Subject: Increased development Burnside Council
Date: Tuesday, 18 February 2020 2:40:39 PM

As residents in Stonyfell for twenty two years we were attracted to this suburb because of the trees, bird life and low density housing. Over the years I have been shocked and dismayed by the number of trees, some very large, pulled down for large housing development which is detrimental to the environment and our health and wellbeing. Now the State Government wants to significantly increase this practise in the Burnside council area. This contravenes the important research undertaken by scientists regarding climate change. I wonder when government propose to start listening to the expert scientists.

Thanks

Pam
