In relation to the submissions closing on 18/12/2020

I support the submission provided by the City of Unley- including:

1. That ALL of Black Forest be included in the new Suburban zone. There is no point opening the area of Aroha and Lincoln to higher density development when most of it has already been recently redeveloped.
2. The 1.5m cill height does not mitigate overlooking and the 1.7m favoured by Unley is more appropriate.
3. That references to contextual parameters in our Development plan should be maintained and not dismissed in favour of a purely numeric approach.

Kind Regards

Irene Kontos
