Subject: Room for trees
Date: Sunday, 12 January 2020 6:05:03 PM

My submission is simple:

All future suburban infill and subdivision of blocks MUST have room for at least one substantial tree to be planted in the front and back yards.

Current subdivisions are not allowing any room for trees. Indeed the back yards are so small that there's barely any room for pot plants let alone a substantial tree to assist in the natural shading of the property. A recent view from Mt Lofty shocked and astounded me in the significant loss of trees over the past 10 years and this should be investigated. It is of vital importance that we maintain our tree numbers. Kindly consider this in what future developments are approved.

Sincerely,

Annette Peters
