

# PlanSA DAP Reporting and Dashboards for Relevant Authorities

Version 1.0

## About this guide

This guide outlines the decommissioning of Development Assessment Portal (DAP) Reports and how their information can now be accessed through dashboards. It identifies which DAP Reports remain available, which have been decommissioned, and where equivalent information can be found within replacement dashboards or across the broader dashboard suite.

The guide includes a comparison between DAP Reports and dashboards, highlighting information that has been retained, updated, removed, or enhanced, as well as new information now available through dashboards.

In addition, the guide provides instructions on creating and saving frequently used dashboard filters, exporting dashboard data to Microsoft Excel, and navigating dashboards to locate information previously available in DAP Reports.

If you have any questions regarding the content of this guide, please contact the PlanSA Service Desk.

# DAP reports remaining

The following **DAP Reports** are being retained and can be accessed from the **Reports** menu located on the homepage ribbon.

## Councils, Regional Assessment Panels (RAPs) and the State Planning Commission (SPC)

1. Allocated Applications
2. Discontinued Applications
3. ESP Report
4. Power BI Reports (opens a page containing links to available Power BI reports)
5. Practical Experience Report
6. Wastewater Information Report

## Accredited Professionals

1. Accredited Professional Fees
2. Allocated Applications
3. Discontinued Applications
4. Payment Summary
5. Practical Experience Report

## Minister for Planning

1. Allocated Applications
2. Discontinued Applications
3. Wastewater Information Report

## State Planning Commission (Planning Services)

1. Deposited Plans
2. Inconsistent Deposited plans

## Applicants (volume)

1. Payment Summary

# Dashboards replacing decommissioned DAP reports

| DAP Report                                     | Dashboard homepage & side menu                                                                                                                                                                                                                                    |

# Dashboard tools and features

## Export and Filters

### Export to excel

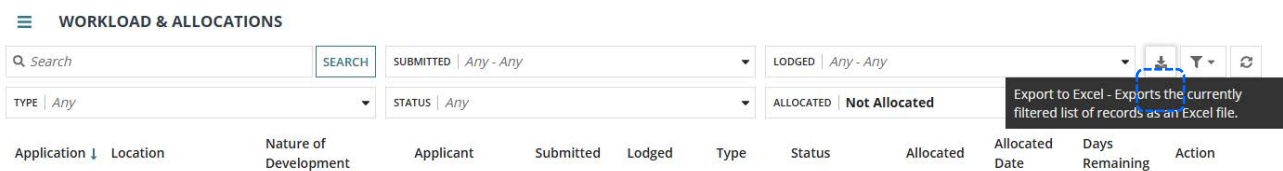

The **Export to excel** option is available in all dashboard views.

All records can be exported to Excel, even when no search criteria or filters have been applied.

### Steps to export records to excel

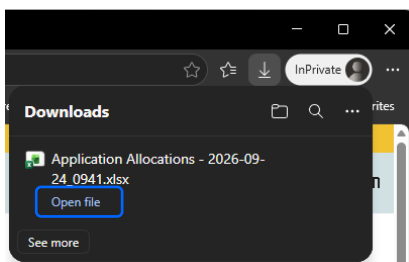

The following is an example of exporting unallocated applications in the **Workload & Allocations** dashboard.

1. Open **Workload & Allocations** from the side-menu.
2. Click on  **Export to excel** icon.

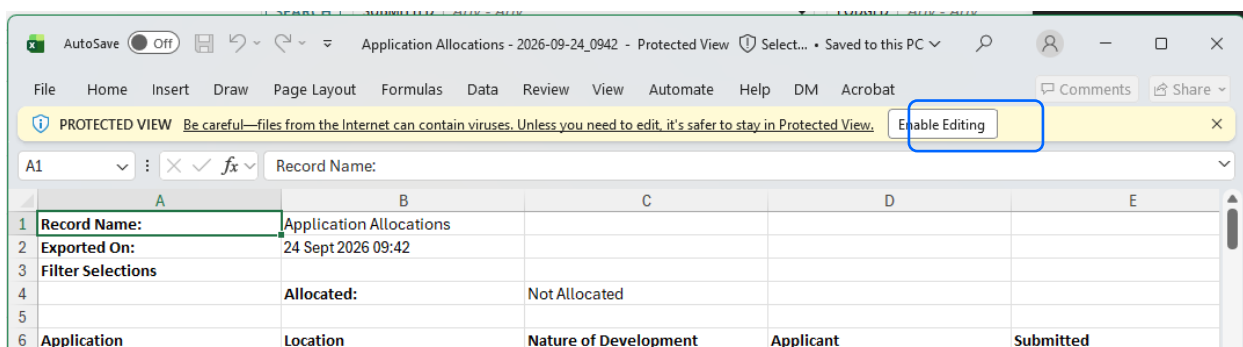

Downloaded files may appear differently depending on the web browser being used. The example below shows how downloads are displayed in Microsoft Edge.

3. Click on [Open file](#) in the **Downloads** message window.

The file opens in Microsoft Excel. Depending on your system security settings, you may need to select **Enable Editing** before you can make changes to the file.

## Setup favourite filters

The **Manage Filter** option is available across all dashboard views.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

### Steps to create personal filter

The following is an example of creating a filter in the **Workload & Allocations** dashboard view.

1. Open **Workload & Allocations** from the side-menu.
2. Filter records by **Allocated** option *Not Allocated*.

The screenshot shows the 'WORKLOAD & ALLOCATIONS' dashboard. The 'ALLOCATED' dropdown menu is open, displaying 'Not Allocated' as the selected filter. The table below shows a single record for application 26002104.

| Application | Location                         | Nature of Development | Applicant            | Submitted  | Lodged | Type | Action   |
|-------------|----------------------------------|-----------------------|----------------------|------------|--------|------|----------|
| 26002104    | 1 LINDA DR<br>ATHELSTONE SA 5076 | Dwelling              | City of Campbelltown | 15/09/2026 | -      | PC   | ALLOCATE |

Only applications that are *not allocated* are displayed.

The screenshot shows the 'WORKLOAD & ALLOCATIONS' dashboard with the 'Not Allocated' filter applied. The table displays two records.

| Application | Location                           | Nature of Development | Applicant      | Submitted  | Lodged     | Type | Status           | Allocated | Allocated Date | Days Remaining | Action   |
|-------------|------------------------------------|-----------------------|----------------|------------|------------|------|------------------|-----------|----------------|----------------|----------|
| 26001655    | 5 JAMES ST<br>CAMPBELLTOWN SA 5074 | Development details   | Test Applicant | 22/07/2026 | 22/07/2026 | PC   | Under Assessment | -         | -              | (29 Days)      | ALLOCATE |
| 26001656    | 1 LINDA DR<br>ATHELSTONE SA 5076   | Dwelling              | Test Applicant | 22/07/2026 | 24/07/2026 | PC   | Under Assessment | -         | -              | (1 Days)       | ALLOCATE |

3. Click on  **Manage Filters** icon and **Save filters as ..** option.

The screenshot shows the 'WORKLOAD & ALLOCATIONS' dashboard. The 'Manage Filters' icon (funnel with a plus sign) is highlighted, and the dropdown menu is open, showing the 'Save filters as ..' option.

The **Save Filters** window opens.

4. Enter a filter name. This field is mandatory and has a maximum character limit of 50. For the purposes of this example, enter **Unallocated applications**.
5. Leave **Set as default**. The **Workload & Allocations** view will automatically show 'all' applications not allocated.

6. Click **SAVE**.

### Save Filters

**Name \***

Unallocated applications24/50

☒ Set as default

Allocated = **Not Allocated**

CANCEL

SAVE

The **Workload & Allocations** dashboard opens with the **Unallocated applications** filter selected and set as the default. A green highlight indicates the default filter.

WORKLOAD & ALLOCATIONS

MY FILTERS **Unallocated applications**

Q Search

SEARCH

SUBMITTED | Any - Any

LOGGED | Any - Any

TYPE | Any

STATUS | Any

ALLOCATED | **Not Allocated**

| Application | Location | Nature of Development | Applicant | Submitted | Lodged | Type | Status | Allocated | Allocated Date | Days Remaining | Action |
|-------------|----------|-----------------------|-----------|-----------|--------|------|--------|-----------|----------------|----------------|--------|
|-------------|----------|-----------------------|-----------|-----------|--------|------|--------|-----------|----------------|----------------|--------|

To view the full filter name, hover over any filter where the label has been truncated due to character length limits.

7. Click on **Unallocated applications** filter to deselect and show all applications. The green text indicates the filter is deselected.

WORKLOAD & ALLOCATIONS

MY FILTERS Unallocated applications

Q Search

SEARCH

SUBMITTED | Any - Any

LOGGED | Any - Any

TYPE | Any

STATUS | Any

ALLOCATED | Any

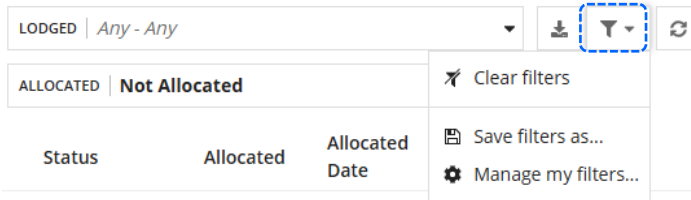

| Application | Location | Nature of Development | Applicant | Submitted | Lodged | Type | Status | Allocated | Allocated Date | Days Remaining | Action |
|-------------|----------|-----------------------|-----------|-----------|--------|------|--------|-----------|----------------|----------------|--------|
|-------------|----------|-----------------------|-----------|-----------|--------|------|--------|-----------|----------------|----------------|--------|

Repeat these steps to create additional filters. There is no limit to the number of filters you can create.

## Manage favourite filters

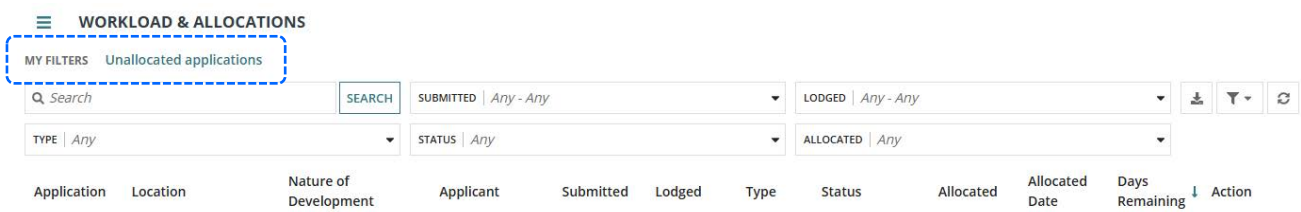

The **Manage Filter** option is available across all dashboard views.

1. Click on  **Manage Filters** icon to view filter management options.

The screenshot shows the top navigation bar of the application. It includes a dropdown menu for 'LODGED | Any - Any', a download icon, a filter icon (highlighted with a blue dashed box), and a refresh icon. Below this, there's a section for 'ALLOCATED | Not Allocated' with a 'Clear filters' button. A table with columns 'Status', 'Allocated', and 'Allocated Date' is partially visible. A dropdown menu is open from the filter icon, showing options: 'Clear filters', 'Save filters as...', and 'Manage my filters...'.

The **Clear Filters** option will remove the active filter selection. The green text indicates the filter is deselected.

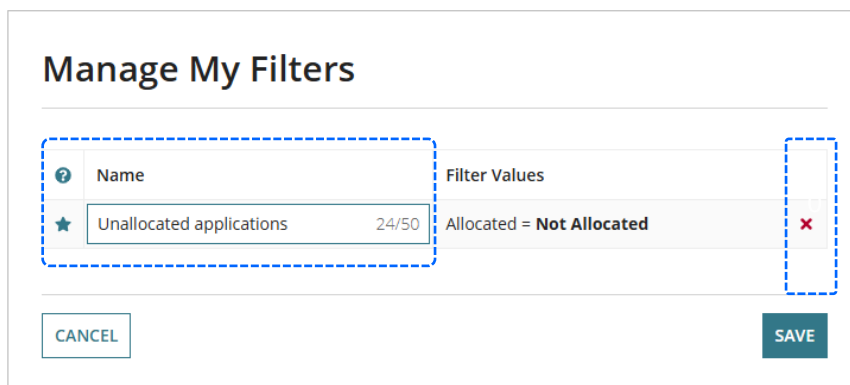

The screenshot shows the 'WORKLOAD & ALLOCATIONS' section. The 'MY FILTERS' tab is highlighted with a blue dashed box. Below the tabs, there's a search bar and several dropdown filters for 'SUBMITTED', 'LODGED', 'TYPE', 'STATUS', and 'ALLOCATED'. A table with various columns like 'Application', 'Location', 'Nature of Development', 'Applicant', 'Submitted', 'Lodged', 'Type', 'Status', 'Allocated', 'Allocated Date', 'Days Remaining', and 'Action' is visible at the bottom.

Select **Manage My Filters** to open the **Manage My Filters** window. From here, you can rename a filter, remove a filter, or set a different default filter.

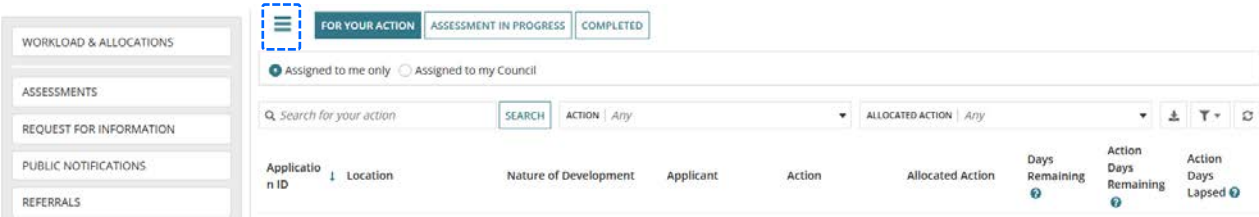

After a filter is created, its position in the list and its filter values cannot be modified. If you need to change the filter values, remove the filter and recreate it with the new values.

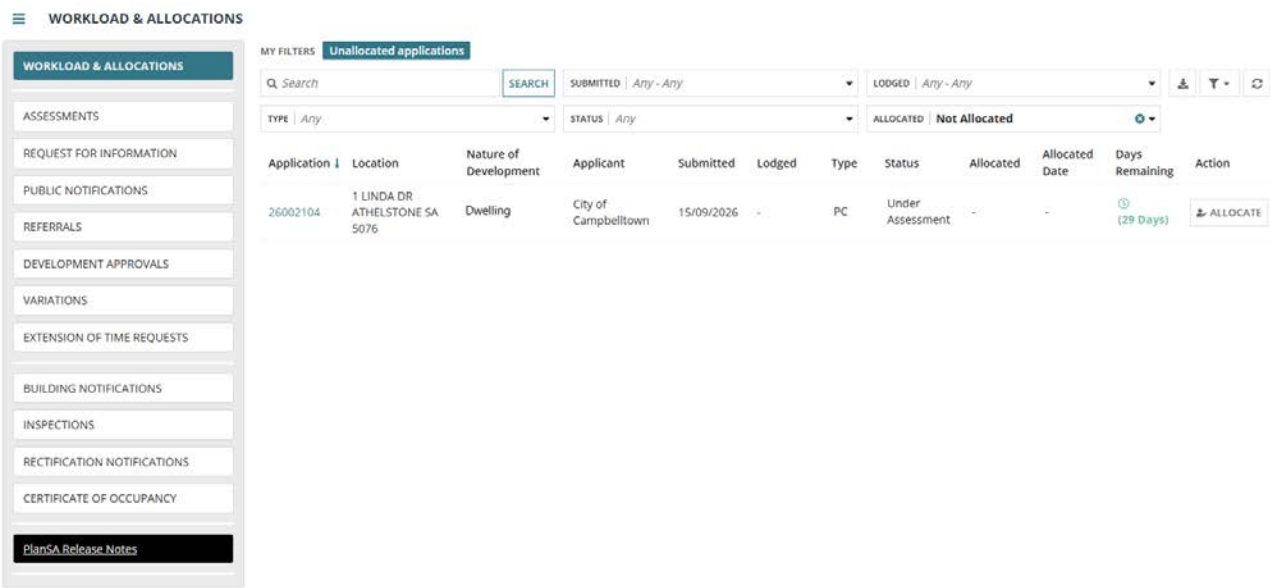

The screenshot shows the 'Manage My Filters' window. It has a title 'Manage My Filters' and a table with two columns: 'Name' and 'Filter Values'. The first row shows a filter named 'Unallocated applications' with the value 'Allocated = Not Allocated'. The filter name is highlighted with a blue dashed box, and the filter value is also highlighted with a blue dashed box. There are 'CANCEL' and 'SAVE' buttons at the bottom.

### Navigating the side menu

Use the **Show/Hide Side Menu**  icon to hide the side menu and maximise the page viewing area.

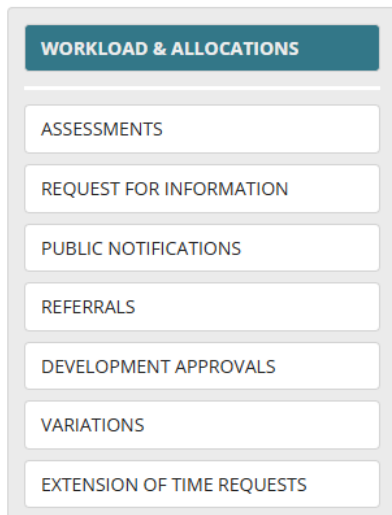

When viewing a dashboard, select the **Show/Hide Side Menu**  icon to open the side menu. From here, you can navigate directly to other dashboards without returning to the homepage.

# Locating DAP report information using dashboards

## Unallocated Applications

**Replaced by:** Workload & Allocations dashboard

The **Workload & Allocations** dashboard available from the homepage side-menu is where you go to view applications allocated or not allocated for in progress consents and development approvals for your organisation. If the current consent is with a different relevant authority these are excluded from the dashboard.

**Note:** At this time the **Workload & Allocations** dashboard is only available to councils and councils in a Regional Assessment Panel (RAP). Until access is expanded to other organisations, it is recommended that users utilise the **Assessment in Progress** dashboard from the homepage to identify both allocated and unallocated applications.

## Instructions

1. From the side-menu select **Workload & Allocations**.

The **Workload & Allocations** dashboard displays applications with an active assessment; includes consent and development approval. For this example, the council belongs to a Regional Assessment Panel (RAP) who will see two additional columns, **Location RA** and **Relevant Authority**.

2. Select from the **Allocated** filter the *Not Allocated* option.
3. Further filter and sort the applications by one or more of the following.
  - a. **Submitted** date or date range.
  - b. **Type** selects specific consent or development approval.
  - c. **Status** selects *awaiting verification* for submitted applications.
  - d. **Lodged** sort to show applications not lodged at the top.

CLOSE SAVE USER ALLOCATION

### 5. Start typing name of the **Allocated Assessor** and selecting from list of matches.

The **Allocated Assessor** field for councils part of the RAP will see all council users where the relevant authority is the RAP, if council is the relevant authority, then only council users are available. Furthermore, if a user is not flagged with access to consents or development approval (via the **Your Organisation** option in the ribbon) then their name will not be returned to the list of allocated assessors.

The selected *allocated assessor* is pinned to the field and enables the **Save User Allocation** button. The **Close** button can be actioned at any time to exit without saving changes.

## 6. Enter a note to the assessor, as required.

| Allocation details                                                                                         |                                                                        |                                           |                            |                                                                    |

## Setup favourite filters

Refer to [Export and Filters](#) instructions.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

## Report and dashboard comparison

**Unallocated Applications**

This report displays the list of applications without an allocated assessor. It displays information related to active consents and development approvals.

Legend: ● No change. In both DAP Classic and DAP ● Not available in DAP dashboard ● New to DAP dashboard

## Days Left in Verification

**Recommendation:** Workload & Allocations dashboard

Each of the dashboards below includes the ability to create a list of applications with consent *awaiting verification* and *in verification* included the number of business days left in verification.

Alternatives

- homepage **Assessment in progress** tab
- side-menu **Assessments** and

## Instructions to identify days left in verification applications

1. From the side menu select **Workload & Allocations**.

The **Workload & Allocations** dashboard displays applications with an active assessment; includes consent and development approval. For this example, the council belongs to a Regional Assessment Panel (RAP) who will see two additional columns **Location RA** and **Relevant Authority**.

| WORKLOAD & ALLOCATIONS |                                      |                       |                          |                                |                                                    |            |              |                 |                  |                  |                |                |          |

2. Filter and sort the applications by one or more of the following.
  - a. **Type** selects specific consent(s), for example PC (planning consent).
  - b. **Status** selects *awaiting verification* and *in verification*.
  - c. **Days Remaining** sort to order oldest first.

The **Workload & Allocations** dashboard shows applications *in verification* in order of **days remaining**.

## Setup favourite filters

Refer to [Export and Filters](#) instructions.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

## Report & Dashboard Comparison

**Days Left in Verification**  
This report lists new application submissions with 5 business days or less (not including today) remaining in the verification stage as well as applications awaiting verification. The report only displays information related to active consents.

## Referral Agency Response Days Left

**Replaced by:** External Referrals dashboard

The **Referrals** menu item is where you can access the **external referrals** dashboard to find distributed referral requests and response days remaining.

Further refined by the referral status by *awaiting further info, distributed, expired, in progress, and pending recall* (for declined requests).

## Instructions to identify referral request response days left

1. From the homepage select **Referrals** from the side-menu.

The **External Referrals** dashboard displays both referrals distributed or received as the relevant authority.

| EXTERNAL REFERRALS   INTERNAL REFERRALS |                                |                       |                     |                                                       |                                             |               |              |            |               |             |                |

## Setup favourite filters

Refer to [Export and Filters](#) instructions.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

## Report & Dashboard Comparison

Referral Agency Response Days Left

This report displays a list of referrals with 5 business days or less (not including today) remaining for response.

No change. In both DAP Classic and DAP

EXTENSION OF TIME REQUESTS

**Replaced by:** External Referrals dashboard

To find referral requests with council as the referral agency and the number of response days remaining, select the council from the **Referral Body** filter.

If the council is not available in the filter, then there are no referral requests.

Further refined by the referral status *awaiting further info*, *distributed*, *expired*, *in progress*, and *pending recall* (for declined requests).

## Instructions to identify referral request response days left

- From the homepage select **Referrals** from the side-menu.

The **External Referrals** dashboard displays both referrals request distributed or received as the relevant authority.

## Public Notification Days left

ASSESSMENTS

REQUEST FOR INFORMATION

**PUBLIC NOTIFICATIONS**

REFERRALS

DEVELOPMENT APPROVALS

VARIATIONS

EXTENSION OF TIME REQUESTS

**Replaced by:** Public Notifications dashboard

Monitoring Public Notifications timeframes can be performed by sorting the **Close Date** column to show earliest to latest. Unlike the **Public Notification Days left** report where days remaining were available.

## Setup favourite filters

Refer to [Export and Filters](#) instructions.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

## Report & Dashboard Comparison

EXTENSION OF TIME REQUESTS

### Recommendation: Workload & Allocations dashboard

The following dashboards display all consents with a pending decision, including the number of days remaining until determination. Unlike the previous DAP report, which showed only consents due to expire within the next five days.

#### Alternatives

- homepage **Assessment in progress** tab
- side-menu **Assessments** and

## Instructions to identify decisions in progress applications

1. From the side-menu select **Workload & Allocations**.

The **Workload & Allocations** dashboard displays applications with an active assessment; includes consent and development approval. For this example, the council belongs to a Regional Assessment Panel (RAP) who will see two additional columns **Location RA** and **Relevant Authority**.

2. Filter and sort the applications by one or more of the following.
  - a. **Type** selects specific consent(s), this example all consents are selected.
  - b. **Status** selects *Under assessment*.
  - c. **Days Remaining** sort to order oldest first.

The **Workload & Allocations** dashboard shows applications with assessments currently in progress and sorted by days remaining.

Replaced by: Internal referrals dashboard

The **Internal Referral** dashboard replaces the **Internal Referral Assigned** report, with it comes new capability including the following.

- Filter requests by the consent **allocated** assessor.
- Filter requests by user **allocated the action**.
- Refine requests by **status**, for example *distributed* or *responded*.

Setup favourite filters

Refer to [Export and Filters](#) instructions.

 It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

VARIATIONS

EXTENSION OF TIME REQUESTS

**Replaced by:** Request for information dashboard

The **Request for Information** dashboard replaces the **Further Information Requests** report. Includes the following additional reporting capability.

- Includes the **Days Remaining**.
- Shows RFI requests initiated by referral bodies and the **Days Remaining** will show clock *paused*.

## Setup favourite filters

Refer to [Export and Filters](#) instructions.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

## Report & Dashboard Comparison

**Further information requests (RFI's)**

This report displays a list of all RFI's issued by the viewing organisation (RAs only see RFI's they issue) - That are not completed (in-Progress, Pending-Review and Expired status).

**Replaced by:** Development Approvals dashboard

The **Development approval** dashboard replaces the **Pending development approvals** report for councils and State Planning Commission (SPC).

The Development approval and alternative dashboards (see below) display all development approvals with a pending decision and the number of days remaining until determination. Unlike the previous DAP report, upcoming development approvals are not included.

### Alternative

- Assessments in progress (homepage)
- Workload & Allocations (side-menu)

## Setup favourite filters

Refer to [Export and Filters](#) instructions.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

## Active Variation

ASSESSMENTS

REQUEST FOR INFORMATION

PUBLIC NOTIFICATIONS

REFERRALS

IMPACT ASSESSED REFERRALS

DEVELOPMENT APPROVALS

**VARIATIONS**

EXTENSION OF TIME REQUESTS

**Replaced by:** Variations dashboard

The **Variations** dashboard replaces the **Active Variation Report**.

Includes applications with a variation request submitted, awaiting further information, awaiting payment and under assessment.

The consent authority and location council will see requests with them as the relevant authority and requests with a different authority.

## Setup favourite filters

Refer to [Export and Filters](#) instructions.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

## Inspection Allocated Applications

**Replaced by:** Inspection Status & Allocations dashboard

The **Inspections** dashboard replaces the **Allocated Applications** DAP Report.

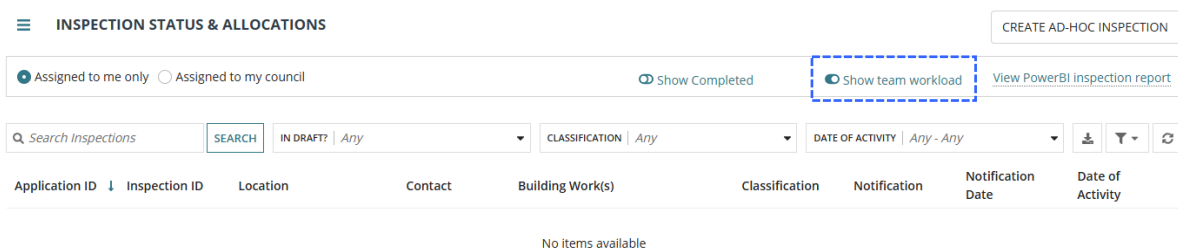

Not applicable to accredited professionals and Minister for Planning.

## Instructions to view inspection allocated applications

1. From the side menu select **Inspections**.

The **Inspection Status & Allocations** dashboard shows with default view assigned to me only.

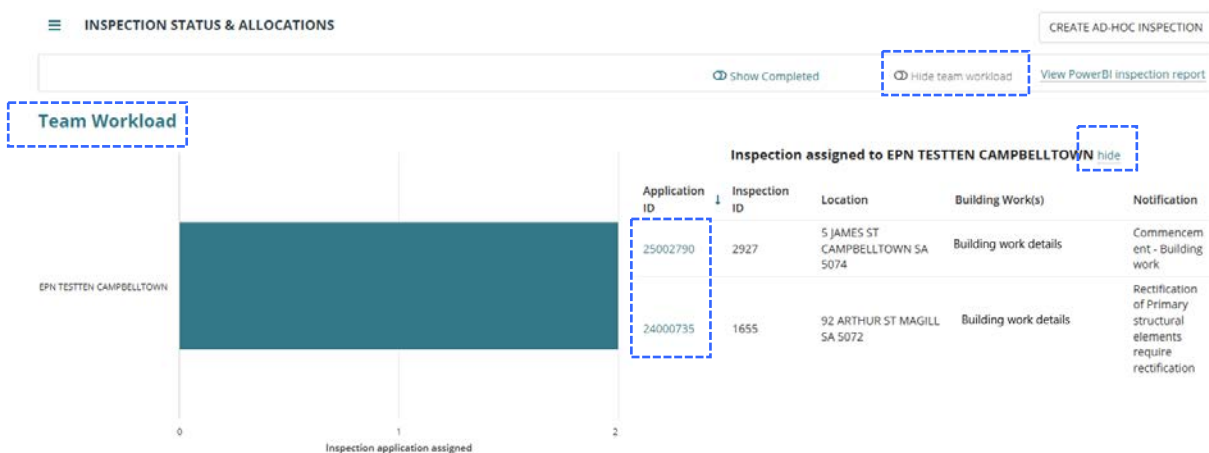

2. Click on link **Show team workload**.

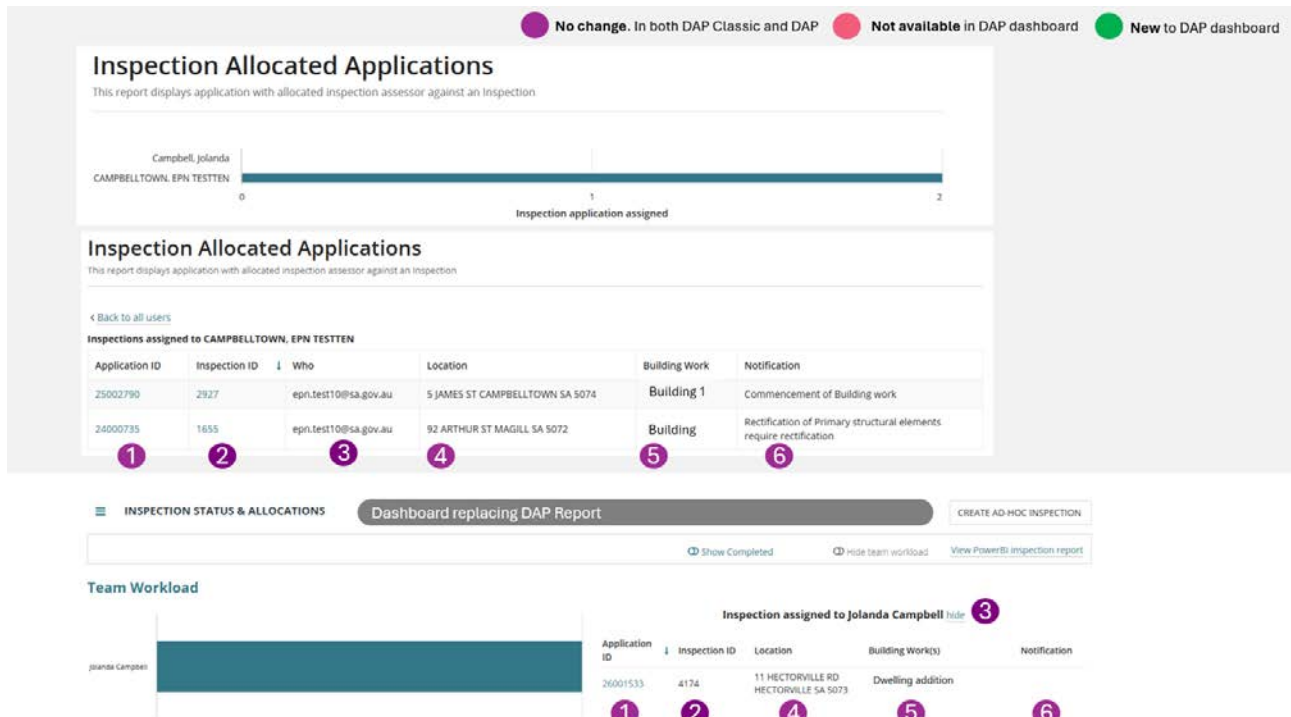

The **Team Workload** graph appears and the link updates to **Hide team workload**.

3. Click on the bar for the applicable user to view a list of allocated inspections.

The list of inspections assigned includes a link to view the application and option to hide the list or use **Hide team workload** to close.

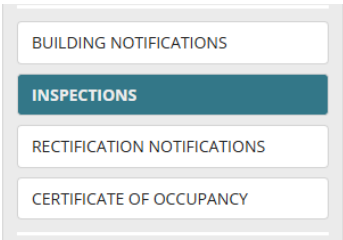

## Report &amp; Dashboard Comparison

Inspection status

**Replaced by:** Inspection Status & Allocations dashboard

The **Inspections** dashboard replaces the **Inspection Status** report.

Not applicable to accredited professionals and Minister for Planning.

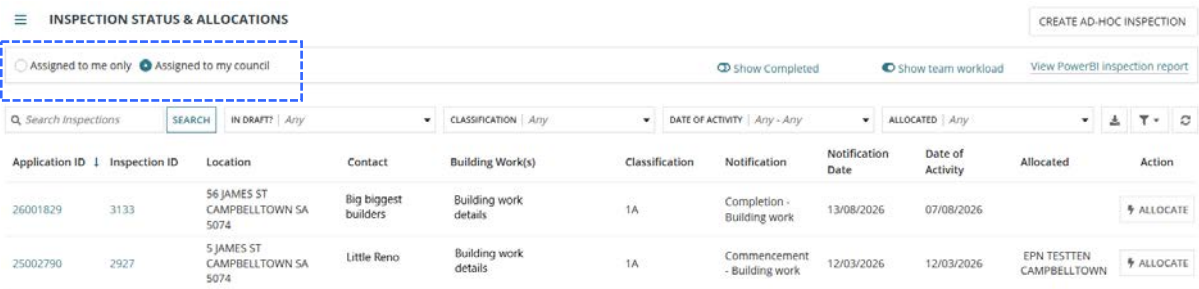

Instructions to identify pending inspections

The dashboard defaults to **Pending Inspections Assigned to Me**, displaying only inspections allocated to you. To view all pending inspections within your organisation, change the view to **Assigned to My Council** (or equivalent).

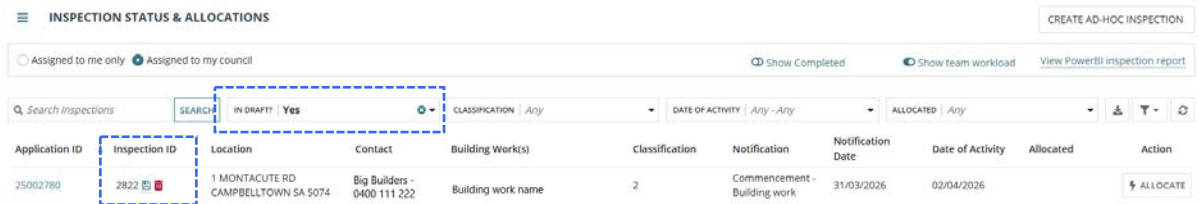

Additional viewing options are available:

- **Show Completed** displays completed inspections.
- **Show Team Workload** displays a graph showing the total number of pending inspections assigned to each team member.

A link is also available to open the **Power BI Inspection Report** for more detailed inspection reporting and analysis.

To view inspections saved as a draft select Yes the **In draft** filter.

An inspection saved as a draft will show two icons   one to resume adding inspection details and the other to delete the draft.

Instructions on allocating an inspection

Within the dashboard is the option to **allocate** or **reallocate** inspections, an alternative to assigning who to inspect from the inspection record.

- 1. Select *Not Allocated* from the **Allocated** filter.

The **Inspection Status & Allocations** shows *pending* unallocated inspections.

- 2. Click on **ALLOCATE**.

## Setup favourite filters

Refer to [Export and Filters](#) instructions.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.

**Replaced by:** Building Notifications and Rectification Notifications dashboards

The information previously available in the DAP Report is now distributed across two dashboards. Alternatively, you can access the equivalent information through the Power BI **Building Inspection Report**.

- **Building Notifications dashboard:** Displays submitted building notifications and notifications that have received a decision outcome (that is, whether an inspection is required).
- **Rectification Notifications dashboard:** Displays submitted rectification notifications and notifications that have received a decision outcome (that is, whether an inspection is required).

Not applicable to accredited professionals and Minister for Planning.

## Setup favourite filters

Refer to [Export and Filters](#) instructions.

It is recommended that you plan the filters you want to create and the order in which they should appear. Once a filter has been created, its display order cannot be changed.
