To the Department of Planning Transport and Infrastructure,

Re: The draft code.

After reading the new Planning and Design Code I have concerns on how it will affect my family and I therefore **I oppose it.**

This new planning code will increase the immediate housing density due to increased subdivisions, reduce my privacy due to the height regulations of walls reduced to 1.5 meters which will result in a reduction in the value of my property as well as our security and privacy.

Yours Sincerely,

Vasilios Liapis.
