**Subject:** Proposed planning changes

As a long term resident of SA, I am horrified at the changes that are being proposed by the Planning Commission. To allow developers to take control of our communities, to determine where and how development occurs with no say allowed from councils or individuals whose homes could be overlooked, their ambience destroyed and environment ruined.

You need to scrap the proposed plan changes and bring some common sense to the planning issues.

The government cannot be allowed to abrogate its responsibility and must act to bring some common sense to SA planning rules.
