**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions     |
|----------------------|----------------|
| None specified       | None specified |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

- (d) in the case of a garage or carport, the garage or carport:
  - (i) is set back at least 5.5m from the boundary of the primary street
  - (ii) when facing a primary street or secondary street, has a total door / opening not exceeding:
    - A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser
    - B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width
- (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  - (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and
  - (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent

12. If clad in sheet metal is pre-colour treated or painted in a non-reflective colour.

13. Does not involve-
  - (a) excavation exceeding a vertical height of 1 metre; or
  - (b) filling exceeding a vertical height of 1 metre,

and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2 metres.

14. Does not involve the clearance of native vegetation.
15. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
16. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

#### Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions     |
|----------------------|----------------|
| None specified       | None specified |

#### Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

##### Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development (Column A)   | Exceptions (Column B)   |
|---|---|
| 1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.   | None specified.   |

Built Form and Character

PO 3.1  
Development includes distinctive building, landscape and streetscape design to achieve high visual and environmental amenity particularly along arterial roads, zone boundaries and public open spaces.

DTS/DPF 3.1  
None are applicable.

PO 3.2  
Building facades facing a boundary of a zone primarily intended to accommodate sensitive receivers, a public road, or public open space incorporate design elements to add visual interest by considering the following:

- (a) using a variety of building finishes
- (b) avoiding elevations that consist solely of metal cladding
- (c) using materials with a low reflectivity
- (d) using techniques to add visual interest and reduce large expanses of blank walls including modulation and incorporation of offices and showrooms along elevations visible to a public road.

DTS/DPF 3.2  
None are applicable.

PO 3.3  
Buildings are set back from the primary street boundary to contribute to a consistent streetscape.

DTS/DPF 3.3  
Buildings setback from the primary street boundary in accordance with the following table:

| Development Context  | Minimum setback  |
|--|--|
| There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building.  | The average setback of the existing buildings.   |
| There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site. | The setback of the existing building.  |
| There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site.     | <ul style="list-style-type: none"> <li>(a) Where the existing building shares the same primary street frontage – the setback of the existing building</li> <li>(b) Where the existing building has a different primary street frontage:                             <ul style="list-style-type: none"> <li>(i) 8m or more for proposed buildings up to 6m high</li> <li>(ii) not less than 10m for proposed buildings greater than 6m high.</li> </ul> </li> </ul> |
| There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building.   | <ul style="list-style-type: none"> <li>(a) 8m or more for proposed buildings up to 6m high</li> <li>(b) not less than 10m for proposed buildings greater than 6m high.</li> </ul>  |

For the purposes of **DTS/DPF 3.3:**

- (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback
- (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table

PO 3.4  
Buildings are set back from secondary street boundaries to accommodate the provision of landscaping between buildings and the road to enhance the appearance of land and buildings when viewed from the street.

DTS/DPF 3.4  
Building walls are set back 4m or more from a secondary street boundary.

PO 3.5  
Buildings are sited to accommodate vehicle access to the rear of a site for deliveries, maintenance and emergency purposes.

DTS/DPF 3.5  
Building walls are set back 3m or more from at least one side boundary, unless an alternative means for vehicular access to the rear of the site is available.

Interface Height

PO 4.1

DTS/DPF 4.1

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood-type zone.

Buildings are constructed within a building envelope provided by a 45 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary or where this boundary is the street boundary):

PO 4.2

Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.

DTS/DPF 4.2

Buildings on sites with a southern boundary adjoining an allotment used for residential purposes within a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram (except where this boundary is a street boundary):

PO 4.3

Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.

DTS/DPF 4.3

None are applicable.

Landscaping

PO 5.1

Landscaping is provided along public roads and thoroughfares and zone boundaries to enhance the visual appearance of development and soften the impact of large buildings when viewed from public spaces and adjacent land outside the zone.

DTS/DPF 5.1

Other than to accommodate a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land, a landscaped area is provided within the development site (excluding any land required for road widening purposes):

- (a) where a building is set back less than 3m from the street boundary - within the area remaining between a relevant building and the street boundary or
- (b) in accordance with the following:

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

| Class of Development   | Accepted Development Classification Criteria   |

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from 0058

notification. The table also identifies any exemptions to the placement of notices when notification is required.

### Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)  | Exceptions<br>(Column B)  |
|---|---|
| 1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.   | None specified.   |
| 2. Any development involving any of the following (or of any combination of any of the following):<br>(a) advertisement<br>(b) telecommunications facility<br>(c) temporary public service depot.   | Except development that does not satisfy any of the following:<br><br>1. | 4. Any development involving any of the following (or of any combination of any of the following):<br>(a) air handling unit, air conditioning system or exhaust fan<br>(b) carport<br>(c) deck<br>(d) fence<br>(e) internal building works<br>(f) land division<br>(g) outbuilding<br>(h) pergola<br>(i) private bushfire shelter<br>(j) replacement building<br>(k) retaining wall<br>(l) shade sail<br>(m) solar photovoltaic panels (roof mounted)<br>(n) swimming pool or spa pool and associated swimming pool safety features<br>(o) temporary accommodation in an area affected by bushfire<br>(p) tree damaging activity<br>(q) verandah<br>(r) water tank. | None specified.   |
| 5. Building for the purposes of railway activities.   | None specified.   |
| 6. Demolition.  | Except any of the following:<br><br>1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)<br>2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building). |
| 7. Railway line.  | Except where located outside of a rail corridor or rail reserve.  |
| 8. Shop.  | Except:   |

Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | A range of major logistics, manufacturing, high technology and research land uses generating wealth and employment for the state that takes advantage of road, rail and ports infrastructure together with compatible business activities that support an expanding workforce.  |
| DO 2            | Co-location of the management of Adelaide's waste, resource recovery and related processing and industrial activities to provide operational efficiencies and the economic provision of infrastructure, and provision of land for stormwater management and enhancement of tidal flow and habitat function of Magazine Creek, Range wetlands, samphire and mangroves. |

- (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation* layer or *Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other
- (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.

PO 3.2

Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.

DTS/DPF 3.2

**Interface Height**

Buildings constructed within a building envelope provided by a:

- (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):

- (b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

**Table 1 - Accepted Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

| Class of Development   | Accepted Development Classification Criteria  |

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)   | Exceptions<br>(Column B)  |

- (i) for the purpose of DTS/DPF 3.1(a)(i), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation* layer or *Maximum Building Height (Levels) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (ii) for the purpose of DTS/DPF 3.1(b) refer to the *Minimum Building Height (Levels) Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (d) only one value is returned for DTS/DPF 3.1(a)(i), (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other
- (e) no value is returned for DTS/DPF 3.1(b), (ie there is a blank field), then there is no minimum building height and DTS/DPF 3.1(b) is met.

PO 3.2

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood-type zone.

DTS/DPF 3.2

**Interface Height**

Buildings constructed within a building envelope provided by a:

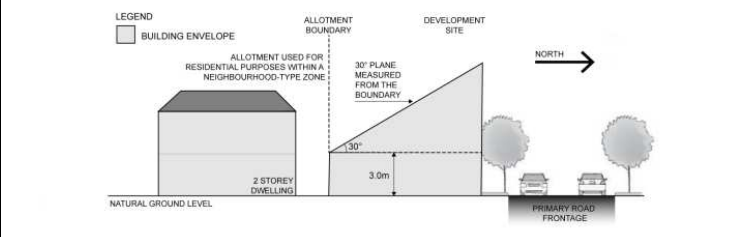

- (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):

- (b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions     |
|----------------------|----------------|
| Special industry     | None specified |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)  | Exceptions<br>(Column B)   |

## Suburban Business Zone

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | A business and innovation precinct that includes a range of emerging businesses which have low level off-site impacts. Residential development within the area is subordinate to employment uses and generally includes medium-density housing designed to complement and not prejudice the operation of existing businesses. |
| DO 2            | A zone characterised by low-rise buildings with additional height in well serviced and accessible locations.  |

(b) in all other cases (ie there is a blank field for both values):

- (i) 2 building levels or 9m where the development is located adjoining a different zone that primarily envisages residential development
- (ii) 3 building levels or 12m in all other cases.

In relation to DTS/DPF 3.1, in instances where:

(c) more than one value is returned in the same field:

- (i) for the purpose of DTS/DPF 3.1(a), refer to the Maximum Building Height (Metres) Technical and Numeric Variation layer or Maximum Building Height (Levels) Technical and Numeric Variation layer in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (ii) only one value is returned for DTS/DPF 3.1(a), (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.

**PO 3.2**

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood-type zone.

**DTS/DPF 3.2**

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary, or where this boundary is the street boundary):

The diagram shows a cross-section of a residential allotment. On the left is a '2 STOREY DWELLING'. To its right is the 'ALLOTMENT BOUNDARY'. A dashed line representing a '45° PLANE MEASURED FROM THE BOUNDARY' starts at a height of '3.0m' above the 'NATURAL GROUND LEVEL' and extends diagonally to the right. The area between this plane and the ground is shaded as the 'BUILDING ENVELOPE'. To the right of the boundary is the 'DEVELOPMENT SITE'. At the bottom right, a 'PRIMARY ROAD FRONTAGE' is shown with trees and cars.

**PO 3.3**

Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.

**DTS/DPF 3.3**

Buildings on sites with a southern boundary adjoining an allotment used for residential purposes within a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram (except where this boundary is a street boundary):

**PO 3.4**  
Buildings are set back from primary street boundaries to contribute to a consistent streetscape.

**DTS/DPF 3.4**  
Buildings setback from the primary street boundary in accordance with the following table:

| Development Context  | Minimum setback  |
|--|--|
| There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building.  | The average setback of the existing buildings.   |
| There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site. | The setback of the existing building.  |
| There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site.     | (a) Where the existing building shares the same primary street frontage - the setback of the existing building<br>(b) Where the existing building has a different primary street frontage - 6m |
| There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building.   | 6m   |

For the purposes of **DTS/DPF 3.4:**

- (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback
- (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table

**PO 3.5**  
Buildings are set back from secondary street boundaries (other than rear laneways) to contribute to a consistent streetscape.

**DTS/DPF 3.5**  
Building walls are set back from the secondary street frontage:

- (a) the average of any existing buildings on adjoining sites having frontage to the same street  
or
- (b) not less than 900mm where no building exists on an adjoining site.

**PO 3.6**  
Buildings are set back from side boundaries to maintain adequate separation and ventilation.

**DTS/DPF 3.6**  
Other than walls located on a side boundary, building walls are set back at least 900mm from side boundaries.

**PO 3.7**  
Buildings are set back from rear boundaries to minimise adverse impacts on adjoining land uses.

**DTS/DPF 3.7**  
Building walls are set back from the rear boundary at least 3m.

**PO 3.8**  
Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.

**DTS/DPF 3.8**  
None are applicable.

Land Division

**PO 4.1**  
Land division and / or site amalgamation create allotments that vary in size and are suitable for a variety of residential and commercial activities and improve the level of development

**DTS/DPF 4.1**  
None are applicable.

**Outbuilding**

Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*.
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system.
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary.
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads).
6. Total floor area - does not exceed 40m<sup>2</sup>.
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end).
8. Building height - does not exceed 5m.
9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11.5m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent.
10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure.
11. If the outbuilding is a garage - door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
12. If the outbuilding is a garage, it is located so that vehicle access:
  - (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
  - (b) is not obtained from a State Maintained Road, and will use a driveway that:
    - (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing;
    - (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
    - (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
    - (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
    - (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site
13. If clad in sheet metal is pre-colour treated or painted in a non-reflective colour.
14. Does not involve-
  - (a) excavation exceeding a vertical height of 1 metre; or
  - (b) filling exceeding a vertical height of 1 metre,

and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2 metres.

15. Does not involve the clearance of native vegetation.
16. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
17. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions  |
|----------------------|---|
| Shop                 | Any of the following:<br><br>(a) shop with a gross leasable floor area less than 1000m <sup>2</sup><br>(b) shop that is a restaurant. |
| Special industry     | None specified  |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development | Exceptions |

PO 3.3  
 Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.

DTS/DPF 3.3  
 Buildings on sites with a southern boundary adjoining an allotment used for residential purposes in a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram (except where this boundary is a street boundary):

PO 3.4  
 Buildings with no setbacks from road boundaries achieve a continuity of street façade to the main street, but with sections of building set back to create outdoor dining areas, visually interesting building entrances and intimate, active spaces.

DTS/DPF 3.4  
 None are applicable.

PO 3.5  
 Buildings with no setback from side boundaries achieve a continuity of street façade to the main street.

DTS/DPF 3.5  
 Except where contrary to DTS/DPF 3.2 or 3.3, building walls located on the site's side boundaries, with the front wall set back in line with neighbouring buildings.

PO 3.6  
 Buildings that are set back from rear boundaries (other than street boundaries) minimise impacts on neighbouring properties, including access to natural light and ventilation.

DTS/DPF 3.6  
 Buildings are set back a minimum 3 metres from rear boundaries where the subject land directly abuts an allotment of a different zone, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 3.7  
 Buildings are set back from rear access ways to provide adequate manoeuvrability for vehicles.

DTS/DPF 3.7  
 Buildings are set back from the rear access way have:  
 (a) no requirement where the access way is 6.5m or more wide  
 or  
 (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

PO 3.8  
 Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.

DTS/DPF 3.8  
 None are applicable.

Traffic, parking and access

PO 4.1  
 Development minimises the need for vehicle crossovers on the main street to reduce conflicts with pedestrians and avoid disruption to the continuity of built form.

DTS/DPF 4.1  
 None are applicable.

PO 4.2

DTS/DPF 4.2

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions     |
|----------------------|----------------|
| Special industry     | None specified |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)  | Exceptions<br>(Column B)   |
|---|--|
| 1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.   | None specified.  |
| 2. Any kind of development where the site of the development is <b>not</b> adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.  | Except any of the following: <ol style="list-style-type: none"> <li>1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)</li> <li>2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).</li> </ol> |
| 3. Any development involving any of the following (or of any combination of any of the following): <ol style="list-style-type: none"> <li>(a) advertisement</li> <li>(b) child care facility</li> <li>(c) cinema</li> <li>(d) community facility</li> <li>(e) consulting room</li> <li>(f) dwelling located above a non-residential building level</li> <li>(g) indoor recreation facility</li> <li>(h) library</li> <li>(i) office</li> <li>(j) place of worship</li> <li>(k) shop</li> <li>(l) temporary public service depot</li> <li>(m) tourist accommodation.</li> </ol>                            | Except development that exceeds the maximum building height specified in Suburban Main Street Zone DTS/DPF 3.1 or does not satisfy any of the following: <ol style="list-style-type: none"> <li>1. Ancillary Buildings and Structures

PO 11.1  
Residential ancillary buildings are sited and designed to not detract from the streetscape or appearance of primary residential buildings on the site or neighbouring properties.

DTS/DPF 11.1

Ancillary buildings:

- (a) are ancillary to a dwelling erected on the same site
- (b) have a floor area not exceeding 60m<sup>2</sup>
- (c) are not constructed, added to or altered so that any part is situated:
  - (i) in front of any part of the building line of the dwelling to which it is ancillary or
  - (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
- (d) in the case of a garage or carport, the garage or carport:
  - (i) is set back at least 5.5m from the boundary of the primary street
  - (ii) when facing a primary street or secondary street, has a total door / opening not exceeding:
    - A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser
    - B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width
- (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless
  - (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and
  - (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary
- (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure
- (h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)
- (i) have a roof height where no part of the roof is more than 5m above the natural ground level
- (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour
- (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:
  - (i) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |
| 150-200  | 15%                        |
| 201-450  | 20%                        |
| >450   | 25%                        |

- (ii) the amount of existing soft landscaping prior to the development occurring.

PO 11.2  
Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

DTS/DPF 11.2

Ancillary buildings and structures do not result in:

- (a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space
- (b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas

PO 11.3  
Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.

DTS/DPF 11.3

Non-residential ancillary buildings and structures:

- (a) are ancillary and subordinate to an existing non-residential use on the same site
- (b) have a floor area not exceeding the following:

| Allotment size     | Floor area       |
|--------------------|------------------|
| ≤500m <sup>2</sup> | 60m <sup>2</sup> |
| >500m <sup>2</sup> | 80m <sup>2</sup> |

- (c) are not constructed, added to or altered so that any part is situated:
  - (i) in front of any part of the building line of the main building to which it is ancillary  
or
  - (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
- (d) in the case of a garage or carport, the garage or carport:
  - (i) is set back at least 5.5m from the boundary of the primary street
- (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  - (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary
  - (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary
- (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure
- (h) have a wall height (or post height) not exceeding 3m (and not including a gable end)
- (i) have a roof height where no part of the roof is more than 5m above the natural ground level
- (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions   |
|----------------------|--|
| Shop                 | Shop with a gross leasable floor area less than 1000m <sup>2</sup> |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)  | Exceptions<br>(Column B)   |

**Table 1 - Accepted Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions  |
|----------------------|---|
| Industry             | Any of the following:<br><br>(a) Light industry<br>(b) Winery development in the Winery Experience Subzone.                           |
| Shop                 | Any of the following:<br><br>(a) shop with a gross leasable floor area less than 1000m <sup>2</sup><br>(b) shop that is a restaurant. |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)   | Exceptions<br>(Column B)   |
