**Kangarilla Historic Area Statement (Onka2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

**Willunga Historic Area Statement (Onka7)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

|   |   |
|---|---|
| Eras, themes and context                        | <p>Predominantly 1840s - 1900. Early settlement; Agriculture, Slate Quarrying.</p>  |
| Allotments, subdivision and built form patterns | <p>Original subdivision in the late 1830s. Second subdivision of southern part of the township in 1857.</p> <p>Laid out around High Street, the main thoroughfare through the town, which cuts diagonally through the original subdivision.</p> <p>Allotments perpendicular to High Street in centre of township.</p> <p>Grid pattern with allotments perpendicular to streets in southern section of township.</p> <p>Original allotments of around half an acre.</p> <p>Subsequent land division has occurred, but allotments remain relatively large.</p> <p>Early buildings line High street and the road out of Willunga to Aldinga and McLaren Vale.</p> <p>Rectilinear.</p> <p>Buildings aligned parallel to boundaries.</p> |

| Statement# | Statement   |  |
|------------|---|--|
| Onka7      | Architectural styles, detailing and built form features     | <p>Simple, vernacular cottages. Mid-to-late 1800s stone buildings with Victorian stylistic influences. Double-fronted cottages, villas and asymmetrical cottages with Victorian stylistic influences. Shops and shop/dwellings with Victorian stylistic influences. Churches and cemeteries. Public buildings such as police station, courthouse, school, former post and telegraph office, post office, former Institute building (hall). Three hotels. Transport-related structures such as bridges.</p> <p>Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills.</p> <p>Roof types: hipped. Gable. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans.</p> |
|            | Building height   | <p>Variation in the size and sophistication of buildings, from humble cottages to two-storey dwellings and institutional or public buildings. Predominantly single-storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres.</p> <p>Smaller vernacular cottages. Hotels, former post and telegraph office, former police station and courthouse and former Institute (hall) are landmarks.</p>  |
|            | Materials   | <p>Masonry - local sandstone, pug-with-lime render, some local brick - random rubble, squared.</p> <p>Quoins - stone, rendered, brick.</p> <p>Roof - corrugated iron, Willunga slate.</p> <p>Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.</p> <p>Consistent with the materials used in the 1840s-1900s buildings within the township.</p>   |
|            | Fencing   | <p>Picket. Post-and-rail. Post-and-wire. Slate post-and-wire. Hedges. Randomly-laid stone up to 1.2 metres high. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.</p>  |
|            | Setting, landscaping, streetscape and public realm features | <p>Commercial and residential buildings indicative of the town's early settlement phase in the mid-1800s. Landmark two-storey buildings in High Street. Range of buildings and uses reflecting the composition of the town's community and enterprise. Town's foothill topography features creek lines. Substantial remnant gum trees. High degree of mature landscaping.</p>  |

**Historic Areas affecting City of Port Adelaide Enfield**

| <b>Alberston / Rosewater Historic Area Statement (PAde1)</b>  |   |
|---|---|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |   |
| Eras, themes and context  | 1860 - 1950 built development.  |
| Allotments,   | Squares linked by wide streets. Modified grid pattern. Reasonably consistent allotment depths. Varied front setbacks. |

| Statement#   | Statement   |   |
|--|---|---|
| PAdE1  | subdivision and built form patterns   |   |
|  | Architectural styles, detailing and built form features   | Wide range of housing styles including villas, bungalows, cottages, terrace and rows.   |
|  | Materials   | Materials consistent with the style of building and era of its original construction.   |
|  | Building height   | Single storey.  |
|  | Fencing   | Low and/or open consistent with the style and era of construction of the building it is associated with.<br><br>Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with 1920s including capped timber palings, post and wire or woven wire fences.   |
|  | Setting, landscaping, streetscape and public realm features   | Pockets of important early houses in Queen Street and King Street, dating from the 1860s. Substantial Victorian stone and brick houses grouped around two squares, Company Square and St Patricks Square, with good examples of substantial corner villas. The Alberton station complex is an important feature in the area and contains the earliest railway station in South Australia and shops of a consistent design. The double line of trees along the railway line that divides the area and the established street trees, particularly, Plane trees, Ash trees, Jacarandas, White Cedars and some mature Canary Island Date Palms make an important contribution to the character of the area. |
|  | Representative Buildings  | Identified - refer to SA planning database.   |
| PAdE2  | <b>Exeter Historic Area Statement (PAdE2)</b>   |   |
|  | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.  |   |
|  | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.  |   |
|  | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.  |   |
|  | Eras, themes and context  | 1860's - 1940's built development.  |
|  | Allotments, subdivision and built form patterns   | Grid pattern with narrow north-south running streets with the long axes of allotments running east-west. Allotments fronting Harris St, Exmouth Road and Semaphore Road configured with their long axes running north-south so that buildings address those roads. Generally built close to street with small front setbacks.   |
|  | Architectural styles, detailing and built form features   | Housing styles consisting of cottages, villas, bungalows, terraces and rows.  |
|  | Materials   | Materials consistent with the style of building and era of its original construction.   |
| Building height  | Predominately single storey but some scattered two storey.  |   |
| Fencing  | Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated Victorian and Edwardian houses include pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with the 1920s including capped timber palings, post and wire or woven wire fences.   |   |
| Setting, landscaping, streetscape and public realm features  | The early cottages and neighbourhood shops with verandahs extending over the footpath and the Cooperative Building Society in Denman Street provide a reminder of the local village character of this area, catering for the needs of residents whose main means of transport was walking. A collection of intact early buildings characterised by stone and brick residences, early timber houses and later corrugated iron houses all retaining original detailing. A second small residential pocket on the south side of Semaphore Road which also has a local village character with single storey brick and stone cottages and a two storey hotel and paired terrace. |   |
| Representative Buildings   | Identified - refer to SA planning database.   |   |
|  | <b>Semaphore / Largs Historic Area Statement (PAdE3)</b>  |   |
|  | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.  |   |
|  | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.  |   |
| The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. |   |   |
| Eras, themes and context   | 1860's - 1940's built development.  |   |
| Allotments, subdivision and built form patterns  | Grid pattern with predominately east-west running streets with the long axes of allotments running north-south. Allotments fronting the Esplanade and Military Road configured with their long axes running east-west so that buildings address these roads. Consistent front setbacks for each street but setbacks varying between streets. Varied allotment sizes.  |   |

| Statement#  | Statement  |   |
|---|--|---|
| PAde3   | Architectural styles, detailing and built form features  | Wide range of housing styles from all periods of development of Semaphore and Largs including villas, bungalows, workers row cottages, terraces, rows, mansions and Tudors. Early timber and masonry houses.  |
|   | Building height  | Predominately single storey but scattered two storey and a small amount of three storey along parts of the Esplanade frontage.  |
|   | Materials  | Materials consistent with the style of building and era of its original construction. Timber and masonry housing.   |
|   | Fencing  | Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.  |
|   | Setting, landscaping, streetscape and public realm features  | A continuous run of high quality residential buildings set among mature Norfolk Island Pines along the Esplanade. The low scale of the Esplanade set against the open view of the sea opposite contains individual houses of historical and architectural importance built as seaside residences. An important sub-precinct along Military Road running from Fort Glanville through to Largs containing high quality public and private buildings. A concentration of early houses around Newman Street and Blackler Street associated with the development of Semaphore during the 1860s. Pockets of mature street planting providing important settings for these early houses, particularly along the Esplanade, Union Street, Clare Street, Hall Street and others. |
|   | Representative Buildings   | Identified - refer to SA planning database.   |
| PAde4   | <b>Mainstreet Historic Area Statement (PAde4)</b>  |   |
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.   |   |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |   |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |   |
|   | Eras, themes and context   | 1850's - 1940's built development.  |
|   | Allotments, subdivision and built form patterns  | Focused around Commercial Road, St Vincent Street, Dale Street and Church Place. Allotments configured with their long axes running perpendicular to these roads. Allotments sizes vary to accommodate retail and commercial uses. Commercial buildings generally built to road frontages.  |
|   | Architectural styles, detailing and built form features  | Commercial buildings featuring a fine grain fabric of small scale tenancies with narrow frontages. The extensive use of balconies and verandahs over footpaths.   |
|   | Building height  | Predominately single and two storey with a small number three and four storey buildings to the east of Commercial Road.   |
|   | Materials  | Materials consistent with the style of building and era of its original construction.   |
| Fencing   | <i>[Not stated]</i>  |   |
| Setting, landscaping, streetscape and public realm features | The area is a commercial and retail focus. It acts as a buffer and an approach area to the Port Adelaide State Heritage Area noting that the boundary around the Port Adelaide State Heritage Area is relatively arbitrary and the Main street Policy Area contains some buildings that are of equal significance to buildings within the Port Adelaide State Heritage Area. It features a large number of early buildings, many of which have housed the same continuous functions since the time of their construction. The State Heritage listed St Paul's Church is a prominent building in the area and provides a land mark along a major view corridor from the Nelson St Bridge. Similarly, the State Heritage listed Uniting Church off Commercial Road is an important landmark and southern gateway to this area. The area contains a number of State Heritage places and many Local Heritage places. |   |
| Representative Buildings                                    | Identified - refer to SA planning database.  |   |
|   | <b>Woolstores Historic Area Statement (PAde5)</b>  |   |
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.   |   |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |   |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |   |
| Eras, themes and context                                    | 1880's - 1940's built development.   |   |
| Allotments, subdivision and built form patterns             | Modified grid pattern with St Vincent Street and Bedford Street providing the main access roads into and out of this area. The southern and western boundaries of the grid are radiused by Brock Street and Barlow Street. The northern boundary is defined by Santo Parade, the northern side of which was previously an extension of Dock 1 and provided the woolstores with convenient access to cargo vessels. Woolstores and commercial buildings generally built to road frontages. Cottages close to and facing the road frontage. Medium to large allotment sizes.   |   |
| Architectural styles, detailing and built                   | Large purpose designed woolstores and warehouses featuring strong and robust built forms with parapet walls and saw tooth roofs. Simple, single storey workers cottages.   |   |

| Statement#  | Statement   |  |
|---|---|--|
| PAdE5   | form features   |  |
|   | Building height   | Large masonry woolstores buildings ranging from single to four storeys. Single storey former workers cottages.   |
|   | Materials   | Masonry and corrugated iron feature strongly and are key defining materials. Materials consistent with the style of building and era of its original construction.   |
|   | Fencing   | <i>[Not stated]</i>  |
|   | Setting, landscaping, streetscape and public realm features | A key characteristic of this area is the compact group of large, well detailed warehouses associated with the wool export trade and located close to the dockside. The woolstores buildings are highly visible and prominent from eastern approaches into the Port Adelaide Regional Centre, particularly from Perkins Drive. The unimpeded visibility and prominence of these buildings is important. The area also contains a collection of primarily corrugated iron houses, mainly located between Aberdeen and Crozier Streets south of Brock Street. Some are identified as Local Heritage Places, dating from 1900 to 1920, which served as worker's housing for the nearby woolstores. These surviving houses are a remnant of a more consistent low scale residential area which contrasted visually with the adjacent imposing woolstores.   |
|   | Representative Buildings                                    | Identified - refer to SA planning database.  |
| <b>Semaphore Road Historic Area Statement (PAdE6)</b>   |   |  |
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |  |
| <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |  |
| <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |  |
| PAdE6   | Eras, themes and context                                    | 1870's - 1920's built development. Semaphore Road developed as a substantial commercial centre after the establishment of a railway line from Port Adelaide to Semaphore Jetty in 1878 and a subsequent increase in residential population in the area requiring goods and services.   |
|   | Allotments, subdivision and built form patterns             | <p>Semaphore Road is a wide east west road that in this area runs from Causeway Road to the Esplanade.</p> <p>Allotments are orientated so that buildings address Semaphore Road. Allotment sizes vary to accommodate a range of retail and commercial uses.</p> <p>Retail and commercial buildings built to and addressing the Semaphore Road frontage.</p>   |
|   | Architectural styles, detailing and built form features     | A variety of Government, institutional and commercial buildings including simple single storey shops with verandahs and parapet walls. Many of these shops retain post-supported verandahs over the footpath. There are pockets of well-preserved historic residential development featuring mansions, villas and cottages.  |
|   | Building height   | Predominately single storey and two storey.  |
|   | Materials   | Materials consistent with the style of building and era of its original construction.  |
|   | Fencing   | <p>None for retail and commercial buildings.</p> <p>Low and/or open consistent with the style and era of construction of the building it is associated with.</p> <p>Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms.</p>  |
|   | Setting, landscaping, streetscape and public realm features | <p>A popular main street that links Semaphore and Port Adelaide and provides a pleasant environment for both seaside holiday makers and residents.</p> <p>The seaward end of Semaphore Road retains strong evidence of Semaphore's original function as a transport and communications station for the early South Australian colony from 1850 onwards. The Time Ball Tower, Customs Boarding Station and the early Post Office building remain as an indication of these early services. The development of the Semaphore Town Hall, now the Library, and the RSL Hall continued the provision of community facilities, and these developed in association with the commercial areas of Semaphore road further to the east. This area is an important reminder of Semaphore's early prominence in the development of Port Adelaide and the State.</p> <p>A generous public foreshore provides a popular recreation area and the backdrop and view to the western end of Semaphore Road.</p> <p>The road is wide and features pedestrian areas, paving, upper canopy trees and low lying shrubs located in the median and verge, seating and public art. It is a well-established retail and commercial area that provides cafes, restaurants, shops, hotels, churches, a cinema and a range of other facilities.</p> <p>Many well maintained commercial and residential buildings from the 1880s to the 1920s remain in the area. There are many Local Heritage listed places along the length of the road and a number of State Heritage listed places in the western portion of the area.</p> |
|   | Representative Buildings                                    | Identified - refer to SA planning database.  |
| <b>Jetty Road Historic Area Statement (PAdE7)</b>   |   |  |
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |  |
| <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |  |
| <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |  |

| Statement# | Statement   |  |
|------------|---|--|
| PAde7      | Eras, themes and context                                    | 1870's - 1920's built development.<br><br>The first subdivision of Largs was in 1873. The Largs Bay Land and Investment Company formed in 1881, constructed the jetty and built the Largs Pier Hotel by December of 1882.  |
|            | Allotments, subdivision and built form patterns             | Allotments are orientated so that buildings have frontages to and address Jetty Road and the Esplanade. Generous rectangular allotments with wide frontages.<br><br>Retail and commercial buildings built to and addressing road frontages.  |
|            | Building height   | Single storey and two storey except at the Jetty Road / Esplanade intersection where development is three storey.  |
|            | Architectural styles, detailing and built form features     | A mix of architectural styles including simple, single storey shops with over footpath verandahs and parapet walls and a double storey terrace with residential development over ground floor shops.   |

| Pr3   | <b>Little Adelaide Historic Area Statement (Pr3)</b>   |  |
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |  |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |  |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |  |
|   | Eras, themes and context   | Little Adelaide Village formed in late 1839. The section was bought by John Bradford an agent for Adelaide Mechanics Land Company. Most of the current homes are dated from the 1870s to 1890s.  |
|   | Allotments, subdivision and built form patterns  | Is centred on a triangle created by Main North Road, Carter Street, Highbury Street and Argyle Street.<br>Narrow allotments of varying widths and narrow streets.<br>Small setbacks from all boundaries with compact spaces between buildings.   |
|   | Architectural styles, detailing and built form features  | Coherent pattern of small cottages with common features including pitched roofs, brick chimneys & front verandahs.<br>Single fronted and attached cottages are predominant, mainly from 1870-1890s. The village retains a church, corner shops (former) and other buildings typical of early village settlement. |
|   | Building height  | Single storey.<br>Compact small single fronted and attached cottages.  |
|   | Materials  | Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.  |
|   | Fencing  | Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.   |
| Setting, landscaping, streetscape and public realm features | Small front yards and limited space between buildings. Public realm characterised by narrow street and verge with limited room for landscaping.<br>Village atmosphere. Where present, garages and carports are designed and sited to be subordinate to the main dwelling.  |  |
| Representative Buildings                                    | Identified - refer to SA planning database.  |  |

| <b>North Ovingham Historic Area Statement (Pr7)</b>  |   |  |
|--|---|--|
| The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |   |  |
| These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |   |  |
| The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |   |  |
| Pr7  | Eras, themes and context                                    | Late 19th Century housing. 1877 - 1879.  |
|  | Allotments, subdivision and built form patterns             | Small allotments subdivided in 1877 - 1879. Double fronted, narrow, deep allotments between Toronto Street and Cotton Street. Small setbacks from all boundaries with compact spaces between buildings.  |
|  | Architectural styles, detailing and built form features     | Coherent pattern of small cottages with common features including pitched roofs, brick chimneys & front verandahs. Primarily double fronted cottages with central gable feature and front steps to raised finished floor levels to respond to the falling topography on individual allotments from east to west. Small symmetrically fronted or attached stone houses remain in Toronto Street and larger examples of similar style fronting Churchill Road. |
|  | Building height   | Single storey and small residential scale.   |
|  | Materials   | Stone walls and steps facing stone and brick houses and attached cottages with verandahs, corrugated iron roofs.   |
|  | Fencing   | Low open style to 1.2 metres high associated with the design of the dwelling and allows gardens to spill onto the street.  |
|  | Setting, landscaping, streetscape and public realm features | Small front yards and limited space between buildings. Public realm characterised by narrow street and verge and moderate canopy cover from semi-mature street trees. Mature gardens which spill onto the street, pleasant green streetscape. Intimate, small residential pocket.<br>Where present, garages and carports are designed and sited to be subordinate to the main dwelling.  |

| <b>Prospect Lanes Historic Area Statement (Pr8)</b>  |   |   |
|--|---|---|
| The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |   |   |
| These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |   |   |
| The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |   |   |
| Pr8  | Eras, themes and context                                | Reflects substantial areas of Prospect that were developed during the turn of the century (1880s to early 1900s) and constructing cottages and villa homes on higher areas overlooking Churchill Road and beyond.   |
|  | Allotments, subdivision and built form patterns         | Regular subdivision pattern with consistent large frontages and site areas. The series of laneways that link the allotments are distinctive features within the sub division. Regular moderate front setbacks. Large and small asymmetrical side setbacks to dwellings.   |
|  | Architectural styles, detailing and built form features | Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs. Cottages and villa homes on higher areas overlooking Churchill Road and beyond. Housing in the area displays a consistency of character reflecting the styles of domestic architecture at the turn of the century. Houses incorporate concave or bull-nosed verandahs and other typical detail and generally comprise face stone front walls, with brick or rendered quoins, and window and door dressings. |
|  | Building height   | Single storey.  |
|  | Materials   | Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.   |

| Statement#  | Statement  |  |
|---|--|--|
|   | Fencing  | Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.   |
|   | Setting, landscaping, streetscape and public realm features  | Consistent moderate street setbacks.<br>Large and small asymmetrical side setbacks to dwellings.<br>Rear lane access, with primary streets having no access or access which has been designed and located to be subordinate to the main dwelling.      |
|   | Representative Buildings   | <i>[Not identified]</i>  |
| Pr9   | <b>Highbury Historic Area Statement (Pr9)</b>  |  |
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |  |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |  |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |  |
|   | Eras, themes and context   | 1882 subdivision. Turn of the century residential development. The area is characterised by primarily detached housing reflecting styles of domestic architecture at the turn of the century.  |
|   | Allotments, subdivision and built form patterns  | Regular subdivision pattern with consistent large frontages and site areas.<br>Regular moderate front setbacks.<br>Large and small asymmetrical side setbacks to dwellings.  |
|   | Architectural styles, detailing and built form features  | Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs.<br>Characteristic design features such as bull-nosed verandahs, brick quoining, and stone front walls. |
|   | Building height  | Single storey and moderate residential scale.  |
|   | Materials  | Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.  |
| Fencing   | Low open style to 1.2 metres high, providing visibility to landscaped front yards and dwellings.   |  |
| Setting, landscaping, streetscape and public realm features | Well landscaped front yards as an extension of a green leafy streetscape. Garages and carports are designed and sited to be subordinate to the main dwelling.  |  |

|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |  |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |  |
|   | Eras, themes and context   | Subdivided in 1878 by Henry Ball. Turn of century residential development. The area is characterised by primarily detached housing reflecting styles of domestic architecture at the turn of the century.  |
|   | Allotments, subdivision and built form patterns  | Original subdivision with modest allotments with large frontages. Consistent moderate street setbacks.<br>Large and small asymmetrical side setbacks to dwellings.   |
|   | Architectural styles, detailing and built form features  | Primarily detached housing reflecting styles of domestic architecture at the turn of the century.<br>Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs.   |
|   | Building height  | Single storey and moderate residential scale.  |
| Materials   | Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.  |  |
| Fencing   | Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.   |  |
| Setting, landscaping, streetscape and                       | Limited landscaping and dominant built form from small front yards and narrow road verges. Gloucester Street has greener front yards and public realm.   |  |

| Statement# | Statement                |  |
|------------|--------------------------|--|
|            | public realm features    | St Cuthbert's Anglican Church and its adjacent manse are prominent landmarks.<br>Garages and carports are designed and sited to be subordinate to the main dwelling. |
|            | Representative Buildings | <i>[Not identified]</i>  |

| Pr11 | <b>Medindie Gardens Historic Area Statement (Pr11)</b>  |  |
|------|---|--|
|      | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |  |
|      | Eras, themes and context  | Inter-War period housing. The area is predominated by bungalows to the east of Corbin Road and Tudor-style houses to the west. The majority of the original dwellings constructed prior to 1930 remain intact, with additions occurring over time either within the roof space or to the rear and side.  |
|      | Allotments, subdivision and built form patterns   | Regular subdivision pattern of generously sized allotments and wide frontages. Consistent large front and side setbacks. The area retains its original subdivision pattern, with regular sized allotments supporting residential development at a low density.   |
|      | Architectural styles, detailing and built form features   | <p>Predominantly bungalows to the east of Corbin Road and Tudor-style houses to the west.</p> <p>Homogeneity derived from front facades with detailing around windows/doors/verandahs &amp; gables, pitched roofs, brick chimneys &amp; front verandahs.</p>   |
|      | Building height   | Single storey and large residential scale. Two storey additions are within the roof space or to rear of buildings.   |
|      | Materials   | <p>Stone and brick walls and limited external colour palette with detailing (including glazed bricks) around windows, doors and edges of walls and corrugated iron or terra cotta roofs.</p> <p>Consistent use of materials including rock faced stone and masonry, face red brick, terracotta roof tiles or corrugated iron, glazed bricks for trim and other details and materials typical of the housing of the Inter-War Period.</p> |
|      | Fencing   | Low open style (to 1.2 metres high). Fencing associated with the period and style of the dwelling.   |
|      | Setting, landscaping, streetscape and public realm features   | Large well landscaped front yards and tree lined streets above grassed verges. Minimal driveway and hard-surfaced areas. Consistent pattern of prestigious single storey detached dwellings on generous allotments fronting tree-lined street. Spacious and open feel. Garages and carports are designed and sited to be subordinate to the main dwelling.   |
|      | Representative Buildings  | <i>[Not identified]</i>  |

**Historic Areas affecting Robe**

| RO1 | <b>Robe Historic Area Statement (Ro1)</b>  |  |
|-----|--|--|
|     | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |  |
|     | Eras, themes and context   | <p>19<sup>th</sup> century and early decades of 20<sup>th</sup> century.</p> <p>Shipping port, communication and administration township servicing pastoral development of the South East.</p>   |
|     | Allotments, subdivision and built form patterns  | <p>Topography shapes the setting of Robe and land division pattern. Royal Circus is a low knoll. It is a commemorative landmarks and a distinct road feature. There is a legible connection between Royal Circus, the sea wall / jetty abutment, the Customs House and the Post and Telegraph Office. Main Road, Victoria Street and Mundy Street form the main line of road to the port and the main street. The traditional street grid pattern extends either side of Victoria Street, to the coastal fore-dune and across the ridge to the south which overlooks and forms the backdrop to the township.</p> <p>Most of the original large square allotments have been subdivided but the pattern of historic buildings remains legible.</p>   |
|     | Architectural styles, detailing and built form features  | <p>Traditional stone commercial buildings with shopfronts, parapets and verandahs within the town centre. The variety rather than the consistency of traditional building forms is a distinct characteristic of Robe. Small workers' cottages on large allotments, often with low walls, hipped roofs spanning one or two rooms, casement windows and lime-washed or natural stone walls. Heritage listed community buildings (the primary school, churches and the Institute) are on prominent sites and remain as strong landmarks. Heritage-listed government buildings (the Post and Telegraph Office, Customs House and Court House) dominate Royal Circus. Massive stone chimneys are a characteristic feature of the historic buildings. Stone outbuildings are visible from public streets. Roof pitches between 25-35 degrees. Roofs with a high degree of articulation, steep pitches and small spans, provide a unique roofscape across Robe to Guichen Bay. Older buildings have casement windows. Later buildings</p> |

| Statement#  | Statement   |
|---|---|
|   | have double-hung timber sash windows.   |
| Building height   | Two storey buildings along small section of Smillie Street, and hotels. Their built form combines double and single storey elements and verandahs, articulating their bulk and scale. Adjacent buildings differ in style, creating a varied rather than a consistent skyline. Other historic buildings generally single storey, with small span hipped roofs. Building floor levels are close to, step with or are built into, the slope of the land.   |
| Materials   | Local stone, limestone, rendered and bagged masonry with painted or lime wash finish. Painted timber weatherboard, painted timber joinery, trims, verandahs, barges and fascias. Galvanised and painted corrugated iron roofing. Some examples of slate and traditional flat metal roof tiles. Driveway materials are neutral in colour and pattern with natural finishes.  |
| Fencing   | Local stone, hardwood palings and pickets, hardwood and woven wire, brush with round hardwood posts and hedges not exceeding 1.2m.  |
| Setting, landscaping, streetscape and public realm features | Views and vistas of the entrance to the town centre along Main Road past Lake Fellmongery and Lake Charra. Views of the foreshore area adjacent Town Beach and streetscapes of historic buildings of Smillie Street and Mundy Terrace. Views across the area illustrate the importance of native vegetation and the distinct character of the roof designs of historic buildings. Historic buildings square to and often close to street alignments, particularly on Smillie Street. Minimal breaks between buildings except where access to the rear of a site is provided. Streets, verges and reserves in the public realm characterised by Lakestone kerbing, limestone cuttings, landmark trees (Norfolk Island Pines in particular) and native vegetation. Important public open space reserves that frame the township at Lannum Reserve, the Institute / Town Beach Foreshore, Royal Circus and the southern edge of Lake Butler. Each has a distinct landscape structure, planting character and historic quality. |

In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |  |
| Eras, themes and context   | 1910-1930.   |
| Allotments, subdivision and built form patterns  | Traditional grid.<br>Large allotments.   |
| Architectural styles, detailing and built form features  | Federation-style houses with asymmetrical plans and multiple decorative gables. California bungalows with veranda pylons and gables extending to the veranda perimeter. Low-pitched roofs. |
| Building height  | Single storey.   |
| Materials  | Rock-faced sandstone walls and terracotta tiled roofs.   |
| Fencing  | No fencing or open front fencing no more than 1.2m.  |
| Setting, landscaping, streetscape and public realm features  | Rural setting. Landscaping surrounding dwellings.  |
| Representative Buildings   | Identified – refer to SA planning database.  |

**Historic Areas affecting City of Tea Tree Gully**

| <b>Tea Tree Gully Township Historic Area Statement (TTG1)</b>   |  |
|---|--|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |  |
| Eras, themes and context  | The village core of Tea Tree Gully. Mid to late 19th Century to early 20th Century.  |
| Allotments, subdivision and built form patterns   | Traditional subdivision layout focussed on North East Road as the major approach route to the township in both directions. Allotments are varied in size and shape. Regular moderate front setbacks and small setbacks from side boundaries. Generally consistent siting and space between buildings. Sites address North East Road. |
| Architectural styles, detailing and built form features   | Colonial style flat facades articulated with post-supported verandas. Symmetrical designs with simple footprints. Roof forms are generally hipped or gable roofs with pitches between 30-40 degrees. A mix of buildings including detached dwellings, churches, row shops, a war memorial, former                                    |

| Statement# | Statement   |   |
|------------|---|---|
| TTG1       | form features   | police station, institute building, hotel, former bakehouses, flour mill and winery. Tea Tree Gully museum and former council chambers building as State Heritage Places. Historic homestead relics and a stone retaining wall in Pine Park.  |
|            | Building Height   | Single storey, with the exception of the Old Flour Mill and Tea Tree Gully Museum.  |
|            | Materials   | A combination of sandstone and bluestone construction with corners and window and door reveals formed with quoin work. Generally, all dwellings include corrugated roofs in galvanised or light to mid-tone greys, green or red. Unpainted stone / brick. Modern dwellings are consistent with the above materials, but also include a combination of raw brick, painted brick and rendered brick in natural, earthy colours. Timber windows.   |
|            | Fencing   | Low, open fencing forward of the building line to height of 900mm. Associated with the traditional period, style and form of building. Hedges, timber picket, post and rail with woven wire, pailing or railing, stone, rendered brick or block.  |
|            | Setting, landscaping, streetscape and public realm features | <p>Undulating and natural setting with minimal cut and fill, and extensive planting and landscaping.</p> <p>The Township provides for a visual transition between the rural landscape of the hills to the east and the suburban plains to the west.</p> <p>Angove's tower and cellar are recognised as landmark buildings and are important elements of the western gateway, including vistas of the tower.</p> <p>The North East Road entrance to Anstey Hill Recreation Park is also an important gateway and features historic building relics that line the entrance walk inside the park.</p> <p>The communal focal point is Haines Memorial Park, which features a European landscape theme surrounded by native street tree planting which illustrates the history of European settlement. Views to and from Haines Memorial park.</p> <p>Strong landscape setting dominated by undulating topography. Significant stands of native trees and intensively landscaped watercourse of Tea Tree Creek</p> <p>Discreet, low scale advertising comprising typefaces, colours, sizes and forms associated with the clear and simple styles used on the 19th and early 20th centuries, generally not illuminated.</p> |

**Historic Areas affecting City of Unley**

| <b>Centres Conservation - Goodwood, King William and Fullarton Roads Historic Area Statement (Un1)</b>  |   |   |
|---|---|---|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |   |
| <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |   |
| <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |   |
| Un1   | Eras, themes and context                                    | 1880 to 1940's built development.   |
|   | Allotments, subdivision and built form patterns             | <p>Goodwood Road - prominent original imposing buildings, homogeneous historic nature and intrinsic features formed by the close-knit development to the street alignment, open balconies and verandahs extending over the footpath.</p> <p>King William Road - early era buildings and quaint unique close-knit character formed by the parade of buildings of narrow fronted shops to the street alignment, with simple continuous series of ornate parapet facades and verandahs over the footpath and some open balconies above.</p> <p>Fullarton Road - significant and early era residential forms of buildings with appropriate setbacks, low-key commercial uses adaptation and substantial landscaped frontages north of Cheltenham Street and small scale simple straight facade shopfronts to south.</p> <p>Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks and spacing between buildings and garden landscape setting.</p> |
|   | Architectural styles, detailing and built form features     | Victorian. Turn-of-Century. Inter-War. Complementary main street shopfronts, parapet walls and verandahs over footpaths and residential forms.  |
|   | Building height   | Maximum two storey street presentation.   |
|   | Fencing   | Fencing forward of the front façade of the building on Fullarton Road, of a form associated with the building and generally of low masonry pier and plinth, cast iron, brush, timber or similar nature.   |
|   | Setting, landscaping, streetscape and public realm features | <p>Limited street trees, except Fullarton Road with dominant, well-established street trees.</p> <p>Goodwood Road - early commercial centre from the late nineteenth century comprising large imposing buildings, including landmark two-storey State Heritage Place, two-storey Local Heritage Place and Church buildings, and smaller narrow fronted premises.</p> <p>King William Road - early commercial centre from the late nineteenth century comprising some larger buildings and primarily small narrow fronted premises.</p> <p>Fullarton Road - residential buildings, some converted to community and commercial uses, and low-key, well landscaped gardens and State Heritage significant mansion 'Hughes Estate'.</p>   |
|   | Representative Buildings                                    | Identified - refer to SA planning database.   |

Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting. |  | Architectural styles, detailing and built form features | Central to this estate is the notable original homestead "Bella Vista" c1862. Late Inter-War period (between 1934 and 1940) in particular of bungalow, Tudor, art deco and complementary latter English domestic styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |  |
| Eras, themes and context                                | 1920 to 1940's built development.  |  |                          |                                   |  |   |   |  |   |   |  |
| Allotments, subdivision and built form patterns         | Short grid street layout of short, wide tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.  |  |                          |                                   |  |   |   |  |   |   |  |

| <b>Residential Spacious Unley and Malvern Trimmer Estate Historic Area Statement (Un13)</b>   |   |   |
|---|---|---|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |   |   |
| <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |   |   |
| <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |   |   |
| Un13  | Eras, themes and context                                    | 1880 to 1920 built development.   |
|   | Allotments, subdivision and built form patterns             | Spacious streetscape character of regular grid layout (with axial views focussed on the central oval feature) of wide, tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.  |
|   | Architectural styles, detailing and built form features     | Victorian and Turn-of-the-Century villas (asymmetrical and symmetrical), double-fronted cottages and limited complementary, Inter-war era, styles. More affluent, original owners developed some larger, amalgamated allotments in the southern areas of Malvern establishing grander residences and gardens. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.  |
|   | Building height   | Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.   |
|   | Materials   | Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.  |
|   | Fencing   | Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing. |
|   | Setting, landscaping, streetscape and public realm features | Spacious streetscape character. Regular grid layout of wide tree-lined streets, with axial views along wide, tree-lined Cambridge Terrace and Oxford Street focussed on the central Unley Oval feature. Large front gardens. Wide verges. Large street trees.   |

| Un22  | <b>Residential Spacious Wayville Historic Area Statement (Un22)</b>  |   |
|---|--|---|
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. |   |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |   |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |   |
|   | Eras, themes and context   | 1880 to 1940 built development.   |
|   | Allotments, subdivision and built form patterns  | Simple grid layout of pattern of wider streets. Regular large allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.  |
|   | Architectural styles, detailing and built form features  | Victorian and Turn-of-the-Century cottages, double-fronted and narrow-fronted styles, and villas. Inter-War era housing, primarily bungalow but also complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.   |
|   | Building height  | Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.   |
|   | Materials  | Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. **Historic Areas affecting City of Victor Harbor**

| <b>Victor Harbor Town Centre Historic Area Statement (VIH1)</b>   |  |
|---|--|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> |  |
| <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>   |  |
| <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>   |  |
| Eras, themes and context  | <p>1870s to 1890s era, a period of early development in Victor Harbor.</p> <p>1920s to 1930s when Victor Harbor experienced a boom period as a holiday destination.</p>  |
| Allotments, subdivision and built form patterns   | <p>Mostly grid pattern.</p> <p>The intersections of Ocean Street and Coral Street, Coral Street and Flinders Parade and the termination of the Railway Terrace at Warland Reserve are key elements of urban space within the area. No or minimal front and side setbacks.</p>  |
| Architectural styles, detailing and built form features   | <p>Commercial premises in Ocean Street, institutional buildings in Coral Street and those supporting facilities associated with the terminus of the railway line along Railway Terrace.</p> <p>Late 1800s era shops (some with Inter-war additions), dwellings, shop/dwellings, town hall, institute/library, hotels, former banks, railway buildings and associated infrastructure. Victorian stylistic influences.</p> <p>Inter-War commercial and public buildings, some with Art-Deco and some with Stripped Classical stylistic influences.</p> <p>Low scale and simple form.</p> <p>Rectilinear plan form with steeply-pitched roof forms (typically 35 to 40 degrees) on 1800s and early 1900s era buildings, also comprising low-pitched roofs behind parapets on Inter-War buildings, reflecting traditional architectural styles and building methods. Short roof spans, minimising roof bulk. Concave, bullnose and straight-pitched verandahs on front and sometimes side facades reduce building bulk and scale and add visual interest. Lean-to forms are also common. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.</p> |
| Building height   | <p>Prevailing one to two storeys. One or two three storey buildings on Coral Street and Flinders Parade.</p>   |
| Materials   | <p>Limestone walls, some rendered masonry. Red brick or rendered quoin work and detail. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Corrugated iron or corrugated steel roofing. Variation in materials which assists in breaking down bulk and scale, adding visual interest.</p>  |
| Fencing   | <p>Some timber picket fencing and corrugated iron fencing.</p>   |

VIH1

| Statement# | Statement   |   |
|------------|---|---|
|            | Setting, landscaping, streetscape and public realm features | Commercial properties provide the main built form and are characteristically single or two-storey buildings aligning with the street boundary. Typically buildings are symmetrical in design with parapets, verandas and balconies over the footpath to further define the pedestrian nature of the area. The railway corridor with its associated buildings and infrastructure is a prominent landscape element. |
|            | Representative Buildings                                    | <i>[Not identified]</i>   |

**Historic Areas affecting Wakefield**

| <b>Edith Terrace / Wallace Street, Balaklava Historic Area Statement (WakR1)</b>   |   |   |
|--|---|---|
| <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. | Statement#  | Statement  |  |
|---|--|--|
| Walk1   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |  |
|   | Eras, themes and context   | Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to late 1920s.  |
|   | Allotments, subdivision and built form patterns  | Very-low density and low-density residential development, with predominantly detached dwellings on wide allotments. Detached dwellings on hammerhead allotments or group dwellings with shared access at the rear with wide street frontage. Very large allotments fronting Church Terrace and St Andrews Street, slightly smaller allotments within the remaining parts of the area.  |
|   | Architectural styles, detailing and built form features  | Built form is varied, covering a range of architectural periods including early stone villas and brick cottages such as those in the Lansdowne Terrace, together with Victorian and Edwardian architecture and later bungalows and Tudor houses. This historic character has been partially eroded through the development of semi-detached dwellings and other dwellings of uncomplimentary design and siting, reducing the areas available for landscaping to along the front and side of dwellings. |
|   | Building height  | Generally single storey. Two storey additions to the rear of buildings or within the roof space and on larger sites with setbacks.   |
|   | Materials  | Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.   |
|   | Fencing  | Examples of original fencing with bluestone plinths and cast iron fence railings above remains. Low front fencing which provides some visibility to the historic built form, although brush fencing or solid pillars and plinths with open style inserts and gates appears in some locations.  |
|   | Setting, landscaping, streetscape and public realm features  | Vegetation in private yards contributes positively to the overall visual amenity and street tree planting which includes Jacarandas, Golden Rain and Ash trees, particularly in Church Terrace and Devonshire Street also contributes positively to residential amenity.   |
|   | Representative Buildings   | Identified - refer to SA planning database.  |
| Walk2   | <b>Medindie Historic Area Statement (Walk2)</b>  |  |
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.   |  |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.   |  |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |  |
|   | Eras, themes and context   | Very-low and low density residential. 19th Century and early 20th Century.   |
|   | Allotments, subdivision and built form patterns  | Predominantly detached dwellings on large, wide allotments. Allotment sizes and building setbacks vary throughout the policy area, although there are patterns established in individual streets.  |
|   | Architectural styles, detailing and built form features  | Range of architectural styles and dwelling types from the late 19th Century and early 20th Century periods including early Victorian, high Victorian, Edwardian, Classic Revival and large bungalows, all set within large landscaped garden settings that enhance the presentation of the dwellings.  |
|   | Building height  | Predominantly single storey. Two storey additions to the rear of buildings or within the roof space with single storey appearance at the street. Two storey dwellings found on Robe Terrace and on larger sites with setbacks.   |
|   | Materials  | Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. Consistent early stone and brick dwellings on large sites with wide frontages to public roads.  |
| Fencing   | There is a distinctive lack of high, solid fencing and/or the use of open design of large gates to access long driveways has enabled the principal elevation of the historic homes and landscaped grounds to be visible from the public roads.   |  |
| Setting, landscaping, streetscape and public realm features | Reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. Low-density residential development, with predominantly detached dwellings on allotments that are generous in width. Regular spacing between residential buildings that is primarily achieved through consistent setbacks from each side boundary. Formal avenues and regular spacing of street trees along road verges also make a positive contribution to the amenity of the area. |  |
| Representative Buildings                                    | Identified - refer to SA planning database.  |  |
|   | <b>Walkerville Terrace Historic Area Statement (Walk3)</b>   |  |
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.   |  |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.   |  |

| Statement# | Statement   |   |
|------------|---|---|
| Walk3      | Eras, themes and context                                    | Low-density residential development with predominantly detached dwellings. 19th Century and early 20th Century.   |
|            | Allotments, subdivision and built form patterns             | Closely sited pattern of development, small allotments with narrow-to-medium frontages and intact historic character throughout the majority of the streets.<br>Large frontages to Church Terrace (northern side) and Stephen Terrace, slightly smaller frontages elsewhere.  |
|            | Architectural styles, detailing and built form features     | Range of architectural styles and dwelling types from the late 19th Century and early 20th Century. Existing dwellings are typically double or single fronted cottages, with simple detailing and modest sized rooms.   |
|            | Building height   | Predominantly single storey. Two storey additions to the rear of buildings or within the roof space.  |
|            | Materials   | Residences within this area vary in material application. Residences were constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. The locality exhibits consistent early stone and brick dwellings on large sites with wide frontages to public roads. |
|            | Fencing   | Low front fencing, such as picket fencing, or no front fencing at all. High solid fencing up to 2 metres in height on Stephen Terrace.  |
|            | Setting, landscaping, streetscape and public realm features | The locality exhibits regular spacing between residential buildings that is primarily achieved through consistent setbacks from each side boundary.   |
|            | Representative Buildings                                    | Identified - refer to SA planning database.   |

|   |   |   |

| Walk4   | <b>Gilberton North Historic Area Statement (Walk4)</b>  |   |
|   | <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> |   |
|   | Eras, themes and context  | Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to late 1920s. Proximity to Walkerville Terrace generally dictates more modest dwellings while grander architecturally designed residences exist on Walkerville Hill, capitalising on views to the Adelaide Hills. |
|   | Allotments, subdivision and built form patterns   | Predominantly low density detached dwellings on wide allotments of a range of sizes.  |
|   | Architectural styles, detailing and built form features   | Mixture of architectural styles from turn of the century to early 1900s. Established character of large detached dwellings on spacious allotments, well setback from all allotment boundaries. Pitched roofs and articulated roof forms are an important characteristic of the area.  |
|   | Building height   | Predominantly single storey. Two storey additions to the rear of buildings or within the roof space.  |
|   | Materials   | Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.  |
|   | Fencing   | Front boundary fencing is open in design (including gates) with solid components limited to the base and pillars so as to provide views of the principle dwelling facade. Traditional materials, heights and designs.   |
| Setting, landscaping, streetscape and public realm features | <p>There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches.</p> <p>Large street trees and generous garden settings visible from the primary street frontage.</p>   |   |
| Representative Buildings                                    | Identified - refer to SA planning database.   |   |

**Historic Areas affecting District Council of Yankalilla**

|  |   |
|--|---|
|  | <p><b>Rapid Bay Historic Area Statement (Ya1)</b></p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> |
|--|---|

| Statement#  | Statement   |   |
|---|---|---|
| Ya1   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.  |   |
|   | Eras, themes and context  | <p>Rapid Bay is historically significant because of its connection with the first mainland landing by Colonel Light and his survey team in 1836 and has very strong connections and cultural significance for Aboriginal descendants being a popular fishing and summer occupation site, burial ground and Tjilbruke Dreaming site.</p> <p>1948-1949 (School added in 1950). Encompasses housing established by BHP as part of mining/quarrying operations to the west as well as historic buildings and items at the southern end of the town.</p> <p>Rapid Bay's built character and landscape setting reflects the influence of BHP's extractive industry, which was established during the 1940s with the establishment of a limestone quarry, crushers and loading jetty. Houses were built for employees. At the peak of construction homes were built for BHP by Fricker Bros using local stone and Wattle Flat bricks. A further 16 houses were built during 1949/50 on the eastern side of the township and the primary school officially opened in 1950. BHP stopped operations in June, 1962, and sold houses on the eastern side of Rapid Bay for private ownership. Adelaide Brighton Cement recommenced quarry operations in 1982, providing local jobs and stone products for the Highways Department, local councils and private contractors amounting to 12,000 tonnes annually. The operations have resulted in moving the shore line westward, as 30% of screenings were deposited in the area. Consequently the setting of the township with company housing divided by the Yattogolonga Creek and school oval, has a unique landscape setting and character.</p> |
|   | Allotments, subdivision and built form patterns   | <p>Rapid Bay has two residential enclaves which are divided by Yattogolonga River and the town oval. The western section of the town is laid out around the main entrance road and comprises eighteen houses, a former general store and meeting hall. These are without individual subdivision allotments.</p> <p>The eastern section includes fifteen houses either side of Cygnet Place and the primary school. They are constructed on allotments of approximately the same size and are set back the same distance from the road. Allotment sizes provide narrower frontages at the end of the cul-de-sac.</p>   |
|   | Architectural styles, detailing and built form features   | <p>Semi bungalow in design with painted hipped corrugated roofs, simple and return verandahs, windows surrounds comprising painted concrete lintels and window sills. The 15 houses in Cygnet Place were designed using one of six house plans prepared by BHP Limited. They are either five or six room dwellings and some have sleep-outs attached.</p> <p>On the western side, company dwellings range from simple detached, hipped or gable roof designs to a row of larger stone and brick houses with expansive verandahs facing the sea and overlooking the coastal area.</p>  |
|   | Building height   | All buildings in the township are of single storey, low scale character on generous allotments.   |
|   | Materials   | Materials used in housing construction include varying combinations of red brick, concrete brick and stone or limestone.  |
|   | Fencing   | There is a row of low rendered walls along the front of one group of allotments in Cygnet Place which overlook the sea, but all other allotments have wire mesh front fences and corrugated iron side and rear fences.  |
|   | Setting, landscaping, streetscape and public realm features   | <p>The streets are well treed, and although Norfolk Island pines are not the only species, they are the most dominant. The extension of the main entrance road which leads through the western residential area and then branches off towards the quarry is divided by a wide median strip in which Norfolk Island pines and pyramid trees have been planted alternately. About a third of the way along this street a road branches off towards the beach to provide access to the jetty, the foreshore caravan park and camping area and the eastern residential area. Trees have been planted along all these routes and the embankments along the roads have been planted with shrubs, flowers and ground cover.</p> <p>The mouth of the Yattogolonga River, which is located near the junction of these three routes, is shallow and filled with reeds. The jetty and the quarry works dominate the western end of the beach.</p>  |
| Representative Buildings                                | <i>[Not identified]</i>   |   |
| Ya2   | <b>Randalsea Historic Area Statement (Ya2)</b>  |   |
|   | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.  |   |
|   | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.  |   |
|   | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.  |   |
|   | Eras, themes and context  | <p>Established during the first phase of settlement (1836-1861). A sharp distinction is evident between the unformed groupings of buildings set within the township proper, and the bare hillsides surrounding the town.</p> <p>Randalsea comprises a small rural village founded in the 1836-1861 settlement period of SA around two industries- a steam mill and sawmilling. The historic significance of the village lies in the integrity, age and condition of the original buildings and landscape setting. The settlement's corner setting in Second Valley has been described as 'aesthetically one of the most pleasing heritage environments in South Australia'.</p>   |
| Allotments, subdivision and built form patterns         | Historic division pattern is maintained around the intersection of Main South Road and Finnis Vale Drive. A range of allotments of various configurations and sizes east and west of Main South Road.   |   |
| Architectural styles, detailing and built form features | A compact group of small scale, single storey cottages and buildings with randomly aligned frontages to the original road (Gamlen Place), with Randall's cottage and Palm House a former boarding house located west at a distance from the group. The Institute building, school house, school, and Florence's Guest House are higher set on the southern side of Finnis Vale Road. Leonard's Mill, with ancillary buildings is a visually dominant building on the eastern side of Main South Road. The former Mill is State Heritage listed. |   |
| Building height   | Predominantly single storey heights, in small scale buildings. The State Heritage listed Leonard's Mill provides a dominant element on the south-eastern side of Main South Road opposite Gamlen Place. Palm House presents a single storey appearance to Finnis Vale Drive but is two storey given the building is cut into the side of the slope that falls away from the road to the creek like north of the road.   |   |

| Statement# | Statement   |  |
|------------|---|--|
|            | Materials   | Dominant materials include stone walling, timber fenestration and entrances, slate flooring and corrugated iron roofing. More recent materials include colorbond roofing, mini-orb iron sheeting, brick and rendered surfaces. Evidence of early gum slab construction noted in outbuilding.   |
|            | Fencing   | Minimal fencing retaining an open feel to the shared spatial arrangements of buildings and gardens. A section of existing stone walling on the southern side of the road intersection and some post and wire fencing maintains the informal and open spatial character of the village.   |
|            | Setting, landscaping, streetscape and public realm features | Randalsea is nestled at the bottom of the Parananacooka River at its junction with a smaller tributary. A scattered collection of buildings are located along the valley floor, with trees and grazing land rising steeply behind to the ridge lines which form a contrasting rural backdrop. The public realm includes a creek side reserve and higher level park with walkway in the vicinity of a fenced War Memorial set higher than the Finnis Vale Road. |
|            | Representative Buildings                                    | [Not identified]   |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body  | Purpose of Referral  | Statutory Reference  |
|---|--|--|--|
| Development that may involve impact to the surface or subsoil of land or the floor of a sea, lake or river. | Minister responsible for the administration of the <i>Historic Shipwrecks Act 1981</i> . | To provide expert assessment and direction to the relevant authority on the potential impacts of development on, or in proximity to, historic shipwrecks or relics protected under the relevant Act. | Development of a class to which Schedule 9 clause 3 item 5 of the Planning |

|   |  |  |  |
|---|--|--|--|
|   |  |  | Development and Infrastructure (General) Regulations 2017 applies.   |
| Development that may involve impact to the surface or subsoil of land or sea floor, where located partly or fully within the 'adjacent area' of a historic shipwreck or historic relic within the meaning of the <i>Underwater Cultural Heritage Act 2018</i> (Commonwealth) as shown on the Historic Shipwrecks Overlay. | Commonwealth Minister responsible for the administration of the <i>Underwater Cultural Heritage Act 2018</i> (Commonwealth). | To provide expert assessment and direction to the relevant authority on the potential impacts of development on, or in proximity to, historic shipwrecks or relics protected under the relevant Act. | Development of a class to which Schedule 9 clause 3 item 6 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Interface Management Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Development of sensitive receivers in a manner that mitigates potential adverse environmental and amenity impacts generated by the lawful operation of neighbouring and proximate land uses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| Land Use and Intensity   |   |
| PO 1.1<br>Sensitive receivers are carefully sited and designed to mitigate adverse impacts of hazards, noise, dust, odour, light spill or other emissions from existing legally operating land uses through design techniques such as: <ul style="list-style-type: none"> <li>(a) locating residential accommodation the greatest distance practicable from the source of the impacts</li> <li>(b) locating buildings containing non-sensitive receivers between the source of the impacts and sensitive receivers</li> <li>(c) placing rooms more sensitive to air, noise and odour impacts (e.g. bedrooms) further away from the source of the impacts</li> <li>(d) providing private or common open space adjacent a building elevation that shields the space from the source of the impacts.</li> </ul> | DTS/DPF 1.1<br>None are applicable.                         |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

## Key Outback and Rural Routes Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Safe and efficient movement of vehicle and freight traffic on Key Outback and Rural Routes. |
| DO 2            | Provision of safe and efficient vehicular access to and from Key Outback and Rural Routes.  |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| Access - Safe Entry and Exit (Traffic Flow)   |  |
| <p>PO 1.1</p> <p>Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State maintained roads.</p>   | <p>DTS/DPF 1.1</p> <p>An access point satisfies (a), (b) or (c):</p> <ul style="list-style-type: none"> <li>(a) where servicing a single dwelling / residential allotment:                             <ul style="list-style-type: none"> <li>(i) it will not result in more than one access point</li> <li>(ii) vehicles can enter and exit the site in a forward direction</li> <li>(iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees</li> <li>(iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road</li> <li>(v) it will have a width of between 3m and 4m (measured at the site boundary).</li> </ul> </li> <li>(b) where the development will result in 2 and up to 6 dwellings:                             <ul style="list-style-type: none"> <li>(i) it will not result in more than one access point servicing the development site</li> <li>(ii) vehicles can enter and exit the site in a forward direction</li> <li>(iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees</li> <li>(iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road</li> <li>(v) it will have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site).</li> </ul> </li> <li>(c) where the development will result in 7 or more dwellings, or is a non-residential land use:                             <ul style="list-style-type: none"> <li>(i) it will not result in more than one access point servicing the development site</li> <li>(ii) where on a road with a speed limit of 80 km/h or greater vehicles can enter and exit the site using left turn only movements</li> <li>(iii) vehicles can enter and exit the site in a forward direction</li> <li>(iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees</li> <li>(v) it will have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less</li> <li>(vi) it will have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m</li> <li>(vii) it will have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m</li> <li>(viii) it provides for simultaneous two-way vehicle movements at the access:                                     <ul style="list-style-type: none"> <li>A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road</li> <li>and</li> <li>B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.</li> </ul> </li> </ul> </li> </ul> |
| Access - On-Site Queuing  |  |
| <p>PO 2.1</p> <p>Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site to minimise interruption of the functional performance of the road and maintain safe vehicle movements.</p> | <p>DTS/DPF 2.1</p> <p>An access point in accordance with one of the following:</p> <ul style="list-style-type: none"> <li>(a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:</li> </ul>   |

- (b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and:
  - (i) is expected to be serviced by vehicles with a length no greater than 6.4m
  - (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site).
- (c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and:
  - (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle
  - (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)
  - (iii) any termination of or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop
  - (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the largest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram:

Access - Location (Spacing) - Existing Access Points

PO 3.1  
Existing access points designed to accommodate the type and volume of traffic likely to be generated by development.

- DTS/DPF 3.1  
An existing access point satisfies (a), (b) or (c):
- (a) it will not service, or is not intended to service, more than 6 dwellings
  - (b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access
  - (c) it is not located on a Controlled Access Road and development constitutes:
    - (i) a change of use between an office <500m<sup>2</sup> gross leasable floor area and a consulting room <500m<sup>2</sup> gross leasable floor area or vice versa
    - (ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment
    - (iii) a change of use from a consulting room or office <250m<sup>2</sup> gross leasable floor area to shop <250m<sup>2</sup> gross leasable floor area
    - (iv) a change of use from a shop <500m<sup>2</sup> gross leasable floor area to a warehouse <500m<sup>2</sup> gross leasable floor area
    - (v) an office or consulting room with a gross leasable floor area <500m<sup>2</sup>
    - (vi) a change of use from residential dwelling to a shop or office or consulting room or personal or domestic services establishment with <250m<sup>2</sup> gross leasable floor area.

PO 4.1  
New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1  
A new access point satisfies (a), (b) or (c):  
(a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:  
The points marked X<sub>1</sub> and X are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension Y-Y extends to Point Y<sub>1</sub>.

- (b) where the development site is intended to serve between 1 and 6 dwellings, the new access:
- (i) is not located on a Controlled Access Road
  - (ii) is not located on a section of road affected by double barrier lines
  - (iii) will be on a road with a speed environment of 70km/h or less
  - (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
  - (v) is located a minimum of 6m from a median opening or pedestrian crossing.
- (c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

| Speed Limit     | Separation between access points   | Separation from public road junctions and merging/terminating lanes |
|-----------------|--|---|
| 50 km/h or less | No spacing requirement   | 97m   |
| 60 km/h         | 5m (for development intended to serve between 1 and 6 dwellings) and 20m for all other cases | 123m  |
| 70 km/h         | 55m  | 151m  |
| 80 km/h         | 70m  | 181m  |
| 90 km/h         | 90m  | 226m  |
| 100 km/h        | 110m   | 262m  |
| 110 km/h        | 135m   | 300m  |

PO 5.1  
Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.

DTS/DPF 5.1  
An access point satisfies (a) and (c) or (b) and (c):  
(a) the development site serves or is intended to serve between 1 and 6 dwellings and utilises an existing access point  
or  
(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

| Speed Limit     | Access Point serving 1-6 dwellings | Access point serving all other development |
|-----------------|------------------------------------|--|
| 40 km/h or less | 47m                                | 73m  |
| 50 km/h         | 63m                                | 97m  |
| 60 km/h         | 81m                                | 123m                                       |
| 70 km/h         | 100m                               | 151m                                       |
| 80 km/h         | 121m                               | 181m                                       |
| 90 km/h         | 144m                               | 226m                                       |
| 100 km/h        | 169m                               | 262m                                       |
| 110km/h         | 195m                               | 300m                                       |

and  
(c) pedestrian sightlines in accordance with the following diagram:

Access - Mud and Debris

PO 6.1  
Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.

DTS/DPF 6.1  
Where the road has an unsealed shoulder and the road is not kerbed, the access way is sealed from the edge of the seal on the road for a minimum of 10m or to the property boundary (whichever is closer).

Access - Stormwater

PO 7.1  
Access points are designed to minimise negative impact on roadside drainage of water.

DTS/DPF 7.1  
Development does not:  
(a) decrease the capacity of an existing drainage point  
(b) restrict or prevent the flow of stormwater to an existing drainage point system  
(c) result in access points becoming stormwater flow paths directly onto the road.

Building on Road Reserve

PO 8.1  
Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users.

DTS/DPF 8.1  
No encroachment of buildings or structures onto, above or below the road reserve.

Public Road Junctions

PO 9.1  
New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road opening conditions are maintained on the State Maintained Road.

DTS/DPF 9.1  
Development does not comprise any of the following:  
(a) creating a new junction with a public road  
(b) opening an unmade public road junction  
(c) modifying an existing public road junction.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body             | Purpose of Referral   | Statutory Reference                        |
|---|---------------------------|---|--|
| Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road: | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways | Development of a class to which Schedule 9 |

|  |  |   |   |
|--|--|---|---|
| <ul style="list-style-type: none"> <li>(a) creation of a new access or junction</li> <li>(b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority)</li> <li>(c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).</li> </ul> |  | as described in the Planning and Design Code. | clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Key Railway Crossings Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Safe, efficient and uninterrupted operation of key railway crossings. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| Access, Design and Function  |   |
| <p>PO 1.1</p> <p>Site access does not interfere or impact on the safe operation of a railway crossing.</p> | <p>DTS/DPF 1.1</p> <p>Development does not involve a new or modified access or cause an increase in traffic through an existing access that is located within the following distance from a railway crossing:</p> <ul style="list-style-type: none"> <li>(a) 110 km/h road - 190m</li> <li>(b) 100 km/h road - 165m</li> <li>(c) 90 km/h road - 140m</li> <li>(d) 80 km/h road - 110m</li> <li>(e) 70 km/h road - 90m</li> <li>(f) 60 km/h road - 70m</li> <li>(g) 50km/h or less road - 50m</li> </ul> |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

## Limited Dwelling Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Establishment of additional dwellings in primary production areas is limited to avoid undermining primary production. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature                            |
|---|--|
| PO 1.1<br>Development does not result in the establishment of a dwelling. | DTS/DPF 1.1<br>A new dwelling replaces an existing dwelling within the same allotment. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Limited Land Division Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | The long term use of land for primary production is maintained by minimising fragmentation through division of land. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| General   |   |
| PO 1.1<br>Land division does not result in the creation of an additional allotment.   | DTS/DPF 1.1<br>No additional allotments are created.        |
| PO 1.2<br>Land division involving boundary realignments occurs only where the number of resulting allotments with a site area less than that specified in the relevant Zone is not greater than the number that existed prior to the realignment. | DTS/DPF 1.2<br>None are applicable.                         |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Local Heritage Place Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Development maintains the heritage and cultural values of Local Heritage Places through conservation, ongoing use and adaptive reuse. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Built Form  |   |
| PO 1.1<br>The form of new buildings and structures maintains the heritage values of the Local Heritage Place.   | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Massing, scale and siting of development maintains the heritage values of the Local Heritage Place.   | DTS/DPF 1.2<br>None are applicable.                         |
| PO 1.3<br>Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the Local Heritage Place.  | DTS/DPF 1.3<br>None are applicable.                         |
| PO 1.4<br>Development is consistent with boundary setbacks and setting.   | DTS/DPF 1.4<br>None are applicable.                         |
| PO 1.5<br>Materials and colours are either consistent with or complement the heritage values of the Local Heritage Place.   | DTS/DPF 1.5<br>None are applicable.                         |
| PO 1.6<br>New buildings and structures are not placed or erected between the primary or secondary street boundaries and the façade of a Local Heritage Place.   | DTS/DPF 1.6<br>None are applicable.                         |
| PO 1.7<br>Development of a Local Heritage Place retains features contributing to its heritage value.  | DTS/DPF 1.7<br>None are applicable.                         |
| Alterations and Additions   |   |
| PO 2.1<br>Alterations and additions complement the subject building and are sited to be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the Local Heritage Place or its setting.                                | DTS/DPF 2.1<br>None are applicable.                         |
| PO 2.2<br>Adaptive reuse and revitalisation of Local Heritage Places to support their retention in a manner that respects and references the original use of the Local Heritage Place.  | DTS/DPF 2.2<br>None are applicable.                         |
| Ancillary Development   |   |
| PO 3.1<br>Ancillary development, including carports, outbuildings and garages, complements the heritage values of the Local Heritage Place.   | DTS/DPF 3.1<br>None are applicable.                         |
| PO 3.2<br>Ancillary development, including carports, outbuildings and garages, is located behind the building line and does not dominate the Local Heritage Place or its setting.   | DTS/DPF 3.2<br>None are applicable.                         |
| PO 3.3<br>Advertising and advertising hoardings are designed to complement the Local Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or its setting. | DTS/DPF 3.3<br>None are applicable.                         |
| PO 3.4<br>Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the Local Heritage Place.                       | DTS/DPF 3.4<br>None are applicable.                         |
| Land Division   |   |
| PO 4.1<br>Land division creates allotments that:  | DTS/DPF 4.1<br>None are applicable.                         |

|  |                                     |
|--|-------------------------------------|
| (a) maintain the heritage values of the Local Heritage Place, including setting<br>(b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the Local Heritage Place.   |                                     |
| Landscape Context and Streetscape Amenity  |                                     |
| PO 5.1<br>Individually heritage listed trees, parks, historic gardens and memorial avenues are retained unless:<br><br>(a) trees / plantings are, or have the potential to be, a danger to life or property or<br>(b) trees / plantings are significantly diseased and their life expectancy is short.   | DTS/DPF 5.1<br>None are applicable. |
| Demolition   |                                     |
| PO 6.1<br>Local Heritage Places are not demolished, destroyed or removed in total or in part unless:<br><br>(a) the portion of the Local Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value or<br>(b) the structural integrity or condition of the Local Heritage Place represents an unacceptable risk to public or private safety and is irredeemably beyond repair. | DTS/DPF 6.1<br>None are applicable. |
| PO 6.2<br>The demolition, destruction or removal of a building, portion of a building or other feature or attribute is appropriate where it does not contribute to the heritage values of the Local Heritage Place.  | DTS/DPF 6.2<br>None are applicable. |
| Conservation Works   |                                     |
| PO 7.1<br>Conservation works to the exterior of a Local Heritage Place (and other features identified in the extent of listing) match original materials to be repaired and utilise traditional work methods.  | DTS/DPF 7.1<br>None are applicable. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Major Urban Transport Routes Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Safe and efficient operation of Major Urban Transport Routes for all road users. |
| DO 2            | Provision of safe and efficient access to and from Major Urban Transport Routes. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Access - Safe Entry and Exit (Traffic Flow)   |   |
| PO 1.1<br>Access is designed to allow safe entry and exit to and from a site to meet the needs of | DTS/DPF 1.1<br>An access point satisfies (a), (b) or (c):   |

development and minimise traffic flow interference associated with access movements along adjacent State Maintained Roads.

- (a) where servicing a single (1) residential dwelling / residential allotment:
  - (i) it will not result in more than one access point
  - (ii) vehicles can enter and exit the site in a forward direction
  - (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees
  - (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road
  - (v) have a width of between 3m and 4m (measured at the site boundary).
- (b) where the development will result in 2 and up to 6 dwellings:
  - (i) it will not result in more than one access point servicing the development site
  - (ii) entry and exit movements are left turn only
  - (iii) vehicles can enter and exit the site in a forward direction
  - (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees;
  - (v) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road
  - (vi) have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site).
- (c) where the development will result in over 7 dwellings, or is a non-residential land use:
  - (i) it will not result in more than one access point servicing the development site
  - (ii) vehicles can enter and exit the site using left turn only movements
  - (iii) vehicles can enter and exit the site in a forward direction
  - (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees
  - (v) have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less
  - (vi) have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m
  - (vii) have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m
  - (viii) provides for simultaneous two-way vehicle movements at the access;
    - A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road
    - and
    - B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.

Access - On-Site Queuing

PO 2.1

Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption of the functional performance of the road and maintain safe vehicle movements.

DTS/DPF 2.1

An access point in accordance with one of the following:

- (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:

- (b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and:
  - (i) is expected to be serviced by vehicles with a length no greater than 6.4m
  - (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site).
- (c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and:
  - (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle
  - (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)
  - (iii) any termination of, or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop
  - (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the largest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram:

Access – Location (Spacing) - Existing Access Points

PO 3.1  
Existing access points designed to accommodate the type and volume of traffic likely to be generated by the development.

- DTS/DPF 3.1  
An existing access point satisfies (a), (b) or (c):
- (a) it will not service, or is not intended to service, more than 6 dwellings
  - (b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access
  - (c) it is not located on a Controlled Access Road and development constitutes:
    - (i) a change of use between an office <500m<sup>2</sup> gross leasable floor area and a consulting room <500m<sup>2</sup> gross leasable floor area or vice versa
    - (ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment
    - (iii) a change of use from a consulting room or office <250m<sup>2</sup> gross leasable floor area to shop <250m<sup>2</sup> gross leasable floor area
    - (iv) a change of use from a shop <500m<sup>2</sup> gross leasable floor area to a warehouse <500m<sup>2</sup> gross leasable floor area
    - (v) an office or consulting room with a gross leasable floor area <500m<sup>2</sup>
    - (vi) a change of use from residential dwelling to a shop, office, consulting room or personal or domestic services establishment with <250m<sup>2</sup> gross leasable floor area.

PO 4.1

New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1

A new access point satisfies (a), (b) or (c):

- (a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:

The points marked X<sub>1</sub> and X are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension Y-Y extends to Point Y<sub>1</sub>.

- (b) where the development site is intended to serve between 1 and 6 dwellings, the new access:
  - (i) is not located on a Controlled Access Road
  - (ii) is not located on a section of road affected by double barrier lines
  - (iii) will be on a road with a speed environment of 70km/h or less
  - (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
  - (v) located minimum of 6m from a median opening or pedestrian crossing.
- (c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

| Speed Limit     | Separation between access points   | Separation from public road junctions and merging/terminating lanes |
|-----------------|--|---|
| 50 km/h or less | No spacing requirement   | 20m   |
| 60 km/h         | 5m (for development intended to serve between 1 and 6 dwellings) and 20m for all other cases | 123m  |
| 70 km/h         | 55m  | 151m  |
| 80 km/h         | 70m  | 181m  |
| 90 km/h         | 90m  | 214m  |
| 100 km/h        | 110m   | 248m  |
| 110 km/h        | 135m   | 285m  |

Access - Location (Sight Lines)

PO 5.1

Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.

DTS/DPF 5.1

An access point satisfies (a) and (c) or (b) and (c):

- (a) the development site does or is intended to serve between 1 and 6 dwellings and utilises an existing access point or
- (b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

| Speed Limit     | Access Point serving 1-6 dwellings | Access point serving all other development |
|-----------------|------------------------------------|--|
| 40 km/h or less | 47m                                | 73m  |
| 50 km/h         | 63m                                | 97m  |
| 60 km/h         | 81m                                | 123m                                       |
| 70 km/h         | 100m                               | 151m                                       |
| 80 km/h         | 121m                               | 181m                                       |
| 90 km/h         | 144m                               | 226m                                       |
| 100 km/h        | 169m                               | 262m                                       |

(c) pedestrian sightlines in accordance with the following diagram:

Access - Mud and Debris

PO 6.1  
Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.

DTS/DPF 6.1  
Where the road has an unsealed shoulder and the road is not kerbed the access way is sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer)

Access - Stormwater

PO 7.1  
Access points designed to minimise negative impact on roadside drainage of water.

DTS/DPF 7.1  
Development does not:  
(a) decrease the capacity of an existing drainage point  
(b) restrict or prevent the flow of stormwater to an existing drainage point and system  
(c) results in access points becoming stormwater flow paths directly onto the road.

Building on Road Reserve

PO 8.1  
Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users.

DTS/DPF 8.1  
No encroachment of buildings or structures onto, above or below the road reserve.

Public Road Junctions

PO 9.1  
New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road operating conditions are maintained on the State Maintained Road.

DTS/DPF 9.1  
Development does not comprise any of the following:  
(a) creating a new junction with a public road  
(b) opening an unmade public road junction  
(c) modifying an existing public road junction.

Corner Cut-Offs

PO 10.1  
Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to driver safety.

DTS/DPF 10.1  
Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram:

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body             | Purpose of Referral   | Statutory Reference  |
|---|---------------------------|---|--|
| <p>Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road:</p> <ul style="list-style-type: none"> <li>(a) creation of a new access or junction</li> <li>(b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority)</li> <li>(c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).</li> </ul> | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

**Marine Parks (Managed Use) Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Marine habitats and biodiversity are protected through limiting development to coastal infrastructure (jetties, marinas, pontoons), aquaculture, tourism, recreation and renewable energy facilities. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use  |   |
| PO 1.1<br>Development avoids or minimises harm to marine habitats, biodiversity or the functioning of ecosystems. | DTS/DPF 1.1<br>None are applicable.                         |

**Procedural Matters (PM) - Referrals**

### Marine Parks (Restricted Use) Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | High value marine habitats and biological diversity are protected. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use  |   |
| PO 1.1<br>Development is limited to that required to support the ongoing operation of ports and harbours. | DTS/DPF 1.1<br>None are applicable.                         |

#### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

### Mount Lofty Ranges Water Supply Catchment (Area 1) Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Safeguard Greater Adelaide's public water supply by ensuring development has a neutral or beneficial effect on the quality of water harvested from primary reservoirs or diversion weir catchments from the Mount Lofty Ranges. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Water Quality   |   |
| PO 1.1<br>Development results in a neutral or beneficial effect on the quality of water draining from the site to maintain and enhance the role of the catchment as a water supply. | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2  | DTS/DPF 1.2   |

|  |   |
|--|---|
| <p>Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into primary public water supply reservoirs and weirs.</p>   | <p>Development does not involve any one or combination of the following:</p> <ul style="list-style-type: none"> <li>(a) aquaculture involving husbandry or supplementary feeding in a water flow through system</li> <li>(b) dairy except if a replacement dairy</li> <li>(c) organic waste processing facility</li> <li>(d) fuel depot</li> <li>(e) horticulture involving only market gardening or commercial turf growing</li> <li>(f) intensive animal husbandry</li> <li>(g) landfill</li> <li>(h) retail fuel outlet</li> <li>(i) special industry</li> <li>(j) stock sales yard</li> <li>(k) stock slaughter works</li> <li>(l) timber preservation works</li> <li>(m) waste recycling, storage or treatment facility</li> <li>(n) wrecking yard.</li> </ul> |
| <p>Wastewater</p>  |   |
| <p>PO 2.1<br/>Development that generates trade or industrial wastewater is designed to ensure wastewater disposal avoids adverse impacts on the quality of water draining into primary public water supply reservoirs and weirs.</p>                         | <p>DTS/DPF 2.1<br/>Development that generates trade or industrial wastewater is connected to a:</p> <ul style="list-style-type: none"> <li>(a) sewer or community wastewater management system with sufficient hydraulic and treatment capacity to accept the inflow, or</li> <li>(b) wastewater holding tank which has storage capacity of more than four days total flow during peak operations and is contained within an impervious, bunded area with a total liquid holding capacity of more than 120 percent of the total holding tank capacity, prior to transporting for off-site disposal.</li> </ul>  |
| <p>PO 2.2<br/>Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within primary reservoir and weir catchment areas.</p> | <p>DTS/DPF 2.2<br/>Development, including alterations and additions, in combination with existing built form and activities within an allotment:</p> <ul style="list-style-type: none"> <li>(a) does not generate a combined total of more than 900 litres of wastewater per day, and</li> <li>(b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards</li> </ul> <p>or is otherwise connected to a sewerage or community wastewater management system.</p>  |
| <p>PO 2.3<br/>Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.</p>   | <p>DTS/DPF 2.3<br/>Development results in:</p> <ul style="list-style-type: none"> <li>(a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards</li> </ul> <p>or</p> <ul style="list-style-type: none"> <li>(a) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.</li> </ul>  |
| <p>PO 2.4<br/>Surface and groundwater protected from wastewater discharge pollution.</p>   | <p>DTS/DPF 2.4<br/>All components of an effluent disposal area are:</p> <ul style="list-style-type: none"> <li>(a) set back 50 metres or more from a watercourse</li> <li>(b) set back 100 metres or more from a public water supply reservoir</li> <li>(c) located on land with a slope no greater than 1-in-5 (20%)</li> <li>(d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table</li> <li>(e) above the 10% AEP flood level.</li> </ul>   |
| <p>Stormwater</p>  |   |
| <p>PO 3.1<br/>Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site.</p>   | <p>DTS/DPF 3.1<br/>None are applicable.</p>   |
| <p>PO 3.2<br/>Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution.</p>   | <p>DTS/DPF 3.2<br/>None are applicable.</p>   |
| <p>PO 3.3<br/>Polluted stormwater is treated prior to discharge from the site.</p>   | <p>DTS/DPF 3.3<br/>None are applicable.</p>   |
| <p>PO 3.4<br/>Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to</p>   | <p>DTS/DPF 3.4<br/>Development includes:</p>  |

|   |  |
|---|--|
| protect water quality.  | <ul style="list-style-type: none"> <li>(a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings or</li> <li>(b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m<sup>2</sup>.</li> </ul>  |
| PO 3.5<br>Stormwater from dwelling additions captured to protect water quality.   | DTS/DPF 3.5<br>Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.   |
| PO 3.6<br>Stormwater from shops and tourist accommodation is managed to protect water quality.  | DTS/DPF 3.6<br>Shops and tourist accommodation satisfy all the following: <ul style="list-style-type: none"> <li>(a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores</li> <li>(b) are located 100m or more from public water supply reservoirs and diversion weirs</li> <li>(c) are located on land with a slope not exceeding 20%</li> <li>(d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L</li> <li>(e) includes swales that divert clean stormwater away from areas where it could be polluted.</li> </ul>                         |
| PO 3.7<br>Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.   | DTS/DPF 3.7<br>Horse keeping and low intensity animal husbandry satisfy all the following: <ul style="list-style-type: none"> <li>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores</li> <li>(b) is located on land with a slope not exceeding 10%</li> <li>(c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L</li> <li>(d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted.</li> </ul> |
| PO 3.8<br>Stormwater from horticulture is managed to protect water quality.   | DTS/DPF 3.8<br>Horticulture satisfies all the following : <ul style="list-style-type: none"> <li>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores</li> <li>(b) is located 100m or more from public water supply reservoirs and diversion weirs</li> <li>(c) is located on land with a slope not exceeding 10%</li> <li>(d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted.</li> </ul>                          |
| PO 3.9<br>Stormwater from excavated and filled areas is managed to protect water quality.   | DTS/DPF 3.9<br>Excavation and/or filling satisfy all the following: <ul style="list-style-type: none"> <li>(a) is located 50m or more from watercourses</li> <li>(b) is located 100m or more from public water supply reservoirs and diversion weirs</li> <li>(c) does not involve excavation exceeding a vertical height of 0.75m</li> <li>(d) does not involve filling exceeding a vertical height of 0.75m</li> <li>(e) does not involve a total combined excavation and filling vertical height of 1.5m.</li> </ul>  |
| Landscapes and Natural Features   |  |
| PO 4.1<br>Development minimises the need to modify landscapes and natural features.   | DTS/DPF 4.1<br>None are applicable.  |
| Land Division   |  |
| PO 5.1<br>Land division does not result in an increased risk of pollution to surface or underground water.  | DTS/DPF 5.1<br>Land division does not create additional allotments and satisfies (a) and/or (b): <ul style="list-style-type: none"> <li>(a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures</li> <li>(b) is for realignment of allotment boundaries to improve management of the land for primary production and/or conservation of natural features.</li> </ul>  |
| PO 5.2<br>Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists. | DTS/DPF 5.2<br>None are applicable.  |

**Procedural Matters (PM)**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory |
|---------------------------------|---------------|---------------------|-----------|
|---------------------------------|---------------|---------------------|-----------|

|   |                                   |   | Reference  |
|---|-----------------------------------|---|--|
| <p>Any of the following classes of development that are not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure:</p> <ul style="list-style-type: none"> <li>(a) land division creating one or more additional allotments, either partly or wholly within the area of the overlay</li> <li>(b) function venue with more than 75 seats for customer dining purposes</li> <li>(c) restaurant with more than 40 seats for customer dining purposes</li> <li>(d) restaurant with more than 30 seats for customer dining purposes in association with a cellar door</li> <li>(e) dwelling where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned</li> <li>(f) tourist accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned</li> <li>(g) workers' accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned</li> <li>(h) any other development that generates human wastewater from a peak loading capacity of more than 40 persons (or more than 6,000 litres/day).</li> </ul> | Environment Protection Authority. | To provide expert technical assessment and direction to the relevant authority on whether a proposed development will have a neutral or beneficial impact on water quality. | Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period more than 200 tonnes of organic waste or matter (EPA Licence)   |                                   |   |  |
| Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period more than 2.5 ML of wastewater (EPA Licence required at more than 5ML)  |                                   |   |  |
| Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding   |                                   |   |  |
| Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units (EPA Licence required at 650 or more standard pig units)  |                                   |   |  |
| Dairies - carrying on of a dairy with a total processing capacity exceeding 100 milking animals at any one time.  |                                   |   |  |

## Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Safeguard Greater Adelaide's public water supply by ensuring development has a neutral or beneficial effect on the quality of water harvested from secondary reservoirs or diversion weir catchments from the Mount Lofty Ranges. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Water Quality   |   |
| <p>PO 1.1</p> <p>Development results in a neutral or beneficial effect on the quality of water draining from the site to maintain and enhance the role of the catchment as a water supply.</p>  | <p>DTS/DPF 1.1</p> <p>None are applicable.</p>  |
| <p>PO 1.2</p> <p>Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into secondary public water supply reservoirs and weirs.</p>  | <p>DTS/DPF 1.2</p> <p>Development does not involve any one or combination of the following:</p> <ul style="list-style-type: none"> <li>(a) landfill</li> <li>(b) special industry.</li> </ul>   |
| Wastewater  |   |
| <p>PO 2.1</p> <p>Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within secondary reservoir and weir catchment areas.</p> | <p>DTS/DPF 2.1</p> <p>Development including alterations and additions, in combination with existing built form and activities within an allotment:</p> <ul style="list-style-type: none"> <li>(a) do not generate a combined total of more than 1500 litres of wastewater per day and</li> <li>(b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards</li> </ul> <p>or is otherwise connected to a sewer or community wastewater management system.</p>   |
| <p>PO 2.2</p> <p>Dairy development is of a scale and design that will avoid adverse water quality impacts.</p>  | <p>DTS/DPF 2.2</p> <p>Dairy development satisfies all of the following:</p> <ul style="list-style-type: none"> <li>(a) is located at least 100 metres from any watercourse, dam, bore or well</li> <li>(b) is connected to a wastewater management system that is located 200 metres from any watercourse, dam, bore or well and is designed and constructed to avoid leakage to groundwater or overflow under extreme rainfall conditions</li> <li>(c) treated wastewater irrigation areas:                             <ul style="list-style-type: none"> <li>(i) have a slope of less than 1-in-5 (20 percent)</li> <li>(ii) are greater than 100 metres from any watercourse, dam, bore or well</li> </ul> </li> </ul> <p>are suitable to provide for seasonal wastewater irrigation without causing pollution of surface or groundwater.</p> |
| <p>PO 2.3</p> <p>Development that generates trade or industrial wastewater is designed to ensure wastewater disposal avoids adverse impacts on the quality of water draining into secondary public water supply reservoirs and weirs.</p>                         | <p>DTS/DPF 2.3</p> <p>Development that generates trade or industrial wastewater is connected to:</p> <ul style="list-style-type: none"> <li>(a) a sewer or community wastewater management system with sufficient hydraulic and treatment capacity to accept the inflow</li> <li>or</li> <li>(b) an on-site wastewater holding tank which has storage capacity of more than four days total flow during peak operations and is contained within an impervious, bunded area with a total liquid holding capacity of more than 120 percent of the total holding tank capacity, prior to transporting for off-site disposal.</li> </ul>  |
| <p>PO 2.4</p> <p>Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.</p>   | <p>DTS/DPF 2.4</p> <p>Development results in:</p> <ul style="list-style-type: none"> <li>(a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards</li> <li>or</li> <li>(b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.</li> </ul>  |
| <p>PO 2.5</p> <p>Surface and groundwater protected from wastewater discharge pollution.</p>   | <p>DTS/DPF 2.5</p> <p>All components of an effluent disposal area are:</p> <ul style="list-style-type: none"> <li>(a) setback 50 metres or more from a watercourse</li> </ul>   |

|  |  |
|--|--|
|  | <ul style="list-style-type: none"> <li>(b) setback 100 metres or more from a public water supply reservoir</li> <li>(c) located on land with a slope no greater than 1-in-5 (20%)</li> <li>(d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table</li> <li>(e) above the 10% AEP flood level.</li> </ul>  |
| Stormwater   |  |
| PO 3.1<br>Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site. | DTS/DPF 3.1<br>None are applicable.  |
| PO 3.2<br>Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution.                                       | DTS/DPF 3.2<br>None are applicable.  |

| PO 3.4<br>Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality.  | DTS/DPF 3.4<br>Development includes: <ul style="list-style-type: none"> <li>(a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings</li> <li>or</li> <li>(b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m<sup>2</sup>.</li> </ul>  |
| PO 3.5<br>Stormwater from dwelling additions captured to protect water quality.  | DTS/DPF 3.5<br>Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.   |
| PO 3.6<br>Stormwater from shops and tourist accommodation is managed to protect water quality.   | DTS/DPF 3.6<br>Shops and tourist accommodation satisfy all the following: <ul style="list-style-type: none"> <li>(a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores</li> <li>(b) are located 100m or more from public water supply reservoirs and diversion weirs</li> <li>(c) are located on land with a slope not exceeding 20%</li> <li>(d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L</li> <li>(e) includes swales that divert clean stormwater away from areas where it could be polluted.</li> </ul>                         |
| PO 3.7<br>Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.  | DTS/DPF 3.7<br>Horse keeping and low intensity animal husbandry satisfy all the following: <ul style="list-style-type: none"> <li>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores</li> <li>(b) is located on land with a slope not exceeding 10%</li> <li>(c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L</li> <li>(d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted.</li> </ul> |
| PO 3.8<br>Stormwater from horticulture is managed to protect water quality.  | DTS/DPF 3.8<br>Horticulture satisfies all the following: <ul style="list-style-type: none"> <li>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores</li> <li>(b) is located 100m or more from public water supply reservoirs and diversion weirs</li> <li>(c) is located on land with a slope not exceeding 10%</li> <li>(d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted.</li> </ul>                           |
| PO 3.9<br>Stormwater from excavated and filled areas is managed to protect water quality.  | DTS/DPF 3.9<br>Excavation and/or filling satisfy all the following: <ul style="list-style-type: none"> <li>(a) is located 50m or more from watercourses</li> <li>(b) is located 100m or more from public water supply reservoirs and diversion weirs</li> <li>(c) does not involve excavation exceeding a vertical height of 0.75m</li> <li>(d) does not involve filling exceeding a vertical height of 0.75m</li> <li>(e) does not involve a total combined excavation and filling vertical height of 1.5m.</li> </ul>  |
| Landscapes and Natural Features  |  |
| PO 4.1<br>Development minimises the need to modify landscapes and natural features.  | DTS/DPF 4.1<br>None are applicable.  |

| Land Division  |   |
|--|---|
| <p>PO 5.1</p> <p>Land division does not result in an increased risk of pollution to surface or underground water.</p>  | <p>DTS/DPF 5.1</p> <p>Land division does not create additional allotments and satisfies (a) and/or (b):</p> <ul style="list-style-type: none"> <li>(a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures</li> <li>or</li> <li>(b) is for realignment of allotment boundaries in order to improve management of the land for primary production and/or conservation of natural features.</li> </ul> |
| <p>PO 5.2</p> <p>Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists.</p> | <p>DTS/DPF 5.2</p> <p>None are applicable.</p>  |

**Procedural Matters (PM)**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body                            | Purpose of Referral  | Statutory Reference   |
|--|--|--|---|
| <p>Any of the following classes of development that are not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure:</p> <ul style="list-style-type: none"> <li>(a) land division creating one or more additional allotments, either partly or wholly within the area of the overlay</li> <li>(b) function venue with more than 75 seats for customer dining purposes</li> <li>(c) restaurant with more than 40 seats for customer dining purposes</li> <li>(d) restaurant with more than 30 seats for customer dining purposes in association with a cellar door</li> <li>(e) dwelling where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned</li> <li>(f) tourist accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned</li> <li>(g) workers' accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned</li> <li>(h) any other development that generates human wastewater from a peak loading capacity of more than 40 persons (or more than 6,000 litres/day)</li> </ul> | <p>Environment Protection Authority.</p> | <p>To provide expert technical assessment and direction to the relevant authority on whether a proposed development will have a neutral or beneficial impact on water quality.</p> | <p>Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |
| <p>Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period more than 200 tonnes of organic waste or matter (EPA Licence)</p>   |  |  |   |
| <p>Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period more than 2.5 ML of wastewater (EPA Licence required at more than 5ML)</p>  |  |  |   |
| <p>Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of</p>  |  |  |   |

|  |  |  |  |
|--|--|--|--|
| drought or other emergency feeding   |  |  |  |
| Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units (EPA Licence required at 650 or more standard pig units) |  |  |  |
| Dairies - carrying on of a dairy with a total processing capacity exceeding 100 milking animals at any one time.   |  |  |  |

## Murray-Darling Basin Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Sustainable water use in the Murray-Darling Basin area. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| <p>PO 1.1</p> <p>All development, but in particular development involving:</p> <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) activities requiring irrigation</li> <li>(c) aquaculture</li> <li>(d) industry</li> <li>(e) intensive animal husbandry</li> <li>(f) horse keeping</li> <li>(g) commercial forestry</li> </ul> <p>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in the Murray-Darling Basin.</p> | <p>DTS/DPF 1.1</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> <li>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use<br/>or</li> <li>(b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.</li> </ul> |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body   | Purpose of Referral   | Statutory Reference   |
|--|---|---|---|
| <p>Any of the following classes of development that require, or may require water to be taken from the River Murray within the meaning of the <i>River Murray Act 2003</i> under a water licence required in addition to any allocation that has already been granted under the <i>Landscape South Australia Act 2019</i>:</p> <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) activities requiring irrigation</li> <li>(c) aquaculture</li> <li>(d) industry</li> <li>(e) intensive animal husbandry</li> <li>(f) horse keeping</li> <li>(g) commercial forestry.</li> </ul> | Minister responsible for the administration of the <i>River Murray Act 2003</i> . | To provide expert technical assessment and direction to the relevant authority on matters regarding the taking of water, to ensure development is undertaken sustainably in the Murray-Darling Basin. | Development of a class to which Schedule 9 clause 3 item 10 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Native Vegetation Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Areas of native vegetation are protected, retained and restored in order to sustain biodiversity, threatened species and vegetation communities, fauna habitat, ecosystem services, carbon storage and amenity values. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Environmental Protection  |   |
| <p>PO 1.1</p> <p>Development avoids, or where it cannot be practically avoided, minimises the clearance of native vegetation taking into account the siting of buildings, access points, bushfire protection measures and building maintenance.</p>   | <p>DTS/DPF 1.1</p> <p>An application is accompanied by:</p> <ul style="list-style-type: none"> <li>(a) a declaration stating that the proposal will not, or would not, involve clearance of native vegetation under the Native Vegetation Act 1991, including any clearance that may occur:                             <ul style="list-style-type: none"> <li>(i) in connection with a relevant access point and / or driveway</li> <li>(ii) within 10m of a building (other than a residential building or tourist accommodation)</li> <li>(iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control</li> <li>(iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area</li> </ul> </li> <li>or</li> <li>(b) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the clearance is categorised as 'Level 1 clearance'.</li> </ul> |
| <p>PO 1.2</p> <p>Native vegetation clearance in association with development avoids the following:</p> <ul style="list-style-type: none"> <li>(a) significant wildlife habitat and movement corridors</li> <li>(b) rare, vulnerable or endangered plants species</li> <li>(c) native vegetation that is significant because it is located in an area which has been extensively cleared</li> <li>(d) native vegetation that is growing in, or in association with, a wetland environment.</li> </ul>  | <p>DTS/DPF 1.2</p> <p>None are applicable.</p>  |
| <p>PO 1.3</p> <p>Intensive animal husbandry, commercial forestry and agricultural activities are sited, set back and designed to minimise impacts on native vegetation, including impacts on native vegetation in an adjacent State Significant Native Vegetation Area, from:</p> <ul style="list-style-type: none"> <li>(a) in the case of commercial forestry, the spread of fires from a plantation</li> <li>(b) the spread of pest plants and phytophthora</li> <li>(c) the spread of non-indigenous plants species</li> <li>(d) excessive nutrient loading of the soil or loading arising from surface water runoff</li> <li>(e) soil compaction</li> <li>(f) chemical spray drift.</li> </ul> | <p>DTS/DPF 1.3</p> <p>Development within 500 metres of a boundary of a State Significant Native Vegetation Area does not involve any of the following:</p> <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) intensive animal husbandry</li> <li>(c) dairy</li> <li>(d) commercial forestry</li> <li>(e) aquaculture.</li> </ul>   |
| <p>PO 1.4</p> <p>Development restores and enhances biodiversity and habitat values through revegetation using locally indigenous plant species.</p>   | <p>DTS/DPF 1.4</p> <p>None are applicable.</p>  |
| Land division   |   |
| <p>PO 2.1</p> <p>Land division does not result in the fragmentation of land containing native vegetation, or necessitate the clearance of native vegetation, unless such clearance is considered minor, taking into account the location of allotment boundaries, access ways, fire breaks, boundary fencing and potential building siting or the like.</p>   | <p>DTS/DPF 2.1</p> <p>Land division where:</p> <ul style="list-style-type: none"> <li>(a) an application is accompanied by one of the following:                             <ul style="list-style-type: none"> <li>(i) a declaration stating that none of the allotments in the proposed plan of division contain native vegetation under the <i>Native Vegetation Act 1991</i></li> <li>(ii) a declaration stating that no native vegetation clearance under the <i>Native Vegetation Act 1991</i> will be required as a result of the division of land</li> <li>(iii) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the vegetation to be cleared is categorised as 'Level 1 clearance'</li> </ul> </li> </ul>   |

- or
- (b) an application for land division which is being considered concurrently with a proposal to develop each allotment which will satisfy, or would satisfy, the requirements of DTS/DPF 1.1, including any clearance that may occur or
- (c) the division is to support a Heritage Agreement under the Native Vegetation Act 1991 or the *Heritage Places Act 1993*.

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body             | Purpose of Referral  | Statutory Reference   |
|---|---------------------------|--|---|
| Development that is the subject of a report prepared in accordance with Regulation 18(2)(a) of the <i>Native Vegetation Regulations 2017</i> that categorises the clearance, or potential clearance, as 'Level 3 clearance' or 'Level 4 clearance'. | Native Vegetation Council | To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation. | Development of a class to which Schedule 9 clause 3 item 11 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

### Noise and Air Emissions Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Community health and amenity is protected from adverse impacts of noise and air emissions. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| Siting and Design   |  |
| <p>PO 1.1</p> <p>Sensitive receivers adjoining high noise and/or air pollution sources are designed and sited to shield sensitive receivers from the emission source using measures such as:</p> <ul style="list-style-type: none"> <li>(a) placing buildings containing non-sensitive receivers (such as retail and commercial) between the emission source and sensitive receivers</li> <li>(b) within individual buildings, placing rooms more sensitive to air quality and noise impacts (such as living rooms and bedrooms) further away from the emission source</li> <li>(c) providing appropriate separation or erecting noise attenuation barriers, provided the requirements for safety, urban design and access can be met</li> <li>(d) the use of building design elements such as podiums and jutting, deep or enclosed balconies (including with solid balustrades).</li> </ul> | <p>DTS/DPF 1.1</p> <p>Sensitive receivers satisfy all of the following:</p> <ul style="list-style-type: none"> <li>(a) do not adjoin a:                             <ul style="list-style-type: none"> <li>(i) Designated Road: Type A</li> <li>(ii) Designated Road Corridor: Type B</li> <li>(iii) Designated Road: Type R</li> <li>(iv) Train Corridor</li> <li>(v) Tram Corridor</li> </ul> </li> <li>(b) adjoining development incorporating music includes noise attenuation measures to achieve a noise level in any bedroom exposed to music noise (L10) less than:                             <ul style="list-style-type: none"> <li>(i) 8 dB above the level of background noise (L90,15 min) in any octave band of the sound spectrum; and</li> <li>(ii) 5 dB(A) above the level of background noise (LA90,15 min) for the overall (sum of all octave bands) A-weighted levels.</li> </ul> </li> </ul> |
| PO 1.2  | DTS/DPF 1.2  |

|  |  |
|--|--|
| <p>Development incorporating a sensitive receiver adjoining high air pollution sources use building design elements such as varying building heights, widths, articulation, setbacks and shapes to increase wind turbulence and the dispersion of air pollutants.</p>  | <p>Sensitive receivers do not adjoin any of the following:</p> <ul style="list-style-type: none"> <li>(a) Designated Road: Type A</li> <li>(b) Designated Road: Type B</li> <li>(c) Designated Road: Type R</li> <li>(d) Train Corridor</li> <li>(e) Tram Corridor.</li> </ul>   |
| <p>PO 1.3<br/>Development incorporating a sensitive receiver adjoining high noise and/or air pollution sources locates private open space (including ground level courtyards and balconies), common open space and outdoor play areas within educational facilities and child care facilities away from the emission source.</p> | <p>DTS/DPF 1.3<br/>Open space associated with a sensitive receiver is not adjoining any of the following:</p> <ul style="list-style-type: none"> <li>(a) Designated Road: Type A</li> <li>(b) Designated Road: Type B</li> <li>(c) Designated Road: Type R</li> <li>(d) Train Corridor</li> <li>(e) Tram Corridor</li> <li>(f) Development incorporating music.</li> </ul> |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Non-Stop Corridors Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Safe and efficient operation of non-stop corridors, where free-flowing traffic movement is prioritised. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| Non-Stop Corridor Overlay  |   |
| <p>PO 1.1<br/>The safety, efficiency and functional performance of non-stop corridors is maintained.</p> | <p>DTS/DPF 1.1<br/>None are applicable.</p>                 |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body             | Purpose of Referral   | Statutory Reference  |
|--|---------------------------|---|--|
| <p>Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a Non-Stop Corridor Road or within 25 metres of an intersection with any such road:</p> <ul style="list-style-type: none"> <li>(a) creation of a new access or junction</li> </ul> | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the 4854 |

|   |                                  |  |   |
|---|----------------------------------|--|---|
| <p>(b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority)</p> <p>(c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).</p>   |                                  |  | <p>Planning, Development and Infrastructure (General) Regulations 2017 applies.</p>   |
| <p>Except where all of the relevant deemed-to-satisfy criteria are met, an advertisement or advertising hoarding that is on a Non-Stop Corridor Road or is on land abutting a Non-Stop Corridor Road and:</p> <p>(a) is within 100m of an on or off ramp to a Non-Stop Corridor Road as shown in the Non-Stop Corridors Overlay and</p> <p>(b) will:</p> <ul style="list-style-type: none"> <li>(i) be internally illuminated or</li> <li>(ii) incorporate a moving or changing display or message or</li> <li>(iii) incorporate a flashing light.</li> </ul> | <p>Commissioner of Highways.</p> | <p>To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.</p> | <p>Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |

### Prescribed Surface Water Areas Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Sustainable water use in prescribed surface water areas that maintains the health and natural flow paths of surface water. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| <p>PO 1.1</p> <p>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.</p>  | <p>DTS/DPF 1.1</p> <p>None are applicable.</p>   |
| <p>PO 1.2</p> <p>All development, but in particular development involving any of the following:</p> <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) activities requiring irrigation</li> <li>(c) aquaculture</li> <li>(d) industry</li> <li>(e) intensive animal husbandry</li> <li>(f) commercial forestry</li> </ul> <p>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed surface water areas.</p> | <p>DTS/DPF 1.2</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> <li>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or</li> <li>(b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.</li> </ul> |

#### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body   | Purpose of Referral   | Statutory Reference  |
|---|---|---|--|
| <p>Development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts surface water flowing over land.</p> | <p>Relevant authority under the <i>Landscape South Australia Act 2019</i> that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the</p> | <p>To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the</p> | <p>Development of a class to which Schedule 9 clause 3.855</p> |

|  |   |   |   |
|--|---|---|---|
|  | subject development.  | provisions of the relevant water allocation plan or regional landscape plan or equivalent.  | 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.  |
| Any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the <i>Landscape South Australia Act 2019</i> :                              | The Chief Executive of the Department of the Minister responsible for the administration of the <i>Landscape South Australia Act 2019</i> . | To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably and maintains the health and natural flow paths of water resources. | Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) activities requiring irrigation</li> <li>(c) aquaculture</li> <li>(d) industry</li> <li>(e) intensive animal husbandry</li> <li>(f) commercial forestry.</li> </ul> |   |   |   |
| Commercial forestry that requires a forest water licence under Part 8 Division 6 of the <i>Landscape South Australia Act 2019</i> .  |   |   |   |

## Prescribed Watercourses Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Prescribed watercourses are protected by ensuring the taking of water from such watercourses is avoided or is undertaken in a sustainable manner that maintains the health and natural flow paths of the watercourses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| <p>PO 1.1</p> <p>All development, but in particular development involving any of the following:</p> <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) activities requiring irrigation</li> <li>(c) aquaculture</li> <li>(d) industry</li> <li>(e) intensive animal husbandry</li> <li>(f) commercial forestry</li> </ul> <p>has a lawful, sustainable and reliable water supply that does not place undue strain on prescribed watercourses.</p> | <p>DTS/DPF 1.1</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> <li>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or</li> <li>(b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.</li> </ul> |
| <p>PO 1.2</p> <p>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing in a prescribed watercourse is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.</p>  | <p>DTS/DPF 1.2</p> <p>None are applicable.</p>   |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body   | Purpose of Referral   | Statutory Reference                  |
|--|---|---|--------------------------------------|
| Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a prescribed watercourse. | Relevant authority under the <i>Landscape South Australia Act 2019</i> that would, if it were not for the operation of section 106(1) | To provide expert assessment and direction to the relevant authority on potential impacts from development on the | Development of a class to which 4856 |

|  |   |   |   |
|--|---|---|---|
|  | (e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development.                        | health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent. | Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.                                 |
| Any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the <i>Landscape South Australia Act 2019</i> :                              | The Chief Executive of the Department of the Minister responsible for the administration of the <i>Landscape South Australia Act 2019</i> . | To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably.                                | Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) activities requiring irrigation</li> <li>(c) aquaculture</li> <li>(d) industry</li> <li>(e) intensive animal husbandry</li> <li>(f) commercial forestry.</li> </ul> |   |   |   |
| Commercial forestry that requires a forest water licence under Part 8 Division 6 of the <i>Landscape South Australia Act 2019</i> .  |   |   |   |

### Prescribed Water Resources Area Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Sustainable water use in prescribed water resources areas maintains the health and natural flow paths of surface water, watercourses and wells. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| <p>PO 1.1</p> <p>All development, but in particular development involving any of the following:</p> <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) activities requiring irrigation</li> <li>(c) aquaculture</li> <li>(d) industry</li> <li>(e) intensive animal husbandry</li> <li>(f) commercial forestry</li> </ul> <p>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas.</p> | <p>DTS/DPF 1.1</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> <li>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or</li> <li>(b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.</li> </ul> |
| <p>PO 1.2</p> <p>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.</p>   | <p>DTS/DPF 1.2</p> <p>None are applicable.</p>   |

#### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
|                                 |               |                     |                     |

|  |   |   |   |
|--|---|---|---|
| Development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts surface water flowing over land.   | Relevant authority under the <i>Landscape South Australia Act 2019</i> that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development. | To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent. | Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the <i>Landscape South Australia Act 2019</i> :<br><br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) commercial forestry | The Chief Executive of the Department of the Minister responsible for the administration of the <i>Landscape South Australia Act 2019</i> .   | To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably and maintains the health and natural flow paths of water resources.   | Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Commercial forestry that requires a forest water licence under Part 8 Division 6 of the <i>Landscape South Australia Act 2019</i> .  |   |   |   |

## Prescribed Wells Area Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Sustainable water use in prescribed wells areas. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| <p>PO 1.1</p> <p>All development, but in particular involving any of the following:</p> <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) activities requiring irrigation</li> <li>(c) aquaculture</li> <li>(d) industry</li> <li>(e) intensive animal husbandry</li> <li>(f) commercial forestry</li> </ul> <p>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed wells areas.</p> | <p>DTS/DPF 1.1</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> <li>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or</li> <li>(b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.</li> </ul> |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body   | Purpose of Referral   | Statutory Reference             |
|---|---|---|---------------------------------|
| Any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the <i>Landscape South Australia Act 2019</i> : | The Chief Executive of the Department of the Minister responsible for the administration of the <i>Landscape South Australia Act 2019</i> . | To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure | Development of a class to which |

|  |  |  |   |
|--|--|--|---|
| <ul style="list-style-type: none"> <li>(a) horticulture</li> <li>(b) activities requiring irrigation</li> <li>(c) aquaculture</li> <li>(d) industry</li> <li>(e) intensive animal husbandry</li> <li>(f) commercial forestry.</li> </ul> |  | development is undertaken sustainably. | Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Commercial forestry that requires a forest water licence under Part 8 Division 6 of the <i>Landscape South Australia Act 2019</i> .  |  |  |   |

## Ramsar Wetlands Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Protection and restoration of Ramsar wetlands. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| General  |   |
| PO 1.1<br>Development provides for the restoration and/or sustainable management of wetlands habitat.  | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Development does not lead to significant negative impacts on Ramsar wetland habitat and its carbon capture and storage potential.  | DTS/DPF 1.2<br>None are applicable.                         |
| PO 1.3<br>Development adjacent to Ramsar wetlands maintains or establishes landform and vegetated corridor links between Ramsar areas where possible.  | DTS/DPF 1.3<br>None are applicable.                         |
| PO 1.4<br>Development is not detrimental to the hydrological regime of Ramsar wetlands taking into account the effects of climate change on rainfall and air temperature, including:<br><br>(a) a change in volume, timing, duration and frequency of ground and surface water flows to and within the wetland<br>(b) a change in the level of salinity, pollutants, nutrients or water temperature. | DTS/DPF 1.4<br>None are applicable.                         |
| PO 1.5<br>Development is designed to minimise the cumulative impacts on Ramsar wetlands from jetties, vegetation clearance and dredging.   | DTS/DPF 1.5<br>None are applicable.                         |
| PO 1.6<br>Development does not result in the disruption of the breeding, feeding, migration or resting behaviour of an ecologically significant proportion of the population of a migratory or resident species.   | DTS/DPF 1.6<br>None are applicable.                         |
| Land Division  |   |
| PO 2.1<br>Land division supports the management or improvement of the natural environment and does not result in any additional allotments within a Ramsar wetland.  | DTS/DPF 2.1<br>None are applicable.                         |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

## Regulated and Significant Tree Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Conservation of regulated and significant trees to provide aesthetic and environmental benefits and mitigate tree loss. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Tree Retention and Health   |   |
| <p>PO 1.1</p> <p>Regulated trees are retained where they:</p> <ul style="list-style-type: none"> <li>(a) make an important visual contribution to local character and amenity</li> <li>(b) are indigenous to the local area and listed under the <i>National Parks and Wildlife Act 1972</i> as a rare or endangered native species and / or</li> <li>(c) provide an important habitat for native fauna.</li> </ul>   | <p>DTS/DPF 1.1</p> <p>None are applicable.</p>              |
| <p>PO 1.2</p> <p>Significant trees are retained where they:</p> <ul style="list-style-type: none"> <li>(a) make an important contribution to the character or amenity of the local area</li> <li>(b) are indigenous to the local area and are listed under the <i>National Parks and Wildlife Act 1972</i> as a rare or endangered native species</li> <li>(c) represent an important habitat for native fauna</li> <li>(d) are part of a wildlife corridor of a remnant area of native vegetation</li> <li>(e) are important to the maintenance of biodiversity in the local environment and / or</li> <li>(f) form a notable visual element to the landscape of the local area.</li> </ul>  | <p>DTS/DPF 1.2</p> <p>None are applicable.</p>              |
| <p>PO 1.3</p> <p>A tree damaging activity not in connection with other development satisfies (a) and (b):</p> <ul style="list-style-type: none"> <li>(a) tree damaging activity is only undertaken to:                             <ul style="list-style-type: none"> <li>(i) remove a diseased tree where its life expectancy is short</li> <li>(ii) mitigate an unacceptable risk to public or private safety due to limb drop or the like</li> <li>(iii) rectify or prevent extensive damage to a building of value as comprising any of the following:                                     <ul style="list-style-type: none"> <li>A. a Local Heritage Place</li> <li>B. a State Heritage Place</li> <li>C. a substantial building of value</li> </ul> </li> </ul> <p>and there is no reasonable alternative to rectify or prevent such damage other than to undertake a tree damaging activity</p> <li>(iv) reduce an unacceptable hazard associated with a tree within 20m of an existing residential, tourist accommodation or other habitable building from bushfire</li> <li>(v) treat disease or otherwise in the general interests of the health of the tree and / or</li> <li>(vi) maintain the aesthetic appearance and structural integrity of the tree</li> </li></ul> <p>(b) in relation to a significant tree, tree-damaging activity is avoided unless all reasonable remedial treatments and measures have been determined to be ineffective.</p> | <p>DTS/DPF 1.3</p> <p>None are applicable.</p>              |
| <p>PO 1.4</p> <p>A tree-damaging activity in connection with other development satisfies all the following:</p>   | <p>DTS/DPF 1.4</p> <p>None are applicable.</p>              |

|  |   |
|--|---|
| <p>(a) it accommodates the reasonable development of land in accordance with the relevant zone or subzone where such development might not otherwise be possible</p> <p>(b) in the case of a significant tree, all reasonable development options and design solutions have been considered to prevent substantial tree-damaging activity occurring.</p> |   |
| Ground work affecting trees  |   |
| <p>PO 2.1</p> <p>Regulated and significant trees, including their root systems, are not unduly compromised by excavation and / or filling of land, or the sealing of surfaces within the vicinity of the tree to support their retention and health.</p>   | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>  |
| Land Division  |   |
| <p>PO 3.1</p> <p>Land division results in an allotment configuration that enables its subsequent development and the retention of regulated and significant trees as far as is reasonably practicable.</p>   | <p>DTS/DPF 3.1</p> <p>Land division where:</p> <ul style="list-style-type: none"> <li>(a) there are no regulated or significant trees located within or adjacent to the plan of division</li> <li>or</li> <li>(b) the application demonstrates that an area exists to accommodate subsequent development of proposed allotments after an allowance has been made for a tree protection zone around any regulated tree within and adjacent to the plan of division.</li> </ul> |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Resource Extraction Protection Area Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Protection of current and future state significant resource extraction activities by ensuring development has regard to potential environmental and amenity impacts generated by the lawful operation of proximate mines and quarries. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| Protection of Strategic Resources  |  |
| <p>PO 1.1</p> <p>Long-term availability of and ability to extract resources is maintained by ensuring development involving sensitive receivers is:</p> <ul style="list-style-type: none"> <li>(a) located away from areas which may be subject to unacceptable noise, dust or vibration emissions generated by current or future resource extraction activities or</li> <li>(b) able to adequately mitigate impacts of noise, dust or vibration emissions through design techniques such as:                             <ul style="list-style-type: none"> <li>(i) locating residential accommodation the greatest distance practicable from the resource extraction activity</li> <li>(ii) placing buildings containing non-sensitive receivers between the resource extraction activity and sensitive receivers</li> <li>(iii) placing rooms more sensitive to air, noise and vibration impacts (e.g. bedrooms) further away from the resource extraction activity</li> <li>(iv) providing private or common open space adjacent a building facade that shields the space from impacts of the resource extraction activity.</li> </ul> </li> </ul> | <p>DTS/DPF 1.1</p> <p>Development does not incorporate:</p> <ul style="list-style-type: none"> <li>(a) a sensitive receiver</li> <li>or</li> <li>(b) alterations or additions to a sensitive receiver which increase the floor area of such buildings by 10% or more</li> <li>or</li> <li>(c) land division for the purposes of accommodating a sensitive receiver.</li> </ul> |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body  | Purpose of Referral   | Statutory Reference  |
|--|--|---|--|
| <p>Where located within the area of the Resource Extraction Zone, all forms of development except:</p> <ul style="list-style-type: none"> <li>(a) where the development is deemed-to-satisfy or</li> <li>(b) where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral or</li> <li>(c) any of the following classes of development                             <ul style="list-style-type: none"> <li>(i) agricultural building</li> <li>(ii) land division for the purpose of a boundary realignment where no additional allotments are created</li> <li>(iii) farming</li> <li>(iv) fence</li> <li>(v) horse keeping</li> <li>(vi) horticulture</li> <li>(vii) mushroom production</li> <li>(viii) protective tree netting structure.</li> </ul> </li> </ul> | <p>Minister responsible for administering the Mining Acts.</p> | <p>To provide expert assessment and direction to the relevant authority on the potential for development to adversely impact upon the lawful continued operation of resource extraction operations.</p> | <p>Development of a class to which Schedule 9 clause 3 item 14 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |
| <p>Where located outside of the Resource Extraction Zone, the following forms of development (including land division creating additional allotments for such uses and alterations and additions which increase the floor area of buildings accommodating the following by 10% or more):</p> <ul style="list-style-type: none"> <li>(a) dwelling</li> <li>(b) residential flat building</li> <li>(c) tourist accommodation</li> <li>(d) boarding home</li> <li>(e) dormitory style accommodation</li> <li>(f) workers' accommodation</li> <li>(g) student accommodation</li> <li>(h) child care facility</li> <li>(i) educational facility</li> <li>(j) retirement facility</li> <li>(k) supported accommodation</li> <li>(l) residential park</li> <li>(m) hospital.</li> </ul>   |  |   |  |

**River Murray Flood Plain Protection Area Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Conservation and protection of water quality and the riverine environment, provision for environmental water flows, the protection of life and property against flood risk, and recognition of the riverine environment as an important ecological, tourist and recreational resource. |
| DO 2            | Development for the purpose of recreation (e.g. landings, jetties, houseboat moorings) water extraction, wetland management and irrigation management (e.g. channel, pumping stand, flood gate).   |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| Land Use  |  |
| <p>PO 1.1</p> <p>All development, but in particular development involving any of the following:</p> <ul style="list-style-type: none"> <li>(a) activities requiring irrigation</li> <li>(b) aquaculture</li> <li>(c) commercial forestry</li> <li>(d) horse keeping</li> <li>(e) horticulture</li> <li>(f) industry</li> <li>(g) intensive animal husbandry</li> </ul> <p>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas.</p> | <p>DTS/DPF 1.1</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> <li>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or</li> <li>(b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.</li> </ul>   |
| Wastewater  |  |
| <p>PO 2.1</p> <p>Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.</p>   | <p>DTS/DPF 2.1</p> <p>Development results in:</p> <ul style="list-style-type: none"> <li>(a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards or</li> <li>(b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer, community wastewater management system or wastewater holding tank that complies with relevant South Australian standards.</li> </ul>   |
| Dredging  |  |
| <p>PO 3.1</p> <p>Development is designed and sited in a manner that limits the need for dredging.</p>   | <p>DTS/DPF 3.1</p> <p>None are applicable.</p>   |
| Land Division   |  |
| <p>PO 4.1</p> <p>Land division does not lead to intensification of development.</p>   | <p>DTS/DPF 4.1</p> <p>Land division is:</p> <ul style="list-style-type: none"> <li>(a) limited to the creation of a public road or a public reserve or</li> <li>(b) for adjustment of allotment boundaries to remove an anomaly in the current boundaries with respect to the location of existing buildings or structures and does not result in an additional allotment.</li> </ul>  |
| <p>PO 4.2</p> <p>Boundary realignment for residential purposes preserves the integrity of public waterfront reserves.</p>   | <p>DTS/DPF 4.2</p> <p>Boundary realignment for residential purposes:</p> <ul style="list-style-type: none"> <li>(a) locates any new roads on the landward side of an existing dwelling (rather than between an existing dwelling and the public waterfront reserve)</li> <li>(b) provides a reserve 50m or more in width above pool level along the water frontage.</li> </ul>   |
| Built Form and Character  |  |
| <p>PO 5.1</p> <p>In the context of any measures required to mitigate against flood risk, buildings are sited and designed to be unobtrusive, particularly when viewed from the River Murray and nearby public roads.</p>  | <p>DTS/DPF 5.1</p> <p>Buildings:</p> <ul style="list-style-type: none"> <li>(a) do not exceed one building level in height (excluding elevation to minimise the potential for personal or property damage as a result of a flood)</li> <li>(b) in accordance with Figure 5: <ul style="list-style-type: none"> <li>(i) have no floor level elevated 3m or more above natural ground level other than where the <i>Finished Ground and Floor Levels Technical and Numeric Variation layer</i> applies and would require the Minimum finished floor level of the building to be greater than 3m above natural ground level, but is not greater than 4m above natural ground level as required by DTS/DPF 6.1(a)</li> <li>(ii) have an overall roof height that does not exceed 4m above the elevated floor level described in DTS 5.1(b)(i)</li> </ul> </li> <li>(c) are not closer than 50m to the waterfront</li> <li>(d) have associated electricity and telecommunications lines installed underground.</li> </ul> |
| <p>PO 5.2</p> <p>Outbuildings and agricultural buildings designed and sited to minimise their visibility from the waterfront and not dominate the appearance of public places.</p>  | <p>DTS/DPF 5.2</p> <p>Outbuildings and agricultural buildings:</p> <ul style="list-style-type: none"> <li>(a) clad in sheet metal are pre-colour treated or painted in a non-reflective colour</li> <li>(b) in the case of a site with a waterfront (including where there is an intervening public reserve), are not sited between the waterfront and the existing or proposed dwelling as demonstrated in Figure 7.</li> </ul>   |

|  |  |

| Minimum finished floor level is 9.85m AHD |  |
| Minimum finished floor level is 4.64m AHD |  |

In instances where no finished floor level value is specified, development incorporates a finished floor level at least 300mm above the height of a 1% AEP flood event except where:

- (a) it would require a finished floor level greater than 4m above natural ground level in which case 4m is the maximum finished floor level
- or
- (b) it relates to habitable buildings and structures within a caravan or tourist park which will be relocatable in the event of a flood.

PO 6.2  
Development avoids the need for coast and river protection works through measures such as setbacks to protect development from coastal erosion, sea, river or stormwater flooding, sand drift or other coastal or riverine processes.

DTS/DPF 6.2  
None are applicable.

PO 6.3  
Dwellings and dwelling additions or alterations:  
(a) do not impede floodwaters and fluctuating pool levels  
(b) are designed and sited to mitigate against damage in the event of a flood.

DTS/DPF 6.3  
Dwellings and additions or alterations to dwellings satisfy (a) or (b) and (c):

- (a) are located outside the 1956 River Murray Flood Plain as shown in the Planning Reference layer in the South Australian Property and Planning Atlas
- (b) are elevated and the undercroft area:
  - (i) is wholly open (there are no enclosures)
  - or
  - (ii) where enclosed areas are proposed, such areas are in accordance with all of the following, as depicted in Figures 5 and 6:
    - A. there are no habitable rooms

|   |  |
|---|--|
|   | <p>B. each enclosed space does not include internal linings (excluding wet areas) and is fitted with roller door(s) or similar on each side of a width not less than 2.4m so the space can be easily opened during times of flood</p> <p>C. does not include more than one wet area and that wet area does not exceed 15m<sup>2</sup></p> <p>D. the combined enclosed area (inclusive of a wet area) does not exceed a total floor area of 60m<sup>2</sup></p> <p>E. at least one third of the undercroft area remains open (not enclosed) from the principal waterfront elevation through to its opposite elevation.</p> <p>(c) in the case of an existing dwelling with a habitable floor level at ground level, alterations and additions do not:</p> <p>(i) increase the total floor area of the dwelling to greater than 90 square metres, excluding:</p> <p>A. wet areas of up to 15 square metres, and</p> <p>B. any verandah, balcony or deck</p> <p>(ii) comprise the addition of a second building level</p> |
| <p>PO 6.4</p> <p>Outbuildings and agricultural buildings do not impede floodwaters and fluctuating pool levels.</p>   | <p>DTS/DPF 6.4</p> <p>Outbuildings and agricultural buildings are:</p> <p>(a) fitted with roller doors, or similar on two opposite ends or sides (whichever elevations face the direction of the river flow)</p> <p>(b) constructed at natural ground level.</p>   |
| <p>PO 6.5</p> <p>Fencing does not impede floodwaters and fluctuating pool levels.</p>   | <p>DTS/DPF 6.5</p> <p>Fencing is of an open design such as post and wire strand construction.</p>  |
| Environmental Protection  |  |
| <p>PO 7.1</p> <p>Adverse impacts on the natural features and stability of the waterfront are minimised.</p>   | <p>DTS/DPF 7.1</p> <p>None are applicable.</p>   |
| <p>PO 7.2</p> <p>Development incorporates buffer areas to protect the river and associated natural features such as wetlands and native vegetation.</p>   | <p>DTS/DPF 7.2</p> <p>None are applicable.</p>   |
| <p>PO 7.3</p> <p>Modification to the natural landform, including land reclamation, is avoided or minimised to prevent impacts on natural features, natural flow paths, floodwaters and the stability of the waterfront.</p> | <p>DTS/DPF 7.3</p> <p>None are applicable.</p>   |
| <p>PO 7.4</p> <p>Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are sited and designed to prevent environmental harm.</p>  | <p>DTS/DPF 7.4</p> <p>Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are located:</p> <p>(a) outside the 1956 River Murray Flood Plain</p> <p>(b) wholly within a bund that has storage capacity of 133% or more of the volume of the largest fuel storage tank.</p>  |
| <p>PO 7.5</p> <p>Facilities for the collection of effluent from moored vessels are sited and designed to prevent environmental harm.</p>  | <p>DTS/DPF 7.5</p> <p>None are applicable.</p>   |
| Access  |  |
| <p>PO 8.1</p> <p>Waterfront reserve areas between buildings and the water are maximised to preserve the amenity of view corridors along the riverine environment.</p>   | <p>DTS/DPF 8.1</p> <p>None are applicable.</p>   |
| <p>PO 8.2</p> <p>Public access routes to waterfront reserves are provided and maintained.</p>   | <p>DTS/DPF 8.2</p> <p>None are applicable.</p>   |
| <p>PO 8.3</p> <p>Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.</p>  | <p>DTS/DPF 8.3</p> <p>No more than 100mm excavation and 100mm of fill is required in association with the construction of a driveway, access track or parking area.</p>  |
| River Structures  |  |
| <p>PO 9.1</p> <p>River structures are located where they do not cause a hazard to safe navigation.</p>  | <p>DTS/DPF 9.1</p> <p>River structures are located:</p> <p>(a) wholly outside navigation channels as defined by navigational signs</p>   |

|   |  |
|---|--|
|   | (b) 100m or more from either side of a ferry crossing<br>(c) 150m or more from a lock.   |
| PO 9.2<br>River structures are located where they do not cause a hazard to a designated recreation area for water skiing and swimming.  | DTS/DPF 9.2<br>River structures are located wholly outside designated recreation areas for water skiing and swimming.  |
| PO 9.3<br>Proliferation of water pumps is avoided to limit impact on the riverine environment.  | DTS/DPF 9.3<br>None are applicable.  |
| PO 9.4<br>Water pumping infrastructure is designed and constructed to limit impact on the riverine environment.   | DTS/DPF 9.4<br>Water pumping infrastructure is designed and constructed in accordance with Figure 1.   |
| PO 9.5<br>Proliferation of jetties and floating pontoons is avoided to minimise impact on the riverine environment.   | DTS/DPF 9.5<br>Jetties and floating pontoons are:<br><br>(a) ancillary to a dwelling<br>(b) limited to one jetty or floating pontoon per dwelling<br>(c) located on the same allotment as the associated dwelling<br>or<br>(d) are separated from the allotment (or lease site) accommodating the associated dwelling by a public reserve or a public road (but not both)<br>or<br>(e) are for the repair, maintenance or replacement of an existing licensed river structure. |
| PO 9.6<br>Jetties and floating pontoons are designed and constructed to limit impact on the riverine environment.   | DTS/DPF 9.6<br>Jetties and floating pontoons:<br><br>(a) extend not more than 8m into the river measured from the riverbank at normal pool level<br>(b) have a width of not more than 1.4m in the case of a jetty (or gangway width in the case of a floating pontoon)<br>(c) in the case of floating pontoons, do not exceed the dimensions 3m by 6m<br>(d) maintain a minimum of 3m between river structures including other jetties and pontoons.                           |
| PO 9.7<br>A proliferation of boat ramps is avoided to minimise impact on the riverine environment.  | DTS/DPF 9.7<br>The repair, maintenance or replacement of an existing licensed boat ramp.   |
| PO 9.8<br>On-river mooring facilities are developed only where:<br><br>(a) the mooring facility will not result in a mooring capacity exceeding one vessel per allotment<br>(b) where the allotment has a direct frontage to the river (or is only separated by a public road or public reserve, but not both) and the allotment contains an existing dwelling<br>(c) the width of the river is greater than 100m at normal pool level. | DTS/DPF 9.8<br>None are applicable.  |
| PO 9.9<br>Moorings for vessels are located to avoid interfering with the operation or function of a ferry crossing, lock or major pumping station.  | DTS/DPF 9.9<br>Moorings for vessels not located within:<br><br>(a) 100m of either side of a ferry crossing<br>(b) 150m of a lock<br>(c) 400m of a major pumping station.   |
| PO 9.10<br>Development of structures designed for the mooring of more than one vessel are located off-channel in a marina.  | DTS/DPF 9.10<br>None are applicable.   |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body   | Purpose of Referral   | Statutory Reference             |
|--|---|---|---------------------------------|
| Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral: | Minister responsible for administration of the <i>River Murray Act 2003</i> . | To provide expert assessment and direction to the relevant authority on potential impacts from development on | Development of a class to which |

- (a) development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land
- (b) the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*:
  - (i) horticulture
  - (ii) activities requiring irrigation, other than irrigation used for domestic purposes
  - (iii) aquaculture
  - (iv) industry
  - (v) intensive animal husbandry
  - (vi) horse keeping
  - (vii) commercial forestry
- (c) development that is within the ambit of clause 7 of Schedule 3 of the *Planning, Development and Infrastructure (General) Regulations 2017*
- (d) the construction of a building, or the undertaking of an act or activity specified in clause 3 of Schedule 3 of the *Planning, Development and Infrastructure (General) Regulations 2017*, other than where the development:
  - (i) is the construction of a fence not exceeding 2m in height or
  - (ii) is the construction of a carport, verandah, balcony, porch or other similar structure or
  - (iii) is the construction of an enclosed shed, garage or similar outbuilding:
    - A. that is ancillary to an existing building; and
    - B. where the enclosed shed, garage or similar outbuilding will not have a total floor area of more than 150m<sup>2</sup>; and
    - C. that is located outside the 1956 River Murray Flood Plain or will be fitted with roller doors, or similar on two opposite ends or sides so as not to impede flood waters; and
    - D. that will not be located closer to the River Murray than the building to which it is ancillary
  - or
  - (iv) is the construction of an agricultural building:
    - A. that is located outside the 1956 River Murray Flood Plain or will be fitted with roller doors, or similar on two opposite ends or sides so as not to impede flood waters; and
    - B. that is not closer than 200m to the River Murray; and
    - C. that will not have a total floor area of more than:
      - (A) 350m<sup>2</sup> within the Productive Rural Landscape Zone
      - (B) 500m<sup>2</sup> within the Rural Zone or Rural Intensive Enterprise Zone
      - (C) 250m<sup>2</sup> within any other zone
  - or
  - (v) comprises an alteration or extension of an existing dwelling that in the opinion of the relevant authority is minor and where any extension of the dwelling will not result in a part of the dwelling being closer to the River Murray or
  - (vi) is the construction of an aboveground or inflatable swimming pool, or a spa pool, or an in-ground swimming pool located outside the 1956 River Murray Flood Plain or
  - (vii) is the construction of a dwelling (or the alteration or extension of an existing dwelling) that is located outside the 1956 River Murray Flood Plain and not closer than 100m to the River Murray or
  - (viii) is the construction of an elevated dwelling that is located within the Rural Shack Settlement Zone and has an open undercroft area or an undercroft area:
    - A. that when enclosed, is enclosed on two opposite ends or sides using roller doors, or other material that can be easily opened or removed during times of flood
    - B. that is not a habitable room
    - C. that will have enclosed areas for a toilet, shower or laundry facilities not exceeding a combined maximum floor area of 15m<sup>2</sup>
  - or
  - (ix) is the construction of a transportable dwelling or cabin, or a removable annexe, within an existing caravan and tourist park
- (e) land division classified as restricted by the Planning and Design Code
- (f) land division that results in:

the health of the River Murray system, its natural flow regime (including floodwaters), water quality, and cultural heritage.

Schedule 9 clause 3 item 15 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

|   |   |  |   |
|---|---|--|---|
| <ul style="list-style-type: none"> <li>(i) 4 or more additional allotments</li> <li>(ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment) or</li> <li>(iii) a mix of 4 or more additional allotments and separate grants of occupancy</li> </ul> <p>(g) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system</p> <p>(h) alteration of the boundaries of an allotment so as to result in:</p> <ul style="list-style-type: none"> <li>(i) the allotment having a frontage to a part of the River Murray system or</li> <li>(ii) the allotment having an increase in its frontage to a part of the River Murray system.</li> </ul> |   |  |   |
| <p>Development that generates human wastewater from a peak loading capacity of more than 40 persons or more than 6000 litres/day and is not connected to a community wastewater management system or sewerage infrastructure.</p>   | <p>Environment Protection Authority</p> | <p>To provide expert assessment and direction to the relevant authority on potential impacts to water quality in the River Murray system from pollutants discharged into any waters or onto land in a place that is reasonably likely to impact the quality of drinking water.</p> | <p>Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |
| <p>Any pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for 5 or more vessels at any 1 time</p>  |   |  |   |
| <p>Vessel refuelling facility</p>   |   |  |   |
| <p>Vessel sewage pump-out facility.</p>   |   |  |   |
| <p>Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period more than 200 tonnes of organic waste or matter. (EPA Licence)</p>   |   |  |   |
| <p>Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period, more than 2.5ML of wastewater.<br/><br/>(EPA Licence required at more than 5 ML)</p>  |   |  |   |
| <p>Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.</p>   |   |  |   |
| <p>Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units. (EPA licence required at 650 or more standard pig units)</p>  |   |  |   |
| <p>Dairies - being the carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time.</p>   |   |  |   |

### River Murray Tributaries Protection Area Overlay

### Assessment Provisions (AP)

## Desired Outcome

|      |   |
|------|---|
| DO 1 | Sustainable water use and conservation of riverine environments within the River Murray Tributaries area. |
|------|---|

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| Land Use   |  |
| <p>PO 1.1</p> <p>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment and downstream users.</p>  | <p>DTS/DPF 1.1</p> <p>None are applicable.</p>   |
| <p>PO 1.2</p> <p>All development, but in particular development involving any of the following:</p> <ul style="list-style-type: none"> <li>(a) activities requiring irrigation</li> <li>(b) aquaculture</li> <li>(c) commercial forestry</li> <li>(d) horticulture</li> <li>(e) industry</li> <li>(f) intensive animal husbandry</li> </ul> <p>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas.</p> | <p>DTS/DPF 1.2</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> <li>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or</li> <li>(b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.</li> </ul> |
| Land Division  |  |
| <p>PO 2.1</p> <p>Land division does not lead to the intensification of development to a level that would have a negative impact on the health or natural flow paths of the River Murray Tributaries.</p>   | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>   |
| <p>PO 2.2</p> <p>Land division, including boundary realignment, preserves the integrity of the public waterfront of the River Murray system by limiting the number of allotments having a frontage (or extent of frontage) to that system.</p>   | <p>DTS/DPF 2.2</p> <p>Land division does not result in any of the following:</p> <ul style="list-style-type: none"> <li>(a) an increase in allotments having a frontage to a part of the River Murray system</li> <li>(b) an increase in the frontage of an allotment or allotments to a part of the River Murray system.</li> </ul>   |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body   | Purpose of Referral   | Statutory Reference  |
|--|---|---|--|
| <p>Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral:</p> <ul style="list-style-type: none"> <li>(a) development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land</li> <li>(b) the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the <i>Landscape South Australia Act 2019</i>:                             <ul style="list-style-type: none"> <li>(i) horticulture</li> <li>(ii) activities requiring irrigation, other than irrigation used for domestic purposes</li> <li>(iii) aquaculture</li> <li>(iv) intensive animal husbandry</li> <li>(v) horse keeping</li> <li>(vi) commercial forestry</li> </ul> </li> <li>(c) land division classified as <i>restricted</i> by the Planning and Design Code</li> <li>(d) land division that results in:                             <ul style="list-style-type: none"> <li>(i) 4 or more additional allotments or</li> </ul> </li> </ul> | <p>Minister responsible for the administration of the <i>River Murray Act 2003</i>.</p> | <p>To provide expert assessment and direction to the relevant authority on potential impacts from development on the health of the River Murray system, its natural flow regime (including floodwaters), water quality and cultural heritage.</p> | <p>Development of a class to which Schedule 9 clause 3 item 16 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |

|   |  |  |
|---|--|--|
| <ul style="list-style-type: none"> <li>(ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment) or</li> <li>(iii) a mix of 4 or more additional allotments and separate grants of occupancy</li> </ul> <p>(e) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system</p> <p>(f) alteration of the boundaries of an existing allotment so as to result in:</p> <ul style="list-style-type: none"> <li>(i) the allotment having a frontage to a part of the River Murray system or</li> <li>(ii) the allotment having an increase in its frontage to a part of the River Murray system.</li> </ul> |  |  |

### Significant Interface Management Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | The prevention of the establishment of new, and intensification of sensitive receivers to mitigate community exposure to potential adverse hazards and environmental and amenity impacts generated by the lawful operation of proximate significant activities. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Land Use and Intensity  |   |
| <p>PO 1.1</p> <p>Intensification of sensitive uses and / or sensitive receivers, inclusive of land division for either purpose, is not undertaken to avoid increasing resident or community exposure to potential adverse hazards or emissions unless:</p> <p>(a) each source of adverse hazard or emission has ceased operation</p> <p>or</p> <p>(b) it can be demonstrated that the site of the proposed development is not unreasonably impacted by the hazard or emissions from a relevant source, including as a result of environmental or operational improvements that have been or will be made to reduce the hazard or emissions from each source to an acceptable level.</p> | <p>DTS/DPF 1.1</p> <p>Development does not comprise a sensitive use, sensitive receiver and / or land division for a sensitive use or sensitive receiver purpose unless:</p> <p>(a) it is a replacement dwelling where the total floor area is no greater than the existing or previous dwelling</p> <p>(b) each source of hazard and /or emissions has ceased to operate or has been superseded by another use such that it cannot be revived.</p> |
| <p>PO 1.2</p> <p>Alterations and additions to sensitive receivers support ongoing activity without leading to an increase in resident or community exposure to unacceptable levels of hazard, noise, dust, odour or other emissions.</p>  | <p>DTS/DPF 1.2</p> <p>Alterations and additions where:</p> <p>(a) associated with a dwelling, do not increase the total floor area by more than 10% taking into account any previous alteration or addition</p> <p>(b) associated with any other sensitive receivers, do not increase the on-site capacity of the service or facility.</p>  |

#### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

### Significant Landscape Protection Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

## Desired Outcome

|      |  |
|------|--|
| DO 1 | Conservation of the natural and rural character and scenic and cultural qualities of significant landscapes. |
|------|--|

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| Land Use and Intensity   |  |
| PO 1.1<br>Land use intensity is restrained to conserve and enhance natural and rural character.  | DTS/DPF 1.1<br>None are applicable.  |
| PO 1.2<br>Development inconsistent with conserving significant natural and rural landscapes is not undertaken.   | DTS/DPF 1.2<br>Development does not include any of the following (or any combination of any of the following):<br>(a) renewable energy facility (other than roof mounted solar photovoltaic panels)<br>(b) large-scale industry, storage, distribution, warehousing<br>(c) intensive animal husbandry.   |
| Built Form and Character   |  |
| PO 2.1<br>Development is carefully sited and designed to:<br><br>(a) complement rural or natural character<br>(b) minimise disruption to natural landform<br>(c) integrate existing natural environmental features, including native vegetation<br>(d) minimise impacts on wildlife habitat<br>(e) be low-scale<br>(f) be visually unobtrusive and blend in with the surrounding area<br>(g) be located below ridge lines.   | DTS/DPF 2.1<br>None are applicable.  |
| PO 2.2<br>Buildings and structures are limited to those that:<br><br>(a) are ancillary, adjacent to, and of the same or lesser scale as existing buildings<br>(b) support desired outcomes of the relevant zone or subzone<br>(c) are used for the ancillary sale of produce associated with a pastoral or rural activity<br>(d) are in the form of high-quality, nature-based tourist accommodation<br>(e) are for rainwater storage<br>(f) are for research or education purposes<br>(g) support conservation or the interpretation of the environment or cultural features. | DTS/DPF 2.2<br>None are applicable.  |
| Landscaping  |  |
| PO 3.1<br>Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration.   | DTS/DPF 3.1<br>Landscaping plantings exclusively constitute locally indigenous plant species.  |
| Earthworks   |  |
| PO 4.1<br>Excavation and filling of land is limited to that associated with:<br><br>(a) minimising the visual impact of buildings<br>(b) construction of water storage facilities.   | DTS/DPF 4.1<br>Excavation and/or filling meets the following:<br><br>(a) it is in connection with a building or water storage facility<br>(b) does not involve excavation exceeding a vertical height of 0.75m<br>(c) does not involve filling exceeding a vertical height of 0.75m<br>(d) does not involve a total combined excavation and filling vertical height of 1.5m<br>(e) any scree slope is covered in topsoil and landscaped with locally indigenous plant species. |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

## State Heritage Area Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Development maintains the heritage and cultural values of State Heritage Areas through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993. |
| Note            | Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993 can be found <a href="#">here</a>  |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Built Form  |   |
| PO 1.1<br>The form of new buildings and structures that are visible from the public realm are consistent with the heritage values and characteristics of the State Heritage Area.   | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Development is consistent with the prevailing building and ceiling heights in the State Heritage Area.  | DTS/DPF 1.2<br>None are applicable.                         |
| PO 1.3<br>Design and architectural detailing of street facing buildings is consistent with the prevailing characteristics expressed in the State Heritage Area.   | DTS/DPF 1.3<br>None are applicable.                         |
| PO 1.4<br>Development is consistent with the prevailing front and side boundary setback pattern in the State Heritage Area.   | DTS/DPF 1.4<br>None are applicable.                         |
| PO 1.5<br>Materials are consistent with or complement those within the State Heritage Area.   | DTS/DPF 1.5<br>None are applicable.                         |
| Alterations and Additions   |   |
| PO 2.1<br>Alterations and additions complement the subject building and are sited to ensure they do not dominate the primary façade or streetscape and employ a contextual design approach.   | DTS/DPF 2.1<br>None are applicable.                         |
| PO 2.2<br>Adaptive reuse and revitalisation of heritage buildings and places to support their retention in a manner that respects and references the heritage values of the State Heritage Area.  | DTS/DPF 2.2<br>None are applicable.                         |
| Ancillary Development   |   |
| PO 3.1<br>Ancillary development, including carports, outbuildings and garages, complements the heritage values of the State Heritage Area.  | DTS/DPF 3.1<br>None are applicable.                         |
| PO 3.2<br>Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).  | DTS/DPF 3.2<br>None are applicable.                         |
| PO 3.3<br>Advertising and advertising hoardings are designed to complement the State Heritage Area, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting of the State Heritage Area. | DTS/DPF 3.3<br>None are applicable.                         |
| PO 3.4<br>Fencing and gates are consistent with the heritage values of the State Heritage Area.   | DTS/DPF 3.4<br>None are applicable.                         |

|   |  |
|---|--|
| <p>PO 4.1</p> <p>Land division creates allotments that:</p> <ul style="list-style-type: none"> <li>(a) are compatible with the surrounding pattern of subdivision of the State Heritage Area</li> <li>(b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Area.</li> </ul>   | <p>DTS/DPF 4.1</p> <p>None are applicable.</p>   |
| Landscape Context and Streetscape Amenity   |  |
| <p>PO 5.1</p> <p>Street trees, kerbing, footpaths and other features that contribute to the historic value of the State Heritage Area are maintained unless:</p> <ul style="list-style-type: none"> <li>(a) trees / plantings are, or have the potential to be, a danger to life or property or</li> <li>(b) trees / plantings are significantly diseased and their life expectancy is short.</li> </ul>  | <p>DTS/DPF 5.1</p> <p>None are applicable.</p>   |
| Demolition  |  |
| <p>PO 6.1</p> <p>Buildings and other features of identified heritage value within a State Heritage Area are not demolished, destroyed or removed in total or in part unless:</p> <ul style="list-style-type: none"> <li>(a) the portion of any building or other feature is determined to not contribute to the heritage value of the State Heritage Area or</li> <li>(b) the structural condition of the building represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair.</li> </ul> | <p>DTS/DPF 6.1</p> <p>None are applicable.</p>   |
| Conservation Works  |  |
| <p>PO 7.1</p> <p>Conservation works to the exterior of buildings and other features of identified heritage value match original materials to be repaired and utilise traditional work methods.</p>  | <p>DTS/DPF 7.1</p> <p>Conservation works involving:</p> <ul style="list-style-type: none"> <li>(a) replacement of roof materials, guttering or downpipes with the same or substantially the same materials and detailing</li> <li>(b) replacement of timber building elements (structural or decorative) with the same or substantially the same material, dimension and detailing; or brick and stone repair/repainting to match original.</li> </ul> |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body  | Purpose of Referral  | Statutory Reference  |
|--|--|--|--|
| <p>Except where:</p> <ul style="list-style-type: none"> <li>(a) the development is to be undertaken in accordance with a Heritage Agreement under the Heritage Places Act 1993 or</li> <li>(b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral</li> </ul> <p>any of the following classes of development:</p> <ul style="list-style-type: none"> <li>(a) demolition of external building fabric and other features of identified heritage value within the State Heritage Area</li> <li>(b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare within the State Heritage Area</li> <li>(c) alterations or additions to buildings and other features of identified heritage value that:                             <ul style="list-style-type: none"> <li>(i) are visible from a public street, road or thoroughfare within the State Heritage Area or</li> <li>(ii) are visually dominant within the State Heritage Area or</li> <li>(iii) involve substantive physical impact to the fabric of significant buildings</li> </ul> </li> <li>(d) new buildings that:                             <ul style="list-style-type: none"> <li>(i) are visible from a public street, road or thoroughfare within the State Heritage Area or</li> <li>(ii) are visually dominant within the State Heritage Area</li> </ul> </li> <li>(e) conservation repair works that are not representative of 'like for like' maintenance</li> </ul> | <p>Minister responsible for the administration of the <i>Heritage Places Act 1993</i>.</p> | <p>To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Areas.</p> | <p>Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |

- (f) solar panels that are visible from a public street, road or thoroughfare within the State Heritage Area
- (g) land division
- (h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare within the State Heritage Area
- (i) the removal of an individual tree or a tree within a garden or park of identified heritage significance within the State Heritage Area.

## State Heritage Place Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Development maintains the heritage and cultural values of State Heritage Places through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the <i>Heritage Places Act 1993</i> . |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| Built Form   |   |
| PO 1.1<br>The form of new buildings and structures maintains the heritage values of the State Heritage Place.  | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Massing, scale and siting of development maintains the heritage values of the State Heritage Place.  | DTS/DPF 1.2<br>None are applicable.                         |
| PO 1.3<br>Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the State Heritage Place.                           | DTS/DPF 1.3<br>None are applicable.                         |
| PO 1.4<br>Development is consistent with boundary setbacks and setting.  | DTS/DPF 1.4<br>None are applicable.                         |
| PO 1.5<br>Materials and colours are either consistent with or complement the heritage values of the State Heritage Place.  | DTS/DPF 1.5<br>None are applicable.                         |
| PO 1.6<br>New buildings and structures are not placed or erected between the primary and secondary street boundaries and the façade of a State Heritage Place.   | DTS/DPF 1.6<br>None are applicable.                         |
| PO 1.7<br>Development of a State Heritage Place retains elements contributing to its heritage value.   | DTS/DPF 1.7<br>None are applicable.                         |
| Alterations and Additions  |   |
| PO 2.1<br>Alterations and additions complement the State Heritage Place and are sited to be unobtrusive, not conceal or obstruct heritage features and detailing, or dominate the State Heritage Place or its setting. | DTS/DPF 2.1<br>None are applicable.                         |
| PO 2.2<br>Adaptive reuse and revitalisation of State Heritage Places to support their retention in a manner that respects and references the original use of the State Heritage Place.                                 | DTS/DPF 2.2<br>None are applicable.                         |
| Ancillary Development  |   |
| PO 3.1   | DTS/DPF 3.1   |

|  |                                     |
|--|-------------------------------------|
| Ancillary development, including carports, outbuildings and garages, complement the heritage values of the State Heritage Place.   | None are applicable.                |
| PO 3.2<br>Ancillary development, including carports, outbuildings and garages, is located behind the building line of the State Heritage Place.  | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Advertising and advertising hoardings are designed and located to complement the State Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting.  | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4<br>Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the State Heritage Place.  | DTS/DPF 3.4<br>None are applicable. |
| Land Division  |                                     |
| PO 4.1<br>Land division creates allotments that:<br><br>(a) maintain the heritage values of the State Heritage Place, including setting<br>(b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Place.   | DTS/DPF 4.1<br>None are applicable. |
| Landscape Context and Streetscape Amenity  |                                     |
| PO 5.1<br>Individually heritage listed trees, parks, historic gardens and memorial avenues retained unless:<br><br>(a) trees / plantings are, or have the potential to be, a danger to life or property or<br>(b) trees / plantings are significantly diseased and their life expectancy is short.   | DTS/DPF 5.1<br>None are applicable. |
| Demolition   |                                     |
| PO 6.1<br>State Heritage Places are not demolished, destroyed or removed in total or in part unless either of the following apply:<br><br>(a) the portion of the State Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value or<br>(b) the structural condition of the State Heritage Place represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair. | DTS/DPF 6.1<br>None are applicable. |
| Conservation Works   |                                     |
| PO 7.1<br>Conservation works to the exterior and interior of a State Heritage Place and other features of identified heritage value match original materials to be repaired and utilise traditional work methods.  | DTS/DPF 7.1<br>None are applicable. |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body  | Purpose of Referral   | Statutory Reference  |
|--|--|---|--|
| <p>Except where:</p> <ul style="list-style-type: none"> <li>(a) the development is to be undertaken in accordance with a Heritage Agreement under the <i>Heritage Places Act 1993</i> or</li> <li>(b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral</li> </ul> <p>any of the following classes of development:</p> <ul style="list-style-type: none"> <li>(a) demolition of internal or external significant building fabric</li> <li>(b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare that abuts the State Heritage Place</li> <li>(c) alterations or additions to buildings that:                             <ul style="list-style-type: none"> <li>(i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place or</li> </ul> </li> </ul> | <p>Minister responsible for the administration of the <i>Heritage Places Act 1993</i>.</p> | <p>To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Places.</p> | <p>Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |

|   |  |  |
|---|--|--|
| <ul style="list-style-type: none"> <li>(ii) may materially affect the context of a State Heritage Place or</li> <li>(iii) involve substantive physical impact to the fabric of significant buildings;</li> </ul> <p>(d) new buildings that:</p> <ul style="list-style-type: none"> <li>(i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place or</li> <li>(ii) may materially affect the context of the State Heritage Place</li> </ul> <p>(e) conservation repair works that are not representative of 'like for like' maintenance</p> <p>(f) solar panels that are visible from a public street, road or thoroughfare that abuts the State Heritage Place</p> <p>(g) land division</p> <p>(h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare that abuts the State Heritage Place</p> <p>(i) the removal of an individual tree or a tree within a garden or park of identified heritage significance.</p> |  |  |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Traffic Generating Development Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Safe and efficient operation of Urban Transport Routes and Major Urban Transport Routes for all road users. |
| DO 2            | Provision of safe and efficient access to and from urban transport routes and major urban transport routes. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Traffic Generating Development  |   |
| <p>PO 1.1</p> <p>Development designed to minimise its potential impact on the safety, efficiency and functional performance of the State Maintained Road network.</p>       | <p>DTS/DPF 1.1</p> <p>Access is obtained directly from a State Maintained Road where it involves any of the following types of development:</p> <ul style="list-style-type: none"> <li>(a) building, or buildings, containing in excess of 50 dwellings</li> <li>(b) land division creating 50 or more additional allotments</li> <li>(c) commercial development with a gross floor area of 10,000m<sup>2</sup> or more</li> <li>(d) retail development with a gross floor area of 2,000m<sup>2</sup> or more</li> <li>(e) a warehouse or transport depot with a gross leasable floor area of 8,000m<sup>2</sup> or more</li> <li>(f) industry with a gross floor area of 20,000m<sup>2</sup> or more</li> <li>(g) educational facilities with a capacity of 250 students or more.</li> </ul> |
| <p>PO 1.2</p> <p>Access points sited and designed to accommodate the type and volume of traffic likely to be generated by development.</p>                                  | <p>DTS/DPF 1.2</p> <p>Access is obtained directly from a State Maintained Road where it involves any of the following types of development:</p> <ul style="list-style-type: none"> <li>(a) building, or buildings, containing in excess of 50 dwellings</li> <li>(b) land division creating 50 or more additional allotments</li> <li>(c) commercial development with a gross floor area of 10,000m<sup>2</sup> or more</li> <li>(d) retail development with a gross floor area of 2,000m<sup>2</sup> or more</li> <li>(e) a warehouse or transport depot with a gross leasable floor area of 8,000m<sup>2</sup> or more</li> <li>(f) industry with a gross floor area of 20,000m<sup>2</sup> or more</li> <li>(g) educational facilities with a capacity of 250 students or more.</li> </ul> |
| <p>PO 1.3</p> <p>Sufficient accessible on-site queuing provided to meet the needs of the development so that queues do not impact on the State Maintained Road network.</p> | <p>DTS/DPF 1.3</p> <p>Access is obtained directly from a State Maintained Road where it involves any of the following types of development:</p> <ul style="list-style-type: none"> <li>(a) building, or buildings, containing in excess of 50 dwellings</li> <li>(b) land division creating 50 or more additional allotments</li> <li>(c) commercial development with a gross floor area of 10,000m<sup>2</sup> or more</li> <li>(d) retail development with a gross floor area of 2,000m<sup>2</sup> or more</li> <li>(e) a warehouse or transport depot with a gross leasable floor area of 8,000m<sup>2</sup> or more</li> </ul>   |

- (f) industry with a gross floor area of 20,000m<sup>2</sup> or more
- (g) educational facilities with a capacity of 250 students or more.

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body             | Purpose of Referral   | Statutory Reference  |
|---|---------------------------|---|--|
| <p>Except where all of the relevant deemed-to-satisfy criteria are met, any of the following classes of development that are proposed within 250m of a State Maintained Road:</p> <ul style="list-style-type: none"> <li>(a) except where a proposed development has previously been referred under clause (b) - a building, or buildings, containing in excess of 50 dwellings</li> <li>(b) except where a proposed development has previously been referred under clause (a) - land division creating 50 or more additional allotments</li> <li>(c) commercial development with a gross floor area of 10,000m<sup>2</sup> or more</li> <li>(d) retail development with a gross floor area of 2,000m<sup>2</sup> or more</li> <li>(e) a warehouse or transport depot with a gross leasable floor area of 8,000m<sup>2</sup> or more</li> <li>(f) industry with a gross floor area of 20,000m<sup>2</sup> or more</li> <li>(g) educational facilities with a capacity of 250 students or more.</li> </ul> | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

### Tunnel Protection Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO1             | Development which preserves the integrity and operation of underground tunnel corridors and associated infrastructure. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Land Use and Intensity  |   |
| <p>PO 1.1<br/>Development does not unsatisfactorily increase loading on underground tunnel corridors or infrastructure.</p> | <p>DTS/DPF 1.1<br/>Development satisfies (a) and (b):</p> <ul style="list-style-type: none"> <li>(a) comprises one or more of the following, and does not exceed 3 building levels above the regulated surface level:                             <ul style="list-style-type: none"> <li>(i) ancillary accommodation</li> <li>(ii) carport</li> <li>(iii) child care facility</li> <li>(iv) community facility</li> <li>(v) consulting room</li> <li>(vi) dwelling</li> <li>(vii) educational facility</li> <li>(viii) hotel</li> <li>(ix) office</li> <li>(x) outbuilding</li> <li>(xi) retirement facility</li> <li>(xii) shop (other than a bulky goods outlet)</li> <li>(xiii) student accommodation</li> <li>(xiv) supported accommodation</li> <li>(xv) tourist accommodation</li> <li>(xvi) verandah</li> <li>(xvii) development which is, in the opinion of the relevant authority, minor in nature or would not warrant a referral when considering the purpose of the referral.</li> </ul> </li> <li>(b) does not include any of the following:                             <ul style="list-style-type: none"> <li>(i) filling of land more than 1m above the regulated surface level</li> <li>(ii) storage of material or equipment or temporary stockpiling over a designated stockpiling or storage area that is larger than 100 square metres.</li> </ul> </li> </ul> |

|   |   |
|---|---|
| Excavation and Ground Intruding Activity  |   |
| <p>PO 2.1<br/>Development does not unsatisfactorily interact with or reduce the loading on an underground tunnel corridors or infrastructure.</p> | <p>DTS/DPF 2.1<br/>Development does not include any of the following:</p> <ul style="list-style-type: none"> <li>(a) excavation or ground intruding activity at a depth greater than 2.5 metres below the regulated surface level</li> <li>(b) ground intruding activity involving an underground drain, pipe, cable, conduit, tunnel, underground passageway or adit.</li> </ul> |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body             | Purpose of Referral  | Statutory Reference  |
|--|---------------------------|--|--|
| Except where all of the relevant deemed-to-satisfy criteria are met, development that is within the Tunnel Protection Overlay. | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority in relation to the potential for development to adversely impact upon the safety and structural integrity of tunnels and associated underground infrastructure proposed by or under the care, control and management of the Commissioner of Highways. | Development of a class to which Schedule 9 clause 3 item 8 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

**Urban Transport Routes Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Safe and efficient operation of Urban Transport Routes for all road users. |
| DO 2            | Provision of safe and efficient access to and from Urban Transport Routes. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| Access - Safe Entry and Exit (Traffic Flow)  |   |
| <p>PO 1.1<br/>Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State maintained roads.</p> | <p>DTS/DPF 1.1<br/>An access point satisfies (a), (b) or (c):</p> <ul style="list-style-type: none"> <li>(a) where servicing a single (1) dwelling / residential allotment:                             <ul style="list-style-type: none"> <li>(i) it will not result in more than one access point</li> <li>(ii) vehicles can enter and exit the site in a forward direction</li> <li>(iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees</li> <li>(iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road</li> <li>(v) it will have a width of between 3m and 4m (measured at the site boundary)</li> </ul> </li> <li>(b) where the development will result in 2 and up to 6 dwellings:                             <ul style="list-style-type: none"> <li>(i) it will not result in more than one access point servicing the development site</li> <li>(ii) vehicles can enter and exit the site in a forward direction</li> </ul> </li> </ul> |

- (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees
  - (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road
  - (v) it will have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site)
- (c) where the development will result in 7 or more dwellings, or is a non-residential land use:
- (i) it will not result in more than one access point servicing the development site
  - (ii) vehicles can enter and exit the site using left turn only movements
  - (iii) vehicles can enter and exit the site in a forward direction
  - (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees
  - (v) it will have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less
  - (vi) it will have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m
  - (vii) it will have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m
  - (viii) provides for simultaneous two-way vehicle movements at the access:
    - A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road
    - and
    - B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.

Access - On-Site Queuing

PO 2.1

Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption on the functional performance of the road and maintain safe vehicle movements.

DTS/DPF 2.1

An access point in accordance with one of the following:

- (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:

- (b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and:
  - (i) is expected to be serviced by vehicles with a length no greater than 6.4m
  - (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)
- (c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and:
  - (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle
  - (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)

- (iii) any termination of or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop
- (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the longest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram:

Access - (Location Spacing) - Existing Access Point

PO 3.1

Existing access points are designed to accommodate the type and volume of traffic likely to be generated by the development.

DTS/DPF 3.1

An existing access point satisfies (a), (b) or (c):

- (a) it will not service, or is not intended to service, more than 6 dwellings
- (b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access
- (c) is not located on a Controlled Access Road and development constitutes:
  - (i) a change of use between an office <500m<sup>2</sup> gross leasable floor area and a consulting room <500m<sup>2</sup> gross leasable floor area or vice versa
  - (ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment
  - (iii) a change of use from a consulting room or office <250m<sup>2</sup> gross leasable floor area to shop <250m<sup>2</sup> gross leasable floor area
  - (iv) a change of use from a shop <500m<sup>2</sup> gross leasable floor area to a warehouse <500m<sup>2</sup> gross leasable floor area
  - (v) an office or consulting room with a <500m<sup>2</sup> gross leasable floor area
  - (vi) a change of use from a residential dwelling to a shop, office, consulting room or personal or domestic services establishment with <250m<sup>2</sup> gross leasable floor area.

Access - Location (Spacing) - New Access Points

PO 4.1

New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1

A new access point satisfies (a), (b) or (c):

- (a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:

The points marked  $X_1$  and  $Y$  are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension  $Y-Y$  extends to Point  $Y_1$ .

- (b) where the development site is intended to serve between 1 and 6 dwellings, the new access:
  - (i) is not located on a Controlled Access Road
  - (ii) is not located on a section of road affected by double barrier lines
  - (iii) will be on a road with a speed environment of 70km/h or less
  - (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
  - (v) is located a minimum of 6m from a median opening or pedestrian crossing

- (c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

| Speed Limit     | Separation between access points   | Separation from public road junctions and merging/terminating lanes |
|-----------------|--|---|
| 50 km/h or less | No spacing requirement   | 20m   |
| 60 km/h         | 5m (for development intended to serve between 1 and 6 dwellings) and 10m for all other cases | 73m   |
| 70 km/h         | 40m  | 92m   |
| 80 km/h         | 50m  | 114m  |
| 90 km/h         | 65m  | 139m  |
| 100 km/h        | 80m  | 165m  |
| 110 km/h        | 100m   | 193m  |

Access - Location (Sight Lines)

PO 5.1

Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.

DTS/DPF 5.1

An access point satisfies (a) and (c) or (b) and (c):

- (a) the development site does or is intended to serve between 1 and 6 dwellings and utilises an existing access point or
- (b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

| Speed Limit     | Access point serving 1-6 dwellings | Access point serving all other development |
|-----------------|------------------------------------|--|
| 40 km/h or less | 47m                                | 73m  |
| 50 km/h         | 63m                                | 97m  |
| 60 km/h         | 81m                                | 123m                                       |
| 70 km/h         | 100m                               | 151m                                       |
| 80 km/h         | 121m                               | 181m                                       |
| 90 km/h         | 144m                               | 226m                                       |
| 100 km/h        | 169m                               | 262m                                       |
| 110km/h         | 195m                               | 300m                                       |

- and
- (c) pedestrian sightlines in accordance with the following diagram:

Access - Mud and Debris

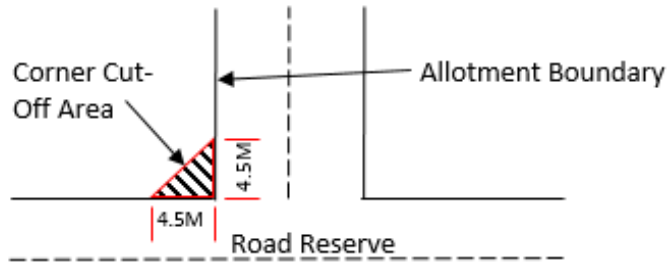

PO 6.1

Access points constructed to minimise mud or other debris being carried or transferred onto

DTS/DPF 6.1

Where the road has an unsealed shoulder and the road is not kerbed, the access way is

|  |   |
|--|---|
| the road to ensure safe road operating conditions.   | sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer).  |
| Access - Stormwater  |   |
| PO 7.1<br>Access points are designed to minimise negative impact on roadside drainage of water.  | DTS/DPF 7.1<br>Development does not:<br><br>(a) decrease the capacity of an existing drainage point<br>(b) restrict or prevent the flow of stormwater through an existing drainage point and system<br>(c) result in access points becoming stormwater flow paths directly onto the road. |
| Building on Road Reserve   |   |
| PO 8.1<br>Buildings or structures that encroach onto, above or below road reserves are designed and sited to minimise impact on safe movements by all road users.  | DTS/DPF 8.1<br>Buildings or structures are not located on, above or below the road reserve.   |
| Public Road Junctions  |   |
| PO 9.1<br>New junctions with a public road (including the opening of unmade public road junctions) or modifications to existing road junctions are located and designed to ensure safe operating conditions are maintained on the State Maintained Road. | DTS/DPF 9.1<br>Development does not comprise any of the following:<br><br>(a) creating a new junction with a public road<br>(b) opening an unmade public road junction<br>(c) modifying an existing public road junction.   |
| Corner Cut-Offs  |   |
| PO 10.1<br>Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to driver safety.  | DTS/DPF 10.1<br>Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram:<br><br>                       |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity   | Referral Body             | Purpose of Referral   | Statutory Reference  |
|---|---------------------------|---|--|
| Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road:<br><br>(a) creation of a new access or junction<br>(b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority)<br>(c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority). | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

**Urban Tree Canopy Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

## Desired Outcome

DO 1 Residential development preserves and enhances urban tree canopy through the planting of new trees and retention of existing mature trees where practicable.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |   |   |      |              |         |                                |      |   |                   |  |  |  |           |                         |                         |   |       |     |    |   |        |     |     |   |       |      |    |   |                        |  |  |  |                                 |                                 |   |                             |      |      |   |                                  |       |      |   |                                   |      |     |   |   |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

## Water Protection Area Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Safeguard South Australia's public water supplies and ecologically significant areas by protecting regionally and locally significant surface and underground water resources in Water Protection Areas from pollution. This includes considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Land Use  |   |
| <p>PO 1.1</p> <p>Development with potential to expose the water supply role of the Water Protection Area to significant adverse water quality risk is avoided to maintain the long term function of the Water Protection Area.</p>  | <p>DTS/DPF 1.1</p> <p>Development does not involve any one or combination of the following:</p> <ul style="list-style-type: none"> <li>(a) fuel depot</li> <li>(b) intensive animal husbandry</li> <li>(c) special industry</li> <li>(d) stock slaughter works</li> <li>(e) timber preservation works.</li> </ul> |
| Groundwater   |   |
| <p>PO 2.1</p> <p>Groundwater resources are protected from pollution by ensuring development does not:</p> <ul style="list-style-type: none"> <li>(a) generate or dispose of waste in a manner that would pollute water resources</li> <li>(b) involve the storage or disposal of chemicals or hazardous substances in a manner that would pose a risk to water supplies.</li> </ul>   | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>  |
| <p>PO 2.2</p> <p>Groundwater catchment and recharge characteristics are safeguarded by ensuring development:</p> <ul style="list-style-type: none"> <li>(a) retains and protects areas of native vegetation</li> <li>(b) does not inhibit the potential of an aquifer to recharge.</li> </ul>   | <p>DTS/DPF 2.2</p> <p>None are applicable.</p>  |
| Farming and Horticulture  |   |
| <p>PO 3.1</p> <p>Farming or horticulture operations occur only where:</p> <ul style="list-style-type: none"> <li>(a) the activity will not result in any increase in the salinity levels of groundwater</li> <li>(b) the land and soil structure is capable of supporting the proposed activity and the likelihood of soil erosion is minimised</li> <li>(c) the depth to the water table is greater than 2 metres from the ground.</li> </ul>  | <p>DTS/DPF 3.1</p> <p>None are applicable.</p>  |
| Irrigation  |   |
| <p>PO 4.1</p> <p>Irrigated areas are sited to ensure they:</p> <ul style="list-style-type: none"> <li>(a) avoid any land prone to waterlogging or subject to flooding through irrigation</li> <li>(b) avoid the risk of the water table falling or rising significantly as a result of irrigation practices</li> <li>(c) do not increase the salinity levels of groundwater</li> <li>(d) minimise the risk of polluting surface and groundwater resources where wastewater is used to irrigate the land.</li> </ul> | <p>DTS/DPF 4.1</p> <p>None are applicable.</p>  |

Wastewater

|  |   |
|--|---|
| <p>PO 5.1</p> <p>Wastewater-generating development utilises existing communal wastewater management infrastructure to avoid on-site disposal.</p>  | <p>DTS/DPF 5.1</p> <p>Development (including land division) that generates wastewater is connected to sewerage or community wastewater management systems with sufficient hydraulic capacity to accept the inflow.</p>  |
| <p>PO 5.2</p> <p>Development that generates wastewater which cannot be disposed of via sewerage or community wastewater management systems, is designed and of a scale that will enable on-site wastewater treatment and disposal in accordance with relevant health and environmental requirements.</p> | <p>DTS/DPF 5.2</p> <p>On-site wastewater treatment systems comply with:</p> <ul style="list-style-type: none"> <li>(a) the 'On-site Wastewater Systems Code' or</li> <li>(b) AS/NZS 1547: On-site domestic wastewater management and the South Australian amendments to AS/NZS 1547 as outlined in section 9.2 of the 'On-site Wastewater Systems Code'.</li> </ul> |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity  | Referral Body                            | Purpose of Referral  | Statutory Reference   |
|--|--|--|---|
| <p>Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period, more than 200 tonnes of organic waste or matter. (EPA Licence)</p> <p>Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period, more than 2.5ML of wastewater.</p> <p>(EPA Licence required at more than 5 ML)</p> <p>Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.</p> <p>Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units. (EPA licence required at 650 or more standard pig units)</p> <p>Dairies - being the carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time.</p> | <p>Environment Protection Authority.</p> | <p>To provide expert Technical assessment and direction to the Relevant authority on the assessment of the potential harm from pollution and waste aspects arising from activities of environmental significance and other activities that have the potential to cause serious environmental harm.</p> | <p>Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p> |

**Water Resources Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Protection of the quality of surface waters considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change. |
| DO 2            | Maintain the conveyance function and natural flow paths of watercourses to assist in the management of flood waters and stormwater runoff.  |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Water Catchment   |   |
| PO 1.1<br>Watercourses and their beds, banks, wetlands and floodplains (1% AEP flood extent) are not damaged or modified and are retained in their natural state, except where modification is required for essential access or maintenance purposes.   | DTS/DPF 1.1<br>None are applicable.   |
| PO 1.2<br>Development avoids interfering with the existing hydrology or water regime of swamps and wetlands other than to improve the existing conditions to enhance environmental values.  | DTS/DPF 1.2<br>None are applicable.   |
| PO 1.3<br>Wetlands and low-lying areas providing habitat for native flora and fauna are not drained, except temporarily for essential management purposes to enhance environmental values.  | DTS/DPF 1.3<br>None are applicable.   |
| PO 1.4<br>Watercourses, areas of remnant native vegetation, or areas prone to erosion that are capable of natural regeneration are fenced off to limit stock access.  | DTS/DPF 1.4<br>None are applicable.   |
| PO 1.5<br>Development that increases surface water run-off includes a suitably sized strip of vegetated land on each side of a watercourse to filter runoff to:<br><br>(a) reduce the impacts on native aquatic ecosystems<br>(b) minimise soil loss eroding into the watercourse.  | DTS/DPF 1.5<br>A strip of land 20m or more wide measured from the top of existing banks on each side of the watercourse is free from development, livestock use and revegetated with locally indigenous vegetation. |
| PO 1.6<br>Development resulting in the depositing or placing of an object or solid material in a watercourse or lake occurs only where it involves any of the following:<br><br>(a) the construction of an erosion control structure<br>(b) devices or structures used to extract or regulate water flowing in a watercourse<br>(c) devices used for scientific purposes<br>(d) the rehabilitation of watercourses. | DTS/DPF 1.6<br>None are applicable.   |
| PO 1.7<br>Watercourses, floodplains (1% AEP flood extent) and wetlands protected and enhanced by retaining and protecting existing native vegetation.   | DTS/DPF 1.7<br>None are applicable.   |
| PO 1.8<br>Watercourses, floodplains (1% AEP flood extent) and wetlands are protected and enhanced by stabilising watercourse banks and reducing sediments and nutrients entering the watercourse.   | DTS/DPF 1.8<br>None are applicable.   |
| PO 1.9<br>Dams, water tanks and diversion drains are located and constructed to maintain the quality and quantity of flows required to meet environmental and downstream needs.   | DTS/DPF 1.9<br>None are applicable.   |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---------------------------------|---------------|---------------------|---------------------|
| None                            | None          | None                | None                |

**Part 4 - General Development Policies**

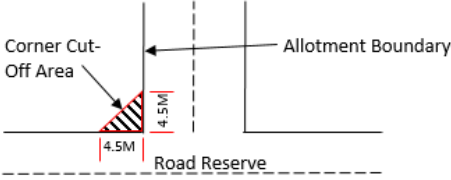

**Advertisements**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Advertisements and advertising hoardings are appropriate to context, efficient and effective in communicating with the public, limited in number to avoid clutter, and do not create hazard. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Appearance  |   |
| <p>PO 1.1</p> <p>Advertisements are compatible and integrated with the design of the building and/or land they are located on.</p>                    | <p>DTS/DPF 1.1</p> <p>Advertisements attached to a building satisfy all of the following:</p> <ul style="list-style-type: none"> <li>(a) are not located in a Neighbourhood-type zone</li> <li>(b) where they are flush with a wall:                             <ul style="list-style-type: none"> <li>(i) if located at canopy level, are in the form of a fascia sign</li> <li>(ii) if located above canopy level:                                     <ul style="list-style-type: none"> <li>A. do not have any part rising above parapet height</li> <li>B. are not attached to the roof of the building</li> </ul> </li> </ul> </li> <li>(c) where they are not flush with a wall:                             <ul style="list-style-type: none"> <li>(i) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure</li> <li>(ii) if attached to a two-storey building:                                     <ul style="list-style-type: none"> <li>A. has no part located above the finished floor level of the second storey of the building</li> <li>B. does not protrude beyond the outer limits of any verandah structure below</li> <li>C. does not have a sign face that exceeds 1m<sup>2</sup> per side.</li> </ul> </li> </ul> </li> <li>(d) if located below canopy level, are flush with a wall</li> <li>(e) if located at canopy level, are in the form of a fascia sign</li> <li>(f) if located above a canopy:                             <ul style="list-style-type: none"> <li>(i) are flush with a wall</li> <li>(ii) do not have any part rising above parapet height</li> <li>(iii) are not attached to the roof of the building.</li> </ul> </li> <li>(g) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure</li> <li>(h) if attached to a two-storey building, have no part located above the finished floor level of the second storey of the building</li> <li>(i) where they are flush with a wall, do not, in combination with any other existing sign, cover more than 15% of the building facade to which they are attached.</li> </ul> |
| <p>PO 1.2</p> <p>Advertising hoardings do not disfigure the appearance of the land upon which they are situated or the character of the locality.</p> | <p>DTS/DPF 1.2</p> <p>Where development comprises an advertising hoarding, the supporting structure is:</p> <ul style="list-style-type: none"> <li>(a) concealed by the associated advertisement and decorative detailing or</li> <li>(b) not visible from an adjacent public street or thoroughfare, other than a support structure in the form of a single or dual post design.</li> </ul>  |
| <p>PO 1.3</p> <p>Advertising does not encroach on public land or the land of an adjacent allotment.</p>   | <p>DTS/DPF 1.3</p> <p>Advertisements and/or advertising hoardings are contained within the boundaries of the site.</p>  |
| <p>PO 1.4</p> <p>Where possible, advertisements on public land are integrated with existing structures and infrastructure.</p>                        | <p>DTS/DPF 1.4</p> <p>Advertisements on public land that meet at least one of the following:</p> <ul style="list-style-type: none"> <li>(a) achieves Advertisements DTS/DPF 1.1</li> <li>(b) are integrated with a bus shelter.</li> </ul>  |
| <p>PO 1.5</p> <p>Advertisements and/or advertising hoardings are of a scale and size appropriate to the character of the locality.</p>                | <p>DTS/DPF 1.5</p> <p>None are applicable.</p>  |

|   |  |
|---|--|
| PO 2.1<br>Proliferation of advertisements is minimised to avoid visual clutter and untidiness.  | DTS/DPF 2.1<br>No more than one freestanding advertisement is displayed per occupancy.   |
| PO 2.2<br>Multiple business or activity advertisements are co-located and coordinated to avoid visual clutter and untidiness.   | DTS/DPF 2.2<br>Advertising of a multiple business or activity complex is located on a single advertisement fixture or structure.   |
| PO 2.3<br>Proliferation of advertisements attached to buildings is minimised to avoid visual clutter and untidiness.  | DTS/DPF 2.3<br>Advertisements satisfy all of the following:<br><br>(a) are attached to a building<br>(b) other than in a Neighbourhood-type zone, where they are flush with a wall, cover no more than 15% of the building facade to which they are attached<br>(c) do not result in more than one sign per occupancy that is not flush with a wall.   |
| Advertising Content   |  |
| PO 3.1<br>Advertisements are limited to information relating to the lawful use of land they are located on to assist in the ready identification of the activity or activities on the land and avoid unrelated content that contributes to visual clutter and untidiness.   | DTS/DPF 3.1<br>Advertisements contain information limited to a lawful existing or proposed activity or activities on the same site as the advertisement.   |
| Amenity Impacts   |  |
| PO 4.1<br>Light spill from advertisement illumination does not unreasonably compromise the amenity of sensitive receivers.  | DTS/DPF 4.1<br>Advertisements do not incorporate any illumination.   |
| Safety  |  |
| PO 5.1<br>Advertisements and/or advertising hoardings erected on a verandah or projecting from a building wall are designed and located to allow for safe and convenient pedestrian access.   | DTS/DPF 5.1<br>Advertisements have a minimum clearance of 2.5m between the top of the footpath and base of the underside of the sign.  |
| PO 5.2<br>Advertisements and/or advertising hoardings do not distract or create a hazard to drivers through excessive illumination.   | DTS/DPF 5.2<br>No advertisement illumination is proposed.  |
| PO 5.3<br>Advertisements and/or advertising hoardings do not create a hazard to drivers by:<br><br>(a) being liable to interpretation by drivers as an official traffic sign or signal<br>(b) obscuring or impairing drivers' view of official traffic signs or signals<br>(c) obscuring or impairing drivers' view of features of a road that are potentially hazardous (such as junctions, bends, changes in width and traffic control devices) or other road or rail vehicles at/or approaching level crossings. | DTS/DPF 5.3<br>Advertisements satisfy all of the following:<br><br>(a) are not located in a public road or rail reserve<br>(b) are located wholly outside the land shown as 'Corner Cut-Off Area' in the following<br><br><br><br>diagram  |
| PO 5.4<br>Advertisements and/or advertising hoardings do not create a hazard by distracting drivers from the primary driving task at a location where the demands on driver concentration are high.   | DTS/DPF 5.4<br>Advertisements and/or advertising hoardings are not located along or adjacent to a road having a speed limit of 80km/h or more.   |
| PO 5.5<br>Advertisements and/or advertising hoardings provide sufficient clearance from the road carriageway to allow for safe and convenient movement by all road users.   | DTS/DPF 5.5<br>Where the advertisement or advertising hoarding is:<br><br>(a) on a kerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 0.6m from the roadside edge of the kerb<br>(b) on an unkerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 5.5m from the edge of the seal<br>(c) on any other kerbed or unkerbed road, the advertisement or advertising hoarding is located a minimum of the following distance from the roadside edge of the kerb or the seal:<br><br>(a) 110 km/h road - 14m<br>(b) 100 km/h road - 13m<br>(c) 90 km/h road - 10m<br>(d) 70 or 80 km/h road - 8.5m. |
| PO 5.6<br>Advertising near signalised intersections does not cause unreasonable distraction to road users through illumination, flashing lights, or moving or changing displays or messages.  | DTS/DPF 5.6<br>Advertising:<br>(a) is not illuminated  |

- (b) does not incorporate a moving or changing display or message
- (c) does not incorporate a flashing light(s).

## Animal Keeping and Horse Keeping

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Animals are kept at a density that is not beyond the carrying capacity of the land and in a manner that minimises their adverse effects on the environment, local amenity and surrounding development. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|---|---|
| Siting and Design   |   |
| PO 1.1<br>Animal keeping, horse keeping and associated activities do not create adverse impacts on the environment or the amenity of the locality.  | DTS/DPF 1.1<br>None are applicable.   |
| PO 1.2<br>Animal keeping and horse keeping is located and managed to minimise the potential transmission of disease to other operations where animals are kept.   | DTS/DPF 1.2<br>None are applicable.   |
| Horse Keeping   |   |
| PO 2.1<br>Water from stable wash-down areas is directed to appropriate absorption areas and/or drainage pits to minimise pollution of land and water.   | DTS/DPF 2.1<br>None are applicable.   |
| PO 2.2<br>Stables, horse shelters or associated yards are sited appropriate distances away from sensitive receivers and/or allotments in other ownership to avoid adverse impacts from dust, erosion and odour.                     | DTS/DPF 2.2<br>Stables, horse shelters and associated yards are sited in accordance with all of the following: <ul style="list-style-type: none"> <li>(a) 30m or more from any sensitive receivers (existing or approved) on land in other ownership</li> <li>(b) where an adjacent allotment is vacant and in other ownership, 30m or more from the boundary of that allotment.</li> </ul> |
| PO 2.3<br>All areas accessible to horses are separated from septic tank effluent disposal areas to protect the integrity of that system. Stable flooring is constructed with an impervious material to facilitate regular cleaning. | DTS/DPF 2.3<br>Septic tank effluent disposal areas are enclosed with a horse-proof barrier such as a fence to exclude horses from this area.  |
| PO 2.4<br>To minimise environmental harm and adverse impacts on water resources, stables, horse shelters and associated yards are appropriately set back from a watercourse.  | DTS/DPF 2.4<br>Stables, horse shelters and associated yards are set back 50m or more from a watercourse.  |
| PO 2.5<br>Stables, horse shelters and associated yards are located on slopes that are stable to minimise the risk of soil erosion and water runoff.   | DTS/DPF 2.5<br>Stables, horse shelters and associated yards are not located on land with a slope greater than 10% (1-in-10).  |
| Kennels   |   |
| PO 3.1<br>Kennel flooring is constructed with an impervious material to facilitate regular cleaning.  | DTS/DPF 3.1<br>The floors of kennels satisfy all of the following: <ul style="list-style-type: none"> <li>(a) are constructed of impervious concrete</li> <li>(b) are designed to be self-draining when washed down.</li> </ul>   |
| PO 3.2<br>Kennels and exercise yards are designed and sited to minimise noise nuisance to neighbours through measures such as:  | DTS/DPF 3.2<br>Kennels are sited 500m or more from the nearest sensitive receiver on land in other ownership.   |

|   |   |
|---|---|
| (a) adopting appropriate separation distances<br>(b) orientating openings away from sensitive receivers.  |   |
| PO 3.3<br>Dogs are regularly observed and managed to minimise nuisance impact on adjoining sensitive receivers from animal behaviour.   | DTS/DPF 3.3<br>Kennels are sited in association with a permanent dwelling on the land.                                    |
| Wastes  |   |
| PO 4.1<br>Storage of manure, used litter and other wastes (other than wastewater lagoons) is designed, constructed and managed to minimise attracting and harbouring vermin.      | DTS/DPF 4.1<br>None are applicable.   |
| PO 4.2<br>Facilities for the storage of manure, used litter and other wastes (other than wastewater lagoons) are located to minimise the potential for polluting water resources. | DTS/DPF 4.2<br>Waste storage facilities (other than wastewater lagoons) are located outside the 1% AEP flood event areas. |

## Aquaculture

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Aquaculture facilities are developed in an ecologically, economically and socially sustainable manner to support an equitable sharing of marine, coastal and inland resources and mitigate conflict with other water-based and land-based uses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| Land-based Aquaculture   |  |
| PO 1.1<br>Land-based aquaculture and associated components are sited and designed to mitigate adverse impacts on nearby sensitive receivers.   | DTS/DPF 1.1<br>Land-based aquaculture and associated components are located to satisfy all of the following:<br><br>(a) 200m or more from a sensitive receiver in other ownership<br>(b) 500m or more from the boundary of a zone primarily intended to accommodate sensitive receivers<br><br>or<br><br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the <i>Aquaculture Act 2001</i> . |
| PO 1.2<br>Land-based aquaculture and associated components are sited and designed to prevent surface flows from entering ponds in a 1% AEP sea flood level event.  | DTS/DPF 1.2<br>None are applicable.  |
| PO 1.3<br>Land-based aquaculture and associated components are sited and designed to prevent pond leakage that would pollute groundwater.  | DTS/DPF 1.3<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the <i>Aquaculture Act 2001</i> .   |
| PO 1.4<br>Land-based aquaculture and associated components are sited and designed to prevent farmed species escaping and entering into any waters.   | DTS/DPF 1.4<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the <i>Aquaculture Act 2001</i> .   |
| PO 1.5<br>Land-based aquaculture and associated components, including intake and discharge pipes, are designed to minimise the need to traverse sensitive areas to minimise impact on the natural environment. | DTS/DPF 1.5<br>None are applicable.  |
| PO 1.6<br>Pipe inlets and outlets associated with land-based aquaculture are sited and designed to minimise the risk of disease transmission.  | DTS/DPF 1.6<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the <i>Aquaculture Act 2001</i> .   |

|   |   |
|---|---|
| <p>PO 1.7</p> <p>Storage areas associated with aquaculture activity are integrated with the use of the land and sited and designed to minimise their visual impact on the surrounding environment.</p>  | <p>DTS/DPF 1.7</p> <p>None are applicable.</p>  |
| <p>Marine Based Aquaculture</p>   |   |
| <p>PO 2.1</p> <p>Marine aquaculture is sited and designed to minimise its adverse impacts on sensitive ecological areas including:</p> <ul style="list-style-type: none"> <li>(a) creeks and estuaries</li> <li>(b) wetlands</li> <li>(c) significant seagrass and mangrove communities</li> <li>(d) marine habitats and ecosystems.</li> </ul>   | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>  |
| <p>PO 2.2</p> <p>Marine aquaculture is sited in areas with adequate water current to disperse sediments and dissolve particulate wastes to prevent the build-up of waste that may cause environmental harm.</p>   | <p>DTS/DPF 2.2</p> <p>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the <i>Aquaculture Act 2001</i>.</p>  |
| <p>PO 2.3</p> <p>Marine aquaculture is designed to not involve discharge of human waste on the site, on any adjacent land or into nearby waters.</p>  | <p>DTS/DPF 2.3</p> <p>The development does not include toilet facilities located over water.</p>  |
| <p>PO 2.4</p> <p>Marine aquaculture (other than inter-tidal aquaculture) is located an appropriate distance seaward of the high water mark.</p>   | <p>DTS/DPF 2.4</p> <p>Marine aquaculture development is located 100m or more seaward of the high water mark</p> <p>or</p> <p>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the <i>Aquaculture Act 2001</i>.</p> |
| <p>PO 2.5</p> <p>Marine aquaculture is sited and designed to not obstruct or interfere with:</p> <ul style="list-style-type: none"> <li>(a) areas of high public use</li> <li>(b) areas, including beaches, used for recreational activities such as swimming, fishing, skiing, sailing and other water sports</li> <li>(c) areas of outstanding visual or environmental value</li> <li>(d) areas of high tourism value</li> <li>(e) areas of important regional or state economic activity, including commercial ports, wharfs and jetties</li> <li>(f) the operation of infrastructure facilities including inlet and outlet pipes associated with the desalination of sea water.</li> </ul>  | <p>DTS/DPF 2.5</p> <p>None are applicable.</p>  |
| <p>PO 2.6</p> <p>Marine aquaculture is sited and designed to minimise interference and obstruction to the natural processes of the coastal and marine environment.</p>  | <p>DTS/DPF 2.6</p> <p>None are applicable.</p>  |
| <p>PO 2.7</p> <p>Marine aquaculture is designed to be as unobtrusive as practicable by incorporating measures such as:</p> <ul style="list-style-type: none"> <li>(a) using feed hoppers painted in subdued colours and suspending them as close as possible to the surface of the water</li> <li>(b) positioning structures to protrude the minimum distance practicable above the surface of the water</li> <li>(c) avoiding the use of shelters and structures above cages and platforms unless necessary to exclude predators and protected species from interacting with the farming structures and/or stock inside the cages, or for safety reasons</li> <li>(d) positioning racks, floats and other farm structures in unobtrusive locations landward from the shoreline.</li> </ul> | <p>DTS/DPF 2.7</p> <p>None are applicable.</p>  |
| <p>PO 2.8</p> <p>Access, launching and maintenance facilities utilise existing established roads, tracks, ramps and paths to or from the sea where possible to minimise environmental and amenity impacts.</p>  | <p>DTS/DPF 2.8</p> <p>The development utilises existing established roads, tracks, ramps and/or paths (as applicable) to access the sea.</p>  |
| <p>PO 2.9</p> <p>Access, launching and maintenance facilities are developed as common user facilities and are co-located where practicable to mitigate adverse impacts on coastal areas.</p>  | <p>DTS/DPF 2.9</p> <p>The development utilises existing established roads, tracks, ramps and/or paths (as applicable) to access the sea.</p>  |
| <p>PO 2.10</p> <p>Marine aquaculture is sited to minimise potential impacts on, and to protect the integrity of, reserves under the <i>National Parks and Wildlife Act 1972</i>.</p>  | <p>DTS/DPF 2.10</p> <p>Marine aquaculture is located 1000m or more seaward of the boundary of any reserve under the <i>National Parks and Wildlife Act 1972</i>.</p>  |
| <p>PO 2.11</p> <p>Onshore storage, cooling and processing facilities do not impair the coastline and its visual</p>   | <p>DTS/DPF 2.11</p> <p>The development does not include any onshore facilities in conjunction with a proposal</p>   |

|  |  |
|--|--|
| amenity by:  | marine aquaculture.  |
| (a) being sited, designed, landscaped and of a scale to reduce the overall bulk and appearance of buildings and complement the coastal landscape   |  |
| (b) making provision for appropriately sited and designed vehicular access arrangements, including using existing vehicular access arrangements as far as practicable  |  |
| (c) incorporating appropriate waste treatment and disposal.  |  |
| Navigation and Safety  |  |
| PO 3.1<br>Marine aquaculture sites are suitably marked to maintain navigational safety.  | DTS/DPF 3.1<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the <i>Aquaculture Act 2001</i> . |
| PO 3.2<br>Marine aquaculture is sited to provide adequate separation between farms for safe navigation.  | DTS/DPF 3.2<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the <i>Aquaculture Act 2001</i> . |
| Environmental Management   |  |
| PO 4.1<br>Marine aquaculture is maintained to prevent hazards to people and wildlife, including breeding grounds and habitats of native marine mammals and terrestrial fauna, especially migratory species.                                | DTS/DPF 4.1<br>None are applicable.  |
| PO 4.2<br>Marine aquaculture is designed to facilitate the relocation or removal of structures in the case of emergency such as oil spills, algal blooms and altered water flows.  | DTS/DPF 4.2<br>None are applicable.  |
| PO 4.3<br>Marine aquaculture provides for progressive or future reclamation of disturbed areas ahead of, or upon, decommissioning.   | DTS/DPF 4.3<br>None are applicable.  |
| PO 4.4<br>Aquaculture operations incorporate measures for the removal and disposal of litter, disused material, shells, debris, detritus, dead animals and animal waste to prevent pollution of waters, wetlands, or the nearby coastline. | DTS/DPF 4.4<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the <i>Aquaculture Act 2001</i> . |

## Beverage Production in Rural Areas

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Mitigation of potential amenity and environmental impacts of value-adding beverage production facilities such as wineries, distilleries, cideries and breweries. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Odour and Noise   |   |
| PO 1.1<br>Beverage production activities are designed and sited to minimise odour impacts on rural amenity.   | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Beverage production activities are designed and sited to minimise noise impacts on sensitive receivers.   | DTS/DPF 1.2<br>None are applicable.                         |
| PO 1.3<br>Fermentation, distillation, manufacturing, storage, packaging and bottling activities occur within enclosed buildings to improve the visual appearance within a locality and manage | DTS/DPF 1.3<br>None are applicable.                         |

|   |   |
|---|---|
| noise associated with these activities.   |   |
| PO 1.4<br>Breweries are designed to minimise odours emitted during boiling and fermentation stages of production.   | DTS/DPF 1.4<br>Brew kettles are fitted with a vapour condenser.   |
| PO 1.5<br>Beverage production solid wastes are stored in a manner that minimises odour impacts on sensitive receivers in other ownership.   | DTS/DPF 1.5<br>Solid waste from beverage production is collected and stored in sealed containers and removed from the site within 48 hours. |
| Water Quality   |   |
| PO 2.1<br>Beverage production wastewater management systems (including wastewater irrigation) are set back from watercourses to minimise adverse impacts on water resources.  | DTS/DPF 2.1<br>Wastewater management systems are set back 50m or more from the banks of watercourses and bores.                             |
| PO 2.2<br>The storage or disposal of chemicals or hazardous substances is undertaken in a manner to prevent pollution of water resources.   | DTS/DPF 2.2<br>None are applicable.   |
| PO 2.3<br>Stormwater runoff from areas that may cause contamination due to beverage production activities (including vehicle movements and machinery operations) is drained to an onsite stormwater treatment system to manage potential environmental impacts.   | DTS/DPF 2.3<br>None are applicable.   |
| PO 2.4<br>Stormwater runoff from areas unlikely to cause contamination by beverage production and associated activities (such as roof catchments and clean hard-paved surfaces) is diverted away from beverage production areas and wastewater management systems.  | DTS/DPF 2.4<br>None are applicable.   |
| Wastewater Irrigation   |   |
| PO 3.1<br>Beverage production wastewater irrigation systems are designed and located to not contaminate soil and surface and ground water resources or damage crops.  | DTS/DPF 3.1<br>None are applicable.   |
| PO 3.2<br>Beverage production wastewater irrigation systems are designed and located to minimise impact on amenity and avoid spray drift onto adjoining land.   | DTS/DPF 3.2<br>Beverage production wastewater is not irrigated within 50m of any dwelling in other ownership.                               |
| PO 3.3<br>Beverage production wastewater is not irrigated onto areas that pose an undue risk to the environment or amenity such as:<br><br>(a) waterlogged areas<br>(b) land within 50m of a creek, swamp or domestic or stock water bore<br>(c) land subject to flooding<br>(d) steeply sloping land<br>(e) rocky or highly permeable soil overlaying an unconfined aquifer. | DTS/DPF 3.3<br>None are applicable.   |

## Bulk Handling and Storage Facilities

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Facilities for the bulk handling and storage of agricultural, mineral, petroleum, rock, ore or other similar commodities are designed to minimise adverse impacts on transport networks, the landscape and surrounding land uses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---------------------|---|
|---------------------|---|

| Siting and Design   |  |
|---|--|
| <p>PO 1.1</p> <p>Bulk handling and storage facilities are sited and designed to minimise risks of adverse air quality and noise impacts on sensitive receivers.</p>   | <p>DTS/DPF 1.1</p> <p>Facilities for the handling, storage and dispatch of commodities in bulk (excluding processing) meet the following minimum separation distances from sensitive receivers:</p> <ul style="list-style-type: none"> <li>(a) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility (including sea-port grain terminals), where the handling of these materials into or from vessels does not exceed 100 tonnes per day: 300m or more from residential premises not associated with the facility</li> <li>(b) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility: 300m or more from residential premises not associated with the facility</li> <li>(c) bulk petroleum storage involving individual containers with a capacity up to 200 litres and a total on-site storage capacity not exceeding 1,000 cubic metres: 500m or more</li> <li>(d) coal handling with:                             <ul style="list-style-type: none"> <li>a. capacity up to 1 tonne per day or a storage capacity up to 50 tonnes: 500m or more</li> <li>b. capacity exceeding 1 tonne per day but not exceeding 100 tonnes per day or a storage capacity exceeding 50 tonnes but not exceeding 5000 tonnes: 1000m or more.</li> </ul> </li> </ul> |
| Buffers and Landscaping   |  |
| <p>PO 2.1</p> <p>Bulk handling and storage facilities incorporate a buffer area for the establishment of dense landscaping adjacent road frontages to enhance the appearance of land and buildings from public thoroughfares.</p> | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>   |
| <p>PO 2.2</p> <p>Bulk handling and storage facilities incorporate landscaping to assist with screening and dust filtration.</p>   | <p>DTS/DPF 2.2</p> <p>None are applicable.</p>   |
| Access and Parking  |  |
| <p>PO 3.1</p> <p>Roadways and vehicle parking areas associated with bulk handling and storage facilities are designed and surfaced to control dust emissions and prevent drag out of material from the site.</p>                  | <p>DTS/DPF 3.1</p> <p>Roadways and vehicle parking areas are sealed with an all-weather surface.</p>   |
| Slipways, Wharves and Pontoons  |  |
| <p>PO 4.1</p> <p>Slipways, wharves and pontoons used for the handling of bulk materials (such as fuel, oil, catch, bait and the like) incorporate catchment devices to avoid the release of materials into adjacent waters.</p>   | <p>DTS/DPF 4.1</p> <p>None are applicable.</p>   |

### Clearance from Overhead Powerlines

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Protection of human health and safety when undertaking development in the vicinity of overhead transmission powerlines. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| <p>PO 1.1</p> <p>Buildings are adequately separated from aboveground powerlines to minimise potential hazard to people and property.</p> | <p>DTS/DPF 1.1</p> <p>One of the following is satisfied:</p> <ul style="list-style-type: none"> <li>(a) a declaration is provided by or on behalf of the applicant to the effect that the proposal would not be contrary to the regulations prescribed for the purposes of section 86 of the <i>Electricity Act 1996</i></li> <li>(b) there are no aboveground powerlines adjoining the site that are the subject of the proposed development.</li> </ul> |

Design

Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | <p>Development is:</p> <ul style="list-style-type: none"> <li>(a) contextual - by considering, recognising and carefully responding to its natural surroundings or built environment and positively contributes to the character of the immediate area</li> <li>(b) durable - fit for purpose, adaptable and long lasting</li> <li>(c) inclusive - by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access, and promoting the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors</li> <li>(d) sustainable - by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.</li> </ul> |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature                                       |
|---|---|
| All development   |   |
| External Appearance   |   |
| PO 1.1<br>Buildings reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).   | DTS/DPF 1.1<br>None are applicable.   |
| PO 1.2<br>Where zero or minor setbacks are desirable, development provides shelter over footpaths (in the form of verandahs, awnings, canopies and the like, with adequate lighting) to positively contribute to the walkability, comfort and safety of the public realm.   | DTS/DPF 1.2<br>None are applicable.   |
| PO 1.3<br>Building elevations facing the primary street (other than ancillary buildings) are designed and detailed to convey purpose, identify main access points and complement the streetscape.   | DTS/DPF 1.3<br>None are applicable.   |
| PO 1.4<br>Plant, exhaust and intake vents and other technical equipment is integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by: <ul style="list-style-type: none"> <li>(a) positioning plant and equipment in unobtrusive locations viewed from public roads and spaces</li> <li>(b) screening rooftop plant and equipment from view</li> <li>(c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses.</li> </ul> | DTS/DPF 1.4<br>Development does not incorporate any structures that protrude beyond the roofline. |
| PO 1.5<br>The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form) taking into account the form of development contemplated in the relevant zone.   | DTS/DPF 1.5<br>None are applicable.   |
| Safety  |   |
| PO 2.1<br>Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.  | DTS/DPF 2.1<br>None are applicable.   |
| PO 2.2<br>Development is designed to differentiate public, communal and private areas.  | DTS/DPF 2.2<br>None are applicable.   |
| PO 2.3<br>Buildings are designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.   | DTS/DPF 2.3<br>None are applicable.   |

|   |   |
|---|---|
| <p>PO 2.4</p> <p>Development at street level is designed to maximise opportunities for passive surveillance of the adjacent public realm.</p>   | <p>DTS/DPF 2.4</p> <p>None are applicable.</p>  |
| <p>PO 2.5</p> <p>Common areas and entry points of buildings (such as the foyer areas of residential buildings), and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.</p>  | <p>DTS/DPF 2.5</p> <p>None are applicable.</p>  |
| <p>Landscaping</p>  |   |
| <p>PO 3.1</p> <p>Soft landscaping and tree planting is incorporated to:</p> <ul style="list-style-type: none"> <li>(a) minimise heat absorption and reflection</li> <li>(b) maximise shade and shelter</li> <li>(c) maximise stormwater infiltration</li> <li>(d) enhance the appearance of land and streetscapes</li> <li>(e) contribute to biodiversity.</li> </ul>   | <p>DTS/DPF 3.1</p> <p>None are applicable.</p>  |
| <p>PO 3.2</p> <p>Soft landscaping and tree planting maximises the use of locally indigenous plant species, incorporates plant species best suited to current and future climate conditions and avoids pest plant and weed species.</p>  | <p>DTS/DPF 3.2</p> <p>None are applicable.</p>  |

| <p>Carparking Appearance</p>  |   |
| <p>PO 7.1</p> <p>Development facing the street is designed to minimise the negative impacts of any semi-basement and undercroft car parking on the streetscapes through techniques such as:</p> <ul style="list-style-type: none"> <li>(a) limiting protrusion above finished ground level</li> <li>(b) screening through appropriate planting, fencing and mounding</li> <li>(c) limiting the width of openings and integrating them into the building structure.</li> </ul> | <p>DTS/DPF 7.1</p> <p>None are applicable.</p>  |
| <p>PO 7.2</p> <p>Vehicle parking areas are appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced and the like.</p>  | <p>DTS/DPF 7.2</p> <p>None are applicable.</p>  |
| <p>PO 7.3</p>   | <p>DTS/DPF 7.3</p>  |

|   |   |
|---|---|
| Safe, legible, direct and accessible pedestrian connections are provided between parking areas and the development.   | None are applicable.  |
| PO 7.4<br>Street level vehicle parking areas incorporate tree planting to provide shade and reduce solar heat absorption and reflection.  | DTS/DPF 7.4<br>None are applicable.   |
| PO 7.5<br>Street level parking areas incorporate soft landscaping to improve visual appearance when viewed from within the site and from public places.   | DTS/DPF 7.5<br>None are applicable.   |
| PO 7.6<br>Vehicle parking areas and associated driveways are landscaped to provide shade and positively contribute to amenity.  | DTS/DPF 7.6<br>None are applicable.   |
| PO 7.7<br>Vehicle parking areas and access ways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with soft landscaping.   | DTS/DPF 7.7<br>None are applicable.   |
| <b>Earthworks and sloping land</b>  |   |
| PO 8.1<br>Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.  | DTS/DPF 8.1<br>Development does not involve any of the following:<br><br>(a) excavation exceeding a vertical height of 1m<br><br>(b) filling exceeding a vertical height of 1m<br><br>(c) a total combined excavation and filling vertical height of 2m or more.  |
| PO 8.2<br>Driveways and access tracks are designed and constructed to allow safe and convenient access on sloping land (with a gradient exceeding 1 in 8).  | DTS/DPF 8.2<br>Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8) satisfy (a) and (b):<br><br>(a) do not have a gradient exceeding 25% (1-in-4) at any point along the driveway<br>(b) are constructed with an all-weather trafficable surface.   |
| PO 8.3<br>Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8):<br><br>(a) do not contribute to the instability of embankments and cuttings<br>(b) provide level transition areas for the safe movement of people and goods to and from the development<br>(c) are designed to integrate with the natural topography of the land. | DTS/DPF 8.3<br>None are applicable.   |
| PO 8.4<br>Development on sloping land (with a gradient exceeding 1 in 8) avoids the alteration of natural drainage lines and includes on-site drainage systems to minimise erosion.   | DTS/DPF 8.4<br>None are applicable.   |
| PO 8.5<br>Development does not occur on land at risk of landslip nor increases the potential for landslip or land surface instability.  | DTS/DPF 8.5<br>None are applicable.   |
| <b>Fences and Walls</b>   |   |
| PO 9.1<br>Fences, walls and retaining walls are of sufficient height to maintain privacy and security without unreasonably impacting the visual amenity and adjoining land's access to sunlight or the amenity of public places.  | DTS/DPF 9.1<br>None are applicable.   |
| PO 9.2<br>Landscaping incorporated on the low side of retaining walls is visible from public roads and public open space to minimise visual impacts.  | DTS/DPF 9.2<br>A vegetated landscaped strip 1m wide or more is provided against the low side of a retaining wall.   |
| <b>Overlooking / Visual Privacy (in building 3 storeys or less)</b>   |   |
| PO 10.1<br>Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses.  | DTS/DPF 10.1<br>Upper level windows facing side or rear boundaries shared with a residential allotment/site satisfy one of the following:<br><br>(a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 200mm<br><br>(b) have sill heights greater than or equal to 1.5m above finished floor level |

|  |  |
|--|--|
|  | (c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5 m above the finished floor level.  |
| PO 10.2<br>Development mitigates direct overlooking from balconies, terraces and decks to habitable rooms and private open space of adjoining residential uses.                                      | DTS/DPF 10.2<br>One of the following is satisfied:<br><br>(a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve that is at least 15m wide in all places faced by the balcony or terrace<br>or<br>(b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of:<br>(i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land<br>or<br>(ii) 1.7m above finished floor level in all other cases   |
| All Residential development  |  |
| Front elevations and passive surveillance  |  |
| PO 11.1<br>Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.                                       | DTS/DPF 11.1<br>Each dwelling with a frontage to a public street:<br><br>(a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m<br>(b) has an aggregate window area of at least 2m <sup>2</sup> facing the primary street.  |
| PO 11.2<br>Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.   | DTS/DPF 11.2<br>Dwellings with a frontage to a public street have an entry door visible from the primary street boundary.  |
| Outlook and amenity  |  |
| PO 12.1<br>Living rooms have an external outlook to provide a high standard of amenity for occupants.  | DTS/DPF 12.1<br>A living room of a dwelling incorporates a window with an outlook towards the street frontage or private open space, public open space, or waterfront areas.   |
| PO 12.2<br>Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion. | DTS/DPF 12.2<br>None are applicable.   |
| Ancillary Development  |  |
| PO 13.1<br>Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.              | DTS/DPF 13.1<br>Ancillary buildings:<br>(a) are ancillary to a dwelling erected on the same site<br>(b) have a floor area not exceeding 60m <sup>2</sup><br>(c) are not constructed, added to or altered so that any part is situated:<br>(i) in front of any part of the building line of the dwelling to which it is ancillary or<br>(ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)<br><br>(d) in the case of a garage or carport, the garage or carport:<br>(i) is set back at least 5.5m from the boundary of the primary street<br>(ii) when facing a primary street or secondary street, has a total door / opening not exceeding:<br>A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser<br>B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width<br><br>(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:<br>(i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary<br>and<br>(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent<br><br>(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary<br><br>(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure |

- (h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)
- (i) have a roof height where no part of the roof is more than 5m above the natural ground level
- (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour
- (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:
  - (i) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |
| 150-200  | 15%                        |
| 201-450  | 20%                        |
| >450   | 25%                        |

- (ii) the amount of existing soft landscaping prior to the development occurring.
- (l) in relation to ancillary accommodation in the Rural Zone, Productive Rural Landscape Zone, or Rural Horticulture Zone, is located within 20m of an existing dwelling.

PO 13.2  
Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision or car parking requirements and do not result in over-development of the site.

DTS/DPF 13.2  
Ancillary buildings and structures do not result in:  
(a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space  
(b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

PO 13.3  
Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa is positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.

DTS/DPF 13.3  
The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:  
(a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment  
or  
(b) located at least 12m from the nearest habitable room located on an adjoining allotment.

PO 13.4  
Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.

DTS/DPF 13.4  
Non-residential ancillary buildings and structures:  
(a) are ancillary and subordinate to an existing non-residential use on the same site  
(b) have a floor area not exceeding the following:  

| Allotment size     | Floor area       |
|--------------------|------------------|
| ≤500m <sup>2</sup> | 60m <sup>2</sup> |
| >500m <sup>2</sup> | 80m <sup>2</sup> |

  
(c) are not constructed, added to or altered so that any part is situated:  

- (i) in front of any part of the building line of the main building to which it is ancillary  
or
- (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)

  
(d) in the case of a garage or carport, the garage or carport:  

- (i) is set back at least 5.5m from the boundary of the primary street

  
(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:  

- (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary
- (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent

  
(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary  
(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure  
(h) have a wall height (or post height) not exceeding 3m (and not including a gable end)  
(i) have a roof height where no part of the roof is more than 5m above the natural ground level  
(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.

(c) if located to provide access from an alley, lane or right of way - the alley, land or right of way is at least 6.2m wide along the boundary of the allotment / site

PO 19.6  
Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.

DTS/DPF 19.6  
Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:

- (a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number)
- (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly
- (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.

Waste storage

PO 20.1  
Provision is made for the adequate and convenient storage of waste bins in a location screened from public view.

DTS/DPF 20.1  
None are applicable.

Design of Transportable Dwellings

PO 21.1  
The sub-floor space beneath transportable buildings is enclosed to give the appearance of a permanent structure.

DTS/DPF 21.1  
Buildings satisfy (a) or (b):

- (a) are not transportable  
or
- (b) the sub-floor space between the building and ground level is clad in a material and finish consistent with the building.

Group dwelling, residential flat buildings and battle-axe development

Amenity

PO 22.1  
Dwellings are of a suitable size to accommodate a layout that is well organised and provides a high standard of amenity for occupants.

DTS/DPF 22.1  
Dwellings have a minimum internal floor area in accordance with the following table:

| Number of bedrooms | Minimum internal floor area                       |
|--------------------|---|
| Studio             | 35m <sup>2</sup>                                  |
| 1 bedroom          | 50m <sup>2</sup>                                  |
| 2 bedroom          | 65m <sup>2</sup>                                  |
| 3+ bedrooms        | 80m <sup>2</sup> and any dwelling over 3 bedrooms |

|   |   |  |
|---|---|--|
|   |   | provides an additional 15m <sup>2</sup> for every additional bedroom   |
| PO 22.2                                       | The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.  | DTS/DPF 22.2<br>None are applicable.   |
| PO 22.3                                       | Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented towards adjoining properties.  | DTS/DPF 22.3<br>None are applicable.   |
| PO 22.4                                       | Battle-axe development is appropriately sited and designed to respond to the existing neighbourhood context.  | DTS/DPF 22.4<br>Dwelling sites/allotments are not in the form of a battle-axe arrangement.   |
| <b>Communal Open Space</b>                    |   |  |
| PO 23.1                                       | Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.  | DTS/DPF 23.1<br>None are applicable.   |
| PO 23.2                                       | Communal open space is of sufficient size and dimensions to cater for group recreation.   | DTS/DPF 23.2<br>Communal open space incorporates a minimum dimension of 5 metres.  |
| PO 23.3                                       | Communal open space is designed and sited to:<br><br>(a) be conveniently accessed by the dwellings which it services<br>(b) have regard to acoustic, safety, security and wind effects.   | DTS/DPF 23.3<br>None are applicable.   |
| PO 23.4                                       | Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.   | DTS/DPF 23.4<br>None are applicable.   |
| PO 23.5                                       | Communal open space is designed and sited to:<br><br>(a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings<br>(b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance. | DTS/DPF 23.5<br>None are applicable.   |
| <b>Carparking, access and manoeuvrability</b> |   |  |
| PO 24.1                                       | Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.  | DTS/DPF 24.1<br>Where on-street parking is available directly adjacent the site, on-street parking is retained adjacent the subject site in accordance with the following requirements:<br><br>(a) minimum 0.33 on-street car parks per proposed dwellings (rounded up to the nearest whole number)<br>(b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly<br>(c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented. |
| PO 24.2                                       | The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.   | DTS/DPF 24.2<br>Access to group dwellings or dwellings within a residential flat building is provided via a single common driveway.  |
| PO 24.3                                       | Residential driveways that service more than one dwelling are designed to allow safe and convenient movement.   | DTS/DPF 24.3<br>Driveways that service more than 1 dwelling or a dwelling on a battle-axe site:<br><br>(a) have a minimum width of 3m<br>(b) for driveways servicing more than 3 dwellings:<br>(i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street<br>(ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m.  |
| PO 24.4                                       | Residential driveways in a battle-axe configuration are designed to allow safe and convenient movement.   | DTS/DPF 24.4<br>Where in a battle-axe configuration, a driveway servicing one dwelling has a minimum width of 3m.  |
| PO 24.5                                       |   | DTS/DPF 24.5   |

|  |  |
|--|--|
| Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site and manoeuvre within the site in a safe and convenient manner.   | Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre.  |
| PO 24.6<br>Dwellings are adequately separated from common driveways and manoeuvring areas.   | DTS/DPF 24.6<br>Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles.   |
| Soft Landscaping   |  |
| PO 25.1<br>Soft landscaping is provided between dwellings and common driveways to improve the outlook for occupants and appearance of common areas.  | DTS/DPF 25.1<br>Other than where located directly in front of a garage or a building entry, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.  |
| PO 25.2<br>Soft landscaping is provided that improves the appearance of common driveways.  | DTS/DPF 25.2<br>Where a common driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point). |
| Site Facilities / Waste Storage  |  |
| PO 26.1<br>Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.  | DTS/DPF 26.1<br>None are applicable.   |
| PO 26.2<br>Provision is made for suitable external clothes drying facilities.  | DTS/DPF 26.2<br>None are applicable.   |
| PO 26.3<br>Provision is made for suitable household waste and recyclable material storage facilities which are:<br><br>(a) located away, or screened, from public view, and<br>(b) conveniently located in proximity to dwellings and the waste collection point.  | DTS/DPF 26.3<br>None are applicable.   |
| PO 26.4<br>Waste and recyclable material storage areas are located away from dwellings.  | DTS/DPF 26.4<br>Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.  |
| PO 26.5<br>Where waste bins cannot be conveniently collected from the street, provision is made for on-site waste collection, designed to accommodate the safe and convenient access, egress and movement of waste collection vehicles.  | DTS/DPF 26.5<br>None are applicable.   |
| PO 26.6<br>Services including gas and water meters are conveniently located and screened from public view.   | DTS/DPF 26.6<br>None are applicable.   |
| Supported accommodation and retirement facilities  |  |
| Siting and Configuration   |  |
| PO 27.1<br>Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land.   | DTS/DPF 27.1<br>None are applicable.   |
| Movement and Access  |  |
| PO 28.1<br>Development is designed to support safe and convenient access and movement for residents by providing:<br><br>(a) ground-level access or lifted access to all units<br>(b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places<br>(c) car parks with gradients no steeper than 1-in-40 and of sufficient area to provide for wheelchair manoeuvrability<br>(d) kerb ramps at pedestrian crossing points. | DTS/DPF 28.1<br>None are applicable.   |
| Communal Open Space  |  |
| PO 29.1<br>Development is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors.   | DTS/DPF 29.1<br>None are applicable.   |
| PO 29.2<br>Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.  | DTS/DPF 29.2<br>None are applicable.   |

|  |   |
|--|---|
| PO 29.3<br>Communal open space is of sufficient size and dimensions to cater for group recreation.   | DTS/DPF 29.3<br>Communal open space incorporates a minimum dimension of 5 metres.   |
| PO 29.4<br>Communal open space is designed and sited to:<br><br>(a) be conveniently accessed by the dwellings which it services<br>(b) have regard to acoustic, safety, security and wind effects.   | DTS/DPF 29.4<br>None are applicable.  |
| PO 29.5<br>Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.   | DTS/DPF 29.5<br>None are applicable.  |
| PO 29.6<br>Communal open space is designed and sited to:<br><br>(a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings<br>(b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.   | DTS/DPF 29.6<br>None are applicable.  |
| <b>Site Facilities / Waste Storage</b>   |   |
| PO 30.1<br>Development is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric powered vehicles.  | DTS/DPF 30.1<br>None are applicable.  |
| PO 30.2<br>Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.  | DTS/DPF 30.2<br>None are applicable.  |
| PO 30.3<br>Provision is made for suitable external clothes drying facilities.  | DTS/DPF 30.3<br>None are applicable.  |
| PO 30.4<br>Provision is made for suitable household waste and recyclable material storage facilities conveniently located and screened from public view.   | DTS/DPF 30.4<br>None are applicable.  |
| PO 30.5<br>Waste and recyclable material storage areas are located away from dwellings.  | DTS/DPF 30.5<br>Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window. |
| PO 30.6<br>Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.   | DTS/DPF 30.6<br>None are applicable.  |
| PO 30.7<br>Services including gas and water meters are conveniently located and screened from public view.   | DTS/DPF 30.7<br>None are applicable.  |
| All non-residential development  |   |
| <b>Water Sensitive Design</b>  |   |
| PO 31.1<br>Development likely to result in significant risk of export of litter, oil or grease includes stormwater management systems designed to minimise pollutants entering stormwater.   | DTS/DPF 31.1<br>None are applicable.  |
| PO 31.2<br>Water discharged from a development site is of a physical, chemical and biological condition equivalent to or better than its pre-developed state.  | DTS/DPF 31.2<br>None are applicable.  |
| <b>Wash-down and Waste Loading and Unloading</b>   |   |
| PO 32.1<br>Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, vessels, plant or equipment are:<br><br>(a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off<br>(b) paved with an impervious material to facilitate wastewater collection<br>(c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area<br>(d) designed to drain wastewater to either: | DTS/DPF 32.1<br>None are applicable.  |

|  |  |
|--|--|
| <ul style="list-style-type: none"> <li>(i) a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme or</li> <li>(ii) a holding tank and its subsequent removal off-site on a regular basis.</li> </ul> |  |
|--|--|

Decks

Design and Siting

| <p>PO 33.1</p> <p>Decks are designed and sited to:</p> <ul style="list-style-type: none"> <li>(a) complement the associated building form</li> <li>(b) minimise impacts on the streetscape through siting behind the building line of the principal building (unless on a significant allotment or open space)</li> <li>(c) minimise cut and fill and overall massing when viewed from adjacent land.</li> </ul> | <p>DTS/DPF 33.1</p> <p>Decks:</p> <ul style="list-style-type: none"> <li>(a) where ancillary to a dwelling:                             <ul style="list-style-type: none"> <li>(i) are not constructed, added to or altered so that any part is situated:                                     <ul style="list-style-type: none"> <li>A. in front of any part of the building line of the dwelling to which it is ancillary</li> <li>or</li> <li>B. within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)</li> </ul> </li> <li>(ii) are set back at least 900mm from side or rear allotment boundaries</li> <li>(iii) when attached to the dwelling, has a finished floor level consistent with the finished ground floor level of the dwelling</li> <li>(iv) where associated with a residential use, retains a total area of soft landscaping for the entire development site, including any common property, with a minimum dimension of 700mm in accordance with (A) or (B), whichever is less:                                     <ul style="list-style-type: none"> <li>A. a total area is determined by the following table:   <table border="1" style="width: 100%; border-collapse: collapse; margin-top: 5px;"> <thead> <tr style="background-color: #2c5e8c; color: white;"> <th style="padding: 5px;">Site area (or in the case of residential flat building or group dwelling(s), average site area) (m<sup>2</sup>)</th> <th style="padding: 5px;">Minimum percentage of site</th> </tr> </thead> <tbody> <tr> <td style="padding: 5px;">&lt;150</td> <td style="padding: 5px;">10%</td> </tr> <tr> <td style="padding: 5px;">150-200</td> <td style="padding: 5px;">15%</td> </tr> <tr> <td style="padding: 5px;">&gt;200-450</td> <td style="padding: 5px;">20%</td> </tr> <tr> <td style="padding: 5px;">&gt;450</td> <td style="padding: 5px;">25%</td> </tr> </tbody> </table> </li> <li>B. the amount of existing soft landscaping prior to the development occurring.</li> </ul> </li> </ul> </li> <li>(b) where in association with a non-residential use:                             <ul style="list-style-type: none"> <li>(i) are set back at least 2 metres from the boundary of an allotment used for residential purposes.</li> <li>(ii) are set back at least 2 metres from a public road.</li> <li>(iii) have a floor area not exceeding 25m<sup>2</sup></li> </ul> </li> <li>(c) in all cases, has a finished floor level not exceeding 1 metre above natural ground level at any point.</li> </ul> | Site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site | <150 | 10% | 150-200 | 15% | >200-450 | 20% | >450 | 25% |
|--|---|---|----------------------------|------|-----|---------|-----|----------|-----|------|-----|
| Site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> )  | Minimum percentage of site  |   |                            |      |     |         |     |          |     |      |     |

| >450   | 25%   |   |                            |      |     |         |     |          |     |      |     |
| <p>PO 33.2</p> <p>Decks are designed and sited to minimise direct overlooking of habitable rooms and private open spaces of adjoining residential uses in neighbourhood-type zones through suitable floor levels, screening and siting taking into account the slope of the subject land, existing vegetation on the subject land, and fencing.</p>  | <p>DTS/DPF 33.2</p> <p>Decks with a finished floor level/s 500mm or more above natural ground level facing side or rear boundaries shared with a residential use in a neighbourhood-type zone incorporate screening with a maximum of 25% transparency/openings, permanently fixed to the outer edge of the deck not less than 1.5 m above the finished floor level/s.</p>  |   |                            |      |     |         |     |          |     |      |     |
| <p>PO 33.3</p> <p>Decks used for outdoor dining, entertainment or other commercial uses provide carparking in accordance with the primary use of the deck.</p>   | <p>DTS/DPF 33.3</p> <p>Decks used for commercial purposes do not result in less on-site car parking for the primary use of the subject land than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.</p>   |   |                            |      |     |         |     |          |     |      |     |

**Table 1 - Private Open Space**

| Dwelling Type                 | Minimum Rate  |
|-------------------------------|---|
| Dwelling (at ground level)    | Total private open space area: <ul style="list-style-type: none"> <li>(a) Site area &lt;301m<sup>2</sup>: 24m<sup>2</sup> located behind the building line.</li> <li>(b) Site area ≥ 301m<sup>2</sup>: 60m<sup>2</sup> located behind the building line.</li> </ul> Minimum directly accessible from a living room: 16m <sup>2</sup> / with a minimum dimension 3m. |
| Dwelling (above ground level) | Studio (no separate bedroom): 4m <sup>2</sup> with a minimum dimension 1.8m   |

|  |  |
|--|--|
|  | <p>One bedroom: 8m<sup>2</sup> with a minimum dimension 2.1m</p> <p>Two bedroom dwelling: 11m<sup>2</sup> with a minimum dimension 2.4m</p> <p>Three + bedroom dwelling: 15m<sup>2</sup> with a minimum dimension 2.6m</p> |
| Cabin or caravan (permanently fixed to the ground) in a residential park or a caravan and tourist park | Total area: 16m <sup>2</sup> , which may be used as second car parking space, provided on each site intended for residential occupation.   |

## Design in Urban Areas

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | <p>Development is:</p> <ul style="list-style-type: none"> <li>(a) contextual - by considering, recognising and carefully responding to its natural surroundings or built environment and positively contributing to the character of the locality</li> <li>(b) durable - fit for purpose, adaptable and long lasting</li> <li>(c) inclusive - by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access and promoting the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors</li> <li>(d) sustainable - by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.</li> </ul> |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| All Development  |  |
| External Appearance  |  |
| <p>PO 1.1</p> <p>Buildings reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).</p>   | <p>DTS/DPF 1.1</p> <p>None are applicable.</p>   |
| <p>PO 1.2</p> <p>Where zero or minor setbacks are desirable, development provides shelter over footpaths (in the form of verandahs, awnings, canopies and the like, with adequate lighting) to positively contribute to the walkability, comfort and safety of the public realm.</p>   | <p>DTS/DPF 1.2</p> <p>None are applicable.</p>   |
| <p>PO 1.3</p> <p>Building elevations facing the primary street (other than ancillary buildings) are designed and detailed to convey purpose, identify main access points and complement the streetscape.</p>   | <p>DTS/DPF 1.3</p> <p>None are applicable.</p>   |
| <p>PO 1.4</p> <p>Plant, exhaust and intake vents and other technical equipment are integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by:</p> <ul style="list-style-type: none"> <li>(a) positioning plant and equipment discretely, in unobtrusive locations as viewed from public roads and spaces</li> <li>(b) screening rooftop plant and equipment from view</li> <li>(c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses.</li> </ul> | <p>DTS/DPF 1.4</p> <p>Development does not incorporate any structures that protrude beyond the roofline.</p> |
| <p>PO 1.5</p> <p>The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form), taking into account the form of development contemplated in the relevant zone.</p>  | <p>DTS/DPF 1.5</p> <p>None are applicable.</p>   |
| Safety   |  |

|  |  |
|--|--|
| PO 2.1   | DTS/DPF 2.1  |
| Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.   | None are applicable.   |
| PO 2.2   | DTS/DPF 2.2  |
| Development is designed to differentiate public, communal and private areas.   | None are applicable.   |
| PO 2.3   | DTS/DPF 2.3  |
| Buildings are designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.  | None are applicable.   |
| PO 2.4   | DTS/DPF 2.4  |
| Development at street level is designed to maximise opportunities for passive surveillance of the adjacent public realm.   | None are applicable.   |
| PO 2.5   | DTS/DPF 2.5  |
| Common areas and entry points of buildings (such as the foyer areas of residential buildings) and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.   | None are applicable.   |
| <b>Landscaping</b>   |  |
| PO 3.1   | DTS/DPF 3.1  |
| Soft landscaping and tree planting are incorporated to: <ul style="list-style-type: none"> <li>(a) minimise heat absorption and reflection</li> <li>(b) maximise shade and shelter</li> <li>(c) maximise stormwater infiltration</li> <li>(d) enhance the appearance of land and streetscapes.</li> </ul>  | None are applicable.   |
| <b>Environmental Performance</b>   |  |
| PO 4.1   | DTS/DPF 4.1  |
| Buildings are sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces.  | None are applicable.   |
| PO 4.2   | DTS/DPF 4.2  |
| Buildings are sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling.  | None are applicable.   |
| PO 4.3   | DTS/DPF 4.3  |
| Buildings incorporate climate responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells.  | None are applicable.   |
| <b>Water Sensitive Design</b>  |  |
| PO 5.1   | DTS/DPF 5.1  |
| Development is sited and designed to maintain natural hydrological systems without negatively impacting: <ul style="list-style-type: none"> <li>(a) the quantity and quality of surface water and groundwater</li> <li>(b) the depth and directional flow of surface water and groundwater</li> <li>(c) the quality and function of natural springs.</li> </ul>  | None are applicable.   |
| <b>On-site Waste Treatment Systems</b>   |  |
| PO 6.1   | DTS/DPF 6.1  |
| Dedicated on-site effluent disposal areas do not include any areas to be used for, or could be reasonably foreseen to be used for, private open space, driveways or car parking.   | Effluent disposal drainage areas do not: <ul style="list-style-type: none"> <li>(a) encroach within an area used as private open space or result in less private open space than that specified in Design in Urban Areas Table 1 - Private Open Space</li> <li>(b) use an area also used as a driveway</li> <li>(c) encroach within an area used for on-site car parking or result in less on-site car parking than that specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.</li> </ul> |
| <b>Car parking appearance</b>  |  |
| PO 7.1   | DTS/DPF 7.1  |
| Development facing the street is designed to minimise the negative impacts of any semi-basement and undercroft car parking on streetscapes through techniques such as: <ul style="list-style-type: none"> <li>(a) limiting protrusion above finished ground level</li> <li>(b) screening through appropriate planting, fencing and mounding</li> <li>(c) limiting the width of openings and integrating them into the building structure.</li> </ul> | None are applicable.   |

|   |   |
|---|---|
| PO 7.2  | DTS/DPF 7.2   |
| Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced and the like.   | None are applicable.  |
| PO 7.3  | DTS/DPF 7.3   |
| Safe, legible, direct and accessible pedestrian connections are provided between parking areas and the development.   | None are applicable.  |
| PO 7.4  | DTS/DPF 7.4   |
| Street-level vehicle parking areas incorporate tree planting to provide shade, reduce solar heat absorption and reflection.   | Vehicle parking areas that are open to the sky and comprise 10 or more car parking spaces include a shade tree with a mature canopy of 4m diameter spaced for each 10 car parking spaces provided and a landscaped strip on any road frontage of a minimum dimension of 1m. |
| PO 7.5  | DTS/DPF 7.5   |
| Street level parking areas incorporate soft landscaping to improve visual appearance when viewed from within the site and from public places.   | Vehicle parking areas comprising 10 or more car parking spaces include soft landscaping with a minimum dimension of:<br><br>(a) 1m along all public road frontages and allotment boundaries<br>(b) 1m between double rows of car parking spaces.                            |
| PO 7.6  | DTS/DPF 7.6   |
| Vehicle parking areas and associated driveways are landscaped to provide shade and positively contribute to amenity.  | None are applicable.  |
| PO 7.7  | DTS/DPF 7.7   |
| Vehicle parking areas and access ways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with soft landscaping.   | None are applicable.  |
| <b>Earthworks and sloping land</b>  |   |
| PO 8.1  | DTS/DPF 8.1   |
| Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.  | Development does not involve any of the following:<br><br>(a) excavation exceeding a vertical height of 1m<br>(b) filling exceeding a vertical height of 1m<br>(c) a total combined excavation and filling vertical height of 2m or more.                                   |
| PO 8.2  | DTS/DPF 8.2   |
| Driveways and access tracks designed and constructed to allow safe and convenient access on sloping land.   | Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8) satisfy (a) and (b):<br><br>(a) do not have a gradient exceeding 25% (1-in-4) at any point along the driveway<br>(b) are constructed with an all-weather trafficable surface.                |
| PO 8.3  | DTS/DPF 8.3   |
| Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8):<br><br>(a) do not contribute to the instability of embankments and cuttings<br>(b) provide level transition areas for the safe movement of people and goods to and from the development<br>(c) are designed to integrate with the natural topography of the land. | None are applicable.  |
| PO 8.4  | DTS/DPF 8.4   |
| Development on sloping land (with a gradient exceeding 1 in 8) avoids the alteration of natural drainage lines and includes on site drainage systems to minimise erosion.   | None are applicable.  |
| PO 8.5  | DTS/DPF 8.5   |
| Development does not occur on land at risk of landslip or increase the potential for landslip or land surface instability.  | None are applicable.  |
| <b>Fences and walls</b>   |   |
| PO 9.1  | DTS/DPF 9.1   |
| Fences, walls and retaining walls of sufficient height maintain privacy and security without unreasonably impacting visual amenity and adjoining land's access to sunlight or the amenity of public places.   | None are applicable.  |
| PO 9.2  | DTS/DPF 9.2   |
| Landscaping is incorporated on the low side of retaining walls that are visible from public roads and public open space to minimise visual impacts.   | A vegetated landscaped strip 1m wide or more is provided against the low side of a retaining wall.  |
| <b>Overlooking / Visual Privacy (low rise buildings)</b>  |   |
| PO 10.1   | DTS/DPF 10.1  |

|   |   |
|---|---|
| <p>Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses in neighbourhood-type zones.</p>  | <p>Upper level windows facing side or rear boundaries shared with a residential use in a neighbourhood-type zone:</p> <ul style="list-style-type: none"> <li>(a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 125mm</li> <li>(b) have sill heights greater than or equal to 1.5m above finished floor level</li> <li>(c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5 m above the finished floor level.</li> </ul>   |
| <p>PO 10.2<br/>Development mitigates direct overlooking from balconies to habitable rooms and private open space of adjoining residential uses in neighbourhood type zones.</p>   | <p>DTS/DPF 10.2<br/>One of the following is satisfied:</p> <ul style="list-style-type: none"> <li>(a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve that is at least 15m wide in all places faced by the balcony or terrace<br/>or</li> <li>(b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of: <ul style="list-style-type: none"> <li>(i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land<br/>or</li> <li>(ii) 1.7m above finished floor level in all other cases</li> </ul> </li> </ul> |
| <p>Site Facilities / Waste Storage (excluding low rise residential development)</p>   |   |
| <p>PO 11.1<br/>Development provides a dedicated area for on-site collection and sorting of recyclable materials and refuse, green organic waste and wash bay facilities for the ongoing maintenance of bins that is adequate in size considering the number and nature of the activities they will serve and the frequency of collection.</p> | <p>DTS/DPF 11.1<br/>None are applicable.</p>  |
| <p>PO 11.2<br/>Communal waste storage and collection areas are located, enclosed and designed to be screened from view from the public domain, open space and dwellings.</p>  | <p>DTS/DPF 11.2<br/>None are applicable.</p>  |
| <p>PO 11.3<br/>Communal waste storage and collection areas are designed to be well ventilated and located away from habitable rooms.</p>  | <p>DTS/DPF 11.3<br/>None are applicable.</p>  |
| <p>PO 11.4<br/>Communal waste storage and collection areas are designed to allow waste and recycling collection vehicles to enter and leave the site without reversing.</p>   | <p>DTS/DPF 11.4<br/>None are applicable.</p>  |
| <p>PO 11.5<br/>For mixed use developments, non-residential waste and recycling storage areas and access provide opportunities for on-site management of food waste through composting or other waste recovery as appropriate.</p>   | <p>DTS/DPF 11.5<br/>None are applicable.</p>  |
| <p>All Development - Medium and High Rise</p>   |   |
| <p>External Appearance</p>  |   |
| <p>PO 12.1<br/>Buildings positively contribute to the character of the local area by responding to local context.</p>   | <p>DTS/DPF 12.1<br/>None are applicable.</p>  |
| <p>PO 12.2<br/>Architectural detail at street level and a mixture of materials at lower building levels near the public interface are provided to reinforce a human scale.</p>  | <p>DTS/DPF 12.2<br/>None are applicable.</p>  |
| <p>PO 12.3<br/>Buildings are designed to reduce visual mass by breaking up building elevations into distinct elements.</p>  | <p>DTS/DPF 12.3<br/>None are applicable.</p>  |
| <p>PO 12.4<br/>Boundary walls visible from public land include visually interesting treatments to break up large blank elevations.</p>  | <p>DTS/DPF 12.4<br/>None are applicable.</p>  |
| <p>PO 12.5<br/>External materials and finishes are durable and age well to minimise ongoing maintenance requirements.</p>   | <p>DTS/DPF 12.5<br/>Buildings utilise a combination of the following external materials and finishes:</p> <ul style="list-style-type: none"> <li>(a) masonry</li> <li>(b) natural stone</li> <li>(c) pre-finished materials that minimise staining, discolouring or deterioration.</li> </ul>   |
| <p>PO 12.6<br/>Street-facing building elevations are designed to provide attractive, high quality and pedestrian-friendly street frontages.</p>   | <p>DTS/DPF 12.6<br/>Building street frontages incorporate:</p> <ul style="list-style-type: none"> <li>(a) active uses such as shops or offices</li> <li>(b) prominent entry areas for multi-storey buildings (where it is a common entry)</li> <li>(c) habitable rooms of dwellings</li> <li>(d) areas of communal public realm with public art or the like, where consistent with the zone and/or subzone provisions.</li> </ul>   |

|  |  |
|--|--|
| <p>PO 12.7</p> <p>Entrances to multi-storey buildings are safe, attractive, welcoming, functional and contribute to streetscape character.</p> | <p>DTS/DPF 12.7</p> <p>Entrances to multi-storey buildings are:</p> <ul style="list-style-type: none"> <li>(a) oriented towards the street</li> <li>(b) clearly visible and easily identifiable from the street and vehicle parking areas</li> <li>(c) designed to be prominent, accentuated and a welcoming feature if there are no active or occupied ground floor uses</li> <li>(d) designed to provide shelter, a sense of personal address and transitional space around the entry</li> <li>(e) located as close as practicable to the lift and / or lobby access to minimise the need for long access corridors</li> <li>(f) designed to avoid the creation of potential areas of entrapment.</li> </ul> |
|--|--|

**Environmental**

|  |   |
|--|---|
| <p>PO 14.1</p> <p>Development minimises detrimental micro-climatic impacts on adjacent land and buildings.</p> | <p>DTS/DPF 14.1</p> <p>None are applicable.</p> |
|--|---|

|   |   |
|---|---|
| <p>PO 14.2</p> <p>Development incorporates sustainable design techniques and features such as window orientation, eaves and shading structures, water harvesting and use, green walls and roof designs that enable the provision of rain water tanks (where they are not provided elsewhere on site), green roofs and photovoltaic cells.</p> | <p>DTS/DPF 14.2</p> <p>None are applicable.</p> |
|---|---|

|  |   |
|--|---|
| <p>PO 14.3</p> <p>Development of 5 or more building levels, or 21m or more in height (as measured from natural ground level and excluding roof-mounted mechanical plant and equipment) is designed to minimise the impacts of wind through measures such as:</p> | <p>DTS/DPF 14.3</p> <p>None are applicable.</p> |
|--|---|

|   |   |
|---|---|
| <ul style="list-style-type: none"> <li>(a) a podium at the base of a tall tower and aligned with the street to deflect wind away from the street</li> <li>(b) substantial verandahs around a building to deflect downward travelling wind flows over pedestrian areas</li> <li>(c) the placement of buildings and use of setbacks to deflect the wind at ground level</li> <li>(d) avoiding tall shear elevations that create windy conditions at street level.</li> </ul>  |   |
| <b>Car Parking</b>  |   |
| <p>PO 15.1</p> <p>Multi-level vehicle parking structures are designed to contribute to active street frontages and complement neighbouring buildings.</p>   | <p>DTS/DPF 15.1</p> <p>Multi-level vehicle parking structures within buildings:</p> <ul style="list-style-type: none"> <li>(a) provide land uses such as commercial, retail or other non-car parking uses along ground floor street frontages</li> <li>(b) incorporate facade treatments in building elevations facing along major street frontages that are sufficiently enclosed and detailed to complement adjacent buildings.</li> </ul>  |
| <p>PO 15.2</p> <p>Multi-level vehicle parking structures within buildings complement the surrounding built form in terms of height, massing and scale.</p>  | <p>DTS/DPF 15.2</p> <p>None are applicable.</p>   |
| <b>Overlooking/Visual Privacy</b>   |   |
| <p>PO 16.1</p> <p>Development mitigates direct overlooking of habitable rooms and private open spaces of adjacent residential uses in neighbourhood-type zones through measures such as:</p> <ul style="list-style-type: none"> <li>(a) appropriate site layout and building orientation</li> <li>(b) off-setting the location of balconies and windows of habitable rooms or areas with those of other buildings so that views are oblique rather than direct to avoid direct line of sight</li> <li>(c) building setbacks from boundaries (including building boundary to boundary where appropriate) that interrupt views or that provide a spatial separation between balconies or windows of habitable rooms</li> <li>(d) screening devices that are integrated into the building design and have minimal negative effect on residents' or neighbours' amenity.</li> </ul> | <p>DTS/DPF 16.1</p> <p>None are applicable.</p>   |
| <b>All residential development</b>  |   |
| <b>Front elevations and passive surveillance</b>  |   |
| <p>PO 17.1</p> <p>Dwellings incorporate windows facing primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.</p>  | <p>DTS/DPF 17.1</p> <p>Each dwelling with a frontage to a public street:</p> <ul style="list-style-type: none"> <li>(a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m</li> <li>(b) has an aggregate window area of at least 2m<sup>2</sup> facing the primary street.</li> </ul>  |
| <p>PO 17.2</p> <p>Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.</p>   | <p>DTS/DPF 17.2</p> <p>Dwellings with a frontage to a public street have an entry door visible from the primary street boundary.</p>  |
| <b>Outlook and Amenity</b>  |   |
| <p>PO 18.1</p> <p>Living rooms have an external outlook to provide a high standard of amenity for occupants.</p>  | <p>DTS/DPF 18.1</p> <p>A living room of a dwelling incorporates a window with an external outlook of the street frontage, private open space, public open space, or waterfront areas.</p>   |
| <p>PO 18.2</p> <p>Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.</p>   | <p>DTS/DPF 18.2</p> <p>None are applicable.</p>   |
| <b>Ancillary Development</b>  |   |
| <p>PO 19.1</p> <p>Residential ancillary buildings are sited and designed to not detract from the streetscape or appearance of primary residential buildings on the site or neighbouring properties.</p>   | <p>DTS/DPF 19.1</p> <p>Ancillary buildings:</p> <ul style="list-style-type: none"> <li>(a) are ancillary to a dwelling erected on the same site</li> <li>(b) have a floor area not exceeding 60m<sup>2</sup></li> <li>(c) are not constructed, added to or altered so that any part is situated: <ul style="list-style-type: none"> <li>(i) in front of any part of the building line of the dwelling to which it is ancillary or</li> <li>(ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)</li> </ul> </li> <li>(d) in the case of a garage or carport, the garage or carport: <ul style="list-style-type: none"> <li>(i) is set back at least 5.5m from the boundary of the primary street</li> <li>(ii) when facing a primary street or secondary street, has a total door / opening not exceeding: <ul style="list-style-type: none"> <li>A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser</li> </ul> </li> </ul> </li> </ul> |

B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width

- (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  - (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and
  - (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary
- (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure
- (h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)
- (i) have a roof height where no part of the roof is more than 5m above the natural ground level
- (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour
- (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:
  - (i) a total area as determined by the following table:

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m <sup>2</sup> ) | Minimum percentage of site |
|--|----------------------------|
| <150   | 10%                        |
| 150-200  | 15%                        |
| 201-450  | 20%                        |
| >450   | 25%                        |

- (ii) the amount of existing soft landscaping prior to the development occurring.
- (l) in relation to ancillary accommodation in the Rural Zone, Productive Rural Landscape Zone, or Rural Horticulture Zone, is located within 20m of an existing dwelling.

PO 19.2  
Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

DTS/DPF 19.2  
Ancillary buildings and structures do not result in:

- (a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space
- (b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

PO 19.3  
Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.

DTS/DPF 19.3  
The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:

- (a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment or
- (b) located at least 12m from the nearest habitable room located on an adjoining allotment.

PO 19.4  
Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.

DTS/DPF 19.4  
Non-residential ancillary buildings and structures:

- (a) are ancillary and subordinate to an existing non-residential use on the same site
- (b) have a floor area not exceeding the following:
 

| Allotment size     | Floor area       |
|--------------------|------------------|
| ≤500m <sup>2</sup> | 60m <sup>2</sup> |
| >500m <sup>2</sup> | 80m <sup>2</sup> |
- (c) are not constructed, added to or altered so that any part is situated:
  - (i) in front of any part of the building line of the main building to which it is ancillary or
  - (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
- (d) in the case of a garage or carport, the garage or carport:
  - (i) is set back at least 5.5m from the boundary of the primary street
- (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:

|  |  |

| >450     | 25% |

(b) at least 30% of any land between the primary street boundary and the primary building line.

Car parking, access and manoeuvrability

|  |  |
|--|--|
| <p>PO 23.1</p> <p>Enclosed car parking spaces are of dimensions to be functional, accessible and convenient.</p>   | <p>DTS/DPF 23.1</p> <p>Residential car parking spaces enclosed by fencing, walls or other structures have the following internal dimensions (separate from any waste storage area):</p> <ul style="list-style-type: none"> <li>(a) single width car parking spaces: <ul style="list-style-type: none"> <li>(i) a minimum length of 5.4m per space</li> <li>(ii) a minimum width of 3.0m</li> <li>(iii) a minimum garage door width of 2.4m</li> </ul> </li> <li>(b) double width car parking spaces (side by side): <ul style="list-style-type: none"> <li>(i) a minimum length of 5.4m</li> <li>(ii) a minimum width of 5.4m</li> <li>(iii) minimum garage door width of 2.4m per space.</li> </ul> </li> </ul>   |
| <p>PO 23.2</p> <p>Uncovered car parking space are of dimensions to be functional, accessible and convenient.</p>   | <p>DTS/DPF 23.2</p> <p>Uncovered car parking spaces have:</p> <ul style="list-style-type: none"> <li>(a) a minimum length of 5.4m</li> <li>(b) a minimum width of 2.4m</li> <li>(c) a minimum width between the centre line of the space and any fence, wall or other obstruction of 1.5m.</li> </ul>  |
| <p>PO 23.3</p> <p>Driveways and access points are located and designed to facilitate safe access and egress while maximising land available for street tree planting, pedestrian movement, domestic waste collection, landscaped street frontages and on-street parking.</p> | <p>DTS/DPF 23.3</p> <p>Driveways and access points satisfy (a) or (b):</p> <ul style="list-style-type: none"> <li>(a) sites with a frontage to a public road of 10m or less, have a width between 3.0 and 3.2 metres measured at the property boundary and are the only access point provided on the site</li> <li>(b) sites with a frontage to a public road greater than 10m: <ul style="list-style-type: none"> <li>(i) have a maximum width of 5m measured at the property boundary and are the only access point provided on the site;</li> <li>(ii) have a width between 3.0 metres and 3.2 metres measured at the property boundary and no more than two access points are provided on site, separated by no less than 1m.</li> </ul> </li> </ul>   |
| <p>PO 23.4</p> <p>Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.</p>   | <p>DTS/DPF 23.4</p> <p>Vehicle access to designated car parking spaces satisfy (a) or (b):</p> <ul style="list-style-type: none"> <li>(a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land</li> <li>(b) where newly proposed, is set back: <ul style="list-style-type: none"> <li>(i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner</li> <li>(ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance</li> <li>(iii) 6m or more from the tangent point of an intersection of 2 or more roads</li> <li>(iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing.</li> </ul> </li> </ul> |
| <p>PO 23.5</p> <p>Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.</p>   | <p>DTS/DPF 23.5</p> <p>Driveways are designed and sited so that:</p> <ul style="list-style-type: none"> <li>(a) the gradient of the driveway does not exceed a grade of 1 in 4 and includes transitions to ensure a maximum grade change of 12.5% (1 in 8) for summit changes, and 15% (1 in 6.7) for sag changes, in accordance with AS 2890.1:2004 to prevent vehicles bottoming or scraping</li> <li>(b) the centreline of the driveway has an angle of no less than 70 degrees and no more than 110 degrees from the street boundary to which it takes its access as shown in the following diagram:</li> </ul>  |

(c) if located to provide access from an alley, lane or right of way - the alley, land or right of way is at least 6.2m wide along the boundary of the allotment / site.

PO 23.6  
Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.

DTS/DPF 23.6  
Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:

- (a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number)
- (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly
- (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.

Waste storage

PO 24.1  
Provision is made for the convenient storage of waste bins in a location screened from public view.

DTS/DPF 24.1  
Where dwellings abut both side boundaries a waste bin storage area is provided behind the building line of each dwelling that:

- (a) has a minimum area of 2m<sup>2</sup> with a minimum dimension of 900mm (separate from any designated car parking spaces or private open space); and
- (b) has a continuous unobstructed path of travel (excluding moveable objects like gates, vehicles and roller doors) with a minimum width of 800mm between the waste bin storage area and the street.

Design of Transportable Buildings

PO 25.1  
The sub-floor space beneath transportable buildings is enclosed to give the appearance of a permanent structure.

DTS/DPF 25.1  
Buildings satisfy (a) or (b):

- (a) are not transportable
- (b) the sub-floor space between the building and ground level is clad in a material and finish consistent with the building.

Residential Development - Medium and High Rise (including serviced apartments)

Outlook and Visual Privacy

PO 26.1  
Ground level dwellings have a satisfactory short range visual outlook to public, communal or private open space.

DTS/DPF 26.1  
Buildings:

- (a) provide a habitable room at ground or first level with a window facing toward the street
- (b) limit the height / extent of solid walls or fences facing the street to 1.2m high above the footpath level or, where higher, to 50% of the site frontage.

PO 26.2  
The visual privacy of ground level dwellings within multi-level buildings is protected.

DTS/DPF 26.2  
The finished floor level of ground level dwellings in multi-storey developments is raised by up to 4925mm

|   |   |

| 3+ bedrooms  | 80m <sup>2</sup> and any dwelling over 3 bedrooms provides an additional 15m <sup>2</sup> for every additional bedroom   |                    |                             |        |                  |           |                  |           |                  |             |  |
| <p>PO 31.2</p> <p>The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.</p>                               | <p>DTS/DPF 31.2</p> <p>None are applicable.</p>  |                    |                             |        |                  |           |                  |           |                  |             |  |
| <p>PO 31.3</p> <p>Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented towards adjoining properties.</p> | <p>DTS/DPF 31.3</p> <p>None are applicable.</p>  |                    |                             |        |                  |           |                  |           |                  |             |  |
| <p>PO 31.4</p> <p>Battle-axe development is appropriately sited and designed to respond to the existing neighbourhood context.</p>   | <p>DTS/DPF 31.4</p> <p>Dwelling sites/allotments are not in the form of a battle-axe arrangement.</p>  |                    |                             |        |                  |           |                  |           |                  |             |  |

Communal Open Space

|  |  |
|--|--|
| <p>PO 32.1</p> <p>Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.</p>   | <p>DTS/DPF 32.1</p> <p>None are applicable.</p>  |
| <p>PO 32.2</p> <p>Communal open space is of sufficient size and dimensions to cater for group recreation.</p>  | <p>DTS/DPF 32.2</p> <p>Communal open space incorporates a minimum dimension of 5 metres.</p> |
| <p>PO 32.3</p> <p>Communal open space is designed and sited to:</p> <ul style="list-style-type: none"> <li>(a) be conveniently accessed by the dwellings which it services</li> <li>(b) have regard to acoustic, safety, security and wind effects.</li> </ul>   | <p>DTS/DPF 32.3</p> <p>None are applicable.</p>  |
| <p>PO 32.4</p> <p>Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.</p>  | <p>DTS/DPF 32.4</p> <p>None are applicable.</p>  |
| <p>PO 32.5</p> <p>Communal open space is designed and sited to:</p> <ul style="list-style-type: none"> <li>(a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings</li> <li>(b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.</li> </ul> | <p>DTS/DPF 32.5</p> <p>None are applicable.</p>  |

Car parking, access and manoeuvrability

|   |   |
|---|---|
| <p>PO 33.1</p> <p>Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.</p>  | <p>DTS/DPF 33.1</p> <p>Where on-street parking is available directly adjacent the site, on-street parking is retained adjacent the subject site in accordance with the following requirements:</p> <ul style="list-style-type: none"> <li>(a) minimum 0.33 on-street car parks per proposed dwelling (rounded up to the nearest whole number)</li> <li>(b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly</li> <li>(c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.</li> </ul> |
| <p>PO 33.2</p> <p>The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.</p> | <p>DTS/DPF 33.2</p> <p>Access to group dwellings or dwellings within a residential flat building is provided via a single common driveway.</p>  |
| <p>PO 33.3</p>  | <p>DTS/DPF 33.3</p>   |

|   |   |
|---|---|
| Residential driveways that service more than one dwelling are designed to allow safe and convenient movement.   | <p>Driveways that service more than 1 dwelling or a dwelling on a battle-axe site:</p> <ul style="list-style-type: none"> <li>(a) have a minimum width of 3m</li> <li>(b) for driveways servicing more than 3 dwellings: <ul style="list-style-type: none"> <li>(i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street</li> <li>(ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m.</li> </ul> </li> </ul> |
| <p>PO 33.4</p> <p>Residential driveways that service more than one dwelling or a dwelling on a battle-axe site are designed to allow passenger vehicles to enter and exit and manoeuvre within the site in a safe and convenient manner.</p>  | <p>DTS/DPF 33.4</p> <p>Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre.</p>  |
| <p>PO 33.5</p> <p>Dwellings are adequately separated from common driveways and manoeuvring areas.</p>   | <p>DTS/DPF 33.5</p> <p>Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles.</p>   |
| <b>Soft landscaping</b>   |   |
| <p>PO 34.1</p> <p>Soft landscaping is provided between dwellings and common driveways to improve the outlook for occupants and appearance of common areas.</p>  | <p>DTS/DPF 34.1</p> <p>Other than where located directly in front of a garage or building entry, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.</p>  |
| <p>PO 34.2</p> <p>Battle-axe or common driveways incorporate landscaping and permeability to improve appearance and assist in stormwater management.</p>  | <p>DTS/DPF 34.2</p> <p>Battle-axe or common driveways satisfy (a) and (b):</p> <ul style="list-style-type: none"> <li>(a) are constructed of a minimum of 50% permeable or porous material</li> <li>(b) where the driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point).</li> </ul>  |
| <b>Site Facilities / Waste Storage</b>  |   |
| <p>PO 35.1</p> <p>Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.</p>  | <p>DTS/DPF 35.1</p> <p>None are applicable.</p>   |
| <p>PO 35.2</p> <p>Provision is made for suitable external clothes drying facilities.</p>  | <p>DTS/DPF 35.2</p> <p>None are applicable.</p>   |
| <p>PO 35.3</p> <p>Provision is made for suitable household waste and recyclable material storage facilities which are:</p> <ul style="list-style-type: none"> <li>(a) located away, or screened, from public view, and</li> <li>(b) conveniently located in proximity to dwellings and the waste collection point.</li> </ul> | <p>DTS/DPF 35.3</p> <p>None are applicable.</p>   |
| <p>PO 35.4</p> <p>Waste and recyclable material storage areas are located away from dwellings.</p>  | <p>DTS/DPF 35.4</p> <p>Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.</p>  |
| <p>PO 35.5</p> <p>Where waste bins cannot be conveniently collected from the street, provision is made for on-site waste collection, designed to accommodate the safe and convenient access, egress and movement of waste collection vehicles.</p>  | <p>DTS/DPF 35.5</p> <p>None are applicable.</p>   |
| <p>PO 35.6</p> <p>Services including gas and water meters are conveniently located and screened from public view.</p>   | <p>DTS/DPF 35.6</p> <p>None are applicable.</p>   |
| <b>Water sensitive urban design</b>   |   |
| <p>PO 36.1</p> <p>Residential development creating a common driveway / access includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.</p>          | <p>DTS/DPF 36.1</p> <p>None are applicable.</p>   |
| <p>PO 36.2</p> <p>Residential development creating a common driveway / access includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.</p>      | <p>DTS/DPF 36.2</p> <p>None are applicable.</p>   |

| Siting, Configuration and Design  |  |
|---|--|
| <p>PO 37.1</p> <p>Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land.</p>   | <p>DTS/DPF 37.1</p> <p>None are applicable.</p>  |
| <p>PO 37.2</p> <p>Universal design features are incorporated to provide options for people living with disabilities or limited mobility and / or to facilitate ageing in place.</p>   | <p>DTS/DPF 37.2</p> <p>None are applicable.</p>  |
| Movement and Access   |  |
| <p>PO 38.1</p> <p>Development is designed to support safe and convenient access and movement for residents by providing:</p> <ul style="list-style-type: none"> <li>(a) ground-level access or lifted access to all units</li> <li>(b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places</li> <li>(c) car parks with gradients no steeper than 1-in-40, and of sufficient area to provide for wheelchair manoeuvrability</li> <li>(d) kerb ramps at pedestrian crossing points.</li> </ul> | <p>DTS/DPF 38.1</p> <p>None are applicable.</p>  |
| Communal Open Space   |  |
| <p>PO 39.1</p> <p>Development is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors.</p>   | <p>DTS/DPF 39.1</p> <p>None are applicable.</p>  |
| <p>PO 39.2</p> <p>Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.</p>  | <p>DTS/DPF 39.2</p> <p>None are applicable.</p>  |
| <p>PO 39.3</p> <p>Communal open space is of sufficient size and dimensions to cater for group recreation.</p>   | <p>DTS/DPF 39.3</p> <p>Communal open space incorporates a minimum dimension of 5 metres.</p>   |
| <p>PO 39.4</p> <p>Communal open space is designed and sited to:</p> <ul style="list-style-type: none"> <li>(a) be conveniently accessed by the dwellings which it services</li> <li>(b) have regard to acoustic, safety, security and wind effects.</li> </ul>  | <p>DTS/DPF 39.4</p> <p>None are applicable.</p>  |
| <p>PO 39.5</p> <p>Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.</p>   | <p>DTS/DPF 39.5</p> <p>None are applicable.</p>  |
| <p>PO 39.6</p> <p>Communal open space is designed and sited to:</p> <ul style="list-style-type: none"> <li>(a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings</li> <li>(b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.</li> </ul>  | <p>DTS/DPF 39.6</p> <p>None are applicable.</p>  |
| Site Facilities / Waste Storage   |  |
| <p>PO 40.1</p> <p>Development is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric-powered vehicles.</p>  | <p>DTS/DPF 40.1</p> <p>None are applicable.</p>  |
| <p>PO 40.2</p> <p>Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.</p>  | <p>DTS/DPF 40.2</p> <p>None are applicable.</p>  |
| <p>PO 40.3</p> <p>Provision is made for suitable external clothes drying facilities.</p>  | <p>DTS/DPF 40.3</p> <p>None are applicable.</p>  |
| <p>PO 40.4</p> <p>Provision is made for suitable household waste and recyclable material storage facilities conveniently located away, or screened, from view.</p>  | <p>DTS/DPF 40.4</p> <p>None are applicable.</p>  |
| <p>PO 40.5</p> <p>Waste and recyclable material storage areas are located away from dwellings.</p>  | <p>DTS/DPF 40.5</p> <p>Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.</p> |
| <p>PO 40.6</p> <p>Provision is made for on-site waste collection where 10 or more bins are to be collected at</p>   | <p>DTS/DPF 40.6</p> <p>None are applicable.</p>  |

|  |  |

| Dwelling Type   | Dwelling / Site Configuration | Minimum Rate   |
|---|-------------------------------|--|
| Dwelling (at ground level, other than a residential flat building that includes above ground dwellings) |                               | <p>Total private open space area:</p> <ul style="list-style-type: none"> <li>(a) Site area &lt;301m<sup>2</sup>: 24m<sup>2</sup> located behind the building line.</li> <li>(b) Site area ≥ 301m<sup>2</sup>: 60m<sup>2</sup> located behind the building line.</li> </ul> <p>Minimum directly accessible from a living room: 16m<sup>2</sup> / with a minimum dimension 3m.</p> |

|  |                               |  |
|--|-------------------------------|--|
| Cabin or caravan (permanently fixed to the ground) in a residential park or caravan and tourist park         |                               | Total area: 16m <sup>2</sup> , which may be uses as second car parking space, provided on each site intended for residential occupation. |
| Dwelling in a residential flat building or mixed use building which incorporate above ground level dwellings | Dwellings at ground level:    | 15m <sup>2</sup> / minimum dimension 3m  |
|  | Dwellings above ground level: |  |
|  | Studio (no separate bedroom)  | 4m <sup>2</sup> / minimum dimension 1.8m   |
|  | One bedroom dwelling          | 8m <sup>2</sup> / minimum dimension 2.1m   |
|  | Two bedroom dwelling          | 11m <sup>2</sup> / minimum dimension 2.4m  |
|  | Three + bedroom dwelling      | 15 m <sup>2</sup> / minimum dimension 2.6m   |

## Forestry

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Commercial forestry is designed and sited to maximise economic benefits whilst managing potential negative impacts on the environment, transport networks, surrounding land uses and landscapes. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| Siting   |   |
| PO 1.1<br>Commercial forestry plantations are established where there is no detrimental effect on the physical environment or scenic quality of the rural landscape.   | DTS/DPF 1.1<br>None are applicable.   |
| PO 1.2<br>Commercial forestry plantations are established on slopes that are stable to minimise the risk of soil erosion.  | DTS/DPF 1.2<br>Commercial forestry plantations are not located on land with a slope exceeding 20% (1-in-5).   |
| PO 1.3<br>Commercial forestry plantations and operations associated with their establishment, management and harvesting are appropriately set back from any sensitive receiver to minimise fire risk and noise disturbance.                | DTS/DPF 1.3<br>Commercial forestry plantations and operations associated with their establishment, management and harvesting are set back 50m or more from any sensitive receiver.  |
| Water Protection   |   |
| PO 2.1<br>Commercial forestry plantations incorporate artificial drainage lines (i.e. culverts, runoffs and constructed drains) integrated with natural drainage lines to minimise concentrated water flows onto or from plantation areas. | DTS/DPF 2.1<br>None are applicable.   |
| PO 2.2<br>Appropriate siting, layout and design measures are adopted to minimise the impact of commercial forestry plantations on surface water resources.   | DTS/DPF 2.2<br>Commercial forestry plantations:<br>(a) do not involve cultivation (excluding spot cultivation) in drainage lines<br>(b) are set back 20m or more from the banks of any major watercourse (a third order or higher watercourse), lake, reservoir, wetland or sinkhole (with direct connection to an aquifer)<br>(c) are set back 10m or more from the banks of any first or second order watercourse or sinkhole ( with no direct connection to an aquifer). |
| Fire Management  |   |
| PO 3.1   | DTS/DPF 3.1   |

|  |  |
|--|--|
| <p>Commercial forestry plantations incorporate appropriate firebreaks and fire management design elements.</p> | <p>Commercial forestry plantations provide:</p> <ul style="list-style-type: none"> <li>(a) 7m or more wide external boundary firebreaks for plantations of 40ha or less</li> <li>(b) 10m or more wide external boundary firebreaks for plantations of between 40ha and 100ha</li> <li>(c) 20m or more wide external boundary firebreaks, or 10m with an additional 10m or more of fuel-reduced plantation, for plantations of 100ha or greater.</li> </ul> <p>Note: Firebreaks prescribed above (as well as access tracks) may be included within the setback buffer distances prescribed by other policies of the Code.</p> |
| <p>PO 3.2<br/>Commercial forestry plantations incorporate appropriate fire management access tracks.</p>       | <p>DTS/DPF 3.2<br/>Commercial forestry plantation fire management access tracks:</p> <ul style="list-style-type: none"> <li>(a) are incorporated within all firebreaks</li> <li>(b) are 7m or more wide with a vertical clearance of 4m or more</li> <li>(c) are aligned to provide straight through access at junctions, or if they are a no through access track are appropriately signposted and provide suitable turnaround areas for fire-fighting vehicles</li> <li>(d) partition the plantation into units of 40ha or less in area.</li> </ul>  |

Power-line Clearances

| <p>PO 4.1<br/>Commercial forestry plantations achieve and maintain appropriate clearances from aboveground powerlines.</p> | <p>DTS/DPF 4.1<br/>Commercial forestry plantations incorporating trees with an expected mature height of greater than 6m meet the clearance requirements listed in the following table:</p> <table border="1" data-bbox="801 772 1557 1272"> <thead> <tr> <th>Voltage of transmission line</th> <th>Tower or Pole</th> <th>Minimum horizontal clearance distance between plantings and transmission lines</th> </tr> </thead> <tbody> <tr> <td>500 kV</td> <td>Tower</td> <td>38m</td> </tr> <tr> <td>275 kV</td> <td>Tower</td> <td>25m</td> </tr> <tr> <td>132 kV</td> <td>Tower</td> <td>30m</td> </tr> <tr> <td>132 kV</td> <td>Pole</td> <td>20m</td> </tr> <tr> <td>66 kV</td> <td>Pole</td> <td>20m</td> </tr> <tr> <td>Less than 66 kV</td> <td>Pole</td> <td>20m</td> </tr> </tbody> </table> | Voltage of transmission line   | Tower or Pole | Minimum horizontal clearance distance between plantings and transmission lines | 500 kV | Tower | 38m | 275 kV | Tower | 25m | 132 kV | Tower | 30m | 132 kV | Pole | 20m | 66 kV | Pole | 20m | Less than 66 kV | Pole | 20m |
|--|--|--|---------------|--|--------|-------|-----|--------|-------|-----|--------|-------|-----|--------|------|-----|-------|------|-----|-----------------|------|-----|
| Voltage of transmission line   | Tower or Pole  | Minimum horizontal clearance distance between plantings and transmission lines |               |  |        |       |     |        |       |     |        |       |     |        |      |     |       |      |     |                 |      |     |
| 500 kV   | Tower  | 38m  |               |  |        |       |     |        |       |     |        |       |     |        |      |     |       |      |     |                 |      |     |
| 275 kV   | Tower  | 25m  |               |  |        |       |     |        |       |     |        |       |     |        |      |     |       |      |     |                 |      |     |
| 132 kV   | Tower  | 30m  |               |  |        |       |     |        |       |     |        |       |     |        |      |     |       |      |     |                 |      |     |
| 132 kV   | Pole   | 20m  |               |  |        |       |     |        |       |     |        |       |     |        |      |     |       |      |     |                 |      |     |
| 66 kV  | Pole   | 20m  |               |  |        |       |     |        |       |     |        |       |     |        |      |     |       |      |     |                 |      |     |
| Less than 66 kV  | Pole   | 20m  |               |  |        |       |     |        |       |     |        |       |     |        |      |     |       |      |     |                 |      |     |

## Housing Renewal

### Assessment Provisions (AP)

The Housing Renewal General Development Policies are only applicable to dwellings or residential flat building undertaken by:

- (a) the South Australian Housing Trust either individually or jointly with other persons or bodies or
- (b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Renewed residential environments replace older social housing and provide new social housing infrastructure and other housing options and tenures to enhance the residential amenity of the local area. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature        |
|--|--|
| Land Use and Intensity   |  |
| PO 1.1<br>Residential development provides a range of housing choices. | DTS/DPF 1.1<br>Development comprises one or more of the following: |

|   |   |
|---|---|
|   | <ul style="list-style-type: none"> <li>(a) detached dwellings</li> <li>(b) semi-detached dwellings</li> <li>(c) row dwellings</li> <li>(d) group dwellings</li> <li>(e) residential flat buildings.</li> </ul>  |
| PO 1.2<br>Medium-density housing options or higher are located in close proximity to public transit, open space and/or activity centres.  | DTS/DPF 1.2<br>None are applicable.   |
| Building Height   |   |
| PO 2.1<br>Buildings generally do not exceed 3 building levels unless in locations close to public transport, centres and/or open space.   | DTS/DPF 2.1<br>Building height (excluding garages, carports and outbuildings) does not exceed 3 building levels and 12m and wall height does not exceed 9m (not including a gable end).   |
| PO 2.2<br>Medium or high rise residential flat buildings located within or at the interface with zones which restrict heights to a maximum of 2 building levels transition down in scale and height towards the boundary of that zone, other than where it is a street boundary.                                  | DTS/DPF 2.2<br>None are applicable.   |
| Primary Street Setback  |   |
| PO 3.1<br>Buildings are set back from the primary street boundary to contribute to an attractive streetscape character.   | DTS/DPF 3.1<br>Buildings are no closer to the primary street (excluding any balcony, verandah, porch, awning or similar structure) than 3m.   |
| Secondary Street Setback  |   |
| PO 4.1<br>Buildings are set back from secondary street boundaries to maintain separation between building walls and public streets and contribute to a suburban streetscape character.  | DTS/DPF 4.1<br>Buildings are set back at least 900mm from the boundary of the allotment with a secondary street frontage.   |
| Boundary Walls  |   |
| PO 5.1<br>Boundary walls are limited in height and length to manage visual impacts and access to natural light and ventilation.   | DTS/DPF 5.1<br>Except where the dwelling is located on a central site within a row dwelling or terrace arrangement, dwellings with side boundary walls are sited on only one side boundary and satisfy (a) or (b):<br><br><ul style="list-style-type: none"> <li>(a) adjoin or abut a boundary wall of a building on adjoining land for the same length and height</li> <li>(b) do not: <ul style="list-style-type: none"> <li>(i) exceed 3.2m in height from the lower of the natural or finished ground level</li> <li>(ii) exceed 11.5m in length</li> <li>(iii) when combined with other walls on the boundary of the subject development site, a maximum 45% of the length of the boundary</li> <li>(iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land.</li> </ul> </li> </ul> |
| PO 5.2<br>Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.   | DTS/DPF 5.2<br>Dwellings in a semi-detached or row arrangement are set back 900mm or more from side boundaries shared with allotments outside the development site, except for a carport or garage.   |
| Side Boundary Setback   |   |
| PO 6.1<br>Buildings are set back from side boundaries to provide:<br><br><ul style="list-style-type: none"> <li>(a) separation between dwellings in a way that contributes to a suburban character</li> <li>(b) access to natural light and ventilation for neighbours.</li> </ul>                                | DTS/DPF 6.1<br>Other than walls located on a side boundary, buildings are set back from side boundaries in accordance with the following:<br><br><ul style="list-style-type: none"> <li>(a) where the wall height does not exceed 3m - at least 900mm</li> <li>(b) for a wall that is not south facing and the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings</li> <li>(c) for a wall that is south facing and the wall height exceeds 3m - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings.</li> </ul>  |
| Rear Boundary Setback   |   |
| PO 7.1<br>Buildings are set back from rear boundaries to provide:<br><br><ul style="list-style-type: none"> <li>(a) separation between dwellings in a way that contributes to a suburban character</li> <li>(b) access to natural light and ventilation for neighbours</li> <li>(c) private open space</li> </ul> | DTS/DPF 7.1<br>Dwellings are set back from the rear boundary:<br><br><ul style="list-style-type: none"> <li>(a) 3m or more for the first building level</li> <li>(b) 5m or more for any subsequent building level.</li> </ul>   |

| (d) space for landscaping and vegetation.  |   |  |                               |              |                            |  |  |                               |        |  |  |                      |  |  |                      |   |
|--|---|--|-------------------------------|--------------|----------------------------|--|--|-------------------------------|--------|--|--|----------------------|--|--|----------------------|---|
| Buildings elevation design   |   |  |                               |              |                            |  |  |                               |        |  |  |                      |  |  |                      |   |
| <p>PO 8.1</p> <p>Dwelling elevations facing public streets and common driveways make a positive contribution to the streetscape and common driveway areas.</p>   | <p>DTS/DPF 8.1</p> <p>Each dwelling includes at least 3 of the following design features within the building elevation facing a primary street, and at least 2 of the following design features within the building elevation facing any other public road (other than a laneway) or a common driveway:</p> <ul style="list-style-type: none"> <li>(a) a minimum of 30% of the building elevation is set back an additional 300mm from the building line</li> <li>(b) a porch or portico projects at least 1m from the building elevation</li> <li>(c) a balcony projects from the building elevation</li> <li>(d) a verandah projects at least 1m from the building elevation</li> <li>(e) eaves of a minimum 400mm width extend along the width of the front elevation</li> <li>(f) a minimum 30% of the width of the upper level projects forward from the lower level primary building line by at least 300mm.</li> <li>(g) a minimum of two different materials or finishes are incorporated on the walls of the building elevation, with a maximum of 80% of the building elevation in a single material or finish.</li> </ul>  |  |                               |              |                            |  |  |                               |        |  |  |                      |  |  |                      |   |
| <p>PO 8.2</p> <p>Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.</p>   | <p>DTS/DPF 8.2</p> <p>Each dwelling with a frontage to a public street:</p> <ul style="list-style-type: none"> <li>(a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m</li> <li>(b) has an aggregate window area of at least 2m<sup>2</sup> facing the primary street</li> </ul>  |  |                               |              |                            |  |  |                               |        |  |  |                      |  |  |                      |   |
| <p>PO 8.3</p> <p>The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets.</p>   | <p>DTS/DPF 8.3</p> <p>None are applicable.</p>  |  |                               |              |                            |  |  |                               |        |  |  |                      |  |  |                      |   |
| <p>PO 8.4</p> <p>Built form considers local context and provides a quality design response through scale, massing, materials, colours and architectural expression.</p>  | <p>DTS/DPF 8.4</p> <p>None are applicable.</p>  |  |                               |              |                            |  |  |                               |        |  |  |                      |  |  |                      |   |
| <p>PO 8.5</p> <p>Entrances to multi-storey buildings are:</p> <ul style="list-style-type: none"> <li>(a) oriented towards the street</li> <li>(b) visible and easily identifiable from the street</li> <li>(c) designed to include a common mail box structure.</li> </ul> | <p>DTS/DPF 8.5</p> <p>None are applicable.</p>  |  |                               |              |                            |  |  |                               |        |  |  |                      |  |  |                      |   |
| Outlook and amenity  |   |  |                               |              |                            |  |  |                               |        |  |  |                      |  |  |                      |   |
| <p>PO 9.1</p> <p>Living rooms have an external outlook to provide a high standard of amenity for occupants.</p>  | <p>DTS/DPF 9.1</p> <p>A living room of a dwelling incorporates a window with an external outlook towards the street frontage or private open space.</p>   |  |                               |              |                            |  |  |                               |        |  |  |                      |  |  |                      |   |

| <p>PO 17.3</p> <p>Driveways are designed to enable safe and convenient vehicle movements from the public</p>   | <p>DTS/DPF 17.3</p> <p>Driveways are designed and sited so that:</p>   |

road to on-site parking spaces.

- (a) the gradient of the driveway does not exceed a grade of 1 in 4 and includes transitions to ensure a maximum grade change of 12.5% (1 in 8) for summit changes, and 15% (1 in 6.7) for sag changes, in accordance with AS 2890.1:2004 to prevent vehicles bottoming or scraping
- (b) the centreline of the driveway has an angle of no less than 70 degrees and no more than 110 degrees from the street boundary to which it takes its access as shown in the following diagram:

- (c) if located to provide access from an alley, lane or right of way - the alley, land or right of way is at least 6.2m wide along the boundary of the allotment / site.

PO 17.4  
Driveways and access points are designed and distributed to optimise the provision of on-street parking.

DTS/DPF 17.4  
Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:

- (a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number)
- (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly
- (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.

PO 17.5  
Residential driveways that service more than one dwelling of a dimension to allow safe and convenient movement.

DTS/DPF 17.5  
Driveways that service more than 1 dwelling or a dwelling on a battle-axe site:

- (a) have a minimum width of 3m
- (b) for driveways servicing more than 3 dwellings:
  - (i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street
  - (ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m.

PO 17.6  
Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site and manoeuvre within the site in a safe and convenient manner.

DTS/DPF 17.6  
Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre

PO 17.7  
Dwellings are adequately separated from common driveways and manoeuvring areas.

DTS/DPF 17.7  
Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles.

Storage

PO 18.1  
Dwellings are provided with sufficient and accessible space for storage to meet likely occupant needs.

DTS/DPF 18.1  
Dwellings are provided with storage at the following rates and 50% or more of the storage volume is provided within the dwelling:

- (a) studio: not less than 6m<sup>3</sup>

|  |   |
|--|---|
|  | <ul style="list-style-type: none"> <li>(b) 1 bedroom dwelling / apartment: not less than 8m<sup>3</sup></li> <li>(c) 2 bedroom dwelling / apartment: not less than 10m<sup>3</sup></li> <li>(d) 3+ bedroom dwelling / apartment: not less than 12m<sup>3</sup>.</li> </ul>  |
| Earthworks   |   |
| <p>PO 19.1</p> <p>Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.</p> | <p>DTS/DPF 19.1</p> <p>The development does not involve:</p> <ul style="list-style-type: none"> <li>(a) excavation exceeding a vertical height of 1m<br/>or</li> <li>(b) filling exceeding a vertical height of 1m<br/>or</li> <li>(c) a total combined excavation and filling vertical height exceeding 2m.</li> </ul>   |
| Service connections and infrastructure   |   |
| <p>PO 20.1</p> <p>Dwellings are provided with appropriate service connections and infrastructure.</p>  | <p>DTS/DPF 20.1</p> <p>The site and building:</p> <ul style="list-style-type: none"> <li>(a) have the ability to be connected to a permanent potable water supply</li> <li>(b) have the ability to be connected to a sewerage system, or a wastewater system approved under the <i>South Australian Public Health Act 2011</i></li> <li>(c) have the ability to be connected to electricity supply</li> <li>(d) have the ability to be connected to an adequate water supply (and pressure) for fire-fighting purposes</li> <li>(e) would not be contrary to the Regulations prescribed for the purposes of Section 86 of the <i>Electricity Act 1996</i>.</li> </ul>   |
| Site contamination   |   |
| <p>PO 21.1</p> <p>Land that is suitable for sensitive land uses to provide a safe environment.</p>   | <p>DTS/DPF 21.1</p> <p>Development satisfies (a), (b), (c) or (d):</p> <ul style="list-style-type: none"> <li>(a) does not involve a change in the use of land</li> <li>(b) involves a change in the use of land that does not constitute a change to a <u>more sensitive use</u></li> <li>(c) involves a change in the use of land to a <u>more sensitive use</u> on land at which <u>site contamination</u> does not exist (as demonstrated in a <u>site contamination declaration form</u>)</li> <li>(d) involves a change in the use of land to a <u>more sensitive use</u> on land at which <u>site contamination</u> exists, or may exist (as demonstrated in a site contamination declaration form), and satisfies both of the following:             <ul style="list-style-type: none"> <li>(i) a <u>site contamination audit report</u> has been prepared under Part 10A of the <i>Environment Protection Act 1993</i> in relation to the land within the previous 5 years which states that                 <ul style="list-style-type: none"> <li>A. <u>site contamination</u> does not exist (or no longer exists) at the land<br/>or</li> <li>B. the land is suitable for the proposed use or range of uses (without the need for any further <u>remediation</u>)<br/>or</li> <li>C. where <u>remediation</u> is, or remains, necessary for the proposed use (or range of uses), <u>remediation work</u> has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development)</li> </ul> </li> <li>and</li> <li>(ii) no other <u>class 1 activity</u> or <u>class 2 activity</u> has taken place at the land since the preparation of the site contamination audit report (as demonstrated in a <u>site contamination declaration form</u>).</li> </ul> </li> </ul> |

## Infrastructure and Renewable Energy Facilities

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Efficient provision of infrastructure networks and services, renewable energy facilities and ancillary development in a manner that minimises hazard, is environmentally and culturally sensitive and manages adverse visual impacts on natural and rural landscapes and residential amenity. |

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| General  |   |
| <p>PO 1.1</p> <p>Development is located and designed to minimise hazard or nuisance to adjacent development and land uses.</p>   | <p>DTS/DPF 1.1</p> <p>None are applicable.</p>              |
| Visual Amenity   |   |
| <p>PO 2.1</p> <p>The visual impact of above-ground infrastructure networks and services (excluding high voltage transmission lines), renewable energy facilities (excluding wind farms), energy storage facilities and ancillary development is minimised from townships, scenic routes and public roads by:</p> <ul style="list-style-type: none"> <li>(a) utilising features of the natural landscape to obscure views where practicable</li> <li>(b) siting development below ridgelines where practicable</li> <li>(c) avoiding visually sensitive and significant landscapes</li> <li>(d) using materials and finishes with low-reflectivity and colours that complement the surroundings</li> <li>(e) using existing vegetation to screen buildings</li> <li>(f) incorporating landscaping or landscaped mounding around the perimeter of a site and between adjacent allotments accommodating or zoned to primarily accommodate sensitive receivers.</li> </ul> | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>              |
| <p>PO 2.2</p> <p>Pumping stations, battery storage facilities, maintenance sheds and other ancillary structures incorporate vegetation buffers to reduce adverse visual impacts on adjacent land.</p>  | <p>DTS/DPF 2.2</p> <p>None are applicable.</p>              |
| <p>PO 2.3</p> <p>Surfaces exposed by earthworks associated with the installation of storage facilities, pipework, penstock, substations and other ancillary plant are reinstated and revegetated to reduce adverse visual impacts on adjacent land.</p>  | <p>DTS/DPF 2.3</p> <p>None are applicable.</p>              |
| Rehabilitation   |   |
| <p>PO 3.1</p> <p>Progressive rehabilitation (incorporating revegetation) of disturbed areas, ahead of or upon decommissioning of areas used for renewable energy facilities and transmission corridors.</p>  | <p>DTS/DPF 3.1</p> <p>None are applicable.</p>              |
| Hazard Management  |   |
| <p>PO 4.1</p> <p>Infrastructure and renewable energy facilities and ancillary development located and operated to not adversely impact maritime or air transport safety, including the operation of ports, airfields and landing strips.</p>   | <p>DTS/DPF 4.1</p> <p>None are applicable.</p>              |
| <p>PO 4.2</p> <p>Facilities for energy generation, power storage and transmission are separated as far as practicable from dwellings, tourist accommodation and frequently visited public places (such as viewing platforms / lookouts) to reduce risks to public safety from fire or equipment malfunction.</p>   | <p>DTS/DPF 4.2</p> <p>None are applicable.</p>              |
| <p>PO 4.3</p> <p>Bushfire hazard risk is minimised for renewable energy facilities by providing appropriate access tracks, safety equipment and water tanks and establishing cleared areas around substations, battery storage and operations compounds.</p>   | <p>DTS/DPF 4.3</p> <p>None are applicable.</p>              |
| Electricity Infrastructure and Battery Storage Facilities  |   |
| <p>PO 5.1</p> <p>Electricity infrastructure is located to minimise visual impacts through techniques including:</p> <ul style="list-style-type: none"> <li>(a) siting utilities and services: <ul style="list-style-type: none"> <li>(i) on areas already cleared of native vegetation</li> <li>(ii) where there is minimal interference or disturbance to existing native vegetation or biodiversity</li> </ul> </li> <li>(b) grouping utility buildings and structures with non-residential development, where practicable.</li> </ul>   | <p>DTS/DPF 5.1</p> <p>None are applicable.</p>              |
| <p>PO 5.2</p> <p>Electricity supply (excluding transmission lines) serving new development in urban areas and townships installed underground, excluding lines having a capacity exceeding or equal to</p>   | <p>DTS/DPF 5.2</p> <p>None are applicable.</p>              |

|  |  |
|--|--|
| 33kV.  |  |
| PO 5.3<br>Battery storage facilities are co-located with substation infrastructure where practicable to minimise the development footprint and reduce environmental impacts.   | DTS/DPF 5.3<br>None are applicable.  |
| Telecommunication Facilities   |  |
| PO 6.1<br>The proliferation of telecommunications facilities in the form of towers/monopoles in any one locality is managed, where technically feasible, by co-locating a facility with other communications facilities to mitigate impacts from clutter on visual amenity.  | DTS/DPF 6.1<br>None are applicable.  |
| PO 6.2<br>Telecommunications antennae are located as close as practicable to support structures to manage overall bulk and mitigate impacts on visual amenity.   | DTS/DPF 6.2<br>None are applicable.  |
| PO 6.3<br>Telecommunications facilities, particularly towers/monopoles, are located and sized to mitigate visual impacts by the following methods:<br><br>(a) where technically feasible, incorporating the facility within an existing structure that may serve another purpose<br><br>or all of the following:<br><br>(b) using existing buildings and landscape features to obscure or interrupt views of a facility from nearby public roads, residential areas and places of high public amenity to the extent practical without unduly hindering the effective provision of telecommunications services<br><br>(c) using materials and finishes that complement the environment<br><br>(d) screening using landscaping and vegetation, particularly for equipment shelters and huts. | DTS/DPF 6.3<br>None are applicable.  |
| Renewable Energy Facilities  |  |
| PO 7.1<br>Renewable energy facilities are located as close as practicable to existing transmission infrastructure to facilitate connections and minimise environmental impacts as a result of extending transmission infrastructure.   | DTS/DPF 7.1<br>None are applicable.  |
| Renewable Energy Facilities (Wind Farm)  |  |
| PO 8.1<br>Visual impact of wind turbine generators on the amenity of residential and tourist development is reduced through appropriate separation.  | DTS/DPF 8.1<br>Wind turbine generators are:<br><br>(a) set back at least 2000m from the base of a turbine to any of the following zones:<br>(i) Rural Settlement Zone<br>(ii) Township Zone<br>(iii) Rural Living Zone<br>(iv) Rural Neighbourhood Zone<br><br>with an additional 10m setback per additional metre over 150m overall turbine height (measured from the base of the turbine).<br><br>(b) set back at least 1500m from the base of the turbine to non-associated (non-stakeholder) dwellings and tourist accommodation |
| PO 8.2<br>The visual impact of wind turbine generators on natural landscapes is managed by:<br><br>(a) designing wind turbine generators to be uniform in colour, size and shape<br>(b) coordinating blade rotation and direction<br>(c) mounting wind turbine generators on tubular towers as opposed to lattice towers.  | DTS/DPF 8.2<br>None are applicable.  |
| PO 8.3<br>Wind turbine generators and ancillary development minimise potential for bird and bat strike.  | DTS/DPF 8.3<br>None are applicable.  |
| PO 8.4<br>Wind turbine generators incorporate recognition systems or physical markers to minimise the risk to aircraft operations.   | DTS/DPF 8.4<br>No Commonwealth air safety (CASA / ASA) or Defence requirement is applicable.   |
| PO 8.5<br>Meteorological masts and guidewires are identifiable to aircraft through the use of colour bands, marker balls, high visibility sleeves or flashing strobes.   | DTS/DPF 8.5<br>None are applicable.  |
| Renewable Energy Facilities (Solar Power)  |  |
| PO 9.1   | DTS/DPF 9.1  |

| <p>Ground mounted solar power facilities generating 5MW or more are not located on land requiring the clearance of areas of intact native vegetation or on land of high environmental, scenic or cultural value.</p>   | <p>None are applicable.</p>  |                                      |                                 |  |                                 |  |       |       |     |      |     |           |            |     |      |       |          |              |     |      |     |         |               |     |      |      |           |             |     |      |      |        |        |    |      |     |

| <p>PO 10.3</p> <p>Hydropower / pumped hydropower facilities on existing or former mine sites minimise environmental impacts from site contamination, including from mine operations or water sources subject to such processes, now or in the future.</p>  | <p>DTS/DPF 10.3</p> <p>None are applicable.</p>  |                                      |                                 |  |                                 |  |       |       |     |      |     |           |            |     |      |       |          |              |     |      |     |         |               |     |      |      |           |             |     |      |      |        |        |    |      |     |
| <p>Water Supply</p>  |  |                                      |                                 |  |                                 |  |       |       |     |      |     |           |            |     |      |       |          |              |     |      |     |         |               |     |      |      |           |             |     |      |      |        |        |    |      |     |
| <p>PO 11.1</p> <p>Development is connected to an appropriate water supply to meet the ongoing requirements of the intended use.</p>  | <p>DTS/DPF 11.1</p> <p>Development is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the on-going requirements of the development.</p>   |                                      |                                 |  |                                 |  |       |       |     |      |     |           |            |     |      |       |          |              |     |      |     |         |               |     |      |      |           |             |     |      |      |        |        |    |      |     |
| <p>PO 11.2</p> <p>Dwellings are connected to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the intended use. Where this is not available an appropriate rainwater tank or storage system for domestic use is provided.</p>  | <p>DTS/DPF 11.2</p> <p>A dwelling is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the development. Where this is not available it is serviced by a rainwater tank or tanks capable of holding at least 50,000 litres of water which is:</p> <ul style="list-style-type: none"> <li>(a) exclusively for domestic use</li> <li>(b) connected to the roof drainage system of the dwelling.</li> </ul>   |                                      |                                 |  |                                 |  |       |       |     |      |     |           |            |     |      |       |          |              |     |      |     |         |               |     |      |      |           |             |     |      |      |        |        |    |      |     |
| <p>Wastewater Services</p>   |  |                                      |                                 |  |                                 |  |       |       |     |      |     |           |            |     |      |       |          |              |     |      |     |         |               |     |      |      |           |             |     |      |      |        |        |    |      |     |

|   |  |
|---|--|
| <p>PO 12.1</p> <p>Development is connected to an approved common wastewater disposal service with the capacity to meet the requirements of the intended use. Where this is not available an appropriate on-site service is provided to meet the ongoing requirements of the intended use in accordance with the following:</p> <ul style="list-style-type: none"> <li>(a) it is wholly located and contained within the allotment of the development it will service</li> <li>(b) in areas where there is a high risk of contamination of surface, ground, or marine water resources from on-site disposal of liquid wastes, disposal systems are included to minimise the risk of pollution to those water resources</li> <li>(c) septic tank effluent drainage fields and other wastewater disposal areas are located away from watercourses and flood prone, sloping, saline or poorly drained land to minimise environmental harm.</li> </ul> | <p>DTS/DPF 12.1</p> <p>Development is connected, or will be connected, to an approved common wastewater disposal service with the capacity to meet the requirements of the development. Where this is not available it is instead capable of being serviced by an on-site waste water treatment system in accordance with the following:</p> <ul style="list-style-type: none"> <li>(a) the system is wholly located and contained within the allotment of development it will service; and</li> <li>(b) the system will comply with the requirements of the South Australian Public Health Act 2011.</li> </ul> |
| <p>PO 12.2</p> <p>Effluent drainage fields and other wastewater disposal areas are maintained to ensure the effective operation of waste systems and minimise risks to human health and the environment.</p>  | <p>DTS/DPF 12.2</p> <p>Development is not built on, or encroaches within, an area that is, or will be, required for a sewerage system or waste control system.</p>   |
| <p>Temporary Facilities</p>   |  |
| <p>PO 13.1</p> <p>In rural and remote locations, development that is likely to generate significant waste material during construction, including packaging waste, makes provision for a temporary on-site waste storage enclosure to minimise the incidence of wind-blown litter.</p>  | <p>DTS/DPF 13.1</p> <p>A waste collection and disposal service is used to dispose of the volume of waste at the rate it is generated.</p>  |
| <p>PO 13.2</p> <p>Temporary facilities to support the establishment of renewable energy facilities (including borrow pits, concrete batching plants, laydown, storage, access roads and worker amenity areas) are sited and operated to minimise environmental impact.</p>  | <p>DTS/DPF 13.2</p> <p>None are applicable.</p>  |

## Intensive Animal Husbandry and Dairies

### Assessment Provisions (AP)

Desired Outcome (DO)

| <h2 style="margin: 0;">Desired Outcome</h2> |  |
|---|--|
| <p>DO 1</p>                                 | <p>Development of intensive animal husbandry and dairies in locations that are protected from encroachment by sensitive receivers and in a manner that minimises their adverse effects on amenity and the environment.</p> |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| <h2 style="margin: 0;">Performance Outcome</h2>   | <h2 style="margin: 0;">Deemed-to-Satisfy Criteria / Designated Performance Feature</h2>  |
|---|--|
| <p>Siting and Design</p>  |  |
| <p>PO 1.1</p> <p>Intensive animal husbandry, dairies and associated activities are sited, designed, constructed and managed to not unreasonably impact on the environment or amenity of the locality.</p>   | <p>DTS/DPF 1.1</p> <p>None are applicable.</p>   |
| <p>PO 1.2</p> <p>Intensive animal husbandry, dairies and associated activities are sited, designed, constructed and managed to prevent the potential transmission of disease to other operations where animals are kept.</p>  | <p>DTS/DPF 1.2</p> <p>None are applicable.</p>   |
| <p>PO 1.3</p> <p>Intensive animal husbandry and associated activities such as wastewater lagoons and liquid/solid waste disposal areas are sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions.</p> | <p>DTS/DPF 1.3</p> <p>None are applicable.</p>   |
| <p>PO 1.4</p> <p>Dairies and associated activities such as wastewater lagoons and liquid/solid waste disposal areas are sited, designed, constructed and managed to not unreasonably impact on sensitive</p>  | <p>DTS/DPF 1.4</p> <p>Dairies, associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities are located 500m or more from the nearest sensitive receiver in other ownership. <b>4943</b></p> |

|   |   |
|---|---|
| receivers in other ownership in terms of noise and air emissions.   |   |
| PO 1.5<br>Lagoons for the storage or treatment of milking shed effluent is adequately separated from roads to minimise impacts from odour on the general public.  | DTS/DPF 1.5<br>Lagoons for the storage or treatment of milking shed effluent are set back 20m or more from public roads.  |
| Waste   |   |
| PO 2.1<br>Storage of manure, used litter and other wastes (other than waste water lagoons) is sited, designed, constructed and managed to:<br><br>(a) avoid attracting and harbouring vermin<br>(b) avoid polluting water resources<br>(c) be located outside 1% AEP flood event areas.   | DTS/DPF 2.1<br>None are applicable.   |
| Soil and Water Protection   |   |
| PO 3.1<br>To avoid environmental harm and adverse effects on water resources, intensive animal husbandry operations are appropriately set back from:<br><br>(a) public water supply reservoirs<br>(b) major watercourses (third order or higher stream)<br>(c) any other watercourse, bore or well used for domestic or stock water supplies. | DTS/DPF 3.1<br>Intensive animal husbandry operations are set back:<br><br>(a) 800m or more from a public water supply reservoir<br>(b) 200m or more from a major watercourse (third order or higher stream)<br>(c) 100m or more from any other watercourse, bore or well used for domestic or stock water supplies. |
| PO 3.2<br>Intensive animal husbandry operations and dairies incorporate appropriately designed effluent and run-off facilities that:<br><br>(a) have sufficient capacity to hold effluent and runoff from the operations on site<br>(b) ensure effluent does not infiltrate and pollute groundwater, soil or other water resources.           | DTS/DPF 3.2<br>None are applicable.   |

### Interface between Land Uses

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Development is located and designed to mitigate adverse effects on or from neighbouring and proximate land uses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |  |                      |                    |  |  |

|  |  |  |
|--|--|--|
| <p>(b) measures to mitigate off-site impacts</p> <p>(c) the extent to which the development is desired in the zone</p> <p>(d) measures that might be taken in an adjacent zone primarily for sensitive receivers that mitigate adverse impacts without unreasonably compromising the intended use of that land.</p>  | <p>Consulting room</p> <p>Office</p> <p>Shop, other than any one or combination of the following:</p> <p>(a) restaurant</p> <p>(b) cellar door in the Productive Rural Landscape Zone, Rural Zone or Rural Horticulture Zone</p> | <p>7am to 9pm, Monday to Friday</p> <p>8am to 5pm, Saturday</p> <p>7am to 9pm, Monday to Friday</p> <p>8am to 5pm, Saturday</p> <p>7am to 9pm, Monday to Friday</p> <p>8am to 5pm, Saturday and Sunday</p>   |
| Overshadowing  |  |  |
| <p>PO 3.1</p> <p>Overshadowing of habitable room windows of adjacent residential land uses in:</p> <p>a. a neighbourhood-type zone is minimised to maintain access to direct winter sunlight</p> <p>b. other zones is managed to enable access to direct winter sunlight.</p>  | <p>DTS/DPF 3.1</p>   | <p>North-facing windows of habitable rooms of adjacent residential land uses in a neighbourhood-type zone receive at least 3 hours of direct sunlight between 9.00am and 3.00pm on 21 June.</p>  |
| <p>PO 3.2</p> <p>Overshadowing of the primary area of private open space or communal open space of adjacent residential land uses in:</p> <p>a. a neighbourhood type zone is minimised to maintain access to direct winter sunlight</p> <p>b. other zones is managed to enable access to direct winter sunlight.</p>   | <p>DTS/DPF 3.2</p>   | <p>Development maintains 2 hours of direct sunlight between 9.00 am and 3.00 pm on 21 June to adjacent residential land uses in a neighbourhood-type zone in accordance with the following:</p> <p>a. for ground level private open space, the smaller of the following:</p> <p>i. half the existing ground level open space</p> <p>or</p> <p>ii. 35m<sup>2</sup> of the existing ground level open space (with at least one of the area's dimensions measuring 2.5m)</p> <p>b. for ground level communal open space, at least half of the existing ground level open space.</p> |
| <p>PO 3.3</p> <p>Development does not unduly reduce the generating capacity of adjacent rooftop solar energy facilities taking into account:</p> <p>(a) the form of development contemplated in the zone</p> <p>(b) the orientation of the solar energy facilities</p> <p>(c) the extent to which the solar energy facilities are already overshadowed.</p>  | <p>DTS/DPF 3.3</p>   | <p>None are applicable.</p>  |
| <p>PO 3.4</p> <p>Development that incorporates moving parts, including windmills and wind farms, are located and operated to not cause unreasonable nuisance to nearby dwellings and tourist accommodation caused by shadow flicker.</p>   | <p>DTS/DPF 3.4</p>   | <p>None are applicable.</p>  |
| Activities Generating Noise or Vibration   |  |  |
| <p>PO 4.1</p> <p>Development that emits noise (other than music) does not unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers).</p>   | <p>DTS/DPF 4.1</p>   | <p>Noise that affects sensitive receivers achieves the relevant Environment Protection (Commercial and Industrial Noise) Policy criteria.</p>  |
| <p>PO 4.2</p> <p>Areas for the on-site manoeuvring of service and delivery vehicles, plant and equipment, outdoor work spaces (and the like) are designed and sited to not unreasonably impact the amenity of adjacent sensitive receivers (or lawfully approved sensitive receivers) and zones primarily intended to accommodate sensitive receivers due to noise and vibration by adopting techniques including:</p> <p>(a) locating openings of buildings and associated services away from the interface with the adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers</p> <p>(b) when sited outdoors, locating such areas as far as practicable from adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers</p> <p>(c) housing plant and equipment within an enclosed structure or acoustic enclosure</p> <p>(d) providing a suitable acoustic barrier between the plant and / or equipment and the adjacent sensitive receiver boundary or zone.</p> | <p>DTS/DPF 4.2</p>   | <p>None are applicable.</p>  |
| <p>PO 4.3</p> <p>Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming</p>   | <p>DTS/DPF 4.3</p>   | <p>The pump and/or filtration system ancillary to a dwelling erected on the same site is:</p>  |

| <p>pool or spa are positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers (or lawfully approved sensitive receivers).</p>   | <p>(a) enclosed in a solid acoustic structure located at least 5m from the nearest habitable room located on an adjoining allotment<br/>or<br/>(b) located at least 12m from the nearest habitable room located on an adjoining allotment.</p>  |                     |                   |  |   |
|--|---|---------------------|-------------------|--|---|
| <p>PO 4.4<br/>External noise into bedrooms is minimised by separating or shielding these rooms from service equipment areas and fixed noise sources located on the same or an adjoining allotment.</p>   | <p>DTS/DPF 4.4<br/>Adjacent land is used for residential purposes.</p>  |                     |                   |  |   |
| <p>PO 4.5<br/>Outdoor areas associated with licensed premises (such as beer gardens or dining areas) are designed and/or sited to not cause unreasonable noise impact on existing adjacent sensitive receivers (or lawfully approved sensitive receivers).</p>   | <p>DTS/DPF 4.5<br/>None are applicable.</p>   |                     |                   |  |   |
| <p>PO 4.6<br/>Development incorporating music achieves suitable acoustic amenity when measured at the boundary of an adjacent sensitive receiver (or lawfully approved sensitive receiver) or zone primarily intended to accommodate sensitive receivers.</p>  | <p>DTS/DPF 4.6<br/>Development incorporating music includes noise attenuation measures that will achieve the following noise levels:</p> <table border="1" data-bbox="802 645 1516 831"> <thead> <tr> <th data-bbox="802 645 1093 712">Assessment location</th> <th data-bbox="1093 645 1516 712">Music noise level</th> </tr> </thead> <tbody> <tr> <td data-bbox="802 712 1093 831">Externally at the nearest existing or envisaged noise sensitive location</td> <td data-bbox="1093 712 1516 831">Less than 8dB above the level of background noise (L<sub>90,15min</sub>) in any octave band of the sound spectrum (LOCT10,15 &lt; LOCT90,15 + 8dB)</td> </tr> </tbody> </table> | Assessment location | Music noise level | Externally at the nearest existing or envisaged noise sensitive location | Less than 8dB above the level of background noise (L <sub>90,15min</sub> ) in any octave band of the sound spectrum (LOCT10,15 < LOCT90,15 + 8dB) |
| Assessment location  | Music noise level   |                     |                   |  |   |
| Externally at the nearest existing or envisaged noise sensitive location   | Less than 8dB above the level of background noise (L <sub>90,15min</sub> ) in any octave band of the sound spectrum (LOCT10,15 < LOCT90,15 + 8dB)   |                     |                   |  |   |
| Air Quality  |   |                     |                   |  |   |
| <p>PO 5.1<br/>Development with the potential to emit harmful or nuisance-generating air pollution incorporates air pollution control measures to prevent harm to human health or unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers) within the locality and zones primarily intended to accommodate sensitive receivers.</p>  | <p>DTS/DPF 5.1<br/>None are applicable.</p>   |                     |                   |  |   |
| <p>PO 5.2<br/>Development that includes chimneys or exhaust flues (including cafes, restaurants and fast food outlets) is designed to minimise nuisance or adverse health impacts to sensitive receivers (or lawfully approved sensitive receivers) by:</p> <p>(a) incorporating appropriate treatment technology before exhaust emissions are released<br/>(b) locating and designing chimneys or exhaust flues to maximise the dispersion of exhaust emissions, taking into account the location of sensitive receivers.</p> | <p>DTS/DPF 5.2<br/>None are applicable.</p>   |                     |                   |  |   |
| Light Spill  |   |                     |                   |  |   |
| <p>PO 6.1<br/>External lighting is positioned and designed to not cause unreasonable light spill impact on adjacent sensitive receivers (or lawfully approved sensitive receivers).</p>  | <p>DTS/DPF 6.1<br/>None are applicable.</p>   |                     |                   |  |   |
| <p>PO 6.2<br/>External lighting is not hazardous to motorists and cyclists.</p>  | <p>DTS/DPF 6.2<br/>None are applicable.</p>   |                     |                   |  |   |
| Solar Reflectivity / Glare   |   |                     |                   |  |   |
| <p>PO 7.1<br/>Development is designed and comprised of materials and finishes that do not unreasonably cause a distraction to adjacent road users and pedestrian areas or unreasonably cause heat loading and micro-climatic impacts on adjacent buildings and land uses as a result of reflective solar glare.</p>  | <p>DTS/DPF 7.1<br/>None are applicable.</p>   |                     |                   |  |   |
| Electrical Interference  |   |                     |                   |  |   |
| <p>PO 8.1<br/>Development in rural and remote areas does not unreasonably diminish or result in the loss of existing communication services due to electrical interference.</p>  | <p>DTS/DPF 8.1<br/>The building or structure:</p> <p>(a) is no greater than 10m in height, measured from existing ground level<br/>or<br/>(b) is not within a line of sight between a fixed transmitter and fixed receiver (antenna) other than where an alternative service is available via a different fixed transmitter or cable.</p>   |                     |                   |  |   |
| Interface with Rural Activities  |   |                     |                   |  |   |
| <p>PO 9.1<br/>Sensitive receivers are located and designed to mitigate impacts from lawfully existing horticultural and farming activities (or lawfully approved horticultural and farming activities), including spray drift and noise and do not prejudice the continued operation of these</p>  | <p>DTS/DPF 9.1<br/>None are applicable.</p>   |                     |                   |  |   |

|  |  |
|--|--|
| activities.  |  |
| PO 9.2<br>Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing intensive animal husbandry activities and do not prejudice the continued operation of these activities.  | DTS/DPF 9.2<br>None are applicable.  |
| PO 9.3<br>Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing land-based aquaculture activities and do not prejudice the continued operation of these activities.  | DTS/DPF 9.3<br>Sensitive receivers are located at least 200m from the boundary of a site used for land-based aquaculture and associated components in other ownership.   |
| PO 9.4<br>Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing dairies including associated wastewater lagoons and liquid/solid waste storage and disposal facilities and do not prejudice the continued operation of these activities.   | DTS/DPF 9.4<br>Sensitive receivers are sited at least 500m from the boundary of a site used for a dairy and associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities in other ownership.   |
| PO 9.5<br>Sensitive receivers are located and designed to mitigate the potential impacts from lawfully existing facilities used for the handling, transportation and storage of bulk commodities (recognising the potential for extended hours of operation) and do not prejudice the continued operation of these activities. | DTS/DPF 9.5<br>Sensitive receivers are located away from the boundary of a site used for the handling, transportation and/or storage of bulk commodities in other ownership in accordance with the following:<br><br><ul style="list-style-type: none"> <li>(a) 300m or more, where it involves the handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility</li> <li>(b) 300m or more, where it involves the handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility (including sea-port grain terminals) where the handling of these materials into or from vessels does not exceed 100 tonnes per day</li> <li>(c) 500m or more, where it involves the storage of bulk petroleum in individual containers with a capacity up to 200 litres and a total on-site storage capacity not exceeding 1000 cubic metres</li> <li>(d) 500m or more, where it involves the handling of coal with a capacity up to 1 tonne per day or a storage capacity up to 50 tonnes</li> <li>(e) 1000m or more, where it involves the handling of coal with a capacity exceeding 1 tonne per day but not exceeding 100 tonnes per day or a storage capacity exceeding 50 tonnes but not exceeding 5000 tonnes.</li> </ul> |
| PO 9.6<br>Setbacks and vegetation plantings along allotment boundaries should be incorporated to mitigate the potential impacts of spray drift and other impacts associated with agricultural and horticultural activities.  | DTS/DPF 9.6<br>None are applicable.  |
| PO 9.7<br>Urban development does not prejudice existing agricultural and horticultural activities through appropriate separation and design techniques.  | DTS/DPF 9.7<br>None are applicable.  |
| Interface with Mines and Quarries (Rural and Remote Areas)   |  |
| PO 10.1<br>Sensitive receivers are separated from existing mines to minimise the adverse impacts from noise, dust and vibration.   | DTS/DPF 10.1<br>Sensitive receivers are located no closer than 500m from the boundary of a Mining Production Tenement under the <i>Mining Act 1971</i> .   |

**Land Division**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | <p>Land division:</p> <ul style="list-style-type: none"> <li>(a) creates allotments with the appropriate dimensions and shape for their intended use</li> <li>(b) allows efficient provision of new infrastructure and the optimum use of underutilised infrastructure</li> <li>(c) integrates and allocates adequate and suitable land for the preservation of site features of value, including significant vegetation, watercourses, water bodies and other environmental features</li> <li>(d) facilitates solar access through allotment orientation</li> <li>(e) creates a compact urban form that supports active travel, walkability and the use of public transport</li> <li>(f) avoids areas of high natural hazard risk.</li> </ul> |

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature   |
|--|---|
| All land division  |   |
| Allotment configuration  |   |
| <p>PO 1.1</p> <p>Land division creates allotments suitable for their intended use.</p>   | <p>DTS/DPF 1.1</p> <p>Division of land satisfies (a) or (b):</p> <ul style="list-style-type: none"> <li>(a) reflects the site boundaries illustrated and approved in an operative or existing development authorisation for residential development under the <i>Development Act 1993</i> or <i>Planning, Development and Infrastructure Act 2016</i> where the allotments are used or are proposed to be used solely for residential purposes</li> <li>(b) is proposed as part of a combined land division application with deemed-to-satisfy dwellings on the proposed allotments.</li> </ul> |
| <p>PO 1.2</p> <p>Land division considers the physical characteristics of the land, preservation of environmental and cultural features of value and the prevailing context of the locality.</p>  | <p>DTS/DPF 1.2</p> <p>None are applicable.</p>  |
| Design and Layout  |   |
| <p>PO 2.1</p> <p>Land division results in a pattern of development that minimises the likelihood of future earthworks and retaining walls.</p>   | <p>DTS/DPF 2.1</p> <p>None are applicable.</p>  |
| <p>PO 2.2</p> <p>Land division enables the appropriate management of interface impacts between potentially conflicting land uses and/or zones.</p>   | <p>DTS/DPF 2.2</p> <p>None are applicable.</p>  |
| <p>PO 2.3</p> <p>Land division maximises the number of allotments that face public open space and public streets.</p>  | <p>DTS/DPF 2.3</p> <p>None are applicable.</p>  |
| <p>PO 2.4</p> <p>Land division is integrated with site features, adjacent land uses, the existing transport network and available infrastructure.</p>  | <p>DTS/DPF 2.4</p> <p>None are applicable.</p>  |
| <p>PO 2.5</p> <p>Development and infrastructure is provided and staged in a manner that supports an orderly and economic provision of land, infrastructure and services.</p>                     | <p>DTS/DPF 2.5</p> <p>None are applicable.</p>  |
| <p>PO 2.6</p> <p>Land division results in watercourses being retained within open space and development taking place on land not subject to flooding.</p>  | <p>DTS/DPF 2.6</p> <p>None are applicable.</p>  |
| <p>PO 2.7</p> <p>Land division results in legible street patterns connected to the surrounding street network.</p>   | <p>DTS/DPF 2.7</p> <p>None are applicable.</p>  |
| <p>PO 2.8</p> <p>Land division is designed to preserve existing vegetation of value including native vegetation and regulated and significant trees.</p>   | <p>DTS/DPF 2.8</p> <p>None are applicable.</p>  |
| Roads and Access   |   |
| <p>PO 3.1</p> <p>Land division provides allotments with access to an all-weather public road.</p>  | <p>DTS/DPF 3.1</p> <p>None are applicable.</p>  |
| <p>PO 3.2</p> <p>Street patterns and intersections are designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.</p>  | <p>DTS/DPF 3.2</p> <p>None are applicable.</p>  |
| <p>PO 3.3</p> <p>Land division does not impede access to publicly owned open space and/or recreation facilities.</p>   | <p>DTS/DPF 3.3</p> <p>None are applicable.</p>  |
| <p>PO 3.4</p> <p>Road reserves provide for safe and convenient movement and parking of projected volumes of vehicles and allow for the efficient movement of service and emergency vehicles.</p> | <p>DTS/DPF 3.4</p> <p>None are applicable.</p>  |
| <p>PO 3.5</p> <p>Road reserves are designed to accommodate pedestrian and cycling infrastructure, street tree planting, landscaping and street furniture.</p>                                    | <p>DTS/DPF 3.5</p> <p>None are applicable.</p>  |

|   |   |
|---|---|
| PO 3.6<br>Road reserves accommodate stormwater drainage and public utilities.   | DTS/DPF 3.6<br>None are applicable.   |
| PO 3.7<br>Road reserves provide unobstructed vehicular access and egress to and from individual allotments and sites.   | DTS/DPF 3.7<br>None are applicable.   |
| PO 3.8<br>Roads, open space and thoroughfares provide safe and convenient linkages to the surrounding open space and transport network.   | DTS/DPF 3.8<br>None are applicable.   |
| PO 3.9<br>Public streets are designed to enable tree planting to provide shade and enhance the amenity of streetscapes.   | DTS/DPF 3.9<br>None are applicable.   |
| PO 3.10<br>Local streets are designed to create low-speed environments that are safe for cyclists and pedestrians.  | DTS/DPF 3.10<br>None are applicable.  |
| <b>Infrastructure</b>   |   |
| PO 4.1<br>Land division incorporates public utility services within road reserves or dedicated easements.   | DTS/DPF 4.1<br>None are applicable.   |
| PO 4.2<br>Waste water, sewage and other effluent is capable of being disposed of from each allotment without risk to public health or the environment.  | DTS/DPF 4.2<br>Each allotment can be connected to:<br><br>(a) a waste water treatment plant that has the hydraulic volume and pollutant load treatment and disposal capacity for the maximum predicted wastewater volume generated by subsequent development of the proposed allotment<br>or<br>(b) a form of on-site waste water treatment and disposal that meets relevant public health and environmental standards. |
| PO 4.3<br>Septic tank effluent drainage fields and other waste water disposal areas are maintained to ensure the effective operation of waste systems and minimise risks to human health and the environment.   | DTS/DPF 4.3<br>Development is not built on, or encroaches within, an area that is or will be, required for a sewerage system or waste control system.   |
| PO 4.4<br>Constructed wetland systems, including associated detention and retention basins, are sited and designed to ensure public health and safety is protected, including by minimising potential public health risks arising from the breeding of mosquitoes.                                | DTS/DPF 4.4<br>None are applicable.   |
| PO 4.5<br>Constructed wetland systems, including associated detention and retention basins, are sited and designed to allow sediments to settle prior to discharge into watercourses or the marine environment.   | DTS/DPF 4.5<br>None are applicable.   |
| PO 4.6<br>Constructed wetland systems, including associated detention and retention basins, are sited and designed to function as a landscape feature.  | DTS/DPF 4.6<br>None are applicable.   |
| Minor Land Division (Under 20 Allotments)   |   |
| <b>Open Space</b>   |   |
| PO 5.1<br>Land division proposing an additional allotment under 1 hectare provides or supports the provision of open space.   | DTS/DPF 5.1<br>None are applicable.   |
| <b>Solar Orientation</b>  |   |
| PO 6.1<br>Land division for residential purposes facilitates solar access through allotment orientation.  | DTS/DPF 6.1<br>None are applicable.   |
| <b>Water Sensitive Design</b>   |   |
| PO 7.1<br>Land division creating a new road or common driveway includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies. | DTS/DPF 7.1<br>None are applicable.   |
| PO 7.2<br>Land division designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the  | DTS/DPF 7.2<br>None are applicable.   |

|  |   |
|--|---|
| peak flows in downstream systems.  |   |
| <b>Battle-Axe Development</b>  |   |
| PO 8.1<br>Battle-axe development appropriately responds to the existing neighbourhood context.   | DTS/DPF 8.1<br>Allotments are not in the form of a battle-axe arrangement.  |
| PO 8.2<br>Battle-axe development designed to allow safe and convenient movement.   | DTS/DPF 8.2<br>The handle of a battle-axe development:<br><br>(a) has a minimum width of 4m<br>or<br>(b) where more than 3 allotments are proposed, a minimum width of 5.5m.  |
| PO 8.3<br>Battle-axe allotments and/or common land are of a suitable size and dimension to allow passenger vehicles to enter and exit and manoeuvre within the site in a safe and convenient manner.   | DTS/DPF 8.3<br>Battle-axe development allows a B85 passenger vehicle to enter and exit parking spaces in no more than a three-point turn manoeuvre.   |
| PO 8.4<br>Battle-axe or common driveways incorporate landscaping and permeability to improve appearance and assist in stormwater management.   | DTS/DPF 8.4<br>Battle-axe or common driveways satisfy (a) and (b):<br><br>(a) are constructed of a minimum of 50% permeable or porous material<br>(b) where the driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point). |
| <b>Major Land Division (20+ Allotments)</b>  |   |
| <b>Open Space</b>  |   |
| PO 9.1<br>Land division allocates or retains evenly distributed, high quality areas of open space to improve residential amenity and provide urban heat amelioration.  | DTS/DPF 9.1<br>None are applicable.   |
| PO 9.2<br>Land allocated for open space is suitable for its intended active and passive recreational use considering gradient and potential for inundation.  | DTS/DPF 9.2<br>None are applicable.   |
| PO 9.3<br>Land allocated for active recreation has dimensions capable of accommodating a range of active recreational activities.  | DTS/DPF 9.3<br>None are applicable.   |
| <b>Water Sensitive Design</b>  |   |
| PO 10.1<br>Land division creating 20 or more allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems. | DTS/DPF 10.1<br>None are applicable.  |
| PO 10.2<br>Land division creating 20 or more allotments includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.     | DTS/DPF 10.2<br>None are applicable.  |
| <b>Solar Orientation</b>   |   |
| PO 11.1<br>Land division creating 20 or more allotments for residential purposes facilitates solar access through allotment orientation and allotment dimensions.  | DTS/DPF 11.1<br>None are applicable.  |

## Marinas and On-Water Structures

### Assessment Provisions (AP)

Desired Outcome (DO)

| <b>Desired Outcome</b> |   |
|------------------------|---|
| DO 1                   | Marinas and on-water structures are located and designed to minimise the impairment of commercial, recreational and navigational activities and adverse impacts on the environment. |

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| Navigation and Safety  |  |
| PO 1.1<br>Safe public access is provided or maintained to the waterfront, public infrastructure and recreation areas.                        | DTS/DPF 1.1<br>None are applicable.  |
| PO 1.2<br>The operation of wharves is not impaired by marinas and on-water structures.   | DTS/DPF 1.2<br>None are applicable.  |
| PO 1.3<br>Navigation and access channels are not impaired by marinas and on-water structures.  | DTS/DPF 1.3<br>None are applicable.  |
| PO 1.4<br>Commercial shipping lanes are not impaired by marinas and on-water structures.   | DTS/DPF 1.4<br>Marinas and on-water structures are set back 250m or more from commercial shipping lanes.   |
| PO 1.5<br>Marinas and on-water structures are located to avoid interfering with the operation or function of a water supply pumping station. | DTS/DPF 1.5<br>On-water structures are set back:<br><br>(a) 3km or more from upstream water supply pumping station take-off points<br>(b) 500m or more from downstream water supply pumping station take-off points. |
| PO 1.6<br>Maintenance of on-water infrastructure, including revetment walls, is not impaired by marinas and on-water structures.             | DTS/DPF 1.6<br>None are applicable.  |
| Environmental Protection   |  |
| PO 2.1<br>Development is sited and designed to facilitate water circulation and exchange.  | DTS/DPF 2.1<br>None are applicable.  |

## Open Space and Recreation

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Pleasant, functional and accessible open space and recreation facilities are provided at State, regional, district, neighbourhood and local levels for active and passive recreation, biodiversity, community health, urban cooling, tree canopy cover, visual amenity, gathering spaces, wildlife and waterway corridors, and a range of other functions and at a range of sizes that reflect the purpose of that open space. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| Land Use and Intensity   |   |
| PO 1.1<br>Recreation facilities are compatible with surrounding land uses and activities.                              | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Open space areas include natural or landscaped areas using locally indigenous plant species and large trees. | DTS/DPF 1.2<br>None are applicable.                         |
| Design and Siting  |   |
| PO 2.1   | DTS/DPF 2.1   |

|  |                                     |
|--|-------------------------------------|
| Open space and recreation facilities address adjacent public roads to optimise pedestrian access and visibility.   | None are applicable.                |
| PO 2.2<br>Open space and recreation facilities incorporate park furniture, shaded areas and resting places.  | DTS/DPF 2.2<br>None are applicable. |
| PO 2.3<br>Open space and recreation facilities link habitats, wildlife corridors and existing open spaces and recreation facilities.   | DTS/DPF 2.3<br>None are applicable. |
| Pedestrians and Cyclists   |                                     |
| PO 3.1<br>Open space incorporates:<br><br>(a) pedestrian and cycle linkages to other open spaces, centres, schools and public transport nodes;<br>(b) safe crossing points where pedestrian routes intersect the road network;<br>(c) easily identified access points. | DTS/DPF 3.1<br>None are applicable. |
| Usability  |                                     |
| PO 4.1<br>Land allocated for open space is suitable for its intended active and passive recreational use taking into consideration its gradient and potential for inundation.  | DTS/DPF 4.1<br>None are applicable. |
| Safety and Security  |                                     |
| PO 5.1<br>Open space is overlooked by housing, commercial or other development to provide casual surveillance where possible.  | DTS/DPF 5.1<br>None are applicable. |
| PO 5.2<br>Play equipment is located to maximise opportunities for passive surveillance.  | DTS/DPF 5.2<br>None are applicable. |
| PO 5.3<br>Landscaping provided in open space and recreation facilities maximises opportunities for casual surveillance throughout the park.  | DTS/DPF 5.3<br>None are applicable. |
| PO 5.4<br>Fenced parks and playgrounds have more than one entrance or exit to minimise potential entrapment.   | DTS/DPF 5.4<br>None are applicable. |
| PO 5.5<br>Adequate lighting is provided around toilets, telephones, seating, litter bins, bicycle storage, car parks and other such facilities.  | DTS/DPF 5.5<br>None are applicable. |
| PO 5.6<br>Pedestrian and bicycle movement after dark is focused along clearly defined, adequately lit routes with observable entries and exits.  | DTS/DPF 5.6<br>None are applicable. |
| Signage  |                                     |
| PO 6.1<br>Signage is provided at entrances to and within the open space and recreation facilities to provide clear orientation to major points of interest such as the location of public toilets, telephones, safe routes, park activities and the like.              | DTS/DPF 6.1<br>None are applicable. |
| Buildings and Structures   |                                     |
| PO 7.1<br>Buildings and car parking areas in open space areas are designed, located and of a scale to be unobtrusive.  | DTS/DPF 7.1<br>None are applicable. |
| PO 7.2<br>Buildings and structures in open space areas are clustered where practical to ensure that the majority of the site remains open.   | DTS/DPF 7.2<br>None are applicable. |
| PO 7.3<br>Development in open space is constructed to minimise the extent of impervious surfaces.  | DTS/DPF 7.3<br>None are applicable. |
| PO 7.4<br>Development that abuts or includes a coastal reserve or Crown land used for scenic, conservation or recreational purposes is located and designed to have regard to the purpose, management and amenity of the reserve.                                      | DTS/DPF 7.4<br>None are applicable. |
| Landscaping  |                                     |

|  |                                     |
|--|-------------------------------------|
| PO 8.1<br>Open space and recreation facilities provide for the planting and retention of large trees and vegetation.   | DTS/DPF 8.1<br>None are applicable. |
| PO 8.2<br>Landscaping in open space and recreation facilities provides shade and windbreaks:<br><br>(a) along cyclist and pedestrian routes;<br>(b) around picnic and barbecue areas;<br>(c) in car parking areas. | DTS/DPF 8.2<br>None are applicable. |
| PO 8.3<br>Landscaping in open space facilitates habitat for local fauna and facilitates biodiversity.  | DTS/DPF 8.3<br>None are applicable. |
| PO 8.4<br>Landscaping including trees and other vegetation passively watered with local rainfall run-off, where practicable.   | DTS/DPF 8.4<br>None are applicable. |

## Out of Activity Centre Development

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO1             | The role of Activity Centres in contributing to the form and pattern of development and enabling equitable and convenient access to a range of shopping, administrative, cultural, entertainment and other facilities in a single trip is maintained and reinforced. |

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>Non-residential development outside Activity Centres of a scale and type that does not diminish the role of Activity Centres:<br><br>(a) as primary locations for shopping, administrative, cultural, entertainment and community services<br>(b) as a focus for regular social and business gatherings<br>(c) in contributing to or maintaining a pattern of development that supports equitable community access to services and facilities.        | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Out-of-activity centre non-residential development complements Activity Centres through the provision of services and facilities:<br><br>(a) that support the needs of local residents and workers, particularly in underserved locations<br>(b) at the edge of Activities Centres where they cannot readily be accommodated within an existing Activity Centre to expand the range of services on offer and support the role of the Activity Centre. | DTS/DPF 1.2<br>None are applicable.                         |

## Resource Extraction

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Resource extraction activities are developed in a manner that minimises human and environmental impacts. |

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity  |   |
| PO 1.1<br>Resource extraction activities minimise landscape damage outside of those areas unavoidably disturbed to access and exploit a resource and provide for the progressive reclamation and betterment of disturbed areas. | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Resource extraction activities avoid damage to cultural sites or artefacts.   | DTS/DPF 1.2<br>None are applicable.                         |
| Water Quality   |   |
| PO 2.1<br>Stormwater and/or wastewater from resource extraction activities is diverted into appropriately sized treatment and retention systems to enable reuse on site.  | DTS/DPF 2.1<br>None are applicable.                         |
| Separation Treatments, Buffers and Landscaping  |   |
| PO 3.1<br>Resource extraction activities minimise adverse impacts upon sensitive receivers through incorporation of separation distances and/or mounding/vegetation.  | DTS/DPF 3.1<br>None are applicable.                         |
| PO 3.2<br>Resource extraction activities are screened from view from adjacent land by perimeter landscaping and/or mounding.  | DTS/DPF 3.2<br>None are applicable.                         |

## Site Contamination

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Ensure land is suitable for the proposed use in circumstances where it is, or may have been, subject to site contamination. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|--|--|
| PO 1.1<br>Ensure land is suitable for use when land use changes to a more sensitive use. | DTS/DPF 1.1<br>Development satisfies (a), (b), (c) or (d): <ul style="list-style-type: none"> <li>(a) does not involve a change in the use of land</li> <li>(b) involves a change in the use of land that does not constitute a change to a more sensitive use</li> <li>(c) involves a change in the use of land to a more sensitive use on land at which site contamination is unlikely to exist (as demonstrated in a site contamination declaration form)</li> <li>(d) involves a change in the use of land to a more sensitive use on land at which site contamination exists, or may exist (as demonstrated in a site contamination declaration form), and satisfies both of the following:                             <ul style="list-style-type: none"> <li>(i) a site contamination audit report has been prepared under Part 10A of the <i>Environment Protection Act 1993</i> in relation to the land within the previous 5 years which states that-                                     <ul style="list-style-type: none"> <li>A. site contamination does not exist (or no longer exists) at the land or</li> <li>B. the land is suitable for the proposed use or range of uses (without the need for any further remediation) or</li> <li>C. where remediation is, or remains, necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development)</li> </ul> </li> </ul> </li> </ul> |

(ii) and no other class 1 activity or class 2 activity has taken place at the land since the preparation of the site contamination audit report (as demonstrated in a site contamination declaration form).

## Tourism Development

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Tourism development is built in locations that cater to the needs of visitors and positively contributes to South Australia's visitor economy. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature  |
|---|--|
| General   |  |
| PO 1.1<br>Tourism development complements and contributes to local, natural, cultural or historical context where: <ul style="list-style-type: none"> <li>(a) it supports immersive natural experiences</li> <li>(b) it showcases South Australia's landscapes and produce</li> <li>(c) its events and functions are connected to local food, wine and nature.</li> </ul> | DTS/DPF 1.1<br>None are applicable.  |
| PO 1.2<br>Tourism development comprising multiple accommodation units (including any facilities and activities for use by guests and visitors) is clustered to minimise environmental and contextual impact.  | DTS/DPF 1.2<br>None are applicable.  |
| Caravan and Tourist Parks   |  |
| PO 2.1<br>Potential conflicts between long-term residents and short-term tourists are minimised through suitable siting and design measures.  | DTS/DPF 2.1<br>None are applicable.  |
| PO 2.2<br>Occupants are provided privacy and amenity through landscaping and fencing.   | DTS/DPF 2.2<br>None are applicable.  |
| PO 2.3<br>Communal open space and centrally located recreation facilities are provided for guests and visitors.   | DTS/DPF 2.3<br>12.5% or more of a caravan park comprises clearly defined communal open space, landscaped areas and areas for recreation. |
| PO 2.4<br>Perimeter landscaping is used to enhance the amenity of the locality.   | DTS/DPF 2.4<br>None are applicable.  |
| PO 2.5<br>Amenity blocks (showers, toilets, laundry and kitchen facilities) are sufficient to serve the full occupancy of the development.  | DTS/DPF 2.5<br>None are applicable.  |
| PO 2.6<br>Long-term occupation does not displace tourist accommodation, particularly in important tourist destinations such as coastal and riverine locations.  | DTS/DPF 2.6<br>None are applicable.  |
| Tourist accommodation in areas constituted under the National Parks and Wildlife Act 1972   |  |
| PO 3.1<br>Tourist accommodation avoids delicate or environmentally sensitive areas such as sand dunes, cliff tops, estuaries, wetlands or substantially intact strata of native vegetation (including regenerated areas of native vegetation lost through bushfire).  | DTS/DPF 3.1<br>None are applicable.  |
| PO 3.2  | DTS/DPF 3.2  |

|   |                                     |
|---|-------------------------------------|
| Tourist accommodation is sited and designed in a manner that is subservient to the natural environment and where adverse impacts on natural features, landscapes, habitats and cultural assets are avoided.   | None are applicable.                |
| PO 3.3<br>Tourist accommodation and recreational facilities, including associated access ways and ancillary structures, are located on cleared (other than where cleared as a result of bushfire) or degraded areas or where environmental improvements can be achieved.  | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4<br>Tourist accommodation is designed to prevent conversion to private dwellings through:<br><br>(a) comprising a minimum of 10 accommodation units<br>(b) clustering separated individual accommodation units<br>(c) being of a size unsuitable for a private dwelling<br>(d) ensuring functional areas that are generally associated with a private dwelling such as kitchens and laundries are excluded from, or physically separated from individual accommodation units, or are of a size unsuitable for a private dwelling. | DTS/DPF 3.4<br>None are applicable. |

## Transport, Access and Parking

### Assessment Provisions (AP)

Desired Outcome (DO)

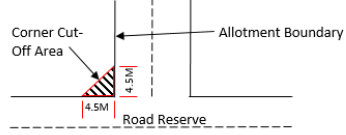

| Desired Outcome |  |
|-----------------|--|
| DO 1            | A comprehensive, integrated and connected transport system that is safe, sustainable, efficient, convenient and accessible to all users. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Movement Systems  |   |
| PO 1.1<br>Development is integrated with the existing transport system and designed to minimise its potential impact on the functional performance of the transport system.   | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Development is designed to discourage commercial and industrial vehicle movements through residential streets and adjacent other sensitive receivers.   | DTS/DPF 1.2<br>None are applicable.                         |
| PO 1.3<br>Industrial, commercial and service vehicle movements, loading areas and designated parking spaces are separated from passenger vehicle car parking areas to ensure efficient and safe movement and minimise potential conflict. | DTS/DPF 1.3<br>None are applicable.                         |
| PO 1.4<br>Development is sited and designed so that loading, unloading and turning of all traffic avoids interrupting the operation of and queuing on public roads and pedestrian paths.  | DTS/DPF 1.4<br>All vehicle manoeuvring occurs onsite.       |
| Sightlines  |   |
| PO 2.1<br>Sightlines at intersections, pedestrian and cycle crossings, and crossovers to allotments for motorists, cyclists and pedestrians are maintained or enhanced to ensure safety for all road users and pedestrians.               | DTS/DPF 2.1<br>None are applicable.                         |
| PO 2.2<br>Walls, fencing and landscaping adjacent to driveways and corner sites are designed to provide adequate sightlines between vehicles and pedestrians.   | DTS/DPF 2.2<br>None are applicable.                         |
| Vehicle Access  |   |
| PO 3.1  | DTS/DPF 3.1   |

|  |  |
|--|--|
| <p>Safe and convenient access minimises impact or interruption on the operation of public roads.</p>   | <p>The access is:</p> <ul style="list-style-type: none"> <li>(a) provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land<br/>or</li> <li>(b) not located within 6m of an intersection of 2 or more roads or a pedestrian activated crossing.</li> </ul>   |
| <p>PO 3.2<br/>Development incorporating vehicular access ramps ensures vehicles can enter and exit a site safely and without creating a hazard to pedestrians and other vehicular traffic.</p>   | <p>DTS/DPF 3.2<br/>None are applicable.</p>  |
| <p>PO 3.3<br/>Access points are sited and designed to accommodate the type and volume of traffic likely to be generated by the development or land use.</p>  | <p>DTS/DPF 3.3<br/>None are applicable.</p>  |
| <p>PO 3.4<br/>Access points are sited and designed to minimise any adverse impacts on neighbouring properties.</p>   | <p>DTS/DPF 3.4<br/>None are applicable.</p>  |
| <p>PO 3.5<br/>Access points are located so as not to interfere with street trees, existing street furniture (including directional signs, lighting, seating and weather shelters) or infrastructure services to maintain the appearance of the streetscape, preserve local amenity and minimise disruption to utility infrastructure assets.</p> | <p>DTS/DPF 3.5<br/>Vehicle access to designated car parking spaces satisfy (a) or (b):</p> <ul style="list-style-type: none"> <li>(a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land</li> <li>(b) where newly proposed, is set back: <ul style="list-style-type: none"> <li>(i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner</li> <li>(ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance</li> <li>(iii) 6m or more from the tangent point of an intersection of 2 or more roads</li> <li>(iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing.</li> </ul> </li> </ul> |
| <p>PO 3.6<br/>Driveways and access points are separated and minimised in number to optimise the provision of on-street visitor parking (where on-street parking is appropriate).</p>   | <p>DTS/DPF 3.6<br/>Driveways and access points:</p> <ul style="list-style-type: none"> <li>(a) for sites with a frontage to a public road of 20m or less, one access point no greater than 3.5m in width is provided</li> <li>(b) for sites with a frontage to a public road greater than 20m: <ul style="list-style-type: none"> <li>(i) a single access point no greater than 6m in width is provided<br/>or</li> <li>(ii) not more than two access points with a width of 3.5m each are provided.</li> </ul> </li> </ul>  |
| <p>PO 3.7<br/>Access points are appropriately separated from level crossings to avoid interference and ensure their safe ongoing operation.</p>  | <p>DTS/DPF 3.7<br/>Development does not involve a new or modified access or cause an increase in traffic through an existing access that is located within the following distance from a railway crossing:</p> <ul style="list-style-type: none"> <li>(a) 80 km/h road - 110m</li> <li>(b) 70 km/h road - 90m</li> <li>(c) 60 km/h road - 70m</li> <li>(d) 50km/h or less road - 50m.</li> </ul>   |
| <p>PO 3.8<br/>Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated.</p>  | <p>DTS/DPF 3.8<br/>None are applicable.</p>  |
| <p>PO 3.9<br/>Development is designed to ensure vehicle circulation between activity areas occurs within the site without the need to use public roads.</p>  | <p>DTS/DPF 3.9<br/>None are applicable.</p>  |
| <p>Access for People with Disabilities</p>   |  |
| <p>PO 4.1<br/>Development is sited and designed to provide safe, dignified and convenient access for people with a disability.</p>   | <p>DTS/DPF 4.1<br/>None are applicable.</p>  |
| <p>Vehicle Parking Rates</p>   |  |
| <p>PO 5.1<br/>Sufficient on-site vehicle parking and specifically marked accessible car parking places are provided to meet the needs of the development or land use having regard to factors that</p>   | <p>DTS/DPF 5.1<br/>Development provides a number of car parking spaces on-site at a rate no less than the amount calculated using one of the following, whichever is relevant:</p>   |

|   |  |
|---|--|
| <p>may support a reduced on-site rate such as:</p> <ul style="list-style-type: none"> <li>(a) availability of on-street car parking</li> <li>(b) shared use of other parking areas</li> <li>(c) in relation to a mixed-use development, where the hours of operation of commercial activities complement the residential use of the site, the provision of vehicle parking may be shared</li> <li>(d) the adaptive reuse of a State or Local Heritage Place.</li> </ul> | <ul style="list-style-type: none"> <li>(a) Transport, Access and Parking Table 2 - Off-Street Vehicle Parking Requirements in Designated Areas if the development is a class of development listed in Table 2 and the site is in a Designated Area</li> <li>(b) Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements where (a) does not apply</li> <li>(c) if located in an area where a lawfully established carparking fund operates, the number of spaces calculated under (a) or (b) less the number of spaces offset by contribution to the fund.</li> </ul> |
| <p>Vehicle Parking Areas</p>  |  |
| <p>PO 6.1</p> <p>Vehicle parking areas are sited and designed to minimise impact on the operation of public roads by avoiding the use of public roads when moving from one part of a parking area to another.</p>   | <p>DTS/DPF 6.1</p> <p>Movement between vehicle parking areas within the site can occur without the need to use a public road.</p>  |
| <p>PO 6.2</p> <p>Vehicle parking areas are appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like.</p>   | <p>DTS/DPF 6.2</p> <p>None are applicable.</p>   |
| <p>PO 6.3</p> <p>Vehicle parking areas are designed to provide opportunity for integration and shared-use of adjacent car parking areas to reduce the total extent of vehicle parking areas and access points.</p>  | <p>DTS/DPF 6.3</p> <p>None are applicable.</p>   |
| <p>PO 6.4</p> <p>Pedestrian linkages between parking areas and the development are provided and are safe and convenient.</p>  | <p>DTS/DPF 6.4</p> <p>None are applicable.</p>   |
| <p>PO 6.5</p> <p>Vehicle parking areas that are likely to be used during non-daylight hours are provided with sufficient lighting to entry and exit points to ensure clear visibility to users.</p>   | <p>DTS/DPF 6.5</p> <p>None are applicable.</p>   |
| <p>PO 6.6</p> <p>Loading areas and designated parking spaces for service vehicles are provided within the boundary of the site.</p>   | <p>DTS/DPF 6.6</p> <p>Loading areas and designated parking spaces are wholly located within the site.</p>  |
| <p>PO 6.7</p> <p>On-site visitor parking spaces are sited and designed to be accessible to all visitors at all times.</p>   | <p>DTS/DPF 6.7</p> <p>None are applicable.</p>   |
| <p>Undercroft and Below Ground Garaging and Parking of Vehicles</p>   |  |
| <p>PO 7.1</p> <p>Undercroft and below ground garaging of vehicles is designed to enable safe entry and exit from the site without compromising pedestrian or cyclist safety or causing conflict with other vehicles.</p>  | <p>DTS/DPF 7.1</p> <p>None are applicable.</p>   |
| <p>Internal Roads and Parking Areas in Residential Parks and Caravan and Tourist Parks</p>  |  |
| <p>PO 8.1</p> <p>Internal road and vehicle parking areas are surfaced to prevent dust becoming a nuisance to park residents and occupants.</p>  | <p>DTS/DPF 8.1</p> <p>None are applicable.</p>   |
| <p>PO 8.2</p> <p>Traffic circulation and movement within the park is pedestrian friendly and promotes low speed vehicle movement.</p>   | <p>DTS/DPF 8.2</p> <p>None are applicable.</p>   |
| <p>Bicycle Parking in Designated Areas</p>  |  |
| <p>PO 9.1</p> <p>The provision of adequately sized on-site bicycle parking facilities encourages cycling as an active transport mode.</p>   | <p>DTS/DPF 9.1</p> <p>Areas and / or fixtures are provided for the parking and storage of bicycles at a rate not less than the amount calculated using Transport, Access and Parking Table 3 - Off Street Bicycle Parking Requirements.</p>  |
| <p>PO 9.2</p> <p>Bicycle parking facilities provide for the secure storage and tethering of bicycles in a place where casual surveillance is possible, is well lit and signed for the safety and convenience of cyclists and deters property theft.</p>   | <p>DTS/DPF 9.2</p> <p>None are applicable.</p>   |
| <p>PO 9.3</p> <p>Non-residential development incorporates end-of-journey facilities for employees such as showers, changing facilities and secure lockers, and signage indicating the location of the facilities to encourage cycling as a mode of journey-to-work transport.</p>   | <p>DTS/DPF 9.3</p> <p>None are applicable.</p>   |
| <p>Corner Cut-Offs</p>  |  |

|  |   |
|--|---|
| <p>PO 10.1</p> <p>Development is located and designed to ensure drivers can safely turn into and out of public road junctions.</p>   | <p>DTS/DPF 10.1</p> <p>Development does not involve building work, or building work is located wholly outside the land shown as Corner Cut-Off Area in the following diagram:</p>   |
| <p>Heavy Vehicle Parking</p>   |   |
| <p>PO 11.1</p> <p>Heavy vehicle parking and access is designed and sited so that the activity does not result in nuisance to adjoining neighbours as a result of dust, fumes, vibration, odour or potentially hazardous loads.</p> | <p>DTS/DPF 11.1</p> <p>Heavy vehicle parking occurs in accordance with the following:</p> <ul style="list-style-type: none"> <li>(a) the site is not located within a Neighbourhood-type zone (except a Rural Living Zone)</li> <li>(b) the site is a minimum of 0.4 ha</li> <li>(c) where the site is 2 ha or more, no more than 2 vehicles exceeding 3,000 kilograms each (and trailers) are to be parked on the allotment at any time</li> <li>(d) where the site is between 0.4 ha and 2 ha, only one vehicle exceeding 3,000 kilograms (and one trailer) are to be parking on the allotment at any time</li> <li>(e) the vehicle parking area achieves the following setbacks:             <ul style="list-style-type: none"> <li>(i) behind the building line or 30m, whichever is greater</li> <li>(ii) 20m from the secondary street if it is a State Maintained Road</li> <li>(iii) 10m from the secondary street if it is a local road</li> <li>(iv) 10m from side and rear boundaries</li> </ul> </li> <li>(f) parking and access areas (including internal driveways) should be sealed or have a surface that can be treated and maintained to minimise dust and mud nuisance</li> <li>(g) does not include refrigerated trailers or vehicles</li> <li>(h) vehicles only enter and exit the property in accordance with the following hours:             <ul style="list-style-type: none"> <li>(i) Monday to Saturday 6:00am and 9:30pm</li> <li>(ii) Sunday and public holidays between 9:30 am and 7:00 pm</li> </ul> </li> <li>(i) the handling or trans-shipment of freight is not carried out on the property.</li> </ul> |
| <p>PO 11.2</p> <p>Heavy vehicle parking ensures that vehicles can enter and exit a site safely and without creating a hazard to pedestrians and other vehicular traffic.</p>   | <p>DTS/DPF 11.2</p> <p>Heavy vehicles:</p> <ul style="list-style-type: none"> <li>(a) can enter and exit the site in a forward direction; and</li> <li>(b) operate within the statutory mass and dimension limited for General Access Vehicles (as prescribed by the National Heavy Vehicle Regulator).</li> </ul>  |
| <p>PO 11.3</p> <p>Heavy vehicle parking is screened through siting behind buildings, screening, landscaping or the like to obscure views from adjoining properties and public roads.</p>   | <p>DTS/DPF 11.3</p> <p>None are applicable.</p>   |

**Table 1 - General Off-Street Car Parking Requirements**

The following parking rates apply and if located in an area where a lawfully established carparking fund operates, the number of spaces is reduced by an amount equal to the number of spaces offset by contribution to the fund.

| Class of Development           | Car Parking Rate (unless varied by Table 2 onwards)  |
|--------------------------------|--|
| <p>Residential Development</p> |  |
| <p>Detached Dwelling</p>       | <p>Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.</p>       |
| <p>Group Dwelling</p>          | <p>Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.</p> |

|   |  |
|---|--|
|   | 0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.   |
| Residential Flat Building   | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.<br><br>0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.  |
| Row Dwelling where vehicle access is from the primary street                        | Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.  |
| Row Dwelling where vehicle access is not from the primary street (i.e. rear-loaded) | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.  |
| Semi-Detached Dwelling  | Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.  |
| Aged / Supported Accommodation  |  |
| Retirement facility   | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling.<br><br>0.2 spaces per dwelling for visitor parking.   |
| Supported accommodation   | 0.3 spaces per bed.  |
| Residential Development (Other)   |  |
| Ancillary accommodation   | No additional requirements beyond those associated with the main dwelling.   |
| Residential park  | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling.<br><br>0.2 spaces per dwelling for visitor parking.   |
| Student accommodation   | 0.3 spaces per bed.  |
| Workers' accommodation  | 0.5 spaces per bed plus 0.2 spaces per bed for visitor parking.  |
| Tourist   |  |
| Caravan and tourist park  | Parks with 100 sites or less - a minimum of 1 space per 10 sites to be used for accommodation.<br><br>Parks with more than 100 sites - a minimum of 1 space per 15 sites used for accommodation.<br><br>A minimum of 1 space for every caravan (permanently fixed to the ground) or cabin.   |
| Tourist accommodation other than a caravan and tourist park                         | 1 car parking space per accommodation unit / guest room.   |
| Commercial Uses   |  |
| Auction room/ depot   | 1 space per 100m <sup>2</sup> of building floor area plus an additional 2 spaces.  |
| Automotive collision repair   | 3 spaces per service bay.  |
| Motor repair station  | 3 spaces per service bay.  |
| Office  | For a call centre, 8 spaces per 100m <sup>2</sup> of gross leasable floor area<br><br>In all other cases, 4 spaces per 100m <sup>2</sup> of gross leasable floor area.   |
| Retail fuel outlet  | 3 spaces per 100m <sup>2</sup> gross leasable floor area.  |
| Service trade premises  | 2.5 spaces per 100m <sup>2</sup> of gross leasable floor area<br><br>1 space per 100m <sup>2</sup> of outdoor area used for display purposes.  |
| Shop (no commercial kitchen)  | 5.5 spaces per 100m <sup>2</sup> of gross leasable floor area where not located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.<br><br>5 spaces per 100m <sup>2</sup> of gross leasable floor area where located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared. |
| Shop (in the form of a bulky goods outlet)  | 2.5 spaces per 100m <sup>2</sup> of gross leasable floor area.   |
| Shop (in the form of a restaurant or involving a commercial kitchen)                | Premises with a dine-in service only (which may include a take-away component with no drive-through) - 0.4 spaces per seat.<br><br>Premises with take-away service but with no seats - 12 spaces per 100m <sup>2</sup> of total floor area plus a drive-through queue capacity of ten vehicles measured from the pick-up point.<br><br>Premises with a dine-in and drive-through take-away service - 0.3 spaces per seat plus a drive through queue capacity of 10 vehicles measured from the pick-up point.   |

|                                     |  |
|-------------------------------------|--|
| Community facility                  | For a library, 4 spaces per 100m2 of total floor area.<br>For a hall/meeting hall, 0.2 spaces per seat.<br>In all other cases, 10 spaces per 100m2 of total floor area.  |
| Educational facility                | For a primary school - 1.1 space per full time equivalent employee plus 0.25 spaces per student for a pickup/set down area either on-site or on the public realm within 300m of the site.<br>For a secondary school - 1.1 per full time equivalent employee plus 0.1 spaces per student for a pickup/set down area either on-site or on the public realm within 300m of the site.<br>For a tertiary institution - 0.4 per student based on the maximum number of students on the site at any time. |
| Place of worship                    | 1 space for every 3 visitor seats.   |
| Child care facility                 | For a child care centre, 0.25 spaces per child<br>In all other cases, 1 per employee plus 0.25 per child (drop off/pick up bays).  |
| Health Related Uses                 |  |
| Consulting room                     | 4 spaces per consulting room excluding ancillary facilities.   |
| Hospital                            | 4.5 spaces per bed for a public hospital.<br><br>1.5 spaces per bed for a private hospital.  |
| Recreational and Entertainment Uses |  |
| Cinema complex                      | 0.2 spaces per seat.   |
| Concert hall / theatre              | 0.2 spaces per seat.   |
| Hotel                               | 1 space for every 2m2 of total floor area in a public bar plus 1 space for every 6m2 of total floor area available to the public in a lounge, beer garden plus 1 space per 2 gaming machines, plus 1 space per 3 seats in a restaurant.  |
| Indoor recreation facility          | 6.5 spaces per 100m2 of total floor area for a Fitness Centre<br><br>4.5 spaces per 100m2 of total floor area for all other Indoor recreation facilities.  |
| Industry/Employment Uses            |  |
| Fuel depot                          | 1.5 spaces per 100m2 total floor area<br><br>1 spaces per 100m2 of outdoor area used for fuel depot activity purposes.   |
| Industry                            | 1.5 spaces per 100m2 of total floor area.  |
| Store                               | 0.5 spaces per 100m2 of total floor area.  |
| Timber yard                         | 1.5 spaces per 100m2 of total floor area<br><br>1 space per 100m2 of outdoor area used for display purposes.   |
| Warehouse                           | 0.5 spaces per 100m2 total floor area.   |
| Other Uses                          |  |
| Funeral Parlour                     | 1 space per 5 seats in the chapel plus 1 space for each vehicle operated by the parlour.   |
| Radio or Television Station         | 5 spaces per 100m2 of total building floor area.   |

**Table 2 - Off-Street Car Parking Requirements in Designated Areas**

The following parking rates apply in any zone, subzone or other area described in the 'Designated Areas' column.

| Class of Development       | Car Parking Rate         |   | Designated Areas   |
|----------------------------|--------------------------|---|--|
|                            | Minimum number of spaces | Maximum number of spaces  |  |
| Development generally      |                          |   |  |
| All classes of development | No minimum.              | No maximum except in the Primary Pedestrian Area identified in the Primary Pedestrian Area Concept Plan, where the maximum is:<br><br>1 space for each dwelling with a total floor area less than 75 square metres<br><br>2 spaces for each dwelling with a total floor area between 75 square metres and 150 square metres | Capital City Zone<br>City Main Street Zone<br>City Riverbank Zone<br>Adelaide Park Lands Zone<br>Business Neighbourhood Zone (within the City of Adelaide) |

|   |   |  |  |
|---|---|--|--|
|   |   | 3 spaces for each dwelling with a total floor area greater than 150 square metres.<br><br>Residential flat building or Residential component of a multi-storey building: 1 visitor space for each 6 dwellings. | The St Andrews Hospital Precinct Subzone and Women's and Children's Hospital Precinct Subzone of the Community Facilities Zone   |
| Non-residential development                                 |   |  |  |
| Non-residential development excluding tourist accommodation | 3 spaces per 100m2 of gross leasable floor area.  | 5 spaces per 100m2 of gross leasable floor area.   | City Living Zone<br><br>Urban Corridor (Boulevard) Zone<br><br>Urban Corridor (Business) Zone<br><br>Urban Corridor (Living) Zone<br><br>Urban Corridor (Main Street ) Zone<br><br>Urban Neighbourhood Zone (except for Bowden, Brompton or Hindmarsh)   |

| Semi-detached dwelling                           | 0.75 per dwelling   | None specified  | Urban Neighbourhood Zone (in Bowden, Brompton or Hindmarsh)   |

**Table 3 - Off-Street Bicycle Parking Requirements**

The bicycle parking rates apply within designated areas located within parts of the State identified in the Schedule to Table 3.

| Class of Development                             | Bicycle Parking Rate  |  |
|--|---|--|
|  | Where a development comprises more than one development type, then the overall bicycle parking rate will be taken to be the sum of the bicycle parking rates for each development type.   |  |
| Consulting room                                  | 1 space per 20 employees plus 1 space per 20 consulting rooms for customers.  |  |
| Educational facility                             | For a secondary school - 1 space per 20 full-time time employees plus 10 percent of the total number of employee spaces for visitors.<br><br>For tertiary education - 1 space per 20 employees plus 1 space per 10 full time students.  |  |
| Hospital   | 1 space per 15 beds plus 1 space per 30 beds for visitors.  |  |
| Indoor recreation facility                       | 1 space per 4 employees plus 1 space per 200m2 of gross leasable floor area for visitors.   |  |
| Licensed Premises                                | 1 per 20 employees, plus 1 per 60 square metres total floor area, plus 1 per 40 square metres of bar floor area, plus 1 per 120 square metres lounge and beer garden floor area, plus 1 per 60 square metres dining floor area, plus 1 per 40 square metres gaming room floor area.   |  |
| Office   | 1 space for every 200m2 of gross leasable floor area plus 2 spaces plus 1 space per 1000m2 of gross leasable floor area for visitors.   |  |
| Child care facility                              | 1 space per 20 full time employees plus 1 space per 40 full time children.  |  |
| Recreation area                                  | 1 per 1500 spectator seats for employees plus 1 per 250 visitor and customers.  |  |
| Residential flat building                        | Within the City of Adelaide 1 for every dwelling for residents with a total floor area less than 150 square metres, 2 for every dwelling for residents with a total floor area greater than 150 square metres, plus 1 for every 10 dwellings for visitors, and in all other cases 1 space for every 4 dwellings for residents plus 1 for every 10 dwellings for visitors.       |  |
| Residential component of a multi-storey building | Within the City of Adelaide 1 for every dwelling for residents with a total floor area less than 150 square metres, 2 for every dwelling for residents with a total floor area greater than 150 square metres, plus 1 for every 10 dwellings for visitors, and in all other cases 1 space for every 4 dwellings for residents plus 1 space for every 10 dwellings for visitors. |  |
| Shop   | 1 space for every 300m2 of gross leasable floor area plus 1 space for every 600m2 of gross leasable floor area for customers.   |  |
| Tourist accommodation                            | 1 space for every 20 employees plus 2 for the first 40 rooms and 1 for every additional 40 rooms for visitors.  |  |
| Schedule to Table 3                              | Designated Area   | Relevant part of the State   |
|  | All zones   | The bicycle parking rate applies to a designated area located in a relevant part of the State described below.<br><br>City of Adelaide |

### Waste Treatment and Management Facilities

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |   |
|-----------------|---|
| DO 1            | Mitigation of the potential environmental and amenity impacts of waste treatment and management facilities. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome   | Deemed-to-Satisfy Criteria / Designated Performance Feature                        |
|---|--|
| Siting  |  |
| PO 1.1<br>Waste treatment and management facilities incorporate separation distances and attenuation measures within the site between waste operations areas (including all closed, operating and future cells) and sensitive receivers and sensitive environmental features to mitigate off-site impacts from noise, air and dust emissions.   | DTS/DPF 1.1<br>None are applicable.  |
| Soil and Water Protection   |  |
| PO 2.1<br>Soil, groundwater and surface water are protected from contamination from waste treatment and management facilities through measures such as: <ul style="list-style-type: none"> <li>(a) containing potential groundwater and surface water contaminants within waste operations areas</li> <li>(b) diverting clean stormwater away from waste operations areas and potentially contaminated areas</li> <li>(c) providing a leachate barrier between waste operations areas and underlying soil and groundwater.</li> </ul> | DTS/DPF 2.1<br>None are applicable.  |
| PO 2.2<br>Wastewater lagoons are set back from watercourses to minimise environmental harm and adverse effects on water resources.  | DTS/DPF 2.2<br>Wastewater lagoons are set back 50m or more from watercourse banks. |
| PO 2.3<br>Wastewater lagoons are designed and sited to: <ul style="list-style-type: none"> <li>(a) avoid intersecting underground waters;</li> <li>(b) avoid inundation by flood waters;</li> <li>(c) ensure lagoon contents do not overflow;</li> <li>(d) include a liner designed to prevent leakage.</li> </ul>  | DTS/DPF 2.3<br>None are applicable.  |

|  |   |
|--|---|
| PO 2.4   | DTS/DPF 2.4   |
| Waste operations areas of landfills and organic waste processing facilities are set back from watercourses to minimise adverse impacts on water resources.     | Waste operations areas are set back 100m or more from watercourse banks.  |
| Amenity  |   |
| PO 3.1   | DTS/DPF 3.1   |
| Waste treatment and management facilities are screened, located and designed to minimise adverse visual impacts on amenity.                                    | None are applicable.  |
| PO 3.2   | DTS/DPF 3.2   |
| Access routes to waste treatment and management facilities via residential streets is avoided.   | None are applicable.  |
| PO 3.3   | DTS/DPF 3.3   |
| Litter control measures minimise the incidence of windblown litter.  | None are applicable.  |
| PO 3.4   | DTS/DPF 3.4   |
| Waste treatment and management facilities are designed to minimise adverse impacts on both the site and surrounding areas from weed and vermin infestation.    | None are applicable.  |
| Access   |   |
| PO 4.1   | DTS/DPF 4.1   |
| Traffic circulation movements within any waste treatment or management site are designed to enable vehicles to enter and exit the site in a forward direction. | None are applicable.  |
| PO 4.2   | DTS/DPF 4.2   |
| Suitable access for emergency vehicles is provided to and within waste treatment or management sites.  | None are applicable.  |
| Fencing and Security   |   |
| PO 5.1   | DTS/DPF 5.1   |
| Security fencing provided around waste treatment and management facilities prevents unauthorised access to operations and potential hazard to the public.      | Chain wire mesh or pre-coated painted metal fencing 2m or more in height is erected along the perimeter of the waste treatment or waste management facility site. |
| Landfill   |   |
| PO 6.1   | DTS/DPF 6.1   |
| Landfill gas emissions are managed in an environmentally acceptable manner.  | None are applicable.  |
| PO 6.2   | DTS/DPF 6.2   |
| Landfill facilities are separated from areas of environmental significance and land used for public recreation and enjoyment.                                  | Landfill facilities are set back 250m or more from a public open space reserve, forest reserve, national park or Conservation Zone.                               |
| PO 6.3   | DTS/DPF 6.3   |
| Landfill facilities are located on land that is not subject to land slip.  | None are applicable.  |
| PO 6.4   | DTS/DPF 6.4   |
| Landfill facilities are separated from areas subject to flooding.  | Landfill facilities are set back 500m or more from land inundated in a 1% AEP flood event.  |
| Organic Waste Processing Facilities  |   |
| PO 7.1   | DTS/DPF 7.1   |
| Organic waste processing facilities are separated from the coast to avoid potential environment harm.  | Organic waste processing facilities are set back 500m or more from the coastal high water mark.   |
| PO 7.2   | DTS/DPF 7.2   |
| Organic waste processing facilities are located on land where the engineered liner and underlying seasonal water table cannot intersect.                       | None are applicable.  |
| PO 7.3   | DTS/DPF 7.3   |
| Organic waste processing facilities are sited away from areas of environmental significance and land used for public recreation and enjoyment.                 | Organic waste processing facilities are set back 250m or more from a public open space reserve, forest reserve, national park or a Conservation Zone.             |
| PO 7.4   | DTS/DPF 7.4   |
| Organic waste processing facilities are located on land that is not subject to land slip.  | None are applicable.  |
| PO 7.5   | DTS/DPF 7.5   |
| Organic waste processing facilities separated from areas subject to flooding.  | Organic waste processing facilities are set back 500m or more from land inundated in a 1% AEP flood event.  |
| Major Wastewater Treatment Facilities  |   |
| PO 8.1   | DTS/DPF 8.1   |
| Major wastewater treatment and disposal systems, including lagoons, are designed to  | None are applicable.  |

|  |                                     |
|--|-------------------------------------|
| minimise potential adverse odour impacts on sensitive receivers, minimise public and environmental health risks and protect water quality.   |                                     |
| PO 8.2<br>Artificial wetland systems for the storage of treated wastewater are designed and sited to minimise potential public health risks arising from the breeding of mosquitoes. | DTS/DPF 8.2<br>None are applicable. |

## Workers' accommodation and Settlements

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome |  |
|-----------------|--|
| DO 1            | Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome  | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|--|---|
| PO 1.1<br>Workers' accommodation and settlements are obscured from scenic routes, tourist destinations and areas of conservation significance or otherwise designed to complement the surrounding landscape. | DTS/DPF 1.1<br>None are applicable.                         |
| PO 1.2<br>Workers' accommodation and settlements are sited and designed to minimise nuisance impacts on the amenity of adjacent users of land.   | DTS/DPF 1.2<br>None are applicable.                         |
| PO 1.3<br>Workers' accommodation and settlements are built with materials and colours that blend with the landscape.   | DTS/DPF 1.3<br>None are applicable.                         |
| PO 1.4<br>Workers' accommodation and settlements are supplied with service infrastructure such as power, water and effluent disposal sufficient to satisfy the living requirements of workers.               | DTS/DPF 1.4<br>None are applicable.                         |

## Part 5 - Specified matters and areas identified under the Act and Regulations

The *Planning, Development and Infrastructure Act 2016* and the *Planning, Development and Infrastructure (General) Regulations 2017* allow the Planning and Design Code to specify matters and identify areas for certain purposes. Column A identifies the purpose of a specified matter or identified area and Column B identifies the relevant matter or zone, subzone or overlay in the Planning and Design Code or other area identified for that purpose, including limits to the extent of an identified area.

Where the extent of an identified area is limited in Column B by a figure, the figure is provided in Schedule 1 of this Part.

**Table 1 - Specified matters and areas identified under the Planning, Development and Infrastructure (General) Regulations 2017**

| Introduction (Column A)   | Specified matters / identified areas (Column B)  |
|---|--|
| Interpretation  |  |
| Areas identified as 'designated airport building heights area' for the purposes of clause 3(1) of the Regulations - Interpretation          | Airport Building Heights (Aircraft Landing Areas) Overlay<br>Airport Building Heights (Regulated) Overlay<br>Defence Aviation Area Overlay |
| Areas identified as 'designated environmental zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations - Interpretation | None specified   |
| Areas identified as 'designated flood zone, subzone or overlay' for   | Coastal Areas Overlay  |

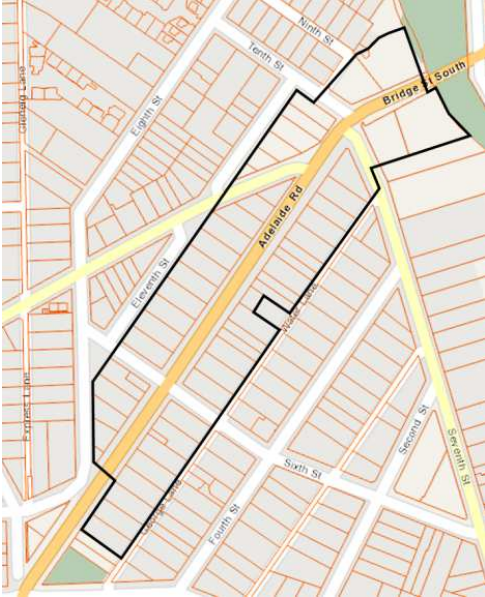

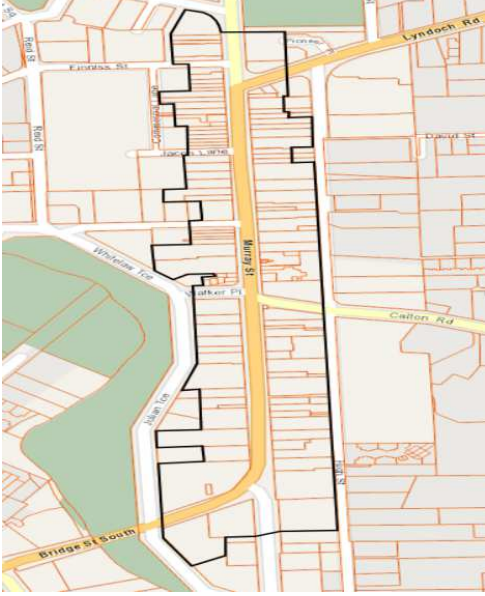

|  |  |
|--|--|
| the purposes of clause 3(1) of the Regulations - Interpretation  | Hazards (Flooding) Overlay<br>River Murray Flood Plain Protection Area Overlay   |
| Areas identified as 'designated regulated tree overlay' for the purposes of clause 3(1) of the Regulations - Interpretation  | Regulated and Significant Tree Overlay   |
| Building Rules: bushfire prone areas   |  |
| Areas identified as 'designated bushfire prone areas' for the purposes of clause 98(b) of the Regulations - Building Rules: bushfire prone areas                         | Refer to <i>Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements</i>  |
| Areas identified as a 'bushfire prone area' for the purposes of clause 14 of Schedule 8 of the Regulations - Additional requirements for bushfire prone areas            | Hazards (Bushfire - General Risk) Overlay<br>Hazards (Bushfire - High Risk) Overlay<br>Hazards (Bushfire - Medium Risk) Overlay<br>Hazards (Bushfire - Outback) Overlay<br>Hazards (Bushfire - Regional) Overlay<br>Hazards (Bushfire - Urban Interface) Overlay |
| Additions to definition of development   |  |
| Areas identified for the purposes of clause 1 of Schedule 3 under the Regulations - Excavating or filling in identified zones or areas                                   | Hills Face Zone<br>Hills Neighbourhood Zone<br>Significant Landscape Protection Overlay<br>Hazard (Acid Sulfate Soils) Overlay   |
| Areas identified for the purposes of clause 3 of Schedule 3 under the Regulations - Excavation or filling in identified zones or areas subject to inundation or flooding | In addition to a 'designated flood zone, subzone or overlay', the following:<br>None specified   |
| Exclusions from definition of development - general  |  |
| Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(i) of Schedule 4 under the Regulations - Council works                                      | Conservation Zone<br>Significant Landscape Protection Overlay  |
| Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(ii)(A) of Schedule 4 under the Regulations - Council works                                  | Coastal Areas Overlay  |
| Areas identified for the purposes of clause 4 (1)(a) of Schedule 4 under the Regulations - Outbuilding   | In addition to a 'designated flood zone, subzone or overlay', the following:<br>Hills Face Zone<br>Significant Landscape Protection Overlay  |
| Areas identified for the purposes of clause 4(1)(c) of Schedule 4 under the Regulations - Swimming pool  | In addition to a 'designated flood zone, subzone or overlay', the following:<br>Hills Face Zone  |
| Areas identified for the purposes of clause 4 (1)(d)(i)(B) of Schedule 4 under the Regulations - Fence not exceeding 2.1m in height                                      | In addition to a 'designated flood zone, subzone or overlay', the following:<br>Hills Face Zone<br>Significant Landscape Protection Overlay  |
| Areas identified for the purposes of clause 4(1)(i) of Schedule 4 under the Regulations - Deck   | In addition to a 'designated bushfire prone area', the following:<br>Coastal Areas Overlay<br>Hills Face Zone<br>Significant Landscape Protection Overlay  |
| Areas identified for the purposes of clause 10 of Schedule 4 under the Regulations - Demolition of the whole of a building   | Historic Area Overlay  |
| Areas identified for the purposes of clause 11 of Schedule 4 under the Regulations - Dams  | In addition to a 'designated flood zone, subzone or overlay', the following:<br>Hills Face Zone<br>Significant Landscape Protection Overlay  |
| Areas identified for the purposes of clause 13(1) of Schedule 4 under the Regulations - Aerials, towers  | Hills Face Zone<br>Significant Landscape Protection Overlay  |

|   |  |
|---|--|
| Areas identified for the purposes of clause 13(2) of Schedule 4 under the Regulations - Aerials, towers in the Hills Face Zone          | Hills Face Zone  |
| Relevant authority - Commission   |  |
| Areas identified for the purposes of clause 4(1) of Schedule 6 of the Regulations - Buildings exceeding 4 storeys                       | Those parts of the Design Overlay within the following areas:<br><br>City of Burnside<br><br>The Corporation of the City of Norwood Payneham and St Peters<br><br>City of Prospect<br><br>The Corporation of the City of Unley<br><br>City of West Torrens<br><br>City of Holdfast Bay |
| Areas identified for the purposes of clause 5(1) of Schedule 6 of the Regulations - Developments over \$3m in the City of Port Adelaide | Design Overlay   |
| Areas identified for the purposes of clause 8(1) of Schedule 6 of the Regulations - Developments over \$3m in the City of Charles Sturt | That part of the Urban Neighbourhood Zone identified as 'Bowden Urban Village' in the <i>Concept Plan Technical and Numeric Variation layer</i>  |
| Areas identified for the purposes of clause 11 of Schedule 6 of the Regulations - Developments in the show grounds                      | That part of the Recreation Zone in the City of Unley shown in Figure Un/1 of Schedule 1.  |
| State agency development exempt from approval   |  |
| Areas identified for the purposes of clause 3 of Schedule 13 of the Regulations - Certain development in part of City of Mitcham        | The area identified in Figure Mit/1 of Schedule 1  |

**Table 2 – Specified matters and areas identified under the Planning, Development and Infrastructure Act 2016**

| Introduction (Column A)  | Specified matters / identified areas (Column B)   |
|--|---|
| For the purposes of paragraph (g) of the definition of development under section 3(1) of the Act - External painting of a building   | Any building located within the area identified in Figure Ga/1 or Figure Ga/2 of Schedule 1.  |
| Land identified as an infrastructure reserve for the purposes of section 129 (1)(a)  | Land within the Infrastructure (Airfield) Zone located on the Andamooka Road (11km east of the eastern most boundary of Roxby Downs [Municipality]) and / or the site of Olympic Dam mining settlement (as per the approved Olympic Dam mining lease), within 150m north, and 50m south, of the existing road alignment of Andamooka Road, between the eastern boundary of the Roxby Downs (Municipality) and the eastern zone boundary of the Infrastructure (Airfield) Zone is land identified as having a land use that is suitable for infrastructure.  |
| For the purposes of paragraph (f) of the definition of 'development' under section 3(1) of the Act - Works in relation to a local heritage place   | The demolition, removal, conversion, alteration or external painting of, or addition to, the place, or any other work (not including internal painting but including, in the case of a tree, any tree-damaging activity) that could materially affect the heritage value of the place   |
| Pursuant to section 102(4) of the <i>Planning, Development and Infrastructure Act 2016</i> , a matter specified by the Planning and Design Code to be reserved on the application of the applicant | Any of the matters in DTS/DPF 1.1 of the Urban Tree Canopy Overlay  |
| 1. Development within the ambit of subclause (2) is specified as a class of development for the purposes of section 121(1) of the Act.   | 2. Development that is—<br>(a) within the area of a council that has determined to make design review available in its area by participating in the scheme determined by the Minister for the purposes of section 121 of the Act; and<br>(b) a form of development that is, or has the potential to be, either performance assessed development or restricted development that is within a class of development that has been—<br>(i) selected by the council as a class of development for the purposes of this clause; and<br>(ii) specified by the Chief Executive by a notice published on the SA planning portal for the purposes of this clause.<br><br>3. A council may from time to time vary the classes of development applying in its area under this clause by a further notice published by the Chief Executive on the SA planning portal at the request of the council. |

Part 6 - Index of Technical and Numeric Variations

Part 6.1 Minimum Allotment Sizes

| Minimum Site Area   |  |
|---|--|
| Minimum site area for a group dwelling is 250 sqm; residential flat building is 250 sqm   |  |
| Minimum site area for a detached dwelling is 100 sqm; semi-detached dwelling is 100 sqm; row dwelling is 100 sqm; group dwelling is 100 sqm; residential flat building is 100 sqm           |  |
| Minimum site area for a detached dwelling is 1,000 sqm  |  |
| Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 1,000 sqm; group dwelling is 1,000 sqm; residential flat building is 1,000 sqm |  |
| Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm       |  |
| Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 600 sqm; row dwelling is 400 sqm; group dwelling is 500 sqm   |  |
| Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 600 sqm; row dwelling is 450 sqm; group dwelling is 1,200 sqm; residential flat building is 450 sqm       |  |
| Minimum site area for a detached dwelling is 120 sqm; semi-detached dwelling is 120 sqm; row dwelling is 120 sqm; group dwelling is 120 sqm; residential flat building is 120 sqm           |  |
| Minimum site area for a detached dwelling is 1,200 sqm; semi-detached dwelling is 450 sqm; row dwelling is 350 sqm; group dwelling is 350 sqm; residential flat building is 350 sqm         |  |
| Minimum site area for a detached dwelling is 125 sqm; semi-detached dwelling is 125 sqm; row dwelling is 125 sqm; group dwelling is 275 sqm; residential flat building is 275 sqm           |  |
| Minimum site area for a detached dwelling is 150 sqm; semi-detached dwelling is 150 sqm; row dwelling is 150 sqm  |  |
| Minimum site area for a detached dwelling is 150 sqm; semi-detached dwelling is 150 sqm; row dwelling is 150 sqm; group dwelling is 150 sqm; residential flat building is 150 sqm           |  |
| Minimum site area for a detached dwelling is 1,500 sqm  |  |

| <b>Minimum Site Area</b>  |
|---|
| Minimum site area is 3 ha   |
| Minimum site area is 30 ha  |
| Minimum site area is 32 ha  |
| Minimum site area is 33 ha  |
| Minimum site area is 350 sqm  |
| Minimum site area is 400 sqm  |
| Minimum site area is 4,000 sqm  |
| Minimum site area is 4 ha   |
| Minimum site area is 40 ha  |
| Minimum site area is 420 sqm  |

### Part 6.3 Building Heights (Metres)

#### Maximum Building Height (Metres)

| <b>Maximum Building Height (Metres)</b> |
|---|
| Maximum building height is 4m           |
| Maximum building height is 4.5m         |
| Maximum building height is 5m           |
| Maximum building height is 5.6m         |
| Maximum building height is 5.7m         |
| Maximum building height is 6m           |
| Maximum building height is 6.5m         |
| Maximum building height is 7m           |
| Maximum building height is 8m           |
| Maximum building height is 8.2m         |
| Maximum building height is 8.5m         |
| Maximum building height is 9m           |
| Maximum building height is 10m          |
| Maximum building height is 11.5m        |

| <b>Maximum Building Height (Metres)</b>               |
|---|
| Maximum building height is 12m                        |
| Maximum building height is 12.5m                      |
| Maximum building height is 13.5m                      |
| Maximum building height is 14m                        |
| Maximum building height is 15m                        |
| Maximum building height is 16.5m                      |
| Maximum building height is 18m                        |
| Maximum building height is 18.5m                      |
| Maximum building height is 22m                        |
| Maximum building height is 24.5m                      |
| Maximum building height is 25.5m                      |
| Maximum building height is 28m                        |
| Maximum building height is 29m                        |
| Maximum building height is 32.5m                      |
| Maximum building height is 34m                        |
| Maximum building height is 36m                        |
| Maximum building height is 43m                        |
| Maximum building height is 53m                        |
| No prescribed height limit                            |
| Maximum building height is 7.5m                       |
| Maximum building height is 10.2m                      |
| Maximum building height is 10.5m                      |
| Maximum building height is 11m                        |
| Maximum building height is 20m                        |
| Maximum building height is 20.5m                      |
| Maximum building height is 28.5m                      |
| Maximum building height is 40.5m                      |
| Maximum building height is 48m                        |
| Maximum building height is 13m                        |
| Maximum building height is 17.5m                      |
| Maximum building height is 21m                        |
| Maximum building height is 15.1m AHD                  |
| Maximum building height is 8m restricted to 62m AHD   |
| Maximum building height is 8.3m AHD                   |
| Maximum building height is 9m restricted to 53.5m AHD |
| Maximum building height is 48.5m                      |
| Maximum building height is 60.5m                      |

**Part 6.4 Building Heights (Levels)**

**Minimum Building Height (Levels)**

| <b>Minimum Building Height (Levels)</b> |
|---|
| Minimum building height is 1 level      |
| Minimum building height is 2 levels     |
| Minimum building height is 3 levels     |
| Minimum building height is 4 levels     |

**Maximum Building Height (Levels)**

| <b>Maximum Building Height (Levels)</b> |
|---|
| Maximum building height is 1 level      |
| Maximum building height is 2 levels     |
| Maximum building height is 3 levels     |
| Maximum building height is 4 levels     |
| Maximum building height is 5 levels     |
| Maximum building height is 6 levels     |
| Maximum building height is 7 levels     |
| Maximum building height is 8 levels     |

| Minimum dwelling allotment size is 100 ha |
| Minimum dwelling allotment size is 200 ha |
| Minimum dwelling allotment size is 300 ha |
| Minimum dwelling allotment size is 900 ha |

### Part 6.13 Minimum Future Local Road Widening Setback

| <b>Minimum Future Local Road Widening Setback</b>   |
|---|
| Minimum future local road widening setback is 10.5m |
| Minimum future local road widening setback is 11m   |
| Minimum future local road widening setback is 12.5m |
| Minimum future local road widening setback is 12.9m |
| Minimum future local road widening setback is 13m   |
| Minimum future local road widening setback is 14m   |
| Minimum future local road widening setback is 16.5m |
| Minimum future local road widening setback is 18m   |
| Minimum future local road widening setback is 5m    |
| Minimum future local road widening setback is 8m    |
| Minimum future local road widening setback is 9.5m  |
| Minimum future local road widening setback is 7m    |
| Minimum future local road widening setback is 2.5m  |
| Minimum future local road widening setback is 6m    |

## Part 7 - Land Use Definitions

### Land Use Terms

The following table lists terms which may be used in this Planning and Design Code in relation to the use of land.

### Meaning of Terms

A term listed in Column A has the meaning set out beside that term in Column B.

## Inclusions and Exclusions

Land uses and activities set out in Column C are to be taken as being **included** in the meaning of the land use term set out in Column A.

Land uses and activities set out in Column D are to be taken as being **excluded** from the meaning of the land use term set out in Column A.

In the event of any inconsistency Column D prevails over Column C.

## Ancillary and Subordinate

Unless stated to the contrary, a term set out in the following table which purports to define a form of land use will be taken to include a use which is ancillary and subordinate to that defined use.

## No Definition

A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

## Land Use Definitions Table

| Land Use Term (Column A)             | Definition (Column B)  | Includes (Column C)  | Excludes (Column D)   |
|--------------------------------------|--|--|---|
| Adult entertainment premises         | Means a premises used for the exhibition, display, or performance of any entertainment or act which is sexually explicit such as nude dancing or lap dancing, and to which admittance by minors is restricted by law but does not include a personal or domestic services establishment  |  | Personal or domestic services establishment;<br>Shop.   |
| Adult products and services premises | Means a premises used for the sale, exchange, hire, exhibition, loan, delivery or display, or to otherwise render accessible or available to the public, sexually explicit material including: <ul style="list-style-type: none"> <li>(a) publications classified as restricted or prohibited under the <i>Classification (Publications, Films and Computer Games) Act 1995</i>; and/or</li> <li>(b) material compounds, objects or devices (other than contraception and medical treatments) designed to be used in connection with sexual behaviour or activities; and/or</li> <li>(c) films, video films or tapes, any other form of optical or electronic records from which a visual image may be produced or any other pictorial matter, the sale, delivery, exhibition, advertisement or display of which is restricted or prohibited under the <i>Classification (Publications, Films and Computer Games) Act 1995</i>.</li> </ul> It does not include premises used for prostitution. |  | Personal or domestic services establishment;<br>Shop.   |
| Affordable housing                   | Means housing that meets the relevant criteria for 'affordable housing' as determined by the Minister responsible for the <i>South Australian Housing Trust Act 1995</i> under Regulation 4 of the South Australian Housing Trust Regulations 2010.  |  |   |
| Agricultural building                | Means a building used wholly or partly for purposes associated with farming, commercial forestry, intensive animal husbandry, dairying or horticulture, or to support the operations of that use, but does not include frost fans or a building used wholly or partly for any of the following: <ul style="list-style-type: none"> <li>(a) the processing or packaging of commodities</li> <li>(b) the housing of animals for the purposes of intensive animal husbandry</li> <li>(c) the purposes of a dairy.</li> </ul>  | Farm shed;<br>Farm silo;<br>Horticultural shed;<br>Hay shed;<br>Implement shed;<br>Pump shed | Dairy;<br>Dwelling;<br>Industry;<br>Intensive animal husbandry;<br>Office;<br>Outbuilding;<br>Shop          |
| Ancillary accommodation              | Means accommodation that: <ul style="list-style-type: none"> <li>(a) is located on the same allotment as an existing dwelling; and</li> <li>(b) can be (but need not be) a self-contained residence; and</li> <li>(c) contains no more than 2 bedrooms or rooms or areas capable of being used as a bedroom; and</li> <li>(d) is subordinate to and does not have separate connection to utilities and services (such as electricity, gas, water, telecommunications, sewerage system, wastewater system or waste control system) to those servicing the existing dwelling.</li> </ul>   |  | Dwelling;<br>Tourist Accommodation  |
| Animal keeping                       | Means the boarding (short or long term), keeping, breeding or training of animals, except horses and/or commercially kept livestock.   | Dog kennelling<br>Catteries  | Aquaculture;<br>Farming;<br>Horse keeping;<br>Intensive animal husbandry;<br>Low intensity animal husbandry |
| Aquaculture                          | Has the same meaning as in the <i>Aquaculture Act 2001</i> .   |  | Intensive animal husbandry.   |
| Automotive collision repair          | Means repairs to motor vehicles involving structural repairs, panel beating, replacement of vehicle body parts or spray painting.  |  | Motor repair station  |

|                          |   |  |   |
|--------------------------|---|--|---|
| Bulky goods outlet       | Means premises used primarily for the sale, rental, display or offer by retail of goods, other than foodstuffs, clothing, footwear or personal effects goods, unless the sale, rental, display or offer by retail of the foodstuffs, clothing, footwear or personal effects goods is incidental to the sale, rental, display or offer by retail of other goods. Examples— The following are examples of goods that may be available or on display at bulky goods outlets or retail showrooms:<br><ul style="list-style-type: none"> <li>(a) automotive parts and accessories;</li> <li>(b) furniture;</li> <li>(c) floor coverings;</li> <li>(d) window coverings;</li> <li>(e) appliances or electronic equipment;</li> <li>(f) home entertainment goods;</li> <li>(g) lighting and electric light fittings;</li> <li>(h) curtains and fabric;</li> <li>(i) bedding and manchester;</li> <li>(j) party supplies;</li> <li>(k) animal and pet supplies;</li> <li>(l) camping and outdoor recreation supplies;</li> <li>(m) hardware;</li> <li>(n) garden plants (primarily in an indoor setting);</li> <li>(o) office equipment and stationery supplies;</li> <li>(p) baby equipment and accessories;</li> <li>(q) sporting, fitness and recreational equipment and accessories;</li> <li>(r) homewares;</li> <li>(s) children's play equipment.</li> </ul> |  |   |
| Caravan and tourist park | Means land used to provide short-term accommodation in caravans, recreational vehicles (RVs), cabins, tents and other similar demountable forms of shelter in a managed setting.  |  | Residential park  |
| Child care facility      | Means a place primarily for the care or instruction of children of less than primary school age, children with special needs or out-of-school-hours care (including vacation care) and not resident on the site.  | Child care centre;<br>Early learning centre;<br>Kindergarten;<br>Nursery;<br>Pre-school. |   |
| Commercial forestry      | Means the practice of planting and managing plantation forests that are to be harvested for wood products or other commercial purposes, including through the commercial exploitation of the carbon absorption capacity of the forest.  |  | Horticulture;<br>Cropping;<br>Farming.  |
| Community facility       | Means premises used for the provision of social, artistic, educational or community support services to the public but does not include a child care facility, educational facility, place of worship or indoor recreation facility.  | Library;<br>Community hall.  | Educational facility;<br>Place of worship;<br>Child care facility;<br>Indoor recreation facility                                  |
| Consulting Room          | Means a building or part of a building (not being a hospital) used in the practice of a profession by a medical, veterinary or dental practitioner, or a practitioner in any curative science, in the provision of medical services, mental, moral or family guidance, but does not involve any overnight accommodation other than for animals that are recovering from surgery, medical care or in for observation as part of a veterinary practice.   |  |   |
| Cropping                 | Means propagating, cultivating and/or harvesting of grains, cereals, oilseeds, lupins, legumes, hops, hemp, hay, lucerne or other similar plants or plant products for commercial production.   |  | Commercial forestry;<br>Horticulture;<br>Mushroom production.   |
| Dairy                    | Means a building or part of a building used for all or any of the operations of commercial milk production (whether mechanical or otherwise) and includes a milking shed, milk room, wash room or engine room.  |  |   |
| Detached dwelling        | Means a detached building comprising 1 dwelling on its own site and has a frontage to a public road, or to a road proposed in a plan of land division that is the subject of a current development authorisation  |  |   |
| Dwelling                 | Means a building or part of a building used as a self-contained residence.  |  | Ancillary accommodation   |
| Educational facility     | Means a primary school, secondary school, reception to year 12 school, college, university or technical institute, and includes an associated child care facility or institution for the care and maintenance of children.  |  |   |
| Electricity substation   | Means:<br><ul style="list-style-type: none"> <li>(a) works for the conversion, transformation or control of electricity by 1 or more transformers, or by any switchgear or other equipment;<br/>or</li> <li>(b) any equipment, building, structure or other works ancillary to or associated with works referred to in paragraph (a), other than any such works: <ul style="list-style-type: none"> <li>(i) that are mounted on a pole;<br/>or</li> <li>(ii) that are wholly enclosed in a weather-proof enclosure not exceeding 8.5m<sup>3</sup>;<br/>or</li> <li>(iii) that are incidental to any lawful use of the land which the works are situated.</li> </ul> </li> </ul>   |  |   |
| Farming                  | Means cropping, grazing or low intensity animal husbandry.  | Cropping;<br>Grazing;<br>Low intensity animal husbandry.                                 | Animal keeping;<br>Commercial forestry;<br>Horse keeping;<br>Horticulture;<br>Intensive animal husbandry;<br>Mushroom production. |

|                                   |  |   |  |
|-----------------------------------|--|---|--|
| Fuel depot                        | Means land used primarily for the storage of petrol, gas, oils or other petroleum products and within or upon which no retail trade is conducted.  |   |  |
| Function venue                    | Means premises used primarily for the hosting of events, conferences, conventions, receptions or functions.  |   |  |
| General industry                  | Means any industry other than a light industry or special industry.  |   |  |
| Group dwelling                    | Means 1 of a group of 2 or more detached buildings, each of which is used as a dwelling and 1 or more of which has a site without a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current development authorisation.   |   |  |
| Heavy vehicle parking             | Means the parking of any vehicle exceeding 3000 kg in weight (including the weight of any attached trailer) on land used for residential purposes.   |   |  |
| Home care                         | Has the same meaning as in the <i>Commonwealth Aged Care Act 1997</i> .  |   |  |
| Horse keeping                     | Means the keeping or husbandry of horses where more than 1 horse is kept per 3ha of land used for such purposes.   |   |  |
| Horticulture                      | Means the use of land for market gardening, viticulture, floriculture, orchards, wholesale plant nurseries or commercial turf growing.   |   | Commercial forestry;<br>Mushroom production.   |
| Hotel                             | Means premises licensed, or proposed to be licensed as a general and hotel licence under the <i>Liquor Licensing Act 1997</i> .  |   |  |
| Indoor recreation facility        | Means a building or part of a building designed or adapted primarily for recreation or fitness pursuits.   | Bowling alley;<br>Squash courts;<br>Fitness centre;<br>Gymnasium;<br>Pilates studio;<br>Yoga studio;<br>Dance studio;<br>Indoor swimming centre;<br>Indoor trampoline centre;<br>Indoor rock climbing centre;<br>Indoor children's play centre;<br>Indoor skating rink. |  |
| Industry                          | Means the carrying on, in the course of a trade or business, of any process (other than the generation of electricity using a renewable energy source or a process in the course of farming or mining) for, or incidental to:<br>(a) the making of any article, ship or vessel, or of part of any article, ship or vessel; or<br>(b) the altering, repairing, ornamenting, finishing, assembling, cleaning, washing, packing, bottling, canning or adapting for sale, or the breaking up or demolition, of any article, ship or vessel; or<br>(c) the getting, dressing or treating of materials.<br><br>The use may include:<br>(d) selling by wholesale of goods manufactured on site<br>(e) selling by retail of goods manufactured on site, provided the total floor area occupied for such sale does not exceed 250m <sup>2</sup> (and industrial will be construed accordingly). | General industry;<br>Light industry;<br>Special industry  |  |
| Intensive animal husbandry        | Means the commercial production of animals or animal products where the animals are kept in enclosures or other confinement and their main food source is introduced from outside the enclosures or area of confinement in which they are kept.  | Broiler shed;<br>Feedlot;<br>Poultry hatchery;<br>Piggery;<br>Poultry battery.  | Animal keeping;<br>Apiculture;<br>Aquaculture;<br>Horse keeping;<br>Low intensity animal husbandry;<br>Stock sales yard. |
| Landfill                          | Land used for the receipt and controlled disposal of refuse through burial and/or spreading over land.   |   |  |
| Light industry                    | Means an industry where the process carried on, the materials and machinery used, the transport of materials, goods or commodities to and from the land on or in which (wholly or in part) the industry is conducted and the scale of the industry does not:<br>(a) detrimentally affect the amenity of the locality or the amenity within the vicinity of the locality by reason of the establishment or the bulk of any building or structure, the emission of noise, vibration, smell, fumes, smoke, vapour, steam, soot, ash, dust, waste water, waste products, grit, oil, spilled light, or otherwise howsoever;<br>or<br>(b) directly or indirectly cause dangerous or congested traffic conditions in any nearby road.   |   |  |
| Low intensity animal husbandry    | Means the commercial production of animals or animal products (eg meat, wool) on either native or improved pastures or vegetation where the animal's main food source is obtained by grazing or foraging.  | Grazing;  | Animal keeping;<br>Aquaculture;<br>Horse keeping;<br>Intensive animal husbandry.   |
| Motor repair station              | Means any land or building used for carrying out repairs, servicing and/or maintenance (other than panel beating or spray painting) to motor vehicles and / or farm machinery.   |   | Automotive collision repair  |
| Mushroom production               | Means the commercial production of mushrooms or any other type of fungi.   |   |  |
| Office                            | Means any building or part of a building used for administration or the practice of a profession, but does not include a consulting room or premises where materials are stored for sale or manufacture.   |   | Consulting room.   |
| Organic waste processing facility | Means the commercial processing of organic waste by composting, mulching, shredding, grinding or similar process into organic material for use as mulch, soil improver, growing medium or the like.  |   |  |
| Outbuilding                       | Means a non-habitable detached building on the same site as a main building which is ancillary and subordinate to the main building and has a use and function which relates to the main building, but does not include a private bushfire shelter.  |   | Private bushfire shelter.  |

|   |   |   |   |
|---|---|---|---|
| Personal or domestic services establishment | Means premises used for the provision of services catering to the personal or domestic needs of customers.<br>Examples- The following are examples of services that may be available at personal and domestic services establishments:<br>(a) clothing repair and alterations;<br>(b) cutting, trimming and styling hair;<br>(c) domestic pet grooming;<br>(d) manicures and pedicures;<br>(e) non-surgical cosmetic procedures;<br>(f) personal care procedures;<br>(g) self-service clothes laundering;<br>(h) shoe repair;<br>(i) watch repair.  |   | Adult entertainment premises;<br>Adult products and services premises;<br>Consulting room;<br>Office;<br>Financial institute. |
| Place of worship                            | Means premises used by an organised group for worship and religious activities.<br>The use may include facilities for social, educational and charitable activities associated with the congregation.   | Chapel;<br>Church;<br>Mosque;<br>Synagogue;<br>Temple.  | Funeral parlour.  |
| Protective tree netting structure           | Means netting and any associated structure that:<br>(a) is designed to protect trees or plants grown for the purpose of commercial horticulture; and<br>(b) consists of a netting canopy attached to a structure (such as poles and cables).  |   |   |
| Public service depot                        | Means land used for storage and operations connected with the provision of public services (including gas, electricity, water supply, sewerage, drainage, roadworks or telecommunication services) by a body responsible for the provision of those services.   |   |   |
| Recreation area                             | Means any park, garden, children's playground or sports ground that is under the care, control and management of the Crown or a council, and is open to the public without payment of a charge.   | Outdoor public sports courts;<br>Public ovals and fields.   | Golf course.  |
| Renewable energy facility                   | Means land and/or water used to generate electricity from a renewable source such as wind, solar, tidal, hydropower, biomass and/or geothermal. This use may also include:<br>(a) any associated facility for the storage and/or transmission of the generated electricity;<br>(b) any building or structure used in connection with the generation of electricity.   | Battery storage facility;<br>Hydropower or pumped hydropower facility;<br>Solar power facility;<br>Wave power generator;<br>Wind farm |   |
| Replacement building                        | The construction of a new building in the same, or substantially the same, position as a building which was demolished within the previous 3 years and has the same, or substantially the same, layout and external appearance as the previous building.  |   |   |
| Residential care                            | Has the same meaning as in the <i>Commonwealth Aged Care Act 1997</i> .   |   |   |
| Residential flat building                   | Means a single building in which there are 2 or more dwellings.   |   | Group dwelling;<br>Row dwelling;<br>Semi-detached dwelling;   |
| Residential park                            | Means a residential park operating under the regulatory framework of the <i>Residential Parks Act 2007</i> .  |   | Caravan and tourist park;   |
| Restaurant                                  | Means land used primarily for the consumption of meals on the site.   |   |   |
| Retail fuel outlet                          | Means land used for:<br>(a) the fuelling of motor vehicles involving the sale by retail of petrol, oil, liquid petroleum gas, automotive distillate and any other fuels; and<br>(b) the sale by retail of food, drinks and other convenience goods for consumption on or off the land; and<br><br>both are operated as and constitute one integrated facility where on-site facilities, systems and processes, car parking and access and egress are all shared.<br><br>The use may also include one or more of the following secondary activities:<br><br>(c) the washing and cleaning of motor vehicles<br>(d) the washing of other equipment or things including dogs and other pets<br>(e) the provision (on a paid or free basis) of facilities for charging electric vehicles<br>(f) the hiring of trailers<br>(g) selling of motor vehicle accessories and/or parts<br>(h) the installation of motor vehicle accessories and/or parts. |   | Fuel depot;<br>Motor repair station.  |
| Retirement facility                         | Means a facility operating under the regulatory framework of the <i>Retirement Villages Act 2016</i> .  |   |   |
| Row dwelling                                | Means a dwelling:<br>(a) occupying its own site and has a frontage to a public road, or to a road proposed in a plan of land division that is the subject of a current development authorisation; and<br>(b) comprising 1 of 3 or more dwellings erected side by side, joined together and forming, by themselves, a single building.   |   |   |
| Sales office                                | Means the use of an existing building or premises for a temporary period of no more than 2 years to display land parcels or buildings that are for sale, proposed to be sold, or can be won as a prize in a competition.  |   | Office  |

|                             |  |   |  |
|-----------------------------|--|---|--|
| Semi-detached dwelling      | Means a dwelling:<br>(a) occupying its own site and has a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current planning authorisation; and<br>(b) comprising 1 of 2 dwellings erected side by side, joined together and forming, by themselves, a single building.  |   |  |
| Service trade premises      | Means premises used primarily for the sale, rental or display of any of the following:<br>(a) basic plant, equipment or machinery used in agriculture or industry; or<br>(b) boats; or<br>(c) caravans and recreational vehicles (RVs); or<br>(d) domestic garages; or<br>(e) sheds; or<br>(f) outbuildings; or<br>(g) motor vehicles; or<br>(h) marquees; or<br>(i) trailers; or<br>(j) swimming pools, equipment and accessories; or<br>(k) building materials in bulk supply; or<br>(l) landscaping materials; or<br>(m) garden plants (primarily in an outdoor setting); or<br>(n) agricultural supplies such as agricultural chemicals, fertilisers, seed and animal feed; or<br>(o) rainwater tanks and irrigation supplies;<br><br>or similar articles or merchandise.<br><br>The use may also include the servicing and repair of any of the listed items (but not vehicle panel beating or spray painting). | Motor vehicle showroom;<br>Used car yard.   | Bulky goods outlet.  |
| Shop                        | Means:<br>(a) premises used primarily for the sale by retail, rental or display of goods, foodstuffs, merchandise or materials; or<br>(b) a personal or domestic services establishment.   | Bulky goods outlet;<br>Personal or domestic services establishment;<br>Restaurant | Adult entertainment premises;<br>Adult products and services premises;<br>Hotel;<br>Motor repair station;<br>Retail fuel outlet;<br>Service trade premises;<br>Wholesale plant nursery |
| Special Industry            | Means an industry where the processes carried on, the methods of manufacture adopted or the particular materials or goods used, produced or stored, are likely to:<br><br>(a) cause or create dust, fumes, vapours, smells or gases; or<br>(b) discharge foul liquid or blood or other substance or impurities liable to become foul,<br><br>and thereby:<br><br>(c) endanger, injure or detrimentally affect the life, health or property of any person (other than any person employed or engaged in the industry); or<br>(d) produce conditions which are, or may become, offensive or repugnant to the occupiers or users of land in the locality of or within the vicinity of the locality of the land on which (whether wholly or partly) the industry is conducted.   |   |  |
| Stock sales yard            | Means land or premises used for the commercial conduct of buying and selling of livestock.   |   | Stock slaughter works.   |
| Stock slaughter works       | Means a building or part of a building, or land used primarily for slaughter of stock (including camels, goats and deer) or poultry, This use may also include:<br>(a) the keeping of animals prior to slaughter on site<br>(b) processing of animal products for human or animal consumption.   |   | Retail butcher.  |
| Store                       | Means a building or enclosed land used for the storage of goods and within or upon which no trade (whether wholesale or retail) or industry is carried on.   |   | Junk yard;<br>Outbuilding;<br>Public service depot.  |
| Student accommodation       | Mean premises used to accommodate students in room or dormitory style accommodation that can be (but need not be) self-contained and that includes common facilities for shared use by student occupants such as:<br>(a) shared cooking facilities and/or the provision of meals;<br>(b) common rooms and recreation areas;<br>(c) shared laundry facilities or a laundry service; or<br>(d) shared bathroom facilities.   |   | Dwelling;<br>Residential flat building.  |
| Supported accommodation     | Means premises in which residential accommodation is provided to persons requiring/together with regular medical and/or personal care assistance, but does not include home care.  | Nursing home;<br>Residential care   | Hospital;<br>Retirement facility.  |
| Telecommunications facility | Means a facility within the meaning of the <i>Commonwealth Telecommunications Act 1997</i> .   |   |  |

|   |  |  |                                 |
|---|--|--|---------------------------------|
| Temporary accommodation in an area affected by bushfire | Means the construction or placement of a building or structure on land on which a dwelling, or part of a dwelling, has been destroyed or significantly damaged by a bushfire if:<br>(a) the building or structure is to be used as accommodation by the owner of the land and<br>(b) the building or structure is a minimum of 20 metres from any remaining or regenerating cluster of vegetation (whether that vegetation is on the land or on adjoining land) and<br>(c) the owner of the land complies with any requirements of the South Australian Country Fire Service relating to the maintenance of a clearance area between the temporary accommodation and any remaining or regenerating cluster of vegetation and<br>(d) the building or structure is to be used as accommodation:<br>(i) for a period not exceeding 2 years or<br>(ii) until a Class 1a building on the land is able to be occupied in accordance with regulation 103 of the Planning, Development and Infrastructure (General) Regulations 2017,<br><br>whichever occurs first. |  |                                 |
| Tourist accommodation                                   | Means premises in which temporary or short-term accommodation is provided to travellers on a commercial basis.<br><br>This use may also include:<br>(a) onsite services and facilities primarily for the use by guests;<br>(b) facilities for the management of the accommodation.   | Caravan and tourist park   | Campground;<br>Residential Park |
| Warehouse   | Means a building or enclosed land used for the storage of goods and the carrying out of commercial transactions involving the sale of such goods, but does not include any land or building used for sale by retail.   |  | Store                           |
| Wind farm   | Means land used to generate electricity from wind force with wind turbine generators.<br>This use may also include:<br>(a) any associated facility for the storage and/or transmission of the generated electricity;<br>(b) any building or structure used in connection with the generation of electricity including a wind turbine, substation, maintenance shed, access road or wind monitoring mast.<br><br>The use does not include a wind farm principally used to supply and/or store electricity to an existing use of land (e.g., domestic wind generator).   |  |                                 |
| Workers' accommodation                                  | Means premises used to accommodate workers on a temporary basis while they carry out employment:<br>(a) on the same site as the workers' accommodation; or<br>(b) in mining or petroleum extraction; or<br>(c) in seasonally intensive rural activities including fruit picking, pruning, animal shearing, meat processing, bulk handling or freight handling; or<br>(d) in the construction of essential infrastructure.  | Mining camp;<br>Road workers camp;<br>Shearing quarters;<br>Railway workers camp | Tourist accommodation.          |

## Part 8 - Administrative Terms and Definitions

The following table lists terms which may be used to assist with the interpretation of policy used in the Planning and Design Code.

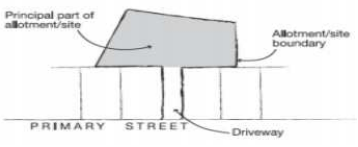

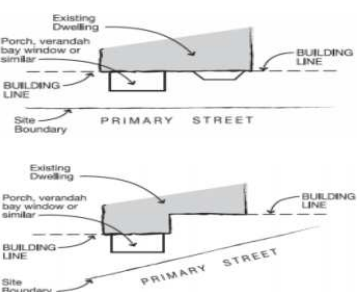

### Meaning of Terms

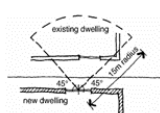

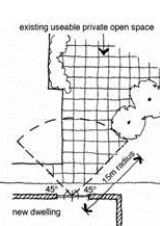

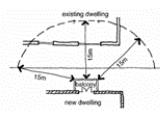

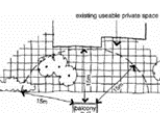

A term listed in Column A has the meaning set out beside that term in Column B. Column C contains, where applicable, illustrations to assist with the interpretation of the meaning provided in Column B.

### No Definition

A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

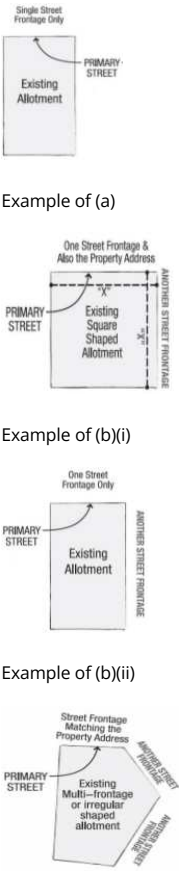

## Administrative Terms and Definitions Table

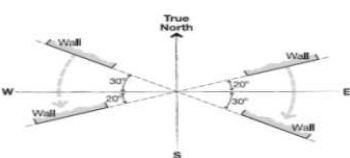

| Term<br>(Column A)     | Definition<br>(Column B)   | Illustrations<br>(Column C)  |
|------------------------|--|--|
| Activity centre        | <p>Means land contained in a Local Activity Centre Zone, Suburban Activity Centre Zone, Suburban Main Street Zone, Township Activity Centre Zone, Township Main Street Zone, Urban Activity Centre Zone, Urban Corridor (Main Street) Zone, Urban Corridor Living Retail Subzone, Urban Neighbourhood Retail Subzone, Activity Node Subzone, Retail Activity Centre Subzone or in relation to the Emerging Activity Centre Subzone in the Master Planned Neighbourhood Zone or the Emerging Township Activity Centre Subzone in the Master Planned Township Zone, either:</p> <ul style="list-style-type: none"> <li>(a) land identified for the purposes of an activity centre on a building envelope plan</li> <li>(b) an activity centre nominated on a Concept Plan in Part 12 of the Code.</li> </ul> |  |
| AEP                    | Means annual exceedance probability  |  |
| AHD                    | Means Australian Height Datum.   |  |
| ANEF                   | Means Australian Noise Exposure Forecast.  |  |
| Asset protection zone  | <p>In relation to bushfire protection, means an area generally clear of vegetation that is maintained to minimise the spread of fire between areas of hazardous vegetation and habitable buildings.</p> <p>Asset protection zones may incorporate features such as driveways, vegetable gardens or landscaped gardens incorporating deciduous trees and fire-retardant plant species.</p> <p>Note: this term has been defined for use in the Planning and Design Code. Other organisations or legislation may use the same term but with different meaning and for different purposes.</p>   |    |
| Battle-axe allotment   | <p>Means an allotment or site that comprises:</p> <ul style="list-style-type: none"> <li>(a) a driveway or 'handle' (and any related open space) that leads back from a road to the balance of the allotment or site; and</li> <li>(b) a balance of the allotment or site that is the principal part of the allotment or site and that does not have a boundary with a road.</li> </ul>  |  <p>Note: Battle-axe allotments are often referred to as 'hammerhead' or 'flagpole' allotments.</p> |
| Building envelope plan | Means a building envelope plan that has been approved under the Planning, Development and Infrastructure (General) Regulations 2017, has been published on the SA planning portal by the Chief Executive, and applies in relation to the site where the relevant development is proposed to be situated.   |  |
| Building height        | <p>Means the maximum vertical distance between the lower of the natural or finished ground level or a measurement point specified by the applicable policy of the Code (in which case the Code policy will prevail in the event of any inconsistency) at any point of any part of a building and the finished roof height at its highest point, ignoring any antenna, aerial, chimney, flagpole or the like. For the purposes of this definition, building does not include any of the following:</p> <ul style="list-style-type: none"> <li>(a) flues connected to a sewerage system</li> <li>(b) telecommunications facility tower or monopole</li> <li>(c) electricity pole or tower</li> <li>(d) or any similar structure.</li> </ul>  |  |
| Building level         | Means that portion of a building which is situated between the top of any floor and the top of the next floor above it, and if there is no floor above it, that portion between the top of the floor and the ceiling above it. It does not include any mezzanine or any building level having a floor that is located 1.5m or more below finished ground level.  |  |
| Building line          | In relation to a building on a site, means a line drawn parallel to the wall of the building closest to the boundary of the site that faces the primary street and any existing projection from that wall of the building such as a verandah, porch, balcony, awning or bay window is not to be taken to form part of the building for the purposes of determining the relevant wall of the building.  |    |
| Bushfire buffer zone   | In relation to bushfire protection, means an area of land designed to isolate residential allotments from areas that pose a bushfire risk such as areas with rugged terrain or hazardous vegetation.   |    |

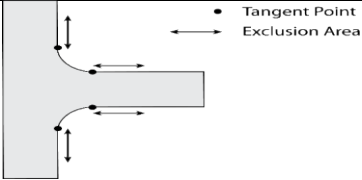

|  |   |  |
|--|---|--|
|  | Note: this term has been defined for use in the Planning and Design Code. Other organisations or legislation may use the same term but with different meaning and for different purposes.   |  |
| Catalyst site                          | Means a site greater than 1500m <sup>2</sup> , which may include one or more allotments   |  |
| Central site                           | Means the site of a row dwelling or dwelling in a terrace arrangement that does not share a side boundary with an allotment outside of the development site.  |  |
| Class 1 activity                       | Has the same meaning as in the <i>Practice Direction 14 Site Contamination Assessment</i>   |  |
| Class 2 activity                       | Has the same meaning as in the <i>Practice Direction 14 Site Contamination Assessment</i>   |  |
| Communal open space                    | Means open space shared by more than one dwelling, but is not publicly accessible.<br><br>It excludes any of the following:<br><br>(a) private open space<br>(b) public rights of way<br>(c) private streets<br>(d) parking areas and driveways;<br>(e) service and storage areas<br>(f) land with a minimum dimension less than 2.0m.  |  |
| Community wastewater management system | Means a system for the collection and management of wastewater generated in a town, regional or other community.  |  |
| Defence aviation area                  | Has the same meaning as in the Commonwealth <i>Defence Act 1903</i> .   |  |
| Direct overlooking                     | In relation to direct overlooking from a window, is limited to an area that falls within a horizontal distance of 15 metres measured from the centre line of the overlooking window and not less than 45 degree angle from the plane of that wall containing the overlooking window.<br><br>In relation to direct overlooking from a deck, balcony or terrace, is limited to an area that falls within a horizontal distance of 15 metres measured from any point of the overlooking deck, balcony or terrace.  | <p>Overlooking window</p>   <p>Overlooking deck, balcony or terrace</p>   |
| EPA Licence                            | Means an activity requiring a licence under the <i>Environment Protection Act 1993</i> (and this will determine the applicable referral fee under the 'Chief Executive Schemes and Requirements as to the Payment and Distribution of Fees under the Planning, Development and Infrastructure (Fees, Charges and Contributions) Regulations 2019')  |  |
| Exceedances per year (EY)              | Means the number of times an event is likely to occur or be exceeded within any given year.   |  |
| Excluded boundary                      | Means, for the purposes of Table 5 – Procedural Matters (PM) – Notification, an allotment boundary where the allotment and the adjoining allotment are both part of the development site.   |  |
| Excluded building                      | Means, for the purposes of Table 5 - Procedural Matters (PM) - Notification, a building, structure or landscape feature (or part thereof) that is:<br><br>(a) in an area established as a State Heritage Area under the <i>Heritage Places Act 1993</i> and the relevant authority is of the opinion that the building, structure or landscape feature (or part thereof) does not contribute to the buildings or features of identified heritage value within the State Heritage Area; or<br><br>(b) in a Historic Area Overlay and the building (or part thereof): |  |

|  |  |  |
|--|--|--|
|  | <p>(i) is an ancillary building; or</p> <p>(ii) in the opinion of the relevant authority, does not demonstrate the historic characteristics as expressed in the Historic Area Statement</p> <p>but does not include a building, structure or landscape feature (or part thereof) that is specifically listed in Part 11 of the Code as a Local Heritage Place or a State Heritage Place in the South Australian Heritage Register.</p>   |  |
| Excluded land division                 | Means, for the purposes of Affordable Housing Overlay - Procedural Matters (PM) - Referrals, land division that reflects the site boundaries illustrated and approved in an operative or existing development authorisation for residential development under the <i>Development Act 1993</i> or <i>Planning, Development and Infrastructure Act 2016</i> .  |  |
| FFL                                    | Means finished floor level.  |  |
| Gross leasable floor area              | Means the total floor area of a building excluding public or common tenancy areas such as malls, hallways, verandahs, public or shared tenancy toilets, common storage areas and loading docks.  |  |
| Groundwater                            | Means water that is naturally contained beneath the surface of the ground.   |  |
| Habitable room                         | Means any room used for domestic purposes other than a bathroom, laundry, toilet, pantry, walk-in wardrobe, stair, dedicated corridor/hallway, lobby, clothes drying room or other space of a specialised nature occupied neither frequently nor for extended periods.   |  |
| Heritage agreement                     | In relation to State Heritage, is an agreement that is registered under section 34 of the <i>Heritage Places Act 1993</i> .  |  |
| High frequency public transit area     | <p>A site that is wholly located within Metropolitan Adelaide and satisfies one or more of the following:</p> <ul style="list-style-type: none"> <li>(a) is within 200 metres of any section of road reserve along which a bus service operates as a high frequency public transit service (2)</li> <li>(b) is within 400 metres of a bus interchange (1)</li> <li>(c) is within 400 metres of an O-Bahn interchange (1)</li> <li>(d) is within 400 metres of a passenger rail station (1)</li> <li>(e) is within 400 metres of a passenger tram station (1)</li> <li>(f) is within 400 metres of the Adelaide Parklands.</li> </ul> <p>[NOTE(S): (1) Measured from an areas that contains any platform(s), shelter(s) or stop(s) where people congregate for the purpose waiting to board a bus, tram or train, but does not include areas used for the parking of vehicles. (2) A high frequency public transit service is a route serviced every 15 minutes between 7:30am and 6:30pm Monday to Friday and every 30 minutes at night, Saturday, Sunday and public holidays until 10pm.]</p> |  |
| High net residential density           | Means greater than 70 dwelling units per hectare.  |  |
| High-rise                              | In relation to development, means 7 building levels and above.   |  |
| Hours of operation                     | Means the hours that a land use is open to the public or conducting activities related to the land use, not including administration or routine activities normally associated with opening and closing or start up and shut down.   |  |
| Human wastewater                       | Has the same meaning as in the <i>Environment Protection (Water Quality) Policy 2015</i> .   |  |
| Liquid waste                           | Means waste classified as liquid waste in accordance with the assessment process set out in the guideline Liquid waste classification test, re-issued by the Environment Protection Authority in September 2003; as defined in Schedule 1 of the <i>Environment Protection Act 1993</i> .  |  |
| Listed waste                           | Means a substance or thing listed in Part B of Schedule 1 of the <i>Environment Protection Act 1993</i> .  |  |
| Low net residential density            | Means less than 35 dwelling units per hectare  |  |
| Low-rise                               | In relation to development, means up to and including 2 building levels.   |  |
| Medical waste                          | Has the same meaning as in the <i>Environment Protection (Waste to Resources) Policy 2010</i> .  |  |
| Medium net residential density         | Means 35 to 70 dwelling units per hectare.   |  |
| Medium-rise                            | In relation to development, means 3 to 6 building levels.  |  |
| Mezzanine                              | Means an intermediate floor within a building level that is open to the floor below and does not extend over the whole floor space.  |  |
| More sensitive use                     | Has the same meaning as in the <i>Practice Direction 14 Site Contamination Assessment</i>  |  |
| More than one dwelling on an allotment | <p>Reference to 'dwelling' in this phrase includes any dwelling that:</p> <ul style="list-style-type: none"> <li>(a) already exists on the allotment</li> <li>or</li> <li>(b) has a valid development authorisation for construction on the allotment</li> <li>or</li> <li>(c) is subject to a development application that is yet to be determined.</li> </ul>  |  |
| Native vegetation                      | Has the same meaning as in the <i>Native Vegetation Act 1991</i> .   |  |

|                                     |  |   |
|-------------------------------------|--|---|
| <p>Neighbourhood-type zone</p>      | <p>Means any of the following:<br/>                 Business Neighbourhood Zone<br/>                 City Living Zone<br/>                 Established Neighbourhood Zone<br/>                 General Neighbourhood Zone<br/>                 Golf Course Estate Zone<br/>                 Hills Neighbourhood Zone<br/>                 Housing Diversity Neighbourhood Zone<br/>                 Master Planned Neighbourhood Zone<br/>                 Master Planned Renewal Zone<br/>                 Master Planned Township Zone<br/>                 Neighbourhood Zone<br/>                 Residential Park Zone<br/>                 Rural Living Zone<br/>                 Rural Neighbourhood Zone<br/>                 Rural Settlement Zone<br/>                 Rural Shack Settlement Zone<br/>                 Suburban Neighbourhood Zone<br/>                 Township Zone<br/>                 Township Neighbourhood Zone<br/>                 Urban Renewal Neighbourhood Zone<br/>                 Waterfront Neighbourhood Zone</p> |   |
| <p>Net residential density</p>      | <p>Is calculated by dividing the total number of dwellings by the area of residential land that they occupy (excluding other land uses, roads, public open space and services) and expressed as dwelling units per hectare (du/ha)</p>   |   |
| <p>Non-sensitive use</p>            | <p>Means use of land other than sensitive use.</p>   |   |
| <p>Post height</p>                  | <p>Means the height of the post measured from the top of its footings or a measurement point specified by the applicable policy of the Code (in which case the Code policy will prevail in the event of any inconsistency) noting that the height measurement does not include any part of the post that is concealed behind an eave or similar roof structure and not visible external to the land.</p>   |   |
| <p>Power system</p>                 | <p>Has the same meaning as in the <i>Electricity Act 1996</i>.</p>   |   |
| <p>Prescribed approved activity</p> | <p>Means any of the following:<br/>                 (a) the on-site storage or disposal of domestic waste<br/>                 (b) a regulated beverage container activity<br/>                 (c) a regulated drop-off station for e-waste<br/>                 (d) the temporary on-site storage of waste (other than tyre waste) while awaiting transport to another place<br/>                 (e) incineration by way of thermal oxidation using fuel burning equipment for the disposal of solid trade waste with a processing capacity not exceeding 100 kilograms per hour<br/>                 (f) the storage or disposal of tyre waste in a manner approved by the Environment protection Authority<br/>                 (g) the disposal of human wastewater or sewage to land in a manner approved by the Environment protection Authority.</p>  |   |
| <p>Prescribed factors</p>           | <p>Has the same meaning as in Schedule 1 of the <i>Environment Protection Act 1993</i>.</p>  |   |
| <p>Primary street</p>               | <p>In relation to an existing or proposed building on a site is:</p> <p>(a) in the case of a site that has a frontage to only 1 road - that road;</p> <p>(b) in the case of a site that has a frontage to 2 roads:<br/>                 (i) if the frontages are identical in length - the road that forms part of the street address of the building, as determined by the council for the relevant area when it is allocating numbers to building and allotments under section 220 of the <i>Local Government Act 1999</i>; or<br/>                 (ii) in any other case, the road in relation to which the site has a shorter frontage; or</p> <p>(c) in any other case, the road that forms part of the street address of the building as determined by the council for the relevant area when it is allocated numbers to buildings and allotments under section 220 of the <i>Local Government Act 1999</i>.</p>  |  <p>The diagrams illustrate the determination of a primary street for different allotment configurations:</p> <ul style="list-style-type: none"> <li><b>Example of (a):</b> A rectangular allotment with a single street frontage. The primary street is the one street frontage.</li> <li><b>Example of (b)(i):</b> A square-shaped allotment with two street frontages of equal length. The primary street is the one that forms part of the property address.</li> <li><b>Example of (b)(ii):</b> A rectangular allotment with two street frontages of unequal length. The primary street is the shorter frontage.</li> <li><b>Example of (c):</b> An irregularly shaped allotment with multiple street frontages. The primary street is the one that matches the property address.</li> </ul> |

|                              |  |  |
|------------------------------|--|--|
| Private open space           | <p>Means a private outdoor area associated with a dwelling that:</p> <ul style="list-style-type: none"> <li>(a) is for the exclusive use of the occupants of that dwelling</li> <li>(b) has a minimum dimension of 2.0m for ground level areas and 1.8m for balconies</li> <li>(c) is screened from public view by a building, fence, wall or other similar structure with a minimum height of 1.8m above ground level and a maximum transparency of 20%.</li> </ul> <p>Private open space may include verandahs, alfrescos, balconies, terraces, decks where not enclosed on all sides. Private open space does not include areas used for bin storage, laundry drying, rainwater tanks, utilities, driveways or vehicle parking areas.</p> |  |
| Proclaimed shipwreck         | <p>Means:</p> <ul style="list-style-type: none"> <li>(a) a historic shipwreck or historic relic within the meaning of the <i>Historic Shipwrecks Act 1981</i>;</li> <li>or</li> <li>(b) a historic shipwreck or historic relic within the meaning of the <i>Commonwealth Underwater Cultural Heritage Act 2018</i>.</li> </ul>   |  |
| Quarantine waste             | <p>Means waste that is subject to quarantine under the <i>Quarantine Act 1908</i> of the Commonwealth.</p>   |  |
| Regulated surface level      | <p>Means the measured ground surface level within the boundaries of the Tunnel Protection Overlay as established at the time of commencement of operation of the Tunnel Corridor Code Amendment, as shown on the Planning Reference layer of the SA Property and Planning Atlas.</p>   |  |
| Relevant certificate         | <p>Means a certificate by, or on behalf of, the South Australian Country Fire Service certifying that:</p> <ul style="list-style-type: none"> <li>(a) a Bushfire Attack Level assessment of the development has been undertaken within 3 months prior to lodgement of the application for planning consent in respect of the development and</li> <li>(b) the Bushfire Attack Level is -19 range.</li> </ul>   |  |
| Representative buildings     | <p>Representative buildings referenced in Historic Area Statements and Character Area Statements and mapped in the South Australian Planning and Property Atlas are buildings which display characteristics of importance in a particular area. The identification of representative buildings in a particular area is not intended to imply that other buildings in an historic area are not of importance.</p>   |  |
| River Murray protection Area | <p>Means a River Murray Protection Area under the <i>River Murray Act 2003</i>.</p>  |  |
| Secondary street             | <p>In relation to a building is any road, other than the primary street, that shares a boundary with the allotment on which the building is situated (or to be situated).</p>  |  |
| Sensitive receiver           | <p>Means:</p> <ul style="list-style-type: none"> <li>(a) any use for residential purposes or land zoned primarily for residential purposes;</li> <li>(b) child care facility;</li> <li>(c) educational facility;</li> <li>(d) hospital;</li> <li>(e) supported accommodation;</li> <li>(f) tourist accommodation</li> </ul>  |  |
| Sensitive use                | <p>Has the same meaning as in the <i>Environment Protection Act 1993</i>.</p>  |  |
| Sewerage infrastructure      | <p>Has the same meaning as in the <i>Water Industry Act 2012</i></p>   |  |
| Site                         | <p>Means the area of land (whether or not comprising a separate or entire allotment) on which a building is built, or proposed to be built, including the curtilage of the building, or in the case of a building comprising more than 1 separate occupancy, the area of land (whether or not comprising a separate or entire allotment) on which each occupancy is built, or proposed to be built, together with its curtilage.</p>   |  |
| Site contamination           | <p>Has the same meaning as in the <i>Environment Protection Act 1993</i>.</p>  |  |
| Site coverage                | <p>Is calculated by adding the total roof area of all roofed buildings/structures on a site (excluding any eaves surrounding a habitable building) dividing this by the site area and then multiplying it by 100. Site coverage is expressed as a percentage.</p>  |  |
| Soft landscaping             | <p>Means landscaped areas that are pervious and capable of supporting the growth of plant species. It does not include artificial turf or any form of pervious paving or paved/hardstand areas used for pedestrian and/or vehicle movement.</p>  |  |
| South                        | <p>Means true south.</p>   |  |
| South facing                 | <p>In relation to building orientation, a side wall is south facing if the wall is orientated anywhere between E20°N/W20°S and E30°S/W30°N.</p>  |  |

|                               |  |  |
|-------------------------------|--|--|
|                               |  | Example of south facing walls.   |
| Standard sea flood risk level | Means the 1% AEP sea flood level (tide, stormwater and associated wave effects combined) plus an allowance to accommodate 100 years of land subsidence.  |  |
| Tangent point                 | Means the end point of a road's curve at the point of intersection, measured at the kerb.  |  |
| Terrace arrangement           | Means a group of 3 or more detached dwellings erected side by side and abutting each other but not joined by way of a party wall or party walls.   |  |
| Total floor area              | Means the sum of the superficies of horizontal sections of a building or other roofed area made at the level of each floor (including any mezzanine floor), inclusive of all roofed areas and of the external walls and of such portions of any party walls as belong to the building.   |  |
| Treatment                     | Is taken to have the same meaning as defined in section 3(1) as in the <i>Environment Protection Act 1993</i> .  |  |
| Wall height                   | Means the height of the wall measured from the top of its footings or a measurement point specified by the applicable policy of the Code (in which case the Code policy will prevail in the event of any inconsistency) noting that the height measurement does not include any part of the wall that is concealed behind an eave or similar roof structure and not visible external to the land.  |  |
| Waste                         | Means waste within the meaning of the <i>Environment Protection Act 1993</i> .   |  |
| Wastewater                    | Means waste principally consisting of water and includes:<br>(a) human wastewater<br>(b) sewage<br>(c) water containing food or beverage waste<br>(d) wash down water or cooling water<br>(e) irrigation runoff or contaminated stormwater<br>(f) water containing any other trade waste or industrial waste<br>(g) any other water that has been used in any form of human activity<br>(h) a combination of any 1 or more of the above. |  |
| Water protection area         | Has the same meaning as in the <i>Environment protection Act 1993</i> .  |  |

## Part 9 - Referrals

### Notes: Additional Referrals

Additional referrals to those specified below are contained within Overlays within the Planning and Design Code.

### Part 9.1 Referral Body: Environment Protection Authority

#### Referral Body: Environment Protection Authority

##### Interpretation

For the purposes of item 9 of the table in clause 3 of schedule 9 of the Planning Development and Infrastructure (General) Regulations 2017, development that involves, or is for the purposes of, an activity specified in the table below, requires a referral to the Environment Protection Authority, including:

- (a) development that reaches a threshold specified in the table below;
- (b) development with the capacity or potential to operate above the threshold level specified in the table below; or
- (c) an alteration or expansion of an existing development (or existing use) where the alteration or expansion will have the effect of producing a total capacity exceeding the relevant threshold level specified in the table below.

The above does not apply for the purposes of items 9A and 9AB of the table in clause 3 of schedule 9 of the Planning Development and Infrastructure (General) Regulations 2017, which relate to site contamination and land division.

| Class of Development / Activity          |            | Policies Relevant to the Referral   | Purpose of Referral   | Statutory Reference   |   |
|--|------------|---|---|---|---|
| Energy generation and storage facilities | Wind farms | Development that involves the establishment of a wind farm where 1 or more wind turbine generators (whether or not located on the same site) are used to generate electricity that is then supplied to another person for use at another place. | Section 57 of <i>Environment Protection Act 1993</i> sets out criteria to be considered by the EPA in relation to the assessment of development applications. This head power | To provide expert technical assessment and direction to the relevant authority on the assessment of the potential harm from | Activity of environmental significance to which Schedule 9 clause 3 item 9 of the Planning, |

|                               |  |   |  |  |   |
|-------------------------------|--|---|--|--|---|
|                               | <p>Energy recovery from waste</p>                  | <p>Development involving energy recovery from <i>waste</i>, including <i>anaerobic digestion</i> and thermal activities such as <i>direct combustion</i>, <i>pyrolysis</i> and <i>gasification</i> used to generate gas, heat, electricity or a combination.</p> <p>In this class of development / activity:</p> <p><b>anaerobic digestion</b> involves a series of processes in which microorganisms break down biodegradable material to biogas in the absence of oxygen</p> <p><b>direct combustion</b> involves burning in excess oxygen (from air) to produce heat or release energy contained in the fuel</p> <p><b>pyrolysis</b> involves the thermo-chemical decomposition of organic or inorganic material- for example synthetic tyres - at elevated temperatures in the absence of oxygen</p> <p><b>gasification</b> of waste is a process that converts organic or fossilised organic material such as coal, at elevated temperatures and with controlled amounts of oxygen, into a synthetic gas (syngas).</p> | <p>also links to other statutory criteria in the <i>Environment Protection (Air Quality) Policy 2016</i>, <i>Environment Protection (Commercial and Industrial Noise) Policy 2023</i>, <i>Environment Protection (Waste to Resources) Policy 2010</i> and <i>the Environment Protection (Water Quality) Policy 2015</i>.</p> | <p>pollution and waste aspects arising from activities of environmental significance and other activities that have the potential to cause serious environmental harm.</p> | <p>Development and Infrastructure (General) Regulations 2017 applies.</p> |
|                               | <p>Energy generation</p>                           | <p>Development involving an <i>electricity generating plant</i> (other than a <i>battery storage facility</i> or <i>pumped hydroelectricity production works</i>) using any other energy source (excluding <i>fuel burning</i> and solar photovoltaic) with a capacity to generate or store 30 megawatts (MW) or more.</p> <p>In this class of development / activity:</p> <p><b>battery storage facility</b> means a facility for the purpose of 1 or more batteries that are capable of being charged, storing energy and discharging in into the State's power system</p> <p><b>electricity generating plant</b> means electricity generating plant within the ambit of paragraph (a) of the definition of electricity infrastructure in section 4(1) of the <i>Electricity Act 1996</i>.</p>  |  |  |   |
|                               | <p>Pumped hydroelectricity production works</p>    | <p>Development involving the conduct of works or a facility for the generation of electricity by means of passing water through a turbine with a total full-load sustained output capacity of 30 megawatts or more (EPA Licence).</p>   |  |  |   |
| <p>Petroleum and chemical</p> | <p>Chemical storage and warehousing facilities</p> | <p>The storage or warehousing of chemicals or chemical products that are, or are to be, stored or kept in bulk or in containers having a capacity exceeding 200 litres at facilities with a total storage capacity exceeding 1,000 cubic metres. (EPA Licence)</p>  |  |  |   |
|                               | <p>Chemical works</p>                              | <p>The conduct of:</p> <ul style="list-style-type: none"> <li>(a) works with a total processing capacity exceeding 10 tonnes per year (EPA Licence required at processing capacity exceeding 100 tonnes per year), involving either or both of the following operations: <ul style="list-style-type: none"> <li>(i) manufacture (through chemical reaction) of any inorganic chemical, including sulphuric acid, inorganic fertilisers, soap, sodium silicate, lime or other calcium compound</li> <li>(ii) manufacture (through chemical reaction) or processing of any organic chemical or chemical product or petrochemical, including the separation of such materials into different products by distillation or other means</li> </ul> </li> <li>or</li> <li>(b) works with a total processing capacity exceeding 5,000 tonnes per year involving operations for salt production. (EPA Licence)</li> </ul> <p>or</p>  |  |  |   |

|                                      |   |   |  |  |
|--------------------------------------|---|---|--|--|
|                                      |   | (c) works for the production of hydrogen with a production capacity of more than 100 tonnes per year (EPA Licence).   |  |  |
|                                      | Coke works                              | The production, quenching, cutting, crushing and grading of coke. (EPA Licence)   |  |  |
|                                      | Hydrocarbon storage or production works | The conduct of works or a facility:<br><br>(a) for the storage of hydrocarbon or hydrocarbon products in tanks that, in aggregate, have a storage capacity exceeding 100m <sup>3</sup> (EPA Licence required at more than 2000m <sup>3</sup> ) or<br><br>(b) for the production of hydrocarbon or hydrocarbon products, being works having a total capacity exceeding 20 tonnes per hour. (EPA Licence) |  |  |
|                                      | Petrol stations                         | The conduct of a petrol station, being a facility for the storage and retail sale of petroleum products or other liquid organic chemical substances. (EPA Licence)<br><br>In this class of development / activity:<br><br><b>petroleum product</b> has the same meaning as in the <i>Petroleum Products Regulation Act 1995</i> .   |  |  |
|                                      | Timber preservation works               | The conduct of works for the preservation of timber by chemicals, but excluding the preservation by a primary producer of timber for use in the course of primary production carried on by the producer. (EPA Licence)  |  |  |
| Manufacturing and mineral processing | Abrasive blasting                       | The cleaning of materials by the abrasive action of any metal shot or mineral particulate propelled in a gaseous or liquid medium (otherwise than solely by using blast cleaning cabinets less than 5m <sup>3</sup> in volume or totally enclosed automatic blast cleaning units). (EPA Licence)  |  |  |
|                                      | Hot mix asphalt preparation             | The conduct of works at which crushed or ground rock aggregates are mixed with bituminous or asphaltic materials (by heating in a furnace, kiln or other fuel fired plant) for the purposes of producing road building mixtures. (EPA Licence)  |  |  |
|                                      | Cement works                            | The conduct of works for the use of <i>argillaceous</i> and <i>calcareous</i> materials in the production of cement clinker or the grinding of cement clinker. (EPA Licence)<br><br>In this class of development / activity:<br><br><b>argillaceous</b> means having to do with or resembling clay<br><br><b>calcareous</b> means having to do with calcium carbonate                                   |  |  |
|                                      | Ceramic works                           | The conduct of works for the production of any products such as bricks, tiles, pipes, pottery goods, refractories, or glass that are manufactured or are capable of being manufactured in furnaces or kilns fired by any fuel, being works with a total capacity for the production of such products exceeding 100 tonnes per year. (EPA Licence)   |  |  |
|                                      | Concrete batching works                 | The conduct of works for the production of concrete or concrete products that are manufactured or are capable of being manufactured by the mixing of cement, sand, rock, aggregate or other similar materials, being works with a total capacity for production of such products exceeding 0.5m <sup>3</sup> per production cycle. (EPA Licence)  |  |  |

|  |   |  |
|--|---|--|
|  | Drum reconditioning or treatment works                    | The conduct of works for the cleaning, repairing, reconditioning or other treatment of metal or plastic drums or containers for the purposes of their reuse, including any associated storage facility. (EPA Licence)  |
|  | Ferrous and non-ferrous metal melting                     | The melting of ferrous or non-ferrous metal in a furnace or furnaces that alone or in aggregate have the capacity to melt: <ul style="list-style-type: none"> <li>(a) in excess of 50 but not in excess of 500 kilograms of metal during the normal cycle of operation but excluding facilities more than 500m from residential premises not associated with the works or</li> <li>(b) in excess of 500 kilograms of metal during the normal cycle of operation. (EPA Licence)</li> </ul>  |
|  | Metallurgical works                                       | The conduct of works at which ores are smelted or reduced to produce metal. (EPA Licence)  |
|  | Mineral works   | The conduct of works for processing mineral ores, sands or earths to produce mineral concentrates. (EPA Licence)   |
|  | Pulp or paper works                                       | The conduct of works at which paper pulp or paper is manufactured or is capable of being manufactured, being works with a total capacity for production of such products exceeding 10 tonnes per year. (EPA Licence required at production exceeding 100 tonnes per year)  |
|  | Surface coating   | The conduct of: <ul style="list-style-type: none"> <li>(a) works for metal finishing, in which metal surfaces are prepared or finished by means of electroplating, electrolyse plating, anodising (chromating, phosphating and colouring), chemical etching or milling, or printed circuit board manufacture, being works producing more than 5 kilolitres per day of effluent (EPA Licence) or</li> <li>(b) works for hot dip galvanising (EPA Licence) or</li> <li>(c) works for spray painting or powder coating with a capacity to use more than 100 litres per day of paint or 10kg per day of dry powder (EPA Licence).</li> </ul> |
|  | Timber processing works                                   | The conduct of works (other than works at a builders supply yard or a home improvement centre) at which timber is sawn, cut, chipped, compressed, milled or machined, being works with a total processing capacity exceeding 4,000m <sup>3</sup> per year. (EPA Licence)   |
|  | Maritime construction works                               | The conduct of works for the construction or repair of ships, vessels or floating platforms or structures, being works with the capacity to construct or repair ships, vessels or floating platforms or structures of a mass exceeding 80 tonnes. (EPA Licence)  |
|  | Vehicle production  | The conduct of works for the production of motor vehicles, being works with a production capacity exceeding 2,000 motor vehicles per year. (EPA Licence)   |
|  | Fibre-reinforced plastic manufacturing                    | The conduct of facilities for the purposes of manufacturing fibre-reinforced plastic products, but excluding facilities more than 300m from residential premises not associated with the facility.   |
| Resource recovery, waste disposal and related activities | Waste recovery (excluding a prescribed approved activity) |  |
|  | Waste recovery facility                                   | The conduct of a <i>waste recovery facility</i> , being a depot, works or facility (including, but not limited to,   |

|  |   |
|--|---|
|  | <p>a transfer station or material recovery facility) that, during a 12 month period, receives for <i>preliminary treatment</i>, or has the capacity for the <i>preliminary treatment</i> of:</p> <ul style="list-style-type: none"> <li>(a) more than 100 tonnes of solid waste or matter<br/>or</li> <li>(b) more than 100 kilolitres of liquid waste or matter</li> </ul> <p>prior to its transfer elsewhere for lawful reuse, further treatment or disposal but excluding a prescribed approved activity or an activity in respect of which the Environment Protection Authority is satisfied, having regard to prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p> <p>In this class of development / activity:</p> <p><b>preliminary treatment</b> of waste or matter, includes sorting, aggregating, compacting, baling or packaging the waste or matter as defined in Schedule 1 of the <i>Environment Protection Act 1993</i>.</p> |
| <p>Waste reprocessing (excluding a prescribed approved activity)</p> |   |
| <p>Composting works</p>  | <p>Being a depot, facility or works with the capacity to treat, during a 12 month period:</p> <ul style="list-style-type: none"> <li>(a) in the case of works located wholly or partly within a water protection area - more than 200 tonnes of organic waste or matter<br/>or</li> <li>(b) in the case of works located wholly outside of a water protection area - more than 1,000 tonnes of organic waste or matter</li> </ul> <p>for the production of compost, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p>   |
| <p>Scrap metal treatment works</p>                                   | <p>Being a depot, facility or works for the treatment of scrap metal (by processes involving electrically heated furnaces or other fuel burning equipment or by mechanical processes), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p>  |
| <p>Tyre waste treatment works</p>                                    | <p>Being a depot, facility or works with the capacity to treat more than 5 tonnes of <i>tyre waste</i> during a 12 month period, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p> <p>In this class of development / activity:</p> <p><b>tyre waste</b> means waste comprised of tyres or tyre pieces as defined in Schedule 1 of the <i>Environment Protection Act 1993</i>.</p>   |
| <p>Waste lead acid battery treatment works</p>                       | <p>Being a depot, facility or works with the capacity to treat more than 500 waste lead acid batteries during a 12 month period, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p>  |

|  |   |
|--|---|
| Other waste reprocessing facility                                | <p>Being a depot, works or facility (other than a waste reprocessing facility specified above) that, during a 12 month period, receives or has the capacity to treat:</p> <ul style="list-style-type: none"> <li>(a) more than 100 tonnes of solid waste or matter<br/>or</li> <li>(b) more than 100 kilolitres of liquid waste or matter</li> </ul> <p>for the production of energy or materials that are ready for use (without requiring further treatment), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p>                         |
| <b>Waste disposal (excluding a prescribed approved activity)</b> |   |
| Landfill depot   | <p>Being a depot, facility or works for the disposal of waste to land, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p>  |
| Liquid waste depot   | <p>Being a depot, facility or works for the reception and disposal of liquid waste, or the reception, treatment and disposal of liquid waste, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p>   |
| Incineration depot   | <p>Being a depot, facility or works for the disposal, by incineration, pyrolysis or gasification by high temperature chemical decomposition, or thermal oxidation using fuel burning equipment, of solid waste, a listed waste or quarantine waste (EPA Licence), but excluding:</p> <ul style="list-style-type: none"> <li>(a) facilities with a processing capacity not exceeding 100 kilograms per hour and more than 500m from residential premises not associated with the facility<br/>or</li> <li>(b) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.</li> </ul> |
| <b>Wastewater treatment</b>                                      |   |
| Wastewater treatment works                                       | <p>Being sewage treatment works, a CWMS, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period:</p> <ul style="list-style-type: none"> <li>(a) in the case of works located wholly or partly within a water protection area - more than 2.5 ML of wastewater (EPA Licence required at more than 5 ML)<br/>or</li> <li>(b) in the case of works located wholly outside of a water protection area - more than 12.5 ML of wastewater (EPA Licence required at more than 50 ML).</li> </ul>   |
| <b>Activities involving listed wastes</b>                        |   |
| Activity producing listed waste                                  | <p>The conduct of an activity in which a <i>listed waste</i> is produced as waste or becomes waste, but excluding any of the following:</p>   |

|  |   |  |  |  |  |
|--|---|--|--|--|--|
|  |   | <ul style="list-style-type: none"> <li>(a) a domestic activity</li> <li>(b) retail pharmacy</li> <li>(c) medical practice (other than the practice of pathology)</li> <li>(d) nursing practice</li> <li>(e) dental practice</li> <li>(f) veterinary practice</li> <li>(g) the conduct of a nursing home or other residential aged care facility</li> <li>(h) the conduct of an immunisation clinic</li> <li>(i) the conduct of a hospital with capacity of fewer than 40 beds</li> <li>(j) a <i>prescribed industrial activity</i></li> <li>(k) an activity in which the waste produced is lawfully disposed of to a sewer</li> <li>(l) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.<br/>(EPA Licence)</li> </ul> <p>In this class of development / activity:</p> <p><b>prescribed industrial activity</b> - means any of the following:</p> <ul style="list-style-type: none"> <li>(a) building work</li> <li>(b) carpentry or joinery</li> <li>(c) film processing</li> <li>(d) plumbing or gas fitting</li> <li>(e) dry cleaning</li> <li>(f) primary or secondary school education</li> <li>(g) agriculture or horticulture</li> <li>(h) french polishing</li> <li>(i) manufacturing jewellery</li> <li>(j) painting or decorating</li> <li>(k) panel beating and associated spray painting</li> <li>(l) an activity that results in the production of less than 50 000 litres of waste oil per year</li> <li>(m) an activity authorised by a lease or licence under the <i>Mining Act 1971, the Petroleum and Geothermal Energy Act 2000 or the Roxby Downs (Indenture Ratification) Act 1982</i> where the waste is lawfully disposed of to land and contained within the area of the lease or licence</li> <li>(n) an activity authorised by a lease under the <i>Mining Act 1971</i> where the waste is lawfully disposed of to land and contained within the area of a miscellaneous purposes licence under that Act adjacent to the area of the lease.</li> </ul> |  |  |  |
|  | <p>Reception or storage of listed waste</p> | <p>The conduct of a depot, facility or works for the reception or storage of a <i>listed waste</i>, but excluding the following:</p> <ul style="list-style-type: none"> <li>(a) the temporary on-site storage of such waste while awaiting transport to another place</li> <li>(b) an activity consisting only of storing or distributing goods, in respect of which the Environment Protection Authority is satisfied, having regard to prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority</li> <li>(c) the reception or storage by a council or hospital of medical waste produced in the course of a <i>prescribed medical activity</i></li> <li>(d) the reception or storage by a retail pharmacy of <i>personal sharps waste, pharmaceutical waste</i> or other medical waste, in connection with a return system for such waste.<br/>(EPA Licence)</li> </ul> <p>In this class of development / activity:</p> <p><b>personal sharps waste</b> means medical sharps that have been used in a domestic situation for medical purposes</p> <p><b>pharmaceutical waste</b> means waste comprised of</p>  |  |  |  |

|  |  |   |  |  |
|--|--|---|--|--|
|  |  | <p>medicines or other pharmaceutical products</p> <p><b>prescribed medical activity</b> - means any of the following:</p> <ul style="list-style-type: none"> <li>(a) a medical practice other than: <ul style="list-style-type: none"> <li>(i) medical practice at a hospital or</li> <li>(ii) the practice of pathology</li> </ul> </li> <li>(b) nursing practice other than at a hospital</li> <li>(c) dental practice other than at a hospital</li> <li>(d) operating a nursing home</li> <li>(e) veterinary practice</li> <li>(f) operating a hospital with a capacity of less than 40 beds</li> <li>(g) operating an immunisation clinic.</li> </ul>               |  |  |
|  | Treatment of listed waste                      | The conduct of a depot, facility or works for the treatment of a <i>listed waste</i> , or <i>wastewater</i> containing a listed waste, by immobilising, stabilising or sterilising the waste by any process (before its further treatment or disposal), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)  |  |  |
| Activities in specified areas                      | Brukung Mine Site                              | The management of the abandoned Brukung mine site and associated acid neutralisation plant situated adjacent to Dawesley Creek in the Mount Lofty Ranges. (EPA Licence)   |  |  |
|  | Discharge of stormwater to underground aquifer | <p>Discharge of stormwater from a catchment area exceeding 1 hectare to an underground aquifer by way of a well or other direct means where the stormwater drains to the aquifer from:</p> <ul style="list-style-type: none"> <li>(a) land or premises on which a business is carried on in the council area of the City of Mount Gambier or</li> <li>(b) a stormwater drainage system in the council area of the City of Mount Gambier or</li> <li>(c) a stormwater drainage system in Metropolitan Adelaide. (EPA Licence)</li> </ul>   |  |  |
| Animal husbandry, aquaculture and other activities | Feedlots                                       | <p>Carrying on an operation for holding in a confined yard or area and feeding principally by mechanical means or by hand:</p> <ul style="list-style-type: none"> <li>(a) not less than an average of 500 cattle (EPA Licence), or 4,000 sheep or goats per day over any period of 12 months or</li> <li>(b) where the yard or area is situated in a water protection area - not less than an average of 200 cattle (EPA Licence), or 1,600 sheep or goats per day over any period of 12 months</li> </ul> <p>but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.</p> |  |  |
|  | Aquaculture or Fish Farming                    | The land based propagation or rearing of marine, estuarine or fresh water fish or other marine or freshwater organisms that involves the discharge of wastewater into marine or inland waters, or onto land but excluding where wastewater is discharged to an approved wastewater management system.   |  |  |
|  | Saleyards                                      | The commercial conduct of yards at which cattle, sheep or other animals are gathered or confined for the purpose of their sale, auction or exchange, including associated transport loading facilities, being yards with a throughput exceeding 50,000 sheep  |  |  |

|   |                        |  |  |  |
|---|------------------------|--|--|--|
|   |                        | <p>equivalent units per year [sheep equivalent units: 1 sheep or goat = 1 unit, 1 pig (&lt; 40kg) = 1 unit, 1 pig (&gt; 40kg) = 4 units, 1 cattle (&lt; 40kg) = 3 units, 1 cattle (40-400kg) = 6 units, 1 cattle (&gt; 400kg) = 8 units]. (EPA Licence)</p>  |  |  |
|   | Piggeries              | <p>The conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of:</p> <ul style="list-style-type: none"> <li>(a) in the case of a piggery located wholly outside of a water protection area - 1,300 or more <i>standard pig units</i> (EPA Licence required at 6500 or more standard pig units)</li> <li>or</li> <li>(b) in the case of a piggery located wholly or partly within a <i>water protection area</i> - 130 or more <i>standard pig units</i>. (EPA Licence required at 650 or more standard pig units)</li> </ul> <p>In this class of development / activity:</p> <p><b>standard pig units</b> is a unit of measurement of pigs determined:</p> <ul style="list-style-type: none"> <li>(a) by reference to clause 4.3 of the <i>National Environmental Guidelines for Piggeries 2010</i> (second edition (revised)) prepared by Australian Pork Limited</li> <li>or</li> <li>(b) in a manner approved by the Environment Protection Authority and published on a website determined by the Environment Protection Authority.</li> </ul> |  |  |
|   | Poultry farms          | <p>The keeping of <i>poultry</i> in confined or roofed structure(s) exceeding 1,000m<sup>2</sup> (EPA Licence required for the growing of <i>poultry</i> meat only where the total area of the sheds or structures used to keep the <i>poultry</i> is 13,500m<sup>2</sup> or more.</p> <p>In this class of development / activity:</p> <p><b>poultry</b> means chicken, turkey, guinea fowl, duck, geese, pheasants, quail, squab (pigeons), muttonbirds or other avian species but does not include ratites.</p>  |  |  |
|   | Dairies                | <p>Carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time in a <i>water protection area</i>.</p>  |  |  |
| Food production and animal and plant product processing | Meat processing works  | <p>The conduct of slaughtering works for commercial purposes for the production of meat or meat products for human or animal consumption, being:</p> <ul style="list-style-type: none"> <li>(a) in the case of poultry or poultry meat products - works with a rate of production exceeding 100 tonnes per year (EPA Licence required at rate of production exceeding 200 tonnes per year)</li> <li>or</li> <li>(b) in the case of any other animal meat or animal meat products - works with a rate of production exceeding 50 tonnes per year. (EPA Licence required at rate of production exceeding 100 tonnes per year)</li> </ul>   |  |  |
|   | Breweries and cideries | <p>The conduct of works for the production of beer (EPA Licence only for beer production), cider or any other alcoholic beverage (excluding wine and spirits) by infusion, boiling or fermentation, being works with a production capacity exceeding 5,000 litres per day.</p>   |  |  |
|   | Fish processing        | <p>The conduct of works for scaling, gilling, gutting, filleting or otherwise <i>processing fish</i> for sale (EPA Licence), but excluding:</p>  |  |  |

|  |   |
|--|---|
|  | <ul style="list-style-type: none"> <li>(a) works with a processing output of less than 100 tonnes per year where wastewater is disposed of to a sewer or CWMS or</li> <li>(b) works with a processing output of less than 2 tonnes per year where wastewater is disposed of otherwise than to a sewer or CWMS or</li> <li>(c) processing of <i>fish</i> only in the course of a business of selling <i>fish</i> by retail.</li> </ul> <p>In this class of development / activity:</p> <p><b><i>fish</i></b> has the same meaning as in the <i>Fisheries Management Act 2007</i></p> <p><b><i>processing fish</i></b> does not include freezing, chilling or packing the fish.</p> |
| Milk processing works                  | The conduct of works at which milk is separated, evaporated or otherwise processed for the manufacture of evaporated or condensed milk, cheese, butter, ice cream or other similar dairy products, being works at which milk is processed at a rate exceeding 5ML per year. (EPA Licence)   |
| Produce processing works               | The conduct of works for processing any agricultural crop material being: <ul style="list-style-type: none"> <li>(a) works for the processing of agricultural crop material by deep fat frying, roasting or drying through the application of heat with a processing capacity exceeding 30kg per hour (EPA Licence) or</li> <li>(b) works at which more than 10ML of wastewater is generated per year and disposed of otherwise than to a sewer or CWMS. (EPA Licence)</li> </ul>   |
| Rendering and fat extraction works     | The conduct of works at which animal, fish or grease trap wastes or other matter is processed or is capable of being processed by rendering or extraction or by some other means to produce tallow or fat or their derivatives or proteinaceous matter, being works with a total processing capacity exceeding 25 kg per hour. (EPA Licence required at processing capacity exceeding 250 kilograms per hour)   |
| Curing or drying works                 | The conduct of works at which meat, fish or other edible products are smoked, dried or cured by the application of heat or smoke: <ul style="list-style-type: none"> <li>(a) with a total processing capacity of between 25kg and 250kg per hour but excluding works that are more than 200m from residential premises not associated with the works or</li> <li>(b) with a total processing capacity exceeding 250kg per hour. (EPA Licence)</li> </ul>  |
| Tanneries or fellmongeries             | The conduct of works for the commercial preservation or treatment of animal skins or hides being works processing more than 5 tonnes of skins or hides per year, but excluding: <ul style="list-style-type: none"> <li>(a) the processing of skins or hides by primary producers in the course of primary production activities outside township areas or</li> <li>(b) the processing of skins or hides in the course of taxidermy. (EPA Licence)</li> </ul>  |
| Woolscouring or wool carbonising works | The conduct of works for the commercial cleaning or carbonising of wool, but excluding cleaning or carbonising of wool in the course of handicraft activities where the wool is further processed for sale by retail. (EPA Licence)   |

|                                       |                          |   |  |  |  |
|---------------------------------------|--------------------------|---|--|--|--|
|                                       | Wineries or Distilleries | The conduct of works for the processing of grapes or other produce to make wine or spirits, being works at which more than 50 tonnes of grapes or other produce are processed per year, but excluding works for bottling only. (EPA Licence required for wineries or distilleries processing more than 50 tonnes of grapes or other produce per year in the Mt Lofty Ranges Water Protection Area or processing more than 500 tonnes of grapes or other produce per year outside of the Mt Lofty Ranges Water Protection Area)  |  |  |  |
| Materials handling and transportation | Bulk shipping facilities | The conduct of facilities for bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any wharf or wharf side facility (including sea-port grain terminals), being facilities handling or capable of handling these materials into or from vessels at a rate: <ul style="list-style-type: none"> <li>(a) of between 10 tonnes and 100 tonnes per day, excluding facilities that are more than 300m from residential premises not associated with the facility or</li> <li>(b) exceeding 100 tonnes per day. (EPA Licence)</li> </ul>  |  |  |  |
|                                       | Bulk storage             | The conduct of facilities for bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility at a rate exceeding 100 tonnes per day, excluding facilities more than 300m from residential premises not associated with the facility.   |  |  |  |
|                                       | Railway operations       | The conduct of any of the following activities associated with a <i>railway</i> : <ul style="list-style-type: none"> <li>(a) the construction or operation of <i>rail infrastructure</i></li> <li>(b) the operation of <i>rolling stock</i> on a <i>railway</i></li> <li>(c) other activities conducted on <i>railway land</i> (EPA Licence required for the above activities but not the following exclusions)</li> </ul> but excluding: <ul style="list-style-type: none"> <li>(d) any activities associated with any of the following:                         <ul style="list-style-type: none"> <li>(i) a <i>railway</i> with a track gauge that is less than 600mm</li> <li>(ii) a <i>railway</i> in a mine which is underground or predominantly underground and used in connection with the performance of mining operations</li> <li>(iii) a slipway</li> <li>(iv) a crane-type runway</li> <li>(v) a <i>railway</i> used solely for the purposes of horse-drawn trams</li> <li>(vi) a <i>railway</i> used solely for the purposes of static displays</li> <li>(vii) a <i>railway</i> at an amusement park used solely for the purposes of an amusement structure</li> <li>(viii) the transfer of freight into or onto, and unloading of freight from, <i>rolling stock</i></li> <li>(ix) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.</li> </ul> </li> </ul> In this class of development / activity:<br><b>rail infrastructure</b> means infrastructure associated with the operation of a railway and includes (but is not limited to) railway track, associated track structures, over or under track structures, supports, |  |  |  |

|                                      |   |  |  |  |
|--------------------------------------|---|--|--|--|
|                                      | <p>tunnels, bridges, stations, platforms, train control systems, signalling systems, communication systems, electric traction infrastructure and buildings, but does not include any workshop or repair facility</p> <p><b>railway</b> means a guided system designed for the movement of rolling stock which has the capability of transporting passengers, freight or both on a railway track, together with its infrastructure and associated sidings or crossing, or passing loops, and includes a railway in a marshalling yard or a passenger or freight terminal</p> <p><b>railway land</b> means any of the following:</p> <ul style="list-style-type: none"> <li>(a) land within a rail corridor or rail reserve, including any associated sidings</li> <li>(b) railway yards</li> <li>(c) other land over which a railway track passes</li> </ul> <p><b>rolling stock</b> means a vehicle (whether or not self-propelled) that operates on or uses a railway track, but does not include a vehicle designed to operate both on and off a railway track when the vehicle is not operating on a railway track</p> <p>Examples of rolling stock - A locomotive, carriage, rail car, rail motor, light rail vehicle, train, tram, light inspection vehicle, road/rail vehicle, trolley, wagon.</p>                                  |  |  |  |
| <p>Crushing, grinding or milling</p> | <p>Processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or in any other manner) of any of the following:</p> <ul style="list-style-type: none"> <li>(a) chemicals or rubber at a rate: <ul style="list-style-type: none"> <li>(i) of between 1 tonne and 100 tonnes per year, excluding facilities that are more than 500m from residential premises not associated with the facility</li> <li>or</li> <li>(ii) in excess of 100 tonnes per year (EPA Licence)</li> </ul> </li> <li>(b) agricultural crop products at a rate: <ul style="list-style-type: none"> <li>(i) of between 50 tonnes and 500 tonnes per year, excluding facilities that are more than 300m from residential premises not associated with the facility</li> <li>or</li> <li>(ii) in excess of 500 tonnes per year (EPA Licence)</li> </ul> <p>but excluding non-commercial processing for on farm use</p> </li> <li>(c) rock, ores or minerals at a rate: <ul style="list-style-type: none"> <li>(i) of between 100 tonnes and 1,000 tonnes per year, excluding facilities that are more than 500m from residential premises not associated with the facility</li> <li>or</li> <li>(ii) in excess of 1,000 tonnes per year (EPA Licence)</li> </ul> <p>but excluding processing of wet sand.</p> </li> </ul> |  |  |  |
| <p>Dredging</p>                      | <p>The conduct of capital dredging being the excavation of more than 10m<sup>3</sup> of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means and any associated disposal of dredged material to land or waters (EPA Licence), but excluding any of the following:</p> <ul style="list-style-type: none"> <li>(a) <i>maintenance dredging</i></li> <li>(b) works associated with the establishment of a visual aid</li> <li>(c) any lawful fishing or recreational activity</li> </ul> <p>In this class of development / activity:</p> <p><b>marine waters</b> has the same meaning as in Section</p>  |  |  |  |

|       |                                |   |  |  |
|-------|--------------------------------|---|--|--|
|       |                                | <p>3 of <i>Environment Protection Act 1993</i>.</p> <p><b>maintenance dredging</b> means the excavation of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means for the purpose of maintaining a previously dredged (approved) depth, width and area in marine or inland waters.</p>  |  |  |
|       | Coal handling and storage      | The handling of coal or carbonaceous material by any means or the storage of coal, coke or carbonaceous reject material at facilities with a total handling capacity exceeding 100 tonnes per day or a storage capacity exceeding 5,000 tonnes. (EPA Licence)   |  |  |
|       | Extractive industries          | The conduct of operations involving extraction, or extraction and processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or any other manner), of sand, gravel, stone, shell, shale, clay or soil, being operations with an extraction production rate exceeding 100,000 tonnes per year. (EPA Licence)  |  |  |
| Other | Aerodromes                     | <p>The conduct of facilities for commercial or charter aircraft take-off and landing, being facilities estimated to be used for:</p> <ul style="list-style-type: none"> <li>(a) more than 200 flight movements per year, excluding facilities more than 3km from residential premises not associated with the facilities</li> <li>or</li> <li>(b) more than 2000 flight movements per year in any case. (EPA Licence for aerodromes used for more than 20000 flight movements per year)</li> </ul>  |  |  |
|       | Fuel burning                   | <p>The conduct of works or facilities involving the use of fuel burning equipment, including flaring (other than flaring at hydrocarbon storage or production works that do not have a total storage capacity or total production rate exceeding the levels respectively specified in 'Hydrocarbon storage or production works' above) or incineration, where the equipment alone or in aggregate is capable of burning combustible matter:</p> <ul style="list-style-type: none"> <li>(a) a rate of heat release exceeding 5MW (EPA Licence)</li> <li>or</li> <li>(b) at a rate of heat release exceeding 500KW and the products of combustion are used: <ul style="list-style-type: none"> <li>(i) to stove enamel (EPA Licence)</li> <li>or</li> <li>(ii) to bake or dry any substance that on heating releases dust or air impurities. (EPA Licence)</li> </ul> </li> </ul> |  |  |
|       | Helicopter landing facilities  | <p>The conduct of facilities designed for the arrival and departure of helicopters, but excluding:</p> <ul style="list-style-type: none"> <li>(a) facilities that are more than 3km from residential premises not associated with the facilities (EPA Licence required for helicopter landing facilities situated within 1km of residential premises not associated with the facilities)</li> <li>or</li> <li>(b) facilities at the site of an activity authorised under the <i>Mining Act 1971</i>, the <i>Petroleum and Geothermal Energy Act 2000</i>, the <i>Petroleum (Submerged Lands) Act 1982</i> or the <i>Roxby Downs (Indenture Ratification) Act 1982</i>.</li> </ul>   |  |  |
|       | Marinas and boating facilities | The conduct of facilities comprising pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for:   |  |  |

|                                       |   |
|---------------------------------------|---|
|                                       | <ul style="list-style-type: none"> <li>(a) 50 or more powered vessels at any 1 time (EPA Licence) or</li> <li>(b) works for the repair or maintenance of vessels with the capacity to handle 5 or more vessels at any one time or vessels 12m or more in length (EPA Licence).</li> </ul>   |
| Motor racing or testing venues        | The conduct of facilities designed and used for motor vehicle competitions or motor vehicle speed or performance trials, but excluding facilities that are situated more than 3km from residential premises not associated with the facilities. (EPA Licence required for facilities that are situated 200 metres or less from residential premises not associated with the facilities)   |
| Shooting ranges                       | The conduct of facilities for shooting competitions, practice or instruction (being shooting involving the propulsion of projectiles by means of explosion), but excluding facilities that are more than 3km from residential premises not associated with the facilities. (EPA Licence required for outdoor facilities only that are situated 200 metres or less from residential premises not associated with the facilities)   |
| Desalination plants                   | <p>The conduct of a desalination plant being a plant for the production of desalinated water that has a production capacity exceeding 200 kilolitres of desalinated water per day, and includes:</p> <ul style="list-style-type: none"> <li>(a) an <i>underground desalination plant</i></li> <li>(b) a number of <i>underground desalination plants</i> within any 1 square kilometre area that, in aggregate, have a production capacity exceeding 200 kilolitres of desalinated water per day (EPA Licence)</li> </ul> <p>but does not include:</p> <ul style="list-style-type: none"> <li>(c) a plant that disposes of all of its wastewater to a wastewater management system that is the subject of a licence or</li> <li>(d) a plant that produces 2 megalitres or less of wastewater per year.</li> </ul> <p>In this class of development / activity:</p> <p><b><i>underground desalination plant</i></b> means a plant having a system comprised of a borehole, submersible pump and associated equipment for the desalination below the ground of underground water</p> <p><b><i>underground water</i></b> means water occurring naturally under the ground or introduced to an aquifer or other area under the ground.</p> |
| Discharges to marine or inland waters | <p>The conduct of operations (other than a desalination plant referred to above) involving discharges into marine waters or inland waters where:</p> <ul style="list-style-type: none"> <li>(a) the discharges: <ul style="list-style-type: none"> <li>(i) raise the temperature of the receiving waters by more than 2 degrees Celsius at any time at a distance of 10m or more from the point of discharge or</li> <li>(ii) contain antibiotic or chemical water treatments</li> </ul> </li> <li>and</li> <li>(b) the total volume of the discharges exceeds 50kl per day. (EPA Licence)</li> </ul>   |
| Saline water discharge                | An activity involving the discharge to land, surface water or underground water of more than 0.5ML of water per day containing more than 1500mg of total dissolved solids per litre.  |

|                    |  |   |  |   |   |
|--------------------|--|---|--|---|---|
|                    | Cremation or incineration of human or animal remains | <p>The conduct of a facility for the cremation or incineration of <i>human or animal remains</i> by means of thermal oxidation using fuel burning equipment. (EPA Licence)</p> <p>In this class of development / activity:</p> <p><b>human or animal remains</b> does not include any of the following:</p> <ul style="list-style-type: none"> <li>(a) medical waste</li> <li>(b) cytotoxic wastes</li> <li>(c) quarantine waste</li> </ul> <p><b>Cytotoxic wastes</b> means waste that is toxic to living things.</p>  |  |   |   |
| Land division      | Land division  | Land division creating 1 or more additional allotments for residential purposes within 500 metres of land used as a landfill waste depot.   | Section 57 of <i>Environment Protection Act 1993</i> sets out criteria to be considered by the EPA in relation to the assessment of development applications. This head power also links to other statutory criteria in the <i>Environment Protection (Air Quality) Policy 2016</i> , <i>Environment Protection (Commercial and Industrial Noise) Policy 2023</i> , <i>Environment Protection (Waste to Resources) Policy 2010</i> and <i>the Environment Protection (Water Quality) Policy 2015</i> . | To provide expert technical assessment and advice to the relevant authority on the appropriateness of further residential opportunities being established within close proximity to landfill waste depots, due to potential health and safety impacts.          | Development of a class to which Schedule 9 clause 3 item 23 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Site contamination | Change in the use of land to a more sensitive use.   | <p>Change in the use of land to a more sensitive use on land at which site contamination exists or may exist as a result of one of the following:</p> <ul style="list-style-type: none"> <li>(a) class 1 activity (including where a class 1 activity exists or previously existed on adjacent land)</li> <li>(b) class 2 activity and the proposed use is a sensitive use</li> </ul> <p>or</p> <p>Change in the use of land to a more sensitive use on land where one or more of the following applies:</p> <ul style="list-style-type: none"> <li>(a) that is the subject of a notation on the relevant title under section 103P of the Environment Protection Act 1993 that a site contamination audit report has been prepared;</li> <li>(b) subject to a notification of site contamination of underground water (known as a section 83A notification under the Environment Protection Act 1993), or where such a notification exists on adjacent land, shown on the South Australian Property and Planning Atlas;</li> <li>(c) located within a Groundwater Prohibition Area as shown on the South Australian Property and Planning Atlas</li> </ul> <p>No referral is required where, in relation to the subject land:</p> <ul style="list-style-type: none"> <li>(a) a site contamination audit report has been prepared under Part 10A of the Environment Protection Act 1993 in relation to the land within the previous 5 years which concludes one or more of the following: <ul style="list-style-type: none"> <li>(i) site contamination does not exist (or no longer exists) at the land</li> <li>(ii) the land is suitable for the proposed use or range of uses (without the need for any further remediation)</li> <li>(iii) where remediation is, or remains, necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development)</li> </ul> </li> </ul> | Site Contamination General Development Policies and Section 57 of Environment Protection Act 1993 that sets out criteria to be considered by the EPA in relation to the assessment of development applications.  | To provide direction to the relevant authority on whether they must consider the advice of either a site contamination consultant or site contamination auditor regarding site suitability, including through the imposition of conditions of planning consent. | Development of a class to which Schedule 9 clause 3 item 9A of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

|  |               |   |  |   |  |
|--|---------------|---|--|---|--|
|  |               | (b) no other class 1 activity or class 2 activity has taken place at the land since the preparation of the site contamination audit report  |  |   |  |
|  | Land Division | <p>Subject to clause 1(4) of Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017, development involving the division of land if—</p> <p>(a) Schedule 8 clause 2A(1)(b) applies to the application in respect of the development; and</p> <p>(b) site contamination exists or may exist at the land because of 1 or more of the following circumstances:</p> <ul style="list-style-type: none"> <li>(i) a class 1 activity has been conducted on the land or on adjacent land;</li> <li>(ii) a class 2 activity has been conducted on the land;</li> <li>(iii) the land or adjacent land is the subject of a section 83A notification under the <i>Environment Protection Act 1993</i> that appears on the South Australian Property and Planning Atlas;</li> <li>(iv) the land is within a groundwater prohibition area that appears on the South Australian Property and Planning Atlas;</li> <li>(v) the land is the subject of a notation on the certificate of title for the land under section 103P of the <i>Environment Protection Act 1993</i> that a site contamination audit report has been prepared.</li> </ul> | Site Contamination General Development Policies and Section 57 of <i>Environment Protection Act 1993</i> that sets out criteria to be considered by the EPA in relation to the assessment of development applications. | To provide direction to the relevant authority on whether they must consider the advice of either a site contamination consultant or site contamination auditor regarding site suitability, including through the imposition of conditions of planning consent. | Development of a class to which Schedule 9 clause 3 item 9AB of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

**Part 9.2 Referral Body: Relevant authority under the Landscape South Australia Act 2019.**

**Referral Body: Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development.**

| Class of Development / Activity |  | Purpose of Referral   | Statutory Reference   |
|---------------------------------|--|---|---|
| Dams                            | <p>Except where located within the River Murray Flood Plain Protection Area Overlay, River Murray Tributaries Protection Area, Prescribed Surface Water Overlay, Prescribed Watercourse Overlay, Prescribed Water Resources Area Overlay, Mount Lofty Ranges Catchment (Area 1) Overlay or the Mount Lofty Ranges Catchment (Area 2) Overlay, development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that:</p> <p>(a) will collect or divert, or collects or diverts water flowing:</p> <ul style="list-style-type: none"> <li>(i) over land or</li> <li>(ii) in a watercourse that is not prescribed</li> </ul> <p>and</p> <p>(b) is contrary to a regional landscape plan applying in the region of the development site.</p> | To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent. | Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Commercial Forestry             | <p>Development that involves a change in use of land for the purposes of undertaking commercial forestry for which a permit would be required under section 104(4)(k) of the <i>Landscape South Australia Act 2019</i>.</p>  | To provide expert assessment and direction to the relevant authority on potential impacts from such development on water resources.   | Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

**Part 9.3 Referral Body: Technical Regulator**

**Referral Body: Technical Regulator**

| Class of Development / Activity |   | Purpose of Referral  | Statutory Reference  |
|---------------------------------|---|--|--|
| Building near powerlines        | Development that involves the construction of a building where a declaration has not been given under Schedule 8 clause 6 of the <i>Planning, Development and Infrastructure (General) Regulations 2017</i> , other than where the development is a building that is intended only to house, or that constitutes, electricity infrastructure (within the meaning of the <i>Electricity Act 1996</i> ) or is limited to: <ul style="list-style-type: none"> <li>(a) an internal alteration of a building or</li> <li>(b) an alteration to the walls of a building but not so as to alter the shape of the building.</li> </ul> | To provide expert technical assessment and direction to the relevant authority on: <ul style="list-style-type: none"> <li>• potential impacts of development on electricity infrastructure</li> <li>• potential safety issues relating to development in close proximity to electricity infrastructure.</li> </ul> | Development of a class to which Schedule 9 clause 3 item 18 of the <i>Planning, Development and Infrastructure (General) Regulations 2017</i> applies. |

**Part 9.4 Referral Body: Minister responsible for the administration of the Aquaculture Act 2001**

**Referral Body: Minister responsible for the administration of the *Aquaculture Act 2001***

| Class of Development / Activity |  | Purpose of Referral   | Statutory Reference  |
|---------------------------------|--|---|--|
| Aquaculture development         | Aquaculture development, other than development which involves an alteration to an existing or approved development which in the opinion of the relevant authority is minor in nature. | To provide expert technical assessment and direction to the relevant authority on matters which may impact upon the associated aquaculture leases and/or licences, and any other existing aquaculture leases and/or licences within the region, and aquaculture zone policies under the <i>Aquaculture Act 2001</i> . | Development of a class to which Schedule 9 clause 3 item 19 of the <i>Planning, Development and Infrastructure (General) Regulations 2017</i> applies. |

**Part 10 - Significant Trees**

**Notes: Declared Trees**

Pursuant to Section 68 of the *Planning, Development and Infrastructure Act 2016*, the following trees or stand of trees have been declared as significant by the Planning and Design Code.

**Adelaide**

| Property Address  | Suburb         | Certificate of Title | Location   | Species and Common Name  | Criteria             |

| 1154 Bews Road ALFORD | Former Pine Forest Methodist Chapel and School (now Private Residence). Rectangular in plan, this church and schoolhouse is constructed of limestone rubble with red brick quoins. The gable roof is clad with corrugated pre-finished metal.; External form and features of the former church structure and commemorative plaque. Excludes residential additions at the rear.   | a b c                  | 28175       |
| 2 High Street ALFORD  | Alford Memorial Park. This memorial park contains a granite monument with marble statue containing the names of local soldiers who served during the Great War. A second gateway monument in a simplified Deco style records those soldiers who served during World War II.; Form and features of the memorial arch structure and stone memorial, including attached plaques.  | a c e                  | 28168       |
| 11 High Street ALFORD | Former Alford Institute (Alford Hall). The Alford Hall is constructed of limestone rubble with red brick quoins and squared lined pointing to the principal façade. Windows and door openings to the principal façade are circular headed whereas windows to the sides are triangular headed. A stone and brick parapet with brick cornices contains a rendered sign with stylised 'Alford Hall' lettering. Two foundation stones are contained within the front wall. One reads: 'This stone was laid by His Excellency the Governor, Sir George Le Hunte, K.C.M.G., August 11th 1908'. The other reads: 'This Institute was opened by the founder and president, R. Chappell, Esq., August 11, 1909.'; External form and features of the hall. | a c d                  | 28171       |

|---|---|------------------------|-------------|
| Lot 1 South Terrace (4 High Street) ALFORD                      | Former Strathneath Schoolroom. Timber construction schoolroom with entrance porch and shelter shed incorporated under the main gable-ended roof. Windows are multi-paned double hung.; External form and features of the structure, including entrance porch and shelter shed incorporated under the main roof.   | a c d                  | 28169       |
| 5-7 Third Street (cnr of South Terrace) ALFORD                  | Alford Hotel. This hotel occupies a prominent corner site. The principal façade is rendered masonry with simply detailed parapet with projecting cornice and painted 'Alford Hotel' sign. A bullnosed verandah returns along the side. Timber windows are double hung. Glazed doors are later additions. The roof is of hip construction clad with corrugated iron.; External form and features of the hotel and associated verandah.   | a c                    | 28170       |
| Lot 3 Church Road (Cnr of Church Road and Willamulka Road) BUTE | Former Willamulka Bible Christian Chapel (later Methodist Church). This is a simple church building of random local stone with red brick quoining. It is cruciform in plan with square headed window and door openings and corrugated iron clad gable roof. Doors and windows have been removed, and although it appears an attempt has been made to close the openings using corrugated iron sheets the building is open to the elements. There is considerable evidence of pigeons and probably also sheep gaining entry.; In the small front entry porch, there is a hand painted plaque displaying the names of the original 1884 church trustees. The year of construction and the words 'Methodist Church' written in black paint are faintly visible on the front wall of the porch, which is badly cracked. An apparently later addition to the rear comprises a transept, constructed in a similar fashion to the original structure. A marble foundation stone (unlikely to be from this building as it is dated 10 July 1935), and a commemorative plaque dated 1990 in memory of the church founders are mounted together on a large piece of stone near the front of the building. The church is sited on top of a sandhill with commanding views out over the surrounding farmlands and has an impressive presence in its rural setting. Exterior form and materials of the building. | a b c d                | 28167       |
| 12 High Street BUTE   | Former Saddlery /Shop/ Workshop (now RSL Club Rooms). This timber-framed commercial building was constructed in 1884 as a retail premises, and occupies a prominent position in the town's High Street. It is a single storey structure originally comprising a pair of shops, with decorative scalloped parapet extending above the roofline, bearing the words 'RSL Club Rooms' and the organization's logo. A deep verandah supported by timber posts spans the front façade. Original shop windows and doors have been removed and replaced with cladding.; External form and features of the original building, excluding detached structures at the rear and later additions.   | a c                    | 28201       |
| 14 High Street (cnr Railway Tce/High St) BUTE                   | Former Bute District Hall / Supper Room (now Bute Community Gym). This building is rectangular in plan with dressed sandstone to the principal façade and rubble to the side walls. The façade is classically detailed with rendered coursed quoins, keystones and capitals to the window architraves and pediment to the entrance door. The decorative pediment to the roof incorporates capped balusters with orb finial. The foundation stone reads: 'This stone was laid by Jas.Watson, Esq., April 20, 1901. T.R. Health, Architect.'; External form and features of the building excluding link to Soldiers' Memorial Hall.   | a c d                  | 28203       |
| 14 High Street BUTE   | Bute Soldiers' Memorial Hall. Constructed of tooled sandstone and rendered decorative plasterwork to the principal façade with limestone and redbrick quoins to the sides and rear, this memorial hall presents an impressively detailed façade to the street. The parapet and rendered pilasters are provided with raised decorative keys which are replicated on the support brackets for the awning to the front door. The louvred vent roof is clad with corrugated iron, and windows are timber framed double hung. The foundation stone reads: 'This stone was laid by Mrs Mary Devitt, 8th March 1922'.; External form and features of the Hall, including 1935 additions, but excluding lean-to amenities block at the rear.  | a c d e                | 28202       |
| 16 Martin Street BUTE   | Former Commons Memorial Hospital; Former 'Coffee Palace' (now private residence). This substantial building occupies a corner site and is constructed of local stone with red brick quoins. The corrugated iron clad roof is of 'M' profile at the rear, but has been rather clumsily modified to give the appearance of a Dutch gable from the front. The front facade is asymmetrical, with a decorative timber barge board and finial to the projecting front gable, and bullnosed return verandah extending across the front and along the eastern elevation. A similar verandah extends over the public footpath to shade the windows along the western side of the building. All openings are plain in form, the timber framed double-hung sash windows are single paned, and the panelled front door has simple side lights and transom window. The internal layout reflects its institutional origins, with multiple bedrooms opening off a long central hallway.; External form and features of the building, excluding later alterations to the roof line and excluding front fence.  | a c                    | 28209       |
| 25 Railway Terrace BUTE   | Former Bute Police Station, Court House, Police Residence and Cell Block (now 'Gunner Bill's Heritage Centre'). This attached police station and residence is constructed of stone with red brick quoins. A continuous bull-nosed verandah extends across the front facade. The louvred vent roof is clad with corrugated iron. A cell block is evident to the rear.; External form and materials of the residence, including former cells and outbuildings at the rear.  | a c                    | 28204       |
| 27 Railway Terrace cnr Second Street BUTE                       | Former Our Lady of the Rosary Catholic Church (now private residence). The church is a simply proportioned gable structure built of local limestone with red brick quoins and banding. Windows and entrance door are Gothic arch headed. A circular roof vent is dominant feature to the principal facade. The nave measures 7m x 10m and the sanctuary 4m x 4m, with adjoining sacristy / vestry rooms located either side. The property features a decorative metal fence with brick piers, defining its southern boundary. This is believed to be a Hume patented rolled steel ribbon fence, as manufactured in Adelaide by Hume Brothers Cement and Iron Co Ltd from the early 1900s, and a rare surviving example of its kind. The marble foundation stone reads: 'D.O.M. Lapidem Hunc Benedixit et Posuit Rdu Josephus Peters, S.J. Adjuvant, Rdo P. Aloysia Enright A. D. April 29th 1894.'; (Translated as 'To God, most good and great, Very Reverend Joseph Peters, SJ, aided by Reverend P Aloysio Enright, laid this stone and blessed it, 29 April 1894 AD'); External form and materials of the church structure, and perimeter Hume iron fence located on the southern (Railway Terrace) boundary.   | a c                    | 28207       |
| 29 Railway Terrace BUTE   | Former Bute Post Office (now private residence). This building is constructed in local limestone with a front of Yakka freestone (painted), and has brick quoins and dressings. Stylistically the building has the appearance of an asymmetric villa with bullnosed verandah and hipped roof with corrugated iron. A cantilevered gable to the projecting front room defines the 'post office' window fronting the street. A circular step is evident beneath front window to allow customers to communicate with the post office staff.; External form and features of the building, excluding the contemporary additions at the rear.   | a c                    | 28208       |
| 2 South West Terrace BUTE                                       | Bute Public School (now Bute Early Learning and Primary School). Constructed of dressed ashlar with red brick quoins, this school building is typical of many public schools of the period. Windows are grouped together and are generally triple sash. The louvred vent roof is clad with corrugated iron and extends to a Dutch gable with red brick parapet to the principal façade.; External form and materials of the 1911 school building, excluding later additions to the rear and northern elevations.  | a c d                  | 28199       |

| Property Address                     | Description and/or Extent of Listed Place   | Section 67(1) Criteria | Heritage NR |
|--------------------------------------|---|------------------------|-------------|
| 7 Third Street BUTE                  | Former Bute Primitive Methodist Church (later Methodist Church, later Uniting Church). This church is rectangular in plan with entrance porch and additions to the rear. Walls are constructed of local limestone with red brick quoins. Windows are multi-paned with Gothic windows heads. The foundation stone reads: 'This stone was laid by P. Jackson ES. 27th August 1902.'; External form and materials of the building including the attached stone additions at the rear. Excludes the freestanding hall behind.   | a b c                  | 28200       |
| 2499 Upper Yorke Road BUTE           | Former Wiltunga Bible Christian Church (later Methodist Church, later Uniting Church). This simple building is rectangular in plan with random limestone rubble walls and rendered quoins and architraves. There is no entry porch. Lintels to the square headed entrance door and windows are timber. What appears to be hand lettering (now illegible) applied to a masonry cartouche is located in the principal façade gable, and a more recent sign ('Wiltunga Uniting Church') is painted on the wall to the right of the central entrance door. The gable roof is clad with corrugated iron.; There is evidence of significant cracking and water penetration in the stonework, and the walls are braced using iron rails and 'S' brackets in several places. Most of the windows have been removed and the openings boarded up; front and back doors are in place, but the front door has apparently been forced and is not secure. The interior seems to have suffered damage to timber floors and ceilings and is littered with broken furniture and rubbish. What appears to be a hand-painted World War I Honour Roll applied directly on to the plaster of the northern interior wall, and another similar plaque (displaying church founders' names) on the southern wall are visible via the damaged openings. A more recent steel-framed building to the south of the church appears to have been a church hall/ Sunday School. Both buildings appear to have been abandoned and are in a poor state of repair. A plaque located in a monument at the front of the church states: 'To commemorate 100 years of worship at Wiltunga (Fairfield); 1884-1900 Bible Christian Church; 1900-1977 Methodist Church; 1977- 1984 Uniting Church. Unveiled 12th August 1984.' External form and materials of original church building, excluding adjacent hall/ Sunday School. Interior painted plaques to be preserved if possible. | a c                    | 28198       |
| Lot 13 Venning Road BUTE             | Former Barunga Methodist Church (later Barunga School). Rectangular in plan, this church and schoolhouse is constructed of limestone rubble with red brick quoins. The gable roof is clad with corrugated iron. There is evidence of a lean-to addition to one end of the building.; External form and features of the former church structure.   | a c                    | 28195       |
| 1724 Copper Coast Highway KULPARA    | Former Kulpara Bible Christian Church (later Methodist, subsequently Uniting Church). Random rubble stone building with brick quoins and surrounds to arch headed windows. The church has a gabled roof clad with corrugated iron with circular vent to gable end. A small gabled stone porch is an addition to the front of the building. The foundation stone retrieved from the former Kindergarten Hall (now demolished) is mounted on a stone cairn located to the east of the church. It reads: 'To the Glory of God this stone was laid by T F Mayfield Esq. on the 22nd April 1933.'; External form and materials of the original (ie 1879) church structure, including front porch added in 1920, and stone cairn with foundation stone retrieved from the demolished Sunday School Hall. Excludes attached timber-framed additions (hall) to the north and east.  | a b c d                | 28159       |
| 2394 Copper Coast Highway KULPARA    | Former Kulpara Lime Kiln. The complex consists of three open-topped kilns of approximately 3 meters square, two skillion-roofed storage/bagging areas, a (now unroofed) concrete floored storage/bagging area and an office. There is also a stockpile of discarded lime and a large retaining wall supporting a raised loading area on the northern side of the kilns. There is a tank stand extant near the westernmost kiln. The complex is linear and is arranged as follows from west to east; No 1 kiln, a storage area, a driveway, a storage area and office, No 2 kiln, No 3 kiln, a concrete floored storage area. The lime stockpile is located to the immediate southeast of the complex.; Surviving material and structures on the site relating to the lime production process, including kilns, storage areas and office.  | a d                    | 28164       |
| 5430 Upper Yorke Road KULPARA        | Kulpara Soldiers' Memorial Hall. Corrugated iron clad hall building with gabled corrugated iron roof and skillion extension to front. Windows are protected by windows hoods.; External form and materials of the 1953 building.  | c e                    | 28160       |
| 7 Third Street MELTON                | Former Melton Valley School (now private residence). This simply proportioned former school is constructed of limestone rubble with red brick quoins and chimneys. Window openings are supported by a rendered lintel band. The roof is of gable construction clad with corrugated iron.; External form and features of the former school building.   | a c                    | 28161       |
| 10 Cross Street MUNDOORA             | Former Methodist Church (now Mundoora Uniting Church). This is a simple gable-roofed church building with entrance porch. Walls are constructed of local limestone with red brick quoins. The roof is clad with corrugated iron and roof rafters are exposed at the eaves line. Later additions have been added to the rear. The front wall contains the foundation stone which reads: 'This stone was laid to the Glory of God by R. D. Nicholls, Esq., M.P., on Wednesday January 23rd, 1924.'; External form and materials of the original church building, including stained glass windows, but excluding later additions at the rear.  | a b c                  | 28190       |
| 589 Mundoora - Wokurna Road MUNDOORA | Former 'Tancock's Farm' (House, Cellar and Horse Trough). Site comprises a circular water-trough and farm buildings (most notably a partially above ground cellar). Both are built of local limestone. The cellar originally had a corrugated galvanised iron roof. The buildings on Section 130 are of generic style and probably date from the 1880s, whereas the later house has squared masonry and brick quoins and probably dates from the 1910s. The circular trough, approximately 1 metre high and 4.5 metres in diameter, is of particular interest and is still in good condition. The cellar is built into the side of a sandhill and is in moderate condition.; Exterior form and materials of stone farm structures including houses, cellar, store rooms and stone water trough.   | a b d e                | 28191       |
| 37 Pontifex Road PASKEVILLE          | Former 'Cocoanut' Homestead (now unoccupied). Residence of squared limestone construction with red brick quoining. The verandahs, front and side, are partially enclosed with vertical timber slatting.; External form and materials of the homestead including front and side verandahs.   | a b d                  | 28162       |
| 2 Bay Street PORT BROUGHTON          | Port Broughton Hotel (formerly Broughton Hotel). The two-storey section is constructed of limestone with masonry quoins, tiled hipped roof with cantilevered stucco and batted gable details. The substantial verandah boasts cast iron balustrading and brackets with an ornate frieze detail to the ground floor. The cantilevered stucco batted detail of the main roof is carried through to the gable details of the verandah upper storey. The earlier single storey hotel structure is evident to the rear although now somewhat compromised in its integrity. Foundation stone reads: 'Erected by W U Wall. This stone was laid by Mrs W U Wall, April 14th, 1910.'; External form and features of the hotel, including various stages (1888 & 1910).   | a c d f                | 28181       |
| 7-9 Bay Street PORT BROUGHTON        | Port Broughton Post Office and attached residence. Originally a rectangular plan building incorporating post office and attached residence. The building is constructed of random limestone with red brick quoins and string course. The hip roof is clad with corrugated iron. A later rendered finish simple Deco style entrance porch has been added.; External form and features including later porch addition but excludes timber-framed additions and detached toilet block to the rear.   | a c                    | 28185       |

| Property Address  | Description and/or Extent of Listed Place   | Section 67(1) Criteria | Heritage NR |
|---|---|------------------------|-------------|
| 5 East Terrace PORT BROUGHTON   | Former St Philip's Anglican Church (now private residence). Church building, approximately 10 metres by 8.5 metres, comprising porch, nave, sanctuary, and vestry. Built of local limestone with red brick quoining, the exterior has more recently been given a stucco and painted finish. It has fine timbered ceilings and three stained glass windows in the sanctuary. The gable roof is clad with corrugated iron.; External form and features of the church, including porch, nave, sanctuary and vestry; three memorial windows and timber ceilings.  | a b c                  | 28189       |
| 8 Edmund Street (cnr Harvey Street) PORT BROUGHTON                    | Former Port Broughton Primitive Methodist Church and Memorial School Hall (now Port Broughton Uniting Church and Hall). The church is designed in ecclesiastical Gothic style with limestone rubble walls and rendered quoins to windows and doors. Walls and quoins are painted. Timber bargeboards display trefoil motif with toothed pendentular detail. The porch has batten and stucco detail to gable end which has been replicated on the adjacent hall. The hall is constructed of cast concrete 'ashlar' blocks with smooth faced ashlar to quoins. Walls and quoins are painted to match the adjacent church. Windows to both buildings are lancet headed. Cantilevered stucco and batten gable detail is also evident to the hall. Roof cladding to both buildings is corrugated iron.; Exterior form and features of church and hall, excluding the later link added between the two buildings. | a b c                  | 28177       |
| 8 Edmund Street (cnr Harvey Street) PORT BROUGHTON                    | Former Methodist Manse (now Uniting Church Opportunity Shop). Symmetrical double-fronted stone cottage, circa 1890, with hipped corrugated iron roof and bull-nosed verandah to front façade featuring timber posts with modest cast iron brackets at each end. The main elevation features a central four-panelled timber entry door with overhead fan-light, and sidelights. Double paned sash windows either side of the main entry and similar windows on the western and eastern elevations appear to be original. All openings and corners are defined by brick quoins (painted). The single remaining brick chimney is also painted. A stone skillion section at the rear is protected by a timber-framed verandah.; Exterior form and features of the former manse (now Opportunity Shop).  | a b                    | 28178       |
| 10 Edmund Street (cnr Harvey Street) PORT BROUGHTON                   | Former Port Broughton School (now Heritage Centre/ Museum). The school building is a rectangular building with lean-to addition. Walls are constructed of limestone rubble with red brick quoins and brick banding. Windows are multi-paned timer framed with window hoods to the northern facade. Circular roof vents are provided to the end gable walls. The gable roof is clad with corrugated iron.; External form and features of the school building including early stone additions, excluding corrugated iron additions at the rear  | a c                    | 28176       |
| 20 Harvey Street PORT BROUGHTON                                       | Former Port Broughton District Council Office. Single room, random limestone construction with rendered quoins. A single brick chimney is evident, and the roof is clad with corrugated iron. Windows are multi-paned timber framed. X-shaped tie rod connection plates are evident.; External form and features of the building.   | a c                    | 28187       |
| 25 Harvey Street PORT BROUGHTON                                       | Former Port Broughton Police Station, Police Court and Cells (now private residence). The police station appears to have been built in two stages. The earlier stage with hipped roof and double-hung windows, is constructed of limestone walls with red brick quoins. A verandah (partially enclosed) extends across the front. A later addition has been added with louvred roof vent and classically styled entrance. To the rear of the site a detached cell block comprising a pair of stone and brick cells is evident.; External form and features of the original police station and courtroom including any remnant structures to the rear of the property such as former police cells.   | a c                    | 28186       |
| 33 Harvey Street PORT BROUGHTON                                       | Former Blacksmith's Cottage (now 'Charlotte's Cottage' Bed-and-Breakfast). Substantial limestone cottage (circa 1898) with double gabled corrugated iron roof facing Harvey Street, with later stone additions at the rear facing Edmund Street. The property includes semiunderground externally accessed cellar of stone and corrugated iron construction adjacent to the Edmund Street boundary, and freestanding stone and brick stable/ carriage house located to the west of the main building. The original building is unusual in having a central front door but no windows on the principal facade.; Exterior form and features of original (circa 1898) cottage and detached cellar and stone coach house/garage. Excludes contemporary additions to dwelling.   | d                      | 28179       |
| 22 McKay Street PORT BROUGHTON  | St Margaret's Catholic Church. Constructed in the Romanesque vernacular style. The walls are of random limestone with rendered quoins and substantial buttresses at the rear. Window and door openings are simply proportioned with round arched heads. The low-pitched gable roof is clad with corrugated iron. A single transept constructed in similar style is also evident.; External form and materials of the church building, excluding brick outhouse at the rear.   | a b c d                | 28188       |
| Lot 488 Mundoora Road PORT BROUGHTON                                  | Railway Culvert, Mundoora Tramway. This simple box culvert with random stone abutments and open timber deck was part of the former Port Broughton to Mundoora Railway /Tramway. This type of structure was built into the raised embankment at intervals to allow water to pass underneath the tracks. It is sometimes referred to as an underpass, underbridge, or historically as a 'cattle creep', as it was designed to also allow stock, and also pedestrians, to pass between paddocks.; Culvert including stone abutments on both sides and timber beams supporting the deck.  | a c                    | 28192       |
| West Terrace, Bay Street PORT BROUGHTON                               | Port Broughton Jetty. Typical substantial coastal jetty of the period constructed of timber pylons with timber support structure and plank decking. Includes a 'T' section at the western end. Remnants of the railway track are still evident.; Form and materials of the jetty, including the extension to the northern side, but excluding balustrading and lighting.  | a b f                  | 28183       |
| West Terrace PORT BROUGHTON   | Row of Norfolk Island Pines along West Terrace. An impressive row of mature Norfolk Island pines (Araucaria heterophylla) planted along the foreshore north and south of the jetty.; Row of Norfolk Island Pine trees on the western side of West Terrace, extending from North Terrace to South Terrace.   | a f g                  | 28184       |
| West Terrace PORT BROUGHTON   | Port Broughton War Memorial. Constructed of granite and marble, the monument comprises a statue of a soldier and rifle, raised on a series of stepped stone plinths which carry inscriptions on all four sides.; Monument including marble statue, granite plinth and inscribed plaques.  | a c e                  | 28182       |
| 16 West Terrace PORT BROUGHTON  | Port Broughton Masonic Lodge. Constructed of limestone rubble with red brick quoins and circular arched headed windows. The louvred vent hip roof is clad in corrugated iron. There is a later gable porch to the front.; External form and features of the building. Excluding later additions such as front porch.  | a c                    | 28180       |
| 1291 Lime Kiln Road (Old Well Road, cnr Lime Kiln Road) THOMAS PLAINS | Ninnes Historic Well, Windmill and Tank. Stone tank, square in plan, constructed of coursed local stone, well and windmill.; Well, stone tank and windmill. Though not the original windmill on this site, the presence of this structure serves to elucidate the functional relationship between the elements of the group.  | a b c f                | 28166       |
| 8 Thomas Plains Road THOMAS PLAINS                                    | Former Thomas Plains Methodist Church (Tennis Club Rooms). This simply proportioned building is constructed of local field limestone with red brick quoins. The gable roof is clad with corrugated iron and is contained by red brick parapets. Windows are timber framed.; External form and features of the original church structure, excluding later additions at the rear.   | a b c                  | 28165       |

|--|--|------------------------|-------------|
| Alford Road (cnr Coast / Tickera - Alford Road) TICKERA                              | Tickera Memorial Park. This memorial park contains a granite monument surmounted by a white marble statue depicting a standing soldier with rifle by his side. The supporting tapered square column, on a tiered concrete base, is engraved with the names of local soldiers killed in WWI on one face, and those who enlisted and returned on others. A small stone monument positioned at the base of the column bears the names of those who served in WWII. The park is located on the main road on the southern approach to the township.; Monument featuring marble statue and granite plinth and base and surrounding park reserve.   | a c e                  | 28172       |
| Broughton Terrace (Off Broughton Tce, Tickera (sec664, lot 305 Wallaroo Tce) TICKERA | Tickera Well. A formed well, approximately 1.5 metres in diameter, lined with local granite stones. A safety grid has been placed across the well at ground level.; Well and immediate surrounds.  | a                      | 28174       |
| 3 Third Street (cnr High Street) TICKERA   | Former Tickera Primitive Methodist Church (now private residence). This modestly proportioned former church is constructed of limestone rubble walls with rendered quoins and architraves. It is of simple rectilinear form with front entry porch. The exterior stonework and quoins have been painted. Windows are multi-paned with lancet heads. The corrugated iron clad gable roof is terminated by brick parapets.; External form and features of the original church structure.   | a b c                  | 28173       |
| 1727 Upper Yorke Road (lot 427) WOKURNA  | Former Wiltunga School Room (now Lincolnfields shearing shed). This former school building is constructed of timber frame with corrugated iron wall and roof cladding. Windows are timber framed with pivoting lower sashes and hopper top sashes. The bull-nosed verandah has been fully enclosed with corrugated iron sheets. Galvanised roof ventilators are evident to the hipped roof. While the former school building has been converted for use as a shearing shed, much of the original fabric remains, including blackboard and bag hooks located inside the structure.; External form and features of the building including verandahs, and any internal features relating to the use of the structure as a school room including the blackboard and bag hooks. | a c                    | 28194       |
| 1781 Wokurna Road WOKURNA  | Wokurna Hall. Community hall built of random local stone with red brick quoining. A side addition is of rendered construction. The north facing front façade contains a central arched entrance with double timber doors and multi-paned fanlight overhead. A marble foundation stone set into the front wall of the building contains the wording: 'This Stone was Laid by James Barclay, Esq JP, 25th March 1908'. A small metal plaque mounted on a stone cairn in front of the building commemorates Wokurna's centenary in 1988. External form and features of the hall, including masonry tank stand at southwestern corner, excluding 'Supper Room' addition with attached amenities block.   | a b c                  | 28193       |
