Q14 Please enter your general feedback here

We are at such a pivotal moment environmentally. Action on climate change has to happen now over the next 20 years. I am a mum with young children and this is something that concerns me terribly. The new planning and design code will have a huge impact on our environmental and community. It is vital that it is done right. We can't afford a business as usual approach. Now is the time to set high environmental standards so that our communities can benefit for years to come. Our suburbs are being filled up with infill (which I know needs to happen), but it has to happen well. I want to see the minimum environmental standards set MUCH higher. Maintaining and protecting old trees is VITAL. Maintaining open space and greenery. Managing storm water and runoff (keeping it on properties, helping it soak into the ground). People want to live in green places. We are doing an environmental and social service in massively increasing the standards expected of new homes. I want you to do much more. As we face climate change, rising temperatures, we need to build cool, green suburbs for people to live in. PLEASE.
