Dear Panel Members

I am concerned mostly with the lack of tree protection under the current code. While provision for new trees must be made in every new development where there currently are none, the retention of existing trees is of the utmost and urgent importance. I urge you to put in place emergency measures to cease all tree removals. This is the only proportionate response to the threat posed by climate change.

I endorse the tree law reform proposals put by Conservation Council of SA here: https://www.conservation.sa.gov.au/top_10_urban_tree_law_reform_priorities

Kind regards
Jessie MacGillivray
