**Subject:** Urgent need to Strengthen SA Planning Code before we lose more tree canopy in Adelaide

██████████ ██████████

Thank you for the opportunity to make a submission to the implementation review of the Planning and Design Code. I am hopeful that the expert panel will meet community expectations by listening attentively and acting on the feedback given.

By strengthening our planning laws to protect and enhance Adelaide's tree canopy we have a once in a decade chance to make this city liveable as temperatures rise (Department of Environment recent modelling shows 1.1 degrees rise by 2030).

I am very concerned about the impact of both the code and our poor regulations on tree canopy right across Adelaide. Locally, on the LeFevre Peninsula, huge opportunities to restore vegetation in the 30 hectares of Biodiversity Park are being threatened by inadequate Open Space zoning laws that allow for a natural area to be reduced, endangered species bulldozed for questionable gain to traffic movement or industrial waste water management.

You are no doubt familiar with the significant body of work published by the Conservation Council of SA and partner organisations over the last 2 years. Using an evidence-based approach, these reports highlighted how impoverished our laws have become since 2011 when significant exemptions were added to them, despite protests from both the community and experts.

The Conservation Council and partner organisations have compiled a list of their top ten priorities for reform. Support of these improvements will help make our state's tree regulations best practice, a Labor election practice. Many of the changes are backed up not only by the CCSA reports but also by the independent report commissioned by the State Planning Commission - I urge you to support these changes.

We cannot underestimate the important role that trees play in our daily lives. We need them more than they need us. By doing so you will improve our mental & physical health, clean the air that we breathe, remove carbon dioxide from the atmosphere, help cool our homes and streets, make our city more livable and mitigate the impacts of climate change for our children and grandchildren.

Yours sincerely,  
Liz Millington
