Subject: Feedback re Linden Park
Date: Thursday, 6 February 2020 3:47:39 PM

To whom it may concern , we are writing to express our opposition to your department"s proposal to transfer our suburb,Linden Park to the proposed General Neighbourhood Zone. Given its existing and long established character the suburb should be considered as a Suburban Neighbourhood Zone. Any one in the least familiar with Linden Park can see that the General proposal with its radical changes to allotment sizes, boundary setbacks ,site frontage widths and streetscaping will totally destroy the existing character that has attracted its rate paying residents,cause serious loss of street trees and private property vegetation and add huge areas of hot spot concrete.to the area. All of the above is anti environment and only going to increase warming and carbon output in a foothill suburb no longer immune to bush fire risk given the recent events. Thanking you for your consideration, Noel Twohig and Ah Bee Twohig
