Subject: Feedback re clarification re the Code's aims

First, I find it extremely difficult to understand how the Marion Council could possibly misinterpret the intentions of the Code to such an extent but I guess this can happen.

And second, I am extremely grateful for the Government's recognition that recent housing [for some reason] ' has been of poor design quality and has detracted from the streets and neighbourhoods we all want', and that the Code's infill policy aims to deal with this.
