| <p>Water tank (underground)<br/>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Ramsar Wetlands Overlay</li> </ul>  | <ol style="list-style-type: none"> <li>1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>2. The tank (including any associated pump) is located wholly below the level of the ground</li> <li>3. Does not involve the clearance of native vegetation</li> <li>4. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay</li> <li>5. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.</li> </ol>   |

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

| Class of Development  | Deemed-to-Satisfy Development Classification Criteria |  |   |  |
|---|---|--|---|--|
|   | Zone  | General Development Policies   | Subzone<br>(applies only in the area affected by the Subzone) | Overlay<br>(applies only in the area affected by the Overlay)  |

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

| Class of Development | Applicable Policies |   |   |   |
|----------------------|---------------------|---|---|---|
|                      | Zone                | General Development Policies  | Subzone<br>(applies only in the area affected by the Subzone) | Overlay<br>(applies only in the area affected by the Overlay)   |

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions   |
|----------------------|--|
| Industry             | Light industry   |
| Shop                 | Any of the following:<br><br>(a) shop located in the Main Street Subzone<br>(b) shop located in the Urban Neighbourhood Retail Subzone<br>(c) shop with a gross leasable floor area less than 2000m <sup>2</sup><br>(d) shop that is a restaurant. |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)   | Exceptions<br>(Column B)   |
|--|--|
| 1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.  | None specified.  |
| 2. Any kind of development where the site of the development is <b>not</b> adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.   | Except any of the following: <ol style="list-style-type: none"> <li>1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)</li> <li>2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).</li> </ol> |
| 3. Any development involving any of the following (or of any combination of any of the following): <ol style="list-style-type: none"> <li>(a) advertisement</li> <li>(b) child care facility</li> <li>(c) dwelling</li> <li>(d) dwelling addition</li> <li>(e) residential flat building</li> <li>(f) retirement facility</li> <li>(g) student accommodation</li> <li>(h) supported accommodation</li> <li>(i) tourist accommodation.</li> </ol>   | Except development that exceeds the maximum building height specified in Urban Neighbourhood DTS/DPF 2.2 or does not satisfy Urban Neighbourhood DTS/DPF 3.1.  |
| 4. Any development involving any of the following (or of any combination of any of the following): <ol style="list-style-type: none"> <li>(a) consulting room</li> <li>(b) office</li> <li>(c) shop.</li> </ol>  | Except development that exceeds the maximum building height specified in Urban Neighbourhood DTS/DPF 2.2 or does not satisfy any of the following: <ol style="list-style-type: none"> <li>1. Urban Neighbourhood DTS/DPF 1.6</li> <li>2. Urban Neighbourhood DTS/DPF 3.1.</li> </ol>   |
| 5. Any development involving any of the following (or of any combination of any of the following): <ol style="list-style-type: none"> <li>(a) air handling unit, air conditioning system or exhaust fan</li> <li>(b) carport</li> <li>(c) deck</li> <li>(d) fence</li> <li>(e) internal building works</li> <li>(f) land division</li> <li>(g) outbuilding</li> <li>(h) pergola</li> <li>(i) private bushfire shelter</li> <li>(j) replacement building</li> <li>(k) retaining wall</li> <li>(l) shade sail</li> <li>(m) solar photovoltaic panels (roof mounted)</li> <li>(n) swimming pool or spa pool and associated swimming pool safety features</li> <li>(o) temporary accommodation in an area affected by bushfire</li> <li>(p) tree damaging activity</li> <li>(q) verandah</li> <li>(r) water tank.</li> </ol> | None specified.  |
| 6. Demolition.   | Except any of the following: <ol style="list-style-type: none"> <li>1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)</li> <li>2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).</li> </ol> |
| 7. Railway line.   | Except where located outside of a rail corridor or rail reserve.   |

**Placement of Notices - Exemptions for Performance Assessed Development**

None specified.

**Placement of Notices - Exemptions for Restricted Development**

None specified.

**Main Street Subzone**

Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | A shopping, entertainment and commercial main street supported by medium to high density residential development.   |
| DO 2            | A fine-grained public realm with safe, walkable and vibrant streets created by mixed use buildings with non-residential uses at ground level and a visually consistent street rhythm informed by local context and narrow tenancy footprints. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Land Use and Intensity  |   |
| PO 1.1<br>Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the local community and the surrounding district.   | DTS/DPF 1.1<br>None are applicable  |
| PO 1.2<br>Land uses promote movement and activity during daytime and evening hours, including shops, restaurants, small scale licensed premises, educational, community and cultural facilities, and visitor and residential accommodation.   | DTS/DPF 1.2<br>None are applicable.   |
| PO 1.3<br>Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities and positively contribute to making the main street locality and pedestrian thoroughfares safe, walkable, comfortable, pleasant and lively places.                    | DTS/DPF 1.3<br>Dwellings developed in conjunction with non-residential uses sited:<br>(a) at upper levels of buildings with non-residential uses located at ground level or<br>(b) behind non-residential uses on the same allotment.             |
| PO 1.4<br>Development of well-designed diverse medium to high density accommodation options, including dwellings, supported accommodation, student accommodation, and short term accommodation, either as part of a mixed use development or wholly residential development.                                | DTS/DPF 1.4<br>None are applicable.   |
| Built Form and Character  |   |
| PO 2.1<br>Ground level uses contribute to a safe, walkable and vibrant main street.   | DTS/DPF 2.1<br>Shop, office, or consulting room uses located on the ground floor level of buildings.  |
| PO 2.2<br>Buildings designed to create visual connection between the public realm and ground level interior, positively contribute to passive surveillance of the public realm, have an active interface with the main street and contribute to the fine-grain character and retail function of the street. | DTS/DPF 2.2<br>The ground floor primary frontage of buildings provides at least 60% of the street frontage as an entry / foyer or display window to a shop or other community or commercial use that provides pedestrian interest and activation. |
| PO 2.3<br>Buildings are adaptable and flexible to suit a range of residential and non-residential land uses.  | DTS/DPF 2.3<br>The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.  |
| PO 2.4<br>Buildings with no set-backs from the main street boundary to achieve a continuity of built form frontage to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate but vibrant spaces.            | DTS/DPF 2.4<br>None are applicable.   |
| PO 2.5  | DTS/DPF 2.5   |

Vehicle parking and ancillary buildings and structures (including garages, carports and outbuildings) located behind buildings away from the primary main street frontage and designed to minimise negative impacts on the main street rhythm and activation.

None are applicable.

### Urban Neighbourhood Retail Subzone

Assessment Provisions (AP)

Desired Outcomes (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Additional neighbourhood-scale shopping, business, entertainment and recreation facilities to provide a focus for business and community life and most daily and weekly shopping needs of the community. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| Land Use and Intensity   |   |
| PO 1.1<br>Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the community. | DTS/DPF 1.1<br>Shops not exceeding a maximum gross leasable floor area of:<br><br>(a) 5500m <sup>2</sup> within the whole subzone area in West Lakes<br>(b) 2000m <sup>2</sup> within the whole subzone area in Bedford Park (Laffer's Triangle). |

### Urban Renewal Neighbourhood Zone

Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Housing and other land uses which no longer meet community preferences are replaced with new diverse housing options. Housing density increases, taking advantage of well-located urban land. Employment and community services will improve access to jobs, goods and services without compromising residential amenity. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Land Use and Intensity  |   |
| PO 1.1<br>Predominantly residential development with complementary non-residential uses that support an active, convenient, and walkable urban neighbourhood. | DTS/DPF 1.1<br>Development comprises one or more of the following:<br><br>(a) Ancillary accommodation<br>(b) Child care facility<br>(c) Community facility<br>(d) Consulting room<br>(e) Dwelling<br>(f) Educational facility<br>(g) Office<br>(h) Place of Worship<br>(i) Recreation area<br>(j) Residential flat building<br>(k) Retirement facility<br>(l) Shop<br>(m) Student accommodation<br>(n) Supported accommodation. |
| PO 1.2<br>Commercial activities improve community access to services are of a scale and type to   | DTS/DPF 1.2<br>A shop, consulting room or office (or any combination thereof) satisfies (a) or (b): <b>4332</b>   |

| <p>maintain residential amenity.</p>   | <p>(a) it is located on the same allotment and in conjunction with a dwelling where all the following are satisfied:</p> <ul style="list-style-type: none"> <li>(i) does not exceed 50m<sup>2</sup> gross leasable floor area</li> <li>(ii) does not involve the display of goods in a window or about the dwelling or its curtilage</li> </ul> <p>(b) where located outside of an Activity Centre, does not exceed 250m<sup>2</sup> in gross leasable floor area.</p>  |                                  |                               |                               |                                 |                               |                                  |                                  |                                |                                |                                  |                                  |                                |                                  |                                  |                                  |                                  |                                     |                                     |

- (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and
  - (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary
  - (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure
  - (h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)
  - (i) have a roof height where no part of the roof is more than 5m above the natural ground level
  - (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour
  - (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:
  - (i) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |
| 150-200  | 15%                        |
| 201-450  | 20%                        |
| >450   | 25%                        |

- (ii) the amount of existing soft landscaping prior to the development occurring.

PO 10.2  
Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

DTS/DPF 10.2  
Ancillary buildings and structures do not result in:

- (a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space
- (b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

PO 10.3  
Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.

DTS/DPF 10.3  
Non-residential ancillary buildings and structures:

- (a) are ancillary and subordinate to an existing non-residential use on the same site
- (b) have a floor area not exceeding the following:
 

| Allotment size     | Floor area       |
|--------------------|------------------|
| ≤500m <sup>2</sup> | 60m <sup>2</sup> |
| >500m <sup>2</sup> | 80m <sup>2</sup> |
- (c) are not constructed, added to or altered so that any part is situated:
  - (i) in front of any part of the building line of the main building to which it is ancillary
  - or
  - (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
- (d) in the case of a garage or carport, the garage or carport:
  - (i) is set back at least 5.5m from the boundary of the primary street
- (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  - (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary
  - (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary
- (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure
- (h) have a wall height (or post height) not exceeding 3m (and not including a gable end)
- (i) have a roof height where no part of the roof is more than 5m above the natural ground level
- (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.

**Table 1 - Accepted Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

| Class of Development   | Accepted Development Classification Criteria  |
|--|---|
| <p>Air handling unit, air conditioning system or exhaust fan<br/>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> </ul>  | <ol style="list-style-type: none"> <li>1. The item will be installed on or within an existing building</li> <li>2. The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire</li> <li>3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.</li> </ol>  |
| <p>Brush fence<br/>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• Ramsar Wetlands Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> </ul>  | <ol style="list-style-type: none"> <li>1. The fence is formed (wholly or partially) from brush</li> <li>2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels)</li> <li>3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved)</li> <li>4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.</li> </ol>  |
| <p>Building alterations<br/>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> </ul>   | <ol style="list-style-type: none"> <li>1. The alteration does not:                         <ol style="list-style-type: none"> <li>(a) increase the floor area of the building</li> <li>(b) exceed the existing wall height</li> <li>(c) exceed the existing overall building height</li> <li>(d) alter the roof profile</li> <li>(e) alter an approved privacy screening arrangement or window treatment</li> </ol> </li> <li>2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.</li> </ol>   |
| <p>Building work on railway land<br/>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• Significant Landscape Protection Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> </ul> | <ol style="list-style-type: none"> <li>1. Building work is associated with a railway</li> <li>2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017)</li> <li>3. It is required for the conduct or maintenance of railway activities</li> <li>4. It does not involve the clearance of native vegetation</li> <li>5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.</li> </ol>  |
| <p>Carport<br/>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Future Local Road Widening Overlay</li> <li>• Future Road Widening Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> </ul>                                     | <ol style="list-style-type: none"> <li>1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the <i>Electricity Act 1996</i></li> <li>2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>3. It is ancillary to a dwelling erected on the site</li> <li>4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary</li> <li>5. Total floor area - does not exceed 40m<sup>2</sup></li> <li>6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end)</li> <li>7. Building height - does not exceed 5m</li> <li>8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11.5m unless:                         <ol style="list-style-type: none"> <li>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</li> <li>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</li> </ol> </li> <li>9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street):                         <ol style="list-style-type: none"> <li>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</li> <li>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</li> </ol> </li> <li>10. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</li> <li>11. The carport is located so that vehicle access:                         <ol style="list-style-type: none"> <li>(a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</li> <li>(b) is not obtained from a State Maintained Road, and will use a driveway that:                                 <ol style="list-style-type: none"> <li>(i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;</li> <li>(ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;</li> </ol> </li> </ol> </li> </ol> |

- (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
- (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
- (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site

12. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour
13. Does not involve the clearance of native vegetation
14. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:
  - (a) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |
| 150-200  | 15%                        |
| 201-450  | 20%                        |
| >450   | 25%                        |

- (b) the amount of existing soft landscaping prior to the development occurring.

**Outbuilding**  
 Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
6. Total floor area - does not exceed 40m<sup>2</sup>
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
8. Building height - does not exceed 5m
9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11.5m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
12. If the outbuilding is a garage, it is located so that vehicle access:
  - (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
  - (b) is not obtained from a State Maintained Road, and will use a driveway that:
    - (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
    - (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
    - (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
    - (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access

|  | <p>(v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site</p> <p>13. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour</p> <p>14. Does not involve-</p> <ul style="list-style-type: none"> <li>(a) excavation exceeding a vertical height of 1m; or</li> <li>(b) filling exceeding a vertical height of 1m,</li> </ul> <p>and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m.</p> <p>15. Does not involve the clearance of native vegetation</p> <p>16. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas</p> <p>17. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:</p> <p>(a) a total area as determined by the following table:</p> <table border="1" data-bbox="868 533 1551 869"> <thead> <tr> <th>Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m<sup>2</sup>)</th> <th>Minimum percentage of site</th> </tr> </thead> <tbody> <tr> <td>&lt;150</td> <td>10%</td> </tr> <tr> <td>150-200</td> <td>15%</td> </tr> <tr> <td>201-450</td> <td>20%</td> </tr> <tr> <td>&gt;450</td> <td>25%</td> </tr> </tbody> </table> <p>(b) the amount of existing soft landscaping prior to the development occurring.</p> | Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site | <150 | 10% | 150-200 | 15% | 201-450 | 20% | >450 | 25% |
|--|---|--|----------------------------|------|-----|---------|-----|---------|-----|------|-----|

|   | 4339   |  |                            |  |      |

|         |     |
|---------|-----|
| <150    | 10% |
| 150-200 | 15% |
| 201-450 | 20% |
| >450    | 25% |

(b) the amount of existing soft landscaping prior to the development occurring.

Solar photovoltaic panels (roof mounted)  
Except where any of the following apply:

- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof
3. Panels and associated components do not overhang any part of the roof
4. Does not apply to a system with a generating capacity of more than 5MW that is to be connected to the State's power system
5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.

Swimming pool or spa pool and associated swimming pool safety features  
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted;
4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature).
5. Primary street setback - at least as far back as the building line of the building to which it is ancillary
6. Location of filtration system from a dwelling on an adjoining allotment:
  - (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise
  - (b) not less than 12m in any other case.
7. Does not involve the clearance of native vegetation
8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
9. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:
  - (a) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |
| 150-200  | 15%                        |
| 201-450  | 20%                        |
| >450   | 25%                        |

(b) the amount of existing soft landscaping prior to the development occurring.

Verandah  
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site
4. Primary street setback - as far back as the building line of the building to which it is ancillary
5. Total floor area - does not exceed 40m<sup>2</sup>
6. Post height - does not exceed 3m measured from natural ground level
7. Building height - does not exceed 5m
8. Length - does not exceed 11.5m if any part of the structure abuts or is situated on a boundary of the allotment
9. Does not involve the clearance of native vegetation
10. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:
  - (a) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

| Class of Development  | Deemed-to-Satisfy Development Classification Criteria  |   |  |   |
|---|--|---|--|---|
|   | Zone   | General Development Policies  | Subzone<br>(applies only in the area affected by the Subzone)                            | Overlay<br>(applies only in the area affected by the Overlay)   |

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

| Class of Development    | Applicable Policies  |  |   |   |

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions  |
|----------------------|---|
| Shop                 | Any of the following:<br><br>(a) shop with a gross leasable floor area less than 1000m2<br>(b) shop that is a restaurant. |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)   | Exceptions<br>(Column B)  |
|--|---|
| 1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.  | None specified.   |
| 2. All development undertaken by:<br>(a) the South Australian Housing Trust either individually or jointly with other persons or bodies or<br>(b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust. | Except development involving any of the following:<br><br>1. residential flat building(s) of 3 or more building levels<br>2. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)<br>3. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building). |

|  |  |
|--|--|
| <p>3. Any development involving any of the following (or of any combination of any of the following):</p> <ul style="list-style-type: none"> <li>(a) ancillary accommodation</li> <li>(b) dwelling</li> <li>(c) dwelling addition</li> <li>(d) residential flat building</li> <li>(e) retirement facility</li> <li>(f) student accommodation</li> <li>(g) supported accommodation.</li> </ul>  | <p>Except development that:</p> <ul style="list-style-type: none"> <li>1. exceeds the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1<br/>or</li> <li>2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: <ul style="list-style-type: none"> <li>(a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment)<br/>or</li> <li>(b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).</li> </ul> </li> </ul>  |

|   | (b) Where the existing building has a different primary street frontage - 5m   |
|   | There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building. 5m  |
|   | <p>For the purposes of <b>DTS/DPF 5.1</b>:</p> <ul style="list-style-type: none"> <li>(a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback</li> <li>(b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table</li> </ul>  |
| Secondary Street Setback  |  |
| <p>PO 6.1</p> <p>Buildings are set back from secondary street boundaries to achieve separation between building walls and public streets and contribute to a suburban streetscape character.</p>  | <p>DTS/DPF 6.1</p> <p>Building walls are set back from the boundary of the allotment with a secondary street frontage at least:</p> <ul style="list-style-type: none"> <li>(a) at least 900mm</li> <li>or</li> <li>(b) if a building (except for ancillary buildings and structures) on any adjoining allotment is closer to the secondary street than 900mm, at least the distance of that building from the boundary with the secondary street.'</li> </ul>  |
| Boundary Walls  |  |
| <p>PO 7.1</p> <p>Walls on boundaries are limited in height and length to manage visual and overshadowing impacts on adjoining properties.</p>   | <p>DTS/DPF 7.1</p> <p>Except where the building is a dwelling and is located on a central site within a row dwelling or terrace arrangement, side boundary walls occur only on one side boundary and satisfy (a) or (b) below:</p> <ul style="list-style-type: none"> <li>(a) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same, or lesser length and height</li> <li>(b) side boundary walls do not: <ul style="list-style-type: none"> <li>(i) exceed 3m in wall height</li> <li>(ii) exceed 11.5m in length</li> <li>(iii) when combined with other walls on the boundary of the subject development site, exceed a maximum 45% of the length of the boundary</li> <li>(iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land.</li> </ul> </li> </ul> |
| <p>PO 7.2</p> <p>Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.</p>  | <p>DTS/DPF 7.2</p> <p>Dwelling walls in a semi-detached, row or terrace arrangement are setback at least 900mm from side boundaries shared with allotments outside the development site.</p>   |
| Side boundary setback   |  |
| <p>PO 8.1</p> <p>Building walls are set back from side boundaries to provide:</p> <ul style="list-style-type: none"> <li>(a) separation between buildings in a way that contributes to a suburban character and</li> <li>(b) access to natural light and ventilation for neighbours.</li> </ul>   | <p>DTS/DPF 8.1</p> <p>Other than walls located on a side boundary, building walls are set back from side boundaries in accordance with the following:</p> <ul style="list-style-type: none"> <li>(a) where the wall height does not exceed 3m - at least 900mm</li> <li>(b) for a wall that is not south facing and the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings</li> <li>(c) for a wall that is south facing and the wall height exceeds 3m - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings.</li> </ul>  |
| Rear boundary setback   |  |
| <p>PO 9.1</p> <p>Building walls (except for ancillary buildings and structures) are set back from rear boundaries to provide:</p> <ul style="list-style-type: none"> <li>(a) separation between buildings in a way that contributes to a suburban character</li> <li>(b) access to natural light and ventilation for neighbours</li> <li>(c) private open space</li> <li>(d) space for landscaping and vegetation</li> <li>(e) a consistent character when viewed from a waterfront.</li> </ul> | <p>DTS/DPF 9.1</p> <p>Building walls (except for ancillary buildings and structures) are set back from the rear boundary at least:</p> <ul style="list-style-type: none"> <li>(a) where the rear boundary fronts a waterfront, no less than the average rear setback of any existing building (except for ancillary buildings and structures) on adjoining allotments.</li> <li>(b) where the rear boundary adjoins a laneway - 0m</li> <li>(c) In all other cases: <ul style="list-style-type: none"> <li>(i) if the size of the site is less than 301 square metres— <ul style="list-style-type: none"> <li>A. 3m in relation to the ground floor of the building</li> <li>B. 5m in relation to any other building level of the building</li> </ul> </li> </ul> </li> </ul>  |

- (ii) if the size of the site is 301 square metres or more—
  - A. 4m in relation to the ground floor of the building
  - B. 6m in relation to any other building level of the building.

Concept Plans

| <p>PO 10.1<br/>Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.</p> | <p>DTS/DPF 10.1<br/>The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:</p> <table border="1" data-bbox="802 365 1559 427"> <thead> <tr> <th data-bbox="802 365 1559 394">Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="802 394 1559 427">Concept Plan 141 - West Lakes</td> </tr> </tbody> </table> <p>In relation to DTS/DPF 10.1, in instances where:</p> <ul style="list-style-type: none"> <li>(a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant.</li> <li>(b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 10.1 is met.</li> </ul> | Description | Concept Plan 141 - West Lakes |
|--|--|-------------|-------------------------------|
| Description  |  |             |                               |
| Concept Plan 141 - West Lakes  |  |             |                               |

Built form and character

|   |   |
|---|---|
| <p>PO 11.1<br/>Dwellings on sites with frontages to both a public street and a waterfront designed to address both frontages.</p>                             | <p>DTS/DPF 11.1<br/>Development is not located on a site/allotment with frontage to a waterfront.</p> |
| <p>PO 11.2<br/>Service areas associated with dwellings such as open storage and clothes drying screened from public view.</p>                                 | <p>DTS/DPF 11.2<br/>None are applicable.</p>  |
| <p>PO 11.3<br/>Development set back from waterfronts to establish a consistent character that includes soft landscaping along coastal/riverine frontages.</p> | <p>DTS/DPF 11.3<br/>None are applicable.</p>  |

Ancillary buildings and structures

|   |  |
|---|--|
| <p>PO 12.1<br/>Outbuildings designed and sited to mitigate their visibility from the waterfront.</p>  | <p>DTS/DPF 12.1<br/>Outbuildings are not located between the main building and waterfront boundary on a site/allotment with frontage to a waterfront.</p>  |
| <p>PO 12.2<br/>Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.</p> | <p>DTS/DPF 12.2<br/>Ancillary buildings:</p> <ul style="list-style-type: none"> <li>(a) are ancillary to a dwelling erected on the same site</li> <li>(b) have a floor area not exceeding 60m<sup>2</sup></li> <li>(c) are not constructed, added to or altered so that any part is situated:                     <ul style="list-style-type: none"> <li>(i) in front of any part of the building line of the dwelling to which it is ancillary or</li> <li>(ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)</li> </ul> </li> <li>(d) in the case of a garage or carport, the garage or carport:                     <ul style="list-style-type: none"> <li>(i) is set back at least 5.5m from the boundary of the primary street</li> <li>(ii) when facing a primary street or secondary street, has a total door / opening not exceeding:                             <ul style="list-style-type: none"> <li>A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser</li> <li>B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width</li> </ul> </li> </ul> </li> <li>(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:                     <ul style="list-style-type: none"> <li>(i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and</li> <li>(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</li> </ul> </li> <li>(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary</li> <li>(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure</li> <li>(h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)</li> <li>(i) have a roof height where no part of the roof is more than 5m above the natural ground level</li> <li>(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour</li> </ul> |

|  | <p>(k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:</p> <p>(i) a total area as determined by the following table:</p> <table border="1" data-bbox="868 136 1551 477"> <thead> <tr> <th>Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m<sup>2</sup>)</th> <th>Minimum percentage of site</th> </tr> </thead> <tbody> <tr> <td>&lt;150</td> <td>10%</td> </tr> <tr> <td>150-200</td> <td>15%</td> </tr> <tr> <td>201-450</td> <td>20%</td> </tr> <tr> <td>&gt;450</td> <td>25%</td> </tr> </tbody> </table> <p>(ii) the amount of existing soft landscaping prior to the development occurring.</p>  | Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site | <150               | 10%              | 150-200            | 15%              | 201-450 | 20% | >450 | 25% |

(v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site

- 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour
- 14. Does not involve the clearance of native vegetation
- 15. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |
| 150-200  | 15%                        |
| 201-450  | 20%                        |
| >450   | 25%                        |

(b) the amount of existing soft landscaping prior to the development occurring.

**Outbuilding**  
Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

- 1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
- 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 3. It is detached from and ancillary to a dwelling erected on the site.
- 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
- 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
- 6. Total floor area - does not exceed 40m<sup>2</sup>
- 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
- 8. Building height - does not exceed 5m
- 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11.5m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 11. Site coverage does not exceed:
  - (a) on sites 300m<sup>2</sup> or less and with a dual frontage to the waterfront and a public street, 80%.
  - (b) in all other cases, 60%.
- 12. Door opening for vehicle access facing a street frontage - does not exceed, in total 7m in width or 50% of the width of the allotment frontage (whichever lesser)
- 13. If the outbuilding is a garage, it is located so that vehicle access:
  - (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
  - (b) is not obtained from a State maintained Road, and will use a driveway that:
    - (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
    - (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
    - (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
    - (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
    - (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site

|   | <p>14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour</p> <p>15. (b) the amount of existing soft landscaping prior to the development occurring.

Solar photovoltaic panels (roof mounted)  
Except where any of the following apply:

- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof
3. Panels and associated components do not overhang any part of the roof
4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system
5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.

Swimming pool or spa pool and associated swimming pool safety features  
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*.
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted
4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature).
5. Primary street setback - at least as far back as the building line of the building to which it is ancillary
6. Location of filtration system from a dwelling on an adjoining allotment:
  - (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise; or
  - (b) not less than 12m in any other case.
7. Does not involve the clearance of native vegetation
8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
9. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |
| 150-200  | 15%                        |
| 201-450  | 20%                        |
| >450   | 25%                        |

(b) the amount of existing soft landscaping prior to the development occurring.

Verandah  
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site
4. Primary street setback - as far back as the building line of the building to which it is ancillary
5. Total floor area - does not exceed 40m<sup>2</sup>
6. Post height - does not exceed 3m measured from natural ground level
7. Building height - does not exceed 5m
8. Length - does not exceed 11.5m if any part of the structure abuts or is situated on a boundary of the allotment
9. Site coverage does not exceed:
  - (a) on sites 300m<sup>2</sup> or less and with a dual frontage to the waterfront and a public street, 80%
  - (b) in all other cases, 60%.
10. Does not involve the clearance of native vegetation
11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) | Minimum percentage of site |
|--|----------------------------|
|--|----------------------------|

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

| Class of Development  | Deemed-to-Satisfy Development Classification Criteria   |   |   |   |
|---|---|---|---|---|
|   | Zone  | General Development Policies  | Subzone<br>(applies only in the area affected by the Subzone) | Overlay<br>(applies only in the area affected by the Overlay)   |

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

| Class of Development    | Applicable Policies   |  |  |   |

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions  |
|----------------------|---|
| Shop                 | Any of the following: <ul style="list-style-type: none"> <li>(a) shop with a gross leasable floor area less than 1000m<sup>2</sup></li> <li>(b) shop that is a restaurant.</li> </ul> |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development<br>(Column A)  | Exceptions<br>(Column B)  |
|---|---|
| 1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.   | None specified.   |
| 2. All development undertaken by: <ul style="list-style-type: none"> <li>(a) the South Australian Housing Trust either individually or jointly with other persons or bodies or</li> <li>(b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.</li> </ul> | Except development involving any of the following: <ul style="list-style-type: none"> <li>1. residential flat building(s) of 3 or more building levels</li> <li>2. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)</li> <li>3. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).</li> </ul>  |
| 3. Any development involving any of the following (or of any combination of any of the following): <ul style="list-style-type: none"> <li>(a) ancillary accommodation</li> <li>(b) dwelling</li> <li>(c) dwelling addition</li> <li>(d) jetty, pontoon or boat berth (or any combination thereof)</li> <li>(e) residential flat building.</li> </ul>                                | Except development that: <ul style="list-style-type: none"> <li>1. exceeds the maximum building height specified in Waterfront Neighbourhood Zone DTS/DPF 4.1 or</li> <li>2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and:                             <ul style="list-style-type: none"> <li>(a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or</li> <li>(b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).</li> </ul> </li> </ul> |

|  |  |
|--|--|
| <p>4. Any development involving any of the following (or of any combination of any of the following):</p> <ul style="list-style-type: none"> <li>(a) consulting room</li> <li>(b) office</li> <li>(c) shop.</li> </ul>   | <p>Except development that:</p> <ul style="list-style-type: none"> <li>1. exceeds the maximum building height specified in Waterfront Neighbourhood Zone DTS/DPF 4.1<br/>or</li> <li>2. does not satisfy Waterfront Neighbourhood Zone DTS/DPF 1.5<br/>or</li> <li>3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: <ul style="list-style-type: none"> <li>(a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment)<br/>or</li> <li>(b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).</li> </ul> </li> </ul> |
| <p>5. Any development involving any of the following (or of any combination of any of the following):</p> <ul style="list-style-type: none"> <li>(a) air handling unit, air conditioning system or exhaust fan</li> <li>(b) carport</li> <li>(c) deck</li> <li>(d) fence</li> <li>(e) internal building works</li> <li>(f) land division</li> <li>(g) outbuilding</li> <li>(h) pergola</li> <li>(i) private bushfire shelter</li> <li>(j) recreation area</li> <li>(k) replacement building</li> <li>(l) retaining wall</li> <li>(m) shade sail</li> <li>(n) solar photovoltaic panels (roof mounted)</li> <li>(o) swimming pool or spa pool and associated swimming pool safety features</li> <li>(p) temporary accommodation in an area affected by bushfire</li> <li>(q) tree damaging activity</li> <li>(r) verandah</li> <li>(s) water tank.</li> </ul> | <p>None specified.</p>   |
| <p>6. Demolition.</p>  | <p>Except any of the following:</p> <ul style="list-style-type: none"> <li>1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)</li> <li>2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).</li> </ul>  |
| <p>7. Railway line.</p>  | <p>Except where located outside of a rail corridor or rail reserve.</p>  |

**Placement of Notices - Exemptions for Performance Assessed Development**

None specified.

**Placement of Notices - Exemptions for Restricted Development**

None specified.

**Workers' Settlement Zone**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| <p style="text-align: center;"><b>Desired Outcome</b></p> |   |
|---|---|
| <p>DO 1</p>   | <p>Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts.</p> |

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| Land Use and Intensity  |  |
| <p>PO 1.1</p> <p>Development is limited to workers' accommodation and ancillary land uses that support the day to day needs of workers.</p>   | <p>DTS/DPF 1.1</p> <p>Development comprises one or more of the following:</p> <ul style="list-style-type: none"> <li>(a) a dwelling (manager's house)</li> <li>(b) amenity block (including shower, toilet and laundry facilities) in association with and ancillary to the workers' accommodation</li> <li>(c) dwelling addition</li> <li>(d) recreational facility in association with and ancillary to the workers' accommodation</li> <li>(e) office in association with and ancillary to the workers' accommodation</li> <li>(f) shop in association with and ancillary to the workers' accommodation</li> <li>(g) workers' accommodation.</li> </ul> |
| <p>PO 1.2</p> <p>Shops, primarily in the form of a restaurant, associated with and ancillary to Workers' accommodation enhance the amenity of the zone for those workers.</p>   | <p>DTS/DPF 1.2</p> <p>Shops located on the same site as workers' accommodation meets one of the following:</p> <ul style="list-style-type: none"> <li>(a) it has a gross leasable floor area not exceeding 100m<sup>2</sup></li> <li>(b) it is a restaurant.</li> </ul>  |
| <p>PO 1.3</p> <p>Office associated with and ancillary to Workers' accommodation supports the management and administrative aspects of the accommodation.</p>  | <p>DTS/DPF 1.3</p> <p>Office is ancillary to and located on the same site as Workers' accommodation.</p>   |
| <p>PO 1.4</p> <p>Development provides space adjacent to and around habitable buildings to accommodate areas for parking of vehicles, storage of waste, landscaping, recreation areas, swimming pool/spa and similar facilities to enhance the amenity for resident workers.</p>   | <p>DTS/DPF 1.4</p> <p>The total roofed area of all existing and proposed buildings on the site will not exceed 60%.</p>  |
| <p>PO 1.5</p> <p>Workers' accommodation is established in association with major industrial, mining, agricultural and business activities to support and facilitate economic activity.</p>  | <p>DTS/DPF 1.5</p> <p>Workers' accommodation is constructed by the principal operator of the relevant business or authorised agent thereof.</p>  |
| <p>PO 1.6</p> <p>A dwelling in the form of a manager or caretaker residence associated with and ancillary to Workers' accommodation provides for the efficient management, maintenance and support of residents.</p>  | <p>DTS/DPF 1.6</p> <p>A dwelling is:</p> <ul style="list-style-type: none"> <li>(a) ancillary to and located on the same allotment or within the same lease area as the workers' accommodation</li> <li>(b) has a demonstrated connection with workers' accommodation</li> <li>(c) will not result in more than one dwelling being located on an allotment or lease area used for workers' accommodation.</li> </ul>   |
| Land Division   |  |
| <p>PO 2.1</p> <p>Land division is designed to:</p> <ul style="list-style-type: none"> <li>(a) minimise fire risk danger to occupants of buildings and firefighting personnel</li> <li>(b) minimise the potential risk of damage to buildings and other property during a bushfire</li> <li>(c) ensure each allotment contains a suitable building envelope that is located away from any vegetation that would pose an unacceptable risk in the event of bushfire.</li> </ul> | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>   |
| Built Form and Character  |  |
| <p>PO 3.1</p> <p>Buildings and recreational facilities are set back from internal roads to accommodate vehicular movements and contribute to the safety of workers and visitors.</p>  | <p>DTS/DPF 3.1</p> <p>Buildings and recreational facilities are set back at least 1 metre from an internal road.</p>   |
| <p>PO 3.2</p> <p>Buildings are set back from public roads to mitigate impacts on the streetscape.</p>   | <p>DTS/DPF 3.2</p> <p>Buildings are set back at least 2m from a public road.</p>   |
| <p>PO 3.3</p> <p>Buildings and recreational areas are set back from the boundary of the zone to minimise impacts on neighbouring properties and enhance local amenity.</p>  | <p>DTS/DPF 3.3</p> <p>Buildings are set back at least 2 metres from the zone boundary.</p>   |
| <p>PO 3.4</p> <p>Buildings use materials and finishes to complement the landscape and mitigate the effects of</p>   | <p>DTS/DPF 3.4</p> <p>Buildings are clad in, or a combination of:</p>  |

|   |   |
|---|---|
| glare on adjacent land users.   | (a) materials other than sheet metal<br>(b) sheet metal pre-colour treated or painted in a non-reflective colour.   |
| Landscaping   |   |
| PO 4.1<br>Landscaping is provided along public roads and thoroughfares, zone boundaries and the perimeter of common vehicle parking areas to enhance the visual appearance of development.  | DTS/DPF 4.1<br>Other than to accommodate a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land, a landscaped area is provided within the development site in accordance with the following:<br><br>(a) at least 1.5m wide along any boundary on the perimeter of the zone fronting a public road or thoroughfare<br>(b) at least 1m wide around the perimeter of any shared vehicle parking area.   |
| PO 4.2<br>Development incorporates areas for landscaping to enhance the overall amenity of the site and locality.   | DTS/DPF 4.2<br>Landscape areas comprise:<br><br>(a) not less than 10 percent of the site area<br>(b) a dimension of at least 1m.  |
| Concept Plans   |   |
| PO 5.1<br>Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure. | DTS/DPF 5.1<br>The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:<br><br>In relation to DTS/DPF 5.1, in instances where:<br><br>(a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant.<br>(b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 5.1 is met. |

**Table 1 - Accepted Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

| Class of Development   | Accepted Development Classification Criteria   |
|--|--|
| Air handling unit, air conditioning system or exhaust fan<br>Except where any of the following apply:<br><ul style="list-style-type: none"><li>• Local Heritage Place Overlay</li><li>• State Heritage Area Overlay</li><li>• State Heritage Place Overlay</li></ul>   | <ol style="list-style-type: none"> <li>1. The item will be installed on or within an existing dwelling.</li> <li>2. The item being installed does not encroach on a public street.</li> <li>3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.</li> </ol>  |
| Building alterations<br>Except where any of the following apply:<br><ul style="list-style-type: none"><li>• Local Heritage Place Overlay</li><li>• State Heritage Area Overlay</li><li>• State Heritage Place Overlay</li></ul>  | <ol style="list-style-type: none"> <li>1. The alteration does not:                             <ol style="list-style-type: none"> <li>(a) increase the floor area of the building</li> <li>(b) exceed the existing wall height</li> <li>(c) exceed the existing overall building height</li> <li>(d) alter the roof profile</li> <li>(e) alter an approved privacy screening arrangement or window treatment</li> </ol> </li> <li>2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.</li> </ol>                            |
| Building work on railway land<br>Except where any of the following apply:<br><ul style="list-style-type: none"><li>• Coastal Areas Overlay</li><li>• Hazards (Acid Sulfate Soils) Overlay</li><li>• Local Heritage Place Overlay</li><li>• Mount Lofty Ranges Water Supply Catchment (Area 1) Overlay</li><li>• Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay</li><li>• Significant Landscape Protection Overlay</li><li>• State Heritage Area Overlay</li><li>• State Heritage Place Overlay</li></ul> | <ol style="list-style-type: none"> <li>1. Building work is associated with a railway.</li> <li>2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017).</li> <li>3. It is required for the conduct or maintenance of railway activities.</li> <li>4. It does not involve the clearance of native vegetation.</li> </ol>  |
| Carport<br>Except where any of the following apply:<br><ul style="list-style-type: none"><li>• Future Local Road Widening Overlay</li><li>• Future Road Widening Overlay</li><li>• Historic Area Overlay</li><li>• Local Heritage Place Overlay</li><li>• State Heritage Area Overlay</li><li>• State Heritage Place Overlay</li></ul>   | <ol style="list-style-type: none"> <li>1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the <i>Electricity Act 1996</i>.</li> <li>2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system.</li> <li>3. It is ancillary to a dwelling erected on the site.</li> <li>4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary.</li> <li>5. Total floor area - does not exceed 40m<sup>2</sup>.</li> </ol> |

6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end).
7. Building height - does not exceed 5m.
8. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent.
9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure.
10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment.
11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser).
12. The carport is located so that vehicle access:
  - (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
  - (b) is not obtained from a State maintained road, and will use a driveway that:
    - (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing;
    - (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
    - (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
    - (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
    - (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site.
13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour.
14. Does not involve the clearance of native vegetation.

Outbuilding  
 Except where any of the following apply:

- Coastal Areas Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*.
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system.
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary.
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads).
6. Total floor area - does not exceed 40m<sup>2</sup>.
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end).
8. Building height - does not exceed 5m.
9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent.
10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent.
11. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%.
12. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and

|  |  |
|--|--|
|  | <p>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure.</p> <p>13. If the outbuilding is a garage, it is located so that vehicle access:</p> <p>(a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</p> <p>(b) is not obtained from a State Maintained Road, and will use a driveway that:</p> <p>(i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing;</p> <p>(ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;</p> <p>(iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average</p> <p>(iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access</p> <p>(v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site</p> <p>14. If clad in sheet metal is pre-colour treated or painted in a non-reflective colour.</p> <p>15. Does not involve-</p> <p>(a) excavation exceeding a vertical height of 1 metre; or</p> <p>(b) filling exceeding a vertical height of 1 metre,</p> <p>and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2 metres.</p> <p>16. Does not involve the clearance of native vegetation.</p> |
| <p>Partial demolition of a building or structure<br/>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> </ul>   | <p>None</p>  |

The tank (including any associated pump) is located wholly below the level of the ground.</p> <p>3. Does not involve the clearance of native vegetation.</p>   |

**Table 2 - Deemed-to-Satisfy Development Classification**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

| Class of Development | Deemed-to-Satisfy Development Classification Criteria  |  |   |   |
|----------------------|--|--|---|---|
|                      | Zone   | General Development Policies   | Subzone<br>(applies only in the area affected by the Subzone) | Overlay<br>(applies only in the area affected by the Overlay)   |

**Table 3 - Applicable Policies for Performance Assessed Development**

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

| Class of Development | Applicable Policies  |   |   |  |
|----------------------|--|---|---|--|

**Table 4 - Restricted Development Classification**

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

| Class of Development | Exclusions  |
|----------------------|---|
| Shop                 | Any of the following:<br>(a) shop with a gross leasable floor area less than 1000m <sup>2</sup><br>(b) shop that is a restaurant. |

**Table 5 - Procedural Matters (PM) - Notification**

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

**Interpretation**

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

| Class of Development (Column A)  | Exceptions (Column B)  |
|--|--|
| 1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.  | None specified.  |
| 2. Any development involving any of the following (or of any combination of any of the following):<br>(a) air handling unit, air conditioning system or exhaust fan<br>(b) amenities block<br>(c) carport<br>(d) deck<br>(e) dwelling<br>(f) dwelling addition<br>(g) fence<br>(h) internal building works<br>(i) land division<br>(j) office<br>(k) outbuilding<br>(l) pergola<br>(m) private bushfire shelter<br>(n) replacement building<br>(o) retaining wall<br>(p) shade sail<br>(q) shop<br>(r) solar photovoltaic panels (roof mounted)<br>(s) swimming pool or spa pool and associated swimming pool safety features<br>(t) temporary accommodation in an area affected by bushfire<br>(u) tree damaging activity<br>(v) verandah<br>(w) workers accommodation<br>(x) water tank. | None specified.  |
| 3. Demolition.   | Except any of the following:<br>1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) |

|                  |   |
|------------------|---|
|                  | 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building). |
| 4. Railway line. | Except where located outside of a rail corridor or rail reserve.  |

**Placement of Notices - Exemptions for Performance Assessed Development**

None specified

**Placement of Notices - Exemptions for Restricted Development**

None specified

### Part 3 - Overlays

#### Adelaide Dolphin Sanctuary Overlay

##### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Protection of the Adelaide Dolphin Sanctuary dolphin population and their habitat. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| Land Use   |   |
| PO 1.1<br>Development avoids or minimises harm to habitat, and the functioning of ecosystems that support the dolphin population.            | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Development does not result in the disruption of critical dolphin behaviours such as breeding, feeding, resting and movement.      | DTS/DPF 1.2<br>None are applicable.                         |
| PO 1.3<br>Stormwater runoff is disposed of in a manner that avoids pollution or other detrimental impacts to the Adelaide Dolphin Sanctuary. | DTS/DPF 1.3<br>None are applicable.                         |

##### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

#### Advertising Near Signalised Intersections Overlay

##### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Provision of a safe road environment by reducing driver distraction at key points of conflict on the road. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| Advertisements Near Signalised Intersections   |  |
| PO 1.1<br>Advertising near signalised intersections does not cause unreasonable distraction to road users through illumination, flashing lights, or moving or changing displays or messages. | DTS/DPF 1.1<br>Advertising:<br><br>(a) is not illuminated<br>(b) does not incorporate a moving or changing display or message<br>(c) does not incorporate a flashing light(s). |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body             | Purpose of Referral  | Statutory Reference   |
|---|---------------------------|--|---|
| Advertisement or advertising hoarding that:<br><br>(a) is within 100m of a:<br>(i) signalised intersection<br>or<br>(ii) signalised pedestrian crossing<br>and<br><br>(b) will:<br>(i) be internally illuminated<br>or<br>(ii) incorporate a moving or changing display or message<br>or<br>(iii) incorporate a flashing light. | Commissioner of Highways. | To provide expert technical assessment on potential risks relating to pedestrian and road safety which may arise from advertisements near intersections. | Development of a class to which Schedule 9 clause 3 item 21 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

**Affordable Housing Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Affordable housing is integrated with residential and mixed use development. |
| DO 2            | Affordable housing caters for a variety of household structures.             |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---------------------|---|
| Land Division       |   |
| PO 1.1              | DTS/DPF 1.1   |

|  |   |
|--|---|
| Development comprising 20 or more dwellings / allotments incorporates affordable housing.  | Development results in 0-19 additional allotments / dwellings.  |
| PO 1.2<br>Development comprising 20 or more dwellings or residential allotments provides housing suited to a range of incomes including households with low to moderate incomes.   | DTS/DPF 1.2<br>Development comprising 20 or more dwellings / or residential allotments includes a minimum of 15% affordable housing except where:<br><br>(a) it can be demonstrated that any shortfall in affordable housing has been provided in a previous stage of development<br>or<br>(b) it can be demonstrated that any shortfall in affordable housing will be accommodated in a subsequent stage or stages of development.   |
| PO 1.3<br>Affordable housing is distributed throughout the development to avoid an overconcentration.  | DTS/DPF 1.3<br>None are applicable.   |
| Built Form and Character   |   |
| PO 2.1<br>Affordable housing is designed to complement the design and character of residential development within the locality.  | DTS/DPF 2.1<br>None are applicable.   |
| Affordable Housing Incentives  |   |
| PO 3.1<br>To support the provision of affordable housing, minimum allotment sizes may be reduced below the minimum allotment size specified in a zone while providing allotments of a suitable size and dimension to accommodate dwellings with a high standard of occupant amenity. | DTS/DPF 3.1<br>The minimum site area specified for a dwelling can be reduced by up to 20%, or the maximum density per hectare increased by up to 20%, where it is to be used to accommodate affordable housing except where the development is located within the Character Area Overlay or Historic Area Overlay.  |
| PO 3.2<br>To support the provision of affordable housing, building heights may be increased above the maximum specified in a zone.   | DTS/DPF 3.2<br>Where a building incorporates dwellings above ground level and includes at least 15% affordable housing, the maximum building height specified in any relevant zone policy can be increased by 1 building level in the:<br><br>(a) Business Neighbourhood Zone<br>(b) City Living Zone<br>(c) Established Neighbourhood Zone<br>(d) General Neighbourhood Zone<br>(e) Hills Neighbourhood Zone<br>(f) Housing Diversity Neighbourhood Zone<br>(g) Neighbourhood Zone<br>(h) Master Planned Neighbourhood Zone<br>(i) Master Planned Renewal Zone<br>(j) Master Planned Township Zone<br>(k) Rural Neighbourhood Zone<br>(l) Suburban Business Zone<br>(m) Suburban Neighbourhood Zone<br>(n) Township Neighbourhood Zone<br>(o) Township Zone<br>(p) Urban Renewal Neighbourhood Zone<br>(q) Waterfront Neighbourhood Zone<br><br>and up to 30% in any other zone, except where:<br><br>(a) the development is located within the Character Area Overlay or Historic Area Overlay<br>or<br>(b) other height incentives already apply to the development. |
| Movement and Car Parking   |   |
| PO 4.1<br>Sufficient car parking is provided to meet the needs of occupants of affordable housing.   | DTS/DPF 4.1<br>Dwellings constituting affordable housing are provided with car parking in accordance with the following:<br>(a) 0.3 carparks per dwelling within a building which incorporates dwellings located above ground level within either:<br>(i) 200 metres of any section of road reserve along which a bus service operates as a high frequency public transit service <sup>(2)</sup><br>(ii) is within 400 metres of a bus interchange <sup>(1)</sup><br>(iii) is within 400 metres of an O-Bahn interchange <sup>(1)</sup><br>(iv) is within 400 metres of a passenger rail station <sup>(1)</sup><br>(v) is within 400 metres of a passenger tram station <sup>(1)</sup><br>(vi) is within 400 metres of the Adelaide Parklands.<br><br>or<br>(b) 1 carpark per dwelling for any other dwelling.  |

[NOTE(S): (1) Measured from an area that contains any platform(s), shelter(s) or stop(s) where people congregate for the purpose waiting to board a bus, tram or train, but does not include areas used for the parking of vehicles. (2) A high frequency public transit service is a route serviced every 15 minutes between 7.30am and 6.30pm Monday to Friday and every 30 minutes at night, Saturday, Sunday and public holidays until 10pm.]

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body   | Purpose of Referral  | Statutory Reference   |
|--|---|--|---|
| <p>Except where the applicant for the development is the South Australian Housing Authority (or an agent acting on behalf of the South Australian Housing Authority), residential development or land division (other than an excluded land division):</p> <ul style="list-style-type: none"> <li>(a) that comprises 20 or more dwellings or residential allotments and is described in the application documentation as intending to provide affordable housing</li> <li>or</li> <li>(b) that is described in the application documentation as intending to provide affordable housing and the applicant is seeking to access one or more of the planning concessions outlined in the Affordable Housing Overlay DTS/DPF 3.1, 3.2 or 4.1</li> <li>or</li> <li>(c) that is described in the application documentation as intending to include affordable housing of any number of dwellings or residential allotments</li> </ul> | Minister responsible for administering the <i>South Australian Housing Trust Act 1995</i> . | To provide direction on the conditions required to secure the provision of dwellings or allotments for affordable housing. | Development of a class to which Schedule 9 clause 3 item 20 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

### Aircraft Noise Exposure Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Development sensitive to aircraft noise is designed and located to manage noise intrusion to reduce land use conflict and protect human health. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| Land Use and Intensity  |  |
| <p>PO 1.1</p> <p>Buildings that accommodate activities sensitive to aircraft noise are designed and located to minimise aircraft noise intrusion and provide appropriate interior acoustic amenity.</p>   | <p>DTS/DPF 1.1</p> <p>Buildings accommodating sensitive receivers are not located within an area having an ANEF value of 30 or more.</p>   |
| Built Form  |  |
| <p>PO 2.1</p> <p>Additions to buildings involving the addition or extension of habitable rooms are designed and located to minimise aircraft noise intrusion and provide appropriate interior acoustic amenity.</p>   | <p>DTS/DPF 2.1</p> <p>Dwelling additions involving the addition or extension of habitable rooms:</p> <ul style="list-style-type: none"> <li>(a) do not result in an increase in the total floor area of the existing dwelling by greater than 50 percent</li> <li>(b) do not occur in areas having an ANEF value of 30 or more.</li> </ul> |
| Land Division   |  |
| <p>PO 3.1</p> <p>Land division does not increase the number of allotments used for sensitive receivers in areas adversely affected by aircraft noise to mitigate community exposure to potential adverse environmental and amenity impacts generated by aircraft movements.</p> | <p>DTS/DPF 3.1</p> <p>Land division:</p> <ul style="list-style-type: none"> <li>(a) within an area having an ANEF value of less than 30</li> <li>or</li> <li>(b) within an area having an ANEF value of 30 or more and:</li> </ul>   |

- (i) does not result in any additional allotments  
or
- (ii) none of the allotments will accommodate a sensitive receiver.

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Airport Building Heights (Aircraft Landing Areas) Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Management of potential impacts of buildings on the operational and safety requirements of aircraft landing areas. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| Built Form   |   |
| PO 1.1<br>Building height does not pose a hazard to the operation of an aircraft landing area. | DTS/DPF 1.1<br>The distance from any part of a runway centreline to the closest point of the building is greater than 30 times building height. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Airport Building Heights (Regulated) Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Management of potential impacts of buildings and generated emissions to maintain operational and safety requirements of registered and certified commercial and military airfields, airports, airstrips and helicopter landing sites. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| Built Form   |   |
| PO 1.1<br>Building height does not pose a hazard to the operation of a certified or registered aerodrome.  | DTS/DPF 1.1<br>Buildings are located outside the area identified as 'All structures' (no height limit is prescribed) and do not exceed the height specified in the Airport Building Heights (Regulated) Overlay which applies to the subject site as shown on the SA Property and Planning Atlas.<br><br>In instances where more than one value applies to the site, the lowest value relevant to the site of the proposed development is applicable. |
| PO 1.2<br>Exhaust stacks are designed and sited to minimise plume impacts on aircraft movements associated with a certified or registered aerodrome. | DTS/DPF 1.2<br>Development does not include exhaust stacks.   |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body   | Purpose of Referral   | Statutory Reference  |
|---|---|---|--|
| Any of the following classes of development:<br>(a) building located in an area identified as 'All structures' (no height limit is prescribed) or will exceed the height specified in the <i>Airport Building Heights (Regulated) Overlay</i><br>(b) building comprising exhaust stacks that generates plumes, or may cause plumes to be generated, above a height specified in the <i>Airport Building Heights (Regulated) Overlay</i> . | The airport-operator company for the relevant airport within the meaning of the <i>Airports Act 1996</i> of the Commonwealth or, if there is no airport-operator company, the Secretary of the Minister responsible for the administration of the <i>Airports Act 1996</i> of the Commonwealth. | To provide expert assessment and direction to the relevant authority on potential impacts on the safety and operation of aviation activities. | Development of a class to which Schedule 9 clause 3 item 1 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

### Building Near Airfields Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Maintain the operational and safety requirements of certified commercial and military airfields, airports, airstrips and helicopter landing sites through management of non-residential lighting, turbulence and activities that may attract or result in the congregation of wildlife. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| PO 1.1<br>Outdoor lighting associated with a non-residential use does not pose a hazard to commercial or military aircraft operations.   | DTS/DPF 1.1<br>Development:<br>(a) primarily or wholly for residential purposes<br>(b) for non-residential purposes that does not incorporate outdoor floodlighting.  |
| PO 1.2<br>Development likely to attract or result in the congregation of wildlife is adequately separated from airfields to minimise the potential for aircraft wildlife strike. | DTS/DPF 1.2<br>All development except where it comprises one or more of the following located not less than 3km from the boundaries of an airport used by commercial or military aircraft:<br><br>(a) food packing/processing plant<br>(b) horticulture<br>(c) intensive animal husbandry<br>(d) showground |

|  |  |
|--|--|
|  | (e) waste management facility<br>(f) waste transfer station<br>(g) wetland<br>(h) wildlife sanctuary.  |
| PO 1.3<br>Buildings are adequately separated from runways and other take-off and landing facilities within certified or registered aerodromes to minimise the potential for building-generated turbulence and windshear that may pose a safety hazard to aircraft flight movement. | DTS/DPF 1.3<br>The distance from any part of a runway centreline to the closest point of the building is not less than 35 times the building height. |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

### Character Area Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Valued streetscape characteristics and development patterns are reinforced through contextually responsive development, design and adaptive reuse that responds to the attributes expressed in the Character Area Statement. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| All Development  |   |
| PO 1.1<br>All development is undertaken having consideration to the valued attributes expressed in the Character Area Statement.   | DTS/DPF 1.1<br>None are applicable.                         |
| Built Form   |   |
| PO 2.1<br>The form of new buildings and structures that are visible from the public realm are consistent with the valued streetscape characteristics of the character area.  | DTS/DPF 2.1<br>None are applicable.                         |
| PO 2.2<br>Development is consistent with the prevailing building and wall heights in the character area.   | DTS/DPF 2.2<br>None are applicable.                         |
| PO 2.3<br>Design and architectural detailing of street-facing buildings (including but not limited to roof pitch and form, openings, chimneys and verandahs) are consistent with the prevailing characteristics in the character area. | DTS/DPF 2.3<br>None are applicable.                         |
| PO 2.4<br>Development is consistent with the prevailing front and side boundary setback pattern in the character area.   | DTS/DPF 2.4<br>None are applicable.                         |
| PO 2.5<br>Materials are either consistent with or complement those within the character area.  | DTS/DPF 2.5<br>None are applicable.                         |
| Alterations and Additions  |   |
| PO 3.1   | DTS/DPF 3.1   |

|  |   |
|--|---|
| <p>Additions and alterations do not adversely impact on the streetscape character.</p>   | <p>Additions and alterations:</p> <ul style="list-style-type: none"> <li>(a) are fully contained within the roof space of a building with no external alterations made to the building elevation facing the primary street or</li> <li>(b) meet all of the following: <ul style="list-style-type: none"> <li>(i) do not include any development forward of the front façade building line</li> <li>(ii) any side or rear extensions are no closer to the side boundary than the existing building</li> <li>(iii) do not involve the construction or alteration of a second or subsequent building level.</li> </ul> </li> </ul> |
| <p>PO 3.2<br/>Adaptive reuse and revitalisation of buildings to retain local character consistent with the Character Area Statement.</p>   | <p>DTS/DPF 3.2<br/>None are applicable.</p>   |
| <p>Ancillary Development</p>   |   |
| <p>PO 4.1<br/>Ancillary development, including carports, outbuildings and garages, complements the character of the area and associated building(s).</p>   | <p>DTS/DPF 4.1<br/>None are applicable.</p>   |
| <p>PO 4.2<br/>Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).</p>   | <p>DTS/DPF 4.2<br/>None are applicable.</p>   |
| <p>PO 4.3<br/>Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, be below the parapet line, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.</p>   | <p>DTS/DPF 4.3<br/>None are applicable.</p>   |
| <p>PO 4.4<br/>Fencing and gates closer to a street boundary (other than a laneway) than the elevation of the associated building are consistent with the traditional period, style and form of the of the associated building.</p>   | <p>DTS/DPF 4.4<br/>None are applicable.</p>   |
| <p>Land Division</p>   |   |
| <p>PO 5.1<br/>Land division creates allotments that are:</p> <ul style="list-style-type: none"> <li>(a) compatible with the surrounding pattern of subdivision in the character area</li> <li>(b) of a dimension to accommodate buildings of a bulk and scale that reflect existing buildings and setbacks in the character area.</li> </ul> | <p>DTS/DPF 5.1<br/>None are applicable.</p>   |
| <p>Context and Streetscape Amenity</p>   |   |
| <p>PO 6.1<br/>The width of driveways and other vehicle access ways are consistent with the prevalent width of existing driveways in the character area.</p>  | <p>DTS/DPF 6.1<br/>None are applicable.</p>   |
| <p>PO 6.2<br/>Development maintains the valued landscape pattern and characteristics that contribute to the character area, except where they compromise safety, create nuisance, or impact adversely on existing buildings or infrastructure.</p>   | <p>DTS/DPF 6.2<br/>None are applicable.</p>   |

**Glenelg North (East of Tapleys Hill Road) Character Area Statement (HoB-C6)**

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

|   |  |  |
|---|--|--|
| Eras, themes and context                                |  | 1880s to 1920s.  |
| Allotments, subdivision and built form patterns         |  | Orderly subdivision pattern.<br>Originally subdivided in 1841.<br>Range of allotment sizes with wide frontages.<br>Smaller allotment sizes with rear laneways between Alison and Bagshaw Streets.<br>Medium front setbacks.<br>Side setbacks provide visual spacing between dwellings.   |
| Architectural styles, detailing and built form features |  | Larger scale single storey detached dwellings.<br>Bungalow style dwellings with large front and side boundary setbacks.<br>Examples of smaller scale dwellings between Alison and Bagshaw Streets.<br>Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing.<br>Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings.<br>Some Inter-War buildings, mostly Tudor style.<br>Many dwellings without vehicle garaging.<br>Rectilinear plan forms.<br>High degree of modulation and articulation.<br>Low scale.<br>Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings).<br>Short roof spans.<br>Hip and gable roof forms.<br>Concave, bullnose and straight-pitched verandahs.<br>Fine-grain detail in elements such as plinths, string courses, projecting sills.<br>High solid to void ratio.<br>Vertical proportions in windows and doors.<br>Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. |
| Building height   |  | Predominantly single storey but some two storey.   |
| Materials   |  | Consistent with the materials used in the 1840s to 1920s period.<br>Sandstone and red brick facades.<br>Corrugated iron roofing.   |

**Character Areas affecting City of Marion**

| <b>Edwardstown, Glandore, Glengowrie and Plympton Park Character Area Statement (Mar-C1)</b>  |   |  |
|---|---|--|
| The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. |   |  |
| These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.  |   |  |
| The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.   |   |  |
| MarC1   | Eras, themes and context                                    | 1920s to 1950.   |
|   | Allotments, subdivision and built form patterns             | Conventional grid type pattern of streets.<br><br>Large allotments.<br><br>Predominantly detached dwellings.<br><br>Some examples of semi-detached dwellings in Glandore and Glengowrie.   |

| Statement#  | Statement  |  |
|---|--|--|
| MitC2   |  | <p>Absence of row dwellings and residential flat buildings.</p> <p>Buildings are set back very large distances from street frontages and side boundaries. Consistent pattern of side setbacks, which are generally larger on one side of allotments.</p> <p>Low site coverage of buildings across large sites.</p> <p>Strong landscape setting for buildings, particularly in front yards and between buildings, contributes to sense of grandeur.</p> |
|   | Architectural styles, detailing and built form features  | <p>Eclectic mix of housing stock, styles and architectural features.</p> <p>High quality materials, finishes and detailing associated with grand homes and mansions.</p> <p>Increasing gradient of slopes to the east of the Area promotes split level designs and undercroft garaging formats.</p>  |
|   | Building height  | <p>Predominantly buildings of up to two storeys, with three storeys where cut into sloping sites (incorporating undercroft garaging).</p>  |
|   | Materials  | <p>Brick, stone, rendered masonry finishes to walls.</p> <p>Tiles or metal roofing.</p> <p>High solid to void ratio to facades.</p> <p>Visible retaining walls typically stone or rendered in material.</p>  |
|   | Fencing  | <p>Diversity of fencing treatments and styles.</p> <p>Solid fencing above 1 metre and walls screened with dense landscaping along the street frontage.</p>   |
|   | Setting, landscaping, streetscape and public realm features  | <p>A mixture of mature Eucalypt and exotic street trees provide an overall visual coherence to the public realm.</p> <p>Retaining walls to street frontages on high side of street, with raised front gardens above.</p> <p>Formal garden settings with mature trees are an important element in established character.</p>  |
|   | Representative Buildings   | <p><i>[Not identified]</i></p>   |
| MitC3   | <p><b>Hills Character Area Statement (Mit-C3)</b></p>  |  |
|   | <p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p>   |  |
|   | <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p>  |  |
|   | <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>   |  |
|   | Eras, themes and context   | <p>Low density spacious setting with detached dwellings on large sites within natural vegetated settings with very few other housing types.</p>  |
| Allotments, subdivision and built form patterns         | <p>Variations in land forms, including some steeply sloping locations, produce curvilinear road patterns and irregular shaped allotments in terms of size and frontage widths.</p> <p>Land slope leads to a variety of front setbacks and informs dwelling orientation and height relative to the street. Side setbacks are generally larger on one side of allotments.</p> <p>Simple housing forms of a single and two storey nature (including spilt level) that respond to land form.</p> <p>Garaging typically to side of dwelling or as an undercroft structure. Garaging is only forward of dwellings on steeply sloping sites and is in the form of standalone simple open structures.</p> <p>Row dwellings, group dwellings and residential flat buildings are not representative of the predominant built form in the area.</p> |  |
| Architectural styles, detailing and built form features | <p>The area's built form exhibits a sense of spaciousness due to limited site coverage and generous front and side setbacks.</p> <p>Development responds to land form and does so in a way that blends with landscape character by minimising cut and fill and vegetation clearance.</p> <p>Where visible to the street, large differences in levels between dwellings and roadways are battered and landscaped.</p> <p>Where parking structures are forward of building lines, they are of an open form and low roof profile.</p>   |  |
| Building height   | <p>Low profile roof forms and pitches reflect the land form are a common feature.</p> <p>One and two storeys typically responding to the land form.</p>  |  |
| Materials   | <p>Building materials, colours and finishes assist in blending and receding buildings into the natural landscape character rather than openly contrasting and drawing attention to buildings.</p> <p>Predominantly darker subdued natural earthy tones for wall and roof materials. Lighter or paler colour complement</p>   |  |

| Statement#  | Statement |  |
|---|-----------|--|
|   |           | surrounding landscape in their tone.<br><br>Highly reflective and bright, vivid colour finishes to walls and roof materials, such as stark white or similar are rarely found in the area.  |
| Fencing   |           | No presence of front fencing forward of the building line is a characteristic of the area, and in limited cases where front fencing is present, it is low or open in nature.<br><br>The area features retaining walls that are mostly screened or are natural in form using mainly stone or natural rock, with walls being low in height, terraced and set well back from boundaries and providing landscaped space.<br><br>High concrete sleeper walls are not a part of the built form streetscape.                        |
| Setting, landscaping, streetscape and public realm features |           | Strong landscape character attributes derive from extensive retention of native vegetation on sites, between buildings and within informal road verges. The presence of vegetation on sites, is a defining feature of the area.<br><br>Streets retain an open, often spacious setting characterised by spaces between buildings which contain landscaping.<br><br>Driveways on sloping sites meander within front yards of dwellings, with minimal cut and fill of the land surface, and feature landscaping on their edges. |

**Character Areas affecting City of Port Adelaide Enfield**

| <b>Enfield Character Area Statement (PAde-C1)</b>   |   |  |
|---|---|--|
| <p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p> |   |  |
| PAdeC1  | Eras, themes and context                                    | 1900s - 1950s built development.   |
|   | Allotments, subdivision and built form patterns             | "Garden suburb" street pattern and modified grid. Generous allotment sizes with wide frontages and substantial rear gardens. Consistent front setbacks.  |
|   | Architectural styles, detailing and built form features     | The area is large and features a wide variety of housing styles including bungalows, villas, Tudors, art deco, inter-war, cottages and mansions generally built before the 1940s.<br><br>There is also a significant stock of quality dwellings built between 1940 and 1950 that augment the pre 1940s dwellings and make an important contribution to the character of the area.<br><br>There is a notable concentration of bungalows in the western portion of the area and this style is a defining feature in this part of the area. |
|   | Building height   | Single storey.   |
|   | Materials   | Materials consistent with the style of building and era of its original construction.  |
|   | Fencing   | Low and/or open consistent with the style and era of construction of the building it is associated with.<br><br>Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms.<br><br>Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.   |
|   | Setting, landscaping, streetscape and public realm features | The 1920s street pattern in this area is distinctive and reflects the garden suburb approach to town planning and subdivision.<br><br>It results in wide nature strips and reserves that together with mature, well landscaped gardens create road verges which contribute to an open and high quality residential character.  |
|   | Representative Buildings                                    | <i>[Not identified]</i>  |

| <b>Glanville (East of Carlisle) Character Area Statement (PAde-C2)</b>  |   |  |
|---|---|--|
| <p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p> |   |  |
| PAdeC2  | Eras, themes and context                                | 1860s - 1920s built development.   |
|   | Allotments, subdivision and built form patterns         | The allotment pattern is shaped to accommodate the alignments of Carlisle Street and Causeway Road. Small allotment sizes with narrow frontages. Dwellings are built close to streets. |
|   | Architectural styles, detailing and built form features | Housing styles include cottages, villas, inter-war and bungalows with cottages being the predominant and key defining feature in the area.   |
|   | Building height   | Single storey.   |
|   | Materials   | Materials consistent with the style of building and era of its original construction.  |

| Statement# | Statement   |  |
|------------|---|--|
|            | Fencing   | <p>Low and/or open consistent with the style and era of construction of the building it is associated with.</p> <p>Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.</p>   |
|            | Setting, landscaping, streetscape and public realm features | <p>The area is nestled in to the north west of the Jervois Street bridge and contains many old workers' cottages. These are particularly prevalent in the area bound by Sutherland Street, Connor Street, Hart Street and Carlisle Street.</p> <p>The area's simple low rise housing is strongly counterpointed by the modern, multi -storey Port Adelaide waterfront development to the east of the Outer Harbour rail line and provides an important representation of the early settlement and historical development of Port Adelaide.</p> |
|            | Representative Buildings                                    | <i>[Not identified]</i>  |

| Statement#  | Statement   |  |
|---|---|--|
| PADEC3  | <p><b>Largs / Largs North Character Area Statement (PADE-C3)</b></p>  |  |
|   | <p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p>  |  |
|   | <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p>   |  |
|   | <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>  |  |
|   | Eras, themes and context  | 1900s - 1960s built development.   |
|   | Allotments, subdivision and built form patterns   | <p>Grid pattern with predominately east -west running streets with the long axes of allotments running north-south. Allotments fronting Lady Gowrie Drive and Military Road configured with their long axes running east-west so that buildings address these roads. A high degree of consistency in front setbacks.</p> <p>Regular and generous rectangular allotments with wide frontages.</p> |
|   | Architectural styles, detailing and built form features   | Wide range of housing styles including bungalows, villas, inter-war, Tudors, cottages and art deco. There is a strong concentration of pre 1940s built form.   |
|   | Building height   | Predominately single storey but some two storey along parts of the Lady Gowrie Drive frontage.   |
|   | Materials   | Materials consistent with the style of building and era of its original construction.  |
| Fencing   | <p>Low and/or open consistent with the style and era of construction of the building it is associated with.</p> <p>Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.</p> <p>Original hedges retained, restored and where appropriate, extended, (utilizing the same species of planting currently in existence) as an alternative to constructed fences.</p>  |  |
| Setting, landscaping, streetscape and public realm features | <p>The southern boundary of this area adjoins the Semaphore/Largs Historic Area. It abuts the coast and contains a significant number of dwellings built during the period from 1915-1940.</p> <p>It has a strong relationship with the coast and features tree lined streets with footpaths on both sides that provide vistas and ready walking access to the foreshore and beach.</p> <p>Wide allotment frontages with generous spacing between driveways make a significant contribution to the walkability of these footpaths and the character of the area.</p> <p>An imposing stand of Norfolk Island pines along Lady Gowrie Drive is a key feature of the area.</p> |  |
| Representative Buildings                                    | <i>[Not identified]</i>   |  |

|   | <p><b>Rosewater Character Area Statement (PADE-C4)</b></p>   |  |
|   | <p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> |  |
|   | <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p>  |  |
|   | <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>   |  |
| Eras, themes and context                        | 1900s - 1940s built development.   |  |
| Allotments, subdivision and built form patterns | Grid pattern distorted by the alignment of Newcastle Street. Small allotments with narrow frontages. Front setbacks are consistent on a street by street basis.  |  |
| Architectural styles, detailing and built       | A variety of housing styles but cottages, villas and bungalows are the principle styles.   |  |

| Statement# | Statement   |   |
|------------|---|---|
| PADEC4     | form features   |   |
|            | Building height   | Single storey.  |
|            | Materials   | Materials of existing buildings retained where practicable and missing elements reinstated consistent with the style of building and era of its original construction.  |
|            | Fencing   | Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.  |
|            | Setting, landscaping, streetscape and public realm features | Newcastle Street is a well landscaped road that provides the main access into this area. It features well established avenue tree planting that includes plane trees and jacarandas. Simple, single storey, historic detached dwellings built on allotments with consistent widths laid out in a grid pattern, and the adjacent Mt Carmel school and the reserve to the north west, combine to establish a country town like character. |

**Character Areas affecting City of Prospect**

|   |   |  |
|---|---|--|
| PrC1  | <p><b>Suburban Neighbourhood 1 Character Area Statement (Pr-C1)</b></p>   |  |
|   | <p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p>  |  |
|   | <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p>   |  |
|   | <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>  |  |
|   | Eras, themes and context  | Late 19th and Early 20th centuries residential. Limited post-1950s residential. Very low density and primarily detached dwellings.   |
|   | Allotments, subdivision and built form patterns   | Original land division patterns following grid type street pattern and displaying rectangular, rectilinear allotments. Spacious allotments. Large allotment frontages. Large front setbacks. Street facing front dwelling facades. Large spaces around and between dwellings including generous and asymmetrical (one side larger than the other) side setbacks between dwellings. Typically two storey dwellings display consistent side boundary setbacks between building levels. |
|   | Architectural styles, detailing and built form features   | <p>Majority bungalows and villas of a significant scale.</p> <p>Pitched roofs with their vertical proportion similar to wall height and typically around 25 to 49 degree pitch.</p> <p>Prominent front verandahs of bull-nose or concave design.</p> <p>Moderate front façade detailing and articulation (wall off-sets, verandahs and deep eaves) with walls with a solid to void ratio of greater than 1:1 and fenestrations showing a vertical prominence.</p>                    |
|   | Building height   | <p>Primarily single storey presentation to the street with two storey components sited behind.</p> <p>1 to 2 storey dwellings with vertical proportions consistent with traditional dwellings (wall height at least 3 metres and no more than 3.6 metres for single storey and up to 7 metres for two storeys.</p> <p>Large scale buildings in context with large to very large allotments and frontages.</p>  |
|   | Materials   | <p>Stone, brick and rendered finishes.</p> <p>Detailing around doors, windows, wall edges and gables.</p> <p>Limited colour palette for the majority of building façade (sandstone to reds; bluestone and grey tones) with colour highlights in the detailing.</p>   |
| Fencing   | Front fences forward of the building are of an open style and low in height (to 1.2 metres high). Fencing style associated with dwelling style and era of development. Some more solid fencing of standard height along major roads.  |  |
| Setting, landscaping, streetscape and public realm features | <p>Leafy public realm that visually dominates or supports the built form.</p> <p>Extensively landscaped front yards with mature vegetation/tree canopy. Minimal hard and artificial surfaces. Mature vegetation in public realm. Garages and carports are designed and sited to be subordinate to the main dwelling. Access points are narrow and consolidated.</p> |  |

| Statement# | Statement   |   |
|------------|---|---|
| PrC2       | Eras, themes and context                                    | Late 19th and Early 20th centuries residential. Limited post-1950s infill residential. Primarily low density and low scale residential, including detached, semi-detached and row dwellings.  |
|            | Allotments, subdivision and built form patterns             | Original land division patterns following grid type street pattern and displaying rectangular, rectilinear allotments. Large allotments. Large allotment frontages. Large front setbacks along with reasonable side setbacks. Street facing front dwelling facades.<br><br>Moderate spaces around dwellings including asymmetrical (one side larger than the other) side setbacks between dwellings. Typically two storey dwellings to display consistent side boundary setbacks between building levels. |
|            | Architectural styles, detailing and built form features     | Mainly single storey detached bungalows, cottages and villas.<br><br>Pitched roofs with the vertical proportion similar to wall height and typically around 25 to 49 degree pitch.<br><br>Front verandahs (with bull-nose or concave design) with façade detailing and moderate articulation. Moderate front façade detailing and articulation (wall off-sets, verandahs and deep eaves) with walls with a solid to void ratio of greater than 1:1 and fenestrations showing a vertical prominence.       |
|            | Building height   | Primarily single storey presentation to the street with any two storey components sited behind.<br><br>Predominantly 1 storey dwellings with vertical proportions consistent with traditional dwellings at least 3 metres and no more than 3.6 metres in wall height for single storey and up to 7 metres for two storeys.<br><br>Moderate scale in context with low rise development, allotment size and frontages.  |
|            | Materials   | Stone, brick and rendered finishes.<br><br>Detailing around doors, windows, wall edges and gables<br><br>Limited colour palette for the majority of building façade and roof areas (sandstone to reds; bluestone and grey tones) with complementary colour highlights in the detailing.   |
|            | Fencing   | Front fences forward of the building are of an open style and low in height (to 1.2 metres high). Style associated with dwelling style and era of development. Some more solid fencing of standard height along major roads.  |
|            | Setting, landscaping, streetscape and public realm features | Leafy public realm that supports the built form. Garages and carports are designed and sited to be subordinate to the main dwelling. Access points are narrow and consolidated.<br><br>Well landscaped front yards with mature vegetation/tree canopy. Minimal hard and artificial surfaces. Front and side garden landscaping. Leafy, garden suburb character and visual separation between houses.  |

**Character Area affecting District Council of Tatiara**

|   |  |  |
|---|--|--|
| TatC1   | <b>Mundulla Character Area Statement (TatC1)</b>   |  |
|   | The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.  |  |
|   | These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.  |  |
|   | The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.  |  |
|   | Eras, themes and context   | Pre-1950.  |
|   | Allotments, subdivision and built form patterns  | Original land division, large allotments. Buildings sited regularly and facing towards street frontages. |
|   | Architectural styles, detailing and built form features  | Consistent roof pitches. Unity of design and scale.  |
|   | Building height  | Consistent, low scale.   |
|   | Materials  | Earthen colours. Materials consistent with pre-1950s buildings.  |
| Fencing   | Informal fencing.  |  |
| Setting, landscaping, streetscape and public realm features | Individual and stands of trees, stone culverts, drainage and footpath system add to character of townscape. Informal street furniture, lighting, footpaths, road surface treatments, kerbing and guttering. Surrounded by well vegetated parklands and grazing land. Uncluttered appearance. Advertisements of traditional styles and scale consistent with the era. |  |
| Representative Buildings                                    | [Not identified]   |  |

**Character Areas affecting City of Victor Harbor**

|                 |  |  |
|-----------------|--|--|
| VIHC1           | <b>Burke Street Character Area Statement (VIH-C1)</b>  |  |
|                 | The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.      |  |
|                 | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.   |  |
|                 | The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.  |  |
|                 | Eras, themes and context   | Consistent low scale detached dwellings, primarily constructed after World War 1 to the later part of the 19th Century (mid 1800s to 1930s). Early settlement, consolidation and growth of residential development.  |
|                 | Allotments, subdivision and built form patterns  | Original street layout including rear access lanes and local roads. Curvilinear street with relatively large allotments roughly perpendicular to the street, most with rear laneway access.  |
|                 | Architectural styles, detailing and built form features  | Mix of small mid-1800s detached cottages of early Vernacular style, symmetrical and asymmetrical cottages and villas of the mid to late 1800s with Victorian stylistic influences, early 1900s cottages and villas with Federation stylistic influences, Inter-War bungalows. Church and Hall with late Victorian Gothic stylistic influences located at the bend in the road are landmarks. Adjacent to the Church is a Manse built in the Inter-War period with Georgian Revival stylistic influences.. Rectilinear plan form. Buildings are typically two or more pavilions rather than a single mass. Steeply-pitched roof forms, typically 35 to 40 degrees on 1800s and early 1900s era buildings and slightly lower on Inter-War buildings, reflecting traditional architectural styles and building methods. Short roof spans, minimising roof bulk. Concave, bullnose and straight-pitched verandahs on front and sometimes side facades reduce the bulk and scale and add visual interest. Lean-to forms are common. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. |
| Building height | Single storey, low scale and simple in form.   |  |
| Materials       | Limestone walls. Red brick or rendered quoin work and details. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Corrugated iron or corrugated steel roofing. Variation in materials assists in breaking down bulk and scale and adds visual interest.    |  |
| Fencing         | Low, open style construction front fencing (1.2 metres or less) associated with the traditional period and style of building, and providing views to the building. Low timber pickets, post and rails, pier and plinth masonry or wrought iron. Rear and side fencing behind building line up to 1.8 metres, |  |

| Statement#  | Statement  |
|---|--|
|   | corrugated iron.   |
| Setting, landscaping, streetscape and public realm features | Established garden settings. Varied, small front and side setbacks. Landscaped verges.<br>Garages and carports are sited behind dwellings, accessed from rear laneways or well set back from the front of dwellings. |
| Representative Buildings                                    | [Not identified]   |

**Character Areas affecting Town of Walkerville**

| Gilberton Character Area Statement (Walk-C1)  |   |
|---|---|
| <p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p> |   |
| Eras, themes and context  | Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to early 1900s.  |
| Allotments, subdivision and built form patterns   | Predominantly low density detached dwellings on allotments that are medium in width and of a range of sizes.<br>Some semi-detached and group dwellings on larger allotments.  |
| Architectural styles, detailing and built form features   | The historic built form exhibits a mixture of architectural styles from the late 1800s and early 1900s. Edwardian villas alongside Victorian cottages pepper the locality providing a significant narrative that reflects the contemporaneous construction styles.  |
| Building height   | Predominantly single storey. Two storey additions to the rear of buildings or within the roof space.  |
| Materials   | Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.  |
| Fencing   | Original fencing with bluestone plinths and cast iron fence railings above. Low front fencing.  |
| Setting, landscaping, streetscape and public realm features   | There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches.<br>The landscape setting is an important element of the area, with generally open, well vegetated streetscapes through a combination of public and private plantings and low fencing forward each dwelling. |
| Representative Buildings  | [Not identified]  |

**Character Areas affecting City of West Torrens**

| Ashford Character Area Statement (WeTo-C1)  |  |
|---|--|
| <p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p> |  |
| Eras, themes and context  | 1920s - 1940s  |
| Allotments, subdivision and built form patterns   | Strong uniformity of allotment pattern. Low to very low density site areas. Wide street frontages. Medium sized detached dwellings on substantial allotments.  |
| Architectural styles, detailing and built form features   | Predominantly Tudor and Bungalow dwellings. Articulated hip and gable roofs. Verandahs / porticos. Verandahs as continuation of main roof structure. Additions are generally located to the rear of the dwelling.                |
| Building height   | Generally single storey. Second storey within the roof space.  |
| Materials   | Brick. Painted brick. Stone. Rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Tiled roofs. Timber windows.   |
| Fencing   | Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.  |
| Setting, landscaping, streetscape and public realm features   | Strong uniformity of layout and buildings. Carports and garages are behind the main face of dwellings. Consistent side and rear setbacks, large private yards. Generous traditional well-maintained gardens. Tree lined streets. |

|   | The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. |  |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.  |  |
|   | The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.   |  |
|   | Eras, themes and context  | 1900 - 1940. Developed in the first 40 years of Whyalla up until the 1940's. Illustrates the increasing prosperity of the city from the small corrugated or rendered masonry cottages to the substantial stone bungalow dwellings constructed by BHP for their senior staff at the steelworks. |
|   | Allotments, subdivision and built form patterns   | Pattern of division in predominantly quarter acre lots, generous roads and road reserves with ample provision for on street parking and street planting.   |
| Architectural styles, detailing and built form features | Colonial Cottages with half-hipped roofs, rendered masonry walls with open verandahs the width of the dwelling, symmetrical fronted dwellings with return verandahs and Bungalow dwellings dominate the architectural style of the dwellings.   |  |
| Building height   | <i>[Not stated]</i>   |  |
| Materials   | Corrugated iron, rendered masonry and BHP stone (including stone coins) and BHP brick are the predominant construction materials with   |  |

| Statement# | Statement   |  |
|------------|---|--|
|            |   | corrugated irons roofs.  |
|            | Fencing   | Simple low picket or low rendered masonry, low open fencing or hedging.              |
|            | Setting, landscaping, streetscape and public realm features | Pedestrian and cycle connection to the foreshore, Ada Ryan Gardens and Hummock Hill. |
|            | Representative Buildings                                    | [Not identified]   |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Character Preservation District Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Recognise, protect and enhance the special character of Character Preservation Districts.  |
| DO 2            | The long term use of land outside of townships for primary production and associated value adding enterprises is assured and promoted. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Land Use and Intensity  |   |
| PO 1.1<br>Land division is undertaken in accordance with Section 8 of the <i>Character Preservation (Barossa Valley) Act 2012</i> and Section 8 of the <i>Character Preservation (McLaren Vale) Act 2012</i> .  | DTS/DPF 1.1<br>None are applicable.   |
| PO 1.2<br>Residential development located in townships to reinforce settlement patterns within the district and support the continuation of primary production on land outside townships.   | DTS/DPF 1.2<br>Residential development located within designated township areas of the Character Preservation District Overlay. |
| Built Form and Character  |   |
| PO 2.1<br>Development occurring at the edge of townships is sympathetic to the rural landscape and reinforces a clear transition between townships and rural landscape through measures including:<br><br>(a) being of a low scale<br>(b) orientating residential development towards the rural area<br>(c) ensuring visual separation from the rural area through landscaping and road reserves. | DTS/DPF 2.1<br>None are applicable.   |
| PO 2.2<br>Development contributes to and maintains the historic identity and character of townships through appropriate:<br><br>(a) form<br>(b) scale   | DTS/DPF 2.2<br>None are applicable.   |

|  |   |
|--|---|
| (c) siting<br>(d) design<br>(e) landscaping.   |   |
| PO 2.3<br>Adaptive re-use of rural structures and historic and/or character buildings supports their preservation and ongoing contribution to the landscape.   | DTS/DPF 2.3<br>None are applicable.   |
| Built Form and Character in the Rural Area   |   |
| PO 3.1<br>Preservation of existing natural features including topography, watercourses and mature trees.   | DTS/DPF 3.1<br>None are applicable.   |
| PO 3.2<br>Buildings and structures do not interrupt views of the skyline through measures including being sited below ridge lines.   | DTS/DPF 3.2<br>None are applicable.   |
| PO 3.3<br>Buildings and structures harmonise with the natural features of the landscape and reinforce the rural character through the use of muted, neutral, non-reflective landscape colours on external surfaces.      | DTS/DPF 3.3<br>None are applicable.   |
| PO 3.4<br>Large buildings and structures are sited and oriented to minimise their visual bulk, particularly if close to roads or in open settings where there are no other buildings or mature trees in close proximity. | DTS/DPF 3.4<br>None are applicable.   |
| PO 3.5<br>Buildings and structures are grouped to create compact clusters well set back from public roads.   | DTS/DPF 3.5<br>None are applicable.   |
| PO 3.6<br>Development mitigates the need for long, steep access roads that require excessive grading or removal of vegetation.   | DTS/DPF 3.6<br>None are applicable.   |
| Earthworks   |   |
| PO 4.1<br>Excavation and filling of land is limited to that associated with:<br><br>(a) minimising the visual impact of buildings or structures<br><br>or<br><br>(a) construction of water storage facilities.           | DTS/DPF 4.1<br>Excavation and/or filling of land is:<br><br>(a) no greater than 1.5 metres from natural ground level<br>(b) only undertaken in order to reduce the visual impact of buildings or structures or to construct water storage facilities. |

**Procedural Matters (PM)**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Coastal Areas Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | The natural coastal environment (including environmentally important features such as mangroves, wetlands, saltmarsh, sand dunes, cliff tops, native vegetation, wildlife habitat, shore and estuarine areas) is conserved and enhanced. |

|      |   |
|------|---|
| DO 2 | Provision is made for natural coastal processes; and recognition is given to current and future coastal hazards including sea level rise, flooding, erosion and dune drift to avoid the need, now and in the future, for public expenditure on protection of the environment and development. |
|------|---|

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |                                  |  |   |  |   |   |   |  |  |  |  |  |  |  |   |   |  |  |  |   |  |  |  |  |  |  |  |  |   |  |  |
|---|---|----------------------------------|--|---|--|---|---|---|--|--|--|--|--|--|--|---|---|--|--|--|---|--|--|--|--|--|--|--|--|---|--|--|
| Land Division   |   |                                  |  |   |  |   |   |   |  |  |  |  |  |  |  |   |   |  |  |  |   |  |  |  |  |  |  |  |  |   |  |  |
| <p>PO 1.1</p> <p>Land is divided only if it or the subsequent development and use of the land will not adversely affect the environmental values or ability of the land or adjoining land to adapt to changing coastal processes.</p>   | <p>DTS/DPF 1.1</p> <p>Land division for minor adjustment of allotment boundaries removes an anomaly in the current boundaries with respect to the location of buildings or structures.</p>  |                                  |  |   |  |   |   |   |  |  |  |  |  |  |  |   |   |  |  |  |   |  |  |  |  |  |  |  |  |   |  |  |
| <p>PO 1.2</p> <p>Land is not divided unless a layout is achieved whereby roads, parking areas and development sites for each allotment are at least 0.3m above the standard sea flood risk level, unless the land has, or can be provided with, appropriate and acceptable coastal protection measures.</p>                 | <p>DTS/DPF 1.2</p> <p>None are applicable.</p>  |                                  |  |   |  |   |   |   |  |  |  |  |  |  |  |   |   |  |  |  |   |  |  |  |  |  |  |  |  |   |  |  |
| <p>PO 1.3</p> <p>Other than small-scale infill land division in a predominantly urban zone, land division adjacent to the coast incorporates an existing or proposed public reserve (not including a road or erosion buffer) of a size adequate to provide for natural coastal processes, public access and recreation.</p> | <p>DTS/DPF 1.3</p> <p>None are applicable.</p>  |                                  |  |   |  |   |   |   |  |  |  |  |  |  |  |   |   |  |  |  |   |  |  |  |  |  |  |  |  |   |  |  |
| Hazard Risk Minimisation  |   |                                  |  |   |  |   |   |   |  |  |  |  |  |  |  |   |   |  |  |  |   |  |  |  |  |  |  |  |  |   |  |  |
| <p>PO 2.1</p> <p>Buildings sited over tidal water or that are not capable of being raised or protected by flood protection measures in the future are protected against the standard sea flood risk level and 1m of sea level rise.</p>   | <p>DTS/DPF 2.1</p> <p>Building floor levels are at least 1.25m above the standard sea flood risk level.</p>   |                                  |  |   |  |   |   |   |  |  |  |  |  |  |  |   |   |  |  |  |   |  |  |  |  |  |  |  |  |   |  |  |
| <p>PO 2.2</p> <p>Development, including associated roads and parking areas, but not minor structures unlikely to be adversely affected by flooding, is protected from the standard sea flood risk level and 1m of sea level rise.</p>   | <p>DTS/DPF 2.2</p> <p>Development incorporates finished ground and floor levels not less than:</p> <table border="1" style="width: 100%; | Minimum finished floor level is 9.02m AHD  |                                     |
| Minimum finished floor level is 9.31m AHD  |                                     |
| Minimum finished floor level is 9.51m AHD  |                                     |
| Minimum finished floor level is 9.55m AHD  |                                     |
| Minimum finished floor level is 9.68m AHD  |                                     |
| Minimum finished floor level is 9.77m AHD  |                                     |
| Minimum finished floor level is 9.85m AHD  |                                     |
| Minimum finished floor level is 4.64m AHD  |                                     |
| In instances where no value is specified (i.e. there is a blank field):  |                                     |
| (a) finished ground levels allow for sea level rise by being raised 0.3m or more above the standard sea flood risk level   |                                     |
| (b) finished floor levels are 0.55m or more above the standard sea flood risk level  |                                     |
| (c) practical measures can be implemented to provide future protection against an additional sea level rise of 0.7m plus an allowance to accommodate 100 years of land subsidence.   |                                     |
| PO 2.3<br>Development will not create or aggravate coastal erosion or require coast protection works that cause or aggravate coastal erosion.  | DTS/DPF 2.3<br>None are applicable. |
| PO 2.4<br>Development is set back a sufficient distance from the coast to provide an erosion buffer in addition to a public reserve that will allow for at least 100 years of coastal retreat for single buildings or small-scale developments, or 200 years of coastal retreat for large scale developments unless: | DTS/DPF 2.4<br>None are applicable. |

|  |   |
|--|---|
| <p>(a) the development incorporates appropriate private coastal protection measures to protect it from anticipated erosion<br/>or<br/>(b) there are formal commitments to protect the existing or proposed public reserve and development from anticipated coastal erosion.</p>  |   |
| <p>PO 2.5<br/>Additions or alterations to, or replacement of, a dwelling do not increase the risk of effects from natural coastal processes such as flooding, sea-level rise, sand drift and erosion.</p>  | <p>DTS/DPF 2.5<br/>None are applicable.</p>   |
| Coast Protection Works   |   |
| <p>PO 3.1<br/>Development avoids the need for coast protection works through measures such as setbacks to protect development from coastal erosion, sea or stormwater flooding, sand drift or other coastal processes.</p>   | <p>DTS/DPF 3.1<br/>None are applicable.</p>   |
| <p>PO 3.2<br/>Development does not compromise the structural integrity of any sea wall or levee bank or the ability to maintain, modify or upgrade any sea wall or levee bank.</p>   | <p>DTS/DPF 3.2<br/>None are applicable.</p>   |
| <p>PO 3.3<br/>Unavoidable coast protection works are the subject of binding agreements to cover the cost of future construction, operation, maintenance and management measures and will not:</p> <ul style="list-style-type: none"> <li>(a) have an adverse effect on coastal ecology, processes, conservation, public access and amenity</li> <li>(b) require commitment of public resources including land</li> <li>(c) present an unacceptable risk of failure relative to potential hazard resulting from failure.</li> </ul> | <p>DTS/DPF 3.3<br/>None are applicable.</p>   |
| Environment Protection   |   |
| <p>PO 4.1<br/>Development will not unreasonably affect the marine and onshore coastal environment by pollution, erosion, damage or depletion of physical or biological resources; interference with natural coastal processes; or the introduction of and spread of marine pests and diseases or any other means.</p>  | <p>DTS/DPF 4.1<br/>None are applicable.</p>   |
| <p>PO 4.2<br/>Development avoids delicate or environmentally sensitive coastal areas such as sand dunes, cliff tops, estuaries, wetlands or substantially intact strata of native vegetation.</p>  | <p>DTS/DPF 4.2<br/>None are applicable.</p>   |
| <p>PO 4.3<br/>Development allows for ecological and natural landform adjustment to changing climatic conditions and sea levels, by allowing landward migration of dunes, coastal wetlands, mangrove and samphire areas.</p>  | <p>DTS/DPF 4.3<br/>None are applicable.</p>   |
| <p>PO 4.4<br/>Development avoids, or in built up areas minimises, impacts on important habitat areas that support the nesting, breeding and movement/migration patterns of fauna, including threatened shorebirds.</p>   | <p>DTS/DPF 4.4<br/>None are applicable.</p>   |
| <p>PO 4.5<br/>Development is designed so that wastewater is disposed of in a manner that avoids pollution or other detrimental impacts on the marine and on-shore environment of coastal areas.</p>  | <p>DTS/DPF 4.5<br/>Development is connected, or will be connected, to an approved common wastewater disposal service with the capacity to meet the requirements of the development or on-site wastewater systems set back a minimum of 100m from the Mean High Water Mark at spring tide.</p> |
| <p>PO 4.6<br/>Development is designed so that stormwater runoff is disposed of in a manner that avoids pollution or other detrimental impacts on the marine and on-shore environment of coastal areas.</p>   | <p>DTS/DPF 4.6<br/>None are applicable.</p>   |
| <p>PO 4.7<br/>Development involving the removal of shell grit, cobbles or sand, other than for coastal protection works purposes, is not undertaken.</p>   | <p>DTS/DPF 4.7<br/>Development does not involve the removal of shell grit, cobbles or sand.</p>   |
| Access   |   |
| <p>PO 5.1<br/>Development maintains or enhances appropriate public access to and along the foreshore.</p>  | <p>DTS/DPF 5.1<br/>None are applicable.</p>   |
| <p>PO 5.2<br/>Public access through sensitive coastal landforms, particularly sand dunes, wetlands and cliffs, is restricted to defined pedestrian paths and constructed to minimise adverse environmental impact.</p>   | <p>DTS/DPF 5.2<br/>None are applicable.</p>   |
| <p>PO 5.3</p>  | <p>DTS/DPF 5.3</p>  |

|   |  |
|---|--|
| <p>Access roads to the coast, lookouts and places of interest:</p> <p>(a) do not detract from the amenity or the environment</p> <p>(b) are designed for slow-moving traffic</p> <p>(c) are minimised in number.</p>              | <p>None are applicable.</p>                    |
| <p>PO 5.4</p> <p>Development on land adjoining a coastal reserve is sited and designed to be compatible with the purpose, management and amenity of the reserve and to prevent inappropriate access to or use of the reserve.</p> | <p>DTS/DPF 5.4</p> <p>None are applicable.</p> |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body                  | Purpose of Referral   | Statutory Reference   |
|--|--------------------------------|---|---|
| <p>Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, the following:</p> <p>(a) excavation and/or filling where the total volume of material excavated and/or filled exceeds 9m<sup>3</sup></p> <p>(b) dwellings and habitable buildings that:</p> <p>(i) do not meet DTS/DPF 2.2</p> <p>or</p> <p>(ii) are within 100m of the mean high water mark</p> <p>(c) other than within a Rural Settlement Zone:</p> <p>(i) buildings with a floor area greater than 60m<sup>2</sup></p> <p>or</p> <p>(ii) tourist accommodation, including a caravan park</p> <p>or</p> <p>(iii) division of land that would create 1 or more additional allotments</p> <p>(d) off-shore structures</p> <p>(e) coast protection works</p> <p>(f) infrastructure within 100m landward of the mean high water mark.</p> | <p>Coast Protection Board.</p> | <p>To provide expert assessment and direction to the relevant authority on:</p> <ul style="list-style-type: none"> <li>the risk to development from current and future coastal hazards (including sea-level rise, coastal flooding, erosion, dune drift and acid sulfate soils);</li> <li>coast protection works;</li> <li>potential impacts from development on public access and the coastal environment (including important coastal features).</li> </ul> | <p>Development of a class to which Schedule 9 clause 3 item 3 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |

**Coastal Flooding Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Recognition of coastal flood hazards to avoid the need, now and in the future, for public expenditure on protection of the environment and development. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |                                  |  |   |  |   |   |   |  |  |  |  |

| Finished Ground and Floor Levels  |
|---|
| Minimum finished floor level is 9.51m AHD   |
| Minimum finished floor level is 9.55m AHD   |
| Minimum finished floor level is 9.68m AHD   |
| Minimum finished floor level is 9.77m AHD   |
| Minimum finished floor level is 9.85m AHD   |
| Minimum finished floor level is 4.64m AHD   |
| In instances where no value is specified (i.e. there is a blank field):   |
| (a) finished ground levels allow for sea level rise by being raised 300mm or more above the standard sea flood risk level   |
| (b) finished floor levels are 550mm or more above the standard sea flood risk level   |
| (c) practical measures can be implemented to provide future protection against an additional sea level rise of 700mm plus an allowance to accommodate 100 years of land subsidence. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Defence Aviation Area Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Management of potential impacts of buildings on the operational and safety requirements of Defence Aviation Areas. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| Built Form  |  |
| PO 1.1<br>Building height does not pose a hazard to the operations of Defence Aviation Areas.   | DTS/DPF 1.1<br>Building height does not exceed the relevant height specified by the <i>Defence Aviation Area Overlay</i> . |
| PO 1.2<br>Exhaust stacks are designed and sited to minimise plume impacts on aircraft movements associated with Defence Aviation Areas. | DTS/DPF 1.2<br>Development does not include exhaust stacks.  |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|

#### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

### Future Road Widening Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Development which is consistent with and will not compromise efficient delivery of future road widening requirements. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Future Road Widening  |   |
| PO 1.1<br>Development does not compromise or is located and designed to minimise its impact on future road widening requirements. | DTS/DPF 1.1<br>Development does not involve building work, or building work is located wholly outside the land subject to the 6m Consent Area, the C Type Requirement or the Strip Requirement of the Metropolitan Adelaide Road Widening Plan. |

**Procedural Matters (PM)**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body             | Purpose of Referral   | Statutory Reference  |
|---|---------------------------|---|--|
| Other than where all deemed-to-satisfy criteria for all policies relevant to this referral are met, development (including the division of land) that is within or may encroach within a Future Road Widening Area. | Commissioner of Highways. | To provide expert technical assessment and direction to the relevant authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 4 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

**Gas and Liquid Petroleum Pipelines Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Management of risk to public safety, the environment and security of energy supply from the encroachment of development on strategic gas and liquid petroleum pipelines. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body   | Purpose of Referral   | Statutory Reference   |
|---|---|---|---|
| Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, a class of development that does not satisfy Gas and Liquid Petroleum Pipelines Overlay DTS/DPF 1.1, 1.2 and 1.3. | The Chief Executive of the Department of the Minister responsible for administering the <i>Petroleum and Geothermal Energy Act 2000</i> . | To provide expert assessment and direction to the relevant authority in relation to:<br><br>(a) potential safety issues relating to development or<br>(b) the potential for development to adversely impact upon the lawful continued operation of strategic infrastructure (gas and liquid petroleum pipelines). | Development of a class to which Schedule 9 clause 3 item 9B of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

### Gas and Liquid Petroleum Pipelines (Facilities) Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Management of risk to public safety, the environment and security of energy supply from the encroachment of development on gas and liquid petroleum pipeline facilities. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---------------------|---|
| Safety              |   |
| PO 1.1              | DTS/DPF 1.1   |

Development (including land division) does not present a risk to public health and safety due to any of the following:

- (a) continuous noise associated with pipeline facilities used for energy transportation that exceeds the Environment Protection (Commercial and Industrial Noise) Policy
- (b) potential for occasional noise associated with high pressure venting.

Development (including land division creating additional allotments for such purposes) comprises one or more of the following:

- (a) open space
- (b) roadways
- (c) a class of development that will occur in accordance with an agreement under section 123 of the *Planning, Development and Infrastructure Act, 2016*
- (d) a dwelling or ancillary building/structure on an allotment approved for residential purposes.

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body   | Purpose of Referral  | Statutory Reference   |
|---|---|--|---|
| Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, a class of development that does not satisfy Overlay DTS/DPF 1.1. | The Chief Executive of the Department of the Minister responsible for administering the Petroleum and Geothermal Energy Act 2000. | To provide expert assessment and direction to the relevant authority in relation to: <ul style="list-style-type: none"> <li>(a) potential safety issues relating to development or</li> <li>(b) the potential for development to adversely impact upon the lawful continued operation of strategic infrastructure (gas and liquid petroleum pipelines).</li> </ul> | Development of a class to which Schedule 9 clause 3 item 9B of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

### Gateway Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | The visual amenity and streetscape appeal along prominent entrances into towns, tourist and historic precincts, activity centres and main streets is maintained and improved through the careful siting of buildings and other activities in a well landscaped setting. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| Built Form and Character   |   |
| PO 1.1<br>Buildings are set back from main roads to support a consistent high-quality streetscape character where the prominence of larger buildings is appropriately mitigated.                                   | DTS/DPF 1.1<br>Buildings are set back at least the height of the building and no less than 10m from arterial and main roads and highways, whichever is the greater. |
| PO 1.2<br>Building are set back from side boundaries to moderate the appearance of buildings and enhance the outlook from arterial and main roads and highways.  | DTS/DPF 1.2<br>None are applicable.   |
| PO 1.3<br>The main facade of principal buildings facing arterial and main roads and highways incorporate articulation and various materials to promote a high standard of building design and external appearance. | DTS/DPF 1.3<br>None are applicable.   |
| Landscape Amenity  |   |
| PO 2.1   | DTS/DPF 2.1   |

|   |   |
|---|---|
| Ancillary buildings including carports, outbuildings and garages, other minor structures, waste storage bins and outdoor storage areas are sited to reduce visual clutter and untidiness from arterial and main roads and highways.   | Ancillary buildings including carports, outbuildings and garages, other minor structures, waste storage bins and outdoor storage areas are located in a manner to satisfy one of the following:<br><br>(a) behind principal building(s) facing arterial and main roads and highways<br><br>(b) behind the building line of principal building(s) and obscured from public view from arterial and main roads and highways by solid fencing or landscaping. |
| Landscaping   |   |
| PO 3.1<br>Development incorporates generous landscaping areas along the frontage to arterial roads and highways to enhance visual amenity and complement associated buildings.  | DTS/DPF 3.1<br>None are applicable.   |
| PO 3.2<br>Existing mature on-site vegetation is retained and incorporated into landscape and parking areas to enhance the appearance of land and buildings.   | DTS/DPF 3.2<br>None are applicable.   |
| PO 3.3<br>Development incorporates generous landscaping areas along the frontage to arterial roads and landscaped using a combination of high crown evergreen trees, low shrubs and groundcovers to enhance visual amenity and complement the associated buildings.                           | DTS/DPF 3.3<br>None are applicable.   |
| PO 3.4<br>Vehicle parking areas are located and designed to enhance the streetscape setting by:<br><br>(a) being located to the side or rear of buildings facing arterial and main roads and highways<br><br>(b) incorporating landscaping, including trees, to break up large parking areas. | DTS/DPF 3.4<br>None are applicable.   |
| Advertisements  |   |
| PO 4.1<br>Advertisements along arterial and main roads, and highways are consistent in height, size and design to support a cohesive and uniform appearance in gateway locations without dominating the streetscape.  | DTS/DPF 4.1<br>Advertisements meet all the following:<br><br>(a) will not result in more than 1 advertisement per allotment<br>(b) will not exceed 5m in height<br>(c) do not exceed 3m <sup>2</sup> per advertising face<br>(d) are not internally illuminated<br>(e) are not animated, flash or move in any way.  |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Hazards (Acid Sulfate Soils) Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Development is located and undertaken to minimise disturbance of potential or actual acid sulfate soils and / or the release of acid drainage. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---------------------|---|
|---------------------|---|

Land Use and Intensity

|   |   |
|---|---|
| <p>PO 1.1</p> <p>Development that involves excavation or a change to a water table where potential or actual acid sulfate soils are present is undertaken to minimise soil disturbance or drainage; prevent or minimise oxidation; and contain and treat any acid drainage to prevent harm or damage to the environment, primary production, buildings, structures and infrastructure or public health.</p> | <p>DTS/DPF 1.1</p> <p>Development does not involve or cause:</p> <ul style="list-style-type: none"> <li>(a) excavation of land</li> <li>(b) change to a water table.</li> </ul> |
|---|---|

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Hazards (Bushfire - General Risk) Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Development, including land division responds to the general level of bushfire risk by siting and designing buildings in a manner that mitigates the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change. |
| DO 2            | To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.  |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| Siting   |  |
| <p>PO 1.1</p> <p>Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.</p>   | <p>DTS/DPF 1.1</p> <p>None are applicable.</p>   |
| Built Form   |  |
| <p>PO 2.1</p> <p>Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.</p>                                   | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>   |
| <p>PO 2.2</p> <p>Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.</p>                       | <p>DTS/DPF 2.2</p> <p>Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.</p> |
| Habitable Buildings  |  |
| <p>PO 3.1</p> <p>To minimise the threat, impact and exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.</p> | <p>DTS/DPF 3.1</p> <p>None are applicable.</p>   |
| <p>PO 3.2</p>  | <p>DTS/DPF 3.2</p>   |

|   |  |
|---|--|
| <p>Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.</p>   | <p>Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b):</p> <ul style="list-style-type: none"> <li>(a) the asset protection zone has a minimum width of at least: <ul style="list-style-type: none"> <li>(i) 50 metres to unmanaged grasslands</li> <li>(ii) 100 metres to hazardous bushland vegetation</li> </ul> </li> <li>(b) the asset protection zone is contained wholly within the allotment of the development.</li> </ul>   |
| <p>PO 3.3<br/>Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated area available that is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with <i>Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements</i>.</p> | <p>DTS/DPF 3.3<br/>None are applicable.</p>  |
| <p>Land Division</p>  |  |
| <p>PO 4.1<br/>Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.</p>   | <p>DTS/DPF 4.1<br/>None are applicable.</p>  |
| <p>PO 4.2<br/>Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.</p>   | <p>DTS/DPF 4.2<br/>None are applicable.</p>  |
| <p>PO 4.3<br/>Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.</p>  | <p>DTS/DPF 4.3<br/>None are applicable.</p>  |
| <p>PO 4.4<br/>Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.</p>   | <p>DTS/DPF 4.4<br/>None are applicable.</p>  |
| <p>Vehicle Access – Roads, Driveways and Fire Tracks</p>  |  |
| <p>PO 5.1<br/>Roads are designed and constructed to facilitate the safe and effective:</p> <ul style="list-style-type: none"> <li>(a) access, operation and evacuation of fire-fighting vehicles and emergency personnel</li> <li>(b) evacuation of residents, occupants and visitors.</li> </ul>   | <p>DTS/DPF 5.1<br/>Roads:</p> <ul style="list-style-type: none"> <li>(a) are constructed with a formed, all-weather surface</li> <li>(b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road</li> <li>(c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road</li> <li>(d) have a minimum formed road width of 6m</li> <li>(e) provide overhead clearance of not less than 4m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1)</li> <li>(f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)</li> <li>(g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: <ul style="list-style-type: none"> <li>(i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or</li> <li>(ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4)</li> </ul> </li> <li>(h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.</li> </ul> |
| <p>PO 5.2<br/>Access to habitable buildings is designed and constructed to facilitate the safe and effective:</p> <ul style="list-style-type: none"> <li>(a) access, operation and evacuation of fire-fighting vehicles and emergency personnel</li> <li>(b) evacuation of residents, occupants and visitors</li> </ul>   | <p>DTS/DPF 5.2<br/>Access is in accordance with (a) or (b):</p> <ul style="list-style-type: none"> <li>(a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road</li> <li>(b) driveways: <ul style="list-style-type: none"> <li>(i) do not exceed 600m in length</li> <li>(ii) are constructed with a formed, all-weather surface</li> <li>(iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8)</li> <li>(iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway</li> <li>(v) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the driveway</li> <li>(vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1)</li> </ul> </li> </ul>  |

|   |   |
|---|---|
|   | <ul style="list-style-type: none"> <li>(vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5)</li> <li>(viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1)</li> <li>(ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)</li> <li>(x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either:             <ul style="list-style-type: none"> <li>A. a loop road around the building</li> <li>B. a turning area with a minimum radius of 12.5m (Figure 3)</li> <li>C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4)</li> </ul> </li> <li>(xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.</li> </ul> |
| <p>PO 5.3<br/>Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.</p> | <p>DTS/DPF 5.3<br/>None are applicable.</p>   |

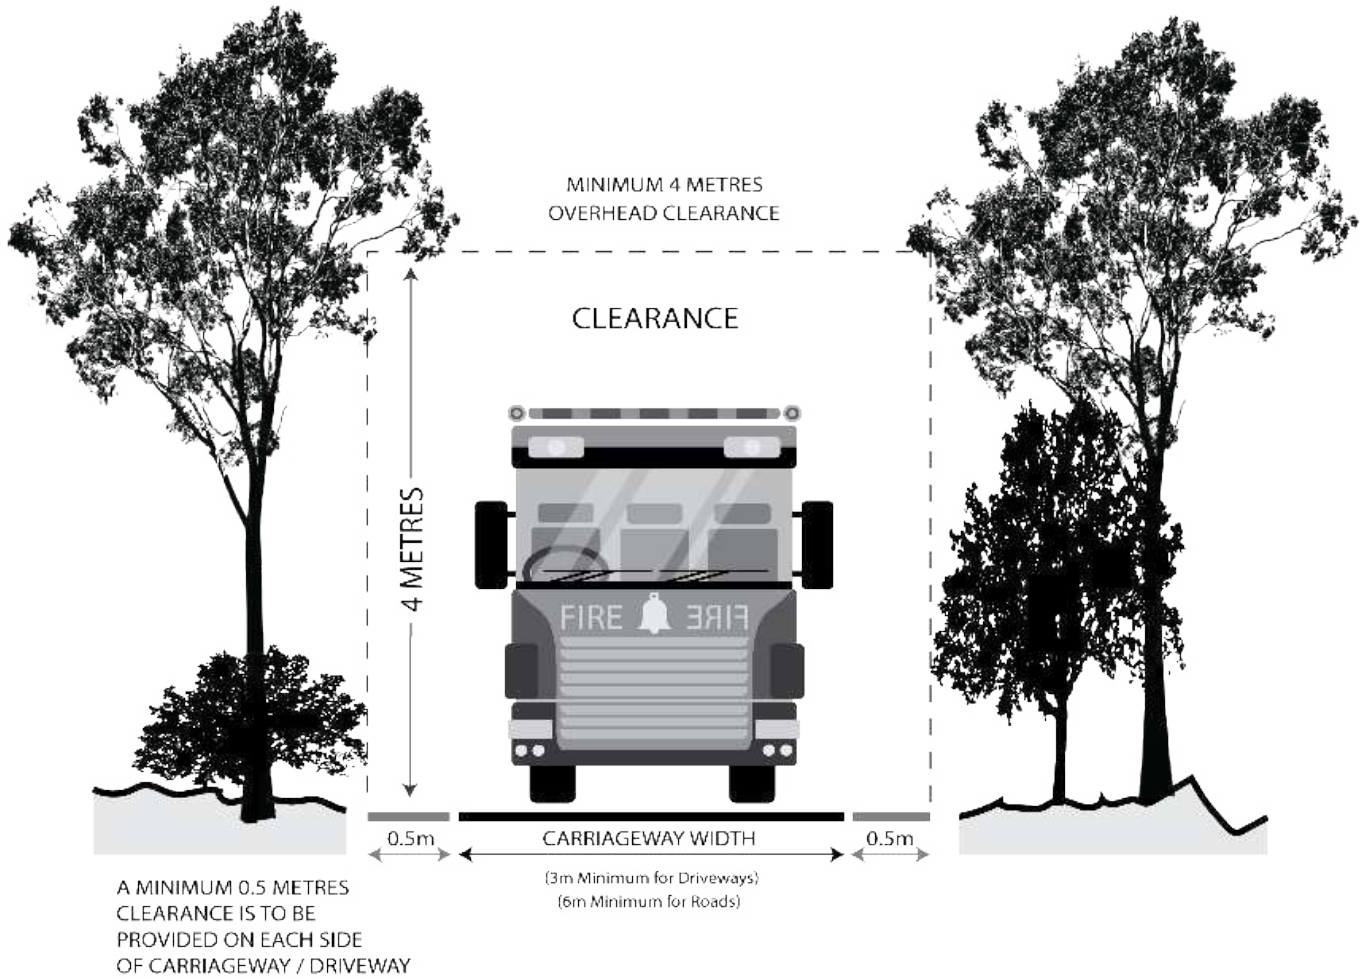

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Figures and Diagrams**

Roads and Driveway Design

Figure 2 - Road and Driveway Curves

Curves to allow fire trucks to turn into the track without having to back-up several times - minimum external radius of 12.5m.

Figure 3 - Full Circle Turning Area

Fire truck turning area -  
minimum radius 12.5m

Figure 4 - 'T' or 'Y' Shaped Turning Head

"T" shaped turning area  
for fire trucks to reverse  
into so they can turn  
around  
- minimum length 11m.

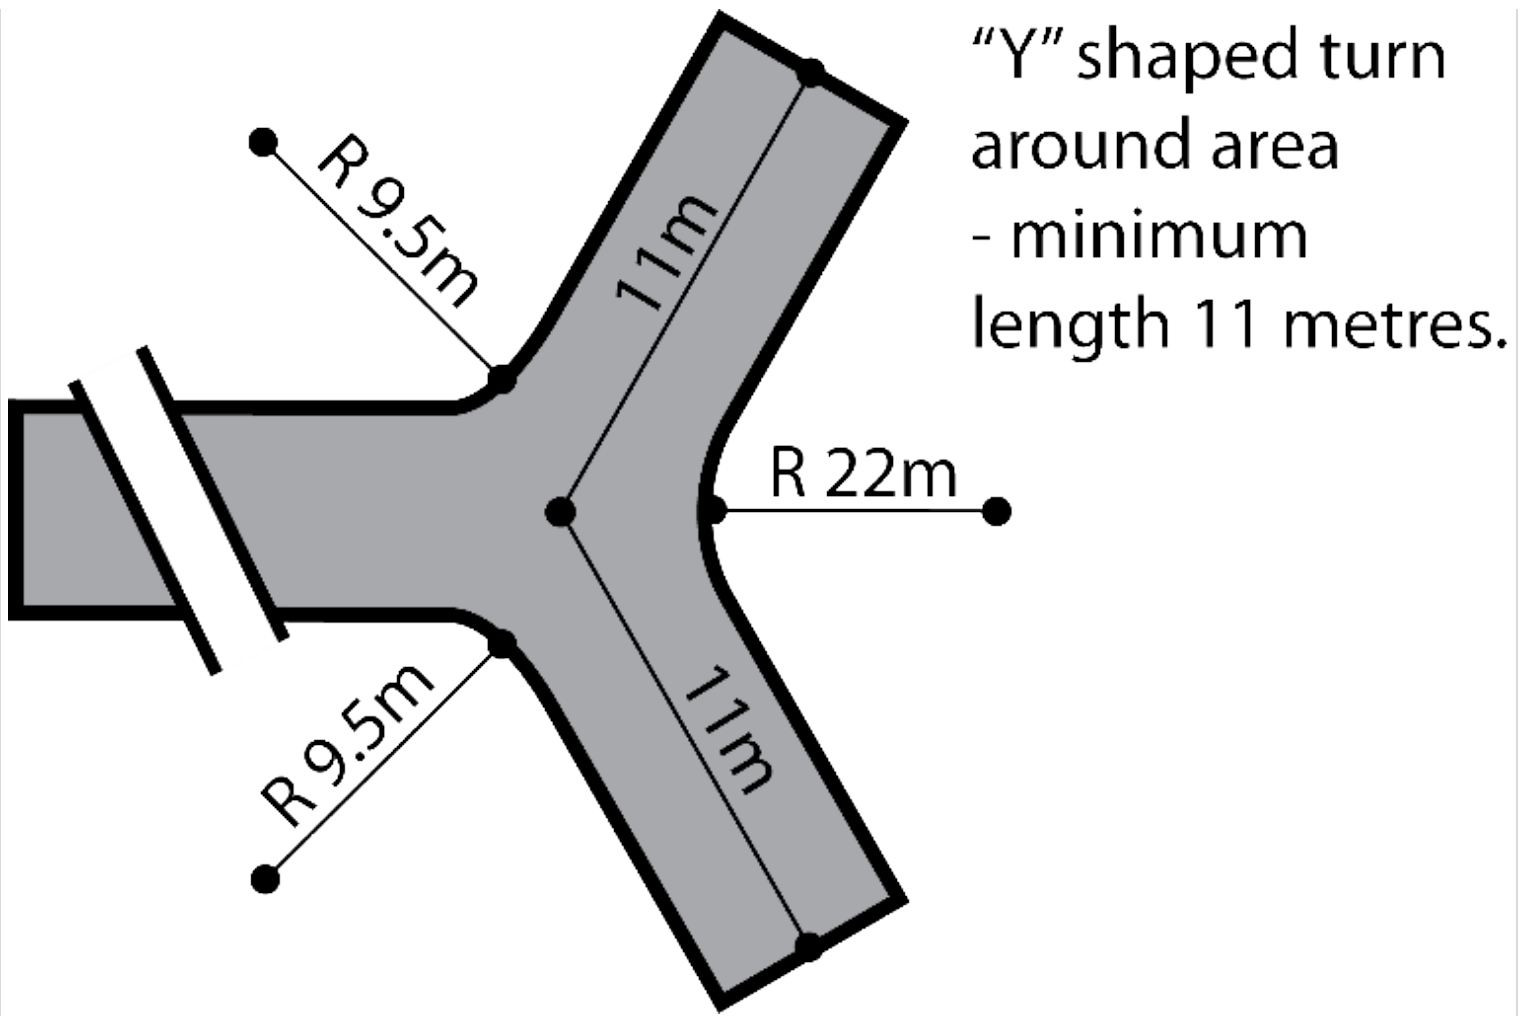

Figure 5 - Driveway Passing Bays

Passing bay for fire trucks - minimum width 6 metres, minimum length 17 metres.

Hazards (Bushfire - High Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | <p>Development, including land division is sited and designed to minimise the threat and impact of bushfires on life and property with regard to the following risks:</p> <ul style="list-style-type: none"> <li>(a) potential for uncontrolled bushfire events taking into account the increased frequency and intensity of bushfires as a result of climate change</li> <li>(b) high levels and exposure to ember attack</li> <li>(c) impact from burning debris</li> <li>(d) radiant heat</li> <li>(e) likelihood and direct exposure to flames from a fire front.</li> </ul> |
| DO 2            | Activities that increase the number of people living and working in the area or where evacuation would be difficult is sited away from areas of unacceptable bushfire risk.  |
| DO 3            | To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.  |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| Land Use   |   |
| <p>PO 1.1</p> <p>Development that significantly increases the potential for fire outbreak as a result of the spontaneous combustion of materials, spark generation or through the magnification and reflection of light is not located in areas of unacceptable bushfire risk.</p>   | <p>DTS/DPF 1.1</p> <p>None are applicable.</p>  |
| <p>PO 1.2</p> <p>Child care facilities, educational facilities, hospitals, retirement and supported accommodation are sited away from areas of unacceptable bushfire risk and locations that:</p> <ul style="list-style-type: none"> <li>(a) are remote from or require extended periods of travel to reach safer locations</li> <li>(b) don't have a safe path of travel to safer locations.</li> </ul> | <p>DTS/DPF 1.2</p> <p>None are applicable.</p>  |
| Siting   |   |
| <p>PO 2.1</p> <p>Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.</p>   | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>  |
| Built Form   |   |
| <p>PO 3.1</p> <p>Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.</p>   | <p>DTS/DPF 3.1</p> <p>None are applicable.</p>  |
| <p>PO 3.2</p> <p>Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.</p>                                       | <p>DTS/DPF 3.2</p> <p>Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.</p>  |
| Habitable Buildings  |   |
| <p>PO 4.1</p> <p>To minimise the threat, impact and potential exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.</p>       | <p>DTS/DPF 4.1</p> <p>None are applicable.</p>  |
| <p>PO 4.2</p> <p>Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.</p>  | <p>DTS/DPF 4.2</p> <p>Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b):</p> <ul style="list-style-type: none"> <li>(a) the asset protection zone has a minimum width of at least:                             <ul style="list-style-type: none"> <li>(i) 50 metres to unmanaged grasslands</li> <li>(ii) 100 metres to hazardous bushland vegetation</li> </ul> </li> </ul> |

|  |  |
|--|--|
|  | (b) the asset protection zone is contained wholly within the allotment of the development.   |
| <p>PO 4.3</p> <p>Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated area available that:</p> <p>(a) is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with <i>Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements</i></p> <p>(b) includes the provision of an all-weather hardstand area in a location that:</p> <p>(i) allows fire-fighting vehicles to safely access the dedicated water supply and exit the site in a forward direction</p> <p>(ii) is no further than 6 metres from the dedicated water supply outlet(s) where required.</p> | <p>DTS/DPF 4.3</p> <p>None are applicable.</p>   |
| Land Division  |  |
| <p>PO 5.1</p> <p>Land division for residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is limited to those areas specifically set aside for these uses.</p>   | <p>DTS/DPF 5.1</p> <p>None are applicable.</p>   |
| <p>PO 5.2</p> <p>Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.</p>   | <p>DTS/DPF 5.2</p> <p>None are applicable.</p>   |
| <p>PO 5.3</p> <p>Land division is designed to provide a continuous street pattern (avoiding the use of dead end roads/cul-de-sac road design) to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors. Where cul-de-sac / dead end roads are proposed, an alternative emergency evacuation route is provided.</p>  | <p>DTS/DPF 5.3</p> <p>None are applicable.</p>   |
| <p>PO 5.4</p> <p>Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.</p>  | <p>DTS/DPF 5.4</p> <p>None are applicable.</p>   |
| <p>PO 5.5</p> <p>Land division provides sufficient space for future asset protection zones and incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.</p>   | <p>DTS/DPF 5.5</p> <p>None are applicable.</p>   |
| Vehicle Access –Roads, Driveways and Fire Tracks   |  |
| <p>PO 6.1</p> <p>Roads are designed and constructed to facilitate the safe and effective:</p> <p>(a) access, operation and evacuation of fire-fighting vehicles and emergency personnel</p> <p>(b) evacuation of residents, occupants and visitors.</p>  | <p>DTS/DPF 6.1</p> <p>Roads:</p> <p>(a) are constructed with a formed, all-weather surface</p> <p>(b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road</p> <p>(c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road</p> <p>(d) have a minimum formed road width of 6m</p> <p>(e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1)</p> <p>(f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)</p> <p>(g) incorporating cul-de-sac endings or dead end roads are provided within an alternative evacuation route and do not exceed 200m in length and the end of the road has either:</p> <p>(i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or</p> <p>(ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4)</p> <p>(h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.</p> |
| <p>PO 6.2</p> <p>Access to habitable buildings is designed and constructed to facilitate the safe and effective:</p> <p>(a) use, operation and evacuation of fire-fighting and emergency personnel</p> <p>(b) evacuation of residents, occupants and visitors.</p>   | <p>DTS/DPF 6.2</p> <p>Access is in accordance with (a) or (b):</p> <p>(a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road</p> <p>(b) driveways:</p> <p>(i) do not exceed 600m in length</p>  |

|  |  |
|--|--|
|  | <ul style="list-style-type: none"> <li>(ii) are constructed with a formed, all-weather surface</li> <li>(iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8)</li> <li>(iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway</li> <li>(v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway</li> <li>(vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1)</li> <li>(vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5)</li> <li>(viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1)</li> <li>(ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)</li> <li>(x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either:             <ul style="list-style-type: none"> <li>A. a loop road around the building or</li> <li>B. a turning area with a minimum radius of 12.5m (Figure 3) or</li> <li>C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4)</li> </ul> </li> <li>(xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.</li> </ul> |
| <p>PO 6.3</p> <p>Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.</p> | <p>DTS/DPF 6.3</p> <p>None are applicable.</p>   |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body                                 | Purpose of Referral  | Statutory Reference   |
|---|---|--|---|
| <p>Except if a <b>relevant certificate</b> accompanies the application for planning consent in respect of the development, any of the following classes of development (including alterations and additions which increase the floor area of such buildings by 10% or more):</p> <ul style="list-style-type: none"> <li>(a) land division creating one or more additional allotments</li> <li>(b) dwelling</li> <li>(c) ancillary accommodation</li> <li>(d) residential flat building</li> <li>(e) tourist accommodation</li> <li>(f) boarding home</li> <li>(g) dormitory style accommodation</li> <li>(h) workers' accommodation</li> <li>(i) student accommodation</li> <li>(j) child care facility</li> <li>(k) educational facility</li> <li>(l) retirement village</li> <li>(m) supported accommodation</li> <li>(n) residential park</li> <li>(o) hospital</li> <li>(p) camp ground.</li> </ul> | <p>South Australian Country Fire Service.</p> | <p>To provide expert assessment and direction to the relevant authority on the potential impacts of bushfire on the development.</p> | <p>Development of a class to which Schedule 9 clause 3 item 2 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |

Hazards (Bushfire - Medium Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Development, including land division responds to the medium level of bushfire risk and potential for ember attack and radiant heat by siting and designing buildings in a manner that mitigates the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change. |
| DO 2            | To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.   |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| Siting  |  |
| PO 1.1<br>Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.   | DTS/DPF 1.1<br>None are applicable.  |
| Built Form  |  |
| PO 2.1<br>Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.   | DTS/DPF 2.1<br>None are applicable.  |
| PO 2.2<br>Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.   | DTS/DPF 2.2<br>Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.  |
| Habitable Buildings   |  |
| PO 3.1<br>To minimise the threat, impact and potential exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.   | DTS/DPF 3.1<br>None are applicable.  |
| PO 3.2<br>Residential, tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.   | DTS/DPF 3.2<br>Residential, tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b):<br><br>(a) the asset protection zone has a minimum width of at least:<br>(i) 50 metres to unmanaged grasslands<br>(ii) 100 metres to hazardous bushland vegetation<br><br>(b) the asset protection zone is contained wholly within the allotment of the development. |
| PO 3.3<br>Residential, tourist accommodation and habitable buildings for vulnerable communities, (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation), has a dedicated area available that is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with <i>Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements</i> . | DTS/DPF 3.3<br>None are applicable.  |
| Land Division   |  |
| PO 4.1<br>Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.   | DTS/DPF 4.1<br>None are applicable.  |
| PO 4.2<br>Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.   | DTS/DPF 4.2<br>None are applicable.  |

|   |  |
|---|--|
| <p>PO 4.3</p> <p>Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.</p>   | <p>DTS/DPF 4.3</p> <p>None are applicable.</p>   |
| <p>PO 4.4</p> <p>Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.</p>                            | <p>DTS/DPF 4.4</p> <p>None are applicable.</p>   |

Hazards (Bushfire - Regional) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Development, including land division responds to the relevant level of bushfire risk and is sited and designed to mitigate the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change. |
| DO 2            | To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.  |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Siting  |   |
| PO 1.1<br>Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.   | DTS/DPF 1.1<br>None are applicable.   |
| Built Form  |   |
| PO 2.1<br>Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.                                   | DTS/DPF 2.1<br>None are applicable.   |
| PO 2.2<br>Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) in the event of bushfire.                       | DTS/DPF 2.2<br>Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.   |
| Habitable Buildings   |   |
| PO 3.1<br>To minimise the threat, impact and exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes. | DTS/DPF 3.1<br>None are applicable.   |
| PO 3.2<br>Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.  | DTS/DPF 3.2<br>Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b):<br><br>(a) the asset protection zone has a minimum width of at least:<br>(i) 50 metres to unmanaged grasslands<br>(ii) 100 metres to hazardous bushland vegetation<br><br>(b) the asset protection zone is contained wholly within the allotment of the development. |
| PO 3.3<br>Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated and accessible water supply available at all times for fire-fighting purposes.   | DTS/DPF 3.3<br>Development has a dedicated water supply available at all times for fire-fighting purposes:<br><br>(a) comprising a minimum of 5000 litres<br>(b) positioned in an accessible location and accompanied with necessary equipment to allow occupants to minimise the spread of bushfire to the habitable building(s).  |
| Land Division   |   |
| PO 4.1<br>Land division is designed to and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.  | DTS/DPF 4.1<br>None are applicable.   |
| PO 4.2<br>Land division designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.  | DTS/DPF 4.2<br>None are applicable.   |

|   |  |
|---|--|
| <p>PO 4.3</p> <p>Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.</p>   | <p>DTS/DPF 4.3</p> <p>None are applicable.</p>   |
| <p>PO 4.4</p> <p>Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.</p>                            | <p>DTS/DPF 4.4</p> <p>None are applicable.</p>   |
| <p>Vehicle Access -Roads and Driveways</p>  |  |
| <p>PO 5.1</p> <p>Roads are designed and constructed to facilitate the safe and effective:</p> <ul style="list-style-type: none"> <li>(a) access, operation and evacuation of fire-fighting vehicles and emergency personnel</li> <li>(b) evacuation of residents, occupants and visitors.</li> </ul>                        | <p>DTS/DPF 5.1</p> <p>Roads:</p> <ul style="list-style-type: none"> <li>(a) are constructed with a formed, all-weather surface</li> <li>(b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road</li> <li>(c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road</li> <li>(d) have a minimum formed road width of 6m</li> <li>(e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1)</li> <li>(f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)</li> <li>(g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: <ul style="list-style-type: none"> <li>(i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or</li> <li>(ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4)</li> </ul> </li> <li>(h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.</li> </ul>  |
| <p>PO 5.2</p> <p>Access to habitable buildings is designed and constructed to facilitate the safe and effective:</p> <ul style="list-style-type: none"> <li>(a) access, operation and evacuation of fire-fighting vehicles and emergency personnel</li> <li>(b) evacuation of residents, occupants and visitors.</li> </ul> | <p>DTS/DPF 5.2</p> <p>Access is in accordance with (a) or (b):</p> <ul style="list-style-type: none"> <li>(a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road</li> <li>(b) driveways: <ul style="list-style-type: none"> <li>(i) do not exceed 600m in length</li> <li>(ii) are constructed with a formed, all-weather surface</li> <li>(iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8)</li> <li>(iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway</li> <li>(v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway</li> <li>(vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1)</li> <li>(vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5)</li> <li>(viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1)</li> <li>(ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)</li> <li>(x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: <ul style="list-style-type: none"> <li>A. a loop road around the building or</li> <li>B. a turning area with a minimum radius of 12.5m (Figure 3) or</li> <li>C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4)</li> </ul> </li> <li>(xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.</li> </ul> </li> </ul> |
| <p>PO 5.3</p> <p>Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.</p>  | <p>DTS/DPF 5.3</p> <p>None are applicable.</p>   |

**Procedural Matters (PM) - Referrals**

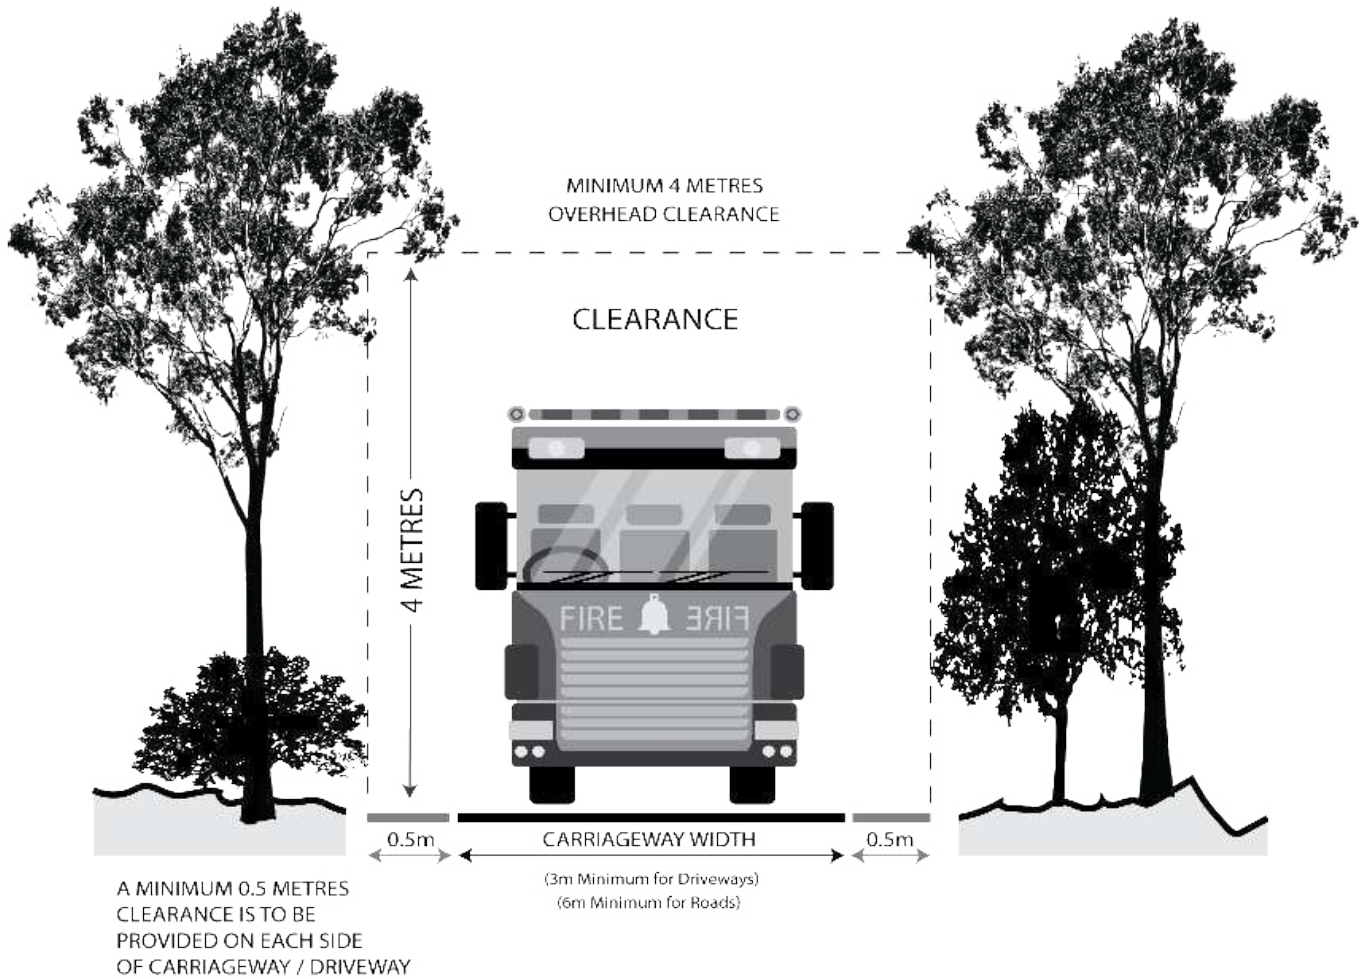

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

## Hazards (Flooding) Overlay

### Assessment Provisions (AP)

#### Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Impacts on people, property, infrastructure and the environment from high flood risk are minimised by retaining areas free from development, and minimising intensification where development has occurred. |

#### Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| Land Division  |   |
| PO 1.1<br>Land division is limited to areas where the consequences to buildings and safety are low and can be readily managed or overcome.   | DTS/DPF 1.1<br>None are applicable.   |
| Land Use   |   |
| PO 2.1<br>Development sited and designed to minimise exposure of people and property to unacceptable flood risk.   | DTS/DPF 2.1<br>None are applicable.   |
| PO 2.2<br>Buildings housing vulnerable people, community services facilities, key infrastructure and emergency services are sited away from flood prone areas to enable uninterrupted operation of services and reduce likelihood of entrapment. | DTS/DPF 2.2<br>Child care facilities, educational facilities, retirement and supported accommodation, emergency services facilities, hospitals and prisons are not located within the Overlay area. |
| Flood Resilience   |   |
| PO 3.1<br>Development avoids the need for flood protection works.  | DTS/DPF 3.1<br>None are applicable.   |
| PO 3.2<br>Development does not cause unacceptable impacts on any adjoining property by the   | DTS/DPF 3.2<br>None are applicable.   |

|  |  |
|--|--|
| diversion of flood waters or an increase in flood velocity or flood level.   |  |
| PO 3.3<br>Development does not impede the flow of floodwaters through the allotment or the surrounding land, or cause an unacceptable loss of flood storage.   | DTS/DPF 3.3<br>None are applicable.  |
| PO 3.4<br>Development avoids frequently flooded or high velocity areas, other than where it is part of a flood mitigation scheme to reduce flood impact.   | DTS/DPF 3.4<br>Other than a recreation area, development is located outside of the 5% AEP principal flow path.   |
| PO 3.5<br>Buildings are sited, designed and constructed to prevent the entry of floodwaters in a 1% AEP flood event where the entry of floodwaters is likely to result in undue damage to, or compromise ongoing activities within, buildings.   | DTS/DPF 3.5<br>Buildings comprise one of the following:<br><br>(a) a porch or portico with at least 2 open sides<br>(b) a verandah with at least 3 open sides<br>(c) a carport or outbuilding with at least 2 open sides (whichever elevations face the direction of the flow)<br>(d) any post construction with open sides<br>(e) a building with a finished floor level that is at least 300mm above the height of a 1% AEP flood event. |
| PO 3.6<br>Fences do not unreasonably impede floodwaters.   | DTS/DPF 3.6<br>A post and wire fence (other than a chain mesh fence).  |
| Environmental Protection   |  |
| PO 4.1<br>Buildings and structures used either partly or wholly to contain or store hazardous materials are designed to prevent spills or leaks leaving the confines of the building during a 1% AEP flood event to avoid potential environmental harm.  | DTS/DPF 4.1<br>Development involving the storage or disposal of hazardous materials is wholly located outside of the 1% AEP flood plain or flow path.  |
| PO 4.2<br>Development does not create or aggravate the potential for erosion or siltation or lead to the destruction of vegetation during a flood.   | DTS/DPF 4.2<br>None are applicable.  |
| Site Earthworks  |  |
| PO 5.1<br>The depth and extent of filling required to raise the finished floor level of a building does not cause unacceptable impact on any adjoining property by diversion of flood waters, an increase in flood velocity or flood level, or an unacceptable loss of flood storage.              | DTS/DPF 5.1<br>None are applicable.  |
| PO 5.2<br>Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.  | DTS/DPF 5.2<br>Filling for ancillary purposes:<br><br>(a) does not exceed 300mm above existing ground level<br>(b) is no more than 5m wide.  |
| Access   |  |
| PO 6.1<br>Development does not occur on land:<br><br>(a) from which evacuation to areas not vulnerable to flood risk is not possible during a 1% AEP flood event<br>(b) which cannot be accessed by emergency services vehicles or essential utility service vehicles during a 1% AEP flood event. | DTS/DPF 6.1<br>None are applicable.  |
| PO 6.2<br>Access driveways and tracks to significant development (i.e. dwellings, places of work, etc.) consist of a safe, all-weather trafficable surface that is accessible during a 1% AEP flood event.   | DTS/DPF 6.2<br>None are applicable.  |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

| DO 1            | Development adjacent to State and Local Heritage Places maintains the heritage and cultural values of those Places. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| Built Form   |   |
| PO 1.1<br>Development adjacent to a State or Local Heritage Place does not dominate, encroach on or unduly impact on the setting of the Place.   | DTS/DPF 1.1<br>None are applicable.                         |
| Land Division  |   |
| PO 2.1<br>Land division adjacent to a State or Local Heritage Place creates allotments that are of a size and dimension that enables the siting and setbacks of new buildings from allotment | DTS/DPF 2.1<br>None are applicable.                         |

boundaries so that they do not dominate, encroach or unduly impact on the setting of the Place.

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body  | Purpose of Referral  | Statutory Reference   |
|---|--|--|---|
| Development which in the opinion of the relevant authority materially affects the context within which the <b>State Heritage Place</b> is situated. | Minister responsible for the administration of the <i>Heritage Places Act 1993</i> . | To provide expert assessment and direction to the relevant authority on the potential impacts of development adjacent State Heritage Places. | Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

### Historic Area Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Historic themes and characteristics are reinforced through conservation and contextually responsive development, design and adaptive reuse that responds to existing coherent patterns of land division, site configuration, streetscapes, building siting and built scale, form and features as exhibited in the Historic Area and expressed in the Historic Area Statement. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| All Development  |   |
| PO 1.1<br>All development is undertaken having consideration to the historic streetscapes and built form as expressed in the Historic Area Statement.  | DTS/DPF 1.1<br>None are applicable.                         |
| Built Form   |   |
| PO 2.1<br>The form and scale of new buildings and structures that are visible from the public realm are consistent with the prevailing historic characteristics of the historic area.  | DTS/DPF 2.1<br>None are applicable.                         |
| PO 2.2<br>Development is consistent with the prevailing building and wall heights in the historic area.  | DTS/DPF 2.2<br>None are applicable.                         |
| PO 2.3<br>Design and architectural detailing of street-facing buildings (including but not limited to roof pitch and form, openings, chimneys and verandahs) complement the prevailing characteristics in the historic area. | DTS/DPF 2.3<br>None are applicable.                         |
| PO 2.4<br>Development is consistent with the prevailing front and side boundary setback pattern in the historic area.  | DTS/DPF 2.4<br>None are applicable.                         |
| PO 2.5   | DTS/DPF 2.5   |

|   |   |
|---|---|
| Materials are either consistent with or complement those within the historic area.  | None are applicable.  |
| Alterations and additions   |   |
| PO 3.1<br>Alterations and additions complement the subject building, employ a contextual design approach and are sited to ensure they do not dominate the primary façade.   | DTS/DPF 3.1<br>Alterations and additions are fully contained within the roof space of an existing building with no external alterations made to the building elevation facing the primary street. |
| PO 3.2<br>Adaptive reuse and revitalisation of buildings to support retention consistent with the Historic Area Statement.  | DTS/DPF 3.2<br>None are applicable.   |
| Ancillary development   |   |
| PO 4.1<br>Ancillary development, including carports, outbuildings and garages, complements the historic character of the area and associated buildings.   | DTS/DPF 4.1<br>None are applicable.   |
| PO 4.2<br>Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s) and does not dominate the building or its setting.  | DTS/DPF 4.2<br>None are applicable.   |
| PO 4.3<br>Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, be below the parapet line, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.  | DTS/DPF 4.3<br>None are applicable.   |
| PO 4.4<br>Fencing and gates closer to a street boundary (other than a laneway) than the elevation of the associated building are consistent with the traditional period, style and form of the associated building.   | DTS/DPF 4.4<br>None are applicable.   |
| Land Division   |   |
| PO 5.1<br>Land division creates allotments that are:<br><br>(a) compatible with the surrounding pattern of subdivision in the historic area<br>(b) of a dimension to accommodate buildings of a bulk and scale that reflect existing buildings and setbacks in the historic area  | DTS/DPF 5.1<br>None are applicable.   |
| Context and Streetscape Amenity   |   |
| PO 6.1<br>The width of driveways and other vehicle access ways are consistent with the prevailing width of existing driveways of the historic area.   | DTS/DPF 6.1<br>None are applicable.   |
| PO 6.2<br>Development maintains the valued landscape patterns and characteristics that contribute to the historic area, except where they compromise safety, create nuisance, or impact adversely on buildings or infrastructure.   | DTS/DPF 6.2<br>None are applicable.   |
| Demolition  |   |
| PO 7.1<br>Buildings and structures, or features thereof, that demonstrate the historic characteristics as expressed in the Historic Area Statement are not demolished, unless:<br><br>(a) the front elevation of the building has been substantially altered and cannot be reasonably restored in a manner consistent with the building's original style or<br>(b) the structural integrity or safe condition of the original building is beyond reasonable repair. | DTS/DPF 7.1<br>None are applicable.   |
| PO 7.2<br>Partial demolition of a building where that portion to be demolished does not contribute to the historic character of the streetscape.  | DTS/DPF 7.2<br>None are applicable.   |
| PO 7.3<br>Buildings or elements of buildings that do not conform with the values described in the Historic Area Statement may be demolished.  | DTS/DPF 7.3<br>None are applicable.   |
| Ruins   |   |
| PO 8.1<br>Development conserves and complements features and ruins associated with former activities of significance.   | DTS/DPF 8.1<br>None are applicable.   |

**North Adelaide Wellington Square Historic Area Statement (Adel3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

|   |   |
|---|---|
| Eras, themes and context                                | <p>1837 to 1901 - Victorian period.</p> <p>1920's to 1942 - Inter-war period.</p> <p>Residential development. Important historical public space.</p>  |
| Allotments, subdivision and built form patterns         | <p>Cohesive built form edge to the Square. Buildings sited close to side boundaries. Building set-back and subdivision pattern established by Heritage Places.</p>  |
| Architectural styles, detailing and built form features | <p>Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights.</p> <p>Inter-War Housing consisting of Bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments.</p> <p>Historic built form comprising large, single storey Local Heritage places and one or two storey State Heritage places. Townscape is contiguous with and complementary to the townscape character of the major</p> |

**North Adelaide Tynte Historic Area Statement (Adel4)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

|   |   |
|---|---|
| Eras, themes and context                                | <p>1837 to 1901 - Victorian period.</p> <p>1920's to 1942 - Inter-war period.</p> <p>Low and medium density residential development characterised by a range of dwelling types as well as community facilities; Formal and dignified historic character derived from traditional community uses such as the post office, library, hotel, church and kindergarten.</p> |
| Allotments, subdivision and built form patterns         | <i>[Not stated]</i>   |
| Architectural styles, detailing and built form features | Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to   |

**North Adelaide Cathedral Historic Area Statement (Adel9)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

|   |   |
|---|---|
| Eras, themes and context                                | <p>1837 to 1901 - Victorian period.</p> <p>1920's to 1942 - Inter-war period.</p> <p>Diverse range of nineteenth century predominantly residential architecture with extensive Park Lands frontages.</p>  |
| Allotments, subdivision and built form patterns         | <p>Cohesive lines of buildings set behind landscaping.</p> <p><u>Brougham Court</u></p> <p>Closely sited dwellings with consistent setbacks.</p> <p><u>Kermode Street</u></p> <p>Traditional subdivision pattern to the east of Bagot Street.</p> <p>Existing pattern of development characterised by freestanding buildings within landscaped grounds.</p> <p><u>Pennington Terrace</u></p> <p>Considerable siting, set-back, scale and character variation of State Heritage places.</p> <p><u>King William Road</u></p> <p>Grand, spacious character of the townscape created by St Peter's Cathedral.</p> <p><u>Lakeman Street</u></p> <p>Dwellings sited on the street frontage.</p> |
| Architectural styles, detailing and built form features | <p>Victorian housing that is single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally</p>   |

|   |   | <p>Street trees, avenue planting and other landscaping and a high standard of paving to the public realm.</p> <p>Landmark significance of the Brougham Place Uniting Church.</p> <p>The topography is characterised by the North Adelaide scarp, a steep rise from Melbourne Street to Stanley Street, below which the area is relatively flat, towards the River Torrens. The ridge of the scarp along Kingston Terrace/Stanley Street and the frontages to the Park Lands provided for prestigious residential addresses. The higher concentration of small cottages in the lower section below the scarp reflects the early subdivision of these Town Acres into estates providing workers housing following the establishment of local manufacturing industries such as the Lion Brewery. The creation of the road through Brougham Place in the 1860s and the introduction of horse drawn trams along Melbourne Street in 1878 gave this section of North Adelaide closer links with the rest of the City and made the area an attractive location for workers to live.</p> <p>Vehicle access is via minor streets, side and rear lanes. Vehicle access points have been designed and located to maintain historic kerbing and trees.</p> |

**Historic Areas Affecting Adelaide Hills Council**

**Mylor Historic Area Statement (AdHi1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

| Statement#               | Statement  |  |
|--------------------------|--|--|
| AdHi1                    | <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>  |  |
|                          | Eras, themes and context   | 1880 to late 1890s. Commercial centre. Workingmen's Block movement.  |
|                          | Allotments, subdivision and built form patterns  | Uniform rectangular allotments fronting the main street. Large site areas. Large street frontages. Varying front setbacks (residential development has generous setbacks with commercial/retail development located closer to the front boundary to address the main street). Varying side setbacks, with limited boundary development.  |
|                          | Architectural styles, detailing and built form features  | 1890s commercial buildings interspersed with a variety of civic and residential buildings.   |
|                          | Building height  | Generally small scale, single storey construction with the exception of the larger public buildings such as the Uniting Church and the former Institute building.  |
|                          | Materials  | Consistent with the materials associated with the architectural styles of the subject building and streetscape. Random coursed and rubble stone. Rendered stone. Brick and rendered quoins. Hipped and gabled roofs. Raked and bullnose verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. External finishes non-reflective incorporating a natural autumnal palate.  |
|                          | Fencing  | Front fences of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, to a height of 1200 millimetres.  |
|                          | Setting, landscaping, streetscape and public realm features  | <p>Rustic character. The township is enclosed on three sides by highly valued remnant vegetation within the Mylor Parklands. Leslie Creek and Aldgate Creek meander through the township before joining up with the Onkaparinga River to the south. The main entrance to Mylor from the north is marked by bridge crossings over Leslie and Aldgate Creeks, the war memorial and views to an avenue of deciduous trees which define the centre of the township. Views of the historic building within the primary school.</p> <p>Other important views along Strathalbyn Road include the heritage buildings containing the general store and rural supplies establishment which defines the southern entry to the township. Wide landscaped verge that incorporates an avenue of trees along Strathalbyn road accentuates the historic built form.</p> <p>Vehicular access at the rear of allotments fronting Strathalbyn Road.</p> |
| Representative Buildings | <i>[Not identified]</i>  |  |
| AdHi2                    | <p><b>Stirling - Ayres Hill Road Historic Area Statement (AdHi2)</b></p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |  |
|                          | Eras, themes and context   | Mid to late 1880s residential.   |
|                          | Allotments, subdivision and built form patterns  | Large blocks of land. Larger houses on large, well vegetated grounds. Dwellings set well back from the street boundary. Smaller subordinate buildings located closer to the street boundary.   |
|                          | Architectural styles, detailing and built form features  | The architectural style of the buildings varies with their date of construction.   |
|                          | Building height  | Building height to 9 metres. Original scale of buildings.  |
|                          | Materials  | Consistent with the materials associated with the architectural style of the subject building. Random, coursed and dressed stone. Rendered stone. Brick, stone and rendered quoins. String courses. Hipped and gabled roofs. Dormer windows. Raked verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. Decorative cast iron features. Brick and stone chimneys. Stone Porticos. Decorative and ornate timber bargeboards. External finishes non-reflective and utilise natural colours.  |
|                          | Fencing  | Front fencing of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, with varying heights to between 1200-1800 millimetres.   |
|                          | Setting, landscaping, streetscape and public realm features  | <p>'Secluded' nature of houses, in most cases set well back on their blocks, hidden behind the gardens and hedges.</p> <p>Streetscape is dominated by tree plantings and fencing behind which can be seen the larger trees and shrubs of the gardens. The lower section of the road (from Laurel Road to the roundabout near St Catherine's) is winding and bordered by hedges and trees. The upper portion of the road is straight and reveals a wider footpath margin than the lower section, adding to the feeling of privacy of the houses.</p> <p>Wide footpath verges which are of a rustic nature.</p> <p>Row and avenue plantings of exotic trees in the road verges.</p>  |

| Eras, themes and context | <p>Between the 1850s and 1880s Goolwa developed as one of Australia's most important river ports. Dwindling after the Morgan to Port Adelaide railway opened in 1878.</p> <p>Australia's first railway, a single-track horse powered tramway (1854) extended from Goolwa to Victor Harbor in 1864 and later converted to steam and rail, now forms part of a major tourist attraction, the 'Cockle Train' trip.</p> <p>Residential development commenced with the settlement of Goolwa. From the late 19th century to the present day, Goolwa's main focus has been as a tourist township, but the industrial historic legacy of earlier times which includes former breweries, sawmill, shipyards, the wharf area, the Goolwa Patent Slip and iron works and flour mill.</p> |  |

| Statement# | Statement   |  |
|------------|---|--|
| Alex4      |   | The Goolwa Historic Area is a residential area known as 'Little Scotland' adjoining the State Heritage Area to the north and bounded by the railway line to the south.   |
|            | Allotments, subdivision and built form patterns             | Small narrow allotments, with many dwellings built over two allotments giving appearance of larger frontages. Buildings parallel to street. Minimal side setbacks, often no driveways or vehicle access.   |
|            | Architectural styles, detailing and built form features     | Small humble workers' cottages. Gabled, hipped and parapeted roofs at 30-40 degree pitches. Separate verandah roof across frontage typical. High solid to void (window and door opening) ratio.<br><br>Carports and garages generally to the rear of allotments and not attached to dwellings. |
|            | Building height   | Single storey with external wall heights 3.8 - 4.1m and ceilings of at least 3m.   |
|            | Materials   | Stone, rendered masonry, weatherboard walls. Corrugated roofing. Distinct absence of contemporary materials.   |
|            | Fencing   | Low picket fences or timber post and rails often at verandah line, up to 1.2m high.  |
|            | Setting, landscaping, streetscape and public realm features | Intimate village, narrow streets with minimal or no footpaths. Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination.   |
|            | Representative Buildings                                    | <i>[Not identified]</i>  |

**Port Elliot Township Main Street and Suburban Neighbourhood Historic Area Statement (Alex5)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

|   |  |
|---|--|
| Eras, themes and context                                | <p>1850s-1920s.</p> <p><u>The Strand</u></p> <p>Residential and Small Commercial.</p> <p>Early commercial, civic and institutional buildings underpin the historic street. A compact commercial and shopping core towards North Terrace, with holiday houses and cottages concentrated towards Freeman's Lookout to the south. A pedestrian-friendly environment, preserving the backdrop to streetscapes on Charteris Street, Murray Terrace and Horseshoe Bay.</p> <p><u>Horseshoe Bay</u></p> <p>Former Port, Leisure.</p> <p>The focal point of the township and centre for leisure activities is Horseshoe Bay. It remains largely undeveloped, with landscape and natural elements prioritised.</p> <p><u>Murray Terrace</u></p> <p>Residential.</p> <p>The Murray Terrace section contains both historically significant buildings of the 19th Century and more recent dwellings which give the area a unique character, particularly the bungalow style dwellings located south of the railway line.</p> <p><u>North Terrace</u></p> <p>Commercial and Residential.</p> <p>This area provides the entrance to the historic Port Elliot township.</p> |
| Allotments, subdivision and built form patterns         | <p><u>The Strand</u></p> <p>Large allotment sizes and frontages. Minimal front setbacks to residential buildings, often no front setback to commercial buildings. Buildings parallel to street. Small to medium side setbacks.</p> <p><u>Murray Terrace</u></p> <p>Large allotment sizes and frontages. Minimal front setbacks south of the train line, significantly large front setbacks north of the train line. Buildings parallel to the street. Small to medium side setbacks.</p> <p><u>North Terrace</u></p> <p>Large allotment sizes and frontages. Medium to large front setbacks to residential buildings, typically no setback to commercial buildings. Buildings parallel to the street. Medium to large side setbacks to residential buildings, minimal setbacks to commercial buildings.</p>  |
| Architectural styles, detailing and built form features | <p><u>The Strand</u></p> <p>Square or rectangular ground plans with hipped and gabled roofs and mostly separate verandahs. Symmetrical facades common. High solid to void (door and window openings) ratio.</p> <p>Carports and garages generally to the rear of allotments and not attached to dwellings.</p>   |

**Historic Areas affecting The Barossa Council**

| <b>Angaston Centre Historic Area Statement (Baro1)</b>  |   |  |
|---|---|--|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |  |
| <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |  |
| <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |  |
| Baro1   | Eras, themes and context                                    | Early settlement in 1850s and 1860s. 19th and early 20th Century buildings and streetscapes.   |
|   | Allotments, subdivision and built form patterns             | Original development and subdivision pattern, especially in the vicinity of Hannay Crescent including the cemetery allotment.  |
|   | Architectural styles, detailing and built form features     | Banks, churches and hotels along Murray Street. Early post-supported verandas along sections of Murray Street.   |
|   | Building height   | Two storeys.   |
|   | Materials   | <i>[Not stated]</i>  |
|   | Fencing   | <i>[Not stated]</i>  |
|   | Setting, landscaping, streetscape and public realm features | <p>Significant visual backdrop formed by the hills, cemetery and stone walling when viewed from the Hannay Crescent area and Murray Street.</p> <p>The configuration of Murray Street with a bend at the Sturt Street junction provides interesting vistas east and west along the street.</p> <p>A vista is evident along Washington Street towards the Town Hall. Marble walling in front of the former Station Masters Residence, and former animal pound walls on the railway land.</p> <p>Along Murray Street, the paddock like nature of the land adjoining the creek bank links with the residential surrounds and, in association with the Murray Street park and rural backdrop, creates an attractive setting.</p> <p>Mature landscaping, deciduous street trees, Moreton Bay Fig trees, English Elm and the grouping of deciduous trees adjacent to the Laucke Mill on Murray Street.</p> |
|   | Representative Buildings                                    | Identified - refer to SA planning database.  |

| <b>Angaston Residential Historic Area Statement (Baro2)</b>   |   |  |
|---|---|--|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |  |
| <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |  |
| <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |  |
| Baro2   | Eras, themes and context                                    | <p>Late 1800s.</p> <p>1920s, second wave of prosperity for Angaston in the 20th Century.</p>   |
|   | Allotments, subdivision and built form patterns             | <i>[Not stated]</i>  |
|   | Architectural styles, detailing and built form features     | <p>Substantial residences in 1879-80.</p> <p>Residences of the 1920s.</p>  |
|   | Building height   | <i>[Not stated]</i>  |
|   | Materials   | Local stone.   |
|   | Fencing   | <i>[Not stated]</i>  |
|   | Setting, landscaping, streetscape and public realm features | <p>Tree lined streets, attractive gardens, varied topography, mature white cedars along Schilling Street, coprosma hedges in front of some houses (retaining early post and wire fence structures), mature ficus at the base of Dean Street, mature gums along the creek, and cypress hedges to many 1920s dwellings.</p> <p>Angas Recreation Park forms an important element located within the residential area. The park between Dean Street and Hill Street and Angaston Children's Reserve provides an open area for community use.</p> |
|   | Representative Buildings                                    | Identified - refer to SA planning database.  |

| Baro3                                  | <b>Bethany Historic Area Statement (Baro3)</b>  |   |
|  | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |   |
|  | Eras, themes and context  | Established in 1842 - one of the earliest substantial German settlements in the Barossa.  |
|  | Allotments, subdivision and built form patterns   | Subdivided according to the hufendorf principle of long strips. Houses built close to the road with long narrow allotments stretching out behind, together with significant timber structures, particularly farm buildings either close to the road or behind the farm houses.  |
|  | Architectural styles, detailing and built form features   | Early houses dating from the 1850s and the 1860s, many of which retain layouts and construction techniques clearly indicating their German origin.  |
|  | Building height   | <i>[Not stated]</i>   |
|  | Materials   | <i>[Not stated]</i>   |
|  | Fencing   | <i>[Not stated]</i>   |
|  | Setting, landscaping, streetscape and public realm features   | <p>The Herberge Christi Lutheran Church and the cemetery in the eastern end of the settlement form a dominant element.</p> <p>Vegetation and landscaping located within the public realm and mature street tree plantings lining the road, together with the mature gardens associated with the early dwellings. The Tanunda Creek, the Bethany Reserve and the creek crossing at Bethany Road are also important to the character of the settlement.</p> |
| Representative Buildings               | Identified - refer to SA planning database.   |   |
| Baro4                                  | <b>Krondorf Historic Area Statement (Baro4)</b>   |   |
|  | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |   |
|  | Eras, themes and context  | Established in 1847. First plan of division 1877.   |
|  | Allotments, subdivision and built form patterns   | Division of land undertaken to the hufendorf arrangement. Linear nature.  |
|  | Architectural styles, detailing and built form features   | Early farm complexes and buildings indicative of its early date of settlement.  |
|  | Building height   | <i>[Not stated]</i>   |
|  | Materials   | Pioneer building techniques and specifically German traditions in construction. Significant stone and timber structures, particularly farm sheds.   |
|  | Fencing   | <i>[Not stated]</i>   |
|  | Setting, landscaping, streetscape and public realm features   | Buildings close to the road alignment. Zum Krippelein Christi Church ("Manger of Christ") forms a dominant building in the middle of the settlement.  |
| Representative Buildings               | Identified - refer to SA planning database.   |   |
|  | <b>Moculta Historic Area Statement (Baro5)</b>  |   |
|  | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |   |
|  | Eras, themes and context  | Early service town in the northern agricultural plains comprising small scale development.  |
| Allotments, subdivision and built form | Simple linear nature.   |   |

| Statement# | Statement   |  |
|------------|---|--|
| Baro5      | patterns  |  |
|            | Architectural styles, detailing and built form features     | Early residential and commercial buildings along Truro Road. |
|            | Building height   | [Not stated]   |
|            | Materials   | [Not stated]   |
|            | Fencing   | [Not stated]   |
|            | Setting, landscaping, streetscape and public realm features | Row of mature Carob street trees lining Truro Road.          |
|            | Representative Buildings                                    | Identified - refer to SA planning database.                  |

| Baro6   | <b>Mount Pleasant Centre Historic Area Statement (Baro6)</b>  |  |
|---|---|--|
|   | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |  |
|   | <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |  |
|   | <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |  |
|   | Eras, themes and context  | Service centre for the surrounding pastoral area.  |
|   | Allotments, subdivision and built form patterns   | Linear nature of settlement along Melrose Street.  |
|   | Architectural styles, detailing and built form features   | Consistent early dwellings, the former bank building at the pivotal junction of Melrose Street and Saleyards Road, the ruins of the Henry Giles' early flour mill on the corner of Glen Devon Road and Melrose Street. |
|   | Building height   | [Not stated]   |
|   | Materials   | [Not stated]   |
|   | Fencing   | [Not stated]   |
| Setting, landscaping, streetscape and public realm features | Substantial buildings including the two hotels. Mature street planting.   |  |
| Representative Buildings                                    | Identified - refer to SA planning database.   |  |

| Baro7   | <b>Stockwell Historic Area Statement (Baro7)</b>  |   |
|---|---|---|
|   | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |
|   | <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |
|   | <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |
|   | Eras, themes and context  | A rural character that highlights the early agricultural development of the district.                   |
|   | Allotments, subdivision and built form patterns   | Reflects the earliest periods of subdivision and also the later expansion of the town.                  |
|   | Architectural styles, detailing and built form features   | Significant public and private buildings located along Duckponds Road. Former steam powered flour mill. |
|   | Building height   | Low scale.  |
|   | Materials   | [Not stated]  |
| Fencing   | [Not stated]  |   |
| Setting, landscaping, streetscape and public realm features | Central concentration of public and residential buildings with the prominence of the St Thomas Lutheran Church.   |   |
| Representative Buildings                                    | Identified - refer to SA planning database.   |   |

**Historic Areas affecting City of Charles Sturt**

| ChSt1 | <b>Bowden / Brompton Historic Area Statement (ChSt1)</b>  |  |
|-------|---|--|
|       | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |  |
|       | Eras, themes and context  | 1850s to early 1900s.<br><br>Victorian era with an intimate and small-scale character.   |
|       | Allotments, subdivision and built form patterns   | Small, long narrow allotments.   |
|       | Architectural styles, detailing and built form features   | Single storey, detached and attached, single and double fronted workers' cottages.<br><br>Some parapet walling to street with visible side return.<br><br>Shop and dwelling typically on street corners.<br><br>Early commercial and industrial buildings.<br><br>Detached and semi-detached bungalow dwellings with wide verandahs, austerity and later townhouses.   |
|       | Building height   | Single storey with ceiling heights at least 3m.<br><br>Industrial scale walls of up to 5m.   |
|       | Materials   | Red brick and bluestone walls and piers.<br><br>Render to verandah piers, banding and parapets.<br><br>Corrugated steel roofing in galvanised or paint finish.<br><br>OG guttering in galvanised or paint finish.<br><br>Painted timber to window frames, doors and roof trim.<br><br>Chimneys; brick or painted render.<br><br>Typically, small span steeply pitched gable and hipped 'M' roofs facing the street with ridge perpendicular or parallel to the street.<br><br>Separate verandah to higher front wall or parapet. |
|       | Fencing   | Low front fencing, typically picket fencing and low masonry walls or combination thereof.  |
|       | Setting, landscaping, streetscape and public realm features   | Small setbacks from the street. Narrow streets with minimal on site car parking. Original shopfronts to street corners.<br><br>Industrial buildings constructed to street frontages.   |
|       | Representative Buildings  | Identified - refer to SA planning database.  |

|   | <b>Ovingham Historic Area Statement (ChSt2)</b>   |  |
|---|---|--|

| <b>Brompton Park Historic Area Statement (ChSt3)</b>   |   |   |
|--|---|---|
| The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |   |   |
| These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |   |   |
| The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |   |   |
| ChSt3  | Eras, themes and context                                    | 1870s to 1890s.<br>Victorian era.   |
|  | Allotments, subdivision and built form patterns             | Very narrow, long allotments.   |
|  | Architectural styles, detailing and built form features     | Single storey, detached and attached, single and double fronted workers' cottages.<br>Typically, small span steeply pitched gable and hipped 'M' roofs facing the street with ridge perpendicular or parallel to the street.<br>Separate verandah to higher front wall or parapet.  |
|  | Building height   | Single storey with ceiling heights at least 3m.   |
|  | Materials   | Bluestone and sandstone front walls, and red brick sidewalls.<br>Render to verandah piers, banding and parapets.<br>Corrugated steel roofing in galvanised or paint finish.<br>OG guttering in galvanised or paint finish.<br>Painted timber to window frames, doors and roof trim.<br>Chimneys; brick or painted render. |
|  | Fencing   | Low front fencing, typically picket fencing and low masonry walls or combination thereof.   |
|  | Setting, landscaping, streetscape and public realm features | Small setbacks from the street.<br>Narrow streets with minimal on-site car parking.<br>Original shopfronts and hotels to street corners.<br>Some industrial buildings constructed to street frontages.  |
|  | Representative Buildings                                    | Identified - refer to SA planning database.   |

|--------|--|---|
|        | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |   |
|        | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |   |
|        | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |   |
|        | Eras, themes and context   | 1860s - 1930s.  |
|        | Allotments, subdivision and built form patterns  | Uniform small allotments interspersed with larger allotments.   |
|        | Architectural styles, detailing and built form features  | Single storey attached and detached cottages, row dwellings, former fire station, former Christian Chapel, former municipal hall, former brewery, Victorian churches.<br><br>Steeply pitched gable and hipped roofs facing the street, with various separate verandah form and saw-tooth design (former brewery).<br><br>Steeple and bell tower.<br><br>Some parapet walling. |
|        | Building height  | Typically, single storey with ceiling heights at least 3m.<br><br>Industrial and former church buildings with substantial ceiling and wall heights.   |
|        | Materials  | Rendered masonry, red brick, bluestone, limestone and sandstone walls.<br><br>Decorative brickwork detailing to windows and doors.<br><br>Corrugated galvanised steel roofing.<br><br>Painted decorative timber posts and fascia elements.  |
|        | Fencing  | Substantial rendered masonry with brick capping, and cast iron infill fences and gates.   |
|        | Setting, landscaping, streetscape and public realm features  | Small setbacks from the street.   |
|        | Representative Buildings   | Identified - refer to SA planning database.   |

|  | <b>Hindmarsh District Centre Historic Area Statement (ChSt21)</b>  |  |
|--|--|--|
|  | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |  |
|  | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |  |
|  | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |  |
|  | Eras, themes and context   | 1840s to 1930s.  |
|  | Allotments, subdivision and built form patterns  | Narrow fronted with deep allotments facing Port Road.<br><br>Wider allotments to Manton and Milner Street.   |
|  | Architectural styles, detailing and built form features  | Narrow fronted two-storey built form interspersed with some narrow fronted single storey of intimate scale.<br><br>Generous verandahs over footpaths, balconies and parapets with some decorative elements including pediments.<br><br>Some detached single and two storey residential buildings to Orsmond Street.<br><br>Occasional upper level balconies.<br><br>Vertically proportioned elements with high solid to void ratio, particularly at upper levels.<br><br>Substantial church buildings.<br><br>Decorative parapets to street frontages and returns. |

| Statement# | Statement   |   |
|------------|---|---|
| ChSt21     |   | <p>Steeply pitched hipped roofs visible behind parapets, with separate, wide verandahs across frontage.</p> <p>Some gable forms including simple cottage form to Milner Street.</p>   |
|            | Building height   | Single and two-storey built form with ceiling heights that vary from 3m through to substantial church buildings.  |
|            | Materials   | <p>Limestone, bluestone, sandstone, face red brick walls and rendered walls.</p> <p>Use of brick and rendered quoins.</p> <p>Corrugated galvanised steel roofing.</p> <p>Decorative cast iron posts and balustrades.</p> <p>Painted timber posts and fascia elements.</p> |
|            | Fencing   | <p>Built form typically to the street with verandahs over public realm.</p> <p>Some rendered masonry fencing with cast iron infill.</p>   |
|            | Setting, landscaping, streetscape and public realm features | Historic heart of the Hindmarsh Village and the principal area for a range of retail, business, ecclesiastic and office uses.   |
|            | Representative Buildings                                    | Identified - refer to SA planning database.   |

|   |   |   |
|---|---|---|
| ChSt22  | <b>Henley Square Historic Area Statement (ChSt22)</b>   |   |
|   | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |
|   | <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |
|   | <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |
|   | Eras, themes and context  | 1840s to 1920s.   |
|   | Allotments, subdivision and built form patterns   | Traditional patterns of development incorporating verandahs, balconies and parapets clustered around Henley Square.   |
|   | Architectural styles, detailing and built form features   | <p>Substantial two-storey buildings with wide balconies and verandahs, some over footpaths.</p> <p>Traditional single storey buildings with verandahs over footpaths.</p> <p>Modern development including large expansive verandahs on the square.</p> <p>Decorative parapets to the street and Henley Square facades.</p> <p>Steeply pitched hipped and gable roof forms, with attached balconies and verandahs across frontage.</p> <p>Skillion and curved (bull nose) verandah roof forms.</p> |
|   | Building height   | Single and double storey buildings with ceiling heights at least 4.5m per floor giving an imposing character.   |
|   | Materials   | <p>Bluestone, sandstone, red brick walls and rendered walls.</p> <p>Some corrugated iron walling.</p> <p>Use of brick and rendered quoins, brick banding and other traditional decoration.</p> <p>Imposing masonry pediments and gables with brick banding.</p> <p>Corrugated steel roofing.</p> <p>Decorative cast iron and painted timber verandahs and balconies.</p>  |
|   | Fencing   | <p>Some low masonry walling.</p> <p>Typically, open shop fronts with verandahs over public realm.</p>   |
| Setting, landscaping, streetscape and public realm features | Historic heart of Henley Beach and the principal area for a range of retail, business and entertainment uses.   |   |
| Representative Buildings                                    | Identified - refer to SA planning database.   |   |

**Historic Areas affecting Town of Gawler**

|   |   |   |
|---|---|---|
| Ga1   | <b>Gawler East Historic Area Statement (Ga1)</b>  |   |
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.  |   |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.  |   |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.  |   |
|   | Eras, themes and context  | 1850-1940; residential and local scale retail.  |
|   | Allotments, subdivision and built form patterns   | The Area is divided into two sections by Lyndoch Road. Large allotments with large dwellings and gardens exist along High Street and Duffield Street. Smaller allotments exist along Lyndoch Road. Traditional grid north of Lyndoch Road. Allotments typically are of consistent width and depth, rectangular in shape orthogonal to the street layout apart from some dwellings facing Lyndoch Road on the north side, which have an angled front boundary. The pattern of streets stem from orthogonal junctions with Lyndoch Road and rising ground.  |
|   | Architectural styles, detailing and built form features   | Victorian and Turn-of-the-Century Villas/Mansions. Nineteenth century double fronted symmetrical cottages; parapet end gables a feature. Bungalows with some Inter War. Roof pitches in the order of 27 degrees and 35 degrees. Stone walls and stone outbuildings.<br><br>Steeply pitched hipped and simple gable roofs of small and large scale. Large roofs typically gambrel in form with additional central gables and villa style projecting gable. Smaller early roof forms with ridge parallel to the street. Separate, generous verandahs to the street of bullnose, straight and concave form. Some return verandahs and some central entrance gable. Some verandahs continuous with main roof. Shallower pitched bungalow roof forms with simple generous roof planes and overhangs. Wide bungalow style verandahs with masonry supports and low plinth walls. |
|   | Materials   | Sandstone/Limestone with red brick quoins. Ornate render. Corrugated profile roofing. Vertically proportioned painted timber window frames and doors. Painted timber cover battens. Decorative brick, stone or rendered chimneys. Cast iron decoration and painted timber detailing to verandahs.   |
|   | Building height   | Single storey forms generally influenced by site topography.<br><br>Buildings on low side of streets appear as single storey with double level to rear, particularly in north west of area.<br><br>Buildings on high side of street appear as double storey or elevated single storey with verandahs occurring on high plinth and central access steps.   |
|   | Fencing   | Low open style fencing which includes masonry pier and plinth fence with decorative open infill. Low masonry walls up to 1.2 metres. Timber picket fences. Hedges. Stone walls on front boundaries are important features.  |
| Setting, landscaping, streetscape and public realm features | Important entrance to Gawler from east with significant north to south connecting streets such as Duffield and East. Unique angled street layout north of Lyndoch Road with Edith and Blanch Street connected by Short Street. North western edge defined by Railway Line. A portion of the west side faces Pioneer Park; some small scale mixed use to Union Street. North to south streets generally run with contours of land with high and low side. Generous front and side setbacks. Landscaped setting derived from generous gardens with substantial trees and wide tree-lined streets. Surfaces consistent with the footpaths and streets. Views to and from the area. |   |
| Representative Buildings                                    | Identified - refer to SA planning database.   |   |
| <b>Gawler South Historic Area Statement (Ga2)</b>           |   |   |

| Statement#  | Statement  |  |   |
|---|--|--|---|

|   | <table border="1"> <tr> <td data-bbox="151 280 343 353">Eras, themes and context</td> <td data-bbox="343 280 1560 353">1860 to 1950 including bungalows and Austerity.</td> </tr> </table>   | Eras, themes and context   | 1860 to 1950 including bungalows and Austerity. |
|   | Eras, themes and context   | 1860 to 1950 including bungalows and Austerity.  |   |
|   | Allotments, subdivision and built form patterns  | Generous allotments typically on flat land with some variations in topography towards Dead Man's Pass and river. Grid pattern intersected by Twelfth Street that shifts direction at Adelaide Road. Oblique street intersections and prominent irregular corner allotments as follows: Unique and variable Street pattern defined by Railway line, Adelaide Road, Racecourse, Gawler River and Town Centre. Eighteenth to twenty second street run east to west. First, Second and Fourth Streets run parallel with the northern Adelaide Road and join with Adelaide Road at an angle. Fifth, Seventh, Third and Sixth Streets connect to each side of Adelaide Road. Thirteenth, Fourteenth and Fifteenth Street and Eighth Streets angled to River. Smaller allotments to Ninth and Tenth Streets. Gawler Terrace defined by Dead Man's Pass. |   |
|   | Architectural styles, detailing and built form features  | <p>Detached double-fronted villas. Semi-detached and row cottages. Some Federation and Bungalow style dwellings. Some Inter War and Austerity. Verandahs and parapets. Substantial stone or masonry villas surrounded by generous gardens and landscaping.</p> <p>Traditional railway structures associated with the Gawler Railway Station including workshops, stores and industrial buildings and small.</p> <p>Roof pitches in the order of 27 degrees and 35 degrees. 'M' Roof form and gambrel roof found in 13th and 14th street vicinity. Gambrel roof forms to villas. Simple, small span cottage style roofs generally evident. Parapets to cottages.</p> <p>Separate verandahs including but not limited to generous sweeping concave style. Some verandahs continuous with main roof.</p>  |   |
|   | Building Height  | Single storey with some elevated housing in Eighth Street and Gawler Terrace, featuring substantial setbacks and elevated verandahs. Wall heights in the order of 3.6 metres above floor level.  |   |
|   | Materials  | Stone and limestone walling with red brick quoins. Some bluestone. Corrugated iron roof sheeting to verandahs and roofs. Red brick or render chimneys. Ornate brick detailing to gables and gable vents. Cast iron lacework to verandahs; typically simple timber details. Painted timber window frames, doors, roof trim and modest decorative treatments such as finials.  |   |
|   | Fencing  | Low masonry walling. Low open style fencing which includes masonry pier and plinth fence with decorative open sections of up to 1.2 metres in total height. Painted timber picket fencing. Some woven wire fencing with painted timber posts.  |   |
| Setting, landscaping, streetscape and public realm features | Detached dwellings on generous wide and deep allotments. Generous front and side setbacks. Some early cottages with very substantial setbacks. The strong visual axis to the Railway Station buildings provided by Nineteenth Street. Boulevard style and character of Nineteenth Street derived from buildings positioned close to and square to the road frontage and designed to directly address the street. Corner sites where the grid is interrupted accommodating prominent buildings whose built form and side elevations are of equal importance to the façade. Established gardens with substantial front and side setbacks. Wide tree lined streets particularly Eighteenth Street, which incorporates gravel verges and remnant bluestone/slate kerbing to define bitumen. Night Cart lanes alignment and widths. |  |   |
| Representative Buildings                                    | Identified - refer to SA planning database.  |  |   |
| Ga3   | <p><b>Light Historic Area Statement (Ga3)</b></p>  |  |   |
|   | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>  |  |   |
|   | Eras, themes and context   | Residential, commercial, public and ecclesiastical buildings developed predominantly between 1850 to 1940, with some later Federation and Bungalows (Jerningham Street).   |   |
|   | Allotments, subdivision and built form patterns  | Allotments, streets, squares and other elements which comprise the original 1839 grid layout of Light, Finnis and Co. Large allotments of original plan, with some limited subdivision generally on the perimeter of the State Heritage Area.  |   |
|   | Architectural styles, detailing and built form features  | <p>Simple symmetrical double fronted cottages and villas surrounding the Church Hill State Heritage Area. Early small cottages and more substantial dwellings that retain simple symmetrical features, with vertically proportioned window openings and doors. Some parapet walling to early cottages.</p> <p>Roof pitches in the order of 27 degrees to 35 degrees. Variety of roof forms including simple small span gable and hipped to early cottages; 'M' roof forms; villa with typical projecting gable; larger span and higher Gambrel roof.</p> <p>Separate verandah forms with bullnose, straight pitch and concave verandahs of generous width. Some verandahs continuous with main roof.</p>   |   |
|   | Building Height  | <p>Single storey facing street with double storey to rear due to escarpment.</p> <p>External wall heights to frontage and sides in the order of 3.6 metres.</p>  |   |
|   | Materials  | Bluestone, sandstone and limestone external walling with typically red brick trim and features including quoins and plinth. Some external front and side walling entirely in red brick. Corrugated iron roofing generally with roof tiling rarely found on older buildings and only on more recent buildings. Prominent chimneys in brick, stone or render finish. Some elaborate brick detailing to gable vents and parapets.   |   |
| Fencing   | Low masonry front walls. Significant stone retaining walls to edge of Church Hill escarpment. Low open style fencing which includes masonry pier and plinth fence with decorative open sections, painted timber picket and woven wire. Stone walls and retaining walls are important features.   |  |   |

| Statement#  | Statement   |  |                          |  |   |   |   |   |                 |   |           |  |         |   |   |  |                          |   |
|---|---|--|--------------------------|--|---|---|---|---|-----------------|---|-----------|--|---------|---|---|--|--------------------------|---|
|   | Setting, landscaping, streetscape and public realm features   | Subdivision retains planning undertaken by Light, Finniss and Co in 1839. Low lying areas that rise from surrounding rivers to Church Hill State Heritage Area. King Street is located on a ridge so dwellings on both sides appear as single story to the street with double storey to rear. Wide streets with slate kerbs and substantial trees. Gardens in scale with the buildings and large allotments. Front setbacks to streets such as King, Queen, Howard and Cameron Streets outside of Church Hill State Heritage Area have lesser front setbacks and generous side setbacks; notable exception is Jerningham Street that exhibits generous setbacks. |                          |  |   |   |   |   |                 |   |           |  |         |   |   |  |                          |   |

**Historic Areas affecting City of Holdfast Bay**

| <b>Glenelg Village Historic Area Statement (HoB1)</b>   |   |  |
|---|---|--|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |   |  |
| Eras, themes and context  | 1840s-1860s.<br>1870s - 1900s.<br>1910s - 1930s.<br>Subdivision in 1839.<br>Growth period in 1920s associated with increase in holidaymaking and leisure pursuits.  |  |
| Allotments, subdivision and built form patterns   | Orderly street layout, centred around the St Peters Anglican Church in Torrens Square.<br>Grid pattern of large allotments.<br>Subject to further land division over time but legibility of original pattern remains.<br>Consistent small front setbacks.<br>Small side setbacks.   |  |
| Architectural styles, detailing and built form features   | Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing.<br>Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings.<br>Inter-War buildings, mostly Bungalows.<br>Low scale to medium, relatively small dimensions and basic building details.<br>Many dwellings without vehicle garaging.<br>Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade.<br>Rectilinear plan forms.<br>High degree of modulation and articulation.<br>Low scale.<br>Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings).<br>Short roof spans.<br>Hip and gable roof forms.<br>Concave, bullnose and straight-pitched verandahs.<br>Fine-grain detail in elements such as plinths, string courses, projecting sills.<br>High solid to void ratio.<br>Vertical proportions in windows and doors. |  |
| Building height   | Predominantly single storey but some two storey.  |  |
| Materials   | Consistent with the materials used in the 1840s to 1930s period.<br>Bluestone, sandstone, walls (unpainted).<br>Some brick.<br>Brick or rendered quoin work and plinths.  |  |

HoB1

| Statement#  | Statement   |
|---|---|
|   | Corrugated iron roofing.<br>Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.  |
| Fencing   | Fencing associated with the era and style of the building, and providing views to the building.<br>Timber picket, timber dowel, timber paling.<br>Hedging.<br>Low masonry plinth with cast iron or wrought iron in a traditional arrangement.<br>Woven wire or low masonry with or without geometric steel for Inter-war buildings. |
| Setting, landscaping, streetscape and public realm features | Well established streetscape character, with clearly defined setbacks and uniform front landscaping.<br>Substantial Norfolk Island Pines along Augusta Street and Fig trees at Torrens Square.<br>Vistas toward St Peters Anglican Church from Augusta and Nile Streets.  |
| Representative Buildings                                    | Identified - refer to SA planning database.   |

**Maturin Road Historic Area Statement (HoB2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

|   |   |
|---|---|
| Eras, themes and context                                | 1920s or 30s.   |
| Allotments, subdivision and built form patterns         | Original subdivision of The Olives and Bromley.<br>Allotments on southwest end were subdivided in 1886 and 1912.<br>Mixed allotment sizes with large frontages.<br>Substantial building setbacks.<br>Large front setbacks.<br>Side setbacks provide visual spacing between dwellings.   |
| Architectural styles, detailing and built form features | Typical 1890s to early 20th Century dwellings.<br>Victorian dwellings.<br>Inter-War dwelling styles including Bungalow, Tudor, Art Deco and Mediterranean.<br>Rectilinear plan forms.<br>High degree of modulation and articulation.<br>Low scale.<br>Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings).<br>Short roof spans.<br>Hip and gable roof forms.<br>Deep verandahs and porches.<br>Fine-grain detail in elements such as plinths, string courses, projecting sills.<br>High solid to void ratio.<br>Vertical proportions in windows and doors.<br>Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. |
| Building height   | Single storey and two storey (some in-roof or partly in-roof).  |
| Materials   | Consistent with the materials used in the 1880s to 1930s period.<br>Sandstone, red brick, rendered facades.<br>Corrugated iron and terracotta tiled roofing.<br>Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.  |

| Residential (Central Plains) Historic Area Statement (Mit1)   |  |  |
|---|--|--|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |  |  |
| Eras, themes and context  | Early 20th century dwellings.  |  |
| Allotments, subdivision and built form patterns   | <p>Substantial rectangular blocks.</p> <p>Substantial consistently wide and deep rectangular blocks that retains the historic pattern of land division.</p> <p>Consistent generous spacing between dwellings.</p>  |  |
| Architectural styles, detailing and built form features   | <p>Predominance of Queen Anne style villas and bungalow style dwellings. A number of early villas.</p> <p>Steeply pitched hipped and gable roof forms including smaller scale corner gable to return verandah villas.</p> <p>Separate typically bull nose verandah with some a continuation of the main roof form.</p> <p>Return verandahs particularly at corner allotments.</p> <p>Bungalows with slightly shallower roof pitch, simple generous roof plane facing the street with main ridge typically parallel to street.</p> <p>Wide Bungalow verandahs with tapered or upright masonry support piers and low infill walling.</p> |  |

| Statement# | Statement   |   |
|------------|---|---|
| Mit1       |   | Timber framed and iron clad awnings to windows.<br>Tudor roof forms generally steeper with two main projecting gables and smaller gable porch over main entrance.   |
|            | Building height   | Predominately single storey with external wall height of 3-3.5 metres.<br>Second storey development located within the roof space or to rear of dwellings.  |
|            | Materials   | Original materials, finishes and profiles of building elements.<br>External walls of sandstone, rendered masonry, face brick<br>Decorative wall treatments such as rendered, or brick quoins and low plinths defined by cant brick set out.<br>Painted timber cover battens to gables and roof trim.<br>Painted decorative timber to verandahs and finials to gables.<br>Verandahs supported on timber posts with some on painted masonry pillars.<br>Roofs of corrugated galvanised iron cladding or terracotta tiles.<br>Original unpainted plaster, brickwork, stonework or other masonry preserved unpainted.<br>Decorated face brick or rendered masonry chimneys.<br>Painted metal gutters to D or OG profile and round painted metal downpipes.<br>Painted timber window frames and doors. |
|            | Fencing   | Typically fences reflect the era of the dwelling. Low masonry plinth and post, wrought iron, brush, timber woven with wire, painted timber picket.<br>Height of 1.2m. Rear and side boundary fences located behind the front dwelling alignment 1.8m in height in corrugated profile metal.   |
|            | Setting, landscaping, streetscape and public realm features | Regularly planted tree lined verges.<br>Established front gardens.<br>Consistent setback of buildings.  |
|            | Representative Buildings                                    | Identified - refer to SA planning database.   |

| <b>Adey Road Historic Area Statement (Mit2)</b>  |   |  |
|--|---|--|
| The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |   |  |
| These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |   |  |
| The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |   |  |
| Eras, themes and context   | 1879 subdivision with predominance of buildings built between 1881-1920.  |  |
| Allotments, subdivision and built form patterns  | Traditional pattern and scale of low density, rectangular allotments associated with the original subdivision for the purpose of detached dwellings.<br>Variable width to allotments.<br>East side is orthogonal to Adey Road. West side has angled side boundaries to Adey Road.   |  |
| Architectural styles, detailing and built form features  | Detached dwellings of simple, modest, small scale with symmetrical early stone and brick villas.<br>Victorian Regency and Edwardian to smaller and later bungalows.<br>Gambrel roof typically with short ridge parallel to street, with projecting gable.<br>Simple 'M' Roof with ridge parallel to street.<br>Federation style verandahs continuous with main roof.<br>Separate verandahs attached to main wall of varying profiles.<br>Some bungalow influence roof forms and verandahs with masonry support piers and low plinth wall. |  |
| Building height  | Predominantly single storey with external wall height of 3 - 3.5 metres.<br>Second storey development located within the roof space or to rear of dwellings behind ridgeline of roof. Second storey windows with total length less than 30 percent of total roof length along each elevation.   |  |
| Materials  | Original materials, finishes and profiles of building elements.<br>External walls incorporating sandstone, red brick, render.<br>Roof in corrugated metal cladding.   |  |

| Statement#  | Statement  |
|---|--|
|   | <p>Render with some ornate detail to window surrounds.</p> <p>Simple painted timber detail and roof trim.</p> <p>Painted timber window frames and doors.</p> <p>Simple and modestly detailed timber posts to verandah.</p> <p>Red brick or render chimneys, some tapered in height with some ornate detailing.</p> <p>Some ornate painted timber barge boards and finials.</p> <p>Most original unpainted plaster, brickwork, stonework or other masonry is preserved unpainted.</p> |
| Fencing   | <p>Low and/or open fencing, typically in the form of hedges, woven wire, timber picket or low stone walls reflecting and the traditional period, style and form of the associated building.</p> <p>Generally, no more than 1.2m in height.</p> <p>Rear and side boundary fences located behind the front dwelling alignment no more than 1.8 metres in height.</p>   |
| Setting, landscaping, streetscape and public realm features | <p>Minimal driveway widths with established front gardens dominant, including mature vegetation.</p> <p>Sense of space between buildings.</p> <p>Sloping land with minimal alteration to the land form.</p> <p>Bowling Club provides focal point and sense of Place.</p> <p>Traditional dwelling pattern located parallel to front boundaries.</p>   |
| Representative Buildings                                    | <p><i>[Not identified]</i></p>   |

|           |   |   |
|-----------|---|---|
| Mit3      | <p><b>Belair Village Historic Area Statement (Mit3)</b></p>   |   |
|           | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>   |   |
|           | <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |
|           | <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |
|           | Eras, themes and context  | <p>1880-1900 (built form) original township of Belair developed around the railway. Village / residential character with an evident railway theme and rural character and the development of an old township.</p>   |
|           | Allotments, subdivision and built form patterns   | <p>Historic land division pattern, demonstrating a diverse array of allotments of varying sizes and shapes resulting from the change to rural character brought about through the introduction of the railway.</p> <p>A diverse mix of residential, education and commercial buildings with a cohesive style and generous setting.</p>  |
|           | Architectural styles, detailing and built form features   | <p>Mix of development including, churches, school, local shop, and concrete water tower. Clusters of substantial villas (4-6 rooms) with return verandahs to both sides of Sheoak Road.</p> <p>Long linear buildings constructed along the Sheoak Road ridge and generally oriented facing Sheoak Road, resulting in a variable but cohesive pattern of buildings.</p> <p>Traditional steeply pitched hipped and gabled roof forms and some projecting gables, typical of the Victorian era.</p> <p>Ridges tend to be parallel to the street.</p> <p>Separate verandahs of bullnose, straight monopitch or concave profile supported on painted timber posts.</p> |
|           | Building height   | <p>Predominantly single storey with generally substantial external wall height up to 3.5 metres.</p>  |
| Materials | <p>Original or otherwise complementary materials, colours and finishes, including stone, rendered masonry, face brick, corrugated iron and timber board.</p> <p>Original verandah detailing including paving, posts and decoration.</p> <p>External walls of sandstone or limestone.</p> <p>Red brick quoins.</p> <p>Corrugated sheet roofing in painted or galvanised finish.</p> <p>Vertically proportioned painted timber window and door frames.</p> <p>Decorative brick and rendered chimneys.</p> |   |
| Fencing   | <p>Open rural style fencing using timber posts with draw wire.</p> <p>Hedges define property boundaries.</p> <p>Front fences and gates that reflect the traditional period, style and form of the associated building.</p>  |   |

| Statement# | Statement   |   |
|------------|---|---|
|            |   | Open rural style Front fences and gates that are a maximum of 1.2 metres in height to a maximum of 1.5 metres if wrought iron, brush, timber and/or wire or woven mesh style.   |
|            | Setting, landscaping, streetscape and public realm features | <p>Village character with an evident railway theme and historic Residential character.</p> <p>Historic views of open railway side in a treed setting.</p> <p>The Village area retains much of its original character and integrity, with a railway theme evident in various places of state heritage, local heritage and other buildings of historic character.</p> <p>There are many prominent intact historic buildings and features within it and the streetscapes, townscapes and landscapes created by these historic features.</p> <p>Central bitumen roadway with gravel verge and no kerb or guttering Street trees to Sheoak Road.</p> <p>Gravel driveway entrances to properties.</p> |
|            | Representative Buildings                                    | Identified - refer to SA planning database.   |

| Mit4 | <b>Mitcham Village Historic Area Statement (Mit4)</b>   |  |
|------|---|--|
|      | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |  |
|      | Eras, themes and context  | <p>Village Setting - 1840.</p> <p>Core precinct of the village is readily identifiable and exhibits many of the original aspects of its early beginnings, including a range of single and cottage houses, commercial buildings, post office, bakery, shops, hotel and other public buildings.</p> <p>Historic buildings and features that contribute to the historic character including State and Local Heritage Places and other buildings displaying historic architectural features.</p> |
|      | Allotments, subdivision and built form patterns   | The village was laid out on the lines of an English village and contained traditional elements such as a village green and high street. Further subdivision has occurred since the date, however the majority of the original land division is intact.   |
|      | Architectural styles, detailing and built form features   | <p>Single, semi-detached, row and cottage houses, commercial buildings, post office, bakery, shops, hotel and other public buildings.</p> <p>Intimate small scale and finely grained buildings.</p> <p>Hotel and Institute with tall gabled ornate rendered parapets.</p> <p>Modestly detailed parapet walling above verandahs to shopfronts and shops attached to dwellings, mostly over pavements.</p>   |
|      | Building height   | Single storey with 3 to 3.5 metres ceiling height.   |
|      | Materials   | <p>Consistent with the architectural era of the building.</p> <p>Original unpainted brickwork or stonework.</p> <p>Bluestone walling.</p> <p>Corrugated profile roofing.</p> <p>Painted timber window frames and doors.</p> <p>Modest detailing to verandah posts and roof trim.</p> <p>Brick, stone and rendered masonry chimneys.</p>  |
|      | Fencing   | <p>Front fences and gates reflecting the traditional period, style and form of the associated building.</p> <p>Generally timber picket, brush or wire Fence height typically no more than 1.2m.</p> <p>Rear and side boundary fences located behind the front dwelling alignment no more than 1.8 metres in height with corrugated profile cladding.</p>   |
|      | Setting, landscaping, streetscape and public realm features   | <p>Traditional village setting with village green reflecting a mix of uses. Unbuilt land adjoining Brownhill Creek of Aboriginal heritage significance.</p> <p>Regular pattern of street trees.</p> <p>Varied historic townscape views due to plan of village and open space.</p> <p>Consistent building setbacks for dwellings.</p> <p>Shops attached to dwellings, commercial and institutional buildings constructed to the front boundary.</p>   |
|      | Representative Buildings  | Identified - refer to SA planning database.  |

**Paddys Hill, Mount Barker Historic Area Statement (MtB13)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

|                          |  |
|--------------------------|--|
| Eras, themes and context | <p>1848.</p> <p>Detached dwellings of early European settlements.</p> <p>A visual landmark of the eastern landscaped boundary of the town.</p> <p>Area represents religious beliefs including places of study, worship and burial in a landscaped setting.</p> |
| Allotments,              | Open landscape.  |

| Statement# | Statement   |  |

**Historic Areas affecting City of Mount Gambier**

| MtG1  | <b>Bay Road Historic Area Statement (MtG1)</b>   |  |
|---|--|--|
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |  |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |  |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |  |
|   | Eras, themes and context   | Development from period of settlement up to and including the 1920s.                             |
|   | Allotments, subdivision and built form patterns  | Generous allotment sizes. Extensive street and side boundary set-backs.                          |
|   | Architectural styles, detailing and built form features  | Large single storey houses with hipped and gabled galvanised iron roofs; and generous verandahs. |
|   | Building height  | Predominantly single storey, with two storey additions within roof space to rear of buildings.   |
|   | Materials  | Varied building construction but generally comprising dolomite or limestone walling with quoins. |
| Fencing   | Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls.<br>Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.  |  |
| Setting, landscaping, streetscape and public realm features | Well maintained, mature gardens that contribute to a pleasant, open streetscape. Streetscape improvements within the area have particular emphasis on Bay Road as the entry to the Volcanic Complex State Heritage Area.   |  |
| Representative Buildings                                    | Identified - refer to SA planning database.  |  |

| MtG2  | <b>Doughty Street and Wehl Street North Historic Area Statement (MtG2)</b>   |   |
|---|--|---|
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |   |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |   |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |   |
|   | Eras, themes and context   | Development from period of settlement up to and including the 1920s.  |
|   | Allotments, subdivision and built form patterns  | Generous allotments dominating the higher slopes, with substantial street and side boundary setbacks.<br>Smaller allotments on the lower slopes.                      |
|   | Architectural styles, detailing and built form features  | Varied building styles from one street to another.<br>Grand houses dominating the higher slopes.<br>On the lower slopes, workman's cottages.<br>Contemporary housing. |
|   | Building height  | Predominantly single storey, with two storey additions within roof space to rear of buildings.  |
|   | Materials  | Varied building construction and materials reflecting traditional period and style.<br>Timber workman's cottages.   |
| Fencing   | Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls.<br>Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.  |   |
| Setting, landscaping, streetscape and public realm features | Characterised by steep topography with generous allotments sizes and well-maintained mature gardens.   |   |
| Representative Buildings                                    | Identified - refer to SA planning database.  |   |

| Statement# | Statement   |   |
|------------|---|---|
| MtG5       | Eras, themes and context                                    | 1880s-1920s.  |
|            | Allotments, subdivision and built form patterns             | Adjoining the St Andrews Historic Area, the Vansittart Park area contains uniform residential allotments on a grid pattern. There has been a small number of infill type developments in the area to date. However, the area remains predominantly dwellings on large regular shaped allotments. Generally large, consistent frontages. Predominantly large, consistent allotments. The Vansittart Park provides a sporting ground (with associated amenities) and large open garden areas. |
|            | Architectural styles, detailing and built form features     | Villa, federation and bungalow style dwellings.   |
|            | Building height   | Predominantly single storey, with two storey additions within roof space to rear of buildings.  |
|            | Materials   | Construction and materials reflecting traditional period and style.   |
|            | Fencing   | Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls.<br>Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.   |
|            | Setting, landscaping, streetscape and public realm features | Well landscaped Vansittart Park and the topography of the area adds interest. Streets are not excessively wide by comparison to other areas of Mount Gambier.   |
|            | Representative Buildings                                    | Identified - refer to SA planning database.   |

|      |   |   |
|------|---|---|
| MtG6 | <b>Wehl Street South Historic Area Statement (MtG6)</b>   |   |
|      | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |   |
|      | Eras, themes and context  | 1860s- mid 1920s.   |
|      | Allotments, subdivision and built form patterns   | Wide roads with large, deep allotments, although east-west roads are generally narrow with buildings set close to the street.<br>Side setbacks are in some cases small.   |
|      | Architectural styles, detailing and built form features   | Diverse dwelling styles.<br>Larger residences predominantly along Wehl Street South.<br>Smaller stone or timber-clad workman's cottages close to the railway line.<br>Wehl Street Public School.  |
|      | Building height   | Predominantly single storey, with two storey additions within roof space to rear of buildings.  |
|      | Materials   | Stone and timber clad.<br>Construction and materials reflecting traditional period and style.   |
|      | Fencing   | Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls.<br>Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.   |
|      | Setting, landscaping, streetscape and public realm features   | Street set-backs in this area vary considerably, and combined with clusters of historical housing, produce an interesting streetscape.<br>Residential streetscape character, including within commercial areas. Unobtrusive advertising. Front fences and garden landscaping. Car parking located to the rear of buildings. |
|      | Representative Buildings  | Identified - refer to SA planning database.   |

| NALU1  | Eras, themes and context                                    | 1870s to 1890s and turn of the 20 <sup>th</sup> century.  |
|  | Allotments, subdivision and built form patterns             | Small allotments.   |
|  | Architectural styles, detailing and built form features     | Single- and double- fronted detached cottages (typically involving two rooms).                    |
|  | Building height   | Single storey.  |
|  | Materials   | Local stone, fibro-sheet and weatherboard, corrugated iron and patterned sheet metal.             |
|  | Fencing   | Open fencing predominantly wire and picket style no more than 1.2 metres.                         |
|  | Setting, landscaping, streetscape and public realm features | Buildings positioned close to street frontages, landscaped front gardens and wide grassed verges. |
|  | Representative Buildings                                    | [Not identified]  |

**Historic Areas affecting City of Norwood, Payneham and St Peters**

| College Park Historic Area Statement (NPSP1)  |   |  |
|---|---|--|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |   |  |
| NPSP1   | Eras, themes and context                                | Subdivision during the 1870s with dwellings built between 1870s and 1920s. Detached dwellings.   |
|   | Allotments, subdivision and built form patterns         | Consistent pattern of prestigious single-storey detached dwellings on very large, spacious allotments fronting wide, tree-lined streets. Very low density.<br>Side and rear setbacks providing large separation distances between dwellings.   |
|   | Architectural styles, detailing and built form features | Double fronted, symmetrical and asymmetrical dwellings; East Adelaide Investment Company dwellings; Larger villas and mansions; Victorian villas; Edwardian Queen Anne and Art Nouveau.<br><br>The double fronted, symmetrical and asymmetrical dwellings in the College Park Policy Area are an elegant larger version of the simple colonial cottage with the addition of a projecting wing (in the case of the asymmetrical dwelling), a more elaborate verandah and increased detailing in plaster and render work around openings. The pitch and size of the roof makes this an important design element. The external walls are generally constructed of bluestone or dressed and coursed sandstone. Verandahs along the front elevation are another important element of both the double fronted symmetrical and asymmetrical dwelling. |
|   | Building height   | Single storey, two storey in some locations.   |
|   | Materials   | External walls made of bluestone or dressed and coursed sandstone. Stone, brick and rendered masonry.<br><br>Traditional colours and materials.  |
|   | Fencing   | Low, open front fencing (including secondary streets to the main façade of building) associated with the traditional period and style of the building up to  |

| Statement#  | Statement |   |
|---|-----------|---|
|   |           | <p>1.2m (masonry), 1.5m (wrought iron, timber and wire) and 2m (masonry pillars) in height, allowing views to dwelling.</p> <p>Timber picket, timber dowelling, masonry and cast iron palisade, or</p> <p>corrugated iron or mini orb within timber framing for cottages, villas and other dwellings built during the Victorian period; or timber picket, timber paling or woven crimped wire; or corrugated iron or mini orb within timber framing for Edwardian dwellings.</p> <p>Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry. Side fences along street corners continue the detailing of the front fence to the house alignment, solid fencing beyond this point in traditional materials.</p> |
| Setting, landscaping, streetscape and public realm features |           | <p>Dwellings have sizeable setbacks from all boundaries and are typically set in large landscaped grounds with front boundaries defined by fencing of various styles.</p> <p>Open landscape character to front garden, which enhances dwelling and streetscape quality.</p> <p>Wide streets lined with mature trees.</p>  |
| Representative Buildings                                    |           | Identified - refer to SA planning database.   |

| <b>Hackney North Historic Area Statement (NPSP2)</b>  |   |   |
|---|---|---|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |   |
| <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |   |
| <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |   |
| NPSP2   | Eras, themes and context                                    | Predominantly pre 1920s, some pre 1940s dwellings. Detached, semi-detached and row dwellings.   |
|   | Allotments, subdivision and built form patterns             | Small narrow fronted allotments on narrow streets.  |
|   | Architectural styles, detailing and built form features     | Humble, mainly double fronted (with some single fronted) single storey cottages, in detached, semi-detached and row dwelling configurations.  |
|   | Building height   | Single storey.  |
|   | Materials   | Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.   |
|   | Fencing   | <p>Low, open front fencing (including secondary streets to the main façade of building) reflecting the traditional period and style of the associated building up to 0.9m in height, allowing views to building. Rear and side fencing behind the alignment of the main dwelling face to 1.8m.</p> <p>Timber picket, timber dowelling, simple masonry and cast iron palisade.</p> <p>Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry.</p> |
|   | Setting, landscaping, streetscape and public realm features | Consistent pattern of narrow streets with dwellings built close to street with minimal setbacks and separation distances.   |
|   | Representative Buildings                                    | Identified - refer to SA planning database.   |

| <b>Hackney South Historic Area Statement (NPSP3)</b>  |   |   |
|---|---|---|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |   |
| <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |   |
| <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |   |
| NPSP3   | Eras, themes and context                                | Detached, semi-detached and row dwellings.  |
|   | Allotments, subdivision and built form patterns         | <p>Closely packed arrangement of buildings built close to the street frontage. Mainly small narrow fronted allotments which generally only allow for dwellings with a single room width, rear service lanes. Some sizeable allotments along parts of Osborne Street.</p> <p>Primary dwelling frontages are to streets, not lanes.</p> |
|   | Architectural styles, detailing and built form features | <p>Small, mainly single-fronted dwellings, in detached, semi-detached and row dwelling configurations. Some elevated dwellings along eastern side of Westbury Street. Verandahs along the primary frontage of dwellings.</p> <p>Dwellings simple in structure and plan.</p>   |
|   | Building height   | Single-storey.  |
|   | Materials   | Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.   |

| Statement# | Statement   |  |
|------------|---|--|
|            | Fencing   | Front fencing (including any secondary street frontage up to the alignment to the fair face of the dwelling) generally low in height up to 1.2m, allowing views to building. Original design and materials, such as timber picket, timber dowelling or simple masonry and cast iron palisade.  |
|            | Setting, landscaping, streetscape and public realm features   | Consistent pattern of narrow streets and rear service lanes. Rear lanes used for vehicular access and garages. Streets lined with mature exotic street trees. Landscaped gardens to sizeable allotments.   |
|            | Representative Buildings  | Identified - refer to SA planning database.  |
| NPSP4      | <p><b>Joslin / Royston Park Historic Area Statement (NPSP4)</b></p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |  |
|            | Eras, themes and context  | 1900s-1930s. Detached dwellings.<br><br>Joslin/Royston Park Historic Area is divided into two separate locations:<br><br>the area around First and Second Avenue, north of Lambert Road, in the suburb of Royston Park, and the area centred around Fourth, Fifth and Sixth Avenues in the suburb of Joslin.   |
|            | Allotments, subdivision and built form patterns   | Regular pattern of large allotments.   |
|            | Architectural styles, detailing and built form features   | Single storey detached dwellings. Bungalows. Edwardian (such as Queen Anne) and Federation dwelling styles. Some Tudor style dwellings with a steeper roof pitch, tiled roof and heavy columns.  |
|            | Building height   | Single-storey, two storeys in some locations.  |
|            | Materials   | Stone dwelling walls and original joinery.   |
|            | Fencing   | Front fencing (including any secondary street frontage up to the alignment to the fair face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, brush or timber and wire) and 2m (masonry pillars), allowing views to dwelling. Original design and materials, such as timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other Victorian dwellings.<br><br>Timber picket, timber paling or woven crimped wire, or corrugated iron or mini orb within timber framing for Edwardian dwellings.<br><br>Timber paling, wire mesh and timber or tube framing, woven crimped wire, or masonry with galvanised steel ribbon for Bungalow and Tudor house styles.<br><br>Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry. |
|            | Setting, landscaping, streetscape and public realm features   | Area characterised by regularity of the wide, tree lined avenues.<br><br>Landscaped garden setting, particularly in front of dwelling; Streets lined with distinctive street trees.  |
|            | Representative Buildings  | Identified - refer to SA planning database.  |
| NPSP5      | <p><b>Kensington 1 Historic Area Statement (NPSP5)</b></p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. |            | Building height  | Up to two storeys.  |
|            | Materials  | Bluestone or sandstone.   |
|            | Fencing  | Generally low, reflecting the traditional period, style and form of the associated building.  |
|            | Setting, landscaping, streetscape and public realm features  | Consistency of front set-backs, in particular, the row of double-fronted houses in Grenfell Street.   |
|            | Representative Buildings   | <i>[Not identified]</i>   |
| NPSP9      | <p><b>Marden (Broad Street / Pollock Avenue) Historic Area Statement (NPSP9)</b></p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |   |
|            | Eras, themes and context   | <p>Small group of dwellings, dating from 1910s.</p> <p>Detached dwellings. Semi-detached dwellings on Broad Street.</p>   |
|            | Allotments, subdivision and built form patterns  | <p>Original historic pattern.</p> <p>Detached dwellings of modest proportions, set relatively close to Pollock Avenue.</p> <p>Mix of detached and semi-detached dwellings on Broad Street.</p>  |
|            | Architectural styles, detailing and built form features  | Detached dwellings of modest proportions. Features such as the typical bull-nose verandah and gable ends, which are elaborated with strapping or finials.   |
|            | Building height  | Single-storey.  |
|            | Materials  | Unpainted stone, corrugated iron roofing materials and joinery.   |
|            | Fencing  | <p>Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, timber and wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling.</p> <p>Timber picket and paling, woven crimped wire, or corrugated iron or mini orb within timber framing.</p> <p>Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.</p> |
|            | Setting, landscaping, streetscape and public realm features  | Narrow street width, street plantings and footpath treatments of Pollock Avenue.  |
|            | Representative Buildings   | Identified - refer to SA planning database.   |
| NPSP10     | <p><b>Maylands Historic Area Statement (NPSP10)</b></p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>                              |   |
|            | Eras, themes and context   | Late 1800s onwards. Detached and semi-detached dwellings.   |
|            | Allotments, subdivision and  | Similar to Stepney area but with greater percentage of larger allotments, with proportionately larger homes. Allotments of generous size.   |

| Statement# | Statement   |  |
|------------|---|--|
| NPSP10     | built form patterns   | Original historic pattern.   |
|            | Architectural styles, detailing and built form features     | Double-fronted detached villas and cottages of modest proportions with substantial established gardens.<br>Single-fronted attached dwellings of sandstone and bluestone construction.<br>Remaining corner shop structures.<br>Verandahs along the primary frontage.  |
|            | Building height   | Single-storey.   |
|            | Materials   | Sandstone and bluestone.   |
|            | Fencing   | Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the main face of the dwelling) generally low in height up to 1.2m (masonry) or 1.5m (other materials), allowing views to dwelling.<br>Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing.<br>Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry. |
|            | Setting, landscaping, streetscape and public realm features | Relatively wide streets in the original subdivision layout. Landscaping around a dwelling, particularly in the front garden, is an important design element as it enhances the dwelling and adds to the appearance and quality of the streetscape.<br>Street trees are present in most of the streets and make a solid contribution to the overall character.  |
