Subject: Planning and Design Code Implementation Review - Urban Forest

DTI,

As a resident of Medindie just north of the Adelaide CBD. I have witnessed the recent disregard for our public parklands and the many significant trees in and around the area lost to state government projects like the new Aquatic center. We need much stronger protection for established trees that can prevent the government or private developers disregarding this precious resource when they consider suitable building sites and how the site is used. We need to be protect and increase our ability to shade and cool our environment and to also maintain and improve the ability to lock up carbon dioxide. I support much greater protection for trees and parklands and stronger legislation to facilitate this.

Regards
Christopher Colhoun
(Medindie 5081)
