<tr><td>There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site.</td><td>(a) Where the existing building shares the same primary street frontage – the setback of the existing building
(b) Where the existing building has a different primary street frontage - 6m</td></tr>
<tr><td>There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building.</td><td>6m</td></tr>
</table>
</td></tr>
</table>

	For the purposes of **DTS/DPF 2.3:** (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table
PO 2.4 Buildings are set back from a secondary street boundary to maintain a consistent pattern of separation between building walls and public thoroughfares on corner sites within the locality.	DTS/DPF 2.4 Buildings are no closer than 900mm to the secondary street boundary.
PO 2.5 Buildings (except for ancillary buildings and structures) are set back from rear boundaries to provide: (a) access to natural light and ventilation for neighbours (b) open space recreational opportunities (c) space for landscaping and vegetation.	DTS/DPF 2.5 Building (except for ancillary buildings and structures) are no closer to the rear boundary of the site than: (a) 4m for the ground floor of a building (b) 6m for the upper floor of a building.
PO 2.6 Buildings are set back from side boundaries to: (a) establish separation between buildings to complement the established character within a locality (b) provide access to natural light and ventilation for neighbours.	DTS/DPF 2.6 Other than walls located on a side boundary, buildings are set back from side boundaries in accordance with the following: (a) where the wall height does not exceed 3m - at least 900mm (b) for a wall that is not south facing and the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings (c) for a wall that is south facing and the wall height exceeds 3m - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings.
PO 2.7 Boundary walls are limited in height and length to mitigate adverse impacts on the amenity of adjoining land users, including through an unreasonable loss of natural light and ventilation.	DTS/DPF 2.7 For buildings that do not have a common wall, any wall sited on or abutting a side allotment boundary: (a) does not exceed 3m in wall height (b) does not exceed 11.5m in length (c) when combined with other walls on the boundary, does not exceed 45% of the length of the boundary (d) is set back at least 3 metres from any existing or proposed boundary walls.
Site Dimensions and Land Division	
PO 3.1 Allotments for residential purposes are of a suitable size and dimension to contribute to a housing pattern consistent with the locality.	DTS/DPF 3.1 Development will not result in more than 1 dwelling on an existing allotment or Allotments/sites for residential purposes accord with the following: (a) where allotments/sites are connected to mains sewer or a Community Wastewater Management System site areas (or allotment areas in the case of land division) are not less than the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building):

Minimum Site Area
Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm
Minimum site area for a detached dwelling is 800 sqm; semi-detached dwelling is 500 sqm; row dwelling is 450 sqm; group dwelling is 450 sqm; residential flat building is 450 sqm
Minimum site area is 1,000 sqm
Minimum site area is 10 ha
Minimum site area is 100 ha
Minimum site area is 1,200 sqm
Minimum site area is 1,500 sqm
Minimum site area is 3,000 sqm
Minimum site area is 4,000 sqm
Minimum site area is 40 ha
Minimum site area is 500 sqm
Minimum site area is 5,000 sqm
Minimum site area is 600 sqm
Minimum site area is 800 sqm
Minimum site area is 850 sqm

	Minimum Site Area Minimum site area is 900 sqm Minimum site area is 950 sqm (b) where allotments/sites are not connected to mains sewer or an approved common waste water disposal service site areas are not less than the greater of: (i) 1200m^2 (ii) the following: **Minimum Site Area** Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm Minimum site area for a detached dwelling is 800 sqm; semi-detached dwelling is 500 sqm; row dwelling is 450 sqm; group dwelling is 450 sqm; residential flat building is 450 sqm Minimum site area is 1,000 sqm Minimum site area is 10 ha Minimum site area is 100 ha Minimum site area is 1,200 sqm Minimum site area is 1,500 sqm Minimum site area is 3,000 sqm Minimum site area is 4,000 sqm Minimum site area is 40 ha Minimum site area is 500 sqm Minimum site area is 5,000 sqm Minimum site area is 600 sqm Minimum site area is 800 sqm Minimum site area is 850 sqm Minimum site area is 900 sqm Minimum site area is 950 sqm (c) site frontages are not less than 20m In relation to DTS/DPF 3.1, in instances where: (d) more than one value is returned in the same field, refer to the *Minimum Site Area Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (e) no value is returned for DTS/DPF 3.1(a) (i.e. there is a blank field), then non are applicable and the relevant development cannot be classified as deemed-to-satisfy (f) no value is returned for DTS/DPF 3.1(b)(ii) (i.e. there is a blank field), the value for DTS/DPF 3.1(b)(ii) is zero.
Advertisements	
PO 4.1 Freestanding advertisements that identify the associated business without creating a visually dominant element within the locality.	DTS/DPF 4.1 Freestanding advertisements: (a) do not exceed 2m in height (b) do not have a sign face that exceeds 2m^2 per side.
Concept Plans	
PO 5.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 5.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: In relation to DTS/DPF 5.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 5.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply:	1. The item will be installed on or within an existing dwelling.

• Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	2. The item being installed does not encroach on a public street. 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7. Building height - does not exceed 5m 8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour

	14. Does not involve the clearance of native vegetation.
Outbuilding Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Nairne Redevelopment Subzone • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 6. Total floor area - does not exceed 40m^2 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end) 8. Building height - does not exceed 5m 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 11. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 12. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 13. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not located in an area subject to the Urban Transport Overlay, Non-Stop Corridors Overlay, Major Urban Transport Routes Overlay, Key Outback and Rural Routes Overlay, Key Railway Crossings Overlay, Future Local Road Widening Overlay or Future Road Widening Overlay, will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour 15. Does not involve- (a) excavation exceeding a vertical height of 1m; or (b) filling exceeding a vertical height of 1m, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m. 16. Does not involve the clearance of native vegetation 17. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None

Private bushfire shelter Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • River Murray Flood Plain Protection Area Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Primary street setback - at least as far back as the building to which it is ancillary 4. Secondary street setback - at least 900mm from the boundary of the allotment 5. At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place) 6. Does not involve the clearance of native vegetation.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary 6. Location of filtration system from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Temporary public service depot Except where any of the following apply: • Hazards (Flooding) Overlay • Local Heritage Place Overlay • Major Urban Transport Routes Overlay • State Heritage Place Overlay • Traffic Generating Development Overlay • Urban Transport Routes Overlay	1. Occupies land for no longer than 3 months 2. Ensures litter and water are contained on site 3. Provides temporary security fencing around the perimeter of the site.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • Nairne Redevelopment Subzone • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level

	7. Building height - does not exceed 5m 8. Length - does not exceed 11m if any part of the structure abuts or is situated on a boundary of the allotment 9. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 10. Does not involve the clearance of native vegetation.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Nairne Redevelopment Subzone • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. The tank is part of a roof drainage system 4. Total floor area - not exceeding 15m^2 5. The tank is located wholly above ground 6. Tank height - does not exceed 4m above natural ground level 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Special industry	None specified

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any development involving any of the following (or of any combination of any of the following):	Except development that:

(a) advertisement (b) ancillary accommodation (c) dwelling (d) dwelling addition (e) temporary public service depot.	1. exceeds the maximum building height specified in Township Zone DTS/DPF 2.2 or 2. involves the creation of 4 or more additional dwellings or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
3. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Township Zone DTS/DPF 2.2 or 2. does not satisfy Township Zone DTS/DPF 1.2 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
4. Any development involving any of the following (or of any combination of any of the following): (a) light industry (b) store (c) warehouse.	Except development that: 1. exceeds the maximum building height specified in Township Zone DTS/DPF 2.2 or 2. does not satisfy Township Zone DTS/DPF 1.3 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) temporary accommodation in an area affected by bushfire (p) tree damaging activity (q) verandah (r) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.

None specified.

Placement of Notices - Exemptions for Restricted Development

None specified.

Nairne Redevelopment Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

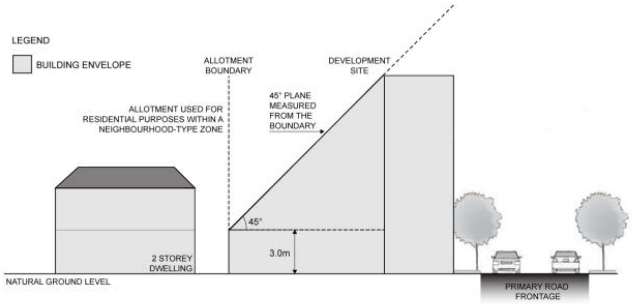
Desired Outcome	
DO 1	Redevelopment of the former Chapman's Smallgoods factory (the Chapman's site) and Bush Timbers' Salvage yard (Bush Timbers' site) (Nairne East) to achieve a mix of retail and medium density housing.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Shops (including a supermarket), consulting room, office and related uses are supplemented by other businesses that provide a range of goods and services to the surrounding neighbourhood and district.	DTS/DPF 1.1 None are applicable.
PO 1.2 Medium density residential development that does not prejudice the operation of existing non-residential development and the long-term provision of services and facilities for wider community benefit.	DTS/DPF 1.2 None are applicable.
Built Form and Character	
PO 2.1 Adaptive reuse of buildings complements the prevailing historic values of the locality.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development maintains the valued heritage and streetscape characteristics of the area.	DTS/DPF 2.2 None are applicable.

Township Activity Centre Zone

Assessment Provisions (AP)



Desired Outcome (DO)

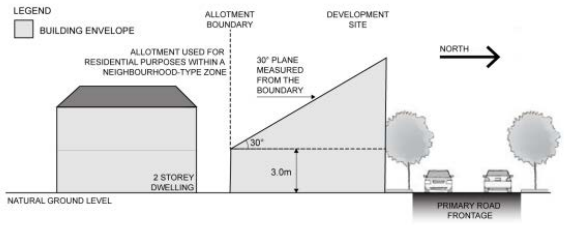
Desired Outcome	
DO 1	A cohesive, active, accessible and welcoming centre for local residents and visitors to shop, work, meet, entertain and relax in an attractive and safe environment.
DO 2	The range of land uses that occur in the centre provide important services to town residents, rural hinterland and the broader region.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment, health , recreation related uses and other businesses provide a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Cinema (d) Community facility

	(e) Consulting room (f) Dwelling (g) Educational facility (h) Emergency services facility (i) Hospital (j) Hotel (k) Indoor recreation facility (l) Library (m) Office (n) Place of worship (o) Public transport terminal (p) Recreation area (q) Retail fuel outlet (r) Service trade premises (s) Shop (t) Tourist accommodation.
PO 1.2 Residential development does not prejudice the operation of existing or future retail, office, entertainment or recreation related activity within the zone.	DTS/DPF 1.2 Dwellings are: (a) developed in conjunction with non-residential uses (b) sited either behind or above non-residential uses on the same allotment
PO 1.3 Tourist accommodation and visitor attractions support the visiting public and holiday makers.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.	DTS/DPF 1.4 None are applicable.
PO 1.5 Changes in the use of land encourage the efficient reuse of commercial premises to maintain and enhance vibrancy within activity centres.	DTS/DPF 1.5 A change of use to a shop, office, consulting room or any combination of these uses where all of the following are achieved: (a) the area to be occupied by the proposed development is in an existing building and is currently used as a shop, office, consulting room or any combination of these uses (b) if the proposed change of use is for a shop that primarily involves the handling and sale of foodstuffs, areas used for the storage and collection of refuse are sited at least 10 metres from the site of a dwelling (other than a dwelling directly associated with the proposed shop) (c) if the proposed change of use is for a shop that primarily involves heating and cooking of foodstuffs in a commercial kitchen and is within 30 metres of any neighbourhood-type zone boundary or a dwelling (other than a dwelling directly associated with the proposed shop), an exhaust duct and stack (chimney) exists or is capable of being installed for discharging exhaust emissions (d) if the change in use involves a gross leasable floor area greater than 250m^2 and has direct frontage to an arterial road, it achieves: (i) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (ii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared (e) off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, except where: (i) the building is a local heritage place or (ii) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (iii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Built Form and Character	
PO 2.1 Development complements adjacent development within the zone, and mitigates interface impacts on adjoining residential uses in neighbourhood- type zones, through appropriate building siting, scale and design.	DTS/DPF 2.1 None are applicable.
PO 2.2	DTS/DPF 2.2

Buildings are sited and designed to create pedestrian, vehicular and visual linkages between the various built-form elements within the zone and adjoining main roads.	None are applicable.
Building height and setbacks	
PO 3.1 Buildings are set back from primary and secondary street boundaries to contribute to the consistent established streetscape.	DTS/DPF 3.1 Buildings are set back from road boundaries to align with buildings on adjoining land.
PO 3.2 Building height is consistent with the form expressed in any relevant *Maximum Building Height (Levels) Technical and Numeric Variation layer* and *Maximum Building Height (Metres) Technical and Numeric Variation layer* or is generally low-rise to complement the established streetscape and local character.	DTS/DPF 3.2 Building height is not greater than: (a) the following: **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 9m Maximum building height is 15m **Maximum Building Height (Levels)** Maximum building height is 2 levels Maximum building height is 3 levels (b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)) - 3 building levels up to a height of 12m. In relation to DTS/DPF 3.2, in instances where: (c) more than one value is returned in the same field for DTS/DPF 3.2(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer or Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development (d) only one value is returned for DTS/DPF 3.2(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.
PO 3.3 Buildings mitigate visual impacts of massing on residential development within a neighbourhood-type zone.	DTS/DPF 3.3 Buildings are constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes in a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary or where this boundary is the street boundary): 
PO 3.4 Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.	DTS/DPF 3.4 Buildings on sites with a southern boundary adjoining the allotment boundary of an allotment used for residential purposes in a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram (except where this boundary is a street boundary):

PO 3.5 Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 3.5 None are applicable.
Land division	
PO 4.1 Land division creates allotments that vary in size and are suitable for a variety of business and community facilities.	DTS/DPF 4.1 None are applicable.
Advertisements	
PO 5.1 Advertisements are sited and designed to achieve an overall consistency of appearance along individual street frontages	DTS/DPF 5.1 None are applicable.
PO 5.2 Freestanding advertisements: (a) identify the associated business(es) (b) are of a size that is commensurate with the scale of the centre and the street frontage (c) avoid visual clutter (d) positively respond to the context without dominating the locality.	DTS/DPF 5.2 Freestanding advertisements: (a) do not exceed 5m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser) (b) do not have a sign face that exceeds $4m^2$ per side.
Concept Plans	
PO 6.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 6.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 75 - Warrengie Development Area Land Form / Building Module Cross Section - Warrengie Concept Plan 9 - Blakeview Concept Plan 21 - Virginia Concept Plan 22 - Virginia Infrastructure Concept Plan 50 - Roseworthy Town Expansion Concept Plan 81 - Edinburgh Defence Airfield Lighting Constraints Concept Plan 98 - Mallala Concept Plan 136 - Point Turton In relation to DTS/DPF 6.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 6.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Consulting room Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Office Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or

	(b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Shop Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or

	(c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Temporary public service depot Except where any of the following apply: • Hazards (Flooding) Overlay • Local Heritage Place Overlay • Major Urban Transport Routes Overlay • State Heritage Place Overlay • Traffic Generating Development Overlay • Urban Transport Routes Overlay	1. Occupies land for no longer than 3 months 2. Ensures litter and water are contained on site 3. Provides temporary security fencing around the perimeter of the site.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. The tank is part of a roof drainage system 4. Total floor area - not exceeding 15m^2 5. The tank is located wholly above ground 6. Tank height - does not exceed 4m above natural ground level 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Special industry	None specified

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are

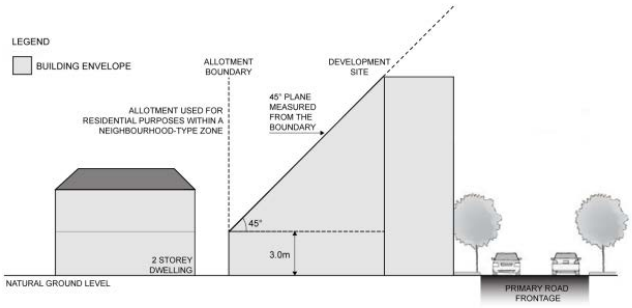
excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

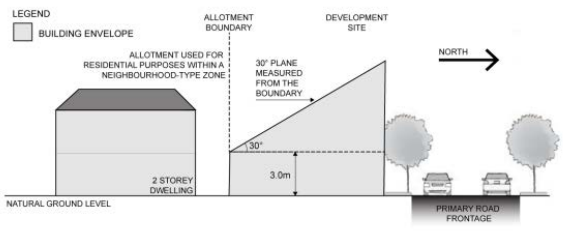
A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) cinema (d) community facility (e) consulting room (f) dwelling located above a non-residential building level (g) indoor recreation facility (h) library (i) office (j) place of worship (k) service trade premises (l) shop (m) temporary public service depot (n) tourist accommodation.	Except development that exceeds the maximum building height specified in Township Activity Centre Zone DTS/DPF 3.2 or does not satisfy any of the following: 1. Township Activity Centre Zone DTS/DPF 3.3 2. Township Activity Centre Zone DTS/DPF 3.4.
4. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) recreation area (k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	None specified.
5. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
6. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Township Main Street Zone

Assessment Provisions (AP)





Desired Outcome (DO)

Desired Outcome	
DO 1	A cohesive, active, accessible and welcoming main street environment for residents and visitors to shop, work, meet, entertain and relax.
DO 2	Development contributes to the vibrancy and activity of public spaces and reinforces the traditional main street character.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses are supplemented by other businesses that provide a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Cinema (d) Community facility (e) Consulting room (f) Dwelling (g) Hotel (h) Indoor recreation facility (i) Library (j) Office (k) Place of worship (l) Shop (m) Tourist accommodation.
PO 1.2 Ground floor uses contribute to an active and vibrant main street.	DTS/DPF 1.2 Shop, office, or consulting room uses are located on the ground floor level of buildings.
PO 1.3 Residential development does not prejudice the operation of non-residential development and the long-term provision of services and facilities for wider community benefit.	DTS/DPF 1.3 None are applicable.
PO 1.4 Dwellings are developed in conjunction with non-residential uses to support business, entertainment and recreational activities.	DTS/DPF 1.4 Dwellings are developed in conjunction with non-residential uses and sited: (a) at upper levels of buildings with non-residential uses located at ground level or (b) behind non-residential uses on the same allotment.
PO 1.5 Development is sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.	DTS/DPF 1.5 Any of the following: (a) shop, other than a bulky goods outlet with a gross leasable floor area more than 500m^2 (b) cinema (c) hotel (d) licensed premises.
PO 1.6 Changes in the use of land encourage the efficient reuse of commercial premises to maintain and enhance vibrancy within activity centres.	DTS/DPF 1.6 A change of use to a shop, office, consulting room or any combination of these uses where all of the following are achieved: (a) the area to be occupied by the proposed development is in an existing building and is currently used as a shop, office, consulting room or any combination of these uses (b) if the proposed change of use is for a shop that primarily involves the handling and sale of foodstuffs, areas used for the storage and collection of refuse are sited at least 10 metres from the site of a dwelling (other than a dwelling directly associated with the proposed shop)

	(c) if the proposed change of use is for a shop that primarily involves heating and cooking of foodstuffs in a commercial kitchen and is within 30 metres of any neighbourhood-type zone boundary or a dwelling (other than a dwelling directly associated with the proposed shop), an exhaust duct and stack (chimney) exists or is capable of being installed for discharging exhaust emissions (d) if the change in use involves a gross leasable floor area greater than 250m^2 and has direct frontage to an arterial road, it achieves either (i) or (ii): (i) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) is from a road that is not an arterial road (ii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared (e) off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, except in any of the following circumstances: (i) the building is a local heritage place (ii) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) (iii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse.
Built Form and Character	
PO 2.1 Buildings and structures are designed to complement the traditional low-scale main street built form by ensuring wall, parapet and roof height, verandah profile, and materials of construction are consistent with adjacent traditional main street buildings.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings preserve main street character by complementing key traditional shop-front elements such as narrow building and tenancy footprint with frequently repeated frontages, clear-glazed narrow shop front displays above raised display levels (base stall boards) and recessed entries.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings are adaptable and flexible to accommodate a range of land uses, including shops, offices, consulting rooms and residential land uses.	DTS/DPF 2.3 Ground floor levels of buildings incorporate a minimum ceiling height of 3.5m.
PO 2.4 Buildings create visual interest and an active interface with the main street frontage and maximise passive surveillance.	DTS/DPF 2.4 Not less than 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.
PO 2.5 Pedestrian shelter and shade are provided over footpaths through the use of structures such as awnings, canopies and verandas.	DTS/DPF 2.5 None are applicable.
PO 2.6 Dwellings are generally sited behind or above non-residential uses on the same site to maintain vibrancy and activity along the main street.	DTS/DPF 2.6 None are applicable.
PO 2.7 Outbuildings, carports and garages are located behind the primary building facing the main street to ensure vibrancy and activity along the main street.	DTS/DPF 2.7 None are applicable.
PO 2.8 Development contributes to and does not interfere with provision of an efficient and convenient pedestrian network linking the main street to adjoining zones.	DTS/DPF 2.8 None are applicable.
Building height and setbacks	
PO 3.1 Building height is consistent with the form expressed in any relevant *Maximum Building Height (Levels) Technical and Numeric Variation* layer and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or is low-rise, with height commensurate with the development site's frontage and depth as well as the main street width, so that the impacts of building mass on adjoining properties and the streetscape are minimised.	DTS/DPF 3.1 Building height is not greater than: (a) the following: **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 9m Maximum building height is 15m Maximum building height is 7.5m **Maximum Building Height (Levels)**

	Maximum Building Height (Levels) Maximum building height is 1 level Maximum building height is 2 levels Maximum building height is 4 levels (b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)): (i) where the site has a frontage of at least 25m and depth of at least 50m - 3 building levels up to a height of 12m (ii) in all other cases - 2 building levels up to a height of 9m. In relation to DTS/DPF 3.1, in instances where: (c) more than one value is returned in the same field for DTS/DPF 3.1(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer or Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development (d) only one value is returned for DTS/DPF 3.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.
PO 3.2 Buildings mitigate the visual impacts of massing on residential development within a neighbourhood-type zone.	DTS/DPF 3.2 Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes in a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary or where this boundary is the street boundary): 
PO 3.3 Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.	DTS/DPF 3.3 Buildings on sites with a southern boundary adjoining the boundary of an allotment used for residential purposes in a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram (except where this boundary is a street boundary): 
PO 3.4 Buildings are constructed to the front boundary to achieve a continuity of street façade to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate, active spaces.	DTS/DPF 3.4 None are applicable.
PO 3.5 Buildings are constructed to side boundaries to achieve a continuity of street façade to the	DTS/DPF 3.5 Building walls are located on side boundaries.

main street.	
PO 3.6 Buildings are set back from rear boundaries (other than where these are also street boundaries) to minimise impacts on neighbouring properties, including access to natural light and ventilation.	DTS/DPF 3.6 Buildings are set back 3m or more from rear boundaries where the subject land directly abuts an allotment of a different zone, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.
PO 3.7 Buildings are set back from rear access ways to provide adequate manoeuvrability for vehicles.	DTS/DPF 3.7 Buildings are set back from the rear access way have (a) no minimum requirement where the access way is 6.5m or more wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.
PO 3.8 Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 3.8 None are applicable.
Traffic, parking and access	
PO 4.1 Development minimises the need for vehicle crossovers on the main street to reduce conflicts with pedestrians and avoid disruption to the continuity of built form.	DTS/DPF 4.1 None are applicable.
PO 4.2 Vehicle parking is located behind buildings away from the primary main street frontage and designed to minimise impacts on residential amenity.	DTS/DPF 4.2 Vehicle parking areas are located behind the building line of the associated building.
Advertisements	
PO 5.1 Advertisements are sited and designed to achieve an overall consistency of appearance along individual street frontages.	DTS/DPF 5.1 None are applicable.
PO 5.2 Freestanding advertisements: (a) identify the associated business(es) (b) are of a size that is commensurate with the scale of the centre and the street frontage (c) avoid visual clutter (d) positively respond to the context without dominating the locality (e) are sited and designed to not detract from the main street character.	DTS/DPF 5.2 Freestanding advertisements: (a) do not exceed 5m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser) (b) do not have a sign face that exceeds 4m^2 per side.
Concept Plans	
PO 6.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 6.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 21 - Virginia Concept Plan 22 - Virginia Infrastructure Concept Plan 71 - Hamley Bridge Concept Plan 81 - Edinburgh Defence Airfield Lighting Constraints Concept Plan 99 - Two Wells Concept Plan 100 - Gawler East In relation to DTS/DPF 6.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 6.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush. 2. The fence does not exceed 2.1 metres in height (measured from the lower of the 2 adjoining finished ground levels). 3. The fence does not exceed 1 m in height within 6 m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved).
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway. 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017). 3. It is required for the conduct or maintenance of railway activities. 4. Does not involve the clearance of native vegetation.
Consulting room Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Office Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or

	(b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996.* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. Shade sail consists of permeable material. 4. The total area of the sail - does not exceed 40m^2. 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment. 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m. 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation.
Shop Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.

Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996.* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof. 3. Panels and associated components do not overhang any part of the roof. 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system. 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Temporary public service depot Except where any of the following apply: • Hazards (Flooding) Overlay • Local Heritage Place Overlay • Major Urban Transport Routes Overlay • State Heritage Place Overlay • Traffic Generating Development Overlay • Urban Transport Routes Overlay	1. Occupies land for no longer than 3 months 2. Ensures litter and water are contained on site 3. Provides temporary security fencing around the perimeter of the site.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996.* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. The tank is part of a roof drainage system. 4. Total floor area - not exceeding 15m^2. 5. The tank is located wholly above ground. 6. Tank height - does not exceed 4m above natural ground level. 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour. 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Special industry	None specified

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) cinema (d) community facility (e) consulting room (f) dwelling located above a non-residential building level (g) indoor recreation facility (h) library (i) office (j) place of worship (k) shop (l) temporary public service depot (m) tourist accommodation.	Except development that exceeds the maximum building height specified in Township Main Street Zone DTS/DPF 3.1 or does not satisfy any of the following: 1. Township Main Street Zone DTS/DPF 3.2 2. Township Main Street Zone DTS/DPF 3.3.
4. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) recreation area (k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	None specified.
5. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
6. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Accommodation of a range of housing types that respond to housing preferences in a manner that contributes to and enhances township streetscapes and original settlement patterns.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Predominantly residential development with complementary non-residential uses compatible with the township streetscapes and established settlement patterns.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Ancillary accommodation (b) Consulting room (c) Dwelling (d) Office (e) Recreation area (f) Shop
PO 1.2 Commercial activities improve community access to services are of a scale and type to maintain residential amenity.	DTS/DPF 1.2 A shop, consulting room or office (or any combination thereof) satisfies any one of the following: (a) it is located on the same allotment and in conjunction with a dwelling where all the following are satisfied: (i) does not exceed 50m^2 gross leasable floor area (ii) does not involve the display of goods in a window or about the dwelling or its curtilage (b) it reinstates a former shop, consulting room or office in an existing building (or portion of a building) and satisfies one of the following: (i) the building is a State or Local Heritage Place (ii) is in conjunction with a dwelling and there is no increase in the gross leasable floor area previously used for non-residential purposes.
PO 1.3 Non-residential development located and designed to improve community accessibility to services, primarily in the form of: (a) small scale commercial uses such as offices, shops, and consulting rooms (b) community services such as educational facilities, community centres, places of worship, child care facilities and other health and welfare services (c) services and facilities ancillary to the function or operation of supported accommodation or retirement facilities (d) open space and recreation facilities.	DTS/DPF 1.3 None are applicable.
PO 1.4 Non-residential development sited and designed to complement the residential character and amenity of the neighbourhood.	DTS/DPF 1.4 None are applicable.
Site Dimensions and Land Division	
PO 2.1 Allotments/sites for residential purposes are consistent with the density expressed in any relevant *Minimum Site Area Technical and Numeric Variation* or are of a suitable size and dimension to accommodate the anticipated dwelling form, achieve compatibility with the prevailing development pattern in the locality and provide for appropriate wastewater disposal.	DTS/DPF 2.1 Development will not result in more than 1 dwelling on an existing allotment or Allotments/sites for residential purposes accord with the following: (a) where allotments/sites are connected to mains sewer or a Community Wastewater Management System site areas (or allotment areas in the case of land division) are not less than the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building): **Minimum Site Area** Minimum site area for a detached dwelling is 325 sqm; semi-detached dwelling is 325 sqm Minimum site area for a detached dwelling is 800 sqm; group dwelling is 800 sqm Minimum site area is 1,000 sqm Minimum site area is 1,200 sqm Minimum site area is 500 sqm

Minimum Site Area
Minimum site area is 750 sqm
Minimum site area is 800 sqm

or

(b) where allotments/sites are not connected to mains sewer or an approved common waste water disposal service site areas are not less than the greater of:

(i) 1200m^2

(ii) the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building):

Minimum Site Area
Minimum site area for a detached dwelling is 325 sqm; semi-detached dwelling is 325 sqm
Minimum site area for a detached dwelling is 800 sqm; group dwelling is 800 sqm
Minimum site area is 1,000 sqm
Minimum site area is 1,200 sqm
Minimum site area is 500 sqm
Minimum site area is 750 sqm
Minimum site area is 800 sqm

and

(c) site frontages are not less than:

Minimum Frontage
Minimum frontage for a detached dwelling is 20m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 9m
Minimum frontage is 12m
Minimum frontage is 15m
Minimum frontage is 18m
Minimum frontage is 20m
Minimum frontage is 25m

In relation to DTS/DPF 2.1, in instances where:

(d) more than one value is returned in the same field, refer to the *Minimum Frontage Technical and Numeric Variation layer* or *Minimum Site Area Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development

(e) no value is returned for DTS/DPF 2.1(a) (i.e, there is a blank field) then non are applicable and the relevant development cannot be classified as deemed-to-satisfy

(f) no value is returned for DTS/DPF 2.1(b)(ii) (i.e, there is a blank field) then the value for DTS/DPF 2.1(b)(ii) is zero

(g) no value is returned for DTS/DPF 2.1(c)(i) (i.e, there is a blank field) then the minimum site frontage is 20m.

PO 2.2

Development results in sites suitable for their intended purpose.

DTS/DPF 2.2

Where the site of a dwelling does not comprise an entire allotment:

(a) the balance of the allotment accords with the requirements specified in DTS/DPF 2.1

(b) if there is an existing dwelling on the allotment that will remain on the allotment after completion of the development it will not contravene:

(i) private open space requirements specified in Design in Urban Areas Table 1 - Private Open Space

(ii) car parking requirements specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.

Site Coverage

PO 3.1

Building footprints are consistent with the character and pattern of the township and provide sufficient space around buildings to limit visual impact, provide an attractive outlook and access to light and ventilation.

DTS/DPF 3.1

Development does not result in site coverage exceeding:

Site Coverage
Maximum site coverage is 35 per cent

In instances where:

(a) no value is returned (i.e. there is a blank field), then 50% applies

(b) more than one value is returned in the same field, refer to the Site Coverage Technical and Numeric Variation layer in the SA planning database to determine the applicable value relevant to the site of the proposed development.

Building Height

PO 4.1

Building and wall height contributes to the prevailing character of the neighbourhood and complements the height of nearby buildings.

DTS/DPF 4.1

Building height (excluding garages, carports and outbuildings) is no greater than:

(a) the following:

	Maximum Building Height (Metres) Maximum building height is 9m Maximum building height is 7.5m **Maximum Building Height (Levels)** Maximum building height is 1 level Maximum building height is 2 levels (b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)) - 2 building levels up to a height of 9m. In relation to DTS/DPF 4.1, in instances where: (c) more than one value is returned in the same field, refer to the *Maximum Building Height (levels) Technical and Numeric Variation* layer or *Maximum Building Height (Meters) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (d) only one value is returned for DTS/DPF 4.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.
PO 4.2 Additions and alterations do not adversely impact on the streetscape character.	DTS/DPF 4.2 Additions and alterations: (a) are fully contained within the roof space of a building with no external alterations made to the building elevation facing the primary street or (b) meet all of the following: (i) do not include any development forward of the front façade building line (ii) where including a second or subsequent building level addition, it does not project beyond a 45 degree angle measured from ground level at the building line of the existing building.
Primary Street Setback	
PO 5.1 Buildings are set back from primary street boundaries consistent with the existing streetscape.	DTS/DPF 5.1 Buildings setback from the primary street boundary in accordance with the following table: **Development Context** / **Minimum setback** There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building. — The average setback of the existing buildings. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site. — The setback of the existing building. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site. — (a) Where the existing building shares the same primary street frontage – the setback of the existing building (b) Where the existing building has a different primary street frontage - 6m There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building. — 6m For the purposes of **DTS/DPF 5.1:** (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table
Secondary Street Setback	
PO 6.1 Buildings are set back from secondary street boundaries to maintain a pattern of separation between buildings and public streets and reinforce streetscape character.	DTS/DPF 6.1 Building walls are set back from the secondary street boundary (other than a rear laneway): (a) no less than: **Minimum Side Boundary Setback** Minimum side boundary setback is 1m or (b) 900mm, whichever is greater or

	(c) if a building (except for ancillary buildings and structures) on any adjoining allotment is closer to the secondary street, not less than the distance of that building from the boundary with the secondary street. In instances where no value is returned in DTS/DPF 6.1(a) (i.e. there is a blank field), then the value for DTS/DPF 6.1(a) is zero.
Boundary Walls	
PO 7.1 Boundary walls are limited in height and length to manage visual and overshadowing impacts on adjoining properties.	DTS/DPF 7.1 Buildings do not incorporate side boundary walls where a side boundary setback value is returned in (a) below: (a) **Minimum Side Boundary Setback** Minimum side boundary setback is 1m or (b) where no side boundary setback value is returned in (a) above, and except where the building is a dwelling and is located on a central site within a row dwelling or terrace arrangement, side boundary walls occur only on one side boundary and satisfy (i) or (ii) below: (i) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same or lesser length and height (ii) side boundary walls do not: A. exceed 3.2m in wall height from the lower of the natural or finished ground level B. exceed 8m in length C. when combined with other walls on the boundary of the subject development site, exceed maximum 45% of the length of the boundary D. encroach within 3 metres of any other existing or proposed boundary walls on the subject land.
PO 7.2 Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a low density suburban streetscape character.	DTS/DPF 7.2 Dwelling walls in a semi-detached, row or terrace arrangement are setback from side boundaries shared with allotments outside the development site at least the minimum distance identified in DTS/DPF 8.1.
Side Boundary Setback	
PO 8.1 Buildings are set back from side boundaries to provide: (a) separation between buildings in a way that complements the established character of the locality (b) access to natural light and ventilation for neighbours.	DTS/DPF 8.1 Other than walls located on a side boundary in accordance with Township Neighbourhood Zone DTS/DPF 7.1, building walls are set back from the side boundary: (a) no less than: **Minimum Side Boundary Setback** Minimum side boundary setback is 1m (b) in all other cases (i.e., there is a blank field), then: (i) where the wall height does not exceed 3m measured from the lower of natural or finished ground level - at least 900mm (ii) for a wall that is not south facing and the wall height exceeds 3m measured from the lower of natural or finished ground level - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the lower of natural or finished ground level (iii) for a wall that is south facing and the wall height exceeds 3m measured from the lower of natural or finished ground level - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the lower of natural or finished ground level.
Rear Boundary Setback	
PO 9.1 Buildings are set back from rear boundaries to provide: (a) separation between buildings in a way that complements the established character of the locality (b) access to natural light and ventilation for neighbours (c) private open space (d) space for landscaping and vegetation.	DTS/DPF 9.1 Other than in relation to an access lane way, building walls are set back from the rear boundary at least: (a) 4m for the first building level (b) 6m for any second building level.
Appearance	
PO 10.1 Garages and carports are designed and sited to be discreet and not dominate the appearance of the associated dwelling when viewed from the street.	DTS/DPF 10.1 Garages and carports facing a street (other than an access lane way): (a) are set back at least 0.5m behind the building line of the associated dwelling (b) are set back at least 5.5m from the boundary of the primary street (c) have a total garage door / opening width not exceeding 30% of the allotment or site frontage, to a maximum width of 7m.

PO 10.2	DTS/DPF 10.2
The appearance of development as viewed from public roads is sympathetic to the wall height, roof forms, and roof pitches of the predominant housing stock in the locality.	None are applicable.
Ancillary buildings and structures	
PO 11.1 Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.	DTS/DPF 11.1 Ancillary buildings and structures: (a) are ancillary to a dwelling erected on the same site (b) have a floor area not exceeding 60m^2 (c) are constructed, added to or altered so that they are situated at least: (i) 0.5m behind the building line of the dwelling to which they are ancillary or (ii) 900mm from a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street (ii) when facing a primary street or secondary street. has a total door/opening not exceeding 7m or 30% of the site frontage, whichever is the lesser (e) if situated on a boundary (not being a boundary with a primary street or secondary street), a length not exceeding 8m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary not exceeding 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure (h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end), and where located to the side of the associated dwelling, have a wall height or post height no higher than the wall height of the associated dwelling (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, are pre-colour treated or painted in a non-reflective colour (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less: (i) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (ii) the amount of existing soft landscaping prior to the development occurring.
PO 11.2 Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements and do not result in over-development of the site.	DTS/DPF 11.2 Ancillary buildings and structures do not result in: (a) less private open space than specified in Design Table 1 - Private Open Space (b) less car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
PO 11.3 Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.	DTS/DPF 11.3 Non-residential ancillary buildings and structures: (a) are ancillary and subordinate to an existing non-residential use on the same site (b) have a floor area not exceeding the following: Allotment size / Floor area ≤500m^2 / 60m^2 >500m^2 / 80m^2 (c) are not constructed, added to or altered so that any part is situated: (i) in front of any part of the building line of the main building to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street

	(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height (or post height) not exceeding 3m (and not including a gable end) (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.
Concept Plans	
PO 12.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 12.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 3 - Mount Barker and Littlehampton In relation to DTS/DPF 12.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 12.1 is met.
Advertisements	
PO 13.1 Advertisements identify the associated business activity, and do not detract from the residential character of the locality.	DTS/DPF 13.1 Advertisements relating to a lawful business activity associated with a residential use do not exceed 0.3m2 and mounted flush with a wall or fence.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing dwelling. 2. The item being installed does not encroach on a public street. 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.

Carport

Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Total floor area - does not exceed 40m^2
6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end)
7. Building height - does not exceed 5m
8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 8m unless:
   (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
   (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street):
   (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
   (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
10. Site coverage does not exceed 50% or the amount specified in the *Site Coverage Technical and Numeric Variation* layer in the SA planning database (whichever is less).
11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 30% of the width of the allotment frontage (whichever is less).
12. The carport is located so that vehicle access:
   (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
   (b) is not obtained form a State maintained Road, and will use a driveway that:
      (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
      (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
      (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
      (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
      (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site
13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour
14. Does not involve the clearance of native vegetation
15. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Outbuilding

Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
6. Total floor area - does not exceed 40m^2
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)

	8. Building height - does not exceed 5m 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 8m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 11. Site coverage does not exceed 50% or the amount specified in the Site Coverage Technical and Numeric Variation layer in the SA planning database (whichever is less). 12. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 13. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State Maintained Road, and will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour 15. Does not involve- (a) excavation exceeding a vertical height of 1m; or (b) filling exceeding a vertical height of 1m, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m. 16. Does not involve the clearance of native vegetation 17. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 18. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None

<table>
<tr>
<td>Private bushfire shelter
Except where any of the following apply:

• Coastal Areas Overlay
• Future Local Road Widening Overlay
• Future Road Widening Overlay
• Hazards (Acid Sulfate Soils) Overlay
• Hazards (Flooding) Overlay
• Local Heritage Place Overlay
• River Murray Flood Plain Protection Area Overlay
• Significant Landscape Protection Overlay
• State Heritage Area Overlay
• State Heritage Place Overlay</td>
<td>1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the Electricity Act 1996
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. Primary street setback - at least as far back as the building to which it is ancillary
4. Secondary street setback - at least 900mm from the boundary of the allotment
5. At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place)
6. Does not involve the clearance of native vegetation.</td>
</tr>
<tr>
<td>Shade sail
Except where any of the following apply:

• Future Local Road Widening Overlay
• Future Road Widening Overlay
• Historic Area Overlay
• Local Heritage Place Overlay
• State Heritage Area Overlay
• State Heritage Place Overlay</td>
<td>1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the Electricity Act 1996
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. Shade sail consists of permeable material
4. The total area of the sail - does not exceed 40m^2
5. No part of the shade sail will be:
(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment
(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment
6. Primary street setback - at least as far back as the building line of the building to which it is ancillary
7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m
8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary
9. Does not involve the clearance of native vegetation
10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:
(a) a total area as determined by the following table:
<table><tr><th>Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)</th><th>Minimum percentage of site</th></tr><tr><td><150</td><td>10%</td></tr><tr><td>150-200</td><td>15%</td></tr><tr><td>201-450</td><td>20%</td></tr><tr><td>>450</td><td>25%</td></tr></table>(b) the amount of existing soft landscaping prior to the development occurring.</td>
</tr>
<tr>
<td>Solar photovoltaic panels (roof mounted)
Except where any of the following apply:

• Local Heritage Place Overlay
• State Heritage Area Overlay
• State Heritage Place Overlay</td>
<td>1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the Electricity Act 1996
2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof
3. Panels and associated components do not overhang any part of the roof
4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system
5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.</td>
</tr>
<tr>
<td>Swimming pool or spa pool and associated swimming pool safety features
Except where any of the following apply:

• Future Local Road Widening Overlay
• Future Road Widening Overlay
• Hazards (Flooding) Overlay
• Local Heritage Place Overlay
• State Heritage Area Overlay
• State Heritage Place Overlay</td>
<td>1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the Electricity Act 1996.
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted
4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature).
5. Primary street setback - at least as far back as the building line of the building to which it is ancillary
6. Location of filtration system from a dwelling on an adjoining allotment:
(a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise; or
(b) not less than 12m in any other case.
7. Does not involve the clearance of native vegetation
8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
9. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:</td>
</tr>
</table>

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Verandah
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site
4. Primary street setback - as far back as the building line of the building to which it is ancillary
5. Total floor area - does not exceed $40m^2$
6. Post height - does not exceed 3m measured from natural ground level
7. Building height - does not exceed 5m
8. Length - does not exceed 8m if any part of the structure abuts or is situated on a boundary of the allotment
9. Site coverage does not exceed 50% or the amount specified in the Site Coverage Technical and Numeric Variation layer in the SA planning database (whichever is less)
10. Does not involve the clearance of native vegetation
11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Water tank (above ground)
Except where any of the following apply:

- Historic Area Overlay
- Local Heritage Place Overlay
- Ramsar Wetlands Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. The tank is part of a roof drainage system
4. Total floor area - not exceeding $15m^2$
5. The tank is located wholly above ground
6. Tank height - does not exceed 4m above natural ground level
7. Primary street setback - at least as far back as the building line of the building to which it is ancillary
8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour
9. Does not involve the clearance of native vegetation
10. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

	(b) the amount of existing soft landscaping prior to the development occurring.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m^2 (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. All development undertaken by: (a) the South Australian Housing Trust either individually or jointly with other persons or bodies or (b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.	Except development involving any of the following: 1. residential flat building(s) of 3 or more building levels 2. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 3. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) ancillary accommodation (b) dwelling (c) dwelling addition (d) residential flat building.	Except development that: 1. exceeds the maximum building height specified in Township Neighbourhood Zone DTS/DPF 4.1 or 2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and:

	(a) the length of the proposed wall (or structure) exceeds 8m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3.2m measured from the lower of the natural or finished ground level (other than where the proposed wall abuts an existing wall or structure of greater height on the adjoining allotment).
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. does not satisfy Township Neighbourhood Zone DTS/DPF 1.2 or 2. exceeds the maximum building height specified in Township Neighbourhood Zone DTS/DPF 4.1 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 8m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3.2m measured from the lower of the natural or finished ground level (other than where the proposed wall abuts an existing wall or structure of greater height on the adjoining allotment).
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) recreation area (k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	None specified.
6. Demolition.	Except any of the the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified	
Placement of Notices - Exemptions for Restricted Development	
None specified	

Urban Activity Centre Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A cohesive and legible environment supporting a broad spectrum of regional level business, shopping, entertainment and recreational facilities that can cater for large crowds, smaller social gatherings and events over extended hours.
DO 2	Primary business, shopping and entertaining areas are integrated with public transport facilities, pedestrian and cycling networks, and community transport infrastructure, and designed to enhance the quality of the public realm.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Shops, offices, entertainment, health, education and recreation related uses and other businesses that provide a comprehensive range of goods and services to the region.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Car park facility (c) Child care facility (d) Cinema (e) Consulting room (f) Community transport facilities (g) Community facility (h) Consulting room (i) Dwelling (j) Educational facility (k) Emergency services facility (l) Hospital (m) Hotel (n) Indoor recreation facility (o) Library (p) Licensed Premises (q) Light industry (r) Office (s) Place of worship (t) Public transport facilities (u) Retail fuel outlet (v) Retirement facility (w) Shop (x) Store (y) Student accommodation (z) Supported accommodation (aa) Telecommunications facility (ab) Tourist accommodation (ac) Warehouse
PO 1.2 Facilities within the centre sited and designed with a view to promoting after-hours use to reinforce the centre as the focus of social activity.	DTS/DPF 1.2 None are applicable.
PO 1.3 Residential development does not prejudice the operation of existing non-residential development and the long term provision of services and facilities for wider community benefit.	DTS/DPF 1.3 None are applicable.
PO 1.4 Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities and contribute to making streets and pedestrian thoroughfares pleasant and lively places.	DTS/DPF 1.4 Dwellings are located at upper levels of buildings with non-residential uses located at ground level.
PO 1.5 Where residential development is appropriate having regarding to other performance outcomes of the zone, residential development achieves medium-to-high densities.	DTS/DPF 1.5 None are applicable.
PO 1.6 Development sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.	DTS/DPF 1.6 Any of the following: (a) shop, other than a bulky goods outlet with a gross leasable floor area more than 500m^2

	(b) cinema (c) hotel (d) licensed premises.
PO 1.7 Changes in the use of land encourage the efficient reuse of commercial premises to maintain and enhance vibrancy within activity centres.	DTS/DPF 1.7 A change of use to a shop, office, consulting room or any combination of these uses where all the following are achieved: (a) the area to be occupied by the proposed development is in an existing building and is currently used as a shop, office, consulting room or any combination of these uses (b) if the proposed change of use is for a shop that primarily involves the handling and sale of foodstuffs, areas used for the storage and collection of refuse are sited at least 10 metres from any neighbourhood-type zone, or the site of a dwelling (other than a dwelling directly associated with the proposed shop) (c) if the proposed change of use is for a shop that primarily involves heating and cooking of foodstuffs in a commercial kitchen and is within 30 metres of any neighbourhood-type zone boundary or a dwelling (other than a dwelling directly associated with the proposed shop), an exhaust duct and stack (chimney) exists or is capable of being installed for discharging exhaust emissions (d) if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves either (i) or (ii): (i) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) is from a road that is not an arterial road (ii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared (e) off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, whether exclusive to the premises or shared as part of an integrated complex containing two or more tenancies with shared facilities for off-street vehicle parking.
Built Form and Character	
PO 2.1 Development throughout the zone that integrates with existing development through building scale, connections and complementary land uses.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development integrated with existing or planned public or community transport interchanges and networks to support pedestrian access to activity centre facilities and services.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings are sited and designed to create pedestrian, vehicular, open space and visual linkages between the various built-form elements within the zone and adjoining main roads and thoroughfares.	DTS/DPF 2.3 None are applicable.
PO 2.4 Vehicular access points and car parks are coordinated and consolidated to enable the shared use of parking spaces.	DTS/DPF 2.4 None are applicable.
PO 2.5 Development promotes the use of pedestrian and cyclist connections to centre facilities and services.	DTS/DPF 2.5 None are applicable.
PO 2.6 Buildings and facilities are sited and designed to provide an active frontage to the public realm, contributing to streetscapes and spaces that encourage social interaction.	DTS/DPF 2.6 Not less than 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.
Building height and setbacks	
PO 3.1 Building height is consistent with the form expressed in any relevant *Maximum Building Height (Levels) Technical and Numeric Variation layer* and *Maximum Building Height (Metres) Technical and Numeric Variation layer* or is generally medium-rise development, with the highest intensity of built form at the centre of the zone, and lower scale at the peripheral zone interface.	DTS/DPF 3.1 Building height is: (a) not greater than: **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 9m Maximum building height is 12m Maximum building height is 14m Maximum building height is 15m Maximum building height is 16.5m Maximum building height is 24.5m Maximum building height is 10.5m

Maximum Building Height (Metres)
Maximum building height is 11m
Maximum building height is 20m
Maximum building height is 40.5m
Maximum building height is 17.5m
Maximum building height is 21m

Maximum Building Height (Levels)
Maximum building height is 2 levels
Maximum building height is 3 levels
Maximum building height is 4 levels
Maximum building height is 5 levels
Maximum building height is 6 levels
Maximum building height is 7 levels
Maximum building height is 10 levels

and

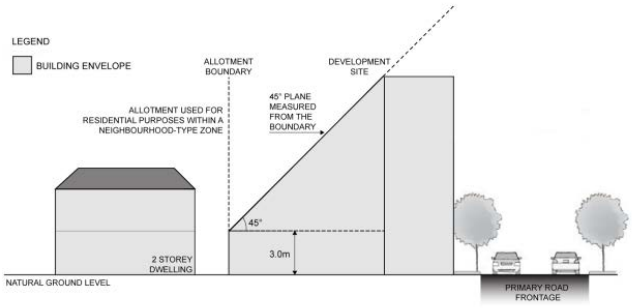
(b) not less than:

Minimum Building Height (Levels)
Minimum building height is 2 levels
Minimum building height is 3 levels
Minimum building height is 4 levels

In relation to DTS/DPF 3.1, in instances where:

(c) more than one value is returned in the same field then:
  (i) for the purpose of DTS/DPF 3.1(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer or Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development
  (ii) for the purpose of DTS/DPF 3.1(b) refer to the *Minimum Building Height (Levels) Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development

(d) only one value is returned for DTS/DPF 3.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other



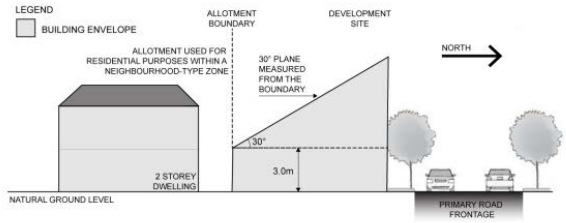
(e) no value is returned (ie there is a blank field), then:
  (i) for the purpose of DTS/DPF 3.1(a), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy
  (ii) for the purpose of DTS/DPF 3.1(b), then there is no minimum building height and DTS/DPF 3.1(b) is met.

PO 3.2

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood-type zone.

DTS/DPF 3.2

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary or where this boundary is the street boundary):



PO 3.3

Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.

DTS/DPF 3.3

Buildings on sites with a southern boundary adjoining an allotment used for residential purposes within a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram (except where this boundary is a street boundary):

PO 3.4 Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 3.4 None are applicable.
Land Division	
PO 4.1 Land division that creates allotments that vary in size and are suitable for a variety of business and community facilities.	DTS/DPF 4.1 None are applicable.
Advertisements	
PO 5.1 Advertisements are sited and designed to achieve an overall consistency and appearance along individual street frontages.	DTS/DPF 5.1 None are applicable.
PO 5.2 Freestanding advertisements: (a) identify the associated business(es) (b) are of a size that is commensurate with the scale of the centre and the street frontage (c) avoid visual clutter (d) positively respond to the context without dominating the locality.	DTS/DPF 5.2 Freestanding advertisements: (a) do not exceed 10m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser) (b) do not have a sign face that exceeds 8m^2 per side.
Vehicle parking	
PO 6.1 Vehicle parking areas are sited and designed to minimise visual dominance when viewed from the public realm.	DTS/DPF 6.1 Vehicle parking areas are sited above or below street level, in decked or basement parking.
Concept Plans	
PO 7.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 7.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:

Description
Concept Plan 51 - Cruickshank's Corner
Concept Plan 52 - Dock One
Concept Plan 57 - McLaren's Wharf
Concept Plan 60 - Port Adelaide State Heritage Area
Concept Plan 61 - Port Approach
Concept Plan 67 - Woolstores
Concept Plan 3 - Mount Barker and Littlehampton
Concept Plan 9 - Blakeview
Concept Plan 54 - Fletchers Slip
Concept Plan 62 - Railways
Concept Plan 64 - Southern Approach
Concept Plan 58 - North West
Concept Plan 66 - West
Concept Plan 59 - Old Port Reach
Concept Plan 63 - Retail Core
Concept Plan 65 - Southern Gateway
Concept Plan 53 - East End
Concept Plan 55 - Hart's Mill
Concept Plan 56 - Main Street
Concept Plan 81 - Edinburgh Defence Airfield Lighting Constraints

Description
Concept Plan 93 - Noarlunga Centre

In relation to DTS/DPF 7.1, in instances where:

(a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant.

(b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 7.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Consulting room Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Office Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or

	(b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Shade sail consists of permeable material 2. The total area of the sail - does not exceed 40m^2 3. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 4. Primary street setback - at least as far back as the building line of the building to which it is ancillary 5. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 6. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 7. Does not involve the clearance of native vegetation 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Shop Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.

Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Special industry	None specified

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) consulting room (d) dwelling	Except development that exceeds the maximum building height specified in Urban Activity Centre Zone DTS/DPF 3.1 or does not satisfy any of the following: 1. Urban Activity Centre Zone DTS/DPF 3.2 2. Urban Activity Centre Zone DTS/DPF 3.3.

(e) office (f) residential flat building (g) student accommodation (h) supported accommodation.	
4. Any development involving any of the following (or of any combination of any of the following): (a) hotel (b) licensed premises (c) shop.	Except development that exceeds the maximum building height specified in Urban Activity Centre Zone DTS/DPF 3.1 or does not satisfy any of the following: 1. Urban Activity Centre Zone DTS/DPF 1.6 2. Urban Activity Centre Zone DTS/DPF 3.2 3. Urban Activity Centre Zone DTS/DPF 3.3.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) temporary accommodation in an area affected by bushfire (p) tree damaging activity (q) verandah (r) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development

None specified.

Placement of Notices - Exemptions for Restricted Development

None specified.

Port Adelaide Centre Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Tourism, cultural and recreational facilities related to Port Adelaide's unique maritime and commercial heritage and character, and promotion of the zone as a major State tourism destination.
DO 2	Optimal use of vacant and under-utilised land, buildings and the inner harbour of the Port Adelaide River.
DO 3	Conservation and enhancement of items and areas of significance to the zone's unique maritime and commercial heritage, townscape, waterscape and landscape character.
DO 4	A substantial increase in the number of residential dwellings, resident population and provision of accommodation and services for a wide range of people and household types in appropriate areas.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

<table>
<tr><th>Performance Outcome</th><th>Deemed-to-Satisfy Criteria / Designated Performance Feature</th></tr>
<tr><td colspan="2">Land Use and Intensity</td></tr>
<tr><td>PO 1.1

Development is located, staged and designed such that vacant or under-utilised land and buildings are redeveloped or reused for more appropriate uses.</td><td>DTS/DPF 1.1

None are applicable.</td></tr>
<tr><td>PO 1.2

Development is located, staged and designed such that vacant or under-utilised land and buildings are redeveloped or reused for more appropriate uses.

<table><tr><th>Concept Map</th><th>Envisaged land uses</th></tr><tr><td>Cruickshank's Corner</td><td>Tourism and commercial development, with links to public open space, the public waterfront promenade and shore area</td></tr><tr><td>Dock One</td><td>Medium to high density residential development that includes mixed uses at ground floor level

Small craft mooring facilities</td></tr><tr><td>East End</td><td>Northern and south western parts: Offices, consulting rooms and similar uses that are suited to the conversion or rehabilitation of historic buildings in this area.

Old Port Dock Railway Station and yards: tourism, museum uses and car parking, with sites fronting St Vincent Street and Lipson Street primarily office, commercial and institutional uses

Southern part: Light industry, service industry, warehouse</td></tr><tr><td>Fletcher's Slip</td><td>Medium to high density residential dwellings

Small scale marine related businesses and tourism activity</td></tr><tr><td>Hart's Mill</td><td>Areas fronting Vincent Street: Tourist accommodation and tourist or commercial uses at ground level

Adjacent to the waterfront: Residential dwellings and mixed uses</td></tr><tr><td>Mainstreet</td><td>Small scale shops, offices, showrooms and consulting rooms

Residential development integrated above ground floor envisaged uses.</td></tr><tr><td>McLaren's Wharf</td><td>Mixed tourism, retail, office, recreational, educational and residential development of diverse character which capitalises on its access to the waterfront.

Development overlooking the Port Adelaide River: medium density to high density residential development.</td></tr><tr><td>North West</td><td>Medium to high density residential and small scale mixed use activities including some small scale tourist accommodation

Areas over water: ground level non-residential purposes including retail, tourism and commercial uses</td></tr><tr><td>Old Port Reach</td><td>Medium to high-density residential

development, including affordable housing</td></tr><tr><td>Port Adelaide State Heritage Area</td><td>Civic and administrative uses, small-scale offices, shipping agents and related commercial uses, and tourist facilities compatible with the area's historic townscape character.</td></tr><tr><td>Port Approach</td><td>Light industrial and commercial activities with opportunities for tourist infrastructure such as the maritime museum, tourist accommodation, offices, low impact commercial activities, and residential and mixed use development adjacent Dock One.

Development to the south of the Port River Expressway: residential and mixed use development, commercial, office and tourist activities.

Industrial development should not occur south of the road and rail bridges</td></tr></table></td><td>DTS/DPF 1.2

None are applicable.</td></tr>
</table>

	nearby residential activities.
Railways	Railway activities and associated commercial and industrial uses.
Retail Core	Major supermarkets and discount department stores, together with associated specialty shops, consulting rooms, offices and community service facilities. Medium to high-density residential development located above active ground floor uses
Southern Approach	Retail, showrooms, commercial, institutional development North-western part of the area: residential development.
Southern Gateway	Offices, commercial, showrooms, service trade premises and shops. Medium to high density residential development, including affordable housing, on sites in close proximity to major public transport facilities.
West	medium to high density residential development with associated open space areas and mixed use activities including some small-scale tourist accommodation
Woolstores	Low impact commercial, warehouse and storage activities Residential development where compatible with nearby land uses. Light industry, service industry and home industry in the area to the south of Brock Street.

PO 1.3 Land adjacent to the Port Adelaide River not required for port or shipping activities is progressively redeveloped for a range of the following uses, where consistent with the intent of any relevant Concept Plans: (a) community uses (b) medium and higher density residential uses (c) recreation (d) tourism (e) office (f) retail.	DTS/DPF 1.3 None are applicable.
PO 1.4 Recreational and tourism development, such as the following, are developed on the Port Adelaide River in locations where boating and harbour activities can be undertaken safely and conveniently: (a) marinas (b) maritime museum uses (c) ferry services (d) water taxis.	DTS/DPF 1.4 None are applicable.
PO 1.5 Residential development adjacent the rail corridor as shown on Concept Plans 53 (East End), 61 (Port Approach), 62 (Railways), 64 (Southern Approach), 65 (Southern Gateway), 66 (West) and 67 (Woolstores) has regard to existing and possible future noise sources with respect to site layout, orientation, design and construction to ensure a safe and comfortable residential environment and to minimise conflict with existing non-residential activities.	DTS/DPF 1.5 None are applicable.
PO 1.6 Tourist development is primarily situated adjacent to and on the Port Adelaide River and associated public promenade.	DTS/DPF 1.6 None are applicable.
PO 1.7 Major shops and groups of shops are concentrated within the areas constituting the 'Mainstreet' and 'Retail Core' Concept Plans.	DTS/DPF 1.7 None are applicable.
PO 1.8 Residential accommodation at medium and higher densities where it can be demonstrated that it is compatible with, and does not prejudice, the operation of non-residential activities within this or adjacent zones.	DTS/DPF 1.8 None are applicable.
PO 1.9 Public open space is provided in a variety of forms including a publicly accessible waterfront promenade, public reserves and public plazas.	DTS/DPF 1.9 None are applicable.

PO 1.10 Large landscaped or other open areas fronting on to Commercial Road and St Vincent Street are not developed.	DTS/DPF 1.10 None are applicable.
Built form and character	
PO 2.1 Buildings are situated close to or abutting street frontages, particularly on corner sites, to reinforce the prevailing townscape character within the subzone.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is sited to provide view lines and reinforce existing vistas indicated on a relevant Concept Plan including: View corridors: (a) take the form of one or more of the following: (i) public road reservations (ii) public reserves (iii) wider spaces between buildings (b) incorporate pedestrian linkages (c) have a minimum width of 17.5 metres if identified as a major view corridor (d) have a minimum width of 12 metres if identified as a minor view corridor.	DTS/DPF 2.2 None are applicable.
PO 2.3 The siting, form and scale of buildings on corner sites: (a) increases the presence of built form on street intersections (b) addresses both street frontages (c) minimises unusable open space on the street frontages.	DTS/DPF 2.3 None are applicable.
PO 2.4 Street furniture, including lighting, advertisements, advertising hoardings, litter bins, seats, bicycle parking facilities and bollards, are designed and located so as to complement the townscape character of the area and respond to its maritime locality.	DTS/DPF 2.4 None are applicable.
PO 2.5 Development abutting St Vincent Street, Commercial Road, Church Place and Dale Street, public spaces and pedestrian malls has facades of no less than two storeys.	DTS/DPF 2.5 None are applicable.
PO 2.6 Materials reflect and reinforce the historic, maritime character of the subzone wherever practicable.	DTS/DPF 2.6 None are applicable.
PO 2.7 Development adjacent to the public promenade, public plazas, public reserves, main roads and edges of public spaces is designed to: (a) maintain an active interface through architectural detail and interest in skyline and pedestrian levels (b) provide active street frontages at ground level with land uses such as cafes, restaurants, local shops and home offices that contribute to the vibrancy and diversity of the area (c) maintain the continuity of streetscape with streets and public spaces defined by consistent building frontages at the street alignment (d) maximise solar access and limit overshadowing of these areas (e) protect the amenity of residents at ground level (f) protect pedestrian amenity (g) provide for varied and attractive building elevations.	DTS/DPF 2.7 None are applicable.
PO 2.8 Landmark buildings indicated on a Concept Plans are designed to: (a) preserve a pleasant pedestrian environment (b) create consistent building frontages at the street, plaza or promenade alignment (c) assist to deflect wind downdrafts from penetrating to street level plazas and promenades (d) be exemplary in their design quality and enhance the locality with architectural elements characteristic of the Port Adelaide, heritage buildings and waterfront environment.	DTS/DPF 2.8 None are applicable.
PO 2.9 Development facilitates the provision of a continuous pedestrian and cyclist 'Inner Harbour Ring Route' including connections to nearby bicycle routes, schools and stations shown on Concept Maps relating to: (a) Cruickshank's Corner (b) Dock One	DTS/DPF 2.9 None are applicable.

(c) Fletcher's Slip
(d) Hart's Mill
(e) Mainstreet
(f) McLaren's Wharf
(g) North West
(h) Old Port Reach
(i) Port Approach
(j) West

PO 2.10

Waterfront development is designed and sited to allow for future potential flood mitigation measures such as the creation of sea walls or levees that will provide protection from stormwater and seawater flooding in a consistent and integrated manner.

DTS/DPF 2.10

None are applicable.

PO 2.11

Buildings greater than three storeys provide human scale street frontages through one or more of the following methods:

(a) stepped reduction of building heights towards street frontages
(b) use of the podium level
(c) use of secondary/adjoining building elements to the street.

DTS/DPF 2.11

None are applicable.

Building height

PO 3.1

Buildings are designed to reflect the street wall heights and horizontal elements of adjacent buildings by reinforcing:

(a) the prevailing datum heights, including parapet levels, balconies or distinguishing elements such as verandas and canopies at the street level
(b) a distinction of levels below and above prevailing horizontal elements through architectural expression.

DTS/DPF 3.1

None are applicable.

Land Division

PO 4.1

Development is sited to ensure that original grid street layouts within the centre are retained and wherever possible, re-established.

DTS/DPF 4.1

None are applicable.

PO 4.2

Roads and reserves are of sufficient width to cater for the projected traffic volumes and to provide for safe and convenient vehicle access, pedestrian environment, and on-street car parking.

DTS/DPF 4.2

Road types and road reserve widths are provided in accordance with the following table:

Road type	Maximum 24-hour traffic volume (vehicles)	Road reserve width (metres)	Carriageway width (metres)
Bus Route (Major Collector)	**Over 3000**	**23.2 (including bike lanes)**	**7 (takes into account provision for parallel car parking provided both sides)**
Bus Route (Minor Collector)	**1500-3000**	**20.2**	**7 (takes into account provision for parallel car parking provided both sides)**
Major Collector	**Over 3000**	**19.2 (22 with bike lanes)**	**6**
Minor Collector	**1500-3000**	**16.1**	**7.5**
Local Street	**500-1500**	**15**	**7**
Local Street with rear lane access	**0-1500**	**14 (provides for indented car parking)**	**5.5**
Local public road less than 60m in length and	**Less than 500**	**12.4**	**5**

	not contiguous with a road of lesser dimension than prescribed above			

Vehicle parking and access	
PO 5.1 Car parking areas, including decked car parking: (a) do not intrude upon, or interrupt the continuity of built-form desired along major street frontages in the subzone (b) do not detract from areas of architectural or townscape value. (c) in relation to multi-level car parking, are designed as buildings that contribute to the desired built form character include ground level uses adjacent to street frontages, such as offices, shops and tourist development.	DTS/DPF 5.1 None are applicable.
PO 5.2 On-street parking provided for detached, semi-detached and row dwellings to cater for anticipated demand.	DTS/DPF 5.2 Development of detached, semi-detached or row dwellings provides on-street parking at the rate of 0.3 spaces per dwelling within the areas as delineated on Concept Maps for: (a) Cruickshank's Corner (b) Dock One (c) Fletcher's Slip (d) McLaren's Wharf (e) North West (f) Old Port Reach (g) Port Approach (h) West
PO 5.3 Garages and carports associated with residential development are sited and designed to minimise visual dominance on the streetscape and views of the dwelling from the street.	DTS/DPF 5.3 Garages or carports do not obtain direct access from or face the primary street.
Waterfront development	
PO 6.1 Development creates and enhances a public promenade with a minimum width of 8 metres along the waterfront that achieves: (a) continuous public pedestrian and cyclist access (b) convenient, safe and attractive linkages between sections in areas of high pedestrian or cycle traffic and in front of key tourism uses (c) allowance for infrastructure provision and flood mitigation including a sea wall or levee.	DTS/DPF 6.1 None are applicable.
PO 6.2 Public plazas and public reserves are provided adjacent to the pedestrian promenade to provide for larger outdoor public events and gathering spaces adjacent to the waterfront in accordance with a relevant Concept Plan.	DTS/DPF 6.2 Public reserves and plazas have a minimum area of: (a) In the case of public reserves: 2000 square metres (other than those located within the Concept Plan 54 Fletcher's Slip) or (b) In the case of public plazas: 1500 square metres (and where a public plaza abuts a promenade, the area of the promenade is included in calculation of the plaza area for the length that the promenade abuts the plaza).
PO 6.3 Development is sited to take advantage of waterfront views and activities.	DTS/DPF 6.3 None are applicable.
PO 6.4 Marinas, wharfs, jetties, piers or boat moorings: (a) provide permanent and temporary docking facilities for residents and the public (b) provide moorings suitable to a variety and varying sizes of watercraft and vessels (c) provide a visually stimulating environment (d) add vitality and maritime activity to waterfront areas (e) provide a continuation (literal or thematic) of the historic maritime uses of the Port (f) maintain a strong link and physical integration between the Port Adelaide River and land based public reserves, plazas, promenades and other public and private features comprising the waterfront (g) integrate with development built directly on or over the river (h) avoid or minimise any negative impacts on: (i) natural riverine ecology and processes (i) dolphin safety within the dolphin sanctuary area (j) riverine or other water quality	DTS/DPF 6.4 None are applicable.

(k) ensure that any mechanical and electrical equipment and power outlets are safe from flooding or raised to a level not lower than 3.65 metres Australian Height Datum (AHD).	
PO 6.5 Development along the waterfront comprises bold, robust architectural forms with articulated and modelled facades and materials which reflect the character of older maritime/industrial buildings nearby.	DTS/DPF 6.5 None are applicable.
PO 6.6 Development encourages and facilitates the provision of a continuous 'Major Pedestrian/Cycle Path' and 'Inner Harbour Ring Route' public promenade including connections to nearby bicycle routes, schools and stations as shown on Concept Plans 'Port Adelaide Centre Traffic and Transport' and "McLaren's Wharf'.	DTS/DPF 6.6 None are applicable.
PO 6.7 Marinas, wharfs, jetties, piers or boat mooring facilities and associated development provide for: (a) serviced moorings to allow for floating retail activity (b) functional requirements of public transport and water navigation including berthing and wharf facilities for ferry and water taxi stopping points that are coordinated with land based services (c) modal interface with land-based public and private transport services and infrastructure (d) connection to shore-based service requirements and support facilities such as boat repair and servicing, amenities, accommodation and shelter structures.	DTS/DPF 6.7 None are applicable.

Urban Corridor (Boulevard) Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Buildings that achieve a consistent, tall, uniform facade to frame the primary road corridor (e.g., a State maintained road or a road with similar attributes) that are consistently well set back with areas of significant open space in front, other than in specified areas where a lesser or no setback is desired. Buildings accommodate a mix of compatible residential and non-residential uses including shops and other business activities at ground and lower floor levels with residential land uses above.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 A vibrant mix of land uses adding to the vitality of the area and extend activities outside shop hours including restaurants, educational, community and cultural facilities and visitor and residential accommodation.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Consulting Room (d) Dwelling (e) Educational Facility (f) Hotel (g) Licensed Premises (h) Office (i) Residential Flat Building (j) Retirement Facility (k) Shop (l) Supported Accommodation (m) Student Accommodation (n) Tourist Accommodation
PO 1.2 Shops, offices and consulting rooms that provide a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.2 Shop, office or consulting room uses not exceeding a maximum gross leasable floor area of 2,000m^2 in a single building.
PO 1.3 Dwellings developed in conjunction with non-residential uses that positively contribute to making the public realm of the primary street frontage, open space frontage and pedestrian thoroughfares safe, walkable, comfortable, pleasant and vibrant places.	DTS/DPF 1.3 Dwellings in mixed use buildings to be located at the upper floor levels of buildings.

<table>
<tr><td>PO 1.4

Development of medium to high density accommodation options either as part of a mixed use development or wholly residential development.</td><td>DTS/DPF 1.4

None are applicable.</td></tr>
<tr><td>PO 1.5

Ground floor uses positively contribute to an active primary street frontage and open space frontage.</td><td>DTS/DPF 1.5

Shop, office, or consulting room uses located on the ground floor level of mixed use buildings fronting the primary street frontage.</td></tr>
<tr><td>PO 1.6

Changes in the use of land encourage the efficient reuse of premises to support local access to a range of services compatible to the locality.</td><td>DTS/DPF 1.6

Provided off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, a change of use involving either of the following:

(a) from residential to office or consulting room on the ground or first floor of a building
(b) from residential to shop less than 250 m^2 on the ground floor of a building.</td></tr>
<tr><td colspan="2">Built Form and Character</td></tr>
<tr><td>PO 2.1

Buildings contribute to a consistent framing of the primary road corridor (e.g., a State maintained road or a road with similar attributes), open space and public spaces and provide visual relief from building mass at street level.</td><td>DTS/DPF 2.1

Buildings:

(a) include a clearly defined podium or street wall with a maximum height of 2 levels or 8 metres
(b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.</td></tr>
<tr><td>PO 2.2

Buildings are adaptable and flexible to suit a range residential and non-residential of land uses.</td><td>DTS/DPF 2.2

The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.</td></tr>
<tr><td>PO 2.3

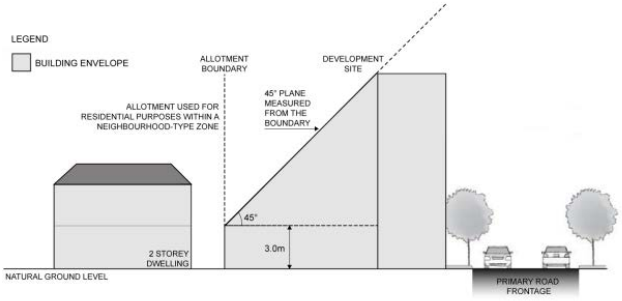
Buildings designed to create visual connection between the public realm and ground level interior, to ensure an active interface with the primary street frontage and maximise passive surveillance.</td><td>DTS/DPF 2.3

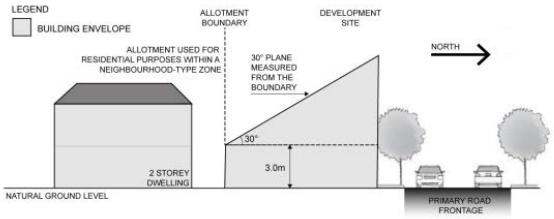
Minimum 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.</td></tr>
<tr><td>PO 2.4

Buildings setback from the primary street boundaries to provide a consistent streetscape edge with generous landscaping and tall articulated building facades, except in locations where a lesser or no setback is desired to achieve a more prominent, strongly defined, and continuous built form presence to the primary street frontage.</td><td>DTS/DPF 2.4

Buildings setback from the primary street boundary:

(a) not less than:





<table><tr><th>Minimum Primary Street Setback</th></tr><tr><td>Minimum primary street setback is 0m</td></tr><tr><td>Minimum primary street setback is 2m</td></tr><tr><td>Minimum primary street setback is 3m</td></tr><tr><td>Minimum primary street setback is 4m</td></tr><tr><td>Minimum primary street setback is 6m</td></tr></table>
Or

(b) where no value is returned in DTS/DPF 2.4(a), in accordance with the following table:

<table><tr><th>Development Context</th><th>Minimum setback</th></tr><tr><td>There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building.</td><td>The average setback of the existing buildings.</td></tr><tr><td>There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site.</td><td>The setback of the existing building.</td></tr><tr><td>There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site.</td><td>(a) Where the existing building shares the same primary street frontage – the setback of the existing building
(b) Where the existing building has a different primary street frontage - no DTS/DPF is applicable</td></tr></table>
In instances where DTS/DPF 2.4 (a) or (b) do not apply, then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.

For the purposes of DTS/DPF 2.4 (a) and (b):</td></tr>
</table>

	(a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table
PO 2.5 Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.	DTS/DPF 2.5 Building walls setback from a secondary street frontage not less than 2m.
PO 2.6 Buildings are: (a) sited on side boundaries for parts of the building located towards the front part of the allotment to achieve a continuity of street façade to the street (b) setback from side boundaries for parts of the building located behind the street facing elements, to enable building separation to provide access to natural ventilation and sunlight.	DTS/DPF 2.6 Building walls with no window/s or balcony/ies fronting the boundary, setback from side boundaries as follows: (a) no minimum on the boundary, within the first 18m from the front property boundary for any building level (b) no minimum for remaining length for ground level only (c) 2m for 1st level and above for building parts more than 18 metres from the front property boundary.
PO 2.7 Buildings set back from rear boundaries (other than street boundaries) to minimise negative impacts on neighbouring properties, including access to natural sunlight and ventilation.	DTS/DPF 2.7 Building walls setback from rear boundaries as follows: (a) 5m or more where the subject land directly abuts an allotment of a different zone or (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.
PO 2.8 Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.	DTS/DPF 2.8 Building walls setback from the rear access way: (a) no requirement where the access way is not less than 6.5m wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.
Building Height	
PO 3.1 Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer* and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or positively responds to the local context including the site's frontage, depth, and adjacent primary road corridor (e.g., a State maintained road or a road with similar attributes) or street width.	DTS/DPF 3.1 Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s): **Maximum Building Height (Levels)** Maximum building height is 2 levels Maximum building height is 3 levels Maximum building height is 4 levels Maximum building height is 5 levels Maximum building height is 6 levels Maximum building height is 7 levels Maximum building height is 8 levels Maximum building height is 9 levels Maximum building height is 10 levels **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 9m Maximum building height is 11.5m Maximum building height is 12m Maximum building height is 12.5m Maximum building height is 15m Maximum building height is 18.5m Maximum building height is 22m Maximum building height is 25.5m Maximum building height is 32.5m Maximum building height is 36m In relation to DTS/DPF 3.1, in instances where: (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation* layer or *Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other

	(c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 3.2 Buildings designed to achieve optimal height and floor space yields, and views across the Park Lands (where relevant).	DTS/DPF 3.2 New development is not less that the following building height: **Minimum Building Height (Levels)** Minimum building height is 2 levels Minimum building height is 3 levels Minimum building height is 4 levels In relation to DTS/DPF 3.2, in instances where: (a) more than one value is returned in the same field, refer to the *Minimum Building Height (Levels) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) no value is returned (i.e. there is a blank field), then there is no minimum building height and DTS/DPF 3.2 is met.
Interface Height	
PO 4.1 Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.	DTS/DPF 4.1 **Interface Height** Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):  Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): 
PO 4.2 Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 4.2 None are applicable.

Significant Development Sites	
PO 5.1 Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.	DTS/DPF 5.1 Development on significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area) up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it: (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area (b) includes more than 15% of dwellings as affordable housing or (c) includes at least: (i) three of the following: A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site C. active uses are located on the public street frontages of the building, with any above ground car parking located behind D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments E. a child care centre and (ii) three of the following: A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance B. living landscaped vertical surfaces of at least 50m^2 supported by services that ensure ongoing maintenance C. passive heating and cooling design elements including solar shading integrated into the building D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.
PO 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.	DTS/DPF 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area) that: (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF4.1 (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes) (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).
Movement, parking and access	
PO 6.1 Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.	DTS/DPF 6.1 Vehicular access to be provided: (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or (b) where it consolidates or replaces existing crossovers.
PO 6.2 Development is designed to ensure car parking is located to avoid negative impacts on the primary corridor streetscape.	DTS/DPF 6.2 Vehicle parking garages located behind buildings away from the primary main street frontage.
Advertisements	
PO 7.1 Freestanding advertisements identify the associated business without creating a visually dominant element within the streetscape.	DTS/DPF 7.1 Freestanding advertisements: (a) do not exceed 6m in height above natural ground level (b) do not have a sign face that exceeds 4m^2 per side.
Concept Plans	
PO 8.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 8.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 135 - Thebarton In relation to DTS/DPF 8.1, in instances where:

	(a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the Electricity Act 1996 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation. 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas

Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the Electricity Act 1996 2. The system is freestanding and not attached to a building or other structure. 3. No part of the system: (a) is more than 4m in height (measured as a height above the natural surface of the ground); (b) is within 100m of a dwelling not associated with the system (whether the dwelling is on the same allotment as the system or another allotment); and (c) is within 10m of a boundary of an allotment containing a dwelling not associated with the system. 4. The generating capacity of the system does not exceed 30 kW 5. Does not result in the clearance of any native vegetation.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted. 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 6. Location of filtration system from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation. 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry
Shop	Any of the following: (a) shop with a gross leasable floor area less than 4000m^2 (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) dwelling (d) residential flat building (e) retirement facility (f) student accommodation (g) supported accommodation.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Boulevard) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Boulevard) DTS/DPF 4.1 or 3. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Boulevard) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Boulevard) DTS/DPF 1.2 or 3. does not satisfy Urban Corridor (Boulevard) DTS/DPF 4.1 or 4. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) tree damaging activity (p) verandah (q) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).

7. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development

None specified.

Placement of Notices - Exemptions for Restricted Development

None specified.

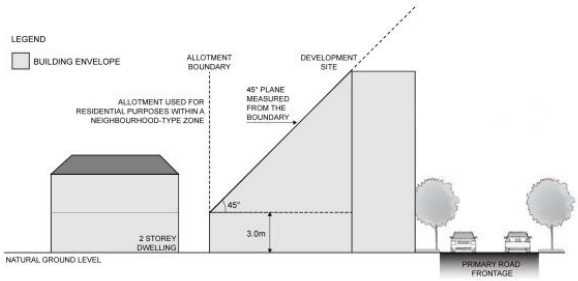
Urban Corridor (Business) Zone

Assessment Provisions (AP)

Desired Outcome (DO)

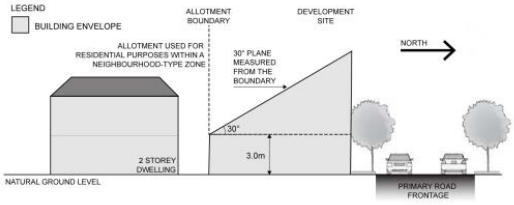
Desired Outcome	
DO 1	A medium rise mixed use zone with a strong focus on employment, which accommodates a diverse range of commercial and light industrial land uses together with compatible medium density residential development oriented towards a primary road corridor (e.g., a State maintained road or a road with similar attributes).
DO 2	Residential development that provides a pleasant amenity for residents without diminishing business opportunities on adjacent land.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria



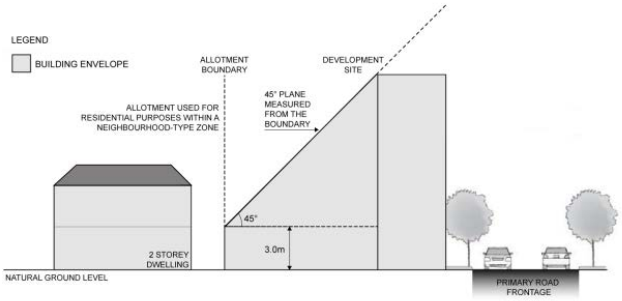
Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 A diverse range of employment land uses, educational and community facilities in conjunction with residential accommodation.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Consulting Room (d) Dwelling (e) Educational Facility (f) Hotel (g) Licensed Premises (h) Light Industry (i) Office (j) Residential Flat Building (k) Retail Fuel Outlet (l) Retirement Facility (m) Service Trade Premises (n) Shop (o) Store (p) Student Accommodation (q) Supported Accommodation (r) Tourist Accommodation (s) Warehouse
PO 1.2 A range of small- to medium- scale non-residential uses, services and facilities such as shops, offices and consulting rooms that meet the day to day needs of the local community.	DTS/DPF 1.2 Shop, office or consulting room uses not exceeding a maximum gross leasable floor area of 500m^2 in a single building.
PO 1.3 Development of non-residential uses such as educational facilities, child care facilities, health and welfare services to service the local community as well as a wider catchment.	DTS/DPF 1.3 None are applicable.
PO 1.4 Dwellings primarily developed in conjunction with non-residential uses to support local business, activities and contribute to making the primary street frontage and pedestrian thoroughfares safe, walkable, comfortable, pleasant and vibrant places.	DTS/DPF 1.4 Dwellings developed in conjunction with non-residential uses sited: (a) at upper levels of buildings with non-residential uses located at ground level or (b) behind non-residential uses on the same allotment.
PO 1.5 Ground floor uses positively contribute to an active primary street frontage.	DTS/DPF 1.5 Shop, office, or consulting room uses located on the ground floor level of mixed use buildings

	fronting the primary street frontage.
PO 1.6 Changes in the use of land encourage the efficient reuse of premises to support local access to a range of services compatible to the locality.	DTS/DPF 1.6 Provided off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, a change of use involving either of the following: (a) from residential to office or consulting room on the ground or first floor of a building (b) from residential to shop less than 250 m^2 on the ground floor of a building.
PO 1.7 Residential accommodation sited and designed to not impede ongoing operations of existing commercial activity.	DTS/DPF 1.7 None are applicable.
Built Form and Character	
PO 2.1 Buildings are adaptable and flexible to suit a range residential and non-residential of land uses.	DTS/DPF 2.1 The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.
PO 2.2 Buildings designed to create visual connection between the public realm and ground level interior, to ensure an active interface with the primary road corridor (e.g., a State maintained road or a road with similar attributes) and maximise passive surveillance.	DTS/DPF 2.2 Minimum 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.
PO 2.3 Buildings setback from the primary street boundaries contribute to the consistent established streetscape, except in locations where no setback is desired to achieve a more prominent, strongly defined, and continuous built form presence to the primary street frontage.	DTS/DPF 2.3 Buildings setback from the primary street boundary: (a) not less than: **Minimum Primary Street Setback** Minimum primary street setback is 0m Minimum primary street setback is 2m Minimum primary street setback is 3m Or (b) where no value is returned in DTS/DPF 2.3(a), in accordance with the following table: **Development Context** / **Minimum setback** There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building. — The average setback of the existing buildings. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site. — The setback of the existing building. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site. — (a) Where the existing building shares the same primary street frontage – the setback of the existing building (b) Where the existing building has a different primary street frontage - no DTS/DPF is applicable In instances where DTS/DPF 2.3 (a) or (b) do not apply, then none are applicable and the relevant development cannot be classified as deemed-to-satisfy. For the purposes of **DTS/DPF 2.3 (a) and (b):** (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table
PO 2.4 Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.	DTS/DPF 2.4 Building walls setback from a secondary street frontage of not less than 2m.
PO 2.5	DTS/DPF 2.5

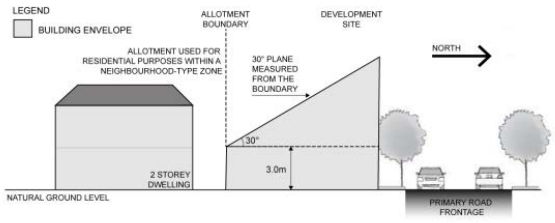


Buildings set back from rear boundaries (other than street boundaries) to minimise impacts on neighbouring properties, including access to natural sunlight and ventilation.	Building walls setback from rear boundaries as follows: (a) 5m or more where the subject land directly abuts an allotment of a different zone or (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.
PO 2.6 Buildings are: (a) sited on side boundaries for parts of the building located towards the front part of the allotment to achieve a continuity of street façade to the street (b) setback from side boundaries for parts of the building located behind the street facing elements, to enable building separation to provide access to natural ventilation and sunlight.	DTS/DPF 2.6 Building walls with no window/s or balcony/s fronting the boundary, setback from side boundaries as follows: (a) no minimum on the boundary within the first 18m from the front property boundary for any building level (b) no minimum for remaining length for ground level only (c) 2m for 1st level and above for building parts more than 18m from the front property boundary.
PO 2.7 Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.	DTS/DPF 2.7 Building walls setback from the rear access way: (a) no requirement where the access way is not less than 6.5m wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.
Building Height	
PO 3.1 Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer* and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or positively responds to the local context including the site's frontage, depth, and adjacent primary road corridor (e.g., a State maintained road or a road with similar attributes) or street width.	DTS/DPF 3.1 Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s): **Maximum Building Height (Levels)** Maximum building height is 2 levels Maximum building height is 4 levels Maximum building height is 5 levels Maximum building height is 6 levels **Maximum Building Height (Metres)** Maximum building height is 15m Maximum building height is 16.5m Maximum building height is 18.5m Maximum building height is 22m Maximum building height is 24.5m In relation to DTS/DPF 3.1, in instances where: (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation* layer or *Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 3.2 Buildings designed to achieve optimal height and floor space yields.	DTS/DPF 3.2 New development is not less that the following building height: **Minimum Building Height (Levels)** Minimum building height is 2 levels Minimum building height is 3 levels Minimum building height is 4 levels In relation to DTS/DPF 3.2, in instances where: (a) more than one value is returned in the same field, refer to the *Minimum Building Height (Levels) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) no value is returned (i.e. there is a blank field), then there is no minimum building height and DTS/DPF 3.2 is met.
Interface Height	
PO 4.1 Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.	DTS/DPF 4.1 **Interface Height** Buildings constructed within a building envelope provided by a:

Interface Height



(a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):



(b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

	Interface Height 
PO 4.2 Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 4.2 None are applicable.
Significant Development Sites	
PO 5.1 Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.	DTS/DPF 5.1 Development on significant development sites up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it: (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area (b) includes more than 15% of dwellings as affordable housing or (c) includes at least: (i) three of the following: A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site C. active uses are located on the public street frontages of the building, with any above ground car parking located behind D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments; E. a child care centre (ii) three of the following: A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance B. living landscaped vertical surfaces of at least 50m^2 supported by services that ensure ongoing maintenance C. passive heating and cooling design elements including solar shading integrated into the building D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.
PO 5.2 Development on a significant development site (a site with a frontage to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 which may include one or more allotments) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.	DTS/DPF 5.2 Development that: (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 4.1 (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes) (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).
Movement, parking and access	
PO 6.1 Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.	DTS/DPF 6.1 Vehicular access to be provided: (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or (b) where it consolidates or replaces existing crossovers.
Advertisements	

PO 7.1 Freestanding advertisements identify the associated business without creating a visually dominant element within the streetscape.	DTS/DPF 7.1 Freestanding advertisements: (a) do not exceed 6m in height (b) do not have a sign face that exceeds $4m^2$ per side.
Concept Plans	
PO 8.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 8.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 135 - Thebarton In relation to DTS/DPF 8.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Total floor area - does not exceed $40m^2$. 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end). 7. Building height - does not exceed 5m. 8. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure. 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment. 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser).

	12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site. 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour. 14. Does not involve the clearance of native vegetation.
Outbuilding Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 6. Total floor area - does not exceed 40m^2 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end) 8. Building height - does not exceed 5m 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 11. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 12. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 13. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour 15. Does not involve- (a) excavation exceeding a vertical height of 1m; or (b) filling exceeding a vertical height of 1m, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m. 16. Does not involve the clearance of native vegetation

	17. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. Shade sail consists of permeable material. 4. The total area of the sail - does not exceed 40m^2. 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment. 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m. 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation. 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof. 3. Panels and associated components do not overhang any part of the roof. 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system. 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level 7. Building height - does not exceed 5m 8. Length - does not exceed 11m if any part of the structure abuts or is situated on a boundary of the allotment 9. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 10. Does not involve the clearance of native vegetation.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. The tank is part of a roof drainage system. 4. Total floor area - not exceeding 15m^2. 5. The tank is located wholly above ground. 6. Tank height - does not exceed 4m above natural ground level. 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour. 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry
Shop	Any of the following: (a) shop with a gross leasable floor area less than 2000m^2 (b) shop located within the Urban Corridor Business Retail Subzone (c) shop that is a restaurant

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development **(Column A)**	**Exceptions** **(Column B)**
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) dwelling (d) residential flat building (e) retirement facility (f) student accommodation (g) supported accommodation.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Business) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Business) DTS/DPF 4.1 or 3. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.

4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Business) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Business) DTS/DPF 1.2 or 3. does not satisfy Urban Corridor (Business) DTS/DPF 4.1 or 4. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) tree damaging activity (p) verandah (q) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development

None specified.

Placement of Notices - Exemptions for Restricted Development

None specified.

Urban Corridor Business Retail Subzone

Assessment Provisions

Desired Outcome (DO)

Desired Outcome	
DO1	Additional neighbourhood-scale shopping, business, entertainment and recreation facilities to provide a focus for business and community life and most daily and weekly shopping needs of the community.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the community.	DTS/DPF 1.1 Shop, office or consulting room uses not exceeding a maximum gross leasable floor area of 2000m2 in a single building.

Urban Corridor (Living) Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A mixed use area with a strong residential focus that provides a diverse range of medium density housing options primarily in multi-level medium rise buildings supported by compatible non-residential land uses oriented towards a primary road corridor (e.g., a State maintained road or a road with similar attributes), high frequency public transport route, activity centre or significant open space.
DO 2	Non-residential activities that enhance convenient day to day living for nearby residents and encourage small group and intimate social gatherings that is contextually appropriate to a compact residential amenity.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 A vibrant mix of land uses adding to the vitality of the area and extend activities outside shop hours including restaurants, educational, community and cultural facilities and visitor and residential accommodation.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Consulting Room (d) Dwelling (e) Educational Facility (f) Office (g) Retirement Facility (h) Shop (i) Student Accommodation (j) Supported Accommodation (k) Tourist Accommodation
PO 1.2 A range of small to medium scale non-residential uses, services and facilities such as shops, offices and consulting rooms that meet the day to day needs for the local community.	DTS/DPF 1.2 Shop, office, or consulting room uses not exceeding a maximum gross leasable floor area of 500m^2.
PO 1.3 Development of diverse medium density accommodation options either as part of a mixed use development or wholly residential development.	DTS/DPF 1.3 None are applicable.
PO 1.4 Changes in the use of land encourage the efficient reuse of premises to support local access to a range of services compatible to the locality.	DTS/DPF 1.4 Provided off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, a change of use involving either of the following: (a) from residential to office or consulting room on the ground or first floor of a building (b) from residential to shop less than 250 m^2 on the ground floor of a building.
Built Form and Character	
PO 2.1 Buildings positively contribute to a continuous framing of the primary road corridor (e.g., a State maintained road or a road with similar attributes) and public realm, and provide visual relief from building scale and massing from the ground level public realm.	DTS/DPF 2.1 Buildings: (a) include a clearly defined podium or street wall with a maximum building height of 2 building levels or 8m in height (b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.
PO 2.2 Buildings setback from the primary street boundaries are consistent with the established streetscape, except in locations where no setback is desired to achieve a more prominent, strongly defined, and continuous built form presence to the primary street frontage.	DTS/DPF 2.2 Buildings setback from the primary street boundary: (a) not less than: **Minimum Primary Street Setback** Minimum primary street setback is 0m Minimum primary street setback is 2m

Minimum Primary Street Setback
Minimum primary street setback is 3m
Minimum primary street setback is 4m
Minimum primary street setback is 6m

Or

(b) where no value is returned in DTS/DPF 2.2(a), in accordance with the following table:

Development Context	Minimum setback
There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building.	The average setback of the existing buildings.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site.	The setback of the existing building.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site.	(a) Where the existing building shares the same primary street frontage – the setback of the existing building (b) Where the existing building has a different primary street frontage - no DTS/DPF is applicable

In instances where DTS/DPF 2.2 (a) or (b) do not apply, then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.

For the purposes of **DTS/DPF 2.2 (a) and (b):**

(a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback

(b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table

PO 2.3

Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.

DTS/DPF 2.3

Building walls setback from a secondary street frontage not less than 2m.

PO 2.4

Buildings are:

(a) sited on side boundaries for parts of the building located towards the front part of the allotment to achieve a continuity of street façade to the street

(b) setback from side boundaries for parts of the building located behind the street facing elements, to enable building separation to provide access to natural ventilation and sunlight.

DTS/DPF 2.4

Building walls with no window/s or balcony/s fronting the boundary, setback from side boundaries as follows:

(a) no minimum on the boundary, within the first 18m from the front property boundary for any building level

(b) no minimum for remaining length for ground level only

(c) 2m or more for 1st level and above for building parts more than 18m from the front property boundary.

PO 2.5

Buildings set back from rear boundaries (other than street boundaries) to:

(a) minimise negative impacts on neighbouring properties, including access to natural sunlight and ventilation

(b) provide open space recreational opportunities

(c) provide space for landscaping and vegetation.

DTS/DPF 2.5

Building walls setback from rear boundaries as follows:

(a) 5m or more where the subject land directly abuts an allotment of a different zone

(b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 2.6

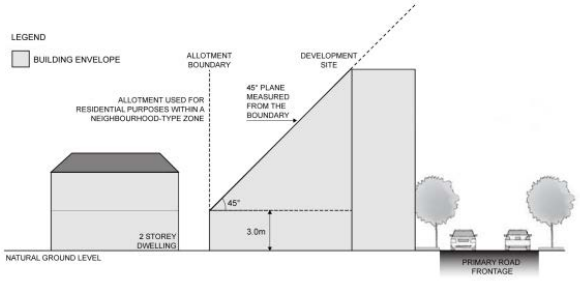
Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.

DTS/DPF 2.6

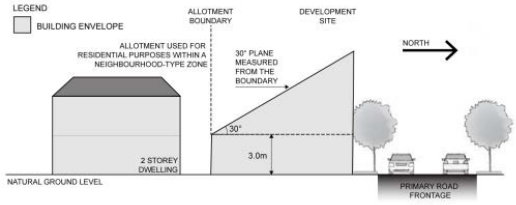
Building walls setback from the rear access way:

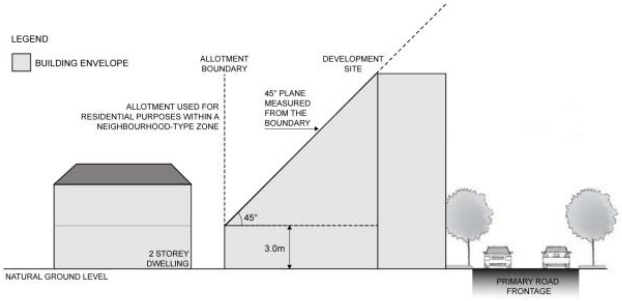
(a) no requirement where the access way is not less than 6.5m wide
or

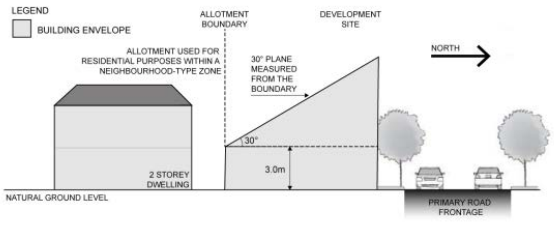
(b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.



Building Height







PO 3.1

Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer and the Maximum Building Height (Metres) Technical and*

DTS/DPF 3.1

Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s):

Numeric Variation layer or positively responds to the local context including the site's frontage, depth, and adjacent primary road corridor (e.g., a State maintained road or a road with similar attributes) or street width.	**Maximum Building Height (Levels)** Maximum building height is 3 levels Maximum building height is 4 levels Maximum building height is 6 levels Maximum building height is 8 levels Maximum building height is 20 levels **Maximum Building Height (Metres)** Maximum building height is 11.5m Maximum building height is 12.5m Maximum building height is 15m Maximum building height is 16.5m Maximum building height is 22m Maximum building height is 24.5m Maximum building height is 29m Maximum building height is 73m In relation to DTS/DPF 3.1, in instances where: (a) more than one value is returned, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer or Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 3.2 Buildings designed to achieve optimal height and floor space yields, and maintain traditional main street form.	DTS/DPF 3.2 New development is not less that the following building height: **Minimum Building Height (Levels)** Minimum building height is 1 level Minimum building height is 2 levels Minimum building height is 3 levels In relation to DTS/DPF 3.2, in instances where: (a) more than one value is returned, refer to the *Minimum Building Height (Levels) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) no value is returned (i.e. there is a blank field), then there is no minimum building height and DTS/DPF 3.2 is met.
Interface Height	
PO 4.1 Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.	DTS/DPF 4.1 **Interface Height** Buildings constructed within a building envelope provided by a: (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):  (b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

	Interface Height
	
	Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): 
	Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): 
PO 4.2 Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 4.2 None are applicable.
Significant Development Sites	
PO 5.1 Consolidation of significant development sites (a site with a frontage over 25m to a primary	DTS/DPF 5.1 Development on significant development sites up to 30% above the maximum building

road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.	height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it: (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area (b) includes more than 15% of dwellings as affordable housing or (c) includes at least: (i) three of the following: A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site C. active uses are located on the public street frontages of the building, with any above ground car parking located behind D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments E. a child care centre. (ii) three of the following: A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance; B. living landscaped vertical surfaces of at least 50m^2 supported by services that ensure ongoing maintenance; C. passive heating and cooling design elements including solar shading integrated into the building; D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.
PO 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area, which may include one or more allotments) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.	DTS/DPF 5.2 Development that: (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 4.1 (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes) (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).
Movement, parking and access	
PO 6.1 Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.	DTS/DPF 6.1 Vehicular access to be provided: (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or (b) where it consolidates or replaces existing crossovers.
PO 6.2 Development is designed to ensure car parking is located avoid negative impacts on the primary street frontage streetscape.	DTS/DPF 6.2 Vehicle parking garages located behind buildings away from the primary main street frontage.
Advertisements	
PO 7.1 Freestanding advertisements identify the associated business without creating a visually dominant element within the streetscape.	DTS/DPF 7.1 Freestanding advertisements: (a) do not exceed 6m in height above natural ground level (b) do not have a face that exceeds 4m^2 per side.
Concept Plans	
PO 8.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 8.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 24 - Glenside Concept Plan 110 - Forestville In relation to DTS/DPF 8.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1 metres in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1 m in height within 6 m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7. Building height - does not exceed 5m 8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access

	(v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour 14. Does not involve the clearance of native vegetation.
Outbuilding Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads). 6. Total floor area - does not exceed 40m^2. 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end). 8. Building height - does not exceed 5m. 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 10. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%. 11. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure. 12. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 13. If clad in sheet metal is pre-colour treated or painted in a non-reflective colour. 14. Does not involve- (a) excavation exceeding a vertical height of 1 metre; or (b) filling exceeding a vertical height of 1 metre, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2 metres. 15. Does not involve the clearance of native vegetation. 16. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment

	(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted. 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 6. Location of filtration system from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation. 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site. 4. Primary street setback - as far back as the building line of the building to which it is ancillary. 5. Total floor area - does not exceed 40m^2. 6. Post height - does not exceed 3m measured from natural ground level. 7. Building height - does not exceed 5m. 8. Length - does not exceed 11m if any part of the structure abuts or is situated on a boundary of the allotment. 9. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%. 10. Does not involve the clearance of native vegetation.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. The tank is part of a roof drainage system. 4. Total floor area - not exceeding 15m^2. 5. The tank is located wholly above ground. 6. Tank height - does not exceed 4m above natural ground level. 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour. 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry
Residential flat building	Any of the following: (a) residential flat building not located within the Concept Plan Boundary of Concept Plan 24 – Glenside (b) residential flat building that: (i) is located within the Concept Plan Boundary of Concept Plan 24 – Glenside and (ii) does not exceed 20 building levels or 73m in building height
Shop	Any of the following: (a) shop with a gross leasable floor area less than or equal to 1000m^2 (b) shop within the Urban Corridor Living Retail Subzone (c) shop that is a Restaurant

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following):	Except development that:

(a) advertisement (b) child care facility (c) dwelling (d) residential flat building (e) student accommodation (f) supported accommodation.	1. exceeds the maximum building height specified in Urban Corridor (Living) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Living) DTS/DPF 4.1 or 3. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Living) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Living) DTS/DPF 1.2 or 3. does not satisfy Urban Corridor (Living) DTS/DPF 4.1 or 4. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) tree damaging activity (p) verandah (q) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development
None specified.

Placement of Notices - Exemptions for Restricted Development
None specified.

Urban Corridor Living Retail Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO1	Additional neighbourhood-scale shopping, business, entertainment and recreation facilities to provide a focus for business and community life and most daily and weekly shopping needs of the community.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the community as part of a mixed use development.	DTS/DPF 1.1 Shops, offices or consulting room uses exceeding a maximum gross leasable floor area of 500m^2 where integrated with residential development and comprise a range of tenancies.

Urban Corridor (Main Street) Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A safe, walkable and vibrant shopping, entertainment and commercial main street precinct with an active day and evening economy supported by medium density residential development.
DO 2	Built form positively contributing to: (a) a streetscape that is visually interesting at human-scale comprising articulated buildings with a high level of fenestration and balconies oriented towards the street (b) a fine-grain public realm comprising buildings with active frontages that are designed to reinforce the street rhythm, that consider the facades, articulation and massing of existing buildings and any spaces between them, and provide narrow tenancy footprints at ground level.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

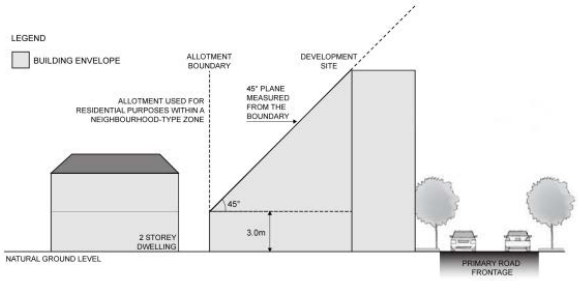
Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 A vibrant mix of land uses adding to the vitality of the area and extending activities outside shop hours including restaurants, educational, community and cultural facilities and visitor and residential accommodation.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child Care Facility (c) Consulting Room (d) Dwelling (e) Hotel (f) Educational Facility (g) Licensed Premises (h) Office (i) Residential Flat Building (j) Retirement Facility (k) Shop (l) Student Accommodation (m) Supported Accommodation (n) Tourist Accommodation
PO 1.2 Retail, office, entertainment and recreation related uses that provide a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.2 None are applicable.
PO 1.3 Ground floor uses contribute to a safe, active and vibrant main street.	DTS/DPF 1.3 Shop, office, or consulting room uses located on the ground floor level of buildings fronting the primary street frontage.
PO 1.4 Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities that contribute to making the main street locality and pedestrian thoroughfares safe, walkable, comfortable, pleasant and vibrant places.	DTS/DPF 1.4 Dwellings developed in conjunction with non-residential uses, and sited: (a) at upper levels of buildings with non-residential uses located at ground level or (b) behind non-residential uses on the same allotment.
PO 1.5	DTS/DPF 1.5

Development of diverse medium density accommodation options either as part of a mixed use development or wholly residential development.	None are applicable.
PO 1.6 Land uses promote movement and activity during daylight and evening hours, including restaurants, educational, health, community and cultural facilities, and visitor and residential accommodation.	DTS/DPF 1.6 None are applicable.
PO 1.7 Changes in the use of land encourage the efficient reuse of commercial premises to maintain and enhance vibrancy within activity centres.	DTS/DPF 1.7 A change of use to a shop, office, consulting room or any combination of these uses where all of the following are achieved: (a) the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses; (b) if the proposed change of use is for a shop that primarily involves the handling and sale of foodstuffs, areas used for the storage and collection of refuse are sited at least 10 metres from the site of a dwelling (other than a dwelling directly associated with the proposed shop) (c) if the proposed change of use is for a shop that primarily involves heating and cooking of foodstuffs in a commercial kitchen and is within 30 metres of any neighbourhood-type zone boundary or a dwelling (other than a dwelling directly associated with the proposed shop), an exhaust duct and stack (chimney) exists or is capable of being installed for discharging exhaust emissions (d) if the change in use involves a gross leasable floor area greater than 250m^2 and has direct frontage to an arterial road, it achieves either (i) or (ii): (i) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) is from a road that is not an arterial road (ii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared (e) off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, except in any of the following circumstances: (i) the building is a local heritage place (ii) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made); or (iii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Built Form and Character	
PO 2.1 Buildings sensitively frame the main street and public spaces, provide overall visual relief from building height and mass, and maintain a human scale for pedestrians.	DTS/DPF 2.1 Buildings: (a) include a clearly defined podium or street wall with a maximum building height of 2 building levels or 8m, or higher where it matches the existing street wall of adjoining buildings (b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.
PO 2.2 Buildings and structures designed to complement and respond to the established fine-grained main street character by: (a) ensuring the verandah profile and materials of construction are consistent with and positively respond to adjacent traditional main street buildings (b) complementing the traditional shop-front elements, such as narrow buildings and tenancy footprints, with frequently repeated frontages, and clear-glazed narrow shop front displays above raised display levels [base stall boards] and recessed entries.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings designed to create visual connection between the public realm and ground level interior, to ensure an active interface with the main street and maximise passive surveillance.	DTS/DPF 2.3 The ground floor primary frontage of buildings provides at least 60% of the street frontage as an entry / foyer or display window to a shop or other community or commercial use that provides pedestrian interest and activation.
PO 2.4 Buildings provide a high amenity pedestrian environment by providing shelter and shade over footpaths.	DTS/DPF 2.4 Buildings that provide a continuity of verandahs, canopies, awnings or other pedestrian shelters to contribute to pedestrian comfort.
PO 2.5 Buildings are adaptable and flexible to accommodate a range of residential and non-residential land uses on the ground floor.	DTS/DPF 2.5 The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.
PO 2.6 Buildings sited on the primary street boundary to achieve a continuity of built form frontage	DTS/DPF 2.6 Buildings with a 0m setback from the primary street boundary, with the exception of mi

to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate but vibrant spaces.	setbacks to accommodate outdoor dining areas.
PO 2.7 Buildings with no setback from the secondary street boundary to contribute to a consistent established streetscape.	DTS/DPF 2.7 Buildings with a 0m setback from the secondary street boundary.
PO 2.8 Buildings with no side boundaries setback to achieve a continuity of street façade to the main street.	DTS/DPF 2.8 Buildings with a 0m setback from the side boundary.
PO 2.9 Buildings set back from rear boundaries (other than street boundaries) to minimise negative impacts on neighbouring properties, including access to natural sunlight and ventilation.	DTS/DPF 2.9 Buildings setback from rear boundaries as follows: (a) 5m or more where the subject land directly abuts an allotment of a different zone or (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.
PO 2.10 Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.	DTS/DPF 2.10 Buildings setback from the rear access way: (a) no requirement where the access way is not less than 6.5m wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.
Building Height	
PO 3.1 Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer* and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or positively responds to the local context including the site's frontage, depth, and adjacent primary road corridor (e.g., a State maintained road or a road with similar attributes) or street width.	DTS/DPF 3.1 Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s): **Maximum Building Height (Levels)** Maximum building height is 2 levels Maximum building height is 3 levels Maximum building height is 4 levels Maximum building height is 5 levels Maximum building height is 6 levels Maximum building height is 7 levels **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 11.5m Maximum building height is 12.5m Maximum building height is 15m Maximum building height is 16.5m Maximum building height is 18m Maximum building height is 18.5m Maximum building height is 22m Maximum building height is 24.5m Maximum building height is 25.5m In relation to DTS/DPF 3.1, in instances where: (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer* or *Maximum Building Height (Metres) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 3.2 Buildings designed to achieve optimal height and floor space yields, and maintain traditional main street form.	DTS/DPF 3.2 New development is not less that the following building height: **Minimum Building Height (Levels)** Minimum building height is 2 levels Minimum building height is 3 levels In relation to DTS/DPF 3.2, in instances where: (a) more than one value is returned in the same field, refer to the *Minimum Building Height (Levels) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) no value is returned (i.e. there is a blank field), then there is no minimum building height and DTS/DPF 3.2 is met.

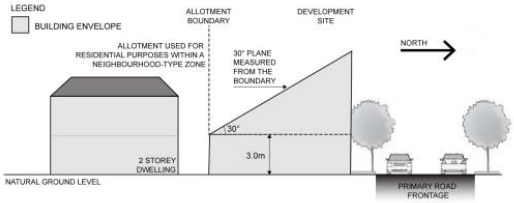
Interface Height

PO 4.1



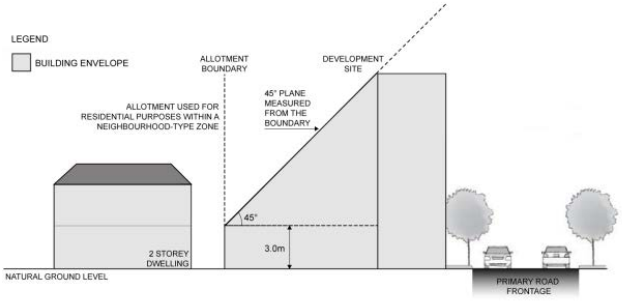
Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.

DTS/DPF 4.1

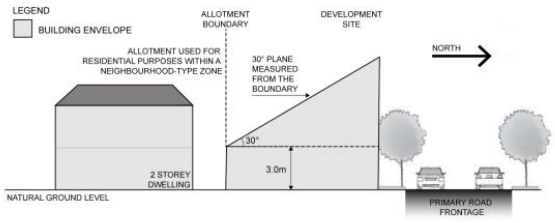


Interface Height

Buildings constructed within a building envelope provided by a:



(a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):



(b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

	Interface Height 
PO 4.2 Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 4.2 None are applicable.
Significant Development Sites	
PO 5.1 Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m^2 in area, which may include one or more allotments) to achieve increased development yield, provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.	DTS/DPF 5.1 Development on significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m^2 in area, which may include one or more allotments) up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it: (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area (b) includes more than 15% of dwellings as affordable housing or (c) includes at least: (i) three of the following: A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site C. active uses are located on the public street frontages of the building, with any above ground car parking located behind D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments; E. a child care centre. (ii) three of the following: A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance; B. living landscaped vertical surfaces of at least 50m2 supported by services that ensure ongoing maintenance C. passive heating and cooling design elements including solar shading integrated into the building D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.
PO 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m^2 in area, which may include one or more allotments) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.	DTS/DPF 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m^2 in area, which may include one or more allotments) that: (a) is constructed within the zone's Interface Building Height provision as specified DTS/DPF 4.1 (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes) (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).
Movement, parking and access	
PO 6.1 Development does not result in additional crossovers on the main street, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.	DTS/DPF 6.1 Vehicular access to be provided: (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or

	(b) where it consolidates or replaces existing crossovers.
PO 6.2 Development is designed to ensure car parking is located to avoid negative impacts on the main street rhythm and activation.	DTS/DPF 6.2 Vehicle parking garages located behind buildings away from the primary main street frontage.
Advertisements	
PO 7.1 Advertisements are sited and designed to achieve an overall consistency of appearance along individual street frontages.	DTS/DPF 7.1 None are applicable.
PO 7.2 Freestanding advertisements: (a) identify the associated business(es) (b) are of a size that is commensurate with the scale of the centre and the street frontage (c) avoid visual clutter (d) positively respond to the context without dominating the locality (e) are sited and designed to not detract from the main street character.	DTS/DPF 7.2 Freestanding advertisements: (a) do not exceed 8m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser) (b) do not have a sign face that exceeds 6m2 per side.
Concept Plans	
PO 8.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 8.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: In relation to DTS/DPF 8.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Consulting room Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or

	(b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Office Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 11. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 12. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.

Shop Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to a system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation 4. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 5. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) dwelling (c) office (d) residential flat building (e) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Main Street) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Main Street) DTS/DPF 4.1 or 3. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
4. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) tree damaging activity (p) verandah (q) water tank.	None specified.
5. Any development involving any of the following (or of any combination of any of the following) within the Tunnel Protection Overlay: (a) storage of materials, equipment or vehicles (whether temporary or permanent) over an area exceeding 100 square metres (b) temporary stockpiling of soil, gravel, rock or other natural material over an area exceeding 100 square metres (c) excavation or ground intruding activity at a depth greater than 2.5 metres below the regulated surface level.	Except where not undertaken by the Crown, a Council or an essential infrastructure provider.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building)

	2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.

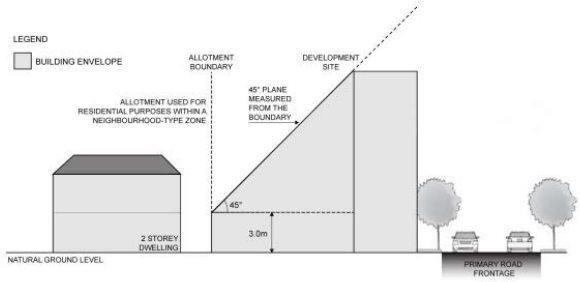
Placement of Notices - Exemptions for Performance Assessed Development
None specified.

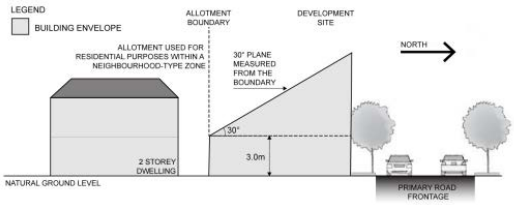
Placement of Notices - Exemptions for Restricted Development
None specified.

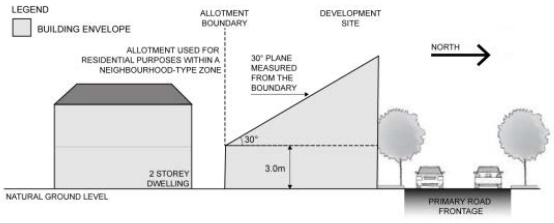
Urban Neighbourhood Zone

Assessment Provisions (AP)

Desired Outcome (DO)







Desired Outcome	
DO 1	A mixed use area that: (a) provides a flexible policy framework for the redevelopment of urban areas in close proximity to high frequency public transport corridors or adjacent primary road corridors that have the potential to become activity generators (b) provides for the high-quality design and integration of buildings and public realm in mixed use areas with walkable urban form, excellent provision for walking and cycling and active street frontages that encourage social interaction, positively contribute to public safety and vibrancy and promote active movement and public transport use (c) provides a concentration of mixed use activity close to community focal points, such as a high frequency fixed transit stop, activity centre or high quality open space (d) provides adaptable and flexible buildings that can accommodate changes in land use and respond to changing economic and social conditions and advances in technology (e) transitions to a reduced scale and intensity at the zone boundary to maintain the amenity of residential properties located within adjoining zones.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development of medium and high density accommodation types for living, including dwellings, supported accommodation, student accommodation, short term accommodation, either as part of a mixed use development or wholly residential development.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Carport (c) Child Care Facility (d) Consulting Room (e) Dwelling (f) Educational Facility (g) Hotel (h) Licensed Premises (i) Light Industry (j) Office (k) Outbuilding (l) Residential Flat Building (m) Retirement Facility (n) Shop (o) Student Accommodation (p) Supported Accommodation (q) Tourist Accommodation
PO 1.2 Development of diverse medium density accommodation, and high density accommodation in specified locations (locations where 7 or more building levels is envisaged), either as part of a mixed use development or wholly residential development.	DTS/DPF 1.2 None are applicable.
PO 1.3 Light industrial and commercial uses (including high technology and research based activity) where compatible with adjoining uses.	DTS/DPF 1.3 None are applicable.
PO 1.4	DTS/DPF 1.4

Co-locate close to public transport land uses that generate high levels of pedestrian activity, encourage public transport use and provide opportunities for multi-purpose trips.	None are applicable.
PO 1.5 In clusters of non-residential development, provide high-quality, inclusive and integrated public realm, including open spaces, sport and recreation facilities, and places that serve as hubs for communal activity.	DTS/DPF 1.5 None are applicable.
PO 1.6 Shops, offices and consulting rooms services and facilities to meet the needs of the local community.	DTS/DPF 1.6 Except where a Main Street Subzone or Urban Neighbourhood Retail Subzone applies, shops, offices or consulting room uses not exceeding a maximum gross leasable floor area of 500m^2 for individual tenancies and 1000m^2 in a single building.
PO 1.7 Larger scale shops, offices, and consulting rooms primarily clustered together to provide a focus for services and facilities.	DTS/DPF 1.7 None are applicable.
Built Form and Character	
PO 2.1 Development positively contributes to creating activity nodes around high-frequency public transport stops/stations and multi-modal transport interchanges, encourages public transport use and positively contributes to a fine-grain streetscape that provides a safe, comfortable, vibrant and walkable public realm at ground level.	DTS/DPF 2.1 None are applicable.
PO 2.2 Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer* and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or positively responds to the local context including the site's frontage, depth, and adjacent primary street width.	DTS/DPF 2.2 Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s): **Maximum Building Height (Levels)** Maximum building height is 3 levels Maximum building height is 4 levels Maximum building height is 5 levels Maximum building height is 6 levels Maximum building height is 8 levels Maximum building height is 10 levels Maximum building height is 12 levels **Maximum Building Height (Metres)** Maximum building height is 12m Maximum building height is 12.5m Maximum building height is 13.5m Maximum building height is 16.5m Maximum building height is 18.5m Maximum building height is 24.5m Maximum building height is 32.5m Maximum building height is 43m Maximum building height is 20.5m Maximum building height is 28.5m Maximum building height is 40.5m Maximum building height is 48.5m In relation to DTS/DPF 2.2, in instances where: (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer* or *Maximum Building Height (Metres) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 2.3 Buildings are designed to be adaptable and flexible to suit a range of land uses, including retail, office and residential, without the need for significant change to the building.	DTS/DPF 2.3 The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.
PO 2.4 Buildings designed to create visual connection between the public realm and ground level interior, promote an active human-scale interface with the primary road / public transport corridor and open space and maximise passive surveillance.	DTS/DPF 2.4 Not less than 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.
PO 2.5	DTS/DPF 2.5

Buildings set back from the primary street boundaries consistent with the existing/emerging streetscape.	Buildings setback from the primary street boundary in accordance with the following table: **Development Context** / **Minimum setback** There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building. — The average setback of the existing buildings. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site. — The setback of the existing building. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site. — (a) Where the existing building shares the same primary street frontage – the setback of the existing building; (b) Where the existing building has a different primary street frontage – 0m There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building. — 0m For the purposes of **DTS/DPF 2.5:** (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table
PO 2.6 Buildings set back from secondary street boundaries in a manner compatible with the emerging streetscape pattern.	DTS/DPF 2.6 Building walls setback from the secondary street frontage in accordance with either of the following: (a) no minimum where adjoining allotments are vacant or (b) the average of the setback of the existing building on each adjoining site fronting the same street.
PO 2.7 Buildings set back from rear boundaries (other than street boundaries) to: (a) minimise impacts on properties in neighbouring zones (b) maximise intensity of development within the zone.	DTS/DPF 2.7 Building walls setback from the rear boundaries as follows: (a) 5m or more where the subject land directly abuts an allotment of a different zone or (b) 0 metres in all other cases.
PO 2.8 Buildings set back from side boundaries (other than street boundaries) to: (a) reduce impacts of building bulk on adjoining properties (b) provide adequate direct sun and ventilation to the building and open spaces (c) minimise the extent of overlooking and resultant loss of privacy on adjoining properties (d) minimise the extent of overshadowing on adjoining properties.	DTS/DPF 2.8 Building walls setback from the side boundaries the average of the setback of the existing building on each adjoining site fronting the same street.
PO 2.9 Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.	DTS/DPF 2.9 Building walls setback from the rear access way: (a) no requirement where the access way is not less than 6.5m wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.
Interface Height	
PO 3.1 Buildings mitigate visual impacts of building massing on residential development within a neighbourhood-type zone.	DTS/DPF 3.1 **Interface Height** Buildings constructed within a building envelope provided by a: (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):

	Interface Height  (b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):  Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): 
PO 3.2 Development that manages the interface with a low-rise neighbourhood-type zone by incorporating less dense, low-rise residential land uses at the interface, and avoiding land uses or intensity of land uses that adversely affect residential amenity.	DTS/DPF 3.2 None are applicable.
Site Dimensions and Land Division	
PO 4.1 Where appropriate, a street grid pattern is provided in mixed use areas to maintain clear sightlines, improve public safety and legibility within the public realm, and ensure walkability and connectivity are maximised.	DTS/DPF 4.1 None are applicable.
Movement, parking and access	
PO 5.1 Where practicable, buildings provide vehicle access via a side street or rear lane access way	DTS/DPF 5.1 Vehicular access to be provided:

that is designed to: (a) provide space between buildings that reduces building mass and creates a more visually diverse public realm (b) minimises conflicts with pedestrians and cyclists (c) achieve active frontages at a lower intensity than the primary street frontage.	(a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or (b) where it consolidates or replaces existing crossovers.
Concept Plans	
PO 6.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code.	DTS/DPF 6.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 5 - Bowden Urban Village Concept Plan 34 - Bowden-Brompton Concept Plan 3 - Mount Barker and Littlehampton Concept Plan 89 - Tonsley Concept Plan 86 - Edwardstown Concept Plan 94 - Old Reynella Concept Plan 112 - West Lakes Concept Plan 111 - St Clair Concept Plan 109 - Seaton Concept Plan 115 - Morphetteville Concept Plan 152 - Brompton Gasworks In relation to DTS/DPF 6.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 6.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing building 2. The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. Shade sail consists of permeable material. 4. The total area of the sail does not exceed 40m^2. 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment.

	6. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m. 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation. 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 11. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 12. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof. 3. Panels and associated components do not overhang any part of the roof. 4. Does not apply to a system with a generating capacity of more than 5MW that is to be connected to the State's power system. 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted. 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 6. Location of filtration system from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation. 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 9. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 10. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation 4. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 5. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry
Shop	Any of the following: (a) shop located in the Main Street Subzone (b) shop located in the Urban Neighbourhood Retail Subzone (c) shop with a gross leasable floor area less than 2000m^2 (d) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) dwelling (d) dwelling addition (e) residential flat building (f) retirement facility (g) student accommodation (h) supported accommodation (i) tourist accommodation.	Except development that exceeds the maximum building height specified in Urban Neighbourhood DTS/DPF 2.2 or does not satisfy Urban Neighbourhood DTS/DPF 3.1.
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that exceeds the maximum building height specified in Urban Neighbourhood DTS/DPF 2.2 or does not satisfy any of the following: 1. Urban Neighbourhood DTS/DPF 1.6 2. Urban Neighbourhood DTS/DPF 3.1.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail	None specified.

(m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) temporary accommodation in an area affected by bushfire (p) tree damaging activity (q) verandah (r) water tank.	
6. Any development involving any of the following (or of any combination of any of the following) within the Tunnel Protection Overlay: (a) storage of materials, equipment or vehicles (whether temporary or permanent) over an area exceeding 100 square metres (b) temporary stockpiling of soil, gravel, rock or other natural material over an area exceeding 100 square metres (c) excavation or ground intruding activity at a depth greater than 2.5 metres below the regulated surface level.	Except where not undertaken by the Crown, a Council or an essential infrastructure provider.
7. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
8. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development
None specified.

Placement of Notices - Exemptions for Restricted Development
None specified.

Main Street Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A shopping, entertainment and commercial main street supported by medium to high density residential development.
DO 2	A fine-grained public realm with safe, walkable and vibrant streets created by mixed use buildings with non-residential uses at ground level and a visually consistent street rhythm informed by local context and narrow tenancy footprints.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.1 None are applicable
PO 1.2 Land uses promote movement and activity during daytime and evening hours, including shops, restaurants, small scale licensed premises, educational, community and cultural facilities, and visitor and residential accommodation.	DTS/DPF 1.2 None are applicable.
PO 1.3 Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities and positively contribute to making the main street locality and pedestrian thoroughfares safe, walkable, comfortable, pleasant and lively places.	DTS/DPF 1.3 Dwellings developed in conjunction with non-residential uses sited: (a) at upper levels of buildings with non-residential uses located at ground level or (b) behind non-residential uses on the same allotment.
PO 1.4	DTS/DPF 1.4

Development of well-designed diverse medium to high density accommodation options, including dwellings, supported accommodation, student accommodation, and short term accommodation, either as part of a mixed use development or wholly residential development.	None are applicable.
Built Form and Character	
PO 2.1 Ground level uses contribute to a safe, walkable and vibrant main street.	DTS/DPF 2.1 Shop, office, or consulting room uses located on the ground floor level of buildings.
PO 2.2 Buildings designed to create visual connection between the public realm and ground level interior, positively contribute to passive surveillance of the public realm, have an active interface with the main street and contribute to the fine-grain character and retail function of the street.	DTS/DPF 2.2 The ground floor primary frontage of buildings provides at least 60% of the street frontage as an entry / foyer or display window to a shop or other community or commercial use that provides pedestrian interest and activation.
PO 2.3 Buildings are adaptable and flexible to suit a range of residential and non-residential land uses.	DTS/DPF 2.3 The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.
PO 2.4 Buildings with no set-backs from the main street boundary to achieve a continuity of built form frontage to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate but vibrant spaces.	DTS/DPF 2.4 None are applicable.
PO 2.5 Vehicle parking and ancillary buildings and structures (including garages, carports and outbuildings) located behind buildings away from the primary main street frontage and designed to minimise negative impacts on the main street rhythm and activation.	DTS/DPF 2.5 None are applicable.

Urban Neighbourhood Retail Subzone

Assessment Provisions (AP)

Desired Outcomes (DO)

Desired Outcome	
DO 1	Additional neighbourhood-scale shopping, business, entertainment and recreation facilities to provide a focus for business and community life and most daily and weekly shopping needs of the community.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the community.	DTS/DPF 1.1 Shops not exceeding a maximum gross leasable floor area of: (a) 5500m^2 within the whole subzone area in West Lakes (b) 2000m^2 within the whole subzone area in Bedford Park (Laffer's Triangle).

Urban Renewal Neighbourhood Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Housing and other land uses which no longer meet community preferences are replaced with new diverse housing options. Housing density increases, taking advantage of well-located urban land. Employment and community services will improve access to jobs, goods and services without compromising residential amenity.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature

Land Use and Intensity	
PO 1.1 Predominantly residential development with complementary non-residential uses that support an active, convenient, and walkable urban neighbourhood.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Ancillary accommodation (b) Child care facility (c) Community facility (d) Consulting room (e) Dwelling (f) Educational facility (g) Office (h) Place of Worship (i) Recreation area (j) Residential flat building (k) Retirement facility (l) Shop (m) Student accommodation (n) Supported accommodation.
PO 1.2 Commercial activities improve community access to services are of a scale and type to maintain residential amenity.	DTS/DPF 1.2 A shop, consulting room or office (or any combination thereof) satisfies (a) or (b): (a) it is located on the same allotment and in conjunction with a dwelling where all the following are satisfied: (i) does not exceed 50m^2 gross leasable floor area (ii) does not involve the display of goods in a window or about the dwelling or its curtilage (b) where located outside of an Activity Centre, does not exceed 250m^2 in gross leasable floor area.
PO 1.3 Non-residential development located and designed to improve community accessibility to services, primarily in the form of: (a) small-scale commercial uses such as offices, shops and consulting rooms (b) community services such as educational facilities, community centres, places of worship, child care facilities and other health and welfare services (c) services and facilities ancillary to the function or operation of supported accommodation or retirement facilities (d) open space and recreation facilities.	DTS/DPF 1.3 None are applicable.
PO 1.4 Expansion of existing community services such as educational facilities, community facilities and child care facilities in a manner which complements the scale of development envisaged by the desired outcome for the neighbourhood.	DTS/DPF 1.4 Alteration of or addition to existing educational facilities, community facilities or child care facilities where: (a) set back at least 3m from any boundary shared with a residential land use (b) building height not exceeding 1 building level (c) the total floor area of the building does not exceed 150% of the total floor area prior to the addition/alteration (d) development satisfies Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.
PO 1.5 Non-residential development sited and designed to complement the residential character and amenity of the neighbourhood.	DTS/DPF 1.5 None are applicable.
PO 1.6 Expansion of existing community services such as educational facilities, community facilities and child care facilities in a manner which complements the scale of development envisaged by the desired outcome for the neighbourhood.	DTS/DPF 1.6 Alteration of or addition to existing educational facilities, community facilities or child care facilities where: (a) set back at least 3m from any boundary shared with a residential land use (b) building height not exceeding 1 building level (c) the total floor area of the building not exceeding 150% of the total floor area prior to the addition/alteration (d) off-street vehicular parking exists or will be provided in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
Building Height	
PO 2.1 Buildings generally 2-3 levels with taller buildings located on sites that are a suitable size and dimension to manage massing and impacts on adjoining residential development.	DTS/DPF 2.1 Building height (excluding garages, carports and outbuildings) is no greater than: (a) the following: **Maximum Building Height (Metres)** Maximum building height is 7m

Maximum Building Height (Metres)
Maximum building height is 8m
Maximum building height is 8.5m
Maximum building height is 9m
Maximum building height is 11.5m
Maximum building height is 12.5m
Maximum building height is 14m
Maximum building height is 15m
Maximum building height is 16.5m
Maximum building height is 18.5m
Maximum building height is 22m
Maximum building height is 32.5m
Maximum building height is 10.5m
Maximum building height is 20.5m
Maximum Building Height (Levels)
Maximum building height is 2 levels
Maximum building height is 3 levels
Maximum building height is 4 levels
Maximum building height is 5 levels
Maximum building height is 6 levels
Maximum building height is 9 levels
Maximum building height is 10 levels

(b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)):
- (i) 4 building levels and 15m where the site:
  - A. is at least 1200m^2 in area
  - and
  - B. has a frontage of 35 metres
  - or
- (ii) 3 building levels and 12m in all other circumstances.

In relation to DTS/DPF 2.1, in instances where:

(c) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer and Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development

(d) only one value is returned for DTS/DPF 2.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.

PO 2.2

Buildings on an allotment at the interface with a different neighbourhood-type zone are sited and designed to provide an orderly transition to the built form scale envisaged in that zone to mitigate impacts on adjacent residential uses.

DTS/DPF 2.2

None are applicable.

Primary Street Setback

PO 3.1

Buildings are set back from primary street boundaries to contribute to the existing/emerging pattern of street setbacks in the streetscape and integrate development with public open space.

DTS/DPF 3.1

Buildings setback from the primary street boundary in accordance with the following table:

Development Context	Minimum setback
Where the allotment adjoins a public reserve greater than 2000m^2 (including where the allotment would adjoin a reserve if not separated by a public road), the dwelling faces that reserve and access is provided to the rear of the allotment.	1.5m
In all other cases.	3m

For the purposes of **DTS/DPF 3.1:**

(a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback

(b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table

Secondary Street Setback

PO 4.1

Buildings are set back from secondary street boundaries to achieve a pattern of separation between building walls and public streets and reinforce a streetscape character.

DTS/DPF 4.1

Building walls are set back at least 900mm from the boundary of the allotment with the secondary street frontage.

Boundary Walls

PO 5.1

DTS/DPF 5.1

Walls on boundaries are limited in height and length to manage visual and overshadowing impacts on adjoining properties.	Except where the building is a dwelling and is located on a central site within a row dwelling or terrace arrangement, side boundary walls occur only on one side boundary and satisfy (a) or (b) below: (a) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same or lesser length and height (b) side boundary walls do not: (i) exceed 3m in wall height (ii) exceed 11.5 metres in length (iii) when combined with other walls on the boundary of the subject development site, exceed a maximum 45% of the length of the boundary (iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land
PO 5.2 Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.	DTS/DPF 5.2 Dwelling walls in a semi-detached, row or terrace arrangement are setback at least 900mm from side boundaries shared with allotments outside the development site.
Side Boundary Setback	
PO 6.1 Buildings are set back from side boundaries to provide: (a) separation between buildings to minimise visual impact (b) access to natural light and ventilation for neighbours.	DTS/DPF 6.1 Building walls not sited on side boundaries are set back from side boundaries in accordance with the following: (a) where the wall height does not exceed 3m - at least 900mm (b) where the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings.
Rear Boundary Setback	
PO 7.1 Buildings are set back from rear boundaries to provide: (a) separation between buildings to minimise visual impact (b) access to natural light and ventilation for neighbours (c) open space recreational opportunities (d) space for landscaping and vegetation.	DTS/DPF 7.1 Building walls are set back from the rear boundary at least: (a) 3m for the first building level or 0m where the rear boundary abuts a laneway (b) 5m for any second building level (c) 5m plus any increase in wall height over 7m for buildings of 3 building levels and above.
Site Dimensions and Land Division	
PO 8.1 Allotments/sites created for residential purposes accommodate a diverse range of medium density housing.	DTS/DPF8.1 Development will not result in more than 1 dwelling on an existing allotment or Allotments/sites for residential purposes achieve a net density of up to 70 dwellings per hectare.
PO 8.2 High density residential development located on sites of a suitable size and dimension to achieve a high standard of amenity for occupants and neighbours.	DTS/DPF 8.2 Development with a net residential density over 70 dwellings per hectare on sites with a minimum area of 1200m^2 and minimum frontage width of 35m.
Concept Plans	
PO 9.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 9.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 4 - Minda Incorporated Brighton Campus - North Brighton Concept Plan 89 - Tonsley Concept Plan 97 - Underdale Concept Plan 116 - Everard Park Concept Plan 127 - Kidman Park Concept Plan 141 - West Lakes Concept Plan 121 - Kilkenny Concept Plan 148 - Lockleys In relation to DTS/DPF 9.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 9.1 is met.
Ancillary buildings and structures	
PO 10.1	DTS/DPF 10.1

Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of neighbouring properties.

Ancillary buildings and structures:

(a) are ancillary to a dwelling erected on the same site
(b) have a floor area not exceeding 60m^2
(c) are not constructed, added to or altered so that any part is situated
  (i) in front of any part of the building line of the dwelling to which it is ancillary or
  (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
(d) in the case of a garage or carport, the garage or carport:
  (i) is set back at least 5.5m from the boundary of the primary street
  (ii) when facing a primary street or secondary street, has a total door / opening not exceeding:
    A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser
    B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width
(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and
  (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary
(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure
(h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)
(i) have a roof height where no part of the roof is more than 5m above the natural ground level
(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour
(k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:
(i) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(ii) the amount of existing soft landscaping prior to the development occurring.

PO 10.2

Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

DTS/DPF 10.2

Ancillary buildings and structures do not result in:

(a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space
(b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

PO 10.3

Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.

DTS/DPF 10.3

Non-residential ancillary buildings and structures:

(a) are ancillary and subordinate to an existing non-residential use on the same site
(b) have a floor area not exceeding the following:

Allotment size	Floor area
≤500m^2	60m^2
>500m^2	80m^2

(c) are not constructed, added to or altered so that any part is situated:
  (i) in front of any part of the building line of the main building to which it is ancillary or
  (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
(d) in the case of a garage or carport, the garage or carport:
  (i) is set back at least 5.5m from the boundary of the primary street
(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary

	(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height (or post height) not exceeding 3m (and not including a gable end) (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing building 2. The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7. Building height - does not exceed 5m 8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11.5m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and

(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure

10. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
11. The carport is located so that vehicle access:
    (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    (b) is not obtained from a State Maintained Road, and will use a driveway that:
        (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
        (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
        (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
        (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
        (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site
12. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour
13. Does not involve the clearance of native vegetation
14. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Outbuilding
Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
6. Total floor area - does not exceed 40m^2
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
8. Building height - does not exceed 5m
9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11.5m unless:
    (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
    (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
    (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
    (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
11. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
12. If the outbuilding is a garage, it is located so that vehicle access:
    (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    (b) is not obtained from a State Maintained Road, and will use a driveway that:
        (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;

	(ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 13. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour 14. Does not involve- (a) excavation exceeding a vertical height of 1m; or (b) filling exceeding a vertical height of 1m, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m. 15. Does not involve the clearance of native vegetation 16. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 17. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Private bushfire shelter Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • River Murray Flood Plain Protection Area Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Primary street setback - at least as far back as the building to which it is ancillary 4. Secondary street setback - at least 900mm from the boundary of the allotment 5. At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place) 6. Does not involve the clearance of native vegetation.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail does not exceed $40m^2$ 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11.5m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas

11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Solar photovoltaic panels (roof mounted)
Except where any of the following apply:

- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof
3. Panels and associated components do not overhang any part of the roof
4. Does not apply to a system with a generating capacity of more than 5MW that is to be connected to the State's power system
5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.

Swimming pool or spa pool and associated swimming pool safety features
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted;
4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature).
5. Primary street setback - at least as far back as the building line of the building to which it is ancillary
6. Location of filtration system from a dwelling on an adjoining allotment:
   (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise
   (b) not less than 12m in any other case.
7. Does not involve the clearance of native vegetation
8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
9. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Verandah
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site
4. Primary street setback - as far back as the building line of the building to which it is ancillary
5. Total floor area - does not exceed $40m^2$
6. Post height - does not exceed 3m measured from natural ground level
7. Building height - does not exceed 5m
8. Length - does not exceed 11.5m if any part of the structure abuts or is situated on a boundary of the allotment
9. Does not involve the clearance of native vegetation
10. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

	(b) the amount of existing soft landscaping prior to the development occurring.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. The tank is part of a roof drainage system 4. Total floor area - not exceeding 15m^2 5. The tank is located wholly above ground 6. Tank height - does not exceed 4m above natural ground level 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour 9. Does not involve the clearance of native vegetation 10. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: (b) the amount of existing soft landscaping prior to the development occurring.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Dwelling	Any of the following:

	(a) dwelling not located in the Kilkenny Subzone or within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: (i) Maximum Building Height (Metres) - Maximum building height is 12.5m (ii) Maximum Building Height (Levels) - Maximum building height is 3 levels (b) dwelling located in the Kilkenny Subzone that does not exceed the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or any relevant Concept Plan (c) dwelling that: (i) is located within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: A. Maximum Building Height (Metres) - Maximum building height is 12.5m B. Maximum Building Height (Levels) - Maximum building height is 3 levels and (ii) does not exceed 3 building levels or 12.5m in building height.
Residential flat building	Any of the following: (a) residential flat building not located in the Kilkenny Subzone or within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: (i) Maximum Building Height (Metres) - Maximum building height is 12.5m (ii) Maximum Building Height (Levels) - Maximum building height is 3 levels (b) residential flat building located in the Kilkenny Subzone that does not exceed the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or any relevant Concept Plan. (c) residential flat building that: (i) is located within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: A. Maximum Building Height (Metres) - Maximum building height is 12.5m B. Maximum Building Height (Levels) - Maximum building height is 3 levels and (ii) does not exceed 3 building levels or 12.5m in building height.
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m^2 that is not within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: (i) Maximum Building Height (Metres) - Maximum building height is 12.5m (ii) Maximum Building Height (Levels) - Maximum building height is 3 levels (b) shop that is a restaurant that is not within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: (i) Maximum Building Height (Metres) - Maximum building height is 12.5m (ii) Maximum Building Height (Levels) - Maximum building height is 3 levels (c) shop that: (i) is located within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: A. Maximum Building Height (Metres) - Maximum building height is 12.5m B. Maximum Building Height (Levels) - Maximum building height is 3 levels and (ii) satisfies all of the following: A. it does not exceed 3 building levels or 12.5m in building height B. has a gross leasable floor area less than 1000m^2 or is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)

1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. All development undertaken by: (a) the South Australian Housing Trust either individually or jointly with other persons or bodies or (b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.	Except development involving any of the following: 1. residential flat building(s) of 3 or more building levels 2. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 3. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building). 4. a dwelling(s) or residential flat building(s) that is situated within both the Interface Management Overlay and the Kilkenny Subzone.
3. Any development involving any of the following (or of any combination of any of the following) where **not** located in the Kilkenny Subzone: (a) ancillary accommodation (b) dwelling (c) dwelling addition (d) residential flat building (e) retirement facility (f) student accommodation (g) supported accommodation.	Except development that: 1. exceeds the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or 2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
4. Any development involving any of the following (or of any combination of any of the following) where located in the Kilkenny Subzone: (a) ancillary accommodation (b) dwelling (c) dwelling addition (d) residential flat building (e) retirement facility (f) student accommodation (g) supported accommodation.	Except development that: 1. exceeds the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or 2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment). or 3. involves a dwelling(s) or residential flat building(s) that is situated within both the Interface Management Overlay and the Kilkenny Subzone.
5. Alteration of or addition to any of the following (or of any combination of any of the following): (a) child care facility (b) community facility (c) educational facility.	Except development that does not satisfy Urban Renewal Neighbourhood Zone DTS/DPF 1.6.
6. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or 2. does not satisfy Urban Renewal Neighbourhood Zone DTS/DPF 1.2 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
7. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding	None specified.

(h) pergola (i) private bushfire shelter (j) recreation area (k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	
8. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
9. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Mixed Use Transition Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development accommodating a range of business, commercial, warehousing and light industrial uses enabling the transition of the area to mixed use development, compatible with residential development.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Redevelopment and transition of the area towards mixed development including, residential, supported by a mix of compatible uses including light industry, service trade, motor repair and other compatible businesses servicing the local community that do not produce objectionable emissions.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Dwelling (b) Entertainment venue (c) Licenced premises (d) Hotel (e) Consulting room (f) Indoor recreation facility (g) Light industry (h) Motor repair station (i) Office (j) Place of worship (k) Research facility (l) Retail fuel outlet (m) Service trade premises (n) Shop (o) Store (p) Tourist accommodation (q) Training facility
PO 1.2 Non-residential development involving the expansion, alteration or replacement of an	DTS/DPF 1.2 None are applicable.

existing industry or activity adjacent to a sensitive receiver or zone, and where current adverse impacts exist, only occur where adverse impacts are minimised in accordance the with *Environment Protection Act 1993* requirements.	
PO 1.3 Residential development and other sensitive development only occur where adverse impacts from nearby industries and activities are minimised in accordance with the *Environment Protection Act 1993* requirements.	DTS/DPF 1.3 None are applicable.
PO 1.4 Shops, other than bulky goods outlets, provide a local convenience service to meet the day to day needs of the local community and surrounding businesses as well as support the sale of products made on-site as a supplement to a business activity to enhance local job opportunities.	DTS/DPF 1.4 Shop comprising any of the following: (a) shop with a gross leasable floor area up to 500m^2 (b) shop in the form of a bulky goods outlet (c) shop that is ancillary to and located on the same allotment as a light industry.
Land Division	
PO 2.1 Sensitive uses and sensitive receivers are: (a) located away from areas which may be subject to unacceptable noise, dust, odour or other emissions or (b) able to adequately mitigate impacts of noise, dust, odour or other emissions through design techniques such as: (i) locating residential accommodation, the greatest distance practicable from the industry (ii) locating buildings containing less non-sensitive receivers between the industry and sensitive receivers (iii) placing rooms more sensitive to air, noise and odour impacts (e.g. bedrooms) further away from the industry or (iv) providing private or common open space adjacent a building facade that shields the space from impacts of the industry.	DTS/DPF 2.1 Development does not incorporate any of the following (including alterations and additions which increase the floor area of buildings accommodating the following by 10% or more): (a) land division creating one or more additional allotments for residential purposes (b) dwelling (c) residential flat building (d) tourist accommodation (e) boarding home (f) dormitory style accommodation (g) Workers' accommodation (h) student accommodation (i) child care facility (j) educational facility (k) retirement village (l) supported accommodation (m) residential park (n) hospital.

Landscape Transition Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development in an open landscaped setting.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form and Siting	
PO 1.1 Building footprints consistent with the character and pattern of the prevailing open landscaped character of the neighbourhood.	DTS/DPF 1.1 The development does not result in a site coverage exceeding 50%.
PO 1.2 Development incorporates deep soil zones for the retention or provision of large trees to contribute to a well landscaped setting.	DTS/DPF 1.2 At least 15% of a site incorporates deep soil zone areas.
Site Dimensions and Land Division	
PO 2.1 Allotments/sites created for residential purposes primarily accommodating medium density residential development, with lower density at the interface with a different neighbourhood zone.	DTS/DPF 2.1 Allotments/sites for residential purposes accord with the following: (a) Site areas (or allotment areas in the case of land division) are not less than: (i) 180m2, or 100m2 on an allotment >2000m2, for a dwelling (ii) 120m2, or 80m2 on an allotment >2000m2, for each dwelling in a residential flat building (iii) 300m2 for a dwelling (including in a residential flat building) in areas where the Maximum Building Height (Levels) Technical and Numeric Variation specifies a maximum building height of 2 levels. (b) Site frontages (or allotment frontage in the case of land division) are not less than): (i) 8m for a dwelling (ii) 20m for a residential flat building

Kilkenny Subzone

Assessment provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sensitive receivers coexist with and do not undermine the viability of existing state-significant employment generating land uses in the adjacent Strategic Employment Zone.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Sensitive receivers are designed and sited to be shielded from noise emitted by proximate lawfully existing employment generating land uses.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development incorporating a sensitive receiver locates private open space (including ground level courtyards and balconies), common open space and outdoor play areas within education establishments and pre-schools away from noise emitted by proximate lawfully existing employment generating land uses.	DTS/DPF 1.2 None are applicable.

Waterfront Neighbourhood Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A diverse range of housing which takes advantage of waterfront locations. Development enhances public access to waterfront areas. Dual aspect allotments incorporate designs to enhance the streetscape.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Residential development and supporting services and facilities make waterfront neighbourhoods a convenient place to live.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Ancillary accommodation (b) Child care facility (c) Community facility (d) Dwelling (e) Educational facility (f) Jetty, pontoon or boat berth (or any combination thereof) (g) Marina (h) Office (i) Place of Worship (j) Recreation area (k) Residential flat building (l) Retirement facility (m) Shop (n) Supported accommodation (o) Tourist accommodation
PO 1.2 Marinas include constructed waterways, mooring facilities, pontoons and small jetties to accommodate recreational activities and mooring of small boats associated with residential allotments.	DTS/DPF 1.2 None are applicable.
PO 1.3 Non-residential development located and designed to improve community accessibility to services, primarily in the form of: (a) small-scale commercial uses such as offices, consulting rooms and shops	DTS/DPF 1.3 None are applicable.

(b) community services such as educational facilities, community centres, places of worship, child care facilities and other health and welfare services (c) services and facilities ancillary to the function or operation of supported accommodation or retirement facilities (d) open space and recreation facilities.	
PO 1.4 Non-residential development is compatible with the waterfront character and amenity of a neighbourhood.	DTS/DPF 1.4 None are applicable.
PO 1.5 Commercial activities improve community access to services and activate waterfront areas are of a scale and type to maintain residential amenity.	DTS/DPF 1.5 A shop, consulting room or office (or any combination thereof) satisfies any one of the following: (a) it is located on the same allotment and in conjunction with a dwelling, and all the following are satisfied: (i) does not exceed 50m^2 gross leasable floor area (ii) does not involve the display of goods in a window or about the dwelling or its curtilage (b) it reinstates a former shop, consulting room or office in an existing building (or portion of a building) and at least one of the following is satisfied: (i) the building is a State or Local Heritage Place (ii) is in conjunction with a dwelling and there is no increase in the gross leasable floor area previously used for non-residential purposes (c) it is located more than 500m from an Activity Centre and satisfies one of the following: (i) does not exceed 100m^2 gross leasable floor area (individually or combined, in a single building) where the site does not have a frontage to a State Maintained Road (ii) does not exceed 200m^2 gross leasable floor area (individually or combined, in a single building) where the site has a frontage to a State Maintained Road (d) the development site abuts an Activity Centre and all the following are satisfied: (i) it does not exceed 200m^2 gross leasable floor area (in a single building) (ii) the proposed development will not result in the combined gross leasable floor area of all buildings used as a shop, office or consulting room (existing and proposed) or an combination thereof abutting the Activity Centre in this zone exceeding the lesser of the following: A. 50% of the gross leasable floor area within the Activity Centre B. 1000m^2. (e) the development is located within the ground level of a mixed use building with frontage to a waterfront or coastal reserve and does not exceed 250m^2 gross leasable floor area.
PO 1.6 Expansion of existing community services such as educational facilities, community facilities and child care facilities in a manner which complements the scale of development envisaged by the desired outcome for the neighbourhood.	DTS/DPF 1.6 Alteration of or addition to existing educational facilities, community facilities or child care facilities where: (a) set back at least 3m from any boundary shared with a residential land use (b) building height not exceeding 1 building level (c) the total floor area of the building not exceeding 150% of the total floor area prior to the addition/alteration (d) off-street vehicular parking exists or will be provided in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
Site Dimensions and Land Division	
PO 2.1 Allotments/sites created for residential purposes are of suitable size and dimension to accommodate the anticipated dwelling form and remain compatible with the pattern of development in a waterfront neighbourhood.	DTS/DPF 2.1 Development will not result in more than 1 dwelling on an existing allotment or Allotments/sites for residential purposes accord with the following: (a) site areas (or allotment areas in the case of land division) are not less than the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building): **Minimum Site Area** Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 200 sqm; row dwelling is 180 sqm; group dwelling is 200 sqm; residential flat building is 150 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 220 sqm; row dwelling is 180 sqm; group dwelling is 275 sqm; residential flat building is 200 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 250 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 300 sqm; row dwelling is 200 sqm; group dwelling is 300 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 300 sqm; row dwelling is 300 sqm; group dwelling is 300 sqm; residential flat building is 300 sqm

	Minimum Site Area Minimum site area for a detached dwelling is 350 sqm; semi-detached dwelling is 250 sqm; row dwelling is 180 sqm; group dwelling is 250 sqm; residential flat building is 180 sqm Minimum site area for a detached dwelling is 350 sqm; semi-detached dwelling is 350 sqm; row dwelling is 350 sqm; group dwelling is 350 sqm; residential flat building is 350 sqm Minimum site area for a detached dwelling is 390 sqm; semi-detached dwelling is 270 sqm; row dwelling is 200 sqm; group dwelling is 275 sqm; residential flat building is 250 sqm Minimum site area for a detached dwelling is 450 sqm; semi-detached dwelling is 350 sqm; row dwelling is 300 sqm; group dwelling is 400 sqm; residential flat building is 300 sqm Minimum site area is 2,000 sqm Minimum site area is 2 ha Minimum site area is 7,500 sqm (b) site frontages (or allotment frontages in the case of land division) are not less than: **Minimum Frontage** Minimum frontage for a detached dwelling is 10m; semi-detached dwelling is 10m; row dwelling is 10m; group dwelling is 18m; residential flat building is 18m Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 9m; row dwelling is 7m; group dwelling is 18m; residential flat building is 18m Minimum frontage for a detached dwelling is 15m; semi-detached dwelling is 9m; row dwelling is 8m; group dwelling is 20m; residential flat building is 20m Minimum frontage for a detached dwelling is 4m; semi-detached dwelling is 4m; row dwelling is 4m; group dwelling is 4m; residential flat building is 6m Minimum frontage for a detached dwelling is 5m; semi-detached dwelling is 5m; row dwelling is 5m; group dwelling is 5m; residential flat building is 5m Minimum frontage for a detached dwelling is 8m; semi-detached dwelling is 8m; row dwelling is 7m; group dwelling is 16m; residential flat building is 16m Minimum frontage for a detached dwelling is 8m; semi-detached dwelling is 8m; row dwelling is 8m; group dwelling is 16m; residential flat building is 16m Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 8m; row dwelling is 7m; group dwelling is 15m; residential flat building is 15m Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 9m; row dwelling is 7m; group dwelling is 15m Minimum frontage is 25m In relation to DTS/DPF 2.1, in instances where: (c) more than one value is returned in the same field, refer to the *Minimum Frontage Technical and Numeric Variation layer* or *Minimum Site Area Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (d) no value is returned in (a) or (b) (i.e. there is a blank field or relevant dwelling type is not listed), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 2.2 Development creating new allotments/sites in conjunction with retention of an existing dwelling ensures the site of the existing dwelling remains fit for purpose.	DTS/DPF 2.2 Where the site of a dwelling does not comprise an entire allotment: (a) The balance of the allotment accords with site area and frontage requirements specified in DTS/DPF 2.1 (b) If there is an existing dwelling on the allotment that will remain on the allotment after completion of the development, it will not contravene: (i) Private open space requirements specified in Design in Urban Areas Table 1 - Private Open Space (ii) Car parking requirements specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
Site Coverage	
PO 3.1 Building footprints consistent with the character of a waterfront neighbourhood and limited to: (a) allow sufficient space around buildings to limit visual impact (b) provide an attractive outlook (c) provide access to light and ventilation (d) on sites with a dual frontage, to maximise use of available land.	DTS/DPF 3.1 The development does not result in site coverage exceeding: (a) on sites 300m^2 or less and with a dual frontage to the waterfront and a public street, 80%. (b) in all other cases, 60%.
Building Height	
PO 4.1 Building height is consistent with the form expressed in any relevant Maximum Building Height Levels Technical and Numeric Variation and Maximum Building Height Metres Technical and Numeric Variation, and is otherwise generally low rise, or complements the height of nearby buildings.	DTS/DPF 4.1 Building height (excluding garages, carports and outbuildings) is no greater than: (a) the following: **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 8.5m

Maximum Building Height (Metres)
Maximum building height is 9m
Maximum building height is 12m
Maximum building height is 10.5m
Maximum Building Height (Levels)
Maximum building height is 2 levels
Maximum building height is 3 levels

(b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)) - 2 building levels up to a height of 9m.

In relation to DTS/DPF 4.1, in instances where:

(c) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer and Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development

(d) only one value is returned for DTS/DPF 4.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.

Primary Street Setback

PO 5.1

Buildings are setback from primary street boundaries to contribute to the existing/emerging pattern of street setbacks in the streetscape and the waterfront environment.

DTS/DPF 5.1

Buildings setback from the primary street boundary in accordance with the following table:

Development Context	Minimum setback
There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building.	The average setback of the existing buildings.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site.	The setback of the existing building.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site.	(a) Where the existing building shares the same primary street frontage – the setback of the existing building (b) Where the existing building has a different primary street frontage - 5m
There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building.	5m

For the purposes of **DTS/DPF 5.1:**

(a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback

(b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table

Secondary Street Setback

PO 6.1

Buildings are set back from secondary street boundaries to achieve separation between building walls and public streets and contribute to a suburban streetscape character.

DTS/DPF 6.1

Building walls are set back from the boundary of the allotment with a secondary street frontage at least:

(a) at least 900mm

or

(b) if a building (except for ancillary buildings and structures) on any adjoining allotment is closer to the secondary street than 900mm, at least the distance of that building from the boundary with the secondary street.'

Boundary Walls

PO 7.1

Walls on boundaries are limited in height and length to manage visual and overshadowing impacts on adjoining properties.

DTS/DPF 7.1

Except where the building is a dwelling and is located on a central site within a row dwelling or terrace arrangement, side boundary walls occur only on one side boundary and satisfy (a) or (b) below:

(a) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same, or lesser length and height

(b) side boundary walls do not:

(i) exceed 3m in wall height

(ii) exceed 11.5m in length

	(iii) when combined with other walls on the boundary of the subject development site, exceed a maximum 45% of the length of the boundary (iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land.
PO 7.2 Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.	DTS/DPF 7.2 Dwelling walls in a semi-detached, row or terrace arrangement are setback at least 900mm from side boundaries shared with allotments outside the development site.
Side boundary setback	
PO 8.1 Building walls are set back from side boundaries to provide: (a) separation between buildings in a way that contributes to a suburban character and (b) access to natural light and ventilation for neighbours.	DTS/DPF 8.1 Other than walls located on a side boundary, building walls are set back from side boundaries in accordance with the following: (a) where the wall height does not exceed 3m - at least 900mm (b) for a wall that is not south facing and the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings (c) for a wall that is south facing and the wall height exceeds 3m - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings.
Rear boundary setback	
PO 9.1 Building walls (except for ancillary buildings and structures) are set back from rear boundaries to provide: (a) separation between buildings in a way that contributes to a suburban character (b) access to natural light and ventilation for neighbours (c) private open space (d) space for landscaping and vegetation (e) a consistent character when viewed from a waterfront.	DTS/DPF 9.1 Building walls (except for ancillary buildings and structures) are set back from the rear boundary at least: (a) where the rear boundary fronts a waterfront, no less than the average rear setback of any existing building (except for ancillary buildings and structures) on adjoining allotments. (b) where the rear boundary adjoins a laneway - 0m (c) In all other cases: (i) if the size of the site is less than 301 square metres— A. 3m in relation to the ground floor of the building B. 5m in relation to any other building level of the building (ii) if the size of the site is 301 square metres or more— A. 4m in relation to the ground floor of the building B. 6m in relation to any other building level of the building.
Concept Plans	
PO 10.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 10.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 141 - West Lakes In relation to DTS/DPF 10.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 10.1 is met.
Built form and character	
PO 11.1 Dwellings on sites with frontages to both a public street and a waterfront designed to address both frontages.	DTS/DPF 11.1 Development is not located on a site/allotment with frontage to a waterfront.
PO 11.2 Service areas associated with dwellings such as open storage and clothes drying screened from public view.	DTS/DPF 11.2 None are applicable.
PO 11.3 Development set back from waterfronts to establish a consistent character that includes soft landscaping along coastal/riverine frontages.	DTS/DPF 11.3 None are applicable.
Ancillary buildings and structures	
PO 12.1 Outbuildings designed and sited to mitigate their visibility from the waterfront.	DTS/DPF 12.1 Outbuildings are not located between the main building and waterfront boundary on a site/allotment with frontage to a waterfront.
PO 12.2 Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.	DTS/DPF 12.2 Ancillary buildings: (a) are ancillary to a dwelling erected on the same site (b) have a floor area not exceeding 60m^2

	(c) are not constructed, added to or altered so that any part is situated: (i) in front of any part of the building line of the dwelling to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street (ii) when facing a primary street or secondary street, has a total door / opening not exceeding: A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end) (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less: (i) a total area as determined by the following table: <table><tr><th>Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)</th><th>Minimum percentage of site</th></tr><tr><td><150</td><td>10%</td></tr><tr><td>150-200</td><td>15%</td></tr><tr><td>201-450</td><td>20%</td></tr><tr><td>>450</td><td>25%</td></tr></table> (ii) the amount of existing soft landscaping prior to the development occurring.
PO 12.3 Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements and do not result in over-development of the site.	DTS/DPF 12.3 Ancillary buildings and structures do not result in: (a) less private open space than specified in Design Table 1 - Private Open Space (b) less car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
PO 12.4 Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.	DTS/DPF 12.4 Non-residential ancillary buildings and structures: (a) are ancillary and subordinate to an existing non-residential use on the same site (b) have a floor area not exceeding the following: <table><tr><th>Allotment size</th><th>Floor area</th></tr><tr><td>≤500m^2</td><td>60m^2</td></tr><tr><td>>500m^2</td><td>80m^2</td></tr></table> (c) are not constructed, added to or altered so that any part is situated: (i) in front of any part of the building line of the main building to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary

	(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height (or post height) not exceeding 3m (and not including a gable end) (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.
Advertisements	
PO 13.1 Advertisements identify the associated business activity, and do not detract from the residential character of the locality.	DTS/DPF 13.1 Advertisements relating to a lawful business activity associated with a residential use do not exceed 0.3m2 and mounted flush with a wall or fence.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing dwelling. 2. The item being installed does not encroach on a public street. 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7. Building height - does not exceed 5m 8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11.5m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure

10. Site coverage does not exceed:
    (a) on sites 300m2 or less and with a dual frontage to the waterfront and a public street, 80%
    (b) in all other cases, 60%.
11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
12. The carport is located so that vehicle access:
    (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    (b) is not obtained from a State Maintained Road, and will use a driveway that:
        (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
        (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
        (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
        (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
        (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site
13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour
14. Does not involve the clearance of native vegetation
15. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Outbuilding
Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
6. Total floor area - does not exceed 40m^2
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
8. Building height - does not exceed 5m
9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11.5m unless:
    (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
    (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
    (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
    (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
11. Site coverage does not exceed:
    (a) on sites 300m2 or less and with a dual frontage to the waterfront and a public street, 80%.
    (b) in all other cases, 60%.
12. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
13. If the outbuilding is a garage, it is located so that vehicle access:

	(a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained Road, and will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour 15. Does not involve- (a) excavation exceeding a vertical height of 1m; or (b) filling exceeding a vertical height of 1m, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m. 16. Does not involve the clearance of native vegetation 17. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 18. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Private bushfire shelter Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • River Murray Flood Plain Protection Area Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Primary street setback - at least as far back as the building to which it is ancillary 4. Secondary street setback - at least 900mm from the boundary of the allotment 5. At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place) 6. Does not involve the clearance of native vegetation.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed $40m^2$ 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11.5m

8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary
9. Does not involve the clearance of native vegetation
10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Solar photovoltaic panels (roof mounted)
Except where any of the following apply:

- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof
3. Panels and associated components do not overhang any part of the roof
4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system
5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.

Swimming pool or spa pool and associated swimming pool safety features
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*.
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted
4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature).
5. Primary street setback - at least as far back as the building line of the building to which it is ancillary
6. Location of filtration system from a dwelling on an adjoining allotment:
   (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise; or
   (b) not less than 12m in any other case.
7. Does not involve the clearance of native vegetation
8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
9. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Verandah
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site
4. Primary street setback - as far back as the building line of the building to which it is ancillary
5. Total floor area - does not exceed 40m^2
6. Post height - does not exceed 3m measured from natural ground level

<table>
<tr><td></td><td>
7. Building height - does not exceed 5m
8. Length - does not exceed 11.5m if any part of the structure abuts or is situated on a boundary of the allotment
9. Site coverage does not exceed:
(a) on sites 300m2 or less and with a dual frontage to the waterfront and a public street, 80%
(b) in all other cases, 60%.
10. Does not involve the clearance of native vegetation
11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:
(a) a total area as determined by the following table:
<table>
<tr><th>Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)</th><th>Minimum percentage of site</th></tr>
<tr><td><150</td><td>10%</td></tr>
<tr><td>150-200</td><td>15%</td></tr>
<tr><td>201-450</td><td>20%</td></tr>
<tr><td>>450</td><td>25%</td></tr>
</table>
(b) the amount of existing soft landscaping prior to the development occurring.
</td></tr>
<tr><td>Water tank (above ground)
Except where any of the following apply:
• Historic Area Overlay
• Local Heritage Place Overlay
• Ramsar Wetlands Overlay
• State Heritage Area Overlay
• State Heritage Place Overlay</td><td>
1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the Electricity Act 1996
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. The tank is part of a roof drainage system
4. Total floor area - not exceeding 15m^2
5. The tank is located wholly above ground
6. Tank height - does not exceed 4m above natural ground level
7. Primary street setback - at least as far back as the building line of the building to which it is ancillary
8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour
9. Does not involve the clearance of native vegetation
10. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:
(a) a total area as determined by the following table:
<table>
<tr><th>Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)</th><th>Minimum percentage of site</th></tr>
<tr><td><150</td><td>10%</td></tr>
<tr><td>150-200</td><td>15%</td></tr>
<tr><td>201-450</td><td>20%</td></tr>
<tr><td>>450</td><td>25%</td></tr>
</table>

<tr><td>Water tank (underground)
Except where any of the following apply:
• Coastal Areas Overlay
• Hazards (Acid Sulfate Soils) Overlay
• Ramsar Wetlands Overlay</td><td>
1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
2. The tank (including any associated pump) is located wholly below the level of the ground
3. Does not involve the clearance of native vegetation.
</td></tr>
</table>

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m^2 (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. All development undertaken by: (a) the South Australian Housing Trust either individually or jointly with other persons or bodies or (b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.	Except development involving any of the following: 1. residential flat building(s) of 3 or more building levels 2. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 3. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) ancillary accommodation (b) dwelling (c) dwelling addition (d) jetty, pontoon or boat berth (or any combination thereof) (e) residential flat building.	Except development that: 1. exceeds the maximum building height specified in Waterfront Neighbourhood Zone DTS/DPF 4.1 or 2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Waterfront Neighbourhood Zone DTS/DPF 4.1 or 2. does not satisfy Waterfront Neighbourhood Zone DTS/DPF 1.5 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).

5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) recreation area (k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Workers' Settlement Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development is limited to workers' accommodation and ancillary land uses that support the day to day needs of workers.	DTS/DPF 1.1 Development comprises one or more of the following: (a) a dwelling (manager's house) (b) amenity block (including shower, toilet and laundry facilities) in association with and ancillary to the workers' accommodation (c) dwelling addition (d) recreational facility in association with and ancillary to the workers' accommodation (e) office in association with and ancillary to the workers' accommodation (f) shop in association with and ancillary to the workers' accommodation (g) workers' accommodation.
PO 1.2 Shops, primarily in the form of a restaurant, associated with and ancillary to Workers'	DTS/DPF 1.2 Shops located on the same site as workers' accommodation meets one of the following:

accommodation enhance the amenity of the zone for those workers.	(a) it has a gross leasable floor area not exceeding 100m^2 (b) it is a restaurant.
PO 1.3 Office associated with and ancillary to Workers' accommodation supports the management and administrative aspects of the accommodation.	DTS/DPF 1.3 Office is ancillary to and located on the same site as Workers' accommodation.
PO 1.4 Development provides space adjacent to and around habitable buildings to accommodate areas for parking of vehicles, storage of waste, landscaping, recreation areas, swimming pool/spa and similar facilities to enhance the amenity for resident workers.	DTS/DPF 1.4 The total roofed area of all existing and proposed buildings on the site will not exceed 60%.
PO 1.5 Workers' accommodation is established in association with major industrial, mining, agricultural and business activities to support and facilitate economic activity.	DTS/DPF 1.5 Workers' accommodation is constructed by the principal operator of the relevant business or authorised agent thereof.
PO 1.6 A dwelling in the form of a manager or caretaker residence associated with and ancillary to Workers' accommodation provides for the efficient management, maintenance and support of residents.	DTS/DPF 1.6 A dwelling is: (a) ancillary to and located on the same allotment or within the same lease area as the workers' accommodation (b) has a demonstrated connection with workers' accommodation (c) will not result in more than one dwelling being located on an allotment or lease area used for workers' accommodation.
Land Division	
PO 2.1 Land division is designed to: (a) minimise fire risk danger to occupants of buildings and firefighting personnel (b) minimise the potential risk of damage to buildings and other property during a bushfire (c) ensure each allotment contains a suitable building envelope that is located away from any vegetation that would pose an unacceptable risk in the event of bushfire.	DTS/DPF 2.1 None are applicable.
Built Form and Character	
PO 3.1 Buildings and recreational facilities are set back from internal roads to accommodate vehicular movements and contribute to the safety of workers and visitors.	DTS/DPF 3.1 Buildings and recreational facilities are set back at least 1 metre from an internal road.
PO 3.2 Buildings are set back from public roads to mitigate impacts on the streetscape.	DTS/DPF 3.2 Buildings are set back at least 2m from a public road.
PO 3.3 Buildings and recreational areas are set back from the boundary of the zone to minimise impacts on neighbouring properties and enhance local amenity.	DTS/DPF 3.3 Buildings are set back at least 2 metres from the zone boundary.
PO 3.4 Buildings use materials and finishes to complement the landscape and mitigate the effects of glare on adjacent land users.	DTS/DPF 3.4 Buildings are clad in, or a combination of: (a) materials other than sheet metal (b) sheet metal pre-colour treated or painted in a non-reflective colour.
Landscaping	
PO 4.1 Landscaping is provided along public roads and thoroughfares, zone boundaries and the perimeter of common vehicle parking areas to enhance the visual appearance of development.	DTS/DPF 4.1 Other than to accommodate a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land, a landscaped area is provided within the development site in accordance with the following: (a) at least 1.5m wide along any boundary on the perimeter of the zone fronting a public road or thoroughfare (b) at least 1m wide around the perimeter of any shared vehicle parking area.
PO 4.2 Development incorporates areas for landscaping to enhance the overall amenity of the site and locality.	DTS/DPF 4.2 Landscape areas comprise: (a) not less than 10 percent of the site area (b) a dimension of at least 1m.
Concept Plans	
PO 5.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 5.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:

	In relation to DTS/DPF 5.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 5.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing dwelling. 2. The item being installed does not encroach on a public street. 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Mount Lofty Ranges Water Supply Catchment (Area 1) Overlay • Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway. 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017). 3. It is required for the conduct or maintenance of railway activities. 4. It does not involve the clearance of native vegetation.
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Total floor area - does not exceed 40m^2. 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end). 7. Building height - does not exceed 5m. 8. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure. 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment. 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser). 12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing;

	(ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site. 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour. 14. Does not involve the clearance of native vegetation.
Outbuilding Except where any of the following apply: • Coastal Areas Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads). 6. Total floor area - does not exceed 40m^2. 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end). 8. Building height - does not exceed 5m. 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 11. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%. 12. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure. 13. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State Maintained Road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 14. If clad in sheet metal is pre-colour treated or painted in a non-reflective colour. 15. Does not involve- (a) excavation exceeding a vertical height of 1 metre; or (b) filling exceeding a vertical height of 1 metre, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2 metres. 16. Does not involve the clearance of native vegetation.
Partial demolition of a building or structure Except where any of the following apply:	None

• Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. Shade sail consists of permeable material. 4. The total area of the sail - does not exceed 40m^2. 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment. 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m. 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof. 3. Panels and associated components do not overhang any part of the roof. 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system. 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted. 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 6. Location of filtration system from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation.
Water tank (above ground) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. The tank is part of a roof drainage system. 4. Total floor area - not exceeding 15m^2. 5. The tank is located wholly above ground. 6. Tank height - does not exceed 4m above natural ground level. 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour. 9. Does not involve the clearance of native vegetation
Water tank (underground)	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m^2 (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) amenities block (c) carport (d) deck (e) dwelling (f) dwelling addition (g) fence (h) internal building works (i) land division (j) office (k) outbuilding (l) pergola (m) private bushfire shelter (n) replacement building (o) retaining wall (p) shade sail (q) shop (r) solar photovoltaic panels (roof mounted) (s) swimming pool or spa pool and associated swimming pool safety features (t) temporary accommodation in an area affected by bushfire (u) tree damaging activity (v) verandah (w) workers accommodation (x) water tank.	None specified.
3. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).

4. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development
None specified

Placement of Notices - Exemptions for Restricted Development
None specified

Part 3 - Overlays

Adelaide Dolphin Sanctuary Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of the Adelaide Dolphin Sanctuary dolphin population and their habitat.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development avoids or minimises harm to habitat, and the functioning of ecosystems that support the dolphin population.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development does not result in the disruption of critical dolphin behaviours such as breeding, feeding, resting and movement.	DTS/DPF 1.2 None are applicable.
PO 1.3 Stormwater runoff is disposed of in a manner that avoids pollution or other detrimental impacts to the Adelaide Dolphin Sanctuary.	DTS/DPF 1.3 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Advertising Near Signalised Intersections Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Provision of a safe road environment by reducing driver distraction at key points of conflict on the road.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Advertisements Near Signalised Intersections	
PO 1.1 Advertising near signalised intersections does not cause unreasonable distraction to road users through illumination, flashing lights, or moving or changing displays or messages.	DTS/DPF 1.1 Advertising: (a) is not illuminated (b) does not incorporate a moving or changing display or message (c) does not incorporate a flashing light(s).

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Advertisement or advertising hoarding that: (a) is within 100m of a: (i) signalised intersection or (ii) signalised pedestrian crossing and (b) will: (i) be internally illuminated or (ii) incorporate a moving or changing display or message or (iii) incorporate a flashing light.	Commissioner of Highways.	To provide expert technical assessment on potential risks relating to pedestrian and road safety which may arise from advertisements near intersections.	Development of a class to which Schedule 9 clause 3 item 21 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Affordable Housing Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Affordable housing is integrated with residential and mixed use development.
DO 2	Affordable housing caters for a variety of household structures.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Development comprising 20 or more dwellings / allotments incorporates affordable housing.	DTS/DPF 1.1 Development results in 0-19 additional allotments / dwellings.
PO 1.2 Development comprising 20 or more dwellings or residential allotments provides housing suited to a range of incomes including households with low to moderate incomes.	DTS/DPF 1.2 Development comprising 20 or more dwellings / or residential allotments includes a minimum of 15% affordable housing except where: (a) it can be demonstrated that any shortfall in affordable housing has been provided in a previous stage of development or (b) it can be demonstrated that any shortfall in affordable housing will be accommodated in a subsequent stage or stages of development.
PO 1.3 Affordable housing is distributed throughout the development to avoid an overconcentration.	DTS/DPF 1.3 None are applicable.
Built Form and Character	
PO 2.1	DTS/DPF 2.1

Affordable housing is designed to complement the design and character of residential development within the locality.	None are applicable.
Affordable Housing Incentives	
PO 3.1 To support the provision of affordable housing, minimum allotment sizes may be reduced below the minimum allotment size specified in a zone while providing allotments of a suitable size and dimension to accommodate dwellings with a high standard of occupant amenity.	DTS/DPF 3.1 The minimum site area specified for a dwelling can be reduced by up to 20%, or the maximum density per hectare increased by up to 20%, where it is to be used to accommodate affordable housing except where the development is located within the Character Area Overlay or Historic Area Overlay.
PO 3.2 To support the provision of affordable housing, building heights may be increased above the maximum specified in a zone.	DTS/DPF 3.2 Where a building incorporates dwellings above ground level and includes at least 15% affordable housing, the maximum building height specified in any relevant zone policy can be increased by 1 building level in the: (a) Business Neighbourhood Zone (b) City Living Zone (c) Established Neighbourhood Zone (d) General Neighbourhood Zone (e) Hills Neighbourhood Zone (f) Housing Diversity Neighbourhood Zone (g) Neighbourhood Zone (h) Master Planned Neighbourhood Zone (i) Master Planned Renewal Zone (j) Master Planned Township Zone (k) Rural Neighbourhood Zone (l) Suburban Business Zone (m) Suburban Neighbourhood Zone (n) Township Neighbourhood Zone (o) Township Zone (p) Urban Renewal Neighbourhood Zone (q) Waterfront Neighbourhood Zone and up to 30% in any other zone, except where: (a) the development is located within the Character Area Overlay or Historic Area Overlay or (b) other height incentives already apply to the development.
Movement and Car Parking	
PO 4.1 Sufficient car parking is provided to meet the needs of occupants of affordable housing.	DTS/DPF 4.1 Dwellings constituting affordable housing are provided with car parking in accordance with the following: (a) 0.3 carparks per dwelling within a building which incorporates dwellings located above ground level within either: (i) 200 metres of any section of road reserve along which a bus service operates as a high frequency public transit service(2) (ii) is within 400 metres of a bus interchange(1) (iii) is within 400 metres of an O-Bahn interchange(1) (iv) is within 400 metres of a passenger rail station(1) (v) is within 400 metres of a passenger tram station(1) (vi) is within 400 metres of the Adelaide Parklands. or (b) 1 carpark per dwelling for any other dwelling. [NOTE(S): (1) Measured from an area that contains any platform(s), shelter(s) or stop(s) where people congregate for the purpose waiting to board a bus, tram or train, but does not include areas used for the parking of vehicles. (2) A high frequency public transit service is a route serviced every 15 minutes between 7.30am and 6.30pm Monday to Friday and every 30 minutes at night, Saturday, Sunday and public holidays until 10pm.]

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the applicant for the development is the South Australian Housing Authority (or an agent acting on behalf of the South Australian Housing Authority), residential development or land division (other than an excluded land division):	Minister responsible for administering the *South Australian Housing Trust Act 1995.*	To provide direction on the conditions required to secure the provision of dwellings or	Development of a class to which Schedule 9

(a) that comprises 20 or more dwellings or residential allotments and is described in the application documentation as intending to provide affordable housing or (b) that is described in the application documentation as intending to provide affordable housing and the applicant is seeking to access one or more of the planning concessions outlined in the Affordable Housing Overlay DTS/DPF 3.1, 3.2 or 4.1 or (c) that is described in the application documentation as intending to include affordable housing of any number of dwellings or residential allotments		allotments for affordable housing.	clause 3 item 20 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Aircraft Noise Exposure Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development sensitive to aircraft noise is designed and located to manage noise intrusion to reduce land use conflict and protect human health.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Buildings that accommodate activities sensitive to aircraft noise are designed and located to minimise aircraft noise intrusion and provide appropriate interior acoustic amenity.	DTS/DPF 1.1 Buildings accommodating sensitive receivers are not located within an area having an ANEF value of 30 or more.
Built Form	
PO 2.1 Additions to buildings involving the addition or extension of habitable rooms are designed and located to minimise aircraft noise intrusion and provide appropriate interior acoustic amenity.	DTS/DPF 2.1 Dwelling additions involving the addition or extension of habitable rooms: (a) do not result in an increase in the total floor area of the existing dwelling by greater than 50 percent (b) do not occur in areas having an ANEF value of 30 or more.
Land Division	
PO 3.1 Land division does not increase the number of allotments used for sensitive receivers in areas adversely affected by aircraft noise to mitigate community exposure to potential adverse environmental and amenity impacts generated by aircraft movements.	DTS/DPF 3.1 Land division: (a) within an area having an ANEF value of less than 30 or (b) within an area having an ANEF value or 30 or more and: (i) does not result in any additional allotments or (ii) none of the allotments will accommodate a sensitive receiver.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Airport Building Heights (Aircraft Landing Areas) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of potential impacts of buildings on the operational and safety requirements of aircraft landing areas.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Building height does not pose a hazard to the operation of an aircraft landing area.	DTS/DPF 1.1 The distance from any part of a runway centreline to the closest point of the building is greater than 30 times building height.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Airport Building Heights (Regulated) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of potential impacts of buildings and generated emissions to maintain operational and safety requirements of registered and certified commercial and military airfields, airports, airstrips and helicopter landing sites.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Building height does not pose a hazard to the operation of a certified or registered aerodrome.	DTS/DPF 1.1 Buildings are located outside the area identified as 'All structures' (no height limit is prescribed) and do not exceed the height specified in the Airport Building Heights (Regulated) Overlay which applies to the subject site as shown on the SA Property and Planning Atlas. In instances where more than one value applies to the site, the lowest value relevant to the site of the proposed development is applicable.
PO 1.2 Exhaust stacks are designed and sited to minimise plume impacts on aircraft movements associated with a certified or registered aerodrome.	DTS/DPF 1.2 Development does not include exhaust stacks.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development: (a) building located in an area identified as 'All structures' (no height limit is prescribed) or will exceed the height specified in the *Airport Building Heights (Regulated) Overlay* (b) building comprising exhaust stacks that generates plumes, or may cause plumes to be generated, above a height specified in the *Airport Building Heights (Regulated) Overlay.*	The airport-operator company for the relevant airport within the meaning of the *Airports Act 1996* of the Commonwealth or, if there is no airport-operator company, the Secretary of the Minister responsible for the administration of the *Airports Act 1996* of the Commonwealth.	To provide expert assessment and direction to the relevant authority on potential impacts on the safety and operation of aviation activities.	Development of a class to which Schedule 9 clause 3 item 1 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Building Near Airfields Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Maintain the operational and safety requirements of certified commercial and military airfields, airports, airstrips and helicopter landing sites through management of non-residential lighting, turbulence and activities that may attract or result in the congregation of wildlife.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Outdoor lighting associated with a non-residential use does not pose a hazard to commercial or military aircraft operations.	DTS/DPF 1.1 Development: (a) primarily or wholly for residential purposes (b) for non-residential purposes that does not incorporate outdoor floodlighting.
PO 1.2 Development likely to attract or result in the congregation of wildlife is adequately separated from airfields to minimise the potential for aircraft wildlife strike.	DTS/DPF 1.2 All development except where it comprises one or more of the following located not less than 3km from the boundaries of an airport used by commercial or military aircraft: (a) food packing/processing plant (b) horticulture (c) intensive animal husbandry (d) showground (e) waste management facility (f) waste transfer station (g) wetland (h) wildlife sanctuary.
PO 1.3 Buildings are adequately separated from runways and other take-off and landing facilities within certified or registered aerodromes to minimise the potential for building-generated turbulence and windshear that may pose a safety hazard to aircraft flight movement.	DTS/DPF 1.3 The distance from any part of a runway centreline to the closest point of the building is not less than 35 times the building height.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Character Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Valued streetscape characteristics and development patterns are reinforced through contextually responsive development, design and adaptive reuse that responds to the attributes expressed in the Character Area Statement.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All Development	
PO 1.1 All development is undertaken having consideration to the valued attributes expressed in the Character Area Statement.	DTS/DPF 1.1 None are applicable.

Built Form	
PO 2.1 The form of new buildings and structures that are visible from the public realm are consistent with the valued streetscape characteristics of the character area.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is consistent with the prevailing building and wall heights in the character area.	DTS/DPF 2.2 None are applicable.
PO 2.3 Design and architectural detailing of street-facing buildings (including but not limited to roof pitch and form, openings, chimneys and verandahs) are consistent with the prevailing characteristics in the character area.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development is consistent with the prevailing front and side boundary setback pattern in the character area.	DTS/DPF 2.4 None are applicable.
PO 2.5 Materials are either consistent with or complement those within the character area.	DTS/DPF 2.5 None are applicable.
Alterations and Additions	
PO 3.1 Additions and alterations do not adversely impact on the streetscape character.	DTS/DPF 3.1 Additions and alterations: (a) are fully contained within the roof space of a building with no external alterations made to the building elevation facing the primary street or (b) meet all of the following: (i) do not include any development forward of the front façade building line (ii) any side or rear extensions are no closer to the side boundary than the existing building (iii) do not involve the construction or alteration of a second or subsequent building level.
PO 3.2 Adaptive reuse and revitalisation of buildings to retain local character consistent with the Character Area Statement.	DTS/DPF 3.2 None are applicable.
Ancillary Development	
PO 4.1 Ancillary development, including carports, outbuildings and garages, complements the character of the area and associated building(s).	DTS/DPF 4.1 None are applicable.
PO 4.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).	DTS/DPF 4.2 None are applicable.
PO 4.3 Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, be below the parapet line, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.	DTS/DPF 4.3 None are applicable.
PO 4.4 Fencing and gates closer to a street boundary (other than a laneway) than the elevation of the associated building are consistent with the traditional period, style and form of the of the associated building.	DTS/DPF 4.4 None are applicable.
Land Division	
PO 5.1 Land division creates allotments that are: (a) compatible with the surrounding pattern of subdivision in the character area (b) of a dimension to accommodate buildings of a bulk and scale that reflect existing buildings and setbacks in the character area.	DTS/DPF 5.1 None are applicable.
Context and Streetscape Amenity	
PO 6.1 The width of driveways and other vehicle access ways are consistent with the prevalent width of existing driveways in the character area.	DTS/DPF 6.1 None are applicable.
PO 6.2 Development maintains the valued landscape pattern and characteristics that contribute to the character area, except where they compromise safety, create nuisance, or impact adversely on existing buildings or infrastructure.	DTS/DPF 6.2 None are applicable.

Character Area Statements

<table>
<tr><td>Eras, themes and context</td><td>Residential.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Low site coverage, large front and side building set-backs from property boundaries. Substantial allotment widths, consistent pattern of driveway access from the street to garaging and large landscaped open spaces.

Detached dwellings at low densities.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Villas and inter-war bungalows on large allotments with wide frontages, set within well-established landscaped gardens and streets.

Consistent roof forms and pitches.

Garages, carports and outbuildings are low in scale and generally located to the rear of dwellings or to the side, well set back from the front facade.</td></tr>
<tr><td>Building height</td><td>Predominantly one storey buildings, with attic or loft spaces contained within the roof form, or two storey additions to the rear of dwellings.</td></tr>
<tr><td>Materials</td><td>Red brick, stone and masonry building materials. Roofs of terracotta tiles or red painted corrugated iron.</td></tr>
<tr><td>Fencing</td><td>Low, open fencing to 1 metre in height, providing views to the built form. Low picket fencing, solid brush fencing, stone or masonry materials, wire and creepers, and hedges.</td></tr>
</table></td></tr>
</table>

Statement#	Statement
	Some high masonry fences specifically along Magill and Glynburn Roads.
Setting, landscaping, streetscape and public realm features	Avenues of street tree planting make an important contribution to the landscape character and visual amenity. Generally single width driveways, located to protect mature street trees. Lawns and vegetated gardens.
Representative Buildings	Identified - refer to SA planning database.

Character Areas affecting Clare and Gilbert Valleys Council

Auburn Character Area Statement (CGV-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

CGVC1

Eras, themes and context	Buildings constructed in the 19th century.
Allotments, subdivision and built form patterns	Original land division pattern, street layout and setback patterns.
Architectural styles, detailing and built form features	Verandahs. Original architectural styles.
Building height	1-2 storeys, with 2 storey buildings generally for retail and civic uses.
Materials	*[Not stated]*
Fencing	Front fences and gates of timber pickets, pier and plinth masonry, wrought iron, brush or masonry not exceeding 1.2m.
Setting, landscaping, streetscape and public realm features	Established trees. Residential amenity.
Representative Buildings	Identified - refer to SA planning database.

Character Areas affecting City of Holdfast Bay

Seacliff Character Area Statement (HoB-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

HoBC1

Eras, themes and context	1880s to 1920s west of the railway line. 1930s to 1960s east of the railway line.
Allotments, subdivision and built form patterns	19th century rectilinear road pattern, with small allotment sizes. Large allotments and frontages. Narrow streets, limited street trees. Reduced setbacks. Varied front setbacks. Side setbacks provide visual spacing between dwellings.
Architectural styles, detailing and built form features	Range of architectural styles. Still some remaining examples of bungalows west of the railway line. Influence of Spanish Mission style architecture. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees.

Statement#	Statement	
		Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Single storey.
	Materials	Red and cream brick. Stone. Render. Corrugated iron roofing. Terra cotta tile roofing. Varied building materials across the area.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building.
	Setting, landscaping, streetscape and public realm features	Railway line is a significant feature, with associated landscape corridor. Sloping landform. Coastal views.
	Representative Buildings	*[Not identified]*
HoBC2	**Brighton Character Area Statement (HoB-C2)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1900s to 1930s.
	Allotments, subdivision and built form patterns	Medium to large sized allotments. Linear and curvilinear street layout adjacent Dunluce Castle. Large allotment sizes and frontages. Large front setbacks. Small side setbacks, including driveway access down one side of the site and a small setback from the non-driveway side boundary.
	Architectural styles, detailing and built form features	Federation style dwellings. Inter-War style dwellings including: Tudor Revival, Californian bungalow, Art Deco, Some Spanish mission. Some Post-War Austerity and Conventional style dwellings. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees. Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings are low in scale and generally located unobtrusively to the rear of dwellings or to the side, well set back from the front facade.

Statement#	Statement	
	Building height	Single storey.
	Materials	Corrugated iron or terracotta tile roofing. Brick, stone, timber and part-rendered finishes. Fenestration, doorways, windows, eaves and roof forms generally dark in colour.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Woven wire. Low masonry with geometric steel. Low masonry (stepped). Brush fencing up to 1.4m in height with either rolled or metal capping.
	Setting, landscaping, streetscape and public realm features	Heavily landscaped settings, mature trees. Mature and uniform street tree settings on Linwood and Athelney Streets. Outlook toward a row of heritage listed Eucalyptus trees on Alfreda Street. Heritage listed Dunluce Castle.
	Representative Buildings	*[Not identified]*
HoBC3	**Glenelg East Character Area Statement (HoB-C3)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1900s to 1930s.
	Allotments, subdivision and built form patterns	Medium to large sized allotments. Garden suburb street layout, centred around Da Costa Park in the area south of the tramway, and Sandison reserve north of the tramway. Original subdivisions of Helmsdale, Grovene and Dunleath. Predominantly large allotment sizes and frontages south of the tramway, larger allotment sizes and frontages north of the tramway. Large front setbacks. Small side setbacks on one side, smaller on the other.
	Architectural styles, detailing and built form features	Federation style dwellings. Inter-War style dwellings including: Tudor Revival, Californian bungalow, Art Deco, Some Spanish mission. Some Post-War Austerity and Conventional style dwellings. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees. Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings are low in scale and generally located unobtrusively to the rear of dwellings or to the side, well set back from the front facade.
	Building height	Single storey.
	Materials	Consistent with the materials used in the 1920s to 1930s period. Corrugated iron or terracotta tile roofing. Brick, sandstone, and stucco and part-rendered finishes. Roofing, facades and fenestration in natural red brick and terracotta colouration. Timber joinery including fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables.

Statement#	Statement	
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Woven wire. Low masonry with geometric steel. Low masonry (stepped). Cyclone wire and steel or timber frame. Brush fencing up to 1.4m in height with either rolled or metal capping.
	Setting, landscaping, streetscape and public realm features	Centred around Da Costa Park historic area, and its associated built form and open space. Glenelg Tramway and linear reserve between Maxwell and Dunbar Terraces. Norfolk Island pines and other mature street trees throughout.
	Representative Buildings	*[Not identified]*
HoBC4	**Glenelg Character Area Statement (HoB-C4)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1840s - 1930s. Earliest period of settlement of South Australia. Subdivision in 1839 by Light Finnis and Co. Growth period in 1920s associated with increase in holidaymaking and leisure pursuits.
	Allotments, subdivision and built form patterns	Uniform street layout, an extension of the original Glenelg Village set out in 1839 by Colonel William Light. Rear laneways to service dwellings on Gordon and Rose Streets, and buildings on Brighton Road. Range allotment sizes. Medium to very large frontages. Small setbacks. Side setbacks provide visual spacing between dwellings. Consistency of setbacks in streetscapes.
	Architectural styles, detailing and built form features	Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Inter-War buildings, mostly Bungalows. Low scale to medium, relatively small dimensions and basic building details. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings are low in scale and generally located unobtrusively to the rear of dwellings or to the side, well set back from the front facade.
	Building height	Predominantly single storey but some two storey.
	Materials	Consistent with the materials used in the 1840s to 1930s period. Bluestone or sandstone walls (unpainted).

Statement#		Statement
		Some brick. Brick or rendered quoin work and plinths. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings. Cyclone wire and steel or timber frame.
	Setting, landscaping, streetscape and public realm features	Clearly defined setbacks and uniform front landscaping.
	Representative Buildings	*[Not identified]*
HoBC5	**Glenelg North (West of Tapleys Hill Road) Character Area Statement (HoB-C5)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1850s to 1920s.
	Allotments, subdivision and built form patterns	Rectangular allotment shapes in varying sizes. Some allotments have been amalgamated to make way for residential flat buildings and units. Mix of front setback patterns, with older dwellings having small front setbacks, and later dwellings set further back from the street. Generally small front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Small scale, simplified building forms. Single storey detached and semi-detached villas. Single storey detached cottages. Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Some Inter-War buildings, mostly Tudor style. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.

Statement#	Statement	
	Building height	Predominantly single storey but some two storey.
	Materials	Consistent with the materials used in the 1840s to 1920s period. Bluestone or sandstone walls. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.
	Setting, landscaping, streetscape and public realm features	Small suburban feel, within proximity to the open spaces of the Patawalonga Reserve. Strong sense of uniformity of buildings in some areas.
	Representative Buildings	*[Not identified]*
HoBC6	**Glenelg North (East of Tapleys Hill Road) Character Area Statement (HoB-C6)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1880s to 1920s.
	Allotments, subdivision and built form patterns	Orderly subdivision pattern. Originally subdivided in 1841. Range of allotment sizes with wide frontages. Smaller allotment sizes with rear laneways between Alison and Bagshaw Streets. Medium front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Larger scale single storey detached dwellings. Bungalow style dwellings with large front and side boundary setbacks. Examples of smaller scale dwellings between Alison and Bagshaw Streets. Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Some Inter-War buildings, mostly Tudor style. Many dwellings without vehicle garaging. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade.
	Building height	Predominantly single storey but some two storey.
	Materials	Consistent with the materials used in the 1840s to 1920s period.

Statement#	Statement	
		Sandstone and red brick facades. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.
	Setting, landscaping, streetscape and public realm features	Combination of wide, open streetscapes, and more relatively narrow laneways. Frontages on MacFarlane and Bagshaw Streets facing the Old Gum Tree Reserve. St Leonard's Primary School is a significant presence to the locality.
	Representative Buildings	*[Not identified]*
Character Areas affecting City of Marion		
MarC1	**Edwardstown, Glandore, Glengowrie and Plympton Park Character Area Statement (Mar-C1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1920s to 1950.
	Allotments, subdivision and built form patterns	Conventional grid type pattern of streets. Large allotments. Predominantly detached dwellings. Some examples of semi-detached dwellings in Glandore and Glengowrie.
	Architectural styles, detailing and built form features	Single storey detached dwellings. Occasional single storey semi-detached dwellings. Mixture of Bungalow, Art Deco, Spanish Mission, Tudor. Articulated roof forms (gable, Dutch gable, hips). Chimneys, projecting front verandahs, porches, porticos. Garages and carports located behind main face of dwelling.
	Building height	Single storey. 2nd storey in roofline.
	Materials	Timber frame windows. External walls constructed of mixture of red brick, painted brick, stone and rendered masonry. Roofing - galvanised iron/replaced with colorbond, terracotta tiles.
	Fencing	Low height - rendered masonry, timber picket, post and wire, tubular.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Well maintained traditional gardens. Mature vegetation in private properties. Low scale dwellings. Housing well setback from street.
	Representative Buildings	*[Not identified]*

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>MarC2</td><td>
The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.
<table>
<tr><td>Eras, themes and context</td><td>Original housing stock - predominantly 1950s to 1970s.

More recent infill scattered throughout.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Grid type pattern of streets, partly angular due to diagonal alignment of railway resulting in some irregular shaped allotments.

Large allotments.

Detached dwellings.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Predominantly single storey detached dwellings.

Small number of 2 storey dwellings.

Original housing stock - mixture of austerity, conventional 1950s.

Roof forms (gable, hips).</td></tr>
<tr><td>Building height</td><td>Original housing stock is generally single storey.

Recent dwellings are predominantly single storey however there are more examples of 2 storey.</td></tr>
<tr><td>Materials</td><td>External walls predominantly a mixture of brick (variety of colours) and rendered masonry.

Roofing - original housing has terracotta tiles. More recent replacement housing has colorbond.</td></tr>
<tr><td>Fencing</td><td>No dominant fencing style or material.

Mixed with open front yards.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Tree lined streets.

Well maintained leafy garden character.

Mature vegetation in private properties.

Low scale dwellings.

Housing well setback from street.

Visual separation between houses.</td></tr>
<tr><td>Representative Buildings</td><td>[Not identified]</td></tr>

<tr><td></td><td>Plains Character Area Statement (Mit-C1)</td></tr>
</table>

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>MitC1</td><td>
The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.
<table>
<tr><td>Eras, themes and context</td><td>Mix of pre-war, inter-war and post-war housing of a low density detached nature comprising symmetrical cottages, villas, bungalows, Tudor, art deco and austerity.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Established traditional grid neighbourhoods, with a high presence of pre-1940s housing stock.

Consistent allotment pattern, frontage widths and setbacks of buildings to streets and to each other creating a strong rhythm and pattern of development. Consistent pattern of side setbacks, which are generally larger on one side of allotments.

Low site coverage supporting strong landscaped settings and space that frame and give context to dwelling forms.

Absence of row dwellings and residential flat buildings.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Single storey detached dwellings at low densities with regular large front and side setbacks.

Intact pattern of setbacks and spacings between buildings.

Prominence of gables and verandahs which are reflective of the building types in these areas. The use of parapets to front facades are a rarely visible built form element in the area's established streetscape character.

Roof forms consist of gabled, hipped and Dutch gable at pitches that reflect the prevailing building size, style and era.

High solid to void ratios within building facades.

Garaging is a minor built form element and subordinate to the principal dwelling form when viewed from the streetscape.

Garaging is in the form of single garages situated to the side of dwellings, setback behind the front building line and comprising wall heights and roof forms that are lower than the associated dwelling.</td></tr>
<tr><td>Building height</td><td>Single storey appearance with second storeys typically not visible from the street and characteristically integrated within the roof form or behind roof ridges.</td></tr>
<tr><td>Materials</td><td>Building materials consist of traditional housing materials such as brick, stone and rendered masonry finishes to walls and tile or corrugated metal roofs.

Dwelling facades display a range of materiality and finishes producing a richness of textures and colour schemes.</td></tr>
<tr><td>Fencing</td><td>Low and open fencing styles consisting of timber picket, post and wire, low stone or brick structures or hedges.

Limited use of high solid fencing except along railway or arterial road alignments.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Important contribution of front yards, landscaping and street trees to overall character of the area.

Front yards are generously landscaped spaces with a high proportion of vegetation to paved surfaces.

Driveways are aligned to side boundaries and are of single width.

Existing street trees and road verges form important streetscape features that contribute to the public realm appearance producing a pattern of plantings protected by isolating driveway entranceway and crossover locations.</td></tr>
<tr><td>Representative Buildings</td><td>[Not identified]</td></tr>
</table>

Springfield Character Area Statement (Mit-C2)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1930s to present.

Pre and post war housing stock as well as contemporary housing styles.

Sense of grandeur and spaciousness.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Intact original subdivision pattern.

Winding road network that follows land form and results in irregular shaped allotments.

Detached dwellings on very large allotments and very wide frontages which contribute to sense of spaciousness and scale.

Absence of row dwellings and residential flat buildings.

Buildings are set back very large distances from street frontages and side boundaries. Consistent pattern of side setbacks</td></tr>
</table>
</td></tr>
</table>

Statement#		Statement
MitC2		which are generally larger on one side of allotments. Low site coverage of buildings across large sites. Strong landscape setting for buildings, particularly in front yards and between buildings, contributes to sense of grandeur.
	Architectural styles, detailing and built form features	Eclectic mix of housing stock, styles and architectural features. High quality materials, finishes and detailing associated with grand homes and mansions. Increasing gradient of slopes to the east of the Area promotes split level designs and undercroft garaging formats.
	Building height	Predominantly buildings of up to two storeys, with three storeys where cut into sloping sites (incorporating undercroft garaging).
	Materials	Brick, stone, rendered masonry finishes to walls. Tiles or metal roofing. High solid to void ratio to facades. Visible retaining walls typically stone or rendered in material.
	Fencing	Diversity of fencing treatments and styles. Solid fencing above 1 metre and walls screened with dense landscaping along the street frontage.
	Setting, landscaping, streetscape and public realm features	A mixture of mature Eucalypt and exotic street trees provide an overall visual coherence to the public realm. Retaining walls to street frontages on high side of street, with raised front gardens above. Formal garden settings with mature trees are an important element in established character.
	Representative Buildings	*[Not identified]*
MitC3	**Hills Character Area Statement (Mit-C3)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Low density spacious setting with detached dwellings on large sites within natural vegetated settings with very few other housing types.
	Allotments, subdivision and built form patterns	Variations in land forms, including some steeply sloping locations, produce curvilinear road patterns and irregular shaped allotments in terms of size and frontage widths. Land slope leads to a variety of front setbacks and informs dwelling orientation and height relative to the street. Side setbacks are generally larger on one side of allotments. Simple housing forms of a single and two storey nature (including spilt level) that respond to land form. Garaging typically to side of dwelling or as an undercroft structure. Garaging is only forward of dwellings on steeply sloping sites and is in the form of standalone simple open structures. Row dwellings, group dwellings and residential flat buildings are not representative of the predominant built form in the area.
	Architectural styles, detailing and built form features	The area's built form exhibits a sense of spaciousness due to limited site coverage and generous front and side setbacks. Development responds to land form and does so in a way that blends with landscape character by minimising cut and fill and vegetation clearance. Where visible to the street, large differences in levels between dwellings and roadways are battered and landscaped. Where parking structures are forward of building lines, they are of an open form and low roof profile.
	Building height	Low profile roof forms and pitches reflect the land form are a common feature. One and two storeys typically responding to the land form.
	Materials	Building materials, colours and finishes assist in blending and receding buildings into the natural landscape character rather than openly contrasting and drawing attention to buildings. Predominantly darker subdued natural earthy tones for wall and roof materials. Lighter or paler colour complement the surrounding landscape in their tone. Highly reflective and bright, vivid colour finishes to walls and roof materials, such as stark white or similar are rarely found in the area.

Statement#	Statement	
	Fencing	No presence of front fencing forward of the building line is a characteristic of the area, and in limited cases where front fencing is present, it is low or open in nature. The area features retaining walls that are mostly screened or are natural in form using mainly stone or natural rock, with walls being low in height, terraced and set well back from boundaries and providing landscaped space. High concrete sleeper walls are not a part of the built form streetscape.
	Setting, landscaping, streetscape and public realm features	Strong landscape character attributes derive from extensive retention of native vegetation on sites, between buildings and within informal road verges. The presence of vegetation on sites, is a defining feature of the area. Streets retain an open, often spacious setting characterised by spaces between buildings which contain landscaping. Driveways on sloping sites meander within front yards of dwellings, with minimal cut and fill of the land surface, and feature landscaping on their edges.
	Representative Buildings	*[Not identified]*

Character Areas affecting City of Norwood, Payneham and St Peters

Evandale/Maylands/Stepney Character Area Statement (NPSP-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Statement#		
NPSPC1	Eras, themes and context	Pre-1940. Primarily low-scale and low density residential. Detached (including battleaxe in Maylands, Evandale and Payneham), semi-detached and group dwellings.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns. Setbacks from boundaries creating space between dwellings.
	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. Semi-detached dwellings often presenting as single dwellings.
	Building height	Single storey, with some two storey to the rear of buildings (with single storey appearance to primary street frontage).
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*

Hackney Character Area Statement (NPSP-C2)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

	Eras, themes and context	Pre- 1940. Primarily low-scale and low density residential. Detached, semi-detached, group and row dwellings. Residential flat buildings.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns. Small areas of Hackney located along the southern side of Richmond Street and between Hackney Road and St Peters College. Existing development comprises a mix of compact and large allotments with a number of Local Heritage Places, pre-1940s dwellings and multi-unit sites.
	Architectural styles, detailing and built form	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions.

Statement#	Statement	
NPSPC2	features	Semi-detached dwellings often presenting as single dwellings.
	Building height	Two storey along Hackney Road. In other locations, single storey, with some two storey to the rear of buildings (with single storey appearance to primary street frontage).
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*

Heathpool/Marryatville Character Area Statement (NPSP-C3)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

NPSPC3		
	Eras, themes and context	Pre-1940. Primarily low-scale and low density residential. Detached (including battleaxe in Marryatville east and west of Clapton Road), semi-detached and group dwellings. Residential flat buildings in Marryatville east and west of Clapton Road.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns.
	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. Semi-detached dwellings often presenting as single dwellings.
	Building height	Single storey, with some two storey to the rear of buildings (with single storey appearance to primary street frontage).
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*

St Peters/Joslin/Royston Park Character Area Statement (NPSP-C4)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

	Eras, themes and context	Pre-1940. Primarily low-scale and low density residential. Detached dwellings. Semi-detached dwellings in St Peters and College Park.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns.
	Architectural styles, detailing and built form	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions.

Statement#	Statement	
NPSPC4	features	Semi-detached dwellings often presenting as single dwellings.
	Building height	Single storey, with some two storey to the rear of buildings (with single storey appearance to primary street frontage).
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*

Trinity Gardens/St Morris Character Area Statement (NPSP-C5)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

NPSPC5	Eras, themes and context	Pre-1940. Primarily low-scale and low density residential. Detached (including battleaxe in some locations), semi-detached dwellings. Group dwellings in St Morris.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns.
	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. Semi-detached dwellings often presenting as single dwellings.
	Building height	Single storey.
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*

Residential Character (Norwood) Area Statement (NPSP-C6)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

	Eras, themes and context	Residential. Detached (including battleaxe), semi-detached, row and group dwellings. Residential flat buildings. Although the built form character throughout Norwood is relatively varied, there remains a strong theme associated with the original built form, which includes a significant number of Local Heritage Places and buildings constructed before 1940.
	Allotments, subdivision and built form patterns	Rectilinear pattern of wide tree-lined major streets, intersected by narrow minor streets, with various eras of development overlaid. Broad mix of allotment sizes and a diversity of residential accommodation options. The regular street grid pattern and the high level of vegetation, including mature street trees and landscaped gardens, are elements that assist in unifying the various eras of built form development in Norwood.

Statement#	Statement	
NPSPC6	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. A mix of housing styles, including workers cottages, bungalows and villas and a variety of post war dwellings, including walk-up flats, townhouses and a range of contemporary detached, attached and group housing styles. This has, over the years, established a broad mix of allotment sizes and provided a diversity of residential accommodation options, including affordable housing. Some undercroft or underground garages along western side of Osmond Terrace. Semi-detached dwellings often presenting as single dwellings.
	Building height	Generally single storey streetscape appearance.
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Distinct rectilinear pattern of wide tree-lined major streets, intersected by narrow minor streets. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*

Character Areas affecting City of Playford

Elizabeth South Character Area Statement (Play-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

PlayC1		
	Eras, themes and context	Late 1950s to early 1960s.
	Allotments, subdivision and built form patterns	First stage of the post war planned Garden City north of Adelaide. Layout and land division pattern involving irregular allotment shapes and curvilinear street pattern, typical of the planning and construction of Trust development in the late 1950s and early 1960s. Large proportion of open space as parks and gardens. Parks and mature trees in the landscape road reserve make a significant contribution to the character and amenity of the area. Rectangular allotment shapes in varying sizes. Some allotments have been amalgamated to make way for residential flat buildings and units. Generally large front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Small scale, simplified building forms consistent with South Australian Housing Trust development of the late 1950s early 1960s. Single storey semi-detached and detached buildings. Dwellings being of brick and concrete block construction with varying stylistic treatments. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. Rectilinear plan forms. Low scale. Hipped roof forms.
	Building heights	Predominantly single storey.
	Materials	Consistent with the materials used in the late 1950s to early 1960s period. Brick or rendered finishes. Corrugated iron roofing. Consistent, original windows dimensions facing the street. Main entrance incorporated into front elevation.
	Fencing	Where fencing exits, it is predominantly in the form of low style open fencing along the primary road frontage. Corrugated iron fencing evident to side and rear boundaries.
	Setting, landscaping, streetscape and public realm features	Low scale suburban feel, within proximity to the open spaces. Strong sense of uniformity of buildings.
	Representative Buildings	*[Not identified]*

Character Areas affecting City of Port Adelaide Enfield

Enfield Character Area Statement (PAdE-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>PAdEC1</td><td>
The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1900s - 1950s built development.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>“Garden suburb' street pattern and modified grid. Generous allotment sizes with wide frontages and substantial rear gardens. Consistent front set-backs.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>The area is large and features a wide variety of housing styles including bungalows, villas, Tudors, art deco, inter-war, cottages and mansions generally built before the 1940s.

There is also a significant stock of quality dwellings built between 1940 and 1950 that augment the pre 1940s dwellings and make an important contribution to the character of the area.

There is a notable concentration of bungalows in the western portion of the area and this style is a defining feature in this part of the area.</td></tr>
<tr><td>Building height</td><td>Single storey.</td></tr>
<tr><td>Materials</td><td>Materials consistent with the style of building and era of its original construction.</td></tr>
<tr><td>Fencing</td><td>Low and/or open consistent with the style and era of construction of the building it is associated with.

Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms.

Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>The 1920s street pattern in this area is distinctive and reflects the garden suburb approach to town planning and subdivision.

It results in wide nature strips and reserves that together with mature, well landscaped gardens create road verges which contribute to an open and high quality residential character.</td></tr>

Glanville (East of Carlisle) Character Area Statement (PAdE-C2)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1860s - 1920s built development.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>The allotment pattern is shaped to accommodate the alignments of Carlisle Street and Causeway Road. Small allotment sizes with narrow frontages. Dwellings are built close to streets.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Housing styles include cottages, villas, inter-war and bungalows with cottages being the predominant and key defining feature in the area.</td></tr>
<tr><td>Building height</td><td>Single storey.</td></tr>
<tr><td>Materials</td><td>Materials consistent with the style of building and era of its original construction.</td></tr>
<tr><td>Fencing</td><td>Low and/or open consistent with the style and era of construction of the building it is associated with.

Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>The area is nestled in to the north west of the Jervois Street bridge and contains many old workers’ cottages. These are particularly prevalent in the area bound by Sutherland Street, Connor Street, Hart Street and Carlisle Street.

The area’s simple low rise housing is strongly counterpointed by the modern, multi -storey Port Adelaide waterfront development to the east of the Outer Harbour rail line and provides an important representation of the early settlement and historical development of Port Adelaide.</td></tr>
<tr><td>Representative Buildings</td><td>[Not identified]</td></tr>

</table>
</td></tr>
</table>

Statement#	Statement	
PAdEC3	context	
	Allotments, subdivision and built form patterns	Grid pattern with predominately east -west running streets with the long axes of allotments running north-south. Allotments fronting Lady Gowrie Drive and Military Road configured with their long axes running east-west so that buildings address these roads. A high degree of consistency in front setbacks. Regular and generous rectangular allotments with wide frontages.
	Architectural styles, detailing and built form features	Wide range of housing styles including bungalows, villas, inter-war, Tudors, cottages and art deco. There is a strong concentration of pre 1940s built form.
	Building height	Predominately single storey but some two storey along parts of the Lady Gowrie Drive frontage.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences. Original hedges retained, restored and where appropriate, extended, (utilizing the same species of planting currently in existence) as an alternative to constructed fences.
	Setting, landscaping, streetscape and public realm features	The southern boundary of this area adjoins the Semaphore/Largs Historic Area. It abuts the coast and contains a significant number of dwellings built during the period from 1915-1940. It has a strong relationship with the coast and features tree lined streets with footpaths on both sides that provide vistas and ready walking access to the foreshore and beach. Wide allotment frontages with generous spacing between driveways make a significant contribution to the walkability of these footpaths and the character of the area. An imposing stand of Norfolk Island pines along Lady Gowrie Drive is a key feature of the area.
	Representative Buildings	*[Not identified]*
PAdEC4	**Rosewater Character Area Statement (PAdE-C4)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1900s - 1940s built development.
	Allotments, subdivision and built form patterns	Grid pattern distorted by the alignment of Newcastle Street. Small allotments with narrow frontages. Front setbacks are consistent on a street by street basis.
	Architectural styles, detailing and built form features	A variety of housing styles but cottages, villas and bungalows are the principle styles.
	Building height	Single storey.
	Materials	Materials of existing buildings retained where practicable and missing elements reinstated consistent with the style of building and era of its original construction.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
	Setting, landscaping, streetscape and public realm features	Newcastle Street is a well landscaped road that provides the main access into this area. It features well established avenue tree planting that includes plane trees and jacarandas. Simple, single storey, historic detached dwellings built on allotments with consistent widths laid out in a grid pattern, and the adjacent Mt Carmel school and the reserve to the north west, combine to establish a country town like character.
	Representative Buildings	*[Not identified]*
Character Areas affecting City of Prospect		
	Suburban Neighbourhood 1 Character Area Statement (Pr-C1) The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. PrC3	**Suburban Neighbourhood 3 Character Area Statement (Pr-C3)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Early 20th century residential. Some examples of residential infill comprising units, conventional and recent dwellings. Primarily low density and low scale residential including various dwelling types.
	Allotments, subdivision and built form patterns	Original land division patterns following grid type street pattern and displaying rectangular, rectilinear allotments. Moderate sized allotments. Moderate to compact allotment frontages. Street facing front dwelling facades. Moderate to compact asymmetrical spaces between dwellings providing physical and visual separation between dwellings. Typically two storey dwellings to display consistent side boundary setbacks between building levels.
	Architectural styles, detailing and built form features	Many bungalows with some cottages, Tudor and art deco housing. Pitched roofs with the vertical proportion similar to wall height and typically around 25 to 49 degree pitch. Front verandahs with façade detailing and moderate articulation (wall off-sets, verandahs and deep eaves) walls with a solid to void ratio of greater than 1:1 and fenestrations showing a vertical prominence.
	Building height	Primarily single storey presentation to the street with two storey components sited behind. Predominantly 1 storey dwellings with vertical proportions consistent with traditional dwellings (at least 3 metres and no more than 3.6 metres in wall height). Moderate to compact scale in context with low rise development, allotment size and frontages.
	Materials	Stone, brick and rendered finishes and durable materials. Detailing around doors, windows, wall edges and gables. Limited palette for the majority of building façade and roof areas with colour highlights in the detailing (sandstone to reds; bluestone and grey tones) with complementary colour highlights in the detailing.
	Fencing	Front fences forward of the building are of an open style and low in height (to 1.2 metres high). Style associated with dwelling style and era of development. Some more solid fencing of standard height along major roads.
	Setting, landscaping, streetscape and public realm features	Leafy public realm that supports the built form. Landscaped front yards with mature vegetation/tree canopy. Minimal hard and artificial surfaces. Leafy garden suburb character and maintaining visual separation between houses. Garages and carports are designed and sited to be subordinate to the main dwelling. Access points are narrow and consolidated.

Burke Street Character Area Statement (ViH-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Statement#		
ViHC1	Eras, themes and context	Consistent low scale detached dwellings, primarily constructed after World War 1 to the later part of the 19th Century (mid 1800s to 1930s). Early settlement, consolidation and growth of residential development.
	Allotments, subdivision and built form patterns	Original street layout including rear access lanes and local roads. Curvilinear street with relatively large allotments roughly perpendicular to the street, most with rear laneway access.
	Architectural styles, detailing and built form features	Mix of small mid-1800s detached cottages of early Vernacular style, symmetrical and asymmetrical cottages and villas of the mid to late 1800s with Victorian stylistic influences, early 1900s cottages and villas with Federation stylistic influences, Inter-War bungalows. Church and Hall with late Victorian Gothic stylistic influences located at the bend in the road are landmarks. Adjacent to the Church is a Manse built in the Inter-War period with Georgian Revival stylistic influences.. Rectilinear plan form. Buildings are typically two or more pavilions rather than a single mass. Steeply-pitched roof forms, typically 35 to 40 degrees on 1800s and early 1900s era buildings and slightly lower on Inter-War buildings, reflecting traditional architectural styles and building methods. Short roof spans, minimising roof bulk. Concave, bullnose and straight-pitched verandahs on front and sometimes side facades reduce the bulk and scale and add visual interest. Lean-to forms are common. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Single storey, low scale and simple in form.
	Materials	Limestone walls. Red brick or rendered quoin work and details. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Corrugated iron or corrugated steel roofing. Variation in materials assists in breaking down bulk and scale and adds visual interest.
	Fencing	Low, open style construction front fencing (1.2 metres or less) associated with the traditional period and style of building, and providing views to the building. Low timber pickets, post and rails, pier and plinth masonry or wrought iron. Rear and side fencing behind building line up to 1.8 metres, corrugated iron.
	Setting, landscaping, streetscape and public realm features	Established garden settings. Varied, small front and side setbacks. Landscaped verges. Garages and carports are sited behind dwellings, accessed from rear laneways or well set back from the front of dwellings.

Character Areas affecting Town of Walkerville

Gilberton Character Area Statement (Walk-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Statement#		
WalkC1	Eras, themes and context	Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to early 1900s.
	Allotments, subdivision and built form patterns	Predominantly low density detached dwellings on allotments that are medium in width and of a range of sizes. Some semi-detached and group dwellings on larger allotments.
	Architectural styles, detailing and built form features	The historic built form exhibits a mixture of architectural styles from the late 1800s and early 1900s. Edwardian villas alongside Victorian cottages pepper the locality providing a significant narrative that reflects the contemporaneous construction styles.
	Building height	Predominantly single storey. Two storey additions to the rear of buildings or within the roof space.
	Materials	Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.

Statement#	Statement	
	Fencing	Original fencing with bluestone plinths and cast iron fence railings above. Low front fencing.
	Setting, landscaping, streetscape and public realm features	There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. The landscape setting is an important element of the area, with generally open, well vegetated streetscapes through a combination of public and private plantings and low fencing forward each dwelling.
	Representative Buildings	*[Not identified]*
Character Areas affecting City of West Torrens		
WeToC1	**Ashford Character Area Statement (WeToC1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1920s - 1940s
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Wide street frontages. Medium sized detached dwellings on substantial allotments.
	Architectural styles, detailing and built form features	Predominantly Tudor and Bungalow dwellings. Articulated hip and gable roofs. Verandahs / porticos. Verandahs as continuation of main roof structure. Additions are generally located to the rear of the dwelling.
	Building height	Generally single storey. Second storey within the roof space.
	Materials	Brick. Painted brick. Stone. Rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Tiled roofs. Timber windows.
	Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Carports and garages are behind the main face of dwellings. Consistent side and rear setbacks, large private yards. Generous traditional well-maintained gardens. Tree lined streets.
	Representative Buildings	*[Not identified]*
WeToC2	**Cowandilla / Mile End West Character Area Statement (WeToC2)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1920s - 1940.'s
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Narrow and deep allotments. Detached and semi-detached dwellings on substantial allotments.
	Architectural styles, detailing and built form features	Predominantly Californian and State Bank Bungalows with some examples of Spanish Mission; Dutch Colonial dwellings; Detached and semi-detached federation cottages/villas; Victorian era cottages/villas; and Early inter-war dwellings. Gable and Dutch gable roofs with hips. Verandahs / porticos. Additions are generally located to the rear of the dwelling.
	Building height	Generally single storey. Second storey generally within the roof space or otherwise designed to complement single storey character.
	Materials	Brick. Painted brick. Stone. Rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick/red brick chimneys.
	Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Consistent side and rear setbacks, large private yards. Carports and garages are behind the main face of dwellings. Generous traditional well-maintained gardens. Tree lined streets.

Character Areas affecting Whyalla City Council		
WhC1	**Whyalla Character Area Statement (Wh-C1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1900 - 1940. Developed in the first 40 years of Whyalla up until the 1940's. Illustrates the increasing prosperity of the city from the small corrugated or rendered masonry cottages to the substantial stone bungalow dwellings constructed by BHP for their senior staff at the steelworks.
	Allotments, subdivision and built form patterns	Pattern of division in predominantly quarter acre lots, generous roads and road reserves with ample provision for on street parking and street planting.
	Architectural styles, detailing and built form features	Colonial Cottages with half-hipped roofs, rendered masonry walls with open verandahs the width of the dwelling, symmetrical fronted dwellings with return verandahs and Bungalow dwellings dominate the architectural style of the dwellings.
	Building height	*[Not stated]*
	Materials	Corrugated iron, rendered masonry and BHP stone (including stone coins) and BHP brick are the predominant construction materials with corrugated irons roofs.
	Fencing	Simple low picket or low rendered masonry, low open fencing or hedging.
	Setting, landscaping, streetscape and public realm features	Pedestrian and cycle connection to the foreshore, Ada Ryan Gardens and Hummock Hill.
	Representative Buildings	*[Not identified]*

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Character Preservation District Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Recognise, protect and enhance the special character of Character Preservation Districts.
DO 2	The long term use of land outside of townships for primary production and associated value adding enterprises is assured and promoted.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Land division is undertaken in accordance with Section 8 of the *Character Preservation (Barossa Valley) Act 2012* and Section 8 of the *Character Preservation (McLaren Vale) Act 2012.*	DTS/DPF 1.1 None are applicable.
PO 1.2	DTS/DPF 1.2

Residential development located in townships to reinforce settlement patterns within the district and support the continuation of primary production on land outside townships.	Residential development located within designated township areas of the Character Preservation District Overlay.
Built Form and Character	
PO 2.1 Development occurring at the edge of townships is sympathetic to the rural landscape and reinforces a clear transition between townships and rural landscape through measures including: (a) being of a low scale (b) orientating residential development towards the rural area (c) ensuring visual separation from the rural area through landscaping and road reserves.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development contributes to and maintains the historic identity and character of townships through appropriate: (a) form (b) scale (c) siting (d) design (e) landscaping.	DTS/DPF 2.2 None are applicable.
PO 2.3 Adaptive re-use of rural structures and historic and/or character buildings supports their preservation and ongoing contribution to the landscape.	DTS/DPF 2.3 None are applicable.
Built Form and Character in the Rural Area	
PO 3.1 Preservation of existing natural features including topography, watercourses and mature trees.	DTS/DPF 3.1 None are applicable.
PO 3.2 Buildings and structures do not interrupt views of the skyline through measures including being sited below ridge lines.	DTS/DPF 3.2 None are applicable.
PO 3.3 Buildings and structures harmonise with the natural features of the landscape and reinforce the rural character through the use of muted, neutral, non-reflective landscape colours on external surfaces.	DTS/DPF 3.3 None are applicable.
PO 3.4 Large buildings and structures are sited and oriented to minimise their visual bulk, particularly if close to roads or in open settings where there are no other buildings or mature trees in close proximity.	DTS/DPF 3.4 None are applicable.
PO 3.5 Buildings and structures are grouped to create compact clusters well set back from public roads.	DTS/DPF 3.5 None are applicable.
PO 3.6 Development mitigates the need for long, steep access roads that require excessive grading or removal of vegetation.	DTS/DPF 3.6 None are applicable.
Earthworks	
PO 4.1 Excavation and filling of land is limited to that associated with: (a) minimising the visual impact of buildings or structures or (a) construction of water storage facilities.	DTS/DPF 4.1 Excavation and/or filling of land is: (a) no greater than 1.5 metres from natural ground level (b) only undertaken in order to reduce the visual impact of buildings or structures or to construct water storage facilities.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Coastal Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	The natural coastal environment (including environmentally important features such as mangroves, wetlands, saltmarsh, sand dunes, cliff tops, native vegetation, wildlife habitat, shore and estuarine areas) is conserved and enhanced.
DO 2	Provision is made for natural coastal processes; and recognition is given to current and future coastal hazards including sea level rise, flooding, erosion and dune drift to avoid the need, now and in the future, for public expenditure on protection of the environment and development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Land is divided only if it or the subsequent development and use of the land will not adversely affect the environmental values or ability of the land or adjoining land to adapt to changing coastal processes.	DTS/DPF 1.1 Land division for minor adjustment of allotment boundaries removes an anomaly in the current boundaries with respect to the location of buildings or structures.
PO 1.2 Land is not divided unless a layout is achieved whereby roads, parking areas and development sites for each allotment are at least 0.3m above the standard sea flood risk level, unless the land has, or can be provided with, appropriate and acceptable coastal protection measures.	DTS/DPF 1.2 None are applicable.
PO 1.3 Other than small-scale infill land division in a predominantly urban zone, land division adjacent to the coast incorporates an existing or proposed public reserve (not including a road or erosion buffer) of a size adequate to provide for natural coastal processes, public access and recreation.	DTS/DPF 1.3 None are applicable.
Hazard Risk Minimisation	
PO 2.1 Buildings sited over tidal water or that are not capable of being raised or protected by flood protection measures in the future are protected against the standard sea flood risk level and 1m of sea level rise.	DTS/DPF 2.1 Building floor levels are at least 1.25m above the standard sea flood risk level.
PO 2.2 Development, including associated roads and parking areas, but not minor structures unlikely to be adversely affected by flooding, is protected from the standard sea flood risk level and 1m of sea level rise.	DTS/DPF 2.2 Development incorporates finished ground and floor levels not less than: **Finished Ground and Floor Levels** Minimum finished floor level is 2.6m AHD Minimum finished floor level is 20.4m AHD Minimum finished floor level is 3m AHD Minimum finished floor level is 3.45m AHD Minimum finished floor level is 4.15m AHD Minimum finished floor level is 4.35m AHD Minimum finished floor level is 5.3m AHD Minimum finished ground level is 1.7m AHD; Minimum finished floor level is 1.95m AHD Minimum finished ground level is 1.75m AHD; Minimum finished floor level is 2m AHD Minimum finished ground level is 1.85m AHD; Minimum finished floor level is 2.1m AHD Minimum finished ground level is 1.9m AHD; Minimum finished floor level is 2.15m AHD Minimum finished ground level is 2.2m AHD; Minimum finished floor level is 2.45m AHD Minimum finished ground level is 2.3m AHD; Minimum finished floor level is 2.55m AHD Minimum finished ground level is 2.3m AHD; Minimum finished floor level is 2.6m AHD Minimum finished ground level is 2.4m AHD Minimum finished ground level is 2.4m AHD; Minimum finished floor level is 2.65m AHD Minimum finished ground level is 2.45m AHD; Minimum finished floor level is 2.7m AHD Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.65m AHD Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.7m AHD Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.75m AHD Minimum finished ground level is 2.55m AHD; Minimum finished floor level is 2.8m AHD Minimum finished ground level is 2.6m AHD; Minimum finished floor level is 2.85m AHD

Minimum finished floor level is 9.85m AHD
Minimum finished floor level is 4.64m AHD

In instances where no value is specified (i.e. there is a blank field):

(a) finished ground levels allow for sea level rise by being raised 0.3m or more above the standard sea flood risk level

(b) finished floor levels are 0.55m or more above the standard sea flood risk level

(c) practical measures can be implemented to provide future protection against an additional sea level rise of 0.7m plus an allowance to accommodate 100 years of land subsidence.

PO 2.3 Development will not create or aggravate coastal erosion or require coast protection works that cause or aggravate coastal erosion.	DTS/DPF 2.3 None are applicable.

PO 2.4 Development is set back a sufficient distance from the coast to provide an erosion buffer in addition to a public reserve that will allow for at least 100 years of coastal retreat for single buildings or small-scale developments, or 200 years of coastal retreat for large scale developments unless: (a) the development incorporates appropriate private coastal protection measures to protect it from anticipated erosion or (b) there are formal commitments to protect the existing or proposed public reserve and development from anticipated coastal erosion.	DTS/DPF 2.4 None are applicable.
PO 2.5 Additions or alterations to, or replacement of, a dwelling do not increase the risk of effects from natural coastal processes such as flooding, sea-level rise, sand drift and erosion.	DTS/DPF 2.5 None are applicable.
Coast Protection Works	
PO 3.1 Development avoids the need for coast protection works through measures such as setbacks to protect development from coastal erosion, sea or stormwater flooding, sand drift or other coastal processes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Development does not compromise the structural integrity of any sea wall or levee bank or the ability to maintain, modify or upgrade any sea wall or levee bank.	DTS/DPF 3.2 None are applicable.
PO 3.3 Unavoidable coast protection works are the subject of binding agreements to cover the cost of future construction, operation, maintenance and management measures and will not: (a) have an adverse effect on coastal ecology, processes, conservation, public access and amenity (b) require commitment of public resources including land (c) present an unacceptable risk of failure relative to potential hazard resulting from failure.	DTS/DPF 3.3 None are applicable.
Environment Protection	
PO 4.1 Development will not unreasonably affect the marine and onshore coastal environment by pollution, erosion, damage or depletion of physical or biological resources; interference with natural coastal processes; or the introduction of and spread of marine pests and diseases or any other means.	DTS/DPF 4.1 None are applicable.
PO 4.2 Development avoids delicate or environmentally sensitive coastal areas such as sand dunes, cliff tops, estuaries, wetlands or substantially intact strata of native vegetation.	DTS/DPF 4.2 None are applicable.
PO 4.3 Development allows for ecological and natural landform adjustment to changing climatic conditions and sea levels, by allowing landward migration of dunes, coastal wetlands, mangrove and samphire areas.	DTS/DPF 4.3 None are applicable.
PO 4.4 Development avoids, or in built up areas minimises, impacts on important habitat areas that support the nesting, breeding and movement/migration patterns of fauna, including threatened shorebirds.	DTS/DPF 4.4 None are applicable.
PO 4.5 Development is designed so that wastewater is disposed of in a manner that avoids pollution or other detrimental impacts on the marine and on-shore environment of coastal areas.	DTS/DPF 4.5 Development is connected, or will be connected, to an approved common wastewater disposal service with the capacity to meet the requirements of the development or on-site wastewater systems set back a minimum of 100m from the Mean High Water Mark at spring tide.
PO 4.6 Development is designed so that stormwater runoff is disposed of in a manner that avoids pollution or other detrimental impacts on the marine and on-shore environment of coastal areas.	DTS/DPF 4.6 None are applicable.
PO 4.7 Development involving the removal of shell grit, cobbles or sand, other than for coastal protection works purposes, is not undertaken.	DTS/DPF 4.7 Development does not involve the removal of shell grit, cobbles or sand.
Access	
PO 5.1 Development maintains or enhances appropriate public access to and along the foreshore.	DTS/DPF 5.1 None are applicable.

PO 5.2 Public access through sensitive coastal landforms, particularly sand dunes, wetlands and cliffs, is restricted to defined pedestrian paths and constructed to minimise adverse environmental impact.	DTS/DPF 5.2 None are applicable.
PO 5.3 Access roads to the coast, lookouts and places of interest: (a) do not detract from the amenity or the environment (b) are designed for slow-moving traffic (c) are minimised in number.	DTS/DPF 5.3 None are applicable.
PO 5.4 Development on land adjoining a coastal reserve is sited and designed to be compatible with the purpose, management and amenity of the reserve and to prevent inappropriate access to or use of the reserve.	DTS/DPF 5.4 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, the following: (a) excavation and/or filling where the total volume of material excavated and/or filled exceeds $9m^3$ (b) dwellings and habitable buildings that: (i) do not meet DTS/DPF 2.2 or (ii) are within 100m of the mean high water mark (c) other than within a Rural Settlement Zone: (i) buildings with a floor area greater than $60m^2$ or (ii) tourist accommodation, including a caravan park or (iii) division of land that would create 1 or more additional allotments (d) off-shore structures (e) coast protection works (f) infrastructure within 100m landward of the mean high water mark.	Coast Protection Board.	To provide expert assessment and direction to the relevant authority on: • the risk to development from current and future coastal hazards (including sea-level rise, coastal flooding, erosion, dune drift and acid sulfate soils); • coast protection works; • potential impacts from development on public access and the coastal environment (including important coastal features).	Development of a class to which Schedule 9 clause 3 item 3 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Coastal Flooding Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Recognition of coastal flood hazards to avoid the need, now and in the future, for public expenditure on protection of the environment and development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Development, including associated roads and parking areas, but not minor structures unlikely to be adversely affected by flooding, is protected from the standard sea flood risk level and 1m of sea level rise.	DTS/DPF 1.1 Development incorporates finished ground and floor levels not less than: **Finished Ground and Floor Levels** Minimum finished floor level is 2.6m AHD Minimum finished floor level is 20.4m AHD Minimum finished floor level is 3m AHD Minimum finished floor level is 3.45m AHD Minimum finished floor level is 4.15m AHD Minimum finished floor level is 4.35m AHD

In instances where no value is specified (i.e. there is a blank field):

(a) finished ground levels allow for sea level rise by being raised 300mm or more above the standard sea flood risk level

(b) finished floor levels are 550mm or more above the standard sea flood risk level

(c) practical measures can be implemented to provide future protection against an additional sea level rise of 700mm plus an allowance to accommodate 100 years of land subsidence.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Co-located Housing Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Co-located housing integrated within and amongst existing housing stock to cater for a variety of household structures, including aging in place, whilst maintaining existing dwellings, streetscape character, and neighbourhood amenity.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Co-located housing established to support variety in housing options.	DTS/DPF 1.1 None are applicable.
Site Dimensions and Land Division	
PO 2.1 Sites for co-located housing are of a suitable size to accommodate the intended number of dwellings, common facilities for shared use (which may include a kitchen, dining / living room and laundry), shared car parking, communal open space, soft landscaping areas and retention of existing mature vegetation.	DTS/DPF 2.1 None are applicable.
PO 2.2 Co-located housing includes (as part of the application) a community title land division with a community scheme description and by-laws that address the tenure, access, functional and operational management matters of co-located housing.	DTS/DPF 2.2 None are applicable.
PO 2.3 Amalgamation of sites (including the retention of all existing dwellings) is encouraged to achieve improved design outcomes for co-located housing including improved solar orientation of housing, increased soft landscaping and greater retention of tree canopy.	DTS/DPF 2.3 None are applicable.
Built form and Character	
PO 3.1 Co-located housing features dwellings behind or integrated with one or more established dwellings which faces a street in a manner which preserves the existing streetscape pattern and character.	DTS/DPF 3.1 None are applicable.
PO 3.2 Co-located housing incorporates form, height, scale, spacing and design that complements the prevailing streetscape character of the locality and minimises the visual impacts to neighbouring properties.	DTS/DPF3.2 None are applicable.
PO 3.3	DTS/DPF 3.3

Established dwelling(s) on the site of a co-located housing development are retained to accommodate co-located housing, and may include sensitive alterations, additions and/or partial demolition.	None are applicable.
PO 3.4 New building(s) accommodating dwelling(s) for co-located housing have footprint(s) which minimise bulk and scale impacts on adjoining residential properties and retains areas for landscaping and communal open space.	DTS/DPF 3.4 None are applicable.
PO 3.5 Co-located housing dwellings are separated from other buildings and boundaries within the site to facilitate the provision of open space, retention of deep root zones for trees, reduce the visual impact of buildings, and provide an attractive outlook and access to light and ventilation from both within and external to the development site.	DTS/DPF 3.5 None are applicable.
PO 3.6 Co-located housing boundary walls are limited in height and length to manage visual and overshadowing impacts on adjoining residential properties.	DTS/DPF 3.6 Side boundary walls for co-located housing occur only on one side boundary and satisfy (a) or (b) below: (a) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same or lesser length and height (b) side boundary walls do not: (i) exceed 3.2m in height from the lower of the natural or finished ground level (ii) exceed 8m in length (iii) when combined with other walls on the boundary of the subject development site, exceed a maximum 45% of the length of the boundary (iv) encroach within 3m of any other existing or proposed boundary walls on the subject land.
Open Space	
PO 4.1 Communal open space is provided to meet the needs of co-located housing occupants, in a manner that encourages interaction between occupants and provides privacy from public view while complementing streetscape character.	DTS/DPF 4.1 Communal open space for co-located housing satisfies all of the following: (a) a minimum of 24m² of communal open space is provided per co-located housing dwelling for shared use by all occupants (b) 80% of the total of communal open space is provided in a single location that is overlooked by a minimum of two dwellings and has a minimum dimension of 5m (c) is obscured or screened from public view (external to the site) by siting or the use of vegetation, buildings, or other similar structures with a minimum height of 1.8m above ground level and a maximum transparency of 20% (d) may include verandahs, alfrescos, terraces, decks where not enclosed on all sides (e) does not include areas used for bin storage, laundry drying, rainwater tanks, utilities, driveways, or vehicle parking areas.
Internal Privacy and Overlooking	
PO 5.1 Co-located housing encourages positive interaction between residents with the living areas of dwellings strategically placed off communal open space to create strong connections between inside and out and to provide passive surveillance across the site.	DTS/DPF 5.1 None are applicable.
PO 5.2 Co-located housing developments provide visibility between living areas and communal open space, avoiding internal fencing and other obstructions to promote passive surveillance across the site.	DTS/DPF 5.2 None are applicable.
PO 5.3 Bedrooms of co-located housing are oriented away from communal open space and are instead provided with views of, and access to smaller areas of outdoor private open space.	DTS/DPF 5.3 None are applicable.
PO 5.4 Internal fencing within a co-located housing development is limited in height and visually permeable to maintain visibility, outlook and passive surveillance of common areas.	DTS/DPF 5.4 Fencing within the site of a co-located housing development (where not located along the perimeter boundary) is no more than 1.2m in height and constructed of a material with a minimum transparency of 50%.
Parking and Access	
PO 6.1 Car parking for co-located housing satisfies all of the following: (a) is shared with car parks accessible to occupants and visitors at all times (b) is established in a manner that maintains the existing primary streetscape (c) maintains or reduces the number of existing driveway access points.	DTS/DPF 6.1 None are applicable.
PO 6.2 Existing driveways and manoeuvring areas are maintained or reduced to maximise the amount of landscaping and communal open space provided.	DTS/DPF 6.2 None are applicable.
Pedestrian Access	
PO 7.1 Pedestrian access to co-located housing from the primary street frontage is convenient, safe and minimises disruption to the occupants of other co-located housing by providing all of the following: (a) a single common pathway accessible throughout the development site (b) controlled lighting to mitigate artificial light intrusion while maintaining safety (c) appropriate separation from bedrooms or any private open space areas.	DTS/DPF 7.1 None are applicable.
PO 7.2	DTS/DPF 7.2

Co-located housing developments are designed to support safe and convenient access and movement for residents throughout the site by avoiding steps in pathways, parking areas and common areas, where practicable.	None are applicable.
Landscaping	
PO 8.1 Co-located housing retains mature landscaping throughout the site in order to maintain the existing character of the locality and enhance resident amenity.	DTS/DPF 8.1 None are applicable.
PO 8.2 Landscaping is used to soften the bulk, scale and visual appearance of new buildings for co-located housing and to minimise hard, impermeable on-site surface treatments.	DTS/DPF 8.2 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Defence Aviation Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of potential impacts of buildings on the operational and safety requirements of Defence Aviation Areas.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Building height does not pose a hazard to the operations of Defence Aviation Areas.	DTS/DPF 1.1 Building height does not exceed the relevant height specified by the *Defence Aviation Area Overlay*.
PO 1.2 Exhaust stacks are designed and sited to minimise plume impacts on aircraft movements associated with Defence Aviation Areas.	DTS/DPF 1.2 Development does not include exhaust stacks.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Design Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development positively contributes to the liveability, durability and sustainability of the built environment through high-quality design.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Medium to high rise buildings and state significant development demonstrate high quality design.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the development comprises a variation to an application that has either been: (a) previously referred to the Government Architect or Associate Government Architect or (b) given development authorisation under the *Planning, Development and Infrastructure Act 2016 or Development Act 1993* and (c) the variation to that application is, in the opinion of the relevant authority, minor in nature or would not warrant a referral when considering the purpose of the referral any of the following classes of development: (a) development within the area of the overlay located within the Corporation of the City of Adelaide where the total amount to be applied to any work, when all stages of the development are completed, exceeds $10,000,000 (b) development within the area of the overlay located within the City of Port Adelaide Enfield where the total amount to be applied to any work, when all stages of the development are completed, exceeds $3 000 000 (c) development within all other areas of the overlay that involves the erection or construction of a building that exceeds 4 building levels.	Government Architect or Associate Government Architect	To provide expert design advice to the relevant authority on how the development: (a) responds to its surrounding context and contributes to the quality and character of a place (b) contributes to inclusiveness, connectivity, and universal design of the built environment (c) enables buildings and places that are fit for purpose, adaptable and long-lasting (d) adds value by positively contributing to places and communities (e) optimises performance and public benefit (f) supports sustainable and environmentally responsible development.	Development of a class to which Schedule 9 clause 3 item 22 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Dwelling Excision Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Creation of allotments to accommodate existing habitable dwellings in primary production areas is limited to avoid undermining primary production.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Land division creating an additional allotment to accommodate an existing dwelling does not undermine the role of primary production areas by being limited and designed to achieve the following:	DTS/DPF 1.1 Land division satisfies all the following: (a) no other dwelling has previously been excised from the allotment by creating an additional allotment

(a) accommodate a dwelling that has had a long term association with primary production on the same allotment (b) contain the excised dwelling within an allotment capable of providing a suitable rural residential amenity (c) maintain all other land (ie land outside the allotment containing the excised dwelling) in suitably sized allotments to support primary production (d) no other dwelling has been excised from the primary production allotment.	(b) it does not create more than one additional allotment where the resultant allotments satisfy (i) and (ii): (i) one allotment will contain a single existing lawful dwelling that existed prior to 1 December 2011 and meets all of the following: A. no allotment boundary is closer than 40m to an existing dwelling B. the allotment is no less than 1 hectare and no greater than 4 hectares in area C. if the allotment is of a battle-axe configuration, the driveway 'handle' is no more than 50 metres in length (ii) any other allotment has an area not less than that identified in the Minimum Site Area Technical and Numeric Variation layer in the SA planning database.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Environment and Food Production Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of valuable rural, landscape, environmental and food production areas from urban encroachment.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Land division undertaken in accordance with Section 7 of the *Planning, Development and Infrastructure Act 2016.*	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Future Local Road Widening Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development consistent with and will not compromise efficient delivery of future road widening requirements of local roads.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature

Future Road Widening	
PO 1.1 Development does not compromise or is located and designed to minimise its impact on future road widening requirements.	DTS/DPF 1.1 Development does not involve building work, or building work is located wholly outside land within the following distance from the primary street frontage. **Minimum Future Local Road Widening Setback** Minimum future local road widening setback is 10.5m Minimum future local road widening setback is 11m Minimum future local road widening setback is 12.5m Minimum future local road widening setback is 12.9m Minimum future local road widening setback is 13m Minimum future local road widening setback is 14m Minimum future local road widening setback is 16.5m Minimum future local road widening setback is 18m Minimum future local road widening setback is 5m Minimum future local road widening setback is 8m Minimum future local road widening setback is 9.5m Minimum future local road widening setback is 7m Minimum future local road widening setback is 2.5m Minimum future local road widening setback is 6m

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Future Road Widening Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development which is consistent with and will not compromise efficient delivery of future road widening requirements.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Future Road Widening	
PO 1.1 Development does not compromise or is located and designed to minimise its impact on future road widening requirements.	DTS/DPF 1.1 Development does not involve building work, or building work is located wholly outside the land subject to the 6m Consent Area, the C Type Requirement or the Strip Requirement of the Metropolitan Adelaide Road Widening Plan.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Other than where all deemed-to-satisfy criteria for all policies relevant to this referral are met, development (including the division of land) that is within or may encroach within a Future Road Widening Area.	Commissioner of Highways.	To provide expert technical assessment and direction to the relevant authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 4 of the Planning, Development

			and Infrastructure (General) Regulations 2017 applies.

Gas and Liquid Petroleum Pipelines Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of risk to public safety, the environment and security of energy supply from the encroachment of development on strategic gas and liquid petroleum pipelines.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Community exposure to a potential hazard from the failure of a gas or liquid petroleum pipeline is mitigated by locating development that may accommodate or result in large congregations of people, buildings for housing and / or caring for vulnerable people and community facilities outside areas that pose an unacceptable risk to protect life.	DTS/DPF 1.1 Development satisfies one of the following: (a) it does not comprise: (i) child care facility (ii) caravan and tourist park (iii) educational facility (iv) buildings comprising 3 or more building levels (v) land division creating allotments under 1ha for residential purposes (except where the existing allotment is less than 1ha) (vi) prison (vii) residential park (viii) retirement facility (ix) student accommodation (x) supported accommodation (xi) shop or shops with a gross leasable floor area of 1000m^2 or greater (xii) tourist accommodation (xiii) stadium (b) a class of development referred to in part (a), or any combination thereof, which will occur in accordance with an agreement under section 123 of the *Planning, Development and Infrastructure Act, 2016*
PO 1.2 Emergency service and major community health related facilities are located outside areas where a gas or liquid petroleum pipeline failure may disrupt ongoing operations to maintain the response capacity in the event of an emergency.	DTS/DPF 1.2 Development does not comprise any of the following: (a) emergency services facility (b) hospital.
PO 1.3 Development involving the manufacture, collection, handling or bulk storage of flammable, explosive, or otherwise hazardous materials is located and designed to avoid escalating the potential for and effects of a gas or liquid petroleum pipeline failure.	DTS/DPF 1.3 Development satisfies one of the following: (a) it does not comprise: (i) general industry (ii) special industry (iii) landfill (iv) renewable energy facility (v) electricity substation (vi) fuel depot (vii) retail fuel outlet (viii) store (ix) warehouse (x) waste treatment facility (b) a class of development referred to in part (a), or any combination thereof, which will occur in accordance with an agreement under section 123 of the *Planning, Development and Infrastructure Act, 2016*

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the

relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, a class of development that does not satisfy Gas and Liquid Petroleum Pipelines Overlay DTS/DPF 1.1, 1.2 and 1.3.	The Chief Executive of the Department of the Minister responsible for administering the *Petroleum and Geothermal Energy Act 2000*.	To provide expert assessment and direction to the relevant authority in relation to: (a) potential safety issues relating to development or (b) the potential for development to adversely impact upon the lawful continued operation of strategic infrastructure (gas and liquid petroleum pipelines).	Development of a class to which Schedule 9 clause 3 item 9B of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Gas and Liquid Petroleum Pipelines (Facilities) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of risk to public safety, the environment and security of energy supply from the encroachment of development on gas and liquid petroleum pipeline facilities.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Safety	
PO 1.1 Development (including land division) does not present a risk to public health and safety due to any of the following: (a) continuous noise associated with pipeline facilities used for energy transportation that exceeds the Environment Protection (Commercial and Industrial Noise) Policy (b) potential for occasional noise associated with high pressure venting.	DTS/DPF 1.1 Development (including land division creating additional allotments for such purposes) comprises one or more of the following: (a) open space (b) roadways (c) a class of development that will occur in accordance with an agreement under section 123 of the *Planning, Development and Infrastructure Act, 2016* (d) a dwelling or ancillary building/structure on an allotment approved for residential purposes.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, a class of development that does not satisfy Overlay DTS/DPF 1.1.	The Chief Executive of the Department of the Minister responsible for administering the Petroleum and Geothermal Energy Act 2000.	To provide expert assessment and direction to the relevant authority in relation to: (a) potential safety issues relating to development or (b) the potential for development to adversely impact upon the lawful continued operation of strategic infrastructure (gas and liquid petroleum pipelines).	Development of a class to which Schedule 9 clause 3 item 9B of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Gateway Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	The visual amenity and streetscape appeal along prominent entrances into towns, tourist and historic precincts, activity centres and main streets is maintained and improved through the careful siting of buildings and other activities in a well landscaped setting.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form and Character	
PO 1.1 Buildings are set back from main roads to support a consistent high-quality streetscape character where the prominence of larger buildings is appropriately mitigated.	DTS/DPF 1.1 Buildings are set back at least the height of the building and no less than 10m from arterial and main roads and highways, whichever is the greater.
PO 1.2 Building are set back from side boundaries to moderate the appearance of buildings and enhance the outlook from arterial and main roads and highways.	DTS/DPF 1.2 None are applicable.
PO 1.3 The main facade of principal buildings facing arterial and main roads and highways incorporate articulation and various materials to promote a high standard of building design and external appearance.	DTS/DPF 1.3 None are applicable.
Landscape Amenity	
PO 2.1 Ancillary buildings including carports, outbuildings and garages, other minor structures, waste storage bins and outdoor storage areas are sited to reduce visual clutter and untidiness from arterial and main roads and highways.	DTS/DPF 2.1 Ancillary buildings including carports, outbuildings and garages, other minor structures, waste storage bins and outdoor storage areas are located in a manner to satisfy one of the following: (a) behind principal building(s) facing arterial and main roads and highways (b) behind the building line of principal building(s) and obscured from public view from arterial and main roads and highways by solid fencing or landscaping.
Landscaping	
PO 3.1 Development incorporates generous landscaping areas along the frontage to arterial roads and highways to enhance visual amenity and complement associated buildings.	DTS/DPF 3.1 None are applicable.
PO 3.2 Existing mature on-site vegetation is retained and incorporated into landscape and parking areas to enhance the appearance of land and buildings.	DTS/DPF 3.2 None are applicable.
PO 3.3 Development incorporates generous landscaping areas along the frontage to arterial roads and landscaped using a combination of high crown evergreen trees, low shrubs and groundcovers to enhance visual amenity and complement the associated buildings.	DTS/DPF 3.3 None are applicable.
PO 3.4 Vehicle parking areas are located and designed to enhance the streetscape setting by: (a) being located to the side or rear of buildings facing arterial and main roads and highways (b) incorporating landscaping, including trees, to break up large parking areas.	DTS/DPF 3.4 None are applicable.
Advertisements	
PO 4.1 Advertisements along arterial and main roads, and highways are consistent in height, size and design to support a cohesive and uniform appearance in gateway locations without dominating the streetscape.	DTS/DPF 4.1 Advertisements meet all the following: (a) will not result in more than 1 advertisement per allotment (b) will not exceed 5m in height (c) do not exceed $3m^2$ per advertising face (d) are not internally illuminated (e) are not animated, flash or move in any way.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Acid Sulfate Soils) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is located and undertaken to minimise disturbance of potential or actual acid sulfate soils and / or the release of acid drainage.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development that involves excavation or a change to a water table where potential or actual acid sulfate soils are present is undertaken to minimise soil disturbance or drainage; prevent or minimise oxidation; and contain and treat any acid drainage to prevent harm or damage to the environment, primary production, buildings, structures and infrastructure or public health.	DTS/DPF 1.1 Development does not involve or cause: (a) excavation of land (b) change to a water table.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Bushfire - General Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development, including land division responds to the general level of bushfire risk by siting and designing buildings in a manner that mitigates the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

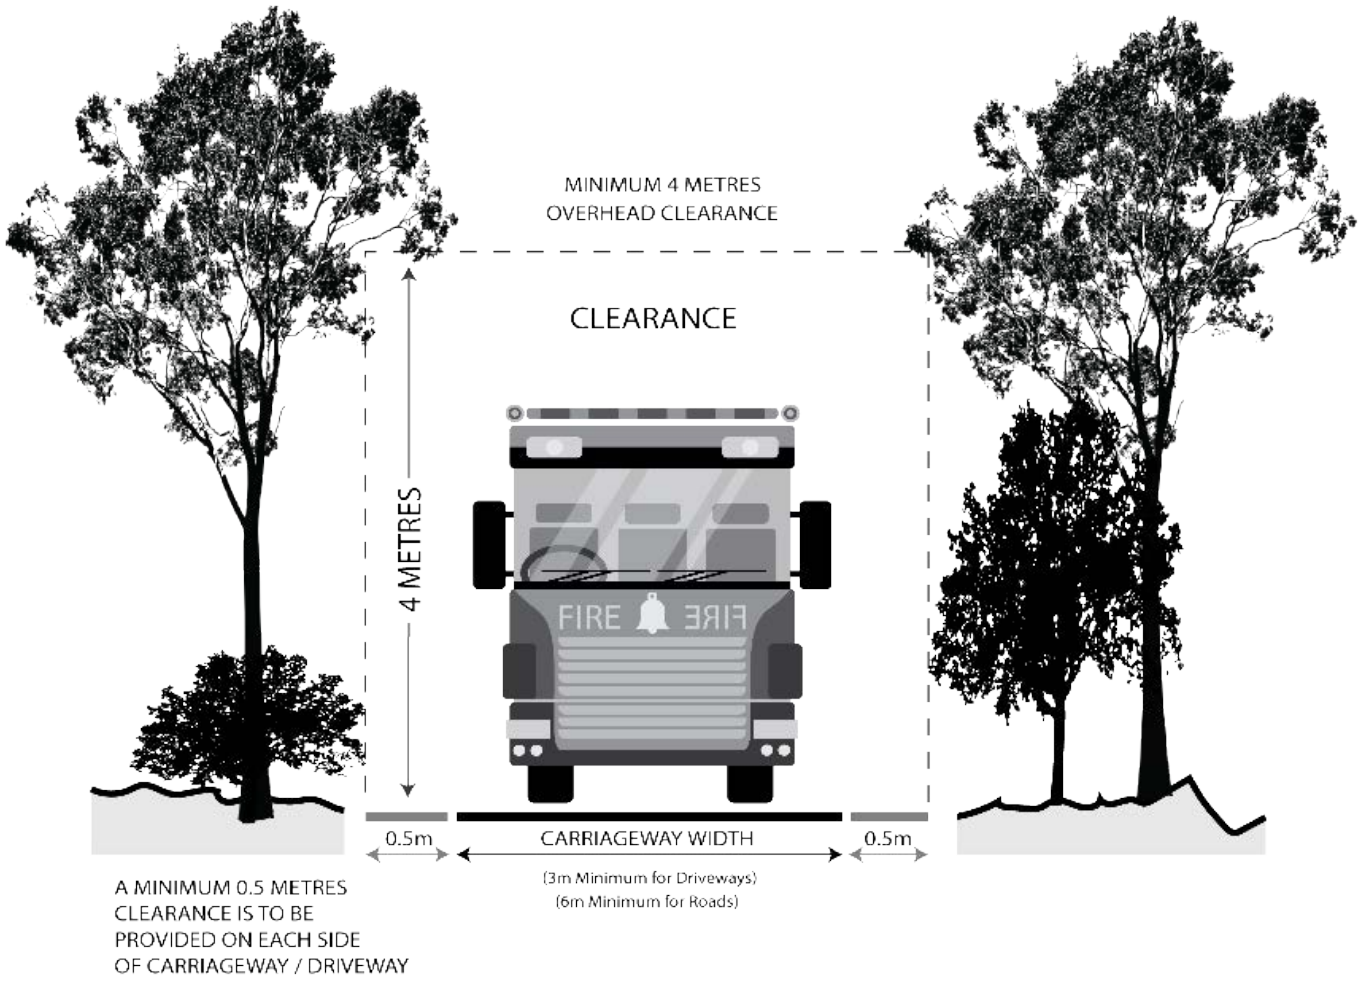
Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 None are applicable.

Built Form	
PO 2.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	DTS/DPF 2.1 None are applicable.
PO 2.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.	DTS/DPF 2.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 3.1 To minimise the threat, impact and exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.	DTS/DPF 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least: (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
PO 3.3 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated area available that is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with *Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements*.	DTS/DPF 3.3 None are applicable.
Land Division	
PO 4.1 Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF 4.1 None are applicable.
PO 4.2 Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.	DTS/DPF 4.2 None are applicable.
PO 4.3 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 4.3 None are applicable.
PO 4.4 Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	DTS/DPF 4.4 None are applicable.
Vehicle Access – Roads, Driveways and Fire Tracks	
PO 5.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3)

	or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors	DTS/DPF 5.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building B. a turning area with a minimum radius of 12.5m (Figure 3) C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.3 Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 5.3 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.



Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Bushfire - High Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development, including land division is sited and designed to minimise the threat and impact of bushfires on life and property with regard to the following risks: (a) potential for uncontrolled bushfire events taking into account the increased frequency and intensity of bushfires as a result of climate change (b) high levels and exposure to ember attack (c) impact from burning debris (d) radiant heat (e) likelihood and direct exposure to flames from a fire front.
DO 2	Activities that increase the number of people living and working in the area or where evacuation would be difficult is sited away from areas of unacceptable bushfire risk.
DO 3	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

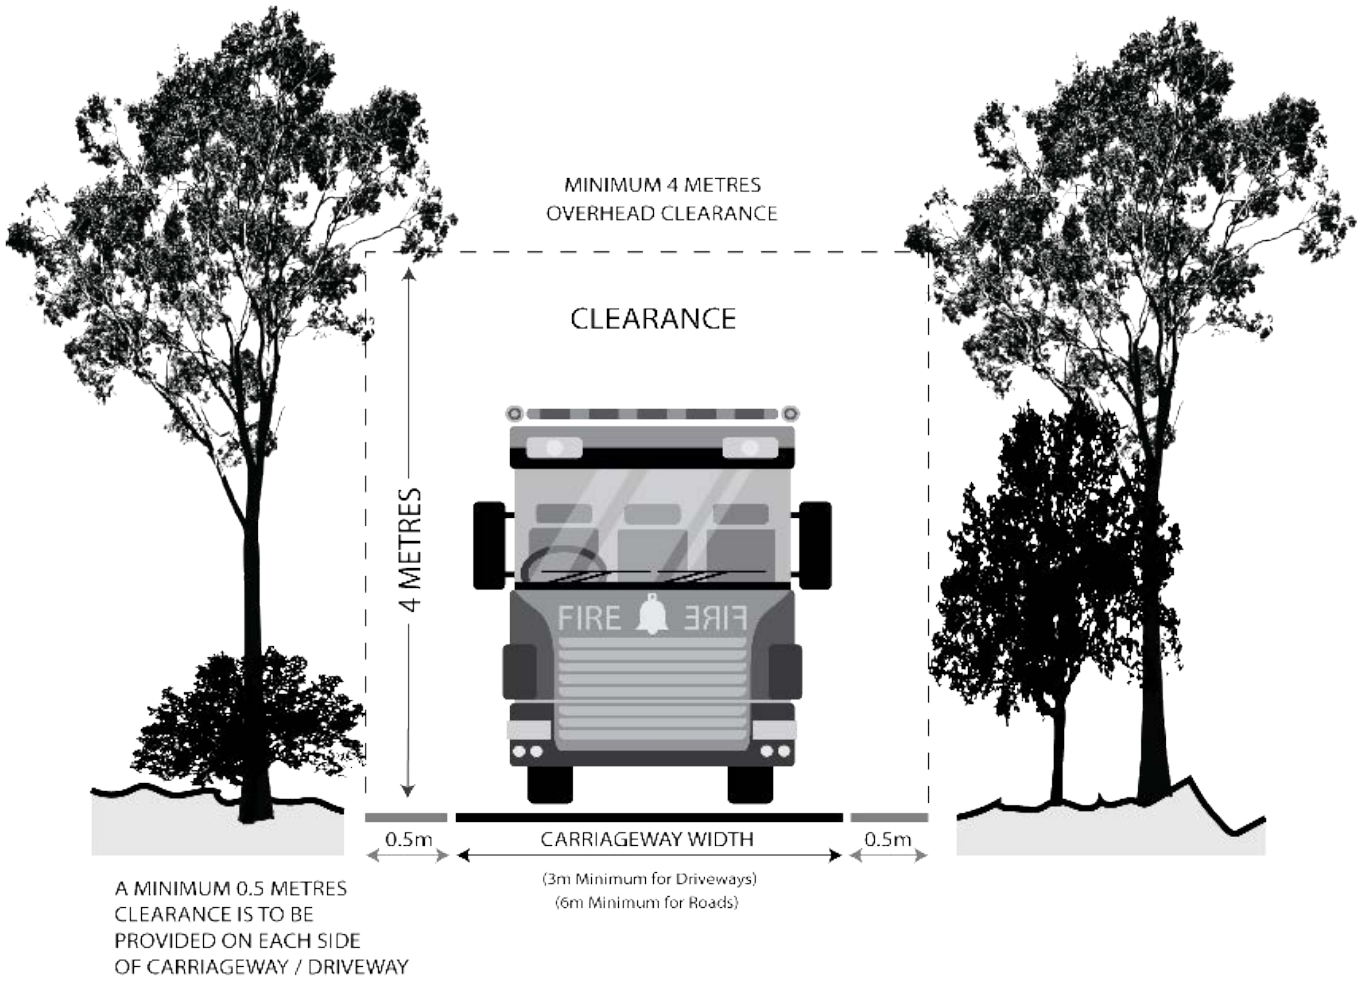
Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development that significantly increases the potential for fire outbreak as a result of the spontaneous combustion of materials, spark generation or through the magnification and reflection of light is not located in areas of unacceptable bushfire risk.	DTS/DPF 1.1 None are applicable.
PO 1.2 Child care facilities, educational facilities, hospitals, retirement and supported accommodation are sited away from areas of unacceptable bushfire risk and locations that: (a) are remote from or require extended periods of travel to reach safer locations (b) don't have a safe path of travel to safer locations.	DTS/DPF 1.2 None are applicable.
Siting	
PO 2.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 2.1 None are applicable.
Built Form	
PO 3.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	DTS/DPF 3.1 None are applicable.
PO 3.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.	DTS/DPF 3.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 4.1 To minimise the threat, impact and potential exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.	DTS/DPF 4.1 None are applicable.
PO 4.2 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.	DTS/DPF 4.2 Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least: (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
PO 4.3 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated area available that:	DTS/DPF 4.3 None are applicable.

(a) is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with *Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements* (b) includes the provision of an all-weather hardstand area in a location that: (i) allows fire-fighting vehicles to safely access the dedicated water supply and exit the site in a forward direction (ii) is no further than 6 metres from the dedicated water supply outlet(s) where required.	
Land Division	
PO 5.1 Land division for residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is limited to those areas specifically set aside for these uses.	DTS/DPF 5.1 None are applicable.
PO 5.2 Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF 5.2 None are applicable.
PO 5.3 Land division is designed to provide a continuous street pattern (avoiding the use of dead end roads/cul-de-sac road design) to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors. Where cul-de-sac / dead end roads are proposed, an alternative emergency evacuation route is provided.	DTS/DPF 5.3 None are applicable.
PO 5.4 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 5.4 None are applicable.
PO 5.5 Land division provides sufficient space for future asset protection zones and incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	DTS/DPF 5.5 None are applicable.
Vehicle Access –Roads, Driveways and Fire Tracks	
PO 6.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 6.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads are provided within an alternative evacuation route and do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 6.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) use, operation and evacuation of fire-fighting and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 6.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway

	(vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building or B. a turning area with a minimum radius of 12.5m (Figure 3) or C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 6.3 Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 6.3 None are applicable.

Procedural Matters (PM) - Referrals



The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except if a ***relevant certificate*** accompanies the application for planning consent in respect of the development, any of the following classes of development (including alterations and additions which increase the floor area of such buildings by 10% or more): (a) land division creating one or more additional allotments (b) dwelling (c) ancillary accommodation (d) residential flat building (e) tourist accommodation (f) boarding home (g) dormitory style accommodation (h) workers' accommodation (i) student accommodation (j) child care facility (k) educational facility (l) retirement village (m) supported accommodation (n) residential park (o) hospital (p) camp ground.	South Australian Country Fire Service.	To provide expert assessment and direction to the relevant authority on the potential impacts of bushfire on the development.	Development of a class to which Schedule 9 clause 3 item 2 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Hazards (Bushfire - Medium Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

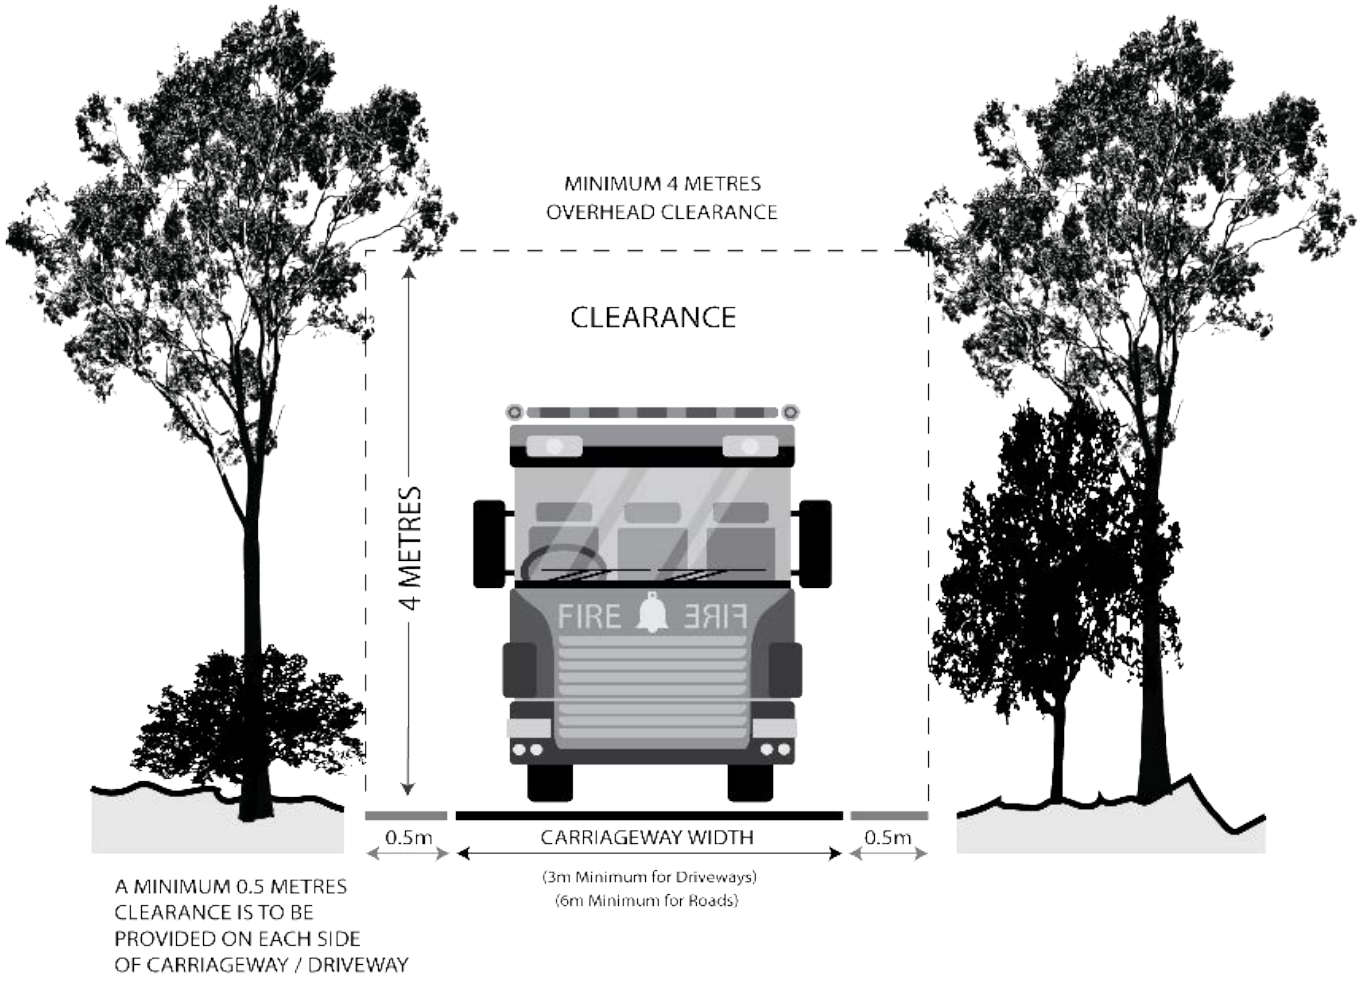
Desired Outcome	
DO 1	Development, including land division responds to the medium level of bushfire risk and potential for ember attack and radiant heat by siting and designing buildings in a manner that mitigates the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	DTS/DPF 2.1 None are applicable.
PO 2.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.	DTS/DPF 2.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 3.1 To minimise the threat, impact and potential exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Residential, tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.	DTS/DPF 3.2 Residential, tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least: (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
PO 3.3 Residential, tourist accommodation and habitable buildings for vulnerable communities, (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation), has a dedicated area available that is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with *Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements*.	DTS/DPF 3.3 None are applicable.
Land Division	
PO 4.1 Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF 4.1 None are applicable.
PO 4.2 Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.	DTS/DPF 4.2 None are applicable.
PO 4.3 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 4.3 None are applicable.
PO 4.4	DTS/DPF 4.4

Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	None are applicable.
Vehicle Access - Roads, Driveways and Fire Tracks	
PO 5.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building or B. a turning area with a minimum radius of 12.5m (Figure 3) or C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.3 Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 5.3 None are applicable.

Procedural Matters (PM) - Referrals



The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Hazards (Bushfire - Outback) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is located to minimise the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Habitable Buildings	
PO 1.1 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zones(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least 50 metres (b) the asset protection zone is contained wholly within the allotment of the development.
Vehicle Access - Roads and Driveways	
PO 2.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors	DTS/DPF 2.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or

	(ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 2.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 2.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building or B. a turning area with a minimum radius of 12.5m (Figure 3) or C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.

Assessment Provisions (AP)

Desired Outcome (DO)

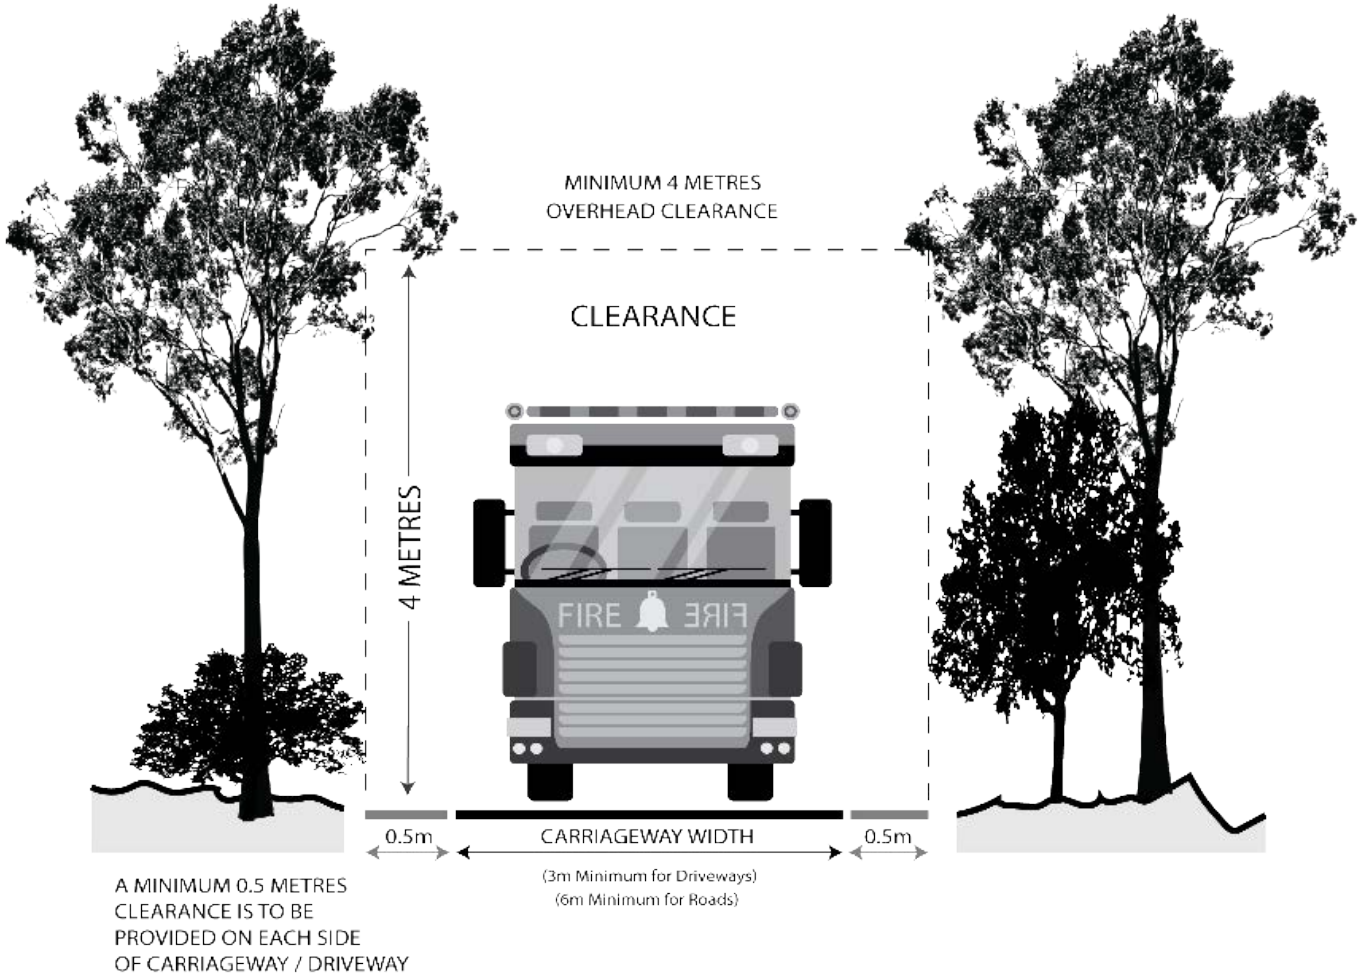
Desired Outcome	
DO 1	Development, including land division responds to the relevant level of bushfire risk and is sited and designed to mitigate the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	DTS/DPF 2.1 None are applicable.
PO 2.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers', accommodation) in the event of bushfire.	DTS/DPF 2.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 3.1 To minimise the threat, impact and exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.	DTS/DPF 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least: (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
PO 3.3 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated and accessible water supply available at all times for fire-fighting purposes.	DTS/DPF 3.3 Development has a dedicated water supply available at all times for fire-fighting purposes: (a) comprising a minimum of 5000 litres (b) positioned in an accessible location and accompanied with necessary equipment to allow occupants to minimise the spread of bushfire to the habitable building(s).
Land Division	
PO 4.1 Land division is designed to and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF 4.1 None are applicable.
PO 4.2 Land division designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.	DTS/DPF 4.2 None are applicable.
PO 4.3 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 4.3 None are applicable.
PO 4.4	DTS/DPF 4.4

Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	None are applicable.
Vehicle Access -Roads and Driveways	
PO 5.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building or B. a turning area with a minimum radius of 12.5m (Figure 3) or C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.3 Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 5.3 None are applicable.

Procedural Matters (PM) - Referrals



The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. Hazards (Bushfire - Urban Interface) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Urban neighbourhoods that adjoin areas of General, Medium and High Bushfire Risk: (a) allow access through to bushfire risk areas (b) are designed to protect life and property from the threat of bushfire and the dangers posed by ember attack (c) facilitate evacuation to areas safe from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Land division creating public roads or resulting in 10 or more new allotments is designed to make provision for emergency vehicle access through to the bushfire risk area.	DTS/DPF 1.1 Land division creates less than 10 allotments and/or does not involve the creation of public roads.
PO 1.2 Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.	DTS/DPF 1.2 Land division does not involve the creation of public roads.
PO 1.3 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 1.3 Land division creates less than 10 allotments.
PO 1.4 Land division creating public roads or resulting in 10 or more new allotments incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	DTS/DPF 1.4 Land division creates less than 10 allotments and/or does not involve the creation of public roads.
PO 1.5 Land division does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 1.5 Land division does not create or rely on fire tracks.
PO 1.6 Land division resulting in 10 or more new allotments and within 100m a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF1.6 Land division is not located within 100m of a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay or does not create 10 or more new allotments.
Vehicle Access - Roads, Driveways and Fire Tracks	
PO 2.1 Roads that are within 100 metres of a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 2.1 Any proposed new roads are not within 100m of a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay or (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.

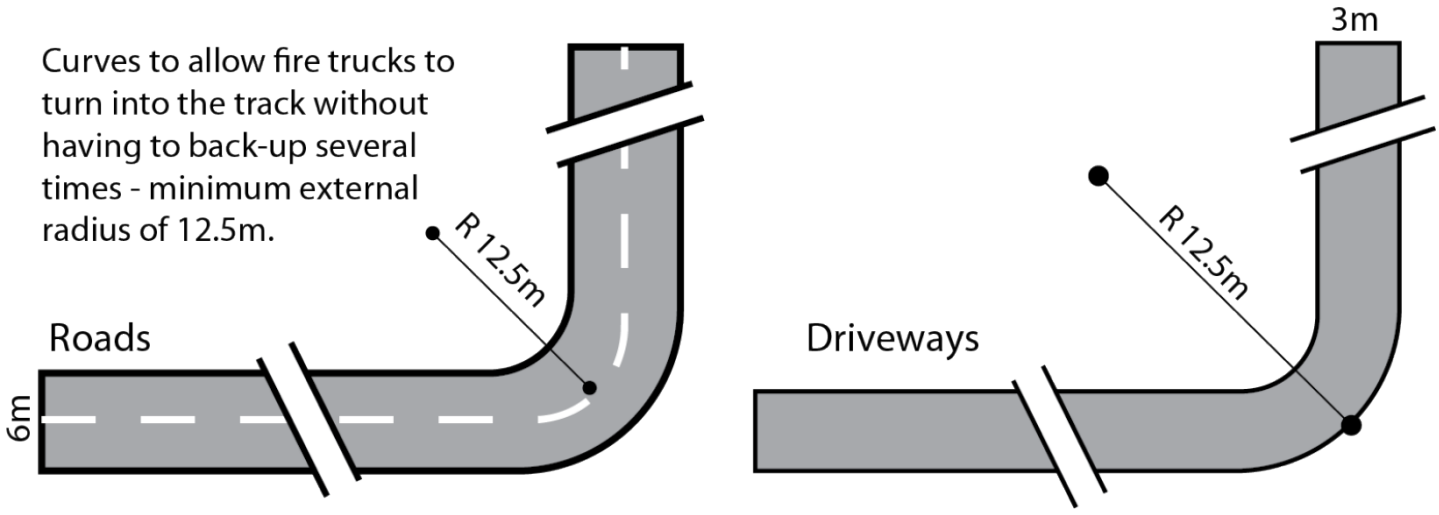

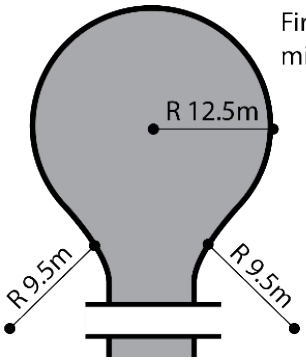

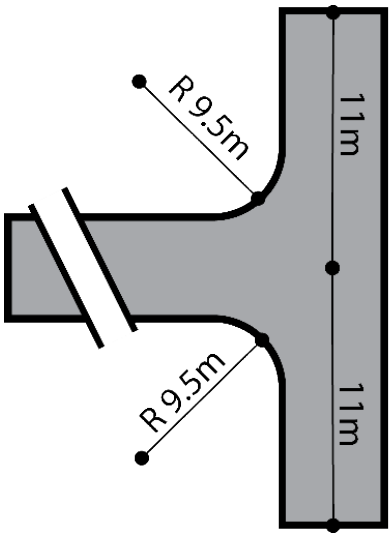

Figure 3 - Full Circle Turning Area

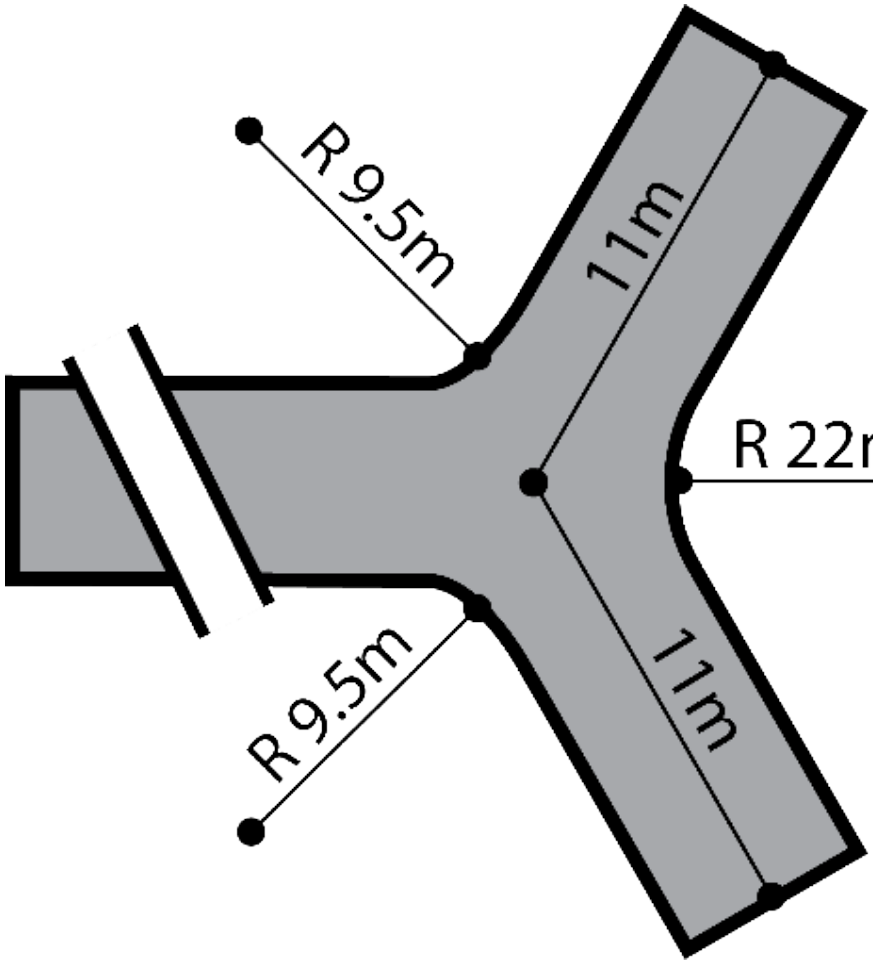
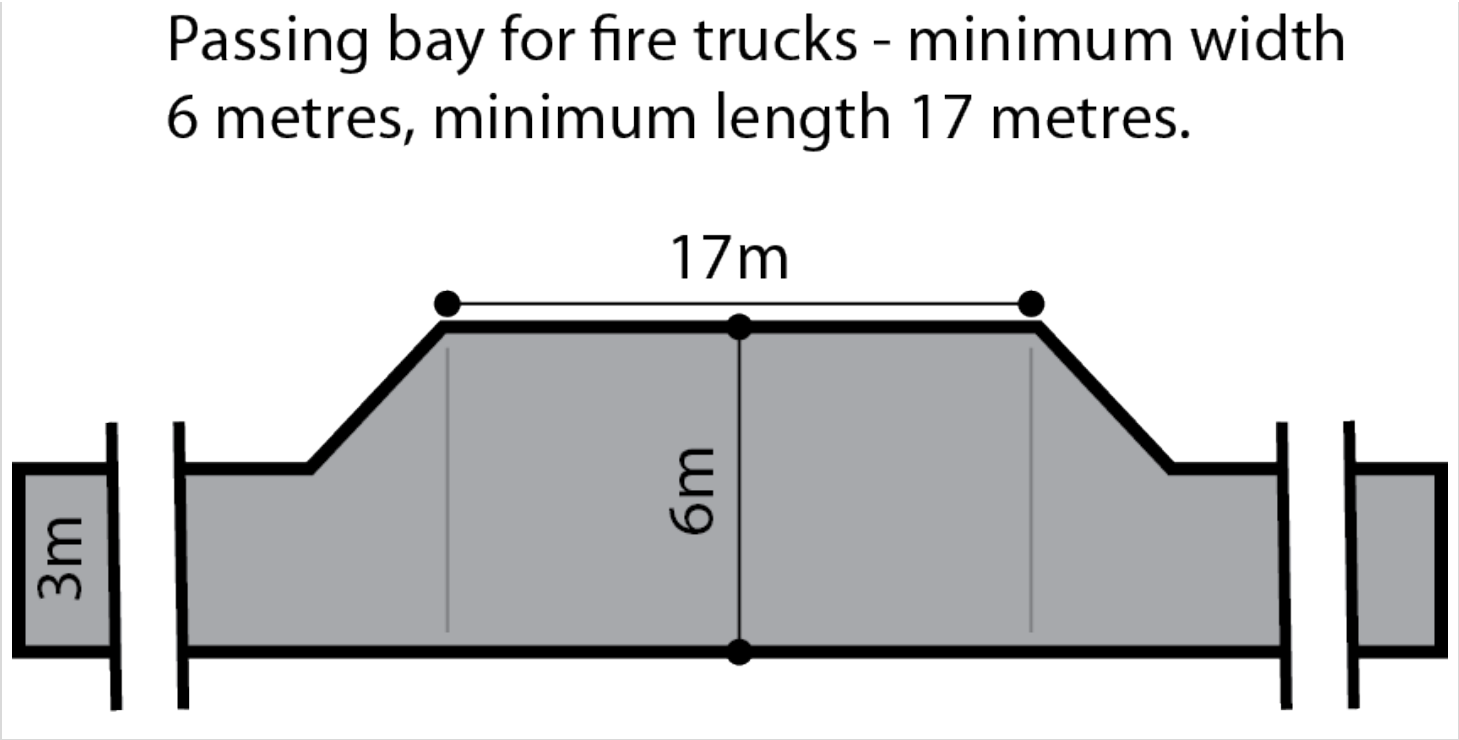


Fire truck turning area - minimum radius 12.5m

Figure 4 - 'T' or 'Y' Shaped Turning Head



"T" shaped turning area for fire trucks to reverse into so they can turn around - minimum length 11m.

"Y" shaped turn around area - minimum length 11 metres.

Figure 5 - Driveway Passing Bays

Hazards (Flooding) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Impacts on people, property, infrastructure and the environment from high flood risk are minimised by retaining areas free from development, and minimising intensification where development has occurred.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Land division is limited to areas where the consequences to buildings and safety are low and can be readily managed or overcome.	DTS/DPF 1.1 None are applicable.
Land Use	
PO 2.1 Development sited and designed to minimise exposure of people and property to unacceptable flood risk.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings housing vulnerable people, community services facilities, key infrastructure and emergency services are sited away from flood prone areas to enable uninterrupted operation of services and reduce likelihood of entrapment.	DTS/DPF 2.2 Child care facilities, educational facilities, retirement and supported accommodation, emergency services facilities, hospitals and prisons are not located within the Overlay area.
Flood Resilience	
PO 3.1 Development avoids the need for flood protection works.	DTS/DPF 3.1 None are applicable.
PO 3.2 Development does not cause unacceptable impacts on any adjoining property by the diversion of flood waters or an increase in flood velocity or flood level.	DTS/DPF 3.2 None are applicable.
PO 3.3 Development does not impede the flow of floodwaters through the allotment or the surrounding land, or cause an unacceptable loss of flood storage.	DTS/DPF 3.3 None are applicable.

PO 3.4 Development avoids frequently flooded or high velocity areas, other than where it is part of a flood mitigation scheme to reduce flood impact.	DTS/DPF 3.4 Other than a recreation area, development is located outside of the 5% AEP principal flow path.
PO 3.5 Buildings are sited, designed and constructed to prevent the entry of floodwaters in a 1% AEP flood event where the entry of floodwaters is likely to result in undue damage to, or compromise ongoing activities within, buildings.	DTS/DPF 3.5 Buildings comprise one of the following: (a) a porch or portico with at least 2 open sides (b) a verandah with at least 3 open sides (c) a carport or outbuilding with at least 2 open sides (whichever elevations face the direction of the flow) (d) any post construction with open sides (e) a building with a finished floor level that is at least 300mm above the height of a 1% AEP flood event.
PO 3.6 Fences do not unreasonably impede floodwaters.	DTS/DPF 3.6 A post and wire fence (other than a chain mesh fence).
Environmental Protection	
PO 4.1 Buildings and structures used either partly or wholly to contain or store hazardous materials are designed to prevent spills or leaks leaving the confines of the building during a 1% AEP flood event to avoid potential environmental harm.	DTS/DPF 4.1 Development involving the storage or disposal of hazardous materials is wholly located outside of the 1% AEP flood plain or flow path.
PO 4.2 Development does not create or aggravate the potential for erosion or siltation or lead to the destruction of vegetation during a flood.	DTS/DPF 4.2 None are applicable.
Site Earthworks	
PO 5.1 The depth and extent of filling required to raise the finished floor level of a building does not cause unacceptable impact on any adjoining property by diversion of flood waters, an increase in flood velocity or flood level, or an unacceptable loss of flood storage.	DTS/DPF 5.1 None are applicable.
PO 5.2 Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.	DTS/DPF 5.2 Filling for ancillary purposes: (a) does not exceed 300mm above existing ground level (b) is no more than 5m wide.
Access	
PO 6.1 Development does not occur on land: (a) from which evacuation to areas not vulnerable to flood risk is not possible during a 1% AEP flood event (b) which cannot be accessed by emergency services vehicles or essential utility service vehicles during a 1% AEP flood event.	DTS/DPF 6.1 None are applicable.
PO 6.2 Access driveways and tracks to significant development (i.e. dwellings, places of work, etc.) consist of a safe, all-weather trafficable surface that is accessible during a 1% AEP flood event.	DTS/DPF 6.2 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Flooding – General) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Impacts on people, property, infrastructure and the environment from general flood risk are minimised through the appropriate siting and design of development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Buildings housing vulnerable people, community services facilities, key infrastructure and emergency services are sited away from flood areas enable uninterrupted operation of services and reduce likelihood of entrapment.	DTS/DPF 1.1 Child care facilities, educational facilities, retirement and supported accommodation, emergency services facilities, hospitals and prisons located outside the 1% AEP flood event.
Flood Resilience	
PO 2.1 Development is sited, designed and constructed to prevent the entry of floodwaters where the entry of flood waters is likely to result in undue damage to or compromise ongoing activities within buildings.	DTS/DPF 2.1 Habitable buildings, commercial and industrial buildings, and buildings used for animal keeping incorporate a finished ground and floor level not less than:

Finished Ground and Floor Levels
Minimum finished floor level is 2.6m AHD
Minimum finished floor level is 20.4m AHD
Minimum finished floor level is 3m AHD
Minimum finished floor level is 3.45m AHD

	Minimum finished floor level is 9.77m AHD
	Minimum finished floor level is 9.85m AHD
	Minimum finished floor level is 4.64m AHD
	In instances where no finished floor level value is specified, a building incorporates a finished floor level at least 300mm above the height of a 1% AEP flood event.
Environmental Protection	
PO 3.1 Buildings and structures used either partly or wholly to contain or store hazardous materials are designed to prevent spills or leaks leaving the confines of the building during a 1% AEP flood event to avoid potential environmental harm.	DTS/DPF 3.1 Development involving the storage or disposal of hazardous materials is wholly located outside of the 1% AEP flood plain or flow path.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Flooding - Evidence Required) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development adopts a precautionary approach to mitigate potential impacts on people, property, infrastructure and the environment from potential flood risk through the appropriate siting and design of development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Flood Resilience	
PO 1.1 Development is sited, designed and constructed to minimise the risk of entry of potential floodwaters where the entry of flood waters is likely to result in undue damage to or compromise ongoing activities within buildings.	DTS/DPF 1.1 Habitable buildings, commercial and industrial buildings, and buildings used for animal keeping incorporate a finished floor level at least 300mm above: (a) the highest point of top of kerb of the primary street or (b) the highest point of natural ground level at the primary street boundary where there is no kerb
Environmental Protection	
PO 2.1 Buildings and structures used either partly or wholly to contain or store hazardous materials are designed to prevent spills or leaks leaving the confines of the building.	DTS/DPF 2.1 Development does not involve the storage of hazardous materials.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Heritage Adjacency Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development adjacent to State and Local Heritage Places maintains the heritage and cultural values of those Places.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Development adjacent to a State or Local Heritage Place does not dominate, encroach on or unduly impact on the setting of the Place.	DTS/DPF 1.1 None are applicable.
Land Division	
PO 2.1 Land division adjacent to a State or Local Heritage Place creates allotments that are of a size and dimension that enables the siting and setbacks of new buildings from allotment boundaries so that they do not dominate, encroach or unduly impact on the setting of the Place.	DTS/DPF 2.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development which in the opinion of the relevant authority materially affects the context within which the **State Heritage Place** is situated.	Minister responsible for the administration of the *Heritage Places Act 1993*.	To provide expert assessment and direction to the relevant authority on the potential impacts of development adjacent State Heritage Places.	Development of a class to which Schedule 9 clause 3 item

			17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Historic Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Historic themes and characteristics are reinforced through conservation and contextually responsive development, design and adaptive reuse that responds to existing coherent patterns of land division, site configuration, streetscapes, building siting and built scale, form and features as exhibited in the Historic Area and expressed in the Historic Area Statement.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All Development	
PO 1.1 All development is undertaken having consideration to the historic streetscapes and built form as expressed in the Historic Area Statement.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 The form and scale of new buildings and structures that are visible from the public realm are consistent with the prevailing historic characteristics of the historic area.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is consistent with the prevailing building and wall heights in the historic area.	DTS/DPF 2.2 None are applicable.
PO 2.3 Design and architectural detailing of street-facing buildings (including but not limited to roof pitch and form, openings, chimneys and verandahs) complement the prevailing characteristics in the historic area.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development is consistent with the prevailing front and side boundary setback pattern in the historic area.	DTS/DPF 2.4 None are applicable.
PO 2.5 Materials are either consistent with or complement those within the historic area.	DTS/DPF 2.5 None are applicable.
Alterations and additions	
PO 3.1 Alterations and additions complement the subject building, employ a contextual design approach and are sited to ensure they do not dominate the primary façade.	DTS/DPF 3.1 Alterations and additions are fully contained within the roof space of an existing building with no external alterations made to the building elevation facing the primary street.
PO 3.2 Adaptive reuse and revitalisation of buildings to support retention consistent with the Historic Area Statement.	DTS/DPF 3.2 None are applicable.
Ancillary development	
PO 4.1 Ancillary development, including carports, outbuildings and garages, complements the historic character of the area and associated buildings.	DTS/DPF 4.1 None are applicable.
PO 4.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s) and does not dominate the building or its setting.	DTS/DPF 4.2 None are applicable.

PO 4.3 Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, be below the parapet line, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.	DTS/DPF 4.3 None are applicable.
PO 4.4 Fencing and gates closer to a street boundary (other than a laneway) than the elevation of the associated building are consistent with the traditional period, style and form of the associated building.	DTS/DPF 4.4 None are applicable.
Land Division	
PO 5.1 Land division creates allotments that are: (a) compatible with the surrounding pattern of subdivision in the historic area (b) of a dimension to accommodate buildings of a bulk and scale that reflect existing buildings and setbacks in the historic area	DTS/DPF 5.1 None are applicable.
Context and Streetscape Amenity	
PO 6.1 The width of driveways and other vehicle access ways are consistent with the prevailing width of existing driveways of the historic area.	DTS/DPF 6.1 None are applicable.
PO 6.2 Development maintains the valued landscape patterns and characteristics that contribute to the historic area, except where they compromise safety, create nuisance, or impact adversely on buildings or infrastructure.	DTS/DPF 6.2 None are applicable.
Demolition	
PO 7.1 Buildings and structures, or features thereof, that demonstrate the historic characteristics as expressed in the Historic Area Statement are not demolished, unless: (a) the front elevation of the building has been substantially altered and cannot be reasonably restored in a manner consistent with the building's original style or (b) the structural integrity or safe condition of the original building is beyond reasonable repair.	DTS/DPF 7.1 None are applicable.
PO 7.2 Partial demolition of a building where that portion to be demolished does not contribute to the historic character of the streetscape.	DTS/DPF 7.2 None are applicable.
PO 7.3 Buildings or elements of buildings that do not conform with the values described in the Historic Area Statement may be demolished.	DTS/DPF 7.3 None are applicable.
Ruins	
PO 8.1 Development conserves and complements features and ruins associated with former activities of significance.	DTS/DPF 8.1 None are applicable.

Historic Area Statements

Statement#	Statement
Historic Areas affecting City of Adelaide	
	North Adelaide Hill Street Historic Area Statement (Adel1) The Historic Area Overlays identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1837 to 1901 - Victorian period. 1901 to 1920s - Edwardian period. 1920s to 1942 - Inter-war period. Low and medium density cottages. Villas and terrace houses. Historically intact residential areas. Long established institutions.
Allotments, subdivision and built form	Large allotments together with low and medium density residential. Building set-back and subdivision pattern established

Statement#	Statement	
	patterns	by Heritage Places. Hill Street Regular setbacks from primary street frontage and regular pattern and siting of Heritage Places. Buildings setback from the side and street frontages of the Church of Perpetual Adoration retain the views and vistas of the Church. Jeffcott Street Buildings on corner site set on or close to the primary street frontage. Barton Terrace West Buildings reinforce the setback and orientation to the Park Lands established by Heritage Places.
Adel1	Architectural styles, detailing and built form features	Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights. Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile. Inter-War Housing consisting of bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments. Finely detailed mansions; Cottages, villas and terraces; aged care, health care, consulting rooms and educational. Victorian Italianate villas, detached and semi-detached dwellings. Institutions are part of the historic fabric of North Adelaide. Mills Terrace and Strangways Terrace (west of Hill Street) Victorian, Edwardian and Inter-War Housing. Detached dwellings, group dwellings and residential flat buildings of one or two storeys incorporating articulation, bay windows, hip or hip - gable roof profiles, verandahs, balconies and porches, set within landscaped grounds. Imposing townscape character of Park Lands frontages established by various styles of detached dwellings of identified heritage value. Gibbon Lane Attached and detached two storey dwellings and single storey detached dwellings of Local Heritage value. Roofs are pitched and the design and composition of facades reflect traditional proportions of Heritage Places. Hill Street One and two storey Victorian, Edwardian and Inter-war detached and semi-detached Local and State Heritage Places. Prominent corner sites containing St Lawrence's Church and Calvary Hospital. Buxton Street Highly cohesive frontages of single storey detached Victorian and Edwardian Local Heritage Places and one and two storey State Heritage Places. Finely detailed Italianate villas. Traditional corner shop to north-west corner of Buxton and Jeffcott Streets. Molesworth Street Victorian, Edwardian and Inter-war housing. Similar semi-detached dwellings of similar architectural design to southern side and detached Victorian Italianate houses and other Local Heritage places to the northern side. Visual prominence of the Church of Perpetual Adoration makes a valuable contribution to the historic character of the area. Barnard Street Victorian and Inter-war housing. Detached and semi-detached one and two storey Heritage Places of consistent setback. Visual prominence of Calvary Hospital Chapel forms an important part of the street character. Jeffcott Street Victorian, Edwardian and Inter-war housing. Diversity of large, traditional, single storey Local Heritage Places of consistent character. Childers Street

Statement#	Statement	
		Victorian, Edwardian and Inter-war housing. Large, low density detached single storey Local Heritage places. <u>Barton Terrace West</u> Victorian and Edwardian housing. Detached, semi-detached and group dwellings, and residential flat buildings. Heritage Places with orientation of dwellings to the Park Lands. <u>Ward Street and Strangways Terrace (east of Hill Street)</u> Calvary Hospital is visually prominent on corner site. Victorian single storey detached residences of consistent architectural style, form and siting to the east of Calvary Hospital.
	Building height	Single and two storey residential. *Note: Concept Plan.*
	Materials	<u>Victorian Houses</u> Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. <u>Edwardian Houses</u> Face brick walls with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material. Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding. Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels. Masonry fencing with cast iron palisade, or timber (picket). <u>Inter-War Houses</u> Australian-made Wunderlich roof tiles. Timber joinery with some use of metal framed windows. Typically low masonry walls, built from materials matching the main building. Stone and cast-iron fencing.
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites. Solid pillars and plinths and similar fencing styles. Cast iron fencing to Buxton Street.
	Setting, landscaping, streetscape and public realm features	Views and vistas of the Church of Perpetual Adoration, Calvary Hospital and Calvary Hospital Chapel. Landscaped grounds.
	Representative Buildings	*[Not identified]*

North Adelaide Childers East Historic Area Statement (Adel2)

The Historic Area Overlays identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1837 to 1901 - Victorian period. 1901 to 1910 - Edwardian period. 1920's to 1942 - Inter-war period. Mansions; historic low and medium density detached and semi-detached residential development such as typical cottages and terrace houses.

Statement#	Statement	
	Allotments, subdivision and built form patterns	Range of subdivision patterns including large allotments together with low and medium density residential development on narrow frontages. Childers Street Consistently sited row cottages on north side. Varying setbacks on south side. Gover Street Generous scale and siting of heritage placed on south side (west of Mansfield Street). Jeffcott Street North of Childers Street, consistent and intensive built form edge to the eastern frontage sited on or close to the primary street frontage. South of Childers Street, buildings sited close to the primary street frontage. Barton Terrace West Cohesive edge along Barton Terrace West.
Adel2	Architectural styles, detailing and built form features	Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights. Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile. Inter-War Housing consisting of bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments. Elegant and finely detailed mansions; Large Villas set on large allotments. Childers Street Victorian, Edwardian and Inter-war housing. Single storey Local Heritage Places, including consistently sited single-storey row cottages, detached cottages and the occasional terrace house with narrow frontages on the northern side and on the southern side, detached and attached cottages with varying set-backs. Continuity of verandahs and parapets and roof profiles. Single storey detached or semi-detached cottages on the southern side. Gover Street Victorian and Edwardian housing. Primarily single storey detached dwellings. Generous scale and siting patterns of Heritage Places to the southern side of street west of Mansfield Street. Jeffcott Street Diversity of traditional dwelling types reflecting the different stages of early Victorian residential development. Low scale row dwellings (north of Childers Street). Larger detached bay window and gable-fronted villas on individual sites

Statement#	Statement	
		Continuity of roof and verandah profiles north of Childers Street. Barton Terrace West Highly modified character. Victorian and Edwardian housing. One or two storey detached or semi-detached dwellings. Hack Street Intimate character derived from Victorian single storey detached cottages. Single width car parking. Mansfield Street Single storey detached, semi-detached and row cottages.
	Building height	Low scale, one and two storey residential. Single storey in appearance along the Childers Street, Gover Street, Jeffcott Street, Hack Street and Mansfield Street frontages.
	Materials	Victorian Houses Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. Edwardian Houses Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material. Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding. Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels. Masonry fencing with cast iron palisade, or timber (picket). Inter-War Houses Australian-made Wunderlich roof tiles. Timber joinery with some use of metal framed windows. Typically low masonry walls, built from materials matching the main building.
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites. Front fences of stone and cast iron, brick, stone or rendered pillars and plinths, timber or well detailed masonry. Brick, rendered masonry and timber side fences on secondary street frontages. Rear and side fences (behind main face of building) of corrugated metal sheeting.

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	Tall trees at the intersection of Barton Terrace West and Jeffcott Street create an imposing 'gateway' to this major entrance to North Adelaide and complement the character of existing street tree planting. Street trees and high quality paving and landscaping. Existing vehicle access points along Barton Terrace West. <u>Hack Street</u> Intimate character of narrow streets.
	Representative Buildings	*[Not identified]*
Adel3	**North Adelaide Wellington Square Historic Area Statement (Adel3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1837 to 1901 - Victorian period. 1920's to 1942 - Inter-war period. Residential development. Important historical public space.
	Allotments, subdivision and built form patterns	Cohesive built form edge to the Square. Buildings sited close to side boundaries. Building set-back and subdivision pattern established by Heritage Places.
	Architectural styles, detailing and built form features	Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights. Inter-War Housing consisting of Bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments. Historic built form comprising large, single storey Local Heritage places and one or two storey State Heritage places. Townscape is contiguous with and complementary to the townscape character of the major streets which lead into the Square. Detached and semi-detached Victorian and Inter-war housing. Balconies over footpaths are not characteristic to the square.
	Building height	Single and two storey.
	Materials	<u>Victorian Houses</u> Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. <u>Inter-War Houses</u>

Statement#	Statement	
		Australian-made Wunderlich roof tiles, face brick and rendered masonry. Timber joinery with some use of metal framed windows.
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites. Front fences of stone and cast iron, brick, stone or rendered pillars and plinths, timber or well detailed masonry. Brick, rendered masonry and timber side fences on secondary street frontages. Rear and side fences (behind main face of building) of corrugated metal sheeting.
	Setting, landscaping, streetscape and public realm features	Landscaping, paving, planting lighting and street furniture contribute to the informal character and unity of Wellington Square. Pedestrian paths and informal recreation areas provide attractive and safe shelter and seating. Predominantly no vehicle access on the Wellington Square frontage.
	Representative Buildings	*[Not identified]*
Adel4	**North Adelaide Tynte Historic Area Statement (Adel4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1837 to 1901 - Victorian period. 1920's to 1942 - Inter-war period. Low and medium density residential development characterised by a range of dwelling types as well as community facilities; Formal and dignified historic character derived from traditional community uses such as the post office, library, hotel, church and kindergarten.
	Allotments, subdivision and built form patterns	*[Not stated]*
	Architectural styles, detailing and built form features	Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights. Inter-War housing consisting of bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments. Variety of detached dwelling types. Intimate scale and siting of historic built form. Specific below by street. <u>Tynte Street</u> Victorian and Inter-war housing. Dignified, quality public buildings. Verandahs and balconies established across footpaths where street trees allow. Buildings on or sited close to the street frontage. <u>Mansfield Street</u> Victorian and Inter-war housing. Low scale cohesive historic patterns of development along street frontage. <u>Wellington Square</u> Victorian and Inter-war housing. Low scale historic built from around perimeter of square.

Statement#	Statement	
		Gover Street Historic detached dwellings of a generous scale and siting.
	Building height	One and two storeys. Intimate scale of Tynte and Archer Streets derived by historic and established built form. *Note: Concept Plan.*
	Materials	Victorian Houses Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. Inter-War Houses Australian-made Wunderlich roof tiles, face brick and rendered masonry. Timber joinery with some use of metal framed windows.
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites. Rear and side fences (behind main face of building) of corrugated metal sheeting.
	Setting, landscaping, streetscape and public realm features	Wide tree-lined streets. Wide footpaths. Quality landscaping, paving and street furniture that reflects its historic context. Views to prominent landmark buildings of Bishops Court and Carclew.
	Representative Buildings	*[Not identified]*

North Adelaide Carclew Historic Area Statement (Adel5)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1837 to 1901 - Victorian period. 1901 to 1920s - Edwardian period. 1920s to 1942 - Inter-war period. 1950 plus - Post War Period. Residential development with intact and generally cohesive townscapes of nineteenth and twentieth century detached houses set in landscaped grounds and imposing two-storey terrace houses.
Allotments, subdivision and built form patterns	Strangways Terrace Large allotments. Ward Street (east of Jeffcott Street) Setback established by Heritage Places. Ward Street (west of Jeffcott Street) (south side) Intimate development pattern. Low density; close grouping of smaller detached cottages of local heritage value located on or near the street to the southern frontage. Jeffcott Street Dwellings sited close to the street frontage.
Architectural styles, detailing and built form features	Victorian housing consisting of single fronted,

Statement#	Statement	
Adel5		symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights. Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile. Inter-War Housing consisting of Bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments. Post War Housing consisting of Old English and Georgian Revival styles. The Old English Revival style uses elements that reference some Elizabethan/Tudor architectural details, steeply pitched roof form and tall chimneys. The Georgian Revival style displays symmetrical elevation with rendered or brick walls, fanlight above central entrance door, hipped roof form and classically derived proportions and details. This style had no verandah but often displayed an entrance portico. Post-war International Style are generally cubiform with flat roofs, large areas of glass in smooth masonry walls and cantilevered elements and recessed porch areas were typical of the style. Nineteenth and twentieth century detached houses. Montefiore Hill, Palmer Place and Brougham Place Victorian, Edwardian, Inter-war and Post-war housing. Unique historic townscapes derived from the setting of prominent heritage places and large, generously proportioned mansions set in landscaped grounds, with articulation and modelling with intricate detailing and ornamentation and exhibiting variations in architectural style. Ancillary buildings are subordinate to heritage places and setback from the principal road frontages. Strangways Terrace Imposing large detached Victorian Villas to the western part of the Terrace. Cohesive detached houses, consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches within a landscaped setting. Detached and semi-detached dwellings. Jeffcott Street Victorian, Edwardian and Inter-war housing. North of Ward Street the residential character is derived from the low scale and close grouping of small cottages and row dwellings sited close to the street frontage. South of Ward Street, the townscape character is derived from detached residences, institutional buildings and a large contemporary apartment building. Articulated masonry facades, gable frontages, pitched roofs, verandahs and cast iron decoration. Ward Street (east of Jeffcott Street) Victorian, Edwardian and Inter-war housing. Detached and semi-detached dwellings and residential flat buildings. Ward Street (west of Jeffcott Street)

Statement#	Statement	
		Single-storey detached residences of consistent architectural style, form and siting. Plain or articulated gabled frontages with a high proportion of solid to void in the composition of facades of these existing dwellings. Prominence of early limestone walls and outbuildings.
	Building height	Low scale. *Note: Concept Plan.*
	Materials	Victorian Houses Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. Edwardian Houses Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material. Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding. Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels. Masonry fencing with cast iron palisade, or timber (picket). Inter-War Houses Australian-made Wunderlich roof tiles, face brick and rendered masonry. Timber joinery with some use of metal framed windows. Post War Housing Old English Revival style displays brick or white rendered walls. Georgian Revival style displays rendered or brick walls. International Style displays large areas of glass and smooth masonry walls. Traditional materials. Stone and brick. Masonry facades with cast iron decoration. Montefiore Hill, Palmer Place and Brougham Place Stone and brick with intricate detailing and ornamentation. Jeffcott Street Masonry Facades and cast iron decoration. Ward Street (west of Jeffcott St) limestone walls and outbuildings.
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites. Front fences of stone and cast iron, brick, stone or rendered pillars and plinths, timber or well detailed masonry.

Statement#	Statement	
		Brick, rendered masonry and timber side fences on secondary street frontages. Rear and side fences (behind main face of building) of corrugated metal sheeting. Boundary fencing to Jeffcott Street.
	Setting, landscaping, streetscape and public realm features	High quality streetscapes and setting. Pleasant and attractive pedestrian environment with landscaping in public spaces that complements Palmer Gardens, Brougham Place and the Park Lands below Montefiore Hill. Vistas to major landmark buildings and roof forms, particularly in the vicinity of Bishops' Court where a distinctive silhouette is created by the juxtaposition of steeply pitched roof profiles, gables and tall narrow chimneys, and on Montefiore Hill by the distinctive roof forms of the prominent Carclew mansion. Dwellings set in landscaped grounds. Landscape setting and views to Heritage Places.
	Representative Buildings	*[Not identified]*

North Adelaide Archer West Historic Area Statement (Adel6)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1837 to 1901 - Victorian period. 1901 to 1920s - Edwardian period. 1920's to 1942 - Inter-war period.
Allotments, subdivision and built form patterns	Large land parcels. Historic grid pattern and smaller building footprints. Consistent setbacks fronting Wellington Square.
Architectural styles, detailing and built form features	Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights. Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile. Inter-War Housing consisting of Bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments. Buildings with articulation and fenestration, frequent openings in building facades, verandahs, balconies, and other features that contribute to the area's historic development pattern. <u>Archer Street</u> Victorian and Inter-war housing. Low scale buildings fronting the street. Townscape character and contemporary buildings of O'Connell Street transitioning to low scale built form

Statement#	Statement	
Adel6		surrounding Wellington Square. Jeffcott Street Low scale buildings fronting the street. Lutheran Seminary buildings and a number of detached single and two storey Heritage Places of consistent architectural style, form and siting Landscaped setting and visual prominence of the historic buildings of Hebart Hall. Ward Street Victorian and Edwardian housing. Low scale buildings fronting the street. Lutheran Seminary buildings, a number of single storey detached and semi-detached dwellings and former dwellings as well more recent two and three storey buildings. Historic character derived from the landscaped setting and visual prominence of the historic buildings of Hebart Hall. Walter Street Victorian and Edwardian housing. Intimate scale and siting of the historic and established built form.
	Building height	Low scale. Single storey in appearance along the Walter Street frontage.
	Materials	Victorian Houses Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. Edwardian Houses Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material. Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding. Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels. Masonry fencing with cast iron palisade, or timber. Inter-War Houses Australian-made Wunderlich roof tiles, face brick and rendered masonry. Timber joinery with some use of metal framed windows. Post War Housing Old English Revival style displays brick or white rendered walls. Georgian Revival style displays rendered or brick walls. International Style displays large areas of glass and smooth masonry walls. Stone, brick, render, galvanized steel and terracotta.

Statement#	Statement	
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites. Front fences of stone and cast iron, brick, stone or rendered pillars and plinths, timber or well detailed masonry. Brick, rendered masonry and timber side fences on secondary street frontages. Rear and side fences (behind main face of building) of corrugated metal sheeting.
	Setting, landscaping, streetscape and public realm features	Landmark attributes of Hebart Hall including landscaping, clock tower spire and cast iron and stone walling along Jeffcott and Ward Street frontages. Views to Heritage Places. Car parking is generally located in the basement, particularly where associated with larger scale buildings. Access points are narrow and consolidated, maintaining a residential scale and pattern. Prominent historic buildings of nearby Hebart Hall.
	Representative Buildings	*[Not identified]*

North Adelaide Margaret Street Historic Area Statement (Adel7)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1837 to 1901 - Victorian period 1901 to 1920s - Edwardian period 1920's to 1942 - Inter-war period One of the most historically intact residential areas in South Australia.
Allotments, subdivision and built form patterns	Continuous built form edge in an historic landscape. <u>Gover Street</u> Regular pattern of Heritage Places addressing the principal road frontage with a consistent building setback from the street. <u>Tynte Street</u> Buildings set close to the street frontage west of Margaret Street. Buildings with deeper setbacks east of Margaret Street. Buildings abut the street frontage on the intersection of Tynte and Margaret Street. <u>Archer Street</u> Buildings situated close to the street frontage. <u>Ward Street</u> Individual dwellings set close to the street. <u>Beviss Street</u> Consistently sited. <u>Curtis Street</u> Buildings built close to the street frontage. <u>Murray Street</u> Closely sited semi-detached cottages.
Architectural styles, detailing and built form features	Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights.

Statement#		Statement
Adel7		Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile. Inter-War housing consisting of bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments. Continuous built form edge in an historic streetscape. Verandahs or balconies over footpaths are not characteristic to the area, other than on existing non-residential corner buildings. Gover Street Victorian and Edwardian housing. Detached, semi-detached dwellings and residential flat buildings. Consistent building set-back from the street of Heritage places. Appearance of detached or semi-detached dwellings or residential flat buildings on southern side. Tynte Street Victorian, Edwardian and Inter-war housing. Non-residential buildings larger in scale and frontage. Mix of dwellings characterised by more generous landscaped grounds and deeper setbacks east of Margaret Street. West of Margaret Street, a mixture of dwellings up to two storeys set close to the street frontage. Two storey buildings built to the street adjacent the Tynte and Margarate Streets intersection. Archer Street Victorian terrace housing, Victorian institutional buildings, a former traditional corner hotel and Victorian detached houses situated close to the street frontage. One and two storey dwellings. Ward Street Victorian, Edwardian and Inter-war housing. Single-storey detached cottages. Individual dwellings set close to the street and a cohesive built form character with sympathetic interpretation of traditional residential forms. Ralston Street Victorian single-storey semi-detached dwellings. Edwardian historic houses of brick construction to the eastern side of the street. Varying scale, siting and character to the western side of the street. Beviss Street Consistent sited, Victorian detached and semi-detached single-storey cottages. Curtis Street Consistent townscape of Victorian detached and semi-detached nineteenth century houses built close to the street frontage. Murray Street Victorian style row housing built in the form of closely sited semi-detached pairs. Consistent roof forms and verandahs contribute to the cohesive townscape. Almost exclusively comprised of Local Heritage Places. Margaret Street Victorian and Inter-war housing. Single storey detached or semi-detached buildings.
	Building height	Up to two storeys at street corners and junctions. Single storey in appearance along the Margaret Street, Beviss Street and Ralston Street frontages. Gover Street Single and two storey. Ward, Ralston, Beviss Streets

Statement#	Statement	
		Single storey.

	North Adelaide Cathedral Historic Area Statement (Adel9)	

Statement#	Statement

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1837 to 1901 - Victorian period. 1920's to 1942 - Inter-war period. Diverse range of nineteenth century predominantly residential architecture with extensive Park Lands frontages.
Allotments, subdivision and built form patterns	Cohesive lines of buildings set behind landscaping. Brougham Court Closely sited dwellings with consistent setbacks. Kermode Street Traditional subdivision pattern to the east of Bagot Street. Existing pattern of development characterised by freestanding buildings within landscaped grounds. Pennington Terrace Considerable siting, set-back, scale and character variation of State Heritage places. King William Road Grand, spacious character of the townscape created by St Peter's Cathedral. Lakeman Street Dwellings sited on the street frontage.
Architectural styles, detailing and built form features	Victorian housing that is single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex form verandah roof and four panelled doors with fanlights and often sidelights. Inter-War housing consisting of bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments. Diverse range of nineteenth century architecture including mansions, detached and semi-detached dwellings and cottages. Brougham Place, Palmer Place Low scale, Victorian and Inter-war detached dwellings. Brougham Court Closely sited Victorian semi-detached and detached Local Heritage Places, with consistent set-backs. Strong built form definition at the junction of Brougham Place and Brougham Court. Kermode Street Victorian and Inter-war housing. Detached residences on individual allotments Semi-detached buildings of local heritage value. Existing pattern of development characterised by

Statement#	Statement	
Adel9		freestanding buildings within landscaped grounds. Appearance of single storey detached or semi-detached dwellings or residential flat buildings west of Bagot Street. Pennington Terrace Victorian and Inter-war housing. State heritage places (including those forming part of St Marks College). Lakeman Street Victorian housing. Small cottages and other single storey dwellings sited on the street frontage. Two storey development generally set back from the street giving single storey appearance. Side boundary walling of larger residences with frontages to Pennington Terrace and Kermode Street. Low scale townscape character with two storey building setback. King William Road Victorian and Inter-war buildings. St Peters Cathedral and Anglican Church Offices, Cathedral Hotel.
	Building height	Low scale. *Note: Concept Plan.*
	Materials	Victorian Houses Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. Edwardian Houses Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material. Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding. Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels. Masonry fencing with cast iron palisade, or timber (picket). Inter-War Houses Australian-made Wunderlich roof tiles, face brick and rendered masonry. Timber joinery with some use of metal framed windows.
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites.
	Setting, landscaping, streetscape and public realm features	Distinctive topography.

Statement#	Statement	
		Cohesive lines of buildings set behind attractive landscaping. St Peters Cathedral and the grand, spacious character of the townscape. Visual prominence of St Peter's Anglican Cathedral. Important view of St Peters Cathedral south from Kermode Street. Important view of the north-east elevation of St Peters Cathedral. Open landscaped setting and curtilage to Pennington Terrace. Park Lands. Shelter in the form of balconies and verandahs over footpaths on the south-west corner of King William Road and Kermode Street intersection. Visual prominence of North Adelaide Church of Christ Chapel and Queens Head Hotel, and heritage listed places. <u>Lakeman Street</u> Intimate character and enclosure of this narrow street. <u>King William Road</u> St Peters Cathedral and the grand, spacious character of the townscape. Important view of the north-east elevation of the Cathedral. Visual prominence of the sandstone dwelling at the junction of Kermode Street and Palmer Place and the bluestone terrace house at the junction of Kermode Street and Lakeman Street. Intimate character and enclosure of Lakeman Street. Major traffic flows on King William Road and Sir Edwin Smith Avenue and high levels of pedestrian safety and accessibility to adjacent Park Lands and public gardens adjacent the existing public road network.
	Representative Buildings	*[Not identified]*
Adel10	**North Adelaide Women's and Children's Historic Area Statement (Adel10)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Traditional institutional buildings including Angus Building and Alan Campbell Building at the Women's and Children's Hospital, the Anglican Church Offices, Former dwellings at Memorial Hospital ('The Avenues' and 'Leahurst') and the Cathedral Hotel. North Adelaide retains strong physical evidence of the historical stages of the development of the colony, most particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services. Until 1856, Kermode Street was the 'High Street' of North Adelaide.
	Allotments, subdivision and built form patterns	<u>King William Street</u> Cohesive buildings reinforce the setback pattern established by Heritage Places. <u>Sir Edwin Smith Drive (South of Kermode) and Pennington Terrace.</u> Buildings reinforce the setback pattern established by Heritage Places. <u>Kermode Street</u> Buildings that reinforce one of the first local main streets of North Adelaide.
	Architectural styles, detailing and built form features	Traditional institutional architecture, including State Heritage Places.
	Building height	Low scale Heritage Places on King William Street, Sir Edwin Smith Drive (South of Kermode) and Pennington Terrace.

Statement#	Statement	
		Buildings enable the visual prominence of the St Peter's Anglican Cathedral to be seen from the Adelaide Park Lands (Park 11, Park 12, and Park 25).
	Materials	Traditional materials reflecting the architectural styles of the Heritage Places. Cast iron fence and stone walling along Sir Edwin Smith Avenue and Pennington Terrace
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites.
	Setting, landscaping, streetscape and public realm features	St Peter's Cathedral, dating from 1869, is a major landmark and visually dominates this area which is characterised by large institutional buildings. High degree of pedestrian amenity and shelter provided by street trees and on-site landscaping. Visually interesting streetscapes. High quality urban realm that supports cultural and community services within the locality. Landscaping and open space breaks up building mass and provides amenity. Pedestrian comfort is supported by a high quality public realm and limited vehicle access from King William Road and Sir Edwin Smith Drive and Kermode Street. Park Land frontages including to the Cross of Sacrifice, Brougham Gardens and Peace Park.
	Representative Buildings	*[Not identified]*

North Adelaide Stanley Historic Area Statement (Adel11)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Low density residential with a distinctive and cohesive character derived from large nineteenth and early twentieth century dwellings and other low density detached and semi-detached dwellings in a variety of forms and styles. Brougham Place Uniting Church has visual prominence.
Allotments, subdivision and built form patterns	Built form edge to Brougham Gardens and the Park Lands along Brougham Place. Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street) Close subdivision pattern west of New Street. Kingston Terrace Consistent setbacks established by Heritage Places.
Architectural styles, detailing and built form features	Victorian housing that is single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex form verandah roof and four panelled doors with fanlights and often sidelights. Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile. Georgian Revival housing displays symmetrical elevation with rendered or brick walls, fanlight above central entrance door, hipped roof form and generally classically derived proportions and details. This style had no verandah but often displayed an entrance portico. Large nineteenth and early twentieth century dwellings comprising more substantial Victorian, Edwardian and Georgian Revival villas, and other low density detached and semi-detached dwellings in a variety of forms and styles.

Statement#	Statement	
Adel11		Buildings on Stanley Street, Kingston Terrace and Brougham Place are defined by the landfall and escarpment. Development takes advantage of the landfall by providing semi-basement floors. Kingston Terrace Victorian and Inter-war housing. Large one and two storey detached residences on individual allotments set close to the street with a Park Lands frontage. Towards Lefevre Terrace: Imposing rear elevations of two storey mansions with frontages to Stanley Street. Modelled and articulated, constructed of masonry, with a high proportion of solid to void in the composition of facades and often feature verandahs and balconies. Stanley Street (northern side) Victorian, Edwardian and Inter-war. Two large mansions set well back from the northern frontage on elevated ground above Stanley Street and large detached and semi-detached residences. Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street) Victorian, Edwardian and Inter-war. Two-storey residences on the southern frontage presenting a single-storey appearance to Stanley Street and Brougham Place due to sloping topography. Consistent set-back of stone Victorian villas typified by rich detailing and cast-iron ornamentation west of New Street. Detached or semi-detached dwellings presenting as single storey to the street frontage. Brougham Place (western boundary) Imposing and finely detailed Brougham Place Uniting Church with its dominant central tower. Low scaled St Ann's College buildings which step down the Brougham Place frontage reflecting the topography of the locality.
	Building height	Low scale dwellings and buildings that enable views of the City from Stanley Street and Brougham Place. Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street) Single storey to the street frontage.
	Materials	Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street) Stone with rich detailing and cast iron west of New Street. Victorian Houses Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. Edwardian Houses Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material.

Statement#	Statement	
		Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding. Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels. Masonry fencing with cast or wrought iron palisade, or timber. Georgian Revival Houses The Georgian Revival style displays symmetrical elevation with rendered or brick walls, fanlight above central entrance door, hipped roof form and generally classically derived proportions and details. This style had no verandah but often displayed an entrance portico. Masonry fencing (brick and /or dressed stone or rendered) and may include cast or wrought iron palisade and gates.
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites. Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street). Stone and cast iron ornamental boundary fencing along street frontage west of New Street.
	Setting, landscaping, streetscape and public realm features	Views of the City from Stanley Street and Brougham Place. Landscape qualities of public and private open space. Vistas to the Park Lands, Brougham Place and the eastern end of Stanley Street. Street trees, avenue planting and other landscaping and a high standard of paving to the public realm. Landmark significance of the Brougham Place Uniting Church. The topography is characterised by the North Adelaide scarp, a steep rise from Melbourne Street to Stanley Street, below which the area is relatively flat, towards the River Torrens. The ridge of the scarp along Kingston Terrace/Stanley Street and the frontages to the Park Lands provided for prestigious residential addresses. The higher concentration of small cottages in the lower section below the scarp reflects the early subdivision of these Town Acres into estates providing workers housing following the establishment of local manufacturing industries such as the Lion Brewery. The creation of the road through Brougham Place in the 1860s and the introduction of horse drawn trams along Melbourne Street in 1878 gave this section of North Adelaide closer links with the rest of the City and made the area an attractive location for workers to live. Vehicle access is via minor streets, side and rear lanes. Vehicle access points have been designed and located to maintain historic kerbing and trees.
	Representative Buildings	*[Not identified]*
	North Adelaide Kentish Arms Historic Area Statement (Adel12) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Residential area reflecting the townscapes of large nineteenth and early twentieth century.

Statement#	Statement	
		1837 to 1901 - Victorian period. 1901 to 1920s - Edwardian period.
	Allotments, subdivision and built form patterns	Strong residential built form edge to the Park Lands and Mann Terrace with regular siting and pattern of building addressing principal road frontage. Stanley Street (south side), East and West Pallant Streets Closely sited single-storey buildings. Stanley Street (north side) Close siting of buildings.
	Architectural styles, detailing and built form features	Victorian Dwellings Single or two storey houses built in a variety of sizes and scale. Single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Vertically proportioned window and door surrounds highlighted with moulded render or brick dressings. Roofs generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay. Concave or convex form verandah roof Four panelled doors with fanlights and often sidelights. Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. Edwardian dwellings Prominent strapped gables and detailing, tall brick chimneys, and verandahs incorporated under the main pitch of the roof. Verandahs with convex (or bullnose) profile. Masonry fencing with cast iron palisade, or timber. Stanley Street (south side), East and West Pallant Streets - Victorian and Inter-war dwellings. Adelaide's earliest residential buildings. Stanley Street (north side) Victorian and Edwardian dwellings. Cohesive, single-storey detached, semi-detached and row housing of the Victorian and Edwardian periods with verandahs along the street frontages and hipped roofs or parapets to front facades. Sussex Street Victorian and Edwardian dwellings. Early German settler cottages and Victorian row dwellings. Sections of small scale, closely sited and cohesive development to the eastern and western end. Early settler cottages on the northern side and Victorian row houses on the southern side. Kingston Terrace Victorian dwellings. A mixture of single-storey row housing and detached and semi-detached houses of the late Victorian to Edwardian periods from Jerningham Street to Francis Street (west), with more recent detached houses and contemporary three storey town houses.

Statement#	Statement	
Adel12		A diversity of architectural styles and housing types which present a cohesive townscape. Jerningham Street Victorian dwellings. Single storey nineteenth century detached and semi-detached dwellings. MacKinnon Parade East of Dunn Street has detached and semi-detached houses of similar scale and design that are of identified heritage value. West of Dunn Street has eroded streetscape pattern. Mann Terrace Victorian dwellings. A group of identical villas. The articulated and gabled facades, pitched roof profiles and verandahs create a highly cohesive character. South of Melbourne Street the townscape comprises a group of identical villas, all of local heritage value. The articulated and gabled facades, pitched roof profiles and verandahs create a highly cohesive character. North of Melbourne Street there is also a cohesive townscape established by closely developed detached and semi-detached dwellings most of which have local heritage value and a regular building set-back from the street. Hart Street Victorian dwellings. Cohesive and intense built form consisting of detached stone cottages of a consistent scale, built form character and siting with masonry construction, fenestration, pitched roofs and verandahs. Bower Street/Provost Street Victorian dwellings. Small detached cottages and row dwellings set on or close to the street. Arthur Street Victorian and Edwardian dwellings. Low scale character.
	Building height	Buildings up to two storeys in Jerningham Street, Stanley Street, MacKinnon Parade, Sussex Street, Hart, Street and East and West Pallant Streets, presenting as single storey to the street. Single storey on Kingston Terrace between Fuller Street and Francis Street (west).
	Materials	Victorian Houses Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses Edwardian Houses Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material.

Statement#	Statement	
		Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding. Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels. Masonry fencing with cast iron palisade, or timber (picket).
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites.
	Setting, landscaping, streetscape and public realm features	Landscape qualities of public and private open space. Pedestrian amenity and shelter provided by street trees, other landscaping and a high standard of paving within the public realm. Vehicle access is via minor streets, side and rear lanes. Vehicle access points have been designed and located to maintain historic kerbing and trees. Vehicle access to row dwellings is provided from laneways and minor streets. Car parking is located behind buildings on the frontages to Kingston Terrace, Mann Terrace, MacKinnon Parade, Melbourne Street and Sussex Street. Car parking is located behind or beside buildings on the Stanley Street and Jerningham Street frontages.

North Adelaide Finniss Historic Area Statement (Adel13)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Low scale residential character. Victorian Houses (1870s to 1890s) on Finniss Street. Victorian Houses (1870s to 1890s) and Post War Dickson Platten buildings date from 1968 - 71 (Kathleen Lumley College) on MacKinnon Parade. Victorian (1870s to 1890s) and Edwardian houses (1900 to 1920s) on Brougham Place.
Allotments, subdivision and built form patterns	Distinctive built form edge between the Park Lands and Lower North Adelaide. Buildings reinforce the setback pattern established by Heritage Places.
Architectural styles, detailing and built form features	<u>Victorian Dwellings</u> Single or two storey houses built in a variety of sizes and scale. Single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Vertically proportioned window and door surrounds highlighted with moulded render or brick dressings. Roofs generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay. Concave or convex form verandah roof. Four panelled doors with fanlights and often sidelights. <u>Edwardian Houses</u> Prominent strapped gables and detailing, tall brick chimneys, and verandahs incorporated under the main pitch of the roof. Verandahs with convex (or bullnose) profile. <u>Finniss Street (north side)</u> Victorian dwellings. Consistent siting and scale of the Victorian and Edwardian villas and, towards the eastern part, the terraces and cottages. <u>Finniss Street (south side)</u> Detached and semi-detached Victorian dwellings.

Statement#	Statement	
Adel13		Brougham Place Victorian and Edwardian dwellings. Large detached dwellings set within spacious landscaped open space. McKinnon Parade Victoria dwellings and Post war buildings. Dwellings proving a Park Land edge within landscaped open space.
	Building height	Low scale. Finniss Street Single storey, or presenting as single storey on the southern side. MacKinnon Parade One to two storeys to the street and up to 4 storeys on the Kathleen Lumley site.
	Materials	Victorian Houses Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. Edwardian Houses Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) was used the wall material. Masonry fencing with cast iron palisade, or timber.
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites.
	Setting, landscaping, streetscape and public realm features	Landscape qualities, dwellings adjacent Park Lands and the established avenue planting in Finniss Street and MacKinnon Parade. Avenue planting in Finniss Street and MacKinnon Parade. Park Lands. Prominence of the British Hotel with its fine detailing and cantilevered balcony. Visual prominence of the State Heritage Place of Kathleen Lumley College. Visual prominence to Brougham Place Uniting Church. Vehicle access is via minor streets, side and rear lanes. Vehicle access points have been designed and located to maintain historic kerbing and trees.
	Representative Buildings	*[Not identified]*

Adelaide Historic Area Statement (Adel14)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Cultural and historic evidence of the creation of the colony and the consolidation of early settlement in Adelaide. 1837 to 1901 - Victorian period. 1901 to 1920s - Edwardian period. 1920's to 1942 - Inter-war period. Broad range of residential stock, from nearby grand villas / mansions on South and East Terraces overlooking the Park Lands (1870-1880) to humble cottages lining the smaller street.
Allotments, subdivision and built form patterns	Subdivision of town acres in the south-east into a network of streets and lanes. Ada Street Close development pattern of residences.

Statement#	Statement	
		Carrington Street (east of Marion Street) Consistent setback of Heritage Places. Carrington Street (west of Marion Street) Close siting. Corryton Street (north of Halifax Street) -Single-storey semi-detached and detached cottages sited close to the street frontage. Castle Street Closely sited to the street with narrow frontages. Gilles Street Close pattern of development. East of St John Street is a more open subdivision pattern. Gladstone Street Sited close to the street frontage. Halifax Street (east of Hutt Street) -Single-storey detached and semi-detached cottages of a consistent built form character and the occasional terrace house. -St John's Church is a prominent landmark. Halifax Street (west of Hutt Street) -Single-storey attached and detached cottages, a large bay window residence and a two-storey Victorian former corner shop. Kate Court -Dwellings sited close to the street frontage. Marion Street - Close grouping of 19th century small semi-detached and detached cottages and row cottages. McLaren Street and Regent Street South -Closely sited, single-storey cottages and row houses. Royal Avenue Close pattern of development. St. John Street -The north east townscape is dominated by the substantial scale and richly detailed character of St John's Church, Meeting Hall and Rectory. Western frontage - group of consistently sited dwellings. Eastern frontage - small group of narrow fronted cottages. Tomsey Street Single-storey semi-detached and detached cottages.
	Architectural styles, detailing and built form features	Ada Street A variety of dwellings, including row cottages, small semi-detached cottages and detached bay window cottages make up this historic townscape. A sense of intimacy and enclosure is derived from the narrowness of the street. Consistent pitched roof profiles, verandahs, fenestration and material. Carrington Street (east of Marion Street) Comprises single-storey detached, semi-detached and row cottages, terrace houses and contemporary attached dwellings. Vertically proportioned openings, pitched roofs and verandahs. Carrington Street (west of Marion Street) Single-storey cottages, row cottages, and terrace houses with historic window proportions, pitched roof profiles, verandah. Castle Street Small semi-detached and detached cottages and the single terrace with verandahs along the street and pitched roofs. Corryton Street (north of Halifax Street)

Statement#	Statement	
Adel14		Single-storey semi-detached and detached cottages sited close to the street frontage establishing a rhythm of narrow dwelling facades, fenestration, pitched roof profiles and verandahs. Corryton Street (south of Halifax Street) Long single-storey row of cottages, with a horizontal emphasis created by the common roof, verandah profiles. Gilles Street Intimate attached and detached cottages with consistent fenestration, pitched roof profiles and verandah styles. Large detached residences set in landscaped ground east of John Street. Variety of architectural forms. Gladstone Street Single-storey row and semi-detached cottages sited close to the street frontage. Intimacy and sense of enclosure from horizontal form of dwellings. Halifax Street (east of Hutt Street) Detached and semi-detached cottages and the occasional terrace house, sited close to the street frontage with minimal side boundary set-backs and having consistency of window proportions, the high proportion of solid to void, pitched roof profiles and verandahs. St John's Church is a prominent landmark. Halifax Street (west of Hutt Street) Attached and detached cottages, a large bay window residence and a two-storey Victorian former corner shop. Kate Court Semi-detached cottages, detached gable-fronted cottages and terrace house sited close to the street frontage, with consistent window proportions, roof forms and verandah styles. Marion Street Close grouping of 19th century small semi-detached and detached cottages and row cottages with low front parapet line and consistent roof and verandah forms. McLaren Street and Regent Street South Closely sited cottages and row houses with vertically proportioned openings and the consistent form of pitched roofs and verandahs. Royal Avenue Cottages and villas. St. John Street Substantial scale and richly detailed character of St John's Church, Meeting Hall and Rectory. Consistently sited, gable-fronted villas to western frontage. Small group of narrow fronted cottages on the eastern frontage. Tomsey Street Semi-detached and detached cottages.
	Building height	Low scale.
	Materials	Victorian Houses Bluestone, limestone or sandstone, with brick or rubble side and rear walls. Timber framed windows and doors. Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. Edwardian Houses Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material. Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding. Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels. Masonry fencing with cast iron palisade, or timber. Inter-War Houses

Statement#	Statement	
		Australian-made Wunderlich roof tiles. Timber joinery with some use of metal framed windows. Typically low masonry fencing, built from materials matching the main building.
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites. Front fences of stone and cast iron, brick, stone or rendered pillars and plinths, timber or well detailed masonry. Brick, rendered masonry and timber side fences on secondary street frontages. Rear and side fences (behind main face of building) of corrugated metal sheeting. Corryton Street (south of Halifax Street) Continuous picket fencing.
	Setting, landscaping, streetscape and public realm features	A sense of intimacy and enclosure to Ada, Gladstone, McLaren, Streets, and Regent Street South. Landmark qualities of St John's Church, Meeting Hall and Rectory. Landscaped open space with significant vegetation. Public and private open spaces incorporating landscaping to street frontages. Vehicle access is via minor streets, side and rear lanes. Vehicle access points have been designed and located to maintain historic kerbing and significant trees.

Historic Areas Affecting Adelaide Hills Council		
AdHi1	**Mylor Historic Area Statement (AdHi1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to late 1890s. Commercial centre. Workingmen's Block movement.
	Allotments, subdivision and built form patterns	Uniform rectangular allotments fronting the main street. Large site areas. Large street frontages. Varying front setbacks (residential development has generous setbacks with commercial/retail development located closer to the front boundary to address the main street). Varying side setbacks, with limited boundary development.
	Architectural styles, detailing and built form features	1890s commercial buildings interspersed with a variety of civic and residential buildings.
	Building height	Generally small scale, single storey construction with the exception of the larger public buildings such as the Uniting Church and the former Institute building.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape. Random coursed and rubble stone. Rendered stone. Brick and rendered quoins. Hipped and gabled roofs. Raked and bullnose verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. External finishes non-reflective incorporating a natural autumnal palate.
	Fencing	Front fences of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, to a height of 1200 millimetres.
	Setting, landscaping, streetscape and public realm features	Rustic character. The township is enclosed on three sides by highly valued remnant vegetation within the Mylor Parklands. Leslie Creek and Aldgate Creek meander through the township before joining up with the Onkaparinga River to the south. The main entrance to Mylor from the north is marked by bridge crossings over Leslie and Aldgate Creeks, the war memorial and views to an avenue of deciduous trees which define the centre of the township. Views of the historic building within the primary school. Other important views along Strathalbyn Road include the heritage buildings containing the general store and rural supplies establishment which defines the southern entry to the township. Wide landscaped verge that incorporates an avenue of trees along Strathalbyn road accentuates the historic built form. Vehicular access at the rear of allotments fronting Strathalbyn Road.
	Representative Buildings	*[Not identified]*
	Stirling - Ayres Hill Road Historic Area Statement (AdHi2) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	

Statement#	Statement	
AdHi2	Eras, themes and context	Mid to late 1880s residential.
	Allotments, subdivision and built form patterns	Large blocks of land. Larger houses on large, well vegetated grounds. Dwellings set well back from the street boundary. Smaller subordinate buildings located closer to the street boundary.
	Architectural styles, detailing and built form features	The architectural style of the buildings varies with their date of construction.
	Building height	Building height to 9 metres. Original scale of buildings.
	Materials	Consistent with the materials associated with the architectural style of the subject building. Random, coursed and dressed stone. Rendered stone. Brick, stone and rendered quoins. String courses. Hipped and gabled roofs. Dormer windows. Raked verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. Decorative cast iron features. Brick and stone chimneys. Stone Porticos. Decorative and ornate timber bargeboards. External finishes non-reflective and utilise natural colours.
	Fencing	Front fencing of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, with varying heights to between 1200-1800 millimetres.
	Setting, landscaping, streetscape and public realm features	'Secluded' nature of houses, in most cases set well back on their blocks, hidden behind the gardens and hedges. Streetscape is dominated by tree plantings and fencing behind which can be seen the larger trees and shrubs of the gardens. The lower section of the road (from Laurel Road to the roundabout near St Catherine's) is winding and bordered by hedges and trees. The upper portion of the road is straight and reveals a wider footpath margin than the lower section, adding to the feeling of privacy of the houses. Wide footpath verges which are of a rustic nature. Row and avenue plantings of exotic trees in the road verges.
	Representative Buildings	*[Not identified]*

Woodside Historic Area Statement (AdHi3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

AdHi3	Eras, themes and context	Late 1880s.
	Allotments, subdivision and built form patterns	Original grid subdivision pattern. Uniform rectangular allotments.
	Architectural styles, detailing and built form features	The predominant character is single storey detached dwellings with an eclectic mix of European architecture set in large landscaped surrounds, interspersed with buildings including workers cottages and churches, at times built to the front boundary. The architectural style of the buildings varies with their date of construction.
	Building height	Primarily single storey detached buildings.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape. Random coursed and rubble stone. Rendered stone. Brick and rendered quoins. Hipped and gabled roofs. Raked verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. External finishes non-reflective and utilise natural colours.
	Fencing	Front fencing of pickets, post and wire, and masonry (exposed or rendered brickwork or stonework), with maximum heights ranging from 1000 of 1200 millimetres.
	Setting, landscaping, streetscape and public realm features	Relatively narrow streets, typically featuring box-style kerb and gutters, do not often have footpaths.
	Representative Buildings	*[Not identified]*

Historic Areas affecting Alexandrina Council

Strathalbyn Suburban Neighbourhood Historic Area Statement (Alex1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

	Eras, themes and context	Northern (Manse Road, Melville Lane, Taylors Lane, Melville Street, Harriet Street and North Parade) 1860s-1910s. Symmetrical double-fronted early settler cottages and simple workers accommodation. Centred on North Parade, the area was initially subdivided in 1856 and was developed to contain a mixture of functions ranging from an early butcher's shop, to a school, a hospital and a Rechabite Hall and residences.

Statement#	Statement	
Alex1		The early commercial and institutional functions have declined over time and the area is now mainly residential. Western (Sandegrove Road, King Street, Coronation Road) 1910s. Symmetrical double-fronted cottages and early Bungalow era dwellings. The Western area is important in the overall character of Strathalbyn as it reflects the period at the turn of the century which was one of consolidation and prosperity for the town. The specific residential character of the area derives from the consistent character of the circa 1910 residences, which display typical characteristics of domestic architecture at the time. Central (East Terrace, Murray Street, North Parade, Grey Street, Chapel Street, Rowe Street, Commercial Road, West Terrace, Jeff Street, Wallbank Street, Mill Street) 1860s - 1950.s. Symmetrical double-fronted cottages and early Bungalow era dwellings. The Central area represents the predominantly residential area within the bounds of the original town boundary following, North Parade, East Terrace, South Terrace and West Terrace. The area also includes church landmarks to the east of the town centre on Murray and Chapel Streets.
	Allotments, subdivision and built form patterns	Northern Large allotments and setbacks. Medium- to large front setbacks. Buildings parallel to street. Buildings typically located asymmetrically on allotments, allowing for access to rear of blocks on one side. This subdivision has a less regular layout, in part due to path of Middle Creek which borders the area on the north and east. Western Large allotments and setbacks. Consistent medium- to large front setbacks. Buildings parallel to street. Buildings typically located symmetrically on allotments with very wide side setbacks. Central Large allotments and setbacks. Buildings parallel to street. Buildings typically located asymmetrically on allotments, allowing for access to rear of blocks on one side.
	Architectural styles, detailing and built form features	Western and Northern Symmetrical stone double fronted cottages with some early bungalow styles. Predominantly hipped roofs of 27-35 degree pitch with detached verandah (concave, convex and bullnosed) set 300mm below main building gutter. High solid to void (window & door opening) ratio. Carports and sheds generally to the rear of allotments and not attached to dwellings. Central Stone double fronted cottages with some early bungalow styles. Predominantly hipped roofs of 27-35 degree pitch with verandahs. High solid to void (window & door opening) ratio. Carports and sheds generally to the rear of allotments and not attached to dwellings.
	Building height	Single storey with external wall heights generally 3.8-4.1m and ceilings at least 3.
	Materials	Sandstone and limestone with red brick quoins predominantly. Corrugated (mostly galvanised) roofing.
	Fencing	Northern Timber post and rail (local variation diamond style), low masonry, timber post and cyclone mesh, rural post and wire fencing to a height of 1.2m at front and 1.8m on side boundaries. Western Hedges, brush, pickets, low masonry and cyclone mesh, rural post and wire fencing to a height of 1.2m at front and 1.8m on side boundaries. Central Timber post and rail (local variation diamond style), hedges, low masonry, timber post and cyclone mesh, rural post and wire fencing to a height of 1.2m at front and 1.8m on side boundaries.
	Setting, landscaping, streetscape and public realm features	Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination. Northern Heavily vegetated, rural character, especially to Taylors Lane and Melville Street. Western Newly formed footpaths with planted verges and street trees. Central Rural character, wide streets and footpaths with regular street trees.
	Representative Buildings	Identified - refer to SA planning database.

Strathalbyn Centre - Township Main Street and Community Facilities Historic Area Statement (Alex2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1860s - 1910s settlement period. Residential, small commercial, institutional and civic buildings.

<u>Dawson (Commercial Road / Dawson Street, Catherine Street, Rankine Street, South Terrace, Donald Terrace, Albyn Terrace)</u>

The River Angas and the associated Soldiers Memorial Gardens is a key element within this area, reflecting the rising civic consciousness of the residents of Strathalbyn as the town prospered through the 1870's-90's. Dawson Street and Albyn Terrace contain many notable early examples of commercial buildings which reflect the enterprise and success of these residents.

<u>High Street (High Street, Grey Street, Swale Street, Sunter Street, Alfred Place)</u>

An historic predominantly commercial area with buildings ranging from early settlement, through a period of expansion in the late 1860's to about 1910.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td><u>Dawson</u>

Large, rectangular allotments with large frontage. No front setback to commercial properties. Typically small front setback to residential properties. Buildings parallel to street. Minimal side setbacks often with no driveways or vehicle access.

<u>High Street</u>

Large, rectangular allotments with large frontage. No front setback to commercial properties. Typically minimal to no front setback to residential properties. Buildings parallel to street. Minimal side setbacks often with no driveways or vehicle access.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>High solid to void (window & door opening) ratio.

Commercial properties typically parapeted or hipped and gabled with verandahs overhanging footpaths.

Residential properties simple double fronted early settler residences and homesteads hipped and gabled roofs of 27-35 degrees pitch with separate verandah.

Carports and garages generally to the rear of allotments and not attached to dwellings.</td></tr>
<tr><td>Building height</td><td>Commercial and residential single storey with external wall heights 3.8-4.1m and ceilings of at least 3m. Two storey grand, civic or historic commercial activities.</td></tr>
<tr><td>Materials</td><td>Sandstone and limestone with red brick quoins predominantly. Corrugated (mostly galvanised) roofing. Institutional and grand civic buildings rendered quoins and features. Distinct absence of contemporary materials.</td></tr>
<tr><td>Fencing</td><td>Timber post and rail (local variation diamond style), timber post and cyclone mesh up to 1.2m in height at front and 1.8m on side boundaries. Pickets to verandahs at street line.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Rural open streetscape character. Some early stone and terracotta kerbing remain. Traditional street tree planting such as Ash trees. Wide streets in original layout connecting to traditional parks/gardens reinforcing rural character and scenic views. Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>

Alex4	**Goolwa Historic Area Statement (Alex4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Between the 1850s and 1880s Goolwa developed as one of Australia's most important river ports. Dwindling after the Morgan to Port Adelaide railway opened in 1878. Australia's first railway, a single-track horse powered tramway (1854) extended from Goolwa to Victor Harbor in 1864 and later converted to steam and rail, now forms part of a major tourist attraction, the 'Cockle Train' trip. Residential development commenced with the settlement of Goolwa. From the late 19th century to the present day, Goolwa's main focus has been as a tourist township, but the industrial historic legacy of earlier times which includes former breweries, sawmill, shipyards, the wharf area, the Goolwa Patent Slip and iron works and flour mill. The Goolwa Historic Area is a residential area known as 'Little Scotland' adjoining the State Heritage Area to the north and bounded by the railway line to the south.
	Allotments, subdivision and built form patterns	Small narrow allotments, with many dwellings built over two allotments giving appearance of larger frontages. Buildings parallel to street. Minimal side setbacks, often no driveways or vehicle access.
	Architectural styles, detailing and built form features	Small humble workers' cottages. Gabled, hipped and parapeted roofs at 30-40 degree pitches. Separate verandah roof across frontage typical. High solid to void (window and door opening) ratio. Carports and garages generally to the rear of allotments and not attached to dwellings.
	Building height	Single storey with external wall heights 3.8 - 4.1m and ceilings of at least 3m.
	Materials	Stone, rendered masonry, weatherboard walls. Corrugated roofing. Distinct absence of contemporary materials.
	Fencing	Low picket fences or timber post and rails often at verandah line, up to 1.2m high.
	Setting, landscaping, streetscape and public realm features	Intimate village, narrow streets with minimal or no footpaths. Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination.
	Representative Buildings	*[Not identified]*
	Port Elliot Township Main Street and Suburban Neighbourhood Historic Area Statement (Alex5) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s-1920s. <u>The Strand</u> Residential and Small Commercial. Early commercial, civic and institutional buildings underpin the historic street. A compact commercial and shopping core towards North Terrace, with holiday houses and cottages concentrated towards Freeman's Lookout to the south. A pedestrian-friendly environment, preserving the backdrop to streetscapes on Charteris Street, Murray Terrace and Horseshoe Bay. <u>Horseshoe Bay</u> Former Port, Leisure. The focal point of the township and centre for leisure activities is Horseshoe Bay. It remains largely undeveloped, with landscape and natural elements prioritised. <u>Murray Terrace</u> Residential. The Murray Terrace section contains both historically significant buildings of the 19th Century and more recent dwellings which give the area a unique character, particularly the bungalow style dwellings located south of the railway line. <u>North Terrace</u>

Statement#	Statement	
Alex5		Commercial and Residential. This area provides the entrance to the historic Port Elliot township.
	Allotments, subdivision and built form patterns	The Strand Large allotment sizes and frontages. Minimal front setbacks to residential buildings, often no front setback to commercial buildings. Buildings parallel to street. Small to medium side setbacks. Murray Terrace Large allotment sizes and frontages. Minimal front setbacks south of the train line, significantly large front setbacks north of the train line. Buildings parallel to the street. Small to medium side setbacks. North Terrace Large allotment sizes and frontages. Medium to large front setbacks to residential buildings, typically no setback to commercial buildings. Buildings parallel to the street. Medium to large side setbacks to residential buildings, minimal setbacks to commercial buildings.
	Architectural styles, detailing and built form features	The Strand Square or rectangular ground plans with hipped and gabled roofs and mostly separate verandahs. Symmetrical facades common. High solid to void (door and window openings) ratio. Carports and garages generally to the rear of allotments and not attached to dwellings. Horseshoe Bay Significant natural landscape with historic shipping remnants (timber jetty, breakwater and quarry). Existing structures are generally unobtrusive. Murray Terrace Square or rectangular ground plans with hipped and gabled roofs and continuous verandahs in Bungalow styles. High solid to void (door and window openings) ratio. Carports and garages generally to the rear of allotments and not attached to dwellings. North Terrace Square or rectangular ground plans with hipped and gabled roofs. Separate verandahs, extending over footpaths for commercial buildings. High solid to void (window and door opening) ratio. Carports and garages generally to the rear of allotments and not attached to dwellings.
	Building height	The Strand and North Terrace Predominantly single storey residential external wall heights 3.8-4.1m and ceilings of at least 3m. Two-storey historic landmark civic, religious and commercial structures. Horseshoe Bay Predominantly single storey and sited well below the cliff face. Murray Terrace Single storey external wall heights 3.8-4.1m and ceilings of at least 3m.
	Materials	The Strand Walls unpainted limestone and bluestone with redbrick quoins. Some rendered masonry. Corrugated roofs. Distinct absence of contemporary materials. Horseshoe Bay Natural materials dominate. Stone, rendered masonry, unpainted timber, corrugated roofs. Murray Terrace Walls unpainted limestone redbrick quoins and side walls. Some rendered masonry. Corrugated and terracotta tiled roofs. Distinct absence of contemporary materials. North Terrace Bluestone, limestone and rendered masonry. Corrugated roofs. Distinct absence of contemporary materials.
	Fencing	The Strand Low, open fencing including post and wire, post and rail, picket, hedges and vegetation, masonry reflecting the dwelling behind. Front fencing up to 1.2m. Horseshoe Bay Fencing that enables views. Murray Street

Statement#	Statement	
		Low fencing including pickets and masonry (reflecting style of dwelling behind), some hedges. Front fencing up to 1.2m. North Terrace Low masonry fencing most common. Some brush, timber and hedging. Front fencing up to 1.2m.
	Setting, landscaping, streetscape and public realm features	Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination. The Strand Intimate village character, street trees and verandahs over footpath. Prominent public parks and railway precinct directly connected to street. Horseshoe Bay Significant natural landscape with historic shipping remnants. Murray Street Wide footpaths with planted verges including street trees and shrubs. North Terrace Rural open streetscape character with minimal signage and no illuminated signage. Paved and bituminised footpaths with some street trees. Street lamps and significant pine tree prominent features.
	Representative Buildings	*[Not identified]*
Alex6	**Milang Neighbourhood, Township Activity Centre and Conservation Historic Area Statement (Alex6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s-1920s Milang's location on the western shore of Lake Alexandrina has been pivotal in its colonial development as a thriving river port. This economic influence, in addition to typical civic services has left a legacy of industrial, civic and domestic buildings, mostly built of local limestone, and a surviving subdivision pattern from the 1850s. Since the 1920s, with the decline of commercial activity, Milang has developed as a tourist, retiree and holiday destination. The substantial Institute building and several commercial buildings including the old Butter Factory, former Lake Hotel and current Pier Hotel stand out as larger buildings in an essentially low-rise environment. These buildings should remain the most prominent structures within their localities, with new development subservient and reverential to them. Surrounding residential development is characterised by a mixture of simple vernacular cottages built in the mid to late 1800s, of local random stone, and more substantial double fronted cottages, villas and the occasional asymmetrical cottage with Victorian stylistic influences.
	Allotments, subdivision and built form patterns	The original township pattern remains clearly evident and should be retained and reinforced by any new divisions. The dominant subdivision pattern is rectilinear, with buildings parallel to boundaries. Front setbacks vary considerably, although as a rule older buildings are sited closer to front boundaries, some with zero setbacks. There are minimal 'hammerhead' or cul-de-sac arrangements, and this form of division should be discouraged. The distinct pattern of reserves and parklands surrounding Luard, Maroo and Lyon Streets should be retained as open landscaped areas surrounding the original central survey on three sides (the fourth side being the lake).
	Architectural styles, detailing and built form features	The early character of Milang can still be readily discerned through the historic buildings that remain from the 1850s to the early 1900s and the original subdivision pattern, which left a rich legacy of buildings including prominent public buildings, churches and a large number of private residences of varying scales and degrees of detail, mostly constructed of stone. It is envisaged Coxe Street and Daranda Terrace will serve as the primary retail areas of Milang complemented by adjacent streets within the Township Activity Centre providing small scale retail facilities catering more for the holiday maker, such as art galleries and tea rooms. It is expected that development along these streets will be mindful of the backdrop to adjacent streetscapes in terms of building bulk, height, overshadowing and overlooking. The floor areas of new buildings will be in the order of those of adjacent historic buildings, but deferential to landmark sites. Overall, development will continue to accommodate the range of small-scale retail and commercial land uses to serve the day to day needs of the local population while retaining Milang's distinctive historic character. In the commercial/civic core of the township, buildings tend to be sited on or close to street boundaries. Many former shops and workshops have been converted to dwellings over the years although many original features remain and should be conserved. It is desirable that sites currently containing development incompatible with the existing character of the policy area be redeveloped with residential development more in keeping with the prevailing historic character. The form of buildings, and the colours and materials used, need to be in keeping with those used on historic buildings existing within the policy area. Existing mature vegetation, walls and fences contribute to character and need to be retained and integrated with any future development.

Statement#	Statement	
		Future residential development within the Historic Area Overlay will complement the existing single storey form, design, siting and appearance of the historic built form. Development closer to street frontages should have a higher degree of consideration to the historic character and development further from street frontages with less contribution to the streetscape character should be screened by substantial vegetation such as large trees, shrubs and hedges. Outbuildings tend to be alongside or to the rear of the dwelling. Front verandahs are common, both concave and convex and the more substantial dwellings have verandahs front and side. Roof forms are a mixture of gable and hipped, typically at a pitch of 20° to 30° with corrugated iron roofs. Exclusively single-storey, high solid to void ratio, vertical proportions to doors and windows, and fine grain detail in elements such as plinths, door and window quoins and projecting sills predominate.
	Building height	Single-storey residential with typical proportions of Victorian era cottages with wall heights of 3m plus and overall heights of 4m to 5m.
	Materials	Materials are typically random stone, stone and brick dressings, with brick chimneys and timber joinery. Typically, these materials would have been sourced locally including underlying limestone. There are three corrugated iron-clad dwellings, one of which is State Heritage listed.
	Fencing	Predominantly low, around 1metre high, timber picket, post and wire, open wire, corrugated iron and occasional hedges. Many properties have no front fencing and in others landscaping is used to delineate boundaries. Overall impression is of low, unobtrusive front and side fencing.
	Setting, landscaping, streetscape and public realm features	This is a low-scale, essentially residential lakeside township with a focus on the water and historic artefacts associated with 19th century river and lake trade. There are significant pockets of tree cover which are prominent in the streetscape, in the surrounding parklands, along Luard Street and the central part of Daranda Terrace. Elsewhere landscaping is casual and scattered. The township has an informal feel. Many streets have no stormwater infrastructure and in others, kerb and gutter are “under” rather than “over” engineered, presenting a more natural appearance more like a country lane. Verges are untended for the most part, or casually landscaped, and Marroo Street and Lyon Street are unsealed.
	Representative Buildings	[Not identified]
Alex7	**Milang Shacks Conservation Historic Area Statement (Alex7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1948-1960. Milang’s proximity to Adelaide made it a desirable riverside site for shacks. The first shack appeared in Milang in 1947. Shacks are a familiar feature of many coastal and riverine locations and have played a significant role in the holiday ethos of South Australia. The shacks provide sleeping accommodation, a place to prepare meals, eat and relax, and a place to store fishing and other equipment for holiday use only, not permanent occupation. Each have their own macerator that pumps effluent to the main CWMS tanks at the Todds Hill / Daranda Terrace area. Rainwater is collected from the roof of each shack. Public facilities on the foreshore also provide toilets and showers. Shacks now have electricity connected and electric lights and appliances replace the ice-chests, and kerosene lamps and stoves once used.
	Allotments, subdivision and built form patterns	There are 92 shacks in three distinct rows on the foreshore. Allotments are typically 5-6m wide and 10-12m deep.
	Architectural styles, detailing and built form features	Uniform in design, being simple rectilinear forms with simple gabled roofs of 10-20 degrees, with simple detailing. Small, simple verandahs of low pitch.
	Building height	Predominantly single storey with minimal two-storey structures. Wall heights typically 2.4m. Overall heights approximately 3m.
	Materials	Lightweight materials including fibre cement sheet, weatherboard and corrugated materials with timber and aluminium windows and doors. Colours vary greatly which is part of the charm and character of the locality.
	Fencing	No fencing between shacks. Some balustrades and enclosed verandahs.
	Setting, landscaping, streetscape and public realm features	Intimate, informal setting with some grassed common areas and scattered trees of modest size.
	Representative Buildings	[Not identified]
Historic Areas affecting The Barossa Council		
	Angaston Centre Historic Area Statement (Baro1) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Early settlement in 1850s and 1860s. 19th and early 20th Century buildings and streetscapes.

<table>
<tr><th>Statement#</th><th colspan="2">Statement</th></tr>
<tr><td rowspan="8">Baro1</td><td>Allotments, subdivision and built form patterns</td><td>Original development and subdivision pattern, especially in the vicinity of Hannay Crescent including the cemetery allotment.</td></tr>

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 - 1917 Victorian and Federation. 1918 - 1952 Post WW1.
	Allotments, subdivision and built form patterns	Traditional rectangular grid pattern. Large site areas. Large street frontage Large front of dwelling set-back.
	Architectural styles, detailing and built form features	Predominantly large single storey early 20th Century dwellings. Federation and Interwar styles including Gentleman's Bungalows and Tudors. Various forms, designs and detailing reflective of the era. Ranging from substantial residences to more modest, unornamented dwellings. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs, ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports located behind the main façade of dwellings. Visible chimneys.
	Building height	Predominantly single storey. A few dwellings with upper storey elements integrated sympathetically into the dwelling design.
	Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet or original terracotta tiles. Some original slate roof tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Timber picket or dowelling.

Statement#	Statement	
		Timber paling with timber top rail not exceeding 1m high. Masonry and cast iron palisade. Masonry with galvanised steel ribbon. Low masonry wall under 900mm in brick matching dwelling. Masonry base with wrought iron steel top rail. Some substantial hedging.
	Setting, landscaping, streetscape and public realm features	Wide streets with wide verges. Substantial trees. Expansive allotments, street frontages and gardens. Significant front landscaped gardens.
	Representative Buildings	Identified - refer to SA planning database.
Bur7	**Toorak Gardens Fergusson Square Historic Area Statement (Bur7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Majority 1918 - 1952 Post WW1.
	Allotments, subdivision and built form patterns	Traditional rectangular grid set out around a central formal garden square. Large site areas. Large street frontage widths Large front of dwelling set-back.
	Architectural styles, detailing and built form features	Interwar styles including Bungalows and Tudors of various forms, designs and detailing reflective of the era. Ranging from substantial residences to more modest, unornamented dwellings. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs, ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports located behind the main façade of dwellings. Visible chimneys.
	Building height	Single storey.
	Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet. Few terracotta tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building facade. Maximum height to 1.2m. Woven crimped wire. Wire mesh with timber or galvanised tube framing. Timber paling with timber top rail not exceeding 1m high. Masonry with galvanised steel ribbon. Low masonry wall under 900mm in brick matching dwelling. Masonry base with wrought iron steel top rail.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Buildings square to and on street alignments. Central formal public garden square. Established vegetated gardens.
	Representative Buildings	Identified - refer to SA planning database.
	Glenunga Park Historic Area Statement (Bur8) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 - 1913 Victorian and Federation.

Statement#	Statement	
Bur8		1914 - 1935 WW1 and Post war WW1.
	Allotments, subdivision and built form patterns	Traditional rectangular grid pattern. Large site areas. Large street frontage widths Large front of dwelling set-back.
	Architectural styles, detailing and built form features	Interwar styles including Bungalows and Tudors, of various forms, designs and detailing reflective of the era. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs, ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports located behind the main façade of dwellings. Visible chimneys.
	Building height	Single storey.
	Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet. Few terracotta tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Timber picket or dowelling. Woven crimped wire. Masonry and cast iron palisade. Masonry with galvanised steel ribbon. Masonry base with wrought iron steel top rail. Low masonry wall under 900mm in brick matching dwelling. Timber pailing with timber top rail not exceeding 1m high. Some substantial hedging.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Buildings square to and on street alignments.
	Representative Buildings	Identified - refer to SA planning database.

Kensington Gardens - The Terraces Historic Area Statement (Bur9)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1880 - 1917 Victorian and Federation. 1918 - 1949 Post WW1.
Allotments, subdivision and built form patterns	Traditional rectangular grid pattern set out around a large recreational reserve. Large site areas. Large street frontage widths Large front of dwelling set-back.
Architectural styles, detailing and built form features	Interwar styles including Bungalows and Tudors , of various forms, designs and detailing reflective of the era. Ranging from substantial residences to more modest, unornamented dwellings. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs, ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports located behind the main façade of dwellings. Visible chimneys.
Building height	Predominantly single storey.

Statement#	Statement	
Bur9	Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet. Few terracotta tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Woven crimped wire. Wire mesh with timber or galvanised tube framing. Masonry and cast iron palisade. Masonry with galvanised steel ribbon. Masonry base with wrought iron steel top rail. Low masonry wall under 900mm in brick matching dwelling. Timber pailing with timber top rail not exceeding 1m high.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Buildings square to and on street alignments. Large central public recreational reserve.
	Representative Buildings	Identified - refer to SA planning database.
Historic Areas affecting City of Charles Sturt		
ChSt1	**Bowden / Brompton Historic Area Statement (ChSt1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s to early 1900s. Victorian era with an intimate and small-scale character.
	Allotments, subdivision and built form patterns	Small, long narrow allotments.
	Architectural styles, detailing and built form features	Single storey, detached and attached, single and double fronted workers' cottages. Some parapet walling to street with visible side return. Shop and dwelling typically on street corners. Early commercial and industrial buildings. Detached and semi-detached bungalow dwellings with wide verandahs, austerity and later townhouses.
	Building height	Single storey with ceiling heights at least 3m. Industrial scale walls of up to 5m.
	Materials	Red brick and bluestone walls and piers. Render to verandah piers, banding and parapets. Corrugated steel roofing in galvanised or paint finish. OG guttering in galvanised or paint finish. Painted timber to window frames, doors and roof trim. Chimneys; brick or painted render. Typically, small span steeply pitched gable and hipped 'M' roofs facing the street with ridge perpendicular or parallel to the street. Separate verandah to higher front wall or parapet.
	Fencing	Low front fencing, typically picket fencing and low masonry walls or combination thereof.
	Setting, landscaping, streetscape and public	Small setbacks from the street. Narrow streets with minimal on site car parking. Original shopfronts to street corners.

Statement#	Statement	
	realm features	Industrial buildings constructed to street frontages.
	Representative Buildings	Identified - refer to SA planning database.
ChSt2	**Ovingham Historic Area Statement (ChSt2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s to 1900s. 1930s to 1940s. 1970s to 1980s (SA Housing Trust).
	Allotments, subdivision and built form patterns	Small narrow lots, often on strongly sloping sites. Allotment shape and size variable and angled to suit strongly sloping sites and street pattern including Albert Turnbull Reserve.
	Architectural styles, detailing and built form features	Single storey, detached and attached, single and double fronted workers' cottages. Bungalows and Austerity houses. Some early SA Housing Trust stock. Typically gable and hipped roofs facing the street, with separate verandah form. Generous roof planes and eaves overhangs to bungalows. Low wide bungalow style overhang verandah or gable.
	Building height	Single storey with ceiling heights at least 3m.
	Materials	Bluestone, sandstone and pressed metal/corrugated walls. Chimneys; brick or painted render. Red brick walls, chimneys and piers. Render to verandah piers, chimneys and banding. Corrugated steel roofing in galvanised or paint finish. OG guttering in galvanised or paint finish. Painted timber to window frames, doors and roof trim.
	Fencing	Low front fencing, typically picket fencing and low masonry walls or combination thereof.
	Setting, landscaping, streetscape and public realm features	Small to some generous variable setbacks from the street. Some dwellings parallel with angled side boundaries.
	Representative Buildings	Identified - refer to SA planning database.
ChSt3	**Brompton Park Historic Area Statement (ChSt3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1870s to 1890s. Victorian era.
	Allotments, subdivision and built form patterns	Very narrow, long allotments.
	Architectural styles, detailing and built form features	Single storey, detached and attached, single and double fronted workers' cottages. Typically, small span steeply pitched gable and hipped 'M' roofs facing the street with ridge perpendicular or parallel to the street. Separate verandah to higher front wall or parapet.
	Building height	Single storey with ceiling heights at least 3m.

Statement#	Statement	
	Materials	Bluestone and sandstone front walls, and red brick sidewalls. Render to verandah piers, banding and parapets. Corrugated steel roofing in galvanised or paint finish. OG guttering in galvanised or paint finish. Painted timber to window frames, doors and roof trim. Chimneys; brick or painted render.
	Fencing	Low front fencing, typically picket fencing and low masonry walls or combination thereof.
	Setting, landscaping, streetscape and public realm features	Small setbacks from the street. Narrow streets with minimal on-site car parking. Original shopfronts and hotels to street corners. Some industrial buildings constructed to street frontages.
	Representative Buildings	Identified - refer to SA planning database.
ChSt4	**Blight Street, Ridleyton Historic Area Statement (ChSt4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1939. Early SA Housing Trust.
	Allotments, subdivision and built form patterns	Regular rectangular allotments with generous frontage and depth, central shared boundary and small side boundary setbacks for driveways.
	Architectural styles, detailing and built form features	Single storey, 'early modern' style, typically semi-detached (duplex). Symmetrical frontage to duplex. Variable pattern of duplexes in street. Vertical proportions to windows. Hipped and gabled roofs, with porch a continuation of main roof or separate and awnings over front door and windows. Some projecting hipped roofs. Shallow roof pitch of 20 degrees maximum.
	Building height	Single storey with ceiling heights around 2.7m - 3m.
	Materials	Red brick, protruding courses, painted and rendered sections, generally ay high level to walls. Corrugated steel and tiled roofing. Porches either corrugated steel or curved flat concrete canopies. Timber framed sunshade awnings with corrugated iron sheet roof. Red brick chimneys. Painted timber framed window frames, doors and roof trim.
	Fencing	Low open cyclone wire fencing or low tubular steel fencing.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Generous setting to each side of duplex.
	Representative Buildings	Identified - refer to SA planning database.
	Bell Street, Pennington Historic Area Statement (ChSt5) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1938.

Statement#	Statement	
ChSt5		Early SA Housing Trust.
	Allotments, subdivision and built form patterns	Layout reflects 'Garden Suburb' design concept, generally with shared central boundary and side boundary setbacks for driveways. Strong urban focal points in Sinclair Square and Tulloch Avenue. Regular rectangular allotments with generous frontage and depth central shared boundary and side boundary setbacks for driveways.
	Architectural styles, detailing and built form features	Austere, with late modern style, typically semi-detached (duplex). Symmetrical frontage to duplex. Variable pattern of duplexes in street. Vertical proportions to windows. Hipped and gable roof forms with porches continuous to main roof and separate awnings over windows. Some projecting hipped roofs. Shallow roof pitch of 20 degrees maximum.
	Building height	Single storey with ceiling heights around 2.7m - 3m.
	Materials	Red brick walls with protruding courses, painted and rendered sections, generally at high level to walls. Corrugated steel roofing and terracotta tile roofing (Bell Street). Porches either corrugated steel or curved flat concrete canopies. Timber framed sunshade awnings with corrugated iron sheet roof. Red brick chimneys. Painted timber framed window frames, doors and roof trim.
	Fencing	Low open cyclone wire fencing or low tubular steel fencing.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Generous setting to each side of duplex.
	Representative Buildings	Identified - refer to SA planning database.
ChSt6	**Croydon / West Croydon (North east of the railway line) Historic Area Statement (ChSt6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1890s - 1910s. 1910s - 1940s (west of Brown Street, north of Herbert Road).
	Allotments, subdivision and built form patterns	Very regular, consistent and long, rectangular allotments, with generous widths. Some combined shops and dwelling buildings to Rosetta and Elizabeth Street. Generous allotments facing Railway line.
	Architectural styles, detailing and built form features	Detached dwellings on generous allotments. Edwardian to early Federation. Post-Edwardian villas along Day Terrace. Early bungalow styles, including some Queen Anne, Tudor and Art Deco styles in latter period areas. A number of more substantial buildings, particularly fronting the railway line. Combined shop/dwellings and rows of shops (Elizabeth Street, Rosetta Street). Hipped, gable and Dutch-gable (gambrel) roofs, 'M' roofs with ridge parallel to street and separate verandahs. Some verandahs continuous with main roof line. Typical bungalow verandahs as low height gable frontage. Generous roof planes and eaves overhangs to bungalows.
	Building height	Single storey with generous ceiling and external wall heights of at least 3m.

Statement#	Statement	
	Materials	Bluestone, sandstone and redbrick, quoins and window surrounds. Red brick and rendered chimneys. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel and terracotta (latter period) roofing. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements including painted timber fretwork, cast iron lacework to verandahs, finials, cover battens to gables and decorative barges.
	Fencing	Woven wire fences with painted timber posts. Painted timber picket fencing reflecting era of associated dwelling. Low masonry fencing with simple masonry piers, sometimes with simple iron and steel infill panels (from hume iron to tubular steel variations).
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks, typically set in mature gardens Typically tree lined streets particularly Day Terrace with railway line in treed setting. Generous side setbacks.
	Representative Buildings	Identified - refer to SA planning database.
ChSt7	**Croydon / West Croydon (South west of the railway line) Historic Area Statement (ChSt7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1890s - 1910s. 1940's bungalow style.
	Allotments, subdivision and built form patterns	Very regular and consistent rectangular allotments, with large widths.
	Architectural styles, detailing and built form features	Villas and symmetrical cottages, with some later, intrusive infill. Some worker's cottages of earlier periods. Some bungalow style. Hipped and gable roofs, and separate verandahs.
	Building height	Single storey with ceiling heights at least 3m.
	Materials	Bluestone, sandstone and redbrick. Corrugated steel roofing. Ornate render surrounds to window. Red brick and rendered chimneys. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel and terracotta (latter period) roofing. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some ornate decorative elements including painted timber fretwork, cast iron lacework to verandahs, finials, cover battens to gables and decorative barges.
	Fencing	Low masonry and original cast-iron and hume metal fencing. Woven wire fences with painted timber posts. Painted timber picket fencing reflecting era of associated dwelling.
	Setting, landscaping, streetscape and public realm features	Medium front setbacks. Plane Trees to Euston Terrace.
	Representative Buildings	Identified - refer to SA planning database.

Welland Historic Area Statement (ChSt11)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1910s to 1940s.
Allotments, subdivision and built form patterns	Very regular and consistent rectangular allotments, typically very wide. Narrow deep allotments to Frederick Street.
Architectural styles, detailing and built form features	Late-Edwardian and Federation housing styles. Predominantly detached with some early semi-detached housing, some designed to look like one dwelling (Frederick Street). Early bungalows and 1940s Austerity houses. Some bungalow makeovers to earlier symmetrical dwellings. Hipped, gable and louvre roofs. Separate bull nose verandah typically to earlier dwellings. 'M' roof forms with ridge parallel to street frontage. Generous simple bungalow roof planes at shallower pitch to earlier housing with lower height generous width verandah. Some verandahs continuous with main roof.
Building height	Single storey with ceiling and external wall heights at least 3m - 3.5m.
Materials	Red brick, bluestone and sandstone walls. Terracotta tiles, corrugated iron and decorative timber trim roofs. Painted metal gutters. Wall vents at high level between top of verandah and underside of gutter Red brick or render finish chimneys. Flat Cantilever concrete canopy sunshades with steel suspension. Ornate cast iron to some verandahs. Ornate decorative painted timber to some verandahs. Painted timber to window and door frames and timber roof trim.
Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
Setting, landscaping, streetscape and public realm features	Tree-lined streets. Large front setbacks.
Representative Buildings	Identified - refer to SA planning database.

Woodville South Historic Area Statement (ChSt12)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1910s to 1940s.
Allotments, subdivision and built form patterns	Substantial allotments with uniformity of layout and buildings, particularly in the 'Glen' Streets and Angus Street. Predominantly large frontages.
Architectural styles, detailing and built form features	Predominantly bungalows with one wide verandah and Tudors with two main gables and central porch. Some Spanish Mission, Dutch Gable and Art Deco houses.

Statement#	Statement	
ChSt12		Predominantly detached. Steep pitched gables associated with Tudor housing and Dutch Gables. Some villa/bungalow hybrid gables. Gable porches. Bungalow style verandahs with low height pitching point. Some verandah roofs continuous with main roof (bungalow and Spanish Mission). Some flat roofed verandahs set behind arched parapet verandah (Spanish Mission). Tall chimneys.
	Building height	Single storey with ceiling heights at least 3m. Bungalow and Spanish Mission typically of lower wall appearance to the street, with broad frontage.
	Materials	Freestone, red brick, stucco and baked or glazed brick. Exposed ornate timber work. Terracotta tiles and some galvanised corrugated iron roofs. Tapered and straight masonry piers and low walls to verandahs of bungalows, some with rendered capping to brickwork or rendered masonry. Painted timber battens (Tudor curved) to painted panel gables of Tudor and Bungalow. Painted timber framed window frames, door frames and roof trim.
	Fencing	Fencing generally low brick, stucco or wire and mostly integral with the design of the house. Some painted timber fencing with pickets or woven wire.
	Setting, landscaping, streetscape and public realm features	Tree lined streets, well maintained gardens, abundant with mature vegetation. Main-focus the landscaped Woodville Oval complex. Buildings fronting Woodville Oval on Oval Avenue and Cedar Avenue are of a larger scale with wider allotments, particularly on corner allotments with 'Glen' Streets.
	Representative Buildings	Identified - refer to SA planning database.

ChSt13

Kilkenny Historic Area Statement (ChSt13)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1850s to 1950s. Predominant era is 1920s to 1930s in the north and 1910s to 1920s in the south.
Allotments, subdivision and built form patterns	Typically regular and consistent rectangular allotments, typically very wide. Narrow allotments to Wilpena Terrace, Arkaba Road and Mundulla Street.
Architectural styles, detailing and built form features	Single front cottages. Edwardian and post-Edwardian cottages in the south. Federation and bungalow houses in the north. Small group of Victorian former shops located at the southern end of Wilpena Terrace reflecting the original main street of Kilkenny. High-quality 1930s houses on large allotments at the northern end Predominantly detached and some attached housing. Semi-Detached dwellings to Wilpena Terrace west of Mundulla Street. Small scale hipped, gable and louvre roofs typically with ridge line perpendicular to the street. Some 'M' roofs with ridge line parallel to the street. Relatively steeper roof pitch. Generous Bungalow roofing with simple roof plane and generous overhangs. Some federation verandahs continuous with main roof.

Statement#	Statement	
		Some separate bullnose verandahs lower than main wall height. Some central gable to verandah with finial.
	Building height	Single storey with ceiling heights at least 3m. Some traditional two storey.
	Materials	Freestone and red brick side walls. Red brick quoins. Rendered walling, tapered piers to bungalow verandahs and parapets. Corrugated iron and terracotta tile roofs. Brick or render chimneys with some decoration. Painted timber frame windows and doors with painted timber roof trim.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Shop and attached dwelling a strong characteristic in Wilpena Terrace with corner shops and verandahs over footpaths. Some dwellings and former shops constructed closer to front boundaries, especially if located on a corner allotment.
	Representative Buildings	Identified - refer to SA planning database.
ChSt14	**Woodville Park Historic Area Statement (ChSt14)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900s to 1950s.
	Allotments, subdivision and built form patterns	Very regular and consistent rectangular, deep allotments, to both sides of the railway line typically very wide with some narrow allotments to Belmore and Russell Terraces.
	Architectural styles, detailing and built form features	Generally detached, later symmetrical cottages, Villas, Federation, Queen Anne, occasional Austerity and bungalow styles with some attached housing to suit narrow allotments. Hipped, gable and louvre roofs with verandahs. Separate verandahs, typically bullnose, across frontages of symmetrical cottages, with many return verandahs not always on corner allotments. Separate verandahs to suit Villa style. Steeper roof pitches to earlier styles and Tudor with shallower pitched bungalow roofing. Wide low height verandah frontages to bungalows with gable and half gable styles with masonry piers and low plinth walls. Simple generous roof planes and eaves overhangs to bungalows with main ridge generally parallel to the street. Steeply pitched Tudor gables and verandah gables facing the street.
	Building height	Single storey with ceiling heights at least 3m.
	Materials	Red brick and freestone walls. Galvanised corrugated iron and terracotta roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels. Some ornate painted timber fretwork and posts to verandahs. Brick or rendered masonry chimneys.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Fences and front gardens are strong elements. Medium to large front setbacks.
	Representative Buildings	Identified - refer to SA planning database.
	Woodville Historic Area Statement (ChSt15) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can

Cheltenham East Historic Area Statement (ChSt16)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1880 -1940.

Small early cottages, Federation through to Bungalow.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Small and variable allotment sizes, typically wide.

Some substantial corner allotments remain.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Villas and symmetrical cottages, Federation and bungalow styles.

Predominantly detached.

Simple steeply pitched hipped, gable, louvre roof forms and verandas.</td></tr>
</table>
</td></tr>
</table>

Statement#	Statement	
ChSt16		Some separate and bullnose generally symmetrical with occasional return verandahs not always on corner allotments. Bungalow roof forms with simple generous roof planes and eaves overhangs. Some verandahs continuous with main roof. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.
	Building height	Single storey with ceiling heights at least 3m - 3.5m.
	Materials	Pressed metal, 'stone' front, metal or weatherboard clad, red brick, freestone and sandstone walls. Corrugated iron and terracotta tiled roofs. Red brick and rendered finish to chimneys. Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally, less ornate painted timber fretwork and posts to verandahs. Some cast iron lacework to verandahs.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Varied, small to medium front setbacks.
	Representative Buildings	Identified - refer to SA planning database.
ChSt17	**Cheltenham West Historic Area Statement (ChSt17)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1910s to 1950s.
	Allotments, subdivision and built form patterns	Typically, wide streets, with large allotments typically very wide.
	Architectural styles, detailing and built form features	Villas, Post-Edwardian, Federation, Tudor and bungalow and Post War style. West of Stroud Street, occasional Tudor or 1940s dwellings. Housing close to Torrens Road and south of the railway line more 'mixed' in character. Hipped, gable and louvre roof forms and verandas. Simple steeply pitched hipped, gable, louvre roof forms and verandas. Some separate and bullnose generally symmetrical with occasional return verandahs not always on corner allotments. Bungalow roof forms with simple generous roof planes and eaves overhangs. Shallower roof pitches to Post War housing. Some verandahs continuous with main roof. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.
	Building height	Single storey with ceiling heights at least 3m - 3.5m.
	Materials	Pressed metal, 'stone' front, metal or weatherboard clad, red brick, freestone and sandstone walls. Corrugated iron and terracotta tiled roofs. Red brick and rendered finish to chimneys. Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally, less ornate painted timber fretwork and posts to verandahs. Some cast iron lacework to verandahs.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Residual shops attached to dwellings and community facilities centred around 'main streets' in Buller Terrace, Stroud Street (north and south) and Railway Terrace. Medium to large front setbacks.

Statement#	Statement
	Representative Buildings: Identified - refer to SA planning database.
ChSt18	**Henley Beach Historic Area Statement (ChSt18)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1880s to 1940s. Transitional styles adopting cross era characteristics.
Allotments, subdivision and built form patterns	Regular and consistent rectangular allotments, typically very wide with a high proportion of narrow and medium width allotments. Angled allotments to North Street west of Military Road.
Architectural styles, detailing and built form features	Marlborough Street and Crewe Street, south to Clarence Street/Durham Street generally feature smaller but elaborate villas, early Spanish Mission, Federation and bungalows. Larger, grand villas, cottages and bungalows predominantly along Marlborough Street and East Terrace. South of Atkin Street, bungalows and Tudors. Hipped, gable and louvre roof forms and verandas. Bungalow roof forms with simple generous roof planes and eaves overhangs. Steeply pitched Tudor roof forms with two main symmetrical gables and central smaller gable porch to street. Some verandahs continuous with main roof. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.
Building height	Single storey with ceiling heights at least 3m - 3.5m.
Materials	Red brick walls and freestone facades. Corrugated and terracotta tile roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels especially Tudor and Bungalow. Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys.
Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
Setting, landscaping, streetscape and public realm features	South of the Bowling Club to Atkin Street, small setbacks. South of Atkin Street larger allotments and medium setbacks. Tree lined streets with a large presence of Norfolk Island pines along North Street and East Terrace. Vehicle access has been designed and located to preserve existing street trees. Some rear lane access.
Representative Buildings	Identified - refer to SA planning database.

Grange Historic Area Statement (ChSt19)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Grange Road Late 1800s to 1950s. Beach Street Late 1800s to 1950s. Jetty Street Late 1800s in the west, to 1950s in the east. Grange Esplanade

Statement#	Statement	
		1880s to 1940s.
	Allotments, subdivision and built form patterns	Grange Road Allotments typically large and wide. Beach Street Allotments typically large and wide. Some angled allotments west of Military Road. Jetty Street Allotments typically large and wide. Large corner allotments. Grange Esplanade Varied, elevated allotments.
	Architectural styles, detailing and built form features	Grange Road Bungalows, Spanish Mission. Symmetrical cottages to Grange Road. Pitched Hipped, gable with verandahs (continuous and separate). Bungalow roof forms with simple generous roof planes and eaves overhangs. Some verandahs continuous with main roof. Some separate bullnose verandahs and return verandah. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls. Beach Street Victorian houses, Federation, Bungalows, Spanish Mission, Austerity. Pitched Hipped, gable with verandahs (continuous and separate). Bungalow roof forms with simple generous roof planes and eaves overhangs. Some verandahs continuous with main roof. Some separate bullnose verandahs and return verandah. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls. Jetty Street Bungalows, cottages, and villas. Some Austerity. Concentration of Tudor homes on Jetty Street (from Charles Sturt Avenue to High Street). Pitched Hipped, gable with verandahs (continuous and separate). Bungalow roof forms with simple generous roof planes and eaves overhangs. Some verandahs continuous with main roof. Some separate bullnose verandahs and return verandah on corner allotments. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls. Grange Esplanade The Marines (State Heritage Place). Grange Hotel (Local Heritage Place). Federation dwellings, bungalows. Hipped, gable and louvre roofs. Some verandahs continuous with main roof. Some separate bullnose verandahs and return verandah on corner allotments. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.
ChSt19	Building height	Grange Road Single storey with ceiling heights at least 3.5m. Beach Street and Jetty Street Single storey with ceiling heights at least 3m. Grange Esplanade The Esplanade: 3 storeys.

Statement#	Statement	
		Along western frontage to Seaview Road: 2 storeys. To the east of Seaview Road: 2 storeys.
	Materials	Grange Road Red brick, painted render and freestone walls. Corrugated sheeting and terracotta tile roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys. Beach Street Red brick and freestone walls. Corrugated sheeting roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels especially Tudor and Bungalow. Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys Curved enclosed verandah form with flat roof. Jetty Street Red brick and freestone walls Corrugated metal sheeting and terracotta tile roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels especially Tudor and Bungalow. Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys. Grange Esplanade Stone and red brick walls. Corrugated iron and terracotta tiled roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally less ornate painted timber fretwork and posts to verandahs. Brick (sometimes painted) and rendered finish to chimneys.
	Fencing	Grange Road Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. Beach Street Predominantly small masonry retaining walls that border the footpath. Jetty Street Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. Grange Esplanade Variety of fencing styles or remaining unfenced. East of Seaview Road, given the retaining walls in this location, low or no fencing.
	Setting, landscaping, streetscape and public realm features	Grange Road Small, front setbacks relatively consistent. Beach Street Tree lined streets. Large presence of Norfolk Island pines. Vehicle access has been designed and located to preserve existing street trees. Jetty Street Large presence of Norfolk Island pines along Jetty Street. Vehicle access has been designed and located to preserve existing street trees. Grange Esplanade Seaview Road dominated by rendered retaining walls of varying heights between one to two metres. Presence of Norfolk Island pines.

Statement#	Statement	
		Vehicle access has been designed and located to preserve existing street trees.

ChSt20

Hindmarsh Place Historic Area Statement (ChSt20)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1860s - 1930s.
Allotments, subdivision and built form patterns	Uniform small allotments interspersed with larger allotments.
Architectural styles, detailing and built form features	Single storey attached and detached cottages, row dwellings, former fire station, former Christian Chapel, former municipal hall, former brewery, Victorian churches. Steeply pitched gable and hipped roofs facing the street, with various separate verandah form and saw-tooth design (former brewery). Steeple and bell tower. Some parapet walling.
Building height	Typically, single storey with ceiling heights at least 3m. Industrial and former church buildings with substantial ceiling and wall heights.
Materials	Rendered masonry, red brick, bluestone, limestone and sandstone walls. Decorative brickwork detailing to windows and doors. Corrugated galvanised steel roofing. Painted decorative timber posts and fascia elements.
Fencing	Substantial rendered masonry with brick capping, and cast iron infill fences and gates.
Setting, landscaping, streetscape and public realm features	Small setbacks from the street.
Representative Buildings	Identified - refer to SA planning database.

ChSt21

Hindmarsh District Centre Historic Area Statement (ChSt21)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1840s to 1930s.
Allotments, subdivision and built form patterns	Narrow fronted with deep allotments facing Port Road. Wider allotments to Manton and Milner Street.
Architectural styles, detailing and built form features	Narrow fronted two-storey built form interspersed with some narrow fronted single storey of intimate scale. Generous verandahs over footpaths, balconies and parapets with some decorative elements including pediments. Some detached single and two storey residential buildings to Orsmond Street. Occasional upper level balconies. Vertically proportioned elements with high solid to void ratio, particularly at upper levels. Substantial church buildings. Decorative parapets to street frontages and returns. Steeply pitched hipped roofs visible behind parapets, with separate, wide verandahs across frontage. Some gable forms including simple cottage form to Milner Street.
Building height	Single and two-storey built form with ceiling heights that vary from 3m through to substantial church buildings.
Materials	Limestone, bluestone, sandstone, face red brick walls and rendered walls.

Statement#	Statement	
		Use of brick and rendered quoins. Corrugated galvanised steel roofing. Decorative cast iron posts and balustrades. Painted timber posts and fascia elements.
	Fencing	Built form typically to the street with verandahs over public realm. Some rendered masonry fencing with cast iron infill.
	Setting, landscaping, streetscape and public realm features	Historic heart of the Hindmarsh Village and the principal area for a range of retail, business, ecclesiastic and office uses.
	Representative Buildings	Identified - refer to SA planning database.
ChSt22	**Henley Square Historic Area Statement (ChSt22)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s to 1920s.
	Allotments, subdivision and built form patterns	Traditional patterns of development incorporating verandahs, balconies and parapets clustered around Henley Square.
	Architectural styles, detailing and built form features	Substantial two-storey buildings with wide balconies and verandahs, some over footpaths. Traditional single storey buildings with verandahs over footpaths. Modern development including large expansive verandahs on the square. Decorative parapets to the street and Henley Square facades. Steeply pitched hipped and gable roof forms, with attached balconies and verandahs across frontage. Skillion and curved (bull nose) verandah roof forms.
	Building height	Single and double storey buildings with ceiling heights at least 4.5m per floor giving an imposing character.
	Materials	Bluestone, sandstone, red brick walls and rendered walls. Some corrugated iron walling. Use of brick and rendered quoins, brick banding and other traditional decoration. Imposing masonry pediments and gables with brick banding. Corrugated steel roofing. Decorative cast iron and painted timber verandahs and balconies.
	Fencing	Some low masonry walling. Typically, open shop fronts with verandahs over public realm.
	Setting, landscaping, streetscape and public realm features	Historic heart of Henley Beach and the principal area for a range of retail, business and entertainment uses.
	Representative Buildings	Identified - refer to SA planning database.
	Eighth Street, Bowden Historic Area Statement (ChSt23) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860s - 1890s.

Statement#	Statement	
ChSt23	Allotments, subdivision and built form patterns	Intimate scaled narrow fronted and regular rectangular allotment containing three pairs of semi-detached dwellings and one detached dwelling.
	Architectural styles, detailing and built form features	Single storey semi-detached dwellings and detached dwelling. Gable facing the street defining each semi-detached dwelling. Steeply pitched gable roofs facing the street. Skillion verandah roof forms or variable pitch.
	Building height	Single storey with ceiling heights around 3m. High solid to void ratio and vertically proportioned openings.
	Materials	Rendered masonry walls with attached front verandahs. Brick capping to parapets with some decoration. Corrugated steel roofing.
	Fencing	Traditional and some non-original low rendered masonry and timber picket fencing with occasional tubular-steel.
	Setting, landscaping, streetscape and public realm features	Small front wall setbacks with verandah forward of front wall.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting Clare and Gilbert Valleys

CGV1

Auburn Historic Area Statement (CGV1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Town centre as the original village of Auburn. Buildings constructed in the 19th century.
Allotments, subdivision and built form patterns	Original land division pattern, street layout and setback patterns.
Architectural styles, detailing and built form features	Verandahs.
Building height	1-2 storeys, with 2 storey buildings generally for retail and civic uses.
Materials	[Not stated]
Fencing	Front fences and gates of timber pickets, pier and plinth masonry, wrought iron, brush or masonry not exceeding 1.2m.
Setting, landscaping, streetscape and public realm features	Wide streets and established trees contribute to a village setting.
Representative Buildings	Identified – refer to SA planning database.

Historic Areas affecting Coorong

Raukkan Historic Area Statement (CooD1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	A significant meeting place for the Ngarrindjeri people. Community buildings (including the Raukkan Church, community hall and school) are of particular value.

Statement#	Statement	
COOD1	Allotments, subdivision and built form patterns	Allotments of 700 to 800m^2.
	Building height	Single storey.
	Materials	Stone and corrugated iron roofing.
	Setting, landscaping, streetscape and public realm features	Settlement arranged around the green open space defined by Lealinyeri, Seymour and Taplin streets. Wide streets, large grassed verges and buildings constructed to street frontages.
	Representative Buildings	[Not identified]
Historic Areas affecting Copper Coast		
COCO1	**Moonta Mines Buffer Historic Area Statement (CoCo1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	19th century historic main street with a mix of civic, commercial and retail activities.
	Allotments, subdivision and built form patterns	Traditional grid.
	Architectural styles, detailing and built form features	Two-storey stone buildings exhibiting refined detailing, ornate roof elements and a high-level of craftsmanship are of particular value. Extensive glazing and double-hung doors and windows in street facing frontages of non-residential buildings. Windows emphasised by framing. Symmetrical fronted and vertically proportioned dwellings. Hipped roof forms with pitches between 30-45 degrees. Sloping verandahs overhang footpaths to the street and are connected to shops.
	Building height	Predominantly single storey where residential or retail. Two storeys associated with grand, civic or commercial activities (town hall, hotels).
	Materials	Local stone, masonry, corrugated iron roofing, stone and timber-framed windows and doors, timber verandah posts and brick chimneys.
	Fencing	Timber and stone fences not exceeding 1.2m.
	Setting, landscaping, streetscape and public realm features	Wide streets, a prominent central public square framed by significant public buildings and limited landscaping. Buildings square to and on street alignments. Minimal breaks between buildings except where access to the rear of a site is provided. Dwellings are consistently set back further from the street.

Historic Areas affecting Town of Gawler

Ga1

Gawler East Historic Area Statement (Ga1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1850-1940; residential and local scale retail.
Allotments, subdivision and built form patterns	The Area is divided into two sections by Lyndoch Road. Large allotments with large dwellings and gardens exist along High Street and Duffield Street. Smaller allotments exist along Lyndoch Road. Traditional grid north of Lyndoch Road. Allotments typically are of consistent width and depth, rectangular in shape orthogonal to the street layout apart from some dwellings facing Lyndoch Road on the north side, which have an angled front boundary. The pattern of streets stem from orthogonal junctions with Lyndoch Road and rising ground.
Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century Villas/Mansions. Nineteenth century double fronted symmetrical cottages; parapet end gables a feature. Bungalows with some Inter War. Roof pitches in the order of 27 degrees and 35 degrees. Stone walls and stone outbuildings. Steeply pitched hipped and simple gable roofs of small and large scale. Large roofs typically gambrel in form with additional central gables and villa style projecting gable. Smaller early roof forms with ridge parallel to the street. Separate, generous verandahs to the street of bullnose, straight and concave form. Some return verandahs and some central entrance gable. Some verandahs continuous with main roof. Shallower pitched bungalow roof forms with simple generous roof planes and overhangs. Wide bungalow style verandahs with masonry supports and low plinth walls.
Materials	Sandstone/Limestone with red brick quoins. Ornate render. Corrugated profile roofing. Vertically proportioned painted timber window frames and doors. Painted timber cover battens. Decorative brick, stone or rendered chimneys. Cast iron decoration and painted timber detailing to verandahs.
Building height	Single storey forms generally influenced by site topography. Buildings on low side of streets appear as single storey with double level to rear, particularly in north west of area. Buildings on high side of street appear as double storey or elevated single storey with verandahs occurring on high plinth and central access steps.
Fencing	Low open style fencing which includes masonry pier and plinth fence with decorative open infill. Low masonry walls up to 1.2 metres. Timber picket fences. Hedges. Stone walls on front boundaries are important features.
Setting, landscaping, streetscape and public realm features	Important entrance to Gawler from east with significant north to south connecting streets such as Duffield and East. Unique angled street layout north of Lyndoch Road with Edith and Blanch Street connected by Short Street. North western edge defined by Railway Line. A portion of the west side faces Pioneer Park; some small scale mixed use to Union Street. North to south streets generally run with contours of land with high and low side. Generous front and side setbacks. Landscaped setting derived from generous gardens with substantial trees and wide tree-lined streets. Surfaces consistent with the footpaths and streets. Views to and from the area.
Representative Buildings	Identified - refer to SA planning database.

Gawler South Historic Area Statement (Ga2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1860 to 1950 including bungalows and Austerity.
Allotments, subdivision and built form patterns	Generous allotments typically on flat land with some variations in topography towards Dead Man's Pass and river. Grid pattern intersected by Twelfth Street that shifts direction at Adelaide Road. Oblique street intersections and prominent irregular corner allotments as follows: Unique and variable Street pattern defined by Railway line, Adelaide Road, Racecourse, Gawler River and Town Centre. Eighteenth to twenty second street run east to west. First, Second and Fourth Streets run parallel with the northern Adelaide Road and join with Adelaide Road at an angle. Fifth, Seventh, Third and

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td rowspan="8">Ga2</td><td></td><td>Sixth Streets connect to each side of Adelaide Road. Thirteenth, Fourteenth and Fifteenth Street and Eighth Streets angled to River. Smaller allotments to Ninth and Tenth Streets. Gawler Terrace defined by Dead Man's Pass.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Detached double-fronted villas. Semi-detached and row cottages. Some Federation and Bungalow style dwellings. Some Inter War and Austerity. Verandahs and parapets. Substantial stone or masonry villas surrounded by generous gardens and landscaping.

Traditional railway structures associated with the Gawler Railway Station including workshops, stores and industrial buildings and small.

Roof pitches in the order of 27 degrees and 35 degrees. 'M' Roof form and gambrel roof found in 13th and 14th street vicinity. Gambrel roof forms to villas. Simple, small span cottage style roofs generally evident. Parapets to cottages.

Separate verandahs including but not limited to generous sweeping concave style. Some verandahs continuous with main roof.</td></tr>
<tr><td>Building Height</td><td>Single storey with some elevated housing in Eighth Street and Gawler Terrace, featuring substantial setbacks and elevated verandahs. Wall heights in the order of 3.6 metres above floor level.</td></tr>
<tr><td>Materials</td><td>Stone and limestone walling with red brick quoins. Some bluestone. Corrugated iron roof sheeting to verandahs and roofs. Red brick or render chimneys. Ornate brick detailing to gables and gable vents. Cast iron lacework to verandahs; typically simple timber details. Painted timber window frames, doors, roof trim and modest decorative treatments such as finials.</td></tr>
<tr><td>Fencing</td><td>Low masonry walling. Low open style fencing which includes masonry pier and plinth fence with decorative open sections of up to 1.2 metres in total height. Painted timber picket fencing. Some woven wire fencing with painted timber posts.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Detached dwellings on generous wide and deep allotments. Generous front and side setbacks. Some early cottages with very substantial setbacks. The strong visual axis to the Railway Station buildings provided by Nineteenth Street. Boulevard style and character of Nineteenth Street derived from buildings positioned close to and square to the road frontage and designed to directly address the street. Corner sites where the grid is interrupted accommodating prominent buildings whose built form and side elevations are of equal importance to the façade. Established gardens with substantial front and side setbacks. Wide tree lined streets particularly Eighteenth Street, which incorporates gravel verges and remnant bluestone/slate kerbing to define bitumen. Night Cart lanes alignment and widths.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>
<tr><td></td><td></td><td></td></tr>
<tr><td rowspan="9">Ga3</td><td colspan="2">Light Historic Area Statement (Ga3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</td></tr>
<tr><td>Eras, themes and context</td><td>Residential, commercial, public and ecclesiastical buildings developed predominantly between 1850 to 1940, with some later Federation and Bungalows (Jerningham Street).</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Allotments, streets, squares and other elements which comprise the original 1839 grid layout of Light, Finniss and Co. Large allotments of original plan, with some limited subdivision generally on the perimeter of the State Heritage Area.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Simple symmetrical double fronted cottages and villas surrounding the Church Hill State Heritage Area. Early small cottages and more substantial dwellings that retain simple symmetrical features, with vertically proportioned window openings and doors. Some parapet walling to early cottages.

Roof pitches in the order of 27 degrees to 35 degrees. Variety of roof forms including simple small span gable and hipped to early cottages; 'M' roof forms; villa with typical projecting gable; larger span and higher Gambrel roof.

Separate verandah forms with bullnose, straight pitch and concave verandahs of generous width. Some verandahs continuous with main roof.</td></tr>
<tr><td>Building Height</td><td>Single storey facing street with double storey to rear due to escarpment.

External wall heights to frontage and sides in the order of 3.6 metres.</td></tr>
<tr><td>Materials</td><td>Bluestone, sandstone and limestone external walling with typically red brick trim and features including quoins and plinth. Some external front and side walling entirely in red brick. Corrugated iron roofing generally with roof tiling rarely found on older buildings and only on more recent buildings. Prominent chimneys in brick, stone or render finish. Some elaborate brick detailing to gable vents and parapets.</td></tr>
<tr><td>Fencing</td><td>Low masonry front walls. Significant stone retaining walls to edge of Church Hill escarpment. Low open style fencing which includes masonry pier and plinth fence with decorative open sections, painted timber picket and woven wire. Stone walls and retaining walls are important features.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Subdivision retains planning undertaken by Light, Finniss and Co in 1839. Low lying areas that rise from surrounding rivers to Church Hill State Heritage Area. King Street is located on a ridge so dwellings on both sides appear as single story to the street with double storey to rear. Wide streets with slate kerbs and substantial trees. Gardens in scale with the buildings and large allotments. Front setbacks to streets such as King, Queen, Howard and Cameron Streets outside of Church Hill State Heritage Area have lesser front setbacks and generous side setbacks; notable exception is Jerningham Street that exhibits generous setbacks.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>
<tr><td></td><td colspan="2"></td></tr>

<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>Ga4</td><td>
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1848 to 1940. Early Victorian through to Bungalow style. Intimate frontage commercial and retail with early to more recent residential in prominent locations. Substantial rear stone outbuildings and stone walling sometimes sharing a central dividing wall. Changing land use from early residential buildings to commercial uses, with minimal alteration to remnant residential character. Some prominent dwellings that retain a substantial land holding and visual prominence in the overall historic streetscape and main street appearance.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Variable allotment sizes in a main street setting ranging from long and relatively narrow through to large. Area includes the important forked junction of Main North Road and Redbanks Road and the angled allotments that result from the road pattern. Rising ground from the Willaston Bridge northwards. The topography and physical limits of river, bridge and major road junction to the north retain the Willaston Township as a distinct and identifiable size.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Several wide shop and row shop frontages with front verandahs over footpath. Small scale shops with parapet walling above shopfront and separate verandahs, either over footpath or close to street frontage. Large dwellings with small to generous setbacks from street frontage, with separate concave, simple monopitch and bull nose verandahs. Early symmetrical cottages, generally elevated from the street frontage with minimal to generous setbacks, parapet end walls and small span simple gable roof forms with parapet ends. Traditional stone outbuildings and remnant walling at the rear or side of sites. Variety of roof forms ranging from simple small span gable through to longer span hipped gambrel and ‘M’ Roofs with some villa styles. Separate verandah forms with bull nose, simple pitch and concave.</td></tr>
<tr><td>Building height</td><td>Single storey typically apart from the Willaston Hotel. Wall heights generally up to 3.5 to 4m on elevated sites.</td></tr>
<tr><td>Materials</td><td>Stone external walls with brick quoins and some ornate render detail. Painted timber supports to verandahs with modest decorated timber treatments. Stone, brick and render chimneys.</td></tr>
<tr><td>Fencing</td><td>Low to medium height masonry walling some of which are retaining walls. Some open timber picket or rural style fencing.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Definition of the main street achieved through stone walling to front boundaries, verandahs close to and over front boundaries, and shop fronts. Buildings and allotments typically orthogonal to main street. Strong sense of arrival in defined separate village from Gawler achieved through rising land, road junctions, river and bridge.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>

<tr><td rowspan="3"></td><td colspan="2">Town Centre Light Historic Area Statement (Ga8)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</td></tr>
<tr><td>Eras, themes and context</td><td>Planning undertaken by Light, Finniss and Co in 1839. Historic civic and commercial heart of Gawler.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Long relatively narrow allotments that span between Murray Street and High Street to the east and Julian Terrace to the west (south of Walker Place). Intersection with streets, squares and other elements which comprise the original 1839 grid layout of Light, Finniss and Co. Linear form that is positioned on a strong north/south axis with rising ground from south to the north. Area defined by the angled Adelaide Road entrance and junction with Murray Street, Gawler Mill and bridge on the south and angled road junctions with Lyndoch Road and Cowan Street to the north, the eastern</td></tr>
</table>

Statement#		Statement
		escarpment and the river (Julian Terrace and avenue of Moreton Bay Figs). Area includes Gawler Central Railway Station precinct on the north side and Murray Street south of Bridge Street towards Dead Man's Pass. Pioneer Park and McKinlay's Monument mark the Cowan Street junction.
Ga8	Architectural styles, detailing and built form features	Substantial and ornate single and double storey buildings that demonstrate the importance of Gawler in the development of South Australia including civic and bank buildings, former church, hotels, former industrial buildings, terraces of shops, ground floor shop fronts and residential use above. Buildings constructed to the Murray Street frontage, some with generous verandahs and/or balconies to first floor over the footpath. Mostly narrow shopfronts contrasted by Essex House that demonstrates a rare consolidated wider shopfront to a single storey parapeted shop front. Hipped and gable roof forms, some with gambrel typically set behind parapet with some exceptions which feature eaves with ornate corbel supports. Ridges generally run perpendicular to main street with some exceptions.
	Building Height	Two storey up to 8-10 metres.
	Materials	External walls of bluestone, sandstone or render with brick or rendered parapets. Painted timber or cast iron verandah supports. Painted timber shopfronts and window frames. Brick and render or stone chimneys. Corrugated iron roofing and some terracotta tile.
	Fencing	Some low front walling to former Baptist Church. Masonry walls with cast iron to bank buildings and Rudall and Rudall. Cast iron to ANZ bank building.
	Setting, landscaping, streetscape and public realm features	Buildings generally constructed to street frontage with verandahs over footpath. Some exceptions include former Baptist Church and bank buildings set behind front walling. The topography and natural features of the locality including the rising ground at Church Hill and Gawler East (which flank either side of the Town Centre) and the form of the North and South Para Rivers and their confluence. The public squares around the churches and the terraces and parklands bordering the rivers. Views of the Gawler East escarpment from Bridge Street South.
	Representative Buildings	Identified - refer to SA planning database.
Ga9	**Willaston Historic Area Statement (Ga9)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1848 to 1900. Residential with some former ecclesiastical use and form.
	Allotments, subdivision and built form patterns	Generous allotments typically orthogonal to the street with distinctive variation due to the number of angled intersecting streets. Recent residential infill development.
	Architectural styles, detailing and built form features	Detached villas and double fronted cottages with rare semi-detached. Roof pitches in the order of 27 degrees to 35 degrees. Simple gable roof with parapet ends to semi-detached; 'M' Roof and hipped roof with gambrel.
	Building Height	Single storey with wall heights in the order of 3 to 3.6 metres.
	Fencing	Low open style painted timber picket and wire fencing. Stone walls to lower land.
	Materials	Typically sandstone, limestone with brick trim and modest decoration. Painted timber window frames and doors verandah posts and roof trim. Brick, render or stone chimneys.
	Setting, landscaping, streetscape and public realm features	Landscaped setting derived from wide streets at a variety of angled intersections, substantial trees and expansive allotments. Slate kerbs.
	Representative Buildings	Identified - refer to SA planning database.
Historic Areas affecting City of Holdfast Bay		
	Glenelg Village Historic Area Statement (HoB1) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s-1860s. 1870s - 1900s. 1910s - 1930s. Subdivision in 1839. Growth period in 1920s associated with increase in holidaymaking and leisure pursuits.

Statement#	Statement	
HoB1		
	Allotments, subdivision and built form patterns	Orderly street layout, centred around the St Peters Anglican Church in Torrens Square. Grid pattern of large allotments. Subject to further land division over time but legibility of original pattern remains. Consistent small front setbacks. Small side setbacks.
	Architectural styles, detailing and built form features	Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Inter-War buildings, mostly Bungalows. Low scale to medium, relatively small dimensions and basic building details. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Predominantly single storey but some two storey.
	Materials	Consistent with the materials used in the 1840s to 1930s period. Bluestone, sandstone, walls (unpainted). Some brick. Brick or rendered quoin work and plinths. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.
	Setting, landscaping, streetscape and public realm features	Well established streetscape character, with clearly defined setbacks and uniform front landscaping. Substantial Norfolk Island Pines along Augusta Street and Fig trees at Torrens Square. Vistas toward St Peters Anglican Church from Augusta and Nile Streets.
	Representative Buildings	Identified - refer to SA planning database.
	Maturin Road Historic Area Statement (HoB2) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	

Statement#	Statement	
HoB2	Eras, themes and context	1920s or 30s.
	Allotments, subdivision and built form patterns	Original subdivision of The Olives and Bromley. Allotments on southwest end were subdivided in 1886 and 1912. Mixed allotment sizes with large frontages. Substantial building setbacks. Large front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Typical 1890s to early 20th Century dwellings. Victorian dwellings. Inter-War dwelling styles including Bungalow, Tudor, Art Deco and Mediterranean. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade.
	Building height	Single storey and two storey (some in-roof or partly in-roof).
	Materials	Consistent with the materials used in the 1880s to 1930s period. Sandstone, red brick, rendered facades. Corrugated iron and terracotta tiled roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.
	Setting, landscaping, streetscape and public realm features	Narrow street. Well-established garden settings. Lack of street planting due to the narrow width of Maturin Road. The Olives is a significant State Heritage Place on Olive Street.
	Representative Buildings	Identified - refer to SA planning database.

Da Costa Park Historic Area Statement (HoB3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1923 subdivision. 1920s - 1930s dwellings.

Statement#	Statement	
HoB3	Allotments, subdivision and built form patterns	Subdivision is indicative of 1920s town planning with angled, diagonal streets centred radially around a central park or reserve. Garden city theory in practice. The pattern of the subdivision and the arrangement and size of individual allotments remains largely unaltered. Large allotments with large frontages. Consistent, large front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Inter-War style dwellings including Tudor Revival, Californian bungalow, Art Deco, and some Spanish mission. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees. Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade.
	Building height	Single storey.
	Materials	Consistent with the materials used in the 1920s to 1930s period. Terracotta tiled and corrugated iron roofing. Brick, sandstone, and stucco and part-rendered finishes. Roofing, facades and fenestration in natural red brick and terracotta colouration. Timber joinery including fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Woven wire. Low masonry with geometric steel. Low masonry (stepped). Low masonry fencing (often stepped). Low Rock face sandstone. Hedging.
	Setting, landscaping, streetscape and public realm features	Centred around Da Costa Park, with its triangular landscaped area and mature trees. Relatively wide streets.
	Representative Buildings	Identified - refer to SA planning database.

New Glenelg Historic Area Statement (HoB4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Subdivided in 1850. Buildings 1860s - 1900s and 1920s - 1930s. Most intense development occurred in 1870s and 1880s.

Statement#	Statement	
HoB4		Further development in 1920s - 1930s (Interwar period).
	Allotments, subdivision and built form patterns	Varying allotment sizes and street width. Larger allotment sizes in some areas to the west along Broadway, Robert Street and South Esplanade. Smaller allotment sizes are predominant throughout the Bath Street area, and between Hastings and Moseley Streets. Uniform, large allotment sizes and large frontages along Penzance and Partridge Streets. Front setbacks vary from street to street across the area. Front setbacks are however consistent along individual streetscapes. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	All domestic architectural types from the 1870s to 1880s, from the largest of seaside mansions (e.g. South Esplanade) to the humblest of workers cottages (e.g. John Street). Late Victorian to early 20th Century Period architecture. Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Inter-War buildings, mostly Bungalows. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Predominantly single storey.
	Materials	Consistent with the materials used in the 1840s to 1920s period. Sandstone, bluestone and brick. Corrugated iron and tiled roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.
	Setting, landscaping, streetscape and public realm features	Norfolk Island pines throughout. Mature oak street trees along Moseley Street. Vistas over the ocean to the west of the Historic Area.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting Kangaroo Island

Penneshaw Historic Area Statement (KI1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Coastal village.

Historic Areas affecting Light Regional Council

Lig1

Daveyston Historic Area Statement (Lig1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Early development C1850's in support of mining and trade and later development (C1870's) in support of agricultural pursuits.
Allotments, subdivision and built form patterns	Large allotments characteristic of their rural setting and focused along the Old Sturt Highway.
Architectural styles, detailing and built form features	A mix of both large and smaller homes of typical construction representing a range of periods.
Building height	Single storey built scale to the streetscape.
Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape.
Fencing	Low, open fencing reflective of the architectural style of the subject building.
Setting, landscaping, streetscape and public realm features	Rural setting with the presence of large mature trees and minimal front boundary setback commensurate to the undulating nature of the township.
Representative Buildings	Identified - refer to SA planning database.

Lig2

Freeling Historic Area Statement (Lig2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Mixed era and style of development comprising early buildings dating from 1880's - 1920's aligned with early farming settlement and the townships reliance on the railway and later grand villas (C1910).
Allotments, subdivision and built form patterns	Conventional land division pattern with a mix of allotment sizes.
Architectural styles, detailing and built form features	A mix of building types including stately and modest villas, single and double fronted cottages, interwar bungalows, galvanised iron homes, and symmetrical cottages representing a range of periods. Numerous prominent church buildings used for a range of worship and residential purposes.
Building height	Single storey built scale to the streetscape.
Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape.
Fencing	Low, open fencing reflective of the architectural style of the subject building.

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	Wide streets and expansive allotments, generous siting characteristics and substantial gardens and trees. Areas of narrow streets and laneways and compact allotment layout.
	Representative Buildings	Identified - refer to SA planning database.
Lig3	**Greenock Historic Area Statement (Lig3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Early development dating from C1847 onwards and predominance of masonry residential structures.
	Allotments, subdivision and built form patterns	Mixed allotment sizes with a dominance of deep allotments.
	Architectural styles, detailing and built form features	A mix of building types with a predominance of stone residential structures however presence of other types including corrugated iron.
	Building height	Single storey built scale to the streetscape.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape.
	Fencing	Low, open fencing reflective of the architectural style of the subject building.
	Setting, landscaping, streetscape and public realm features	Areas of wide streets and narrow laneways adding to the village feel and focused around the Greenock Creek.
	Representative Buildings	Identified - refer to SA planning database.
Lig4	**Kapunda Historic Area Statement (Lig4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Mixed style commensurate to the formation of Kapunda from the 1840's onwards and reflective of the era of influence. Dominance of the Main Street and strong architectural elements.
	Allotments, subdivision and built form patterns	Conventional grid land division pattern with a mix of allotment sizes. Within the Main Street/town centre, consistent setbacks and strong building line with little interruption.
	Architectural styles, detailing and built form features	<u>Main Street</u> Distinctive built form with two storey dominance. Strong presence of civic buildings on or within proximity of Main Street (Hill Street). Strong front boundary building line. Verandahs and parapet walls. <u>Residential</u> Stately houses with gardens or open space surrounding the buildings to the eastern end of High Street and South Terrace. Small modest cottages in proximity of the Historic Mine Site. Relatively high-density row cottages in the oldest part of Kapunda (e.g. Mildred Street and Tod Street). Other stately civic buildings in the form of the Kapunda Primary School and Kapunda High School.
	Building height	<u>Main Street</u> Two storey built scale commensurate of the streetscape. <u>Residential</u> Single storey built scale to the streetscape.

Statement#	Statement
	Materials: Consistent with the materials associated with the architectural styles of the subject building and streetscape. Fencing: Low, open fencing reflective of the architectural style of the subject building. Setting, landscaping, streetscape and public realm features: Areas of wide streets and expansive allotments and substantial gardens and trees. Areas of narrow streets and compact allotment layout. Representative Buildings: Identified - refer to SA planning database.
Lig5	**Wasleys Historic Area Statement (Lig5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: 1870's to 1880's dwellings with later development dating from the 1920's and 1930's and the dominance of the railway. Allotments, subdivision and built form patterns: Large conventional land division pattern with a mix of allotment sizes. Architectural styles, detailing and built form features: A mix of building types including small villas and cottages representing a range of periods. Building height: Single storey built scale to the streetscape. Materials: Consistent with the materials associated with the architectural styles of the subject building and streetscape. Fencing: Low, open fencing reflective of the architectural style of the subject building. Setting, landscaping, streetscape and public realm features: Areas of wide streets and expansive allotments with established street trees. Representative Buildings: Identified - refer to SA planning database.
Historic Areas affecting City of Marion	
Mar1	**Worthing Mine Historic Area Statement (Mar1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: 1850/51. Structures and workings associated with Worthing Mine site. Allotments, subdivision and built form patterns: Sited in the steep valley of the Field River. Architectural styles, detailing and built form features: Mine, Chimney and Pump House/Engine House associated with copper mining (oldest surviving Cornish Engine House in Australia). Building height: *[Not stated]* Materials: Random rubble with timber lintels. Fencing: *[Not stated]* Setting, landscaping, streetscape and public realm features: Sited in the steep valley of the Field River amongst undulating grassland.

Statement#	Statement	
	streetscape and public realm features	Recent housing development is located to the north, west and east of the site (200m plus in distance). Views to the Worthing Mine are available from parts of the adjacent residential areas.
	Representative Buildings	*[Not identified]*

Historic Areas affecting City of Mitcham

Residential (Central Plains) Historic Area Statement (Mit1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Mit1		
	Eras, themes and context	Early 20th century dwellings.
	Allotments, subdivision and built form patterns	Substantial rectangular blocks. Substantial consistently wide and deep rectangular blocks that retains the historic pattern of land division. Consistent generous spacing between dwellings.
	Architectural styles, detailing and built form features	Predominance of Queen Anne style villas and bungalow style dwellings. A number of early villas. Steeply pitched hipped and gable roof forms including smaller scale corner gable to return verandah villas. Separate typically bull nose verandah with some a continuation of the main roof form. Return verandahs particularly at corner allotments. Bungalows with slightly shallower roof pitch, simple generous roof plane facing the street with main ridge typically parallel to street. Wide Bungalow verandahs with tapered or upright masonry support piers and low infill walling. Timber framed and iron clad awnings to windows. Tudor roof forms generally steeper with two main projecting gables and smaller gable porch over main entrance.
	Building height	Predominately single storey with external wall height of 3-3.5 metres. Second storey development located within the roof space or to rear of dwellings.
	Materials	Original materials, finishes and profiles of building elements. External walls of sandstone, rendered masonry, face brick Decorative wall treatments such as rendered, or brick quoins and low plinths defined by cant brick set out. Painted timber cover battens to gables and roof trim. Painted decorative timber to verandahs and finials to gables. Verandahs supported on timber posts with some on painted masonry pillars. Roofs of corrugated galvanised iron cladding or terracotta tiles. Original unpainted plaster, brickwork, stonework or other masonry preserved unpainted. Decorated face brick or rendered masonry chimneys. Painted metal gutters to D or OG profile and round painted metal downpipes. Painted timber window frames and doors.
	Fencing	Typically fences reflect the era of the dwelling. Low masonry plinth and post, wrought iron, brush, timber woven with wire, painted timber picket. Height of 1.2m. Rear and side boundary fences located behind the front dwelling alignment 1.8m in height in corrugated profile metal.
	Setting, landscaping, streetscape and public realm features	Regularly planted tree lined verges. Established front gardens. Consistent setback of buildings.
	Representative Buildings	Identified - refer to SA planning database.

Adey Road Historic Area Statement (Mit2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>Mit2</td><td>
These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

<table>
<tr><td>Eras, themes and context</td><td>1879 subdivision with predominance of buildings built between 1881-1920.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Traditional pattern and scale of low density, rectangular allotments associated with the original subdivision for the purpose of detached dwellings.

Variable width to allotments.

East side is orthogonal to Adey Road. West side has angled side boundaries to Adey Road.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Detached dwellings of simple, modest, small scale with symmetrical early stone and brick villas.

Victorian Regency and Edwardian to smaller and later bungalows.

Gambrel roof typically with short ridge parallel to street, with projecting gable.

Simple ‘M’ Roof with ridge parallel to street.

Federation style verandahs continuous with main roof.

Separate verandahs attached to main wall of varying profiles.

Some bungalow influence roof forms and verandahs with masonry support piers and low plinth wall.</td></tr>
<tr><td>Building height</td><td>Predominantly single storey with external wall height of 3 - 3.5 metres.

Second storey development located within the roof space or to rear of dwellings behind ridgeline of roof. Second storey windows with total length less than 30 percent of total roof length along each elevation.</td></tr>
<tr><td>Materials</td><td>Original materials, finishes and profiles of building elements.

External walls incorporating sandstone, red brick, render.

Roof in corrugated metal cladding.

Render with some ornate detail to window surrounds.

Simple painted timber detail and roof trim.

Painted timber window frames and doors.

Simple and modestly detailed timber posts to verandah.

Red brick or render chimneys, some tapered in height with some ornate detailing.

Some ornate painted timber barge boards and finials.

Most original unpainted plaster, brickwork, stonework or other masonry is preserved unpainted.</td></tr>
<tr><td>Fencing</td><td>Low and/or open fencing, typically in the form of hedges, woven wire, timber picket or low stone walls reflecting and the traditional period, style and form of the associated building.

Generally, no more than 1.2m in height.

Rear and side boundary fences located behind the front dwelling alignment no more than 1.8 metres in height.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Minimal driveway widths with established front gardens dominant, including mature vegetation.

Sense of space between buildings.

Sloping land with minimal alteration to the land form.

Bowling Club provides focal point and sense of Place.

Traditional dwelling pattern located parallel to front boundaries.</td></tr>
<tr><td>Representative Buildings</td><td>[Not identified]</td></tr>
</table>

Belair Village Historic Area Statement (Mit3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

<table>
<tr><td>Eras, themes and context</td><td>1880-1900 (built form) original township of Belair developed around the railway. Village / residential character with an evident railway theme and rural character and the development of an old township.</td></tr>
<tr><td>Allotments, subdivision and built</td><td>Historic land division pattern, demonstrating a diverse array of allotments of varying sizes and shapes resulting from the change to rural character brought about through the introduction of the railway.</td></tr>
</table>
</td></tr>
</table>

Statement#	Statement	
Mit3	form patterns	A diverse mix of residential, education and commercial buildings with a cohesive style and generous setting.
	Architectural styles, detailing and built form features	Mix of development including, churches, school, local shop, and concrete water tower. Clusters of substantial villas (4-6 rooms) with return verandahs to both sides of Sheoak Road. Long linear buildings constructed along the Sheoak Road ridge and generally oriented facing Sheoak Road, resulting in a variable but cohesive pattern of buildings. Traditional steeply pitched hipped and gabled roof forms and some projecting gables, typical of the Victorian era. Ridges tend to be parallel to the street. Separate verandahs of bullnose, straight monopitch or concave profile supported on painted timber posts.
	Building height	Predominantly single storey with generally substantial external wall height up to 3.5 metres.
	Materials	Original or otherwise complementary materials, colours and finishes, including stone, rendered masonry, face brick, corrugated iron and timber board. Original verandah detailing including paving, posts and decoration. External walls of sandstone or limestone. Red brick quoins. Corrugated sheet roofing in painted or galvanised finish. Vertically proportioned painted timber window and door frames. Decorative brick and rendered chimneys.
	Fencing	Open rural style fencing using timber posts with draw wire. Hedges define property boundaries. Front fences and gates that reflect the traditional period, style and form of the associated building. Open rural style Front fences and gates that are a maximum of 1.2 metres in height to a maximum of 1.5 metres if wrought iron, brush, timber and/or wire or woven mesh style.
	Setting, landscaping, streetscape and public realm features	Village character with an evident railway theme and historic Residential character. Historic views of open railway side in a treed setting. The Village area retains much of its original character and integrity, with a railway theme evident in various places of state heritage, local heritage and other buildings of historic character. There are many prominent intact historic buildings and features within it and the streetscapes, townscapes and landscapes created by these historic features. Central bitumen roadway with gravel verge and no kerb or guttering Street trees to Sheoak Road. Gravel driveway entrances to properties.
	Representative Buildings	Identified - refer to SA planning database.

Mitcham Village Historic Area Statement (Mit4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Village Setting - 1840. Core precinct of the village is readily identifiable and exhibits many of the original aspects of its early beginnings, including a range of single and cottage houses, commercial buildings, post office, bakery, shops, hotel and other public buildings. Historic buildings and features that contribute to the historic character including State and Local Heritage Places and other buildings displaying historic architectural features.
Allotments, subdivision and built form patterns	The village was laid out on the lines of an English village and contained traditional elements such as a village green and high street. Further subdivision has occurred since the date, however the majority of the original land division is intact.
Architectural styles, detailing and built form features	Single, semi-detached, row and cottage houses, commercial buildings, post office, bakery, shops, hotel and other public buildings. Intimate small scale and finely grained buildings. Hotel and Institute with tall gabled ornate rendered parapets. Modestly detailed parapet walling above verandahs to shopfronts and shops attached to dwellings, mostly over pavements.

Statement#	Statement	
Mit4	Building height	Single storey with 3 to 3.5 metres ceiling height.
	Materials	Consistent with the architectural era of the building. Original unpainted brickwork or stonework. Bluestone walling. Corrugated profile roofing. Painted timber window frames and doors. Modest detailing to verandah posts and roof trim. Brick, stone and rendered masonry chimneys.
	Fencing	Front fences and gates reflecting the traditional period, style and form of the associated building. Generally timber picket, brush or wire Fence height typically no more than 1.2m. Rear and side boundary fences located behind the front dwelling alignment no more than 1.8 metres in height with corrugated profile cladding.
	Setting, landscaping, streetscape and public realm features	Traditional village setting with village green reflecting a mix of uses. Unbuilt land adjoining Brownhill Creek of Aboriginal heritage significance. Regular pattern of street trees. Varied historic townscape views due to plan of village and open space. Consistent building setbacks for dwellings. Shops attached to dwellings, commercial and institutional buildings constructed to the front boundary.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting Mount Barker District Council

MtB1

Callington Historic Area Statement (MtB1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1849. Small compact historic mining township defined by the Bremer River. Buildings and structures predominantly dating from the 19th Century reflecting mining history.
Allotments, subdivision and built form patterns	Unique often unbuilt grid street layout. Regular and repeated pattern of long narrow allotments arranged to west of Bremer River.
Architectural styles, detailing and built form features	Early stone dwellings and outbuildings, shops, hotels and churches. Compact, intact and rustic collection of small scale, single storeyed, detached and semi-detached buildings and structures dating predominantly from the 19th century. Pioneer building techniques and materials typical of a former mining settlement. Parapet walls to end gables. Symmetrical frontages and separate verandas. Hipped and gable roof forms with ridge typically parallel to the street. Some simple skillion roof forms set behind a parapet. Barrel vaulted roofs. Separate verandahs with concave profile.
Building height	External wall height varies from 3 to 4 metres.
Materials	Stone external walls. Brick quoins. Some rendered walling. Corrugated profile sheet roofing often over original timber shingles. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration.

Statement#	Statement
	Brick, render or stone chimneys.
	Fencing: Low stone walling to front and side boundaries. Hardwood post and wire mesh or cyclone mesh. Some timber picket fencing. Metal posts with metal rails, wire or mesh infill varieties evident within the area.
	Setting, landscaping, streetscape and public realm features: Footpaths and verges unmade Street furniture unadorned. Bridge entrance and rise from river provides sense of place.
	Representative Buildings: Identified - refer to SA planning database.
MtB2	**Dawesley Historic Area Statement (MtB2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
	Eras, themes and context: 1857. Small scale, single storeyed, detached and semi-detached built form of early European settlements. Structures reflecting early local production and value adding industries. Small cottages and outbuildings on large allotments.
	Allotments, subdivision and built form patterns: Long narrow allotments typically orthogonal to the street. Mostly to each side of Donald Street and Hawthorn street. Varying allotment sizes and shapes to the streets that rise from Donald including Bower and Bremer. Variety of setbacks from street frontage.
	Architectural styles, detailing and built form features: Cottages. Some adaptation of early industrial or rural structures to dwellings. Steeply pitched (27 to 35 degrees) small span hipped and gable roofs. Separate verandahs with bullnose, concave or monopitch form. Some verandahs continuous with main roof or adopting change in pitch. Painted timber roof trim, verandah posts.
	Building height: External wall height of 3.3 to 3.8m.
	Materials: Building techniques and materials including external walls of local stone, smelter slag and early manufactured bricks. Corrugated galvanised iron roofing. OG or D painted or galvanised steel gutters.
	Fencing: Unpainted hardwood timber posts with wire or wire mesh infill, low hedges or stone walling.
	Setting, landscaping, streetscape and public realm features: Open landscaped/rural setting character. Unique entrance to Dawesley from Princess Highway coinciding with former post office.
	Representative Buildings: Identified - refer to SA planning database.
	Druids Avenue, Mount Barker Historic Area Statement (MtB3) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
	Eras, themes and: 19th and early 20th Century.

Statement#	Statement	
MtB3	context	Buildings and structures predominantly dating from the 19th Century. Small, compact workers cottages and larger residential buildings.
	Allotments, subdivision and built form patterns	Allotment pattern reflective of the original land division pattern.
	Architectural styles, detailing and built form features	Early stone dwellings. Compact, intact collection of small scale detached and semi-detached buildings dating predominantly from the 19th and 20th century. Symmetrical frontages and separate verandahs. Hipped and gabled roof forms with ridge typically parallel to the street Some parapet walling.
	Building height	Single storey. External wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick or rendered chimneys.
	Fencing	Some timber picket fencing. Hedges. Low stone walling to front boundary. Hardwood post and wire mesh or cyclone mesh.
	Setting, landscaping, streetscape and public realm features	Mature street trees. Street hedging. Some red brick pavers to footpath.
	Representative Buildings	Identified - refer to SA planning database.

Echunga Historic Area Statement (MtB4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1849 - 1940. Commercial buildings including single storey shops, ecclesiastical, civic, former post office and hotel. Some rural structures including outbuildings. Some former shops being converted to dwelling. Single storeyed detached and semi-detached dwellings. Small cottages on large allotments.
Allotments, subdivision and built form patterns	Shopfronts close to footpath. Generous setbacks to north-eastern side of Adelaide Road. Consistent, deep allotments.
Architectural styles, detailing and built form features	Verandahs and porches up to and over footpath. Small scale, single storeyed detached and semi-detached built form of early European settlements. Structures reflecting early local production. Parapets to shop fronts. Symmetrical and asymmetric frontages. Separate verandahs. Hipped and gabled roofs.

MtB4

Statement#	Statement	
		Ridge typically parallel to street for residential dwellings. Parapet ends and gable roof for shops.
	Building height	External wall height of 3 to 4 metres for residential dwellings.
	Materials	Stone external walls. Brick quoins. Corrugated profile roof sheeting. Painted timber window frames and doors. Painted timber verandah posts. Brick, render or stone chimneys. Fibre cement sheeting to parapets (e.g. Echunga Memorial Institute).
	Fencing	Hardwood post and wire mesh or cyclone mesh. Some timber picket fencing. Metal posts with metal rails, wire or mesh infill varieties evident within the area.
	Setting, landscaping, streetscape and public realm features	Wide street. Evenly spaced deciduous street trees to north-eastern side. Verandahs and porches to footpath providing shelter for pedestrians.
	Representative Buildings	Identified - refer to SA planning database.
MtB5	**Exhibition Road, Mount Barker Historic Area Statement (MtB5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From mid-19th and 20th Century. Public open space. Small cottages on large allotments. Small scale, single storeyed, detached built form.
	Allotments, subdivision and built form patterns	Variety of allotment sizes and shapes to Exhibition Road. Aligning setbacks from street frontage. Wellington Road dwellings parallel to side boundary providing angled frontage.
	Architectural styles, detailing and built form features	Small scale, intact, single storeyed, detached built form. Cottages. Stone dwellings. Symmetrical frontages and separate verandahs. Hipped roof forms. Roof ridge typically parallel to the street. Separate verandahs with bullnose, concave or monopitch form. Some verandahs continuous with main roof or adopting change in pitch. Painted timber roof trim, verandah posts.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick quoins. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors.

Statement#	Statement	
		Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Low masonry. Brush. Metal picket fence.
	Setting, landscaping, streetscape and public realm features	Public open space. Open interface between the public space and residential uses. Stands of densely planted eucalypts and mature deciduous trees.
	Representative Buildings	Identified - refer to SA planning database.
MtB6	**Gawler Street Historic Area Statement (MtB6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From mid-19th Century. Main street of Mount Barker Township. Commercial, civic and residential. Religious and community buildings. Earliest European settlement of a township in South Australia. 1940's architecture of Bennett and Fisher.
	Allotments, subdivision and built form patterns	Long narrow allotments typically orthogonal to the street. Varying allotments to Hutchinson Street, McLaren Street and Cameron Road. Minimal setbacks. Gradual transition from commercial to residential on Mann Street.
	Architectural styles, detailing and built form features	Early brick and stone shops, hotels, civic and residential buildings. Single and double storeyed detached and semi-detached buildings and structures dating predominantly to late 19th and 20th century. Symmetrical frontages. Separate verandahs, concave, bullnose and monopitch form. Some verandahs as continuations of main roof forms. Parapet ends to gable end roofs. Parapets to shops fronts. Hipped and gable roof forms. Parapets with hipped, gable or skillion roofs behind. Separate verandahs or as continuation of the main roof.
	Building height	External wall height varies from single to double storey (3-8 metres).
	Materials	Stone external walls. Brick external walls. Rendered external walls. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts. Brick, render or stone chimneys. Large glazing to shops. OG or D painted galvanised steel gutters.
	Fencing	No fencing.
	Setting, landscaping,	Public realm.

Statement#	Statement	
	streetscape and public realm features	Human scale. Pedestrian amenity. Verandahs, awnings and canopies sheltering over footpath. Entrances and windows addressing pedestrian environment. Mature avenue of deciduous street trees. Site topography with Gawler Street having gradual slope to creek; Stephen and Hutchinson Street joining at 90 degree junctions with steep slopes to south side. Adelaide Road, Mount Barker Creek and railway corridor uniquely define area. Street lights and bollards in complementary heritage style.
	Representative Buildings	Identified - refer to SA planning database.
MtB7	**Hack - Mill Streets, Mount Barker Historic Area Statement (MtB7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1850's-early to 1910. Buildings and character that represent residential land uses, and streetscapes of the town's early settlement continuing into the middle of the 20th Century. Small scale, single stored detached built form of early European settlements.
	Allotments, subdivision and built form patterns	Part of the original subdivision of the town. Predominantly consistent setbacks. Varying allotment sizes. Garden settings and generous spaces between buildings.
	Architectural styles, detailing and built form features	Worker's cottages and villas. Early stone cottages and interwar dwellings. Varying size and style. Symmetrical early dwellings. Asymmetrical early and interwar dwellings. Typically gabled, hipped or half gabled roofs (with the exception of one half hipped roof). Verandahs generally as a continuation of the main roof. Some verandahs separate to the main roof. Bullnose, concave and monopitch verandahs.
	Building height	Single storey. External wall height varies from 3 to 4 metres.
	Materials	Dressed stone. Course rubble. Rendered external walls. Brick quoins. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick or rendered chimneys. Corrugated profile sheet roofing.
	Fencing	Timber picket, timber post and rail or no fencing.
	Setting, landscaping, streetscape and public realm features	Footpaths and verges unmade.
	Representative Buildings	Identified - refer to SA planning database.
	Kanmantoo Historic Area Statement (MtB8) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1849. Structures reflecting early local production and value adding industries. Buildings and structures predominantly dating from the 19th century reflecting mining history and early settlement.
	Allotments, subdivision and built form patterns	Diamond grid layout. Small cottages on large allotments.
	Architectural styles,	Early stone dwellings, outbuildings, ecclesiastical, civic and shops.

Statement#		Statement
MtB8	detailing and built form features	Small scale, single storeyed, detached and semi-detached buildings and structures dating predominantly from the 19th century. Parapet walls to shop fronts. Symmetrical frontages. Separate verandahs or verandahs as continuations of the main roof. Pioneer building techniques and materials typical of a former mining settlement. Some adaptation of early industrial or rural structures to dwellings. Hipped and gable roof forms. Parapet ends to shop fronts. Separate verandahs or verandahs as continuations of the main roof. Concave, bullnose or monopitch profile verandahs.
	Building height	Single storey, 3 - 4 metres high.
	Materials	Stone external walls. Some rendered walling. Corrugated profile roof sheeting. Painted timber window frames and doors. Painted timber verandah posts. Brick, render or stone chimneys.
	Fencing	No fencing.
	Setting, landscaping, streetscape and public realm features	Vegetated landscape setting including mature and significant trees. Views provided by significant gum tree and creek to the east, and former Black Dog Inn on Old Princes Highway, create a sense of arrival to the township. Open landscape / rural setting character. Footpaths and verges unmade.
	Representative Buildings	Identified - refer to SA planning database.

Littlehampton Historic Area Statement (MtB9)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	From 1857. Buildings and structures predominantly dating from the 19th century and early 20th century. Major service centre for rural hinterland. Buildings, structures and sites reflecting early local production and service provisions.
Allotments, subdivision and built form patterns	Long narrow allotments typically orthogonal to the street. Varying setbacks from street frontage. Elevated allotments to south side of Princes Highway.
Architectural styles, detailing and built form features	Early stone dwellings, outbuildings, shops, civic buildings and churches. Symmetrical or asymmetrical frontages. Single storeyed, detached built form. Early European settlements. Interwar bungalows. Hipped and gable roof forms. Separate verandahs with concave, bullnose or monopitch form. Verandahs as a continuation of the main roof

Statement#	Statement	
MtB9		Some parapets to shop fronts.
	Building height	Dwelling external wall varies from 3 to 4 metres. Shops, civic and churches wall height varies.
	Materials	Stone external walls. Brick external walls. Some rendered walling. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts. Masonry and masonry half columns to verandahs. Brick, render or stone chimneys.
	Fencing	Hedging to street fronts. Some timber picket fencing. Rendered masonry retaining walls.
	Setting, landscaping, streetscape and public realm features	Mature indigenous and significant trees. Vegetated landscape. Shop verandahs providing amenity to pedestrians.
	Representative Buildings	Identified - refer to SA planning database.
MtB10	**Macclesfield Historic Area Statement (MtB10)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1840's and 19th Century. Buildings, sites and structures represent the town's service provision to the local farming district. 19th century buildings associated with commercial and community services.
	Allotments, subdivision and built form patterns	Laid out around a village green, Davenport Square by the Angas River. Regular and repeated pattern of allotments becoming denser to the northern end of Strathalbyn road.
	Architectural styles, detailing and built form features	Early stone dwellings and outbuildings, shops and hotels. Small scale, single storeyed, detached buildings and structures dating predominantly from the 19th century. Parapet walls to shop fronts. Symmetrical frontages. Separate verandahs of a concave, monopitch or bullnose profile. Verandahs as a continuation of the main roof.
	Building height	Dwelling external wall height 3 - 4 metres.
	Materials	Stone external walls. Brick external walls. Brick quoins. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Timber picket fencing.

Statement#	Statement	
		Low stone wall.
	Setting, landscaping, streetscape and public realm features	Mature street trees. Davenport square and Anglican Church provide sense of place. Views of significant buildings along Venables Street. Wide main street. Shop verandahs provide shelter amenity to pedestrians. Footpath and verge unmade to eastern side of Strathalbyn Road.
	Representative Buildings	Identified - refer to SA planning database.
MtB11	**Meadows Historic Area Statement (MtB11)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Unofficial subdivision in 1856. Official subdivision 1884. Buildings, structures and sites that represent the town's governmental, local production, community and commercial service provision role to the district. Buildings predominantly from the 19th century and early 20th century.
	Allotments, subdivision and built form patterns	Linear subdivision layout orthogonal to the street. Deep allotments.
	Architectural styles, detailing and built form features	Stone dwellings and shops. Brick or stone civic buildings and churches. Small scale, single storeyed, detached dwellings dating predominantly from the 19th century and early 20th century. Symmetrical 19th and early 20th century dwellings. Asymmetrical interwar dwellings and shops. Parapet ends to shop fronts. Hipped and gable roof forms. Separate verandahs with concave, bullnose or monopitch profile. Verandahs as a continuation of the main roof.
	Building height	Dwelling external wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick external walls. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts. Masonry columns or half columns. Brick, render or stone chimneys.
	Fencing	Low masonry wall. Timber post and rail. Timber picket fence. No fence.
	Setting, landscaping, streetscape and public realm features	Memorial garden and council reserve along the creek provide sense of place. Mature deciduous street trees to both sides of road. Vegetated landscape.

Statement#	Statement	
	Representative Buildings	Identified - refer to SA planning database.
MtB12	**Nairne Historic Area Statement (MtB12)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1839. Buildings and structures predominantly dating from the late 19th century reflecting surrounding agricultural activity, mining, smelting and civic services. Predominately small scale, single storeyed detached dwellings. Buildings from the 1920s to 1960s include greater economic development and clustering's of interwar dwellings and World War Two Housing Trust dwellings.
	Allotments, subdivision and built form patterns	Subdivision pattern responsive to town's topography and contours of the creek. Original alignment of roads, streets and allotment layouts remain. Deep, narrow allotments.
	Architectural styles, detailing and built form features	Early stone dwellings, outbuildings, shops, hotels and churches. Compact, intact and rustic collection of small scale, single storeyed, detached and semi-detached buildings and structures dating predominantly from the 19th century. Pioneer building techniques and materials typical of an early settlement. Symmetrical frontages to early buildings. Asymmetrical frontages to interwar buildings. Hipped and gable roof forms. Parapet ends to shop fronts. Separate verandahs with concave, bullnose or monopitch profile. Some verandahs as continuations of the main roof.
	Building height	Single storey dwelling external wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick external walls. Some rendered walls. Brick quoins. Corrugated profile sheeting roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Timber picket fencing. Some timber post and rail. Hedging to street front. Low masonry walls.
	Setting, landscaping, streetscape and public realm features	Verandahs, canopies and balconies provide shelter to pedestrians on Old Princes Highway. Some gravel paths to Edinborough Street. Mature street trees to Old Princes Highway.
	Representative Buildings	Identified - refer to SA planning database.
	Paddys Hill, Mount Barker Historic Area Statement (MtB13) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can

Hahndorf, North Approaches Historic Area Statement (MtB14)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>Mid to late 19th and early 20th Century.

Dwellings associated with pioneer families and development of the district.

Indicative of boom period from late 1880's to early 1900's.

Adjacent to the Hahndorf State Heritage Area.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Large detached dwellings.

Substantial gardens with interspersed view to the rural hinterland

Generous setbacks of building from the main road.

Linear residential development along the main arterial road to Adelaide.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Late 19th and early 20th century stone villas, cottages and bungalows.

Some early Germanic influence buildings.</td></tr>
</table>
</td></tr>
</table>

Statement#		Statement
MtB14		Predominantly single storeyed, detached and semidetached buildings and structures. Some double storeyed buildings. Symmetrical frontages to villas and cottages. Asymmetrical frontages to bungalows and some villas. Pioneer building techniques and materials. Parapet walls to end gables.
	Building height	External wall heights varies from 3 to 8 metres.
	Materials	Stone external walls. Some brick external walls. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Timber picket fence. Hedging to street front. Low masonry.
	Setting, landscaping, streetscape and public realm features	Open landscaping indicative of traditional rural entrance to township. Mature deciduous street trees. Predominantly unmade verges and footpaths. Street furniture unadorned.
	Representative Buildings	*[Not identified]*
MtB15	**Pine Avenue, Hahndorf Historic Area Statement (MtB15)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Interwar. Single storeyed, detached built form of Interwar developments. Structures reflect continuing prosperity of the town well into the mid-20th century. Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Long allotments typically orthogonal to the street. Substantial curtilage around existing dwellings. Generous setbacks between dwellings and to the street.
	Architectural styles, detailing and built form features	Late 19th century and late 20th century stone villas and bungalows. Intact collection of single storeyed, detached and semidetached buildings. Symmetrical and asymmetric frontages. Some sun-rooms within verandah roof. Masonry columns or half columns. Hipped and gable roof forms. Projected front gables. Separate verandahs or as a continuation of the main roof.
	Building height	External wall height varies from 3 to 4 metres.

Statement#	Statement	
	Materials	Dressed stone / ashlar. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Brick, render or stone chimneys.
	Fencing	Low masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Mature deciduous street trees. Generous setbacks and street trees provide sense of second entrance into rural township.
	Representative Buildings	*[Not identified]*
MtB16	**Church Street, Hahndorf Historic Area Statement (MtB16)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From mid to late 19th Century. Buildings and structures dating from the 19th century reflecting early settlement and prosperity post settlement. Predominantly single story, with some double storey detached built forms. Public and religious buildings. Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Varying allotment sizes and shapes to the main street. Minimal setback from street.
	Architectural styles, detailing and built form features	Compact, intact and rustic collection of small scale, single and double storeyed, detached buildings and structures dating predominantly from the 19th century. Germanic influence style. Symmetrical frontages and separate verandahs. Parapet walls to shop fronts. Parapet walls to end gables. Hipped and gable roof forms. Half hipped (Germanic influence). Verandahs separate or as a continuation of main roof with concave, bullnose or monopitch profile.
	Building height	External wall height varies from 3 to 8 metres.
	Materials	Stone external walls. Rendered external walls. Some half-timbering / fachwerk. Corrugated profile roof sheeting. Brick quoins. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Some low timber picket fencing.
	Setting, landscaping, streetscape and public realm features	Simplistic planter boxes. Street furniture unadorned. Sense of place established by mature deciduous street trees.

Statement#	Statement	
	Representative Buildings	*[Not identified]*
MtB17	**Auricht Road, Hahndorf Historic Area Statement (MtB17)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From late 19th and early to late 20th Century residential periods. Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Transition in allotments from historic main street to adjacent 20th century residential areas. Historic Strassendorf land division pattern remains evident. Regular and repeated long narrow allotments typically orthogonal to the street. Small setbacks from road.
	Architectural styles, detailing and built form features	Single storey detached dwellings. Brick and stone dwellings and outbuildings. Hipped and gable roof forms. Verandahs separate with bullnose profile or as a continuation of the main roof.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick external walls. Brick quoins. Corrugated profile sheet roofing. Brick, render or stone chimneys.
	Fencing	Low masonry. Timber picket. Hedging to street front.
	Setting, landscaping, streetscape and public realm features	Some street trees. Footpath to eastern side only. Thoroughfare to main road.
	Representative Buildings	*[Not identified]*
	Hahndorf Rural Setting Historic Area Statement (MtB18) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From Late 19th to 20th century. Rural landscape. Low intensity agricultural and pastoral lands. Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Open farmland. Allotments of varying sizes. Some Strassendorf and Hufendorf allotments.
	Architectural styles, detailing and built form features	Interwar bungalows. Late 19th to 20th century cottages. Small scale, single storeyed detached buildings and structures.

Statement#	Statement	
MtB18		Hipped and gable roofs. Separate verandahs with bullnose, concave or monopitch form. Verandahs as a continuation of the main roof.
	Building height	External wall height varies from 3 to 4 meters.
	Materials	Dressed stone external walls. Brick external walls. Brick quoins. Corrugated profile roof sheeting. Brick or render chimneys.
	Fencing	Hedging to street front. Timber post and rail.
	Setting, landscaping, streetscape and public realm features	Rural backdrop to township of Hahndorf. Paddocks. Native vegetation. Informal landscaped appearance.
	Representative Buildings	*[Not identified]*
MtB19	**Kia-Ora Street, Mount Barker Historic Area Statement (MtB19)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From early 20th Century to 1950's. Interwar architecture. Small compact dwellings which reflect the continuing prosperity of the town well into the mid-20th century. Represents a period of housing and streetscaping largely Intact. Stone and brick reflective of prominence of masonry and brickworks within the area.
	Allotments, subdivision and built form patterns	Varying allotment sizes orthogonal to the street, becoming deeper towards the creek. Small front setbacks. Reasonably consistent widths to street frontage. Unique no through road.
	Architectural styles, detailing and built form features	Dressed stone and red brick construction. Single storeyed, detached dwellings. Asymmetric frontages.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Dressed stone and red brick external walls. Brick quoins. Some rendered walling. Corrugated profile roof sheeting. Tiled roofs. Painted timber window frames and doors. Some painted timber verandah posts with ornate decoration. Painted masonry columns and half columns. Brick or render chimneys.

Statement#	Statement	
	Fencing	Low masonry. Timber post and woven wire. No fencing.
	Setting, landscaping, streetscape and public realm features	Verges and footpath unmade. Compact, residential setting character.
	Representative Buildings	*[Not identified]*

Historic Areas affecting City of Mount Gambier

MtG1

Bay Road Historic Area Statement (MtG1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Development from period of settlement up to and including the 1920s.
Allotments, subdivision and built form patterns	Generous allotment sizes. Extensive street and side boundary set-backs.
Architectural styles, detailing and built form features	Large single storey houses with hipped and gabled galvanised iron roofs; and generous verandahs.
Building height	Predominantly single storey, with two storey additions within roof space to rear of buildings.
Materials	Varied building construction but generally comprising dolomite or limestone walling with quoins.
Fencing	Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
Setting, landscaping, streetscape and public realm features	Well maintained, mature gardens that contribute to a pleasant, open streetscape. Streetscape improvements within the area have particular emphasis on Bay Road as the entry to the Volcanic Complex State Heritage Area.
Representative Buildings	Identified - refer to SA planning database.

MtG2

Doughty Street and Wehl Street North Historic Area Statement (MtG2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Development from period of settlement up to and including the 1920s.
Allotments, subdivision and built form patterns	Generous allotments dominating the higher slopes, with substantial street and side boundary setbacks. Smaller allotments on the lower slopes.
Architectural styles, detailing and built form features	Varied building styles from one street to another. Grand houses dominating the higher slopes. On the lower slopes, workman's cottages. Contemporary housing.
Building height	Predominantly single storey, with two storey additions within roof space to rear of buildings.
Materials	Varied building construction and materials reflecting traditional period and style. Timber workman's cottages.
Fencing	Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
Setting, landscaping, streetscape and public realm features	Characterised by steep topography with generous allotments sizes and well-maintained mature gardens.
Representative Buildings	Identified - refer to SA planning database.

Vansittart Park Historic Area Statement (MtG5)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1880s-1920s.</td></tr>
</table>
</td></tr>
</table>

Statement#	Statement	
MtG5	Allotments, subdivision and built form patterns	Adjoining the St Andrews Historic Area, the Vansittart Park area contains uniform residential allotments on a grid pattern. There has been a small number of infill type developments in the area to date. However, the area remains predominantly dwellings on large regular shaped allotments. Generally large, consistent frontages. Predominantly large, consistent allotments. The Vansittart Park provides a sporting ground (with associated amenities) and large open garden areas.
	Architectural styles, detailing and built form features	Villa, federation and bungalow style dwellings.
	Building height	Predominantly single storey, with two storey additions within roof space to rear of buildings.
	Materials	Construction and materials reflecting traditional period and style.
	Fencing	Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Well landscaped Vansittart Park and the topography of the area adds interest. Streets are not excessively wide by comparison to other areas of Mount Gambier.
	Representative Buildings	Identified - refer to SA planning database.

Wehl Street South Historic Area Statement (MtG6)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

MtG6		
	Eras, themes and context	1860s- mid 1920s.
	Allotments, subdivision and built form patterns	Wide roads with large, deep allotments, although east-west roads are generally narrow with buildings set close to the street. Side setbacks are in some cases small.
	Architectural styles, detailing and built form features	Diverse dwelling styles. Larger residences predominantly along Wehl Street South. Smaller stone or timber-clad workman's cottages close to the railway line. Wehl Street Public School.
	Building height	Predominantly single storey, with two storey additions within roof space to rear of buildings.
	Materials	Stone and timber clad. Construction and materials reflecting traditional period and style.
	Fencing	Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Street set-backs in this area vary considerably, and combined with clusters of historical housing, produce an interesting streetscape. Residential streetscape character, including within commercial areas. Unobtrusive advertising. Front fences and garden landscaping. Car parking located to the rear of buildings.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting Rural City of Murray Bridge

Adelaide Road Pontoon Historic Area Statement (MuBr1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

Historic Areas affecting Naracoorte Lucindale

NALU1

Livingston Street, Naracoorte Historic Area Statement (NaLu1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1870s to 1890s and turn of the 20th century.
Allotments, subdivision and built form patterns	Small allotments.
Architectural styles, detailing and built form features	Single- and double- fronted detached cottages (typically involving two rooms).
Building height	Single storey.
Materials	Local stone, fibro-sheet and weatherboard, corrugated iron and patterned sheet metal.
Fencing	Open fencing predominantly wire and picket style no more than 1.2 metres.
Setting, landscaping, streetscape and public realm features	Buildings positioned close to street frontages, landscaped front gardens and wide grassed verges.
Representative Buildings	[Not identified]

Historic Areas affecting City of Norwood, Payneham and St Peters

NPSP1

College Park Historic Area Statement (NPSP1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Subdivision during the 1870s with dwellings built between 1870s and 1920s. Detached dwellings.
Allotments, subdivision and built form patterns	Consistent pattern of prestigious single-storey detached dwellings on very large, spacious allotments fronting wide, tree-lined streets. Very low density. Side and rear setbacks providing large separation distances between dwellings.
Architectural styles, detailing and built form features	Double fronted, symmetrical and asymmetrical dwellings; East Adelaide Investment Company dwellings; Larger villas and mansions; Victorian villas; Edwardian Queen Anne and Art Nouveau. The double fronted, symmetrical and asymmetrical dwellings in the College Park Policy Area are an elegant larger version of the simple colonial cottage with the addition of a projecting wing (in the case of the asymmetrical dwelling), a more elaborate verandah and increased detailing in plaster and render work around openings. The pitch and size of the roof makes this an important design element. The external walls are generally constructed of bluestone or dressed and coursed sandstone. Verandahs along the front elevation are another important element of both the double fronted symmetrical and asymmetrical dwelling.
Building height	Single storey, two storey in some locations.
Materials	External walls made of bluestone or dressed and coursed sandstone. Stone, brick and rendered masonry. Traditional colours and materials.
Fencing	Low, open front fencing (including secondary streets to the main façade of building) associated with the traditional period and style of the building up to 1.2m (masonry), 1.5m (wrought iron, timber and wire) and 2m (masonry pillars) in height, allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other dwellings built during the Victorian period; or timber picket, timber paling or woven crimped wire; or corrugated iron or mini orb within timber framing for Edwardian dwellings. Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry. Side fences along street corners continue the detailing of the front fence to the house alignment, solid fencing beyond this point in traditional materials.
Setting, landscaping,	Dwellings have sizeable setbacks from all boundaries and are typically set in large landscaped grounds with front boundaries defined by fencing of various styles.

Statement#	Statement
	streetscape and public realm features: Open landscape character to front garden, which enhances dwelling and streetscape quality. Wide streets lined with mature trees.
	Representative Buildings: Identified - refer to SA planning database.

Hackney North Historic Area Statement (NPSP2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP2	
Eras, themes and context	Predominantly pre 1920s, some pre 1940s dwellings. Detached, semi-detached and row dwellings.
Allotments, subdivision and built form patterns	Small narrow fronted allotments on narrow streets.
Architectural styles, detailing and built form features	Humble, mainly double fronted (with some single fronted) single storey cottages, in detached, semi-detached and row dwelling configurations.
Building height	Single storey.
Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.
Fencing	Low, open front fencing (including secondary streets to the main façade of building) reflecting the traditional period and style of the associated building up to 0.9m in height, allowing views to building. Rear and side fencing behind the alignment of the main dwelling face to 1.8m. Timber picket, timber dowelling, simple masonry and cast iron palisade. Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry.
Setting, landscaping, streetscape and public realm features	Consistent pattern of narrow streets with dwellings built close to street with minimal setbacks and separation distances.
Representative Buildings	Identified - refer to SA planning database.

Hackney South Historic Area Statement (NPSP3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP3	
Eras, themes and context	Detached, semi-detached and row dwellings.
Allotments, subdivision and built form patterns	Closely packed arrangement of buildings built close to the street frontage. Mainly small narrow fronted allotments which generally only allow for dwellings with a single room width, rear service lanes. Some sizeable allotments along parts of Osborne Street. Primary dwelling frontages are to streets, not lanes.
Architectural styles, detailing and built form features	Small, mainly single-fronted dwellings, in detached, semi-detached and row dwelling configurations. Some elevated dwellings along eastern side of Westbury Street. Verandahs along the primary frontage of dwellings. Dwellings simple in structure and plan.
Building height	Single-storey.
Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.
Fencing	Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m, allowing views to building. Original design and materials, such as timber picket, timber dowelling or simple masonry and cast iron palisade.
Setting, landscaping, streetscape and public realm features	Consistent pattern of narrow streets and rear service lanes. Rear lanes used for vehicular access and garages. Streets lined with mature exotic street trees. Landscaped gardens to sizeable allotments.
Representative Buildings	Identified - refer to SA planning database.

Joslin / Royston Park Historic Area Statement (NPSP4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>NPSP4</td><td>
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1900s-1930s. Detached dwellings.

Joslin/Royston Park Historic Area is divided into two separate locations:

the area around First and Second Avenue, north of Lambert Road, in the suburb of Royston Park, and the area centred around Fourth, Fifth and Sixth Avenues in the suburb of Joslin.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Regular pattern of large allotments.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Single storey detached dwellings. Bungalows. Edwardian (such as Queen Anne) and Federation dwelling styles. Some Tudor style dwellings with a steeper roof pitch, tiled roof and heavy columns.</td></tr>
<tr><td>Building height</td><td>Single-storey, two storeys in some locations.</td></tr>
<tr><td>Materials</td><td>Stone dwelling walls and original joinery.</td></tr>
<tr><td>Fencing</td><td>Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, brush or timber and wire) and 2m (masonry pillars), allowing views to dwelling. Original design and materials, such timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other Victorian dwellings.

Timber picket, timber paling or woven crimped wire, or corrugated iron or mini orb within timber framing for Edwardian dwellings.

Timber paling, wire mesh and timber or tube framing, woven crimped wire, or masonry with galvanised steel ribbon for Bungalow and Tudor house styles.

Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Area characterised by regularity of the wide, tree lined avenues.

Landscaped garden setting, particularly in front of dwelling; Streets lined with distinctive street trees.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>
</table>

NPSP16

Payneham (Harcourt Road) Historic Area Statement (NPSP16)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Early 1900s and 1918-30 (State Bank bungalows). Detached dwellings.
Allotments, subdivision and built form patterns	Medium sized allotments. Large frontages.
Architectural styles, detailing and built form features	Early 1900s architectural housing styles in Harcourt Road - post Federation Villa style dwellings. State Bank bungalows in Kapunda Terrace. Local shop and attached dwelling at the junction of Harcourt Road and Kapunda Terrace. Original verandahs along the primary frontage. Well preserved housing stock, particularly in Harcourt Road.
Building height	Single storey.
Materials	Unpainted stone, corrugated iron roofing materials and joinery.
Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, timber and wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for villas. Timber picket, timber pailing, woven crimped wire, or corrugated iron or mini orb within timber framing for Edwardian dwellings. Timber pailing, wire mesh and timber or tube framing, woven crimped wire, or masonry with galvanised steel ribbon for bungalows. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
Setting, landscaping, streetscape and public realm features	The consistent early tree planting of mature natives species, including Lilly Pillys and Myrtles, particularly along Harcourt Avenue, will continue to define and unify the historic character of this street. Buildings located in garden setting.
Representative Buildings	Identified - refer to SA planning database.

NPSP17

Payneham (Henry Street/George Street) Historic Area Statement (NPSP17)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Pre 1890s (Victorian) and 1890s-1910s (Edwardian). Detached and semi-detached dwellings.
Allotments, subdivision and built form patterns	Historic settlement sections of George Street and Henry Street, Payneham. Dwellings closely set on small, narrow fronted allotments and built close to the street with minimal setbacks and separation distances. Original verandahs.
Architectural styles, detailing and built form features	Small Victorian and Edwardian / federation cottages in detached and semi-detached configurations which are an important relic of early residential development in this section of Payneham. Dwellings simple in structure and plan.
Building height	Single storey.
Materials	Unpainted sandstone and bluestone, corrugated iron roofing materials and joinery.
Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including Henry Street / George Street corners and any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m, allowing views to dwelling. Timber picket, timber dowelling, simple masonry and cast iron palisade, or corrugated iron or mini orb within timber framing. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	Distinctive historic streetscape character established through the pattern of narrow streets and distinctive street trees.
	Representative Buildings	Identified - refer to SA planning database.

NPSP18

St Peters Historic Area Statement (NPSP18)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1870 - 1930s. Detached and semi-detached dwellings.
Allotments, subdivision and built form patterns	Mix of close-set, single-fronted cottages on narrow allotments and a range of cottages and villas set on larger allotments with more substantial established gardens, in wide streets, often with rear service lanes. Rear lanes used for vehicular access and garages In College Park and along Fifth and Sixth Avenue - small to medium sized allotments. In this section of First Avenue - modest sized allotments.
Architectural styles, detailing and built form features	In College Park and along Fifth and Sixth Avenue - mainly single-storey double-fronted villas and detached dwellings of modest proportions with some single-fronted dwellings. In this section of First Avenue - reasonably compact single-fronted, double-fronted, and villa-type dwellings.
Building height	Single storey.
Materials	Sandstone and bluestone construction.
Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, timber and wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
Setting, landscaping, streetscape and public realm features	In College Park and along Fifth and Sixth Avenue - Reasonably wide streets are characteristic of this area, with significant street planting and fenced front boundaries. Rear vehicle access lanes. Landscaping around dwellings is an important design element. Streets lined with mature exotic street trees.
Representative Buildings	Identified - refer to SA planning database.

NPSP19

Stepney Historic Area Statement (NPSP19)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1850 - 1890s. Detached, semi-detached and row dwellings.
Allotments, subdivision and built form patterns	Intricate pattern of development. Dwellings built on small, narrow-fronted allotments, close to the street frontage with minimal setbacks and separation. Primary dwelling frontages to streets, not lanes.
Architectural styles, detailing and built form features	Single and double fronted single storey cottages, in detached, semi-detached and row dwelling configurations, with some modest villas and bungalows. Dwellings simple in structure and plan.
Building height	Single storey.
Materials	Bluestone and sandstone.
Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m, allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade.

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	Street trees feature to a varying degree due to the species selection and age of planting. Rear lanes used for vehicular access and garages
	Representative Buildings	Identified - refer to SA planning database.

NPSP20

The Avenues Historic Area Statement (NPSP20)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Between the late 1870s and 1900, between the 1900s and the 1920s, and inter-war. Detached dwellings.
Allotments, subdivision and built form patterns	Historic streetscape created by the regularity of the avenues and the development patterns that have formed around them. Primary dwelling frontages to streets, not lanes.
Architectural styles, detailing and built form features	Predominantly single-storey, detached, late Victorian Italianate villas of reasonably substantial proportions. Elsewhere - the consistent styles of detached late Victorian Italianate villas of reasonably substantial proportions. Double fronted asymmetrical dwellings are the most common dwelling type, although there are a range of symmetrical dwellings, East Adelaide Company dwellings and some larger villas and mansions. The double fronted symmetrical and asymmetrical dwellings are an elegant, larger version of the simple colonial cottage with the addition of a projecting wing (in the case of the asymmetrical dwelling), a more elaborate verandah and increased detailing in plaster and render work around openings. The pitch and size of the roof makes this an important design element. Verandahs along the front elevation are another important element of both the double fronted symmetrical and asymmetrical dwelling. Some Edwardian style housing (such as Queen Anne and Art Nouveau styles), generally located within the later subdivided areas or on blocks which were re-subdivided from larger allotments. Joslin portion of this Policy Area - reflects general character, some of the dwelling stock, particularly towards the Lambert Road boundary, graduates into the 1920s style of housing, introducing with it a component of inter-war housing such as bungalows.
Building height	Predominantly single-storey, up to two storeys in some locations.
Materials	Bluestone or sandstone dressed and coursed.
Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, brush, timber and or wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other dwellings built during the Victorian period. Timber picket, timber pailing, woven crimped wire, or corrugated iron or mini orb within timber framing for Edwardian dwellings. Timber pailing, wire mesh and timber or tube framing, woven crimped wire, or masonry with galvanised steel ribbon for bungalows, Tudors and inter-war dwellings. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
Setting, landscaping, streetscape and public realm features	Landscaping around a dwelling, particularly in the front garden, is an important design element. In St Peters, wide tree lined streets, with mature street trees and rear lanes used for vehicular access and garages
Representative Buildings	Identified - refer to SA planning database.

Dequetteville Terrace Historic Area Statement (NPSP21)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Late 19th Century and early 20th Century. Buildings primarily originally constructed as dwellings but now used for a range of land uses, including office, consulting rooms, residential, tourist and other accommodation.
Allotments, subdivision and built form patterns	*[Not stated]*

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>NPSP21</td><td>
<table>
<tr><td>Architectural styles, detailing and built form features</td><td>Grand scale late 19th Century and early 20th Century mansions set well back from the Dequetteville Terrace frontage.

Two detached single-storey buildings (large former dwelling and a bungalow-style dwelling) in established garden settings.</td></tr>

Statement#	Statement	
NPSP23		
	Architectural styles, detailing and built form features	Valued architectural elements fronting Payneham Road including verandahs, façade treatments (including windows and entrances), shopfront detailing and roof and parapets. Street-level coherence across signage, canopies, shopfronts and overhanging fabric of buildings such as cornices.
	Building height	Single and two -storey.
	Materials	Original materials and finishes including unpainted brickwork, stonework and corrugated iron roofing.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Vehicular movement is dominated by Payneham Road, which provides primary access for delivery, service and visitors vehicles. Access and car parking is generally shared. Car parking is generally located to the rear of buildings, or otherwise sensitively located.
	Representative Buildings	Identified - refer to SA planning database.
NPSP24	**Portrush Road Historic Area Statement (NPSP24)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880s and 1890s. Offices, consulting rooms and residential dwellings generally utilising historic buildings.
	Allotments, subdivision and built form patterns	Consistent setbacks.
	Architectural styles, detailing and built form features	Valued architectural elements fronting Portrush Road including verandahs, original openings (i.e. doors and windows) in external walls, roof form and pitch and façade treatments. Residential character. The historically significant Funeral Parlour on Portrush Road, Payneham.
	Building height	Single storey.
	Materials	*[Not stated]*
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Vehicular movement is dominated by Portrush Road, which provides primary access for delivery, service and visitors vehicles. Car parking is generally located to the rear of buildings.
	Representative Buildings	Identified - refer to SA planning database.
NPSP25	**The Parade / Fullarton Road Historic Area Statement (NPSP25)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Pre 1890s (Victorian). Offices, consulting rooms and residential dwellings, generally utilising historic buildings, with new residential apartments and townhouses.
	Allotments, subdivision and built form patterns	*[Not stated]*
	Architectural styles, detailing and built form features	Victorian villas, large two storey mansion buildings, double-fronted houses and groups of two storey row houses. Consistent set-backs. Buildings which address Fullarton Road and The Parade have deep set-backs.
	Building height	Generally up to two storeys.
	Materials	Sandstone or bluestone.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Vehicular movement is dominated by The Parade,

Statement#	Statement	
		Fullarton Road, Rundle Street and Little Dew Street, which provides primary access for delivery, service, visitors' and residents' vehicles, in preference to access via the adjoining residential areas. Well established garden settings. High standard of landscaping incorporating large trees which reinforce the leafy avenue character of these roads.
	Representative Buildings	*[Not identified]*
NPSP26	**Heathpool Historic Area Statement (NPSP26)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	An area which demonstrates its origin as a locally significant subdivision of land in 1917, following the sale of Heathpool farm. The subdivision by land developers Wilkinson, Sando and Wyles, created 40 allotments, forming a new residential estate known as 'Toorak East'. Developed during the Inter-War period (1915-1945) after the main phases of suburban development (on northern side of Kensington Road) were completed. This area was developed at the same time as similar subdivisions in nearby parts of the City of Burnside. An intact area displaying historic construction styles built from 1920 featuring large houses and gardens in Stannington Avenue, dominated by wide-fronted bungalow style dwellings. Later construction of mainly middle-class housing in Rothbury Avenue, dominated by Old English style dwellings. The southern extent of the Historic Area along Rothbury Avenue abuts and shares the built form character, patterns and housing styles of the Tusmore Historic Area (in the City of Burnside).
	Allotments, subdivision and built form patterns	Largely intact original subdivision pattern, comprising grid pattern of original allotment sizes, providing regularity and consistency laid out along the east-west streets. Large single storey detached dwellings with bespoke decorative and ornate detailing on large allotments, especially along Stannington Avenue, including double allotments bought and retained as single holdings and other sites with extensive landscaped open space. Allotments are generally between 1000m² and 1400m². Sites comprised of double allotments in the order of 1700m² to 2500m². Frontages are generally between 21 and 33 metres. Sites comprised of double allotments with total frontage width in the order of 42 to 53 metres. Front setbacks are generous and range from 9 metres to 21 metres. Spaciousness around dwellings with site coverage in the order of 30 to 45 per cent on original allotments. Side setbacks are a feature of the locality providing large separation distances between dwellings of between 1 to 5 metres, with limited original development built on the side boundary. Setback patterns are generally asymmetrical, with varied space on either side of dwellings. Street facing dwellings enhanced by their landscaped settings.
	Architectural styles, detailing and built form features	Notable dwellings include large and finely crafted 1920s Inter-War Bungalow dwellings with form, scale and detailing reflective of 1920s-era homes of the wealthy, lining both sides of Stannington Avenue. Along the northern side of Rothbury Avenue are highly intact examples of middle-class Inter-War Old English dwellings and Inter-War Bungalow dwellings of varying designs, repeated on southern side of Rothbury Avenue in City of Burnside – Tusmore Historic Area to form a consistent streetscape. Porches and verandahs in keeping with the scale and style of associated dwellings, either projecting or as a continuation of the main roof structure. Hip and gable roof forms with roof pitches of 20 to 30 degrees on Bungalows and up to approximately 45 degrees on Inter-War Old English dwellings. Visible chimneys are a feature of the distinctive roofing detail in this area. Where a second building level exists, it is setback from side boundaries and incorporated within the roof-pitch. Single-width open style carport alongside and sometimes incorporated into the roof form with matching masonry pillars, or generously recessed is a feature of Inter-war dwellings in the area. Free-standing or enclosed ancillary buildings are sited to the rear of the associated dwelling.
	Building height	Dwelling height to the roof ridge in the order of 5 to 8 metres. Predominantly single storey, except for original lofts, dormer windows or other upper storey elements in some taller dwellings where the second level is incorporated with minimal interruption to the pitched roof-form.
	Materials	Feature front walls materials consistent with era of original construction including freestone, sandstone and brickwork.

Statement#		Statement
		Verandah balustrades of red brick, freestone or rendered brick, often with feature pillars supporting the verandah roof. Bungalow styles featuring a front timber pergola adjoining the verandah. Pitched roofs in galvanised iron sheet or terracotta tiles, including double steep gables. Original materials and finishes and unpainted masonry. Detailing around doors, windows, wall edges and gables. Timber framed sash or casement style window openings and use of projecting bay windows. Natural and muted colour palette (including the use of red brick and terracotta) with colour highlights in the detailing such as quoins.
	Fencing	Front fences are generally open style and low in height (to 1.2 metres high) permitting good views of the dwelling and its curtilage. Fencing materials commonly associated with Inter-War Bungalow and Inter-War Old English dwelling styles, was typically woven wire or chain mesh with timber or galvanised tube framing and/or hedge, or a low masonry plinth wall. 
	Setting, landscaping, streetscape and public realm features	Spacious front and side gardens with extensive landscaping are features of this locality and are important in the setting of historic building forms. Tree lined streets creating a leafy public realm. Trees and tennis courts on larger sites, adding to the sense of buildings integrated into landscaped settings. Narrow access points which maximise the extent of unbroken street frontage and front landscaping with single width driveways.
	Representative Buildings	Identified - refer to SA planning database.
Historic Areas affecting City of Onkaparinga		
Onka1	**Clarendon Historic Area Statement (Onka1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s - 1890s. Early European survey and settlement in the regional areas around Adelaide; Pastoralism, Agriculture, Viticulture, Tertiary Industries, Communications, Road Transport, Water Catchment and Supply, Social Services, Religion, Education, Law and Order, Local Government.
	Allotments, subdivision and built form patterns	Township allotments set out from the main road (Grants Gully Road) which winds its way along the floor of a valley and Turners Gully Road. Relatively large allotments, typical of a country township. Allotment sizes increase out from the centre of the township, emphasising the semi-rural environment. Substantial space between buildings. Buildings are sited relatively close to front boundaries and each other in the centre of the township but front and side setbacks increase as distance from the town centre increases. This pattern of development contributes to the sense of space and rural/country township character. Building frontages are parallel to streets becoming more random out from the centre of the township. Dwellings with frontage to Turners Gully Road and/or Clarendon Road sited on the lower slopes of hillsides or within the valley floor.
	Architectural styles, detailing and built form features	Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian stylistic influences. Agriculture and viticulture related structures such as winery buildings, farmhouses and barns. Public buildings such as police station, courthouse, school, former institute building (hall) with Victorian Gothic and similar styles of the Victorian era. Churches and cemeteries. Hotel, general store and shops. Transport related structures such as bridges. War memorial. Roof types: M - shaped, gable, hipped, concave or straight-pitched veranda, steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods short roof spans Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills
	Building height	Predominantly single-storey. Single-storey residential buildings with some two-storey or part two-storey dwellings. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres.

Statement#	Statement	
		Tall single-storey churches and institutional and public buildings that are generally exceptions and landmarks that punctuate the streetscape and stand out because of their difference in scale.
	Materials	Masonry - random rubble, roughly-coursed stone, unpainted local bluestone, sandstone, some with brick or rendered quoin work Roof - slate or corrugated iron Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts Consistent with the materials used in the 1840s-1890s buildings within the township. Unobtrusive, natural colours.
	Fencing	Picket fence. Woven wire. Timber post-and-rail or post-and-wire Low (approximately 1.2 metres in height) sandstone rubble. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Lineal township laid out along a narrow valley floor. Township located within a steeply-sided valley and a hillside, rural setting. Narrow streets. The reservoir and the Onkaparinga River. Mature landscape environment where well-established trees and vegetation reinforce the country township character and emphasise the space between buildings. Village or rural township character. Vistas and views into and out of the township are important.
	Representative Buildings	Identified - refer to SA planning database.
Onka2	**Kangarilla Historic Area Statement (Onka2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s - early 1900s. Early European survey and settlement in the regional areas around Adelaide; Pastoralism, Agriculture, Tertiary Industries, Communications, Road Transport, Social Services, Religion, Education.
	Allotments, subdivision and built form patterns	Concentrated on McLaren Flat Road. Relatively large allotments, typical of country township. Allotment sizes increase out from the centre of the township, emphasising the semi-rural environment. Substantial space between buildings. Buildings are sited relatively close to front boundaries and each other in the centre of the township but front and side setbacks increase as distance from the town centre increases. Sense of space and country township character. Building frontages parallel to streets.
	Architectural styles, detailing and built form features	Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian stylistic influences. Agriculture and viticulture related structures such as farmhouses, barns, stables, sheds, outbuildings, and winery. Public buildings such as school, post office, hall. Churches and cemeteries. Hotel, general store and shops. Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: M - shaped, gable, hipped. Concave, bullnose or straight-pitched veranda. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. short roof spans.
	Building height	Predominantly single-storey. Single-storey residential buildings with some two-storey or part two-storey dwellings or shop/dwellings. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Tall single-storey churches and institutional and public buildings that are exceptions
	Materials	Masonry - random rubble, roughly coursed stone, unpainted local bluestone, sandstone, some with brick or rendered quoin work.

Statement#	Statement	
		Roof - corrugated iron, slate, stringy bark shingles. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts. Consistent with the materials used in the 1840s-1890s buildings within the township.
	Fencing	Post-and-rail. Crude picket. Timber post-and-rail or post-and-wire. Low (approximately 1.2 metres in height) sandstone rubble. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Positioned at the junction of four main roads. Township confined to small cluster of buildings sited adjacent the major road junction. Presence of reliable creek. Rural township character. Mature landscape environment well-established trees and vegetation emphasise space between buildings. Farmhouses around the township area. Relatively broad road reserves. Informal footpaths and road edges.
	Representative Buildings	*[Not identified]*
Onka3	**Old Reynella Historic Area Statement (Onka3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s - 1920s. Early European survey and settlement in the regional areas around Adelaide; Pastoralism, Agriculture, Viticulture, Tertiary Industries, Communications, Road Transport/Coaching routes, Railway Services, Social Services, Religion, Education.
	Allotments, subdivision and built form patterns	Varied allotment sizes and pattern within the township.
	Architectural styles, detailing and built form features	Symmetrical and asymmetrical cottages with Victorian stylistic influences. Schools, hotel. Transport-related buildings such as horse changing station. Smaller cottages with rectilinear plan form. Low-scale. High solid-to-void ratio. Typically, two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: gable, hipped. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods Short roof spans.
	Building height	Predominantly single-storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger hotel and former school building are landmarks. Historic character punctuated by more recent infill and shopping facilities.
	Materials	Masonry - limestone, sandstone (coursed), random rubble, some stucco and rendered finishes. Quoins - rendered, brick. Roof - corrugated iron. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.
	Fencing	Picket fencing. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Narrow residential streets presenting variety in the age and style of buildings. Attractive public open spaces formed around the Field River. Creek line running through the centre of the town.
	Representative Buildings	*[Not identified]*
	Old Noarlunga Historic Area Statement (Onka4) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s - 1930s. Bungalows and c1920s stage of development.

Statement#	Statement	
Onka4		Early European survey and settlement in the regional areas around Adelaide; Agriculture, Flour Milling, Tertiary Industries, Communications, Road Transport, Water Transport, Social Services, Religion, Education, Local Government.
	Allotments, subdivision and built form patterns	Allotments perpendicular to gently curving roads that follow the line of the adjacent Onkaparinga River. Large allotments with large frontages.
	Architectural styles, detailing and built form features	Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian, Federation and Inter-War Bungalow stylistic influences. Public buildings such as school, former post office, former institute building (hall). Churches and cemeteries. Hotel and shops. Former flour mill. Transport-related structures such as bridges. Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: gable. Steeply-pitched, typically 30 to 40 degrees, (slightly lower for bungalows), reflecting traditional architectural styles and building methods. Short roof spans
	Building height	Predominantly single-storey, with some 2 storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger hotel and former school building are landmarks.
	Materials	Masonry - limestone, sandstone, bluestone - random rubble, some rendered elements Quoins - rendered, brick Roof - corrugated iron, gables with timber strapping Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts. Cream, dark green and muted-earth colours.
	Fencing	Randomly-laid stone. Post-and-rail. Timber picket. Woven wire Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Sited in a bend of the Onkaparinga River. Enclosed by prominent steep river embankments. Township edges defined by open space and national park. Self-contained village with a strong 'main street' character. Town square (former Market Square). Horseshoe Park.
	Representative Buildings	*[Not identified]*
Onka5	**Port Willunga Historic Area Statement (Onka5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s - 1930s. Early European survey and settlement in the regional areas around Adelaide; Agriculture, Tertiary Industries, Road Transport, Water Transport/Shipping, Social Services, Leisure Pursuits/Holidaymaking.
	Allotments, subdivision and built form patterns	Radiating layout from north-easterly point where Mindarie Street meets the original termination of William Street. Traditional grid pattern elsewhere. Based on gridiron pattern. Views of the hills to east down public streets.
	Architectural styles, detailing and built form features	Mid-to-late 1800s stone buildings. Informal inter-war holiday and fishing shacks. Post-war holiday houses. Recent dwellings that draw on the traditional form and scale. Informality in the appearance of many buildings arising from additions over time and variety in use of materials. Rectilinear plan form. Low-scale. Typically two or more pavilions rather than a single mass. High solid-to-void ratio. Concave and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills.

Statement#	Statement	
		Roof types: gable. Hipped. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans.
	Building height	Predominantly single-storey, some two-storey (but well-modulated). Single-storey has typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger former hotel is a landmark.
	Materials	Masonry - limestone, sandstone, weatherboard, some rendered masonry - random rubble. Quoins - rendered, brick. Roof - corrugated iron, slate, dark grey. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.
	Fencing	Picket. Post-and-rail. Post-and-wire. Hedges. Randomly-laid limestone up to 1.2 metres high. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Established trees - mature Aleppo Pines, Norfolk Island Pines, Casuarinas. Informal streetscapes often lined with established trees and shrubs.
	Representative Buildings	*[Not identified]*
Onka6	**Aldinga Historic Area Statement (Onka6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s - 1920s. Early European survey and settlement in the regional areas around Adelaide; Agriculture, Tertiary Industries, Communications, Road Transport, Social Services, Religion, Leisure Pursuits, Holidaymaking.
	Allotments, subdivision and built form patterns	Village centred on the intersection of Old Coach Road and Port Road. Large allotments perpendicular to the roads. Allotment sizes increase out from the centre of the township, emphasising the semi-rural environment. Substantial space between buildings. Buildings are sited relatively close to front boundaries and each other in the centre of the township but front and side setbacks increase as distance from the town centre increases. This pattern of development contributes to the sense of space and rural/country township character. Building frontages are parallel to streets becoming more random out from the centre of the township. Based on gridiron pattern. Views of the hills to the east down public streets.
	Architectural styles, detailing and built form features	Mid-to-late 1800s stone buildings with Victorian stylistic influences. Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian stylistic influences. Hotel, former Temperance Inn, former Institute building (hall) and church are landmarks. Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: gable, hipped. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans.
	Building height	Predominantly single-storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger hotel and former school building are landmarks.
	Materials	Masonry - limestone, sandstone - random rubble. Quoins - rendered, brick. Roof - corrugated iron, Willunga slate. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.
	Fencing	Picket. Post-and-rail. Post-and-wire. Hedges. Randomly-laid limestone up to 1.2 metres high.
	Setting, landscaping, streetscape and public realm features	Established trees - mature Aleppo Pines, Norfolk Island Pines, Casuarinas.

	Representative Buildings	*[Not identified]*
Onka7	**Willunga Historic Area Statement (Onka7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Predominantly 1840s - 1900. Early settlement; Agriculture, Slate Quarrying.
	Allotments, subdivision and built form patterns	Original subdivision in the late 1830s. Second subdivision of southern part of the township in 1857. Laid out around High Street, the main thoroughfare through the town, which cuts diagonally through the original subdivision. Allotments perpendicular to High Street in centre of township. Grid pattern with allotments perpendicular to streets in southern section of township. Original allotments of around half an acre. Subsequent land division has occurred, but allotments remain relatively large. Early buildings line High street and the road out of Willunga to Aldinga and McLaren Vale. Rectilinear. Buildings aligned parallel to boundaries.
	Architectural styles, detailing and built form features	Simple, vernacular cottages. Mid-to-late 1800s stone buildings with Victorian stylistic influences. Double-fronted cottages, villas and asymmetrical cottages with Victorian stylistic influences. Shops and shop/dwellings with Victorian stylistic influences. Churches and cemeteries. Public buildings such as police station, courthouse, school, former post and telegraph office, post office, former Institute building (hall). Three hotels. Transport-related structures such as bridges. Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: hipped. Gable. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans.
	Building height	Variation in the size and sophistication of buildings, from humble cottages to two-storey dwellings and institutional or public buildings. Predominantly single-storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Smaller vernacular cottages. Hotels, former post and telegraph office, former police station and courthouse and former Institute (hall) are landmarks.
	Materials	Masonry - local sandstone, pug-with-lime render, some local brick - random rubble, squared. Quoins - stone, rendered, brick. Roof - corrugated iron, Willunga slate. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts. Consistent with the materials used in the 1840s-1900s buildings within the township.
	Fencing	Picket. Post-and-rail. Post-and-wire. Slate post-and-wire. Hedges. Randomly-laid stone up to 1.2 metres high. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Commercial and residential buildings indicative of the town's early settlement phase in the mid-1800s. Landmark two-storey buildings in High Street. Range of buildings and uses reflecting the composition of the town's community and enterprise. Town's foothill topography features creek lines. Substantial remnant gum trees. High degree of mature landscaping.

Ob2	Eras, themes and context	Small community and historic centre.
	Allotments, subdivision and built form patterns	Original development patterns.
	Architectural styles, detailing and built form features	A number of buildings in original or well-restored condition.
	Building heights	Original building heights and scales.
	Materials	Original materials and colours.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	*[Not stated]*
	Representative Buildings	*[Not identified]*

Historic Areas affecting Peterborough

Peterborough Historic Area Statement (Pet1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

PET1	Eras, themes and context	Turn of 20th century. Civic, commercial and retail. Railways.
	Allotments, subdivision and built form patterns	Traditional grid arranged around Main Street and the railway line.
	Architectural styles, detailing and built form features	Along Main Street and within the town centre, commercial buildings with traditional shopfronts, parapets and verandahs. Small, humble workers' accommodation, including single- and double- fronted cottages and row cottages. Villas. Traditional railway architecture including workshops and industrial buildings. Roof pitches between 30-45 degrees.
	Building height	Single storey with the exception of civic and hotel buildings and the Capitol Theatre .
	Materials	Local stone, masonry and corrugated iron.
	Fencing	Open fencing of a rural style not exceeding 1.2m.
		Along Main Street and within the town centre, consistent setbacks and a strong building line with little interruption. Buildings

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	square to the street. Visibility of the railway line. Dominance of the railways housing and administrative buildings within the railway reserve east of Hurlstone Street. Dominance of railway workshops and industrial buildings at the western end of the railway reserve. Dominance of religious buildings associated with three churches along Kitchener Street. Symmetry given to Main Street by trees where there is no built form. Definition and articulation of four corners created by hotel buildings. Wide streets with stone kerbing. Slate footpaths.
	Representative Buildings	Identified – refer to SA planning database.
PET2	**Yongala Township Historic Area Statement (Pet2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 19th and early 20th century.
	Allotments, subdivision and built form patterns	Traditional grid land division pattern arranged around Main Street.
	Architectural styles, detailing and built form features	Along Main Street, traditional shopfronts with verandahs.
	Building height	Single storey with the exception of the Globe Hotel.
	Materials	Local stone, masonry and corrugated iron.
	Fencing	Open fencing of a rural style no more than 1.2m.
	Setting, landscaping, streetscape and public realm features	Silos and the Globe Hotel are landmark features. Consistent building setbacks from street frontages and the central unifying element of the grassed area on Main Street give the area cohesion.
	Representative Buildings	[Not identified]
Historic Areas affecting City of Playford		
Play1	**One Tree Hill Historic Area Statement (Play1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860s - Uniting Church & Cemetery, Cottages. 1900s - Institute & War Memorial.
	Allotments, subdivision and built form patterns	Orderly allotment configuration fronting Black Top Road. Varying front setbacks. Generous side setbacks.
	Architectural styles, detailing and built form features	Early symmetrical cottages of low scale and simple form. Institutional/community period buildings featuring simple gable form. Rectilinear plan forms. Moderate degree of modulation and articulation. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on domestic buildings. Short roof spans. Hip roof forms on domestic buildings. Gable roof form on institutional/community buildings. Short straight pitched verandahs on domestic buildings. Vertical proportions in windows and doors.
	Building heights	Low scale single storey domestic buildings. Single storey institutional/community buildings.
	Materials	Consistent with the materials used in the 1860s to 1900s period. Institutional/community buildings featuring local stone face, walls unpainted. Private buildings featuring rendered and painted walls. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.

Statement#	Statement	
	Fencing	Fencing associated with the era and style of the building. Low open style fencing. Low stone fence and iron gate to Uniting Church.
	Setting, landscaping, streetscape and public realm features	Well established streetscape character, with notable landscaping.
	Representative Buildings	*[Not identified]*

Historic Areas affecting City of Port Adelaide Enfield

PAdE1

Alberton / Rosewater Historic Area Statement (PAdE1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1860 - 1950 built development.
Allotments, subdivision and built form patterns	Squares linked by wide streets. Modified grid pattern. Reasonably consistent allotment depths. Varied front setbacks.
Architectural styles, detailing and built form features	Wide range of housing styles including villas, bungalows, cottages, terrace and rows.
Materials	Materials consistent with the style of building and era of its original construction.
Building height	Single storey.
Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with 1920s including capped timber palings, post and wire or woven wire fences.
Setting, landscaping, streetscape and public realm features	Pockets of important early houses in Queen Street and King Street, dating from the 1860s. Substantial Victorian stone and brick houses grouped around two squares, Company Square and St Patricks Square, with good examples of substantial corner villas. The Alberton station complex is an important feature in the area and contains the earliest railway station in South Australia and shops of a consistent design. The double line of trees along the railway line that divides the area and the established street trees, particularly, Plane trees, Ash trees, Jacarandas, White Cedars and some mature Canary Island Date Palms make an important contribution to the character of the area.
Representative Buildings	Identified - refer to SA planning database.

PAdE2

Exeter Historic Area Statement (PAdE2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1860's - 1940's built development.
Allotments, subdivision and built form patterns	Grid pattern with narrow north-south running streets with the long axes of allotments running east -west. Allotments fronting Harris St, Exmouth Road and Semaphore Road configured with their long axes running north- south so that buildings address those roads. Generally built close to street with small front setbacks.
Architectural styles, detailing and built form features	Housing styles consisting of cottages, villas, bungalows, terraces and rows.
Materials	Materials consistent with the style of building and era of its original construction.
Building height	Predominately single storey but some scattered two storey.
Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated Victorian and Edwardian houses include pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with the 1920s including capped timber palings, post and wire or woven wire fences.
Setting, landscaping, streetscape and public realm features	The early cottages and neighbourhood shops with verandahs extending over the footpath and the Cooperative Building Society in Denman Street provide a reminder of the local village character of this area, catering for the needs of residents whose main means of transport was walking. A collection of intact early buildings characterised by stone and brick residences, early timber houses and later corrugated iron houses all retaining original detailing. A second small residential pocket on the south side of Semaphore Road which also has a local village character with single storey

Statement#	Statement	
		brick and stone cottages and a two storey hotel and paired terrace.
	Representative Buildings	Identified - refer to SA planning database.
PAdE3	**Semaphore / Largs Historic Area Statement (PAdE3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860's - 1940's built development.
	Allotments, subdivision and built form patterns	Grid pattern with predominately east-west running streets with the long axes of allotments running north-south. Allotments fronting the Esplanade and Military Road configured with their long axes running east-west so that buildings address these roads. Consistent front setbacks for each street but setbacks varying between streets. Varied allotment sizes.
	Architectural styles, detailing and built form features	Wide range of housing styles from all periods of development of Semaphore and Largs including villas, bungalows, workers row cottages, terraces, rows, mansions and Tudors. Early timber and masonry houses.
	Building height	Predominately single storey but scattered two storey and a small amount of three storey along parts of the Esplanade frontage.
	Materials	Materials consistent with the style of building and era of its original construction. Timber and masonry housing.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
	Setting, landscaping, streetscape and public realm features	A continuous run of high quality residential buildings set among mature Norfolk Island Pines along the Esplanade. The low scale of the Esplanade set against the open view of the sea opposite contains individual houses of historical and architectural importance built as seaside residences. An important sub-precinct along Military Road running from Fort Glanville through to Largs containing high quality public and private buildings. A concentration of early houses around Newman Street and Blackler Street associated with the development of Semaphore during the 1860s. Pockets of mature street planting providing important settings for these early houses, particularly along the Esplanade, Union Street, Clare Street, Hall Street and others.
	Representative Buildings	Identified - refer to SA planning database.
PAdE4	**Mainstreet Historic Area Statement (PAdE4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850's - 1940's built development.
	Allotments, subdivision and built form patterns	Focused around Commercial Road, St Vincent Street, Dale Street and Church Place. Allotments configured with their long axes running perpendicular to these roads. Allotments sizes vary to accommodate retail and commercial uses. Commercial buildings generally built to road frontages.
	Architectural styles, detailing and built form features	Commercial buildings featuring a fine grain fabric of small scale tenancies with narrow frontages. The extensive use of balconies and verandahs over footpaths.
	Building height	Predominately single and two storey with a small number three and four storey buildings to the east of Commercial Road.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	The area is a commercial and retail focus. It acts as a buffer and an approach area to the Port Adelaide State Heritage Area noting that the boundary around the Port Adelaide State Heritage Area is relatively arbitrary and the Main street Policy Area contains some buildings that are of equal significance to buildings within the Port Adelaide State Heritage Area. It features a large number of early buildings, many of which have housed the same continuous functions since the time of their construction. The State Heritage listed St Paul's Church is a prominent building in the area and provides a land mark along a major view corridor from the Nelson St Bridge. Similarly, the State Heritage listed Uniting Church off Commercial Road is an important landmark and southern gateway to this area. The area contains a number of State Heritage places and many Local Heritage places.
	Representative Buildings	Identified - refer to SA planning database.
	Woolstores Historic Area Statement (PAdE5)	

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>PAdE5</td><td>
The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1880's - 1940's built development.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Modified grid pattern with St Vincent Street and Bedford Street providing the main access roads into and out of this area. The southern and western boundaries of the grid are radiused by Brock Street and Barlow Street. The northern boundary is defined by Santo Parade, the northern side of which was previously an extension of Dock 1 and provided the woolstores with convenient access to cargo vessels. Woolstores and commercial buildings generally built to road frontages. Cottages close to and facing the road frontage. Medium to large allotment sizes.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Large purpose designed woolstores and warehouses featuring strong and robust built forms with parapet walls and saw tooth roofs. Simple, single storey workers cottages.</td></tr>
<tr><td>Building height</td><td>Large masonry woolstores buildings ranging from single to four storeys. Single storey former workers cottages.</td></tr>
<tr><td>Materials</td><td>Masonry and corrugated iron feature strongly and are key defining materials. Materials consistent with the style of building and era of its original construction.</td></tr>
<tr><td>Fencing</td><td>[Not stated]</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>A key characteristic of this area is the compact group of large, well detailed warehouses associated with the wool export trade and located close to the dockside. The woolstores buildings are highly visible and prominent from eastern approaches into the Port Adelaide Regional Centre, particularly from Perkins Drive. The unimpeded visibility and prominence of these buildings is important. The area also contains a collection of primarily corrugated iron houses, mainly located between Aberdeen and Crozier Streets south of Brock Street. Some are identified as Local Heritage Places, dating from 1900 to 1920, which served as worker's housing for the nearby woolstores. These surviving houses are a remnant of a more consistent low scale residential area which contrasted visually with the adjacent imposing woolstores.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>
</table>

<tr><td>PAdE6</td><td>
Semaphore Road Historic Area Statement (PAdE6)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>1870's - 1920's built development. Semaphore Road developed as a substantial commercial centre after the establishment of a railway line from Port Adelaide to Semaphore Jetty in 1878 and a subsequent increase in residential population in the area requiring goods and services.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Semaphore Road is a wide east west road that in this area runs from Causeway Road to the Esplanade.

Allotments are orientated so that buildings address Semaphore Road. Allotment sizes vary to accommodate a range of retail and commercial uses.

Retail and commercial buildings built to and addressing the Semaphore Road frontage.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>A variety of Government, institutional and commercial buildings including simple single storey shops with verandahs and parapet walls. Many of these shops retain post-supported verandahs over the footpath. There are pockets of well-preserved historic residential development featuring mansions, villas and cottages.</td></tr>
<tr><td>Building height</td><td>Predominately single storey and two storey.</td></tr>
<tr><td>Materials</td><td>Materials consistent with the style of building and era of its original construction.</td></tr>
<tr><td>Fencing</td><td>None for retail and commercial buildings.

Low and/or open consistent with the style and era of construction of the building it is associated with.

Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>A popular main street that links Semaphore and Port Adelaide and provides a pleasant environment for both seaside holiday makers and residents.

The seaward end of Semaphore Road retains strong evidence of Semaphore's original function as a transport and communications station for the early South Australian colony from 1850 onwards. The Time Ball Tower, Customs Boarding Station and the early Post Office building remain as an indication of these early services. The development of the Semaphore Town Hall, now the Library, and the RSL Hall continued the provision of community facilities, and these developed in association with the commercial areas of Semaphore road further to the east. This area is an important reminder of Semaphore's early prominence in the development of Port Adelaide and the State.

A generous public foreshore provides a popular recreation area and the backdrop and view to the western end of Semaphore Road.

The road is wide and features pedestrian areas, paving, upper canopy trees and low lying shrubs located in the median and verge, seating and public art. It is a well-established retail and commercial area that provides cafes, restaurants, shops, hotels, churches, a cinema and a range of other facilities.

Many well maintained commercial and residential buildings from the 1880s to the 1920s remain in the area. There are many Local Heritage listed</td></tr>
</table>
</td></tr>
</table>

Statement#	Statement	
		places along the length of the road and a number of State Heritage listed places in the western portion of the area.
	Representative Buildings	Identified - refer to SA planning database.
PAdE7	**Jetty Road Historic Area Statement (PAdE7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1870's - 1920's built development. The first subdivision of Largs was in 1873. The Largs Bay Land and Investment Company formed in 1881, constructed the jetty and built the Largs Pier Hotel by December of 1882.
	Allotments, subdivision and built form patterns	Allotments are orientated so that buildings have frontages to and address Jetty Road and the Esplanade. Generous rectangular allotments with wide frontages. Retail and commercial buildings built to and addressing road frontages.
	Building height	Single storey and two storey except at the Jetty Road / Esplanade intersection where development is three storey.
	Architectural styles, detailing and built form features	A mix of architectural styles including simple, single storey shops with over footpath verandahs and parapet walls and a double storey terrace with residential development over ground floor shops.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	None for retail and commercial buildings.
	Setting, landscaping, streetscape and public realm features	Located at the seaward end of Jetty Road, this area has strong links to the foreshore and beach and is a popular area for local residents and visitors. The State Heritage listed Largs Pier Hotel of Victorian (Italianate) architecture is a landmark building. Defining the corner of the Esplanade and Jetty Road, the Hotel, with its arcaded facades presents a prominent entry to this area. The area also contains other early commercial and residential buildings including a former Post Office, two storey shops, and early housing. The latter includes a row of double storey terraces with small scale residential development located above shops.
	Representative Buildings	*[Not identified]*
Historic Areas affecting Port Pirie Regional Council		
PtPi1	**Port Pirie Historic Area Statement (PtPi1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Integral part of the Port Pirie Regional Centre. 19th and early 20th century.
	Allotments, subdivision and built form patterns	Buildings on Ellen Street and Alexander Street built to the allotment boundary. Traditional allotment pattern, frontages and widths.
	Architectural styles, detailing and built form features	Traditional designs, roof forms and building features such as verandas, awnings and balconies.
	Building height	One and two storeys.
	Materials	Original or otherwise complementary materials, colours and finishes.
	Fencing	Front fences and gates associated with traditional period, style and form of the building, up to 1.2 m in height.
	Setting, landscaping, streetscape and public realm features	The distinctive historic character is created and enhanced by the interaction between built form, spaces, plantings and general street pattern within the area.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Prospect

Pr1

Fitzroy Terrace Historic Area Statement (Pr1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Late 19th and Early 20th century mansion style housing.
Allotments, subdivision and built form patterns	Very large spacious allotments with wide frontages. Sizable setbacks from all boundaries with sizable spaces between buildings. The established pattern of buildings sited away from allotment boundaries makes a significant contribution to the character.
Architectural styles, detailing and built form features	Very large mansion style dwellings. Additions to the rear or side of dwellings. Range of designs with homogeneity derived from decorative front facades, pitched roofs, brick chimneys & front verandahs and building placement on allotments.
Building height	Up to 2 storeys.
Materials	Variety of materials and colour finishes with additional detailing around windows, doors and edges of walls.
Fencing	Low open style to 1.2 metres high. Fencing that associated with the period and style of the dwelling.
Setting, landscaping, streetscape and public realm features	Substantial well landscaped gardens with front yards that complement the style of the dwelling. Landscaping around dwellings. The spacious streetscape character of Fitzroy Terrace is created by the large allotments on which have been built a range of equally large residences. Garages and carports are designed and sited to be subordinate to the main dwelling.
Representative Buildings	Identified - refer to SA planning database.

Clifton Street Historic Area Statement (Pr2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Late 1870s, late 19th speculative housing by local builder James Trevail for middle class home buyers.

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>Pr2</td><td>
<table>
<tr><td>Allotments, subdivision and built form patterns</td><td>Original subdivisions of 1881, 1882 and larger allotments of 1894-95 at western end of street (known as Prospect View at the time of sale). Consistent, large front setbacks.

Large and small asymmetrical side setbacks to dwellings. The set-back and pattern of coverage creates a notable streetscape with vistas and views towards the west.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Consistent front verandahs with highly decorative cast iron and timber trim, hipped and gabled pitched roofs and brick chimneys. 1880s-1890s residential designs along Clifton Street reflecting speculative subdivision. Double fronted cottages with central gable feature and front steps to raised finished floor levels to respond to the falling topography to the west.</td></tr>
<tr><td>Building height</td><td>Single storey, moderate residential scale. Essentially single storey residences which take advantage of the sloping topography to the west.</td></tr>
<tr><td>Materials</td><td>Stone walls and limited external colour palette with detailing around windows, doors and edges of walls.</td></tr>
<tr><td>Fencing</td><td>Low open style to 1.2 metres high with mainly masonry and iron materials.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Homogenous streetscape of houses and associated buildings.

Substantial well landscaped gardens with front yards that complement the style of the dwelling.

Narrow verge with mature street trees.

Garages and carports are designed and sited to be subordinate to the main dwelling.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>

<tr><td>Pr3</td><td>
Little Adelaide Historic Area Statement (Pr3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>Little Adelaide Village formed in late 1839. The section was bought by John Bradford an agent for Adelaide Mechanics Land Company. Most of the current homes are dated from the 1870s to 1890s.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Is centred on a triangle created by Main North Road, Carter Street, Highbury Street and Argyle Street.

Narrow allotments of varying widths and narrow streets.

Small setbacks from all boundaries with compact spaces between buildings.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Coherent pattern of small cottages with common features including pitched roofs, brick chimneys & front verandahs.

Single fronted and attached cottages are predominant, mainly from 1870-1890s. The village retains a church, corner shops (former) and other buildings typical of early village settlement.</td></tr>
<tr><td>Building height</td><td>Single storey.

Compact small single fronted and attached cottages.</td></tr>
<tr><td>Materials</td><td>Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.</td></tr>
<tr><td>Fencing</td><td>Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Small front yards and limited space between buildings. Public realm characterised by narrow street and verge with limited room for landscaping. Village atmosphere. Where present, garages and carports are designed and sited to be subordinate to the main dwelling.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>

Whinham Street Historic Area Statement (Pr4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>Late 19th century villas.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Regular subdivision pattern.

Consistent moderate street setbacks.

Large and small asymmetrical side setbacks to dwellings.</td></tr>
</table>
</td></tr>
</table>

Statement#	Statement	
Pr4	Architectural styles, detailing and built form features	Consistent front verandahs with highly decorative cast iron and timber trim, hipped and gabled pitched roofs and brick chimneys. 19th century villas with face stone walls and gable ends, verandahs with cast iron or timber trim, steeply pitched corrugated iron roofs and elaborate rendered trim to window surround.
	Building height	Single storey, moderate residential scale. Additions are at the rear or side dwellings.
	Materials	Bluestone walls and limited external colour palette with detailing around windows, doors and edges of walls.
	Fencing	Low open style to 1.2 metres high which provides views to dwellings. Masonry and iron. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Substantial well landscaped gardens with front yards that complement the style of the dwelling. Narrow verge with mature street trees. Relative lack of high, solid fencing enables the principal elevation of the homes to be visible from the public realm. Homogenous streetscape of villas. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.
Pr5	**Flora Terrace Historic Area Statement (Pr5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 19th and early 20th centuries residential. Focus of commemoration of war service, civic activities and important sporting events.
	Allotments, subdivision and built form patterns	Regular subdivision pattern. Three separate land divisions between 1892 and 1923 - part of the Oxford subdivision of 1892 on south side of the Terrace with, part of St John's Wood South subdivision in 1909 on north side with larger allotments of and part of a 1923 division of the eastern end to the Memorial Gardens. Consistent setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Range of designs with range homogeneity derived from decorative front facades (detailing around windows, doors verandahs & gables), pitched roofs, brick chimneys & front verandahs. Houses display style, form and detail of the relevant periods of historic development - 1892 to the 1920s.
	Building height	Single storey and large residential scale.
	Materials	Face stone and brick walls and corrugated iron or terra cotta roofs.
	Fencing	Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Substantial front gardens. Very leafy streetscape. Civic and residential character. Strong visual axis between the Town Hall and the Memorial Gates to Prospect Oval. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.
	Martin Avenue Historic Area Statement (Pr6) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Inter-War residential.
	Allotments, subdivision and built form patterns	Large allotments. Regular generous front setbacks.

Pr9	**Highbury Historic Area Statement (Pr9)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1882 subdivision. Turn of the century residential development. The area is characterised by primarily detached housing reflecting styles of domestic architecture at the turn of the century.
	Allotments, subdivision and built form patterns	Regular subdivision pattern with consistent large frontages and site areas. Regular moderate front setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs. Characteristic design features such as bull-nosed verandahs, brick quoining, and stone front walls.
	Building height	Single storey and moderate residential scale.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high, providing visibility to landscaped front yards and dwellings.
	Setting, landscaping, streetscape and public realm features	Well landscaped front yards as an extension of a green leafy streetscape. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	*[Not identified]*
Pr10	**Ballville/Gloucester Historic Area Statement (Pr10)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Subdivided in 1878 by Henry Ball. Turn of century residential development. The area is characterised by primarily detached housing reflecting styles of domestic architecture at the turn of the century.
	Allotments, subdivision and built form patterns	Original subdivision with modest allotments with large frontages. Consistent moderate street setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Primarily detached housing reflecting styles of domestic architecture at the turn of the century. Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs.
	Building height	Single storey and moderate residential scale.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Limited landscaping and dominant built form from small front yards and narrow road verges. Gloucester Street has greener front yards and public realm. St Cuthbert's Anglican Church and its adjacent manse are prominent landmarks. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	*[Not identified]*

Statement#	Statement
Pr11	**Medindie Gardens Historic Area Statement (Pr11)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Inter-War period housing. The area is predominated by bungalows to the east of Corbin Road and Tudor-style houses to the west. The majority of the original dwellings constructed prior to 1930 remain intact, with additions occurring over time either within the roof space or to the rear and side.
Allotments, subdivision and built form patterns	Regular subdivision pattern of generously sized allotments and wide frontages. Consistent large front and side setbacks. The area retains its original subdivision pattern, with regular sized allotments supporting residential development at a low density.
Architectural styles, detailing and built form features	Predominantly bungalows to the east of Corbin Road and Tudor-style houses to the west. Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs.
Building height	Single storey and large residential scale. Two storey additions are within the roof space or to rear of buildings.
Materials	Stone and brick walls and limited external colour palette with detailing (including glazed bricks) around windows, doors and edges of walls and corrugated iron or terra cotta roofs. Consistent use of materials including rock faced stone and masonry, face red brick, terracotta roof tiles or corrugated iron, glazed bricks for trim and other details and materials typical of the housing of the Inter-War Period.
Fencing	Low open style (to 1.2 metres high). Fencing associated with the period and style of the dwelling.
Setting, landscaping, streetscape and public realm features	Large well landscaped front yards and tree lined streets above grassed verges. Minimal driveway and hard-surfaced areas. Consistent pattern of prestigious single storey detached dwellings on generous allotments fronting tree-lined street. Spacious and open feel. Garages and carports are designed and sited to be subordinate to the main dwelling.
Representative Buildings	*[Not identified]*

Historic Areas affecting Robe

Robe Historic Area Statement (Ro1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

RO1 Eras, themes and context	19th century and early decades of 20th century. Shipping port, communication and administration township servicing pastoral development of the South East.
Allotments, subdivision and built form patterns	Topography shapes the setting of Robe and land division pattern. Royal Circus is a low knoll. It is a commemorative landmarks and a distinct road feature. There is a legible connection between Royal Circus, the sea wall / jetty abutment, the Customs House and the Post and Telegraph Office. Main Road, Victoria Street and Mundy Street form the main line of road to the port and the main street. The traditional street grid pattern extends either side of Victoria Street, to the coastal fore-dune and across the ridge to the south which overlooks and forms the backdrop to the township. Most of the original large square allotments have been subdivided but the pattern of historic buildings remains legible.
Architectural styles, detailing and built form features	Traditional stone commercial buildings with shopfronts, parapets and verandahs within the town centre. The variety rather than the consistency of traditional building forms is a distinct characteristic of Robe. Small workers' cottages on large allotments, often with low walls, hipped roofs spanning one or two rooms, casement windows and lime-washed or natural stone walls. Heritage listed community buildings (the primary school, churches and the Institute) are on prominent sites and remain as strong landmarks. Heritage-listed government buildings (the Post and Telegraph Office, Customs House and Court House) dominate Royal Circus. Massive stone chimneys are a characteristic feature of the historic buildings. Stone outbuildings are visible from public streets. Roof pitches between 25-35 degrees. Roofs with a high degree of articulation, steep pitches and small spans, provide a unique roofscape across Robe to Guichen Bay. Older buildings have casement windows. Later buildings have double-hung timber sash windows.
Building height	Two storey buildings along small section of Smillie Street, and hotels. Their built form combines double and single storey elements and verandahs, articulating their bulk and scale. Adjacent buildings differ in style, creating a varied rather than a consistent skyline. Other historic buildings generally single storey, with small span hipped roofs. Building floor levels are close to, step with or are built into, the slope of the land.
Materials	Local stone, limestone, rendered and bagged masonry with painted or lime wash finish. Painted timber weatherboard, painted timber joinery, trims, verandahs, barges and fascias. Galvanised and painted corrugated iron roofing. Some examples of slate and traditional flat metal roof tiles. Driveway materials are neutral in colour and pattern with natural finishes.

Statement#	Statement	
	Fencing	Local stone, hardwood palings and pickets, hardwood and woven wire, brush with round hardwood posts and hedges not exceeding 1.2m.
	Setting, landscaping, streetscape and public realm features	Views and vistas of the entrance to the town centre along Main Road past Lake Fellmongery and Lake Charra. Views of the foreshore area adjacent Town Beach and streetscapes of historic buildings of Smillie Street and Mundy Terrace. Views across the area illustrate the importance of native vegetation and the distinct character of the roof designs of historic buildings. Historic buildings square to and often close to street alignments, particularly on Smillie Street. Minimal breaks between buildings except where access to the rear of a site is provided. Streets, verges and reserves in the public realm characterised by Lakestone kerbing, limestone cuttings, landmark trees (Norfolk Island Pines in particular) and native vegetation. Important public open space reserves that frame the township at Lannum Reserve, the Institute / Town Beach Foreshore, Royal Circus and the southern edge of Lake Butler. Each has a distinct landscape structure, planting character and historic quality.
	Representative Buildings	[Not identified]
Historic Areas affecting Tatiara		
TAT1	**Bordertown Historic Area Statement (Tat1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1910-1930.
	Allotments, subdivision and built form patterns	Traditional grid. Large allotments.
	Architectural styles, detailing and built form features	Federation-style houses with asymmetrical plans and multiple decorative gables. California bungalows with veranda pylons and gables extending to the veranda perimeter. Low-pitched roofs.
	Building height	Single storey.
	Materials	Rock-faced sandstone walls and terracotta tiled roofs.
	Fencing	No fencing or open front fencing no more than 1.2m.
	Setting, landscaping, streetscape and public realm features	Rural setting. Landscaping surrounding dwellings.
	Representative Buildings	Identified – refer to SA planning database.
Historic Areas affecting City of Tea Tree Gully		
TTG1	**Tea Tree Gully Township Historic Area Statement (TTG1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	The village core of Tea Tree Gully. Mid to late 19th Century to early 20th Century.
	Allotments, subdivision and built form patterns	Traditional subdivision layout focussed on North East Road as the major approach route to the township in both directions. Allotments are varied in size and shape. Regular moderate front setbacks and small setbacks from side boundaries. Generally consistent siting and space between buildings. Sites address North East Road.
	Architectural styles, detailing and built form features	Colonial style flat facades articulated with post-supported verandas. Symmetrical designs with simple footprints. Roof forms are generally hipped or gable roofs with pitches between 30-40 degrees. A mix of buildings including detached dwellings, churches, row shops, a war memorial, former police station, institute building, hotel, former bakehouses, flour mill and winery. Tea Tree Gully museum and former council chambers building as State Heritage Places. Historic homestead relics and a stone retaining wall in Pine Park.
	Building Height	Single storey, with the exception of the Old Flour Mill and Tea Tree Gully Museum.
	Materials	A combination of sandstone and bluestone construction with corners and window and door reveals formed with quoin work. Generally, all dwellings include corrugated roofs in galvanised or light to mid-tone greys, green or red. Unpainted stone / brick. Modern dwellings are consistent with the above materials, but also include a combination of raw brick, painted brick and rendered brick in natural, earthy colours. Timber windows.
	Fencing	Low, open fencing forward of the building line to height of 900mm. Associated with the traditional period, style and form of building. Hedges, timber picket, post and rail with woven wire, pailing or railing, stone, rendered brick or block.

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	Undulating and natural setting with minimal cut and fill, and extensive planting and landscaping. The Township provides for a visual transition between the rural landscape of the hills to the east and the suburban plains to the west. Angove's tower and cellar are recognised as landmark buildings and are important elements of the western gateway, including vistas of the tower. The North East Road entrance to Anstey Hill Recreation Park is also an important gateway and features historic building relics that line the entrance walk inside the park. The communal focal point is Haines Memorial Park, which features a European landscape theme surrounded by native street tree planting which illustrates the history of European settlement. Views to and from Haines Memorial park. Strong landscape setting dominated by undulating topography. Significant stands of native trees and intensively landscaped watercourse of Tea Tree Creek Discreet, low scale advertising comprising typefaces, colours, sizes and forms associated with the clear and simple styles used on the 19th and early 20th centuries, generally not illuminated.
	Representative Buildings	Identified - refer to SA planning database.
Historic Areas affecting City of Unley		
Un1	**Centres Conservation - Goodwood, King William and Fullarton Roads Historic Area Statement (Un1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1940's built development.
	Allotments, subdivision and built form patterns	Goodwood Road - prominent original imposing buildings, homogeneous historic nature and intrinsic features formed by the close-knit development to the street alignment, open balconies and verandahs extending over the footpath. King William Road - early era buildings and quaint unique close-knit character formed by the parade of buildings of narrow fronted shops to the street alignment, with simple continuous series of ornate parapet facades and verandahs over the footpath and some open balconies above. Fullarton Road - significant and early era residential forms of buildings with appropriate setbacks, low-key commercial uses adaptation and substantial landscaped frontages north of Cheltenham Street and small scale simple straight facade shopfronts to south. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks and spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian. Turn-of-Century. Inter-War. Complementary main street shopfronts, parapet walls and verandahs over footpaths and residential forms.
	Building height	Maximum two storey street presentation.
	Fencing	Fencing forward of the front façade of the building on Fullarton Road, of a form associated with the building and generally of low masonry pier and plinth, cast iron, brush, timber or similar nature.
	Setting, landscaping, streetscape and public realm features	Limited street trees, except Fullarton Road with dominant, well-established street trees. Goodwood Road - early commercial centre from the late nineteenth century comprising large imposing buildings, including landmark two-storey State Heritage Place, two-storey Local Heritage Place and Church buildings, and smaller narrow fronted premises. King William Road - early commercial centre from the late nineteenth century comprising some larger buildings and primarily small narrow fronted premises. Fullarton Road - residential buildings, some converted to community and commercial uses, and low-key, well landscaped gardens and State Heritage significant mansion 'Hughes Estate'.
	Representative Buildings	Identified - refer to SA planning database.
	Residential Compact Goodwood Estate Historic Area Statement (Un2) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. 	Setting, landscaping, streetscape and public realm features	Compact streetscape character. Simple grid of short and narrow streets. Narrow verges. Modest street trees.
	Representative Buildings	*[Not identified]*
Un8	**Residential Compact Forrestville and Fullarton Historic Area Statement (Un8)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1940 built development.
	Allotments, subdivision and built form patterns	Simple grid layout pattern, with longitudinal axis perpendicular to narrow roads. Regular allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian. Turn-of-Century. Inter-War. Hipped and gable roof forms, roof louvres, chimneys, open verandahs, feature ornamentation, (plasterwork, ironwork and timberwork), latticework and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Consistent scale and proportions of buildings including wall heights and roof designs to the streetscape.
	Materials	Sandstone. Bluestone. Brick, including glazed brick. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Compact streetscape character, narrow verges, and modest street trees.
	Representative Buildings	*[Not identified]*
Un9	**Residential Grand Unley Park Heywood Estate Historic Area Statement (Un9)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860 to 1940's built development.
	Allotments, subdivision and built form patterns	Regular, very generous allotments and site frontages. Prevailing rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and grand garden landscape setting.
	Architectural styles, detailing and built form features	Victorian Villas and Mansions. Turn-of-the-Century Villas and Mansions. Inter-War period Bungalows, particularly Gentleman's Bungalows. Tudor, particularly Gentleman's Tudors. Old English, Georgian Revival and other International Styles. Individualised by original architectural inspirations. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Grand built scale and form of existing historic buildings.
	Materials	Consistent with the materials typically associated with the style and era of the dwelling. For example (but not limited to): stone with brick or rendered embellishments, iron roof and timber joinery for Victorian and Turn-of-the-Century; stone with brick embellishments, tiled roof and timber joinery for Bungalows; brick with rendered embellishments, tiled roof and timber joinery and gable details for Tudors, brick or render with restrained detailing, flat roof forms and timber, steel and/or concrete features for International Styles.

Statement#	Statement	
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Wide streets and verges. Avenues of substantial street trees. Expansive allotments, street frontages with substantial well landscaped gardens including trees. Heywood Park a key feature at junction of key axis of King William Road and Northgate Street.
	Representative Buildings	*[Not identified]*
Un10	**Residential Grand Myrtle Bank Historic Area Statement (Un10)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1940 built development.
	Allotments, subdivision and built form patterns	Generous, wide, long street. Regular, very generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century grand villas. Inter-War era, primarily Bungalow but also Tudor, Art Deco, Mediterranean and complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Grand streetscape character. Generous wide street. Wide verges. Large street trees.
	Representative Buildings	*[Not identified]*
	Residential Spacious Millswood Page Estate Historic Area Statement (Un11) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900 to 1930's built development.
	Allotments, subdivision and built form patterns	Basic grid street layout around the central recreation feature of Goodwood Oval, but with long curvilinear and some truncated streets around the bisecting train lines previously laid in the 1870's. Spacious streetscape character of long, short and curved, wide, tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century villa styles. Primarily distinctive Inter-War period bungalows, art deco, Tudor and complementary later styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and

Statement#	Statement	
Un11		façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees.- Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on later style buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Simple grid of long, short and curved, wide, tree-lined streets. Large front gardens. Wide verges. Large street trees.
	Representative Buildings	*[Not identified]*
Un12	**Residential Spacious Millswood Wooldridge Estate Historic Area Statement (Un12)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1920 to 1940's built development.
	Allotments, subdivision and built form patterns	Short grid street layout of short, wide tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Central to this estate is the notable original homestead "Bella Vista" c1862. Late Inter-War period (between 1934 and 1940) in particular of bungalow, Tudor, art deco and complementary latter English domestic styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on later style buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Simple grid of short, wide, tree-lined streets. Large front gardens. Wide verges. Large street trees.

Un26	**Residential Spacious Myrtle Bank (North) Historic Area Statement (Un26)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1940 built development.
	Allotments, subdivision and built form patterns	Simple grid layout pattern, with longitudinal axis perpendicular to narrow roads. Regular large allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian. Turn-of-Century. Inter-War. Hipped and gable roof forms, roof louvres, chimneys, open verandahs, feature ornamentation, (plasterwork, ironwork and timberwork), latticework and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Consistent scale and proportions of buildings including wall heights and roof designs to the streetscape.
	Materials	Sandstone. Bluestone. Brick, including glazed brick. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Modest verges. Large street trees.
	Representative Buildings	*[Not identified]*
Un27	**Residential Compact Parkside (South) Historic Area Statement (Un27)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1930 built development.
	Allotments, subdivision and built form patterns	Simple grid layout pattern of roads, with longitudinal axis perpendicular to narrow roads. Regular large allotment sizes and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century double-fronted, single-fronted as well as attached cottages. Victorian and Turn-of-the-Century symmetrical and asymmetrical villas. Inter-War Bungalows. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.5 metres. Total Roof Height in the order of 5.7 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs in the order of 2.1 metre fascia height and 3.0 metre pitching height. Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes associated with the identified architectural styles.
	Materials	Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Rendered masonry. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.

Residential Spacious Fullarton Roseberry Estate Historic Area Statement (Un28)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Un28		
	Eras, themes and context	1840 to 1940 built development.
	Allotments, subdivision and built form patterns	Spacious streetscape character of regular grid of short, wide, tree-lined streets. Regular, generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Notable original homesteads include “Rosefield” c1842 and “Woodfield” c1883. Victorian and Turn-of-the-Century double fronted cottages and villas. Inter-War period primarily bungalows, and some unique Spanish mission and complementary later styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.
	Materials	Sandstone. Bluestone. Brick, including glazed brick. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character from later 1921-1927 subdivision of original farms. Simple grid of short, wide, tree-lined streets. Large front gardens. Wide verges. Large street trees. Regular street-fronting dwelling format, primarily of detached dwellings, and complementary community buildings.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Victor Harbor

Victor Harbor Town Centre Historic Area Statement (ViH1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

	Eras, themes and context	1870s to 1890s era, a period of early development in Victor Harbor. 1920s to 1930s when Victor Harbor experienced a boom period as a holiday destination.
	Allotments, subdivision and built form patterns	Mostly grid pattern. The intersections of Ocean Street and Coral Street, Coral Street and Flinders Parade and the termination of the Railway Terrace at Warland Reserve are key elements of urban space within the area. No or minimal front and side setbacks.
	Architectural styles, detailing and built form features	Commercial premises in Ocean Street, institutional buildings in Coral Street and those supporting facilities associated with the terminus of the railway line along Railway Terrace. Late 1800s era shops (some with Inter-war additions), dwellings, shop/dwellings, town hall, institute/library, hotels, former banks, railway buildings

Statement#	Statement	
ViH1		and associated infrastructure. Victorian stylistic influences. Inter-War commercial and public buildings, some with Art-Deco and some with Stripped Classical stylistic influences. Low scale and simple form. Rectilinear plan form with steeply-pitched roof forms (typically 35 to 40 degrees) on 1800s and early 1900s era buildings, also comprising low-pitched roofs behind parapets on Inter-War buildings, reflecting traditional architectural styles and building methods. Short roof spans, minimising roof bulk. Concave, bullnose and straight-pitched verandahs on front and sometimes side facades reduce building bulk and scale and add visual interest. Lean-to forms are also common. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Prevailing one to two storeys. One or two three storey buildings on Coral Street and Flinders Parade.
	Materials	Limestone walls, some rendered masonry. Red brick or rendered quoin work and detail. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Corrugated iron or corrugated steel roofing. Variation in materials which assists in breaking down bulk and scale, adding visual interest.
	Fencing	Some timber picket fencing and corrugated iron fencing.
	Setting, landscaping, streetscape and public realm features	Commercial properties provide the main built form and are characteristically single or two-storey buildings aligning with the street boundary. Typically buildings are symmetrical in design with parapets, verandas and balconies over the footpath to further define the pedestrian nature of the area. The railway corridor with its associated buildings and infrastructure is a prominent landscape element.

Historic Areas affecting Wakefield

WAKR1

Edith Terrace / Wallace Street, Balaklava Historic Area Statement (WakR1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1875-1930.
Allotments, subdivision and built form patterns	[Not stated]
Architectural styles, detailing and built form features	Face stone walls dressed with quoins; stuccoed raised parapets and stucco 'neoclassical' styled decoration/ elements to commercial premises. Framed shopfront windows and doors. Steeply pitched roof forms. Verandahs provided over footpaths.
Building height	Single storey.
Materials	Local stone, masonry, stucco, red brick quoins, corrugated iron, timber framed windows and doors and brick chimneys.
Fencing	[Not stated]
Setting, landscaping, streetscape and public realm features	Remnant 'Silent Cop' in intersection of two streets, locating the commercial centre of the town. Buildings square to and consistently set back from the street, creating a strong building line with little interruption. Minimal breaks between buildings except where access to the rear of a site is provided.
Representative Buildings	[Not identified]

WAKR2

Scotland Street, Balaklava Historic Area Statement (WakR2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1875-1915.
Allotments, subdivision and built form patterns	[Not stated]
Architectural styles, detailing and built form features	Villas, symmetrical and projecting gable front facades, face stone walls with quoins, vertically proportioned double-hung windows and doors and projecting gables with half-timbered facing, steeply pitched roofs with chimneys and bullnose verandahs.

Statement#	Statement	
	Building height	Single storey buildings.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fencing not exceeding 1.2m to Scotland Street and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Dwellings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]
WAKR3	**Humphrey / Baker Streets, Balaklava Historic Area Statement (WakR3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1875-1915
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Cottages with symmetrical facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors, steeply pitched gable or hipped roofs, masonry parapets to side-gable roofs, chimneys and bullnose verandahs and brick chimneys.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fences not exceeding 1.2m to Scotland Street and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]
WAKR4	**Fisher / Charles Streets, Balaklava Historic Area Statement (WakR4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1875-1925.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Cottages and villas with projecting gable front or symmetrical facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors, projecting gables with half-timbered facing, steeply pitched gable or hipped roofs, chimneys and bullnose and sloping verandahs.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]

Statement#	Statement
WAKR5	**Ralli / John Streets, Balaklava Historic Area Statement (WakR5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1905-1925.
Allotments, subdivision and built form patterns	[Not stated]
Architectural styles, detailing and built form features	Cottages and villas. Projecting gable front and symmetrical facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors and projecting gables with half-timbered facing, steeply pitched gable and hipped roofs, chimneys and bullnose and sloping verandahs.
Building height	Single storey.
Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.
Setting, landscaping, streetscape and public realm features	[Not stated]
Representative Buildings	[Not identified]

Statement#	Statement
WAKR6	**Burney Street, Blyth (WakR6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1875-1930.
Allotments, subdivision and built form patterns	[Not stated]
Architectural styles, detailing and built form features	Villas with projecting gable front and symmetrical facades, face stone walls with quoins to openings and corners, vertically proportioned, double-hung windows and entry doors, projecting gables with half-timbered facing, steeply pitched roofs.
Building height	Single storey.
Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.
Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1878-1945. Civic, commercial and retail.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Gable roofed shops with parapets, framed windows and re-entrant doorways and verandahs overhanging footpaths to the street. Public buildings scaled to suit their importance within the town having facades dressed with stucco decoration and parapets. Decoration is 'classically inspired' in detail. Senior Citizens Hall is of unique value, clad with imported proprietary galvanised sheet profiled cladding.
	Building height	Single storey.
	Materials	Local stone, masonry, galvanised iron, timber-framed windows, doors and verandah posts and stucco decoration and parapets.
	Fencing	[Not stated]
	Setting, landscaping, streetscape and public realm features	Buildings sited close and square to the street. Development sited full width across allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]
WAKR18	**Railway Terrace (West), Snowtown Historic Area Statement (WakR18)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1910-1920.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Dwellings with face stone walls with quoins or horizontal timber planking, vertically proportioned double-hung timber windows and timber entry doors, steeply pitched gable or half-gabled hipped roofs with chimneys and both integrated and separated front verandahs and porches.
	Building height	Single storey.
	Materials	Local stone, masonry, horizontal timber planking, red brick quoins, corrugated iron, timber-framed windows and doors and brick chimneys.

Statement#	Statement	
	Fencing	Timber and wire fences not exceeding 1.2m to Main Street and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]

Historic Areas affecting Town of Walkerville

Walk1

Church Terrace Locality Historic Area Statement (Walk1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to late 1920s.
Allotments, subdivision and built form patterns	Very-low density and low-density residential development, with predominantly detached dwellings on wide allotments. Detached dwellings on hammerhead allotments or group dwellings with shared access at the rear with wide street frontage. Very large allotments fronting Church Terrace and St Andrews Street, slightly smaller allotments within the remaining parts of the area.
Architectural styles, detailing and built form features	Built form is varied, covering a range of architectural periods including early stone villas and brick cottages such as those in the Lansdowne Terrace, together with Victorian and Edwardian architecture and later bungalows and Tudor houses. This historic character has been partially eroded through the development of semi-detached dwellings and other dwellings of uncomplimentary design and siting, reducing the areas available for landscaping to along the front and side of dwellings.
Building height	Generally single storey. Two storey additions to the rear of buildings or within the roof space and on larger sites with setbacks.
Materials	Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.
Fencing	Examples of original fencing with bluestone plinths and cast iron fence railings above remains. Low front fencing which provides some visibility to the historic built form, although brush fencing or solid pillars and plinths with open style inserts and gates appears in some locations.
Setting, landscaping, streetscape and public realm features	Vegetation in private yards contributes positively to the overall visual amenity and street tree planting which includes Jacarandas, Golden Rain and Ash trees, particularly in Church Terrace and Devonshire Street also contributes positively to residential amenity.
Representative Buildings	Identified - refer to SA planning database.

Walk2

Medindie Historic Area Statement (Walk2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Very-low and low density residential. 19th Century and early 20th Century.
Allotments, subdivision and built form patterns	Predominantly detached dwellings on large, wide allotments. Allotment sizes and building setbacks vary throughout the policy area, although there are patterns established in individual streets.
Architectural styles, detailing and built form features	Range of architectural styles and dwelling types from the late 19th Century and early 20th Century periods including early Victorian, high Victorian, Edwardian, Classic Revival and large bungalows, all set within large landscaped garden settings that enhance the presentation of the dwellings.
Building height	Predominantly single storey. Two storey additions to the rear of buildings or within the roof space with single storey appearance at the street. Two storey dwellings found on Robe Terrace and on larger sites with setbacks.
Materials	Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. Consistent early stone and brick dwellings on large sites with wide frontages to public roads.
Fencing	There is a distinctive lack of high, solid fencing and/or the use of open design of large gates to access long driveways has enabled the principal elevation of the historic homes and landscaped grounds to be visible from the public roads.
Setting, landscaping, streetscape and public realm features	Reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. Low-density residential development, with predominantly detached dwellings on allotments that are generous in width. Regular spacing between residential buildings that is primarily achieved through consistent setbacks from each side boundary. Formal avenues and regular spacing of street trees along road verges also make a positive contribution to the amenity of the area.

Statement#	Statement
	Representative Buildings: Identified - refer to SA planning database.
Walk3	**Walkerville Terrace Historic Area Statement (Walk3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Low-density residential development with predominantly detached dwellings. 19th Century and early 20th Century. Allotments, subdivision and built form patterns: Closely sited pattern of development, small allotments with narrow-to-medium frontages and intact historic character throughout the majority of the streets. Large frontages to Church Terrace (northern side) and Stephen Terrace, slightly smaller frontages elsewhere. Architectural styles, detailing and built form features: Range of architectural styles and dwelling types from the late 19th Century and early 20th Century. Existing dwellings are typically double or single fronted cottages, with simple detailing and modest sized rooms. Building height: Predominantly single storey. Two storey additions to the rear of buildings or within the roof space. Materials: Residences within this area vary in material application. Residences were constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. The locality exhibits consistent early stone and brick dwellings on large sites with wide frontages to public roads. Fencing: Low front fencing, such as picket fencing, or no front fencing at all. High solid fencing up to 2 metres in height on Stephen Terrace. Setting, landscaping, streetscape and public realm features: The locality exhibits regular spacing between residential buildings that is primarily achieved through consistent setbacks from each side boundary. Representative Buildings: Identified - refer to SA planning database.
Walk4	**Gilberton North Historic Area Statement (Walk4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to late 1920s. Proximity to Walkerville Terrace generally dictates more modest dwellings while grander architecturally designed residences exist on Walkerville Hill, capitalising on views to the Adelaide Hills. Allotments, subdivision and built form patterns: Predominantly low density detached dwellings on wide allotments of a range of sizes. Architectural styles, detailing and built form features: Mixture of architectural styles from turn of the century to early 1900s. Established character of large detached dwellings on spacious allotments, well setback from all allotment boundaries. Pitched roofs and articulated roof forms are an important characteristic of the area. Building height: Predominantly single storey. Two storey additions to the rear of buildings or within the roof space. Materials: Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. Fencing: Front boundary fencing is open in design (including gates) with solid components limited to the base and pillars so as to provide views of the principle dwelling facade. Traditional materials, heights and designs. Setting, landscaping, streetscape and public realm features: There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. Large street trees and generous garden settings visible from the primary street frontage. Representative Buildings: Identified - refer to SA planning database.
	Gilberton South Historic Area Statement (Walk5) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

Historic Areas affecting City of West Torrens

Elston Street Historic Area Statement (WeTo1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WeTo1		
	Eras, themes and context	1890s - 1920s.
	Allotments, subdivision and built form patterns	Low to very low density site areas. Wide frontages. Detached dwellings on substantial allotments.
	Architectural styles, detailing and built form features	Predominantly Federation villa style homes with examples of Bungalows and Art Deco dwellings. Bay windows. Hip, gable and Dutch gable roofs. Integrated and complementary verandahs / porticos. Simple façade detailing. Additions are generally located to the rear of the dwelling.
	Building height	Generally single storey. Second storey within the roof space.
	Materials	Stone. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick chimneys.
	Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Consistent side and rear setbacks, large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Regularly spaced trees. Vehicle access has been design and located to preserve existing street trees.
	Representative Buildings	Identified - refer to SA planning database.

Mile End Historic Area Statement (WeTo2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WeTo2		
	Eras, themes and context	1860s - 1920s.
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Wide frontages. Detached and semi-detached to allotments.
	Architectural styles, detailing and built form features	Predominantly detached Victorian villas with examples of Victorian semi-detached row dwellings; Victorian single fronted cottages Bungalows; Inter-war Art Deco dwellings; and Parapeted shopfronts. Bay windows. Gable and Dutch gable roofs. Steeply pitched hip roofs. Integrated and complementary verandahs / porticos. Additions are generally located to the rear of the dwelling.
	Building height	Generally single storey. Second storey within the roof space.
	Materials	Stone. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Leadlight windows. Iron and timber filigree. Red brick chimneys.

Statement#	Statement	
	Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Generous side and rear setbacks, maintaining large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Tree lined streets. Vehicle access has been design and located to preserve existing street trees. Vehicle access is via rear lanes where available.
	Representative Buildings	Identified - refer to SA planning database.
WeTo3	**Richmond Historic Area Statement (WeTo3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900s - 1920s.
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Medium to low density. Rectangular shaped allotments with direct street frontage. Predominantly Row and semi-detached dwellings.
	Architectural styles, detailing and built form features	Predominantly Inter-war dwellings with examples of State Bank Bungalows and Art Deco dwellings. Half-hipped (hipped gable roofs). Hip roofs. Integrated and complementary verandahs/porticos. Additions are generally located to the rear of the dwelling.
	Building height	Up to 2 storeys.
	Materials	Consistent material palette. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick chimneys.
	Fencing	No fencing or low fencing facilitating views of the dwelling.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Consistent side and rear setbacks. Carports and garages are behind the main face of dwellings. Street trees. Vehicle access has been design and located to preserve existing street trees.
	Representative Buildings	Identified - refer to SA planning database.
WeTo4	**Rose Street Historic Area Statement (WeTo4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900s - 1920s.
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Rectangular shaped allotments with direct street frontage. Narrow and deep allotments. Predominantly semi-detached dwellings to allotments.
	Architectural styles, detailing and built form features	Strong uniformity in architectural style. Predominantly semi-detached Gothic workers cottages. Pitched roofs. Verandahs / porticos. Parapeted gable. Features associated with traditional era and style of buildings. Additions are generally located to the rear of the dwelling.
	Building height	Generally single storey. Second storey within the roof space.
	Materials	Strong uniformity in material palette. Stone. Brick. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Leadlight windows. Red brick chimneys.
	Fencing	No fencing or low fencing facilitating views of the dwelling. Timber picket to boundary.
	Setting, landscaping, streetscape and public realm features	Consistent front setbacks. Consistent side and rear setbacks. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Street trees. Vehicle access has been design and located to preserve existing street trees. Vehicle access from laneways, particularly Rose Street where there are no crossovers.
	Representative Buildings	Identified - refer to SA planning database.

Statement#	Statement

Torrensville East Historic Area Statement (WeTo5)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WeTo5

Eras, themes and context	1890s - 1930s.
Allotments, subdivision and built form patterns	Low to very low density site areas. Wide frontages. Narrow and deep allotments. Consistent and uniform allotment pattern.
Architectural styles, detailing and built form features	Predominantly Victorian and Federation style villa and cottage dwellings with examples of Californian and State Bank Bungalows; Single fronted cottages; and Parapeted shopfronts. Hip, gable and Dutch gable roofs. Bay windows. Verandahs / porticos. Simple detailing. Window awnings. Additions are generally located to the rear of the dwelling.
Building height	Generally single storey. Second storey within the roof space.
Materials	Stone. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Tiled roofs. Timber windows. Iron and timber filigree. Red brick chimneys.
Fencing	Low fencing to facilitate views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Consistent side and rear setbacks, large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Tree lined streets. Wide streets. Vehicle access has been design and located to preserve existing street trees.
Representative Buildings	Identified - refer to SA planning database.

Urban Corridor (High Street) Historic Area Statement (WeTo6)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WeTo6

Eras, themes and context	1890s - 1920s.
Allotments, subdivision and built form patterns	Linear pattern of development along Henley Beach Road. Medium density site areas. Narrow/deep tenancies. Continuous shopfronts. Fine grained.
Architectural styles, detailing and built form features	Predominantly ornate parapeted, glazed shopfronts. Pedimented parapets. Hidden roof forms. Elaborate parapet treatments. Traditional verandahs. Ornamental timber verandah posts. Additions are generally located to the rear of the building.
Building height	Predominantly single storey. Two storey on corner allotments.
Materials	Rendered masonry. Stone. Masonry. Brick. Timber shopfronts. Corrugated pre-coloured or galvanised iron sheeting. Pressed Metal. Timber verandahs. Materials, finishes and colours associated with of original eras and styles.
Fencing	*[Not stated]*
Setting, landscaping, streetscape and public realm features	Commercial Strip. Continuous shopfronts. No setback to front boundary. Verandahs over footpath. Tree lined streets. Intimate and engaging public interface
Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting District Council of Yankalilla

Rapid Bay Historic Area Statement (Ya1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Statement#	Statement	
Ya1	Eras, themes and context	Rapid Bay is historically significant because of its connection with the first mainland landing by Colonel Light and his survey team in 1836 and has very strong connections and cultural significance for Aboriginal descendants being a popular fishing and summer occupation site, burial ground and Tjilbruke Dreaming site. 1948-1949 (School added in 1950). Encompasses housing established by BHP as part of mining/quarrying operations to the west as well as historic buildings and items at the southern end of the town. Rapid Bay's built character and landscape setting reflects the influence of BHP's extractive industry, which was established during the 1940s with the establishment of a limestone quarry, crushers and loading jetty. Houses were built for employees. At the peak of construction homes were built for BHP by Fricker Bros using local stone and Wattle Flat bricks. A further 16 houses were built during 1949/50 on the eastern side of the township and the primary school officially opened in 1950. BHP stopped operations in June, 1962, and sold houses on the eastern side of Rapid Bay for private ownership. Adelaide Brighton Cement recommenced quarry operations in 1982, providing local jobs and stone products for the Highways Department, local councils and private contractors amounting to 12,000 tonnes annually. The operations have resulted in moving the shore line westward, as 30% of screenings were deposited in the area. Consequently the setting of the township with company housing divided by the Yattogolinga Creek and school oval, has a unique landscape setting and character.
	Allotments, subdivision and built form patterns	Rapid Bay has two residential enclaves which are divided by Yattogolinga River and the town oval. The western section of the town is laid out around the main entrance road and comprises eighteen houses, a former general store and meeting hall. These are without individual subdivision allotments. The eastern section includes fifteen houses either side of Cygnet Place and the primary school. They are constructed on allotments of approximately the same size and are set back the same distance from the road. Allotment sizes provide narrower frontages at the end of the cul-de-sac.
	Architectural styles, detailing and built form features	Semi bungalow in design with painted hipped corrugated roofs, simple and return verandahs, windows surrounds comprising painted concrete lintels and window sills. The 15 houses in Cygnet Place were designed using one of six house plans prepared by BHP Limited. They are either five or six room dwellings and some have sleep-outs attached. On the western side, company dwellings range from simple detached, hipped or gable roof designs to a row of larger stone and brick houses with expansive verandahs facing the sea and overlooking the coastal area.
	Building height	All buildings in the township are of single storey, low scale character on generous allotments.
	Materials	Materials used in housing construction include varying combinations of red brick, concrete brick and stone or limestone.
	Fencing	There is a row of low rendered walls along the front of one group of allotments in Cygnet Place which overlook the sea, but all other allotments have wire mesh front fences and corrugated iron side and rear fences.
	Setting, landscaping, streetscape and public realm features	The streets are well treed, and although Norfolk Island pines are not the only species, they are the most dominant. The extension of the main entrance road which leads through the western residential area and then branches off towards the quarry is divided by a wide median strip in which Norfolk Island pines and pyramid trees have been planted alternately. About a third of the way along this street a road branches off towards the beach to provide access to the jetty, the foreshore caravan park and camping area and the eastern residential area. Trees have been planted along all these routes and the embankments along the roads have been planted with shrubs, flowers and ground cover. The mouth of the Yattagolina River, which is located near the junction of these three routes, is shallow and filled with reeds. The jetty and the quarry works dominate the western end of the beach.
	Representative Buildings	*[Not identified]*

Randalsea Historic Area Statement (Ya2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Ya2	Eras, themes and context	Established during the first phase of settlement (1836-1861). A sharp distinction is evident between the unformed groupings of buildings set within the township proper, and the bare hillsides surrounding the town. Randalsea comprises a small rural village founded in the 1836-1861 settlement period of SA around two industries- a steam mill and sawmilling. The historic significance of the village lies in the integrity, age and condition of the original buildings and landscape setting. The settlement's corner setting in Second Valley has been described as 'aesthetically one of the most pleasing heritage environments in South Australia'.
	Allotments, subdivision and built form patterns	Historic division pattern is maintained around the intersection of Main South Road and Finniss Vale Drive. A range of allotments of various configurations and sizes east and west of Main South Road.
	Architectural styles, detailing and built form features	A compact group of small scale, single storey cottages and buildings with randomly aligned frontages to the original road (Gamlen Place), with Randall's cottage and Palm House a former boarding house located west at a distance from the group. The Institute building, school house, school, and Florence's Guest House are higher set on the southern side of Finnis Vale Road. Leonard's Mill, with ancillary buildings is a visually dominant building on the eastern side of Main South Road. The former Mill is State Heritage listed.
	Building height	Predominantly single storey heights, in small scale buildings. The State Heritage listed Leonard's Mill provides a dominant element on the south-eastern side of Main South Road opposite Gamlen Place. Palm House presents a single storey appearance to Finnis Vale Drive but is two storey given the building is cut into the side of the slope that falls away from the road to the creek like north of the road.
	Materials	Dominant materials include stone walling, timber fenestration and entrances, slate flooring and corrugated iron roofing. More recent materials include colorbond roofing, mini-orb iron sheeting, brick and rendered surfaces. Evidence of early gum slab construction noted in outbuilding.
	Fencing	Minimal fencing retaining an open feel to the shared spatial arrangements of buildings and gardens. A section of existing stone walling on the

Statement#	Statement	
		southern side of the road intersection and some post and wire fencing maintains the informal and open spatial character of the village.
	Setting, landscaping, streetscape and public realm features	Randalsea is nestled at the bottom of the Parananacooka River at its junction with a smaller tributary. A scattered collection of buildings are located along the valley floor, with trees and grazing land rising steeply behind to the ridge lines which form a contrasting rural backdrop. The public realm includes a creek side reserve and higher level park with walkway in the vicinity of a fenced War Memorial set higher than the Finniss Vale Road.
	Representative Buildings	*[Not identified]*

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Historic Shipwrecks Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Historic shipwrecks and historic relics are protected from encroaching development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Development is located and designed to avoid potential impacts on historic shipwrecks and historic relics.	DTS/DPF 1.1 Development involving impact to the surface or subsoil of land or sea/river floor is not located: (a) seaward of the mean high water mark or (b) within 15m landward of the banks of the River Murray.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that may involve impact to the surface or subsoil of land or the floor of a sea, lake or river.	Minister responsible for the administration of the *Historic Shipwrecks Act 1981.*	To provide expert assessment and direction to the relevant authority on the potential impacts of development on, or in proximity to, historic shipwrecks or relics protected under the relevant Act.	Development of a class to which Schedule 9 clause 3 item 5 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Development that may involve impact to the surface or subsoil of land or sea floor, where located partly or fully within the 'adjacent area' of a historic shipwreck or historic relic within the meaning of the *Underwater Cultural Heritage Act 2018* (Commonwealth) as shown on the Historic Shipwrecks	Commonwealth Minister responsible for the administration of the *Underwater Cultural Heritage Act 2018* (Commonwealth).	To provide expert assessment and direction to the relevant authority on the potential impacts of development on, or in proximity to, historic shipwrecks or relics	Development of a class to which Schedule 9

Overlay.		protected under the relevant Act.	clause 3 item 6 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Interface Management Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development of sensitive receivers in a manner that mitigates potential adverse environmental and amenity impacts generated by the lawful operation of neighbouring and proximate land uses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Sensitive receivers are carefully sited and designed to mitigate adverse impacts of hazards, noise, dust, odour, light spill or other emissions from existing legally operating land uses through design techniques such as: (a) locating residential accommodation the greatest distance practicable from the source of the impacts (b) locating buildings containing non-sensitive receivers between the source of the impacts and sensitive receivers (c) placing rooms more sensitive to air, noise and odour impacts (e.g. bedrooms) further away from the source of the impacts (d) providing private or common open space adjacent a building elevation that shields the space from the source of the impacts.	DTS/DPF 1.1 None are applicable.

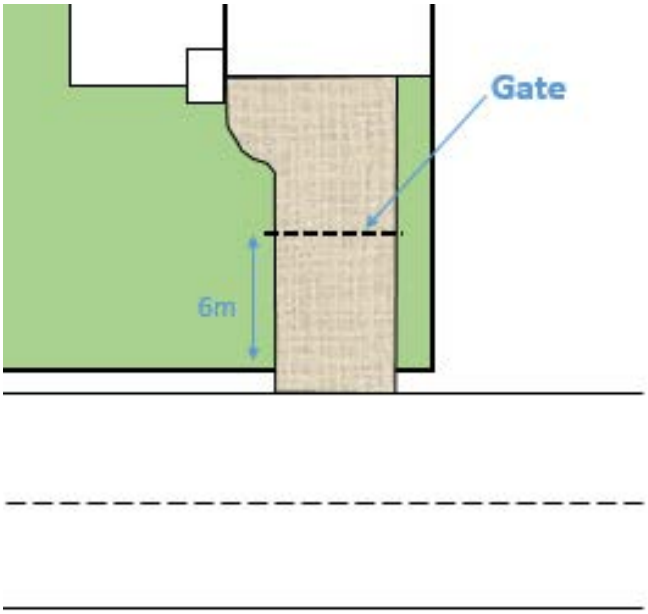
Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Key Outback and Rural Routes Overlay

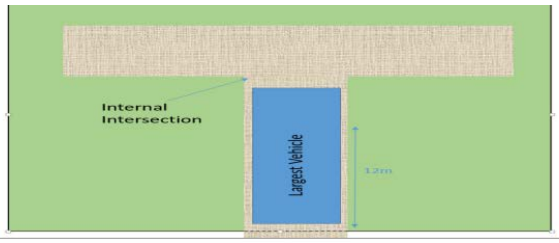
Assessment Provisions (AP)



Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient movement of vehicle and freight traffic on Key Outback and Rural Routes.
DO 2	Provision of safe and efficient vehicular access to and from Key Outback and Rural Routes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)



Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature

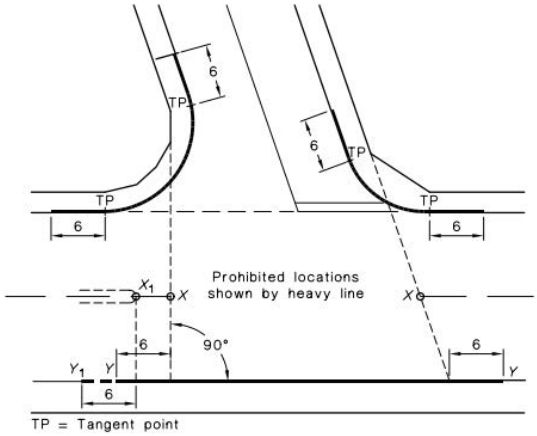
Access - Safe Entry and Exit (Traffic Flow)	
PO 1.1 Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State maintained roads.	DTS/DPF 1.1 An access point satisfies (a), (b) or (c): (a) where servicing a single dwelling / residential allotment: (i) it will not result in more than one access point (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 3m and 4m (measured at the site boundary). (b) where the development will result in 2 and up to 6 dwellings: (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site). (c) where the development will result in 7 or more dwellings, or is a non-residential land use: (i) it will not result in more than one access point servicing the development site (ii) where on a road with a speed limit of 80 km/h or greater vehicles can enter and exit the site using left turn only movements (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (v) it will have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less (vi) it will have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m (vii) it will have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m (viii) it provides for simultaneous two-way vehicle movements at the access: A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road and B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.
Access - On-Site Queuing	
PO 2.1 Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site to minimise interruption of the functional performance of the road and maintain safe vehicle movements.	DTS/DPF 2.1 An access point in accordance with one of the following: (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:

(b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and:
- (i) is expected to be serviced by vehicles with a length no greater than 6.4m
- (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site).

(c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and:
- (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle
- (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)
- (iii) any termination of or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop
- (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the largest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram:

Access - Location (Spacing) - Existing Access Points

PO 3.1	DTS/DPF 3.1
Existing access points designed to accommodate the type and volume of traffic likely to be generated by development.	An existing access point satisfies (a), (b) or (c): (a) it will not service, or is not intended to service, more than 6 dwellings (b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access (c) it is not located on a Controlled Access Road and development constitutes: (i) a change of use between an office <500m² gross leasable floor area and a consulting room <500m² gross leasable floor area or vice versa (ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment (iii) a change of use from a consulting room or office <250m² gross leasable floor area to shop <250m² gross leasable floor area (iv) a change of use from a shop <500m² gross leasable floor area to a warehouse <500m² gross leasable floor area (v) an office or consulting room with a gross leasable floor area <500m² (vi) a change of use from residential dwelling to a shop or office or consulting room or personal or domestic services establishment with <250m² gross leasable floor area.



Access - Location (Spacing) - New Access Points

PO 4.1	DTS/DPF 4.1

New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

A new access point satisfies (a), (b) or (c):

(a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:
The points marked X_1 and X are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension Y-Y extends to Point Y_1.

(b) where the development site is intended to serve between 1 and 6 dwellings, the new access:
- (i) is not located on a Controlled Access Road
- (ii) is not located on a section of road affected by double barrier lines
- (iii) will be on a road with a speed environment of 70km/h or less
- (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
- (v) is located a minimum of 6m from a median opening or pedestrian crossing.

(c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

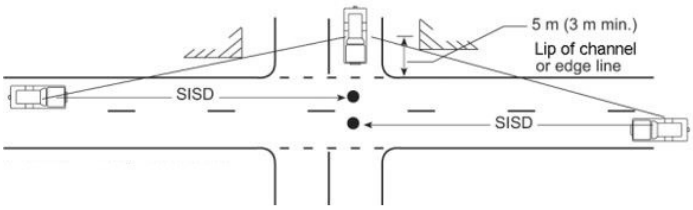
Speed Limit	Separation between access points	Separation from public road junctions and merging/terminating lanes
50 km/h or less	No spacing requirement	97m
60 km/h	5m (for development intended to serve between 1 and 6 dwellings) and 20m for all other cases	123m
70 km/h	55m	151m
80 km/h	70m	181m
90 km/h	90m	226m
100 km/h	110m	262m
110 km/h	135m	300m

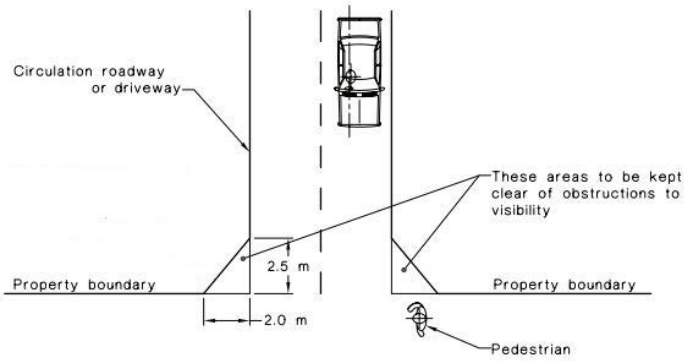
Access - Location (Sight Lines)

PO 5.1

Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.

DTS/DPF 5.1





An access point satisfies (a) and (c) or (b) and (c):

(a) the development site serves or is intended to serve between 1 and 6 dwellings and utilises an existing access point

or

(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

Speed Limit	Access Point serving 1-6 dwellings	Access point serving all other development
40 km/h or less	47m	73m
50 km/h	63m	97m
60 km/h	81m	123m
70 km/h	100m	151m
80 km/h	121m	181m
90 km/h	144m	226m
100 km/h	169m	262m
110km/h	195m	300m

	 and (c) pedestrian sightlines in accordance with the following diagram: 
Access - Mud and Debris	
PO 6.1 Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.	DTS/DPF 6.1 Where the road has an unsealed shoulder and the road is not kerbed, the access way is sealed from the edge of the seal on the road for a minimum of 10m or to the property boundary (whichever is closer).
Access - Stormwater	
PO 7.1 Access points are designed to minimise negative impact on roadside drainage of water.	DTS/DPF 7.1 Development does not: (a) decrease the capacity of an existing drainage point (b) restrict or prevent the flow of stormwater to an existing drainage point system (c) result in access points becoming stormwater flow paths directly onto the road.
Building on Road Reserve	
PO 8.1 Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users.	DTS/DPF 8.1 No encroachment of buildings or structures onto, above or below the road reserve.
Public Road Junctions	
PO 9.1 New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road opening conditions are maintained on the State Maintained Road.	DTS/DPF 9.1 Development does not comprise any of the following: (a) creating a new junction with a public road (b) opening an unmade public road junction (c) modifying an existing public road junction.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road: (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Key Railway Crossings Overlay

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe, efficient and uninterrupted operation of key railway crossings.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Access, Design and Function	
PO 1.1 Site access does not interfere or impact on the safe operation of a railway crossing.	DTS/DPF 1.1 Development does not involve a new or modified access or cause an increase in traffic through an existing access that is located within the following distance from a railway crossing: (a) 110 km/h road - 190m (b) 100 km/h road - 165m (c) 90 km/h road - 140m (d) 80 km/h road - 110m (e) 70 km/h road - 90m (f) 60 km/h road - 70m (g) 50km/h or less road - 50m

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Limited Dwelling Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Establishment of additional dwellings in primary production areas is limited to avoid undermining primary production.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Development does not result in the establishment of a dwelling.	DTS/DPF 1.1 A new dwelling replaces an existing dwelling within the same allotment.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference

None	None	None	None

Limited Land Division Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	The long term use of land for primary production is maintained by minimising fragmentation through division of land.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Land division does not result in the creation of an additional allotment.	DTS/DPF 1.1 No additional allotments are created.
PO 1.2 Land division involving boundary realignments occurs only where the number of resulting allotments with a site area less than that specified in the relevant Zone is not greater than the number that existed prior to the realignment.	DTS/DPF 1.2 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Local Heritage Place Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development maintains the heritage and cultural values of Local Heritage Places through conservation, ongoing use and adaptive reuse.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 The form of new buildings and structures maintains the heritage values of the Local Heritage Place.	DTS/DPF 1.1 None are applicable.
PO 1.2 Massing, scale and siting of development maintains the heritage values of the Local Heritage Place.	DTS/DPF 1.2 None are applicable.
PO 1.3 Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the Local Heritage Place.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is consistent with boundary setbacks and setting.	DTS/DPF 1.4 None are applicable.

PO 1.5 Materials and colours are either consistent with or complement the heritage values of the Local Heritage Place.	DTS/DPF 1.5 None are applicable.
PO 1.6 New buildings and structures are not placed or erected between the primary or secondary street boundaries and the façade of a Local Heritage Place.	DTS/DPF 1.6 None are applicable.
PO 1.7 Development of a Local Heritage Place retains features contributing to its heritage value.	DTS/DPF 1.7 None are applicable.
Alterations and Additions	
PO 2.1 Alterations and additions complement the subject building and are sited to be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the Local Heritage Place or its setting.	DTS/DPF 2.1 None are applicable.
PO 2.2 Adaptive reuse and revitalisation of Local Heritage Places to support their retention in a manner that respects and references the original use of the Local Heritage Place.	DTS/DPF 2.2 None are applicable.
Ancillary Development	
PO 3.1 Ancillary development, including carports, outbuildings and garages, complements the heritage values of the Local Heritage Place.	DTS/DPF 3.1 None are applicable.
PO 3.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line and does not dominate the Local Heritage Place or its setting.	DTS/DPF 3.2 None are applicable.
PO 3.3 Advertising and advertising hoardings are designed to complement the Local Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or its setting.	DTS/DPF 3.3 None are applicable.
PO 3.4 Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the Local Heritage Place.	DTS/DPF 3.4 None are applicable.
Land Division	
PO 4.1 Land division creates allotments that: (a) maintain the heritage values of the Local Heritage Place, including setting (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the Local Heritage Place.	DTS/DPF 4.1 None are applicable.
Landscape Context and Streetscape Amenity	
PO 5.1 Individually heritage listed trees, parks, historic gardens and memorial avenues are retained unless: (a) trees / plantings are, or have the potential to be, a danger to life or property or (b) trees / plantings are significantly diseased and their life expectancy is short.	DTS/DPF 5.1 None are applicable.
Demolition	
PO 6.1 Local Heritage Places are not demolished, destroyed or removed in total or in part unless: (a) the portion of the Local Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value or (b) the structural integrity or condition of the Local Heritage Place represents an unacceptable risk to public or private safety and is irredeemably beyond repair.	DTS/DPF 6.1 None are applicable.
PO 6.2 The demolition, destruction or removal of a building, portion of a building or other feature or attribute is appropriate where it does not contribute to the heritage values of the Local Heritage Place.	DTS/DPF 6.2 None are applicable.
Conservation Works	
PO 7.1	DTS/DPF 7.1

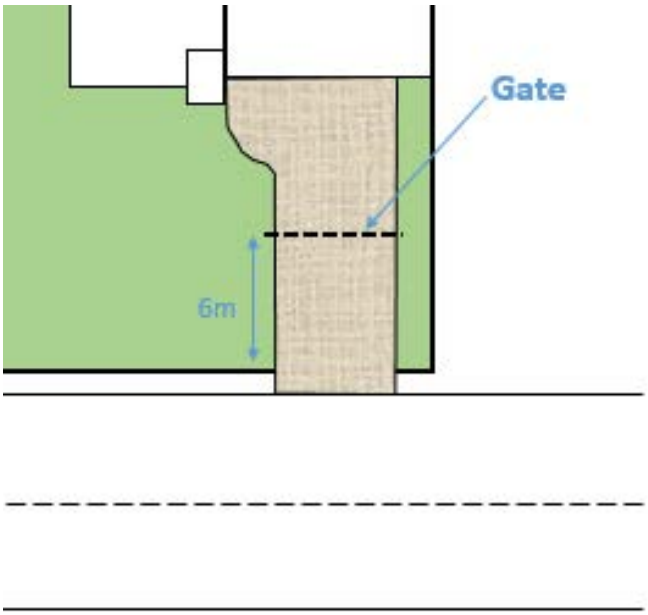
Conservation works to the exterior of a Local Heritage Place (and other features identified in the extent of listing) match original materials to be repaired and utilise traditional work methods.	None are applicable.

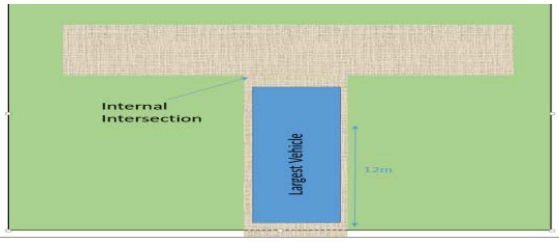
Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Major Urban Transport Routes Overlay





Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of Major Urban Transport Routes for all road users.
DO 2	Provision of safe and efficient access to and from Major Urban Transport Routes.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Access - Safe Entry and Exit (Traffic Flow)	
PO 1.1 Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State Maintained Roads.	DTS/DPF 1.1 An access point satisfies (a), (b) or (c): (a) where servicing a single (1) residential dwelling / residential allotment: (i) it will not result in more than one access point (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) have a width of between 3m and 4m (measured at the site boundary). (b) where the development will result in 2 and up to 6 dwellings: (i) it will not result in more than one access point servicing the development site (ii) entry and exit movements are left turn only (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees; (v) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (vi) have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site). (c) where the development will result in over 7 dwellings, or is a non-residential land use: (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site using left turn only movements (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (v) have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less (vi) have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m (vii) have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m (viii) provides for simultaneous two-way vehicle movements at the access; A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road and

	B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.
Access - On-Site Queuing	
PO 2.1 Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption of the functional performance of the road and maintain safe vehicle movements.	DTS/DPF 2.1 An access point in accordance with one of the following: (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:  (b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and: (i) is expected to be serviced by vehicles with a length no greater than 6.4m (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site). (c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and: (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) (iii) any termination of, or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the largest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram: 
Access – Location (Spacing) - Existing Access Points	
PO 3.1 Existing access points designed to accommodate the type and volume of traffic likely to be generated by the development.	DTS/DPF 3.1 An existing access point satisfies (a), (b) or (c): (a) it will not service, or is not intended to service, more than 6 dwellings (b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access (c) it is not located on a Controlled Access Road and development constitutes: (i) a change of use between an office <500m² gross leasable floor area and a consulting room <500m² gross leasable floor area or vice versa

(ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment

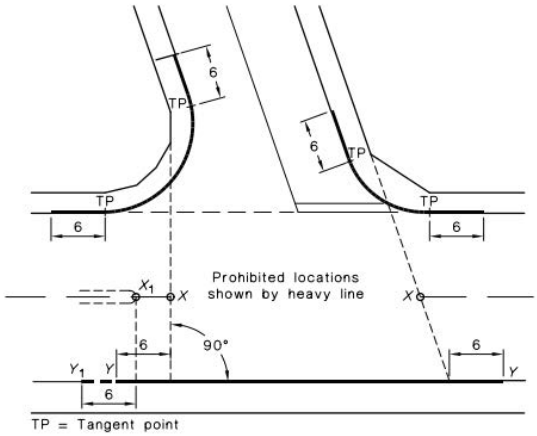
(iii) a change of use from a consulting room or office <250m² gross leasable floor area to shop <250m² gross leasable floor area

(iv) a change of use from a shop <500m² gross leasable floor area to a warehouse <500m² gross leasable floor area

(v) an office or consulting room with a gross leasable floor area <500m²

(vi) a change of use from residential dwelling to a shop, office, consulting room or personal or domestic services establishment with <250m² gross leasable floor area.

Access – Location (Spacing) – New Access Points



PO 4.1

New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1

A new access point satisfies (a), (b) or (c):

(a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:
The points marked X_1 and X are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension Y-Y extends to Point Y_1.

(b) where the development site is intended to serve between 1 and 6 dwellings, the new access:

(i) is not located on a Controlled Access Road

(ii) is not located on a section of road affected by double barrier lines

(iii) will be on a road with a speed environment of 70km/h or less

(iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)

(v) located minimum of 6m from a median opening or pedestrian crossing.

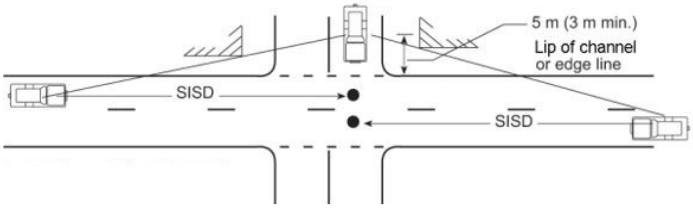
(c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

Speed Limit	Separation between access points	Separation from public road junctions and merging/terminating lanes
50 km/h or less	No spacing requirement	20m
60 km/h	5m (for development intended to serve between 1 and 6 dwellings) and 20m for all other cases	123m
70 km/h	55m	151m
80 km/h	70m	181m
90 km/h	90m	214m
100 km/h	110m	248m
110 km/h	135m	285m

Access - Location (Sight Lines)

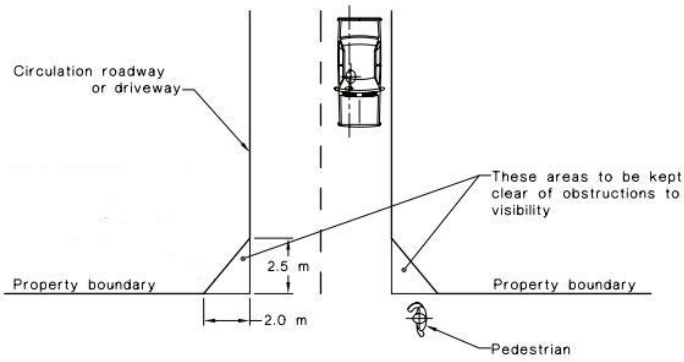
PO 5.1

Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.



DTS/DPF 5.1

An access point satisfies (a) and (c) or (b) and (c):



(a) the development site does or is intended to serve between 1 and 6 dwellings and utilises an existing access point
or

(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

Speed Limit	Access Point serving 1-6 dwellings	Access point serving all other development
40 km/h or less	47m	73m
50 km/h	63m	97m
60 km/h	81m	123m
70 km/h	100m	151m
80 km/h	121m	181m
90 km/h	144m	226m
100 km/h	169m	262m
110km/h	195m	300m

(c) pedestrian sightlines in accordance with the following diagram:

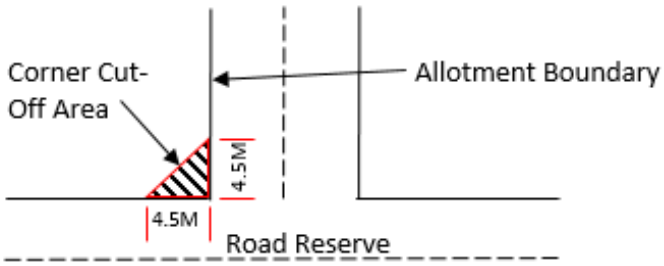
Access - Mud and Debris

PO 6.1	DTS/DPF 6.1
Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.	Where the road has an unsealed shoulder and the road is not kerbed the access way is sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer)

Access - Stormwater

PO 7.1	DTS/DPF 7.1
Access points designed to minimise negative impact on roadside drainage of water.	Development does not: (a) decrease the capacity of an existing drainage point (b) restrict or prevent the flow of stormwater to an existing drainage point and system (c) results in access points becoming stormwater flow paths directly onto the road.

Building on Road Reserve



PO 8.1	DTS/DPF 8.1
Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users.	No encroachment of buildings or structures onto, above or below the road reserve.

Public Road Junctions

PO 9.1	DTS/DPF 9.1
New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road operating conditions are maintained on the State Maintained Road.	Development does not comprise any of the following: (a) creating a new junction with a public road (b) opening an unmade public road junction (c) modifying an existing public road junction.

Corner Cut-Offs

PO 10.1	DTS/DPF 10.1
Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to driver safety.	Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram:

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road: (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Marine Parks (Managed Use) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Marine habitats and biodiversity are protected through limiting development to coastal infrastructure (jetties, marinas, pontoons), aquaculture, tourism, recreation and renewable energy facilities.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development avoids or minimises harm to marine habitats, biodiversity or the functioning of ecosystems.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Marine Parks (Restricted Use) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	High value marine habitats and biological diversity are protected.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development is limited to that required to support the ongoing operation of ports and harbours.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Mount Lofty Ranges Water Supply Catchment (Area 1) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safeguard Greater Adelaide's public water supply by ensuring development has a neutral or beneficial effect on the quality of water harvested from primary reservoirs or diversion weir catchments from the Mount Lofty Ranges.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Water Quality	
PO 1.1 Development results in a neutral or beneficial effect on the quality of water draining from the site to maintain and enhance the role of the catchment as a water supply.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into primary public water supply reservoirs and weirs.	DTS/DPF 1.2 Development does not involve any one or combination of the following: (a) aquaculture involving husbandry or supplementary feeding in a water flow through system (b) dairy except if a replacement dairy (c) organic waste processing facility (d) fuel depot (e) horticulture involving only market gardening or commercial turf growing (f) intensive animal husbandry (g) landfill (h) retail fuel outlet (i) special industry (j) stock sales yard (k) stock slaughter works (l) timber preservation works (m) waste recycling, storage or treatment facility (n) wrecking yard.
Wastewater	

PO 2.1 Development that generates trade or industrial wastewater is designed to ensure wastewater disposal avoids adverse impacts on the quality of water draining into primary public water supply reservoirs and weirs.	DTS/DPF 2.1 Development that generates trade or industrial wastewater is connected to a: (a) sewer or community wastewater management system with sufficient hydraulic and treatment capacity to accept the inflow, or (b) wastewater holding tank which has storage capacity of more than four days total flow during peak operations and is contained within an impervious, bunded area with a total liquid holding capacity of more than 120 percent of the total holding tank capacity, prior to transporting for off-site disposal.
PO 2.2 Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within primary reservoir and weir catchment areas.	DTS/DPF 2.2 Development, including alterations and additions, in combination with existing built form and activities within an allotment: (a) does not generate a combined total of more than 900 litres of wastewater per day, and (b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards or is otherwise connected to a sewerage or community wastewater management system.
PO 2.3 Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.	DTS/DPF 2.3 Development results in: (a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards or (a) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.
PO 2.4 Surface and groundwater protected from wastewater discharge pollution.	DTS/DPF 2.4 All components of an effluent disposal area are: (a) set back 50 metres or more from a watercourse (b) set back 100 metres or more from a public water supply reservoir (c) located on land with a slope no greater than 1-in-5 (20%) (d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table (e) above the 10% AEP flood level.
Stormwater	
PO 3.1 Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site.	DTS/DPF 3.1 None are applicable.
PO 3.2 Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution.	DTS/DPF 3.2 None are applicable.
PO 3.3 Polluted stormwater is treated prior to discharge from the site.	DTS/DPF 3.3 None are applicable.
PO 3.4 Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality.	DTS/DPF 3.4 Development includes: (a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings or (b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m^2.
PO 3.5 Stormwater from dwelling additions captured to protect water quality.	DTS/DPF 3.5 Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.
PO 3.6 Stormwater from shops and tourist accommodation is managed to protect water quality.	DTS/DPF 3.6 Shops and tourist accommodation satisfy all the following: (a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) are located 100m or more from public water supply reservoirs and diversion weirs (c) are located on land with a slope not exceeding 20% (d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L (e) includes swales that divert clean stormwater away from areas where it could be polluted.
PO 3.7	DTS/DPF 3.7

Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.	Horse keeping and low intensity animal husbandry satisfy all the following: (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) is located on land with a slope not exceeding 10% (c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L (d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted.
PO 3.8 Stormwater from horticulture is managed to protect water quality.	DTS/DPF 3.8 Horticulture satisfies all the following : (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) is located on land with a slope not exceeding 10% (d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted.
PO 3.9 Stormwater from excavated and filled areas is managed to protect water quality.	DTS/DPF 3.9 Excavation and/or filling satisfy all the following: (a) is located 50m or more from watercourses (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) does not involve excavation exceeding a vertical height of 0.75m (d) does not involve filling exceeding a vertical height of 0.75m (e) does not involve a total combined excavation and filling vertical height of 1.5m.
Landscapes and Natural Features	
PO 4.1 Development minimises the need to modify landscapes and natural features.	DTS/DPF 4.1 None are applicable.
Land Division	
PO 5.1 Land division does not result in an increased risk of pollution to surface or underground water.	DTS/DPF 5.1 Land division does not create additional allotments and satisfies (a) and/or (b): (a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures (b) is for realignment of allotment boundaries to improve management of the land for primary production and/or conservation of natural features.
PO 5.2 Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists.	DTS/DPF 5.2 None are applicable.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development that are not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure: (a) land division creating one or more additional allotments, either partly or wholly within the area of the overlay (b) function venue with more than 75 seats for customer dining purposes (c) restaurant with more than 40 seats for customer dining purposes (d) restaurant with more than 30 seats for customer dining purposes in association with a cellar door (e) dwelling where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned	Environment Protection Authority.	To provide expert technical assessment and direction to the relevant authority on whether a proposed development will have a neutral or beneficial impact on water quality.	Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

(f) tourist accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (g) workers' accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (h) any other development that generates human wastewater from a peak loading capacity of more than 40 persons (or more than 6,000 litres/day).			
Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period more than 200 tonnes of organic waste or matter (EPA Licence)			
Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period more than 2.5 ML of wastewater (EPA Licence required at more than 5ML)			
Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding			
Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units (EPA Licence required at 650 or more standard pig units)			
Dairies - carrying on of a dairy with a total processing capacity exceeding 100 milking animals at any one time.			

Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safeguard Greater Adelaide's public water supply by ensuring development has a neutral or beneficial effect on the quality of water harvested from secondary reservoirs or diversion weir catchments from the Mount Lofty Ranges.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Water Quality	
PO 1.1 Development results in a neutral or beneficial effect on the quality of water draining from the site to maintain and enhance the role of the catchment as a water supply.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into secondary public water supply reservoirs and weirs.	DTS/DPF 1.2 Development does not involve any one or combination of the following: (a) landfill (b) special industry.
Wastewater	

PO 2.1 Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within secondary reservoir and weir catchment areas.	DTS/DPF 2.1 Development including alterations and additions, in combination with existing built form and activities within an allotment: (a) do not generate a combined total of more than 1500 litres of wastewater per day and (b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards or is otherwise connected to a sewer or community wastewater management system.
PO 2.2 Dairy development is of a scale and design that will avoid adverse water quality impacts.	DTS/DPF 2.2 Dairy development satisfies all of the following: (a) is located at least 100 metres from any watercourse, dam, bore or well (b) is connected to a wastewater management system that is located 200 metres from any watercourse, dam, bore or well and is designed and constructed to avoid leakage to groundwater or overflow under extreme rainfall conditions (c) treated wastewater irrigation areas: (i) have a slope of less than 1-in-5 (20 percent) (ii) are greater than 100 metres from any watercourse, dam, bore or well are suitable to provide for seasonal wastewater irrigation without causing pollution of surface or groundwater.
PO 2.3 Development that generates trade or industrial wastewater is designed to ensure wastewater disposal avoids adverse impacts on the quality of water draining into secondary public water supply reservoirs and weirs.	DTS/DPF 2.3 Development that generates trade or industrial wastewater is connected to: (a) a sewer or community wastewater management system with sufficient hydraulic and treatment capacity to accept the inflow or (b) an on-site wastewater holding tank which has storage capacity of more than four days total flow during peak operations and is contained within an impervious, bunded area with a total liquid holding capacity of more than 120 percent of the total holding tank capacity, prior to transporting for off-site disposal.
PO 2.4 Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.	DTS/DPF 2.4 Development results in: (a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards or (b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.
PO 2.5 Surface and groundwater protected from wastewater discharge pollution.	DTS/DPF 2.5 All components of an effluent disposal area are: (a) setback 50 metres or more from a watercourse (b) setback 100 metres or more from a public water supply reservoir (c) located on land with a slope no greater than 1-in-5 (20%) (d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table (e) above the 10% AEP flood level.
Stormwater	
PO 3.1 Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site.	DTS/DPF 3.1 None are applicable.
PO 3.2 Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution.	DTS/DPF 3.2 None are applicable.
PO 3.3 Polluted stormwater is treated prior to discharge from the site.	DTS/DPF 3.3 None are applicable.
PO 3.4 Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality.	DTS/DPF 3.4 Development includes: (a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings or (b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m^2.
PO 3.5	DTS/DPF 3.5

Stormwater from dwelling additions captured to protect water quality.	Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.
PO 3.6 Stormwater from shops and tourist accommodation is managed to protect water quality.	DTS/DPF 3.6 Shops and tourist accommodation satisfy all the following: (a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) are located 100m or more from public water supply reservoirs and diversion weirs (c) are located on land with a slope not exceeding 20% (d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L (e) includes swales that divert clean stormwater away from areas where it could be polluted.
PO 3.7 Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.	DTS/DPF 3.7 Horse keeping and low intensity animal husbandry satisfy all the following: (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) is located on land with a slope not exceeding 10% (c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L (d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted.
PO 3.8 Stormwater from horticulture is managed to protect water quality.	DTS/DPF 3.8 Horticulture satisfies all the following: (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) is located on land with a slope not exceeding 10% (d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted.
PO 3.9 Stormwater from excavated and filled areas is managed to protect water quality.	DTS/DPF 3.9 Excavation and/or filling satisfy all the following: (a) is located 50m or more from watercourses (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) does not involve excavation exceeding a vertical height of 0.75m (d) does not involve filling exceeding a vertical height of 0.75m (e) does not involve a total combined excavation and filling vertical height of 1.5m.
Landscapes and Natural Features	
PO 4.1 Development minimises the need to modify landscapes and natural features.	DTS/DPF 4.1 None are applicable.
Land Division	
PO 5.1 Land division does not result in an increased risk of pollution to surface or underground water.	DTS/DPF 5.1 Land division does not create additional allotments and satisfies (a) and/or (b): (a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures or (b) is for realignment of allotment boundaries in order to improve management of the land for primary production and/or conservation of natural features.
PO 5.2 Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists.	DTS/DPF 5.2 None are applicable.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development that are not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure:	Environment Protection Authority.	To provide expert technical assessment and direction to the relevant authority on whether a proposed development will have a neutral or	Development of a class to which

(a) land division creating one or more additional allotments, either partly or wholly within the area of the overlay (b) function venue with more than 75 seats for customer dining purposes (c) restaurant with more than 40 seats for customer dining purposes (d) restaurant with more than 30 seats for customer dining purposes in association with a cellar door (e) dwelling where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (f) tourist accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (g) workers' accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (h) any other development that generates human wastewater from a peak loading capacity of more than 40 persons (or more than 6,000 litres/day)			
Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period more than 200 tonnes of organic waste or matter (EPA Licence)			
Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period more than 2.5 ML of wastewater (EPA Licence required at more than 5ML)			
Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding			
Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units (EPA Licence required at 650 or more standard pig units)			
Dairies - carrying on of a dairy with a total processing capacity exceeding 100 milking animals at any one time.			
		beneficial impact on water quality.	Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Murray-Darling Basin Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use in the Murray-Darling Basin area.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 All development, but in particular development involving: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) horse keeping (g) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in the Murray-Darling Basin.	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development that require, or may require water to be taken from the River Murray within the meaning of the *River Murray Act 2003* under a water licence required in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) horse keeping (g) commercial forestry.	Minister responsible for the administration of the *River Murray Act 2003*.	To provide expert technical assessment and direction to the relevant authority on matters regarding the taking of water, to ensure development is undertaken sustainably in the Murray-Darling Basin.	Development of a class to which Schedule 9 clause 3 item 10 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Native Vegetation Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Areas of native vegetation are protected, retained and restored in order to sustain biodiversity, threatened species and vegetation communities, fauna habitat, ecosystem services, carbon storage and amenity values.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Environmental Protection	
PO 1.1 Development avoids, or where it cannot be practically avoided, minimises the clearance of native vegetation taking into account the siting of buildings, access points, bushfire protection measures and building maintenance.	DTS/DPF 1.1 An application is accompanied by: (a) a declaration stating that the proposal will not, or would not, involve clearance of native vegetation under the Native Vegetation Act 1991, including any clearance that may occur: (i) in connection with a relevant access point and / or driveway (ii) within 10m of a building (other than a residential building or tourist accommodation) (iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control (iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area or

	(b) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the clearance is categorised as 'Level 1 clearance'.
PO 1.2 Native vegetation clearance in association with development avoids the following: (a) significant wildlife habitat and movement corridors (b) rare, vulnerable or endangered plants species (c) native vegetation that is significant because it is located in an area which has been extensively cleared (d) native vegetation that is growing in, or in association with, a wetland environment.	DTS/DPF 1.2 None are applicable.
PO 1.3 Intensive animal husbandry, commercial forestry and agricultural activities are sited, set back and designed to minimise impacts on native vegetation, including impacts on native vegetation in an adjacent State Significant Native Vegetation Area, from: (a) in the case of commercial forestry, the spread of fires from a plantation (b) the spread of pest plants and phytophthora (c) the spread of non-indigenous plants species (d) excessive nutrient loading of the soil or loading arising from surface water runoff (e) soil compaction (f) chemical spray drift.	DTS/DPF 1.3 Development within 500 metres of a boundary of a State Significant Native Vegetation Area does not involve any of the following: (a) horticulture (b) intensive animal husbandry (c) dairy (d) commercial forestry (e) aquaculture.
PO 1.4 Development restores and enhances biodiversity and habitat values through revegetation using locally indigenous plant species.	DTS/DPF 1.4 None are applicable.
Land division	
PO 2.1 Land division does not result in the fragmentation of land containing native vegetation, or necessitate the clearance of native vegetation, unless such clearance is considered minor, taking into account the location of allotment boundaries, access ways, fire breaks, boundary fencing and potential building siting or the like.	DTS/DPF 2.1 Land division where: (a) an application is accompanied by one of the following: (i) a declaration stating that none of the allotments in the proposed plan of division contain native vegetation under the *Native Vegetation Act 1991* (ii) a declaration stating that no native vegetation clearance under the *Native Vegetation Act 1991* will be required as a result of the division of land (iii) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the vegetation to be cleared is categorised as 'Level 1 clearance' or (b) an application for land division which is being considered concurrently with a proposal to develop each allotment which will satisfy, or would satisfy, the requirements of DTS/DPF 1.1, including any clearance that may occur or (c) the division is to support a Heritage Agreement under the Native Vegetation Act 1991 or the *Heritage Places Act 1993*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that is the subject of a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* that categorises the clearance, or potential clearance, as 'Level 3 clearance' or 'Level 4 clearance'.	Native Vegetation Council	To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation.	Development of a class to which Schedule 9 clause 3 item 11 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Noise and Air Emissions Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Community health and amenity is protected from adverse impacts of noise and air emissions.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting and Design	
PO 1.1 Sensitive receivers adjoining high noise and/or air pollution sources are designed and sited to shield sensitive receivers from the emission source using measures such as: (a) placing buildings containing non-sensitive receivers (such as retail and commercial) between the emission source and sensitive receivers (b) within individual buildings, placing rooms more sensitive to air quality and noise impacts (such as living rooms and bedrooms) further away from the emission source (c) providing appropriate separation or erecting noise attenuation barriers, provided the requirements for safety, urban design and access can be met (d) the use of building design elements such as podiums and jutting, deep or enclosed balconies (including with solid balustrades).	DTS/DPF 1.1 Sensitive receivers satisfy all of the following: (a) do not adjoin a: (i) Designated Road: Type A (ii) Designated Road Corridor: Type B (iii) Designated Road: Type R (iv) Train Corridor (v) Tram Corridor (b) adjoining development incorporating music includes noise attenuation measures to achieve a noise level in any bedroom exposed to music noise (L10) less than: (i) 8 dB above the level of background noise (L90,15 min) in any octave band of the sound spectrum; and (ii) 5 dB(A) above the level of background noise (LA90,15 min) for the overall (sum of all octave bands) A-weighted levels.
PO 1.2 Development incorporating a sensitive receiver adjoining high air pollution sources use building design elements such as varying building heights, widths, articulation, setbacks and shapes to increase wind turbulence and the dispersion of air pollutants.	DTS/DPF 1.2 Sensitive receivers do not adjoin any of the following: (a) Designated Road: Type A (b) Designated Road: Type B (c) Designated Road: Type R (d) Train Corridor (e) Tram Corridor.
PO 1.3 Development incorporating a sensitive receiver adjoining high noise and/or air pollution sources locates private open space (including ground level courtyards and balconies), common open space and outdoor play areas within educational facilities and child care facilities away from the emission source.	DTS/DPF 1.3 Open space associated with a sensitive receiver is not adjoining any of the following: (a) Designated Road: Type A (b) Designated Road: Type B (c) Designated Road: Type R (d) Train Corridor (e) Tram Corridor (f) Development incorporating music.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Non-Stop Corridors Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of non-stop corridors, where free-flowing traffic movement is prioritised.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Non-Stop Corridor Overlay	
PO 1.1 The safety, efficiency and functional performance of non-stop corridors is maintained.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a Non-Stop Corridor Road or within 25 metres of an intersection with any such road: (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Except where all of the relevant deemed-to-satisfy criteria are met, an advertisement or advertising hoarding that is on a Non-Stop Corridor Road or is on land abutting a Non-Stop Corridor Road and: (a) is within 100m of an on or off ramp to a Non-Stop Corridor Road as shown in the Non-Stop Corridors Overlay and (b) will: (i) be internally illuminated or (ii) incorporate a moving or changing display or message or (iii) incorporate a flashing light.	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Prescribed Surface Water Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use in prescribed surface water areas that maintains the health and natural flow paths of surface water.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.	DTS/DPF 1.1 None are applicable.
PO 1.2 All development, but in particular development involving any of the following:	DTS/DPF 1.2 Development satisfies either of the following:

(a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed surface water areas.	(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts surface water flowing over land.	Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development.	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent.	Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019:* (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry.	The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*.	To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably and maintains the health and natural flow paths of water resources.	Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*.			

Prescribed Watercourses Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Prescribed watercourses are protected by ensuring the taking of water from such watercourses is avoided or is undertaken in a sustainable manner that maintains the health and natural flow paths of the watercourses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 All development, but in particular development involving any of the following: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.

prescribed watercourses.	
PO 1.2 Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing in a prescribed watercourse is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.	DTS/DPF 1.2 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a prescribed watercourse.	Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development.	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent.	Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry.	The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*.	To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably.	Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*.			

Prescribed Water Resources Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use in prescribed water resources areas maintains the health and natural flow paths of surface water, watercourses and wells.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 All development, but in particular development involving any of the following: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas.	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.
PO 1.2	DTS/DPF 1.2

Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.	None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts surface water flowing over land.	Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development.	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent.	Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry	The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*.	To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably and maintains the health and natural flow paths of water resources.	Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*.			

Prescribed Wells Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use in prescribed wells areas.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 All development, but in particular involving any of the following: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed wells areas.	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019:* (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commerical forestry.	The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*.	To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably.	Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019.*			

Ramsar Wetlands Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection and restoration of Ramsar wetlands.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Development provides for the restoration and/or sustainable management of wetlands habitat.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development does not lead to significant negative impacts on Ramsar wetland habitat and its carbon capture and storage potential.	DTS/DPF 1.2 None are applicable.
PO 1.3 Development adjacent to Ramsar wetlands maintains or establishes landform and vegetated corridor links between Ramsar areas where possible.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is not detrimental to the hydrological regime of Ramsar wetlands taking into account the effects of climate change on rainfall and air temperature, including: (a) a change in volume, timing, duration and frequency of ground and surface water flows to and within the wetland (b) a change in the level of salinity, pollutants, nutrients or water temperature.	DTS/DPF 1.4 None are applicable.
PO 1.5 Development is designed to minimise the cumulative impacts on Ramsar wetlands from jetties, vegetation clearance and dredging.	DTS/DPF 1.5 None are applicable.
PO 1.6 Development does not result in the disruption of the breeding, feeding, migration or resting behaviour of an ecologically significant proportion of the population of a migratory or resident species.	DTS/DPF 1.6 None are applicable.
Land Division	
PO 2.1 Land division supports the management or improvement of the natural environment and does not result in any additional allotments within a Ramsar wetland.	DTS/DPF 2.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Regulated and Significant Tree Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Conservation of regulated and significant trees to provide aesthetic and environmental benefits and mitigate tree loss.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Tree Retention and Health	
PO 1.1 Regulated trees are retained where they: (a) make an important visual contribution to local character and amenity (b) are indigenous to the local area and listed under the *National Parks and Wildlife Act 1972* as a rare or endangered native species and / or (c) provide an important habitat for native fauna.	DTS/DPF 1.1 None are applicable.
PO 1.2 Significant trees are retained where they: (a) make an important contribution to the character or amenity of the local area (b) are indigenous to the local area and are listed under the *National Parks and Wildlife Act 1972* as a rare or endangered native species (c) represent an important habitat for native fauna (d) are part of a wildlife corridor of a remnant area of native vegetation (e) are important to the maintenance of biodiversity in the local environment and / or (f) form a notable visual element to the landscape of the local area.	DTS/DPF 1.2 None are applicable.
PO 1.3 A tree damaging activity not in connection with other development satisfies (a) and (b): (a) tree damaging activity is only undertaken to: (i) remove a diseased tree where its life expectancy is short (ii) mitigate an unacceptable risk to public or private safety due to limb drop or the like (iii) rectify or prevent extensive damage to a building of value as comprising any of the following: A. a Local Heritage Place B. a State Heritage Place C. a substantial building of value and there is no reasonable alternative to rectify or prevent such damage other than to undertake a tree damaging activity (iv) reduce an unacceptable hazard associated with a tree within 20m of an existing residential, tourist accommodation or other habitable building from bushfire (v) treat disease or otherwise in the general interests of the health of the tree and / or (vi) maintain the aesthetic appearance and structural integrity of the tree (b) in relation to a significant tree, tree-damaging activity is avoided unless all reasonable remedial treatments and measures have been determined to be ineffective.	DTS/DPF 1.3 None are applicable.
PO 1.4 A tree-damaging activity in connection with other development satisfies all the following: (a) it accommodates the reasonable development of land in accordance with the relevant zone or subzone where such development might not otherwise be possible	DTS/DPF 1.4 None are applicable.

(b) in the case of a significant tree, all reasonable development options and design solutions have been considered to prevent substantial tree-damaging activity occurring.	
Ground work affecting trees	
PO 2.1 Regulated and significant trees, including their root systems, are not unduly compromised by excavation and / or filling of land, or the sealing of surfaces within the vicinity of the tree to support their retention and health.	DTS/DPF 2.1 None are applicable.
Land Division	
PO 3.1 Land division results in an allotment configuration that enables its subsequent development and the retention of regulated and significant trees as far as is reasonably practicable.	DTS/DPF 3.1 Land division where: (a) there are no regulated or significant trees located within or adjacent to the plan of division or (b) the application demonstrates that an area exists to accommodate subsequent development of proposed allotments after an allowance has been made for a tree protection zone around any regulated tree within and adjacent to the plan of division.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Resource Extraction Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of current and future state significant resource extraction activities by ensuring development has regard to potential environmental and amenity impacts generated by the lawful operation of proximate mines and quarries.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Protection of Strategic Resources	
PO 1.1 Long-term availability of and ability to extract resources is maintained by ensuring development involving sensitive receivers is: (a) located away from areas which may be subject to unacceptable noise, dust or vibration emissions generated by current or future resource extraction activities or (b) able to adequately mitigate impacts of noise, dust or vibration emissions through design techniques such as: (i) locating residential accommodation the greatest distance practicable from the resource extraction activity (ii) placing buildings containing non-sensitive receivers between the resource extraction activity and sensitive receivers (iii) placing rooms more sensitive to air, noise and vibration impacts (e.g. bedrooms) further away from the resource extraction activity (iv) providing private or common open space adjacent a building facade that shields the space from impacts of the resource extraction activity.	DTS/DPF 1.1 Development does not incorporate: (a) a sensitive receiver or (b) alterations or additions to a sensitive receiver which increase the floor area of such buildings by 10% or more or (c) land division for the purposes of accommodating a sensitive receiver.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference

Where located within the area of the Resource Extraction Zone, all forms of development except: (a) where the development is deemed-to-satisfy or (b) where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral or (c) any of the following classes of development (i) agricultural building (ii) land division for the purpose of a boundary realignment where no additional allotments are created (iii) farming (iv) fence (v) horse keeping (vi) horticulture (vii) mushroom production (viii) protective tree netting structure.	Minister responsible for administering the Mining Acts.	To provide expert assessment and direction to the relevant authority on the potential for development to adversely impact upon the lawful continued operation of resource extraction operations.	Development of a class to which Schedule 9 clause 3 item 14 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Where located outside of the Resource Extraction Zone, the following forms of development (including land division creating additional allotments for such uses and alterations and additions which increase the floor area of buildings accommodating the following by 10% or more): (a) dwelling (b) residential flat building (c) tourist accommodation (d) boarding home (e) dormitory style accommodation (f) workers' accommodation (g) student accommodation (h) child care facility (i) educational facility (j) retirement facility (k) supported accommodation (l) residential park (m) hospital.			

River Murray Flood Plain Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Conservation and protection of water quality and the riverine environment, provision for environmental water flows, the protection of life and property against flood risk, and recognition of the riverine environment as an important ecological, tourist and recreational resource.
DO 2	Development for the purpose of recreation (e.g. landings, jetties, houseboat moorings) water extraction, wetland management and irrigation management (e.g. channel, pumping stand, flood gate).

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 All development, but in particular development involving any of the following: (a) activities requiring irrigation (b) aquaculture (c) commercial forestry (d) horse keeping (e) horticulture (f) industry (g) intensive animal husbandry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas.	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.

Wastewater	
PO 2.1 Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.	DTS/DPF 2.1 Development results in: (a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards or (b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer, community wastewater management system or wastewater holding tank that complies with relevant South Australian standards.
Dredging	
PO 3.1 Development is designed and sited in a manner that limits the need for dredging.	DTS/DPF 3.1 None are applicable.
Land Division	
PO 4.1 Land division does not lead to intensification of development.	DTS/DPF 4.1 Land division is: (a) limited to the creation of a public road or a public reserve or (b) for adjustment of allotment boundaries to remove an anomaly in the current boundaries with respect to the location of existing buildings or structures and does not result in an additional allotment.
PO 4.2 Boundary realignment for residential purposes preserves the integrity of public waterfront reserves.	DTS/DPF 4.2 Boundary realignment for residential purposes: (a) locates any new roads on the landward side of an existing dwelling (rather than between an existing dwelling and the public waterfront reserve) (b) provides a reserve 50m or more in width above pool level along the water frontage.
Built Form and Character	
PO 5.1 In the context of any measures required to mitigate against flood risk, buildings are sited and designed to be unobtrusive, particularly when viewed from the River Murray and nearby public roads.	DTS/DPF 5.1 Buildings: (a) do not exceed one building level in height (excluding elevation to minimise the potential for personal or property damage as a result of a flood) (b) in accordance with Figure 5: (i) have no floor level elevated 3m or more above natural ground level other than where the Finished Ground and Floor Levels Technical and Numeric Variation layer applies and would require the minimum finished floor level of the building to exceed 3m above natural ground level, in which case this is acceptable as outlined in DTS/DPF 6.1(a) (ii) have an overall roof height that does not exceed 5m above the elevated floor level described in DTS 5.1(b)(i) (c) are not closer than 50m to the waterfront (d) have associated electricity and telecommunications lines installed underground (e) in relation to outbuildings and agricultural buildings clad in sheet metal - are pre-colour treated or painted in a non-reflective colour.
PO 5.2 Outbuildings and agricultural buildings designed and sited to minimise their visibility from the waterfront and not dominate the appearance of public places.	DTS/DPF 5.2 Outbuildings and agricultural buildings: (a) clad in sheet metal are pre-colour treated or painted in a non-reflective colour (b) in the case of a site with a waterfront (including where there is an intervening public reserve), are not sited between the waterfront and the existing or proposed dwelling as demonstrated in Figure 7.
PO 5.3 Development setback from the River Murray and canals to establish a consistent character along a river front.	DTS/DPF 5.3 None are applicable.
PO 5.4 Limited use of retaining walls in the 1956 River Murray Flood Plain and in highly visible locations that can be viewed from public roads or the main channel of the River Murray to maintain the natural amenity and character along the river.	DTS/DPF 5.4 A retaining wall for one or more of the following purposes: (a) for the repair or replacement of a lawful retaining wall (b) to provide safe public access to the waterfront on public land (c) to protect structures and buildings of historic significance (d) to protect waterfront vegetation (e) is ancillary to a dwelling and will provide safe access to the waterfront from that dwelling (f) to protect a dwelling from material risk presented by erosion.
Flood Resilience	
PO 6.1	DTS/DPF 6.1

Habitable and other valuable buildings that may be adversely affected by floodwaters and fluctuating pool levels are elevated (or relocatable in the case of caravan and tourist parks) to protect property from damage.

Development incorporates finished ground and floor levels not less than the following, except where:

(a) it would require a finished floor level greater than 4m above natural ground level in which case 4m is an acceptable finished floor level
or
(b) it relates to habitable buildings within a caravan or tourist park which will be relocatable in the event of a flood:

Finished Ground and Floor Levels
Minimum finished floor level is 2.6m AHD
Minimum finished floor level is 20.4m AHD
Minimum finished floor level is 3m AHD

Minimum finished floor level is 7.41m AHD
Minimum finished floor level is 7.46m AHD
Minimum finished floor level is 8.56m AHD
Minimum finished floor level is 8.59m AHD
Minimum finished floor level is 8.71m AHD
Minimum finished floor level is 8.93m AHD
Minimum finished floor level is 9.02m AHD
Minimum finished floor level is 9.51m AHD
Minimum finished floor level is 9.55m AHD
Minimum finished floor level is 9.68m AHD
Minimum finished floor level is 9.77m AHD
Minimum finished floor level is 9.85m AHD
Minimum finished floor level is 4.64m AHD

In instances where no finished floor level value is specified, development incorporates a finished floor level at least 300mm above the height of a 1% AEP flood event except where:

(a) it would require a finished floor level greater than 4m above natural ground level in which case 4m is an acceptable finished floor level
or
(b) it relates to habitable buildings and structures within a caravan or tourist park which will be relocatable in the event of a flood.

PO 6.2

Development avoids the need for coast and river protection works through measures such as setbacks to protect development from coastal erosion, sea, river or stormwater flooding, sand drift or other coastal or riverine processes.

DTS/DPF 6.2

None are applicable.

PO 6.3

Dwellings and dwelling additions or alterations:

(a) do not impede floodwaters and fluctuating pool levels
(b) are designed and sited to mitigate against damage in the event of a flood.

DTS/DPF 6.3

Dwellings and additions or alterations to dwellings satisfy (a) or (b) and (c):

(a) are located outside the 1956 River Murray Flood Plain as shown in the Planning Reference layer in the South Australian Property and Planning Atlas
(b) are elevated and the undercroft area:
  (i) is wholly open (there are no enclosures)
  or
  (ii) where enclosed areas are proposed, such areas are in accordance with all of the following, as depicted in Figures 5 and 6:
    A. there are no habitable rooms
    B. each enclosed space does not include internal linings (excluding a wet area or lift facility) and is fitted with roller door(s) or similar (that are not glass) on each side of a width not less than 2.4m so the space can be easily opened during times of flood
    C. does not include more than one wet area and that wet area does not exceed $15m^2$
    D. the combined enclosed area (inclusive of a wet area but excluding a lift facility) does not exceed a total floor area of $60m^2$
    E. at least one third of the undercroft area remains open (not enclosed) from the principal waterfront elevation through to its opposite elevation.
(c) in the case of an existing dwelling with a habitable floor level at ground level, alterations and additions do not:
  (i) increase the total floor area of the dwelling to greater than 90 square metres, excluding:
    A. wet areas of up to 15 square metres, and
    B. any verandah, balcony or deck
  (ii) comprise the addition of a second building level.

PO 6.4

Outbuildings and agricultural buildings do not impede floodwaters and fluctuating pool levels.

DTS/DPF 6.4

Outbuildings and agricultural buildings are:

(a) fitted with roller doors, or similar (that are not glass) on two opposite ends or sides (whichever elevations face the direction of the river flow)
(b) constructed at natural ground level.

PO 6.5

DTS/DPF 6.5

Fencing does not impede floodwaters and fluctuating pool levels.	Fencing is of an open design such as post and wire strand construction.
Environmental Protection	
PO 7.1 Adverse impacts on the natural features and stability of the waterfront are minimised.	DTS/DPF 7.1 None are applicable.
PO 7.2 Development incorporates buffer areas to protect the river and associated natural features such as wetlands and native vegetation.	DTS/DPF 7.2 None are applicable.
PO 7.3 Modification to the natural landform, including land reclamation, is avoided or minimised to prevent impacts on natural features, natural flow paths, floodwaters and the stability of the waterfront.	DTS/DPF 7.3 None are applicable.
PO 7.4 Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are sited and designed to prevent environmental harm.	DTS/DPF 7.4 Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are located: (a) outside the 1956 River Murray Flood Plain (b) wholly within a bund that has storage capacity of 133% or more of the volume of the largest fuel storage tank.
PO 7.5 Facilities for the collection of effluent from moored vessels are sited and designed to prevent environmental harm.	DTS/DPF 7.5 None are applicable.
Access	
PO 8.1 Waterfront reserve areas between buildings and the water are maximised to preserve the amenity of view corridors along the riverine environment.	DTS/DPF 8.1 None are applicable.
PO 8.2 Public access routes to waterfront reserves are provided and maintained.	DTS/DPF 8.2 None are applicable.
PO 8.3 Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.	DTS/DPF 8.3 No more than 100mm excavation and 100mm of fill is required in association with the construction of a driveway, access track or parking area.
River Structures	
PO 9.1 River structures are located where they do not cause a hazard to safe navigation.	DTS/DPF 9.1 River structures are located: (a) wholly outside navigation channels as defined by navigational signs (b) 100m or more from either side of a ferry crossing (c) 150m or more from a lock.
PO 9.2 River structures are located where they do not cause a hazard to a designated recreation area for water skiing and swimming.	DTS/DPF 9.2 River structures are located wholly outside designated recreation areas for water skiing and swimming.
PO 9.3 Proliferation of water pumps is avoided to limit impact on the riverine environment.	DTS/DPF 9.3 None are applicable.
PO 9.4 Water pumping infrastructure is designed and constructed to limit impact on the riverine environment.	DTS/DPF 9.4 Water pumping infrastructure is designed and constructed in accordance with Figure 1.
PO 9.5 Proliferation of jetties and floating pontoons is avoided to minimise impact on the riverine environment.	DTS/DPF 9.5 Jetties and floating pontoons are: (a) ancillary to a dwelling (b) limited to one jetty or floating pontoon per dwelling (c) located on the same allotment as the associated dwelling or (d) are separated from the allotment (or lease site) accommodating the associated dwelling by a public reserve or a public road (but not both) or (e) are for the repair, maintenance or replacement of an existing licensed river structure.
PO 9.6 Jetties and floating pontoons are designed and constructed to limit impact on the riverine environment.	DTS/DPF 9.6 Jetties and floating pontoons:

	(a) extend not more than 8m into the river measured from the riverbank at normal pool level (b) have a width of not more than 1.4m in the case of a jetty (or gangway width in the case of a floating pontoon) (c) in the case of floating pontoons, do not exceed the dimensions 3m by 6m (d) maintain a minimum of 3m between river structures including other jetties and pontoons.
PO 9.7 A proliferation of boat ramps is avoided to minimise impact on the riverine environment.	DTS/DPF 9.7 The repair, maintenance or replacement of an existing licensed boat ramp.
PO 9.8 On-river mooring facilities are developed only where: (a) the mooring facility will not result in a mooring capacity exceeding one vessel per allotment (b) where the allotment has a direct frontage to the river (or is only separated by a public road or public reserve, but not both) and the allotment contains an existing dwelling (c) the width of the river is greater than 100m at normal pool level.	DTS/DPF 9.8 None are applicable.
PO 9.9 Moorings for vessels are located to avoid interfering with the operation or function of a ferry crossing, lock or major pumping station.	DTS/DPF 9.9 Moorings for vessels not located within: (a) 100m of either side of a ferry crossing (b) 150m of a lock (c) 400m of a major pumping station.
PO 9.10 Development of structures designed for the mooring of more than one vessel are located off-channel in a marina.	DTS/DPF 9.10 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral: (a) development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land (b) the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*: (i) horticulture (ii) activities requiring irrigation, other than irrigation used for domestic purposes (iii) aquaculture (iv) industry (v) intensive animal husbandry (vi) horse keeping (vii) commercial forestry (c) development that is within the ambit of clause 7 of Schedule 3 of the *Planning, Development and Infrastructure (General) Regulations 2017* (d) the construction of a building, or the undertaking of an act or activity specified in clause 3 of Schedule 3 of the *Planning, Development and Infrastructure (General) Regulations 2017*, other than where the development: (i) is the construction of a fence not exceeding 2m in height or (ii) is the construction of a carport, verandah, balcony, porch or other similar structure or (iii) is the construction of an enclosed shed, garage or similar outbuilding: A. that is ancillary to an existing building; and B. where the enclosed shed, garage or similar outbuilding will not have a total floor area of more than 150m^2; and C. that is located outside the 1956 River Murray Flood Plain or will be fitted with roller doors, or similar on two opposite ends or sides so as not to impede flood waters; and D. that will not be located closer to the River Murray than the building to which it is ancillary or (iv) is the construction of an agricultural building:	Minister responsible for administration of the *River Murray Act 2003.*	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health of the River Murray system, its natural flow regime (including floodwaters), water quality, and cultural heritage.	Development of a class to which Schedule 9 clause 3 item 15 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

A. that is located outside the 1956 River Murray Flood Plain or will be fitted with roller doors, or similar on two opposite ends or sides so as not to impede flood waters; and B. that is not closer than 200m to the River Murray; and C. that will not have a total floor area of more than: (A) 350m² within the Productive Rural Landscape Zone (B) 500m² within the Rural Zone or Rural Intensive Enterprise Zone (C) 250m² within any other zone or (v) comprises an alteration or extension of an existing dwelling that in the opinion of the relevant authority is minor and where any extension of the dwelling will not result in a part of the dwelling being closer to the River Murray or (vi) is the construction of an aboveground or inflatable swimming pool, or a spa pool, or an in-ground swimming pool located outside the 1956 River Murray Flood Plain or (vii) is the construction of a dwelling (or the alteration or extension of an existing dwelling) that is located outside the 1956 River Murray Flood Plain and not closer than 100m to the River Murray or (viii) is the construction of an elevated dwelling that is located within the Rural Shack Settlement Zone and has an open undercroft area or an undercroft area: A. that when enclosed, is enclosed on two opposite ends or sides using roller doors, or other material (that is not glass) that can be easily opened or removed during times of flood B. that is not a habitable room C. that will have enclosed areas for a toilet, shower or laundry facilities not exceeding a combined maximum floor area of 15m² (excluding any stairwell and/or lift shaft area) or (ix) is the construction of a transportable dwelling or cabin, or a removable annexe, within an existing caravan and tourist park (e) land division classified as restricted by the Planning and Design Code (f) land division that results in: (i) 4 or more additional allotments (ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment) or (iii) a mix of 4 or more additional allotments and separate grants of occupancy (g) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system (h) alteration of the boundaries of an allotment so as to result in: (i) the allotment having a frontage to a part of the River Murray system or (ii) the allotment having an increase in its frontage to a part of the River Murray system.			
Development that generates human wastewater from a peak loading capacity of more than 40 persons or more than 6000 litres/day and is not connected to a community wastewater management system or sewerage infrastructure.	Environment Protection Authority	To provide expert assessment and direction to the relevant authority on potential impacts to water quality in the River Murray system from pollutants discharged into any waters or onto land in a place that is reasonably likely to impact the quality of drinking water.	Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Any pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for 5 or more vessels at any 1 time			
Vessel refuelling facility			
Vessel sewage pump-out facility.			
Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period more than 200 tonnes of organic waste or matter. (EPA Licence)			
Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period, more than 2.5ML of wastewater. (EPA Licence required at more than 5 ML)			
Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12			

months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.			
Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units. (EPA licence required at 650 or more standard pig units)			
Dairies - being the carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time.

River Murray Tributaries Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use and conservation of riverine environments within the River Murray Tributaries area.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment and downstream users.	DTS/DPF 1.1 None are applicable.
PO 1.2 All development, but in particular development involving any of the following: (a) activities requiring irrigation (b) aquaculture (c) commercial forestry (d) horticulture (e) industry (f) intensive animal husbandry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas.	DTS/DPF 1.2 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.
Land Division	
PO 2.1 Land division does not lead to the intensification of development to a level that would have a negative impact on the health or natural flow paths of the River Murray Tributaries.	DTS/DPF 2.1 None are applicable.
PO 2.2 Land division, including boundary realignment, preserves the integrity of the public waterfront of the River Murray system by limiting the number of allotments having a frontage (or extent of frontage) to that system.	DTS/DPF 2.2 Land division does not result in any of the following: (a) an increase in allotments having a frontage to a part of the River Murray system (b) an increase in the frontage of an allotment or allotments to a part of the River Murray system.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral: (a) development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land (b) the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019:* (i) horticulture (ii) activities requiring irrigation, other than irrigation used for domestic purposes (iii) aquaculture (iv) intensive animal husbandry (v) horse keeping (vi) commercial forestry (c) land division classified as *restricted* by the Planning and Design Code (d) land division that results in: (i) 4 or more additional allotments or (ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment) or	Minister responsible for the administration of the *River Murray Act 2003.*	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health of the River Murray system, its natural flow regime (including floodwaters), water quality and cultural heritage.	Development of a class to which Schedule 9 clause 3 item 16 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

	(iii) a mix of 4 or more additional allotments and separate grants of occupancy (e) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system (f) alteration of the boundaries of an existing allotment so as to result in: (i) the allotment having a frontage to a part of the River Murray system or (ii) the allotment having an increase in its frontage to a part of the River Murray system.			

Scenic Quality Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development complements natural and rural character, and areas of scenic value.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Land uses that complement and enhance the natural and rural character.	DTS/DPF 1.1 None are applicable.
Built Form and Character	
PO 2.1 Development is carefully sited and designed to: (a) complement rural or natural character (b) minimise disruption to natural landform (c) integrate existing natural environmental features (d) minimise impacts on scenic features (e) be low-scale (f) be visually unobtrusive and blend in with the surrounding area	DTS/DPF 2.1 None are applicable.
Landscaping	
PO 3.1 Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration.	DTS/DPF 3.1 Landscaping plantings exclusively constitute locally indigenous plant species.
Earthworks	
PO 4.1 Excavation and filling of land is limited to that required to reduce the visual prominence of buildings and make provision for water storage facilities to maintain natural landforms and landscapes.	DTS/DPF 4.1 Excavation and/or filling is associated with a building or water storage facility and satisfies all of the following: (a) does not involve excavation exceeding a vertical height of 750mm (b) does not involve filling exceeding a vertical height of 750mm (c) does not involve a total combined excavation and filling vertical height of 1.5m (d) any scree slope is covered in topsoil and landscaped.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Significant Interface Management Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	The prevention of the establishment of new, and intensification of sensitive receivers to mitigate community exposure to potential adverse hazards and environmental and amenity impacts generated by the lawful operation of proximate significant activities.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Intensification of sensitive uses and / or sensitive receivers, inclusive of land division for either purpose, is not undertaken to avoid increasing resident or community exposure to potential adverse hazards or emissions unless: (a) each source of adverse hazard or emission has ceased operation or (b) it can be demonstrated that the site of the proposed development is not unreasonably impacted by the hazard or emissions from a relevant source, including as a result of environmental or operational improvements that have been or will be made to reduce the hazard or emissions from each source to an acceptable level.	DTS/DPF 1.1 Development does not comprise a sensitive use, sensitive receiver and / or land division for a sensitive use or sensitive receiver purpose unless: (a) it is a replacement dwelling where the total floor area is no greater than the existing or previous dwelling (b) each source of hazard and /or emissions has ceased to operate or has been superseded by another use such that it cannot be revived.
PO 1.2 Alterations and additions to sensitive receivers support ongoing activity without leading to an increase in resident or community exposure to unacceptable levels of hazard, noise, dust, odour or other emissions.	DTS/DPF 1.2 Alterations and additions where: (a) associated with a dwelling, do not increase the total floor area by more than 10% taking into account any previous alteration or addition (b) associated with any other sensitive receivers, do not increase the on-site capacity of the service or facility.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Significant Landscape Protection Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Conservation of the natural and rural character and scenic and cultural qualities of significant landscapes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Land use intensity is restrained to conserve and enhance natural and rural character.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development inconsistent with conserving significant natural and rural landscapes is not undertaken.	DTS/DPF 1.2 Development does not include any of the following (or any combination of any of the following):

	(a) renewable energy facility (other than roof mounted solar photovoltaic panels) (b) large-scale industry, storage, distribution, warehousing (c) intensive animal husbandry.
Built Form and Character	
PO 2.1 Development is carefully sited and designed to: (a) complement rural or natural character (b) minimise disruption to natural landform (c) integrate existing natural environmental features, including native vegetation (d) minimise impacts on wildlife habitat (e) be low-scale (f) be visually unobtrusive and blend in with the surrounding area (g) be located below ridge lines.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings and structures are limited to those that: (a) are ancillary, adjacent to, and of the same or lesser scale as existing buildings (b) support desired outcomes of the relevant zone or subzone (c) are used for the ancillary sale of produce associated with a pastoral or rural activity (d) are in the form of high-quality, nature-based tourist accommodation (e) are for rainwater storage (f) are for research or education purposes (g) support conservation or the interpretation of the environment or cultural features.	DTS/DPF 2.2 None are applicable.
Landscaping	
PO 3.1 Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration.	DTS/DPF 3.1 Landscaping plantings exclusively constitute locally indigenous plant species.
Earthworks	
PO 4.1 Excavation and filling of land is limited to that associated with: (a) minimising the visual impact of buildings (b) construction of water storage facilities.	DTS/DPF 4.1 Excavation and/or filling meets the following: (a) it is in connection with a building or water storage facility (b) does not involve excavation exceeding a vertical height of 0.75m (c) does not involve filling exceeding a vertical height of 0.75m (d) does not involve a total combined excavation and filling vertical height of 1.5m (e) any scree slope is covered in topsoil and landscaped with locally indigenous plant species.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

State Heritage Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development maintains the heritage and cultural values of State Heritage Areas through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993.
Note	Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993 can be found here

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	

PO 1.1 The form of new buildings and structures that are visible from the public realm are consistent with the heritage values and characteristics of the State Heritage Area.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development is consistent with the prevailing building and ceiling heights in the State Heritage Area.	DTS/DPF 1.2 None are applicable.
PO 1.3 Design and architectural detailing of street facing buildings is consistent with the prevailing characteristics expressed in the State Heritage Area.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is consistent with the prevailing front and side boundary setback pattern in the State Heritage Area.	DTS/DPF 1.4 None are applicable.
PO 1.5 Materials are consistent with or complement those within the State Heritage Area.	DTS/DPF 1.5 None are applicable.
Alterations and Additions	
PO 2.1 Alterations and additions complement the subject building and are sited to ensure they do not dominate the primary façade or streetscape and employ a contextual design approach.	DTS/DPF 2.1 None are applicable.
PO 2.2 Adaptive reuse and revitalisation of heritage buildings and places to support their retention in a manner that respects and references the heritage values of the State Heritage Area.	DTS/DPF 2.2 None are applicable.
Ancillary Development	
PO 3.1 Ancillary development, including carports, outbuildings and garages, complements the heritage values of the State Heritage Area.	DTS/DPF 3.1 None are applicable.
PO 3.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).	DTS/DPF 3.2 None are applicable.
PO 3.3 Advertising and advertising hoardings are designed to complement the State Heritage Area, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting of the State Heritage Area.	DTS/DPF 3.3 None are applicable
PO 3.4 Fencing and gates are consistent with the heritage values of the State Heritage Area.	DTS/DPF 3.4 None are applicable.
Land Division	
PO 4.1 Land division creates allotments that: (a) are compatible with the surrounding pattern of subdivision of the State Heritage Area (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Area.	DTS/DPF 4.1 None are applicable.
Landscape Context and Streetscape Amenity	
PO 5.1 Street trees, kerbing, footpaths and other features that contribute to the historic value of the State Heritage Area are maintained unless: (a) trees / plantings are, or have the potential to be, a danger to life or property or (b) trees / plantings are significantly diseased and their life expectancy is short.	DTS/DPF 5.1 None are applicable.
Demolition	
PO 6.1 Buildings and other features of identified heritage value within a State Heritage Area are not demolished, destroyed or removed in total or in part unless: (a) the portion of any building or other feature is determined to not contribute to the heritage value of the State Heritage Area or (b) the structural condition of the building represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair.	DTS/DPF 6.1 None are applicable.

Conservation Works	
PO 7.1 Conservation works to the exterior of buildings and other features of identified heritage value match original materials to be repaired and utilise traditional work methods.	DTS/DPF 7.1 Conservation works involving: (a) replacement of roof materials, guttering or downpipes with the same or substantially the same materials and detailing (b) replacement of timber building elements (structural or decorative) with the same or substantially the same material, dimension and detailing; or brick and stone repair/ repointing to match original.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where: (a) the development is to be undertaken in accordance with a Heritage Agreement under the Heritage Places Act 1993 or (b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral any of the following classes of development: (a) demolition of external building fabric and other features of identified heritage value within the State Heritage Area (b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare within the State Heritage Area (c) alterations or additions to buildings and other features of identified heritage value that: (i) are visible from a public street, road or thoroughfare within the State Heritage Area or (ii) are visually dominant within the State Heritage Area or (iii) involve substantive physical impact to the fabric of significant buildings (d) new buildings that: (i) are visible from a public street, road or thoroughfare within the State Heritage Area or (ii) are visually dominant within the State Heritage Area (e) conservation repair works that are not representative of 'like for like' maintenance (f) solar panels that are visible from a public street, road or thoroughfare within the State Heritage Area (g) land division (h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare within the State Heritage Area (i) the removal of an individual tree or a tree within a garden or park of identified heritage significance within the State Heritage Area.	Minister responsible for the administration of the *Heritage Places Act 1993*.	To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Areas.	Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

State Heritage Place Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development maintains the heritage and cultural values of State Heritage Places through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the *Heritage Places Act 1993*.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	

PO 1.1 The form of new buildings and structures maintains the heritage values of the State Heritage Place.	DTS/DPF 1.1 None are applicable.
PO 1.2 Massing, scale and siting of development maintains the heritage values of the State Heritage Place.	DTS/DPF 1.2 None are applicable.
PO 1.3 Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the State Heritage Place.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is consistent with boundary setbacks and setting.	DTS/DPF 1.4 None are applicable.
PO 1.5 Materials and colours are either consistent with or complement the heritage values of the State Heritage Place.	DTS/DPF 1.5 None are applicable.
PO 1.6 New buildings and structures are not placed or erected between the primary and secondary street boundaries and the façade of a State Heritage Place.	DTS/DPF 1.6 None are applicable.
PO 1.7 Development of a State Heritage Place retains elements contributing to its heritage value.	DTS/DPF 1.7 None are applicable.
Alterations and Additions	
PO 2.1 Alterations and additions complement the State Heritage Place and are sited to be unobtrusive, not conceal or obstruct heritage features and detailing, or dominate the State Heritage Place or its setting.	DTS/DPF 2.1 None are applicable.
PO 2.2 Adaptive reuse and revitalisation of State Heritage Places to support their retention in a manner that respects and references the original use of the State Heritage Place.	DTS/DPF 2.2 None are applicable.
Ancillary Development	
PO 3.1 Ancillary development, including carports, outbuildings and garages, complement the heritage values of the State Heritage Place.	DTS/DPF 3.1 None are applicable.
PO 3.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the State Heritage Place.	DTS/DPF 3.2 None are applicable.
PO 3.3 Advertising and advertising hoardings are designed and located to complement the State Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting.	DTS/DPF 3.3 None are applicable.
PO 3.4 Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the State Heritage Place.	DTS/DPF 3.4 None are applicable.
Land Division	
PO 4.1 Land division creates allotments that: (a) maintain the heritage values of the State Heritage Place, including setting (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Place.	DTS/DPF 4.1 None are applicable.
Landscape Context and Streetscape Amenity	
PO 5.1 Individually heritage listed trees, parks, historic gardens and memorial avenues retained unless: (a) trees / plantings are, or have the potential to be, a danger to life or property or (b) trees / plantings are significantly diseased and their life expectancy is short.	DTS/DPF 5.1 None are applicable.
Demolition	
PO 6.1	DTS/DPF 6.1

State Heritage Places are not demolished, destroyed or removed in total or in part unless either of the following apply: (a) the portion of the State Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value or (b) the structural condition of the State Heritage Place represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair.	None are applicable.
Conservation Works	
PO 7.1 Conservation works to the exterior and interior of a State Heritage Place and other features of identified heritage value match original materials to be repaired and utilise traditional work methods.	DTS/DPF 7.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where: (a) the development is to be undertaken in accordance with a Heritage Agreement under the *Heritage Places Act 1993* or (b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral any of the following classes of development: (a) demolition of internal or external significant building fabric (b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare that abuts the State Heritage Place (c) alterations or additions to buildings that: (i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place or (ii) may materially affect the context of a State Heritage Place or (iii) involve substantive physical impact to the fabric of significant buildings; (d) new buildings that: (i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place or (ii) may materially affect the context of the State Heritage Place (e) conservation repair works that are not representative of 'like for like' maintenance (f) solar panels that are visible from a public street, road or thoroughfare that abuts the State Heritage Place (g) land division (h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare that abuts the State Heritage Place (i) the removal of an individual tree or a tree within a garden or park of identified heritage significance.	Minister responsible for the administration of the *Heritage Places Act 1993*.	To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Places.	Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

State Significant Native Vegetation Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protect, retain and restore significant areas of native vegetation.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Environmental Protection	
PO 1.1 Development enhances biodiversity and habitat values through revegetation and avoiding native vegetation clearance except to promote an appreciation and awareness of wildlife areas, including visitor parking and amenities, or for the administration and management of a reserve or park established for the protection and conservation of wildlife.	DTS/DPF 1.1 An application is accompanied by either (a) or (b): (a) a declaration stating that the proposal will not , or would not, involve clearance of native vegetation under the *Native Vegetation Act 1991*, including any clearance that may occur: (i) in connection with a relevant access point and / or driveway (ii) within 10m of a building (other than a residential building or tourist accommodation) (iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control (iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area (b) a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* that confirms that the clearance is categorised as 'Level 1 clearance'.
Land division	
PO 2.1 Land division that contributes to the conservation, protection and enhancement of native vegetation.	DTS/DPF 2.1 Land division satisfies one of the following: (a) to create a public road or a public reserve where the application is accompanied by a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* in which the extent of native vegetation clearance proposed to be undertaken in connection with the division is categorised as 'Level 1 clearance' (b) to realign allotment boundaries to incorporate land into a park or reserve established under the *National Parks and Wildlife Act 1972*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
The following classes of development: (a) land division where a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* in connection with a development application categorises the clearance, or potential clearance, as 'Level 2 clearance', 'Level 3 clearance' or 'Level 4 clearance' (b) all other classes of development other than where DTS/DPF 1.1(a) or DTS/DPF 1.1(b) is achieved.	Native Vegetation Council	To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation.	Development of a class to which Schedule 9 clause 3 item 11 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Stormwater Management Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development incorporates water sensitive urban design techniques to capture and re-use stormwater.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Residential development is designed to capture and re-use stormwater to:	DTS/DPF 1.1 Residential development comprising detached, semi-detached or row dwellings, or less than

(a) maximise conservation of water resources
(b) manage peak stormwater runoff flows and volume to ensure the carrying capacities of downstream systems are not overloaded
(c) manage stormwater runoff quality.

5 group dwellings, co-located housing or dwellings within a residential flat building:

(a) includes rainwater tank storage:
  (i) connected to at least:
    A. in relation to a detached dwelling (not in a battle-axe arrangement), semi-detached dwelling or row dwelling, 60% of the roof area
    B. in all other cases, 80% of the roof area
  (ii) connected to either a toilet, laundry cold water outlets or hot water service for sites less than 200m^2
  (iii) connected to one toilet and either the laundry cold water outlets or hot water service for sites of 200m^2 or greater
  (iv) with a minimum total capacity in accordance with Table 1
  (v) where detention is required, includes a 20-25 mm diameter slow release orifice at the bottom of the detention component of the tank
(b) incorporates dwelling roof area comprising at least 80% of the site's impervious area

Table 1: Rainwater Tank

Site size (m^2)	Minimum retention volume (Litres)	Minimum detention volume (Litres)
<200	1000	1000
200-400	2000	Site perviousness <30%: 1000 Site perviousness ≥30%: N/A
>401	4000	Site perviousness <35%: 1000 Site perviousness ≥35%: N/A

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Traffic Generating Development Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of Urban Transport Routes and Major Urban Transport Routes for all road users.
DO 2	Provision of safe and efficient access to and from urban transport routes and major urban transport routes.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Traffic Generating Development	
PO 1.1 Development designed to minimise its potential impact on the safety, efficiency and functional performance of the State Maintained Road network.	DTS/DPF 1.1 Access is obtained directly from a State Maintained Road where it involves any of the following types of development: (a) building, or buildings, containing in excess of 50 dwellings (b) land division creating 50 or more additional allotments

	(c) commercial development with a gross floor area of 10,000m2 or more (d) retail development with a gross floor area of 2,000m2 or more (e) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more (f) industry with a gross floor area of 20,000m2 or more (g) educational facilities with a capacity of 250 students or more.
PO 1.2 Access points sited and designed to accommodate the type and volume of traffic likely to be generated by development.	DTS/DPF 1.2 Access is obtained directly from a State Maintained Road where it involves any of the following types of development: (a) building, or buildings, containing in excess of 50 dwellings (b) land division creating 50 or more additional allotments (c) commercial development with a gross floor area of 10,000m2 or more (d) retail development with a gross floor area of 2,000m2 or more (e) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more (f) industry with a gross floor area of 20,000m2 or more (g) educational facilities with a capacity of 250 students or more.
PO 1.3 Sufficient accessible on-site queuing provided to meet the needs of the development so that queues do not impact on the State Maintained Road network.	DTS/DPF 1.3 Access is obtained directly from a State Maintained Road where it involves any of the following types of development: (a) building, or buildings, containing in excess of 50 dwellings (b) land division creating 50 or more additional allotments (c) commercial development with a gross floor area of 10,000m2 or more (d) retail development with a gross floor area of 2,000m2 or more (e) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more (f) industry with a gross floor area of 20,000m2 or more (g) educational facilities with a capacity of 250 students or more.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, any of the following classes of development that are proposed within 250m of a State Maintained Road: (a) except where a proposed development has previously been referred under clause (b) - a building, or buildings, containing in excess of 50 dwellings (b) except where a proposed development has previously been referred under clause (a) - land division creating 50 or more additional allotments (c) commercial development with a gross floor area of 10,000m^2 or more (d) retail development with a gross floor area of 2,000m^2 or more (e) a warehouse or transport depot with a gross leasable floor area of 8,000m^2 or more (f) industry with a gross floor area of 20,000m^2 or more (g) educational facilities with a capacity of 250 students or more.	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Tunnel Protection Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO1	Development which preserves the integrity and operation of underground tunnel corridors and associated infrastructure.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development does not unsatisfactorily increase loading on underground tunnel corridors or infrastructure.	DTS/DPF 1.1 Development satisfies (a) and (b):

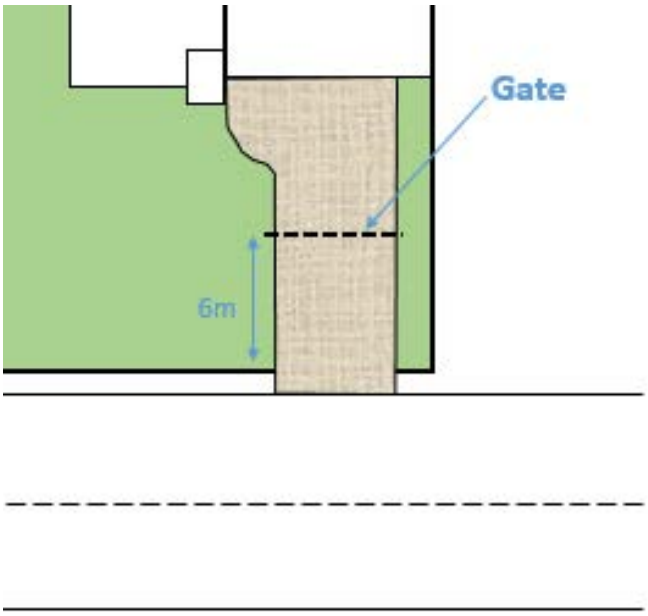
	(a) comprises one or more of the following, and does not exceed 3 building levels above the regulated surface level: (i) ancillary accommodation (ii) carport (iii) child care facility (iv) community facility (v) consulting room (vi) dwelling (vii) educational facility (viii) hotel (ix) office (x) outbuilding (xi) retirement facility (xii) shop (other than a bulky goods outlet) (xiii) student accommodation (xiv) supported accommodation (xv) tourist accommodation (xvi) verandah (xvii) development which is, in the opinion of the relevant authority, minor in nature or would not warrant a referral when considering the purpose of the referral. (b) does not include any of the following: (i) filling of land more than 1m above the regulated surface level (ii) storage of materials, equipment or vehicles (whether temporary or permanent) over an area exceeding 100 square metres (iii) temporary stockpiling of soil, gravel, rock or other natural material over an area exceeding 100 square metres.
Excavation and Ground Intruding Activity	
PO 2.1 Development does not unsatisfactorily interact with or reduce the loading on an underground tunnel corridors or infrastructure.	DTS/DPF 2.1 Development does not include excavation or ground intruding activity at a depth greater than 2.5 metres below the regulated surface level.

Procedural Matters (PM) - Referrals

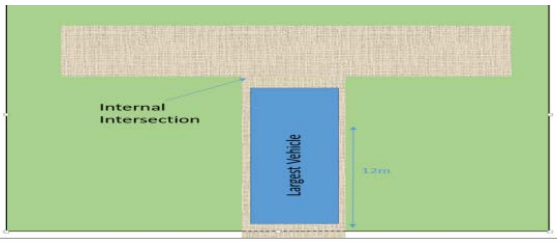
The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

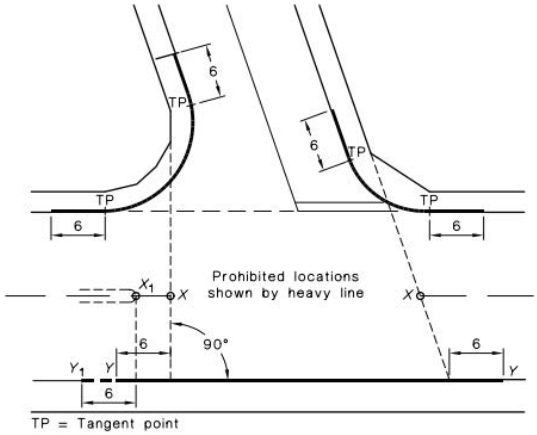
Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development that is within the Tunnel Protection Overlay.	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority in relation to the potential for development to adversely impact upon the safety and structural integrity of tunnels and associated underground infrastructure proposed by or under the care, control and management of the Commissioner of Highways.	Development of a class to which Schedule 9 clause 3 item 8 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Urban Transport Routes Overlay



Assessment Provisions (AP)





Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of Urban Transport Routes for all road users.
DO 2	Provision of safe and efficient access to and from Urban Transport Routes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Access - Safe Entry and Exit (Traffic Flow)	

PO 1.1	DTS/DPF 1.1
Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State maintained roads.	An access point satisfies (a), (b) or (c): (a) where servicing a single (1) dwelling / residential allotment: (i) it will not result in more than one access point (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 3m and 4m (measured at the site boundary) (b) where the development will result in 2 and up to 6 dwellings: (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site) (c) where the development will result in 7 or more dwellings, or is a non-residential land use: (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site using left turn only movements (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (v) it will have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less (vi) it will have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m (vii) it will have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m (viii) provides for simultaneous two-way vehicle movements at the access: A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road and B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.
Access - On-Site Queuing	
PO 2.1	DTS/DPF 2.1
Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption on the functional performance of the road and maintain safe vehicle movements.	An access point in accordance with one of the following: (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram: 

	(b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and: (i) is expected to be serviced by vehicles with a length no greater than 6.4m (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) (c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and: (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) (iii) any termination of or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the longest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram: 
Access - (Location Spacing) - Existing Access Point	
PO 3.1 Existing access points are designed to accommodate the type and volume of traffic likely to be generated by the development.	DTS/DPF 3.1 An existing access point satisfies (a), (b) or (c): (a) it will not service, or is not intended to service, more than 6 dwellings (b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access (c) is not located on a Controlled Access Road and development constitutes: (i) a change of use between an office <500m² gross leasable floor area and a consulting room <500m² gross leasable floor area or vice versa (ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment (iii) a change of use from a consulting room or office <250m² gross leasable floor area to shop <250m² gross leasable floor area (iv) a change of use from a shop <500m² gross leasable floor area to a warehouse <500m² gross leasable floor area (v) an office or consulting room with a <500m² gross leasable floor area (vi) a change of use from a residential dwelling to a shop, office, consulting room or personal or domestic services establishment with <250m² gross leasable floor area.
Access – Location (Spacing) – New Access Points	
PO 4.1 New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.	DTS/DPF 4.1 A new access point satisfies (a), (b) or (c): (a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:  NOTE: The points marked X_1 and X are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension Y-Y extends to Point Y_1.

(b) where the development site is intended to serve between 1 and 6 dwellings, the new access:

(i) is not located on a Controlled Access Road

(ii) is not located on a section of road affected by double barrier lines

(iii) will be on a road with a speed environment of 70km/h or less

(iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)

(v) is located a minimum of 6m from a median opening or pedestrian crossing

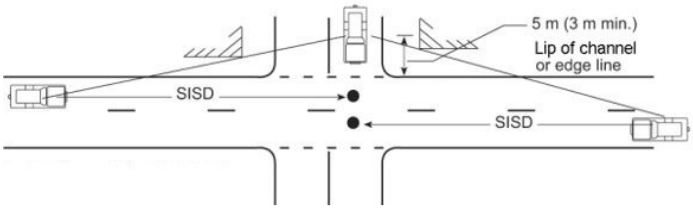
(c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

Speed Limit	Separation between access points	Separation from public road junctions and merging/terminating lanes
50 km/h or less	No spacing requirement	20m
60 km/h	5m (for development intended to serve between 1 and 6 dwellings) and 10m for all other cases	73m
70 km/h	40m	92m
80 km/h	50m	114m
90 km/h	65m	139m
100 km/h	80m	165m
110 km/h	100m	193m

Access - Location (Sight Lines)

PO 5.1

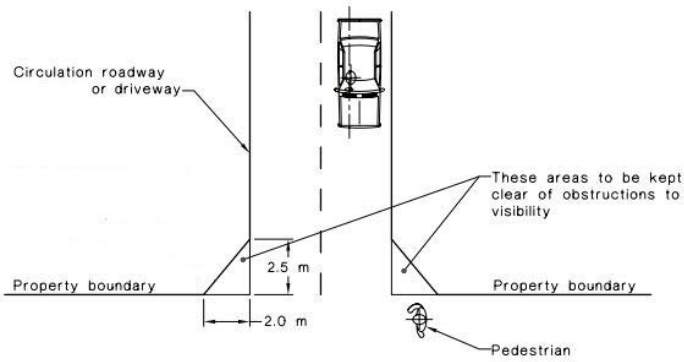
Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.



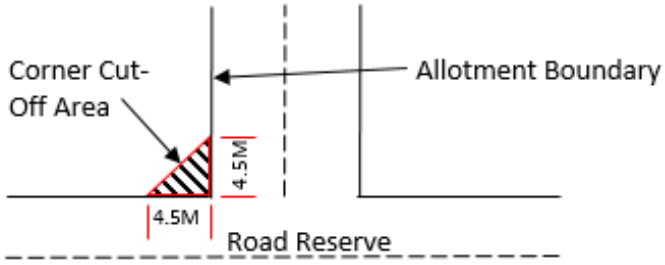
DTS/DPF 5.1

An access point satisfies (a) and (c) or (b) and (c):

(a) the development site does or is intended to serve between 1 and 6 dwellings and utilises an existing access point
or



(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):



Speed Limit	Access point serving 1-6 dwellings	Access point serving all other development
40 km/h or less	47m	73m
50 km/h	63m	97m
60 km/h	81m	123m
70 km/h	100m	151m
80 km/h	121m	181m
90 km/h	144m	226m
100 km/h	169m	262m
110km/h	195m	300m

and

(c) pedestrian sightlines in accordance with the following diagram:

Access – Mud and Debris	
PO 6.1 Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.	DTS/DPF 6.1 Where the road has an unsealed shoulder and the road is not kerbed, the access way is sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer).
Access - Stormwater	
PO 7.1 Access points are designed to minimise negative impact on roadside drainage of water.	DTS/DPF 7.1 Development does not: (a) decrease the capacity of an existing drainage point (b) restrict or prevent the flow of stormwater through an existing drainage point and system (c) result in access points becoming stormwater flow paths directly onto the road.
Building on Road Reserve	
PO 8.1 Buildings or structures that encroach onto, above or below road reserves are designed and sited to minimise impact on safe movements by all road users.	DTS/DPF 8.1 Buildings or structures are not located on, above or below the road reserve.
Public Road Junctions	
PO 9.1 New junctions with a public road (including the opening of unmade public road junctions) or modifications to existing road junctions are located and designed to ensure safe operating conditions are maintained on the State Maintained Road.	DTS/DPF 9.1 Development does not comprise any of the following: (a) creating a new junction with a public road (b) opening an unmade public road junction (c) modifying an existing public road junction.
Corner Cut-Offs	
PO 10.1 Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to driver safety.	DTS/DPF 10.1 Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram: 

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road: (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Urban Tree Canopy Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Residential development preserves and enhances urban tree canopy through the planting of new trees and retention of existing mature trees where practicable.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome

PO 1.1

Trees are planted or retained to contribute to an urban tree canopy.

Deemed-to-Satisfy Criteria / Designated Performance Feature

DTS/DPF 1.1

Tree planting is provided in accordance with the following:

Site size per dwelling (m^2)	Tree size* and number required per dwelling
<450	1 small tree
450-800	1 medium tree or 2 small trees
>800	1 large tree or 2 medium trees or 4 small trees

*refer Table 1 Tree Size

Table 1 Tree Size			
Tree size	Mature height (minimum)	Mature spread (minimum)	Soil area around tree within development site (minimum)
Small	4 m	2m	$10m^2$ and min. dimension of 1.5m
Medium	6 m	4 m	$30m^2$ and min. dimension of 2m
Large	12 m	8m	$60m^2$ and min. dimension of 4m

The discount in Column D of Table 2 discounts the number of trees required to be planted in DTS/DPF 1.1 where existing tree(s) are retained on the subject land that meet the criteria in Columns A, B and C of Table 2, and are not a species identified in Regulation 3F(4)(b) of the Planning Development and Infrastructure (General) Regulations 2017.

Table 2 Tree Discounts			
Retained tree height (Column A)	Retained tree spread (Column B)	Retained soil area around tree within development site (Column C)	Discount applied (Column D)
4-6m	2-4m	$10m^2$ and min. dimension of 1.5m	2 small trees (or 1 medium tree)
6-12m	4-8m	$30m^2$ and min. dimension of 3m	2 medium trees (or 4 small trees)
>12m	>8m	$60m^2$ and min. dimension of 6m	2 large trees (or 4 medium trees, or 8 small trees)

Note: In order to satisfy DTS/DPF 1.1, payment may be made in accordance with a relevant off-set scheme established by the Minister under section 197 of the Planning, Development and Infrastructure Act 2016, provided the provisions and requirements of that scheme are satisfied. For the purposes of section 102(4) of the Planning, Development and Infrastructure Act 2016, an applicant may elect for any of the matters in DTS/DPF 1.1 to be reserved.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Water Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safeguard South Australia's public water supplies and ecologically significant areas by protecting regionally and locally significant surface and underground water resources in Water Protection Areas from pollution. This includes considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development with potential to expose the water supply role of the Water Protection Area to significant adverse water quality risk is avoided to maintain the long term function of the Water Protection Area.	DTS/DPF 1.1 Development does not involve any one or combination of the following: (a) fuel depot (b) intensive animal husbandry (c) special industry (d) stock slaughter works (e) timber preservation works.
Groundwater	
PO 2.1 Groundwater resources are protected from pollution by ensuring development does not: (a) generate or dispose of waste in a manner that would pollute water resources (b) involve the storage or disposal of chemicals or hazardous substances in a manner that would pose a risk to water supplies.	DTS/DPF 2.1 None are applicable.
PO 2.2 Groundwater catchment and recharge characteristics are safeguarded by ensuring development: (a) retains and protects areas of native vegetation (b) does not inhibit the potential of an aquifer to recharge.	DTS/DPF 2.2 None are applicable.
Farming and Horticulture	
PO 3.1 Farming or horticulture operations occur only where: (a) the activity will not result in any increase in the salinity levels of groundwater (b) the land and soil structure is capable of supporting the proposed activity and the likelihood of soil erosion is minimised (c) the depth to the water table is greater than 2 metres from the ground.	DTS/DPF 3.1 None are applicable.
Irrigation	
PO 4.1 Irrigated areas are sited to ensure they: (a) avoid any land prone to waterlogging or subject to flooding through irrigation (b) avoid the risk of the water table falling or rising significantly as a result of irrigation practices (c) do not increase the salinity levels of groundwater (d) minimise the risk of polluting surface and groundwater resources where wastewater is used to irrigate the land.	DTS/DPF 4.1 None are applicable.
Wastewater	
PO 5.1 Wastewater-generating development utilises existing communal wastewater management	DTS/DPF 5.1 Development (including land division) that generates wastewater is connected to sewerage

infrastructure to avoid on-site disposal.	or community wastewater management systems with sufficient hydraulic capacity to accept the inflow.
PO 5.2 Development that generates wastewater which cannot be disposed of via sewerage or community wastewater management systems, is designed and of a scale that will enable on-site wastewater treatment and disposal in accordance with relevant health and environmental requirements.	DTS/DPF 5.2 On-site wastewater treatment systems comply with: (a) the 'On-site Wastewater Systems Code' or (b) AS/NZS 1547: On-site domestic wastewater management and the South Australian amendments to AS/NSZ 1547 as outlined in section 9.2 of the 'On-site Wastewater Systems Code'.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period, more than 200 tonnes of organic waste or matter. (EPA Licence)	Environment Protection Authority.	To provide expert Technical assessment and direction to the Relevant authority on the assessment of the potential harm from pollution and waste aspects arising from activities of environmental significance and other activities that have the potential to cause serious environmental harm.	Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period, more than 2.5ML of wastewater. (EPA Licence required at more than 5 ML)			
Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.			
Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units. (EPA licence required at 650 or more standard pig units)			
Dairies - being the carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time.			

Water Resources Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of the quality of surface waters considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change.
DO 2	Maintain the conveyance function and natural flow paths of watercourses to assist in the management of flood waters and stormwater runoff.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Water Catchment	
PO 1.1 Watercourses and their beds, banks, wetlands and floodplains (1% AEP flood extent) are not damaged or modified and are retained in their natural state, except where modification is required for essential access or maintenance purposes.	DTS/DPF 1.1 None are applicable.
PO 1.2	DTS/DPF 1.2

Development avoids interfering with the existing hydrology or water regime of swamps and wetlands other than to improve the existing conditions to enhance environmental values.	None are applicable.
PO 1.3 Wetlands and low-lying areas providing habitat for native flora and fauna are not drained, except temporarily for essential management purposes to enhance environmental values.	DTS/DPF 1.3 None are applicable.
PO 1.4 Watercourses, areas of remnant native vegetation, or areas prone to erosion that are capable of natural regeneration are fenced off to limit stock access.	DTS/DPF 1.4 None are applicable.
PO 1.5 Development that increases surface water run-off includes a suitably sized strip of vegetated land on each side of a watercourse to filter runoff to: (a) reduce the impacts on native aquatic ecosystems (b) minimise soil loss eroding into the watercourse.	DTS/DPF 1.5 A strip of land 20m or more wide measured from the top of existing banks on each side of the watercourse is free from development, livestock use and revegetated with locally indigenous vegetation.
PO 1.6 Development resulting in the depositing or placing of an object or solid material in a watercourse or lake occurs only where it involves any of the following: (a) the construction of an erosion control structure (b) devices or structures used to extract or regulate water flowing in a watercourse (c) devices used for scientific purposes (d) the rehabilitation of watercourses.	DTS/DPF 1.6 None are applicable.
PO 1.7 Watercourses, floodplains (1% AEP flood extent) and wetlands protected and enhanced by retaining and protecting existing native vegetation.	DTS/DPF 1.7 None are applicable.
PO 1.8 Watercourses, floodplains (1% AEP flood extent) and wetlands are protected and enhanced by stabilising watercourse banks and reducing sediments and nutrients entering the watercourse.	DTS/DPF 1.8 None are applicable.
PO 1.9 Dams, water tanks and diversion drains are located and constructed to maintain the quality and quantity of flows required to meet environmental and downstream needs.	DTS/DPF 1.9 None are applicable.

Procedural Matters (PM) - Referrals

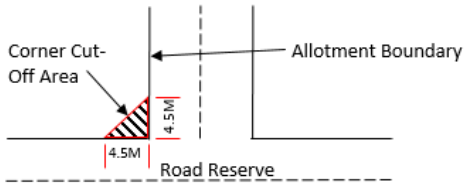
The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Part 4 - General Development Policies

Advertisements

Assessment Provisions (AP)



Desired Outcome (DO)

Desired Outcome	
DO 1	Advertisements and advertising hoardings are appropriate to context, efficient and effective in communicating with the public, limited in number to avoid clutter, and do not create hazard.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Appearance	

PO 1.1 Advertisements are compatible and integrated with the design of the building and/or land they are located on.	DTS/DPF 1.1 Advertisements attached to a building satisfy all of the following: (a) are not located in a Neighbourhood-type zone (b) where they are flush with a wall: (i) if located at canopy level, are in the form of a fascia sign (ii) if located above canopy level: A. do not have any part rising above parapet height B. are not attached to the roof of the building (c) where they are not flush with a wall: (i) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure (ii) if attached to a two-storey building: A. has no part located above the finished floor level of the second storey of the building B. does not protrude beyond the outer limits of any verandah structure below C. does not have a sign face that exceeds 1m2 per side. (d) if located below canopy level, are flush with a wall (e) if located at canopy level, are in the form of a fascia sign (f) if located above a canopy: (i) are flush with a wall (ii) do not have any part rising above parapet height (iii) are not attached to the roof of the building. (g) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure (h) if attached to a two-storey building, have no part located above the finished floor level of the second storey of the building (i) where they are flush with a wall, do not, in combination with any other existing sign, cover more than 15% of the building facade to which they are attached.
PO 1.2 Advertising hoardings do not disfigure the appearance of the land upon which they are situated or the character of the locality.	DTS/DPF 1.2 Where development comprises an advertising hoarding, the supporting structure is: (a) concealed by the associated advertisement and decorative detailing or (b) not visible from an adjacent public street or thoroughfare, other than a support structure in the form of a single or dual post design.
PO 1.3 Advertising does not encroach on public land or the land of an adjacent allotment.	DTS/DPF 1.3 Advertisements and/or advertising hoardings are contained within the boundaries of the site.
PO 1.4 Where possible, advertisements on public land are integrated with existing structures and infrastructure.	DTS/DPF 1.4 Advertisements on public land that meet at least one of the following: (a) achieves Advertisements DTS/DPF 1.1 (b) are integrated with a bus shelter.
PO 1.5 Advertisements and/or advertising hoardings are of a scale and size appropriate to the character of the locality.	DTS/DPF 1.5 None are applicable.
Proliferation of Advertisements	
PO 2.1 Proliferation of advertisements is minimised to avoid visual clutter and untidiness.	DTS/DPF 2.1 No more than one freestanding advertisement is displayed per occupancy.
PO 2.2 Multiple business or activity advertisements are co-located and coordinated to avoid visual clutter and untidiness.	DTS/DPF 2.2 Advertising of a multiple business or activity complex is located on a single advertisement fixture or structure.
PO 2.3 Proliferation of advertisements attached to buildings is minimised to avoid visual clutter and untidiness.	DTS/DPF 2.3 Advertisements satisfy all of the following: (a) are attached to a building (b) other than in a Neighbourhood-type zone, where they are flush with a wall, cover no more than 15% of the building facade to which they are attached (c) do not result in more than one sign per occupancy that is not flush with a wall.
Advertising Content	
PO 3.1 Advertisements are limited to information relating to the lawful use of land they are located on to assist in the ready identification of the activity or activities on the land and avoid unrelated content that contributes to visual clutter and untidiness.	DTS/DPF 3.1 Advertisements contain information limited to a lawful existing or proposed activity or activities on the same site as the advertisement.
Amenity Impacts	
PO 4.1	DTS/DPF 4.1

Light spill from advertisement illumination does not unreasonably compromise the amenity of sensitive receivers.	Advertisements do not incorporate any illumination.
Safety	
PO 5.1 Advertisements and/or advertising hoardings erected on a verandah or projecting from a building wall are designed and located to allow for safe and convenient pedestrian access.	DTS/DPF 5.1 Advertisements have a minimum clearance of 2.5m between the top of the footpath and base of the underside of the sign.
PO 5.2 Advertisements and/or advertising hoardings do not distract or create a hazard to drivers through excessive illumination.	DTS/DPF 5.2 No advertisement illumination is proposed.
PO 5.3 Advertisements and/or advertising hoardings do not create a hazard to drivers by: (a) being liable to interpretation by drivers as an official traffic sign or signal (b) obscuring or impairing drivers' view of official traffic signs or signals (c) obscuring or impairing drivers' view of features of a road that are potentially hazardous (such as junctions, bends, changes in width and traffic control devices) or other road or rail vehicles at/or approaching level crossings.	DTS/DPF 5.3 Advertisements satisfy all of the following: (a) are not located in a public road or rail reserve (b) are located wholly outside the land shown as 'Corner Cut-Off Area' in the following  diagram
PO 5.4 Advertisements and/or advertising hoardings do not create a hazard by distracting drivers from the primary driving task at a location where the demands on driver concentration are high.	DTS/DPF 5.4 Advertisements and/or advertising hoardings are not located along or adjacent to a road having a speed limit of 80km/h or more.
PO 5.5 Advertisements and/or advertising hoardings provide sufficient clearance from the road carriageway to allow for safe and convenient movement by all road users.	DTS/DPF 5.5 Where the advertisement or advertising hoarding is: (a) on a kerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 0.6m from the roadside edge of the kerb (b) on an unkerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 5.5m from the edge of the seal (c) on any other kerbed or unkerbed road, the advertisement or advertising hoarding is located a minimum of the following distance from the roadside edge of the kerb or the seal: (a) 110 km/h road - 14m (b) 100 km/h road - 13m (c) 90 km/h road - 10m (d) 70 or 80 km/h road - 8.5m.
PO 5.6 Advertising near signalised intersections does not cause unreasonable distraction to road users through illumination, flashing lights, or moving or changing displays or messages.	DTS/DPF 5.6 Advertising: (a) is not illuminated (b) does not incorporate a moving or changing display or message (c) does not incorporate a flashing light(s).

Animal Keeping and Horse Keeping

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Animals are kept at a density that is not beyond the carrying capacity of the land and in a manner that minimises their adverse effects on the environment, local amenity and surrounding development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting and Design	

PO 1.1 Animal keeping, horse keeping and associated activities do not create adverse impacts on the environment or the amenity of the locality.	DTS/DPF 1.1 None are applicable.
PO 1.2 Animal keeping and horse keeping is located and managed to minimise the potential transmission of disease to other operations where animals are kept.	DTS/DPF 1.2 None are applicable.
Horse Keeping	
PO 2.1 Water from stable wash-down areas is directed to appropriate absorption areas and/or drainage pits to minimise pollution of land and water.	DTS/DPF 2.1 None are applicable.
PO 2.2 Stables, horse shelters or associated yards are sited appropriate distances away from sensitive receivers and/or allotments in other ownership to avoid adverse impacts from dust, erosion and odour.	DTS/DPF 2.2 Stables, horse shelters and associated yards are sited in accordance with all of the following: (a) 30m or more from any sensitive receivers (existing or approved) on land in other ownership (b) where an adjacent allotment is vacant and in other ownership, 30m or more from the boundary of that allotment.
PO 2.3 All areas accessible to horses are separated from septic tank effluent disposal areas to protect the integrity of that system. Stable flooring is constructed with an impervious material to facilitate regular cleaning.	DTS/DPF 2.3 Septic tank effluent disposal areas are enclosed with a horse-proof barrier such as a fence to exclude horses from this area.
PO 2.4 To minimise environmental harm and adverse impacts on water resources, stables, horse shelters and associated yards are appropriately set back from a watercourse.	DTS/DPF 2.4 Stables, horse shelters and associated yards are set back 50m or more from a watercourse.
PO 2.5 Stables, horse shelters and associated yards are located on slopes that are stable to minimise the risk of soil erosion and water runoff.	DTS/DPF 2.5 Stables, horse shelters and associated yards are not located on land with a slope greater than 10% (1-in-10).
Kennels	
PO 3.1 Kennel flooring is constructed with an impervious material to facilitate regular cleaning.	DTS/DPF 3.1 The floors of kennels satisfy all of the following: (a) are constructed of impervious concrete (b) are designed to be self-draining when washed down.
PO 3.2 Kennels and exercise yards are designed and sited to minimise noise nuisance to neighbours through measures such as: (a) adopting appropriate separation distances (b) orientating openings away from sensitive receivers.	DTS/DPF 3.2 Kennels are sited 500m or more from the nearest sensitive receiver on land in other ownership.
PO 3.3 Dogs are regularly observed and managed to minimise nuisance impact on adjoining sensitive receivers from animal behaviour.	DTS/DPF 3.3 Kennels are sited in association with a permanent dwelling on the land.
Wastes	
PO 4.1 Storage of manure, used litter and other wastes (other than wastewater lagoons) is designed, constructed and managed to minimise attracting and harbouring vermin.	DTS/DPF 4.1 None are applicable.
PO 4.2 Facilities for the storage of manure, used litter and other wastes (other than wastewater lagoons) are located to minimise the potential for polluting water resources.	DTS/DPF 4.2 Waste storage facilities (other than wastewater lagoons) are located outside the 1% AEP flood event areas.

Aquaculture

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Aquaculture facilities are developed in an ecologically, economically and socially sustainable manner to support an equitable sharing of marine, coastal and inland resources and mitigate conflict with other water-based and land-based uses.

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land-based Aquaculture	
PO 1.1 Land-based aquaculture and associated components are sited and designed to mitigate adverse impacts on nearby sensitive receivers.	DTS/DPF 1.1 Land-based aquaculture and associated components are located to satisfy all of the following: (a) 200m or more from a sensitive receiver in other ownership (b) 500m or more from the boundary of a zone primarily intended to accommodate sensitive receivers or The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 1.2 Land-based aquaculture and associated components are sited and designed to prevent surface flows from entering ponds in a 1% AEP sea flood level event.	DTS/DPF 1.2 None are applicable.
PO 1.3 Land-based aquaculture and associated components are sited and designed to prevent pond leakage that would pollute groundwater.	DTS/DPF 1.3 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 1.4 Land-based aquaculture and associated components are sited and designed to prevent farmed species escaping and entering into any waters.	DTS/DPF 1.4 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 1.5 Land-based aquaculture and associated components, including intake and discharge pipes, are designed to minimise the need to traverse sensitive areas to minimise impact on the natural environment.	DTS/DPF 1.5 None are applicable.
PO 1.6 Pipe inlets and outlets associated with land-based aquaculture are sited and designed to minimise the risk of disease transmission.	DTS/DPF 1.6 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 1.7 Storage areas associated with aquaculture activity are integrated with the use of the land and sited and designed to minimise their visual impact on the surrounding environment.	DTS/DPF 1.7 None are applicable.
Marine Based Aquaculture	
PO 2.1 Marine aquaculture is sited and designed to minimise its adverse impacts on sensitive ecological areas including: (a) creeks and estuaries (b) wetlands (c) significant seagrass and mangrove communities (d) marine habitats and ecosystems.	DTS/DPF 2.1 None are applicable.
PO 2.2 Marine aquaculture is sited in areas with adequate water current to disperse sediments and dissolve particulate wastes to prevent the build-up of waste that may cause environmental harm.	DTS/DPF 2.2 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 2.3 Marine aquaculture is designed to not involve discharge of human waste on the site, on any adjacent land or into nearby waters.	DTS/DPF 2.3 The development does not include toilet facilities located over water.
PO 2.4 Marine aquaculture (other than inter-tidal aquaculture) is located an appropriate distance seaward of the high water mark.	DTS/DPF 2.4 Marine aquaculture development is located 100m or more seaward of the high water mark or The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 2.5 Marine aquaculture is sited and designed to not obstruct or interfere with: (a) areas of high public use (b) areas, including beaches, used for recreational activities such as swimming, fishing, skiing, sailing and other water sports	DTS/DPF 2.5 None are applicable.

(c) areas of outstanding visual or environmental value (d) areas of high tourism value (e) areas of important regional or state economic activity, including commercial ports, wharfs and jetties (f) the operation of infrastructure facilities including inlet and outlet pipes associated with the desalination of sea water.	
PO 2.6 Marine aquaculture is sited and designed to minimise interference and obstruction to the natural processes of the coastal and marine environment.	DTS/DPF 2.6 None are applicable.
PO 2.7 Marine aquaculture is designed to be as unobtrusive as practicable by incorporating measures such as: (a) using feed hoppers painted in subdued colours and suspending them as close as possible to the surface of the water (b) positioning structures to protrude the minimum distance practicable above the surface of the water (c) avoiding the use of shelters and structures above cages and platforms unless necessary to exclude predators and protected species from interacting with the farming structures and/or stock inside the cages, or for safety reasons (d) positioning racks, floats and other farm structures in unobtrusive locations landward from the shoreline.	DTS/DPF 2.7 None are applicable.
PO 2.8 Access, launching and maintenance facilities utilise existing established roads, tracks, ramps and paths to or from the sea where possible to minimise environmental and amenity impacts.	DTS/DPF 2.8 The development utilises existing established roads, tracks, ramps and/or paths (as applicable) to access the sea.
PO 2.9 Access, launching and maintenance facilities are developed as common user facilities and are co-located where practicable to mitigate adverse impacts on coastal areas.	DTS/DPF 2.9 The development utilises existing established roads, tracks, ramps and/or paths (as applicable) to access the sea.
PO 2.10 Marine aquaculture is sited to minimise potential impacts on, and to protect the integrity of, reserves under the *National Parks and Wildlife Act 1972*.	DTS/DPF 2.10 Marine aquaculture is located 1000m or more seaward of the boundary of any reserve under the *National Parks and Wildlife Act 1972*.
PO 2.11 Onshore storage, cooling and processing facilities do not impair the coastline and its visual amenity by: (a) being sited, designed, landscaped and of a scale to reduce the overall bulk and appearance of buildings and complement the coastal landscape (b) making provision for appropriately sited and designed vehicular access arrangements, including using existing vehicular access arrangements as far as practicable (c) incorporating appropriate waste treatment and disposal.	DTS/DPF 2.11 The development does not include any onshore facilities in conjunction with a proposal for marine aquaculture.
Navigation and Safety	
PO 3.1 Marine aquaculture sites are suitably marked to maintain navigational safety.	DTS/DPF 3.1 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 3.2 Marine aquaculture is sited to provide adequate separation between farms for safe navigation.	DTS/DPF 3.2 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
Environmental Management	
PO 4.1 Marine aquaculture is maintained to prevent hazards to people and wildlife, including breeding grounds and habitats of native marine mammals and terrestrial fauna, especially migratory species.	DTS/DPF 4.1 None are applicable.
PO 4.2 Marine aquaculture is designed to facilitate the relocation or removal of structures in the case of emergency such as oil spills, algal blooms and altered water flows.	DTS/DPF 4.2 None are applicable.
PO 4.3 Marine aquaculture provides for progressive or future reclamation of disturbed areas ahead of, or upon, decommissioning.	DTS/DPF 4.3 None are applicable.
PO 4.4 Aquaculture operations incorporate measures for the removal and disposal of litter, disused material, shells, debris, detritus, dead animals and animal waste to prevent pollution of waters, wetlands, or the nearby coastline.	DTS/DPF 4.4 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.

Beverage Production in Rural Areas

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Mitigation of potential amenity and environmental impacts of value-adding beverage production facilities such as wineries, distilleries, cideries and breweries.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Odour and Noise	
PO 1.1 Beverage production activities are designed and sited to minimise odour impacts on rural amenity.	DTS/DPF 1.1 None are applicable.
PO 1.2 Beverage production activities are designed and sited to minimise noise impacts on sensitive receivers.	DTS/DPF 1.2 None are applicable.
PO 1.3 Fermentation, distillation, manufacturing, storage, packaging and bottling activities occur within enclosed buildings to improve the visual appearance within a locality and manage noise associated with these activities.	DTS/DPF 1.3 None are applicable.
PO 1.4 Breweries are designed to minimise odours emitted during boiling and fermentation stages of production.	DTS/DPF 1.4 Brew kettles are fitted with a vapour condenser.
PO 1.5 Beverage production solid wastes are stored in a manner that minimises odour impacts on sensitive receivers in other ownership.	DTS/DPF 1.5 Solid waste from beverage production is collected and stored in sealed containers and removed from the site within 48 hours.
Water Quality	
PO 2.1 Beverage production wastewater management systems (including wastewater irrigation) are set back from watercourses to minimise adverse impacts on water resources.	DTS/DPF 2.1 Wastewater management systems are set back 50m or more from the banks of watercourses and bores.
PO 2.2 The storage or disposal of chemicals or hazardous substances is undertaken in a manner to prevent pollution of water resources.	DTS/DPF 2.2 None are applicable.
PO 2.3 Stormwater runoff from areas that may cause contamination due to beverage production activities (including vehicle movements and machinery operations) is drained to an onsite stormwater treatment system to manage potential environmental impacts.	DTS/DPF 2.3 None are applicable.
PO 2.4 Stormwater runoff from areas unlikely to cause contamination by beverage production and associated activities (such as roof catchments and clean hard-paved surfaces) is diverted away from beverage production areas and wastewater management systems.	DTS/DPF 2.4 None are applicable.
Wastewater Irrigation	
PO 3.1 Beverage production wastewater irrigation systems are designed and located to not contaminate soil and surface and ground water resources or damage crops.	DTS/DPF 3.1 None are applicable.
PO 3.2 Beverage production wastewater irrigation systems are designed and located to minimise impact on amenity and avoid spray drift onto adjoining land.	DTS/DPF 3.2 Beverage production wastewater is not irrigated within 50m of any dwelling in other ownership.
PO 3.3 Beverage production wastewater is not irrigated onto areas that pose an undue risk to the environment or amenity such as:	DTS/DPF 3.3 None are applicable.

(a) waterlogged areas (b) land within 50m of a creek, swamp or domestic or stock water bore (c) land subject to flooding (d) steeply sloping land (e) rocky or highly permeable soil overlaying an unconfined aquifer.	

Bulk Handling and Storage Facilities

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Facilities for the bulk handling and storage of agricultural, mineral, petroleum, rock, ore or other similar commodities are designed to minimise adverse impacts on transport networks, the landscape and surrounding land uses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting and Design	
PO 1.1 Bulk handling and storage facilities are sited and designed to minimise risks of adverse air quality and noise impacts on sensitive receivers.	DTS/DPF 1.1 Facilities for the handling, storage and dispatch of commodities in bulk (excluding processing) meet the following minimum separation distances from sensitive receivers: (a) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility (including sea-port grain terminals), where the handling of these materials into or from vessels does not exceed 100 tonnes per day: 300m or more from residential premises not associated with the facility (b) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility: 300m or more from residential premises not associated with the facility (c) bulk petroleum storage involving individual containers with a capacity up to 200 litres and a total on-site storage capacity not exceeding 1,000 cubic metres: 500m or more (d) coal handling with: a. capacity up to 1 tonne per day or a storage capacity up to 50 tonnes: 500m or more b. capacity exceeding 1 tonne per day but not exceeding 100 tonnes per day or a storage capacity exceeding 50 tonnes but not exceeding 5000 tonnes: 1000m or more.
Buffers and Landscaping	
PO 2.1 Bulk handling and storage facilities incorporate a buffer area for the establishment of dense landscaping adjacent road frontages to enhance the appearance of land and buildings from public thoroughfares.	DTS/DPF 2.1 None are applicable.
PO 2.2 Bulk handling and storage facilities incorporate landscaping to assist with screening and dust filtration.	DTS/DPF 2.2 None are applicable.
Access and Parking	
PO 3.1 Roadways and vehicle parking areas associated with bulk handling and storage facilities are designed and surfaced to control dust emissions and prevent drag out of material from the site.	DTS/DPF 3.1 Roadways and vehicle parking areas are sealed with an all-weather surface.
Slipways, Wharves and Pontoons	
PO 4.1 Slipways, wharves and pontoons used for the handling of bulk materials (such as fuel, oil, catch, bait and the like) incorporate catchment devices to avoid the release of materials into adjacent waters.	DTS/DPF 4.1 None are applicable.

Clearance from Overhead Powerlines

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of human health and safety when undertaking development in the vicinity of overhead transmission powerlines.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Buildings are adequately separated from aboveground powerlines to minimise potential hazard to people and property.	DTS/DPF 1.1 One of the following is satisfied: (a) a declaration is provided by or on behalf of the applicant to the effect that the proposal would not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* (b) there are no aboveground powerlines adjoining the site that are the subject of the proposed development.

Design

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is: (a) contextual - by considering, recognising and carefully responding to its natural surroundings or built environment and positively contributes to the character of the immediate area (b) durable - fit for purpose, adaptable and long lasting (c) inclusive - by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access, and promoting the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors (d) sustainable - by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All development	
External Appearance	
PO 1.1 Buildings reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).	DTS/DPF 1.1 None are applicable.
PO 1.2 Where zero or minor setbacks are desirable, development provides shelter over footpaths (in the form of verandahs, awnings, canopies and the like, with adequate lighting) to positively contribute to the walkability, comfort and safety of the public realm.	DTS/DPF 1.2 None are applicable.
PO 1.3 Building elevations facing the primary street (other than ancillary buildings) are designed and detailed to convey purpose, identify main access points and complement the streetscape.	DTS/DPF 1.3 None are applicable.
PO 1.4 Plant, exhaust and intake vents and other technical equipment is integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by: (a) positioning plant and equipment in unobtrusive locations viewed from public roads and spaces (b) screening rooftop plant and equipment from view (c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses.	DTS/DPF 1.4 Development does not incorporate any structures that protrude beyond the roofline.
PO 1.5 The negative visual impact of outdoor storage, waste management, loading and service areas	DTS/DPF 1.5 None are applicable.

is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form) taking into account the form of development contemplated in the relevant zone.	
Safety	
PO 2.1 Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is designed to differentiate public, communal and private areas.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings are designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development at street level is designed to maximise opportunities for passive surveillance of the adjacent public realm.	DTS/DPF 2.4 None are applicable.
PO 2.5 Common areas and entry points of buildings (such as the foyer areas of residential buildings), and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.	DTS/DPF 2.5 None are applicable.
Landscaping	
PO 3.1 Soft landscaping and tree planting is incorporated to: (a) minimise heat absorption and reflection (b) maximise shade and shelter (c) maximise stormwater infiltration (d) enhance the appearance of land and streetscapes (e) contribute to biodiversity.	DTS/DPF 3.1 None are applicable.
PO 3.2 Soft landscaping and tree planting maximises the use of locally indigenous plant species, incorporates plant species best suited to current and future climate conditions and avoids pest plant and weed species.	DTS/DPF 3.2 None are applicable.
Environmental Performance	
PO 4.1 Buildings are sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces.	DTS/DPF 4.1 None are applicable.
PO 4.2 Buildings are sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling.	DTS/DPF 4.2 None are applicable.
PO 4.3 Buildings incorporate climate-responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells.	DTS/DPF 4.3 None are applicable.
Water Sensitive Design	
PO 5.1 Development is sited and designed to maintain natural hydrological systems without negatively impacting: (a) the quantity and quality of surface water and groundwater (b) the depth and directional flow of surface water and groundwater (c) the quality and function of natural springs.	DTS/DPF 5.1 None are applicable.
On-site Waste Treatment Systems	
PO 6.1 Dedicated on-site effluent disposal areas do not include any areas to be used for, or could be reasonably foreseen to be used for, private open space, driveways or car parking.	DTS/DPF 6.1 Effluent disposal drainage areas do not: (a) encroach within an area used as private open space or result in less private open space than that specified in Design Table 1 - Private Open Space (b) use an area also used as a driveway

	(c) encroach within an area used for on-site car parking or result in less on-site car parking than that specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.
Carparking Appearance	
PO 7.1 Development facing the street is designed to minimise the negative impacts of any semi-basement and undercroft car parking on the streetscapes through techniques such as: (a) limiting protrusion above finished ground level (b) screening through appropriate planting, fencing and mounding (c) limiting the width of openings and integrating them into the building structure.	DTS/DPF 7.1 None are applicable.
PO 7.2 Vehicle parking areas are appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced and the like.	DTS/DPF 7.2 None are applicable.
PO 7.3 Safe, legible, direct and accessible pedestrian connections are provided between parking areas and the development.	DTS/DPF 7.3 None are applicable.
PO 7.4 Street level vehicle parking areas incorporate tree planting to provide shade and reduce solar heat absorption and reflection.	DTS/DPF 7.4 None are applicable.
PO 7.5 Street level parking areas incorporate soft landscaping to improve visual appearance when viewed from within the site and from public places.	DTS/DPF 7.5 None are applicable.
PO 7.6 Vehicle parking areas and associated driveways are landscaped to provide shade and positively contribute to amenity.	DTS/DPF 7.6 None are applicable.
PO 7.7 Vehicle parking areas and access ways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with soft landscaping.	DTS/DPF 7.7 None are applicable.
Earthworks and sloping land	
PO 8.1 Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.	DTS/DPF 8.1 Development does not involve any of the following: (a) excavation exceeding a vertical height of 1m (b) filling exceeding a vertical height of 1m (c) a total combined excavation and filling vertical height of 2m or more.
PO 8.2 Driveways and access tracks are designed and constructed to allow safe and convenient access on sloping land (with a gradient exceeding 1 in 8).	DTS/DPF 8.2 Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8) satisfy (a) and (b): (a) do not have a gradient exceeding 25% (1-in-4) at any point along the driveway (b) are constructed with an all-weather trafficable surface.
PO 8.3 Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8): (a) do not contribute to the instability of embankments and cuttings (b) provide level transition areas for the safe movement of people and goods to and from the development (c) are designed to integrate with the natural topography of the land.	DTS/DPF 8.3 None are applicable.
PO 8.4 Development on sloping land (with a gradient exceeding 1 in 8) avoids the alteration of natural drainage lines and includes on-site drainage systems to minimise erosion.	DTS/DPF 8.4 None are applicable.
PO 8.5 Development does not occur on land at risk of landslip nor increases the potential for landslip or land surface instability.	DTS/DPF 8.5 None are applicable.
Fences and Walls	
PO 9.1	DTS/DPF 9.1

Fences, walls and retaining walls are of sufficient height to maintain privacy and security without unreasonably impacting the visual amenity and adjoining land's access to sunlight or the amenity of public places.	None are applicable.
PO 9.2 Landscaping incorporated on the low side of retaining walls is visible from public roads and public open space to minimise visual impacts.	DTS/DPF 9.2 A vegetated landscaped strip 1m wide or more is provided against the low side of a retaining wall.
Overlooking / Visual Privacy (in building 3 storeys or less)	
PO 10.1 Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses.	DTS/DPF 10.1 Upper level windows facing side or rear boundaries shared with a residential allotment/site satisfy one of the following: (a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 200mm (b) have sill heights greater than or equal to 1.5m above finished floor level (c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5 m above the finished floor level.
PO 10.2 Development mitigates direct overlooking from balconies, terraces and decks to habitable rooms and private open space of adjoining residential uses.	DTS/DPF 10.2 One of the following is satisfied: (a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve that is at least 15m wide in all places faced by the balcony or terrace or (b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of: (i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land or (ii) 1.7m above finished floor level in all other cases
All Residential development	
Front elevations and passive surveillance	
PO 11.1 Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.	DTS/DPF 11.1 Each dwelling with a frontage to a public street: (a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m (b) has an aggregate window area of at least $2m^2$ facing the primary street.
PO 11.2 Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.	DTS/DPF 11.2 Dwellings with a frontage to a public street have an entry door visible from the primary street boundary.
Outlook and amenity	
PO 12.1 Living rooms have an external outlook to provide a high standard of amenity for occupants.	DTS/DPF 12.1 A living room of a dwelling incorporates a window with an outlook towards the street frontage or private open space, public open space, or waterfront areas.
PO 12.2 Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.	DTS/DPF 12.2 None are applicable.
Ancillary Development	
PO 13.1 Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.	DTS/DPF 13.1 Ancillary buildings (excluding ancillary accommodation): (a) are ancillary to a dwelling erected on the same site (b) have a floor area not exceeding 60m2 (c) are not constructed, added to or altered so that any part is situated: (i) in front of any part of the building line of the dwelling to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street (ii) when facing a primary street or secondary street, has a total door / opening not exceeding: A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width

	(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end) (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less: (i) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (ii) the amount of existing soft landscaping prior to the development occurring.
PO 13.2 Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision or car parking requirements and do not result in over-development of the site.	DTS/DPF 13.2 Ancillary buildings and structures do not result in: (a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space (b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.
PO 13.3 Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa is positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.	DTS/DPF 13.3 The pump and/or filtration system is ancillary to a dwelling erected on the same site and is: (a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment or (b) located at least 12m from the nearest habitable room located on an adjoining allotment.
PO 13.4 Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.	DTS/DPF 13.4 Non-residential ancillary buildings and structures: (a) are ancillary and subordinate to an existing non-residential use on the same site (b) have a floor area not exceeding the following: Allotment size / Floor area ≤500m^2 / 60m^2 >500m^2 / 80m^2 (c) are not constructed, added to or altered so that any part is situated: (i) in front of any part of the building line of the main building to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height (or post height) not exceeding 3m (and not including a gable end)

	(i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.
PO 13.5 Ancillary accommodation: (a) is sited and designed to not detract from the streetscape or appearance of primary residential buildings on the site or neighbouring properties (b) is integrated within the site of the dwelling to which it is ancillary and incorporates shared utilities and shared open space.	DTS/DPF 13.5 Ancillary accommodation: (a) is ancillary to a dwelling erected on the same site (b) has a floor area not exceeding 70m^2 (c) is not constructed, added to, or altered so that any part is situated: (i) in front of any part of the building line of the dwelling to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) if situated on a boundary (not being a boundary with a primary street or secondary street), does not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (e) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (f) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure (g) has a wall height or post height not exceeding 3m above natural ground level (and not including a gable end) (h) has a roof height where no part of the roof is more than 5m above the natural ground level (i) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour (j) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less: (i) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (ii) the amount of existing soft landscaping prior to the development occurring. (k) does not have separate connection to utilities and services (such as electricity, gas, water, telecommunications, sewerage system, wastewater system or waste control system) to those servicing the existing dwelling (l) has unrestricted access to the private open space associated with the existing dwelling to which it is ancillary (m) in the case of the Rural Zone, Productive Rural Landscape Zone, or Rural Horticulture Zone, is located within 20m of an existing dwelling.
Garage appearance	
PO 14.1 Garaging is designed to not detract from the streetscape or appearance of a dwelling.	DTS/DPF 14.1 Garages and carports facing a street: (a) are situated so that no part of the garage or carport is in front of any part of the building line of the dwelling (b) are set back at least 5.5m from the boundary of the primary street (c) have a garage door / opening not exceeding 7m in width (d) have a garage door /opening width not exceeding 50% of the site frontage unless the dwelling has two or more building levels at the building line fronting the same public street.
Massing	
PO 15.1 The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets.	DTS/DPF 15.1 None are applicable
Dwelling additions	
PO 16.1 Dwelling additions are sited and designed to not detract from the streetscape or amenity of adjoining properties and do not impede on-site functional requirements.	DTS / DPF 16.1 Dwelling additions: (a) are not constructed, added to or altered so that any part is situated closer to a public street (b) do not result in:

	(i) excavation exceeding a vertical height of 1m (ii) filling exceeding a vertical height of 1m (iii) a total combined excavation and filling vertical height of 2m or more (iv) less Private Open Space than specified in Design Table 1 - Private Open Space (v) less on-site parking than specified in Transport Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas (vi) upper level windows facing side or rear boundaries unless: A. they are permanently obscured to a height of 1.5m above finished floor level that is fixed or not capable of being opened more than 200mm or B. have sill heights greater than or equal to 1.5m above finished floor level or C. incorporate screening to a height of 1.5m above finished floor level (vii) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of: A. 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land B. 1.7m above finished floor level in all other cases.
Private Open Space	
PO 17.1 Dwellings are provided with suitable sized areas of usable private open space to meet the needs of occupants.	DTS/DPF 17.1 Private open space is provided in accordance with Design Table 1 - Private Open Space.
Water Sensitive Design	
PO 18.1 Residential development creating a common driveway / access includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.	DTS/DPF 18.1 Residential development creating a common driveway / access that services 5 or more dwellings achieves the following stormwater runoff outcomes: (a) 80 per cent reduction in average annual total suspended solids (b) 60 per cent reduction in average annual total phosphorus (c) 45 per cent reduction in average annual total nitrogen.
PO 18.2 Residential development creating a common driveway / access includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.	DTS/DPF 18.2 Development creating a common driveway / access that services 5 or more dwellings: (a) maintains the pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 18.1% AEP 30-minute storm and the stormwater runoff time to peak is not increased or captures and retains the difference in pre-development runoff volume (based upon a 0.35 runoff coefficient) vs post development runoff volume from the site for an 18.1% AEP 30-minute storm; and (b) manages site generated stormwater runoff up to and including the 1% AEP flood event to avoid flooding of buildings.
Car parking, access and manoeuvrability	
PO 19.1 Enclosed parking spaces are of a size and dimensions to be functional, accessible and convenient.	DTS/DPF 19.1 Residential car parking spaces enclosed by fencing, walls or other structures have the following internal dimensions (separate from any waste storage area): (a) single width car parking spaces: (i) a minimum length of 5.4m per space (ii) a minimum width of 3.0m (iii) a minimum garage door width of 2.4m (b) double width car parking spaces (side by side): (i) a minimum length of 5.4m (ii) a minimum width of 5.4m (iii) minimum garage door width of 2.4m per space.
PO 19.2 Uncovered parking spaces are of a size and dimensions to be functional, accessible and convenient.	DTS/DPF 19.2 Uncovered car parking spaces have: (a) a minimum length of 5.4m (b) a minimum width of 2.4m (c) a minimum width between the centre line of the space and any fence, wall or other obstruction of 1.5m
PO 19.3 Driveways and access points are located and designed to facilitate safe access and egress while maximising land available for street tree planting, pedestrian movement, domestic waste collection, landscaped street frontages and on-street parking.	DTS/DPF 19.3 Driveways and access points on sites with a frontage to a public road of 10m or less have a width between 3.0 and 3.2 metres measured at the property boundary and are the only access point provided on the site.
PO 19.4 Vehicle access is safe, convenient, minimises interruption to the operation of public roads	DTS/DPF 19.4 Vehicle access to designated car parking spaces satisfy (a) or (b):

and does not interfere with street infrastructure or street trees.	(a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land (b) where newly proposed: (i) is set back 6m or more from the tangent point of an intersection of 2 or more roads (ii) is set back outside of the marked lines or infrastructure dedicating a pedestrian crossing (iii) does not involve the removal, relocation or damage to of mature street trees, street furniture or utility infrastructure services.
PO 19.5 Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.	DTS/DPF 19.5 Driveways are designed and sited so that: (a) the gradient of the driveway does not exceed a grade of 1 in 4 and includes transitions to ensure a maximum grade change of 12.5% (1 in 8) for summit changes, and 15% (1 in 6.7) for sag changes, in accordance with AS 2890.1:2004 to prevent vehicles bottoming or scraping (b) the centreline of the driveway has an angle of no less than 70 degrees and no more than 110 degrees from the street boundary to which it takes its access as shown in the following diagram:  (c) if located to provide access from an alley, lane or right of way - the alley, land or right or way is at least 6.2m wide along the boundary of the allotment / site
PO 19.6 Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.	DTS/DPF 19.6 Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements: (a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number) (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.
Waste storage	
PO 20.1 Provision is made for the adequate and convenient storage of waste bins in a location screened from public view.	DTS/DPF 20.1 None are applicable.
Design of Transportable Dwellings	
PO 21.1 The sub-floor space beneath transportable buildings is enclosed to give the appearance of a permanent structure.	DTS/DPF 21.1 Buildings satisfy (a) or (b): (a) are not transportable or

	(b) the sub-floor space between the building and ground level is clad in a material and finish consistent with the building.
Group dwelling, residential flat buildings and battle-axe development	
Amenity	
PO 22.1 Dwellings are of a suitable size to accommodate a layout that is well organised and provides a high standard of amenity for occupants.	DTS/DPF 22.1 Dwellings have a minimum internal floor area in accordance with the following table: **Number of bedrooms** — **Minimum internal floor area** Studio — 35m^2 1 bedroom — 50m^2 2 bedroom — 65m^2 3+ bedrooms — 80m^2 and any dwelling over 3 bedrooms provides an additional 15m^2 for every additional bedroom
PO 22.2 The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.	DTS/DPF 22.2 None are applicable.
PO 22.3 Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented towards adjoining properties.	DTS/DPF 22.3 None are applicable.
PO 22.4 Battle-axe development is appropriately sited and designed to respond to the existing neighbourhood context.	DTS/DPF 22.4 Dwelling sites/allotments are not in the form of a battle-axe arrangement.
Communal Open Space	
PO 23.1 Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.	DTS/DPF 23.1 None are applicable.
PO 23.2 Communal open space is of sufficient size and dimensions to cater for group recreation.	DTS/DPF 23.2 Communal open space incorporates a minimum dimension of 5 metres.
PO 23.3 Communal open space is designed and sited to: (a) be conveniently accessed by the dwellings which it services (b) have regard to acoustic, safety, security and wind effects.	DTS/DPF 23.3 None are applicable.
PO 23.4 Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.	DTS/DPF 23.4 None are applicable.
PO 23.5 Communal open space is designed and sited to: (a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings (b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.	DTS/DPF 23.5 None are applicable.
Carparking, access and manoeuvrability	
PO 24.1 Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.	DTS/DPF 24.1 Where on-street parking is available directly adjacent the site, on-street parking is retained adjacent the subject site in accordance with the following requirements: (a) minimum 0.33 on-street car parks per proposed dwellings (rounded up to the nearest whole number) (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.
PO 24.2 The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.	DTS/DPF 24.2 Access to group dwellings or dwellings within a residential flat building is provided via a single common driveway.

PO 24.3 Residential driveways that service more than one dwelling are designed to allow safe and convenient movement.	DTS/DPF 24.3 Driveways that service more than 1 dwelling or a dwelling on a battle-axe site: (a) have a minimum width of 3m (b) for driveways servicing more than 3 dwellings: (i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street (ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m.
PO 24.4 Residential driveways in a battle-axe configuration are designed to allow safe and convenient movement.	DTS/DPF 24.4 Where in a battle-axe configuration, a driveway servicing one dwelling has a minimum width of 3m.
PO 24.5 Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site and manoeuvre within the site in a safe and convenient manner.	DTS/DPF 24.5 Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre.
PO 24.6 Dwellings are adequately separated from common driveways and manoeuvring areas.	DTS/DPF 24.6 Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles.
Soft Landscaping	
PO 25.1 Soft landscaping is provided between dwellings and common driveways to improve the outlook for occupants and appearance of common areas.	DTS/DPF 25.1 Other than where located directly in front of a garage or a building entry, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.
PO 25.2 Soft landscaping is provided that improves the appearance of common driveways.	DTS/DPF 25.2 Where a common driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point).
Site Facilities / Waste Storage	
PO 26.1 Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.	DTS/DPF 26.1 None are applicable.
PO 26.2 Provision is made for suitable external clothes drying facilities.	DTS/DPF 26.2 None are applicable.
PO 26.3 Provision is made for suitable household waste and recyclable material storage facilities which are: (a) located away, or screened, from public view, and (b) conveniently located in proximity to dwellings and the waste collection point.	DTS/DPF 26.3 None are applicable.
PO 26.4 Waste and recyclable material storage areas are located away from dwellings.	DTS/DPF 26.4 Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.
PO 26.5 Where waste bins cannot be conveniently collected from the street, provision is made for on-site waste collection, designed to accommodate the safe and convenient access, egress and movement of waste collection vehicles.	DTS/DPF 26.5 None are applicable.
PO 26.6 Services including gas and water meters are conveniently located and screened from public view.	DTS/DPF 26.6 None are applicable.
Supported accommodation and retirement facilities	
Siting and Configuration	
PO 27.1 Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land.	DTS/DPF 27.1 None are applicable.
Movement and Access	
PO 28.1 Development is designed to support safe and convenient access and movement for residents by providing:	DTS/DPF 28.1 None are applicable.

(a) ground-level access or lifted access to all units (b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places (c) car parks with gradients no steeper than 1-in-40 and of sufficient area to provide for wheelchair manoeuvrability (d) kerb ramps at pedestrian crossing points.	
Communal Open Space	
PO 29.1 Development is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors.	DTS/DPF 29.1 None are applicable.
PO 29.2 Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.	DTS/DPF 29.2 None are applicable.
PO 29.3 Communal open space is of sufficient size and dimensions to cater for group recreation.	DTS/DPF 29.3 Communal open space incorporates a minimum dimension of 5 metres.
PO 29.4 Communal open space is designed and sited to: (a) be conveniently accessed by the dwellings which it services (b) have regard to acoustic, safety, security and wind effects.	DTS/DPF 29.4 None are applicable.
PO 29.5 Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.	DTS/DPF 29.5 None are applicable.
PO 29.6 Communal open space is designed and sited to: (a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings (b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.	DTS/DPF 29.6 None are applicable.
Site Facilities / Waste Storage	
PO 30.1 Development is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric powered vehicles.	DTS/DPF 30.1 None are applicable.
PO 30.2 Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.	DTS/DPF 30.2 None are applicable.
PO 30.3 Provision is made for suitable external clothes drying facilities.	DTS/DPF 30.3 None are applicable.
PO 30.4 Provision is made for suitable household waste and recyclable material storage facilities conveniently located and screened from public view.	DTS/DPF 30.4 None are applicable.
PO 30.5 Waste and recyclable material storage areas are located away from dwellings.	DTS/DPF 30.5 Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.
PO 30.6 Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.	DTS/DPF 30.6 None are applicable.
PO 30.7 Services including gas and water meters are conveniently located and screened from public view.	DTS/DPF 30.7 None are applicable.
All non-residential development	
Water Sensitive Design	
PO 31.1 Development likely to result in significant risk of export of litter, oil or grease includes stormwater management systems designed to minimise pollutants entering stormwater.	DTS/DPF 31.1 None are applicable.
PO 31.2	DTS/DPF 31.2

Water discharged from a development site is of a physical, chemical and biological condition equivalent to or better than its pre-developed state.	None are applicable.
Wash-down and Waste Loading and Unloading	
PO 32.1 Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, vessels, plant or equipment are: (a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off (b) paved with an impervious material to facilitate wastewater collection (c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area (d) designed to drain wastewater to either: (i) a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme or (ii) a holding tank and its subsequent removal off-site on a regular basis.	DTS/DPF 32.1 None are applicable.
Decks	
Design and Siting	
PO 33.1 Decks are designed and sited to: (a) complement the associated building form (b) minimise impacts on the streetscape through siting behind the building line of the principal building (unless on a significant allotment or open space) (c) minimise cut and fill and overall massing when viewed from adjacent land.	DTS/DPF 33.1 Decks: (a) where ancillary to a dwelling: (i) are not constructed, added to or altered so that any part is situated: A. in front of any part of the building line of the dwelling to which it is ancillary or B. within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (ii) are set back at least 900mm from side or rear allotment boundaries (iii) when attached to the dwelling, has a finished floor level consistent with the finished ground floor level of the dwelling (iv) where associated with a residential use, retains a total area of soft landscaping for the entire development site, including any common property, with a minimum dimension of 700mm in accordance with (A) or (B), whichever is less: A. a total area is determined by the following table: **Site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% >200-450 / 20% >450 / 25% B. the amount of existing soft landscaping prior to the development occurring. (b) where in association with a non-residential use: (i) are set back at least 2 metres from the boundary of an allotment used for residential purposes. (ii) are set back at least 2 metres from a public road. (iii) have a floor area not exceeding 25m^2 (c) in all cases, has a finished floor level not exceeding 1 metre above natural ground level at any point.
PO 33.2 Decks are designed and sited to minimise direct overlooking of habitable rooms and private open spaces of adjoining residential uses in neighbourhood-type zones through suitable floor levels, screening and siting taking into account the slope of the subject land, existing vegetation on the subject land, and fencing.	DTS/DPF 33.2 Decks with a finished floor level/s 500mm or more above natural ground level facing side or rear boundaries shared with a residential use in a neighbourhood-type zone incorporate screening with a maximum of 25% transparency/openings, permanently fixed to the outer edge of the deck not less than 1.5 m above the finished floor level/s.
PO 33.3 Decks used for outdoor dining, entertainment or other commercial uses provide carparking in accordance with the primary use of the deck.	DTS/DPF 33.3 Decks used for commercial purposes do not result in less on-site car parking for the primary use of the subject land than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

Table 1 - Private Open Space

Dwelling Type	Minimum Rate
Dwelling (at ground level)	Total private open space area: (a) Site area <301m^2: 24m^2 located behind the building line. (b) Site area ≥ 301m^2: 60m^2 located behind the building line. Minimum directly accessible from a living room: 16m^2 / with a minimum dimension 3m.
Dwelling (above ground level)	Studio (no separate bedroom): 4m^2 with a minimum dimension 1.8m One bedroom: 8m^2 with a minimum dimension 2.1m Two bedroom dwelling: 11m^2 with a minimum dimension 2.4m Three + bedroom dwelling: 15m^2 with a minimum dimension 2.6m
Cabin or caravan (permanently fixed to the ground) in a residential park or a caravan and tourist park	Total area: 16m^2, which may be used as second car parking space, provided on each site intended for residential occupation.

Design in Urban Areas

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is: (a) contextual - by considering, recognising and carefully responding to its natural surroundings or built environment and positively contributing to the character of the locality (b) durable - fit for purpose, adaptable and long lasting (c) inclusive - by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access and promoting the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors (d) sustainable - by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All Development	
External Appearance	
PO 1.1 Buildings reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).	DTS/DPF 1.1 None are applicable.
PO 1.2 Where zero or minor setbacks are desirable, development provides shelter over footpaths (in the form of verandahs, awnings, canopies and the like, with adequate lighting) to positively contribute to the walkability, comfort and safety of the public realm.	DTS/DPF 1.2 None are applicable.
PO 1.3 Building elevations facing the primary street (other than ancillary buildings) are designed and detailed to convey purpose, identify main access points and complement the streetscape.	DTS/DPF 1.3 None are applicable.
PO 1.4 Plant, exhaust and intake vents and other technical equipment are integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by: (a) positioning plant and equipment discretely, in unobtrusive locations as viewed from public roads and spaces (b) screening rooftop plant and equipment from view (c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses.	DTS/DPF 1.4 Development does not incorporate any structures that protrude beyond the roofline.
PO 1.5 The negative visual impact of outdoor storage, waste management, loading and service areas	DTS/DPF 1.5 None are applicable.

is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form), taking into account the form of development contemplated in the relevant zone.	
Safety	
PO 2.1 Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is designed to differentiate public, communal and private areas.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings are designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development at street level is designed to maximise opportunities for passive surveillance of the adjacent public realm.	DTS/DPF 2.4 None are applicable.
PO 2.5 Common areas and entry points of buildings (such as the foyer areas of residential buildings) and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.	DTS/DPF 2.5 None are applicable.
Landscaping	
PO 3.1 Soft landscaping and tree planting are incorporated to: (a) minimise heat absorption and reflection (b) maximise shade and shelter (c) maximise stormwater infiltration (d) enhance the appearance of land and streetscapes.	DTS/DPF 3.1 None are applicable.
Environmental Performance	
PO 4.1 Buildings are sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces.	DTS/DPF 4.1 None are applicable.
PO 4.2 Buildings are sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling.	DTS/DPF 4.2 None are applicable.
PO 4.3 Buildings incorporate climate responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells.	DTS/DPF 4.3 None are applicable.
Water Sensitive Design	
PO 5.1 Development is sited and designed to maintain natural hydrological systems without negatively impacting: (a) the quantity and quality of surface water and groundwater (b) the depth and directional flow of surface water and groundwater (c) the quality and function of natural springs.	DTS/DPF 5.1 None are applicable.
On-site Waste Treatment Systems	
PO 6.1 Dedicated on-site effluent disposal areas do not include any areas to be used for, or could be reasonably foreseen to be used for, private open space, driveways or car parking.	DTS/DPF 6.1 Effluent disposal drainage areas do not: (a) encroach within an area used as private open space or result in less private open space than that specified in Design in Urban Areas Table 1 - Private Open Space (b) use an area also used as a driveway (c) encroach within an area used for on-site car parking or result in less on-site car parking than that specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.
Car parking appearance	
PO 7.1	DTS/DPF 7.1

Development facing the street is designed to minimise the negative impacts of any semi-basement and undercroft car parking on streetscapes through techniques such as: (a) limiting protrusion above finished ground level (b) screening through appropriate planting, fencing and mounding (c) limiting the width of openings and integrating them into the building structure.	None are applicable.
PO 7.2 Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced and the like.	DTS/DPF 7.2 None are applicable.
PO 7.3 Safe, legible, direct and accessible pedestrian connections are provided between parking areas and the development.	DTS/DPF 7.3 None are applicable.
PO 7.4 Street-level vehicle parking areas incorporate tree planting to provide shade, reduce solar heat absorption and reflection.	DTS/DPF 7.4 Vehicle parking areas that are open to the sky and comprise 10 or more car parking spaces include a shade tree with a mature canopy of 4m diameter spaced for each 10 car parking spaces provided and a landscaped strip on any road frontage of a minimum dimension of 1m.
PO 7.5 Street level parking areas incorporate soft landscaping to improve visual appearance when viewed from within the site and from public places.	DTS/DPF 7.5 Vehicle parking areas comprising 10 or more car parking spaces include soft landscaping with a minimum dimension of: (a) 1m along all public road frontages and allotment boundaries (b) 1m between double rows of car parking spaces.
PO 7.6 Vehicle parking areas and associated driveways are landscaped to provide shade and positively contribute to amenity.	DTS/DPF 7.6 None are applicable.
PO 7.7 Vehicle parking areas and access ways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with soft landscaping.	DTS/DPF 7.7 None are applicable.
Earthworks and sloping land	
PO 8.1 Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.	DTS/DPF 8.1 Development does not involve any of the following: (a) excavation exceeding a vertical height of 1m (b) filling exceeding a vertical height of 1m (c) a total combined excavation and filling vertical height of 2m or more.
PO 8.2 Driveways and access tracks designed and constructed to allow safe and convenient access on sloping land.	DTS/DPF 8.2 Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8) satisfy (a) and (b): (a) do not have a gradient exceeding 25% (1-in-4) at any point along the driveway (b) are constructed with an all-weather trafficable surface.
PO 8.3 Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8): (a) do not contribute to the instability of embankments and cuttings (b) provide level transition areas for the safe movement of people and goods to and from the development (c) are designed to integrate with the natural topography of the land.	DTS/DPF 8.3 None are applicable.
PO 8.4 Development on sloping land (with a gradient exceeding 1 in 8) avoids the alteration of natural drainage lines and includes on site drainage systems to minimise erosion.	DTS/DPF 8.4 None are applicable.
PO 8.5 Development does not occur on land at risk of landslip or increase the potential for landslip or land surface instability.	DTS/DPF 8.5 None are applicable.
Fences and walls	
PO 9.1 Fences, walls and retaining walls of sufficient height maintain privacy and security without unreasonably impacting visual amenity and adjoining land's access to sunlight or the amenity of public places.	DTS/DPF 9.1 None are applicable.
PO 9.2	DTS/DPF 9.2

Landscaping is incorporated on the low side of retaining walls that are visible from public roads and public open space to minimise visual impacts.	A vegetated landscaped strip 1m wide or more is provided against the low side of a retaining wall.
Overlooking / Visual Privacy (low rise buildings)	
PO 10.1 Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses in neighbourhood-type zones.	DTS/DPF 10.1 Upper level windows facing side or rear boundaries shared with a residential use in a neighbourhood-type zone: (a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 125mm (b) have sill heights greater than or equal to 1.5m above finished floor level (c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5 m above the finished floor level.
PO 10.2 Development mitigates direct overlooking from balconies to habitable rooms and private open space of adjoining residential uses in neighbourhood type zones.	DTS/DPF 10.2 One of the following is satisfied: (a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve that is at least 15m wide in all places faced by the balcony or terrace or (b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of: (i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land or (ii) 1.7m above finished floor level in all other cases
Site Facilities / Waste Storage (excluding low rise residential development)	
PO 11.1 Development provides a dedicated area for on-site collection and sorting of recyclable materials and refuse, green organic waste and wash bay facilities for the ongoing maintenance of bins that is adequate in size considering the number and nature of the activities they will serve and the frequency of collection.	DTS/DPF 11.1 None are applicable.
PO 11.2 Communal waste storage and collection areas are located, enclosed and designed to be screened from view from the public domain, open space and dwellings.	DTS/DPF 11.2 None are applicable.
PO 11.3 Communal waste storage and collection areas are designed to be well ventilated and located away from habitable rooms.	DTS/DPF 11.3 None are applicable.
PO 11.4 Communal waste storage and collection areas are designed to allow waste and recycling collection vehicles to enter and leave the site without reversing.	DTS/DPF 11.4 None are applicable.
PO 11.5 For mixed use developments, non-residential waste and recycling storage areas and access provide opportunities for on-site management of food waste through composting or other waste recovery as appropriate.	DTS/DPF 11.5 None are applicable.
All Development - Medium and High Rise	
External Appearance	
PO 12.1 Buildings positively contribute to the character of the local area by responding to local context.	DTS/DPF 12.1 None are applicable.
PO 12.2 Architectural detail at street level and a mixture of materials at lower building levels near the public interface are provided to reinforce a human scale.	DTS/DPF 12.2 None are applicable.
PO 12.3 Buildings are designed to reduce visual mass by breaking up building elevations into distinct elements.	DTS/DPF 12.3 None are applicable.
PO 12.4 Boundary walls visible from public land include visually interesting treatments to break up large blank elevations.	DTS/DPF 12.4 None are applicable.
PO 12.5 External materials and finishes are durable and age well to minimise ongoing maintenance requirements.	DTS/DPF 12.5 Buildings utilise a combination of the following external materials and finishes: (a) masonry (b) natural stone (c) pre-finished materials that minimise staining, discolouring or deterioration.
PO 12.6 Street-facing building elevations are designed to provide attractive, high quality and pedestrian-friendly street frontages.	DTS/DPF 12.6 Building street frontages incorporate: (a) active uses such as shops or offices

	(b) prominent entry areas for multi-storey buildings (where it is a common entry) (c) habitable rooms of dwellings (d) areas of communal public realm with public art or the like, where consistent with the zone and/or subzone provisions.
PO 12.7 Entrances to multi-storey buildings are safe, attractive, welcoming, functional and contribute to streetscape character.	DTS/DPF 12.7 Entrances to multi-storey buildings are: (a) oriented towards the street (b) clearly visible and easily identifiable from the street and vehicle parking areas (c) designed to be prominent, accentuated and a welcoming feature if there are no active or occupied ground floor uses (d) designed to provide shelter, a sense of personal address and transitional space around the entry (e) located as close as practicable to the lift and / or lobby access to minimise the need for long access corridors (f) designed to avoid the creation of potential areas of entrapment.
PO 12.8 Building services, plant and mechanical equipment are screened from the public realm.	DTS/DPF 12.8 None are applicable.
Landscaping	
PO 13.1 Development facing a street provides a well landscaped area that contains a deep soil space to accommodate a tree of a species and size adequate to provide shade, contribute to tree canopy targets and soften the appearance of buildings.	DTS/DPF 13.1 Buildings provide a 4m by 4m deep soil space in front of the building that accommodates a medium to large tree, except where no building setback from front property boundaries is desired.
PO 13.2 Deep soil zones are provided to retain existing vegetation or provide areas that can accommodate new deep root vegetation, including tall trees with large canopies to provide shade and soften the appearance of multi-storey buildings.	DTS/DPF 13.2 Multi-storey development provides deep soil zones and incorporates trees at not less than the following rates, except in a location or zone where full site coverage is desired.

Site area	Minimum deep soil area	Minimum dimension	Tree / deep soil zones
<300 m^2	10 m^2	1.5m	1 small tree / 10 m^2
300-1500 m^2	7% site area	3m	1 medium tree / 30 m^2
>1500 m^2	7% site area	6m	1 large or medium tree / 60 m^2

Tree size and site area definitions	
Small tree	4-6m mature height and 2-4m canopy spread
Medium tree	6-12m mature height and 4-8m canopy spread
Large tree	12m mature height and >8m canopy spread
Site area	The total area for development site, not average area per dwelling

PO 13.3 Deep soil zones with access to natural light are provided to assist in maintaining vegetation health.	DTS/DPF 13.3 None are applicable.
PO 13.4 Unless separated by a public road or reserve, development sites adjacent to any zone that has a primary purpose of accommodating low-rise residential development incorporate a deep soil zone along the common boundary to enable medium to large trees to be retained or established to assist in screening new buildings of 3 or more building levels in height.	DTS/DPF 13.4 Building elements of 3 or more building levels in height are set back at least 6m from a zone boundary in which a deep soil zone area is incorporated.
Environmental	
PO 14.1 Development minimises detrimental micro-climatic impacts on adjacent land and buildings.	DTS/DPF 14.1 None are applicable.
PO 14.2 Development incorporates sustainable design techniques and features such as window orientation, eaves and shading structures, water harvesting and use, green walls and roof designs that enable the provision of rain water tanks (where they are not provided elsewhere on site), green roofs and photovoltaic cells.	DTS/DPF 14.2 None are applicable.
PO 14.3	DTS/DPF 14.3

Development of 5 or more building levels, or 21m or more in height (as measured from natural ground level and excluding roof-mounted mechanical plant and equipment) is designed to minimise the impacts of wind through measures such as: (a) a podium at the base of a tall tower and aligned with the street to deflect wind away from the street (b) substantial verandahs around a building to deflect downward travelling wind flows over pedestrian areas (c) the placement of buildings and use of setbacks to deflect the wind at ground level (d) avoiding tall shear elevations that create windy conditions at street level.	None are applicable.
Car Parking	
PO 15.1 Multi-level vehicle parking structures are designed to contribute to active street frontages and complement neighbouring buildings.	DTS/DPF 15.1 Multi-level vehicle parking structures within buildings: (a) provide land uses such as commercial, retail or other non-car parking uses along ground floor street frontages (b) incorporate facade treatments in building elevations facing along major street frontages that are sufficiently enclosed and detailed to complement adjacent buildings.
PO 15.2 Multi-level vehicle parking structures within buildings complement the surrounding built form in terms of height, massing and scale.	DTS/DPF 15.2 None are applicable.
Overlooking/Visual Privacy	
PO 16.1 Development mitigates direct overlooking of habitable rooms and private open spaces of adjacent residential uses in neighbourhood-type zones through measures such as: (a) appropriate site layout and building orientation (b) off-setting the location of balconies and windows of habitable rooms or areas with those of other buildings so that views are oblique rather than direct to avoid direct line of sight (c) building setbacks from boundaries (including building boundary to boundary where appropriate) that interrupt views or that provide a spatial separation between balconies or windows of habitable rooms (d) screening devices that are integrated into the building design and have minimal negative effect on residents' or neighbours' amenity.	DTS/DPF 16.1 None are applicable.
All residential development	
Front elevations and passive surveillance	
PO 17.1 Dwellings incorporate windows facing primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.	DTS/DPF 17.1 Each dwelling with a frontage to a public street: (a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m (b) has an aggregate window area of at least $2m^2$ facing the primary street.
PO 17.2 Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.	DTS/DPF 17.2 Dwellings with a frontage to a public street have an entry door visible from the primary street boundary.
Outlook and Amenity	
PO 18.1 Living rooms have an external outlook to provide a high standard of amenity for occupants.	DTS/DPF 18.1 A living room of a dwelling incorporates a window with an external outlook of the street frontage, private open space, public open space, or waterfront areas.
PO 18.2 Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.	DTS/DPF 18.2 None are applicable.
Ancillary Development	
PO 19.1 Residential ancillary buildings are sited and designed to not detract from the streetscape or appearance of primary residential buildings on the site or neighbouring properties.	DTS/DPF 19.1 Ancillary buildings (excluding ancillary accommodation): (a) are ancillary to a dwelling erected on the same site (b) have a floor area not exceeding 60m2 (c) are not constructed, added to or altered so that any part is situated: (i) in front of any part of the building line of the dwelling to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street

(ii) when facing a primary street or secondary street, has a total door / opening not exceeding:
  A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser
  B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width

(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary
  and
  (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent

(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary

(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure

(h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)

(i) have a roof height where no part of the roof is more than 5m above the natural ground level

(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour

(k) retains a total area of soft landscaping for the entire development site, including any common property, with a minimum dimension of 700mm in accordance with (i) or (ii), whichever is less:
  (i) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
>200-450	20%
>450	25%

  (ii) the amount of existing soft landscaping prior to the development occurring.

PO 19.2

Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

DTS/DPF 19.2

Ancillary buildings and structures do not result in:

(a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space

(b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

PO 19.3

Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.

DTS/DPF 19.3

The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:

(a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment
or
(b) located at least 12m from the nearest habitable room located on an adjoining allotment.

PO 19.4

Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.

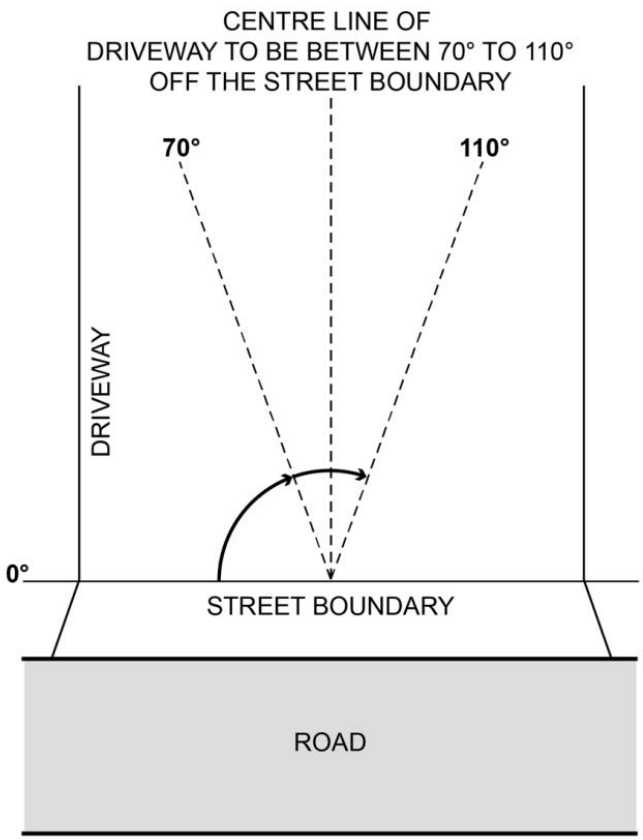
DTS/DPF 19.4

Non-residential ancillary buildings and structures:

(a) are ancillary and subordinate to an existing non-residential use on the same site

(b) have a floor area not exceeding the following:

Allotment size	Floor area
≤500m^2	60m^2
>500m^2	80m^2



(c) are not constructed, added to or altered so that any part is situated:
  (i) in front of any part of the building line of the main building to which it is ancillary
  or
  (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)

(d) in the case of a garage or carport, the garage or carport:
  (i) is set back at least 5.5m from the boundary of the primary street

(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary

	(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height (or post height) not exceeding 3m (and not including a gable end) (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.
PO 19.5 Ancillary accommodation: (a) is sited and designed to not detract from the streetscape or appearance of primary residential buildings on the site or neighbouring properties (b) is integrated within the site of the dwelling to which it is ancillary and incorporates shared utilities and shared open space.	DTS/DPF 19.5 Ancillary accommodation: (a) is ancillary to a dwelling erected on the same site (b) has a floor area not exceeding 70m^2 (c) is not constructed, added to, or altered so that any part is situated: (i) in front of any part of the building line of the dwelling to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) if situated on a boundary (not being a boundary with a primary street or secondary street), does not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (e) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (f) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure (g) has a wall height or post height not exceeding 3m above natural ground level (and not including a gable end) (h) has a roof height where no part of the roof is more than 5m above the natural ground level (i) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour (j) retains a total area of soft landscaping for the entire development site, including any common property, with a minimum dimension of 700mm in accordance with (i) or (ii), whichever is less: (i) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% >200-450 / 20% >450 / 25% (ii) the amount of existing soft landscaping prior to the development occurring. (k) does not have separate connection to utilities and services (such as electricity, gas, water, telecommunications, sewerage system, wastewater system or waste control system) to those servicing the existing dwelling (l) has unrestricted access to the private open space associated with the existing dwelling to which it is ancillary (m) in the case of the Rural Zone, Productive Rural Landscape Zone, or Rural Horticulture Zone, is located within 20m of an existing dwelling.
Residential Development - Low Rise	
External appearance	
PO 20.1 Garaging is designed to not detract from the streetscape or appearance of a dwelling.	DTS/DPF 20.1 Garages and carports facing a street: (a) are situated so that no part of the garage or carport will be in front of any part of the building line of the dwelling (b) are set back at least 5.5m from the boundary of the primary street (c) have a garage door / opening width not exceeding 7m (d) have a garage door / opening width not exceeding 50% of the site frontage unless the dwelling has two or more building levels at the building line fronting the same public street.
PO 20.2	DTS/DPF 20.2

Dwelling elevations facing public streets and common driveways make a positive contribution to the streetscape and the appearance of common driveway areas.	Each dwelling includes at least 3 of the following design features within the building elevation facing a primary street, and at least 2 of the following design features within the building elevation facing any other public road (other than a laneway) or a common driveway: (a) a minimum of 30% of the building wall is set back an additional 300mm from the building line (b) a porch or portico projects at least 1m from the building wall (c) a balcony projects from the building wall (d) a verandah projects at least 1m from the building wall (e) eaves of a minimum 400mm width extend along the width of the front elevation (f) a minimum 30% of the width of the upper level projects forward from the lower level primary building line by at least 300mm (g) a minimum of two different materials or finishes are incorporated on the walls of the front building elevation, with a maximum of 80% of the building elevation in a single material or finish.
PO 20.3 The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets.	DTS/DPF 20.3 None are applicable
Private Open Space	
PO 21.1 Dwellings are provided with suitable sized areas of usable private open space to meet the needs of occupants.	DTS/DPF 21.1 Private open space is provided in accordance with Design in Urban Areas Table 1 - Private Open Space.
PO 21.2 Private open space is positioned to provide convenient access from internal living areas.	DTS/DPF 21.2 Private open space is directly accessible from a habitable room.
Landscaping	
PO 22.1 Soft landscaping is incorporated into development to: (a) minimise heat absorption and reflection (b) contribute shade and shelter (c) provide for stormwater infiltration and biodiversity (d) enhance the appearance of land and streetscapes.	DTS/DPF 22.1 Residential development incorporates soft landscaping with a minimum dimension of 700mm provided in accordance with (a) and (b): (a) a total area for the entire development site, including any common property, as determined by the following table: **Site area (or in the case of residential flat building, co-located housing or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% >200-450 / 20% >450 / 25% (b) at least 30% of any land between the primary street boundary and the primary building line.
Car parking, access and manoeuvrability	
PO 23.1 Enclosed car parking spaces are of dimensions to be functional, accessible and convenient.	DTS/DPF 23.1 Residential car parking spaces enclosed by fencing, walls or other structures have the following internal dimensions (separate from any waste storage area): (a) single width car parking spaces: (i) a minimum length of 5.4m per space (ii) a minimum width of 3.0m (iii) a minimum garage door width of 2.4m (b) double width car parking spaces (side by side): (i) a minimum length of 5.4m (ii) a minimum width of 5.4m (iii) minimum garage door width of 2.4m per space.
PO 23.2 Uncovered car parking space are of dimensions to be functional, accessible and convenient.	DTS/DPF 23.2 Uncovered car parking spaces have: (a) a minimum length of 5.4m (b) a minimum width of 2.4m (c) a minimum width between the centre line of the space and any fence, wall or other obstruction of 1.5m.
PO 23.3 Driveways and access points are located and designed to facilitate safe access and egress	DTS/DPF 23.3 Driveways and access points satisfy (a) or (b):

while maximising land available for street tree planting, pedestrian movement, domestic waste collection, landscaped street frontages and on-street parking.	(a) sites with a frontage to a public road of 10m or less, have a width between 3.0 and 3.2 metres measured at the property boundary and are the only access point provided on the site (b) sites with a frontage to a public road greater than 10m: (i) have a maximum width of 5m measured at the property boundary and are the only access point provided on the site; (ii) have a width between 3.0 metres and 3.2 metres measured at the property boundary and no more than two access points are provided on site, separated by no less than 1m.
PO 23.4 Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.	DTS/DPF 23.4 Vehicle access to designated car parking spaces satisfy (a) or (b): (a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land (b) where newly proposed, is set back: (i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner (ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance (iii) 6m or more from the tangent point of an intersection of 2 or more roads (iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing.
PO 23.5 Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.	DTS/DPF 23.5 Driveways are designed and sited so that: (a) the gradient of the driveway does not exceed a grade of 1 in 4 and includes transitions to ensure a maximum grade change of 12.5% (1 in 8) for summit changes, and 15% (1 in 6.7) for sag changes, in accordance with AS 2890.1:2004 to prevent vehicles bottoming or scraping (b) the centreline of the driveway has an angle of no less than 70 degrees and no more than 110 degrees from the street boundary to which it takes its access as shown in the following diagram:  (c) if located to provide access from an alley, lane or right of way - the alley, land or right or way is at least 6.2m wide along the boundary of the allotment / site.
PO 23.6 Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.	DTS/DPF 23.6 Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements: (a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number) (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.

Waste storage	
PO 24.1 Provision is made for the convenient storage of waste bins in a location screened from public view.	DTS/DPF 24.1 Where dwellings abut both side boundaries a waste bin storage area is provided behind the building line of each dwelling that: (a) has a minimum area of $2m^2$ with a minimum dimension of 900mm (separate from any designated car parking spaces or private open space); and (b) has a continuous unobstructed path of travel (excluding moveable objects like gates, vehicles and roller doors) with a minimum width of 800mm between the waste bin storage area and the street.
Design of Transportable Buildings	
PO 25.1 The sub-floor space beneath transportable buildings is enclosed to give the appearance of a permanent structure.	DTS/DPF 25.1 Buildings satisfy (a) or (b): (a) are not transportable (b) the sub-floor space between the building and ground level is clad in a material and finish consistent with the building.
Residential Development - Medium and High Rise (including serviced apartments)	
Outlook and Visual Privacy	
PO 26.1 Ground level dwellings have a satisfactory short range visual outlook to public, communal or private open space.	DTS/DPF 26.1 Buildings: (a) provide a habitable room at ground or first level with a window facing toward the street (b) limit the height / extent of solid walls or fences facing the street to 1.2m high above the footpath level or, where higher, to 50% of the site frontage.
PO 26.2 The visual privacy of ground level dwellings within multi-level buildings is protected.	DTS/DPF 26.2 The finished floor level of ground level dwellings in multi-storey developments is raised by up to 1.2m.
Private Open Space	
PO 27.1 Dwellings are provided with suitable sized areas of usable private open space to meet the needs of occupants.	DTS/DPF 27.1 Private open space provided in accordance with Design in Urban Areas Table 1 - Private Open Space.
Residential amenity in multi-level buildings	
PO 28.1 Residential accommodation within multi-level buildings have habitable rooms, windows and balconies designed and positioned to be separated from those of other dwellings and accommodation to provide visual and acoustic privacy and allow for natural ventilation and the infiltration of daylight into interior and outdoor spaces.	DTS/DPF 28.1 Habitable rooms and balconies of independent dwellings and accommodation are separated by at least 6m from one another where there is a direct line of sight between them and 3m or more from a side or rear property boundary.
PO 28.2 Balconies are designed, positioned and integrated into the overall architectural form and detail of the development to: (a) respond to daylight, wind, and acoustic conditions to maximise comfort and provide visual privacy (b) allow views and casual surveillance of the street while providing for safety and visual privacy of nearby living spaces and private outdoor areas.	DTS/DPF 28.2 Balconies utilise one or a combination of the following design elements: (a) sun screens (b) pergolas (c) louvres (d) green facades (e) openable walls.
PO 28.3 Balconies are of sufficient size and depth to accommodate outdoor seating and promote indoor / outdoor living.	DTS/DPF 28.3 Balconies open directly from a habitable room and incorporate a minimum dimension of 2m.
PO 28.4 Dwellings are provided with sufficient space for storage to meet likely occupant needs.	DTS/DPF 28.4 Dwellings (not including student accommodation or serviced apartments) are provided with storage at the following rates with at least 50% or more of the storage volume to be provided within the dwelling: (a) studio: not less than $6m^3$ (b) 1 bedroom dwelling / apartment: not less than $8m^3$ (c) 2 bedroom dwelling / apartment: not less than $10m^3$ (d) 3+ bedroom dwelling / apartment: not less than $12m^3$.
PO 28.5 Dwellings that use light wells for access to daylight, outlook and ventilation for habitable rooms, are designed to ensure a reasonable living amenity is provided.	DTS/DPF 28.5 Light wells: (a) are not used as the primary source of outlook for living rooms (b) up to 18m in height have a minimum horizontal dimension of 3m, or 6m if overlooked by bedrooms

	(c) above 18m in height have a minimum horizontal dimension of 6m, or 9m if overlooked by bedrooms.
PO 28.6 Attached or abutting dwellings are designed to minimise the transmission of sound between dwellings and, in particular, to protect bedrooms from possible noise intrusions.	DTS/DPF 28.6 None are applicable.
PO 28.7 Dwellings are designed so that internal structural columns correspond with the position of internal walls to ensure that the space within the dwelling/apartment is useable.	DTS/DPF 28.7 None are applicable.
Dwelling Configuration	
PO 29.1 Buildings containing in excess of 10 dwellings provide a variety of dwelling sizes and a range in the number of bedrooms per dwelling to contribute to housing diversity.	DTS/DPF 29.1 Buildings containing in excess of 10 dwellings provide at least one of each of the following: (a) studio (where there is no separate bedroom) (b) 1 bedroom dwelling / apartment with a floor area of at least $50m^2$ (c) 2 bedroom dwelling / apartment with a floor area of at least $65m^2$ (d) 3+ bedroom dwelling / apartment with a floor area of at least $80m^2$, and any dwelling over 3 bedrooms provides an additional $15m^2$ for every additional bedroom.
PO 29.2 Dwellings located on the ground floor of multi-level buildings with 3 or more bedrooms have the windows of their habitable rooms overlooking internal courtyard space or other public space, where possible.	DTS/DPF 29.2 None are applicable.
Common Areas	
PO 30.1 The size of lifts, lobbies and corridors is sufficient to accommodate movement of bicycles, strollers, mobility aids and visitor waiting areas.	DTS/DPF 30.1 Common corridor or circulation areas: (a) have a minimum ceiling height of 2.7m (b) provide access to no more than 8 dwellings (c) incorporate a wider section at apartment entries where the corridors exceed 12m in length from a core.
Co-located Housing, Group Dwellings, Residential Flat Buildings and Battle axe Development	
Amenity	
PO 31.1 Dwellings are of a suitable size to provide a high standard of amenity for occupants.	DTS/DPF 31.1 Dwellings have a minimum internal floor area in accordance with the following table: **Number of bedrooms** / **Minimum internal floor area** Studio / $35m^2$ 1 bedroom / $50m^2$ 2 bedroom / $65m^2$ 3+ bedrooms / $80m^2$ and any dwelling over 3 bedrooms provides an additional $15m^2$ for every additional bedroom
PO 31.2 The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.	DTS/DPF 31.2 None are applicable.
PO 31.3 Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented towards adjoining properties.	DTS/DPF 31.3 None are applicable.
PO 31.4 Battle-axe development is appropriately sited and designed to respond to the existing neighbourhood context.	DTS/DPF 31.4 Dwelling sites/allotments are not in the form of a battle-axe arrangement.
Communal Open Space	
PO 32.1 Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.	DTS/DPF 32.1 None are applicable.
PO 32.2 Communal open space is of sufficient size and dimensions to cater for group recreation.	DTS/DPF 32.2 Communal open space incorporates a minimum dimension of 5 metres.
PO 32.3 Communal open space is designed and sited to:	DTS/DPF 32.3 None are applicable.

(a) be conveniently accessed by the dwellings which it services (b) have regard to acoustic, safety, security and wind effects.	
PO 32.4 Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.	DTS/DPF 32.4 None are applicable.
PO 32.5 Communal open space is designed and sited to: (a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings (b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.	DTS/DPF 32.5 None are applicable.
Car parking, access and manoeuvrability	
PO 33.1 Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.	DTS/DPF 33.1 Where on-street parking is available directly adjacent the site, on-street parking is retained adjacent the subject site in accordance with the following requirements: (a) minimum 0.33 on-street car parks per proposed dwelling (rounded up to the nearest whole number) (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.
PO 33.2 The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.	DTS/DPF 33.2 Access to group dwellings or dwellings within a residential flat building is provided via a single common driveway.
PO 33.3 Residential driveways that service more than one dwelling are designed to allow safe and convenient movement.	DTS/DPF 33.3 Driveways that service more than 1 dwelling or a dwelling on a battle-axe site: (a) have a minimum width of 3m (b) for driveways servicing more than 3 dwellings: (i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street (ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m.
PO 33.4 Residential driveways that service more than one dwelling or a dwelling on a battle-axe site are designed to allow passenger vehicles to enter and exit and manoeuvre within the site in a safe and convenient manner.	DTS/DPF 33.4 Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre.
PO 33.5 Dwellings are adequately separated from common driveways and manoeuvring areas.	DTS/DPF 33.5 Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles.
Soft landscaping	
PO 34.1 Soft landscaping is provided between dwellings and common driveways to improve the outlook for occupants and appearance of common areas.	DTS/DPF 34.1 Other than where located directly in front of a garage or building entry, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.
PO 34.2 Battle-axe or common driveways incorporate landscaping and permeability to improve appearance and assist in stormwater management.	DTS/DPF 34.2 Battle-axe or common driveways satisfy (a) and (b): (a) are constructed of a minimum of 50% permeable or porous material (b) where the driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point).
Site Facilities / Waste Storage	
DTS/DPF 35.1 None are applicable.	PO 35.2 Provision is made for suitable external clothes drying facilities.
DTS/DPF 35.2 None are applicable.	PO 35.3 Provision is made for suitable household waste and recyclable material storage facilities which are: (a) located away, or screened, from public view, and (b) conveniently located in proximity to dwellings and the waste collection point.
DTS/DPF 35.3 None are applicable.	PO 35.4 Waste and recyclable material storage areas are located away from dwellings.
DTS/DPF 35.4	PO 35.5

Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.	Where waste bins cannot be conveniently collected from the street, provision is made for on-site waste collection, designed to accommodate the safe and convenient access, egress and movement of waste collection vehicles.
DTS/DPF 35.5 None are applicable.	PO 35.6 Services including gas and water meters are conveniently located and screened from public view.
DTS/DPF 35.6 None are applicable.	PO 35.1 Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.
Water sensitive urban design	
PO 36.1 Residential development creating a common driveway / access includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.	DTS/DPF 36.1 None are applicable.
PO 36.2 Residential development creating a common driveway / access includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.	DTS/DPF 36.2 None are applicable.
Supported Accommodation and retirement facilities	
Siting, Configuration and Design	
PO 37.1 Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land.	DTS/DPF 37.1 None are applicable.
PO 37.2 Universal design features are incorporated to provide options for people living with disabilities or limited mobility and / or to facilitate ageing in place.	DTS/DPF 37.2 None are applicable.
Movement and Access	
PO 38.1 Development is designed to support safe and convenient access and movement for residents by providing: (a) ground-level access or lifted access to all units (b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places (c) car parks with gradients no steeper than 1-in-40, and of sufficient area to provide for wheelchair manoeuvrability (d) kerb ramps at pedestrian crossing points.	DTS/DPF 38.1 None are applicable.
Communal Open Space	
PO 39.1 Development is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors.	DTS/DPF 39.1 None are applicable.
PO 39.2 Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.	DTS/DPF 39.2 None are applicable.
PO 39.3 Communal open space is of sufficient size and dimensions to cater for group recreation.	DTS/DPF 39.3 Communal open space incorporates a minimum dimension of 5 metres.
PO 39.4 Communal open space is designed and sited to: (a) be conveniently accessed by the dwellings which it services (b) have regard to acoustic, safety, security and wind effects.	DTS/DPF 39.4 None are applicable.
PO 39.5 Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.	DTS/DPF 39.5 None are applicable.
PO 39.6 Communal open space is designed and sited to: (a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings	DTS/DPF 39.6 None are applicable.

(b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.	
Site Facilities / Waste Storage	
PO 40.1 Development is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric-powered vehicles.	DTS/DPF 40.1 None are applicable.
PO 40.2 Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.	DTS/DPF 40.2 None are applicable.
PO 40.3 Provision is made for suitable external clothes drying facilities.	DTS/DPF 40.3 None are applicable.
PO 40.4 Provision is made for suitable household waste and recyclable material storage facilities conveniently located away, or screened, from view.	DTS/DPF 40.4 None are applicable.
PO 40.5 Waste and recyclable material storage areas are located away from dwellings.	DTS/DPF 40.5 Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.
PO 40.6 Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.	DTS/DPF 40.6 None are applicable.
PO 40.7 Services, including gas and water meters, are conveniently located and screened from public view.	DTS/DPF 40.7 None are applicable.
Student Accommodation	
PO 41.1 Student accommodation is designed to provide safe, secure, attractive, convenient and comfortable living conditions for residents, including an internal layout and facilities that are designed to provide sufficient space and amenity for the requirements of student life and promote social interaction.	DTS/DPF 41.1 Student accommodation provides: (a) a range of living options to meet a variety of accommodation needs, such as one-bedroom, two-bedroom and disability access units (b) common or shared facilities to enable a more efficient use of space, including: (i) shared cooking, laundry and external drying facilities (ii) internal and external communal and private open space provided in accordance with Design in Urban Areas Table 1 - Private Open Space (iii) common storage facilities at the rate of $8m^3$ for every 2 dwellings or students (iv) common on-site parking in accordance with Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas (v) bicycle parking at the rate of one space for every 2 students.
PO 41.2 Student accommodation is designed to provide easy adaptation of the building to accommodate an alternative use of the building in the event it is no longer required for student housing.	DTS/DPF 41.2 None are applicable.
All non-residential development	
Water Sensitive Design	
PO 42.1 Development likely to result in risk of export of sediment, suspended solids, organic matter, nutrients, oil and grease include stormwater management systems designed to minimise pollutants entering stormwater.	DTS/DPF 42.1 None are applicable.
PO 42.2 Water discharged from a development site is of a physical, chemical and biological condition equivalent to or better than its pre-developed state.	DTS/DPF 42.2 None are applicable.
PO 42.3 Development includes stormwater management systems to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that development does not increase peak flows in downstream systems.	DTS/DPF 42.3 None are applicable.
Wash-down and Waste Loading and Unloading	
PO 43.1 Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, plant or equipment are:	DTS/DPF 43.1 None are applicable.

(a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off
(b) paved with an impervious material to facilitate wastewater collection
(c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area
(d) are designed to drain wastewater to either:
  (i) a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme
  or
  (ii) a holding tank and its subsequent removal off-site on a regular basis.

Laneway Development

Infrastructure and Access

PO 44.1

Development with a primary street comprising a laneway, alley, lane, right of way or similar minor thoroughfare only occurs where:

(a) existing utility infrastructure and services are capable of accommodating the development
(b) the primary street can support access by emergency and regular service vehicles (such as waste collection)
(c) it does not require the provision or upgrading of infrastructure on public land (such as footpaths and stormwater management systems)
(d) safety of pedestrians or vehicle movement is maintained
(e) any necessary grade transition is accommodated within the site of the development to support an appropriate development intensity and orderly development of land fronting minor thoroughfares.

DTS/DPF 44.1

Development with a primary street frontage that is not an alley, lane, right of way or similar public thoroughfare.

Decks

Design and Siting

PO 45.1

Decks are designed and sited to:

(a) complement the associated building form
(b) minimise impacts on the streetscape through siting behind the building line of the principal building (unless on a significant allotment or open space)
(c) minimise cut and fill and overall massing when viewed from adjacent land.

DTS/DPF 45.1

Decks:

(a) where ancillary to a dwelling:
  (i) are not constructed, added to or altered so that any part is situated:
    A. in front of any part of the building line of the dwelling to which it is ancillary
    or
    B. within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
  (ii) are set back at least 900mm from side or rear allotment boundaries
  (iii) when attached to the dwelling, has a finished floor level consistent with the finished ground floor level of the dwelling
  (iv) where associated with a residential use, retains a total area of soft landscaping for the entire development site, including any common property, with a minimum dimension of 700mm in accordance with (A) or (B), whichever is less:
    A. a total area is determined by the following table:

Site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
>200-450	20%
>450	25%

    B. the amount of existing soft landscaping prior to the development occurring.
(b) where in association with a non-residential use:
  (i) are set back at least 2 metres from the boundary of an allotment used for residential purposes.
  (ii) are set back at least 2 metres from a public road.
  (iii) have a floor area not exceeding $25m^2$
(c) in all cases, has a finished floor level not exceeding 1 metre above natural ground level at any point.

PO 45.2

Decks are designed and sited to minimise direct overlooking of habitable rooms and private open spaces of adjoining residential uses in neighbourhood-type zones through suitable floor levels, screening and siting taking into account the slope of the subject land, existing vegetation on the subject land, and fencing.

DTS/DPF 45.2

Decks with a finished floor level/s 500mm or more above natural ground level facing side or rear boundaries shared with a residential use in a neighbourhood-type zone incorporate screening with a maximum of 25% transparency/openings, permanently fixed to the outer edge of the deck not less than 1.5 m above the finished floor level/s.

PO 45.3

DTS/DPF 45.3

Decks used for outdoor dining, entertainment or other commercial uses provide carparking in accordance with the primary use of the deck.	Decks used for commercial purposes do not result in less on-site car parking for the primary use of the subject land than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

Table 1 - Private Open Space

Dwelling Type	Dwelling / Site Configuration	Minimum Rate
Dwelling (at ground level, other than a residential flat building that includes above ground dwellings)		Total private open space area: (a) Site area <301m^2: 24m^2 located behind the building line. (b) Site area ≥ 301m^2: 60m^2 located behind the building line. Minimum directly accessible from a living room: 16m^2 / with a minimum dimension 3m.
Cabin or caravan (permanently fixed to the ground) in a residential park or caravan and tourist park		Total area: 16m^2, which may be uses as second car parking space, provided on each site intended for residential occupation.
Dwelling in a residential flat building or mixed use building which incorporate above ground level dwellings	Dwellings at ground level:	15m^2 / minimum dimension 3m
	Dwellings above ground level:	
	Studio (no separate bedroom)	4m^2 / minimum dimension 1.8m
	One bedroom dwelling	8m^2 / minimum dimension 2.1m
	Two bedroom dwelling	11m^2 / minimum dimension 2.4m
	Three + bedroom dwelling	15 m^2 / minimum dimension 2.6m

Forestry

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Commercial forestry is designed and sited to maximise economic benefits whilst managing potential negative impacts on the environment, transport networks, surrounding land uses and landscapes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Commercial forestry plantations are established where there is no detrimental effect on the physical environment or scenic quality of the rural landscape.	DTS/DPF 1.1 None are applicable.
PO 1.2 Commercial forestry plantations are established on slopes that are stable to minimise the risk of soil erosion.	DTS/DPF 1.2 Commercial forestry plantations are not located on land with a slope exceeding 20% (1-in-5).
PO 1.3 Commercial forestry plantations and operations associated with their establishment, management and harvesting are appropriately set back from any sensitive receiver to minimise fire risk and noise disturbance.	DTS/DPF 1.3 Commercial forestry plantations and operations associated with their establishment, management and harvesting are set back 50m or more from any sensitive receiver.
Water Protection	
PO 2.1 Commercial forestry plantations incorporate artificial drainage lines (i.e. culverts, runoffs and constructed drains) integrated with natural drainage lines to minimise concentrated water	DTS/DPF 2.1 None are applicable.

flows onto or from plantation areas.	
PO 2.2 Appropriate siting, layout and design measures are adopted to minimise the impact of commercial forestry plantations on surface water resources.	DTS/DPF 2.2 Commercial forestry plantations: (a) do not involve cultivation (excluding spot cultivation) in drainage lines (b) are set back 20m or more from the banks of any major watercourse (a third order or higher watercourse), lake, reservoir, wetland or sinkhole (with direct connection to an aquifer) (c) are set back 10m or more from the banks of any first or second order watercourse or sinkhole (with no direct connection to an aquifer).
Fire Management	
PO 3.1 Commercial forestry plantations incorporate appropriate firebreaks and fire management design elements.	DTS/DPF 3.1 Commercial forestry plantations provide: (a) 7m or more wide external boundary firebreaks for plantations of 40ha or less (b) 10m or more wide external boundary firebreaks for plantations of between 40ha and 100ha (c) 20m or more wide external boundary firebreaks, or 10m with an additional 10m or more of fuel-reduced plantation, for plantations of 100ha or greater. Note: Firebreaks prescribed above (as well as access tracks) may be included within the setback buffer distances prescribed by other policies of the Code.
PO 3.2 Commercial forestry plantations incorporate appropriate fire management access tracks.	DTS/DPF 3.2 Commercial forestry plantation fire management access tracks: (a) are incorporated within all firebreaks (b) are 7m or more wide with a vertical clearance of 4m or more (c) are aligned to provide straight through access at junctions, or if they are a no through access track are appropriately signposted and provide suitable turnaround areas for fire-fighting vehicles (d) partition the plantation into units of 40ha or less in area.
Power-line Clearances	
PO 4.1 Commercial forestry plantations achieve and maintain appropriate clearances from aboveground powerlines.	DTS/DPF 4.1 Commercial forestry plantations incorporating trees with an expected mature height of greater than 6m meet the clearance requirements listed in the following table:

Voltage of transmission line	Tower or Pole	Minimum horizontal clearance distance between plantings and transmission lines
500 kV	Tower	38m
275 kV	Tower	25m
132 kV	Tower	30m
132 kV	Pole	20m
66 kV	Pole	20m
Less than 66 kV	Pole	20m

Housing Renewal

Assessment Provisions (AP)

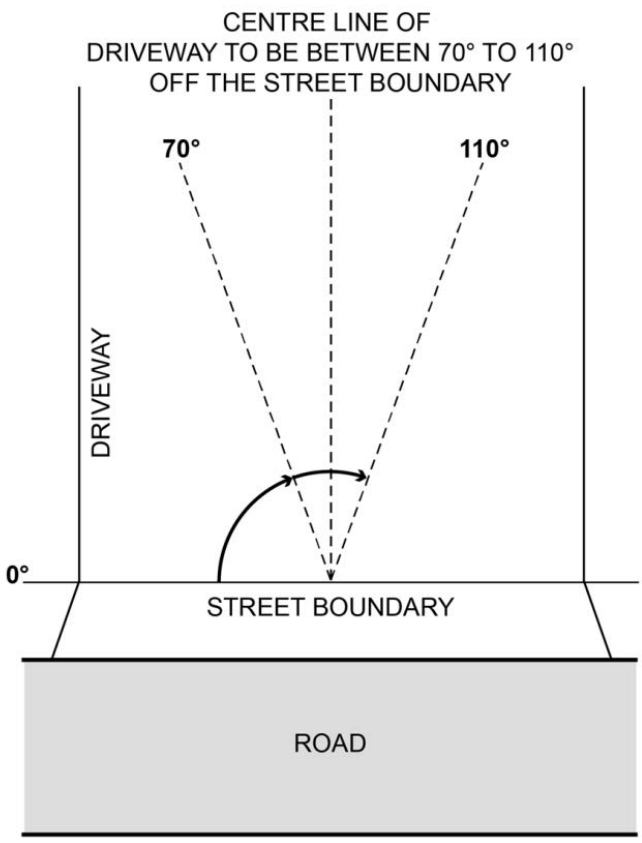
The Housing Renewal General Development Policies are only applicable to dwellings or residential flat building undertaken by:

(a) the South Australian Housing Trust either individually or jointly with other persons or bodies
or
(b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.

Desired Outcome (DO)

Desired Outcome	
DO 1	Renewed residential environments replace older social housing and provide new social housing infrastructure and other housing options and tenures to enhance the residential amenity of the local area.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)



Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Residential development provides a range of housing choices.	DTS/DPF 1.1 Development comprises one or more of the following: (a) detached dwellings (b) semi-detached dwellings (c) row dwellings (d) group dwellings (e) residential flat buildings.
PO 1.2 Medium-density housing options or higher are located in close proximity to public transit, open space and/or activity centres.	DTS/DPF 1.2 None are applicable.
Building Height	
PO 2.1 Buildings generally do not exceed 3 building levels unless in locations close to public transport, centres and/or open space.	DTS/DPF 2.1 Building height (excluding garages, carports and outbuildings) does not exceed 3 building levels and 12m and wall height does not exceed 9m (not including a gable end).
PO 2.2 Medium or high rise residential flat buildings located within or at the interface with zones which restrict heights to a maximum of 2 building levels transition down in scale and height towards the boundary of that zone, other than where it is a street boundary.	DTS/DPF 2.2 None are applicable.
Primary Street Setback	
PO 3.1 Buildings are set back from the primary street boundary to contribute to an attractive streetscape character.	DTS/DPF 3.1 Buildings are no closer to the primary street (excluding any balcony, verandah, porch, awning or similar structure) than 3m.
Secondary Street Setback	
PO 4.1 Buildings are set back from secondary street boundaries to maintain separation between building walls and public streets and contribute to a suburban streetscape character.	DTS/DPF 4.1 Buildings are set back at least 900mm from the boundary of the allotment with a secondary street frontage.
Boundary Walls	
PO 5.1 Boundary walls are limited in height and length to manage visual impacts and access to natural light and ventilation.	DTS/DPF 5.1 Except where the dwelling is located on a central site within a row dwelling or terrace arrangement, dwellings with side boundary walls are sited on only one side boundary and satisfy (a) or (b): (a) adjoin or abut a boundary wall of a building on adjoining land for the same length and height (b) do not: (i) exceed 3.2m in height from the lower of the natural or finished ground level (ii) exceed 11.5m in length (iii) when combined with other walls on the boundary of the subject development site, a maximum 45% of the length of the boundary (iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land.
PO 5.2 Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.	DTS/DPF 5.2 Dwellings in a semi-detached or row arrangement are set back 900mm or more from side boundaries shared with allotments outside the development site, except for a carport or garage.
Side Boundary Setback	
PO 6.1 Buildings are set back from side boundaries to provide: (a) separation between dwellings in a way that contributes to a suburban character (b) access to natural light and ventilation for neighbours.	DTS/DPF 6.1 Other than walls located on a side boundary, buildings are set back from side boundaries in accordance with the following: (a) where the wall height does not exceed 3m - at least 900mm (b) for a wall that is not south facing and the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings (c) for a wall that is south facing and the wall height exceeds 3m - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings.
Rear Boundary Setback	

PO 7.1 Buildings are set back from rear boundaries to provide: (a) separation between dwellings in a way that contributes to a suburban character (b) access to natural light and ventilation for neighbours (c) private open space (d) space for landscaping and vegetation.	DTS/DPF 7.1 Dwellings are set back from the rear boundary: (a) 3m or more for the first building level (b) 5m or more for any subsequent building level.
Buildings elevation design	
PO 8.1 Dwelling elevations facing public streets and common driveways make a positive contribution to the streetscape and common driveway areas.	DTS/DPF 8.1 Each dwelling includes at least 3 of the following design features within the building elevation facing a primary street, and at least 2 of the following design features within the building elevation facing any other public road (other than a laneway) or a common driveway: (a) a minimum of 30% of the building elevation is set back an additional 300mm from the building line (b) a porch or portico projects at least 1m from the building elevation (c) a balcony projects from the building elevation (d) a verandah projects at least 1m from the building elevation (e) eaves of a minimum 400mm width extend along the width of the front elevation (f) a minimum 30% of the width of the upper level projects forward from the lower level primary building line by at least 300mm. (g) a minimum of two different materials or finishes are incorporated on the walls of the building elevation, with a maximum of 80% of the building elevation in a single material or finish.
PO 8.2 Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.	DTS/DPF 8.2 Each dwelling with a frontage to a public street: (a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m (b) has an aggregate window area of at least $2m^2$ facing the primary street
PO 8.3 The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets.	DTS/DPF 8.3 None are applicable.
PO 8.4 Built form considers local context and provides a quality design response through scale, massing, materials, colours and architectural expression.	PO 8.5 Entrances to multi-storey buildings are: (a) oriented towards the street (b) visible and easily identifiable from the street (c) designed to include a common mail box structure.
DTS/DPF 8.5 None are applicable.	DTS/DPF 8.4 None are applicable.
Outlook and amenity	
PO 9.1 Living rooms have an external outlook to provide a high standard of amenity for occupants.	DTS/DPF 9.1 A living room of a dwelling incorporates a window with an external outlook towards the street frontage or private open space.
PO 9.2 Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.	DTS/DPF 9.2 None are applicable.
Private Open Space	
PO 10.1 Dwellings are provided with suitable sized areas of usable private open space to meet the needs of occupants.	DTS/DPF 10.1 Private open space is provided in accordance with the following table:

Dwelling Type	Dwelling / Site Configuration	Minimum Rate
Dwelling (at ground level)		Total area: $24m^2$ located behind the building line Minimum adjacent to a living room: $16m^2$ with a minimum dimension 3m
Dwelling (above ground level)	Studio	$4m^2$ / minimum dimension 1.8m

	One bedroom dwelling: $8m^2$ / minimum dimension 2.1m Two bedroom dwelling: $11m^2$ / minimum dimension 2.4m Three + bedroom dwelling: $15\ m^2$ / minimum dimension 2.6m
PO 10.2 Private open space positioned to provide convenient access from internal living areas.	DTS/DPF 10.2 At least 50% of the required area of private open space is accessible from a habitable room.
PO 10.3 Private open space is positioned and designed to: (a) provide useable outdoor space that suits the needs of occupants; (b) take advantage of desirable orientation and vistas; and (c) adequately define public and private space.	DTS/DPF 10.3 None are applicable.
Visual privacy	
PO 11.1 Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses.	DTS/DPF 11.1 Upper level windows facing side or rear boundaries shared with another residential allotment/site satisfy one of the following: (a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 200mm (b) have sill heights greater than or equal to 1.5m above finished floor level (c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5m above the finished floor.
PO 11.2 Development mitigates direct overlooking from upper level balconies and terraces to habitable rooms and private open space of adjoining residential uses.	DTS/DPF 11.2 One of the following is satisfied: (a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve that is at least 15m wide in all places faced by the balcony or terrace or (b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of: (i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land or (ii) 1.7m above finished floor level in all other cases
Landscaping	
PO 12.1 Soft landscaping is incorporated into development to: (a) minimise heat absorption and reflection (b) maximise shade and shelter (c) maximise stormwater infiltration and biodiversity (d) enhance the appearance of land and streetscapes.	DTS/DPF 12.1 Residential development incorporates pervious areas for soft landscaping with a minimum dimension of 700mm provided in accordance with (a) and (b): (a) a total area as determined by the following table: Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2) — Minimum percentage of site <150 — 10% <200 — 15% 200-450 — 20% >450 — 25% (b) at least 30% of land between the road boundary and the building line.
Water Sensitive Design	
PO 13.1 Residential development is designed to capture and use stormwater to: (a) maximise efficient use of water resources (b) manage peak stormwater runoff flows and volume to ensure the carrying capacities of downstream systems are not overloaded (c) manage runoff quality to maintain, as close as practical, pre-development conditions.	DTS/DPF 13.1 None are applicable.
Car Parking	
PO 14.1 On-site car parking is provided to meet the anticipated demand of residents, with less on-site parking in areas in close proximity to public transport.	DTS/DPF 14.1 On-site car parking is provided at the following rates per dwelling: (a) 2 or fewer bedrooms - 1 car parking space (b) 3 or more bedrooms - 2 car parking spaces.
PO 14.2	DTS/DPF 14.2

Enclosed car parking spaces are of dimensions to be functional, accessible and convenient.	Residential parking spaces enclosed by fencing, walls or other obstructions with the following internal dimensions (separate from any waste storage area): (a) single parking spaces: (i) a minimum length of 5.4m (ii) a minimum width of 3.0m (iii) a minimum garage door width of 2.4m (b) double parking spaces (side by side): (i) a minimum length of 5.4m (ii) a minimum width of 5.5m (iii) minimum garage door width of 2.4m per space.
PO 14.3 Uncovered car parking spaces are of dimensions to be functional, accessible and convenient.	DTS/DPF 14.3 Uncovered car parking spaces have: (a) a minimum length of 5.4m (b) a minimum width of 2.4m (c) a minimum width between the centre line of the space and any fence, wall or other obstruction of 1.5m.
PO 14.4 Residential flat buildings and group dwelling developments provide sufficient on-site visitor car parking to cater for anticipated demand.	DTS/DPF 14.4 Visitor car parking for group and residential flat buildings incorporating 4 or more dwellings is provided on-site at a minimum ratio of 0.25 car parking spaces per dwelling.
PO 14.5 Residential flat buildings provide dedicated areas for bicycle parking.	DTS/DPF 14.5 Residential flat buildings provide one bicycle parking space per dwelling.
Overshadowing	
PO 15.1 Development minimises overshadowing of the private open spaces of adjoining land by ensuring that ground level open space associated with residential buildings receive direct sunlight for a minimum of 2 hours between 9am and 3pm on 21 June.	DTS/DPF 15.1 None are applicable.
Waste	
PO 16.1 Provision is made for the convenient storage of waste bins in a location screened from public view.	DTS/DPF 16.1 A waste bin storage area is provided behind the primary building line that: (a) has a minimum area of $2m^2$ with a minimum dimension of 900mm (separate from any designated car parking spaces or private open space).; and (b) has a continuous unobstructed path of travel (excluding moveable objects like gates, vehicles and roller doors) with a minimum width of 800mm between the waste bin storage area and the street.
PO 16.2 Residential flat buildings provide a dedicated area for the on-site storage of waste which is: (a) easily and safely accessible for residents and for collection vehicles (b) screened from adjoining land and public roads (c) of sufficient dimensions to be able to accommodate the waste storage needs of the development considering the intensity and nature of the development and the frequency of collection.	DTS/DPF 16.2 None are applicable.
Vehicle Access	
PO 17.1 Driveways are located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages and on-street parking.	DTS/DPF 17.1 None are applicable.
PO 17.2 Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.	DTS/DPF 17.2 Vehicle access to designated car parking spaces satisfy (a) or (b): (a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land (b) where newly proposed, is set back: (i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner (ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance (iii) 6m or more from the tangent point of an intersection of 2 or more roads (iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing.
PO 17.3 Driveways are designed to enable safe and convenient vehicle movements from the public	DTS/DPF 17.3 Driveways are designed and sited so that:

road to on-site parking spaces.	(a) the gradient of the driveway does not exceed a grade of 1 in 4 and includes transitions to ensure a maximum grade change of 12.5% (1 in 8) for summit changes, and 15% (1 in 6.7) for sag changes, in accordance with AS 2890.1:2004 to prevent vehicles bottoming or scraping (b) the centreline of the driveway has an angle of no less than 70 degrees and no more than 110 degrees from the street boundary to which it takes its access as shown in the following diagram:  (c) if located to provide access from an alley, lane or right of way - the alley, land or right or way is at least 6.2m wide along the boundary of the allotment / site.
PO 17.4 Driveways and access points are designed and distributed to optimise the provision of on-street parking.	DTS/DPF 17.4 Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements: (a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number) (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.
PO 17.5 Residential driveways that service more than one dwelling of a dimension to allow safe and convenient movement.	DTS/DPF 17.5 Driveways that service more than 1 dwelling or a dwelling on a battle-axe site: (a) have a minimum width of 3m (b) for driveways servicing more than 3 dwellings: (i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street (ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m.
PO 17.6 Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site and manoeuvre within the site in a safe and convenient manner.	DTS/DPF 17.6 Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre
PO 17.7 Dwellings are adequately separated from common driveways and manoeuvring areas.	DTS/DPF 17.7 Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles.
Storage	
PO 18.1 Dwellings are provided with sufficient and accessible space for storage to meet likely occupant needs.	DTS/DPF 18.1 Dwellings are provided with storage at the following rates and 50% or more of the storage volume is provided within the dwelling: (a) studio: not less than $6m^3$ (b) 1 bedroom dwelling / apartment: not less than $8m^3$

	(c) 2 bedroom dwelling / apartment: not less than $10m^3$ (d) 3+ bedroom dwelling / apartment: not less than $12m^3$.
Earthworks	
PO 19.1 Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.	DTS/DPF 19.1 The development does not involve: (a) excavation exceeding a vertical height of 1m or (b) filling exceeding a vertical height of 1m or (c) a total combined excavation and filling vertical height exceeding 2m.
Service connections and infrastructure	
PO 20.1 Dwellings are provided with appropriate service connections and infrastructure.	DTS/DPF 20.1 The site and building: (a) have the ability to be connected to a permanent potable water supply (b) have the ability to be connected to a sewerage system, or a wastewater system approved under the *South Australian Public Health Act 2011* (c) have the ability to be connected to electricity supply (d) have the ability to be connected to an adequate water supply (and pressure) for fire-fighting purposes (e) would not be contrary to the Regulations prescribed for the purposes of Section 86 of the *Electricity Act 1996*.
Site contamination	
PO 21.1 Land that is suitable for sensitive land uses to provide a safe environment.	DTS/DPF 21.1 Development satisfies (a), (b), (c) or (d): (a) does not involve a change in the use of land (b) involves a change in the use of land that does not constitute a change to a more sensitive use (c) involves a change in the use of land to a more sensitive use on land at which site contamination does not exist (as demonstrated in a site contamination declaration form) (d) involves a change in the use of land to a more sensitive use on land at which site contamination exists, or may exist (as demonstrated in a site contamination declaration form), and satisfies both of the following: (i) a site contamination audit report has been prepared under Part 10A of the *Environment Protection Act 1993* in relation to the land within the previous 5 years which states that A. site contamination does not exist (or no longer exists) at the land or B. the land is suitable for the proposed use or range of uses (without the need for any further remediation) or C. where remediation is, or remains, necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development) and (ii) no other class 1 activity or class 2 activity has taken place at the land since the preparation of the site contamination audit report (as demonstrated in a site contamination declaration form).

Infrastructure and Renewable Energy Facilities

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Efficient provision of infrastructure networks and services, renewable energy facilities and ancillary development in a manner that minimises hazard, is environmentally and culturally sensitive and manages adverse visual impacts on natural and rural landscapes and residential amenity.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1	DTS/DPF 1.1

Development is located and designed to minimise hazard or nuisance to adjacent development and land uses.	None are applicable.
Visual Amenity	
PO 2.1 The visual impact of above-ground infrastructure networks and services (excluding high voltage transmission lines), renewable energy facilities (excluding wind farms), energy storage facilities and ancillary development is minimised from townships, scenic routes and public roads by: (a) utilising features of the natural landscape to obscure views where practicable (b) siting development below ridgelines where practicable (c) avoiding visually sensitive and significant landscapes (d) using materials and finishes with low-reflectivity and colours that complement the surroundings (e) using existing vegetation to screen buildings (f) incorporating landscaping or landscaped mounding around the perimeter of a site and between adjacent allotments accommodating or zoned to primarily accommodate sensitive receivers.	DTS/DPF 2.1 None are applicable.
PO 2.2 Pumping stations, battery storage facilities, maintenance sheds and other ancillary structures incorporate vegetation buffers to reduce adverse visual impacts on adjacent land.	DTS/DPF 2.2 None are applicable.
PO 2.3 Surfaces exposed by earthworks associated with the installation of storage facilities, pipework, penstock, substations and other ancillary plant are reinstated and revegetated to reduce adverse visual impacts on adjacent land.	DTS/DPF 2.3 None are applicable.
Rehabilitation	
PO 3.1 Progressive rehabilitation (incorporating revegetation) of disturbed areas, ahead of or upon decommissioning of areas used for renewable energy facilities and transmission corridors.	DTS/DPF 3.1 None are applicable.
Hazard Management	
PO 4.1 Infrastructure and renewable energy facilities and ancillary development located and operated to not adversely impact maritime or air transport safety, including the operation of ports, airfields and landing strips.	DTS/DPF 4.1 None are applicable.
PO 4.2 Facilities for energy generation, power storage and transmission are separated as far as practicable from dwellings, tourist accommodation and frequently visited public places (such as viewing platforms / lookouts) to reduce risks to public safety from fire or equipment malfunction.	DTS/DPF 4.2 None are applicable.
PO 4.3 Bushfire hazard risk is minimised for renewable energy facilities by providing appropriate access tracks, safety equipment and water tanks and establishing cleared areas around substations, battery storage and operations compounds.	DTS/DPF 4.3 None are applicable.
Electricity Infrastructure and Battery Storage Facilities	
PO 5.1 Electricity infrastructure is located to minimise visual impacts through techniques including: (a) siting utilities and services: (i) on areas already cleared of native vegetation (ii) where there is minimal interference or disturbance to existing native vegetation or biodiversity (b) grouping utility buildings and structures with non-residential development, where practicable.	DTS/DPF 5.1 None are applicable.
PO 5.2 Electricity supply (excluding transmission lines) serving new development in urban areas and townships installed underground, excluding lines having a capacity exceeding or equal to 33kV.	DTS/DPF 5.2 None are applicable.
PO 5.3 Battery storage facilities are co-located with substation infrastructure where practicable to minimise the development footprint and reduce environmental impacts.	DTS/DPF 5.3 None are applicable.
Telecommunication Facilities	
PO 6.1 The proliferation of telecommunications facilities in the form of towers/monopoles in any	DTS/DPF 6.1 None are applicable.

one locality is managed, where technically feasible, by co-locating a facility with other communications facilities to mitigate impacts from clutter on visual amenity.	
PO 6.2 Telecommunications antennae are located as close as practicable to support structures to manage overall bulk and mitigate impacts on visual amenity.	DTS/DPF 6.2 None are applicable.
PO 6.3 Telecommunications facilities, particularly towers/monopoles, are located and sized to mitigate visual impacts by the following methods: (a) where technically feasible, incorporating the facility within an existing structure that may serve another purpose or all of the following: (b) using existing buildings and landscape features to obscure or interrupt views of a facility from nearby public roads, residential areas and places of high public amenity to the extent practical without unduly hindering the effective provision of telecommunications services (c) using materials and finishes that complement the environment (d) screening using landscaping and vetegation, particularly for equipment shelters and huts.	DTS/DPF 6.3 None are applicable.
Renewable Energy Facilities	
PO 7.1 Renewable energy facilities are located as close as practicable to existing transmission infrastructure to facilitate connections and minimise environmental impacts as a result of extending transmission infrastructure.	DTS/DPF 7.1 None are applicable.
Renewable Energy Facilities (Wind Farm)	
PO 8.1 Visual impact of wind turbine generators on the amenity of residential and tourist development is reduced through appropriate separation.	DTS/DPF 8.1 Wind turbine generators are: (a) set back at least 2000m from the base of a turbine to any of the following zones: (i) Rural Settlement Zone (ii) Township Zone (iii) Rural Living Zone (iv) Rural Neighbourhood Zone with an additional 10m setback per additional metre over 150m overall turbine height (measured from the base of the turbine). (b) set back at least 1500m from the base of the turbine to non-associated (non-stakeholder) dwellings and tourist accommodation
PO 8.2 The visual impact of wind turbine generators on natural landscapes is managed by: (a) designing wind turbine generators to be uniform in colour, size and shape (b) coordinating blade rotation and direction (c) mounting wind turbine generators on tubular towers as opposed to lattice towers.	DTS/DPF 8.2 None are applicable.
PO 8.3 Wind turbine generators and ancillary development minimise potential for bird and bat strike.	DTS/DPF 8.3 None are applicable.
PO 8.4 Wind turbine generators incorporate recognition systems or physical markers to minimise the risk to aircraft operations.	DTS/DPF 8.4 No Commonwealth air safety (CASA / ASA) or Defence requirement is applicable.
PO 8.5 Meteorological masts and guidewires are identifiable to aircraft through the use of colour bands, marker balls, high visibility sleeves or flashing strobes.	DTS/DPF 8.5 None are applicable.
Renewable Energy Facilities (Solar Power)	
PO 9.1 Ground mounted solar power facilities generating 5MW or more are not located on land requiring the clearance of areas of intact native vegetation or on land of high environmental, scenic or cultural value.	DTS/DPF 9.1 None are applicable.
PO 9.2 Ground mounted solar power facilities allow for movement of wildlife by: (a) incorporating wildlife corridors and habitat refuges (b) avoiding the use of extensive security or perimeter fencing or incorporating fencing that enables the passage of small animals without unreasonably compromising the security of the facility.	DTS/DPF 9.2 None are applicable.
PO 9.3	DTS/DPF 9.3

Amenity impacts of solar power facilities are minimised through separation from conservation areas and sensitive receivers in other ownership.	Ground mounted solar power facilities are set back from land boundaries, conservation areas and relevant zones in accordance with the following criteria: **Generation Capacity** / **Approximate size of array** / **Setback from adjoining land boundary** / **Setback from conservation areas** / **Setback from Township, Rural Settlement, Rural Neighbourhood and Rural Living Zones[1]** 50MW> / 80ha+ / 30m / 500m / 2km 10MW<50MW / 16ha-<80ha / 25m / 500m / 1.5km 5MW<10MW / 8ha to <16ha / 20m / 500m / 1km 1MW<5MW / 1.6ha to <8ha / 15m / 500m / 500m 100kW<1MW / 0.5ha<1.6ha / 10m / 500m / 100m <100kW / <0.5ha / 5m / 500m / 25m Notes: 1. Does not apply when the site of the proposed ground mounted solar power facility is located within one of these zones.
PO 9.4 Ground mounted solar power facilities incorporate landscaping within setbacks from adjacent road frontages and boundaries of adjacent allotments accommodating non-host dwellings, where balanced with infrastructure access and bushfire safety considerations.	DTS/DPF 9.4 None are applicable.
Hydropower / Pumped Hydropower Facilities	
PO 10.1 Hydropower / pumped hydropower facility storage is designed and operated to minimise the risk of storage dam failure.	DTS/DPF 10.1 None are applicable.
PO 10.2 Hydropower / pumped hydropower facility storage is designed and operated to minimise water loss through increased evaporation or system leakage, with the incorporation of appropriate liners, dam covers, operational measures or detection systems.	DTS/DPF 10.2 None are applicable.
PO 10.3 Hydropower / pumped hydropower facilities on existing or former mine sites minimise environmental impacts from site contamination, including from mine operations or water sources subject to such processes, now or in the future.	DTS/DPF 10.3 None are applicable.
Water Supply	
PO 11.1 Development is connected to an appropriate water supply to meet the ongoing requirements of the intended use.	DTS/DPF 11.1 Development is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the on-going requirements of the development.
PO 11.2 Dwellings are connected to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the intended use. Where this is not available an appropriate rainwater tank or storage system for domestic use is provided.	DTS/DPF 11.2 A dwelling is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the development. Where this is not available it is serviced by a rainwater tank or tanks capable of holding at least 50,000 litres of water which is: (a) exclusively for domestic use (b) connected to the roof drainage system of the dwelling.
Wastewater Services	
PO 12.1 Development is connected to an approved common wastewater disposal service with the capacity to meet the requirements of the intended use. Where this is not available an appropriate on-site service is provided to meet the ongoing requirements of the intended use in accordance with the following: (a) it is wholly located and contained within the allotment of the development it will service (b) in areas where there is a high risk of contamination of surface, ground, or marine water resources from on-site disposal of liquid wastes, disposal systems are included to minimise the risk of pollution to those water resources (c) septic tank effluent drainage fields and other wastewater disposal areas are located away from watercourses and flood prone, sloping, saline or poorly drained land to minimise environmental harm.	DTS/DPF 12.1 Development is connected, or will be connected, to an approved common wastewater disposal service with the capacity to meet the requirements of the development. Where this is not available it is instead capable of being serviced by an on-site waste water treatment system in accordance with the following: (a) the system is wholly located and contained within the allotment of development it will service; and (b) the system will comply with the requirements of the South Australian Public Health Act 2011.

PO 12.2 Effluent drainage fields and other wastewater disposal areas are maintained to ensure the effective operation of waste systems and minimise risks to human health and the environment.	DTS/DPF 12.2 Development is not built on, or encroaches within, an area that is, or will be, required for a sewerage system or waste control system.
Temporary Facilities	
PO 13.1 In rural and remote locations, development that is likely to generate significant waste material during construction, including packaging waste, makes provision for a temporary on-site waste storage enclosure to minimise the incidence of wind-blown litter.	DTS/DPF 13.1 A waste collection and disposal service is used to dispose of the volume of waste at the rate it is generated.
PO 13.2 Temporary facilities to support the establishment of renewable energy facilities (including borrow pits, concrete batching plants, laydown, storage, access roads and worker amenity areas) are sited and operated to minimise environmental impact.	DTS/DPF 13.2 None are applicable.

Intensive Animal Husbandry and Dairies

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development of intensive animal husbandry and dairies in locations that are protected from encroachment by sensitive receivers and in a manner that minimises their adverse effects on amenity and the environment.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting and Design	
PO 1.1 Intensive animal husbandry, dairies and associated activities are sited, designed, constructed and managed to not unreasonably impact on the environment or amenity of the locality.	DTS/DPF 1.1 None are applicable.
PO 1.2 Intensive animal husbandry, dairies and associated activities are sited, designed, constructed and managed to prevent the potential transmission of disease to other operations where animals are kept.	DTS/DPF 1.2 None are applicable.
PO 1.3 Intensive animal husbandry and associated activities such as wastewater lagoons and liquid/solid waste disposal areas are sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions.	DTS/DPF 1.3 None are applicable.
PO 1.4 Dairies and associated activities such as wastewater lagoons and liquid/solid waste disposal areas are sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions.	DTS/DPF 1.4 Dairies, associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities are located 500m or more from the nearest sensitive receiver in other ownership.
PO 1.5 Lagoons for the storage or treatment of milking shed effluent is adequately separated from roads to minimise impacts from odour on the general public.	DTS/DPF 1.5 Lagoons for the storage or treatment of milking shed effluent are set back 20m or more from public roads.
Waste	
PO 2.1 Storage of manure, used litter and other wastes (other than waste water lagoons) is sited, designed, constructed and managed to: (a) avoid attracting and harbouring vermin (b) avoid polluting water resources (c) be located outside 1% AEP flood event areas.	DTS/DPF 2.1 None are applicable.
Soil and Water Protection	
PO 3.1 To avoid environmental harm and adverse effects on water resources, intensive animal	DTS/DPF 3.1 Intensive animal husbandry operations are set back:

husbandry operations are appropriately set back from: (a) public water supply reservoirs (b) major watercourses (third order or higher stream) (c) any other watercourse, bore or well used for domestic or stock water supplies.	(a) 800m or more from a public water supply reservoir (b) 200m or more from a major watercourse (third order or higher stream) (c) 100m or more from any other watercourse, bore or well used for domestic or stock water supplies.
PO 3.2 Intensive animal husbandry operations and dairies incorporate appropriately designed effluent and run-off facilities that: (a) have sufficient capacity to hold effluent and runoff from the operations on site (b) ensure effluent does not infiltrate and pollute groundwater, soil or other water resources.	DTS/DPF 3.2 None are applicable.

Interface between Land Uses

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is located and designed to mitigate adverse effects on or from neighbouring and proximate land uses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General Land Use Compatibility	
PO 1.1 Sensitive receivers are designed and sited to protect residents and occupants from adverse impacts generated by lawfully existing land uses (or lawfully approved land uses) and land uses desired in the zone.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development adjacent to a site containing a sensitive receiver (or lawfully approved sensitive receiver) or zone primarily intended to accommodate sensitive receivers is designed to minimise adverse impacts.	DTS/DPF 1.2 None are applicable.
Hours of Operation	
PO 2.1 Non-residential development does not unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers) or an adjacent zone primarily for sensitive receivers through its hours of operation having regard to: (a) the nature of the development (b) measures to mitigate off-site impacts (c) the extent to which the development is desired in the zone (d) measures that might be taken in an adjacent zone primarily for sensitive receivers that mitigate adverse impacts without unreasonably compromising the intended use of that land.	DTS/DPF 2.1 Development operating within the following hours:

Class of Development	Hours of operation
Consulting room	7am to 9pm, Monday to Friday 8am to 5pm, Saturday
Office	7am to 9pm, Monday to Friday 8am to 5pm, Saturday
Shop, other than any one or combination of the following: (a) restaurant (b) cellar door in the Productive Rural Landscape Zone, Rural Zone or Rural Horticulture Zone	7am to 9pm, Monday to Friday 8am to 5pm, Saturday and Sunday

Overshadowing	
PO 3.1 Overshadowing of habitable room windows of adjacent residential land uses in: a. a neighbourhood-type zone is minimised to maintain access to direct winter sunlight b. other zones is managed to enable access to direct winter sunlight.	DTS/DPF 3.1 North-facing windows of habitable rooms of adjacent residential land uses in a neighbourhood-type zone receive at least 3 hours of direct sunlight between 9.00am and 3.00pm on 21 June.
PO 3.2	DTS/DPF 3.2

Overshadowing of the primary area of private open space or communal open space of adjacent residential land uses in: a. a neighbourhood type zone is minimised to maintain access to direct winter sunlight b. other zones is managed to enable access to direct winter sunlight.	Development maintains 2 hours of direct sunlight between 9.00 am and 3.00 pm on 21 June to adjacent residential land uses in a neighbourhood-type zone in accordance with the following: a. for ground level private open space, the smaller of the following: i. half the existing ground level open space or ii. 35m2 of the existing ground level open space (with at least one of the area's dimensions measuring 2.5m) b. for ground level communal open space, at least half of the existing ground level open space.
PO 3.3 Development does not unduly reduce the generating capacity of adjacent rooftop solar energy facilities taking into account: (a) the form of development contemplated in the zone (b) the orientation of the solar energy facilities (c) the extent to which the solar energy facilities are already overshadowed.	DTS/DPF 3.3 None are applicable.
PO 3.4 Development that incorporates moving parts, including windmills and wind farms, are located and operated to not cause unreasonable nuisance to nearby dwellings and tourist accommodation caused by shadow flicker.	DTS/DPF 3.4 None are applicable.
Activities Generating Noise or Vibration	
PO 4.1 Development that emits noise (other than music) does not unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers).	DTS/DPF 4.1 Noise that affects sensitive receivers achieves the relevant Environment Protection (Commercial and Industrial Noise) Policy criteria.
PO 4.2 Areas for the on-site manoeuvring of service and delivery vehicles, plant and equipment, outdoor work spaces (and the like) are designed and sited to not unreasonably impact the amenity of adjacent sensitive receivers (or lawfully approved sensitive receivers) and zones primarily intended to accommodate sensitive receivers due to noise and vibration by adopting techniques including: (a) locating openings of buildings and associated services away from the interface with the adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers (b) when sited outdoors, locating such areas as far as practicable from adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers (c) housing plant and equipment within an enclosed structure or acoustic enclosure (d) providing a suitable acoustic barrier between the plant and / or equipment and the adjacent sensitive receiver boundary or zone.	DTS/DPF 4.2 None are applicable.
PO 4.3 Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa are positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers (or lawfully approved sensitive receivers).	DTS/DPF 4.3 The pump and/or filtration system ancillary to a dwelling erected on the same site is: (a) enclosed in a solid acoustic structure located at least 5m from the nearest habitable room located on an adjoining allotment or (b) located at least 12m from the nearest habitable room located on an adjoining allotment.
PO 4.4 External noise into bedrooms is minimised by separating or shielding these rooms from service equipment areas and fixed noise sources located on the same or an adjoining allotment.	DTS/DPF 4.4 Adjacent land is used for residential purposes.
PO 4.5 Outdoor areas associated with licensed premises (such as beer gardens or dining areas) are designed and/or sited to not cause unreasonable noise impact on existing adjacent sensitive receivers (or lawfully approved sensitive receivers).	DTS/DPF 4.5 None are applicable.
PO 4.6 Development incorporating music achieves suitable acoustic amenity when measured at the boundary of an adjacent sensitive receiver (or lawfully approved sensitive receiver) or zone primarily intended to accommodate sensitive receivers.	DTS/DPF 4.6 Development incorporating music includes noise attenuation measures that will achieve the following noise levels: **Assessment location** / **Music noise level** Externally at the nearest existing or envisaged noise sensitive location / Less than 8dB above the level of background noise ($L_{90,15min}$) in any octave band of the sound spectrum (LOCT10,15 < LOCT90,15 + 8dB)
Air Quality	
PO 5.1	DTS/DPF 5.1

Development with the potential to emit harmful or nuisance-generating air pollution incorporates air pollution control measures to prevent harm to human health or unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers) within the locality and zones primarily intended to accommodate sensitive receivers.	None are applicable.
PO 5.2 Development that includes chimneys or exhaust flues (including cafes, restaurants and fast food outlets) is designed to minimise nuisance or adverse health impacts to sensitive receivers (or lawfully approved sensitive receivers) by: (a) incorporating appropriate treatment technology before exhaust emissions are released (b) locating and designing chimneys or exhaust flues to maximise the dispersion of exhaust emissions, taking into account the location of sensitive receivers.	DTS/DPF 5.2 None are applicable.
Light Spill	
PO 6.1 External lighting is positioned and designed to not cause unreasonable light spill impact on adjacent sensitive receivers (or lawfully approved sensitive receivers).	DTS/DPF 6.1 None are applicable.
PO 6.2 External lighting is not hazardous to motorists and cyclists.	DTS/DPF 6.2 None are applicable.
Solar Reflectivity / Glare	
PO 7.1 Development is designed and comprised of materials and finishes that do not unreasonably cause a distraction to adjacent road users and pedestrian areas or unreasonably cause heat loading and micro-climatic impacts on adjacent buildings and land uses as a result of reflective solar glare.	DTS/DPF 7.1 None are applicable.
Electrical Interference	
PO 8.1 Development in rural and remote areas does not unreasonably diminish or result in the loss of existing communication services due to electrical interference.	DTS/DPF 8.1 The building or structure: (a) is no greater than 10m in height, measured from existing ground level or (b) is not within a line of sight between a fixed transmitter and fixed receiver (antenna) other than where an alternative service is available via a different fixed transmitter or cable.
Interface with Rural Activities	
PO 9.1 Sensitive receivers are located and designed to mitigate impacts from lawfully existing horticultural and farming activities (or lawfully approved horticultural and farming activities), including spray drift and noise and do not prejudice the continued operation of these activities.	DTS/DPF 9.1 None are applicable.
PO 9.2 Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing intensive animal husbandry activities and do not prejudice the continued operation of these activities.	DTS/DPF 9.2 None are applicable.
PO 9.3 Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing land-based aquaculture activities and do not prejudice the continued operation of these activities.	DTS/DPF 9.3 Sensitive receivers are located at least 200m from the boundary of a site used for land-based aquaculture and associated components in other ownership.
PO 9.4 Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing dairies including associated wastewater lagoons and liquid/solid waste storage and disposal facilities and do not prejudice the continued operation of these activities.	DTS/DPF 9.4 Sensitive receivers are sited at least 500m from the boundary of a site used for a dairy and associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities in other ownership.
PO 9.5 Sensitive receivers are located and designed to mitigate the potential impacts from lawfully existing facilities used for the handling, transportation and storage of bulk commodities (recognising the potential for extended hours of operation) and do not prejudice the continued operation of these activities.	DTS/DPF 9.5 Sensitive receivers are located away from the boundary of a site used for the handling, transportation and/or storage of bulk commodities in other ownership in accordance with the following: (a) 300m or more, where it involves the handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility (b) 300m or more, where it involves the handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility (including sea-port grain terminals) where the handling of these materials into or from vessels does not exceed 100 tonnes per day (c) 500m or more, where it involves the storage of bulk petroleum in individual containers with a capacity up to 200 litres and a total on-site storage capacity not exceeding 1000 cubic metres

	(d) 500m or more, where it involves the handling of coal with a capacity up to 1 tonne per day or a storage capacity up to 50 tonnes (e) 1000m or more, where it involves the handling of coal with a capacity exceeding 1 tonne per day but not exceeding 100 tonnes per day or a storage capacity exceeding 50 tonnes but not exceeding 5000 tonnes.
PO 9.6 Setbacks and vegetation plantings along allotment boundaries should be incorporated to mitigate the potential impacts of spray drift and other impacts associated with agricultural and horticultural activities.	DTS/DPF 9.6 None are applicable.
PO 9.7 Urban development does not prejudice existing agricultural and horticultural activities through appropriate separation and design techniques.	DTS/DPF 9.7 None are applicable.
Interface with Mines and Quarries (Rural and Remote Areas)	
PO 10.1 Sensitive receivers are separated from existing mines to minimise the adverse impacts from noise, dust and vibration.	DTS/DPF 10.1 Sensitive receivers are located no closer than 500m from the boundary of a Mining Production Tenement under the *Mining Act 1971*.

Land Division

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Land division: (a) creates allotments with the appropriate dimensions and shape for their intended use (b) allows efficient provision of new infrastructure and the optimum use of underutilised infrastructure (c) integrates and allocates adequate and suitable land for the preservation of site features of value, including significant vegetation, watercourses, water bodies and other environmental features (d) facilitates solar access through allotment orientation (e) creates a compact urban form that supports active travel, walkability and the use of public transport (f) avoids areas of high natural hazard risk.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All land division	
Allotment configuration	
PO 1.1 Land division creates allotments suitable for their intended use.	DTS/DPF 1.1 Division of land satisfies (a) or (b): (a) reflects the site boundaries illustrated and approved in an operative or existing development authorisation for residential development under the *Development Act 1993* or *Planning, Development and Infrastructure Act 2016* where the allotments are used or are proposed to be used solely for residential purposes (b) is proposed as part of a combined land division application with deemed-to-satisfy dwellings on the proposed allotments.
PO 1.2 Land division considers the physical characteristics of the land, preservation of environmental and cultural features of value and the prevailing context of the locality.	DTS/DPF 1.2 None are applicable.
Design and Layout	
PO 2.1 Land division results in a pattern of development that minimises the likelihood of future earthworks and retaining walls.	DTS/DPF 2.1 None are applicable.
PO 2.2 Land division enables the appropriate management of interface impacts between potentially conflicting land uses and/or zones.	DTS/DPF 2.2 None are applicable.
PO 2.3 Land division maximises the number of allotments that face public open space and public streets.	DTS/DPF 2.3 None are applicable.

PO 2.4 Land division is integrated with site features, adjacent land uses, the existing transport network and available infrastructure.	DTS/DPF 2.4 None are applicable.
PO 2.5 Development and infrastructure is provided and staged in a manner that supports an orderly and economic provision of land, infrastructure and services.	DTS/DPF 2.5 None are applicable.
PO 2.6 Land division results in watercourses being retained within open space and development taking place on land not subject to flooding.	DTS/DPF 2.6 None are applicable.
PO 2.7 Land division results in legible street patterns connected to the surrounding street network.	DTS/DPF 2.7 None are applicable.
PO 2.8 Land division is designed to preserve existing vegetation of value including native vegetation and regulated and significant trees.	DTS/DPF 2.8 None are applicable.
Roads and Access	
PO 3.1 Land division provides allotments with access to an all-weather public road.	DTS/DPF 3.1 None are applicable.
PO 3.2 Street patterns and intersections are designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.	DTS/DPF 3.2 None are applicable.
PO 3.3 Land division does not impede access to publicly owned open space and/or recreation facilities.	DTS/DPF 3.3 None are applicable.
PO 3.4 Road reserves provide for safe and convenient movement and parking of projected volumes of vehicles and allow for the efficient movement of service and emergency vehicles.	DTS/DPF 3.4 None are applicable.
PO 3.5 Road reserves are designed to accommodate pedestrian and cycling infrastructure, street tree planting, landscaping and street furniture.	DTS/DPF 3.5 None are applicable.
PO 3.6 Road reserves accommodate stormwater drainage and public utilities.	DTS/DPF 3.6 None are applicable.
PO 3.7 Road reserves provide unobstructed vehicular access and egress to and from individual allotments and sites.	DTS/DPF 3.7 None are applicable.
PO 3.8 Roads, open space and thoroughfares provide safe and convenient linkages to the surrounding open space and transport network.	DTS/DPF 3.8 None are applicable.
PO 3.9 Public streets are designed to enable tree planting to provide shade and enhance the amenity of streetscapes.	DTS/DPF 3.9 None are applicable.
PO 3.10 Local streets are designed to create low-speed environments that are safe for cyclists and pedestrians.	DTS/DPF 3.10 None are applicable.
Infrastructure	
PO 4.1 Land division incorporates public utility services within road reserves or dedicated easements.	DTS/DPF 4.1 None are applicable.
PO 4.2 Waste water, sewage and other effluent is capable of being disposed of from each allotment without risk to public health or the environment.	DTS/DPF 4.2 Each allotment can be connected to: (a) a waste water treatment plant that has the hydraulic volume and pollutant load treatment and disposal capacity for the maximum predicted wastewater volume generated by subsequent development of the proposed allotment or (b) a form of on-site waste water treatment and disposal that meets relevant public health and environmental standards.

PO 4.3 Septic tank effluent drainage fields and other waste water disposal areas are maintained to ensure the effective operation of waste systems and minimise risks to human health and the environment.	DTS/DPF 4.3 Development is not built on, or encroaches within, an area that is or will be, required for a sewerage system or waste control system.
PO 4.4 Constructed wetland systems, including associated detention and retention basins, are sited and designed to ensure public health and safety is protected, including by minimising potential public health risks arising from the breeding of mosquitoes.	DTS/DPF 4.4 None are applicable.
PO 4.5 Constructed wetland systems, including associated detention and retention basins, are sited and designed to allow sediments to settle prior to discharge into watercourses or the marine environment.	DTS/DPF 4.5 None are applicable.
PO 4.6 Constructed wetland systems, including associated detention and retention basins, are sited and designed to function as a landscape feature.	DTS/DPF 4.6 None are applicable.
Minor Land Division (Under 20 Allotments)	
Open Space	
PO 5.1 Land division proposing an additional allotment under 1 hectare provides or supports the provision of open space.	DTS/DPF 5.1 None are applicable.
Solar Orientation	
PO 6.1 Land division for residential purposes facilitates solar access through allotment orientation.	DTS/DPF 6.1 None are applicable.
Water Sensitive Design	
PO 7.1 Land division creating a new road or common driveway includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.	DTS/DPF 7.1 None are applicable.
PO 7.2 Land division designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.	DTS/DPF 7.2 None are applicable.
Battle-Axe Development	
PO 8.1 Battle-axe development appropriately responds to the existing neighbourhood context.	DTS/DPF 8.1 Allotments are not in the form of a battle-axe arrangement.
PO 8.2 Battle-axe development designed to allow safe and convenient movement.	DTS/DPF 8.2 The handle of a battle-axe development: (a) has a minimum width of 4m or (b) where more than 3 allotments are proposed, a minimum width of 5.5m.
PO 8.3 Battle-axe allotments and/or common land are of a suitable size and dimension to allow passenger vehicles to enter and exit and manoeuvre within the site in a safe and convenient manner.	DTS/DPF 8.3 Battle-axe development allows a B85 passenger vehicle to enter and exit parking spaces in no more than a three-point turn manoeuvre.
PO 8.4 Battle-axe or common driveways incorporate landscaping and permeability to improve appearance and assist in stormwater management.	DTS/DPF 8.4 Battle-axe or common driveways satisfy (a) and (b): (a) are constructed of a minimum of 50% permeable or porous material (b) where the driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point).
Major Land Division (20+ Allotments)	
Open Space	
PO 9.1 Land division allocates or retains evenly distributed, high quality areas of open space to improve residential amenity and provide urban heat amelioration.	DTS/DPF 9.1 None are applicable.
PO 9.2 Land allocated for open space is suitable for its intended active and passive recreational use considering gradient and potential for inundation.	DTS/DPF 9.2 None are applicable.

PO 9.3 Land allocated for active recreation has dimensions capable of accommodating a range of active recreational activities.	DTS/DPF 9.3 None are applicable.
Water Sensitive Design	
PO 10.1 Land division creating 20 or more allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.	DTS/DPF 10.1 None are applicable.
PO 10.2 Land division creating 20 or more allotments includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.	DTS/DPF 10.2 None are applicable.
Solar Orientation	
PO 11.1 Land division creating 20 or more allotments for residential purposes facilitates solar access through allotment orientation and allotment dimensions.	DTS/DPF 11.1 None are applicable.

Marinas and On-Water Structures

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Marinas and on-water structures are located and designed to minimise the impairment of commercial, recreational and navigational activities and adverse impacts on the environment.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Navigation and Safety	
PO 1.1 Safe public access is provided or maintained to the waterfront, public infrastructure and recreation areas.	DTS/DPF 1.1 None are applicable.
PO 1.2 The operation of wharves is not impaired by marinas and on-water structures.	DTS/DPF 1.2 None are applicable.
PO 1.3 Navigation and access channels are not impaired by marinas and on-water structures.	DTS/DPF 1.3 None are applicable.
PO 1.4 Commercial shipping lanes are not impaired by marinas and on-water structures.	DTS/DPF 1.4 Marinas and on-water structures are set back 250m or more from commercial shipping lanes.
PO 1.5 Marinas and on-water structures are located to avoid interfering with the operation or function of a water supply pumping station.	DTS/DPF 1.5 On-water structures are set back: (a) 3km or more from upstream water supply pumping station take-off points (b) 500m or more from downstream water supply pumping station take-off points.
PO 1.6 Maintenance of on-water infrastructure, including revetment walls, is not impaired by marinas and on-water structures.	DTS/DPF 1.6 None are applicable.
Environmental Protection	
PO 2.1 Development is sited and designed to facilitate water circulation and exchange.	DTS/DPF 2.1 None are applicable.

Open Space and Recreation

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Pleasant, functional and accessible open space and recreation facilities are provided at State, regional, district, neighbourhood and local levels for active and passive recreation, biodiversity, community health, urban cooling, tree canopy cover, visual amenity, gathering spaces, wildlife and waterway corridors, and a range of other functions and at a range of sizes that reflect the purpose of that open space.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Recreation facilities are compatible with surrounding land uses and activities.	DTS/DPF 1.1 None are applicable.
PO 1.2 Open space areas include natural or landscaped areas using locally indigenous plant species and large trees.	DTS/DPF 1.2 None are applicable.
Design and Siting	
PO 2.1 Open space and recreation facilities address adjacent public roads to optimise pedestrian access and visibility.	DTS/DPF 2.1 None are applicable.
PO 2.2 Open space and recreation facilities incorporate park furniture, shaded areas and resting places.	DTS/DPF 2.2 None are applicable.
PO 2.3 Open space and recreation facilities link habitats, wildlife corridors and existing open spaces and recreation facilities.	DTS/DPF 2.3 None are applicable.
Pedestrians and Cyclists	
PO 3.1 Open space incorporates: (a) pedestrian and cycle linkages to other open spaces, centres, schools and public transport nodes; (b) safe crossing points where pedestrian routes intersect the road network; (c) easily identified access points.	DTS/DPF 3.1 None are applicable.
Usability	
PO 4.1 Land allocated for open space is suitable for its intended active and passive recreational use taking into consideration its gradient and potential for inundation.	DTS/DPF 4.1 None are applicable.
Safety and Security	
PO 5.1 Open space is overlooked by housing, commercial or other development to provide casual surveillance where possible.	DTS/DPF 5.1 None are applicable.
PO 5.2 Play equipment is located to maximise opportunities for passive surveillance.	DTS/DPF 5.2 None are applicable.
PO 5.3 Landscaping provided in open space and recreation facilities maximises opportunities for casual surveillance throughout the park.	DTS/DPF 5.3 None are applicable.
PO 5.4 Fenced parks and playgrounds have more than one entrance or exit to minimise potential entrapment.	DTS/DPF 5.4 None are applicable.
PO 5.5 Adequate lighting is provided around toilets, telephones, seating, litter bins, bicycle storage, car parks and other such facilities.	DTS/DPF 5.5 None are applicable.

PO 5.6 Pedestrian and bicycle movement after dark is focused along clearly defined, adequately lit routes with observable entries and exits.	DTS/DPF 5.6 None are applicable.
Signage	
PO 6.1 Signage is provided at entrances to and within the open space and recreation facilities to provide clear orientation to major points of interest such as the location of public toilets, telephones, safe routes, park activities and the like.	DTS/DPF 6.1 None are applicable.
Buildings and Structures	
PO 7.1 Buildings and car parking areas in open space areas are designed, located and of a scale to be unobtrusive.	DTS/DPF 7.1 None are applicable.
PO 7.2 Buildings and structures in open space areas are clustered where practical to ensure that the majority of the site remains open.	DTS/DPF 7.2 None are applicable.
PO 7.3 Development in open space is constructed to minimise the extent of impervious surfaces.	DTS/DPF 7.3 None are applicable.
PO 7.4 Development that abuts or includes a coastal reserve or Crown land used for scenic, conservation or recreational purposes is located and designed to have regard to the purpose, management and amenity of the reserve.	DTS/DPF 7.4 None are applicable.
Landscaping	
PO 8.1 Open space and recreation facilities provide for the planting and retention of large trees and vegetation.	DTS/DPF 8.1 None are applicable.
PO 8.2 Landscaping in open space and recreation facilities provides shade and windbreaks: (a) along cyclist and pedestrian routes; (b) around picnic and barbecue areas; (c) in car parking areas.	DTS/DPF 8.2 None are applicable.
PO 8.3 Landscaping in open space facilitates habitat for local fauna and facilitates biodiversity.	DTS/DPF 8.3 None are applicable.
PO 8.4 Landscaping including trees and other vegetation passively watered with local rainfall run-off, where practicable.	DTS/DPF 8.4 None are applicable.

Out of Activity Centre Development

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO1	The role of Activity Centres in contributing to the form and pattern of development and enabling equitable and convenient access to a range of shopping, administrative, cultural, entertainment and other facilities in a single trip is maintained and reinforced.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Non-residential development outside Activity Centres of a scale and type that does not diminish the role of Activity Centres: (a) as primary locations for shopping, administrative, cultural, entertainment and community services (b) as a focus for regular social and business gatherings (c) in contributing to or maintaining a pattern of development that supports equitable community access to services and facilities.	DTS/DPF 1.1 None are applicable.

PO 1.2 Out-of-activity centre non-residential development complements Activity Centres through the provision of services and facilities: (a) that support the needs of local residents and workers, particularly in underserviced locations (b) at the edge of Activities Centres where they cannot readily be accommodated within an existing Activity Centre to expand the range of services on offer and support the role of the Activity Centre.	DTS/DPF 1.2 None are applicable.

Resource Extraction

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Resource extraction activities are developed in a manner that minimises human and environmental impacts.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Resource extraction activities minimise landscape damage outside of those areas unavoidably disturbed to access and exploit a resource and provide for the progressive reclamation and betterment of disturbed areas.	DTS/DPF 1.1 None are applicable.
PO 1.2 Resource extraction activities avoid damage to cultural sites or artefacts.	DTS/DPF 1.2 None are applicable.
Water Quality	
PO 2.1 Stormwater and/or wastewater from resource extraction activities is diverted into appropriately sized treatment and retention systems to enable reuse on site.	DTS/DPF 2.1 None are applicable.
Separation Treatments, Buffers and Landscaping	
PO 3.1 Resource extraction activities minimise adverse impacts upon sensitive receivers through incorporation of separation distances and/or mounding/vegetation.	DTS/DPF 3.1 None are applicable.
PO 3.2 Resource extraction activities are screened from view from adjacent land by perimeter landscaping and/or mounding.	DTS/DPF 3.2 None are applicable.

Site Contamination

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Ensure land is suitable for the proposed use in circumstances where it is, or may have been, subject to site contamination.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Ensure land is suitable for use when land use changes to a more sensitive use.	DTS/DPF 1.1 Development satisfies (a), (b), (c) or (d):

	(a) does not involve a change in the use of land (b) involves a change in the use of land that does not constitute a change to a more sensitive use (c) involves a change in the use of land to a more sensitive use on land at which site contamination is unlikely to exist (as demonstrated in a site contamination declaration form) (d) involves a change in the use of land to a more sensitive use on land at which site contamination exists, or may exist (as demonstrated in a site contamination declaration form), and satisfies both of the following: (i) a site contamination audit report has been prepared under Part 10A of the *Environment Protection Act 1993* in relation to the land within the previous 5 years which states that- A. site contamination does not exist (or no longer exists) at the land or B. the land is suitable for the proposed use or range of uses (without the need for any further remediation) or C. where remediation is, or remains, necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development) and (ii) no other class 1 activity or class 2 activity has taken place at the land since the preparation of the site contamination audit report (as demonstrated in a site contamination declaration form).

Tourism Development

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Tourism development is built in locations that cater to the needs of visitors and positively contributes to South Australia's visitor economy.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Tourism development complements and contributes to local, natural, cultural or historical context where: (a) it supports immersive natural experiences (b) it showcases South Australia's landscapes and produce (c) its events and functions are connected to local food, wine and nature.	DTS/DPF 1.1 None are applicable.
PO 1.2 Tourism development comprising multiple accommodation units (including any facilities and activities for use by guests and visitors) is clustered to minimise environmental and contextual impact.	DTS/DPF 1.2 None are applicable.
Caravan and Tourist Parks	
PO 2.1 Potential conflicts between long-term residents and short-term tourists are minimised through suitable siting and design measures.	DTS/DPF 2.1 None are applicable.
PO 2.2 Occupants are provided privacy and amenity through landscaping and fencing.	DTS/DPF 2.2 None are applicable.
PO 2.3 Communal open space and centrally located recreation facilities are provided for guests and visitors.	DTS/DPF 2.3 12.5% or more of a caravan park comprises clearly defined communal open space, landscaped areas and areas for recreation.
PO 2.4 Perimeter landscaping is used to enhance the amenity of the locality.	DTS/DPF 2.4 None are applicable.
PO 2.5 Amenity blocks (showers, toilets, laundry and kitchen facilities) are sufficient to serve the full	DTS/DPF 2.5 None are applicable.

occupancy of the development.	
PO 2.6 Long-term occupation does not displace tourist accommodation, particularly in important tourist destinations such as coastal and riverine locations.	DTS/DPF 2.6 None are applicable.
Tourist accommodation in areas constituted under the National Parks and Wildlife Act 1972	
PO 3.1 Tourist accommodation avoids delicate or environmentally sensitive areas such as sand dunes, cliff tops, estuaries, wetlands or substantially intact strata of native vegetation (including regenerated areas of native vegetation lost through bushfire).	DTS/DPF 3.1 None are applicable.
PO 3.2 Tourist accommodation is sited and designed in a manner that is subservient to the natural environment and where adverse impacts on natural features, landscapes, habitats and cultural assets are avoided.	DTS/DPF 3.2 None are applicable.
PO 3.3 Tourist accommodation and recreational facilities, including associated access ways and ancillary structures, are located on cleared (other than where cleared as a result of bushfire) or degraded areas or where environmental improvements can be achieved.	DTS/DPF 3.3 None are applicable.
PO 3.4 Tourist accommodation is designed to prevent conversion to private dwellings through: (a) comprising a minimum of 10 accommodation units (b) clustering separated individual accommodation units (c) being of a size unsuitable for a private dwelling (d) ensuring functional areas that are generally associated with a private dwelling such as kitchens and laundries are excluded from, or physically separated from individual accommodation units, or are of a size unsuitable for a private dwelling.	DTS/DPF 3.4 None are applicable.

Transport, Access and Parking

Assessment Provisions (AP)

Desired Outcome (DO)

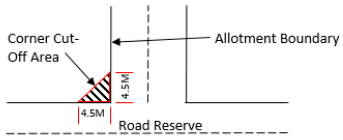
Desired Outcome	
DO 1	A comprehensive, integrated and connected transport system that is safe, sustainable, efficient, convenient and accessible to all users.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Movement Systems	
PO 1.1 Development is integrated with the existing transport system and designed to minimise its potential impact on the functional performance of the transport system.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development is designed to discourage commercial and industrial vehicle movements through residential streets and adjacent other sensitive receivers.	DTS/DPF 1.2 None are applicable.
PO 1.3 Industrial, commercial and service vehicle movements, loading areas and designated parking spaces are separated from passenger vehicle car parking areas to ensure efficient and safe movement and minimise potential conflict.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is sited and designed so that loading, unloading and turning of all traffic avoids interrupting the operation of and queuing on public roads and pedestrian paths.	DTS/DPF 1.4 All vehicle manoeuvring occurs onsite.
Sightlines	
PO 2.1 Sightlines at intersections, pedestrian and cycle crossings, and crossovers to allotments for motorists, cyclists and pedestrians are maintained or enhanced to ensure safety for all road users and pedestrians.	DTS/DPF 2.1 None are applicable.

PO 2.2 Walls, fencing and landscaping adjacent to driveways and corner sites are designed to provide adequate sightlines between vehicles and pedestrians.	DTS/DPF 2.2 None are applicable.
Vehicle Access	
PO 3.1 Safe and convenient access minimises impact or interruption on the operation of public roads.	DTS/DPF 3.1 The access is: (a) provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land or (b) not located within 6m of an intersection of 2 or more roads or a pedestrian activated crossing.
PO 3.2 Development incorporating vehicular access ramps ensures vehicles can enter and exit a site safely and without creating a hazard to pedestrians and other vehicular traffic.	DTS/DPF 3.2 None are applicable.
PO 3.3 Access points are sited and designed to accommodate the type and volume of traffic likely to be generated by the development or land use.	DTS/DPF 3.3 None are applicable.
PO 3.4 Access points are sited and designed to minimise any adverse impacts on neighbouring properties.	DTS/DPF 3.4 None are applicable.
PO 3.5 Access points are located so as not to interfere with street trees, existing street furniture (including directional signs, lighting, seating and weather shelters) or infrastructure services to maintain the appearance of the streetscape, preserve local amenity and minimise disruption to utility infrastructure assets.	DTS/DPF 3.5 Vehicle access to designated car parking spaces satisfy (a) or (b): (a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land (b) where newly proposed, is set back: (i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner (ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance (iii) 6m or more from the tangent point of an intersection of 2 or more roads (iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing.
PO 3.6 Driveways and access points are separated and minimised in number to optimise the provision of on-street visitor parking (where on-street parking is appropriate).	DTS/DPF 3.6 Driveways and access points: (a) for sites with a frontage to a public road of 20m or less, one access point no greater than 3.5m in width is provided (b) for sites with a frontage to a public road greater than 20m: (i) a single access point no greater than 6m in width is provided or (ii) not more than two access points with a width of 3.5m each are provided.
PO 3.7 Access points are appropriately separated from level crossings to avoid interference and ensure their safe ongoing operation.	DTS/DPF 3.7 Development does not involve a new or modified access or cause an increase in traffic through an existing access that is located within the following distance from a railway crossing: (a) 80 km/h road - 110m (b) 70 km/h road - 90m (c) 60 km/h road - 70m (d) 50km/h or less road - 50m.
PO 3.8 Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated.	DTS/DPF 3.8 None are applicable.
PO 3.9 Development is designed to ensure vehicle circulation between activity areas occurs within the site without the need to use public roads.	DTS/DPF 3.9 None are applicable.
Access for People with Disabilities	
PO 4.1 Development is sited and designed to provide safe, dignified and convenient access for people with a disability.	DTS/DPF 4.1 None are applicable.
Vehicle Parking Rates	

PO 5.1 Sufficient on-site vehicle parking and specifically marked accessible car parking places are provided to meet the needs of the development or land use having regard to factors that may support a reduced on-site rate such as: (a) availability of on-street car parking (b) shared use of other parking areas (c) in relation to a mixed-use development, where the hours of operation of commercial activities complement the residential use of the site, the provision of vehicle parking may be shared (d) the adaptive reuse of a State or Local Heritage Place.	DTS/DPF 5.1 Development provides a number of car parking spaces on-site at a rate no less than the amount calculated using one of the following, whichever is relevant: (a) Transport, Access and Parking Table 2 - Off-Street Vehicle Parking Requirements in Designated Areas if the development is a class of development listed in Table 2 and the site is in a Designated Area (b) Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements where (a) does not apply (c) if located in an area where a lawfully established carparking fund operates, the number of spaces calculated under (a) or (b) less the number of spaces offset by contribution to the fund.
Vehicle Parking Areas	
PO 6.1 Vehicle parking areas are sited and designed to minimise impact on the operation of public roads by avoiding the use of public roads when moving from one part of a parking area to another.	DTS/DPF 6.1 Movement between vehicle parking areas within the site can occur without the need to use a public road.
PO 6.2 Vehicle parking areas are appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like.	DTS/DPF 6.2 None are applicable.
PO 6.3 Vehicle parking areas are designed to provide opportunity for integration and shared-use of adjacent car parking areas to reduce the total extent of vehicle parking areas and access points.	DTS/DPF 6.3 None are applicable.
PO 6.4 Pedestrian linkages between parking areas and the development are provided and are safe and convenient.	DTS/DPF 6.4 None are applicable.
PO 6.5 Vehicle parking areas that are likely to be used during non-daylight hours are provided with sufficient lighting to entry and exit points to ensure clear visibility to users.	DTS/DPF 6.5 None are applicable.
PO 6.6 Loading areas and designated parking spaces for service vehicles are provided within the boundary of the site.	DTS/DPF 6.6 Loading areas and designated parking spaces are wholly located within the site.
PO 6.7 On-site visitor parking spaces are sited and designed to be accessible to all visitors at all times.	DTS/DPF 6.7 None are applicable.
Undercroft and Below Ground Garaging and Parking of Vehicles	
PO 7.1 Undercroft and below ground garaging of vehicles is designed to enable safe entry and exit from the site without compromising pedestrian or cyclist safety or causing conflict with other vehicles.	DTS/DPF 7.1 None are applicable.
Internal Roads and Parking Areas in Residential Parks and Caravan and Tourist Parks	
PO 8.1 Internal road and vehicle parking areas are surfaced to prevent dust becoming a nuisance to park residents and occupants.	DTS/DPF 8.1 None are applicable.
PO 8.2 Traffic circulation and movement within the park is pedestrian friendly and promotes low speed vehicle movement.	DTS/DPF 8.2 None are applicable.
Bicycle Parking in Designated Areas	
PO 9.1 The provision of adequately sized on-site bicycle parking facilities encourages cycling as an active transport mode.	DTS/DPF 9.1 Areas and / or fixtures are provided for the parking and storage of bicycles at a rate not less than the amount calculated using Transport, Access and Parking Table 3 - Off Street Bicycle Parking Requirements.
PO 9.2 Bicycle parking facilities provide for the secure storage and tethering of bicycles in a place where casual surveillance is possible, is well lit and signed for the safety and convenience of cyclists and deters property theft.	DTS/DPF 9.2 None are applicable.
PO 9.3 Non-residential development incorporates end-of-journey facilities for employees such as showers, changing facilities and secure lockers, and signage indicating the location of the	DTS/DPF 9.3 None are applicable.



facilities to encourage cycling as a mode of journey-to-work transport.	
Corner Cut-Offs	
PO 10.1 Development is located and designed to ensure drivers can safely turn into and out of public road junctions.	DTS/DPF 10.1 Development does not involve building work, or building work is located wholly outside the land shown as Corner Cut-Off Area in the following diagram: 
Heavy Vehicle Parking	
PO 11.1 Heavy vehicle parking and access is designed and sited so that the activity does not result in nuisance to adjoining neighbours as a result of dust, fumes, vibration, odour or potentially hazardous loads.	DTS/DPF 11.1 Heavy vehicle parking occurs in accordance with the following: (a) the site is not located within a Neighbourhood-type zone (except a Rural Living Zone) (b) the site is a minimum of 0.4 ha (c) where the site is 2 ha or more, no more than 2 vehicles exceeding 3,000 kilograms each (and trailers) are to be parked on the allotment at any time (d) where the site is between 0.4 ha and 2 ha, only one vehicle exceeding 3,000 kilograms (and one trailer) are to be parking on the allotment at any time (e) the vehicle parking area achieves the following setbacks: (i) behind the building line or 30m, whichever is greater (ii) 20m from the secondary street if it is a State Maintained Road (iii) 10m from the secondary street if it is a local road (iv) 10m from side and rear boundaries (f) parking and access areas (including internal driveways) should be sealed or have a surface that can be treated and maintained to minimise dust and mud nuisance (g) does not include refrigerated trailers or vehicles (h) vehicles only enter and exit the property in accordance with the following hours: (i) Monday to Saturday 6:00am and 9:30pm (ii) Sunday and public holidays between 9:30 am and 7:00 pm (i) the handling or trans-shipment of freight is not carried out on the property.
PO 11.2 Heavy vehicle parking ensures that vehicles can enter and exit a site safely and without creating a hazard to pedestrians and other vehicular traffic.	DTS/DPF 11.2 Heavy vehicles: (a) can enter and exit the site in a forward direction; and (b) operate within the statutory mass and dimension limited for General Access Vehicles (as prescribed by the National Heavy Vehicle Regulator).
PO 11.3 Heavy vehicle parking is screened through siting behind buildings, screening, landscaping or the like to obscure views from adjoining properties and public roads.	DTS/DPF 11.3 None are applicable.

Table 1 - General Off-Street Car Parking Requirements

The following parking rates apply and if located in an area where a lawfully established carparking fund operates, the number of spaces is reduced by an amount equal to the number of spaces offset by contribution to the fund.

Class of Development	Car Parking Rate (unless varied by Table 2 onwards) Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.
Residential Development	
Co-located Housing	Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling to be located in a shared car parking area / arrangement. Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling to be located in a shared car parking area / arrangement. Where development involves 3 or more dwellings, 0.33 spaces per dwelling for visitor

	parking to be located in a shared car parking area / arrangement.
Detached Dwelling	Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling. Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.
Group Dwelling	Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling. Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered. 0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.
Residential Flat Building	Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling. Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered. 0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.
Row Dwelling where vehicle access is from the primary street	Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling. Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.
Row Dwelling where vehicle access is not from the primary street (i.e. rear-loaded)	Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling. Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.
Semi-Detached Dwelling	Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling. Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.
Aged / Supported Accommodation	
Retirement facility	Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling. Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling. 0.2 spaces per dwelling for visitor parking.
Supported accommodation	0.3 spaces per bed.
Residential Development (Other)	
Ancillary accommodation	No additional requirements beyond those associated with the main dwelling.
Residential park	Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling. Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling. 0.2 spaces per dwelling for visitor parking.
Student accommodation	0.3 spaces per bed.
Workers' accommodation	0.5 spaces per bed plus 0.2 spaces per bed for visitor parking.
Tourist	
Caravan and tourist park	Parks with 100 sites or less - a minimum of 1 space per 10 sites to be used for accommodation. Parks with more than 100 sites - a minimum of 1 space per 15 sites used for accommodation. A minimum of 1 space for every caravan (permanently fixed to the ground) or cabin.
Tourist accommodation other than a caravan and tourist park	1 car parking space per accommodation unit / guest room.
Commercial Uses	
Auction room/ depot	1 space per 100m2 of building floor area plus an additional 2 spaces.
Automotive collision repair	3 spaces per service bay.
Motor repair station	3 spaces per service bay.
Office	For a call centre, 8 spaces per 100m2 of gross leasable floor area In all other cases, 4 spaces per 100m2 of gross leasable floor area.
Retail fuel outlet	3 spaces per 100m2 gross leasable floor area.
Service trade premises	2.5 spaces per 100m2 of gross leasable floor area 1 space per 100m2 of outdoor area used for display purposes.
Shop (no commercial kitchen)	5.5 spaces per 100m2 of gross leasable floor area where not located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.

	5 spaces per 100m2 of gross leasable floor area where located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Shop (in the form of a bulky goods outlet)	2.5 spaces per 100m2 of gross leasable floor area.
Shop (in the form of a restaurant or involving a commercial kitchen)	Premises with a dine-in service only (which may include a take-away component with no drive-through) - 0.4 spaces per seat. Premises with take-away service but with no seats - 12 spaces per 100m2 of total floor area plus a drive-through queue capacity of ten vehicles measured from the pick-up point. Premises with a dine-in and drive-through take-away service - 0.3 spaces per seat plus a drive through queue capacity of 10 vehicles measured from the pick-up point.
Community and Civic Uses	
Community facility	For a library, 4 spaces per 100m2 of total floor area. For a hall/meeting hall, 0.2 spaces per seat. In all other cases, 10 spaces per 100m2 of total floor area.
Educational facility	For a primary school - 1.1 space per full time equivalent employee plus 0.25 spaces per student for a pickup/set down area either on-site or on the public realm within 300m of the site. For a secondary school - 1.1 per full time equivalent employee plus 0.1 spaces per student for a pickup/set down area either on-site or on the public realm within 300m of the site. For a tertiary institution - 0.4 per student based on the maximum number of students on the site at any time.
Place of worship	1 space for every 3 visitor seats.
Child care facility	For a child care centre, 0.25 spaces per child In all other cases, 1 per employee plus 0.25 per child (drop off/pick up bays).
Health Related Uses	
Consulting room	4 spaces per consulting room excluding ancillary facilities.
Hospital	4.5 spaces per bed for a public hospital. 1.5 spaces per bed for a private hospital.
Recreational and Entertainment Uses	
Cinema complex	0.2 spaces per seat.
Concert hall / theatre	0.2 spaces per seat.
Hotel	1 space for every 2m2 of total floor area in a public bar plus 1 space for every 6m2 of total floor area available to the public in a lounge, beer garden plus 1 space per 2 gaming machines, plus 1 space per 3 seats in a restaurant.
Indoor recreation facility	6.5 spaces per 100m2 of total floor area for a Fitness Centre 4.5 spaces per 100m2 of total floor area for all other Indoor recreation facilities.
Industry/Employment Uses	
Fuel depot	1.5 spaces per 100m2 total floor area 1 spaces per 100m2 of outdoor area used for fuel depot activity purposes.
Industry	1.5 spaces per 100m2 of total floor area.
Store	0.5 spaces per 100m2 of total floor area.
Timber yard	1.5 spaces per 100m2 of total floor area 1 space per 100m2 of outdoor area used for display purposes.
Warehouse	0.5 spaces per 100m2 total floor area.
Other Uses	
Funeral Parlour	1 space per 5 seats in the chapel plus 1 space for each vehicle operated by the parlour.
Radio or Television Station	5 spaces per 100m2 of total building floor area.

Table 2 - Off-Street Car Parking Requirements in Designated Areas

The following parking rates apply in any zone, subzone or other area described in the 'Designated Areas' column.

In the area identified in Concept Plan 152 Brompton Gasworks, car parking can be provided in a consolidated manner for that precinct rather than on a development-by-development basis

Class of Development	Car Parking Rate Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.		Designated Areas
	Minimum number of spaces	Maximum number of spaces	
Development generally			
All classes of development	No minimum.	No maximum except in the Primary Pedestrian Area identified in the Primary Pedestrian Area Concept Plan, where the maximum is: 1 space for each dwelling with a total floor area less than 75 square metres 2 spaces for each dwelling with a total floor area between 75 square metres and 150 square metres 3 spaces for each dwelling with a total floor area greater than 150 square metres. Residential flat building or Residential component of a multi-storey building: 1 visitor space for each 6 dwellings.	Capital City Zone City Main Street Zone City Riverbank Zone Adelaide Park Lands Zone Business Neighbourhood Zone (within the City of Adelaide) The St Andrews Hospital Precinct Subzone and Women's and Children's Hospital Precinct Subzone of the Community Facilities Zone
Non-residential development			
Non-residential development excluding tourist accommodation	3 spaces per 100m2 of gross leasable floor area.	5 spaces per 100m2 of gross leasable floor area.	City Living Zone Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone (except for Bowden, Brompton or Hindmarsh)
Non-residential development excluding tourist accommodation	3 spaces per 100m2 of gross leasable floor area.	6 spaces per 100m2 of gross leasable floor area.	Strategic Innovation Zone in the City of Burnside, City of Marion or City of Mitcham Strategic Innovation Zone outside the City of Burnside, City of Marion or City of Mitcham when the site is also in a high frequency public transit area Suburban Activity Centre Zone when the site is also in a high frequency public transit area Suburban Business Zone when the site is also in a high frequency public transit area Business Neighbourhood Zone outside of the City of Adelaide when the site is also in a high frequency public transit area Suburban Main Street Zone when the site is also in a high frequency public transit area Urban Activity Centre Zone
Non-residential development excluding tourist accommodation	3 spaces per 100 square metres of gross leasable floor area 1.5 spaces per 100 square metres of gross leasable floor area above ground floor level other than for a shop	3 spaces per 100 square metres of gross leasable floor area	Urban Neighbourhood Zone (in Bowden, Brompton or Hindmarsh)

Tourist accommodation	1 space for every 4 bedrooms up to 100 bedrooms plus 1 space for every 5 bedrooms over 100 bedrooms	1 space per 2 bedrooms up to 100 bedrooms and 1 space per 4 bedrooms over 100 bedrooms	City Living Zone Urban Activity Centre Zone when the site is also in a high frequency public transit area Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone (except for Bowden, Brompton or Hindmarsh)
Residential development			
Residential component of a multi-storey building	Dwelling with no separate bedroom -0.25 spaces per dwelling 1 bedroom dwelling - 0.75 spaces per dwelling 2 bedroom dwelling - 1 space per dwelling 3 or more bedroom dwelling - 1.25 spaces per dwelling 0.25 spaces per dwelling for visitor parking.	None specified.	City Living Zone Strategic Innovation Zone in the City of Burnside, City of Marion or City of Mitcham Strategic Innovation Zone outside the City of Burnside, City of Marion or City of Mitcham when the site is also in a high frequency public transit area Urban Activity Centre Zone when the site is also in a high frequency public transit area Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone (except for Bowden, Brompton or Hindmarsh)
Residential component of a multi-storey building	0.75 per dwelling	None specified	Urban Neighbourhood Zone (in Bowden, Brompton or Hindmarsh)
Residential flat building	Dwelling with no separate bedroom -0.25 spaces per dwelling 1 bedroom dwelling - 0.75 spaces per dwelling 2 bedroom dwelling - 1 space per dwelling 3 or more bedroom dwelling - 1.25 spaces per dwelling 0.25 spaces per dwelling for visitor parking.	None specified.	City Living Zone Urban Activity Centre Zone when the site is also in a high frequency public transit area Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone (except for Bowden, Brompton or Hindmarsh)
Residential flat building	0.75 per dwelling	None specified	Urban Neighbourhood Zone (in Bowden, Brompton or Hindmarsh)
Detached dwelling	0.75 per dwelling	None specified	Urban Neighbourhood Zone (in Bowden, Brompton or Hindmarsh)
Row dwelling	0.75 per dwelling	None specified	Urban Neighbourhood Zone (in Bowden, Brompton or Hindmarsh)
Semi-detached dwelling	0.75 per dwelling	None specified	Urban Neighbourhood Zone (in Bowden, Brompton or Hindmarsh)
Notes			
1	In the area identified in Concept Plan 152 Brompton Gasworks, car parking can be provided in a consolidated manner for that precinct rather than on a development-by-development basis		

Table 3 - Off-Street Bicycle Parking Requirements

The bicycle parking rates apply within designated areas located within parts of the State identified in the Schedule to Table 3.

Class of Development	Bicycle Parking Rate

	Where a development comprises more than one development type, then the overall bicycle parking rate will be taken to be the sum of the bicycle parking rates for each development type.
Consulting room	1 space per 20 employees plus 1 space per 20 consulting rooms for customers.
Educational facility	For a secondary school - 1 space per 20 full-time time employees plus 10 percent of the total number of employee spaces for visitors. For tertiary education - 1 space per 20 employees plus 1 space per 10 full time students.
Hospital	1 space per 15 beds plus 1 space per 30 beds for visitors.
Indoor recreation facility	1 space per 4 employees plus 1 space per 200m2 of gross leasable floor area for visitors.
Licensed Premises	1 per 20 employees, plus 1 per 60 square metres total floor area, plus 1 per 40 square metres of bar floor area, plus 1 per 120 square metres lounge and beer garden floor area, plus 1 per 60 square metres dining floor area, plus 1 per 40 square metres gaming room floor area.
Office	1 space for every 200m2 of gross leasable floor area plus 2 spaces plus 1 space per 1000m2 of gross leasable floor area for visitors.
Child care facility	1 space per 20 full time employees plus 1 space per 40 full time children.
Recreation area	1 per 1500 spectator seats for employees plus 1 per 250 visitor and customers.
Residential flat building	Within the City of Adelaide 1 for every dwelling for residents with a total floor area less than 150 square metres, 2 for every dwelling for residents with a total floor area greater than 150 square metres, plus 1 for every 10 dwellings for visitors, and in all other cases 1 space for every 4 dwellings for residents plus 1 for every 10 dwellings for visitors.
Residential component of a multi-storey building	Within the City of Adelaide 1 for every dwelling for residents with a total floor area less than 150 square metres, 2 for every dwelling for residents with a total floor area greater than 150 square metres, plus 1 for every 10 dwellings for visitors, and in all other cases 1 space for every 4 dwellings for residents plus 1 space for every 10 dwellings for visitors.
Shop	1 space for every 300m2 of gross leasable floor area plus 1 space for every 600m2 of gross leasable floor area for customers.
Tourist accommodation	1 space for every 20 employees plus 2 for the first 40 rooms and 1 for every additional 40 rooms for visitors.
Schedule to Table 3	**Designated Area** / **Relevant part of the State** **The bicycle parking rate applies to a designated area located in a relevant part of the State described below.** All zones — City of Adelaide Business Neighbourhood Zone Strategic Innovation Zone Suburban Activity Centre Zone Suburban Business Zone Suburban Main Street Zone Urban Activity Centre Zone Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone — Metropolitan Adelaide

Waste Treatment and Management Facilities

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Mitigation of the potential environmental and amenity impacts of waste treatment and management facilities.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	

PO 1.1 Waste treatment and management facilities incorporate separation distances and attenuation measures within the site between waste operations areas (including all closed, operating and future cells) and sensitive receivers and sensitive environmental features to mitigate off-site impacts from noise, air and dust emissions.	DTS/DPF 1.1 None are applicable.
Soil and Water Protection	
PO 2.1 Soil, groundwater and surface water are protected from contamination from waste treatment and management facilities through measures such as: (a) containing potential groundwater and surface water contaminants within waste operations areas (b) diverting clean stormwater away from waste operations areas and potentially contaminated areas (c) providing a leachate barrier between waste operations areas and underlying soil and groundwater.	DTS/DPF 2.1 None are applicable.
PO 2.2 Wastewater lagoons are set back from watercourses to minimise environmental harm and adverse effects on water resources.	DTS/DPF 2.2 Wastewater lagoons are set back 50m or more from watercourse banks.
PO 2.3 Wastewater lagoons are designed and sited to: (a) avoid intersecting underground waters; (b) avoid inundation by flood waters; (c) ensure lagoon contents do not overflow; (d) include a liner designed to prevent leakage.	DTS/DPF 2.3 None are applicable.
PO 2.4 Waste operations areas of landfills and organic waste processing facilities are set back from watercourses to minimise adverse impacts on water resources.	DTS/DPF 2.4 Waste operations areas are set back 100m or more from watercourse banks.
Amenity	
PO 3.1 Waste treatment and management facilities are screened, located and designed to minimise adverse visual impacts on amenity.	DTS/DPF 3.1 None are applicable.
PO 3.2 Access routes to waste treatment and management facilities via residential streets is avoided.	DTS/DPF 3.2 None are applicable.
PO 3.3 Litter control measures minimise the incidence of windblown litter.	DTS/DPF 3.3 None are applicable.
PO 3.4 Waste treatment and management facilities are designed to minimise adverse impacts on both the site and surrounding areas from weed and vermin infestation.	DTS/DPF 3.4 None are applicable.
Access	
PO 4.1 Traffic circulation movements within any waste treatment or management site are designed to enable vehicles to enter and exit the site in a forward direction.	DTS/DPF 4.1 None are applicable.
PO 4.2 Suitable access for emergency vehicles is provided to and within waste treatment or management sites.	DTS/DPF 4.2 None are applicable.
Fencing and Security	
PO 5.1 Security fencing provided around waste treatment and management facilities prevents unauthorised access to operations and potential hazard to the public.	DTS/DPF 5.1 Chain wire mesh or pre-coated painted metal fencing 2m or more in height is erected along the perimeter of the waste treatment or waste management facility site.
Landfill	
PO 6.1 Landfill gas emissions are managed in an environmentally acceptable manner.	DTS/DPF 6.1 None are applicable.
PO 6.2 Landfill facilities are separated from areas of environmental significance and land used for public recreation and enjoyment.	DTS/DPF 6.2 Landfill facilities are set back 250m or more from a public open space reserve, forest reserve, national park or Conservation Zone.
PO 6.3	DTS/DPF 6.3

Landfill facilities are located on land that is not subject to land slip.	None are applicable.
PO 6.4 Landfill facilities are separated from areas subject to flooding.	DTS/DPF 6.4 Landfill facilities are set back 500m or more from land inundated in a 1% AEP flood event.
Organic Waste Processing Facilities	
PO 7.1 Organic waste processing facilities are separated from the coast to avoid potential environment harm.	DTS/DPF 7.1 Organic waste processing facilities are set back 500m or more from the coastal high water mark.
PO 7.2 Organic waste processing facilities are located on land where the engineered liner and underlying seasonal water table cannot intersect.	DTS/DPF 7.2 None are applicable.
PO 7.3 Organic waste processing facilities are sited away from areas of environmental significance and land used for public recreation and enjoyment.	DTS/DPF 7.3 Organic waste processing facilities are set back 250m or more from a public open space reserve, forest reserve, national park or a Conservation Zone.
PO 7.4 Organic waste processing facilities are located on land that is not subject to land slip.	DTS/DPF 7.4 None are applicable.
PO 7.5 Organic waste processing facilities separated from areas subject to flooding.	DTS/DPF 7.5 Organic waste processing facilities are set back 500m or more from land inundated in a 1% AEP flood event.
Major Wastewater Treatment Facilities	
PO 8.1 Major wastewater treatment and disposal systems, including lagoons, are designed to minimise potential adverse odour impacts on sensitive receivers, minimise public and environmental health risks and protect water quality.	DTS/DPF 8.1 None are applicable.
PO 8.2 Artificial wetland systems for the storage of treated wastewater are designed and sited to minimise potential public health risks arising from the breeding of mosquitoes.	DTS/DPF 8.2 None are applicable.

Workers' accommodation and Settlements

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Workers' accommodation and settlements are obscured from scenic routes, tourist destinations and areas of conservation significance or otherwise designed to complement the surrounding landscape.	DTS/DPF 1.1 None are applicable.
PO 1.2 Workers' accommodation and settlements are sited and designed to minimise nuisance impacts on the amenity of adjacent users of land.	DTS/DPF 1.2 None are applicable.
PO 1.3 Workers' accommodation and settlements are built with materials and colours that blend with the landscape.	DTS/DPF 1.3 None are applicable.
PO 1.4 Workers' accommodation and settlements are supplied with service infrastructure such as power, water and effluent disposal sufficient to satisfy the living requirements of workers.	DTS/DPF 1.4 None are applicable.

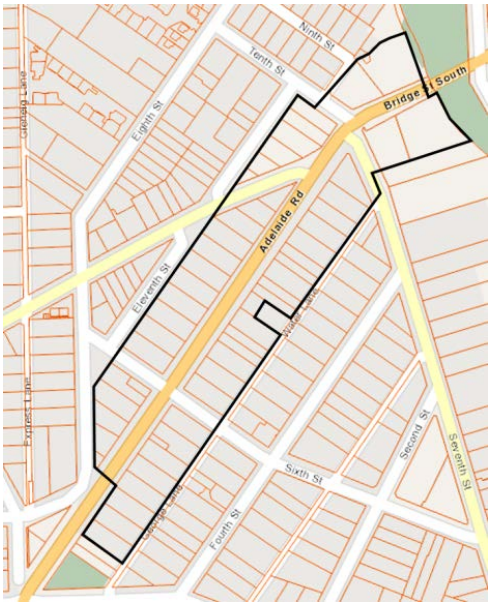
Part 5 - Specified matters and areas identified under the Act and Regulations

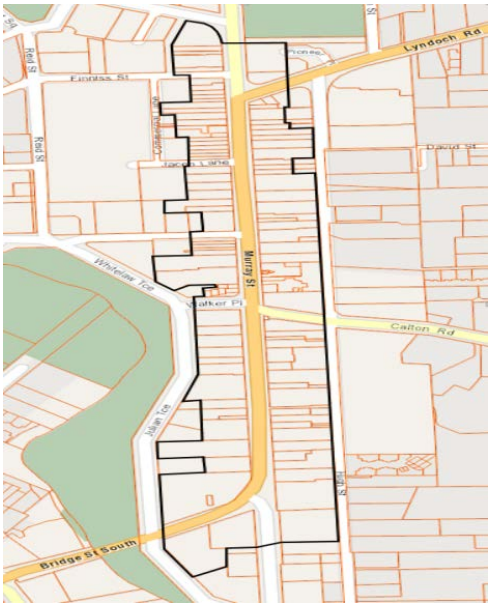
The *Planning, Development and Infrastructure Act 2016* and the *Planning, Development and Infrastructure (General) Regulations 2017* allow the Planning and Design Code to specify matters and identify areas for certain purposes. Column A identifies the purpose of a specified matter or identified area and Column B identifies the relevant matter or zone, subzone or overlay in the Planning and Design Code or other area identified for that purpose, including limits to the extent of an identified area.

Where the extent of an identified area is limited in Column B by a figure, the figure is provided in Schedule 1 of this Part.

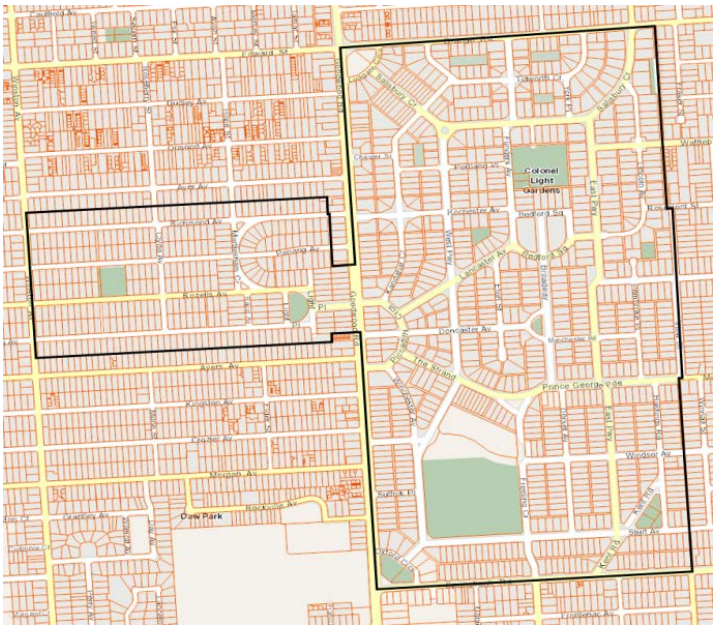
Table 1 - Specified matters and areas identified under the Planning, Development and Infrastructure (General) Regulations 2017

Introduction (Column A)	Specified matters / identified areas (Column B)
Interpretation	
Areas identified as 'designated airport building heights area' for the purposes of clause 3(1) of the Regulations - Interpretation	Airport Building Heights (Aircraft Landing Areas) Overlay Airport Building Heights (Regulated) Overlay Defence Aviation Area Overlay
Areas identified as 'designated environmental zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations - Interpretation	None specified
Areas identified as 'designated flood zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations - Interpretation	Coastal Areas Overlay Hazards (Flooding) Overlay River Murray Flood Plain Protection Area Overlay
Areas identified as 'designated regulated tree overlay' for the purposes of clause 3(1) of the Regulations - Interpretation	Regulated and Significant Tree Overlay
Building Rules: bushfire prone areas	
Areas identified as 'designated bushfire prone areas' for the purposes of clause 98(b) of the Regulations - Building Rules: bushfire prone areas	Refer to *Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements*
Areas identified as a 'bushfire prone area' for the purposes of clause 14 of Schedule 8 of the Regulations - Additional requirements for bushfire prone areas	Hazards (Bushfire - General Risk) Overlay Hazards (Bushfire - High Risk) Overlay Hazards (Bushfire - Medium Risk) Overlay Hazards (Bushfire - Outback) Overlay Hazards (Bushfire - Regional) Overlay Hazards (Bushfire - Urban Interface) Overlay
Additions to definition of development	
Areas identified for the purposes of clause 1 of Schedule 3 under the Regulations - Excavating or filling in identified zones or areas	Hills Face Zone Hills Neighbourhood Zone Significant Landscape Protection Overlay Hazard (Acid Sulfate Soils) Overlay
Areas identified for the purposes of clause 3 of Schedule 3 under the Regulations - Excavation or filling in identified zones or areas subject to inundation or flooding	In addition to a 'designated flood zone, subzone or overlay', the following: None specified
Exclusions from definition of development - general	
Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(i) of Schedule 4 under the Regulations - Council works	Conservation Zone Significant Landscape Protection Overlay
Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(ii)(A) of Schedule 4 under the Regulations - Council works	Coastal Areas Overlay
Areas identified for the purposes of clause 4 (1)(a) of Schedule 4 under the Regulations - Outbuilding	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay





Areas identified for the purposes of clause 4(1)(c) of Schedule 4 under the Regulations - Swimming pool	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone
Areas identified for the purposes of clause 4 (1)(d)(i)(B) of Schedule 4 under the Regulations - Fence not exceeding 2.1m in height	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 4(1)(i) of Schedule 4 under the Regulations - Deck	In addition to a 'designated bushfire prone area', the following: Coastal Areas Overlay Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 10 of Schedule 4 under the Regulations - Demolition of the whole of a building	Historic Area Overlay
Areas identified for the purposes of clause 11 of Schedule 4 under the Regulations - Dams	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 13(1) of Schedule 4 under the Regulations - Aerials, towers	Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 13(2) of Schedule 4 under the Regulations - Aerials, towers in the Hills Face Zone	Hills Face Zone
Relevant authority - Commission	
Areas identified for the purposes of clause 4(1) of Schedule 6 of the Regulations - Buildings exceeding 4 storeys	Those parts of the Design Overlay within the following areas: City of Burnside The Corporation of the City of Norwood Payneham and St Peters City of Prospect The Corporation of the City of Unley City of West Torrens City of Holdfast Bay
Areas identified for the purposes of clause 5(1) of Schedule 6 of the Regulations - Developments over $3m in the City of Port Adelaide	Design Overlay
Areas identified for the purposes of clause 8(1) of Schedule 6 of the Regulations - Developments over $3m in the City of Charles Sturt	That part of the Urban Neighbourhood Zone identified as 'Bowden Urban Village' in the *Concept Plan Technical and Numeric Variation layer*
Areas identified for the purposes of clause 11 of Schedule 6 of the Regulations - Developments in the show grounds	That part of the Recreation Zone in the City of Unley shown in Figure Un/1 of Schedule 1.
State agency development exempt from approval	
Areas identified for the purposes of clause 3 of Schedule 13 of the Regulations - Certain development in part of City of Mitcham	The area identified in Figure Mit/1 of Schedule 1



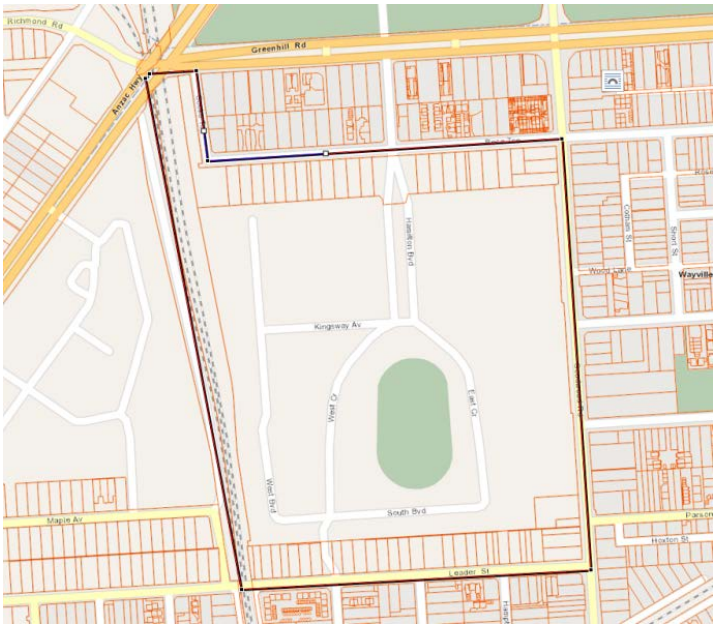


Table 2 – Specified matters and areas identified under the Planning, Development and Infrastructure Act 2016

Introduction (Column A)	Specified matters / identified areas (Column B)
For the purposes of paragraph (g) of the definition of development under section 3(1) of the Act - External painting of a building	Any building located within the area identified in Figure Ga/1 or Figure Ga/2 of Schedule 1.
Land identified as an infrastructure reserve for the purposes of section 129 (1)(a)	Land within the Infrastructure (Airfield) Zone located on the Andamooka Road (11km east of the eastern most boundary of Roxby Downs [Municipality]) and / or the site of Olympic Dam mining settlement (as per the approved Olympic Dam mining lease), within 150m north, and 50m south, of the existing road alignment of Andamooka Road, between the eastern boundary of the Roxby Downs (Municipality) and the eastern zone boundary of the Infrastructure (Airfield) Zone is land identified as having a land use that is suitable for infrastructure.

For the purposes of paragraph (f) of the definition of 'development' under section 3(1) of the Act - Works in relation to a local heritage place	The demolition, removal, conversion, alteration or external painting of, or addition to, the place, or any other work (not including internal painting but including, in the case of a tree, any tree-damaging activity) that could materially affect the heritage value of the place
Pursuant to section 102(4) of the *Planning, Development and Infrastructure Act 2016*, a matter specified by the Planning and Design Code to be reserved on the application of the applicant	Any of the matters in DTS/DPF 1.1 of the Urban Tree Canopy Overlay
1. Development within the ambit of subclause (2) is specified as a class of development for the purposes of section 121(1) of the Act.	2. Development that is— (a) within the area of a council that has determined to make design review available in its area by participating in the scheme determined by the Minister for the purposes of section 121 of the Act; and (b) a form of development that is, or has the potential to be, either performance assessed development or restricted development that is within a class of development that has been— (i) selected by the council as a class of development for the purposes of this clause; and (ii) specified by the Chief Executive by a notice published on the SA planning portal for the purposes of this clause. 3. A council may from time to time vary the classes of development applying in its area under this clause by a further notice published by the Chief Executive on the SA planning portal at the request of the council.

Schedule 1 - Figures for Specified Areas

Location	Figures
Corporation of the Town of Gawler	Figure Ga/1 
	Figure Ga/2 
City of Mitcham - Colonel Light	Figure Mit/1

Gardens	
City of Unley	Figure Un/1 

Part 6 - Index of Technical and Numeric Variations

Part 6.1 Minimum Allotment Sizes

Minimum Site Area
Minimum site area for a group dwelling is 250 sqm; residential flat building is 250 sqm
Minimum site area for a detached dwelling is 100 sqm; semi-detached dwelling is 100 sqm; row dwelling is 100 sqm; group dwelling is 100 sqm; residential flat building is 100 sqm
Minimum site area for a detached dwelling is 1,000 sqm
Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 1,000 sqm; group dwelling is 1,000 sqm; residential flat building is 1,000 sqm
Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm
Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 600 sqm; row dwelling is 400 sqm; group dwelling is 500 sqm
Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 600 sqm; row dwelling is 450 sqm; group dwelling is 1,200 sqm; residential flat building is 450 sqm
Minimum site area for a detached dwelling is 120 sqm; semi-detached dwelling is 120 sqm; row dwelling is 120 sqm; group dwelling is 120 sqm; residential flat building is 120 sqm
Minimum site area for a detached dwelling is 1,200 sqm; semi-detached dwelling is 450 sqm; row dwelling is 350 sqm; group dwelling is 350 sqm; residential flat building is 350 sqm
Minimum site area for a detached dwelling is 125 sqm; semi-detached dwelling is 125 sqm; row dwelling is 125 sqm; group dwelling is 275 sqm; residential flat building is 275 sqm
Minimum site area for a detached dwelling is 150 sqm; semi-detached dwelling is 150 sqm; row dwelling is 150 sqm
Minimum site area for a detached dwelling is 150 sqm; semi-detached dwelling is 150 sqm; row dwelling is 150 sqm; group dwelling is 150 sqm; residential flat building is 150 sqm
Minimum site area for a detached dwelling is 1,500 sqm
Minimum site area for a detached dwelling is 1,500 sqm; group dwelling is 1,500 sqm
Minimum site area for a detached dwelling is 160 sqm; semi-detached dwelling is 160 sqm; row dwelling is 160 sqm; group dwelling is 160 sqm; residential flat building is 160 sqm

Minimum Site Area
Minimum site area for a detached dwelling is 200 sqm; semi-detached dwelling is 180 sqm; row dwelling is 120 sqm; group dwelling is 150 sqm; residential flat building is 80 sqm
Minimum site area for a detached dwelling is 200 sqm; semi-detached dwelling is 200 sqm; row dwelling is 200 sqm
Minimum site area for a detached dwelling is 200 sqm; semi-detached dwelling is 200 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm
Minimum site area for a detached dwelling is 230 sqm; semi-detached dwelling is 230 sqm; row dwelling is 230 sqm; group dwelling is 230 sqm; residential flat building is 200 sqm
Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 200 sqm; row dwelling is 150 sqm; group dwelling is 150 sqm; residential flat building is 150 sqm
Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 200 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm
Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 220 sqm; row dwelling is 170 sqm; group dwelling is 200 sqm; residential flat building is 150 sqm
Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 150 sqm; group dwelling is 175 sqm; residential flat building is 175 sqm
Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 190 sqm; group dwelling is 275 sqm; residential flat building is 275 sqm
Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm
Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 220 sqm; group dwelling is 220 sqm; residential flat building is 220 sqm
Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 250 sqm; group dwelling is 250 sqm
Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 250 sqm; group dwelling is 250 sqm; residential flat building is 250 sqm
Minimum site area for a detached dwelling is 270 sqm; semi-detached dwelling is 220 sqm; row dwelling is 180 sqm; group dwelling is 250 sqm; residential flat building is 200 sqm
Minimum site area for a detached dwelling is 270 sqm; semi-detached dwelling is 270 sqm
Minimum site area for a detached dwelling is 270 sqm; semi-detached dwelling is 270 sqm; row dwelling is 180 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm
Minimum site area for a detached dwelling is 270 sqm; semi-detached dwelling is 270 sqm; row dwelling is 270 sqm
Minimum site area for a detached dwelling is 300 sqm
Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 200 sqm; row dwelling is 180 sqm; group dwelling is 200 sqm; residential flat building is 150 sqm
Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 220 sqm; row dwelling is 180 sqm; group dwelling is 275 sqm; residential flat building is 200 sqm
Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 220 sqm; row dwelling is 220 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm
Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 250 sqm; group dwelling is 250 sqm; residential flat building is 120 sqm
Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 250 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm
