Your Feedback

First Nations of South Australia Aboriginal Corporation are seeking clarification on the following;

How is the Aboriginal Heritage Act integrated and coordinated into the Planning and Design Code? For example; the Native Vegetation Act, Environmental Protection Act and Landscapes Act have policies which guide the assessment process for local council and developers to request information to assess and mitigate risks.

Is there any requirement under the Development and Infrastructure Act for requesting Aboriginal Heritage surveys be undertaken particularly in areas subject to Native Title?

What is potential for decisions under Development and Infrastructure Act to impact on Aboriginal Cultural Heritage sites and ancestral remains. How is this mitigated through the Planning and Design Code?

At what stage does the planning legislation require an Aboriginal heritage survey to be undertaken as part of the development assessment?
