Subject: \$300 developer fee for tree removal

Feedabck is what this is suing is we really don't value trees. Cost less than a speeding fine.

For developments in Eastern suburbs, that is one night dinner bill for 4 with really good wine.

Our trees are important. The proposals are not commensurate with the value of trees to the environment, to the aesthetic and difference of why SA is a great place to live.

Get your policies right. Trees are important and every propert should have a tree.
