Hi

I am the deputy chairman of the South Australian Oyster Growers Association and I have only just become aware on this process.

It is a little disappointing given it's potential impact on our industry.

My main issue is with the following bit.

'Letter/email provided to all property owners/  
occupiers within 60 metres of the  
development site; and'

If that applies to any marine development the distance is nowhere near far enough.

We suffer from the 'tragedy of the commons' where we share a common resource.

Increased capacity can affect all growers in a bay.

Notification in the case of marine developments must include all operators in the bay.

Gary Zippel

Deputy chairman

South Australian Oyster Growers
