Subject: I support totally the ten point plan for Urban Trees / Native Vegetation

Thank you for the opportunity to make a submission to the implementation review of the Planning and Design Code.

South Australia cannot afford to not be a best practice state at any time, but especially in a time of extreme climatic stress. This is why I support the Conservation Council's ten point plan.

I am concerned about the impact of both the code and our poor regulations on tree canopy right across Adelaide. You are no doubt familiar with the significant body of work published by the Conservation Council of SA and partner organisations over the last 2 years. Using an evidence-based approach, these reports highlighted how impoverished our laws have become since 2011 when significant exemptions were added to them, despite protests from both the community and experts.

We cannot underestimate the important role that trees play in our daily lives. We need them more than they need us. By doing so you will improve our mental & physical health, clean the air that we breathe, remove carbon dioxide from the atmosphere, help cool our homes and streets, make our city more livable and mitigate the impacts of climate change for our children and grandchildren.

Yours sincerely,
Robert Farnan
South Australia, 5006, Australia
