Dear Planning Review people

I would like to add my strongest support to the below suggestions. These have been gathered from the community of those concerned about the loss of aesthetics and habitat due to the felling of significant trees.

Remove exemptions from existing Regulated / Significant Tree Protections and Native Vegetation Regulations

Bring SA into line with VIC and NSW by changing definition of regulated tree to one that:

Incorporate Vegetation Overlays into the Planning and Design Code, similar to those used in Victoria, to better reflect the expectations of local communities by allowing for the protection of significant urban vegetation

Remove the ability to prune up to 30% of a regulated / significant tree without requiring council approval and implement a system that requires the use of the AS4373 Standard
Increase the use of arborists to assess applications affecting significant trees and allow for streamlined approval process for applications to remove regulated trees

Restore the requirement for the Department of Infrastructure and Transport and the Department of Education to publicly consult and gain planning approval to remove regulated trees

Modify the Urban Tree Canopy Offset Scheme to better reflect the value of trees to the community by:
Increasing fees to represent loss and expense, increasing number to replant.

Introduce the following requirements where permission is granted to remove a protected tree:
The removal of protected trees should not be allowed until all relevant planning and development approvals

Introduce the following requirements where permission is granted to remove a protected tree:

The removal of protected trees should **Introduce the following requirements where permission is granted to remove a protected tree:**
Homeowners and developers must compensate the environment and society financially until they understand the seriousness of the loss they are creating.

The removal of protected trees should not be allowed until all relevant planning and development approvals have been granted

Please, I beg you, use all your influence, for the sake of our children and their children

Bruce Blackwell
