The Hon. Stephan Knole

State Planning Minister, Government of South Australia

GPO Box 1533

ADELAIDE SA 5001

Dear Minister Knole

I am a former elected member with an Eastern Suburbs Council and I am well aware of what I consider to be the legalised corruption that goes on in all three levels of government, having seen the Payneham Civic Centre basically stolen from the constituents of Payneham and sold to JP Morgan Chase.

This ended as I warned with JP Morgan Chase leaving the establishment and a disastrous failure.

I am extremely concerned with the fact that 3 of the State Planning Commissioners in South Australia are developers or work for developers, and there are only four in total.

How can this be justified?

This is comparable to the "Ethics" Committees in charge of animal experimentation, where most of the Committee are supporting the terrible atrocities being inflicted on innocent animals. These Committees are always weighted against the poor suffering victims and are just a farce when it comes to being "ethical".

Likewise, the developers and those who work for the developers are obviously outweighing the balance of the State Planning Commission to get the results they want to ruin the life-style and quality of our suburbs which are being decimated by inappropriate development.

I call upon you, as State Planning Minister, to stop this legalised corruption and stop this inappropriate development which is turning our suburbs into concrete jungles, laying the foundations for mental ill-health and violence, already being seen in these immense apartment blocks, where numerous residents are forced to live in close contact with each other.

There is nowhere for animals to have a quality of life and this is creating barking dogs, psychotic cats and killing off the wildlife.

The trees which I worked to save as significant, are being chopped down. The natural vegetation which is essential to the wildlife is being bulldozed and the whole of the suburbs are being destroyed by this appalling infill.

Now the heritage zones, which have been a major part of my work on Council to save them from demolition, are under dire threat of being erased.

This has all got to stop.

I live in a heritage zone and I value my existence and the welfare of my animals and I have no intention of accepting this massive threat to my life-style, without a fight.

Thank you for the opportunity to forward this submission.

Yours faithfully

Christine Pierson
