Subject: Planning System Review Feedback

[REDACTED] [REDACTED]

Hi there, my name is Sam White and I writing to you today in regards to the current review into the planning system of South Australia. I support changes to the planning system that incorporate sustainable communities and buildings that are more energy efficient. Both in their design/layout and materials (recycled or repurposed), as well as suburbs designed with green spaces and canopy cover that lower average temperatures in the community.

Kind regards,
Sam
