Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions     |
|----------------------|----------------|
| Special industry     | None specified |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)  | Exceptions<br>(Column B) |
|---|--------------------------|
| 1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development. | None specified.          |
| 2. Any development involving any of the following (or of any combination of any of the following):  | Except development that: |

### Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions     |
|----------------------|----------------|
| Special industry     | None specified |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)   | Exceptions<br>(Column B)   |

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions     |
|----------------------|----------------|
| Special industry     | None specified |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)  | Exceptions<br>(Column B)   |

Site Dimensions and Land Division

PO 2.1  
Allotments/sites for residential purposes are consistent with the density expressed in any relevant *Minimum Site Area Technical and Numeric Variation* or are of a suitable size and dimension to accommodate the anticipated dwelling form, achieve compatibility with the prevailing development pattern in the locality and provide for appropriate wastewater disposal.

DTS/DPF 2.1  
Development will not result in more than 1 dwelling on an existing allotment  
or  
Allotments/sites for residential purposes accord with the following:

- (a) where allotments/sites are connected to mains sewer or a Community Wastewater Management System site areas (or allotment areas in the case of land division) are not less than the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building):

| <b>Minimum Site Area</b>  |
|---|
| Minimum site area for a detached dwelling is 325 sqm; semi-detached dwelling is 325 sqm |
| Minimum site area for a detached dwelling is 800 sqm; group dwelling is 800 sqm         |

| Minimum site area is 1,200 sqm  |
| Minimum site area is 500 sqm  |
| Minimum site area is 750 sqm  |
| Minimum site area is 800 sqm  |

- or
- (b) where allotments/sites are not connected to mains sewer or an approved common waste water disposal service site areas are not less than the greater of:
    - (i) 1200m<sup>2</sup>
    - (ii) the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building):

| <b>Minimum Site Area</b>  |

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions  |
|----------------------|---|
| Shop                 | Any of the following: <ul style="list-style-type: none"> <li>(a) shop with a gross leasable floor area less than 1000m<sup>2</sup></li> <li>(b) shop that is a restaurant.</li> </ul> |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)  | Exceptions<br>(Column B)   |

In relation to DTS/DPF 3.1, in instances where:

- (c) more than one value is returned in the same field then:
  - (i) for the purpose of DTS/DPF 3.1(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or *Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development
  - (ii) for the purpose of DTS/DPF 3.1(b) refer to the *Minimum Building Height (Levels) Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (d) only one value is returned for DTS/DPF 3.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other
- (e) no value is returned (ie there is a blank field), then:
  - (i) for the purpose of DTS/DPF 3.1(a), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy
  - (ii) for the purpose of DTS/DPF 3.1(b), then there is no minimum building height and DTS/DPF 3.1(b) is met.

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions     |
|----------------------|----------------|
| Special industry     | None specified |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)   | Exceptions<br>(Column B)   |

On the left, a '2 STOREY DWELLING' is shown within an 'ALLOTMENT USED FOR RESIDENTIAL PURPOSES WITHIN A NEIGHBOURHOOD-TYPE ZONE'. To its right is the 'ALLOTMENT BOUNDARY'. From a point 3.0m above the 'NATURAL GROUND LEVEL' at this boundary, a dashed line representing a '45° PLANE MEASURED FROM THE BOUNDARY' extends upwards and to the right, defining the 'BUILDING ENVELOPE' for the 'DEVELOPMENT SITE'. A solid line shows a building within this envelope. A 'PRIMARY ROAD FRONTAGE' with cars is shown to the right of the development site.</p> |  |                         |  |   |  |  |  |   |  |

**Interface Height**

PO 4.2  
Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.

DTS/DPF 4.2  
None are applicable.

**Significant Development Sites**

PO 5.1  
Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m<sup>2</sup> in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

DTS/DPF 5.1  
Development on significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m<sup>2</sup> in area) up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it:

- (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area
- (b) includes more than 15% of dwellings as affordable housing
- or
- (c) includes at least:
  - (i) three of the following:
    - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street
    - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site
    - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind
    - D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments
    - E. a child care centre
 and
  - (ii) three of the following:
    - A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance
    - B. living landscaped vertical surfaces of at least 50m<sup>2</sup> supported by services that ensure ongoing maintenance
    - C. passive heating and cooling design elements including solar shading integrated into the building
    - D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.

PO 5.2  
Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m<sup>2</sup> in area) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.

DTS/DPF 5.2  
Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m<sup>2</sup> in area) that:

- (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF4.1
- (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes)
- (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

## Urban Corridor (Business) Zone

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | A medium rise mixed use zone with a strong focus on employment, which accommodates a diverse range of commercial and light industrial land uses together with compatible medium density residential development oriented towards a primary road corridor (e.g., a State maintained road or a road with similar attributes). |
| DO 2            | Residential development that provides a pleasant amenity for residents without diminishing business opportunities on adjacent land.   |

**Interface Height**

**PO 4.2**  
Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.

**DTS/DPF 4.2**  
None are applicable.

**Significant Development Sites**

**PO 5.1**  
Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m<sup>2</sup> in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

**DTS/DPF 5.1**  
Development on significant development sites up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it:

- (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area
- (b) includes more than 15% of dwellings as affordable housing or
- (c) includes at least:
  - (i) three of the following:
    - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street
    - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site
    - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind
    - D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments;
    - E. a child care centre
  - (ii) three of the following:
    - A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance
    - B. living landscaped vertical surfaces of at least 50m<sup>2</sup> supported by services that ensure ongoing maintenance
    - C. passive heating and cooling design elements including solar shading integrated into the building
    - D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.

**PO 5.2**  
Development on a significant development site (a site with a frontage to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m<sup>2</sup> which may include one or more allotments) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.

**DTS/DPF 5.2**  
Development that:

- (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 4.1
- (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes)
- (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).

**Movement, parking and access**

**PO 6.1**  
Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.

**DTS/DPF 6.1**  
Vehicular access to be provided:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or

|   | (b) where it consolidates or replaces existing crossovers.  |             |                              |

**Table 1 - Accepted Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

| Class of Development   | Accepted Development Classification Criteria  |
|--|---|
| Building alterations<br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> </ul>   | 1. **Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions   |

| Industry<br>Shop     | Light industry<br><br>Any of the following:<br>(a) shop with a gross leasable floor area less than 2000m <sup>2</sup><br>(b) shop located within the Urban Corridor Business Retail Subzone<br>(c) shop that is a restaurant |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)   | Exceptions<br>(Column B)  |

PO 4.1

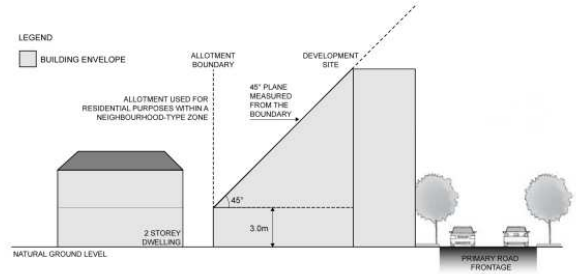

Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.

DTS/DPF 4.1

**Interface Height**

Buildings constructed within a building envelope provided by a:

- (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):

- (b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

**Interface Height**

PO 4.2  
Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.

DTS/DPF 4.2  
None are applicable.

**Significant Development Sites**

PO 5.1  
Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m<sup>2</sup> in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

DTS/DPF 5.1  
Development on significant development sites up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it:

- (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area
- (b) includes more than 15% of dwellings as affordable housing or
- (c) includes at least:
  - (i) three of the following:
    - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street
    - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site
    - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind
    - D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments
    - E. a child care centre.
  - (ii) three of the following:
    - A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance;
    - B. living landscaped vertical surfaces of at least 50m<sup>2</sup> supported by services that ensure ongoing maintenance;
    - C. passive heating and cooling design elements including solar shading integrated into the building;
    - D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.

PO 5.2  
Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m<sup>2</sup> in area, which may include one or more allotments) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.

DTS/DPF 5.2  
Development that:

- (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 4.1
- (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes)
- (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).

**Movement, parking and access**

PO 6.1  
Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.

DTS/DPF 6.1  
Vehicular access to be provided:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or
- (b) where it consolidates or replaces existing crossovers.

**Table 1 - Accepted Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

| Class of Development   | Accepted Development Classification Criteria   |

Building height - does not exceed 5m</li> <li>8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11m unless:</li> </ol> |

- (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street):
- (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment
11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
12. The carport is located so that vehicle access:
- (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
  - (b) is not obtained from a State maintained road, and will use a driveway that:
    - (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing;
    - (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
    - (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
    - (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
    - (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site
13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour
14. Does not involve the clearance of native vegetation.

Outbuilding  
 Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*.
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system.
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary.
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads).
6. Total floor area - does not exceed 40m<sup>2</sup>.
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end).
8. Building height - does not exceed 5m.
9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent.
10. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%.
11. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure.
12. If the outbuilding is a garage, it is located so that vehicle access:
  - (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
  - (b) is not obtained from a State maintained road, and will use a driveway that:
    - (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing;

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions   |
|----------------------|--|
| Industry<br>Shop     | Light industry<br><br>Any of the following: <ul style="list-style-type: none"> <li>(a) shop with a gross leasable floor area less than or equal to 1000m<sup>2</sup></li> <li>(b) shop within the Urban Corridor Living Retail Subzone</li> <li>(c) shop that is a Restaurant</li> </ul> |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

In relation to DTS/DPF 3.1, in instances where:

- (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer* or *Maximum Building Height (Metres) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other
- (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.

PO 3.2  
Buildings designed to achieve optimal height and floor space yields, and maintain traditional main street form.

DTS/DPF 3.2  
New development is not less than the following building height:

| Minimum Building Height (Levels)    |
|-------------------------------------|
| Minimum building height is 2 levels |
| Minimum building height is 3 levels |

In relation to DTS/DPF 3.2, in instances where:

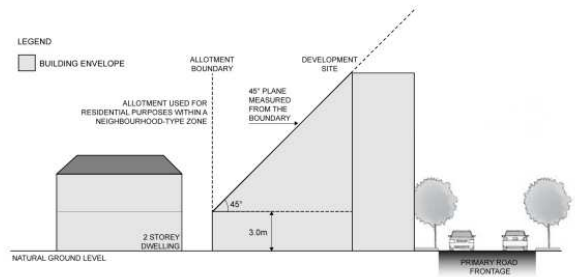

- (a) more than one value is returned in the same field, refer to the *Minimum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (b) no value is returned (i.e. there is a blank field), then there is no minimum building height and DTS/DPF 3.2 is met.

Interface Height

PO 4.1  
Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.

DTS/DPF 4.1  
**Interface Height**  
Buildings constructed within a building envelope provided by a:

- (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):

- (b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

**Interface Height**

for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

PO 4.2  
Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.

DTS/DPF 4.2  
None are applicable.

Significant Development Sites

PO 5.1  
Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m<sup>2</sup> in area, which may include one or more allotments) to achieve increased development yield, provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

DTS/DPF 5.1  
Development on significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m<sup>2</sup> in area, which may include one or more allotments) up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it:

- (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area
- (b) includes more than 15% of dwellings as affordable housing or
- (c) includes at least:
  - (i) three of the following:
    - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street
    - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site
    - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind
    - D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments;
    - E. a child care centre.

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions     |
|----------------------|----------------|
| Industry             | Light industry |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development | Exceptions |
|----------------------|------------|
|----------------------|------------|

| (Column A)  | (Column B)   |
|---|--|
| 1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.   | None specified.  |
| 2. Any kind of development where the site of the development is <b>not</b> adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.  | Except any of the following: <ol style="list-style-type: none"> <li>1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)</li> <li>2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).</li> </ol>   |
| 3. Any development involving any of the following (or of any combination of any of the following): <ol style="list-style-type: none"> <li>(a) advertisement</li> <li>(b) dwelling</li> <li>(c) office</li> <li>(d) residential flat building</li> <li>(e) shop.</li> </ol>  | Except development that: <ol style="list-style-type: none"> <li>1. exceeds the maximum building height specified in Urban Corridor (Main Street) DTS/DPF 3.1 or</li> <li>2. does not satisfy Urban Corridor (Main Street) DTS/DPF 4.1 or</li> <li>3. involves the construction of a building of 4 or more building levels and the site of the development is:                             <ol style="list-style-type: none"> <li>(a) adjacent land to a neighbourhood-type zone and</li> <li>(b) adjoins an allotment containing an existing low-rise building used for residential purposes.</li> </ol> </li> </ol> |
| 4. Any development involving any of the following (or of any combination of any of the following): <ol style="list-style-type: none"> <li>(a) air handling unit, air conditioning system or exhaust fan</li> <li>(b) carport</li> <li>(c) deck</li> <li>(d) fence</li> <li>(e) internal building works</li> <li>(f) land division</li> <li>(g) outbuilding</li> <li>(h) pergola</li> <li>(i) private bushfire shelter</li> <li>(j) replacement building</li> <li>(k) retaining wall</li> <li>(l) shade sail</li> <li>(m) solar photovoltaic panels (roof mounted)</li> <li>(n) swimming pool or spa pool and associated swimming pool safety features</li> <li>(o) tree damaging activity</li> <li>(p) verandah</li> <li>(q) water tank.</li> </ol> | None specified.  |
| 5. Demolition.  | Except any of the following: <ol style="list-style-type: none"> <li>1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)</li> <li>2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).</li> </ol>   |
| 6. Railway line.  | Except where located outside of a rail corridor or rail reserve.   |

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | <p>A mixed use area that:</p> <ul style="list-style-type: none"> <li>(a) provides a flexible policy framework for the redevelopment of urban areas in close proximity to high frequency public transport corridors or adjacent primary road corridors that have the potential to become activity generators</li> <li>(b) provides for the high-quality design and integration of buildings and public realm in mixed use areas with walkable urban form, excellent provision for walking and cycling and active street frontages that encourage social interaction, positively contribute to public safety and vibrancy and promote active movement and public transport use</li> <li>(c) provides a concentration of mixed use activity close to community focal points, such as a high frequency fixed transit stop, activity centre or high quality open space</li> <li>(d) provides adaptable and flexible buildings that can accommodate changes in land use and respond to changing economic and social conditions and advances in technology</li> <li>(e) transitions to a reduced scale and intensity at the zone boundary to maintain the amenity of residential properties located within adjoining zones.</li> </ul> |

**Interface Height**

Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

PO 3.2  
Development that manages the interface with a low-rise neighbourhood-type zone by incorporating less dense, low-rise residential land uses at the interface, and avoiding land uses or intensity of land uses that adversely affect residential amenity.

DTS/DPF 3.2  
None are applicable.

Site Dimensions and Land Division

PO 4.1  
Where appropriate, a street grid pattern is provided in mixed use areas to maintain clear sightlines, improve public safety and legibility within the public realm, and ensure walkability and connectivity are maximised.

DTS/DPF 4.1  
None are applicable.

Movement, parking and access

PO 5.1  
Where practicable, buildings provide vehicle access via a side street or rear lane access way that is designed to:

- (a) provide space between buildings that reduces building mass and creates a more visually diverse public realm
- (b) minimises conflicts with pedestrians and cyclists
- (c) achieve active frontages at a lower intensity than the primary street frontage.

DTS/DPF 5.1  
Vehicular access to be provided:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or
- (b) where it consolidates or replaces existing crossovers.

Concept Plans

PO 6.1  
Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code.

DTS/DPF 6.1  
The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:

**Table 1 - Accepted Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria
