9. Any development involving any of the following (or of any combination of any of the following) within the Tunnel Protection Overlay: (a) storage of materials, equipment or vehicles (whether temporary or permanent) over an area exceeding 100 square metres (b) temporary stockpiling of soil, gravel, rock or other natural material over an area exceeding 100 square metres (c) excavation or ground intruding activity at a depth greater than 2.5 metres below the regulated surface level.	Except where not undertaken by the Crown, a Council or an essential infrastructure provider.
10. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
11. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Tourism Development Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A range of tourist accommodation and associated services and facilities that enhance visitor experiences and enjoyment.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature

Land Use and Intensity	
PO 1.1 Tourist accommodation and a range of complementary entertainment, recreation and service activities catering to the needs and enjoyment of travellers.	DTS/DPF1.1 Development comprises one or more of the following: (a) Advertisement (b) Amenity block, including shower, toilet and laundry facilities (c) Caravan and tourist park (d) Coast protection works (e) Dwelling ancillary to tourist accommodation (f) Indoor recreation facility (g) Office ancillary to tourist accommodation (h) Recreation facility (i) Retail fuel outlet (j) Shop (k) Spa pool (l) Swimming pool (m) Tourist accommodation (n) Tourist information centre.
PO 1.2 Shops complement tourist accommodation and recreational activities to provide services and amenities to travellers at a scale that maintains the tourism values at the relevant location.	DTS/DPF1.2 Shop is not a bulky goods outlet and: (a) is a restaurant ancillary to and in association with tourist accommodation on the same allotment or (b) has a gross leasable floor area not exceeding 250m^2 and is ancillary to another building used for non-residential purposes on the same allotment.
PO 1.3 Offices associated with and ancillary to tourist accommodation or non-residential development support the management and operational aspects of tourist development.	DTS/DPF1.3 Office: (a) is ancillary to and located on the same allotment as tourist accommodation and (b) has a gross leasable floor area not exceeding 50m^2.
PO 1.4 Dwellings in the form of a manager or caretaker residence support the efficient management and maintenance of tourist accommodation and related facilities.	DTS/DPF1.4 Dwelling: (a) is ancillary to and located on the same allotment as tourist accommodation and (b) will not result in more than one dwelling on an allotment.
Land Division	
PO 2.1 Land division, including boundary realignments, support: (a) a range of tourist accommodation, recreation, entertainment and community activities (b) pedestrian and bicycle access between attractions within and adjacent to the zone.	DTS/DPF 2.1 None are applicable.
Advertisements	
PO 3.1 Advertisements complement the scale of buildings and are not visually dominant within the locality.	DTS/DPF 3.1 None are applicable.
Concept Plans	
PO 4.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 4.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: In relation to DTS/DPF 4.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 4.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7. Building height - does not exceed 5m 8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or

	(b) will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour 14. Does not involve the clearance of native vegetation.
Outbuilding Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 6. Total floor area - does not exceed 40m^2 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end) 8. Building height - does not exceed 5m 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 11. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 12. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 13. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not located in an area subject to the Urban Transport Overlay, Non-Stop Corridors Overlay, Major Urban Transport Routes Overlay, Key Outback and Rural Routes Overlay, Key Railway Crossings Overlay, Future Local Road Widening Overlay or Future Road Widening Overlay, will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour 15. Does not involve- (a) excavation exceeding a vertical height of 1m; or (b) filling exceeding a vertical height of 1m, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m. 16. Does not involve the clearance of native vegetation 17. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Private bushfire shelter Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • River Murray Flood Plain Protection Area Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Primary street setback - at least as far back as the building to which it is ancillary 4. Secondary street setback - at least 900mm from the boundary of the allotment 5. At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place) 6. Does not involve the clearance of native vegetation.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary 6. Location of pumps and/or filtration systems from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid acoustic structure; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level 7. Building height - does not exceed 5m 8. Length - does not exceed 11m if any part of the structure abuts or is situated on a boundary of the allotment 9. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 10. Does not involve the clearance of native vegetation.
Water tank (above ground) Except where any of the following apply:	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*

• Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. The tank is part of a roof drainage system 4. Total floor area - not exceeding 15m^2 5. The tank is located wholly above ground 6. Tank height - does not exceed 4m above natural ground level 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Any of the following: (a) Light industry (b) Winery development in the Winery Experience Subzone.
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m^2 (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any development involving any of the following (or of any combination of any of the following): (a) amenity block, shower, toilet and laundry facilities (or any combination thereof) (b) caravan and tourist park (c) indoor recreation facility (d) office (e) recreation facility (f) restaurant (g) shop (h) tourist accommodation (i) tourist information centre.	Except where the site of the development is adjacent land to a site (or land) used for residential purpose in a neighbourhood-type zone.
3. Any development involving any of the following (or of any combination of any of the following) where located within the Monarto Safari Park Subzone: (a) community facility (b) consulting room in the form of a veterinary clinic/hospital (c) educational facility (d) zoological park.	Except where the site of the development is adjacent land to a site (or land) used for residential purpose in a neighbourhood-type zone.
4. Any development involving any of the following (or of any combination of any of the following) where located within the Winery Experience Subzone: (a) convention centre (b) winery.	Except where the site of the development is adjacent land to a site (or land) used for residential purpose in a neighbourhood-type zone.
5. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) air handling unit, air conditioning system or exhaust fan (c) carport (d) coast protection works (e) deck (f) fence (g) internal building works (h) land division (i) outbuilding (j) pergola (k) private bushfire shelter (l) replacement building (m) retaining wall (n) shade sail (o) solar photovoltaic panels (roof mounted) (p) swimming pool or spa pool and associated swimming pool safety features (q) temporary accommodation in an area affected by bushfire (r) tree damaging activity (s) water tank (t) verandah.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).

7. Dwelling.	Except dwelling that does not satisfy Tourism Development Zone DTS/DPF 1.4.
8. Railway line.	Except where located outside of a rail corridor or rail reserve.
9. Telecommunications facility.	Except telecommunications facility that exceeds 30 metres in height or where the site of the development is adjacent land to a site (or land) used for residential purpose in a neighbourhood-type zone.

Placement of Notices - Exemptions for Performance Assessed Development

None specified.

Placement of Notices - Exemptions for Restricted Development

None specified.

Monarto Safari Park Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Establishment of an international standard fauna conservation park and educational and passive recreational resource where watercourses and other environmentally important features are protected from development and buffers are maintained to adjoining land uses.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development of a range of land uses that are associated with or ancillary to the operation of a zoological park and provide facilities for tourists and visitors.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Community facility (b) Consulting room, where in the form of a veterinary clinic/hospital (c) Educational facility (d) Office (e) Recreation facility (f) Restaurant (g) Shop (h) Tourist accommodation (i) Tourist information centre (j) Zoological park.
PO 1.2 Shops are limited in scale and function to service the needs of visitors and tourists.	DTS/DPF 1.2 None are applicable.
Built Form and Character	
PO 2.1 Buildings used for commercial purposes, including shops, restaurants, tourist accommodation and visitor information facilities are designed and sited to: (a) be sympathetic with existing landscape features and utilise existing vegetation to soften visual impact (b) complement the natural environment through use of open verandahs, natural materials and colours.	DTS/DPF 2.1 None are applicable.
PO 2.2 Outbuildings are sited in locations that are not visually prominent and comprise low reflective materials and colours that complement the natural landscape.	DTS/DPF 2.2 None are applicable.
Environmental Management	
PO 3.1 Development protects natural features and does not result in: (a) removal or clearance of important native vegetation (b) reduced surface or underground water quality (c) land form degradation.	DTS/DPF 3.1 None are applicable.
PO 3.2 Stormwater runoff generated by development is controlled and treated to ensure any contaminants are retained on-site and not deposited directly into any watercourse identified in the Water Resources Overlay.	DTS/DPF 3.2 None are applicable.

River Murray Experience Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Recreation and tourism facilities including tourist accommodation and water-based tourism and public recreation uses focused within the River Murray Valley, together with continuation of primary production.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development of a range of recreation uses, tourism facilities, water-based activities and accommodation for visitors.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Detached dwelling (b) Marina, located off-channel (c) Mooring facility, located on-river (d) Jetty (e) Office ancillary to tourism development or tourist accommodation (f) Outbuilding (g) Pontoon (h) Recreation area (i) Shop ancillary to tourism development or tourist accommodation (j) Tourist accommodation.
PO 1.2 Tourism development that complements or provides interpretation of: (a) the natural environment of the River Murray Valley (b) local primary production (c) local cultural heritage.	DTS/DPF 1.2 None are applicable.
PO 1.3 Small-scale shops, including boat and watercraft hire facilities and the like, complement tourist accommodation and recreational activities to provide	DTS/DPF 1.3 Shop is not a bulky goods outlet and:

services and amenities to travellers at a scale that maintains the tourism values at the relevant location.	(a) is in the form of a restaurant ancillary to and in association with tourist accommodation on the same allotment or (b) has a gross leasable floor area not exceeding 150m^2 and is ancillary to another building used for non-residential purposes on the same allotment.
PO 1.4 Detached dwellings established to support primary production or the efficient management and maintenance of recreation and tourism development.	DTS/DPF 1.4 Detached dwelling: (a) is ancillary to and located on the same allotment as primary production or tourist accommodation and (b) will not result in more than one dwelling on an allotment.
PO 1.5 Development in the form of a manager or caretaker residence does not occur on allotments where a dwelling already exists and where: (a) the allotment is less than 36ha in area (b) it is intended to service small-scale tourist accommodation comprising 5 or less accommodation units.	DTS/DPF 1.5 None are applicable.
PO 1.6 Small-scale tourist accommodation that meets the needs of travellers and visitors and is distinguishable from the character and density of development in townships and settlements.	DTS/DPF 1.6 Tourist accommodation (including additions or alterations) achieves one or more of the following: (a) is ancillary to and located on the same allotment as an existing dwelling (b) is located within an existing building.
PO 1.7 Except where located within an existing building, tourist accommodation involving more than 5 accommodation units or accommodating more than 20 persons are: (a) located on allotments of at least 10ha (b) located on the same allotment as an existing dwelling to be used as a manager/caretaker residence.	DTS/DPF 1.7 None are applicable.
PO 1.8 Development on the waterfront does not occur unless: (a) it involves a use that is dependent on waterfront access for its operation such as mooring of boats (b) it will enhance public access.	DTS/DPF 1.8 None are applicable.
PO 1.9 Mooring facilities provided for vessels used for tourist accommodation and overnight stays.	DTS/DPF 1.9 None are applicable.
PO 1.10 Excavation and/or filling of land incidental to building work is kept to a minimum and: (a) limited to a maximum depth or height no greater than 1.5m (b) not below the 1956 River Murray Flood Plain.	DTS/DPF 1.10 None are applicable.
Built Form and Siting	
PO 2.1 Dwellings, tourist accommodation and associated outbuildings are not sited on a slope greater than 1-in-10.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings and structures are sited above the 1956 River Murray Flood Plain to reduce risks to life and property.	DTS/DPF 2.2 None are applicable.
Building Setbacks	
PO 3.1 Dwellings and tourist accommodation appropriately set back from allotment boundaries, roadways and the River Murray.	DTS/DPF 3.1 Buildings are setback: (a) at least 40m from an adjoining allotment boundary or roadway (b) at least 100m from a riverbank, cliff edge/escarpment and the boundary of the 1956 River Murray Flood Plain.

Winery Experience Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Viticulture and facilities for the continuing production, storage, distribution and sale of wine, together with a range of tourism facilities to provide visitor experiences and showcase wine product.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development of viticulture and facilities for the continuing production, storage, distribution and sale of wine, complemented by a range of tourism development for visitors and tourists.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Convention centre (b) Restaurant (c) Tourist accommodation (d) Tourism development (e) Winery and associated facilities.
PO 1.2 Development of restaurants that complement winery and tourism development and provide experiences for visitors and tourists.	DTS/DPF 1.2 None are applicable.
PO 1.3 Development north of The Parade comprises low impact activities such as offices, storage and promotion activities associated with winery operations to minimise impacts on residential development within an adjoining neighbourhood-type zone.	DTS/DPF 1.3 None are applicable.
Built Form and Character	
PO 2.1 Buildings are of a design, scale and located to be sympathetic with and complement existing winery buildings and buildings of significant heritage value.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings, including winery and tourist development, are sited and designed to blend into the landscape, especially when viewed from public roads.	DTS/DPF 2.2 None are applicable.
PO 2.3 Winery development is provided with separate road access to tourism development and hospitality uses to minimise conflict between users or impacts on existing winery operations.	DTS/DPF 2.3 None are applicable.
Land division	
PO 3.1 Land division that facilitates the continued viability and proper functioning of existing winery development.	DTS/DPF 3.1 None are applicable.
Landscaping	
PO 4.1 Landscaping screens and enhances buildings and service areas to minimise impacts on the character of the locality, particularly when viewed from outlying vantage points and public roads.	DTS/DPF 4.1 None are applicable.
PO 4.2	DTS/DPF 4.2

Development retains native vegetation and significant stands of existing trees to maintain and enhance the value of the landscape.	None are applicable.

Township Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A township supporting a range of residential, community, retail, business, commercial and light industry uses and facilities.
DO 2	Development contributes to and enhances streetscapes and the settlement patterns comprising the township.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 A range of development types that complement local built form and the surrounding township context.	DTS/DPF 1.1 Development comprises one or more of the following uses: (a) advertisement (b) carport (c) consulting room (d) detached dwelling (e) dwelling addition (f) light industry (g) office (h) outbuilding (i) semi-detached dwelling (j) shop (k) tourist accommodation (l) verandah (m) warehouse
PO 1.2 Small-scale retail, business and commercial development that provide a range of goods and services to the local community, the surrounding district and visitors.	DTS/DPF 1.2 Shops, offices and consulting rooms (or any combination thereof) do not exceed 250m^2 in gross leasable floor area.
PO 1.3 Small-scale light industry and warehousing activities that supply a local service to the community and business activities.	DTS/DPF 1.3 The gross leasable floor area of a building plus any outdoor space used for a light industry, warehouse or store (or any combination thereof) does not exceed 250m^2.
PO 1.4 Small-scale tourist accommodation that supports the visiting public and holiday makers.	DTS/DPF 1.4 None are applicable.
PO 1.5 Development of a business, commercial or light industrial nature is grouped together or in close proximity to establish identifiable service centres or reinforce traditional main streets.	DTS/DPF 1.5 Development is located adjacent to a site containing an existing non-residential use with the same primary street frontage.
Built Form and Character	
PO 2.1 Buildings are of a scale and design to complement the surrounding built form, streetscape and character.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings contribute to a low-rise character and complement the height of nearby buildings.	DTS/DPF 2.2 Building height (excluding garages, carports and outbuildings) is no greater than 2 building levels and 9m and wall height that is no greater than 6m.
PO 2.3 Buildings are set back from the primary street boundary to complement the existing streetscape character.	DTS/DPF 2.3 Buildings setback from the primary street boundary in accordance with the following table: **Development Context** / **Minimum setback** There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building. — The average setback of the existing buildings. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site. — The setback of the existing building. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site. — (a) Where the existing building shares the same primary street frontage – the setback of the existing building; (b) Where the existing building has a different primary street frontage - 6m There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building. — 6m For the purposes of **DTS/DPF 2.3:** (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table
PO 2.4 Buildings are set back from a secondary street boundary to maintain a consistent pattern of separation between building walls and public thoroughfares on corner sites within the locality.	DTS/DPF 2.4 Buildings are no closer than 900mm to the secondary street boundary.
PO 2.5 Buildings (except for ancillary buildings and structures) are set back from rear boundaries to provide: (a) access to natural light and ventilation for neighbours (b) open space recreational opportunities (c) space for landscaping and vegetation.	DTS/DPF 2.5 Building (except for ancillary buildings and structures) are no closer to the rear boundary of the site than: (a) 4m for the ground floor of a building (b) 6m for the upper floor of a building.
PO 2.6 Buildings are set back from side boundaries to: (a) establish separation between buildings to complement the established character within a locality (b) provide access to natural light and ventilation for neighbours.	DTS/DPF 2.6 Other than walls located on a side boundary, buildings are set back from side boundaries in accordance with the following: (a) where the wall height does not exceed 3m - at least 900mm (b) for a wall that is not south facing and the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings (c) for a wall that is south facing and the wall height exceeds 3m - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings.
PO 2.7 Boundary walls are limited in height and length to mitigate adverse impacts on the amenity of adjoining land users, including through an unreasonable loss of natural light and ventilation.	DTS/DPF 2.7 For buildings that do not have a common wall, any wall sited on or abutting a side allotment boundary satisfies all of the following: (a) does not exceed 3m in wall height (b) does not exceed 11.5m in length (c) when combined with other walls on the boundary, does not exceed 45% of the length of the boundary (d) is set back at least 3 metres from any existing or proposed boundary walls.
Site Dimensions and Land Division	
PO 3.1	DTS/DPF 3.1

Allotments for residential purposes are of a suitable size and dimension to contribute to a housing pattern consistent with the locality.	Development will not result in more than 1 dwelling on an existing allotment or Allotments/sites for residential purposes accord with the following: (a) where allotments/sites are connected to mains sewer or a Community Wastewater Management System site areas (or allotment areas in the case of land division) are not less than the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building): **Minimum Site Area** Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm Minimum site area for a detached dwelling is 800 sqm; semi-detached dwelling is 500 sqm; row dwelling is 450 sqm; group dwelling is 450 sqm; residential flat building is 450 sqm Minimum site area is 1,000 sqm Minimum site area is 10 ha Minimum site area is 100 ha Minimum site area is 1,200 sqm Minimum site area is 1,500 sqm Minimum site area is 3,000 sqm Minimum site area is 4,000 sqm Minimum site area is 40 ha Minimum site area is 500 sqm Minimum site area is 5,000 sqm Minimum site area is 600 sqm Minimum site area is 800 sqm Minimum site area is 850 sqm Minimum site area is 900 sqm Minimum site area is 950 sqm (b) where allotments/sites are not connected to mains sewer or an approved common waste water disposal service site areas are not less than the greater of: (i) 1200m^2 (ii) the following: **Minimum Site Area** Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm Minimum site area for a detached dwelling is 800 sqm; semi-detached dwelling is 500 sqm; row dwelling is 450 sqm; group dwelling is 450 sqm; residential flat building is 450 sqm Minimum site area is 1,000 sqm Minimum site area is 10 ha Minimum site area is 100 ha Minimum site area is 1,200 sqm Minimum site area is 1,500 sqm Minimum site area is 3,000 sqm Minimum site area is 4,000 sqm Minimum site area is 40 ha Minimum site area is 500 sqm Minimum site area is 5,000 sqm Minimum site area is 600 sqm Minimum site area is 800 sqm Minimum site area is 850 sqm Minimum site area is 900 sqm Minimum site area is 950 sqm (c) site frontages are not less than 20m In relation to DTS/DPF 3.1, in instances where: (d) more than one value is returned in the same field, refer to the *Minimum Site Area Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (e) no value is returned for DTS/DPF 3.1(a) (i.e. there is a blank field), then non are applicable and the relevant development cannot be classified as deemed-to-satisfy (f) no value is returned for DTS/DPF 3.1(b)(ii) (i.e. there is a blank field), the value for DTS/DPF 3.1(b)(ii) is zero.
Advertisements	
PO 4.1 Freestanding advertisements that identify the associated business without creating a visually dominant element within the locality.	DTS/DPF 4.1 Freestanding advertisements: (a) do not exceed 2m in height and (b) do not have a sign face that exceeds 2m^2 per side.
Concept Plans	
PO 5.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 5.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: In relation to DTS/DPF 5.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 5.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing dwelling. 2. The item being installed does not encroach on a public street. 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

	2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7. Building height - does not exceed 5m 8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour 14. Does not involve the clearance of native vegetation.
Outbuilding Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Nairne Redevelopment Subzone • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 6. Total floor area - does not exceed 40m^2 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end) 8. Building height - does not exceed 5m 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 11. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 12. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 13. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not located in an area subject to the Urban Transport Overlay, Non-Stop Corridors Overlay, Major Urban Transport Routes Overlay, Key Outback and Rural Routes Overlay, Key Railway Crossings Overlay, Future Local Road Widening Overlay or Future Road Widening Overlay, will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour 15. Does not involve- (a) excavation exceeding a vertical height of 1m; or (b) filling exceeding a vertical height of 1m, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m. 16. Does not involve the clearance of native vegetation 17. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Private bushfire shelter Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • River Murray Flood Plain Protection Area Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Primary street setback - at least as far back as the building to which it is ancillary 4. Secondary street setback - at least 900mm from the boundary of the allotment 5. At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place) 6. Does not involve the clearance of native vegetation.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Solar photovoltaic panels (roof mounted) Except where any of the following apply:	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*

• Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary 6. Location of pumps and/or filtration systems from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid acoustic structure; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Temporary public service depot Except where any of the following apply: • Hazards (Flooding) Overlay • Local Heritage Place Overlay • Major Urban Transport Routes Overlay • State Heritage Place Overlay • Traffic Generating Development Overlay • Urban Transport Routes Overlay	1. Occupies land for no longer than 3 months 2. Ensures litter and water are contained on site 3. Provides temporary security fencing around the perimeter of the site.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • Nairne Redevelopment Subzone • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level 7. Building height - does not exceed 5m 8. Length - does not exceed 11m if any part of the structure abuts or is situated on a boundary of the allotment 9. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 10. Does not involve the clearance of native vegetation.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Nairne Redevelopment Subzone • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. The tank is part of a roof drainage system 4. Total floor area - not exceeding 15m^2 5. The tank is located wholly above ground 6. Tank height - does not exceed 4m above natural ground level 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Special industry	None specified

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) ancillary accommodation (c) dwelling (d) dwelling addition (e) temporary public service depot.	Except development that: 1. exceeds the maximum building height specified in Township Zone DTS/DPF 2.2 or 2. involves the creation of 4 or more additional dwellings or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
3. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Township Zone DTS/DPF 2.2 or 2. does not satisfy Township Zone DTS/DPF 1.2 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater

	length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
4. Any development involving any of the following (or of any combination of any of the following): (a) light industry (b) store (c) warehouse.	Except development that: 1. exceeds the maximum building height specified in Township Zone DTS/DPF 2.2 or 2. does not satisfy Township Zone DTS/DPF 1.3 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) temporary accommodation in an area affected by bushfire (p) tree damaging activity (q) verandah (r) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development
None specified.

Placement of Notices - Exemptions for Restricted Development
None specified.

Nairne Redevelopment Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Redevelopment of the former Chapman's Smallgoods factory (the Chapman's site) and Bush Timbers' Salvage yard (Bush Timbers' site) (Nairne East) to achieve a mix of retail and medium density housing.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Shops (including a supermarket), consulting room, office and related uses are supplemented by other businesses that provide a range of goods and services to the surrounding neighbourhood and district.	DTS/DPF 1.1 None are applicable.
PO 1.2 Medium density residential development that does not prejudice the operation of existing non-residential development and the long-term provision of services and facilities for wider community benefit.	DTS/DPF 1.2 None are applicable.
Built Form and Character	
PO 2.1 Adaptive reuse of buildings complements the prevailing historic values of the locality.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development maintains the valued heritage and streetscape characteristics of the area.	DTS/DPF 2.2 None are applicable.

Township Activity Centre Zone

Assessment Provisions (AP)

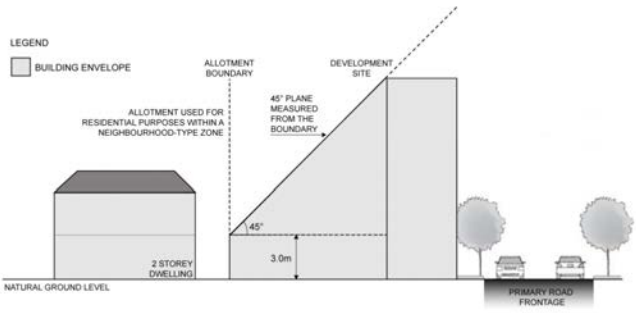
Desired Outcome (DO)

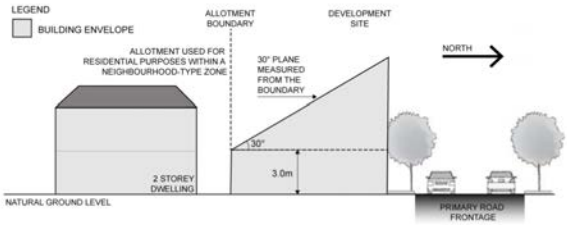
Desired Outcome	
DO 1	A cohesive, active, accessible and welcoming centre for local residents and visitors to shop, work, meet, entertain and relax in an attractive and safe environment.
DO 2	The range of land uses that occur in the centre provide important services to town residents, rural hinterland and the broader region.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment, health , recreation related uses and other businesses provide a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Cinema (d) Co-living

	(e) Community facility (f) Consulting room (g) Dwelling (h) Educational facility (i) Emergency services facility (j) Hospital (k) Hotel (l) Indoor recreation facility (m) Library (n) Office (o) Place of worship (p) Public transport terminal (q) Recreation area (r) Retail fuel outlet (s) Service trade premises (t) Shop (u) Tourist accommodation.
PO 1.2 Residential development does not prejudice the operation of existing or future retail, office, entertainment or recreation related activity within the zone.	DTS/DPF 1.2 Dwellings and/or co-living are: (a) developed in conjunction with non-residential uses and (b) sited either behind or above non-residential uses on the same allotment
PO 1.3 Tourist accommodation and visitor attractions support the visiting public and holiday makers.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.	DTS/DPF 1.4 None are applicable.
PO 1.5 Changes in the use of land encourage the efficient reuse of commercial premises to maintain and enhance vibrancy within activity centres.	DTS/DPF 1.5 A change of use to a shop, office, consulting room or any combination of these uses where all of the following are achieved: (a) the area to be occupied by the proposed development is in an existing building and is currently used as a shop, office, consulting room or any combination of these uses (b) if the proposed change of use is for a shop that primarily involves the handling and sale of foodstuffs, areas used for the storage and collection of refuse are sited at least 10 metres from the site of a dwelling (other than a dwelling directly associated with the proposed shop) (c) if the proposed change of use is for a shop that primarily involves heating and cooking of foodstuffs in a commercial kitchen and is within 30 metres of any neighbourhood-type zone boundary or a dwelling (other than a dwelling directly associated with the proposed shop), an exhaust duct and stack (chimney) exists or is capable of being installed for discharging exhaust emissions (d) if the change in use involves a gross leasable floor area greater than 250m^2 and has direct frontage to an arterial road, it achieves: (i) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (ii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared (e) off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, except where: (i) the building is a local heritage place or (ii) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (iii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Built Form and Character	
PO 2.1 Development complements adjacent development within the zone, and mitigates interface impacts on adjoining residential uses in neighbourhood- type zones, through appropriate building siting, scale and design.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings are sited and designed to create pedestrian, vehicular and visual linkages between the various built-form elements within the zone and adjoining main roads.	DTS/DPF 2.2 None are applicable.
Building height and setbacks	
PO 3.1 Buildings are set back from primary and secondary street boundaries to contribute to the consistent established streetscape.	DTS/DPF 3.1 Buildings are set back from road boundaries to align with buildings on adjoining land.
PO 3.2 Building height is consistent with the form expressed in any relevant *Maximum Building Height (Levels) Technical and Numeric Variation layer* and *Maximum Building Height (Metres) Technical and Numeric Variation layer* or is generally low-rise to complement the established streetscape and local character.	DTS/DPF 3.2 Building height is not greater than: (a) the following: **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 9m Maximum building height is 15m **Maximum Building Height (Levels)** Maximum building height is 2 levels Maximum building height is 3 levels (b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)) - 3 building levels up to a height of 12m. In relation to DTS/DPF 3.2, in instances where: (c) more than one value is returned in the same field for DTS/DPF 3.2(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer or Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development (d) only one value is returned for DTS/DPF 3.2(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.
PO 3.3 Buildings mitigate visual impacts of massing on residential development within a neighbourhood-type zone.	DTS/DPF 3.3 Buildings are constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes in a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary or where this boundary is the street boundary):



PO 3.4 Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.	DTS/DPF 3.4 Buildings on sites with a southern boundary adjoining the allotment boundary of an allotment used for residential purposes in a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram (except where this boundary is a street boundary): 
PO 3.5 Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 3.5 None are applicable.
Land division	
PO 4.1 Land division creates allotments that vary in size and are suitable for a variety of business and community facilities.	DTS/DPF 4.1 None are applicable.
Advertisements	
PO 5.1 Advertisements are sited and designed to achieve an overall consistency of appearance along individual street frontages	DTS/DPF 5.1 None are applicable.
PO 5.2 Freestanding advertisements: (a) identify the associated business(es) (b) are of a size that is commensurate with the scale of the centre and the street frontage (c) avoid visual clutter (d) positively respond to the context without dominating the locality.	DTS/DPF 5.2 Freestanding advertisements: (a) do not exceed 5m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser) and (b) do not have a sign face that exceeds 4m^2 per side.
Concept Plans	
PO 6.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 6.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 75 - Warrengie Development Area Land Form / Building Module Cross Section - Warrengie Concept Plan 9 - Blakeview Concept Plan 21 - Virginia Concept Plan 22 - Virginia Infrastructure Concept Plan 50 - Roseworthy Town Expansion Concept Plan 81 - Edinburgh Defence Airfield Lighting Constraints Concept Plan 98 - Mallala Concept Plan 136 - Point Turton Concept Plan 175 - Smithfield Regeneration In relation to DTS/DPF 6.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 6.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.

• State Heritage Place Overlay	
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Consulting room Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Office Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Shop Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.

Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Temporary public service depot Except where any of the following apply: • Hazards (Flooding) Overlay • Local Heritage Place Overlay • Major Urban Transport Routes Overlay • State Heritage Place Overlay • Traffic Generating Development Overlay • Urban Transport Routes Overlay	1. Occupies land for no longer than 3 months 2. Ensures litter and water are contained on site 3. Provides temporary security fencing around the perimeter of the site.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. The tank is part of a roof drainage system 4. Total floor area - not exceeding 15m^2 5. The tank is located wholly above ground 6. Tank height - does not exceed 4m above natural ground level 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Special industry	None specified

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

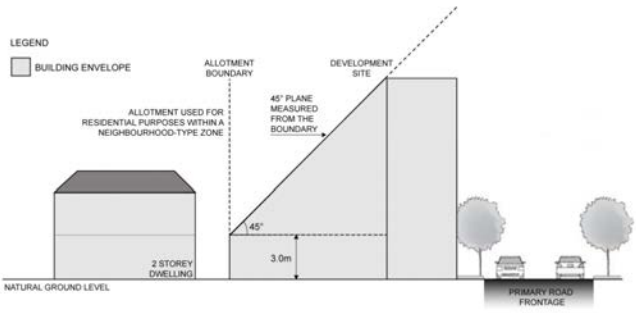
Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) cinema (d) co-living (e) community facility (f) consulting room (g) dwelling located above a non-residential building level (h) indoor recreation facility (i) library (j) office (k) place of worship (l) service trade premises (m) shop (n) temporary public service depot (o) tourist accommodation.	Except development that exceeds the maximum building height specified in Township Activity Centre Zone DTS/DPF 3.2 or does not satisfy any of the following: 1. Township Activity Centre Zone DTS/DPF 3.3 2. Township Activity Centre Zone DTS/DPF 3.4.
4. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) recreation area (k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	None specified.

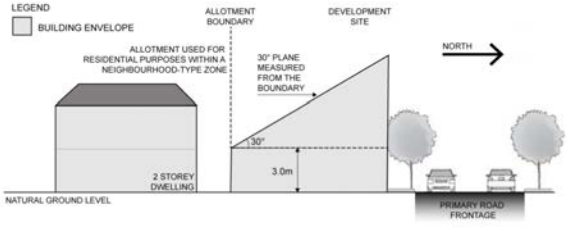
5. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
6. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development
None specified.

Placement of Notices - Exemptions for Restricted Development
None specified.

Township Main Street Zone





Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A cohesive, active, accessible and welcoming main street environment for residents and visitors to shop, work, meet, entertain and relax.
DO 2	Development contributes to the vibrancy and activity of public spaces and reinforces the traditional main street character.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses are supplemented by other businesses that provide a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Cinema (d) Co-living (e) Community facility (f) Consulting room (g) Dwelling (h) Hotel (i) Indoor recreation facility (j) Library (k) Office (l) Place of worship (m) Shop (n) Tourist accommodation.
PO 1.2 Ground floor uses contribute to an active and vibrant main street.	DTS/DPF 1.2 Shop, office, or consulting room uses are located on the ground floor level of buildings.
PO 1.3 Residential development does not prejudice the operation of non-residential development and the long-term provision of services and facilities for wider community benefit.	DTS/DPF 1.3 None are applicable.
PO 1.4 Dwellings and/or co-living are developed in conjunction with non-residential uses to support business, entertainment and recreational activities.	DTS/DPF 1.4 Dwellings and/or co-living are developed in conjunction with non-residential uses and sited: (a) at upper levels of buildings with non-residential uses located at ground level or (b) behind non-residential uses on the same allotment.
PO 1.5 Development is sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.	DTS/DPF 1.5 Any of the following: (a) shop, other than a bulky goods outlet with a gross leasable floor area more than 500m^2 (b) cinema (c) hotel (d) licensed premises.
PO 1.6 Changes in the use of land encourage the efficient reuse of commercial premises to maintain and enhance vibrancy within activity centres.	DTS/DPF 1.6 A change of use to a shop, office, consulting room or any combination of these uses where all of the following are achieved: (a) the area to be occupied by the proposed development is in an existing building and is currently used as a shop, office, consulting room or any combination of these uses (b) if the proposed change of use is for a shop that primarily involves the handling and sale of foodstuffs, areas used for the storage and collection of refuse are sited at least 10 metres from the site of a dwelling (other than a dwelling directly associated with the proposed shop) (c) if the proposed change of use is for a shop that primarily involves heating and cooking of foodstuffs in a commercial kitchen and is within 30 metres of any neighbourhood-type zone boundary or a dwelling (other than a dwelling directly associated with the proposed shop), an exhaust duct and stack (chimney) exists or is capable of being installed for discharging exhaust emissions (d) if the change in use involves a gross leasable floor area greater than 250m^2 and has direct frontage to an arterial road, it achieves either (i) or (ii): (i) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) is from a road that is not an arterial road (ii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared (e) off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, except in any of the following circumstances: (i) the building is a local heritage place (ii) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) (iii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse.
Built Form and Character	
PO 2.1 Buildings and structures are designed to complement the traditional low-scale main street built form by ensuring wall, parapet and roof height, verandah profile, and materials of construction are consistent with adjacent traditional main street buildings.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings preserve main street character by complementing key traditional shop-front elements such as narrow building and tenancy footprint with frequently repeated frontages, clear-glazed narrow shop front displays above raised display levels (base stall boards) and recessed entries.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings are adaptable and flexible to accommodate a range of land uses, including shops, offices, consulting rooms and residential land uses.	DTS/DPF 2.3 Ground floor levels of buildings incorporate a minimum ceiling height of 3.5m.

PO 2.4 Buildings create visual interest and an active interface with the main street frontage and maximise passive surveillance.	DTS/DPF 2.4 Not less than 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.
PO 2.5 Pedestrian shelter and shade are provided over footpaths through the use of structures such as awnings, canopies and verandas.	DTS/DPF 2.5 None are applicable.
PO 2.6 Dwellings are generally sited behind or above non-residential uses on the same site to maintain vibrancy and activity along the main street.	DTS/DPF 2.6 None are applicable.
PO 2.7 Outbuildings, carports and garages are located behind the primary building facing the main street to ensure vibrancy and activity along the main street.	DTS/DPF 2.7 None are applicable.
PO 2.8 Development contributes to and does not interfere with provision of an efficient and convenient pedestrian network linking the main street to adjoining zones.	DTS/DPF 2.8 None are applicable.
Building height and setbacks	
PO 3.1 Building height is consistent with the form expressed in any relevant *Maximum Building Height (Levels) Technical and Numeric Variation* layer and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or is low-rise, with height commensurate with the development site's frontage and depth as well as the main street width, so that the impacts of building mass on adjoining properties and the streetscape are minimised.	DTS/DPF 3.1 Building height is not greater than: (a) the following: **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 9m Maximum building height is 15m Maximum building height is 7.5m **Maximum Building Height (Levels)** Maximum building height is 1 level Maximum building height is 2 levels Maximum building height is 4 levels (b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)): (i) where the site has a frontage of at least 25m and depth of at least 50m - 3 building levels up to a height of 12m (ii) in all other cases - 2 building levels up to a height of 9m. In relation to DTS/DPF 3.1, in instances where: (c) more than one value is returned in the same field for DTS/DPF 3.1(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer or Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development (d) only one value is returned for DTS/DPF 3.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.
PO 3.2 Buildings mitigate the visual impacts of massing on residential development within a neighbourhood-type zone.	DTS/DPF 3.2 Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes in a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary or where this boundary is the street boundary): 
PO 3.3 Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.	DTS/DPF 3.3 Buildings on sites with a southern boundary adjoining the boundary of an allotment used for residential purposes in a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram (except where this boundary is a street boundary): 
PO 3.4 Buildings are constructed to the front boundary to achieve a continuity of street façade to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate, active spaces.	DTS/DPF 3.4 None are applicable.
PO 3.5	DTS/DPF 3.5

Buildings are constructed to side boundaries to achieve a continuity of street façade to the main street.	Building walls are located on side boundaries.
PO 3.6 Buildings are set back from rear boundaries (other than where these are also street boundaries) to minimise impacts on neighbouring properties, including access to natural light and ventilation.	DTS/DPF 3.6 Buildings are set back 3m or more from rear boundaries where the subject land directly abuts an allotment of a different zone, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.
PO 3.7 Buildings are set back from rear access ways to provide adequate manoeuvrability for vehicles.	DTS/DPF 3.7 Buildings are set back from the rear access way have (a) no minimum requirement where the access way is 6.5m or more wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.
PO 3.8 Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 3.8 None are applicable.
Traffic, parking and access	
PO 4.1 Development minimises the need for vehicle crossovers on the main street to reduce conflicts with pedestrians and avoid disruption to the continuity of built form.	DTS/DPF 4.1 None are applicable.
PO 4.2 Vehicle parking is located behind buildings away from the primary main street frontage and designed to minimise impacts on residential amenity.	DTS/DPF 4.2 Vehicle parking areas are located behind the building line of the associated building.
Advertisements	
PO 5.1 Advertisements are sited and designed to achieve an overall consistency of appearance along individual street frontages.	DTS/DPF 5.1 None are applicable.
PO 5.2 Freestanding advertisements: (a) identify the associated business(es) (b) are of a size that is commensurate with the scale of the centre and the street frontage (c) avoid visual clutter (d) positively respond to the context without dominating the locality (e) are sited and designed to not detract from the main street character.	DTS/DPF 5.2 Freestanding advertisements: (a) do not exceed 5m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser) and (b) do not have a sign face that exceeds 4m^2 per side.
Concept Plans	
PO 6.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 6.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 21 - Virginia Concept Plan 22 - Virginia Infrastructure Concept Plan 71 - Hamley Bridge Concept Plan 81 - Edinburgh Defence Airfield Lighting Constraints Concept Plan 99 - Two Wells Concept Plan 100 - Gawler East In relation to DTS/DPF 6.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 6.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush. 2. The fence does not exceed 2.1 metres in height (measured from the lower of the 2 adjoining finished ground levels). 3. The fence does not exceed 1 m in height within 6 m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved).
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway. 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017). 3. It is required for the conduct or maintenance of railway activities. 4. Does not involve the clearance of native vegetation.
Consulting room Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.

Office Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. Shade sail consists of permeable material. 4. The total area of the sail - does not exceed 40m^2. 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment. 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m. 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation.
Shop Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof. 3. Panels and associated components do not overhang any part of the roof. 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system. 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Temporary public service depot Except where any of the following apply: • Hazards (Flooding) Overlay • Local Heritage Place Overlay • Major Urban Transport Routes Overlay • State Heritage Place Overlay • Traffic Generating Development Overlay • Urban Transport Routes Overlay	1. Occupies land for no longer than 3 months 2. Ensures litter and water are contained on site 3. Provides temporary security fencing around the perimeter of the site.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. The tank is part of a roof drainage system. 4. Total floor area - not exceeding 15m^2. 5. The tank is located wholly above ground. 6. Tank height - does not exceed 4m above natural ground level. 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour. 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Special industry	None specified

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) cinema (d) co-living (e) community facility (f) consulting room (g) dwelling located above a non-residential building level (h) indoor recreation facility (i) library (j) office (k) place of worship (l) shop (m) temporary public service depot (n) tourist accommodation.	Except development that exceeds the maximum building height specified in Township Main Street Zone DTS/DPF 3.1 or does not satisfy any of the following: 1. Township Main Street Zone DTS/DPF 3.2 2. Township Main Street Zone DTS/DPF 3.3.
4. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) recreation area (k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	None specified.
5. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
6. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Township Neighbourhood Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Accommodation of a range of housing types that respond to housing preferences in a manner that contributes to and enhances township streetscapes and original settlement patterns.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Predominantly residential development with complementary non-residential uses compatible with the township streetscapes and established settlement patterns.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Ancillary accommodation (b) Co-living (c) Consulting room (d) Dwelling (e) Office (f) Recreation area (g) Shop

PO 1.2 Commercial activities improve community access to services are of a scale and type to maintain residential amenity.	DTS/DPF 1.2 A shop, consulting room or office (or any combination thereof) satisfies any one of the following: (a) it is located on the same allotment and in conjunction with a dwelling where all the following are satisfied: (i) does not exceed 50m^2 gross leasable floor area (ii) does not involve the display of goods in a window or about the dwelling or its curtilage (b) it reinstates a former shop, consulting room or office in an existing building (or portion of a building) and satisfies one of the following: (i) the building is a State or Local Heritage Place (ii) is in conjunction with a dwelling and there is no increase in the gross leasable floor area previously used for non-residential purposes.
PO 1.3 Non-residential development located and designed to improve community accessibility to services, primarily in the form of: (a) small scale commercial uses such as offices, shops, and consulting rooms (b) community services such as educational facilities, community centres, places of worship, child care facilities and other health and welfare services (c) services and facilities ancillary to the function or operation of supported accommodation or retirement facilities (d) open space and recreation facilities.	DTS/DPF 1.3 None are applicable.
PO 1.4 Non-residential development sited and designed to complement the residential character and amenity of the neighbourhood.	DTS/DPF 1.4 None are applicable.
Site Dimensions and Land Division	
PO 2.1 Allotments/sites for residential purposes are consistent with the density expressed in any relevant *Minimum Site Area Technical and Numeric Variation* or are of a suitable size and dimension to accommodate the anticipated dwelling form, achieve compatibility with the prevailing development pattern in the locality and provide for appropriate wastewater disposal.	DTS/DPF 2.1 Development will not result in more than 1 dwelling on an existing allotment or Allotments/sites for residential purposes accord with the following: (a) where allotments/sites are connected to mains sewer or a Community Wastewater Management System site areas (or allotment areas in the case of land division) are not less than the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building): **Minimum Site Area** Minimum site area for a detached dwelling is 325 sqm; semi-detached dwelling is 325 sqm Minimum site area for a detached dwelling is 800 sqm; group dwelling is 800 sqm Minimum site area is 1,000 sqm Minimum site area is 1,200 sqm Minimum site area is 500 sqm Minimum site area is 750 sqm Minimum site area is 800 sqm or (b) where allotments/sites are not connected to mains sewer or an approved common waste water disposal service site areas are not less than the greater of: (i) 1200m^2 (ii) the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building): **Minimum Site Area** Minimum site area for a detached dwelling is 325 sqm; semi-detached dwelling is 325 sqm Minimum site area for a detached dwelling is 800 sqm; group dwelling is 800 sqm Minimum site area is 1,000 sqm Minimum site area is 1,200 sqm Minimum site area is 500 sqm Minimum site area is 750 sqm Minimum site area is 800 sqm and (c) site frontages are not less than: **Minimum Frontage** Minimum frontage for a detached dwelling is 20m Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 9m Minimum frontage is 12m Minimum frontage is 15m Minimum frontage is 18m Minimum frontage is 20m Minimum frontage is 25m In relation to DTS/DPF 2.1, in instances where: (d) more than one value is returned in the same field, refer to the *Minimum Frontage Technical and Numeric Variation layer* or *Minimum Site Area Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (e) no value is returned for DTS/DPF 2.1(a) (i.e, there is a blank field) then non are applicable and the relevant development cannot be classified as deemed-to-satisfy (f) no value is returned for DTS/DPF 2.1(b)(ii) (i.e, there is a blank field) then the value for DTS/DPF 2.1(b)(ii) is zero (g) no value is returned for DTS/DPF 2.1(c)(i) (i.e, there is a blank field) then the minimum site frontage is 20m.
PO 2.2 Development results in sites suitable for their intended purpose.	DTS/DPF 2.2 Where the site of a dwelling does not comprise an entire allotment: (a) the balance of the allotment accords with the requirements specified in DTS/DPF 2.1 and (b) if there is an existing dwelling on the allotment that will remain on the allotment after completion of the development it will not contravene: (i) private open space requirements specified in Design in Urban Areas Table 1 - Private Open Space (ii) car parking requirements specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
Site Coverage	
PO 3.1 Building footprints are consistent with the character and pattern of the township and provide sufficient space around buildings to limit visual impact, provide an attractive outlook and access to light and ventilation.	DTS/DPF 3.1 Development does not result in site coverage exceeding: **Site Coverage** Maximum site coverage is 35 per cent In instances where: (a) no value is returned (i.e. there is a blank field), then 50% applies (b) more than one value is returned in the same field, refer to the Site Coverage Technical and Numeric Variation layer in the SA planning database to determine the applicable value relevant to the site of the proposed development.
Building Height	
PO 4.1 Building and wall height contributes to the prevailing character of the neighbourhood and complements the height of nearby buildings.	DTS/DPF 4.1 Building height (excluding garages, carports and outbuildings) is no greater than: (a) the following: **Maximum Building Height (Metres)** Maximum building height is 9m Maximum building height is 7.5m **Maximum Building Height (Levels)** Maximum building height is 1 level Maximum building height is 2 levels

	(b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)) - 2 building levels up to a height of 9m. In relation to DTS/DPF 4.1, in instances where: (c) more than one value is returned in the same field, refer to the *Maximum Building Height (levels) Technical and Numeric Variation* layer or *Maximum Building Height (Meters) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (d) only one value is returned for DTS/DPF 4.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.
PO 4.2 Additions and alterations do not adversely impact on the streetscape character.	DTS/DPF 4.2 Additions and alterations: (a) are fully contained within the roof space of a building with no external alterations made to the building elevation facing the primary street or (b) meet all of the following: (i) do not include any development forward of the front façade building line (ii) where including a second or subsequent building level addition, it does not project beyond a 45 degree angle measured from ground level at the building line of the existing building.
Primary Street Setback	
PO 5.1 Buildings are set back from primary street boundaries consistent with the existing streetscape.	DTS/DPF 5.1 Buildings setback from the primary street boundary in accordance with the following table: **Development Context** / **Minimum setback** There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building. — The average setback of the existing buildings. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site. — The setback of the existing building. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site. — (a) Where the existing building shares the same primary street frontage – the setback of the existing building (b) Where the existing building has a different primary street frontage - 6m There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building. — 6m For the purposes of **DTS/DPF 5.1:** (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table
Secondary Street Setback	
PO 6.1 Buildings are set back from secondary street boundaries to maintain a pattern of separation between buildings and public streets and reinforce streetscape character.	DTS/DPF 6.1 Building walls are set back from the secondary street boundary (other than a rear laneway): (a) no less than: **Minimum Side Boundary Setback** Minimum side boundary setback is 1m or (b) 900mm, whichever is greater or (c) if a building (except for ancillary buildings and structures) on any adjoining allotment is closer to the secondary street, not less than the distance of that building from the boundary with the secondary street. In instances where no value is returned in DTS/DPF 6.1(a) (i.e. there is a blank field), then the value for DTS/DPF 6.1(a) is zero.
Boundary Walls	
PO 7.1 Boundary walls are limited in height and length to manage visual and overshadowing impacts on adjoining properties.	DTS/DPF 7.1 Buildings do not incorporate side boundary walls where a side boundary setback value is returned in (a) below: (a) **Minimum Side Boundary Setback** Minimum side boundary setback is 1m or (b) where no side boundary setback value is returned in (a) above, and except where the building is a dwelling and is located on a central site within a row dwelling or terrace arrangement, side boundary walls occur only on one side boundary and satisfy (i) or (ii) below: (i) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same or lesser length and height (ii) side boundary walls do not: A. exceed 3.2m in wall height from the lower of the natural or finished ground level B. exceed 8m in length C. when combined with other walls on the boundary of the subject development site, exceed maximum 45% of the length of the boundary D. encroach within 3 metres of any other existing or proposed boundary walls on the subject land.
PO 7.2 Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a low density suburban streetscape character.	DTS/DPF 7.2 Dwelling walls in a semi-detached, row or terrace arrangement are setback from side boundaries shared with allotments outside the development site at least the minimum distance identified in DTS/DPF 8.1.
Side Boundary Setback	
PO 8.1 Buildings are set back from side boundaries to provide: (a) separation between buildings in a way that complements the established character of the locality (b) access to natural light and ventilation for neighbours.	DTS/DPF 8.1 Other than walls located on a side boundary in accordance with Township Neighbourhood Zone DTS/DPF 7.1, building walls are set back from the side boundary: (a) no less than: **Minimum Side Boundary Setback** Minimum side boundary setback is 1m (b) in all other cases (i.e., there is a blank field), then: (i) where the wall height does not exceed 3m measured from the lower of natural or finished ground level - at least 900mm (ii) for a wall that is not south facing and the wall height exceeds 3m measured from the lower of natural or finished ground level - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the lower of natural or finished ground level (iii) for a wall that is south facing and the wall height exceeds 3m measured from the lower of natural or finished ground level - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the lower of natural or finished ground level.
Rear Boundary Setback	
PO 9.1 Buildings are set back from rear boundaries to provide: (a) separation between buildings in a way that complements the established character of the locality (b) access to natural light and ventilation for neighbours (c) private open space (d) space for landscaping and vegetation.	DTS/DPF 9.1 Other than in relation to an access lane way, building walls are set back from the rear boundary at least: (a) 4m for the first building level (b) 6m for any second building level.
Appearance	
PO 10.1 Garages and carports are designed and sited to be discreet and not dominate the appearance of the associated dwelling when viewed from the street.	DTS/DPF 10.1 Garages and carports facing a street (other than an access lane way): (a) are set back at least 0.5m behind the building line of the associated dwelling

	(b) are set back at least 5.5m from the boundary of the primary street (c) have a total garage door / opening width not exceeding 30% of the allotment or site frontage, to a maximum width of 7m.
PO 10.2 The appearance of development as viewed from public roads is sympathetic to the wall height, roof forms, and roof pitches of the predominant housing stock in the locality.	DTS/DPF 10.2 None are applicable.
Ancillary buildings and structures	
PO 11.1 Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.	DTS/DPF 11.1 Ancillary buildings and structures satisfy (a) to (k), inclusive: (a) are ancillary to a dwelling erected on the same site (b) have a floor area not exceeding 60m^2 (c) are constructed, added to or altered so that they are situated at least: (i) 0.5m behind the building line of the dwelling to which they are ancillary or (ii) 900mm from a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street (ii) when facing a primary street or secondary street. has a total door/opening not exceeding 7m or 30% of the site frontage, whichever is the lesser (e) if situated on a boundary (not being a boundary with a primary street or secondary street), a length not exceeding 8m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary not exceeding 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure (h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end), and where located to the side of the associated dwelling, have a wall height or post height no higher than the wall height of the associated dwelling (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, are pre-colour treated or painted in a non-reflective colour (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less: (i) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (ii) the amount of existing soft landscaping prior to the development occurring.
PO 11.2 Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements and do not result in over-development of the site.	DTS/DPF 11.2 Ancillary buildings and structures do not result in: (a) less private open space than specified in Design Table 1 - Private Open Space (b) less car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
PO 11.3 Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.	DTS/DPF 11.3 Non-residential ancillary buildings and structures satisfy (a) to (j), inclusive: (a) are ancillary and subordinate to an existing non-residential use on the same site (b) have a floor area not exceeding the following: Allotment size / Floor area ≤500m^2 / 60m^2 >500m^2 / 80m^2 (c) are not constructed, added to or altered so that any part is situated: (i) in front of any part of the building line of the main building to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height (or post height) not exceeding 3m (and not including a gable end) (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.
Concept Plans	
PO 12.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 12.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 3 - Mount Barker and Littlehampton In relation to DTS/DPF 12.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 12.1 is met.
Advertisements	
PO 13.1 Advertisements identify the associated business activity, and do not detract from the residential character of the locality.	DTS/DPF 13.1 Advertisements relating to a lawful business activity associated with a residential use do not exceed 0.3m2 and mounted flush with a wall or fence.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing dwelling. 2. The item being installed does not encroach on a public street. 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.

Building alterations
Except where any of the following apply:

- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The alteration does not:
   (a) increase the floor area of the building
   (b) exceed the existing wall height
   (c) exceed the existing overall building height
   (d) alter the roof profile
   (e) alter an approved privacy screening arrangement or window treatment
   (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.
2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.

Building work on railway land
Except where any of the following apply:

- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. Building work is associated with a railway
2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017)
3. It is required for the conduct or maintenance of railway activities
4. It does not involve the clearance of native vegetation
5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.

Carport
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Total floor area - does not exceed 40m^2
6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end)
7. Building height - does not exceed 5m
8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 8m unless:
   (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
   (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street):
   (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
   (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
10. Site coverage does not exceed 50% or the amount specified in the *Site Coverage Technical and Numeric Variation* layer in the SA planning database (whichever is less).
11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 30% of the width of the allotment frontage (whichever is less).
12. The carport is located so that vehicle access:
    (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    (b) is not obtained form a State maintained Road, and will use a driveway that:
        (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
        (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
        (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
        (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
        (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site
13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour
14. Does not involve the clearance of native vegetation
15. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Outbuilding
Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
6. Total floor area - does not exceed 40m^2
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
8. Building height - does not exceed 5m
9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 8m unless:
   (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
   (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
    (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
    (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
11. Site coverage does not exceed 50% or the amount specified in the Site Coverage Technical and Numeric Variation layer in the SA planning database (whichever is less).
12. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
13. If the outbuilding is a garage, it is located so that vehicle access:
    (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    (b) is not obtained from a State Maintained Road, and will use a driveway that:
        (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
        (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
        (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
        (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
        (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site
14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour
15. Does not involve-
    (a) excavation exceeding a vertical height of 1m; or
    (b) filling exceeding a vertical height of 1m,
    and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m.
16. Does not involve the clearance of native vegetation
17. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
18. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%

	>450 | 25%

(b) the amount of existing soft landscaping prior to the development occurring.

Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Private bushfire shelter Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • River Murray Flood Plain Protection Area Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Primary street setback - at least as far back as the building to which it is ancillary 4. Secondary street setback - at least 900mm from the boundary of the allotment 5. At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place) 6. Does not involve the clearance of native vegetation.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** | **Minimum percentage of site** <150 | 10% 150-200 | 15% 201-450 | 20% >450 | 25% (b) the amount of existing soft landscaping prior to the development occurring.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary 6. Location of pumps and/or filtration systems from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid acoustic structure; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 9. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** | **Minimum percentage of site** <150 | 10% 150-200 | 15% 201-450 | 20% >450 | 25% (b) the amount of existing soft landscaping prior to the development occurring.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level 7. Building height - does not exceed 5m 8. Length - does not exceed 8m if any part of the structure abuts or is situated on a boundary of the allotment 9. Site coverage does not exceed 50% or the amount specified in the Site Coverage Technical and Numeric Variation layer in the SA planning database (whichever is less) 10. Does not involve the clearance of native vegetation 11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** | **Minimum percentage of site** <150 | 10% 150-200 | 15% 201-450 | 20% >450 | 25% (b) the amount of existing soft landscaping prior to the development occurring.
Water tank (above ground) Except where any of the following apply:	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*

• Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. The tank is part of a roof drainage system 4. Total floor area - not exceeding 15m^2 5. The tank is located wholly above ground 6. Tank height - does not exceed 4m above natural ground level 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour 9. Does not involve the clearance of native vegetation 10. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m^2 (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. All development undertaken by: (a) the South Australian Housing Trust either individually or jointly with other persons or bodies or (b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.	Except development involving any of the following: 1. residential flat building(s) of 3 or more building levels 2. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 3. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) ancillary accommodation (b) co-living (c) dwelling (d) dwelling addition (e) residential flat building.	Except development that: 1. exceeds the maximum building height specified in Township Neighbourhood Zone DTS/DPF 4.1 or 2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 8m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3.2m measured from the lower of the natural or finished ground level (other than where the proposed wall abuts an existing wall or structure of greater height on the adjoining allotment).
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. does not satisfy Township Neighbourhood Zone DTS/DPF 1.2 or 2. exceeds the maximum building height specified in Township Neighbourhood Zone DTS/DPF 4.1 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 8m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3.2m measured from the lower of the natural or finished ground level (other than where the proposed wall abuts an existing wall or structure of greater height on the adjoining allotment).
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) recreation area	None specified.

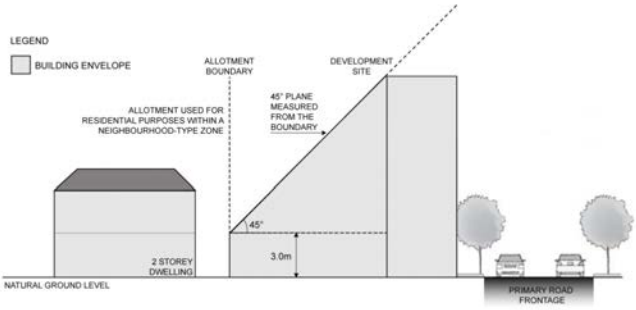
(k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	
6. Demolition.	Except any of the the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development
None specified

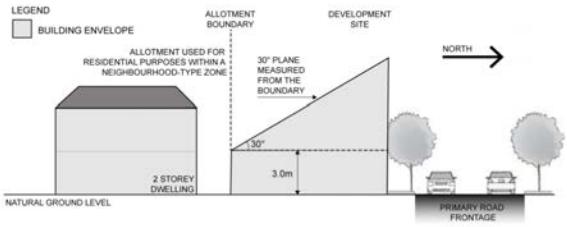
Placement of Notices - Exemptions for Restricted Development
None specified

Urban Activity Centre Zone

Assessment Provisions (AP)



Desired Outcome (DO)



Desired Outcome	
DO 1	A cohesive and legible environment supporting a broad spectrum of regional level business, shopping, entertainment and recreational facilities that can cater for large crowds, smaller social gatherings and events over extended hours.
DO 2	Primary business, shopping and entertaining areas are integrated with public transport facilities, pedestrian and cycling networks, and community transport infrastructure, and designed to enhance the quality of the public realm.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Shops, offices, entertainment, health, education and recreation related uses and other businesses that provide a comprehensive range of goods and services to the region.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Car park facility (c) Child care facility (d) Cinema (e) Co-living (f) Consulting room (g) Community transport facilities (h) Community facility (i) Consulting room (j) Dwelling (k) Educational facility (l) Emergency services facility (m) Hospital (n) Hotel (o) Indoor recreation facility (p) Library (q) Licensed Premises (r) Light industry (s) Office (t) Place of worship (u) Public transport facilities (v) Retail fuel outlet (w) Retirement facility (x) Shop (y) Store (z) Student accommodation (aa) Supported accommodation (ab) Telecommunications facility (ac) Tourist accommodation (ad) Warehouse
PO 1.2 Facilities within the centre sited and designed with a view to promoting after-hours use to reinforce the centre as the focus of social activity.	DTS/DPF 1.2 None are applicable.
PO 1.3 Residential development does not prejudice the operation of existing non-residential development and the long term provision of services and facilities for wider community benefit.	DTS/DPF 1.3 None are applicable.
PO 1.4 Dwellings and/or co-living developed in conjunction with non-residential uses to support business, entertainment and recreational activities and contribute to making streets and pedestrian thoroughfares pleasant and lively places.	DTS/DPF 1.4 Dwellings and/or co-living are located at upper levels of buildings with non-residential uses located at ground level.
PO 1.5 Where residential development is appropriate having regarding to other performance outcomes of the zone, residential development achieves medium-to-high densities.	DTS/DPF 1.5 None are applicable.
PO 1.6 Development sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.	DTS/DPF 1.6 Any of the following: (a) shop, other than a bulky goods outlet with a gross leasable floor area more than 500m^2 (b) cinema (c) hotel (d) licensed premises.
PO 1.7 Changes in the use of land encourage the efficient reuse of commercial premises to maintain and enhance vibrancy within activity centres.	DTS/DPF 1.7 A change of use to a shop, office, consulting room or any combination of these uses where all the following are achieved: (a) the area to be occupied by the proposed development is in an existing building and is currently used as a shop, office, consulting room or any combination of these uses (b) if the proposed change of use is for a shop that primarily involves the handling and sale of foodstuffs, areas used for the storage and collection of refuse are sited at least 10 metres from any neighbourhood-type zone, or the site of a dwelling (other than a dwelling directly associated with the proposed shop) (c) if the proposed change of use is for a shop that primarily involves heating and cooking of foodstuffs in a commercial kitchen and is within 30 metres

	of any neighbourhood-type zone boundary or a dwelling (other than a dwelling directly associated with the proposed shop), an exhaust duct and stack (chimney) exists or is capable of being installed for discharging exhaust emissions (d) if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves either (i) or (ii): (i) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) is from a road that is not an arterial road (ii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared (e) off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, whether exclusive to the premises or shared as part of an integrated complex containing two or more tenancies with shared facilities for off-street vehicle parking.
Built Form and Character	
PO 2.1 Development throughout the zone that integrates with existing development through building scale, connections and complementary land uses.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development integrated with existing or planned public or community transport interchanges and networks to support pedestrian access to activity centre facilities and services.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings are sited and designed to create pedestrian, vehicular, open space and visual linkages between the various built-form elements within the zone and adjoining main roads and thoroughfares.	DTS/DPF 2.3 None are applicable.
PO 2.4 Vehicular access points and car parks are coordinated and consolidated to enable the shared use of parking spaces.	DTS/DPF 2.4 None are applicable.
PO 2.5 Development promotes the use of pedestrian and cyclist connections to centre facilities and services.	DTS/DPF 2.5 None are applicable.
PO 2.6 Buildings and facilities are sited and designed to provide an active frontage to the public realm, contributing to streetscapes and spaces that encourage social interaction.	DTS/DPF 2.6 Not less than 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.
Building height and setbacks	
PO 3.1 Building height is consistent with the form expressed in any relevant *Maximum Building Height (Levels) Technical and Numeric Variation layer* and *Maximum Building Height (Metres) Technical and Numeric Variation layer* or is generally medium-rise development, with the highest intensity of built form at the centre of the zone, and lower scale at the peripheral zone interface.	DTS/DPF 3.1 Building height is: (a) not greater than: **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 9m Maximum building height is 12m Maximum building height is 14m Maximum building height is 15m Maximum building height is 16.5m Maximum building height is 24.5m Maximum building height is 10.5m Maximum building height is 11m Maximum building height is 20m Maximum building height is 40.5m Maximum building height is 17.5m Maximum building height is 21m **Maximum Building Height (Levels)** Maximum building height is 2 levels Maximum building height is 3 levels Maximum building height is 4 levels Maximum building height is 5 levels Maximum building height is 6 levels Maximum building height is 7 levels Maximum building height is 10 levels Maximum building height is 15 levels and (b) not less than: **Minimum Building Height (Levels)** Minimum building height is 2 levels Minimum building height is 3 levels Minimum building height is 4 levels In relation to DTS/DPF 3.1, in instances where: (c) more than one value is returned in the same field then: (i) for the purpose of DTS/DPF 3.1(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or *Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development (ii) for the purpose of DTS/DPF 3.1(b) refer to the *Minimum Building Height (Levels) Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development (d) only one value is returned for DTS/DPF 3.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (e) no value is returned (ie there is a blank field), then: (i) for the purpose of DTS/DPF 3.1(a), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy (ii) for the purpose of DTS/DPF 3.1(b), then there is no minimum building height and DTS/DPF 3.1(b) is met.
PO 3.2 Buildings mitigate visual impacts of building massing on residential development within a neighbourhood-type zone.	DTS/DPF 3.2 Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary or where this boundary is the street boundary):

PO 3.3 Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.	DTS/DPF 3.3 Buildings on sites with a southern boundary adjoining an allotment used for residential purposes within a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram (except where this boundary is a street boundary): 
PO 3.4 Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 3.4 None are applicable.
Land Division	
PO 4.1 Land division that creates allotments that vary in size and are suitable for a variety of business and community facilities.	DTS/DPF 4.1 None are applicable.
Advertisements	
PO 5.1 Advertisements are sited and designed to achieve an overall consistency and appearance along individual street frontages.	DTS/DPF 5.1 None are applicable.
PO 5.2 Freestanding advertisements: (a) identify the associated business(es) (b) are of a size that is commensurate with the scale of the centre and the street frontage (c) avoid visual clutter (d) positively respond to the context without dominating the locality.	DTS/DPF 5.2 Freestanding advertisements: (a) do not exceed 10m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser) and (b) do not have a sign face that exceeds $8m^2$ per side.
Vehicle parking	
PO 6.1 Vehicle parking areas are sited and designed to minimise visual dominance when viewed from the public realm.	DTS/DPF 6.1 Vehicle parking areas are sited above or below street level, in decked or basement parking.
Concept Plans	
PO 7.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 7.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 51 - Cruickshank's Corner Concept Plan 52 - Dock One Concept Plan 57 - McLaren's Wharf Concept Plan 60 - Port Adelaide State Heritage Area Concept Plan 61 - Port Approach Concept Plan 67 - Woolstores Concept Plan 3 - Mount Barker and Littlehampton Concept Plan 9 - Blakeview Concept Plan 54 - Fletchers Slip Concept Plan 62 - Railways Concept Plan 64 - Southern Approach Concept Plan 58 - North West Concept Plan 66 - West Concept Plan 59 - Old Port Reach Concept Plan 63 - Retail Core Concept Plan 65 - Southern Gateway Concept Plan 53 - East End Concept Plan 55 - Hart's Mill Concept Plan 56 - Main Street Concept Plan 81 - Edinburgh Defence Airfield Lighting Constraints Concept Plan 93 - Noarlunga Centre Concept Plan 175 - Smithfield Regeneration

	In relation to DTS/DPF 7.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 7.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Consulting room Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Office Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Shade sail consists of permeable material 2. The total area of the sail - does not exceed 40m^2 3. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 4. Primary street setback - at least as far back as the building line of the building to which it is ancillary 5. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 6. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 7. Does not involve the clearance of native vegetation 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Shop Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or

	(c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Special industry	None specified

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) co-living (d) consulting room (e) dwelling (f) office (g) residential flat building (h) student accommodation (i) supported accommodation.	Except development that exceeds the maximum building height specified in Urban Activity Centre Zone DTS/DPF 3.1 or does not satisfy any of the following: 1. Urban Activity Centre Zone DTS/DPF 3.2 2. Urban Activity Centre Zone DTS/DPF 3.3.
4. Any development involving any of the following (or of any combination of any of the following): (a) hotel (b) licensed premises (c) shop.	Except development that exceeds the maximum building height specified in Urban Activity Centre Zone DTS/DPF 3.1 or does not satisfy any of the following: 1. Urban Activity Centre Zone DTS/DPF 1.6 2. Urban Activity Centre Zone DTS/DPF 3.2 3. Urban Activity Centre Zone DTS/DPF 3.3.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) temporary accommodation in an area affected by bushfire (p) tree damaging activity (q) verandah (r) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Port Adelaide Centre Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Tourism, cultural and recreational facilities related to Port Adelaide's unique maritime and commercial heritage and character, and promotion of the zone as a major State tourism destination.
DO 2	Optimal use of vacant and under-utilised land, buildings and the inner harbour of the Port Adelaide River.
DO 3	Conservation and enhancement of items and areas of significance to the zone's unique maritime and commercial heritage, townscape, waterscape and landscape character.
DO 4	A substantial increase in the number of residential dwellings, resident population and provision of accommodation and services for a wide range of people and household types in appropriate areas.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development is located, staged and designed such that vacant or under-utilised land and buildings are redeveloped or reused for more appropriate uses.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development is located, staged and designed such that vacant or under-utilised land and buildings are redeveloped or reused for more appropriate uses.	DTS/DPF 1.2 None are applicable.

Concept Map	Envisaged land uses
Cruickshank's Corner	Tourism and commercial development, with links to public open space, the public waterfront promenade and shore area
Dock One	Medium to high density residential development that includes mixed uses at ground floor level Small craft mooring facilities
East End	**Northern and south western parts:** Offices, consulting rooms and similar uses that are suited to the conversion or rehabilitation of historic buildings in this area. **Old Port Dock Railway Station and yards:** tourism, museum uses and car parking, with sites fronting St Vincent Street and Lipson Street primarily office, commercial and institutional uses **Southern part:** Light industry, service industry, warehouse
Fletcher's Slip	Medium to high density residential dwellings Small scale marine related businesses and tourism activity
Hart's Mill	**Areas fronting Vincent Street:** Tourist accommodation and tourist or commercial uses at ground level **Adjacent to the waterfront:** Residential dwellings and mixed uses
Mainstreet	Small scale shops, offices, showrooms and consulting rooms Residential development integrated above ground floor envisaged uses.
McLaren's Wharf	Mixed tourism, retail, office, recreational, educational and residential development of diverse character which capitalises on its access to the waterfront. **Development overlooking the Port Adelaide River:** medium density to high density residential development.
North West	Medium to high density residential and small scale mixed use activities including some small scale tourist accommodation **Areas over water:** ground level non-residential purposes including retail, tourism and commercial uses
Old Port Reach	Medium to high-density residential development, including affordable housing
Port Adelaide State Heritage Area	Civic and administrative uses, small-scale offices, shipping agents and related commercial uses, and tourist facilities compatible with the area's historic townscape character.
Port Approach	Light industrial and commercial activities with opportunities for tourist infrastructure such as the maritime museum, tourist accommodation, offices, low impact commercial activities, and residential and mixed use development adjacent Dock One. Development to the south of the Port River Expressway: residential and mixed use development, commercial, office and tourist activities. Industrial development should not occur south of the road and rail bridges nearby residential activities.
Railways	Railway activities and associated commercial and industrial uses.
Retail Core	Major supermarkets and discount department stores, together with associated specialty shops, consulting rooms, offices and community service facilities. Medium to high-density residential development located above active ground floor uses
Southern Approach	Retail, showrooms, commercial, institutional development North-western part of the area: residential development.
Southern Gateway	Offices, commercial, showrooms, service trade premises and shops. Medium to high density residential development, including affordable housing, on sites in close proximity to major public transport facilities.
West	medium to high density residential development with associated open space areas and mixed use activities including some small-scale tourist accommodation
Woolstores	Low impact commercial, warehouse and storage activities Residential development where compatible with nearby land uses. Light industry, service industry and home industry in the area to the south of Brock Street.

PO 1.3 Land adjacent to the Port Adelaide River not required for port or shipping activities is progressively redeveloped for a range of the following uses, where consistent with the intent of any relevant Concept Plans: (a) community uses (b) medium and higher density residential uses (c) recreation (d) tourism (e) office (f) retail.	DTS/DPF 1.3 None are applicable.

PO 1.4 Recreational and tourism development, such as the following, are developed on the Port Adelaide River in locations where boating and harbour activities can be undertaken safely and conveniently: (a) marinas (b) maritime museum uses (c) ferry services (d) water taxis.	DTS/DPF 1.4 None are applicable.
PO 1.5 Residential development adjacent the rail corridor as shown on Concept Plans 53 (East End), 61 (Port Approach), 62 (Railways), 64 (Southern Approach), 65 (Southern Gateway), 66 (West) and 67 (Woolstores) has regard to existing and possible future noise sources with respect to site layout, orientation, design and construction to ensure a safe and comfortable residential environment and to minimise conflict with existing non-residential activities.	DTS/DPF 1.5 None are applicable.
PO 1.6 Tourist development is primarily situated adjacent to and on the Port Adelaide River and associated public promenade.	DTS/DPF 1.6 None are applicable.
PO 1.7 Major shops and groups of shops are concentrated within the areas constituting the 'Mainstreet' and 'Retail Core' Concept Plans.	DTS/DPF 1.7 None are applicable.
PO 1.8 Residential accommodation at medium and higher densities where it can be demonstrated that it is compatible with, and does not prejudice, the operation of non-residential activities within this or adjacent zones.	DTS/DPF 1.8 None are applicable.
PO 1.9 Public open space is provided in a variety of forms including a publicly accessible waterfront promenade, public reserves and public plazas.	DTS/DPF 1.9 None are applicable.
PO 1.10 Large landscaped or other open areas fronting on to Commercial Road and St Vincent Street are not developed.	DTS/DPF 1.10 None are applicable.
Built form and character	
PO 2.1 Buildings are situated close to or abutting street frontages, particularly on corner sites, to reinforce the prevailing townscape character within the subzone.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is sited to provide view lines and reinforce existing vistas indicated on a relevant Concept Plan including: View corridors: (a) take the form of one or more of the following: (i) public road reservations (ii) public reserves (iii) wider spaces between buildings (b) incorporate pedestrian linkages (c) have a minimum width of 17.5 metres if identified as a major view corridor (d) have a minimum width of 12 metres if identified as a minor view corridor.	DTS/DPF 2.2 None are applicable.
PO 2.3 The siting, form and scale of buildings on corner sites: (a) increases the presence of built form on street intersections (b) addresses both street frontages (c) minimises unusable open space on the street frontages.	DTS/DPF 2.3 None are applicable.
PO 2.4 Street furniture, including lighting, advertisements, advertising hoardings, litter bins, seats, bicycle parking facilities and bollards, are designed and located so as to complement the townscape character of the area and respond to its maritime locality.	DTS/DPF 2.4 None are applicable.
PO 2.5 Development abutting St Vincent Street, Commercial Road, Church Place and Dale Street, public spaces and pedestrian malls has facades of no less than two storeys.	DTS/DPF 2.5 None are applicable.
PO 2.6 Materials reflect and reinforce the historic, maritime character of the subzone wherever practicable.	DTS/DPF 2.6 None are applicable.
PO 2.7 Development adjacent to the public promenade, public plazas, public reserves, main roads and edges of public spaces is designed to: (a) maintain an active interface through architectural detail and interest in skyline and pedestrian levels (b) provide active street frontages at ground level with land uses such as cafes, restaurants, local shops and home offices that contribute to the vibrancy and diversity of the area (c) maintain the continuity of streetscape with streets and public spaces defined by consistent building frontages at the street alignment (d) maximise solar access and limit overshadowing of these areas (e) protect the amenity of residents at ground level (f) protect pedestrian amenity (g) provide for varied and attractive building elevations.	DTS/DPF 2.7 None are applicable.
PO 2.8 Landmark buildings indicated on a Concept Plans are designed to: (a) preserve a pleasant pedestrian environment (b) create consistent building frontages at the street, plaza or promenade alignment (c) assist to deflect wind downdrafts from penetrating to street level plazas and promenades (d) be exemplary in their design quality and enhance the locality with architectural elements characteristic of the Port Adelaide, heritage buildings and waterfront environment.	DTS/DPF 2.8 None are applicable.
PO 2.9 Development facilitates the provision of a continuous pedestrian and cyclist 'Inner Harbour Ring Route' including connections to nearby bicycle routes, schools and stations shown on Concept Maps relating to: (a) Cruickshank's Corner (b) Dock One (c) Fletcher's Slip (d) Hart's Mill (e) Mainstreet (f) McLaren's Wharf (g) North West (h) Old Port Reach (i) Port Approach (j) West	DTS/DPF 2.9 None are applicable.
PO 2.10 Waterfront development is designed and sited to allow for future potential flood mitigation measures such as the creation of sea walls or levees that will provide protection from stormwater and seawater flooding in a consistent and integrated manner.	DTS/DPF 2.10 None are applicable.
PO 2.11 Buildings greater than three storeys provide human scale street frontages through one or more of the following methods: (a) stepped reduction of building heights towards street frontages (b) use of the podium level (c) use of secondary/adjoining building elements to the street.	DTS/DPF 2.11 None are applicable.
Building height	
PO 3.1 Buildings are designed to reflect the street wall heights and horizontal elements of adjacent buildings by reinforcing:	DTS/DPF 3.1 None are applicable.

(a) the prevailing datum heights, including parapet levels, balconies or distinguishing elements such as verandas and canopies at the street level
(b) a distinction of levels below and above prevailing horizontal elements through architectural expression.

Land Division

PO 4.1

Development is sited to ensure that original grid street layouts within the centre are retained and wherever possible, re-established.

DTS/DPF 4.1

None are applicable.

PO 4.2

Roads and reserves are of sufficient width to cater for the projected traffic volumes and to provide for safe and convenient vehicle access, pedestrian environment, and on-street car parking.

DTS/DPF 4.2

Road types and road reserve widths are provided in accordance with the following table:

Road type	Maximum 24-hour traffic volume (vehicles)	Road reserve width (metres)	Carriageway width (metres)
Bus Route (Major Collector)	**Over 3000**	**23.2 (including bike lanes)**	**7 (takes into account provision for parallel car parking provided both sides)**
Bus Route (Minor Collector)	**1500-3000**	**20.2**	**7 (takes into account provision for parallel car parking provided both sides)**
Major Collector	**Over 3000**	**19.2 (22 with bike lanes)**	**6**
Minor Collector	**1500-3000**	**16.1**	**7.5**
Local Street	**500-1500**	**15**	**7**
Local Street with rear lane access	**0-1500**	**14 (provides for indented car parking)**	**5.5**
Local public road less than 60m in length and not contiguous with a road of lesser dimension than prescribed above	**Less than 500**	**12.4**	**5**

Vehicle parking and access

PO 5.1

Car parking areas, including decked car parking:

(a) do not intrude upon, or interrupt the continuity of built-form desired along major street frontages in the subzone
(b) do not detract from areas of architectural or townscape value.
(c) in relation to multi-level car parking, are designed as buildings that contribute to the desired built form character include ground level uses adjacent to street frontages, such as offices, shops and tourist development.

DTS/DPF 5.1

None are applicable.

PO 5.2

On-street parking provided for detached, semi-detached and row dwellings to cater for anticipated demand.

DTS/DPF 5.2

Development of detached, semi-detached or row dwellings provides on-street parking at the rate of 0.3 spaces per dwelling within the areas as delineated on Concept Maps for:

(a) Cruickshank's Corner
(b) Dock One
(c) Fletcher's Slip
(d) McLaren's Wharf
(e) North West
(f) Old Port Reach
(g) Port Approach
(h) West

PO 5.3

Garages and carports associated with residential development are sited and designed to minimise visual dominance on the streetscape and views of the dwelling from the street.

DTS/DPF 5.3

Garages or carports do not obtain direct access from or face the primary street.

Waterfront development

PO 6.1

Development creates and enhances a public promenade with a minimum width of 8 metres along the waterfront that achieves:

(a) continuous public pedestrian and cyclist access
(b) convenient, safe and attractive linkages between sections in areas of high pedestrian or cycle traffic and in front of key tourism uses
(c) allowance for infrastructure provision and flood mitigation including a sea wall or levee.

DTS/DPF 6.1

None are applicable.

PO 6.2

Public plazas and public reserves are provided adjacent to the pedestrian promenade to provide for larger outdoor public events and gathering spaces adjacent to the waterfront in accordance with a relevant Concept Plan.

DTS/DPF 6.2

Public reserves and plazas have a minimum area of:

(a) In the case of public reserves: 2000 square metres (other than those located within the Concept Plan 54 Fletcher's Slip)
or
(b) In the case of public plazas: 1500 square metres (and where a public plaza abuts a promenade, the area of the promenade is included in calculation of the plaza area for the length that the promenade abuts the plaza).

PO 6.3

Development is sited to take advantage of waterfront views and activities.

DTS/DPF 6.3

None are applicable.

PO 6.4

Marinas, wharfs, jetties, piers or boat moorings:

(a) provide permanent and temporary docking facilities for residents and the public
(b) provide moorings suitable to a variety and varying sizes of watercraft and vessels
(c) provide a visually stimulating environment
(d) add vitality and maritime activity to waterfront areas
(e) provide a continuation (literal or thematic) of the historic maritime uses of the Port
(f) maintain a strong link and physical integration between the Port Adelaide River and land based public reserves, plazas, promenades and other public and private features comprising the waterfront
(g) integrate with development built directly on or over the river
(h) avoid or minimise any negative impacts on:
  (i) natural riverine ecology and processes
(i) dolphin safety within the dolphin sanctuary area
(j) riverine or other water quality
(k) ensure that any mechanical and electrical equipment and power outlets are safe from flooding or raised to a level not lower than 3.65 metres Australian Height Datum (AHD).

DTS/DPF 6.4

None are applicable.

PO 6.5

Development along the waterfront comprises bold, robust architectural forms with articulated and modelled facades and materials which reflect the character of older maritime/industrial buildings nearby.

DTS/DPF 6.5

None are applicable.

PO 6.6

Development encourages and facilitates the provision of a continuous 'Major Pedestrian/Cycle Path' and 'Inner Harbour Ring Route' public promenade including connections to nearby bicycle routes, schools and stations as shown on Concept Plans 'Port Adelaide Centre Traffic and Transport' and "McLaren's Wharf'.

DTS/DPF 6.6

None are applicable.

PO 6.7

Marinas, wharfs, jetties, piers or boat mooring facilities and associated development provide for:

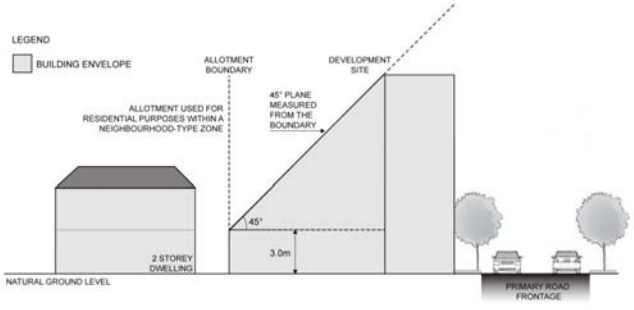
(a) serviced moorings to allow for floating retail activity

DTS/DPF 6.7

None are applicable.

(b) functional requirements of public transport and water navigation including berthing and wharf facilities for ferry and water taxi stopping points that are coordinated with land based services (c) modal interface with land-based public and private transport services and infrastructure (d) connection to shore-based service requirements and support facilities such as boat repair and servicing, amenities, accommodation and shelter structures.	

Urban Corridor (Boulevard) Zone



Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Buildings that achieve a consistent, tall, uniform facade to frame the primary road corridor (e.g., a State maintained road or a road with similar attributes) that are consistently well set back with areas of significant open space in front, other than in specified areas where a lesser or no setback is desired. Buildings accommodate a mix of compatible residential and non-residential uses including shops and other business activities at ground and lower floor levels with residential land uses above.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 A vibrant mix of land uses adding to the vitality of the area and extend activities outside shop hours including restaurants, educational, community and cultural facilities and visitor and residential accommodation.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Co-living (d) Consulting Room (e) Dwelling (f) Educational Facility (g) Hotel (h) Licensed Premises (i) Office (j) Residential Flat Building (k) Retirement Facility (l) Shop (m) Supported Accommodation (n) Student Accommodation (o) Tourist Accommodation
PO 1.2 Shops, offices and consulting rooms that provide a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.2 Shop, office or consulting room uses not exceeding a maximum gross leasable floor area of 2,000m^2 in a single building.
PO 1.3 Dwellings developed in conjunction with non-residential uses that positively contribute to making the public realm of the primary street frontage, open space frontage and pedestrian thoroughfares safe, walkable, comfortable, pleasant and vibrant places.	DTS/DPF 1.3 Dwellings in mixed use buildings to be located at the upper floor levels of buildings.
PO 1.4 Development of medium to high density accommodation options either as part of a mixed use development or wholly residential development.	DTS/DPF 1.4 None are applicable.
PO 1.5 Ground floor uses positively contribute to an active primary street frontage and open space frontage.	DTS/DPF 1.5 Shop, office, or consulting room uses located on the ground floor level of mixed use buildings fronting the primary street frontage.
PO 1.6 Changes in the use of land encourage the efficient reuse of premises to support local access to a range of services compatible to the locality.	DTS/DPF 1.6 Provided off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, a change of use involving either of the following: (a) from residential to office or consulting room on the ground or first floor of a building (b) from residential to shop less than 250 m^2 on the ground floor of a building.
Built Form and Character	
PO 2.1 Buildings contribute to a consistent framing of the primary road corridor (e.g., a State maintained road or a road with similar attributes), open space and public spaces and provide visual relief from building mass at street level.	DTS/DPF 2.1 Buildings: (a) include a clearly defined podium or street wall with a maximum height of 2 levels or 8 metres and (b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.
PO 2.2 Buildings are adaptable and flexible to suit a range residential and non-residential of land uses.	DTS/DPF 2.2 The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.
PO 2.3 Buildings designed to create visual connection between the public realm and ground level interior, to ensure an active interface with the primary street frontage and maximise passive surveillance.	DTS/DPF 2.3 Minimum 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.
PO 2.4 Buildings setback from the primary street boundaries to provide a consistent streetscape edge with generous landscaping and tall articulated building facades, except in locations where a lesser or no setback is desired to achieve a more prominent, strongly defined, and continuous built form presence to the primary street frontage.	DTS/DPF 2.4 Buildings setback from the primary street boundary: (a) not less than: **Minimum Primary Street Setback** Minimum primary street setback is 0m Minimum primary street setback is 2m Minimum primary street setback is 3m Minimum primary street setback is 4m Minimum primary street setback is 6m Or (b) where no value is returned in DTS/DPF 2.4(a), in accordance with the following table: **Development Context** / **Minimum setback** There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building. — The average setback of the existing buildings. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site. — The setback of the existing building. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site. — (a) Where the existing building shares the same primary street frontage – the setback of the existing building (b) Where the existing building has a different primary street frontage - no DTS/DPF is applicable In instances where DTS/DPF 2.4 (a) or (b) do not apply, then none are applicable and the relevant development cannot be classified as deemed-to-satisfy. For the purposes of **DTS/DPF 2.4 (a) and (b):** (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table

PO 2.5 Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.	DTS/DPF 2.5 Building walls setback from a secondary street frontage not less than 2m.
PO 2.6 Buildings are: (a) sited on side boundaries for parts of the building located towards the front part of the allotment to achieve a continuity of street façade to the street (b) setback from side boundaries for parts of the building located behind the street facing elements, to enable building separation to provide access to natural ventilation and sunlight.	DTS/DPF 2.6 Building walls with no window/s or balcony/ies fronting the boundary, setback from side boundaries in accordance with all of the following: (a) no minimum on the boundary, within the first 18m from the front property boundary for any building level (b) no minimum for remaining length for ground level only (c) 2m for 1st level and above for building parts more than 18 metres from the front property boundary.
PO 2.7 Buildings set back from rear boundaries (other than street boundaries) to minimise negative impacts on neighbouring properties, including access to natural sunlight and ventilation.	DTS/DPF 2.7 Building walls setback from rear boundaries as follows: (a) 5m or more where the subject land directly abuts an allotment of a different zone or (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.
PO 2.8 Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.	DTS/DPF 2.8 Building walls setback from the rear access way: (a) no requirement where the access way is not less than 6.5m wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.
Building Height	
PO 3.1 Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer* and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or positively responds to the local context including the site's frontage, depth, and adjacent primary road corridor (e.g., a State maintained road or a road with similar attributes) or street width.	DTS/DPF 3.1 Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s): **Maximum Building Height (Levels)** Maximum building height is 2 levels Maximum building height is 3 levels Maximum building height is 4 levels Maximum building height is 5 levels Maximum building height is 6 levels Maximum building height is 7 levels Maximum building height is 8 levels Maximum building height is 9 levels Maximum building height is 10 levels Maximum building height is 12 levels Maximum building height is 14 levels **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 9m Maximum building height is 11.5m Maximum building height is 12.5m Maximum building height is 15m Maximum building height is 18.5m Maximum building height is 22m Maximum building height is 25.5m Maximum building height is 32.5m Maximum building height is 36m Maximum building height is 43m Maximum building height is 50m In relation to DTS/DPF 3.1, in instances where: (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation* layer or *Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 3.2 Buildings designed to achieve optimal height and floor space yields, and views across the Park Lands (where relevant).	DTS/DPF 3.2 New development is not less that the following building height: **Minimum Building Height (Levels)** Minimum building height is 2 levels Minimum building height is 3 levels Minimum building height is 4 levels In relation to DTS/DPF 3.2, in instances where: (a) more than one value is returned in the same field, refer to the *Minimum Building Height (Levels) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) no value is returned (i.e. there is a blank field), then there is no minimum building height and DTS/DPF 3.2 is met.
Interface Height	
PO 4.1 Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.	DTS/DPF 4.1 **Interface Height** Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): 

	Interface Height
	Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): 
PO 4.2 Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 4.2 None are applicable.
Significant Development Sites	
PO 5.1 Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, retirement facility and supported accommodation provision, or sustainability features.	DTS/DPF 5.1 Development on significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area) up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it satisfies (a), (b), (c) or (d): (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area (b) includes more than 15% of dwellings as affordable housing (c) is for the purpose of a retirement facility or supported accommodation (d) includes at least: (i) three of the following: A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site C. active uses are located on the public street frontages of the building, with any above ground car parking located behind D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments E. a child care centre and (ii) three of the following: A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance B. living landscaped vertical surfaces of at least 50m^2 supported by services that ensure ongoing maintenance C. passive heating and cooling design elements including solar shading integrated into the building D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.
PO 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.	DTS/DPF 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area) that satisfies all of the following: (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF4.1 (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes) (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).
Movement, parking and access	
PO 6.1 Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.	DTS/DPF 6.1 Vehicular access to be provided: (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or (b) where it consolidates or replaces existing crossovers.
PO 6.2 Development is designed to ensure car parking is located to avoid negative impacts on the primary corridor streetscape.	DTS/DPF 6.2 Vehicle parking garages located behind buildings away from the primary main street frontage.
Advertisements	
PO 7.1 Freestanding advertisements identify the associated business without creating a visually dominant element within the streetscape.	DTS/DPF 7.1 Freestanding advertisements: (a) do not exceed 6m in height above natural ground level and (b) do not have a sign face that exceeds 4m^2 per side.
Concept Plans	
PO 8.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 8.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 135 - Thebarton In relation to DTS/DPF 8.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the Electricity Act 1996 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation. 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the Electricity Act 1996 2. The system is freestanding and not attached to a building or other structure. 3. No part of the system: (a) is more than 4m in height (measured as a height above the natural surface of the ground); (b) is within 100m of a dwelling not associated with the system (whether the dwelling is on the same allotment as the system or another allotment); and (c) is within 10m of a boundary of an allotment containing a dwelling not associated with the system. 4. The generating capacity of the system does not exceed 30 kW 5. Does not result in the clearance of any native vegetation.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted. 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 6. Location of pumps and/or filtration systems from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid acoustic structure; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation. 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry
Shop	Any of the following: (a) shop with a gross leasable floor area less than 4000m^2 (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) co-living (d) dwelling (e) residential flat building (f) retirement facility (g) student accommodation (h) supported accommodation.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Boulevard) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Boulevard) DTS/DPF 4.1 or 3. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Boulevard) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Boulevard) DTS/DPF 1.2 or 3. does not satisfy Urban Corridor (Boulevard) DTS/DPF 4.1 or 4. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) tree damaging activity (p) verandah (q) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Urban Corridor (Business) Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A medium rise mixed use zone with a strong focus on employment, which accommodates a diverse range of commercial and light industrial land uses together with compatible medium density residential development oriented towards a primary road corridor (e.g., a State maintained road or a road with similar attributes).
DO 2	Residential development that provides a pleasant amenity for residents without diminishing business opportunities on adjacent land.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 A diverse range of employment land uses, educational and community facilities in conjunction with residential accommodation.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Co-living (d) Consulting Room (e) Dwelling (f) Educational Facility (g) Hotel (h) Licensed Premises (i) Light Industry (j) Office (k) Residential Flat Building (l) Retail Fuel Outlet (m) Retirement Facility (n) Service Trade Premises (o) Shop (p) Store (q) Student Accommodation (r) Supported Accommodation (s) Tourist Accommodation (t) Warehouse

PO 1.2

A range of small- to medium- scale non-residential uses, services and facilities such as shops, offices and consulting rooms that meet the day to day needs of the local community.

DTS/DPF 1.2

Shop, office or consulting room uses not exceeding a maximum gross leasable floor area of 500m^2 in a single building.

PO 1.3

Development of non-residential uses such as educational facilities, child care facilities, health and welfare services to service the local community as well as a wider catchment.

DTS/DPF 1.3

None are applicable.

PO 1.4

Dwellings primarily developed in conjunction with non-residential uses to support local business, activities and contribute to making the primary street frontage and pedestrian thoroughfares safe, walkable, comfortable, pleasant and vibrant places.

DTS/DPF 1.4

Dwellings developed in conjunction with non-residential uses sited:

(a) at upper levels of buildings with non-residential uses located at ground level
or
(b) behind non-residential uses on the same allotment.

PO 1.5

Ground floor uses positively contribute to an active primary street frontage.

DTS/DPF 1.5

Shop, office, or consulting room uses located on the ground floor level of mixed use buildings fronting the primary street frontage.

PO 1.6

Changes in the use of land encourage the efficient reuse of premises to support local access to a range of services compatible to the locality.

DTS/DPF 1.6

Provided off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, a change of use involving either of the following:

(a) from residential to office or consulting room on the ground or first floor of a building
(b) from residential to shop less than 250 m^2 on the ground floor of a building.

PO 1.7

Residential accommodation sited and designed to not impede ongoing operations of existing commercial activity.

DTS/DPF 1.7

None are applicable.

Built Form and Character

PO 2.1

Buildings are adaptable and flexible to suit a range residential and non-residential of land uses.

DTS/DPF 2.1

The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.

PO 2.2

Buildings designed to create visual connection between the public realm and ground level interior, to ensure an active interface with the primary road corridor (e.g., a State maintained road or a road with similar attributes) and maximise passive surveillance.

DTS/DPF 2.2

Minimum 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.

PO 2.3

Buildings setback from the primary street boundaries contribute to the consistent established streetscape, except in locations where no setback is desired to achieve a more prominent, strongly defined, and continuous built form presence to the primary street frontage.

DTS/DPF 2.3

Buildings setback from the primary street boundary:

(a) not less than:

Minimum Primary Street Setback
Minimum primary street setback is 0m
Minimum primary street setback is 2m
Minimum primary street setback is 3m

Or

(b) where no value is returned in DTS/DPF 2.3(a), in accordance with the following table:

Development Context	Minimum setback
There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building.	The average setback of the existing buildings.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site.	The setback of the existing building.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site.	(a) Where the existing building shares the same primary street frontage – the setback of the existing building (b) Where the existing building has a different primary street frontage - no DTS/DPF is applicable

In instances where DTS/DPF 2.3 (a) or (b) do not apply, then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.

For the purposes of **DTS/DPF 2.3 (a) and (b):**

(a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback
(b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table

PO 2.4

Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.

DTS/DPF 2.4

Building walls setback from a secondary street frontage of not less than 2m.

PO 2.5

Buildings set back from rear boundaries (other than street boundaries) to minimise impacts on neighbouring properties, including access to natural sunlight and ventilation.

DTS/DPF 2.5

Building walls setback from rear boundaries as follows:

(a) 5m or more where the subject land directly abuts an allotment of a different zone
or
(b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 2.6

Buildings are:

(a) sited on side boundaries for parts of the building located towards the front part of the allotment to achieve a continuity of street façade to the street
(b) setback from side boundaries for parts of the building located behind the street facing elements, to enable building separation to provide access to natural ventilation and sunlight.

DTS/DPF 2.6

Building walls with no window/s or balcony/s fronting the boundary, setback from side boundaries as follows:

(a) no minimum on the boundary within the first 18m from the front property boundary for any building level
(b) no minimum for remaining length for ground level only
(c) 2m for 1st level and above for building parts more than 18m from the front property boundary.

PO 2.7

Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.

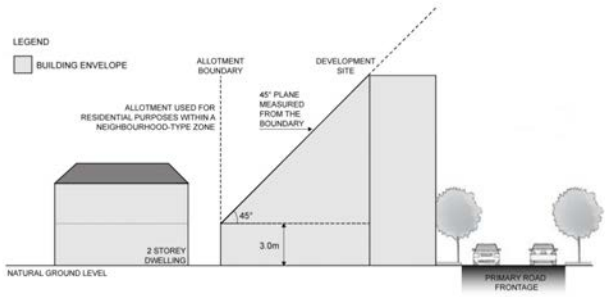
DTS/DPF 2.7

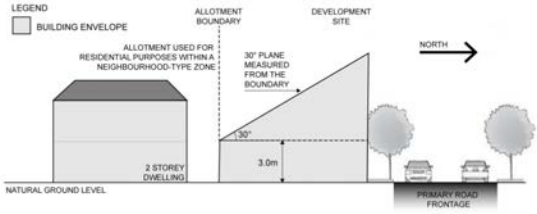
Building walls setback from the rear access way:

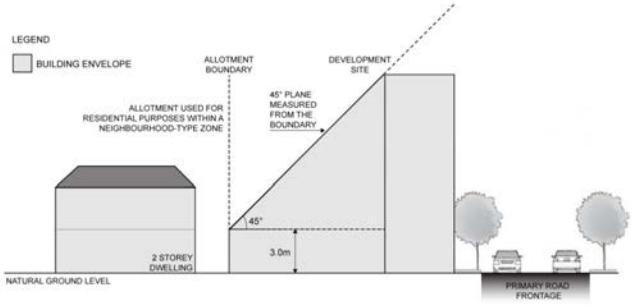
(a) no requirement where the access way is not less than 6.5m wide
or
(b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

Building Height

PO 3.1







Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer* and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or positively responds to the local context including the site's frontage, depth, and adjacent primary road corridor (e.g., a State maintained road or a road with similar attributes) or street width.

DTS/DPF 3.1

Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s):

Maximum Building Height (Levels)
Maximum building height is 2 levels
Maximum building height is 4 levels
Maximum building height is 5 levels
Maximum building height is 6 levels
Maximum Building Height (Metres)
Maximum building height is 15m
Maximum building height is 16.5m
Maximum building height is 18.5m
Maximum building height is 22m
Maximum building height is 24.5m

In relation to DTS/DPF 3.1, in instances where:

	(a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation* layer or *Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 3.2 Buildings designed to achieve optimal height and floor space yields.	DTS/DPF 3.2 New development is not less that the following building height: **Minimum Building Height (Levels)** Minimum building height is 2 levels Minimum building height is 3 levels Minimum building height is 4 levels In relation to DTS/DPF 3.2, in instances where: (a) more than one value is returned in the same field, refer to the *Minimum Building Height (Levels) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) no value is returned (i.e. there is a blank field), then there is no minimum building height and DTS/DPF 3.2 is met.
Interface Height	
PO 4.1 Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.	DTS/DPF 4.1 **Interface Height** Buildings constructed within a building envelope provided by a: (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):  (b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):  Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): 

	Interface Height Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): 
PO 4.2 Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 4.2 None are applicable.
Significant Development Sites	
PO 5.1 Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, retirement facility and supported accommodation provision, or sustainability features.	DTS/DPF 5.1 Development on significant development sites up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it satisfies (a), (b), (c) or (d): (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area (b) includes more than 15% of dwellings as affordable housing (c) is for the purpose of a retirement facility or supported accommodation (d) includes at least: (i) three of the following: A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site C. active uses are located on the public street frontages of the building, with any above ground car parking located behind D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments; E. a child care centre and (ii) three of the following: A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance B. living landscaped vertical surfaces of at least 50m^2 supported by services that ensure ongoing maintenance C. passive heating and cooling design elements including solar shading integrated into the building D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.
PO 5.2 Development on a significant development site (a site with a frontage to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 which may include one or more allotments) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.	DTS/DPF 5.2 Development that satisfies all of the following: (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 4.1 (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes) (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).
Movement, parking and access	
PO 6.1 Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.	DTS/DPF 6.1 Vehicular access to be provided: (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or (b) where it consolidates or replaces existing crossovers.
Advertisements	
PO 7.1 Freestanding advertisements identify the associated business without creating a visually dominant element within the streetscape.	DTS/DPF 7.1 Freestanding advertisements: (a) do not exceed 6m in height and (b) do not have a sign face that exceeds 4m^2 per side.
Concept Plans	
PO 8.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 8.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 135 - Thebarton In relation to DTS/DPF 8.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or

	Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Total floor area - does not exceed 40m^2. 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end). 7. Building height - does not exceed 5m. 8. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure. 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment. 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser). 12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site. 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour. 14. Does not involve the clearance of native vegetation.
Outbuilding Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 6. Total floor area - does not exceed 40m^2 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end) 8. Building height - does not exceed 5m 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 11. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 12. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 13. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour 15. Does not involve- (a) excavation exceeding a vertical height of 1m; or (b) filling exceeding a vertical height of 1m, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m. 16. Does not involve the clearance of native vegetation 17. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. Shade sail consists of permeable material. 4. The total area of the sail - does not exceed 40m^2. 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment. 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m. 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation. 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof. 3. Panels and associated components do not overhang any part of the roof. 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system. 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - as far back as the building line of the building to which it is ancillary

• Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level 7. Building height - does not exceed 5m 8. Length - does not exceed 11m if any part of the structure abuts or is situated on a boundary of the allotment 9. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60% 10. Does not involve the clearance of native vegetation.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. The tank is part of a roof drainage system. 4. Total floor area - not exceeding 15m^2. 5. The tank is located wholly above ground. 6. Tank height - does not exceed 4m above natural ground level. 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour. 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry
Shop	Any of the following: (a) shop with a gross leasable floor area less than 2000m^2 (b) shop located within the Urban Corridor Business Retail Subzone (c) shop that is a restaurant

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) co-living (d) dwelling (e) residential flat building (f) retirement facility (g) student accommodation (h) supported accommodation.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Business) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Business) DTS/DPF 4.1 or 3. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Business) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Business) DTS/DPF 1.2 or 3. does not satisfy Urban Corridor (Business) DTS/DPF 4.1 or 4. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) tree damaging activity (p) verandah (q) water tank.	None specified.

6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development

None specified.

Placement of Notices - Exemptions for Restricted Development

None specified.

Urban Corridor Business Retail Subzone

Assessment Provisions

Desired Outcome (DO)

Desired Outcome	
DO1	Additional neighbourhood-scale shopping, business, entertainment and recreation facilities to provide a focus for business and community life and most daily and weekly shopping needs of the community.

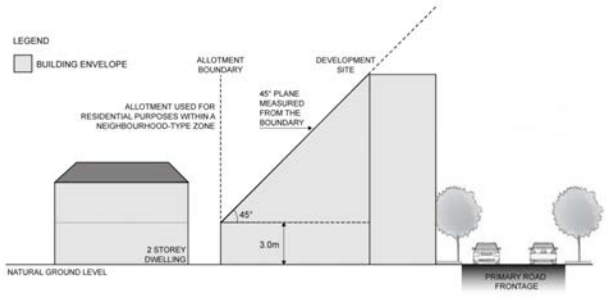
Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the community.	DTS/DPF 1.1 Shop, office or consulting room uses not exceeding a maximum gross leasable floor area of 2000m2 in a single building.

Urban Corridor (Living) Zone

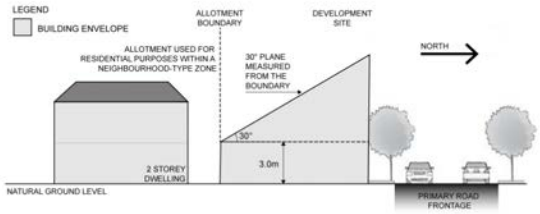
Assessment Provisions (AP)

Desired Outcome (DO)



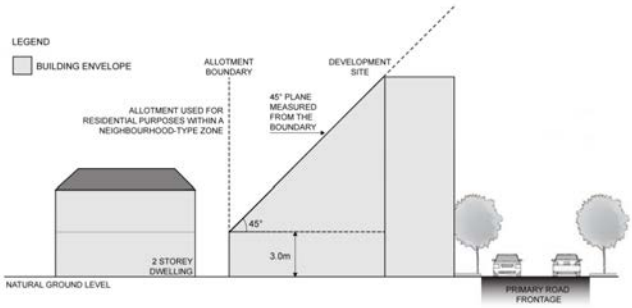
Desired Outcome	
DO 1	A mixed use area with a strong residential focus that provides a diverse range of medium density housing options primarily in multi-level medium rise buildings supported by compatible non-residential land uses oriented towards a primary road corridor (e.g., a State maintained road or a road with similar attributes), high frequency public transport route, activity centre or significant open space.
DO 2	Non-residential activities that enhance convenient day to day living for nearby residents and encourage small group and intimate social gatherings that is contextually appropriate to a compact residential amenity.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria



Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 A vibrant mix of land uses adding to the vitality of the area and extend activities outside shop hours including restaurants, educational, community and cultural facilities and visitor and residential accommodation.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child care facility (c) Co-living (d) Consulting Room (e) Dwelling (f) Educational Facility (g) Office (h) Retirement Facility (i) Shop (j) Student Accommodation (k) Supported Accommodation (l) Tourist Accommodation
PO 1.2 A range of small to medium scale non-residential uses, services and facilities such as shops, offices and consulting rooms that meet the day to day needs for the local community.	DTS/DPF 1.2 Shop, office, or consulting room uses not exceeding a maximum gross leasable floor area of 500m^2.
PO 1.3 Development of diverse medium density accommodation options either as part of a mixed use development or wholly residential development.	DTS/DPF 1.3 None are applicable.
PO 1.4 Changes in the use of land encourage the efficient reuse of premises to support local access to a range of services compatible to the locality.	DTS/DPF 1.4 Provided off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, a change of use involving either of the following: (a) from residential to office or consulting room on the ground or first floor of a building (b) from residential to shop less than 250 m^2 on the ground floor of a building.
Built Form and Character	
PO 2.1 Buildings positively contribute to a continuous framing of the primary road corridor (e.g., a State maintained road or a road with similar attributes) and public realm, and provide visual relief from building scale and massing from the ground level public realm.	DTS/DPF 2.1 Buildings: (a) include a clearly defined podium or street wall with a maximum building height of 2 building levels or 8m in height and (b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.
PO 2.2 Buildings setback from the primary street boundaries are consistent with the established streetscape, except in locations where no setback is desired to achieve a more prominent, strongly defined, and continuous built form presence to the primary street frontage.	DTS/DPF 2.2 Buildings setback from the primary street boundary: (a) not less than: **Minimum Primary Street Setback** Minimum primary street setback is 0m Minimum primary street setback is 2m Minimum primary street setback is 3m Minimum primary street setback is 4m Minimum primary street setback is 6m Or (b) where no value is returned in DTS/DPF 2.2(a), in accordance with the following table: **Development Context** | **Minimum setback** There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building. | The average setback of the existing buildings.

	There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site. — The setback of the existing building. There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site. — (a) Where the existing building shares the same primary street frontage – the setback of the existing building; (b) Where the existing building has a different primary street frontage - no DTS/DPF is applicable In instances where DTS/DPF 2.2 (a) or (b) do not apply, then none are applicable and the relevant development cannot be classified as deemed-to-satisfy. For the purposes of **DTS/DPF 2.2 (a) and (b):** (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table
PO 2.3 Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.	DTS/DPF 2.3 Building walls setback from a secondary street frontage not less than 2m.
PO 2.4 Buildings are: (a) sited on side boundaries for parts of the building located towards the front part of the allotment to achieve a continuity of street façade to the street (b) setback from side boundaries for parts of the building located behind the street facing elements, to enable building separation to provide access to natural ventilation and sunlight.	DTS/DPF 2.4 Building walls with no window/s or balcony/s fronting the boundary, setback from side boundaries in accordance with all of the following: (a) no minimum on the boundary, within the first 18m from the front property boundary for any building level (b) no minimum for remaining length for ground level only (c) 2m or more for 1st level and above for building parts more than 18m from the front property boundary.
PO 2.5 Buildings set back from rear boundaries (other than street boundaries) to: (a) minimise negative impacts on neighbouring properties, including access to natural sunlight and ventilation (b) provide open space recreational opportunities (c) provide space for landscaping and vegetation.	DTS/DPF 2.5 Building walls setback from rear boundaries in accordance with all of the following: (a) 5m or more where the subject land directly abuts an allotment of a different zone (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.
PO 2.6 Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.	DTS/DPF 2.6 Building walls setback from the rear access way: (a) no requirement where the access way is not less than 6.5m wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.
Building Height	
PO 3.1 Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer and the Maximum Building Height (Metres) Technical and Numeric Variation layer* or positively responds to the local context including the site's frontage, depth, and adjacent primary road corridor (e.g., a State maintained road or a road with similar attributes) or street width.	DTS/DPF 3.1 Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s): **Maximum Building Height (Levels)** Maximum building height is 3 levels Maximum building height is 4 levels Maximum building height is 6 levels Maximum building height is 8 levels Maximum building height is 20 levels **Maximum Building Height (Metres)** Maximum building height is 11.5m Maximum building height is 12.5m Maximum building height is 15m Maximum building height is 16.5m Maximum building height is 22m Maximum building height is 24.5m Maximum building height is 29m Maximum building height is 73m In relation to DTS/DPF 3.1, in instances where: (a) more than one value is returned, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer or Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 3.2 Buildings designed to achieve optimal height and floor space yields, and maintain traditional main street form.	DTS/DPF 3.2 New development is not less that the following building height: **Minimum Building Height (Levels)** Minimum building height is 1 level Minimum building height is 2 levels Minimum building height is 3 levels In relation to DTS/DPF 3.2, in instances where: (a) more than one value is returned, refer to the *Minimum Building Height (Levels) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) no value is returned (i.e. there is a blank field), then there is no minimum building height and DTS/DPF 3.2 is met.
Interface Height	
PO 4.1 Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.	DTS/DPF 4.1 **Interface Height** Buildings constructed within a building envelope provided by a: (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):



Interface Height

(b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

	Interface Height 
PO 4.2 Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 4.2 None are applicable.
Significant Development Sites	
PO 5.1 Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, retirement facility and supported accommodation provision, or sustainability features.	DTS/DPF 5.1 Development on significant development sites up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it satisfies (a), (b), (c) or (d): (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area (b) includes more than 15% of dwellings as affordable housing (c) is for the purpose of a retirement facility or supported accommodation (d) includes at least: (i) three of the following: A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site C. active uses are located on the public street frontages of the building, with any above ground car parking located behind D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments E. a child care centre. and (ii) three of the following: A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance; B. living landscaped vertical surfaces of at least 50m^2 supported by services that ensure ongoing maintenance; C. passive heating and cooling design elements including solar shading integrated into the building; D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.
PO 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 2500m^2 in area, which may include one or more allotments) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.	DTS/DPF 5.2 Development that satisfies all of the following: (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 4.1 (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes) (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).
Movement, parking and access	
PO 6.1 Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.	DTS/DPF 6.1 Vehicular access to be provided: (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or (b) where it consolidates or replaces existing crossovers.
PO 6.2 Development is designed to ensure car parking is located avoid negative impacts on the primary street frontage streetscape.	DTS/DPF 6.2 Vehicle parking garages located behind buildings away from the primary main street frontage.
Advertisements	
PO 7.1 Freestanding advertisements identify the associated business without creating a visually dominant element within the streetscape.	DTS/DPF 7.1 Freestanding advertisements: (a) do not exceed 6m in height above natural ground level and (b) do not have a face that exceeds 4m^2 per side.
Concept Plans	
PO 8.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 8.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 24 - Glenside Concept Plan 110 - Forestville In relation to DTS/DPF 8.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1 metres in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1 m in height within 6 m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.

Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7. Building height - does not exceed 5m 8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour 14. Does not involve the clearance of native vegetation.
Outbuilding Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads). 6. Total floor area - does not exceed 40m^2. 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end). 8. Building height - does not exceed 5m. 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 10. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%. 11. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure. 12. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 13. If clad in sheet metal is pre-colour treated or painted in a non-reflective colour. 14. Does not involve- (a) excavation exceeding a vertical height of 1 metre; or (b) filling exceeding a vertical height of 1 metre, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2 metres. 15. Does not involve the clearance of native vegetation. 16. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail - does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.

Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted. 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 6. Location of pumps and/or filtration systems from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid acoustic structure; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation. 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site. 4. Primary street setback - as far back as the building line of the building to which it is ancillary. 5. Total floor area - does not exceed 40m^2. 6. Post height - does not exceed 3m measured from natural ground level. 7. Building height - does not exceed 5m. 8. Length - does not exceed 11m if any part of the structure abuts or is situated on a boundary of the allotment. 9. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%. 10. Does not involve the clearance of native vegetation.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. The tank is part of a roof drainage system. 4. Total floor area - not exceeding 15m^2. 5. The tank is located wholly above ground. 6. Tank height - does not exceed 4m above natural ground level. 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour. 9. Does not involve the clearance of native vegetation.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry
Residential flat building	Any of the following: (a) residential flat building not located within the Concept Plan Boundary of Concept Plan 24 – Glenside (b) residential flat building that: (i) is located within the Concept Plan Boundary of Concept Plan 24 – Glenside and (ii) does not exceed 20 building levels or 73m in building height
Shop	Any of the following: (a) shop with a gross leasable floor area less than or equal to 1000m^2 (b) shop within the Urban Corridor Living Retail Subzone (c) shop that is a Restaurant

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) co-living (d) dwelling (e) residential flat building (f) student accommodation (g) supported accommodation.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Living) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Living) DTS/DPF 4.1 or 3. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Living) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Living) DTS/DPF 1.2

	or 3. does not satisfy Urban Corridor (Living) DTS/DPF 4.1 or 4. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) tree damaging activity (p) verandah (q) water tank.	None specified.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Urban Corridor Living Retail Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

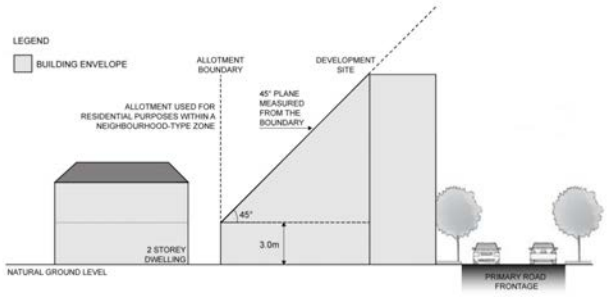
Desired Outcome	
DO1	Additional neighbourhood-scale shopping, business, entertainment and recreation facilities to provide a focus for business and community life and most daily and weekly shopping needs of the community.

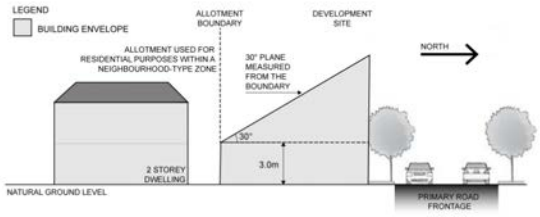
Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

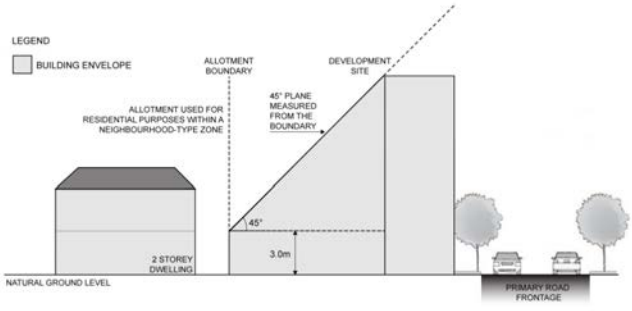
Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the community as part of a mixed use development.	DTS/DPF 1.1 Shops, offices or consulting room uses exceeding a maximum gross leasable floor area of 500m^2 where integrated with residential development and comprise a range of tenancies.

Urban Corridor (Main Street) Zone

Assessment Provisions (AP)







Desired Outcome (DO)

Desired Outcome	
DO 1	A safe, walkable and vibrant shopping, entertainment and commercial main street precinct with an active day and evening economy supported by medium density residential development.
DO 2	Built form positively contributing to: (a) a streetscape that is visually interesting at human-scale comprising articulated buildings with a high level of fenestration and balconies oriented towards the street (b) a fine-grain public realm comprising buildings with active frontages that are designed to reinforce the street rhythm, that consider the facades, articulation and massing of existing buildings and any spaces between them, and provide narrow tenancy footprints at ground level.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 A vibrant mix of land uses adding to the vitality of the area and extending activities outside shop hours including restaurants, educational, community and cultural facilities and visitor and residential accommodation.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Child Care Facility (c) Co-living (d) Consulting Room (e) Dwelling (f) Hotel (g) Educational Facility (h) Licensed Premises (i) Office (j) Residential Flat Building (k) Retirement Facility (l) Shop (m) Student Accommodation (n) Supported Accommodation (o) Tourist Accommodation
PO 1.2 Retail, office, entertainment and recreation related uses that provide a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.2 None are applicable.
PO 1.3 Ground floor uses contribute to a safe, active and vibrant main street.	DTS/DPF 1.3 Shop, office, or consulting room uses located on the ground floor level of buildings fronting the primary street frontage.

PO 1.4 Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities that contribute to making the main street locality and pedestrian thoroughfares safe, walkable, comfortable, pleasant and vibrant places.	DTS/DPF 1.4 Dwellings developed in conjunction with non-residential uses, and sited: (a) at upper levels of buildings with non-residential uses located at ground level or (b) behind non-residential uses on the same allotment.
PO 1.5 Development of diverse medium density accommodation options either as part of a mixed use development or wholly residential development.	DTS/DPF 1.5 None are applicable.
PO 1.6 Land uses promote movement and activity during daylight and evening hours, including restaurants, educational, health, community and cultural facilities, and visitor and residential accommodation.	DTS/DPF 1.6 None are applicable.
PO 1.7 Changes in the use of land encourage the efficient reuse of commercial premises to maintain and enhance vibrancy within activity centres.	DTS/DPF 1.7 A change of use to a shop, office, consulting room or any combination of these uses where all of the following are achieved: (a) the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses; (b) if the proposed change of use is for a shop that primarily involves the handling and sale of foodstuffs, areas used for the storage and collection of refuse are sited at least 10 metres from the site of a dwelling (other than a dwelling directly associated with the proposed shop) (c) if the proposed change of use is for a shop that primarily involves heating and cooking of foodstuffs in a commercial kitchen and is within 30 metres of any neighbourhood-type zone boundary or a dwelling (other than a dwelling directly associated with the proposed shop), an exhaust duct and stack (chimney) exists or is capable of being installed for discharging exhaust emissions (d) if the change in use involves a gross leasable floor area greater than 250m^2 and has direct frontage to an arterial road, it achieves either (i) or (ii): (i) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) is from a road that is not an arterial road (ii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared (e) off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, except in any of the following circumstances: (i) the building is a local heritage place (ii) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made); or (iii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Built Form and Character	
PO 2.1 Buildings sensitively frame the main street and public spaces, provide overall visual relief from building height and mass, and maintain a human scale for pedestrians.	DTS/DPF 2.1 Buildings: (a) include a clearly defined podium or street wall with a maximum building height of 2 building levels or 8m, or higher where it matches the existing street wall of adjoining buildings and (b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.
PO 2.2 Buildings and structures designed to complement and respond to the established fine-grained main street character by: (a) ensuring the verandah profile and materials of construction are consistent with and positively respond to adjacent traditional main street buildings (b) complementing the traditional shop-front elements, such as narrow buildings and tenancy footprints, with frequently repeated frontages, and clear-glazed narrow shop front displays above raised display levels [base stall boards] and recessed entries.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings designed to create visual connection between the public realm and ground level interior, to ensure an active interface with the main street and maximise passive surveillance.	DTS/DPF 2.3 The ground floor primary frontage of buildings provides at least 60% of the street frontage as an entry / foyer or display window to a shop or other community or commercial use that provides pedestrian interest and activation.
PO 2.4 Buildings provide a high amenity pedestrian environment by providing shelter and shade over footpaths.	DTS/DPF 2.4 Buildings that provide a continuity of verandahs, canopies, awnings or other pedestrian shelters to contribute to pedestrian comfort.
PO 2.5 Buildings are adaptable and flexible to accommodate a range of residential and non-residential land uses on the ground floor.	DTS/DPF 2.5 The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.
PO 2.6 Buildings sited on the primary street boundary to achieve a continuity of built form frontage to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate but vibrant spaces.	DTS/DPF 2.6 Buildings with a 0m setback from the primary street boundary, with the exception of minor setbacks to accommodate outdoor dining areas.
PO 2.7 Buildings with no setback from the secondary street boundary to contribute to a consistent established streetscape.	DTS/DPF 2.7 Buildings with a 0m setback from the secondary street boundary.
PO 2.8 Buildings with no side boundaries setback to achieve a continuity of street façade to the main street.	DTS/DPF 2.8 Buildings with a 0m setback from the side boundary.
PO 2.9 Buildings set back from rear boundaries (other than street boundaries) to minimise negative impacts on neighbouring properties, including access to natural sunlight and ventilation.	DTS/DPF 2.9 Buildings setback from rear boundaries as follows: (a) 5m or more where the subject land directly abuts an allotment of a different zone or (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.
PO 2.10 Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.	DTS/DPF 2.10 Buildings setback from the rear access way: (a) no requirement where the access way is not less than 6.5m wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.
Building Height	
PO 3.1 Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer* and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or positively responds to the local context including the site's frontage, depth, and adjacent primary road corridor (e.g., a State maintained road or a road with similar attributes) or street width.	DTS/DPF 3.1 Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s): **Maximum Building Height (Levels)** Maximum building height is 2 levels Maximum building height is 3 levels Maximum building height is 4 levels Maximum building height is 5 levels Maximum building height is 6 levels Maximum building height is 7 levels **Maximum Building Height (Metres)** Maximum building height is 8m Maximum building height is 11.5m Maximum building height is 12.5m Maximum building height is 15m Maximum building height is 16.5m Maximum building height is 18m Maximum building height is 18.5m Maximum building height is 22m Maximum building height is 24.5m Maximum building height is 25.5m In relation to DTS/DPF 3.1, in instances where: (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer* or *Maximum Building Height (Metres) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the

	proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 3.2 Buildings designed to achieve optimal height and floor space yields, and maintain traditional main street form.	DTS/DPF 3.2 New development is not less that the following building height: **Minimum Building Height (Levels)** Minimum building height is 2 levels Minimum building height is 3 levels In relation to DTS/DPF 3.2, in instances where: (a) more than one value is returned in the same field, refer to the *Minimum Building Height (Levels) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) no value is returned (i.e. there is a blank field), then there is no minimum building height and DTS/DPF 3.2 is met.
Interface Height	
PO 4.1 Buildings mitigate impacts of building massing on residential development within a neighbourhood-type zone.	DTS/DPF 4.1 **Interface Height** Buildings constructed within a building envelope provided by a: (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):  (b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):  Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):  Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

	Interface Height 
PO 4.2 Buildings on an allotment fronting a road that is not the primary road corridor (e.g., a State maintained road or a road with similar attributes) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.	DTS/DPF 4.2 None are applicable.
Significant Development Sites	
PO 5.1 Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m^2 in area, which may include one or more allotments) to achieve increased development yield, provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, retirement facility or supported accommodation provision, or sustainability features.	DTS/DPF 5.1 Development on significant development sites (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m^2 in area, which may include one or more allotments) up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it satisfies (a), (b), (c) or (d): (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area (b) includes more than 15% of dwellings as affordable housing (c) is for the purposes of supported accommodation or retirement facility (d) includes at least: (i) three of the following: A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site C. active uses are located on the public street frontages of the building, with any above ground car parking located behind D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments; E. a child care centre. and (ii) three of the following: A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance; B. living landscaped vertical surfaces of at least 50m2 supported by services that ensure ongoing maintenance C. passive heating and cooling design elements including solar shading integrated into the building D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.
PO 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m^2 in area, which may include one or more allotments) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.	DTS/DPF 5.2 Development on a significant development site (a site with a frontage over 25m to a primary road corridor (e.g., a State maintained road or a road with similar attributes) and over 1500m^2 in area, which may include one or more allotments) that satisfies all of the following: (a) is constructed within the zone's Interface Building Height provision as specified DTS/DPF 4.1 (b) locates non-residential activities and higher density elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes) (c) locates taller building elements towards the primary road corridor (e.g., a State maintained road or a road with similar attributes).
Movement, parking and access	
PO 6.1 Development does not result in additional crossovers on the main street, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.	DTS/DPF 6.1 Vehicular access to be provided: (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or (b) where it consolidates or replaces existing crossovers.
PO 6.2 Development is designed to ensure car parking is located to avoid negative impacts on the main street rhythm and activation.	DTS/DPF 6.2 Vehicle parking garages located behind buildings away from the primary main street frontage.
Advertisements	
PO 7.1 Advertisements are sited and designed to achieve an overall consistency of appearance along individual street frontages.	DTS/DPF 7.1 None are applicable.
PO 7.2 Freestanding advertisements: (a) identify the associated business(es) (b) are of a size that is commensurate with the scale of the centre and the street frontage (c) avoid visual clutter (d) positively respond to the context without dominating the locality (e) are sited and designed to not detract from the main street character.	DTS/DPF 7.2 Freestanding advertisements: (a) do not exceed 8m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser) and (b) do not have a sign face that exceeds 6m^2 per side.
Concept Plans	
PO 8.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 8.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: In relation to DTS/DPF 8.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Building alterations Except where any of the following apply:	1. The alteration does not:

• Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	(a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Consulting room Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Office Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 11. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 12. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.
Shop Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	A change of use to a shop (except where it involves handling and sale of foodstuffs, the heating and cooking of foodstuffs in a commercial kitchen, or a restaurant), office, consulting room or any combination of these uses where all of the following are achieved: 1. the area to be occupied by the proposed development is located in an existing building and is currently used as a shop, office, consulting room or any combination of these uses 2. if the change in use involves a gross leasable floor area greater than 250m2 and has direct frontage to an arterial road, it achieves: (a) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road or (b) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared 3. off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1 to the nearest whole number, except where: (a) the building is a local heritage place or (b) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made) or (c) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to a system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.

Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation 4. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 5. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development **(Column A)**	**Exceptions** **(Column B)**
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) co-living (c) dwelling (d) office (e) residential flat building (f) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Corridor (Main Street) DTS/DPF 3.1 or 2. does not satisfy Urban Corridor (Main Street) DTS/DPF 4.1 or 3. involves the construction of a building of 4 or more building levels and the site of the development is: (a) adjacent land to a neighbourhood-type zone and (b) adjoins an allotment containing an existing low-rise building used for residential purposes.
4. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) tree damaging activity (p) verandah (q) water tank.	None specified.
5. Any development involving any of the following (or of any combination of any of the following) within the Tunnel Protection Overlay: (a) storage of materials, equipment or vehicles (whether temporary or permanent) over an area exceeding 100 square metres (b) temporary stockpiling of soil, gravel, rock or other natural material over an area exceeding 100 square metres (c) excavation or ground intruding activity at a depth greater than 2.5 metres below the regulated surface level.	Except where not undertaken by the Crown, a Council or an essential infrastructure provider.
6. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
7. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Urban Neighbourhood Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A mixed use area that: (a) provides a flexible policy framework for the redevelopment of urban areas in close proximity to high frequency public transport corridors or adjacent primary road corridors that have the potential to become activity generators (b) provides for the high-quality design and integration of buildings and public realm in mixed use areas with walkable urban form, excellent provision for walking and cycling and active street frontages that encourage social interaction, positively contribute to public safety and vibrancy and promote active movement and public transport use (c) provides a concentration of mixed use activity close to community focal points, such as a high frequency fixed transit stop, activity centre or high quality open space (d) provides adaptable and flexible buildings that can accommodate changes in land use and respond to changing economic and social conditions and advances in technology (e) transitions to a reduced scale and intensity at the zone boundary to maintain the amenity of residential properties located within adjoining zones.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development of medium and high density accommodation types for living, including dwellings, supported accommodation, student accommodation, short term accommodation, either as part of a mixed use development or wholly residential development.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Carport (c) Child Care Facility (d) Co-living (e) Consulting Room (f) Dwelling (g) Educational Facility (h) Hotel (i) Licensed Premises (j) Light Industry (k) Office (l) Outbuilding (m) Residential Flat Building (n) Retirement Facility (o) Shop (p) Student Accommodation (q) Supported Accommodation (r) Tourist Accommodation
PO 1.2 Development of diverse medium density accommodation, and high density accommodation in specified locations (locations where 7 or more building levels is envisaged), either as part of a mixed use development or wholly residential development.	DTS/DPF 1.2 None are applicable.
PO 1.3 Light industrial and commercial uses (including high technology and research based activity) where compatible with adjoining uses.	DTS/DPF 1.3 None are applicable.
PO 1.4 Co-locate close to public transport land uses that generate high levels of pedestrian activity, encourage public transport use and provide opportunities for multi-purpose trips.	DTS/DPF 1.4 None are applicable.
PO 1.5 In clusters of non-residential development, provide high-quality, inclusive and integrated public realm, including open spaces, sport and recreation facilities, and places that serve as hubs for communal activity.	DTS/DPF 1.5 None are applicable.
PO 1.6 Shops, offices and consulting rooms services and facilities to meet the needs of the local community.	DTS/DPF 1.6 Except where a Main Street Subzone or Urban Neighbourhood Retail Subzone applies, shops, offices or consulting room uses not exceeding a maximum gross leasable floor area of 500m^2 for individual tenancies and 1000m^2 in a single building.
PO 1.7 Larger scale shops, offices, and consulting rooms primarily clustered together to provide a focus for services and facilities.	DTS/DPF 1.7 None are applicable.
Built Form and Character	
PO 2.1 Development positively contributes to creating activity nodes around high-frequency public transport stops/stations and multi-modal transport interchanges, encourages public transport use and positively contributes to a fine-grain streetscape that provides a safe, comfortable, vibrant and walkable public realm at ground level.	DTS/DPF 2.1 None are applicable.
PO 2.2 Building height is consistent with the form expressed in the *Maximum Building Height (Levels) Technical and Numeric Variation layer* and the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or positively responds to the local context including the site's frontage, depth, and adjacent primary street width.	DTS/DPF 2.2 Except where a Concept Plan specifies otherwise, development does not exceed the following building height(s): **Maximum Building Height (Levels)** Maximum building height is 3 levels Maximum building height is 4 levels Maximum building height is 5 levels Maximum building height is 6 levels Maximum building height is 8 levels Maximum building height is 10 levels Maximum building height is 12 levels Maximum building height is 15 levels **Maximum Building Height (Metres)** Maximum building height is 12m Maximum building height is 12.5m Maximum building height is 13.5m Maximum building height is 15m Maximum building height is 16.5m Maximum building height is 18.5m Maximum building height is 24.5m Maximum building height is 32.5m Maximum building height is 43m Maximum building height is 20.5m Maximum building height is 28.5m Maximum building height is 40.5m Maximum building height is 48.5m In relation to DTS/DPF 2.2, in instances where: (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer* or *Maximum Building Height (Metres) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.
PO 2.3 Buildings are designed to be adaptable and flexible to suit a range of land uses, including retail, office and residential, without the need for significant change to the building.	DTS/DPF 2.3 The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.
PO 2.4 Buildings designed to create visual connection between the public realm and ground level interior, promote an active human-scale interface with the primary road / public transport corridor and open space and maximise passive surveillance.	DTS/DPF 2.4 Not less than 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.
PO 2.5	DTS/DPF 2.5

Buildings set back from the primary street boundaries consistent with the existing/emerging streetscape.

Buildings setback from the primary street boundary in accordance with the following table:

Development Context	Minimum setback
There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building.	The average setback of the existing buildings.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site.	The setback of the existing building.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site.	(a) Where the existing building shares the same primary street frontage – the setback of the existing building (b) Where the existing building has a different primary street frontage – 0m
There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building.	0m

For the purposes of **DTS/DPF 2.5:**

(a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback

(b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table

PO 2.6

Buildings set back from secondary street boundaries in a manner compatible with the emerging streetscape pattern.

DTS/DPF 2.6

Building walls setback from the secondary street frontage in accordance with either of the following:

(a) no minimum where adjoining allotments are vacant
or
(b) the average of the setback of the existing building on each adjoining site fronting the same street.

PO 2.7

Buildings set back from rear boundaries (other than street boundaries) to:

(a) minimise impacts on properties in neighbouring zones
(b) maximise intensity of development within the zone.

DTS/DPF 2.7

Building walls setback from the rear boundaries as follows:

(a) 5m or more where the subject land directly abuts an allotment of a different zone
or
(b) 0 metres in all other cases.

PO 2.8

Buildings set back from side boundaries (other than street boundaries) to:

(a) reduce impacts of building bulk on adjoining properties
(b) provide adequate direct sun and ventilation to the building and open spaces
(c) minimise the extent of overlooking and resultant loss of privacy on adjoining properties
(d) minimise the extent of overshadowing on adjoining properties.

DTS/DPF 2.8

Building walls setback from the side boundaries the average of the setback of the existing building on each adjoining site fronting the same street.

PO 2.9

Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.

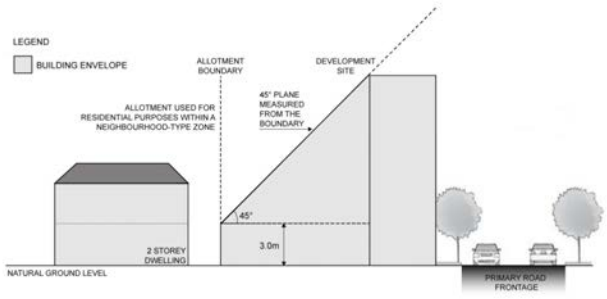
DTS/DPF 2.9

Building walls setback from the rear access way:

(a) no requirement where the access way is not less than 6.5m wide
or
(b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

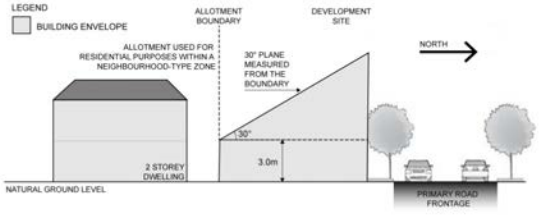
Interface Height

PO 3.1



Buildings mitigate visual impacts of building massing on residential development within a neighbourhood-type zone.

DTS/DPF 3.1



Interface Height

Buildings constructed within a building envelope provided by a:

(a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):

(b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary):

Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street

	Interface Height boundary): 
PO 3.2 Development that manages the interface with a low-rise neighbourhood-type zone by incorporating less dense, low-rise residential land uses at the interface, and avoiding land uses or intensity of land uses that adversely affect residential amenity.	DTS/DPF 3.2 None are applicable.
Site Dimensions and Land Division	
PO 4.1 Where appropriate, a street grid pattern is provided in mixed use areas to maintain clear sightlines, improve public safety and legibility within the public realm, and ensure walkability and connectivity are maximised.	DTS/DPF 4.1 None are applicable.
Movement, parking and access	
PO 5.1 Where practicable, buildings provide vehicle access via a side street or rear lane access way that is designed to: (a) provide space between buildings that reduces building mass and creates a more visually diverse public realm (b) minimises conflicts with pedestrians and cyclists (c) achieve active frontages at a lower intensity than the primary street frontage.	DTS/DPF 5.1 Vehicular access to be provided: (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or (b) where it consolidates or replaces existing crossovers.
Concept Plans	
PO 6.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code.	DTS/DPF 6.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 5 - Bowden Urban Village Concept Plan 34 - Bowden-Brompton Concept Plan 3 - Mount Barker and Littlehampton Concept Plan 81 - Edinburgh Defence Airfield Lighting Constraints Concept Plan 89 - Tonsley Concept Plan 86 - Edwardstown Concept Plan 94 - Old Reynella Concept Plan 112 - West Lakes Concept Plan 111 - St Clair Concept Plan 109 - Seaton Concept Plan 115 - Morphetteville Concept Plan 152 - Brompton Gasworks Concept Plan 175 - Smithfield Regeneration In relation to DTS/DPF 6.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 6.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing building 2. The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. Shade sail consists of permeable material. 4. The total area of the sail does not exceed 40m^2. 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment. 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m.

	8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation. 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 11. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 12. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof. 3. Panels and associated components do not overhang any part of the roof. 4. Does not apply to a system with a generating capacity of more than 5MW that is to be connected to the State's power system. 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted. 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 6. Location of pumps and/or filtration systems from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid acoustic structure; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation. 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 9. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 10. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation 4. It does not involve filling of land more than 1m above the regulated surface level where located within the Tunnel Protection Overlay 5. It does not involve excavation or ground intruding activity more than 2.5m below the regulated surface level where located within the Tunnel Protection Overlay.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Dwelling	Any of the following: (a) dwelling not located within the suburb of Forestville (b) dwelling that: (i) is located within the suburb of Forestville and (ii) does not exceed 4 building levels or 15m in building height
Industry	Light industry
Residential flat building	Any of the following: (a) residential flat building not located within the suburb of Forestville (b) residential flat building that: (i) is located within the suburb of Forestville and (ii) does not exceed 4 building levels or 15m in building height
Shop	Any of the following: (a) shop located in the Main Street Subzone (b) shop located in the Urban Neighbourhood Retail Subzone (c) shop with a gross leasable floor area less than 2000m^2 that is not within the suburb of Forestville (d) shop that is a restaurant that is not within the suburb of Forestville (e) shop that is: (i) located within the suburb of Forestville and (ii) satisfies all of the following: A. it does not exceed 4 building levels or 15m in building height B. has a gross leasable floor area less than 2000m^2 or is a restaurant.
Student Accommodation	Any of the following: (a) student accommodation not located within the suburb of Forestville (b) student accommodation that: (i) is located within the suburb of Forestville and (ii) does not exceed 4 building levels or 15m in building height
Tourist accommodation	Any of the following: (a) tourist accommodation not located within the suburb of Forestville (b) tourist accommodation that: (i) is located within the suburb of Forestville and (ii) does not exceed 4 building levels or 15m in building height

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is **not** adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) child care facility (c) co-living (d) dwelling (e) dwelling addition (f) residential flat building (g) retirement facility (h) student accommodation (i) supported accommodation (j) tourist accommodation.	Except development that exceeds the maximum building height specified in Urban Neighbourhood DTS/DPF 2.2 or does not satisfy Urban Neighbourhood DTS/DPF 3.1.
4. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that exceeds the maximum building height specified in Urban Neighbourhood DTS/DPF 2.2 or does not satisfy any of the following: 1. Urban Neighbourhood DTS/DPF 1.6 2. Urban Neighbourhood DTS/DPF 3.1.
5. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) replacement building (k) retaining wall (l) shade sail (m) solar photovoltaic panels (roof mounted) (n) swimming pool or spa pool and associated swimming pool safety features (o) temporary accommodation in an area affected by bushfire (p) tree damaging activity (q) verandah (r) water tank.	None specified.
6. Any development involving any of the following (or of any combination of any of the following) within the Tunnel Protection Overlay: (a) storage of materials, equipment or vehicles (whether temporary or permanent) over an area exceeding 100 square metres (b) temporary stockpiling of soil, gravel, rock or other natural material over an area exceeding 100 square metres (c) excavation or ground intruding activity at a depth greater than 2.5 metres below the regulated surface level.	Except where not undertaken by the Crown, a Council or an essential infrastructure provider.
7. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
8. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified.	
Placement of Notices - Exemptions for Restricted Development	
None specified.	

Main Street Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A shopping, entertainment and commercial main street supported by medium to high density residential development.
DO 2	A fine-grained public realm with safe, walkable and vibrant streets created by mixed use buildings with non-residential uses at ground level and a visually consistent street rhythm informed by local context and narrow tenancy footprints.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.1 None are applicable
PO 1.2 Land uses promote movement and activity during daytime and evening hours, including shops, restaurants, small scale licensed premises, educational, community and cultural facilities, and visitor and residential accommodation.	DTS/DPF 1.2 None are applicable.
PO 1.3 Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities and positively contribute to making the main street locality and pedestrian thoroughfares safe, walkable, comfortable, pleasant and lively places.	DTS/DPF 1.3 Dwellings developed in conjunction with non-residential uses sited: (a) at upper levels of buildings with non-residential uses located at ground level or (b) behind non-residential uses on the same allotment.
PO 1.4 Development of well-designed diverse medium to high density accommodation options, including dwellings, supported accommodation, student accommodation, and short term accommodation, either as part of a mixed use development or wholly residential development.	DTS/DPF 1.4 None are applicable.

Built Form and Character	
PO 2.1 Ground level uses contribute to a safe, walkable and vibrant main street.	DTS/DPF 2.1 Shop, office, or consulting room uses located on the ground floor level of buildings.
PO 2.2 Buildings designed to create visual connection between the public realm and ground level interior, positively contribute to passive surveillance of the public realm, have an active interface with the main street and contribute to the fine-grain character and retail function of the street.	DTS/DPF 2.2 The ground floor primary frontage of buildings provides at least 60% of the street frontage as an entry / foyer or display window to a shop or other community or commercial use that provides pedestrian interest and activation.
PO 2.3 Buildings are adaptable and flexible to suit a range of residential and non-residential land uses.	DTS/DPF 2.3 The ground floor of buildings contains a minimum floor to ceiling height of 3.5m.
PO 2.4 Buildings with no set-backs from the main street boundary to achieve a continuity of built form frontage to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate but vibrant spaces.	DTS/DPF 2.4 None are applicable.
PO 2.5 Vehicle parking and ancillary buildings and structures (including garages, carports and outbuildings) located behind buildings away from the primary main street frontage and designed to minimise negative impacts on the main street rhythm and activation.	DTS/DPF 2.5 None are applicable.

Urban Neighbourhood Retail Subzone

Assessment Provisions (AP)

Desired Outcomes (DO)

Desired Outcome	
DO 1	Additional neighbourhood-scale shopping, business, entertainment and recreation facilities to provide a focus for business and community life and most daily and weekly shopping needs of the community.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the community.	DTS/DPF 1.1 Shops not exceeding a maximum gross leasable floor area of: (a) 5500m^2 within the whole subzone area in West Lakes (b) 2000m^2 within the whole subzone area in Bedford Park (Laffer's Triangle).

Urban Renewal Neighbourhood Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Housing and other land uses which no longer meet community preferences are replaced with new diverse housing options. Housing density increases, taking advantage of well-located urban land. Employment and community services will improve access to jobs, goods and services without compromising residential amenity.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Predominantly residential development with complementary non-residential uses that support an active, convenient, and walkable urban neighbourhood.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Ancillary accommodation (b) Child care facility (c) Co-living (d) Community facility (e) Consulting room (f) Dwelling (g) Educational facility (h) Office (i) Place of Worship (j) Recreation area (k) Residential flat building (l) Retirement facility (m) Shop (n) Student accommodation (o) Supported accommodation.
PO 1.2 Commercial activities improve community access to services are of a scale and type to maintain residential amenity.	DTS/DPF 1.2 A shop, consulting room or office (or any combination thereof) satisfies (a) or (b): (a) it is located on the same allotment and in conjunction with a dwelling where all the following are satisfied: (i) does not exceed 50m^2 gross leasable floor area (ii) does not involve the display of goods in a window or about the dwelling or its curtilage (b) where located outside of an Activity Centre, does not exceed 250m^2 in gross leasable floor area.
PO 1.3 Non-residential development located and designed to improve community accessibility to services, primarily in the form of: (a) small-scale commercial uses such as offices, shops and consulting rooms (b) community services such as educational facilities, community centres, places of worship, child care facilities and other health and welfare services (c) services and facilities ancillary to the function or operation of supported accommodation or retirement facilities (d) open space and recreation facilities.	DTS/DPF 1.3 None are applicable.
PO 1.4 Expansion of existing community services such as educational facilities, community facilities and child care facilities in a manner which complements the scale of development envisaged by the desired outcome for the neighbourhood.	DTS/DPF 1.4 Alteration of or addition to existing educational facilities, community facilities or child care facilities satisfy all of the following: (a) set back at least 3m from any boundary shared with a residential land use (b) building height not exceeding 1 building level (c) the total floor area of the building does not exceed 150% of the total floor area prior to the addition/alteration (d) development satisfies Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
PO 1.5 Non-residential development sited and designed to complement the residential character and amenity of the neighbourhood.	DTS/DPF 1.5 None are applicable.
Building Height	
PO 2.1 Buildings generally 2-3 levels with taller buildings located on sites that are a suitable size and dimension to manage massing and impacts on adjoining residential development.	DTS/DPF 2.1 Building height (excluding garages, carports and outbuildings) is no greater than: (a) the following:

	Maximum Building Height (Metres)
	Maximum building height is 7m
	Maximum building height is 8m
	Maximum building height is 8.5m
	Maximum building height is 9m
	Maximum building height is 11.5m
	Maximum building height is 12.5m
	Maximum building height is 14m
	Maximum building height is 15m
	Maximum building height is 16.5m
	Maximum building height is 18.5m
	Maximum building height is 22m
	Maximum building height is 28m
	Maximum building height is 32.5m
	Maximum building height is 10.5m
	Maximum building height is 20.5m
	Maximum building height is 35m
	Maximum Building Height (Levels)
	Maximum building height is 2 levels
	Maximum building height is 3 levels
	Maximum building height is 4 levels
	Maximum building height is 5 levels
	Maximum building height is 6 levels
	Maximum building height is 8 levels
	Maximum building height is 9 levels
	Maximum building height is 10 levels
	(b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)): (i) 4 building levels and 15m where the site: A. is at least 1200m^2 in area and B. has a frontage of 35 metres or (ii) 3 building levels and 12m in all other circumstances. In relation to DTS/DPF 2.1, in instances where: (c) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer and Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development (d) only one value is returned for DTS/DPF 2.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.
PO 2.2 Buildings on an allotment at the interface with a different neighbourhood-type zone are sited and designed to provide an orderly transition to the built form scale envisaged in that zone to mitigate impacts on adjacent residential uses.	DTS/DPF 2.2 None are applicable.
Primary Street Setback	
PO 3.1 Buildings are set back from primary street boundaries to contribute to the existing/emerging pattern of street setbacks in the streetscape and integrate development with public open space.	DTS/DPF 3.1 Buildings setback from the primary street boundary in accordance with the following table: **Development Context** — **Minimum setback** Where the allotment adjoins a public reserve greater than 2000m² (including where the allotment would adjoin a reserve if not separated by a public road), the dwelling faces that reserve and access is provided to the rear of the allotment. — 1.5m In all other cases. — 3m For the purposes of **DTS/DPF 3.1:** (a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback (b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table
Secondary Street Setback	
PO 4.1 Buildings are set back from secondary street boundaries to achieve a pattern of separation between building walls and public streets and reinforce a streetscape character.	DTS/DPF 4.1 Building walls are set back at least 900mm from the boundary of the allotment with the secondary street frontage.
Boundary Walls	
PO 5.1 Walls on boundaries are limited in height and length to manage visual and overshadowing impacts on adjoining properties.	DTS/DPF 5.1 Except where the building is a dwelling and is located on a central site within a row dwelling or terrace arrangement, side boundary walls occur only on one side boundary and satisfy (a) or (b) below: (a) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same or lesser length and height (b) side boundary walls do not: (i) exceed 3m in wall height (ii) exceed 11.5 metres in length (iii) when combined with other walls on the boundary of the subject development site, exceed a maximum 45% of the length of the boundary (iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land
PO 5.2 Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.	DTS/DPF 5.2 Dwelling walls in a semi-detached, row or terrace arrangement are setback at least 900mm from side boundaries shared with allotments outside the development site.
Side Boundary Setback	
PO 6.1 Buildings are set back from side boundaries to provide: (a) separation between buildings to minimise visual impact (b) access to natural light and ventilation for neighbours.	DTS/DPF 6.1 Building walls not sited on side boundaries are set back from side boundaries in accordance with the following: (a) where the wall height does not exceed 3m - at least 900mm (b) where the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings.
Rear Boundary Setback	
PO 7.1 Buildings are set back from rear boundaries to provide: (a) separation between buildings to minimise visual impact (b) access to natural light and ventilation for neighbours (c) open space recreational opportunities (d) space for landscaping and vegetation.	DTS/DPF 7.1 Building walls are set back from the rear boundary at least: (a) 3m for the first building level or 0m where the rear boundary abuts a laneway (b) 5m for any second building level (c) 5m plus any increase in wall height over 7m for buildings of 3 building levels and above.
Site Dimensions and Land Division	
PO 8.1 Allotments/sites created for residential purposes accommodate a diverse range of medium density housing.	DTS/DPF8.1 Development will not result in more than 1 dwelling on an existing allotment or Allotments/sites for residential purposes achieve a net density of up to 70 dwellings per hectare.
PO 8.2 High density residential development located on sites of a suitable size and dimension to achieve a high standard of amenity for occupants and neighbours.	DTS/DPF 8.2 Development with a net residential density over 70 dwellings per hectare on sites with a minimum area of 1200m^2 and minimum frontage width of 35m.
Concept Plans	

PO 9.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.

DTS/DPF 9.1

The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:

Description
Concept Plan 4 - Minda Incorporated Brighton Campus - North Brighton
Concept Plan 89 - Tonsley
Concept Plan 97 - Underdale
Concept Plan 116 - Everard Park
Concept Plan 127 - Kidman Park
Concept Plan 141 - West Lakes
Concept Plan 121 - Kilkenny
Concept Plan 148 - Lockleys
Concept Plan 174 - Seaton Urban Renewal

In relation to DTS/DPF 9.1, in instances where:

(a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant.
(b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 9.1 is met.

Ancillary buildings and structures

PO 10.1

Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of neighbouring properties.

DTS/DPF 10.1

Ancillary buildings and structures satisfy (a) to (k), inclusive:

(a) are ancillary to a dwelling erected on the same site
(b) have a floor area not exceeding 60m^2
(c) are not constructed, added to or altered so that any part is situated
  (i) in front of any part of the building line of the dwelling to which it is ancillary
  or
  (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
(d) in the case of a garage or carport, the garage or carport:
  (i) is set back at least 5.5m from the boundary of the primary street
  (ii) when facing a primary street or secondary street, has a total door / opening not exceeding:
    A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser
    B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width
(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and
  (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary
(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure
(h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)
(i) have a roof height where no part of the roof is more than 5m above the natural ground level
(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour
(k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:
(i) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(ii) the amount of existing soft landscaping prior to the development occurring.

PO 10.2

Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

DTS/DPF 10.2

Ancillary buildings and structures do not result in:

(a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space
(b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

PO 10.3

Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.

DTS/DPF 10.3

Non-residential ancillary buildings and structures satisfy (a) to (j), inclusive:

(a) are ancillary and subordinate to an existing non-residential use on the same site
(b) have a floor area not exceeding the following:

Allotment size	Floor area
≤500m^2	60m^2
>500m^2	80m^2

(c) are not constructed, added to or altered so that any part is situated:
  (i) in front of any part of the building line of the main building to which it is ancillary
  or
  (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
(d) in the case of a garage or carport, the garage or carport:
  (i) is set back at least 5.5m from the boundary of the primary street
(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
  (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary
  (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary
(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure
(h) have a wall height (or post height) not exceeding 3m (and not including a gable end)
(i) have a roof height where no part of the roof is more than 5m above the natural ground level
(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing building 2. The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations	

Except where any of the following apply:

- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The alteration does not:
   (a) increase the floor area of the building
   (b) exceed the existing wall height
   (c) exceed the existing overall building height
   (d) alter the roof profile
   (e) alter an approved privacy screening arrangement or window treatment
   (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.
2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.

Building work on railway land
Except where any of the following apply:

- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. Building work is associated with a railway
2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017)
3. It is required for the conduct or maintenance of railway activities
4. It does not involve the clearance of native vegetation
5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.

Carport
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Total floor area - does not exceed 40m^2
6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end)
7. Building height - does not exceed 5m
8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11.5m unless:
   (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
   (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street):
   (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
   (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
10. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
11. The carport is located so that vehicle access:
    (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    (b) is not obtained from a State Maintained Road, and will use a driveway that:
        (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
        (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
        (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
        (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
        (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site
12. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour
13. Does not involve the clearance of native vegetation
14. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Outbuilding
Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
6. Total floor area - does not exceed 40m^2
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
8. Building height - does not exceed 5m
9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11.5m unless:
   (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
   (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
    (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
    (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
11. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
12. If the outbuilding is a garage, it is located so that vehicle access:
    (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    (b) is not obtained from a State Maintained Road, and will use a driveway that:
        (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
        (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
        (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
        (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
        (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site
13. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour
14. Does not involve-
    (a) excavation exceeding a vertical height of 1m; or
    (b) filling exceeding a vertical height of 1m,
    and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m.
15. Does not involve the clearance of native vegetation
16. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
17. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:

(a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

(b) the amount of existing soft landscaping prior to the development occurring.

Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Private bushfire shelter Except where any of the following apply: • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • River Murray Flood Plain Protection Area Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Primary street setback - at least as far back as the building to which it is ancillary 4. Secondary street setback - at least 900mm from the boundary of the allotment 5. At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place) 6. Does not involve the clearance of native vegetation.
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. Shade sail consists of permeable material 4. The total area of the sail does not exceed 40m^2 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11.5m 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary 9. Does not involve the clearance of native vegetation 10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 3. Panels and associated components do not overhang any part of the roof 4. Does not apply to a system with a generating capacity of more than 5MW that is to be connected to the State's power system 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted; 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary 6. Location of pumps and/or filtration systems from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid acoustic structure; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 9. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level 7. Building height - does not exceed 5m 8. Length - does not exceed 11.5m if any part of the structure abuts or is situated on a boundary of the allotment 9. Does not involve the clearance of native vegetation 10. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. The tank is part of a roof drainage system 4. Total floor area - not exceeding 15m^2 5. The tank is located wholly above ground 6. Tank height - does not exceed 4m above natural ground level 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour 9. Does not involve the clearance of native vegetation

	10. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Dwelling	Any of the following: (a) dwelling not located in the Kilkenny Subzone or within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: (i) Maximum Building Height (Metres) - Maximum building height is 12.5m (ii) Maximum Building Height (Levels) - Maximum building height is 3 levels (b) dwelling located in the Kilkenny Subzone that does not exceed the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or any relevant Concept Plan (c) dwelling that: (i) is located within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: A. Maximum Building Height (Metres) - Maximum building height is 12.5m B. Maximum Building Height (Levels) - Maximum building height is 3 levels and (ii) does not exceed 3 building levels or 12.5m in building height.
Residential flat building	Any of the following: (a) residential flat building not located in the Kilkenny Subzone or within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: (i) Maximum Building Height (Metres) - Maximum building height is 12.5m (ii) Maximum Building Height (Levels) - Maximum building height is 3 levels (b) residential flat building located in the Kilkenny Subzone that does not exceed the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or any relevant Concept Plan. (c) residential flat building that: (i) is located within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: A. Maximum Building Height (Metres) - Maximum building height is 12.5m B. Maximum Building Height (Levels) - Maximum building height is 3 levels and (ii) does not exceed 3 building levels or 12.5m in building height.
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m^2 that is not within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: (i) Maximum Building Height (Metres) - Maximum building height is 12.5m (ii) Maximum Building Height (Levels) - Maximum building height is 3 levels (b) shop that is a restaurant that is not within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: (i) Maximum Building Height (Metres) - Maximum building height is 12.5m (ii) Maximum Building Height (Levels) - Maximum building height is 3 levels (c) shop that: (i) is located within the area where the following Technical and Numeric Variations (TNVs) apply in Concept Plan 148 – Lockleys: A. Maximum Building Height (Metres) - Maximum building height is 12.5m B. Maximum Building Height (Levels) - Maximum building height is 3 levels and (ii) satisfies all of the following: A. it does not exceed 3 building levels or 12.5m in building height B. has a gross leasable floor area less than 1000m^2 or is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. All development undertaken by: (a) the South Australian Housing Trust either individually or jointly with other persons or bodies or (b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.	Except development involving any of the following: 1. residential flat building(s) of 3 or more building levels 2. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 3. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).

	4. a dwelling(s) or residential flat building(s) that is situated within both the Interface Management Overlay and the Kilkenny Subzone.
3. Any development involving any of the following (or of any combination of any of the following) where **not** located in the Kilkenny Subzone: (a) ancillary accommodation (b) co-living (c) dwelling (d) dwelling addition (e) residential flat building (f) retirement facility (g) student accommodation (h) supported accommodation.	Except development that: 1. exceeds the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or 2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
4. Any development involving any of the following (or of any combination of any of the following) where located in the Kilkenny Subzone: (a) ancillary accommodation (b) dwelling (c) dwelling addition (d) residential flat building (e) retirement facility (f) student accommodation (g) supported accommodation.	Except development that: 1. exceeds the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or 2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment). or 3. involves a dwelling(s) or residential flat building(s) that is situated within both the Interface Management Overlay and the Kilkenny Subzone.
5. Any development involving any of the following (or of any combination of any of the following) where located on a significant retirement facility and supported accommodation site: (a) retirement facility (b) supported accommodation.	Except development that: 1. exceeds 4 building levels or 15 m in height or 2. does not satisfy Significant Retirement Facility and Supported Accommodation Sites Overlay DTS/DPF 2.2 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
6. Alteration of or addition to any of the following (or of any combination of any of the following): (a) child care facility (b) community facility (c) educational facility.	Except development that does not satisfy Urban Renewal Neighbourhood Zone DTS/DPF 1.6.
7. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Urban Renewal Neighbourhood Zone DTS/DPF 2.1 or 2. does not satisfy Urban Renewal Neighbourhood Zone DTS/DPF 1.2 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
8. Any development involving any of the following (or of any combination of any of the following) where located on a significant retirement facility and supported accommodation site: (a) consulting room (b) office (c) shop.	Except development that: 1. does not satisfy Significant Retirement Facility and Supported Accommodation Sites Overlay DTS/DPF 1.2 or 2. exceeds 4 building levels or 15 m in height or 3. does not satisfy Significant Retirement Facility and Supported Accommodation Sites Overlay DTS/DPF 2.2 or 4. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
9. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) recreation area (k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	None specified.
10. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
11. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development
None specified.
Placement of Notices - Exemptions for Restricted Development
None specified.

Mixed Use Transition Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development accommodating a range of business, commercial, warehousing and light industrial uses enabling the transition of the area to mixed use development, compatible with residential development.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Redevelopment and transition of the area towards mixed development including, residential, supported by a mix of compatible uses including light industry, service trade, motor repair and other compatible businesses servicing the local community that do not produce objectionable emissions.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Dwelling (b) Entertainment venue (c) Licenced premises (d) Hotel (e) Consulting room (f) Indoor recreation facility (g) Light industry (h) Motor repair station (i) Office (j) Place of worship (k) Research facility (l) Retail fuel outlet (m) Service trade premises (n) Shop (o) Store (p) Tourist accommodation (q) Training facility
PO 1.2 Non-residential development involving the expansion, alteration or replacement of an existing industry or activity adjacent to a sensitive receiver or zone, and where current adverse impacts exist, only occur where adverse impacts are minimised in accordance the with *Environment Protection Act 1993* requirements.	DTS/DPF 1.2 None are applicable.
PO 1.3 Residential development and other sensitive development only occur where adverse impacts from nearby industries and activities are minimised in accordance with the *Environment Protection Act 1993* requirements.	DTS/DPF 1.3 None are applicable.
PO 1.4 Shops, other than bulky goods outlets, provide a local convenience service to meet the day to day needs of the local community and surrounding businesses as well as support the sale of products made on-site as a supplement to a business activity to enhance local job opportunities.	DTS/DPF 1.4 Shop comprising any of the following: (a) shop with a gross leasable floor area up to 500m^2 (b) shop in the form of a bulky goods outlet (c) shop that is ancillary to and located on the same allotment as a light industry.
Land Division	
PO 2.1 Sensitive uses and sensitive receivers are: (a) located away from areas which may be subject to unacceptable noise, dust, odour or other emissions or (b) able to adequately mitigate impacts of noise, dust, odour or other emissions through design techniques such as: (i) locating residential accommodation, the greatest distance practicable from the industry (ii) locating buildings containing less non-sensitive receivers between the industry and sensitive receivers (iii) placing rooms more sensitive to air, noise and odour impacts (e.g. bedrooms) further away from the industry or (iv) providing private or common open space adjacent a building facade that shields the space from impacts of the industry.	DTS/DPF 2.1 Development does not incorporate any of the following (including alterations and additions which increase the floor area of buildings accommodating the following by 10% or more): (a) land division creating one or more additional allotments for residential purposes (b) dwelling (c) residential flat building (d) tourist accommodation (e) boarding home (f) dormitory style accommodation (g) Workers' accommodation (h) student accommodation (i) child care facility (j) educational facility (k) retirement village (l) supported accommodation (m) residential park (n) hospital.

Landscape Transition Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development in an open landscaped setting.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form and Siting	
PO 1.1 Building footprints consistent with the character and pattern of the prevailing open landscaped character of the neighbourhood.	DTS/DPF 1.1 The development does not result in a site coverage exceeding 50%.
PO 1.2 Development incorporates deep soil zones for the retention or provision of large trees to contribute to a well landscaped setting.	DTS/DPF 1.2 At least 15% of a site incorporates deep soil zone areas.
Site Dimensions and Land Division	
PO 2.1 Allotments/sites created for residential purposes primarily accommodating medium density residential development, with lower density at the interface with a different neighbourhood zone.	DTS/DPF 2.1 Allotments/sites for residential purposes accord with the following: (a) Site areas (or allotment areas in the case of land division) are not less than: (i) 180m2, or 100m2 on an allotment >2000m2, for a dwelling (ii) 120m2, or 80m2 on an allotment >2000m2, for each dwelling in a residential flat building (iii) 300m2 for a dwelling (including in a residential flat building) in areas where the Maximum Building Height (Levels) Technical and Numeric Variation specifies a maximum building height of 2 levels and (b) Site frontages (or allotment frontage in the case of land division) are not less than): (i) 8m for a dwelling (ii) 20m for a residential flat building

Kilkenny Subzone

Assessment provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sensitive receivers coexist with and do not undermine the viability of existing state-significant employment generating land uses in the adjacent Strategic Employment Zone.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature

PO 1.1 Sensitive receivers are designed and sited to be shielded from noise emitted by proximate lawfully existing employment generating land uses.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development incorporating a sensitive receiver locates private open space (including ground level courtyards and balconies), common open space and outdoor play areas within education establishments and pre-schools away from noise emitted by proximate lawfully existing employment generating land uses.	DTS/DPF 1.2 None are applicable.

Waterfront Neighbourhood Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A diverse range of housing which takes advantage of waterfront locations. Development enhances public access to waterfront areas. Dual aspect allotments incorporate designs to enhance the streetscape.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Residential development and supporting services and facilities make waterfront neighbourhoods a convenient place to live.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Ancillary accommodation (b) Child care facility (c) Co-living (d) Community facility (e) Dwelling (f) Educational facility (g) Jetty, pontoon or boat berth (or any combination thereof) (h) Marina (i) Office (j) Place of Worship (k) Recreation area (l) Residential flat building (m) Retirement facility (n) Shop (o) Supported accommodation (p) Tourist accommodation
PO 1.2 Marinas include constructed waterways, mooring facilities, pontoons and small jetties to accommodate recreational activities and mooring of small boats associated with residential allotments.	DTS/DPF 1.2 None are applicable.
PO 1.3 Non-residential development located and designed to improve community accessibility to services, primarily in the form of: (a) small-scale commercial uses such as offices, consulting rooms and shops (b) community services such as educational facilities, community centres, places of worship, child care facilities and other health and welfare services (c) services and facilities ancillary to the function or operation of supported accommodation or retirement facilities (d) open space and recreation facilities.	DTS/DPF 1.3 None are applicable.
PO 1.4 Non-residential development is compatible with the waterfront character and amenity of a neighbourhood.	DTS/DPF 1.4 None are applicable.
PO 1.5 Commercial activities improve community access to services and activate waterfront areas are of a scale and type to maintain residential amenity.	DTS/DPF 1.5 A shop, consulting room or office (or any combination thereof) satisfies any one of the following: (a) it is located on the same allotment and in conjunction with a dwelling, and all the following are satisfied: (i) does not exceed 50m^2 gross leasable floor area (ii) does not involve the display of goods in a window or about the dwelling or its curtilage (b) it reinstates a former shop, consulting room or office in an existing building (or portion of a building) and at least one of the following is satisfied: (i) the building is a State or Local Heritage Place (ii) is in conjunction with a dwelling and there is no increase in the gross leasable floor area previously used for non-residential purposes (c) it is located more than 500m from an Activity Centre and satisfies one of the following: (i) does not exceed 100m^2 gross leasable floor area (individually or combined, in a single building) where the site does not have a frontage to a State Maintained Road (ii) does not exceed 200m^2 gross leasable floor area (individually or combined, in a single building) where the site has a frontage to a State Maintained Road (d) the development site abuts an Activity Centre and all the following are satisfied: (i) it does not exceed 200m^2 gross leasable floor area (in a single building) (ii) the proposed development will not result in the combined gross leasable floor area of all buildings used as a shop, office or consulting room (existing and proposed) or an combination thereof abutting the Activity Centre in this zone exceeding the lesser of the following: A. 50% of the gross leasable floor area within the Activity Centre B. 1000m^2. (e) the development is located within the ground level of a mixed use building with frontage to a waterfront or coastal reserve and does not exceed 250m^2 gross leasable floor area.
PO 1.6 Expansion of existing community services such as educational facilities, community facilities and child care facilities in a manner which complements the scale of development envisaged by the desired outcome for the neighbourhood.	DTS/DPF 1.6 Alteration of or addition to existing educational facilities, community facilities or child care facilities satisfy all of the following: (a) set back at least 3m from any boundary shared with a residential land use (b) building height not exceeding 1 building level (c) the total floor area of the building not exceeding 150% of the total floor area prior to the addition/alteration (d) off-street vehicular parking exists or will be provided in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
Site Dimensions and Land Division	
PO 2.1 Allotments/sites created for residential purposes are of suitable size and dimension to accommodate the anticipated dwelling form and remain compatible with the pattern of development in a waterfront neighbourhood.	DTS/DPF 2.1 Development will not result in more than 1 dwelling on an existing allotment or Allotments/sites for residential purposes accord with the following: (a) site areas (or allotment areas in the case of land division) are not less than the following (average site area per dwelling, including common areas, applies for group dwellings or dwellings within a residential flat building): **Minimum Site Area** Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 200 sqm; row dwelling is 180 sqm; group dwelling is 200 sqm; residential flat building is 150 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 220 sqm; row dwelling is 180 sqm; group dwelling is 275 sqm; residential flat building is 200 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 250 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 300 sqm; row dwelling is 200 sqm; group dwelling is 300 sqm Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 300 sqm; row dwelling is 300 sqm; group dwelling is 300 sqm; residential flat building is 300 sqm Minimum site area for a detached dwelling is 350 sqm; semi-detached dwelling is 250 sqm; row dwelling is 180 sqm; group dwelling is 250 sqm; residential flat building is 180 sqm Minimum site area for a detached dwelling is 350 sqm; semi-detached dwelling is 350 sqm; row dwelling is 350 sqm; group dwelling is 350 sqm;

Minimum Site Area
residential flat building is 350 sqm
Minimum site area for a detached dwelling is 390 sqm; semi-detached dwelling is 270 sqm; row dwelling is 200 sqm; group dwelling is 275 sqm; residential flat building is 250 sqm
Minimum site area for a detached dwelling is 450 sqm; semi-detached dwelling is 350 sqm; row dwelling is 300 sqm; group dwelling is 400 sqm; residential flat building is 300 sqm
Minimum site area is 2,000 sqm
Minimum site area is 2 ha
Minimum site area is 7,500 sqm

(b) site frontages (or allotment frontages in the case of land division) are not less than:

Minimum Frontage
Minimum frontage for a detached dwelling is 10m; semi-detached dwelling is 10m; row dwelling is 10m; group dwelling is 18m; residential flat building is 18m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 9m; row dwelling is 7m; group dwelling is 18m; residential flat building is 18m
Minimum frontage for a detached dwelling is 15m; semi-detached dwelling is 9m; row dwelling is 8m; group dwelling is 20m; residential flat building is 20m
Minimum frontage for a detached dwelling is 4m; semi-detached dwelling is 4m; row dwelling is 4m; group dwelling is 4m; residential flat building is 6m
Minimum frontage for a detached dwelling is 5m; semi-detached dwelling is 5m; row dwelling is 5m; group dwelling is 5m; residential flat building is 5m
Minimum frontage for a detached dwelling is 8m; semi-detached dwelling is 8m; row dwelling is 7m; group dwelling is 16m; residential flat building is 16m
Minimum frontage for a detached dwelling is 8m; semi-detached dwelling is 8m; row dwelling is 8m; group dwelling is 16m; residential flat building is 16m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 8m; row dwelling is 7m; group dwelling is 15m; residential flat building is 15m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 9m; row dwelling is 7m; group dwelling is 15m
Minimum frontage is 25m

In relation to DTS/DPF 2.1, in instances where:

(c) more than one value is returned in the same field, refer to the *Minimum Frontage Technical and Numeric Variation layer* or *Minimum Site Area Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development

(d) no value is returned in (a) or (b) (i.e. there is a blank field or relevant dwelling type is not listed), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.

PO 2.2

Development creating new allotments/sites in conjunction with retention of an existing dwelling ensures the site of the existing dwelling remains fit for purpose.

DTS/DPF 2.2

Where the site of a dwelling does not comprise an entire allotment:

(a) the balance of the allotment accords with site area and frontage requirements specified in DTS/DPF 2.1
and

(b) if there is an existing dwelling on the allotment that will remain on the allotment after completion of the development, it will not contravene:
  (i) Private open space requirements specified in Design in Urban Areas Table 1 - Private Open Space
  (ii) Car parking requirements specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.

Site Coverage

PO 3.1

Building footprints consistent with the character of a waterfront neighbourhood and limited to:

(a) allow sufficient space around buildings to limit visual impact
(b) provide an attractive outlook
(c) provide access to light and ventilation
(d) on sites with a dual frontage, to maximise use of available land.

DTS/DPF 3.1

The development does not result in site coverage exceeding:

(a) on sites 300m^2 or less and with a dual frontage to the waterfront and a public street, 80%.
(b) in all other cases, 60%.

Building Height

PO 4.1

Building height is consistent with the form expressed in any relevant Maximum Building Height Levels Technical and Numeric Variation and Maximum Building Height Metres Technical and Numeric Variation, and is otherwise generally low rise, or complements the height of nearby buildings.

DTS/DPF 4.1

Building height (excluding garages, carports and outbuildings) is no greater than:

(a) the following:

Maximum Building Height (Metres)
Maximum building height is 8m
Maximum building height is 8.5m
Maximum building height is 9m
Maximum building height is 12m
Maximum building height is 10.5m
Maximum Building Height (Levels)
Maximum building height is 2 levels
Maximum building height is 3 levels

(b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)) - 2 building levels up to a height of 9m.

In relation to DTS/DPF 4.1, in instances where:

(c) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer and Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development

(d) only one value is returned for DTS/DPF 4.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.

Primary Street Setback

PO 5.1

Buildings are setback from primary street boundaries to contribute to the existing/emerging pattern of street setbacks in the streetscape and the waterfront environment.

DTS/DPF 5.1

Buildings setback from the primary street boundary in accordance with the following table:

Development Context	Minimum setback
There is an existing building on both abutting sites sharing the same street frontage as the site of the proposed building.	The average setback of the existing buildings.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is not on a corner site.	The setback of the existing building.
There is an existing building on only one abutting site sharing the same street frontage as the site of the proposed building and the existing building is on a corner site.	(a) Where the existing building shares the same primary street frontage – the setback of the existing building (b) Where the existing building has a different primary street frontage - 5m
There is no existing building on either of the abutting sites sharing the same street frontage as the site of the proposed building.	5m

For the purposes of **DTS/DPF 5.1:**

(a) the setback of an existing building on an abutting site to the street boundary that it shares with the site of the proposed building is to be measured from the closest building wall to that street boundary at its closest point to the building wall and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not taken to form part of the building for the purposes of determining its setback
(b) any proposed projections such as a verandah, porch, balcony, awning or bay window may encroach not more than 1.5 metres into the minimum setback prescribed in the table

Secondary Street Setback

PO 6.1

Buildings are set back from secondary street boundaries to achieve separation between building walls and public streets and contribute to a suburban streetscape character.

DTS/DPF 6.1

Building walls are set back from the boundary of the allotment with a secondary street frontage at least:

(a) at least 900mm

or

(b) if a building (except for ancillary buildings and structures) on any adjoining allotment is closer to the secondary street than 900mm, at least the distance of that building from the boundary with the secondary street.'

Boundary Walls

PO 7.1

DTS/DPF 7.1

Walls on boundaries are limited in height and length to manage visual and overshadowing impacts on adjoining properties.	Except where the building is a dwelling and is located on a central site within a row dwelling or terrace arrangement, side boundary walls occur only on one side boundary and satisfy (a) or (b) below: (a) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same, or lesser length and height (b) side boundary walls do not: (i) exceed 3m in wall height (ii) exceed 11.5m in length (iii) when combined with other walls on the boundary of the subject development site, exceed a maximum 45% of the length of the boundary (iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land.
PO 7.2 Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.	DTS/DPF 7.2 Dwelling walls in a semi-detached, row or terrace arrangement are setback at least 900mm from side boundaries shared with allotments outside the development site.
Side boundary setback	
PO 8.1 Building walls are set back from side boundaries to provide: (a) separation between buildings in a way that contributes to a suburban character and (b) access to natural light and ventilation for neighbours.	DTS/DPF 8.1 Other than walls located on a side boundary, building walls are set back from side boundaries in accordance with the following: (a) where the wall height does not exceed 3m - at least 900mm (b) for a wall that is not south facing and the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings (c) for a wall that is south facing and the wall height exceeds 3m - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings.
Rear boundary setback	
PO 9.1 Building walls (except for ancillary buildings and structures) are set back from rear boundaries to provide: (a) separation between buildings in a way that contributes to a suburban character (b) access to natural light and ventilation for neighbours (c) private open space (d) space for landscaping and vegetation (e) a consistent character when viewed from a waterfront.	DTS/DPF 9.1 Building walls (except for ancillary buildings and structures) are set back from the rear boundary at least: (a) where the rear boundary fronts a waterfront, no less than the average rear setback of any existing building (except for ancillary buildings and structures) on adjoining allotments. (b) where the rear boundary adjoins a laneway - 0m (c) In all other cases: (i) if the size of the site is less than 301 square metres— A. 3m in relation to the ground floor of the building B. 5m in relation to any other building level of the building (ii) if the size of the site is 301 square metres or more— A. 4m in relation to the ground floor of the building B. 6m in relation to any other building level of the building.
Concept Plans	
PO 10.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 10.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: **Description** Concept Plan 141 - West Lakes In relation to DTS/DPF 10.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 10.1 is met.
Built form and character	
PO 11.1 Dwellings on sites with frontages to both a public street and a waterfront designed to address both frontages.	DTS/DPF 11.1 Development is not located on a site/allotment with frontage to a waterfront.
PO 11.2 Service areas associated with dwellings such as open storage and clothes drying screened from public view.	DTS/DPF 11.2 None are applicable.
PO 11.3 Development set back from waterfronts to establish a consistent character that includes soft landscaping along coastal/riverine frontages.	DTS/DPF 11.3 None are applicable.
Ancillary buildings and structures	
PO 12.1 Outbuildings designed and sited to mitigate their visibility from the waterfront.	DTS/DPF 12.1 Outbuildings are not located between the main building and waterfront boundary on a site/allotment with frontage to a waterfront.
PO 12.2 Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.	DTS/DPF 12.2 Ancillary buildings satisfy (a) to (k), inclusive: (a) are ancillary to a dwelling erected on the same site (b) have a floor area not exceeding 60m^2 (c) are not constructed, added to or altered so that any part is situated: (i) in front of any part of the building line of the dwelling to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street (ii) when facing a primary street or secondary street, has a total door / opening not exceeding: A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end) (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less: (i) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (ii) the amount of existing soft landscaping prior to the development occurring.
PO 12.3 Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements and do not result in over-development of the site.	DTS/DPF 12.3 Ancillary buildings and structures do not result in: (a) less private open space than specified in Design Table 1 - Private Open Space (b) less car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number.
PO 12.4 Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties.	DTS/DPF 12.4 Non-residential ancillary buildings and structures satisfy (a) to (j), inclusive:

	(a) are ancillary and subordinate to an existing non-residential use on the same site (b) have a floor area not exceeding the following: Allotment size: ≤500m² — Floor area: 60m²; >500m² — 80m² (c) are not constructed, added to or altered so that any part is situated: (i) in front of any part of the building line of the main building to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: (i) is set back at least 5.5m from the boundary of the primary street (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless: (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height (or post height) not exceeding 3m (and not including a gable end) (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.
Advertisements	
PO 13.1 Advertisements identify the associated business activity, and do not detract from the residential character of the locality.	DTS/DPF 13.1 Advertisements relating to a lawful business activity associated with a residential use do not exceed 0.3m2 and mounted flush with a wall or fence.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing dwelling. 2. The item being installed does not encroach on a public street. 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Brush fence Except where any of the following apply: • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The fence is formed (wholly or partially) from brush 2. The fence does not exceed 2.1m in height (measured from the lower of the 2 adjoining finished ground levels) 3. The fence does not exceed 1m in height within 6m of the intersection of 2 boundaries of land where those boundaries both face a road, other than where a 4 x 4 m corner cut-off has already been provided (and is to be preserved) 4. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.
Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017) 3. It is required for the conduct or maintenance of railway activities 4. It does not involve the clearance of native vegetation 5. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas.
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m² 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7. Building height - does not exceed 5m 8. If situated on or abutting a boundary (not being a boundary with a primary street) - a length not exceeding 11.5m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure 10. Site coverage does not exceed: (a) on sites 300m2 or less and with a dual frontage to the waterfront and a public street, 80% (b) in all other cases, 60%. 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser) 12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State Maintained Road, and will use a driveway that: (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour 14. Does not involve the clearance of native vegetation 15. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m²)** — **Minimum percentage of site** <150 — 10% 150-200 — 15% 201-450 — 20% >450 — 25% (b) the amount of existing soft landscaping prior to the development occurring.
Outbuilding Except where any of the following apply:	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is detached from and ancillary to a dwelling erected on the site.
4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
6. Total floor area - does not exceed 40m^2
7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
8. Building height - does not exceed 5m
9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11.5m unless:
   (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
   (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
    (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
    (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
11. Site coverage does not exceed:
    (a) on sites 300m2 or less and with a dual frontage to the waterfront and a public street, 80%.
    (b) in all other cases, 60%.
12. If the outbuilding is a garage – door opening for vehicle access facing a street frontage – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
13. If the outbuilding is a garage, it is located so that vehicle access:
    (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    (b) is not obtained from a State maintained Road, and will use a driveway that:
        (i) is not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing;
        (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree;
        (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average
        (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access
        (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site
14. If clad in sheet metal-is pre-colour treated or painted in a non-reflective colour
15. Does not involve-
    (a) excavation exceeding a vertical height of 1m; or
    (b) filling exceeding a vertical height of 1m,
    and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2m.
16. Does not involve the clearance of native vegetation
17. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
18. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:
    (a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

    (b) the amount of existing soft landscaping prior to the development occurring.

Partial demolition of a building or structure
Except where any of the following apply:

- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

None

Private bushfire shelter
Except where any of the following apply:

- Coastal Areas Overlay
- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Local Heritage Place Overlay
- River Murray Flood Plain Protection Area Overlay
- Significant Landscape Protection Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. Primary street setback - at least as far back as the building to which it is ancillary
4. Secondary street setback - at least 900mm from the boundary of the allotment
5. At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place)
6. Does not involve the clearance of native vegetation.

Shade sail
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- Ramsar Wetlands Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. Shade sail consists of permeable material
4. The total area of the sail - does not exceed 40m^2
5. No part of the shade sail will be:
   (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment
   (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment
6. Primary street setback - at least as far back as the building line of the building to which it is ancillary
7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11.5m
8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary
9. Does not involve the clearance of native vegetation
10. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas
11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less:
    (a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%

    (b) the amount of existing soft landscaping prior to the development occurring.

Solar photovoltaic panels (roof mounted)
Except where any of the following apply:

- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*
2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof
3. Panels and associated components do not overhang any part of the roof
4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system
5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.

Swimming pool or spa pool and associated swimming pool safety features
Except where any of the following apply:

- Future Local Road Widening Overlay
- Future Road Widening Overlay
- Hazards (Flooding) Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay

1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*.
2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted
4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature).
5. Primary street setback - at least as far back as the building line of the building to which it is ancillary
6. Location of pumps and/or filtration systems from a dwelling on an adjoining allotment:
   (a) not less than 5m where the filtration system is located inside a solid acoustic structure; or

	(b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation 8. The development will not be located within the extents of the River Murray 1956 Flood Level as delineated by the SA Property and Planning Atlas 9. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Verandah Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. It is ancillary to a dwelling erected on the site 4. Primary street setback - as far back as the building line of the building to which it is ancillary 5. Total floor area - does not exceed 40m^2 6. Post height - does not exceed 3m measured from natural ground level 7. Building height - does not exceed 5m 8. Length - does not exceed 11.5m if any part of the structure abuts or is situated on a boundary of the allotment 9. Site coverage does not exceed: (a) on sites 300m2 or less and with a dual frontage to the waterfront and a public street, 80% (b) in all other cases, 60%. 10. Does not involve the clearance of native vegetation 11. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Water tank (above ground) Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • Ramsar Wetlands Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 3. The tank is part of a roof drainage system 4. Total floor area - not exceeding 15m^2 5. The tank is located wholly above ground 6. Tank height - does not exceed 4m above natural ground level 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour 9. Does not involve the clearance of native vegetation 10. Retains a total area of soft landscaping in accordance with (a) or (b), whichever is less: (a) a total area as determined by the following table: **Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m^2)** / **Minimum percentage of site** <150 / 10% 150-200 / 15% 201-450 / 20% >450 / 25% (b) the amount of existing soft landscaping prior to the development occurring.
Water tank (underground) Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Ramsar Wetlands Overlay	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2. The tank (including any associated pump) is located wholly below the level of the ground 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m^2 (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. All development undertaken by: (a) the South Australian Housing Trust either individually or jointly with other persons or bodies or (b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.	Except development involving any of the following: 1. residential flat building(s) of 3 or more building levels 2. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 3. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
3. Any development involving any of the following (or of any combination of any of the following): (a) ancillary accommodation (b) co-living (c) dwelling (d) dwelling addition (e) jetty, pontoon or boat berth (or any combination thereof) (f) residential flat building.	Except development that: 1. exceeds the maximum building height specified in Waterfront Neighbourhood Zone DTS/DPF 4.1 or 2. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
4. Any development involving any of the following (or of any combination of any of the following) where located on a significant retirement facility and supported accommodation site: (a) retirement facility (b) supported accommodation.	Except development that: 1. exceeds 4 building levels or 15 m in height or 2. does not satisfy Significant Retirement Facility and Supported Accommodation Sites Overlay DTS/DPF 2.2 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
5. Any development involving any of the following (or of any combination of any of the following): (a) consulting room (b) office (c) shop.	Except development that: 1. exceeds the maximum building height specified in Waterfront Neighbourhood Zone DTS/DPF 4.1 or 2. does not satisfy Waterfront Neighbourhood Zone DTS/DPF 1.5 or 3. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
6. Any development involving any of the following (or of any combination of any of the following) where located on a significant retirement facility and supported accommodation site: (a) consulting room (b) office (c) shop	Except development that: 1. does not satisfy Significant Retirement Facility and Supported Accommodation Sites Overlay DTS/DPF 1.2 or 2. exceeds 4 building levels or 15 m in height or 3. does not satisfy Significant Retirement Facility and Supported Accommodation Sites Overlay DTS/DPF 2.2 or 4. involves a building wall (or structure) that is proposed to be situated on (or abut) an allotment boundary (not being a boundary with a primary street or secondary street or an excluded boundary) and: (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
7. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) carport (c) deck (d) fence (e) internal building works (f) land division (g) outbuilding (h) pergola (i) private bushfire shelter (j) recreation area (k) replacement building (l) retaining wall (m) shade sail (n) solar photovoltaic panels (roof mounted) (o) swimming pool or spa pool and associated swimming pool safety features (p) temporary accommodation in an area affected by bushfire (q) tree damaging activity (r) verandah (s) water tank.	None specified.
8. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
9. Railway line.	Except where located outside of a rail corridor or rail reserve.

Placement of Notices - Exemptions for Performance Assessed Development
None specified.

Placement of Notices - Exemptions for Restricted Development
None specified.

Workers' Settlement Zone

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development is limited to workers' accommodation and ancillary land uses that support the day to day needs of workers.	DTS/DPF 1.1 Development comprises one or more of the following: (a) a dwelling (manager's house) (b) amenity block (including shower, toilet and laundry facilities) in association with and ancillary to the workers' accommodation (c) dwelling addition (d) recreational facility in association with and ancillary to the workers' accommodation (e) office in association with and ancillary to the workers' accommodation (f) shop in association with and ancillary to the workers' accommodation (g) workers' accommodation.
PO 1.2 Shops, primarily in the form of a restaurant, associated with and ancillary to Workers' accommodation enhance the amenity of the zone for those workers.	DTS/DPF 1.2 Shops located on the same site as workers' accommodation meets one of the following: (a) it has a gross leasable floor area not exceeding $100m^2$ (b) it is a restaurant.
PO 1.3 Office associated with and ancillary to Workers' accommodation supports the management and administrative aspects of the accommodation.	DTS/DPF 1.3 Office is ancillary to and located on the same site as Workers' accommodation.
PO 1.4 Development provides space adjacent to and around habitable buildings to accommodate areas for parking of vehicles, storage of waste, landscaping, recreation areas, swimming pool/spa and similar facilities to enhance the amenity for resident workers.	DTS/DPF 1.4 The total roofed area of all existing and proposed buildings on the site will not exceed 60%.
PO 1.5 Workers' accommodation is established in association with major industrial, mining, agricultural and business activities to support and facilitate economic activity.	DTS/DPF 1.5 Workers' accommodation is constructed by the principal operator of the relevant business or authorised agent thereof.
PO 1.6 A dwelling in the form of a manager or caretaker residence associated with and ancillary to Workers' accommodation provides for the efficient management, maintenance and support of residents.	DTS/DPF 1.6 Dwelling is in the form of a manager or caretaker residence and satisfies all of the following: (a) ancillary to and located on the same allotment or within the same lease area as the workers' accommodation (b) has a demonstrated connection with workers' accommodation (c) will not result in more than one dwelling being located on an allotment or lease area used for workers' accommodation.
Land Division	
PO 2.1 Land division is designed to: (a) minimise fire risk danger to occupants of buildings and firefighting personnel (b) minimise the potential risk of damage to buildings and other property during a bushfire (c) ensure each allotment contains a suitable building envelope that is located away from any vegetation that would pose an unacceptable risk in the event of bushfire.	DTS/DPF 2.1 None are applicable.
Built Form and Character	
PO 3.1 Buildings and recreational facilities are set back from internal roads to accommodate vehicular movements and contribute to the safety of workers and visitors.	DTS/DPF 3.1 Buildings and recreational facilities are set back at least 1 metre from an internal road.
PO 3.2 Buildings are set back from public roads to mitigate impacts on the streetscape.	DTS/DPF 3.2 Buildings are set back at least 2m from a public road.
PO 3.3 Buildings and recreational areas are set back from the boundary of the zone to minimise impacts on neighbouring properties and enhance local amenity.	DTS/DPF 3.3 Buildings are set back at least 2 metres from the zone boundary.
PO 3.4 Buildings use materials and finishes to complement the landscape and mitigate the effects of glare on adjacent land users.	DTS/DPF 3.4 Buildings are clad in, or a combination of: (a) materials other than sheet metal (b) sheet metal pre-colour treated or painted in a non-reflective colour.
Landscaping	
PO 4.1 Landscaping is provided along public roads and thoroughfares, zone boundaries and the perimeter of common vehicle parking areas to enhance the visual appearance of development.	DTS/DPF 4.1 Other than to accommodate a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land, a landscaped area is provided within the development site in accordance with the following: (a) at least 1.5m wide along any boundary on the perimeter of the zone fronting a public road or thoroughfare (b) at least 1m wide around the perimeter of any shared vehicle parking area.
PO 4.2 Development incorporates areas for landscaping to enhance the overall amenity of the site and locality.	DTS/DPF 4.2 Landscape areas comprise: (a) not less than 10 percent of the site area (b) a dimension of at least 1m.
Concept Plans	
PO 5.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 5.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: In relation to DTS/DPF 5.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 5.1 is met.

Table 1 - Accepted Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The item will be installed on or within an existing dwelling. 2. The item being installed does not encroach on a public street. 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Building alterations Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The alteration does not: (a) increase the floor area of the building (b) exceed the existing wall height (c) exceed the existing overall building height (d) alter the roof profile (e) alter an approved privacy screening arrangement or window treatment (f) result in less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. 2. Where located within the Historic Area Overlay, there will be no external alterations to the external appearance of the building where visible from the public realm.

Building work on railway land Except where any of the following apply: • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Mount Lofty Ranges Water Supply Catchment (Area 1) Overlay • Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. Building work is associated with a railway. 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017). 3. It is required for the conduct or maintenance of railway activities. 4. It does not involve the clearance of native vegetation.
Carport Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Total floor area - does not exceed 40m^2. 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end). 7. Building height - does not exceed 5m. 8. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure. 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment. 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser). 12. The carport is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site. 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour. 14. Does not involve the clearance of native vegetation.
Outbuilding Except where any of the following apply: • Coastal Areas Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads). 6. Total floor area - does not exceed 40m^2. 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end). 8. Building height - does not exceed 5m. 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 11. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%. 12. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure. 13. If the outbuilding is a garage, it is located so that vehicle access: (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State Maintained Road, and will use a driveway that: (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site 14. If clad in sheet metal is pre-colour treated or painted in a non-reflective colour. 15. Does not involve- (a) excavation exceeding a vertical height of 1 metre; or (b) filling exceeding a vertical height of 1 metre, and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2 metres. 16. Does not involve the clearance of native vegetation.
Partial demolition of a building or structure Except where any of the following apply: • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	None
Shade sail Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. Shade sail consists of permeable material. 4. The total area of the sail - does not exceed 40m^2. 5. No part of the shade sail will be: (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment. 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m. 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof. 3. Panels and associated components do not overhang any part of the roof. 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system. 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
Swimming pool or spa pool and associated swimming pool safety features Except where any of the following apply: • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted. 4. Allotment boundary setback - not less than 1m (other than a swimming pool safety feature). 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 6. Location of pumps and/or filtration systems from a dwelling on an adjoining allotment:

	(a) not less than 5m where the filtration system is located inside a solid acoustic structure; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation.
Water tank (above ground) Except where any of the following apply: • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay	1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. The tank is part of a roof drainage system. 4. Total floor area - not exceeding 15m^2. 5. The tank is located wholly above ground. 6. Tank height - does not exceed 4m above natural ground level. 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour. 9. Does not involve the clearance of native vegetation
Water tank (underground)	1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 2. The tank (including any associated pump) is located wholly below the level of the ground. 3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

Unless otherwise specified in another class of development, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

[BLANK]

Table 3 - Applicable Policies for Performance Assessed Development

[BLANK]

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m^2 (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

Notification tables exclude the classes of development listed in Column A from notification provided that they do not fall within a corresponding exclusion prescribed in Column B.

Where a development or an element of a development falls within more than one class of development listed in Column A, it will be excluded from notification if it is excluded (in its entirety) under any of those classes of development. It need not be excluded under all applicable classes of development.

Where a development involves multiple performance assessed elements, all performance assessed elements will require notification (regardless of whether one or more elements are excluded in the applicable notification table) unless every performance assessed element of the application is excluded in the applicable notification table, in which case the application will not require notification.

A relevant authority may determine that a variation to 1 or more corresponding exclusions prescribed in Column B is minor in nature and does not require notification.

Class of Development (Column A)	Exceptions (Column B)
1. Development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any development involving any of the following (or of any combination of any of the following): (a) air handling unit, air conditioning system or exhaust fan (b) amenities block (c) carport (d) deck (e) dwelling (f) dwelling addition (g) fence (h) internal building works (i) land division (j) office (k) outbuilding (l) pergola (m) private bushfire shelter (n) replacement building (o) retaining wall (p) shade sail (q) shop (r) solar photovoltaic panels (roof mounted) (s) swimming pool or spa pool and associated swimming pool safety features (t) temporary accommodation in an area affected by bushfire (u) tree damaging activity (v) verandah (w) workers accommodation (x) water tank.	None specified.
3. Demolition.	Except any of the following: 1. the demolition (or partial demolition) of a State or Local Heritage Place (other than an excluded building) 2. the demolition (or partial demolition) of a building in a Historic Area Overlay (other than an excluded building).
4. Railway line.	Except where located outside of a rail corridor or rail reserve.
Placement of Notices - Exemptions for Performance Assessed Development	
None specified	
Placement of Notices - Exemptions for Restricted Development	
None specified	

Part 3 - Overlays

Adelaide Dolphin Sanctuary Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of the Adelaide Dolphin Sanctuary dolphin population and their habitat.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development avoids or minimises harm to habitat, and the functioning of ecosystems that support the dolphin population.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development does not result in the disruption of critical dolphin behaviours such as breeding, feeding, resting and movement.	DTS/DPF 1.2 None are applicable.
PO 1.3 Stormwater runoff is disposed of in a manner that avoids pollution or other detrimental impacts to the Adelaide Dolphin Sanctuary.	DTS/DPF 1.3 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Advertising Near Signalised Intersections Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Provision of a safe road environment by reducing driver distraction at key points of conflict on the road.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Advertisements Near Signalised Intersections	
PO 1.1 Advertising near signalised intersections does not cause unreasonable distraction to road users through illumination, flashing lights, or moving or changing displays or messages.	DTS/DPF 1.1 Advertising satisfies all of the following: (a) is not illuminated (b) does not incorporate a moving or changing display or message (c) does not incorporate a flashing light(s).

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Advertisement or advertising hoarding that: (a) is within 100m of a: (i) signalised intersection or (ii) signalised pedestrian crossing and (b) will: (i) be internally illuminated or (ii) incorporate a moving or changing display or message or (iii) incorporate a flashing light.	Commissioner of Highways.	To provide expert technical assessment on potential risks relating to pedestrian and road safety which may arise from advertisements near intersections.	Development of a class to which Schedule 9 clause 3 item 21 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Affordable Housing Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Affordable housing is integrated with residential and mixed use development.
DO 2	Affordable housing caters for a variety of household structures.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Development comprising 20 or more dwellings / allotments incorporates affordable housing.	DTS/DPF 1.1 Development results in 0-19 additional allotments / dwellings.
PO 1.2 Development comprising 20 or more dwellings or residential allotments provides housing suited to a range of incomes including households with low to moderate incomes.	DTS/DPF 1.2 Development comprising 20 or more dwellings / or residential allotments includes a minimum of 15% affordable housing except where: (a) it can be demonstrated that any shortfall in affordable housing has been provided in a previous stage of development or (b) it can be demonstrated that any shortfall in affordable housing will be accommodated in a subsequent stage or stages of development.
PO 1.3 Affordable housing is distributed throughout the development to avoid an overconcentration.	DTS/DPF 1.3 None are applicable.

Built Form and Character	
PO 2.1 Affordable housing is designed to complement the design and character of residential development within the locality.	DTS/DPF 2.1 None are applicable.
Affordable Housing Incentives	
PO 3.1 To support the provision of affordable housing, minimum allotment sizes may be reduced below the minimum allotment size specified in a zone while providing allotments of a suitable size and dimension to accommodate dwellings with a high standard of occupant amenity.	DTS/DPF 3.1 The minimum site area specified for a dwelling can be reduced by up to 20%, or the maximum density per hectare increased by up to 20%, where it is to be used to accommodate affordable housing except where the development is located within the Character Area Overlay or Historic Area Overlay.
PO 3.2 To support the provision of affordable housing, building heights may be increased above the maximum specified in a zone.	DTS/DPF 3.2 Where a building incorporates dwellings above ground level and includes at least 15% affordable housing, the maximum building height specified in any relevant zone policy can be increased by 1 building level in the: (a) Business Neighbourhood Zone (b) City Living Zone (c) Established Neighbourhood Zone (d) General Neighbourhood Zone (e) Hills Neighbourhood Zone (f) Housing Diversity Neighbourhood Zone (g) Neighbourhood Zone (h) Master Planned Neighbourhood Zone (i) Master Planned Renewal Zone (j) Master Planned Township Zone (k) Rural Neighbourhood Zone (l) Suburban Business Zone (m) Suburban Neighbourhood Zone (n) Township Neighbourhood Zone (o) Township Zone (p) Urban Renewal Neighbourhood Zone (q) Waterfront Neighbourhood Zone and up to 30% in any other zone, except where: (a) the development is located within the Character Area Overlay or Historic Area Overlay or (b) other height incentives already apply to the development.
Movement and Car Parking	
PO 4.1 Sufficient car parking is provided to meet the needs of occupants of affordable housing.	DTS/DPF 4.1 Dwellings constituting affordable housing are provided with car parking in accordance with the following: (a) 0.3 carparks per dwelling within a building which incorporates dwellings located above ground level within either: (i) 200 metres of any section of road reserve along which a bus service operates as a high frequency public transit service(2) (ii) is within 400 metres of a bus interchange(1) (iii) is within 400 metres of an O-Bahn interchange(1) (iv) is within 400 metres of a passenger rail station(1) (v) is within 400 metres of a passenger tram station(1) (vi) is within 400 metres of the Adelaide Parklands. or (b) 1 carpark per dwelling for any other dwelling. [NOTE(S): (1) Measured from an area that contains any platform(s), shelter(s) or stop(s) where people congregate for the purpose waiting to board a bus, tram or train, but does not include areas used for the parking of vehicles. (2) A high frequency public transit service is a route serviced every 15 minutes between 7.30am and 6.30pm Monday to Friday and every 30 minutes at night, Saturday, Sunday and public holidays until 10pm.]

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the applicant for the development is the South Australian Housing Authority (or an agent acting on behalf of the South Australian Housing Authority), residential development or land division (other than an excluded land division): (a) that comprises 20 or more dwellings or residential allotments and is described in the application documentation as intending to provide affordable housing or (b) that is described in the application documentation as intending to provide affordable housing and the applicant is seeking to access one or more of the planning concessions outlined in the Affordable Housing Overlay DTS/DPF 3.1, 3.2 or 4.1 or (c) that is described in the application documentation as intending to include affordable housing of any number of dwellings or residential allotments	Minister responsible for administering the *South Australian Housing Trust Act 1995.*	To provide direction on the conditions required to secure the provision of dwellings or allotments for affordable housing.	Development of a class to which Schedule 9 clause 3 item 20 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Aircraft Noise Exposure Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development sensitive to aircraft noise is designed and located to manage noise intrusion to reduce land use conflict and protect human health.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Buildings that accommodate activities sensitive to aircraft noise are designed and located to minimise aircraft noise intrusion and provide appropriate interior acoustic amenity.	DTS/DPF 1.1 Buildings accommodating sensitive receivers are not located within an area having an ANEF value of 30 or more.
Built Form	
PO 2.1 Additions to buildings involving the addition or extension of habitable rooms are designed and located to minimise aircraft noise intrusion and provide appropriate interior acoustic amenity.	DTS/DPF 2.1 Dwelling additions involving the addition or extension of habitable rooms: (a) do not result in an increase in the total floor area of the existing dwelling by greater than 50 percent and (b) do not occur in areas having an ANEF value of 30 or more.
Land Division	
PO 3.1 Land division does not increase the number of allotments used for sensitive receivers in areas adversely affected by aircraft noise to mitigate community exposure to potential adverse environmental and amenity impacts generated by aircraft movements.	DTS/DPF 3.1 Land division: (a) within an area having an ANEF value of less than 30 or (b) within an area having an ANEF value of 30 or more and:

	(i) does not result in any additional allotments or (ii) none of the allotments will accommodate a sensitive receiver.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Airport Building Heights (Aircraft Landing Areas) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of potential impacts of buildings on the operational and safety requirements of aircraft landing areas.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Building height does not pose a hazard to the operation of an aircraft landing area.	DTS/DPF 1.1 The distance from any part of a runway centreline to the closest point of the building is greater than 30 times building height.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Airport Building Heights (Regulated) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of potential impacts of buildings and generated emissions to maintain operational and safety requirements of registered and certified commercial and military airfields, airports, airstrips and helicopter landing sites.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Building height does not pose a hazard to the operation of a certified or registered aerodrome.	DTS/DPF 1.1 Buildings are located outside the area identified as 'All structures' (no height limit is prescribed) and do not exceed the height specified in the Airport Building Heights (Regulated) Overlay which applies to the subject site as shown on the SA Property and Planning Atlas. In instances where more than one value applies to the site, the lowest value relevant to the site of the proposed development is applicable.
PO 1.2 Exhaust stacks are designed and sited to minimise plume impacts on aircraft movements associated with a certified or registered aerodrome.	DTS/DPF 1.2 Development does not include exhaust stacks.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development: (a) building located in an area identified as 'All structures' (no height limit is prescribed) or will exceed the height specified in the *Airport Building Heights (Regulated) Overlay* (b) building comprising exhaust stacks that generates plumes, or may cause plumes to be generated, above a height specified in the *Airport Building Heights (Regulated) Overlay.*	The airport-operator company for the relevant airport within the meaning of the *Airports Act 1996* of the Commonwealth or, if there is no airport-operator company, the Secretary of the Minister responsible for the administration of the *Airports Act 1996* of the Commonwealth.	To provide expert assessment and direction to the relevant authority on potential impacts on the safety and operation of aviation activities.	Development of a class to which Schedule 9 clause 3 item 1 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Building Near Airfields Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Maintain the operational and safety requirements of certified commercial and military airfields, airports, airstrips and helicopter landing sites through management of non-residential lighting, turbulence and activities that may attract or result in the congregation of wildlife.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Outdoor lighting associated with a non-residential use does not pose a hazard to commercial or military aircraft operations.	DTS/DPF 1.1 Development: (a) primarily or wholly for residential purposes or (b) for non-residential purposes that does not incorporate outdoor floodlighting.
PO 1.2 Development likely to attract or result in the congregation of wildlife is adequately separated from airfields to minimise the potential for aircraft wildlife strike.	DTS/DPF 1.2 All development except where it comprises one or more of the following located not less than 3km from the boundaries of an airport used by commercial or military aircraft:

	(a) food packing/processing plant (b) horticulture (c) intensive animal husbandry (d) showground (e) waste management facility (f) waste transfer station (g) wetland (h) wildlife sanctuary.
PO 1.3 Buildings are adequately separated from runways and other take-off and landing facilities within certified or registered aerodromes to minimise the potential for building-generated turbulence and windshear that may pose a safety hazard to aircraft flight movement.	DTS/DPF 1.3 The distance from any part of a runway centreline to the closest point of the building is not less than 35 times the building height.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Character Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Valued streetscape characteristics and development patterns are reinforced through contextually responsive development, design and adaptive reuse that responds to the attributes expressed in the Character Area Statement.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All Development	
PO 1.1 All development is undertaken having consideration to the valued attributes expressed in the Character Area Statement.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 The form of new buildings and structures that are visible from the public realm are consistent with the valued streetscape characteristics of the character area.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is consistent with the prevailing building and wall heights in the character area.	DTS/DPF 2.2 None are applicable.
PO 2.3 Design and architectural detailing of street-facing buildings (including but not limited to roof pitch and form, openings, chimneys and verandahs) are consistent with the prevailing characteristics in the character area.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development is consistent with the prevailing front and side boundary setback pattern in the character area.	DTS/DPF 2.4 None are applicable.
PO 2.5 Materials are either consistent with or complement those within the character area.	DTS/DPF 2.5 None are applicable.
Alterations and Additions	
PO 3.1 Additions and alterations do not adversely impact on the streetscape character.	DTS/DPF 3.1 Additions and alterations: (a) are fully contained within the roof space of a building with no external alterations made to the building elevation facing the primary street or (b) meet all of the following: (i) do not include any development forward of the front façade building line (ii) any side or rear extensions are no closer to the side boundary than the existing building (iii) do not involve the construction or alteration of a second or subsequent building level.
PO 3.2 Adaptive reuse and revitalisation of buildings to retain local character consistent with the Character Area Statement.	DTS/DPF 3.2 None are applicable.
Ancillary Development	
PO 4.1 Ancillary development, including carports, outbuildings and garages, complements the character of the area and associated building(s).	DTS/DPF 4.1 None are applicable.
PO 4.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).	DTS/DPF 4.2 None are applicable.
PO 4.3 Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, be below the parapet line, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.	DTS/DPF 4.3 None are applicable.
PO 4.4 Fencing and gates closer to a street boundary (other than a laneway) than the elevation of the associated building are consistent with the traditional period, style and form of the of the associated building.	DTS/DPF 4.4 None are applicable.
Land Division	
PO 5.1 Land division creates allotments that are: (a) compatible with the surrounding pattern of subdivision in the character area (b) of a dimension to accommodate buildings of a bulk and scale that reflect existing buildings and setbacks in the character area.	DTS/DPF 5.1 None are applicable.
Context and Streetscape Amenity	
PO 6.1 The width of driveways and other vehicle access ways are consistent with the prevalent width of existing driveways in the character area.	DTS/DPF 6.1 None are applicable.
PO 6.2 Development maintains the valued landscape pattern and characteristics that contribute to the character area, except where they compromise safety, create nuisance, or impact adversely on existing buildings or infrastructure.	DTS/DPF 6.2 None are applicable.

Character Area Statements

Statement#	Statement
Character Areas affecting Alexandrina Council	
AlexC1	**Milang Character Area Statement (Alex-C1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	Small scale shops. Daranda Terrace comprises tourism and waterfront recreation activities.
Allotments, subdivision and built form patterns	Buildings typically of square or rectangular floor plans. Front and side boundary setbacks are generally consistent.
Architectural styles, detailing and built form features	Gable, hipped or pitches roofs and verandahs. Advertisements comprise small signs under verandahs and bellow parapets.
Building height	Predominantly single storey.
Materials	Stone. Slate. Rendered masonry walling. Brick and stone quoins. Corrugated iron. Shingle and slate roofing.
Fencing	*[Not stated]*
Setting, landscaping, streetscape and public realm features	Car parking and service areas are to the rear of buildings or screened by fencing or landscaping.
Representative Buildings	*[Not identified]*

Character Areas affecting The Barossa Council	
BaroC1	**Eden Valley Character Area Statement (Baro-C1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	Pre-1950.
Allotments, subdivision and built form patterns	Grid/organic street pattern.
Architectural styles, detailing and built form features	Mixture of housing styles.
Building height	*[Not stated]*
Materials	*[Not stated]*
Fencing	*[Not stated]*
Setting, landscaping, streetscape and public realm features	'Traditional' verge treatments exist in the main street (front boundary, footpath, street trees and gutter).
Representative Buildings	*[Not identified]*

BaroC2	**Springton Character Area Statement (Baro-C2)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	Pre-1950.
Allotments, subdivision and built form patterns	Grid pattern.
Architectural styles, detailing and built form features	Mixture of housing styles of relatively modern design.
Building height	Generally single storey detached dwellings.
Materials	*[Not stated]*
Fencing	*[Not stated]*
Setting, landscaping, streetscape and public realm features	'Traditional' verge treatments exist in the main street (front boundary, footpath, street trees and gutter).
Representative Buildings	*[Not identified]*

BaroC3	**Angaston Character Area Statement (Baro-C3)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	Late 1800s. 1920s, second wave of prosperity for Angaston in the 20th Century.
Allotments, subdivision and built form patterns	*[Not stated]*
Architectural styles, detailing and built form features	Residences in 1879-80. Residences of the 1920s.
Building height	*[Not stated]*
Materials	Local stone.
Fencing	*[Not stated]*
Setting, landscaping, streetscape and public realm features	Tree lined streets, attractive gardens, varied topography, coprosma hedges in front of some houses (retaining early post and wire fence structures), mature gums along the creek, and cypress hedges to many 1920s dwellings.
Representative Buildings	Identified - refer to SA planning database.

Character Areas affecting City of Campbelltown	
	Poet's Corner, Tranmere Character Area Statement (Cam-C1) The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Statement#		Statement
CamC1	Eras, themes and context	Residential.
	Allotments, subdivision and built form patterns	Low site coverage, large front and side building set-backs from property boundaries. Substantial allotment widths, consistent pattern of driveway access from the street to garaging and large landscaped open spaces. Detached dwellings at low densities.
	Architectural styles, detailing and built form features	Villas and inter-war bungalows on large allotments with wide frontages, set within well-established landscaped gardens and streets. Consistent roof forms and pitches. Garages, carports and outbuildings are low in scale and generally located to the rear of dwellings or to the side, well set back from the front facade.
	Building height	Predominantly one storey buildings, with attic or loft spaces contained within the roof form, or two storey additions to the rear of dwellings.
	Materials	Red brick, stone and masonry building materials. Roofs of terracotta tiles or red painted corrugated iron.
	Fencing	Low, open fencing to 1 metre in height, providing views to the built form. Low picket fencing, solid brush fencing, stone or masonry materials, wire and creepers, and hedges. Some high masonry fences specifically along Magill and Glynburn Roads.
	Setting, landscaping, streetscape and public realm features	Avenues of street tree planting make an important contribution to the landscape character and visual amenity. Generally single width driveways, located to protect mature street trees. Lawns and vegetated gardens.
	Representative Buildings	Identified - refer to SA planning database.

Character Areas affecting Clare and Gilbert Valleys Council

Auburn Character Area Statement (CGV-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

CGVC1		
	Eras, themes and context	Buildings constructed in the 19th century.
	Allotments, subdivision and built form patterns	Original land division pattern, street layout and setback patterns.
	Architectural styles, detailing and built form features	Verandahs. Original architectural styles.
	Building height	1-2 storeys, with 2 storey buildings generally for retail and civic uses.
	Materials	*[Not stated]*
	Fencing	Front fences and gates of timber pickets, pier and plinth masonry, wrought iron, brush or masonry not exceeding 1.2m.
	Setting, landscaping, streetscape and public realm features	Established trees. Residential amenity.
	Representative Buildings	Identified - refer to SA planning database.

Character Areas affecting City of Holdfast Bay

Seacliff Character Area Statement (HoB-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

HoBC1		
	Eras, themes and context	1880s to 1920s west of the railway line. 1930s to 1960s east of the railway line.
	Allotments, subdivision and built form patterns	19th century rectilinear road pattern, with small allotment sizes. Large allotments and frontages. Narrow streets, limited street trees. Reduced setbacks. Varied front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Range of architectural styles. Still some remaining examples of bungalows west of the railway line. Influence of Spanish Mission style architecture. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees. Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Single storey.
	Materials	Red and cream brick. Stone. Render. Corrugated iron roofing. Terra cotta tile roofing. Varied building materials across the area.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building.
	Setting, landscaping, streetscape and public realm features	Railway line is a significant feature, with associated landscape corridor. Sloping landform. Coastal views.
	Representative	*[Not identified]*

Statement#	Statement	
	Buildings	
HoBC2	**Brighton Character Area Statement (HoB-C2)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1900s to 1930s.
	Allotments, subdivision and built form patterns	Medium to large sized allotments. Linear and curvilinear street layout adjacent Dunluce Castle. Large allotment sizes and frontages. Large front setbacks. Small side setbacks, including driveway access down one side of the site and a small setback from the non-driveway side boundary.
	Architectural styles, detailing and built form features	Federation style dwellings. Inter-War style dwellings including: Tudor Revival, Californian bungalow, Art Deco, Some Spanish mission. Some Post-War Austerity and Conventional style dwellings. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees. Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings are low in scale and generally located unobtrusively to the rear of dwellings or to the side, well set back from the front facade.
	Building height	Single storey.
	Materials	Corrugated iron or terracotta tile roofing. Brick, stone, timber and part-rendered finishes. Fenestration, doorways, windows, eaves and roof forms generally dark in colour.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Woven wire. Low masonry with geometric steel. Low masonry (stepped). Brush fencing up to 1.4m in height with either rolled or metal capping.
	Setting, landscaping, streetscape and public realm features	Heavily landscaped settings, mature trees. Mature and uniform street tree settings on Linwood and Athelney Streets. Outlook toward a row of heritage listed Eucalyptus trees on Alfreda Street. Heritage listed Dunluce Castle.
	Representative Buildings	*[Not identified]*
HoBC3	**Glenelg East Character Area Statement (HoB-C3)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1900s to 1930s.
	Allotments, subdivision and built form patterns	Medium to large sized allotments. Garden suburb street layout, centred around Da Costa Park in the area south of the tramway, and Sandison reserve north of the tramway. Original subdivisions of Helmsdale, Grovene and Dunleath. Predominantly large allotment sizes and frontages south of the tramway, larger allotment sizes and frontages north of the tramway. Large front setbacks. Small side setbacks on one side, smaller on the other.
	Architectural styles, detailing and built form features	Federation style dwellings. Inter-War style dwellings including: Tudor Revival, Californian bungalow, Art Deco, Some Spanish mission. Some Post-War Austerity and Conventional style dwellings. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees. Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings are low in scale and generally located unobtrusively to the rear of dwellings or to the side, well set back from the front facade.
	Building height	Single storey.
	Materials	Consistent with the materials used in the 1920s to 1930s period. Corrugated iron or terracotta tile roofing. Brick, sandstone, and stucco and part-rendered finishes. Roofing, facades and fenestration in natural red brick and terracotta colouration. Timber joinery including fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables.

Statement#		Statement
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Woven wire. Low masonry with geometric steel. Low masonry (stepped). Cyclone wire and steel or timber frame. Brush fencing up to 1.4m in height with either rolled or metal capping.
	Setting, landscaping, streetscape and public realm features	Centred around Da Costa Park historic area, and its associated built form and open space. Glenelg Tramway and linear reserve between Maxwell and Dunbar Terraces. Norfolk Island pines and other mature street trees throughout.
	Representative Buildings	*[Not identified]*
HoBC4	**Glenelg Character Area Statement (HoB-C4)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1840s - 1930s. Earliest period of settlement of South Australia. Subdivision in 1839 by Light Finnis and Co. Growth period in 1920s associated with increase in holidaymaking and leisure pursuits.
	Allotments, subdivision and built form patterns	Uniform street layout, an extension of the original Glenelg Village set out in 1839 by Colonel William Light. Rear laneways to service dwellings on Gordon and Rose Streets, and buildings on Brighton Road. Range allotment sizes. Medium to very large frontages. Small setbacks. Side setbacks provide visual spacing between dwellings. Consistency of setbacks in streetscapes.
	Architectural styles, detailing and built form features	Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Inter-War buildings, mostly Bungalows. Low scale to medium, relatively small dimensions and basic building details. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings are low in scale and generally located unobtrusively to the rear of dwellings or to the side, well set back from the front facade.
	Building height	Predominantly single storey but some two storey.
	Materials	Consistent with the materials used in the 1840s to 1930s period.-Bluestone or sandstone walls (unpainted). Some brick. Brick or rendered quoin work and plinths. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings. Cyclone wire and steel or timber frame.
	Setting, landscaping, streetscape and public realm features	Clearly defined setbacks and uniform front landscaping.
	Representative Buildings	*[Not identified]*
	Glenelg North (West of Tapleys Hill Road) Character Area Statement (HoB-C5) The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1850s to 1920s.
	Allotments, subdivision and built form patterns	Rectangular allotment shapes in varying sizes. Some allotments have been amalgamated to make way for residential flat buildings and units. Mix of front setback patterns, with older dwellings having small front setbacks, and later dwellings set further back from the street. Generally small front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Small scale, simplified building forms. Single storey detached and semi-detached villas.

Statement#		Statement
HoBC5		Single storey detached cottages. Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Some Inter-War buildings, mostly Tudor style. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Predominantly single storey but some two storey.
	Materials	Consistent with the materials used in the 1840s to 1920s period.-Bluestone or sandstone walls. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.
	Setting, landscaping, streetscape and public realm features	Small suburban feel, within proximity to the open spaces of the Patawalonga Reserve. Strong sense of uniformity of buildings in some areas.
	Representative Buildings	*[Not identified]*
HoBC6	**Glenelg North (East of Tapleys Hill Road) Character Area Statement (HoB-C6)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1880s to 1920s.
	Allotments, subdivision and built form patterns	Orderly subdivision pattern. Originally subdivided in 1841. Range of allotment sizes with wide frontages. Smaller allotment sizes with rear laneways between Alison and Bagshaw Streets. Medium front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Larger scale single storey detached dwellings. Bungalow style dwellings with large front and side boundary setbacks. Examples of smaller scale dwellings between Alison and Bagshaw Streets. Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Some Inter-War buildings, mostly Tudor style. Many dwellings without vehicle garaging. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade.
	Building height	Predominantly single storey but some two storey.
	Materials	Consistent with the materials used in the 1840s to 1920s period. Sandstone and red brick facades. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.
	Setting, landscaping, streetscape and public realm features	Combination of wide, open streetscapes, and more relatively narrow laneways. Frontages on MacFarlane and Bagshaw Streets facing the Old Gum Tree Reserve. St Leonard's Primary School is a significant presence to the locality.

Character Areas affecting City of Marion		
MarC1	**Edwardstown, Glandore, Glengowrie and Plympton Park Character Area Statement (Mar-C1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1920s to 1950.
	Allotments, subdivision and built form patterns	Conventional grid type pattern of streets. Large allotments. Predominantly detached dwellings. Some examples of semi-detached dwellings in Glandore and Glengowrie.
	Architectural styles, detailing and built form features	Single storey detached dwellings. Occasional single storey semi-detached dwellings. Mixture of Bungalow, Art Deco, Spanish Mission, Tudor. Articulated roof forms (gable, Dutch gable, hips). Chimneys, projecting front verandahs, porches, porticos. Garages and carports located behind main face of dwelling.
	Building height	Single storey. 2nd storey in roofline.
	Materials	Timber frame windows. External walls constructed of mixture of red brick, painted brick, stone and rendered masonry. Roofing - galvanised iron/replaced with colorbond, terracotta tiles.
	Fencing	Low height - rendered masonry, timber picket, post and wire, tubular.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Well maintained traditional gardens. Mature vegetation in private properties. Low scale dwellings. Housing well setback from street.
	Representative Buildings	*[Not identified]*
MarC2	**Marion Character Area Statement (Mar-C2)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Original housing stock - predominantly 1950s to 1970s. More recent infill scattered throughout.
	Allotments, subdivision and built form patterns	Grid type pattern of streets, partly angular due to diagonal alignment of railway resulting in some irregular shaped allotments. Large allotments. Detached dwellings.
	Architectural styles, detailing and built form features	Predominantly single storey detached dwellings. Small number of 2 storey dwellings. Original housing stock - mixture of austerity, conventional 1950s. Roof forms (gable, hips).
	Building height	Original housing stock is generally single storey. Recent dwellings are predominantly single storey however there are more examples of 2 storey.
	Materials	External walls predominantly a mixture of brick (variety of colours) and rendered masonry. Roofing - original housing has terracotta tiles. More recent replacement housing has colorbond.
	Fencing	No dominant fencing style or material. Mixed with open front yards.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Well maintained leafy garden character. Mature vegetation in private properties. Low scale dwellings. Housing well setback from street. Visual separation between houses.
	Representative Buildings	*[Not identified]*
Character Areas affecting Mid Murray Council		
MiMuC1	**Residential Character Area Statement (MiMu-C1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Buildings of interest reflecting the original development of the town.
	Allotments, subdivision and built form patterns	Early subdivision south of Victoria Street, between the cliff face and east of Walker and Berryman Avenue. Larger allotments reflecting the original subdivision pattern. Wide street frontages and generous setbacks to boundaries.
	Architectural styles, detailing and built form features	Provision of mainly detached dwellings with some semi-detached dwellings.
	Building height	Buildings up to two storeys in height.

Statement#	Statement	
	Materials	Original or otherwise complementary materials, colours and finishes.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Landscaping to soften development.
	Representative Buildings	[Not identified]

Character Areas affecting City of Mitcham

MitC1

Plains Character Area Statement (Mit-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	Mix of pre-war, inter-war and post-war housing of a low density detached nature comprising symmetrical cottages, villas, bungalows, Tudor, art deco and austerity.
Allotments, subdivision and built form patterns	Established traditional grid neighbourhoods, with a high presence of pre-1940s housing stock. Consistent allotment pattern, frontage widths and setbacks of buildings to streets and to each other creating a strong rhythm and pattern of development. Consistent pattern of side setbacks, which are generally larger on one side of allotments. Low site coverage supporting strong landscaped settings and space that frame and give context to dwelling forms. Absence of row dwellings and residential flat buildings.
Architectural styles, detailing and built form features	Single storey detached dwellings at low densities with regular large front and side setbacks. Intact pattern of setbacks and spacings between buildings. Prominence of gables and verandahs which are reflective of the building types in these areas. The use of parapets to front facades are a rarely visible built form element in the area's established streetscape character. Roof forms consist of gabled, hipped and Dutch gable at pitches that reflect the prevailing building size, style and era. High solid to void ratios within building facades. Garaging is a minor built form element and subordinate to the principal dwelling form when viewed from the streetscape. Garaging is in the form of single garages situated to the side of dwellings, setback behind the front building line and comprising wall heights and roof forms that are lower than the associated dwelling.
Building height	Single storey appearance with second storeys typically not visible from the street and characteristically integrated within the roof form or behind roof ridges.
Materials	Building materials consist of traditional housing materials such as brick, stone and rendered masonry finishes to walls and tile or corrugated metal roofs. Dwelling facades display a range of materiality and finishes producing a richness of textures and colour schemes.
Fencing	Low and open fencing styles consisting of timber picket, post and wire, low stone or brick structures or hedges. Limited use of high solid fencing except along railway or arterial road alignments.
Setting, landscaping, streetscape and public realm features	Important contribution of front yards, landscaping and street trees to overall character of the area. Front yards are generously landscaped spaces with a high proportion of vegetation to paved surfaces. Driveways are aligned to side boundaries and are of single width. Existing street trees and road verges form important streetscape features that contribute to the public realm appearance producing a pattern of plantings protected by isolating driveway entranceway and crossover locations.
Representative Buildings	*[Not identified]*

MitC2

Springfield Character Area Statement (Mit-C2)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	1930s to present. Pre and post war housing stock as well as contemporary housing styles. Sense of grandeur and spaciousness.
Allotments, subdivision and built form patterns	Intact original subdivision pattern. Winding road network that follows land form and results in irregular shaped allotments. Detached dwellings on very large allotments and very wide frontages which contribute to sense of spaciousness and scale. Absence of row dwellings and residential flat buildings. Buildings are set back very large distances from street frontages and side boundaries. Consistent pattern of side setbacks, which are generally larger on one side of allotments. Low site coverage of buildings across large sites. Strong landscape setting for buildings, particularly in front yards and between buildings, contributes to sense of grandeur.
Architectural styles, detailing and built form features	Eclectic mix of housing stock, styles and architectural features. High quality materials, finishes and detailing associated with grand homes and mansions. Increasing gradient of slopes to the east of the Area promotes split level designs and undercroft garaging formats.
Building height	Predominantly buildings of up to two storeys, with three storeys where cut into sloping sites (incorporating undercroft garaging).
Materials	Brick, stone, rendered masonry finishes to walls. Tiles or metal roofing. High solid to void ratio to facades. Visible retaining walls typically stone or rendered in material.
Fencing	Diversity of fencing treatments and styles. Solid fencing above 1 metre and walls screened with dense landscaping along the street frontage.
Setting, landscaping, streetscape and public realm features	A mixture of mature Eucalypt and exotic street trees provide an overall visual coherence to the public realm. Retaining walls to street frontages on high side of street, with raised front gardens above. Formal garden settings with mature trees are an important element in established character.
Representative Buildings	*[Not identified]*

Hills Character Area Statement (Mit-C3)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Statement#	Statement	
MitC3	Eras, themes and context	Low density spacious setting with detached dwellings on large sites within natural vegetated settings with very few other housing types.
	Allotments, subdivision and built form patterns	Variations in land forms, including some steeply sloping locations, produce curvilinear road patterns and irregular shaped allotments in terms of size and frontage widths. Land slope leads to a variety of front setbacks and informs dwelling orientation and height relative to the street. Side setbacks are generally larger on one side of allotments. Simple housing forms of a single and two storey nature (including spilt level) that respond to land form. Garaging typically to side of dwelling or as an undercroft structure. Garaging is only forward of dwellings on steeply sloping sites and is in the form of standalone simple open structures. Row dwellings, group dwellings and residential flat buildings are not representative of the predominant built form in the area.
	Architectural styles, detailing and built form features	The area's built form exhibits a sense of spaciousness due to limited site coverage and generous front and side setbacks. Development responds to land form and does so in a way that blends with landscape character by minimising cut and fill and vegetation clearance. Where visible to the street, large differences in levels between dwellings and roadways are battered and landscaped. Where parking structures are forward of building lines, they are of an open form and low roof profile.
	Building height	Low profile roof forms and pitches reflect the land form are a common feature. One and two storeys typically responding to the land form.
	Materials	Building materials, colours and finishes assist in blending and receding buildings into the natural landscape character rather than openly contrasting and drawing attention to buildings. Predominantly darker subdued natural earthy tones for wall and roof materials. Lighter or paler colour complement the surrounding landscape in their tone. Highly reflective and bright, vivid colour finishes to walls and roof materials, such as stark white or similar are rarely found in the area.
	Fencing	No presence of front fencing forward of the building line is a characteristic of the area, and in limited cases where front fencing is present, it is low or open in nature. The area features retaining walls that are mostly screened or are natural in form using mainly stone or natural rock, with walls being low in height, terraced and set well back from boundaries and providing landscaped space. High concrete sleeper walls are not a part of the built form streetscape.
	Setting, landscaping, streetscape and public realm features	Strong landscape character attributes derive from extensive retention of native vegetation on sites, between buildings and within informal road verges. The presence of vegetation on sites, is a defining feature of the area. Streets retain an open, often spacious setting characterised by spaces between buildings which contain landscaping. Driveways on sloping sites meander within front yards of dwellings, with minimal cut and fill of the land surface, and feature landscaping on their edges.
	Representative Buildings	*[Not identified]*

Character Areas affecting City of Norwood, Payneham and St Peters

Evandale/Maylands/Stepney Character Area Statement (NPSP-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

NPSPC1		
	Eras, themes and context	Pre-1940. Primarily low-scale and low density residential. Detached (including battleaxe in Maylands, Evandale and Payneham), semi-detached and group dwellings.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns. Setbacks from boundaries creating space between dwellings.
	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. Semi-detached dwellings often presenting as single dwellings.
	Building height	Single storey, with some two storey to the rear of buildings (with single storey appearance to primary street frontage).
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*

Hackney Character Area Statement (NPSP-C2)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

NPSPC2		
	Eras, themes and context	Pre- 1940. Primarily low-scale and low density residential. Detached, semi-detached, group and row dwellings. Residential flat buildings.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns. Small areas of Hackney located along the southern side of Richmond Street and between Hackney Road and St Peters College. Existing development comprises a mix of compact and large allotments with a number of Local Heritage Places, pre-1940s dwellings and multi-unit sites.
	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. Semi-detached dwellings often presenting as single dwellings.
	Building height	Two storey along Hackney Road. In other locations, single storey, with some two storey to the rear of buildings (with single storey appearance to primary street frontage).
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*

Statement#	Statement	
NPSPC3	**Heathpool/Marryatville Character Area Statement (NPSP-C3)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Pre-1940. Primarily low-scale and low density residential. Detached (including battleaxe in Marryatville east and west of Clapton Road), semi-detached and group dwellings. Residential flat buildings in Marryatville east and west of Clapton Road.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns.
	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. Semi-detached dwellings often presenting as single dwellings.
	Building height	Single storey, with some two storey to the rear of buildings (with single storey appearance to primary street frontage).
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*
NPSPC4	**St Peters/Joslin/Royston Park Character Area Statement (NPSP-C4)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Pre-1940. Primarily low-scale and low density residential. Detached dwellings. Semi-detached dwellings in St Peters and College Park.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns.
	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. Semi-detached dwellings often presenting as single dwellings.
	Building height	Single storey, with some two storey to the rear of buildings (with single storey appearance to primary street frontage).
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*
NPSPC5	**Trinity Gardens/St Morris Character Area Statement (NPSP-C5)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Pre-1940. Primarily low-scale and low density residential. Detached (including battleaxe in some locations), semi-detached dwellings. Group dwellings in St Morris.
	Allotments, subdivision and built form patterns	Original, pre-1940s land division patterns.
	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. Semi-detached dwellings often presenting as single dwellings.
	Building height	Single storey.
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Vehicle garaging, driveways and front fences are not dominant streetscape elements. In most areas mature street tree plantings provide an overall visual coherence to the streets. Soft front landscaping, including trees. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*
	Residential Character (Norwood) Area Statement (NPSP-C6) The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Residential. Detached (including battleaxe), semi-detached, row and group dwellings. Residential flat buildings. Although the built form character throughout Norwood is relatively varied, there remains a strong theme associated with the original built form, which includes a significant number of Local Heritage Places and buildings constructed before 1940.
	Allotments, subdivision and built form patterns	Rectilinear pattern of wide tree-lined major streets, intersected by narrow minor streets, with various eras of development overlaid. Broad mix of allotment sizes and a diversity of residential accommodation options. The regular street grid pattern and the high level of vegetation, including mature street trees and landscaped gardens, are elements that assist in unifying the various eras of built form development in Norwood.

Statement#	Statement	
NPSPC6	Architectural styles, detailing and built form features	Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions. A mix of housing styles, including workers cottages, bungalows and villas and a variety of post war dwellings, including walk-up flats, townhouses and a range of contemporary detached, attached and group housing styles. This has, over the years, established a broad mix of allotment sizes and provided a diversity of residential accommodation options, including affordable housing. Some undercroft or underground garages along western side of Osmond Terrace. Semi-detached dwellings often presenting as single dwellings.
	Building height	Generally single storey streetscape appearance.
	Materials	Varied, traditional materials.
	Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
	Setting, landscaping, streetscape and public realm features	Distinct rectilinear pattern of wide tree-lined major streets, intersected by narrow minor streets. Some limited advertising and signage which complements scale and architecture of associated buildings.
	Representative Buildings	*[Not identified]*

Character Areas affecting City of Playford

Elizabeth South Character Area Statement (Play-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Statement#		
PlayC1	Eras, themes and context	Late 1950s to early 1960s.
	Allotments, subdivision and built form patterns	First stage of the post war planned Garden City north of Adelaide. Layout and land division pattern involving irregular allotment shapes and curvilinear street pattern, typical of the planning and construction of Trust development in the late 1950s and early 1960s. Large proportion of open space as parks and gardens. Parks and mature trees in the landscape road reserve make a significant contribution to the character and amenity of the area. Rectangular allotment shapes in varying sizes. Some allotments have been amalgamated to make way for residential flat buildings and units. Generally large front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Small scale, simplified building forms consistent with South Australian Housing Trust development of the late 1950s early 1960s. Single storey semi-detached and detached buildings. Dwellings being of brick and concrete block construction with varying stylistic treatments. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. Rectilinear plan forms. Low scale. Hipped roof forms.
	Building heights	Predominantly single storey.
	Materials	Consistent with the materials used in the late 1950s to early 1960s period. Brick or rendered finishes. Corrugated iron roofing. Consistent, original windows dimensions facing the street. Main entrance incorporated into front elevation.
	Fencing	Where fencing exits, it is predominantly in the form of low style open fencing along the primary road frontage. Corrugated iron fencing evident to side and rear boundaries.
	Setting, landscaping, streetscape and public realm features	Low scale suburban feel, within proximity to the open spaces. Strong sense of uniformity of buildings.
	Representative Buildings	*[Not identified]*

Character Areas affecting City of Port Adelaide Enfield

Enfield Character Area Statement (PAdE-C1)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Statement#		
PAdEC1	Eras, themes and context	1900s - 1950s built development.
	Allotments, subdivision and built form patterns	"Garden suburb' street pattern and modified grid. Generous allotment sizes with wide frontages and substantial rear gardens. Consistent front set-backs.
	Architectural styles, detailing and built form features	The area is large and features a wide variety of housing styles including bungalows, villas, Tudors, art deco, inter-war, cottages and mansions generally built before the 1940s. There is also a significant stock of quality dwellings built between 1940 and 1950 that augment the pre 1940s dwellings and make an important contribution to the character of the area. There is a notable concentration of bungalows in the western portion of the area and this style is a defining feature in this part of the area.
	Building height	Single storey.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
	Setting, landscaping, streetscape and public realm features	The 1920s street pattern in this area is distinctive and reflects the garden suburb approach to town planning and subdivision. It results in wide nature strips and reserves that together with mature, well landscaped gardens create road verges which contribute to an open and high quality residential character.
	Representative Buildings	*[Not identified]*

Glanville (East of Carlisle) Character Area Statement (PAdE-C2)

The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.

The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Statement#		
PAdEC2	Eras, themes and context	1860s - 1920s built development.
	Allotments, subdivision and built form patterns	The allotment pattern is shaped to accommodate the alignments of Carlisle Street and Causeway Road. Small allotment sizes with narrow frontages. Dwellings are built close to streets.
	Architectural styles, detailing and built form features	Housing styles include cottages, villas, inter-war and bungalows with cottages being the predominant and key defining feature in the area.
	Building height	Single storey.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with.

Statement#	Statement	
		Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
	Setting, landscaping, streetscape and public realm features	The area is nestled in to the north west of the Jervois Street bridge and contains many old workers' cottages. These are particularly prevalent in the area bound by Sutherland Street, Connor Street, Hart Street and Carlisle Street. The area's simple low rise housing is strongly counterpointed by the modern, multi -storey Port Adelaide waterfront development to the east of the Outer Harbour rail line and provides an important representation of the early settlement and historical development of Port Adelaide.
	Representative Buildings	*[Not identified]*
PAdEC3	**Largs / Largs North Character Area Statement (PAdE-C3)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1900s - 1960s built development.
	Allotments, subdivision and built form patterns	Grid pattern with predominately east -west running streets with the long axes of allotments running north-south. Allotments fronting Lady Gowrie Drive and Military Road configured with their long axes running east-west so that buildings address these roads. A high degree of consistency in front setbacks. Regular and generous rectangular allotments with wide frontages.
	Architectural styles, detailing and built form features	Wide range of housing styles including bungalows, villas, inter-war, Tudors, cottages and art deco. There is a strong concentration of pre 1940s built form.
	Building height	Predominately single storey but some two storey along parts of the Lady Gowrie Drive frontage.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences. Original hedges retained, restored and where appropriate, extended, (utilizing the same species of planting currently in existence) as an alternative to constructed fences.
	Setting, landscaping, streetscape and public realm features	The southern boundary of this area adjoins the Semaphore/Largs Historic Area. It abuts the coast and contains a significant number of dwellings built during the period from 1915-1940. It has a strong relationship with the coast and features tree lined streets with footpaths on both sides that provide vistas and ready walking access to the foreshore and beach. Wide allotment frontages with generous spacing between driveways make a significant contribution to the walkability of these footpaths and the character of the area. An imposing stand of Norfolk Island pines along Lady Gowrie Drive is a key feature of the area.
	Representative Buildings	*[Not identified]*
PAdEC4	**Rosewater Character Area Statement (PAdE-C4)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1900s - 1940s built development.
	Allotments, subdivision and built form patterns	Grid pattern distorted by the alignment of Newcastle Street. Small allotments with narrow frontages. Front setbacks are consistent on a street by street basis.
	Architectural styles, detailing and built form features	A variety of housing styles but cottages, villas and bungalows are the principle styles.
	Building height	Single storey.
	Materials	Materials of existing buildings retained where practicable and missing elements reinstated consistent with the style of building and era of its original construction.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
	Setting, landscaping, streetscape and public realm features	Newcastle Street is a well landscaped road that provides the main access into this area. It features well established avenue tree planting that includes plane trees and jacarandas. Simple, single storey, historic detached dwellings built on allotments with consistent widths laid out in a grid pattern, and the adjacent Mt Carmel school and the reserve to the north west, combine to establish a country town like character.
	Representative Buildings	*[Not identified]*
Character Areas affecting City of Prospect		
PrC1	**Suburban Neighbourhood 1 Character Area Statement (Pr-C1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Late 19th and Early 20th centuries residential. Limited post-1950s residential. Very low density and primarily detached dwellings.
	Allotments, subdivision and built form patterns	Original land division patterns following grid type street pattern and displaying rectangular, rectilinear allotments. Spacious allotments. Large allotment frontages. Large front setbacks. Street facing front dwelling facades. Large spaces around and between dwellings including generous and asymmetrical (one side larger than the other) side setbacks between dwellings. Typically two storey dwellings display consistent side boundary setbacks between building levels.
	Architectural styles, detailing and built form features	Majority bungalows and villas of a significant scale. Pitched roofs with their vertical proportion similar to wall height and typically around 25 to 49 degree pitch. Prominent front verandahs of bull-nose or concave design. Moderate front façade detailing and articulation (wall off-sets, verandahs and deep eaves) with walls with a solid to void ratio of greater than 1:1 and fenestrations showing a vertical prominence.
	Building height	Primarily single storey presentation to the street with two storey components sited behind. 1 to 2 storey dwellings with vertical proportions consistent with traditional dwellings (wall height at least 3 metres and no more than 3.6 metres for single storey and up to 7 metres for two storeys. Large scale buildings in context with large to very large allotments and frontages.
	Materials	Stone, brick and rendered finishes. Detailing around doors, windows, wall edges and gables. Limited colour palette for the majority of building façade (sandstone to reds; bluestone and grey tones) with colour highlights in the detailing.
	Fencing	Front fences forward of the building are of an open style and low in height (to 1.2 metres high). Fencing style associated with dwelling style and era of development. Some more solid fencing of standard height along major roads.
	Setting, landscaping, streetscape and public realm features	Leafy public realm that visually dominates or supports the built form. Extensively landscaped front yards with mature vegetation/tree canopy. Minimal hard and artificial surfaces. Mature vegetation in public realm. Garages and carports are designed and sited to be subordinate to the main dwelling. Access points are narrow and consolidated.
	Representative Buildings	*[Not identified]*

Statement#	Statement
PrC2	**Suburban Neighbourhood 2 Character Area Statement (Pr-C2)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	Late 19th and Early 20th centuries residential. Limited post-1950s infill residential. Primarily low density and low scale residential, including detached, semi-detached and row dwellings.
Allotments, subdivision and built form patterns	Original land division patterns following grid type street pattern and displaying rectangular, rectilinear allotments. Large allotments. Large allotment frontages. Large front setbacks along with reasonable side setbacks. Street facing front dwelling facades. Moderate spaces around dwellings including asymmetrical (one side larger than the other) side setbacks between dwellings. Typically two storey dwellings to display consistent side boundary setbacks between building levels.
Architectural styles, detailing and built form features	Mainly single storey detached bungalows, cottages and villas. Pitched roofs with the vertical proportion similar to wall height and typically around 25 to 49 degree pitch. Front verandahs (with bull-nose or concave design) with façade detailing and moderate articulation. Moderate front façade detailing and articulation (wall off-sets, verandahs and deep eaves) with walls with a solid to void ratio of greater than 1:1 and fenestrations showing a vertical prominence.
Building height	Primarily single storey presentation to the street with any two storey components sited behind. Predominantly 1 storey dwellings with vertical proportions consistent with traditional dwellings at least 3 metres and no more than 3.6 metres in wall height for single storey and up to 7 metres for two storeys. Moderate scale in context with low rise development, allotment size and frontages.
Materials	Stone, brick and rendered finishes. Detailing around doors, windows, wall edges and gables Limited colour palette for the majority of building façade and roof areas (sandstone to reds; bluestone and grey tones) with complementary colour highlights in the detailing.
Fencing	Front fences forward of the building are of an open style and low in height (to 1.2 metres high). Style associated with dwelling style and era of development. Some more solid fencing of standard height along major roads.
Setting, landscaping, streetscape and public realm features	Leafy public realm that supports the built form. Garages and carports are designed and sited to be subordinate to the main dwelling. Access points are narrow and consolidated. Well landscaped front yards with mature vegetation/tree canopy. Minimal hard and artificial surfaces. Front and side garden landscaping. Leafy, garden suburb character and visual separation between houses.
Representative Buildings	*[Not identified]*

Statement#	Statement
PrC3	**Suburban Neighbourhood 3 Character Area Statement (Pr-C3)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	Early 20th century residential. Some examples of residential infill comprising units, conventional and recent dwellings. Primarily low density and low scale residential including various dwelling types.
Allotments, subdivision and built form patterns	Original land division patterns following grid type street pattern and displaying rectangular, rectilinear allotments. Moderate sized allotments. Moderate to compact allotment frontages. Street facing front dwelling facades. Moderate to compact asymmetrical spaces between dwellings providing physical and visual separation between dwellings. Typically two storey dwellings to display consistent side boundary setbacks between building levels.
Architectural styles, detailing and built form features	Many bungalows with some cottages, Tudor and art deco housing. Pitched roofs with the vertical proportion similar to wall height and typically around 25 to 49 degree pitch. Front verandahs with façade detailing and moderate articulation (wall off-sets, verandahs and deep eaves) walls with a solid to void ratio of greater than 1:1 and fenestrations showing a vertical prominence.
Building height	Primarily single storey presentation to the street with two storey components sited behind. Predominantly 1 storey dwellings with vertical proportions consistent with traditional dwellings (at least 3 metres and no more than 3.6 metres in wall height). Moderate to compact scale in context with low rise development, allotment size and frontages.
Materials	Stone, brick and rendered finishes and durable materials. Detailing around doors, windows, wall edges and gables. Limited palette for the majority of building façade and roof areas with colour highlights in the detailing (sandstone to reds; bluestone and grey tones) with complementary colour highlights in the detailing.
Fencing	Front fences forward of the building are of an open style and low in height (to 1.2 metres high). Style associated with dwelling style and era of development. Some more solid fencing of standard height along major roads.
Setting, landscaping, streetscape and public realm features	Leafy public realm that supports the built form. Landscaped front yards with mature vegetation/tree canopy. Minimal hard and artificial surfaces. Leafy garden suburb character and maintaining visual separation between houses. Garages and carports are designed and sited to be subordinate to the main dwelling. Access points are narrow and consolidated.

Character Area affecting District Council of Tatiara

Statement#	Statement
TatC1	**Mundulla Character Area Statement (TatC1)** The Character Area Overlays identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	Pre-1950.
Allotments, subdivision and built form patterns	Original land division, large allotments. Buildings sited regularly and facing towards street frontages.
Architectural styles, detailing and built form features	Consistent roof pitches. Unity of design and scale.
Building height	Consistent, low scale.
Materials	Earthen colours. Materials consistent with pre-1950s buildings.
Fencing	Informal fencing.
Setting, landscaping, streetscape and public realm features	Individual and stands of trees, stone culverts, drainage and footpath system add to character of townscape. Informal street furniture, lighting, footpaths, road surface treatments, kerbing and guttering. Surrounded by well vegetated parklands and grazing land. Uncluttered appearance. Advertisements of traditional styles and scale consistent with the era.
Representative Buildings	[Not identified]

Character Areas affecting City of Victor Harbor

Statement#	Statement
	Burke Street Character Area Statement (VIH-C1) The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	Consistent low scale detached dwellings, primarily constructed after World War 1 to the later part of the 19th Century (mid 1800s to 1930s). Early settlement, consolidation and growth of residential development.

Statement#		Statement
ViHC1	Allotments, subdivision and built form patterns	Original street layout including rear access lanes and local roads. Curvilinear street with relatively large allotments roughly perpendicular to the street, most with rear laneway access.
	Architectural styles, detailing and built form features	Mix of small mid-1800s detached cottages of early Vernacular style, symmetrical and asymmetrical cottages and villas of the mid to late 1800s with Victorian stylistic influences, early 1900s cottages and villas with Federation stylistic influences, Inter-War bungalows. Church and Hall with late Victorian Gothic stylistic influences located at the bend in the road are landmarks. Adjacent to the Church is a Manse built in the Inter-War period with Georgian Revival stylistic influences.. Rectilinear plan form. Buildings are typically two or more pavilions rather than a single mass. Steeply-pitched roof forms, typically 35 to 40 degrees on 1800s and early 1900s era buildings and slightly lower on Inter-War buildings, reflecting traditional architectural styles and building methods. Short roof spans, minimising roof bulk. Concave, bullnose and straight-pitched verandahs on front and sometimes side facades reduce the bulk and scale and add visual interest. Lean-to forms are common. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Single storey, low scale and simple in form.
	Materials	Limestone walls. Red brick or rendered quoin work and details. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Corrugated iron or corrugated steel roofing. Variation in materials assists in breaking down bulk and scale and adds visual interest.
	Fencing	Low, open style construction front fencing (1.2 metres or less) associated with the traditional period and style of building, and providing views to the building. Low timber pickets, post and rails, pier and plinth masonry or wrought iron. Rear and side fencing behind building line up to 1.8 metres, corrugated iron.
	Setting, landscaping, streetscape and public realm features	Established garden settings. Varied, small front and side setbacks. Landscaped verges. Garages and carports are sited behind dwellings, accessed from rear laneways or well set back from the front of dwellings.
	Representative Buildings	*[Not identified]*
Character Areas affecting Town of Walkerville		
WalkC1	**Gilberton Character Area Statement (Walk-C1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to early 1900s.
	Allotments, subdivision and built form patterns	Predominantly low density detached dwellings on allotments that are medium in width and of a range of sizes. Some semi-detached and group dwellings on larger allotments.
	Architectural styles, detailing and built form features	The historic built form exhibits a mixture of architectural styles from the late 1800s and early 1900s. Edwardian villas alongside Victorian cottages pepper the locality providing a significant narrative that reflects the contemporaneous construction styles.
	Building height	Predominantly single storey. Two storey additions to the rear of buildings or within the roof space.
	Materials	Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.
	Fencing	Original fencing with bluestone plinths and cast iron fence railings above. Low front fencing.
	Setting, landscaping, streetscape and public realm features	There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. The landscape setting is an important element of the area, with generally open, well vegetated streetscapes through a combination of public and private plantings and low fencing forward each dwelling.
	Representative Buildings	*[Not identified]*
Character Areas affecting City of West Torrens		
WeToC1	**Ashford Character Area Statement (WeTo-C1)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1920s - 1940s
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Wide street frontages. Medium sized detached dwellings on substantial allotments.
	Architectural styles, detailing and built form features	Predominantly Tudor and Bungalow dwellings. Articulated hip and gable roofs. Verandahs / porticos. Verandahs as continuation of main roof structure. Additions are generally located to the rear of the dwelling.
	Building height	Generally single storey. Second storey within the roof space.
	Materials	Brick. Painted brick. Stone. Rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Tiled roofs. Timber windows.
	Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Carports and garages are behind the main face of dwellings. Consistent side and rear setbacks, large private yards. Generous traditional well-maintained gardens. Tree lined streets.
	Representative Buildings	*[Not identified]*
WeToC2	**Cowandilla / Mile End West Character Area Statement (WeTo-C2)** The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1920s - 1940.'s
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Narrow and deep allotments. Detached and semi-detached dwellings on substantial allotments.
	Architectural styles, detailing and built form features	Predominantly Californian and State Bank Bungalows with some examples of Spanish Mission; Dutch Colonial dwellings; Detached and semi-detached federation cottages/villas; Victorian era cottages/villas; and Early inter-war dwellings. Gable and Dutch gable roofs with hips. Verandahs / porticos. Additions are generally located to the rear of the dwelling.
	Building height	Generally single storey. Second storey generally within the roof space or otherwise designed to complement single storey character.
	Materials	Brick. Painted brick. Stone. Rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick/red brick chimneys.
	Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Consistent side and rear setbacks, large private yards. Carports and garages are behind the main face of dwellings. Generous traditional well-maintained gardens. Tree lined streets.
	Representative Buildings	*[Not identified]*
	Glandore Character Area Statement (WeTo-C3) The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.

Statement#	Statement
WeToC7	The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	1890s - 1940s.
Allotments, subdivision and built form patterns	Low to very low density site areas. Wide frontages. Commercial development along Henley Beach Road on smaller/ narrower allotments. Detached and semi-detached dwellings on substantial allotments.
Architectural styles, detailing and built form features	Predominantly Victorian and Federation Villas, Tudor and Bungalow style dwellings with examples of Row cottages; Single fronted cottages; Spanish Mission dwellings; and Parapeted shopfronts. Strong uniformity of layout and buildings. Hip, gable and Dutch gable roofs. Integrated and complementary verandahs / porticos. Additions are generally located to the rear of the dwelling.
Building height	Generally single storey. Second storey within the roof space.
Materials	Brick. Painted brick. Stone. Rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick chimneys.
Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
Setting, landscaping, streetscape and public realm features	Large front and side setbacks. Consistent rear setbacks, large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Tree lined streets. Vehicle access has been design and located to preserve existing street trees.
Representative Buildings	*[Not identified]*

Character Areas affecting Whyalla City Council

Whyalla Character Area Statement (Wh-C1)

Statement#	Statement
WhC1	The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area. The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.

Eras, themes and context	1900 - 1940. Developed in the first 40 years of Whyalla up until the 1940's. Illustrates the increasing prosperity of the city from the small corrugated or rendered masonry cottages to the substantial stone bungalow dwellings constructed by BHP for their senior staff at the steelworks.
Allotments, subdivision and built form patterns	Pattern of division in predominantly quarter acre lots, generous roads and road reserves with ample provision for on street parking and street planting.
Architectural styles, detailing and built form features	Colonial Cottages with half-hipped roofs, rendered masonry walls with open verandahs the width of the dwelling, symmetrical fronted dwellings with return verandahs and Bungalow dwellings dominate the architectural style of the dwellings.
Building height	*[Not stated]*
Materials	Corrugated iron, rendered masonry and BHP stone (including stone coins) and BHP brick are the predominant construction materials with corrugated irons roofs.
Fencing	Simple low picket or low rendered masonry, low open fencing or hedging.
Setting, landscaping, streetscape and public realm features	Pedestrian and cycle connection to the foreshore, Ada Ryan Gardens and Hummock Hill.
Representative Buildings	*[Not identified]*

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Character Preservation District Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Recognise, protect and enhance the special character of Character Preservation Districts.
DO 2	The long term use of land outside of townships for primary production and associated value adding enterprises is assured and promoted.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Land division is undertaken in accordance with Section 8 of the *Character Preservation (Barossa Valley) Act 2012* and Section 8 of the *Character Preservation (McLaren Vale) Act 2012.*	DTS/DPF 1.1 None are applicable.
PO 1.2 Residential development located in townships to reinforce settlement patterns within the district and support the continuation of primary production on land outside townships.	DTS/DPF 1.2 Residential development located within designated township areas of the Character Preservation District Overlay.
Built Form and Character	
PO 2.1 Development occurring at the edge of townships is sympathetic to the rural landscape and reinforces a clear transition between townships and rural landscape through measures including: (a) being of a low scale (b) orientating residential development towards the rural area (c) ensuring visual separation from the rural area through landscaping and road reserves.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development contributes to and maintains the historic identity and character of townships through appropriate: (a) form (b) scale (c) siting (d) design (e) landscaping.	DTS/DPF 2.2 None are applicable.
PO 2.3 Adaptive re-use of rural structures and historic and/or character buildings supports their preservation and ongoing contribution to the landscape.	DTS/DPF 2.3 None are applicable.

Built Form and Character in the Rural Area	
PO 3.1 Preservation of existing natural features including topography, watercourses and mature trees.	DTS/DPF 3.1 None are applicable.
PO 3.2 Buildings and structures do not interrupt views of the skyline through measures including being sited below ridge lines.	DTS/DPF 3.2 None are applicable.
PO 3.3 Buildings and structures harmonise with the natural features of the landscape and reinforce the rural character through the use of muted, neutral, non-reflective landscape colours on external surfaces.	DTS/DPF 3.3 None are applicable.
PO 3.4 Large buildings and structures are sited and oriented to minimise their visual bulk, particularly if close to roads or in open settings where there are no other buildings or mature trees in close proximity.	DTS/DPF 3.4 None are applicable.
PO 3.5 Buildings and structures are grouped to create compact clusters well set back from public roads.	DTS/DPF 3.5 None are applicable.
PO 3.6 Development mitigates the need for long, steep access roads that require excessive grading or removal of vegetation.	DTS/DPF 3.6 None are applicable.
Earthworks	
PO 4.1 Excavation and filling of land is limited to that associated with: (a) minimising the visual impact of buildings or structures or (a) construction of water storage facilities.	DTS/DPF 4.1 Excavation and/or filling of land is: (a) no greater than 1.5 metres from natural ground level and (b) only undertaken in order to reduce the visual impact of buildings or structures or to construct water storage facilities.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Coastal Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	The natural coastal environment (including environmentally important features such as mangroves, wetlands, saltmarsh, sand dunes, cliff tops, native vegetation, wildlife habitat, shore and estuarine areas) is conserved and enhanced.
DO 2	Provision is made for natural coastal processes; and recognition is given to current and future coastal hazards including sea level rise, flooding, erosion and dune drift to avoid the need, now and in the future, for public expenditure on protection of the environment and development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Land is divided only if it or the subsequent development and use of the land will not adversely affect the environmental values or ability of the land or adjoining land to adapt to changing coastal processes.	DTS/DPF 1.1 Land division for minor adjustment of allotment boundaries removes an anomaly in the current boundaries with respect to the location of buildings or structures.
PO 1.2 Land is not divided unless a layout is achieved whereby roads, parking areas and development sites for each allotment are at least 0.3m above the standard sea flood risk level, unless the land has, or can be provided with, appropriate and acceptable coastal protection measures.	DTS/DPF 1.2 None are applicable.
PO 1.3 Other than small-scale infill land division in a predominantly urban zone, land division adjacent to the coast incorporates an existing or proposed public reserve (not including a road or erosion buffer) of a size adequate to provide for natural coastal processes, public access and recreation.	DTS/DPF 1.3 None are applicable.
Hazard Risk Minimisation	
PO 2.1 Buildings sited over tidal water or that are not capable of being raised or protected by flood protection measures in the future are protected against the standard sea flood risk level and 1m of sea level rise.	DTS/DPF 2.1 Building floor levels are at least 1.25m above the standard sea flood risk level.
PO 2.2 Development, including associated roads and parking areas, but not minor structures unlikely to be adversely affected by flooding, is protected from the standard sea flood risk level and 1m of sea level rise.	DTS/DPF 2.2 Development incorporates finished ground and floor levels not less than: **Finished Ground and Floor Levels** Minimum finished floor level is 2.6m AHD Minimum finished floor level is 20.4m AHD Minimum finished floor level is 3m AHD Minimum finished floor level is 3.45m AHD Minimum finished floor level is 4.15m AHD Minimum finished floor level is 4.35m AHD Minimum finished floor level is 5.3m AHD Minimum finished ground level is 1.7m AHD; Minimum finished floor level is 1.95m AHD Minimum finished ground level is 1.75m AHD; Minimum finished floor level is 2m AHD Minimum finished ground level is 1.85m AHD; Minimum finished floor level is 2.1m AHD Minimum finished ground level is 1.9m AHD; Minimum finished floor level is 2.15m AHD Minimum finished ground level is 2.2m AHD; Minimum finished floor level is 2.45m AHD Minimum finished ground level is 2.3m AHD; Minimum finished floor level is 2.55m AHD Minimum finished ground level is 2.3m AHD; Minimum finished floor level is 2.6m AHD Minimum finished ground level is 2.4m AHD Minimum finished ground level is 2.4m AHD; Minimum finished floor level is 2.65m AHD Minimum finished ground level is 2.45m AHD; Minimum finished floor level is 2.7m AHD Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.65m AHD Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.7m AHD Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.75m AHD Minimum finished ground level is 2.55m AHD; Minimum finished floor level is 2.8m AHD Minimum finished ground level is 2.6m AHD; Minimum finished floor level is 2.85m AHD Minimum finished ground level is 2.6m AHD; Minimum finished floor level is 2.86m AHD Minimum finished ground level is 2.65m AHD; Minimum finished floor level is 2.9m AHD Minimum finished ground level is 2.7m AHD; Minimum finished floor level is 2.95m AHD

Finished Ground and Floor Levels
Minimum finished ground level is 2.75m AHD; Minimum finished floor level is 3m AHD
Minimum finished ground level is 2.85m AHD; Minimum finished floor level is 3.1m AHD
Minimum finished ground level is 2.85m AHD; Minimum finished floor level is 3.15m AHD
Minimum finished ground level is 2.9m AHD; Minimum finished floor level is 3.15m AHD
Minimum finished ground level is 2.95m AHD; Minimum finished floor level is 3.2m AHD
Minimum finished ground level is 2m AHD; Minimum finished floor level is 2.25m AHD
Minimum finished ground level is 3.1m AHD; Minimum finished floor level is 3.35m AHD

Minimum finished floor level is 6.73m AHD
Minimum finished floor level is 7.32m AHD

	Finished Ground and Floor Levels Minimum finished floor level is 7.33m AHD Minimum finished floor level is 7.36m AHD Minimum finished floor level is 7.39m AHD Minimum finished floor level is 7.41m AHD Minimum finished floor level is 7.46m AHD Minimum finished floor level is 8.56m AHD Minimum finished floor level is 8.59m AHD Minimum finished floor level is 8.71m AHD Minimum finished floor level is 8.93m AHD Minimum finished floor level is 9.02m AHD Minimum finished floor level is 9.51m AHD Minimum finished floor level is 9.55m AHD Minimum finished floor level is 9.68m AHD Minimum finished floor level is 9.77m AHD Minimum finished floor level is 9.85m AHD Minimum finished floor level is 4.64m AHD In instances where no value is specified (i.e. there is a blank field): (a) finished ground levels allow for sea level rise by being raised 0.3m or more above the standard sea flood risk level (b) finished floor levels are 0.55m or more above the standard sea flood risk level (c) practical measures can be implemented to provide future protection against an additional sea level rise of 0.7m plus an allowance to accommodate 100 years of land subsidence.
PO 2.3 Development will not create or aggravate coastal erosion or require coast protection works that cause or aggravate coastal erosion.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development is set back a sufficient distance from the coast to provide an erosion buffer in addition to a public reserve that will allow for at least 100 years of coastal retreat for single buildings or small-scale developments, or 200 years of coastal retreat for large scale developments unless: (a) the development incorporates appropriate private coastal protection measures to protect it from anticipated erosion or (b) there are formal commitments to protect the existing or proposed public reserve and development from anticipated coastal erosion.	DTS/DPF 2.4 None are applicable.
PO 2.5 Additions or alterations to, or replacement of, a dwelling do not increase the risk of effects from natural coastal processes such as flooding, sea-level rise, sand drift and erosion.	DTS/DPF 2.5 None are applicable.
Coast Protection Works	
PO 3.1 Development avoids the need for coast protection works through measures such as setbacks to protect development from coastal erosion, sea or stormwater flooding, sand drift or other coastal processes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Development does not compromise the structural integrity of any sea wall or levee bank or the ability to maintain, modify or upgrade any sea wall or levee bank.	DTS/DPF 3.2 None are applicable.
PO 3.3 Unavoidable coast protection works are the subject of binding agreements to cover the cost of future construction, operation, maintenance and management measures and will not: (a) have an adverse effect on coastal ecology, processes, conservation, public access and amenity (b) require commitment of public resources including land (c) present an unacceptable risk of failure relative to potential hazard resulting from failure.	DTS/DPF 3.3 None are applicable.
Environment Protection	
PO 4.1 Development will not unreasonably affect the marine and onshore coastal environment by pollution, erosion, damage or depletion of physical or biological resources; interference with natural coastal processes; or the introduction of and spread of marine pests and diseases or any other means.	DTS/DPF 4.1 None are applicable.
PO 4.2 Development avoids delicate or environmentally sensitive coastal areas such as sand dunes, cliff tops, estuaries, wetlands or substantially intact strata of native vegetation.	DTS/DPF 4.2 None are applicable.
PO 4.3 Development allows for ecological and natural landform adjustment to changing climatic conditions and sea levels, by allowing landward migration of dunes, coastal wetlands, mangrove and samphire areas.	DTS/DPF 4.3 None are applicable.
PO 4.4 Development avoids, or in built up areas minimises, impacts on important habitat areas that support the nesting, breeding and movement/migration patterns of fauna, including threatened shorebirds.	DTS/DPF 4.4 None are applicable.
PO 4.5 Development is designed so that wastewater is disposed of in a manner that avoids pollution or other detrimental impacts on the marine and on-shore environment of coastal areas.	DTS/DPF 4.5 Development is connected, or will be connected, to an approved common wastewater disposal service with the capacity to meet the requirements of the development or on-site wastewater systems set back a minimum of 100m from the Mean High Water Mark at spring tide.
PO 4.6 Development is designed so that stormwater runoff is disposed of in a manner that avoids pollution or other detrimental impacts on the marine and on-shore environment of coastal areas.	DTS/DPF 4.6 None are applicable.
PO 4.7 Development involving the removal of shell grit, cobbles or sand, other than for coastal protection works purposes, is not undertaken.	DTS/DPF 4.7 Development does not involve the removal of shell grit, cobbles or sand.
Access	
PO 5.1 Development maintains or enhances appropriate public access to and along the foreshore.	DTS/DPF 5.1 None are applicable.
PO 5.2 Public access through sensitive coastal landforms, particularly sand dunes, wetlands and cliffs, is restricted to defined pedestrian paths and constructed to minimise adverse environmental impact.	DTS/DPF 5.2 None are applicable.
PO 5.3 Access roads to the coast, lookouts and places of interest: (a) do not detract from the amenity or the environment (b) are designed for slow-moving traffic (c) are minimised in number.	DTS/DPF 5.3 None are applicable.
PO 5.4 Development on land adjoining a coastal reserve is sited and designed to be compatible with the purpose, management and amenity of the reserve and to prevent inappropriate access to or use of the reserve.	DTS/DPF 5.4 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference

Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, the following: (a) excavation and/or filling where the total volume of material excavated and/or filled exceeds $9m^3$ (b) dwellings and habitable buildings that: (i) do not meet DTS/DPF 2.2 or (ii) are within 100m of the mean high water mark (c) other than within a Rural Settlement Zone: (i) buildings with a floor area greater than $60m^2$ or (ii) tourist accommodation, including a caravan park or (iii) division of land that would create 1 or more additional allotments (d) off-shore structures (e) coast protection works (f) infrastructure within 100m landward of the mean high water mark.	Coast Protection Board.	To provide expert assessment and direction to the relevant authority on: • the risk to development from current and future coastal hazards (including sea-level rise, coastal flooding, erosion, dune drift and acid sulfate soils); • coast protection works; • potential impacts from development on public access and the coastal environment (including important coastal features).	Development of a class to which Schedule 9 clause 3 item 3 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Coastal Flooding Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Recognition of coastal flood hazards to avoid the need, now and in the future, for public expenditure on protection of the environment and development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Development, including associated roads and parking areas, but not minor structures unlikely to be adversely affected by flooding, is protected from the standard sea flood risk level and 1m of sea level rise.	DTS/DPF 1.1 Development incorporates finished ground and floor levels not less than: **Finished Ground and Floor Levels** Minimum finished floor level is 2.6m AHD Minimum finished floor level is 20.4m AHD Minimum finished floor level is 3m AHD Minimum finished floor level is 3.45m AHD Minimum finished floor level is 4.15m AHD Minimum finished floor level is 4.35m AHD Minimum finished floor level is 5.3m AHD Minimum finished ground level is 1.7m AHD; Minimum finished floor level is 1.95m AHD Minimum finished ground level is 1.75m AHD; Minimum finished floor level is 2m AHD Minimum finished ground level is 1.85m AHD; Minimum finished floor level is 2.1m AHD Minimum finished ground level is 1.9m AHD; Minimum finished floor level is 2.15m AHD Minimum finished ground level is 2.2m AHD; Minimum finished floor level is 2.45m AHD Minimum finished ground level is 2.3m AHD; Minimum finished floor level is 2.55m AHD Minimum finished ground level is 2.3m AHD; Minimum finished floor level is 2.6m AHD Minimum finished ground level is 2.4m AHD Minimum finished ground level is 2.4m AHD; Minimum finished floor level is 2.65m AHD Minimum finished ground level is 2.45m AHD; Minimum finished floor level is 2.7m AHD Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.65m AHD Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.7m AHD Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.75m AHD Minimum finished ground level is 2.55m AHD; Minimum finished floor level is 2.8m AHD Minimum finished ground level is 2.6m AHD; Minimum finished floor level is 2.85m AHD Minimum finished ground level is 2.6m AHD; Minimum finished floor level is 2.86m AHD Minimum finished ground level is 2.65m AHD; Minimum finished floor level is 2.9m AHD Minimum finished ground level is 2.7m AHD; Minimum finished floor level is 2.95m AHD Minimum finished ground level is 2.75m AHD; Minimum finished floor level is 3m AHD Minimum finished ground level is 2.85m AHD; Minimum finished floor level is 3.1m AHD Minimum finished ground level is 2.85m AHD; Minimum finished floor level is 3.15m AHD Minimum finished ground level is 2.9m AHD; Minimum finished floor level is 3.15m AHD Minimum finished ground level is 2.95m AHD; Minimum finished floor level is 3.2m AHD Minimum finished ground level is 2m AHD; Minimum finished floor level is 2.25m AHD Minimum finished ground level is 3.1m AHD; Minimum finished floor level is 3.35m AHD Minimum finished ground level is 3.15m AHD; Minimum finished floor level is 3.4m AHD Minimum finished ground level is 3.2m AHD; Minimum finished floor level is 3.45m AHD Minimum finished ground level is 3.25m AHD; Minimum finished floor level is 3.5m AHD Minimum finished ground level is 3.3m AHD; Minimum finished floor level is 3.55m AHD Minimum finished ground level is 3.35m AHD; Minimum finished floor level is 3.6m AHD Minimum finished ground level is 3.4m AHD; Minimum finished floor level is 3.65m AHD Minimum finished ground level is 3.45m AHD; Minimum finished floor level is 3.7m AHD Minimum finished ground level is 3.5m AHD; Minimum finished floor level is 3.7m AHD Minimum finished ground level is 3.5m AHD; Minimum finished floor level is 3.75m AHD Minimum finished ground level is 3.55m AHD; Minimum finished floor level is 3.8m AHD Minimum finished ground level is 3.6m AHD; Minimum finished floor level is 3.85m AHD Minimum finished ground level is 3.65m AHD; Minimum finished floor level is 3.9m AHD Minimum finished ground level is 3.7m AHD; Minimum finished floor level is 3.95m AHD Minimum finished ground level is 3.75m AHD; Minimum finished floor level is 4m AHD Minimum finished ground level is 3m AHD; Minimum finished floor level is 3.25m AHD Minimum finished ground level is 4m AHD; Minimum finished floor level is 4.25m AHD Minimum finished ground level is 2.05m AHD; Minimum finished floor level is 2.3m AHD Minimum finished ground level is 2.8m AHD; Minimum finished floor level is 3.05m AHD Minimum finished ground level is 3.05m AHD; Minimum finished floor level is 3.3m AHD Minimum finished ground level is 3.8m AHD; Minimum finished floor level is 4.05m AHD Minimum finished floor level is 1.87m AHD Minimum finished floor level is 10m AHD Minimum finished floor level is 10.1m AHD Minimum finished floor level is 10.23m AHD Minimum finished floor level is 10.31m AHD Minimum finished floor level is 10.43m AHD Minimum finished floor level is 10.54m AHD Minimum finished floor level is 10.88m AHD Minimum finished floor level is 11.07m AHD Minimum finished floor level is 11.52m AHD Minimum finished floor level is 11.71m AHD Minimum finished floor level is 11.8m AHD

In instances where no value is specified (i.e. there is a blank field):

(a) finished ground levels allow for sea level rise by being raised 300mm or more above the standard sea flood risk level
(b) finished floor levels are 550mm or more above the standard sea flood risk level
(c) practical measures can be implemented to provide future protection against an additional sea level rise of 700mm plus an allowance to accommodate 100 years of land subsidence.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Co-located Housing Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Co-located housing integrated within and amongst existing housing stock to cater for a variety of household structures, including aging in place, whilst maintaining existing dwellings, streetscape character, and neighbourhood amenity.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Co-located housing established to support variety in housing options.	DTS/DPF 1.1 None are applicable.
Site Dimensions and Land Division	
PO 2.1 Sites for co-located housing are of a suitable size to accommodate the intended number of dwellings, common facilities for shared use (which may include a kitchen, dining / living room and laundry), shared car parking, communal open space, soft landscaping areas and retention of existing mature vegetation.	DTS/DPF 2.1 None are applicable.
PO 2.2 Co-located housing includes (as part of the application) a community title land division with a community scheme description and by-laws that address the tenure, access, functional and operational management matters of co-located housing.	DTS/DPF 2.2 None are applicable.
PO 2.3 Amalgamation of sites (including the retention of all existing dwellings) is encouraged to achieve improved design outcomes for co-located housing including improved solar orientation of housing, increased soft landscaping and greater retention of tree canopy.	DTS/DPF 2.3 None are applicable.
Built form and Character	
PO 3.1 Co-located housing features dwellings behind or integrated with one or more established dwellings which faces a street in a manner which preserves the existing streetscape pattern and character.	DTS/DPF 3.1 None are applicable.
PO 3.2 Co-located housing incorporates form, height, scale, spacing and design that complements the prevailing streetscape character of the locality and minimises the visual impacts to neighbouring properties.	DTS/DPF3.2 None are applicable.
PO 3.3 Established dwelling(s) on the site of a co-located housing development are retained to accommodate co-located housing, and may include sensitive alterations, additions and/or partial demolition.	DTS/DPF 3.3 None are applicable.
PO 3.4 New building(s) accommodating dwelling(s) for co-located housing have footprint(s) which minimise bulk and scale impacts on adjoining residential properties and retains areas for landscaping and communal open space.	DTS/DPF 3.4 None are applicable.
PO 3.5 Co-located housing dwellings are separated from other buildings and boundaries within the site to facilitate the provision of open space, retention of deep root zones for trees, reduce the visual impact of buildings, and provide an attractive outlook and access to light and ventilation from both within and external to the development site.	DTS/DPF 3.5 None are applicable.
PO 3.6 Co-located housing boundary walls are limited in height and length to manage visual and overshadowing impacts on adjoining residential properties.	DTS/DPF 3.6 Side boundary walls for co-located housing occur only on one side boundary and satisfy (a) or (b) below: (a) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same or lesser length and height (b) side boundary walls do not: (i) exceed 3.2m in height from the lower of the natural or finished ground level (ii) exceed 8m in length (iii) when combined with other walls on the boundary of the subject development site, exceed a maximum 45% of the length of the boundary (iv) encroach within 3m of any other existing or proposed boundary walls on the subject land.
Open Space	
PO 4.1 Communal open space is provided to meet the needs of co-located housing occupants, in a manner that encourages interaction between occupants and provides privacy from public view while complementing streetscape character.	DTS/DPF 4.1 Communal open space for co-located housing satisfies all of the following: (a) a minimum of 24m² of communal open space is provided per co-located housing dwelling for shared use by all occupants (b) 80% of the total of communal open space is provided in a single location that is overlooked by a minimum of two dwellings and has a minimum dimension of 5m (c) is obscured or screened from public view (external to the site) by siting or the use of vegetation, buildings, or other similar structures with a minimum height of 1.8m above ground level and a maximum transparency of 20% (d) may include verandahs, alfrescos, terraces, decks where not enclosed on all sides (e) does not include areas used for bin storage, laundry drying, rainwater tanks, utilities, driveways, or vehicle parking areas.
Internal Privacy and Overlooking	
PO 5.1 Co-located housing encourages positive interaction between residents with the living areas of dwellings strategically placed off communal open space to create strong connections between inside and out and to provide passive surveillance across the site.	DTS/DPF 5.1 None are applicable.
PO 5.2 Co-located housing developments provide visibility between living areas and communal open space, avoiding internal fencing and other obstructions to promote passive surveillance across the site.	DTS/DPF 5.2 None are applicable.
PO 5.3 Bedrooms of co-located housing are oriented away from communal open space and are instead provided with views of, and access to smaller areas of outdoor private open space.	DTS/DPF 5.3 None are applicable.
PO 5.4 Internal fencing within a co-located housing development is limited in height and visually permeable to maintain visibility, outlook and passive surveillance of common areas.	DTS/DPF 5.4 Fencing within the site of a co-located housing development (where not located along the perimeter boundary) is no more than 1.2m in height and constructed of a material with a minimum transparency of 50%.
Parking and Access	
PO 6.1 Car parking for co-located housing satisfies all of the following: (a) is shared with car parks accessible to occupants and visitors at all times (b) is established in a manner that maintains the existing primary streetscape (c) maintains or reduces the number of existing driveway access points.	DTS/DPF 6.1 None are applicable.
PO 6.2 Existing driveways and manoeuvring areas are maintained or reduced to maximise the amount of landscaping and communal open space provided.	DTS/DPF 6.2 None are applicable.
Pedestrian Access	
PO 7.1 Pedestrian access to co-located housing from the primary street frontage is convenient, safe and minimises disruption to the occupants of other co-located housing by providing all of the following: (a) a single common pathway accessible throughout the development site (b) controlled lighting to mitigate artificial light intrusion while maintaining safety (c) appropriate separation from bedrooms or any private open space areas.	DTS/DPF 7.1 None are applicable.
PO 7.2 Co-located housing developments are designed to support safe and convenient access and movement for residents throughout the site by avoiding steps in pathways, parking areas and common areas, where practicable.	DTS/DPF 7.2 None are applicable.
PO 8.1 Co-located housing retains mature landscaping throughout the site in order to maintain the existing character of the locality and enhance resident amenity.	DTS/DPF 8.1 None are applicable.
PO 8.2 Landscaping is used to soften the bulk, scale and visual appearance of new buildings for co-located housing and to minimise hard, impermeable on-site surface treatments.	DTS/DPF 8.2 None are applicable.
Landscaping	

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Coordinated Development Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Urban development is deferred until land is suitable for the intended land uses, taking into account infrastructure delivery mechanisms and other constraints to urban development.
DO 2	Infrastructure and community services are provided in a timely and coordinated manner to facilitate planned urban growth and ensure the delivery of essential services to future communities.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development is limited to that which satisfies one of the following: (a) does not prejudice the orderly and efficient servicing and conversion of land for future urban development (b) is ancillary to and necessary for the continuation of an existing lawful use (c) accommodates essential infrastructure or community services that are compatible with the relevant zone or sub zone, including any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code.	DTS/DPF 1.1 None are applicable.
Land Division	
PO 2.1 Land division is limited to that which satisfies one of the following: (a) corrects anomalies in the placement of allotment boundaries with respect to the location of existing buildings, structures or land uses (b) facilitates the provision of essential infrastructure, community services or public open space that are compatible with the relevant zone or subzone, including any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code (c) results in the creation of 'super lots' or balance allotments that do not result in a form of division which would prejudice the orderly and efficient development of land for future urban development.	DTS/DPF 2.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Defence Aviation Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of potential impacts of buildings on the operational and safety requirements of Defence Aviation Areas.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Building height does not pose a hazard to the operations of Defence Aviation Areas.	DTS/DPF 1.1 Building height does not exceed the relevant height specified by the *Defence Aviation Area Overlay*.
PO 1.2 Exhaust stacks are designed and sited to minimise plume impacts on aircraft movements associated with Defence Aviation Areas.	DTS/DPF 1.2 Development does not include exhaust stacks.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Design Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development positively contributes to the liveability, durability and sustainability of the built environment through high-quality design.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Medium to high rise buildings and state significant development demonstrate high quality design.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the development comprises a variation to an application that is, in the opinion of the relevant authority, minor in nature or would not warrant a referral when considering the purpose of the referral, any of the following classes of development:	Government Architect or Associate Government Architect	To provide expert design advice to the relevant authority on how the development:	Development of a class to which

(a) development within the area of the overlay located within the Corporation of the City of Adelaide where the total amount to be applied to any work, when all stages of the development are completed, exceeds $10,000,000 (b) development within the area of the overlay located within the City of Port Adelaide Enfield where the total amount to be applied to any work, when all stages of the development are completed, exceeds $3 000 000 (c) development within all other areas of the overlay that involves the erection or construction of a building that exceeds 4 building levels.		(a) responds to its surrounding context and contributes to the quality and character of a place (b) contributes to inclusiveness, connectivity, and universal design of the built environment (c) enables buildings and places that are fit for purpose, adaptable and long-lasting (d) adds value by positively contributing to places and communities (e) optimises performance and public benefit (f) supports sustainable and environmentally responsible development.	Schedule 9 clause 3 item 22 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Dwelling Excision Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Creation of allotments to accommodate existing habitable dwellings in primary production areas is limited to avoid undermining primary production.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Land division creating an additional allotment to accommodate an existing dwelling does not undermine the role of primary production areas by being limited and designed to achieve the following: (a) accommodate a dwelling that has had a long term association with primary production on the same allotment (b) contain the excised dwelling within an allotment capable of providing a suitable rural residential amenity (c) maintain all other land (ie land outside the allotment containing the excised dwelling) in suitably sized allotments to support primary production (d) no other dwelling has been excised from the primary production allotment.	DTS/DPF 1.1 Land division satisfies all the following: (a) no other dwelling has previously been excised from the allotment by creating an additional allotment (b) it does not create more than one additional allotment where the resultant allotments satisfy (i) and (ii): (i) one allotment will contain a single existing lawful dwelling that existed prior to 1 December 2011 and meets all of the following: A. no allotment boundary is closer than 40m to an existing dwelling B. the allotment is no less than 1 hectare and no greater than 4 hectares in area C. if the allotment is of a battle-axe configuration, the driveway 'handle' is no more than 50 metres in length (ii) any other allotment has an area not less than that identified in the Minimum Site Area Technical and Numeric Variation layer in the SA planning database.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Environment and Food Production Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of valuable rural, landscape, environmental and food production areas from urban encroachment.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Land division undertaken in accordance with Section 7 of the *Planning, Development and Infrastructure Act 2016.*	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Future Local Road Widening Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development consistent with and will not compromise efficient delivery of future road widening requirements of local roads.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Future Road Widening	
PO 1.1 Development does not compromise or is located and designed to minimise its impact on future road widening requirements.	DTS/DPF 1.1 Development does not involve building work, or building work is located wholly outside land within the following distance from the primary street frontage. **Minimum Future Local Road Widening Setback** Minimum future local road widening setback is 10.5m Minimum future local road widening setback is 11m Minimum future local road widening setback is 12.5m Minimum future local road widening setback is 12.9m Minimum future local road widening setback is 13m Minimum future local road widening setback is 14m Minimum future local road widening setback is 16.5m

Minimum Future Local Road Widening Setback
Minimum future local road widening setback is 18m
Minimum future local road widening setback is 5m
Minimum future local road widening setback is 8m
Minimum future local road widening setback is 9.5m
Minimum future local road widening setback is 7m
Minimum future local road widening setback is 2.5m
Minimum future local road widening setback is 6m

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Future Road Widening Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development which is consistent with and will not compromise efficient delivery of future road widening requirements.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Future Road Widening	
PO 1.1 Development does not compromise or is located and designed to minimise its impact on future road widening requirements.	DTS/DPF 1.1 Development does not involve building work, or building work is located wholly outside the land subject to the 6m Consent Area, the C Type Requirement or the Strip Requirement of the Metropolitan Adelaide Road Widening Plan.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Other than where all deemed-to-satisfy criteria for all policies relevant to this referral are met, development (including the division of land) that is within or may encroach within a Future Road Widening Area.	Commissioner of Highways.	To provide expert technical assessment and direction to the relevant authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 4 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Gas and Liquid Petroleum Pipelines Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of risk to public safety, the environment and security of energy supply from the encroachment of development on strategic gas and liquid petroleum pipelines.
Note	Guidance documents to support an agreement under section 123 of the *Planning, Development and Infrastructure Act 2016* for the purposes of development applications in the vicinity of pipelines, as prepared and published by the administrative unit of the Public Service responsible for assisting a Minister in the administration of the *Energy Resources Act 2000* can be found here.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Community exposure to a potential hazard from the failure of a gas or liquid petroleum pipeline is mitigated by locating development that may accommodate or result in large congregations of people, buildings for housing and / or caring for vulnerable people and community facilities outside areas that pose an unacceptable risk to protect life.	DTS/DPF 1.1 Development satisfies one of the following: (a) it does not comprise: (i) child care facility (ii) caravan and tourist park (iii) educational facility (iv) buildings comprising 3 or more building levels (v) land division creating allotments under 1ha for residential purposes (except where the existing allotment is less than 1ha) (vi) prison (vii) residential park (viii) retirement facility (ix) student accommodation (x) supported accommodation (xi) shop or shops with a gross leasable floor area of 1000m^2 or greater (xii) tourist accommodation (xiii) stadium (b) a class of development referred to in part (a), or any combination thereof, which will occur in accordance with an agreement under section 123 of the *Planning, Development and Infrastructure Act, 2016*
PO 1.2 Emergency service and major community health related facilities are located outside areas where a gas or liquid petroleum pipeline failure may disrupt ongoing operations to maintain the response capacity in the event of an emergency.	DTS/DPF 1.2 Development does not comprise any of the following: (a) emergency services facility (b) hospital.
PO 1.3 Development involving the manufacture, collection, handling or bulk storage of flammable, explosive, or otherwise hazardous materials is located and designed to avoid escalating the potential for and effects of a gas or liquid petroleum pipeline failure.	DTS/DPF 1.3 Development satisfies one of the following: (a) it does not comprise: (i) general industry

	(ii) special industry (iii) landfill (iv) renewable energy facility (v) electricity substation (vi) fuel depot (vii) retail fuel outlet (viii) store (ix) warehouse (x) waste treatment facility (b) a class of development referred to in part (a), or any combination thereof, which will occur in accordance with an agreement under section 123 of the *Planning, Development and Infrastructure Act, 2016*

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, a class of development that does not satisfy Gas and Liquid Petroleum Pipelines Overlay DTS/DPF 1.1, 1.2 and 1.3.	The Chief Executive of the Department of the Minister responsible for administering the *Petroleum and Geothermal Energy Act 2000*.	To provide expert assessment and direction to the relevant authority in relation to: (a) potential safety issues relating to development or (b) the potential for development to adversely impact upon the lawful continued operation of strategic infrastructure (gas and liquid petroleum pipelines).	Development of a class to which Schedule 9 clause 3 item 9B of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Gas and Liquid Petroleum Pipelines (Facilities) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of risk to public safety, the environment and security of energy supply from the encroachment of development on gas and liquid petroleum pipeline facilities.
Note	Guidance documents to support an agreement under section 123 of the *Planning, Development and Infrastructure Act 2016* for the purposes of development applications in the vicinity of pipelines, as prepared and published by the administrative unit of the Public Service responsible for assisting a Minister in the administration of the *Energy Resources Act 2000* can be found here.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Safety	
PO 1.1 Development (including land division) does not present a risk to public health and safety due to any of the following: (a) continuous noise associated with pipeline facilities used for energy transportation that exceeds the Environment Protection (Commercial and Industrial Noise) Policy (b) potential for occasional noise associated with high pressure venting.	DTS/DPF 1.1 Development (including land division creating additional allotments for such purposes) comprises one or more of the following: (a) open space (b) roadways (c) a class of development that will occur in accordance with an agreement under section 123 of the *Planning, Development and Infrastructure Act, 2016* (d) a dwelling or ancillary building/structure on an allotment approved for residential purposes under the Planning and Development and Infrastructure Act 2016.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, a class of development that does not satisfy Overlay DTS/DPF 1.1.	The Chief Executive of the Department of the Minister responsible for administering the Petroleum and Geothermal Energy Act 2000.	To provide expert assessment and direction to the relevant authority in relation to: (a) potential safety issues relating to development or (b) the potential for development to adversely impact upon the lawful continued operation of strategic infrastructure (gas and liquid petroleum pipelines).	Development of a class to which Schedule 9 clause 3 item 9B of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Gateway Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	The visual amenity and streetscape appeal along prominent entrances into towns, tourist and historic precincts, activity centres and main streets is maintained and improved through the careful siting of buildings and other activities in a well landscaped setting.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form and Character	
PO 1.1 Buildings are set back from main roads to support a consistent high-quality streetscape character where the prominence of larger buildings is appropriately mitigated.	DTS/DPF 1.1 Buildings are set back at least the height of the building and no less than 10m from arterial and main roads and highways, whichever is the greater.
PO 1.2 Building are set back from side boundaries to moderate the appearance of buildings and enhance the outlook from arterial and main roads and highways.	DTS/DPF 1.2 None are applicable.
PO 1.3 The main facade of principal buildings facing arterial and main roads and highways incorporate articulation and various materials to promote a high standard of building design and external appearance.	DTS/DPF 1.3 None are applicable.

Landscape Amenity	
PO 2.1 Ancillary buildings including carports, outbuildings and garages, other minor structures, waste storage bins and outdoor storage areas are sited to reduce visual clutter and untidiness from arterial and main roads and highways.	DTS/DPF 2.1 Ancillary buildings including carports, outbuildings and garages, other minor structures, waste storage bins and outdoor storage areas are located in a manner to satisfy one of the following: (a) behind principal building(s) facing arterial and main roads and highways (b) behind the building line of principal building(s) and obscured from public view from arterial and main roads and highways by solid fencing or landscaping.
Landscaping	
PO 3.1 Development incorporates generous landscaping areas along the frontage to arterial roads and highways to enhance visual amenity and complement associated buildings.	DTS/DPF 3.1 None are applicable.
PO 3.2 Existing mature on-site vegetation is retained and incorporated into landscape and parking areas to enhance the appearance of land and buildings.	DTS/DPF 3.2 None are applicable.
PO 3.3 Development incorporates generous landscaping areas along the frontage to arterial roads and landscaped using a combination of high crown evergreen trees, low shrubs and groundcovers to enhance visual amenity and complement the associated buildings.	DTS/DPF 3.3 None are applicable.
PO 3.4 Vehicle parking areas are located and designed to enhance the streetscape setting by: (a) being located to the side or rear of buildings facing arterial and main roads and highways (b) incorporating landscaping, including trees, to break up large parking areas.	DTS/DPF 3.4 None are applicable.
Advertisements	
PO 4.1 Advertisements along arterial and main roads, and highways are consistent in height, size and design to support a cohesive and uniform appearance in gateway locations without dominating the streetscape.	DTS/DPF 4.1 Advertisements satisfy all of the following: (a) will not result in more than 1 advertisement per allotment (b) will not exceed 5m in height (c) do not exceed $3m^2$ per advertising face (d) are not internally illuminated (e) are not animated, flash or move in any way.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Acid Sulfate Soils) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is located and undertaken to minimise disturbance of potential or actual acid sulfate soils and / or the release of acid drainage.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development that involves excavation or a change to a water table where potential or actual acid sulfate soils are present is undertaken to minimise soil disturbance or drainage; prevent or minimise oxidation; and contain and treat any acid drainage to prevent harm or damage to the environment, primary production, buildings, structures and infrastructure or public health.	DTS/DPF 1.1 Development does not involve or cause: (a) excavation of land or (b) change to a water table.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Bushfire - General Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

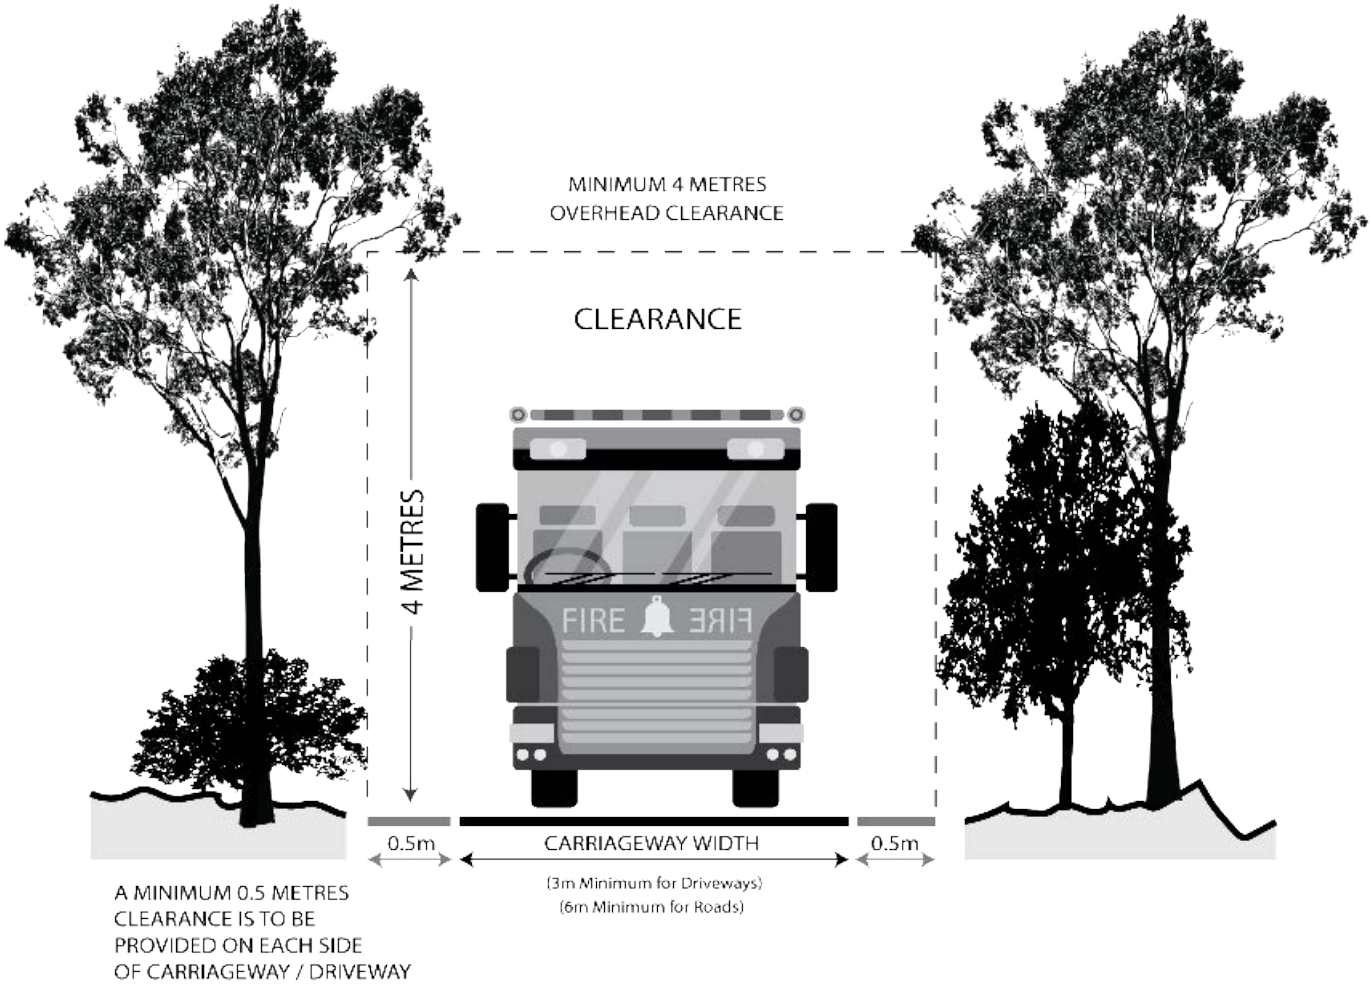
Desired Outcome	
DO 1	Development, including land division responds to the general level of bushfire risk by siting and designing buildings in a manner that mitigates the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning	DTS/DPF 2.1 None are applicable.

debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	
PO 2.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.	DTS/DPF 2.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 3.1 To minimise the threat, impact and exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.	DTS/DPF 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least: (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
PO 3.3 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated area available that is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with *Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements*.	DTS/DPF 3.3 None are applicable.
Land Division	
PO 4.1 Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF 4.1 None are applicable.
PO 4.2 Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.	DTS/DPF 4.2 None are applicable.
PO 4.3 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 4.3 None are applicable.
PO 4.4 Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	DTS/DPF 4.4 None are applicable.
Vehicle Access – Roads, Driveways and Fire Tracks	
PO 5.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors	DTS/DPF 5.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building B. a turning area with a minimum radius of 12.5m (Figure 3) C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.3 Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 5.3 None are applicable.

Procedural Matters (PM) - Referrals



The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Hazards (Bushfire - High Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

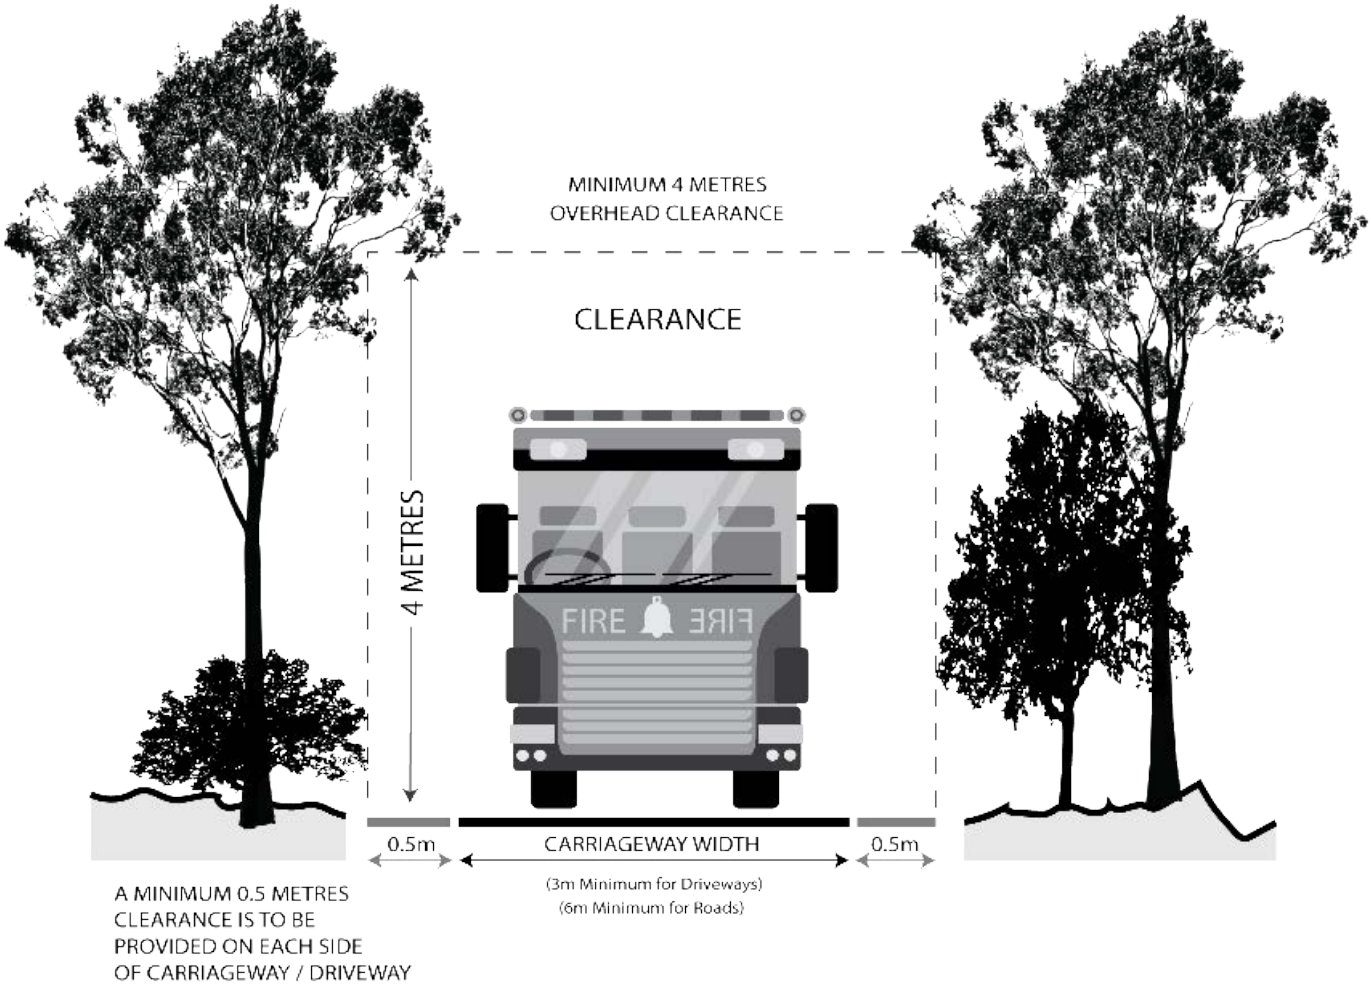
DO 1	Development, including land division is sited and designed to minimise the threat and impact of bushfires on life and property with regard to the following risks: (a) potential for uncontrolled bushfire events taking into account the increased frequency and intensity of bushfires as a result of climate change (b) high levels and exposure to ember attack (c) impact from burning debris (d) radiant heat (e) likelihood and direct exposure to flames from a fire front.
DO 2	Activities that increase the number of people living and working in the area or where evacuation would be difficult is sited away from areas of unacceptable bushfire risk.
DO 3	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development that significantly increases the potential for fire outbreak as a result of the spontaneous combustion of materials, spark generation or through the magnification and reflection of light is not located in areas of unacceptable bushfire risk.	DTS/DPF 1.1 None are applicable.
PO 1.2 Child care facilities, educational facilities, hospitals, retirement and supported accommodation are sited away from areas of unacceptable bushfire risk and locations that: (a) are remote from or require extended periods of travel to reach safer locations (b) don't have a safe path of travel to safer locations.	DTS/DPF 1.2 None are applicable.
Siting	
PO 2.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 2.1 None are applicable.
Built Form	
PO 3.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	DTS/DPF 3.1 None are applicable.
PO 3.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.	DTS/DPF 3.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 4.1 To minimise the threat, impact and potential exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.	DTS/DPF 4.1 None are applicable.
PO 4.2 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.	DTS/DPF 4.2 Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least: (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
PO 4.3 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated area available that: (a) is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with *Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements* (b) includes the provision of an all-weather hardstand area in a location that: (i) allows fire-fighting vehicles to safely access the dedicated water supply and exit the site in a forward direction (ii) is no further than 6 metres from the dedicated water supply outlet(s) where required.	DTS/DPF 4.3 None are applicable.
Land Division	
PO 5.1 Land division for residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is limited to those areas specifically set aside for these uses.	DTS/DPF 5.1 None are applicable.
PO 5.2 Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF 5.2 None are applicable.
PO 5.3 Land division is designed to provide a continuous street pattern (avoiding the use of dead end roads/cul-de-sac road design) to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors. Where cul-de-sac / dead end roads are proposed, an alternative emergency evacuation route is provided.	DTS/DPF 5.3 None are applicable.
PO 5.4 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 5.4 None are applicable.
PO 5.5 Land division provides sufficient space for future asset protection zones and incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	DTS/DPF 5.5 None are applicable.
Vehicle Access –Roads, Driveways and Fire Tracks	
PO 6.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 6.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads are provided within an alternative evacuation route and do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 6.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) use, operation and evacuation of fire-fighting and emergency personnel	DTS/DPF 6.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the

(b) evacuation of residents, occupants and visitors.	habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building or B. a turning area with a minimum radius of 12.5m (Figure 3) or C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 6.3 Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 6.3 None are applicable.

Procedural Matters (PM) - Referrals



The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except if a ***relevant certificate*** accompanies the application for planning consent in respect of the development, any of the following classes of development (including alterations and additions which increase the floor area of such buildings by 10% or more): (a) land division creating one or more additional allotments (b) dwelling (c) ancillary accommodation (d) residential flat building (e) tourist accommodation (f) boarding home (g) dormitory style accommodation (h) workers' accommodation (i) student accommodation (j) child care facility (k) educational facility (l) retirement village (m) supported accommodation (n) residential park (o) hospital (p) camp ground.	South Australian Country Fire Service.	To provide expert assessment and direction to the relevant authority on the potential impacts of bushfire on the development.	Development of a class to which Schedule 9 clause 3 item 2 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Hazards (Bushfire - Medium Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development, including land division responds to the medium level of bushfire risk and potential for ember attack and radiant heat by siting and designing buildings in a manner that mitigates the threat and impact of bushfires on life and property taking into account the increased

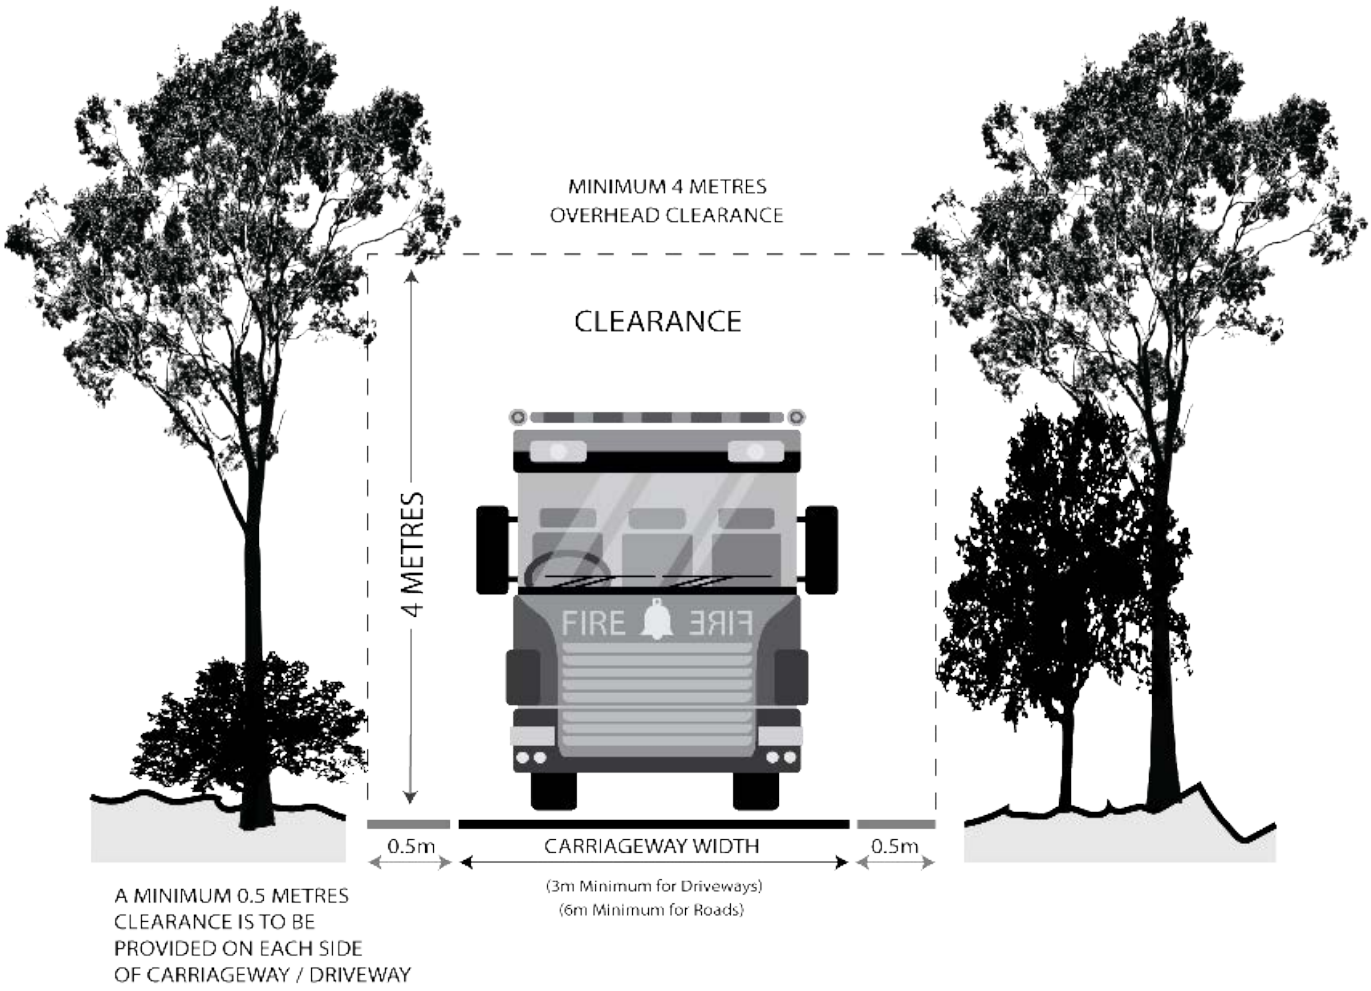
	frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	DTS/DPF 2.1 None are applicable.
PO 2.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.	DTS/DPF 2.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 3.1 To minimise the threat, impact and potential exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Residential, tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.	DTS/DPF 3.2 Residential, tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least: (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
PO 3.3 Residential, tourist accommodation and habitable buildings for vulnerable communities, (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation), has a dedicated area available that is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with *Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements*.	DTS/DPF 3.3 None are applicable.
Land Division	
PO 4.1 Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF 4.1 None are applicable.
PO 4.2 Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.	DTS/DPF 4.2 None are applicable.
PO 4.3 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 4.3 None are applicable.
PO 4.4 Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	DTS/DPF 4.4 None are applicable.
Vehicle Access - Roads, Driveways and Fire Tracks	
PO 5.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building or B. a turning area with a minimum radius of 12.5m (Figure 3) or C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.3 Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 5.3 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.



Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is located to minimise the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Habitable Buildings	
PO 1.1 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zones(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least 50 metres (b) the asset protection zone is contained wholly within the allotment of the development.
Vehicle Access - Roads and Driveways	
PO 2.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors	DTS/DPF 2.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 2.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 2.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building or B. a turning area with a minimum radius of 12.5m (Figure 3) or C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

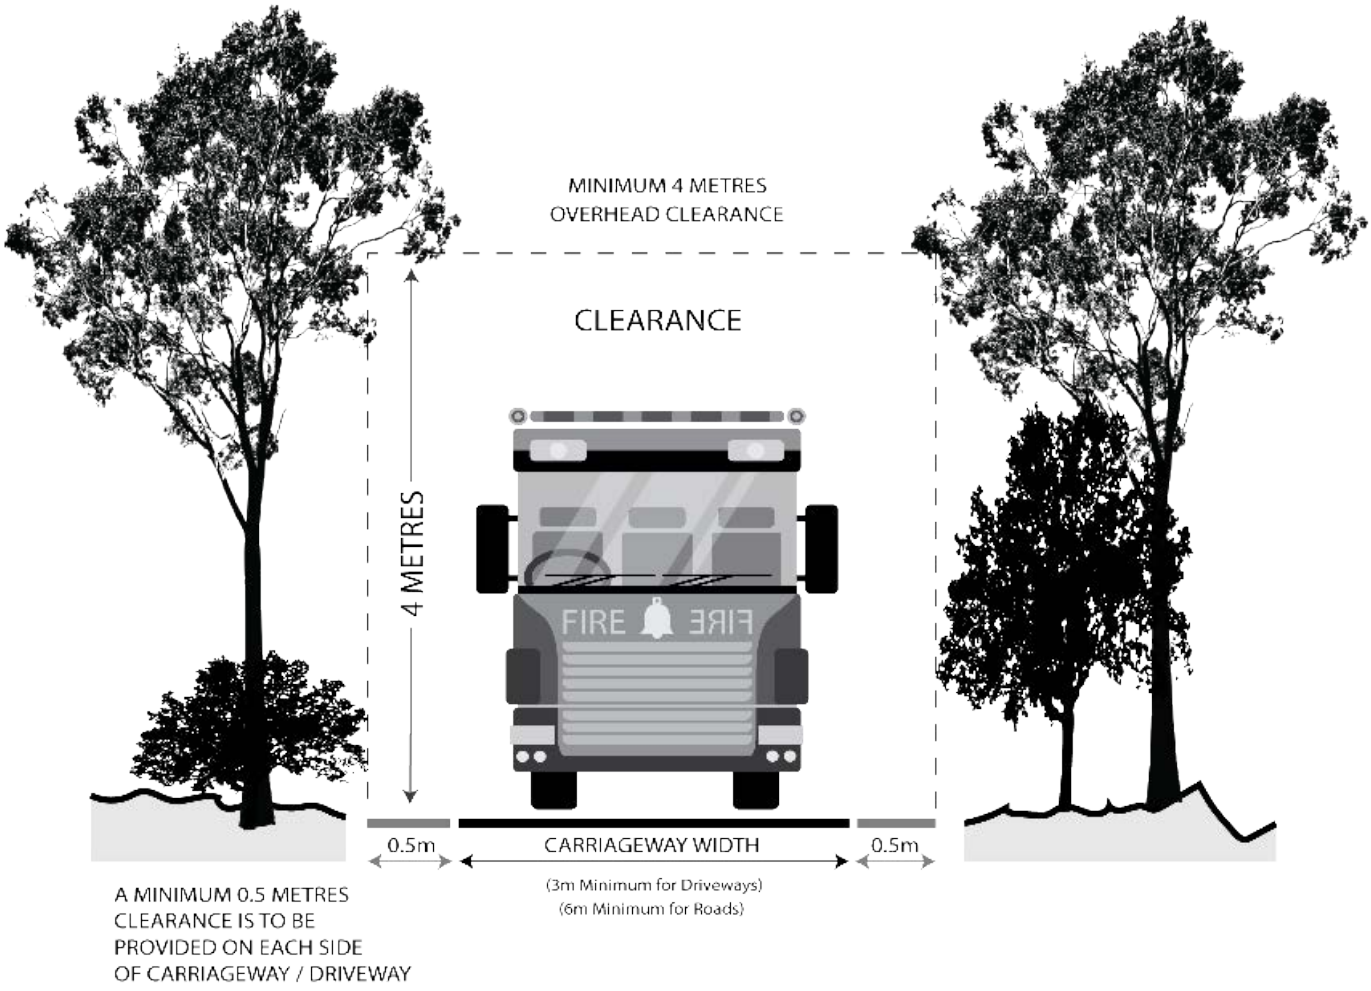
DO 1	Development, including land division responds to the relevant level of bushfire risk and is sited and designed to mitigate the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	DTS/DPF 2.1 None are applicable.
PO 2.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers', accommodation) in the event of bushfire.	DTS/DPF 2.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 3.1 To minimise the threat, impact and exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.	DTS/DPF 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least: (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
PO 3.3 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated and accessible water supply available at all times for fire-fighting purposes.	DTS/DPF 3.3 Development has a dedicated water supply available at all times for fire-fighting purposes: (a) comprising a minimum of 5000 litres (b) positioned in an accessible location and accompanied with necessary equipment to allow occupants to minimise the spread of bushfire to the habitable building(s).
Land Division	
PO 4.1 Land division is designed to and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF 4.1 None are applicable.
PO 4.2 Land division designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.	DTS/DPF 4.2 None are applicable.
PO 4.3 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 4.3 None are applicable.
PO 4.4 Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	DTS/DPF 4.4 None are applicable.
Vehicle Access -Roads and Driveways	
PO 5.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building or B. a turning area with a minimum radius of 12.5m (Figure 3) or C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.3 Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 5.3 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.



Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Bushfire - Urban Interface) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Urban neighbourhoods that adjoin areas of General, Medium and High Bushfire Risk: (a) allow access through to bushfire risk areas (b) are designed to protect life and property from the threat of bushfire and the dangers posed by ember attack (c) facilitate evacuation to areas safe from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Land division creating public roads or resulting in 10 or more new allotments is designed to make provision for emergency vehicle access through to the bushfire risk area.	DTS/DPF 1.1 Land division creates less than 10 allotments and/or does not involve the creation of public roads.
PO 1.2 Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.	DTS/DPF 1.2 Land division does not involve the creation of public roads.
PO 1.3 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 1.3 Land division creates less than 10 allotments.
PO 1.4 Land division creating public roads or resulting in 10 or more new allotments incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	DTS/DPF 1.4 Land division creates less than 10 allotments and/or does not involve the creation of public roads.
PO 1.5 Land division does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.	DTS/DPF 1.5 Land division does not create or rely on fire tracks.
PO 1.6 Land division resulting in 10 or more new allotments and within 100m a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF1.6 Land division is not located within 100m of a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay or does not create 10 or more new allotments.
Vehicle Access - Roads, Driveways and Fire Tracks	
PO 2.1 Roads that are within 100 metres of a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 2.1 Any proposed new roads are not within 100m of a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay or (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.

Procedural Matters (PM) - Referrals

Hazards (Flooding) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Impacts on people, property, infrastructure and the environment from high flood risk are minimised by retaining areas free from development, and minimising intensification where development has occurred.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Land division is limited to areas where the consequences to buildings and safety are low and can be readily managed or overcome.	DTS/DPF 1.1 None are applicable.
Land Use	
PO 2.1 Development sited and designed to minimise exposure of people and property to unacceptable flood risk.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings housing vulnerable people, community services facilities, key infrastructure and emergency services are sited away from flood prone areas to enable uninterrupted operation of services and reduce likelihood of entrapment.	DTS/DPF 2.2 Child care facilities, educational facilities, retirement and supported accommodation, emergency services facilities, hospitals and prisons are not located within the Overlay area.
Flood Resilience	
PO 3.1 Development avoids the need for flood protection works.	DTS/DPF 3.1 None are applicable.
PO 3.2 Development does not cause unacceptable impacts on any adjoining property by the diversion of flood waters or an increase in flood velocity or flood level.	DTS/DPF 3.2 None are applicable.
PO 3.3 Development does not impede the flow of floodwaters through the allotment or the surrounding land, or cause an unacceptable loss of flood storage.	DTS/DPF 3.3 None are applicable.
PO 3.4 Development avoids frequently flooded or high velocity areas, other than where it is part of a flood mitigation scheme to reduce flood impact.	DTS/DPF 3.4 Other than a recreation area, development is located outside of the 5% AEP principal flow path.
PO 3.5 Buildings are sited, designed and constructed to prevent the entry of floodwaters in a 1% AEP flood event where the entry of floodwaters is likely to result in undue damage to, or compromise ongoing activities within, buildings.	DTS/DPF 3.5 Buildings comprise one of the following: (a) a porch or portico with at least 2 open sides (b) a verandah with at least 3 open sides (c) a carport or outbuilding with at least 2 open sides (whichever elevations face the direction of the flow) (d) any post construction with open sides (e) a building with a finished floor level that is at least 300mm above the height of a 1% AEP flood event.
PO 3.6 Fences do not unreasonably impede floodwaters.	DTS/DPF 3.6 A post and wire fence (other than a chain mesh fence).
Environmental Protection	
PO 4.1 Buildings and structures used either partly or wholly to contain or store hazardous materials are designed to prevent spills or leaks leaving the confines of the building during a 1% AEP flood event to avoid potential environmental harm.	DTS/DPF 4.1 Development involving the storage or disposal of hazardous materials is wholly located outside of the 1% AEP flood plain or flow path.
PO 4.2 Development does not create or aggravate the potential for erosion or siltation or lead to the destruction of vegetation during a flood.	DTS/DPF 4.2 None are applicable.
Site Earthworks	
PO 5.1 The depth and extent of filling required to raise the finished floor level of a building does not cause unacceptable impact on any adjoining property by diversion of flood waters, an increase in flood velocity or flood level, or an unacceptable loss of flood storage.	DTS/DPF 5.1 None are applicable.
PO 5.2 Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.	DTS/DPF 5.2 Filling for ancillary purposes: (a) does not exceed 300mm above existing ground level and (b) is no more than 5m wide.
Access	
PO 6.1 Development does not occur on land: (a) from which evacuation to areas not vulnerable to flood risk is not possible during a 1% AEP flood event (b) which cannot be accessed by emergency services vehicles or essential utility service vehicles during a 1% AEP flood event.	DTS/DPF 6.1 None are applicable.
PO 6.2 Access driveways and tracks to significant development (i.e. dwellings, places of work, etc.) consist of a safe, all-weather trafficable surface that is accessible during a 1% AEP flood event.	DTS/DPF 6.2 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Minimum finished floor level is 9.68m AHD
Minimum finished floor level is 9.77m AHD
Minimum finished floor level is 9.85m AHD
Minimum finished floor level is 4.64m AHD

In instances where no finished floor level value is specified, a building incorporates a finished floor level at least 300mm above the height of a 1% AEP flood event.

Environmental Protection	
PO 3.1 Buildings and structures used either partly or wholly to contain or store hazardous materials are designed to prevent spills or leaks leaving the confines of the building during a 1% AEP flood event to avoid potential environmental harm.	DTS/DPF 3.1 Development involving the storage or disposal of hazardous materials is wholly located outside of the 1% AEP flood plain or flow path.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Flooding - Evidence Required) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development adopts a precautionary approach to mitigate potential impacts on people, property, infrastructure and the environment from potential flood risk through the appropriate siting and design of development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Flood Resilience	
PO 1.1 Development is sited, designed and constructed to minimise the risk of entry of potential floodwaters where the entry of flood waters is likely to result in undue damage to or compromise ongoing activities within buildings.	DTS/DPF 1.1 Habitable buildings, commercial and industrial buildings, and buildings used for animal keeping incorporate a finished floor level at least 300mm above: (a) the highest point of top of kerb of the primary street or (b) the highest point of natural ground level at the primary street boundary where there is no kerb
Environmental Protection	
PO 2.1 Buildings and structures used either partly or wholly to contain or store hazardous materials are designed to prevent spills or leaks leaving the confines of the building.	DTS/DPF 2.1 Development does not involve the storage of hazardous materials.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Heritage Adjacency Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development adjacent to State and Local Heritage Places maintains the heritage and cultural values of those Places.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Development adjacent to a State or Local Heritage Place does not dominate, encroach on or unduly impact on the setting of the Place.	DTS/DPF 1.1 None are applicable.
Land Division	
PO 2.1 Land division adjacent to a State or Local Heritage Place creates allotments that are of a size and dimension that enables the siting and setbacks of new buildings from allotment boundaries so that they do not dominate, encroach or unduly impact on the setting of the Place.	DTS/DPF 2.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development which in the opinion of the relevant authority materially affects the context within which the **State Heritage Place** is situated. Note - Referrals are not required where the Overlay relates to a **Local Heritage Place**	Minister responsible for the administration of the *Heritage Places Act 1993*.	To provide expert assessment and direction to the relevant authority on the potential impacts of development adjacent State Heritage Places.	Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Historic Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Historic themes and characteristics are reinforced through conservation and contextually responsive development, design and adaptive reuse that responds to existing coherent patterns of land division, site configuration, streetscapes, building siting and built scale, form and features as exhibited in the Historic Area and expressed in the Historic Area Statement.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

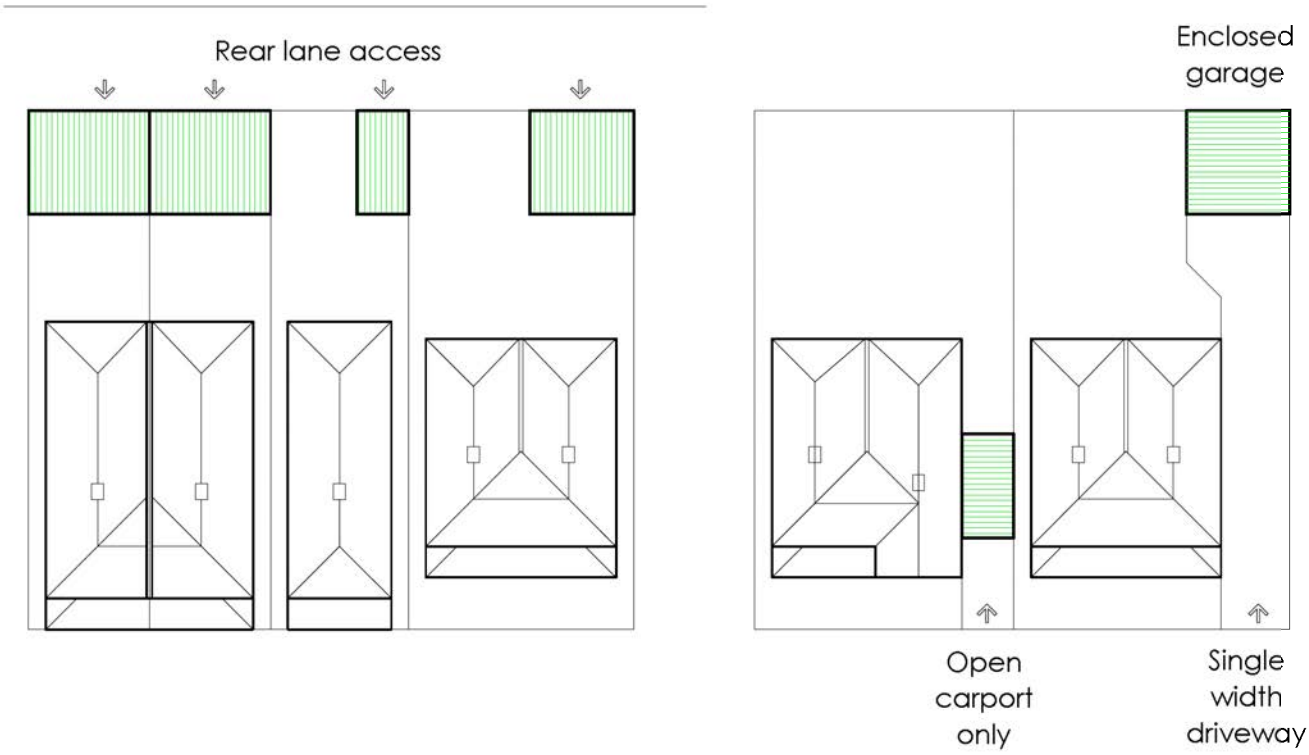
Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All Development	
PO 1.1 All development is undertaken having consideration to the historic streetscapes and built form as expressed in the Historic Area Statement.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 The form and scale of new buildings and structures that are visible from the public realm are consistent with the prevailing historic characteristics of the historic area.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is consistent with the prevailing building and wall heights in the historic area.	DTS/DPF 2.2 None are applicable.
PO 2.3	DTS/DPF 2.3

Design and architectural detailing of street-facing buildings (including but not limited to roof pitch and form, openings, chimneys and verandahs) complement the prevailing characteristics in the historic area.	None are applicable.
PO 2.4 Development is consistent with the prevailing front and side boundary setback pattern in the historic area.	DTS/DPF 2.4 None are applicable.
PO 2.5 Materials are either consistent with or complement those within the historic area.	DTS/DPF 2.5 None are applicable.
Alterations and additions	
PO 3.1 Alterations and additions complement the subject building, employ a contextual design approach and are sited to ensure they do not dominate the primary façade.	DTS/DPF 3.1 Alterations and additions are fully contained within the roof space of an existing building with no external alterations made to the building elevation facing the primary street.
PO 3.2 Adaptive reuse and revitalisation of buildings to support retention consistent with the Historic Area Statement.	DTS/DPF 3.2 None are applicable.
Ancillary development	
PO 4.1 Ancillary development, including carports, outbuildings and garages, complements the historic character of the area and associated buildings.	DTS/DPF 4.1 None are applicable.
PO 4.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s) and does not dominate the building or its setting.	DTS/DPF 4.2 None are applicable.
PO 4.3 Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, be below the parapet line, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.	DTS/DPF 4.3 None are applicable.
PO 4.4 Fencing and gates closer to a street boundary (other than a laneway) than the elevation of the associated building are consistent with the traditional period, style and form of the associated building.	DTS/DPF 4.4 None are applicable.
Land Division	
PO 5.1 Land division creates allotments that are: (a) compatible with the surrounding pattern of subdivision in the historic area (b) of a dimension to accommodate buildings of a bulk and scale that reflect existing buildings and setbacks in the historic area	DTS/DPF 5.1 None are applicable.
Context and Streetscape Amenity	
PO 6.1 The width of driveways and other vehicle access ways are consistent with the prevailing width of existing driveways of the historic area.	DTS/DPF 6.1 None are applicable.
PO 6.2 Development maintains the valued landscape patterns and characteristics that contribute to the historic area, except where they compromise safety, create nuisance, or impact adversely on buildings or infrastructure.	DTS/DPF 6.2 None are applicable.
Demolition	
PO 7.1 Buildings and structures, or features thereof, that demonstrate the historic characteristics as expressed in the Historic Area Statement are not demolished, unless: (a) the front elevation of the building has been substantially altered and cannot be reasonably restored in a manner consistent with the building's original style or (b) the structural integrity or safe condition of the original building is beyond reasonable repair.	DTS/DPF 7.1 None are applicable.
PO 7.2 Partial demolition of a building where that portion to be demolished does not contribute to the historic character of the streetscape.	DTS/DPF 7.2 None are applicable.
PO 7.3 Buildings or elements of buildings that do not conform with the values described in the Historic Area Statement may be demolished.	DTS/DPF 7.3 None are applicable.
Ruins	
PO 8.1 Development conserves and complements features and ruins associated with former activities of significance.	DTS/DPF 8.1 None are applicable.

Historic Area Statements

Statement#	Statement
Historic Areas affecting City of Adelaide	

North Adelaide Hill Street Historic Area Statement (Adel 1)

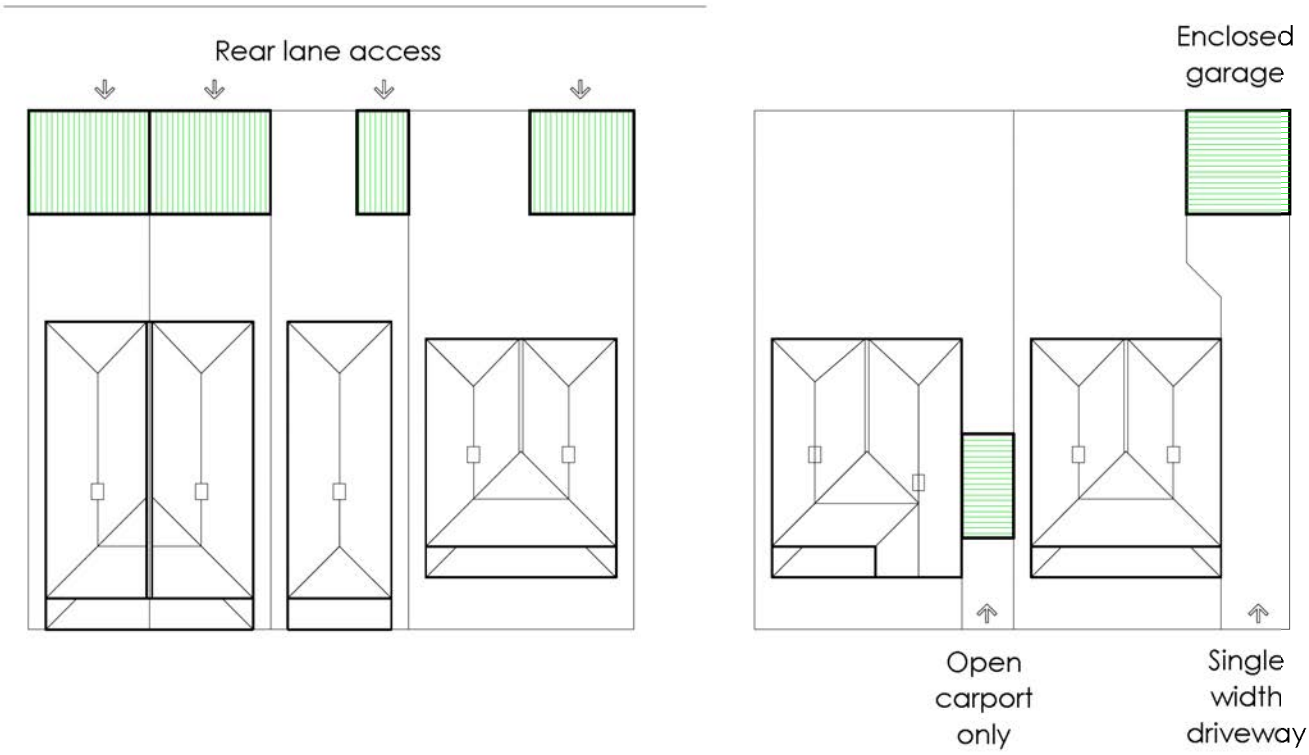


The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is an integral part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing, providing evidence of a different way of life to that experienced by the residents of the more substantial villas. The Hill Street Historic Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings. It exhibits residential architecture from all periods of the city's historical development and includes the residences of many notable Adelaide community members. The 1883-4 City Land Investment Company subdivision of Town Acres along Barnard Street and Molesworth Street resulted in a sequence of large residences which form an important part of the physical character of upper North Adelaide. A number of these remain as State Heritage Places between Hill Street and Wellington Square. Several religious orders were established west of Wellington Square during a period of economic recession when land prices were low, including St Laurence's in Buxton Street in 1867 and St Dominic's Priory in Molesworth Street in 1893. The topography of the City of Adelaide explains many of its patterns of development. Elevated land was selected to avoid flooding, but was also prestigious and offered the best views. This was the case with the allotments that were created around the high points of Strangways Terrace and Mills Terrace, where some of the city's finest buildings are located. Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period. 1943 plus - Post-War period.



Statement#		Statement
	Allotments, subdivision and built form patterns	This Area is one of the lowest density areas in Upper North Adelaide. Historically, it is one of the most important and representative residential areas of high integrity in South Australia. It also contains a range of large institutions, providing contrast in built form to the housing development around them. The Town Acre layout and later patterns of subdivision and development create large allotments, and a low-density residential character derived from generous building setbacks, orientation and patterns established by the prevailing Heritage Places and Representative Buildings. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places and Representative Buildings. Buildings do not project forward of Heritage Places or Representative Buildings, including on adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings. Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 50 percent of the site. The historic built-form character of the Area is established by State and Local Heritage Places and Representative Buildings, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Barnard Street The historic residential streetscape is formed by the moderate street width and the one and two-storey detached and semi-detached dwellings that are almost exclusively Local and State Heritage Places, and the Local Heritage listed Sunningdale Apartments at 2-20 Barnard Street. The dwellings have landscaped front gardens and are well setback from the northern street frontage and sited closer to the southern street frontage. There is only a slight variation in the primary frontage setbacks, which form a coherent building line. The regular pattern and siting is established by the Heritage Places and Representative Buildings. The allotments are generally of consistent size and pattern. Barton Terrace West The high amenity streetscape is formed by the wide street setting and the Adelaide Park Lands frontage. The historic character comprises of single-storey detached and semi-detached dwellings that are almost exclusively State and Local Heritage Places. The landscaped gardens make an important contribution to the streetscape setting. There is a slight variation in setbacks, but when viewed from the street, it is coherent. The pattern, siting and setback of dwellings is established by the Heritage Places. Buxton Street The high amenity value of the historic streetscape is derived from the moderate street width and the highly cohesive frontages of single storey detached dwellings of Local Heritage value, one and two storey detached dwellings of State Heritage value and the Representative Building on large allotments of predominantly consistent size and pattern. The dwellings have landscaped gardens with generous front setbacks, and the side setbacks are established by the regular pattern and siting of Heritage Places and Representative Buildings on individual allotments. The setbacks of dwellings are closer to the street frontage towards Jeffcott Street. A traditional corner shop abutting the frontages at the north-western corner of Buxton Street and Jeffcott Street is an exception to the prevailing building setbacks but complements the scale and character of the adjoining group of detached cottages on the northern frontage of Buxton Street. The imposing St Laurence's Church and Priory is enhanced by its steeply pitched roof profile and the low scale and setback of surrounding development. Childers Street The historic streetscape is formed by the wide street setting and comprises single-storey detached dwellings and two-storey dwellings that are almost exclusively Local and State Heritage Places with modest front gardens on primarily regular allotments of consistent size and pattern. The Heritage Places and Representative Building establish the side and front setback pattern. Gibbon Lane The historic streetscape character is derived from the narrow street setting and the compact residential buildings comprising one and two-storey detached dwellings and two-storey terrace housing of Local Heritage value on allotments of predominantly consistent size and pattern. The dwellings have shallow front setbacks with small garden areas and are either built on the side property boundaries or have 1 to 3 metre side setbacks. Hill Street The historic streetscape is formed by the wide street setting and the one and two-storey dwellings of Local and State Heritage value with single-width vehicle access from the street. The dwellings on the eastern side are sited close to the street with small garden areas. The dwellings on the western side have more generous setbacks with front gardens and are generally consistently setback from the primary street frontage, except for the apartments at 103 Strangways Terrace, which are uncharacteristic to the Area. The built form pattern is established by the regular pattern and siting of Heritage Places on individual allotments. The prominence of St Laurence's Church is enhanced by its steeply pitched roof profile and the low scale and setback of surrounding development. Jeffcott Street The historic streetscape is formed by the wide street setting and the large traditional single-story detached dwellings that generally have a consistent building rhythm and pattern when viewed from the street and are of predominantly Local Heritage value. The buildings have modest setbacks with small garden areas established by the Heritage Places. Some corner sites comprise buildings set on or close to the primary street frontage. The allotments are consistent in size and pattern. Mills Terrace The residential streetscape is of high quality, and the historic character is derived from the Adelaide Park Lands frontage and the low-density one and two-storey detached grand residences on large allotments set within a spacious garden setting, including landscaped front gardens. The historic dwellings are well setback from the street frontage, and the rhythm and pattern of their siting contribute to their historic character. Molesworth Street: The historic streetscape is formed by the wide street setting and the one and two-storey detached and semi-detached dwellings. The dwellings are predominantly setback from side boundaries and well setback from front boundaries with generous garden settings or front garden areas established by the regular pattern and siting of Heritage Places and Representative Buildings on individual allotments. The allotments are of a consistent size, pattern and rhythm. The Church of Perpetual Adoration within the St Dominic's Priory College site makes a valuable contribution to the streetscape quality and the historic character of the Area that is enhanced by the low scale and setback of surrounding development. Ward Street and Strangways Terrace The high amenity streetscape is formed by the wide street setting and the Adelaide Park Lands frontage along Strangways Terrace. The historic character comprises one and two-storey detached dwellings of State and Local Heritage value. The generous landscaped front gardens and garden settings make an important contribution to the streetscape setting. The primary frontage setbacks only slightly vary, but when viewed from the street, they present as a coherent building line. The Heritage Places establish the side and front setback pattern. Calvary Hospital is an important element of built form on a prominent corner site that contributes to the area's character. Queens Close, Tormore Place, Glandfield Court, Figtree Court, Strangways Place and Alder Place Minor streets with consistent building setbacks and side and rear laneway access to carports and garaging for residences fronting another street. Cardiff Street, McKay Mew, Munks Place, Priory Lane, Barnard Lane, Steuart Place and Makin Place Minor streets providing rear laneway access to carports and garaging for residences fronting another street.
	Architectural styles, detailing and built form features	Characterised by a range of quality design and architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s, with varying concentrations of styles localised to areas established by the prevailing patterns set by Heritage Places and Representative Buildings. The Heritage Places include nineteenth and early twentieth century elegant and finely detailed mansions and large villas set on large allotments, intermingled with areas containing low-density cottages, villas, and terrace houses of one and two storeys. The prevailing built form features of the area includes pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places and Representative Buildings. Buildings address the street frontages. Design elements of a Heritage Place and Representative Buildings, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place or Representative Building and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages, and side additions are located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places and Representative Buildings. The illustration below illustrates the typical and appropriate siting of carports and garages.

Statement#	Statement
Adel1	 Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Early Victorian Houses (1837 to 1869)** In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult. **Victorian Houses (1870 to 1899)** During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay-fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber-framed, and doors were typically four-panelled, with fanlights and often sidelights. **Edwardian Houses (1900 to 1915)** Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses with face brick walling and decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels. **Inter-War Houses (1916 to 1942)** In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal-framed windows. Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War. **Post War Housing (1943 plus)** During this period, a range of new styles became popular. The styles constructed in North Adelaide included Old English and Georgian Revival. Houses in these styles were constructed both before and after the Second World War and were either infills or replaced earlier houses. The Old English Revival style used elements that reference Elizabethan/Tudor architectural details, including brick or white rendered walls to simulate limewash, steeply pitched roof form and tall chimneys. The Georgian Revival style was based on an interpretation of English Georgian architecture, using a symmetrical elevation with rendered or brick walls, a fanlight above the central entrance door, a hipped roof form and generally classically derived proportions and details. This style had no verandah but often displayed an entrance portico. Some later notable architecturally designed residences, which were based on the post-war International Style, illustrate the avant-garde trend of domestic architecture in the 1960s. These houses were generally cubiform and were constructed with flat roofs, with large areas of glass in smooth masonry walls. Cantilevered elements and recessed porch areas were typical of the style. Barnard Street Victorian and Inter-war periods. Exhibits a diverse collection of architectural styles, including, but not limited to, Inter-war Mediterranean, Tudor Bungalow, Mediterranean, Inter-war Mediterranean, Old English, Georgian Revival, Victorian Gothic, Victorian villas, Victorian cottages, and row cottages. Distinctive Calvary Hospital Chapel. Barton Terrace West Victorian and Edwardian periods. Architectural styles include but are not limited to Victorian villas and Queen Anne. Buxton Street Victorian, Edwardian, Inter-war and Post-War periods. Exhibits a diverse collection of architectural styles, including but not limited to a Victorian villa, a Queen Anne villa, Tudor Gothic, Old English Revival, Inter-War Bungalow, and single and double-fronted Victorian cottages. The traditional corner shop to the north-west corner of Buxton Street and Jeffcott Street. Childers Street Victorian, Edwardian and Inter-war periods. Exhibits a collection of architectural styles, including but not limited to Victorian detached and semi-detached Victorian villas, Old English Revival, a Bungalow and Victorian cottages. Gibbon Lane Victorian period.

Statement#		Statement
		One-storey Victorian villa and two-storey Victorian terrace housing Local and State Heritage Places. Hill Street Victorian, Edwardian and Inter-war periods. Exhibits a collection of architectural styles, including but not limited to Victorian villas, semi-detached and detached Victorian cottages, Queen Anne, and a Bungalow. Distinctive St Lawrence's Church and Calvary Hospital. Jeffcott Street Victorian, Edwardian and Inter-war periods. Exhibits a collection of architectural styles, including but not limited to Victorian villas and cottages. Diversity of large, traditional, single-storey Local Heritage Places of consistent character. Mills Terrace Victorian, Edwardian and Inter-War periods. Exhibits a diverse collection of architectural styles, including, but not limited to, Victorian villas, Queen Anne villas, Federation Queen Anne, a Bungalow, Inter-war Mediterranean/Spanish Mission, a Victorian Cottage, Georgian Revival, Inter-War Mediterranean, single-fronted Victorian cottages, and Tudor Gothic. Various styles of detached dwellings of identified Heritage value. The built form incorporates articulation, bay windows, hip or hip-gable roof profiles, verandahs, balconies, and porches. Molesworth Street Victorian, Edwardian and Inter-war periods. Exhibits a diverse collection of architectural styles, including but not limited to Tudor Bungalow, Bungalow, Modernist, Mediterranean, Victorian villas, and Victorian detached and semi-detached cottages. The distinctive steeply pitched roof profile of the Church of Perpetual Adoration. Ward Street and Strangways Terrace (east of Hill Street) Victorian and Inter-war periods. Exhibits a diverse collection of architectural styles, including but not limited to Victorian villas and double fronted cottages, Victorian stables, Victorian Gothic, Bungalow, and Mediterranean Inter-war. Distinctive Calvary Hospital.
	Building height	Low-scale, one and two-storey residential buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings, except where the following Concept Plans apply: • Concept Plan 31 – Calvary Hospital • Concept Plan 32 – St Dominic's Priory College • Concept Plan 33 – Helping Hand Aged Care
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens to gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Cast iron fencing to Buxton Street. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Generous landscaped front grounds to residences with a significant number of larger dwellings surrounded by a spacious garden. Generous footpaths and verge areas, with original stone kerbing and guttering. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where traditionally vehicle access is not characteristic to the primary street frontage. Established views and vistas of the Church of Perpetual Adoration, Calvary Hospital and Calvary Hospital Chapel. Stone kerbing along Mills Terrace, Molesworth Street, Barnard Lane, Childers Street and Barnard Terrace West. Stone in concrete kerbing along Gibbon Lane and Jeffcott Street surrounding Wellington Square. Stone water table along Molesworth Street, Munks Place and parts of Mills Terrace and Jeffcott Street. Red brick paver water table along parts of Mills Terrace and Barnard Lane. Former Municipal Tramways Trust Poles along Hill Street and Ward Street. Blue enamel house number plates with white numbering are placed along Childers Street, Molesworth Street, Strangways Terrace, and Ward Street. Nature strips of generous proportion along Jeffcott Street, Barton Terrace West, Barnard Street and Ward Street. Significant avenues of trees along Jeffcott Street, Barton Terrace West, Childers Street, Buxton Street, Molesworth Street and Barnard Street.
	Representative Buildings	Identified - refer to SA planning database.

Statement#		Statement
		Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Childers East Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, and the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services). It exhibits residential architecture from different periods of the city's development, from early colonial times (workers' cottages) through to and including the Inter-war period. Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.
	Allotments, subdivision and built form patterns	This Area is characterised by low-density residential development on rectangular allotments of varying widths and sizes. The Area has retained much of its historic grid pattern with major and minor streets, lanes, and places. The Town-Acre layout and later patterns of subdivision and development create large allotments, and a low-density residential character derived from generous building setbacks, orientation, and patterns established by the prevailing Heritage Places and Representative Buildings. The historic built-form character is established by detached and semi-detached dwellings ranging from some large-scale dwellings fronting Barton Terrace West to compact dwellings on smaller, narrower allotments and sometimes on street corners. Heritage Places and Representative Buildings create a cohesive pattern of shallow as well as examples of deeper building setbacks from the primary street frontages. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places or Representative Buildings, including on adjacent sites, nor do they extend to side boundaries other than for party walls in semi-detached and row dwellings. Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 40 percent of the site. The historic built-form character of the Area is established by State and Local Heritage Places and Representative Buildings, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Barton Terrace West The historic streetscape is formed by the wide street setting and attractive outlook to the Adelaide Park Lands, setback with generous front garden areas to the east towards O'Connell Street and buildings on or close to the street frontage to the west by the intersections with Jeffcott Street and Hack Street forming a harder built edge. Childers Street The historic streetscape is formed by the relatively wide street and the cohesive pattern of dwellings, mostly Heritage Places, set back from the primary street frontage with small front garden areas, with buildings on the street frontage at the two corner sites at the western end. Groups of allotments of consistent size and width containing similar buildings (in terms of period, size, style, etc) establish a pattern and rhythm, including single-storey row cottages, detached dwellings, and terrace houses with narrow frontages on the northern side and detached and semi-detached cottages with consistent setbacks on the southern side. Gover Street The intimate historic streetscape is formed by the narrow street width and the cohesive pattern of dwellings, mostly Heritage Places, set back from the primary street with small front garden areas, with buildings on or close to the street frontage at the two corner sites at the western end, as well as other examples closer to O'Connell Street. Generally, close-set single-storey detached or semi-detached dwellings with consistent setbacks, size, patterns and rhythm, and small front gardens are prevalent, but on the southern side west of Mansfield Street, some dwellings have more generous side or front setbacks. Hack Street The intimate historic character of this narrow street is derived from single-storey detached cottages setback with small front gardens, single-width carparking, and rear access to residences on Jeffcott Street. Jeffcott Street (east side) The historic streetscape is formed by the wide street and single-storey dwellings typically built on the street frontage, especially north of Gover Street, as is the two-storey 1923 corner hall at 200 Jeffcott Street. To the north of Childers Street, the historic streetscape is intact and comprises single-storey row cottages with a consistent and intensive built form edge on or close to the street frontage, with small garden areas. Mansfield Street The historic character of this narrow street is established by single-storey detached cottages that are primarily Heritage Places and largely intact. The dwellings are consistently setback close to the street with small front garden areas. The allotments and buildings are of a consistent size, pattern and rhythm. Travers Place Minor street characterised by detached dwellings and row cottages with consistent building setbacks and providing rear laneway access for residences on Barton Terrace West. Tynte Place Minor street with consistent building setbacks and providing rear access to a dwelling fronting Gover Street. The historic character is derived from consistently setback single-storey, single- and double-fronted detached and semi-detached cottages with small front garden areas or verandahs extending to the street frontage. The allotments are of a consistent size, pattern, and rhythm. Tower Street North Minor street characterised by single-storey detached and semi-detached dwellings and providing rear laneway access for residences fronting another street. Fenchurch Street, Glover Place and Gover Place West Minor streets providing rear laneway access for non-character and character residences fronting another street. Barton Place, Childers Court, Curtin Lane, David Street, Davies Place, Greenock Court, Lombard Street and Tasker Lane Minor streets with consistent building setbacks and providing rear laneway access to residences fronting another street. With the exception of Barton Place and Taskers Lane, these streets predominantly comprise non-character buildings.
	Architectural styles, detailing and built form features	Characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s, with varying localised concentrations of styles that are exhibited by the Heritage Places and Representative Buildings. The variety of dwelling types has been retained by the conservation of Heritage Places, characterised by nineteenth and early twentieth century elegant and finely detailed mansions and other large villas set on large allotments, together with low-density cottages, villas and terrace houses of one and two storeys. The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places and Representative Buildings. Buildings address the street frontages. Design elements of a Heritage Place and Representative Buildings, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place or Representative Building and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages and side additions are located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places and Representative Buildings. The illustration below illustrates the typical and appropriate siting of carports and garages.

Statement#	Statement

Adel2

Undercroft parking is inconsistent with the historic character and value of the Area.

The Area is characterised by a variety of architectural styles, including but not limited to:

Early Victorian Houses (1837 to 1869)

In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult.

Victorian Houses (1870 to 1899)

During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay-fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber-framed, and doors were typically four-panelled, with fanlights and often sidelights.

Edwardian Houses (1900 to 1915)

Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels.

Inter-War Houses (1915 to 1942)

In the period between the First World War and Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows.

Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War.

Barton Terrace West

Victorian and Edwardian periods.

Exhibits a diverse collection of architectural styles, including but not limited to Queen Anne villa, Victorian cottages, villas and a shop.

Distinctive Ru Rua Mansions.

Childers Street

Victorian, Edwardian and Inter-War periods.

Exhibits a diverse collection of architectural styles including but not limited to Estonian Hall, Edwardian villa, Bungalow and Victorian villas, cottages and terraces.

Continuity of parapets, verandahs and roof profiles.

Gover Street

Victorian and Edwardian periods.

Exhibits a diverse collection of architectural styles, including but not limited to Queen Anne villas, Victorian Italianate and Victorian terraces, villas and cottages.

Hack Street

Victorian period.

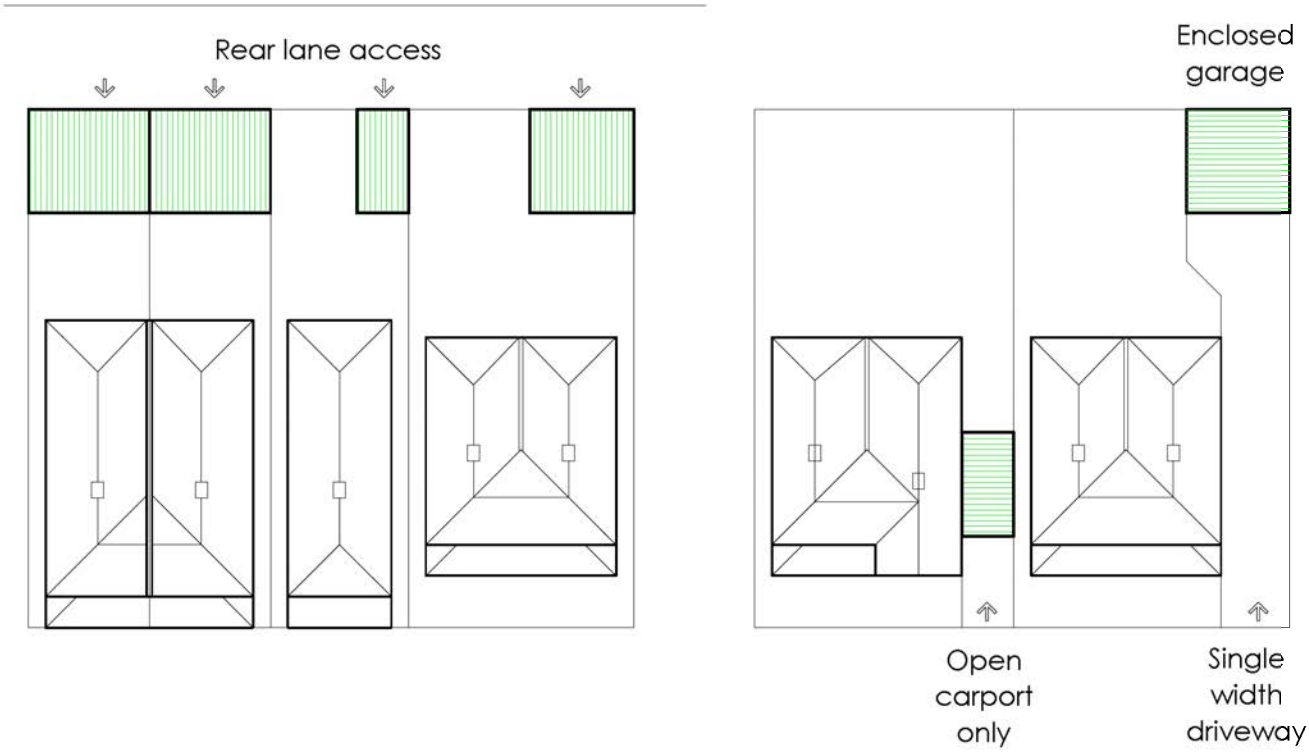
Architectural styles include but are not limited to Victorian cottages.

Jeffcott Street (east side)

Victorian and Inter-war periods.

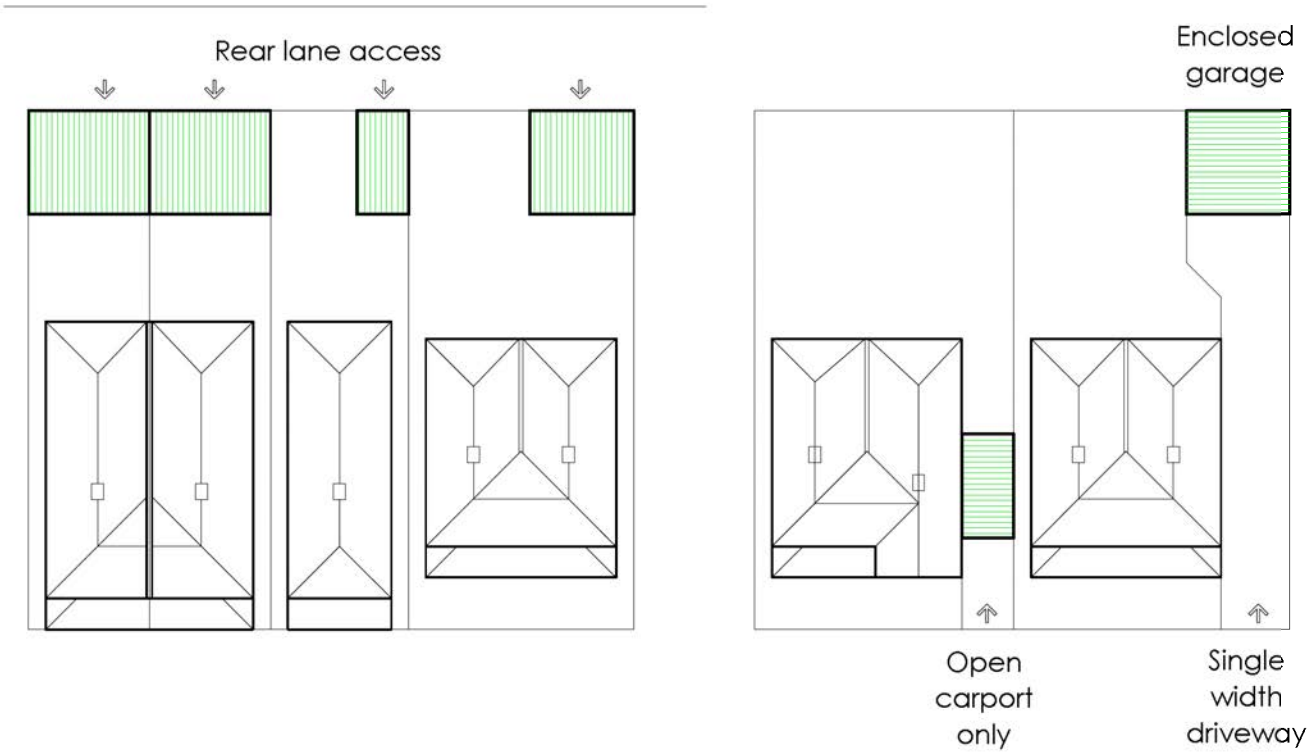
Exhibits a diverse collection of architectural styles, including but not limited to Victorian cottages, Victorian former shop, Victorian Italianate, Estonian Hall, and Gothic cottage.

Continuity of roof and verandah profiles north of Childers Street.



Lombard Street

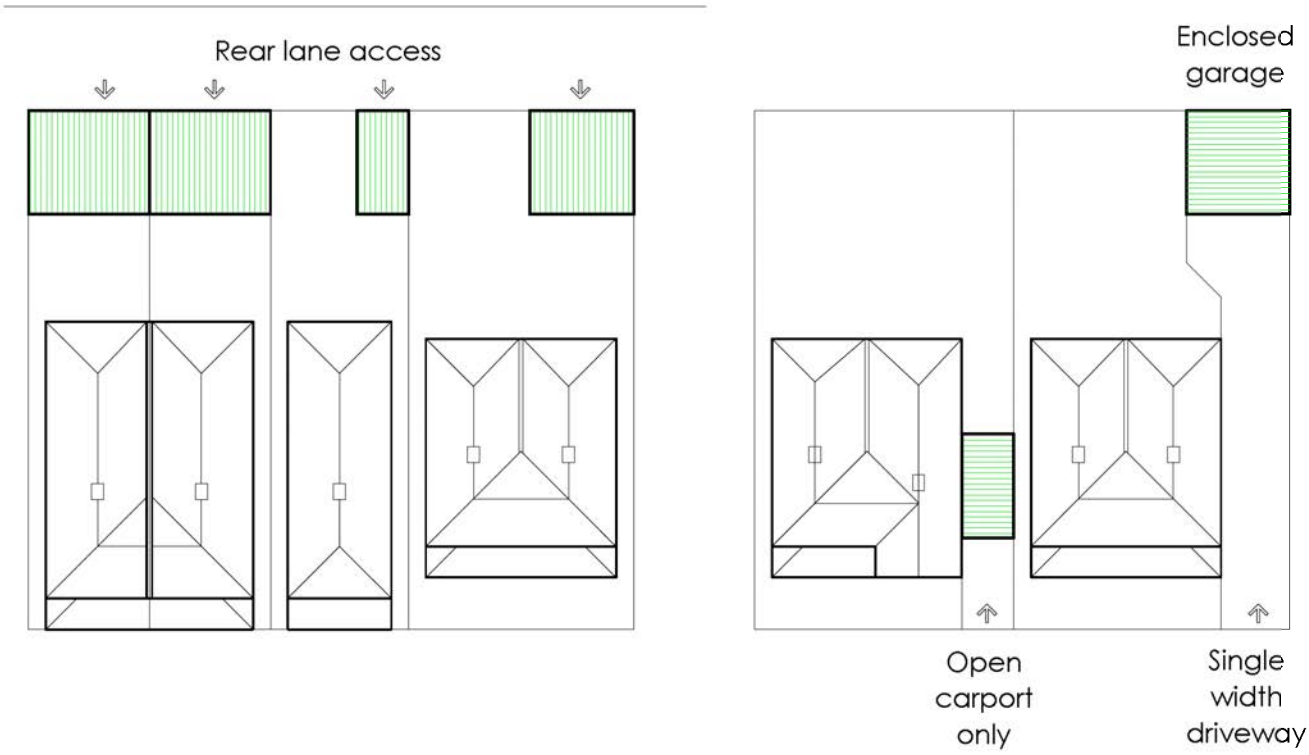
Inter-war period.



Architectural styles include but are not limited to the Inter-war Bungalow.

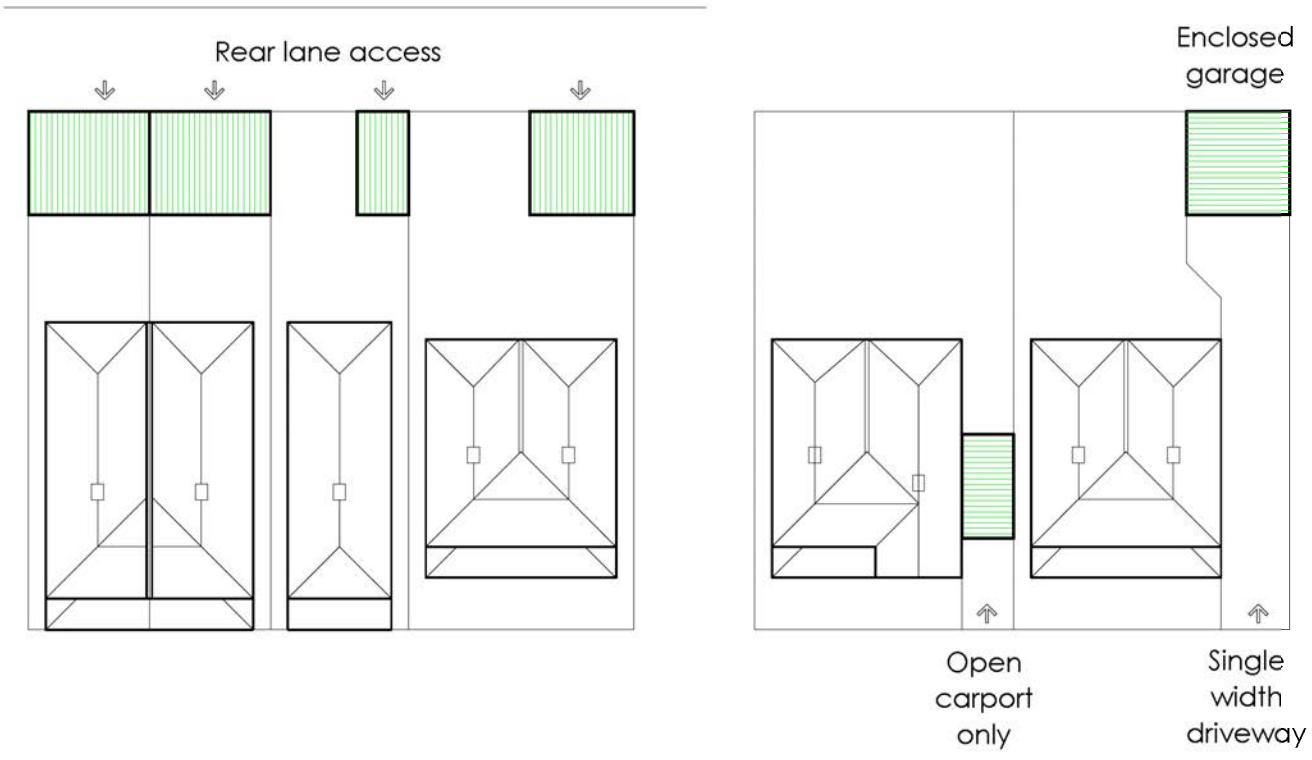
Mansfield Street and Travers Place

Statement#		Statement
		Victorian period. Architectural styles include but are not limited to Victorian cottages. Taskers Lane Victorian period. Architectural styles include but are not limited to Victorian row cottages. Tower Street North Victorian, Edwardian and Inter-war periods. Architectural styles include but are not limited to Victorian cottages and Edwardian villas, and an early Bungalow.
	Building height	Low-scale, one and two-storey residential buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings. Predominantly single-storey buildings along the Childers Street, Gover Street, Jeffcott Street, Hack Street and Mansfield Street frontages. Building height, including the floor to ceiling clearances of each level, references the prevailing floor level and building heights of Heritage Places and Representative Buildings in the Area.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone with brick or rubble side and rear walls. Brick, moulded render or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber-framed window, doors and roof trim. Cast iron or timber posts to the verandahs, elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (later period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences, sometimes with piers and cast-iron railings. Brick, rendered masonry and timber side fences on secondary street frontages. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Generous landscaped front grounds to residences with a significant number of larger dwellings surrounded by a spacious garden. Generous footpaths and verge areas, with original stone kerbing and guttering. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where vehicle access does not prevail on primary street frontage. Hack Street - intimate character of a narrow street. Stone kerbing along Childers Street and Jeffcott Street. Cast iron street name plates on Fenchurch Street. Blue enamel house number plates on Childers Street and Gover Street. Nature strips of generous proportion along Jeffcott Street and Barton Terrace West. Significant avenues of trees along Jeffcott Street, Gover Street and Childers Street. Tall trees at the intersection of Barton Terrace West and Jeffcott Street create an imposing 'gateway' to this major entrance to North Adelaide and complement the character of existing street tree planting. Street trees, high quality paving and landscaping.
	Representative buildings	Identified - refer to SA planning database.
	North Adelaide Wellington Square Historic Area Statement (Adel 3)	
	Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. North Adelaide formed a distinctive part of the plan for Adelaide drawn up by Colonel William Light; its form and layout were determined by its geography. Upper North Adelaide, in particular, repeats the land division pattern created by Light's Plan in South Adelaide, with the Town Acres disposed in a regular grid layout around Wellington Square, the only Square incorporated within the initial plan for North Adelaide. The Area demonstrates the laying out and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings, and for the residences of many notable Adelaide community members. Wellington Square, the only Square in North Adelaide, is surrounded by primarily single- and two-story developments with a village character, including a former shop, a former Church, and a hotel. Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.
	Allotments, subdivision and built form patterns	Wellington Square is one of the city's most important and intact historical public spaces and one of the most attractive residential areas in North Adelaide. The historic streetscape is contiguous with and complementary to the streetscape character of the major streets that lead into the Square. The historic rectilinear grid pattern of streets and allotments around the Square or fronting Jeffcott Street is largely intact.



Statement#		Statement
		Generally, the dwellings are set within generous landscaped grounds which typically cover 50 percent of the site. The historic built-form character is established by mainly detached and some attached dwellings that are Local or State Heritage Places, along with a church building and a hotel that are State Heritage Places, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Gloucestor Place Minor street characterised by single-storey detached cottages located close to the street with verandahs extending to the street frontage and providing rear laneway access for buildings fronting another street. Wellington Square and Jeffcott Street The historic streetscape is derived from the wide streets that surround Wellington Square and the nineteenth century buildings that are sited on or close to the street frontage with garden areas enclosing the open space of the Square and reinforcing the rectilinear pattern of street spaces. The building scale, siting, setbacks and subdivision patterns are established by Heritage Places. The former Primitive Methodist Church makes a valuable contribution to the streetscape and historic character of the Area. Wellington Court Minor street flanked by the side elevation of the Sunningdale Apartments, a Local Heritage Place, and non-character two-storey dwellings setback with small garden areas and providing laneway access for buildings fronting another street.
Adel3	Architectural styles, detailing and built form features	The area surrounding Wellington Square is characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1950s. The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof and the design, form, and composition of facades reflect the traditional proportions of Heritage Places and Representative Buildings. Buildings address the street frontages. Design elements of a Heritage Place, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place and are materially compatible with the building. Second-storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages, and side additions are located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places. The illustration below illustrates the typical and appropriate siting of carports and garages.  Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Early Victorian Houses (1837 to 1869)** In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult. **Victorian Houses (1870 to 1899)** During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber-framed, and doors were typically four-panelled, with fanlights and often sidelights. **Inter-War Houses (1915 to 1942)** In the period between the First World War and Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows. Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War. **Post War Housing (1943 plus)** During this period, a range of new styles became popular. The styles constructed in North Adelaide included Old English and Georgian Revival. Houses in these styles were constructed both before and after the Second World War and were either infills or replacements for earlier houses. The Old English Revival style used elements which made some reference to Elizabethan/Tudor architectural details, including brick or white rendered walls to simulate limewash, steeply pitched roof form and tall chimneys. The Georgian Revival style was based on an interpretation of English Georgian architecture, using a symmetrical elevation with rendered or brick walls, a fanlight above the central entrance door, a hipped roof form and generally classically derived proportions and details. This style had no verandah but often displayed an entrance portico. Some later notable architecturally designed residences, which were based on the post-war International Style, illustrate the avant-garde trend of domestic architecture in the 1960s. These houses were generally cubiform and were constructed with flat roofs, with large areas of glass in

Statement#		Statement
		smooth masonry walls. Cantilevered elements and recessed porch areas were typical of the style. Eastern side (including northern and southern side) of Wellington Square and Jeffcott Street Victorian period. Exhibits a diverse collection of architectural styles, including, but not limited to, Victorian row cottages, Victorian detached and semi-detached cottages, Victorian villas, a Victorian hotel, and a Victorian former Primitive Methodist Church. Western side (including northern and southern side) of Wellington Square and Jeffcott Street Inter-War and Post-war periods. Exhibits a collection of architectural styles, including but not limited to Victorian Cottage, Old English, Tudor Bungalow, Italianate, Inter-war International and Mediterranean Inter-war.
	Building height	Low scale, one and two-storey residential and other buildings. Established by the prevailing historic built-form pattern set by Heritage Places. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor level and building heights of Heritage Places within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Stone and cast-iron boundary fencing. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	A linear grid of tree-lined streets relates to the subdivision of the original Town Acres. Characterised by intact existing layout, a pedestrian pathway system and informal recreation areas provide attractive and safe shelter and seating. The informal character and unity of Wellington Square is provided through appropriate landscaping, paving, planting, lighting and street furniture. Vehicle access to and through the area, together with a safe, pleasant pedestrian environment within Wellington Square and adjacent footpaths of generous proportion around the perimeter roadway of Wellington Square. Stone in concrete kerbing and stormwater tables around the inner and outer perimeter roadway of Wellington Square. Cast iron bollards. Cast iron street name plate on the eastern side of the Square. Single-width vehicle access to the dwellings along the Wellington Square frontage. Jeffcott Street vista south, Jeffcott Street vista north, Tynte Street vista east, Molesworth Street vista west.
	Representative buildings	Not identified.
	North Adelaide Tynte Street Historic Area Statement (Adel 4)	
	Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings, and for the residences of many notable Adelaide community members. North Adelaide also retains strong physical evidence of the historical stages of the colony's development, most particularly the typical 1850s to 1880s village-type settlement pattern, with shops and other services. These remain in Kermode Street, Melbourne Street, and Tynte Street, particularly, as these streets served as the local main streets for the three discrete sections of North Adelaide. Tynte Street originally served as the local main street for upper North Adelaide, and major community buildings reflect its early function, including the school, post office, institute, fire station, Baptist church, and early shops. The introduction of the horse-drawn tramway along O'Connell Street in 1878 drew commercial development away from Tynte Street but also made the western Town Acres, which were previously sparsely settled, more accessible, and construction of substantial houses soon followed. Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.
	Allotments, subdivision and built form patterns	The formal and dignified historic character of Tynte Street derives from the typical 1850s to 1880s village-type settlement pattern, with shops and other services and evidence of its traditional community uses such as the post office, library, hotel, and church, which, along with the wide tree-lined streetscape, still exist today. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings. The intimate scale of Tynte and Archer Streets is derived from historic built form. Generally, buildings are set within landscaped grounds and gardens. The historic built-form character of the Area is established by State and Local Heritage Places, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Archer Street (north side)

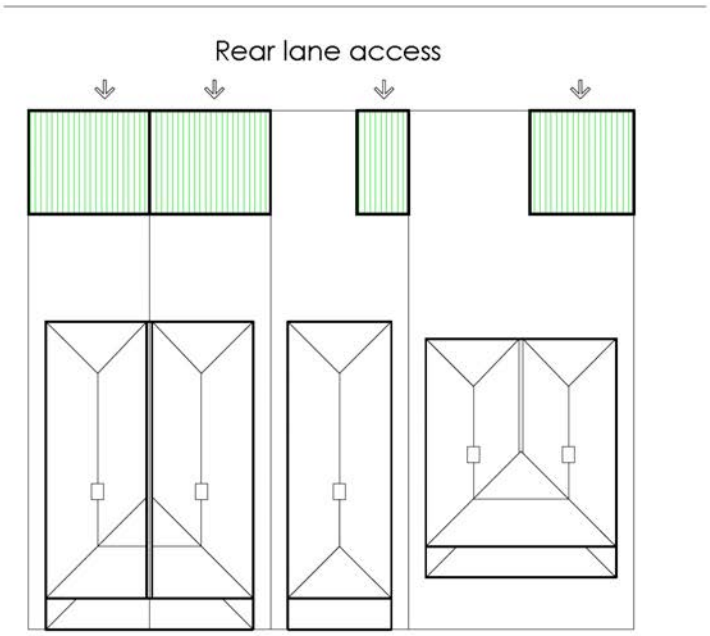


Statement#		Statement
		The historic streetscape is derived from the narrow street and the historic built form, which is sited close to the street frontage. A small garden area along the street frontage contributes to its intimate scale. Cambridge Street The historic character is derived from the detached and semi-detached dwellings set close to the street frontage. The State and Local Heritage Places establish the historic built form character. Mansfield Street The historic character of this narrow street is established by single-storey detached cottages that are primarily Heritage Places and largely intact. The dwellings are consistently set close to the street with small front garden areas. The allotments and buildings are of a consistent size, pattern and rhythm. Tynte Court Minor street with consistent building setbacks and providing side and rear laneway access to carports and garaging for residences fronting another street. Tynte Place (south side) Minor street (on the southern side) with consistent building setbacks and providing rear access to buildings fronting another street. The historic built-form character is established by State and Local Heritage Places. Tynte Street The formal and dignified streetscape is established by the historic large nineteenth-century church, institutional, retail, and hotel buildings sited on or close to the street frontage. These buildings make a valuable contribution to the streetscape and historic character of the Area. The streetscape character is reinforced by the intimate scale derived from the historic built form sited on or close to the street frontage. The allotment pattern and size reflect the function of the historic buildings. Tower Street South and Chapel Street (north side) Minor streets with a single fronted cottage set close to the street frontage, with a small garden area, and providing side and rear laneway access for residences fronting another street.
Adel4	Architectural styles, detailing and built form features	Characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to 1940s, with varying concentrations of styles localised to areas established by the prevailing patterns set by Heritage Places. The prevailing built form features of the Area includes pitched roofs (hipped and/or gable ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof and the design, form, and composition of facades reflect the traditional proportions of Heritage Places and Representative Buildings. Buildings address the street frontages. Design elements of a Heritage Place, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages, and side additions are located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places. The illustration below illustrates the typical and appropriate siting of carports and garages.  Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Early Victorian Houses (1837 to 1869)** In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later but the low scale of these buildings often made this difficult. **Victorian Houses (1870 to 1899)** During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights. **Edwardian Houses (1900 to 1915)** Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used as the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels. **Inter-War Houses (1916 to 1942)** In the period between the First World War and Second World War new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery

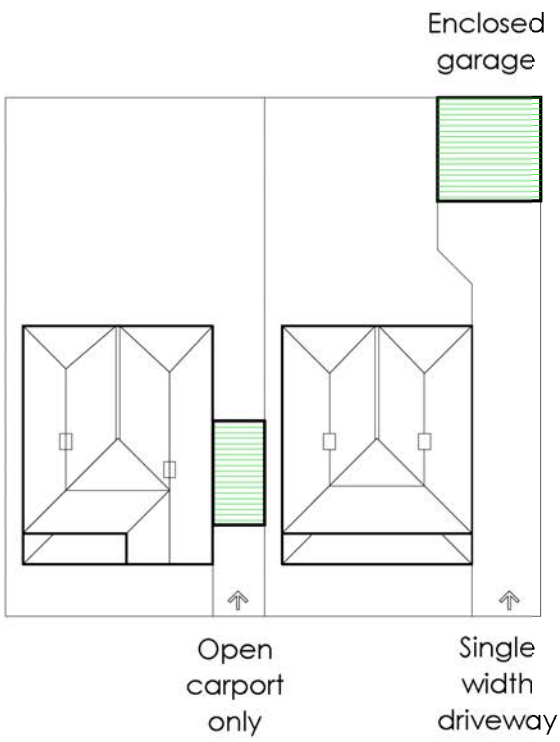
Statement#		Statement
		remained characteristic of the housing styles, but there was some use of metal framed windows. Housing development essentially stopped in North Adelaide during the period 1942 to 1950 because of the materials shortages caused by the Second World War. Archer Street (north side) Victorian and Edwardian periods. Architectural styles include but are not limited to Victorian shop and Edwardian semi-detached cottages. Cambridge Street Edwardian and Inter-war periods. Architectural styles include but are not limited to Bungalow. Mansfield Street Victorian and Inter-war periods. Victorian single-fronted cottage and semi-detached bungalow. Tynte Place (south side) Victorian period. Italianate Architectural style of the North Adelaide Baptist Church, hall, stables and boundary wall and the Federation style of the former stables of the Hall. Tynte Street Victorian and Edwardian periods. High-quality State Heritage public buildings. Exhibits a diverse collection of architectural styles, including but not limited to Victorian row workers cottages, Italianate Church and Manse, Victorian Italianate Institutional buildings, Transitional design, Edwardian Queen Anne villa, Victorian Italianate hotel, Victorian semi-detached villa, and Gothic Hall.
	Building height	Low scale, two-storey traditional community and residential buildings. Established by the prevailing patterns set by Heritage Places. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor level and building heights of Heritage Places within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Quality landscaping, paving and street furniture that complements its historic context, with the wide footpaths along Tynte Street. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where traditionally vehicle access is not characteristic of the primary street frontage. Vistas east and west along Tynte Street. Stone in concrete kerbing and stormwater tables around the inner and outer perimeter roadway of Wellington Square. Drinking fountain on Tynte Street. Two cast-iron hitching posts are present in front of the former hotel in Tynte Street. Vehicle access is typically provided from laneways or minor streets.
	Representative Buildings	Not identified.
	North Adelaide Carclew Historic Area Statement (Adel 5)	
	Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is an integral part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Area demonstrates the laying out and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings. It exhibits residential architecture from all periods of the city's development and includes the residences of many notable Adelaide community members. Following the survey and settlement, the natural landscape was converted to a cultural landscape, which now reflects the divisions of wealth and influence in the early colony. The elevated land adjacent to the Adelaide Park Lands, such as Strangways Terrace, provided prestigious residential addresses. The topography of the City of Adelaide explains many of its patterns of development. Elevated land was selected to avoid flooding, but was also prestigious and offered the best views. This was the case with the allotments that were created around the high points of Montefiore Hill and Strangways Terrace, where some of the city's finest buildings are located, such as Carclew, Aquinas College and Bishop's Court. The built form of North Adelaide is indicative of the social divisions and occupations of Adelaide society from early settlement. It retains many buildings and sites of State and Local Heritage value, ranging from large mansions to simple row cottages, corner shops and hotels to major churches and institutional buildings that reflect the different periods of development. The diversity of scale and integrity of the remaining historic built form is a microcosm of development periods and traditional housing styles in the State as a whole.

Statement#		Statement
		Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period. 1943 plus - Post-war period.
	Allotments, subdivision and built form patterns	The Area is one of the most attractive and historically significant residential areas in the city and is located adjacent to the Adelaide Park Lands. The Area is characterised by an intact and generally cohesive streetscape of nineteenth and twentieth-century detached houses set in landscaped grounds and imposing two-storey terrace houses. The Town-Acre layout and later patterns of subdivision and development create large allotments, and a low-density residential character derived from generous building setbacks, orientation, and patterns established by the prevailing Heritage Places. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings. Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 50 percent of the site. The historic built-form character of the Area is established by State and Local Heritage Places, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Christ Church Lane Provides a pedestrian walkway between Jeffcott Street and Palmer Place. Downs Court The western portion provides a pedestrian walkway between Strangways Terrace and Jeffcott Street, and the eastern portion provides rear laneway access to carports and garages for residences fronting another street. Frederick Place and Australia Lane (west) Minor streets with minimal historic value but characterised by consistent building setbacks, and providing rear or side access for residences fronting another street. Jeffcott Street The attractive historic streetscape is formed by the wide street setting and the low-density one and two-storey detached dwellings that are of generally consistent character and of predominantly Local Heritage value. The historic streetscape character north of Ward Street comprises a close grouping of single-storey row cottages sited near the street frontage with small garden areas. Heritage Places established the coherent pattern and siting. The historic streetscape character south of Ward Street comprises residences and a former church school that are generally setback from the street frontage with front garden areas. The coherent pattern and siting is established by Heritage Places. The visual prominence of Christ Church and Carclew, established by views and vistas, forms an important part of Jeffcott Street's character. Montefiore Hill, Palmer Place and Brougham Place: The high amenity streetscape is derived from the frontage of Palmer Gardens and the Adelaide Park Lands, and the open nature of the streetscape. The unique, high-quality historic streetscape is also derived from the low-density detached State Heritage mansions set on large, wide allotments with generous side and front setbacks and the extensive views and vistas from Palmer Place and Montefiore Hill of the Adelaide Park Lands and cityscape. The spacious landscaped garden settings make an important contribution to the streetscape setting. The strong visual prominence of the State Heritage Places is derived from the positioning and grandeur of the buildings above street level and the views and vistas from Palmer Place and Montefiore Hill. The visual prominence of the State Heritage Places at Aquinas College is enhanced by its prominent corner site location, expansive street frontage and spacious garden setting. There are also significant views and vistas of prominent major landmark buildings in the vicinity of Bishops Court, particularly Bishops Court, Christ Church and Rectory and other State Heritage Places. Strangways Terrace: The high amenity streetscape is derived from the Adelaide Park Lands frontage and the wide street setting. The historic streetscape character is also established by the low-density, large Victorian villas on large allotments situated on the western part of the Terrace, and cohesion derived from the pattern of detached houses. The allotments vary in sizes but generally establish a consistent rhythm and pattern. There is only a slight variation in the primary frontage setbacks, which form a coherent building line. The pattern and siting are established by the Heritage Places. The landscaped gardens make an important contribution to the streetscape setting and form an integral part of the area's character. Carclew dominates Montefiore Hill, enhanced by its prominent corner location, spacious grounds and setback and separation from surrounding development. Ward Street (east of Jeffcott Street): The attractive streetscape is formed by the wide street setting. Bishops Court, set within a spacious landscaped garden and well setback from Ward Street, makes an important contribution to the historic streetscape setting, as do the State Heritage listed former stables built on the street frontage. The historic streetscape is characterised by buildings that respect and interpret the existing nineteenth-century buildings. The visual prominence of the Bishops Court, established by views and vistas, forms an important part of Ward Street's historic streetscape character. Ward Street (west of Jeffcott Street): The attractive historic streetscape is formed by the wide street setting and the low-density one and two-storey detached dwellings. The historic streetscape on the northern side is characterised by similar sized allotments, with buildings setback from front and side boundaries with front garden areas. The historic streetscape on the southern side is characterised by a more intimate development pattern derived from the close grouping of smaller single-storey detached cottages of Local Heritage value located on or near the street with front garden areas. Heritage Places establish the building setbacks, addressing the street frontage.
	Architectural styles, detailing and built form features	Characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s and from the 1960s, with varying concentrations of styles localised to areas established by the prevailing patterns set by Heritage Places. The variety of dwelling types has been retained by the conservation of Heritage Places, characterised by nineteenth and early twentieth century elegant and finely detailed mansions and other large villas set on large allotments, as well as cottages, villas and terrace houses of one and two storeys. The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places and Representative Buildings. Buildings address street frontages. Design elements of a Heritage Place, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions consist of materials and proportions that reflect the character of the Heritage Place and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages and side additions located behind the main face of building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places. The illustration below illustrates the typical and appropriate siting of carports and garages.

Statement#	Statement
Adel5	 Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Early Victorian Houses (1837 to 1869)** In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult. **Victorian Houses (1870 to 1899)** During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay-fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights. **Edwardian Houses (1900 to 1915)** Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels. **Inter-War Houses (1916 to 1942)** In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows. Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War. **Post War Housing (1943 plus)** During this period, a range of new styles became popular. The styles constructed in North Adelaide included Old English and Georgian Revival. Houses in these styles were constructed both before and after the Second World War and were either infills or replacements for earlier houses. The Old English Revival style used elements which made some reference to Elizabethan/Tudor architectural details, including brick or white rendered walls to simulate limewash, steeply pitched roof form and tall chimneys. The Georgian Revival style was based on an interpretation of English Georgian architecture, using a symmetrical elevation with rendered or brick walls, a fanlight above the central entrance door, a hipped roof form and generally classically derived proportions and details. This style had no verandah but often displayed an entrance portico. Some later notable architecturally designed residences, which were based on the post-war International Style, illustrate the avant-garde trend of domestic architecture in the 1960s. These houses were generally cubiform and were constructed with flat roofs, with large areas of glass in smooth masonry walls. Cantilevered elements and recessed porch areas were typical of the style. Montefiore Hill, Palmer Place and Brougham Place: Victorian, Edwardian, Inter-war and Post-war periods. Exhibits a diverse collection of architectural styles, including but not limited to Neo-Georgian, Mediterranean Revival, Inter-War residences, Old English, Georgian Revival, Gothic, Victorian Gothic, Tudor Gothic, Edwardian and Edwardian Gothic. Strangways Terrace: Victorian, Edwardian, Inter-war and Post-war periods. Exhibits a collection of architectural styles, including but not limited to Georgian Revival residences, Victorian villas, Victorian cottages, Arts and Crafts and Tudor Gothic. Distinctive Carclew, a mansion with Victorian Tudor Gothic transitioning into Queen Anne style. Jeffcott Street Victorian and Edwardian periods. Exhibits a diverse collection of architectural styles, including but not limited to Arts and Crafts, Queen Anne and Victorian Terrace housing. Prominence of early limestone walls and outbuildings. Distinctive Christ Church and Carclew. Ward Street (east of Jeffcott Street) Victorian, Edwardian and Inter-war periods. Exhibits a collection of architectural styles, including but not limited to Tudor Gothic, Victorian, and Arts and Crafts. Prominence of early limestone walls and outbuildings.



Statement#		Statement
		Distinctive Bishops Court was created by the juxtaposition of steeply pitched roof profiles, gables and tall narrow chimneys. Ward Street (west of Jeffcott Street) Victorian, Edwardian and Post-war periods. Exhibits a diverse collection of architectural styles, including but not limited to Victorian Gothic, Victorian cottages, Victorian villas, Georgian Revival and Tudor Gothic. Prominence of early limestone walls and outbuildings.
	Building height	Low-scale, one and two-storey residential and other buildings. Established by the prevailing patterns set by Heritage Places, except where the following Concept Plan applies: • Concept Plan 27 – Aquinas College. Buildings are single-storey in appearance along Walter Street. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Typical fencing defining property frontages is constructed of brick, stone, or stone and cast-iron boundary walls, and new fencing should unify the streetscape by using traditional materials. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Generous landscaped front grounds to residences with a significant number of larger dwellings surrounded by a spacious garden. Generous footpaths and verge areas, with original stone kerbing and guttering. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where traditionally vehicle access is not characteristic to the primary street frontage. Safe, pleasant and attractive pedestrian environment, with complementary landscaping in public places that complement the character of Palmer Gardens and the Adelaide Park Lands below Montefiore Hill. Established views and vistas of Bishops Court, Carclew and Aquinas College. Stone kerbing along Jeffcott Street, Palmer Place, Montefiore Hill to the west of Jeffcott Street. Stone in concrete kerbing along Strangways Terrace. Stone water table along Jeffcott Street. Stone in the concrete water table along Jeffcott Street. Concrete over the stone water table along Palmer Place. Cast iron bollards in Christ Church Lane. Victorian cast iron bollards and drinking fountain at Palmer Gardens/Pangki Pangki. Enamel street number plates along Jeffcott Street, Ward Street and Strangways Terrace. Significant avenue of trees along Jeffcott Street. Significant vista (long views framed by trees) along Jeffcott Street (between Montefiore Hill and Wellington Square). Montefiore Hill Vista towards the city - view south and south east. Significant view of the city from Montefiore Road. Nature strips of generous proportion along Jeffcott Street and Ward Street.
	Representative Buildings	Not identified.
	North Adelaide Archer West Street Historic Area Statement (Adel 6)	
	Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is an integral part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Area demonstrates the laying out and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings, and for the residences of many notable Adelaide community members. Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.



Statement#		Statement
	Allotments, subdivision and built form patterns	The low scale streetscape creates a cohesive streetscape with buildings respecting the existing nineteenth and early twentieth century building forms in a responsive, sensitive and contemporary manner, with taller built form located away from the street frontages. Hebart Hall as a landmark is reinforced. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings. Generally, buildings are set within landscaped grounds and gardens, which typically cover 40 percent of the site. The historic built-form character of the Area is established by State and Local Heritage Places and Representative Buildings, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Archer Street (south side) The narrow street setting and the one-storey buildings along the street frontage form the historic streetscape (on the southern side). There is a slight variation in setback with small garden areas, but when viewed from the street, it is coherent. The pattern, siting, and setback of dwellings are established by the Heritage Places. Jeffcott Street (east side) The historic streetscape character (on the eastern side) is established by the prominent historic Lutheran Seminary buildings of Hebart Hall. The visual prominence of the historic buildings of Hebart Hall (former Whinham College) makes a valuable contribution to the historic character of the Area, enabled by building setbacks from the side and street frontages and its landscaped setting. The pattern, siting, and setback of dwellings are established by the Heritage Places. Walter Street Minor street characterised by single-storey detached single and double fronted cottages set on or close to the street frontage, contributing to the intimate scale of the street. The pattern, siting and setback of dwellings are established by the Heritage Places. Ward Court Minor street provides rear laneway access for buildings fronting another street, including the Loehr Hall, a significantly taller building contributing to the historic character of the locality. Ward Street (north side) The historic streetscape character along the western portion (on the northern side) of Ward Street is derived from the landscaped setting and visual prominence of the historic buildings of Hebart Hall (former Whinham College), which are enabled by building setbacks from the side and street frontages and the landscaped setting. The streetscape further east comprises a number of low-scale and close groupings of single-storey detached and semi-detached dwellings and former dwellings sited close to the street frontage with small garden areas. The pattern, siting, and setback of dwellings are established by the Heritage Places.
Adel6	Architectural styles, detailing and built form features	Characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s and from the 1960s, with varying concentrations of styles localised to areas established by the prevailing patterns set by Heritage Places and Representative Buildings. The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof and the design, form, and composition of facades reflect the traditional proportions of Heritage Places and Representative Buildings. Buildings address the street frontages. Design elements of a Heritage Place and Representative Buildings, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place or Representative Building and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages and side additions located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places and Representative Buildings. The illustration below illustrates the typical and appropriate siting of carports and garages.  Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Victorian Houses (1870 to 1899)** During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay-fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights. **Edwardian Houses (1900 to 1915)** Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used as the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels. **Inter-War Houses (1916 to 1942)**

Statement#		Statement
		In the period between the First World War and Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows. Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War. Archer Street (south side) Victorian and Inter-war periods. Exhibits a collection of architectural styles, including but not limited to Victorian Villas and an inter-war institutional building. Jeffcott Street (east side) Victorian period. Victorian Tudor architectural style of the Lutheran Seminary buildings of Hebart Hall, including the centre clock tower spire and cast iron and stone walling. Walter Street Victorian and Edwardian periods. Exhibits a collection of architectural styles, including but not limited to Victorian cottages and an Italianate cottage. Ward Court Victorian period. Architectural style includes but is not limited to Victorian Italianate Gymnasium. Ward Street (north side) Edwardian and Inter-war periods. Exhibits a collection of architectural styles, including but not limited to Art Nouveau/ Arts and Crafts and Romanesque. Victorian Tudor Lutheran Seminary buildings and cast iron and stone walling.
	Building height	Low-scale, one and two-storey residential and other buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings, except where the following Concept Plan applies: • Concept Plan 26 – Archer West Buildings are single-storey in appearance along Walter Street. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where traditionally vehicle access is not characteristic to the primary street frontage. Established views and vistas of the historic Lutheran Seminary buildings of Hebart Hall. Former Municipal Tramways Trust Poles along Ward Street. Significant avenue of trees along Archer Street. Significant vistas along Archer Street between O'Connell Street and Wellington Square. Significant vista (long views framed by trees) along Jeffcott Street (between Montefiore Hill and Wellington Square). Nature strips of generous proportion along Ward Street.
	Representative Buildings	Identified - refer to SA planning database.
	North Adelaide Margaret Street Historic Area Statement (Adel 7)	
	Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings, and for the residences of many notable Adelaide community members. The Margaret Street Historic Area was established with small and medium scale housing and a range of business and institutional uses, including areas which were subdivided into small lots by developers who held Town Acres in groups, creating a character of small cottages and laneways. This is evident in the sixteen Town Acres owned by the SA Company between Gover, Tynte, O'Connell Streets and LeFevre Terrace. Eight Town Acres, originally owned by Governor Hindmarsh, between O'Connell, Margaret, Ward and Archer Streets, was mostly closely settled by 1880. Margaret Street became one of the most densely populated streets in North Adelaide by the 1860s.

Statement#		Statement
		Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.
	Allotments, subdivision and built form patterns	This Area is characterised by intact low-density residential development on rectangular allotments of varying widths and sizes, along with non-residential buildings. The Area has retained much of its historic grid pattern with major and minor streets, lanes and places. The historic built form character is established by detached and attached dwellings, often forming a continuous or near-continuous built edge to the street, interspersed with historic main street (business and institutional) elements in Tynte and Archer Streets. Buildings tend to be smaller in scale in minor streets, and more substantial, including terrace housing and institutional buildings, in major (east-west) streets. The prevailing Heritage Places establish the building setbacks from front, side, and rear allotment boundaries. Buildings do not project forward of Heritage Places on adjacent sites, nor do they extend to side boundaries other than for party walls in semi-detached and row dwellings. Heritage Places and Representative Buildings create a cohesive pattern of shallow setbacks, including buildings on the street frontage. Minor streets and lanes provide the majority of crossover locations for access to sites. The historic built-form character of the Area is established by State and Local Heritage Places, reinforcing the character of the historic built form, allotments and settlement patterns as described below: Archer Street The distinctive historic character is formed by the narrow street setting (20 m), and the village's main street pattern of one and two-storey residential and non-residential buildings, including a former hotel, a church, and a church hall, sited on or close to the street frontage with small garden areas. The historic character generally comprises detached, semi-detached and row dwellings of low or medium density on allotments of consistent size, pattern, and rhythm. The street is characterised by a cohesive, strong building line set behind small garden areas along both sides of the street. The taller institutional buildings on the north side provide some variation in height. Beviss, Curtis, Little Archer, Margaret, Murray and Ralston Streets The intimate historic character is established by the narrow width of the street and single-storey detached and semi-detached dwellings set close to the street with small front gardens and consistent size, pattern and rhythm. Boulton Street Minor street with semi-detached dwellings set close to the street frontage with small garden areas. Centenary Street Minor street connecting Archer and Ward Streets along the western edge of the Historic Area and providing secondary frontages only within the Historic Area. George Street The intimate historic character is established by the narrow street, which is truncated by the school site at the eastern end, and one and two-storey buildings sited on or close to the street, creating an enclosed streetscape with consistent setbacks. The street is characterised by single-storey row cottages on the southern side and the two-storey former sawmill building and masonry outbuildings of State Heritage significance on the northern frontage. Minor street providing rear access for residences fronting another street. Gover Street The intimate historic character is formed by the narrow street setting and the cohesive pattern of dwellings set back from the primary street frontage with small garden areas. The historic character generally comprises close-set detached, semi-detached or row dwellings of single storey with consistent setbacks, sizes, patterns and small front gardens. The Heritage Places and Representative Buildings establish the side and front setback pattern. The side and front setback pattern is established by the Heritage Places and Representative Buildings. Margaret Street North and Margaret Street South The historic character is established by the narrow street comprising single-storey detached, semi-detached and row dwellings set predominantly close to the street frontage with small garden areas contributing to the intimate scale of the street. The pattern, siting and setback of dwellings are established by the Heritage Places. Roneo Place A minor street with consistent building setbacks. Tynte Street The historic character is formed by the relatively wide street and a village main street pattern of residential and non-residential buildings, built on or close to the street frontage. Residential buildings consist of detached, semi-detached and row dwellings. Most have front garden areas. The side and front setback pattern is established by the Heritage Places. West of Margaret Street comprises buildings up to two storeys in height set close to or on the street frontage. East of Margaret Street comprises dwellings set within more generous landscaped grounds and deeper setbacks. Ward Street (north side) The historic character is established (on the northern side) by predominantly single-storey detached cottages set close to the street frontage with small front garden areas on allotments of consistent size, pattern and rhythm. (The southern side of Ward Street is in the Le Fevre Historic Area.) Ashley Street, Boulton Mews, Lohrman Street, Margaret Lane, Peppermint Lane, Pulsford Avenue, Roneo Place, Stephen Street, Watson Street and William Buik Court Minor streets with consistent building setbacks and providing rear laneway access to carports and garaging for residences fronting another street.
	Architectural styles, detailing and built form features	The Area is characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s. The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof and the design, form, and composition of facades reflect the traditional proportions of Heritage Places and Representative Buildings. Buildings address the street frontages. Design elements of a Heritage Place or Representative Building, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Place or Representative Building. Building additions incorporate materials and proportions that reflect the character of the Heritage Place or Representative Building and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages, and side additions located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places and Representative Buildings. The illustration below illustrates the typical and appropriate siting of carports and garages.

Statement#	Statement

Adel7

Undercroft parking is inconsistent with the historic character and value of the Area.

The Area is characterised by a variety of architectural styles, including but not limited to:

Early Victorian Houses (1837 to 1869)

In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult.

Victorian Houses (1870 to 1899)

During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights.

Inter-War Houses (1916 to 1942)

In the period between the First World War and Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows.

Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War.

Archer Street

Victorian period.

Architectural styles include, but are not limited to, Victorian terrace housing and cottages, Victorian institutional buildings, and a former traditional corner hotel.

Ashley Street

Victorian period.

Architectural styles, including but not limited to Victorian cottages.

Beviss Street

Victorian period.

Architectural styles, including but not limited to Victorian cottages.

Curtis Street

Victorian period.

Architectural styles, including but not limited to Victorian cottages.

George Street

Victorian and Edwardian periods.

Architectural styles, including but not limited to Victorian and Edwardian row cottages, along with a former sawmill and ancillary buildings.

Gover Street

Victorian and Edwardian periods.

Architectural styles include but are not limited to Victorian and Edwardian cottages and villas, and some terrace houses.

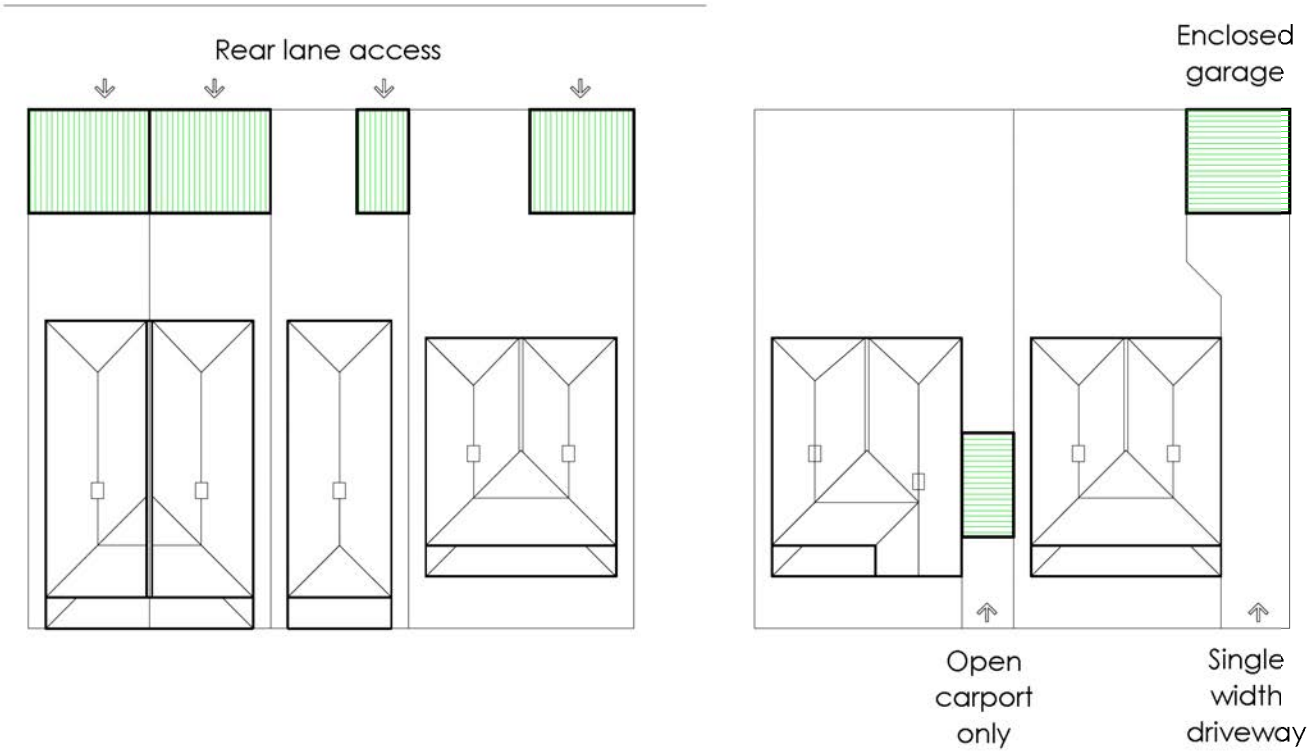
Little Archer Street

Victorian and Edwardian periods.

Architectural styles include but are not limited to Victorian and Edwardian cottages and a two-storey Victorian outbuilding.

Margaret Street

Mostly Victorian cottages with some Inter-war style.



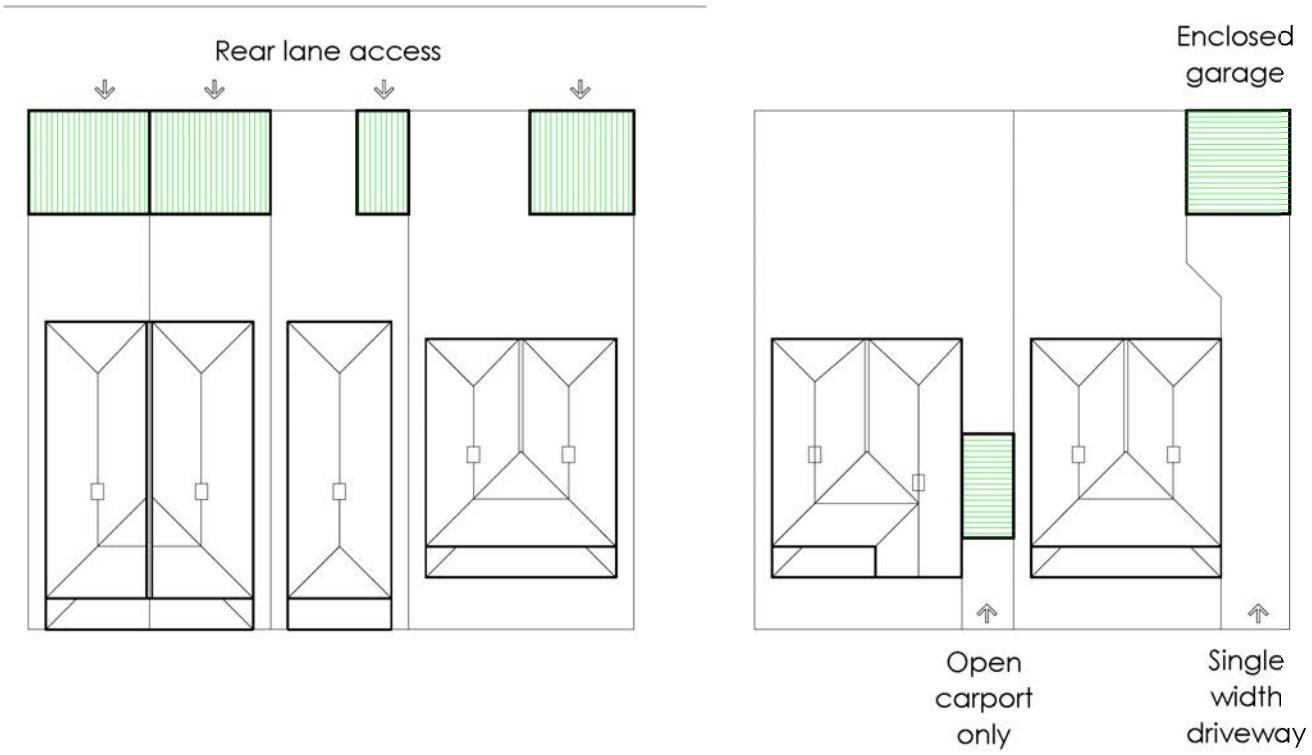
Murray Street

Architectural styles include but are not limited to Victorian cottages.

Ralston Street

Victorian and Edwardian periods.

Statement#		Statement
		Architectural styles include but are not limited to Victorian and Edwardian cottages and villas. Tynte Street Victorian, Edwardian and Inter-war periods. Exhibits a diverse collection of architectural styles, including, but not limited to Victorian cottages and terraces, a Queen Anne mansion, some inter-war style residential infill, and public, shop and other commercial buildings of various styles. Verandahs or balconies are not over footpaths, other than alterations to those on existing non-residential corner buildings. Ward Street Victorian, Edwardian and Inter-war periods. Architectural styles include but are not limited to Victorian cottages and two-storey villas, with Edwardian and Inter-war elements. William Buik Court Victorian period. Architectural styles, including but not limited to Victorian two-storey former office of horse tram depot, which is prominent in the vista from the street entrance on Gover Street.
	Building height	Low-scale, one and two-storey residential and other buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings. Single and two-storey along Gover Street. Single storey along Ward Street, Ralston Street and Beviss Streets. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Stone and cast-iron boundary fencing. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Generous footpaths and verge areas with areas of original stone kerbing and guttering, and landscaped front gardens to residences. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where traditionally vehicle access is not characteristic to the primary street frontage. Stone in concrete kerbing along Ralston Street, Curtis Street and Murray Street. Stone in the concrete water table along Curtis Street and Murray Street. Heritage lighting in Gover Street. Cast iron street name plates at Margaret Street and Murray Street. Blue enamel house number plates with white numbering along Gover Street and Ward Street. Nature strips of generous proportion along Tynte Street and Ward Street. Significant avenue of trees along Gover Street. Significant vistas from Lefevre Terrace through Gover Street.
	Representative Buildings	Identified - refer to SA planning database.
	North Adelaide LeFevre Historic Area Statement (Adel 8)	
	Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings, and for the residences of many notable Adelaide community members. Town Acres along Le Fevre Terrace were only partly subdivided by 1880. After the introduction of the tramway in 1878, there was a rising demand for fashionable parkland frontages. Elevated frontages to the Adelaide Park Lands offered sites for mansions, capturing longer views over the Adelaide Park Lands and were considered prestigious residential addresses. This trend for building mansions persisted until about 1910. After this period, some of these properties were transformed into hospitals, schools, or apartments. The large scale of these buildings, the large size of allotments, and the diversity in architectural expression establish a distinctive residential character along the Adelaide Park Lands edge. Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.



Statement#		Statement
	Allotments, subdivision and built form patterns	This Area is one of the lowest density areas of Upper North Adelaide, containing large residential buildings designed in a grand manner and set in generous landscaped grounds. The Area has retained much of its historic grid pattern, including major and minor streets and lanes. The Town Acre layout and later patterns of subdivision and development created large allotments, and a low-density residential character derived from moderate to generous building setbacks, orientation and patterns established by the prevailing Heritage Places, typically large-scale dwellings some accompanied by significant outbuildings. A cohesive pattern of setbacks from the street frontage is established by the dwellings, which are Heritage Places. Side setbacks are often generous and asymmetrical, with greater separation of the building and side boundary on one side. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings. Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 50 percent of the site. The historic built-form character of the Area is established by State and Local Heritage Places, reinforcing the character of the historic built form, allotments and settlement patterns as described below: Barton Terrace East The high amenity streetscape is formed by the wide street setting and Adelaide Park Lands frontage. The historic character comprises single-storey detached and semi-detached dwellings with outlooks to the Adelaide Park Lands, with shallow and deeper front garden areas. The Heritage Places establish the side and front setback pattern. Lefevre Terrace The historic character is derived from the cohesive pattern of large-scale one and two-storey detached and semi-detached dwellings set in generous landscaped grounds with outlooks to the Adelaide Park Lands. The generous building setbacks and scale are established by Heritage Places that front Lefevre Terrace. Brougham Place The historic character is derived from the cohesive pattern of one and two-storey large-scale detached dwellings and visually prominent former residences within the campus of Lincoln College, set in generous landscaped grounds with outlooks to the Adelaide Park Lands. The generous building setbacks and scale are established by Heritage Places that front Brougham Place. Ward Street (southern side) The historic streetscape character is formed by the wide street setting and the historic outbuildings associated with the State Heritage residences on Brougham Place. (The northern side of the street is in the Margaret Street Historic Area.) Margaret Street (south of Ward Street) The historic streetscape character is derived from the narrow street setting of Margaret Street and the open streetscape of Brougham Place with its large setbacks and generous landscaped areas between buildings. A strong built form definition has been created on the north-eastern corner of Margaret Street and Ward Street through the placement of historic outbuildings along the street frontage.
	Architectural styles, detailing and built form features	Characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s-1940s, with varying localised concentrations of styles which are exhibited by the Heritage Places and Representative Buildings. The prevailing built form features of the Area includes pitched roofs (hipped and/or gable ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof and the design, form, and composition of facades reflect the traditional proportions of Heritage Places and Representative Buildings. Buildings address the street frontages. Design elements of a Heritage Place, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages and side additions located behind the main face of building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places. The illustration below illustrates the typical and appropriate siting of carports and garages. 
Adel8		Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Victorian Houses (1870 to 1899)** During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights. **Edwardian Houses (1900 to 1915)** Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and

Statement#		Statement
		elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels. **Inter-War Houses (1916 to 1942)** In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows. Housing development essentially stopped in North Adelaide during the period 1942 to 1950, because of the materials shortages caused by the Second World War. <u>Barton Terrace East</u> Victorian, Edwardian and Inter-war periods. Exhibits a diverse collection of architectural styles, including but not limited to a Victorian Villa, a Victorian Cottage, Queen Anne, transitional Queen Anne–Bungalow and Inter-war Bungalow. Buildings are modelled and articulated, incorporating pitched roofs, verandahs, balconies, decorative architectural elements and ornamentation. Buildings exhibit vertically proportioned windows and a high proportion of solid to void in the composition of facades. <u>Brougham Place</u> Victorian and Edwardian periods. Exhibits a diverse collection of architectural styles, including but not limited to Victorian Villa, Victorian Gothic, Victorian Italian, Queen Anne and Edwardian Tudor Gothic. <u>Lefevre Terrace</u> Victorian, Edwardian and Inter-war periods. Exhibits a diverse collection of architectural styles, including but not limited to Victorian Italianate, Victorian Terrace, Queen Anne, Edwardian Free Classical and Inter-war Bungalow. Grand style and settings. Terraces and Italianate villas exhibiting a high degree of facade articulation and modelling, with richly detailed masonry and cast-iron ornamentation. <u>Ward Street</u> (southern side) Victorian and Edwardian periods. Outbuildings associated with dwellings fronting Brougham Place.
	Building height	Low scale, one and two-storey residential buildings. Established by the prevailing patterns set by Heritage Places. Predominantly two-storey residential buildings along Brougham Place and Le Fevre Terrace south of Gover Street, and predominantly single-storey north of Gover Street, with scale set by Heritage Places. Predominantly one-storey residential buildings in Barton Terrace East, with scale set by Heritage Places. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Stone and cast-iron boundary fencing. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Generous landscaped front grounds to residences with a significant number of larger dwellings surrounded by a spacious garden. Generous footpaths and verge areas, with original stone kerbing and guttering. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where traditionally vehicle access over the primary street frontage is not characteristic. Views and vistas of the Adelaide Park Lands. An attractive pedestrian environment provides convenient access to the Adelaide Park Lands. Street trees provide pedestrian shelter and amenity, and a high standard of paving and other landscaping enhances the public realm. Landscaping in public places along Lefevre Terrace, Barton Terrace East, and Brougham Place provides a transition between the built-form areas and the informal planting of the Adelaide Park Lands. Established views and vistas from Brougham Place and the Adelaide Park Lands of the former houses of Lincoln College. Stone in concrete kerbing along Ralston Street. Cast iron street name plates on Margaret Street. Blue enamel house number plates with white numbering along Gover Street, Ward Street and Palmer Place. Views from Lefevre Terrace across Park 6/Nanto Womma. Vistas from Lefevre Terrace through Gover Street. Nature strips of generous proportion along Ward Street, Lefevre Terrace, Barton Terrace East and Palmer Place.
	Representative Buildings	Not identified.

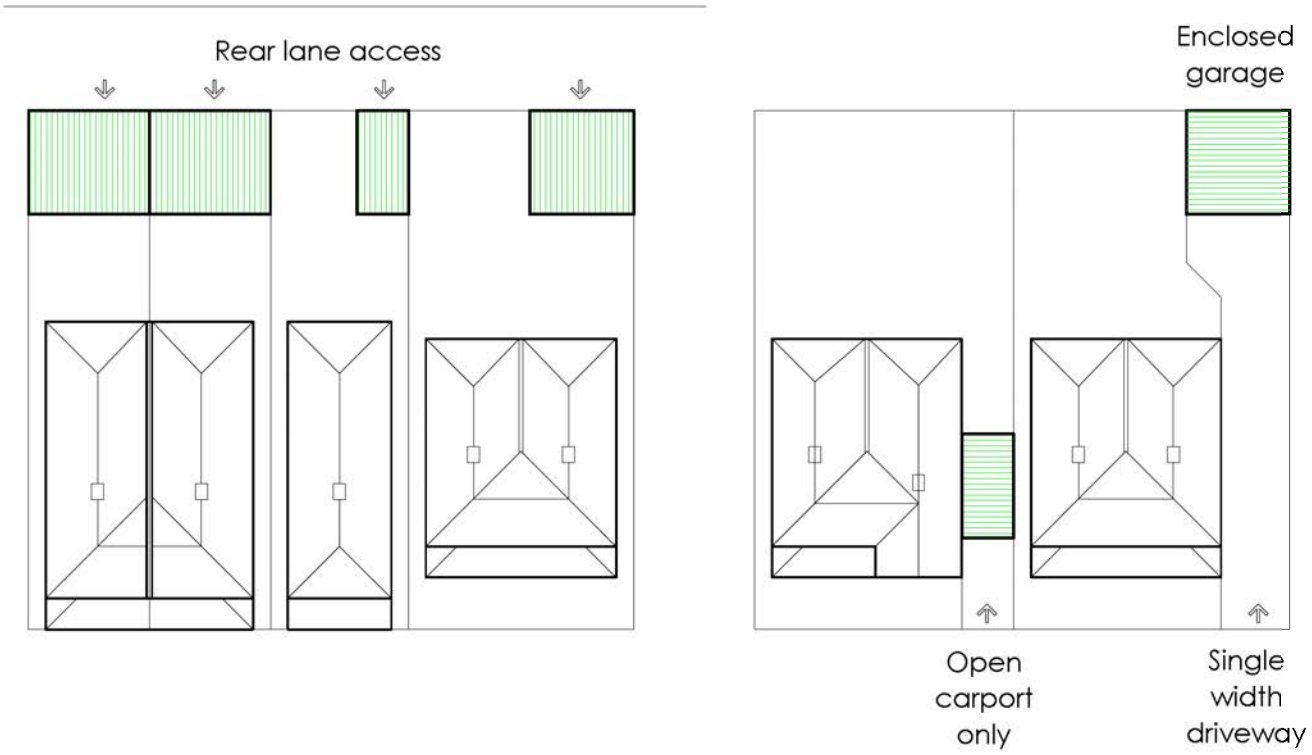
Statement#	Statement

North Adelaide Cathedral Historic Area Statement (Adel 9)

Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is an integral part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings. It exhibits residential architecture from all periods of the city's development and includes the residences of many notable Adelaide community members. Following the survey and settlement, the natural landscape was converted to a cultural landscape, which now reflects the divisions of wealth and influence in the early colony. The elevated land adjacent to the Adelaide Park Lands, such as Pennington Terrace, provided prestigious residential addresses. The topography of the City of Adelaide explains many of its patterns of development. Elevated land was selected to avoid flooding but was also prestigious and offered the best views. The built form of North Adelaide is indicative of the social divisions and occupations of Adelaide society from early settlement. It retains many buildings and sites of State and Local Heritage value, ranging from large mansions to simple row cottages, corner shops and hotels to major churches and institutional buildings that reflect the different periods of development. The diversity of scale and integrity of the remaining historic built form is a microcosm of development periods and traditional housing styles in the State as a whole. St Peter's Cathedral, dating from 1869, is a major landmark and visually dominates this Area, which is characterised by large institutional buildings, with residential development located primarily to the west. St Mark's College is grouped around substantial early residences along Pennington Terrace. Until 1856, Kermode Street was the 'High Street' of North Adelaide. The characteristic collection of shops, a police station, a church and a hotel (the still trading Queens Head) were located along this street, and there are several pre 1850s buildings remaining in this Area. Small cottages and worker housing, such as those in Brougham Court, provide a contrast with the more substantial villas with Adelaide Park Lands frontage around Palmer Place and along Pennington Terrace and are indicative of the diverse social composition of the early resident population. Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period. 1943 plus - Post War Period.
Allotments, subdivision and built form patterns	The Cathedral Area is the entry point to Adelaide and Upper North Adelaide. Its unique streetscape character is established by its distinctive topography, diverse range of nineteenth-century architecture and its extensive Adelaide Park Lands frontages. The cohesive lines of buildings set behind attractive landscaping visually define the perimeter of the Area. The Town Acre layout and later patterns of subdivision and development created large allotments. The low-density residential character is also derived from generous building setbacks, orientation and patterns established by the prevailing Heritage Places and Representative Buildings. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings. Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 50 percent of the site. The historic built-form character of the Area is established by State and Local Heritage Places and Representative Buildings, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Abbott Lane Minor street characterised by one and two-storey buildings on or close to the street frontage and providing rear laneway access to carports and garaging for residences fronting another street. Brougham Court The historic streetscape is formed by the narrow width of the street and is almost exclusively characterised by closely sited single-storey semi-detached and detached Local Heritage Places, with generally consistent setbacks and allotments of consistent size and pattern. The side and front building setbacks are established by Heritage Places. The strong built form definition at the junction of Brougham Place and Brougham Court encloses Brougham Court. Brougham Place and Palmer Place The high amenity streetscape is formed by the wide street setting and their frontage to Brougham Gardens and Palmer Gardens Park Lands. The historic streetscape comprises low scale, late nineteenth century detached housing character in contrast to the larger mansion buildings along the northern (opposite) edge of Brougham Place and Palmer Place. The historic character comprises one and two-storey detached semi-detached dwellings of State and Local Heritage value. The dwellings are setback from the street with small front garden areas, and the rhythm and pattern of their siting contribute to their historic character. Kermode Street The streetscape is derived from the moderately sized street width and the gentle eastward slope, with the concentration of smaller houses at the western end and more institutional scale of college and apartment buildings at the eastern end. The historic streetscape west of Bagot Street is derived from the late nineteenth century, one and two-storey detached and semi-detached residences of Local Heritage value on individual allotments. The historic streetscape east of Bagot Street comprises the Greenways Apartments, one and two-storey detached and semi-detached residences sited on or close to the street frontage with small garden areas and St Mark's College, which is also located close to the street with a garden frontage. The built form pattern is established by the pattern and siting of Heritage Places on individual allotments. King William Road The historic streetscape is formed by St Peters Cathedral and the grand, spacious character of the streetscape. The physical dominance and grandeur of the Cathedral complex on the western corner of Pennington Terrace and King William Road, created by its angled siting, towering height, and the juxtaposition of spires, together with the Cathedral Hotel and the Anglican Church Offices on the eastern side of King William Road, also contribute to the historic streetscape. Lakeman Street The intimate character and enclosure of this narrow minor street are derived from the single-storey cottages sited on the street frontage. The side boundary walling of larger residences with frontages to Pennington Terrace and Kermode Street are a dominant feature. Palmer Lane Minor street providing rear laneway access to carports and garaging for residences fronting another street. Pennington Terrace The high amenity streetscape is formed by the grand spacious character of Pennington Terrace, the setting of the Adelaide Park Lands frontage and the residences and Cathedral set within open garden settings providing an attractive public and private landscape domain. The historic built form streetscape comprises predominantly State Heritage Places (including those forming part of St Marks College) with siting, setback, scale and character variation. The landscape garden setting around the buildings that are well setback from the street frontage forms an integral part of the area's historic character. The cathedral complex's physical dominance on the corner of Pennington Terrace and King William Road contributes to the historic streetscape.
Architectural styles, detailing and built form features	Characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s and from the 1960s, with varying concentrations of styles localised to areas established by the prevailing patterns set by Heritage Places. It retains many buildings and sites of State and Local Heritage value, ranging from large mansions to simple row cottages, corner shops and hotels to major churches and institutional buildings that reflect the different periods of development. The diversity of scale and integrity of the remaining historic built form is a microcosm of development periods and traditional housing styles in the State as a whole. The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places. Buildings address the street frontages. Design elements of a Heritage Place and Representative Buildings, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages, and side additions located behind the main face of the building and facade do not dominate the street frontage or significantly alter the historic character of the Heritage Places. The illustration below illustrates the typical and appropriate siting of carports and garages.

Statement#	Statement
Adel9	 Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Early Victorian Houses (1837 to 1869)** In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult. **Victorian Houses (1870 to 1899)** During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights. **Edwardian Houses (1900 to 1915)** Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses with face brick walling and decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped and doors were often divided into three or four horizontal panels. **Inter-War Houses (1916 to 1942)** In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows. Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War. **Post War Housing (1943 plus)** During this period, a range of new styles became popular. The styles constructed in North Adelaide included Old English and Georgian Revival. Houses in these styles were constructed both before and after the Second World War and were either infills or replacements for earlier houses. The Old English Revival style used elements which made some reference to Elizabethan/Tudor architectural details, including brick or white rendered walls to simulate limewash, steeply pitched roof form, and tall chimneys. The Georgian Revival style was based on an interpretation of English Georgian architecture, using a symmetrical elevation with rendered or brick walls, a fanlight above the central entrance door, a hipped roof form and generally classically derived proportions and details. This style had no verandah but often displayed an entrance portico. Some later notable architecturally designed residences, which were based on the post-war International Style, illustrate the avant-garde trend of domestic architecture in the 1960s. These houses were generally cubiform and were constructed with flat roofs, with large areas of glass in smooth masonry walls. Cantilevered elements and recessed porch areas were typical of the style. Abbott Lane Victorian period. Architectural styles include, but are not limited to, the side frontage of an early Victorian terrace house. Brougham Court Late Victorian and Edwardian periods. Architectural styles include, but are not limited to, detached and semi-detached Victorian and Edwardian villas and the former Ebenezer Chapel. Brougham Place and Palmer Place Victorian, Inter-War and Post-War periods. Exhibits a diverse collection of architectural styles including but not limited to Georgian Revival Villas, Victorian Villas, Neo-Gothic, Terraces and cottages. Kermode Street Victorian and Inter-War periods. Exhibits a diverse collection of architectural styles, including but not limited to Art Deco, Neo-Georgian St Marks College (Memorial Building), an Edwardian villa, Victorian villas, Queens Head Hotel, Old English, Bungalow, Romanesque, Kermode Street Chapel, Italianate Victorian villa and Victorian terraces. King William Road Victorian and Inter-War periods. Exhibits a diverse collection of architectural styles including but not limited to Gothic St Peters Cathedral, Gothic Anglican Church offices, Victorian Italianate Cathedral Hotel, Art Deco Greenways Apartments, Allan Campbell Buildings, Elder Laboratory, Tudor Gothic hospital and Moderne.

Statement#	Statement	
		Lakeman Street Victorian period. Architectural styles include but are not limited to early Victorian cottages. Pennington Terrace Victorian and Inter-War periods. Exhibits a diverse collection of architectural styles, including but not limited to a Neo-Georgian villa, a Neo-Gothic villa, a Federation villa, Gothic St Peters Cathedral and a Victorian cottage, villas and terraces.
	Building height	Apart from the taller St Peters Cathedral, mainly low-scale, one and two-storey residential and other buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings, except where the following Concept Plans apply: • Concept Plan 28 – St Mark's College Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Typical fencing defining property frontages is constructed of brick, stone or stone and cast-iron boundary walls and new fencing should unify the streetscape through the use of traditional materials. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Generous landscaped front grounds to residences with a significant number of larger dwellings surrounded by a spacious garden. Generous footpaths and verge areas, with original stone kerbing and guttering. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where traditionally vehicle access is not characteristic to the primary street frontage. St Peters Cathedral and the grand, spacious character of the streetscape. Visual prominence of St Peters Anglican Cathedral. The elevated areas provide vistas across the city, in particular views of the St Peters Cathedral spires and tower from Brougham Place and King William Road. Important view of the north-east elevation of St Peters Cathedral. Visual prominence of North Adelaide Church of Christ Chapel and Queens Head Hotel. Visual prominence of the sandstone dwelling at the junction of Kermode Street and Palmer Place and the bluestone terrace house at the junction of Kermode Street and Lakeman Street. High landscape qualities of the pocket parks and Adelaide Park Lands frontages along Brougham Place, Palmer Place and Pennington Terrace. Other street elements include early bluestone gutters along Brougham Court, Lakeman Street, and Bagot Street. Stone kerbing along Baggot Street and Lakeman Court. Stone in concrete kerbing along Lakeman Street. Stone water table along Baggot Street and Lakeman Court. Stone in the concrete water table along Lakeman Street and Palmer Court. Concrete over the stone water table along Palmer Place. Drinking fountain on Kermode Street. Enamel street number plates along Brougham Place. Benchmark 88 at 154 Kermode Street.
	Representative Buildings	Not identified.



North Adelaide Women's and Children's Historic Area Statement (Adel 10)

Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Women's and Children's Historic Area is part of a small section of North Adelaide, which represents the layout and settlement patterns of the City of Adelaide from the 1830s, as well as the late Victorian and early twentieth-century establishment of hospitals east of King William Road. It slopes upward to the north and west, creating a distinctive topography, and serves as an entry point to upper North Adelaide, travelling north from the city. Traditional institutional buildings include the Angus Building and Alan Campbell Building at the Women's and Children's Hospital, the Anglican Church Offices, and former dwellings at Memorial Hospital ('The Avenues' and 'Leahurst' fronting Sir Edwin Smith Avenue). North Adelaide retains strong physical evidence of the historical stages of the development of the colony, most particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services. Until 1856, Kermode Street was the 'High Street' of North Adelaide. The St Peter Cathedral is a dominant element of the streetscape, though located outside this Historic Area.

Statement#		Statement
Adel10		Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.
	Allotments, subdivision and built form patterns	The Area has retained a distinctive historic grid of streets and Town Acres at an angle to those of Upper North Adelaide and other sections of Lower North Adelaide, which are separated by public open space. The Area has frontage to the Adelaide Park Lands to the north and east. The Town Acre layout and later patterns of subdivision and development created large allotments and sites occupied mainly by institutional buildings of significant scale, some converted large residences built along the Adelaide Park Lands frontage (Sir Edwin Smith Avenue). Buildings are typically on or near the street frontage, with the exception being deeper setbacks from Sir Edwin Smith Avenue to the south of Kermode Street through to Pennington Terrace. Buildings on corner sites provide facades that address each street frontage. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings. Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 20 percent of the site. The historic built-form character of the Area is established by State and Local Heritage Places, reinforcing the character of the historic built form as described below: Kermode Street Masonry and cast-iron fence along the northern part of Sir Edwin Smith Avenue, and the masonry wall return and gate piers to Kermode Street of the Memorial Hospital. Pennington Terrace and Sir Edwin Smith Drive (South of Kermode) The high amenity streetscape is formed by the wide street setting and the Adelaide Park Lands frontage. The historic character comprises the three-storey State Heritage listed former houses known as the Memorial Hospital, which are of a consistent setback, building rhythm and pattern when viewed from the street, with a garden area around the perimeter of these street frontages. Buildings reinforce the setback pattern established by Heritage Places.
	Architectural styles, detailing and built form features	The Area is characterised by both traditional institutional styles and Victorian residential architectural styles. Roof pitch and forms and the design, form and composition of facades reflect traditional proportions of Heritage Places. Buildings address the street frontages. Design elements of a Heritage Place, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place and are materially compatible with the building. Brougham Place Post-war period. Architectural styles include Moderne. King William Road Victorian Period Victorian Gothic with Queen Anne influences Pennington Terrace and Sir Edwin Smith Drive (South of Kermode) Victorian period. 'The Avenues' and 'Leahurst' are two matching Victorian mansions in the 'Anglo-Italian' style (now part of Memorial Hospital). Buildings address the street, and on corner sites, buildings provide facades that address each street frontage.
	Building height	Low-scale Heritage Places on King William Road, Sir Edwin Smith Drive (South of Kermode) and Pennington Terrace. Established by the prevailing patterns set by Heritage Places. Buildings enable the visual prominence of the St Peters Anglican Cathedral to be seen from the Adelaide Park Lands (Park 11, Park 12, and Park 25).
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. Traditional materials reflecting the architectural styles of the Heritage Places. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the buildings.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building up to 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences with piers and cast-iron railings. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. Fencing design for new buildings reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Heritage listed masonry and cast-iron fence along the northern part of Sir Edwin Smith Avenue, and the masonry wall return and gate piers to Kermode Street of the Memorial Hospital.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets relates to the subdivision of the original Town Acres. High landscape qualities of the Adelaide Park Lands frontages include the Cross of Sacrifice, Brougham Gardens, and Peace Park along Brougham Place, Sir Edwin Smith Drive, and Pennington Terrace. High degree of pedestrian amenity and shelter provided by street trees and on-site landscaping. Visually interesting streetscapes. St Peters Cathedral, dating from 1869, is a major landmark and visually dominates this area, which is characterised by large institutional buildings. High quality urban realm that supports cultural and community services within the locality. Landscaping and open space break up building mass and provide amenity. Pedestrian comfort is supported by a high-quality public realm and limited vehicle access from King William Road and Sir Edwin Smith Drive, and Kermode Street. Drinking fountain on Kermode Street. Enamel street number plates along Brougham Place.
	Representative Buildings	Not identified.
	North Adelaide Stanley Historic Area Statement (Adel 11)	
	Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South

Statement#		Statement
		Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings, and for the residences of many notable Adelaide community members. Lower North Adelaide is a discrete section within North Adelaide, sitting at an oblique angle to the city, encompassing 86 Town Acres and surrounded by the Adelaide Park Lands. Its topography is characterised by a steep rise from Melbourne Street to Stanley Street, below which the Area is relatively flat. The ridge of the North Adelaide scarp along Kingston Terrace/Stanley Street and the frontages to the Adelaide Park Lands provided the wealthy with 'views and airs' and were considered prestigious residential addresses. This Historic Area encompasses land at higher elevations characterised by low residential density and largely excludes areas of more compact housing. The high concentration of small cottages and worker housing in the lower section reflects the early subdivision of these Town Acres into estates for the development of more intensive residential forms, such as the speculative Chichester Gardens development, and the philanthropic mews cottages along the lower end of Stanley Street/Kingston Terrace. 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.
	Allotments, subdivision and built form patterns	This Area is one of the lowest-density areas of Lower North Adelaide containing large residential buildings, predominantly detached dwellings, often designed in a grand manner and set in generous landscaped grounds. The Town Acre layout and later patterns of subdivision and development created large allotments, and a low-density residential character derived from moderate to generous building setbacks, orientation and patterns established by the prevailing Heritage Places, typically large-scale dwellings, some accompanied by significant outbuildings. The Area has retained much of its historic grid pattern, including major and minor streets. The cohesive pattern of setbacks is established by the dwellings, which are Heritage Places. The side setbacks are often generous and asymmetrical, with greater separation of the building and side boundary on one side. The buildings on Stanley Street, Kingston Terrace and Brougham Place take advantage of the landfall to provide semi-basement floors. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached dwellings. Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 50 percent of the site. The historic built-form character of the Area is established by State and Local Heritage Places, reinforcing the character of the historic built form, allotments and settlement patterns as described below: Kingston Terrace The high amenity streetscape is formed by the wide street setting and the Adelaide Park Lands frontage along Kingston Terrace. The historic streetscape character is also established by low-density, large one and two-storey detached dwellings with generally shallow setbacks from the primary street frontage, with small garden areas and some with spacious private gardens to the side and rear. Towards Lefevre Terrace, the streetscape is dominated by the imposing rear elevations of large mansions fronting Stanley Street. Stanley Street – Brougham Place The high amenity streetscape is formed by the wide street setting. The northern side of Stanley Street is characterised by two mansions set well back from the street frontage, with spacious landscaped grounds on elevated ground above Stanley Street. The remainder of this side of the street comprises large detached and semi-detached one and two-storey dwellings that are setback from the street frontage with generous garden areas. The historic character on the southern side of Stanley Street is derived from the cohesive pattern of large-scale one and two-storey detached and semi-detached dwellings of low density, generally set in generous landscaped grounds. The sloping topography presents the two-storey dwellings as single-storey in appearance to Stanley Street and Brougham Place. The building setbacks are established by Heritage Places and are generally deeper on the northern side of Stanley Street. There are outlooks across Brougham Place to the Adelaide Park Lands to the north and west. The Brougham Place Uniting Church at 196-210 Brougham Place, set above the ground with its dominant tall central tower, is of landmark significance. The low-scaled St Ann's College buildings at 186-195 Brougham Place with landscaped garden areas also make an important contribution to the streetscape and step down the Brougham Place frontage, reflecting the topography of the locality. Jerningham Street (west side) The historic streetscape is characterised by more compact sites and dwellings compared with those fronting other major streets in the Historic Area and comprises single-storey dwellings with generally moderate to shallow building setbacks from the primary street frontage established by the Heritage Places with small garden areas. (The eastern side of Jerningham Street is within the Kentish Arms Historic Area.) New Street Minor street characterised by one and two-storey buildings on or close to frontage and providing rear laneway access to carports and garaging for residences fronting another street. Old Street (north side) Minor street characterised by one and two-storey buildings on or close to frontage and providing rear access to properties fronting Stanley Street and Brougham Place. The street is characterised by a more intimate, compact built-form character than major streets in this Area.
	Architectural styles, detailing and built form features	The Area is characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s. The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places. Buildings address the street frontages. Design elements of a Heritage Place, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages and side additions located behind the main face of building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places. The illustration below illustrates the typical and appropriate siting of carports and garages.

Statement#	Statement

Undercroft parking is inconsistent with the historic character and value of the Area.

The Area is characterised by a variety of architectural styles, including but not limited to:

Adel11

Early Victorian Houses (1837 to 1869)

In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult.

Victorian Houses (1870 to 1899)

During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights.

Edwardian Houses (1900 to 1915)

Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels.

Inter-War Houses (1916 to 1942)

In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows.

Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War.

Brougham Place

Victorian, Edwardian and Inter-war periods.

Architectural styles including but not limited to Victorian villa, Mediterranean villa, Italianate Brougham Place Uniting Church and Victorian residences in St Ann's College.

Jerningham Street

Victorian period.

Architectural styles include, but are not limited to, a Victorian shop with attached dwellings, Victorian detached and semi-detached cottages, and a Victorian villa.

Kingston Terrace

Victorian and Inter-war periods.

Architectural styles, including but not limited to Victorian villas and Neo-Georgian villa, a Coach house relating to Nurney House fronting Stanley Street, and outbuildings relating to St Andrews fronting Stanley Street.

Includes Victorian outbuildings of grand dwellings fronting Stanley Street.

LeFevre Terrace

Victorian and Inter-war periods.

Architectural styles, including but not limited to Queen Anne villa and Arts and Crafts.

New Street

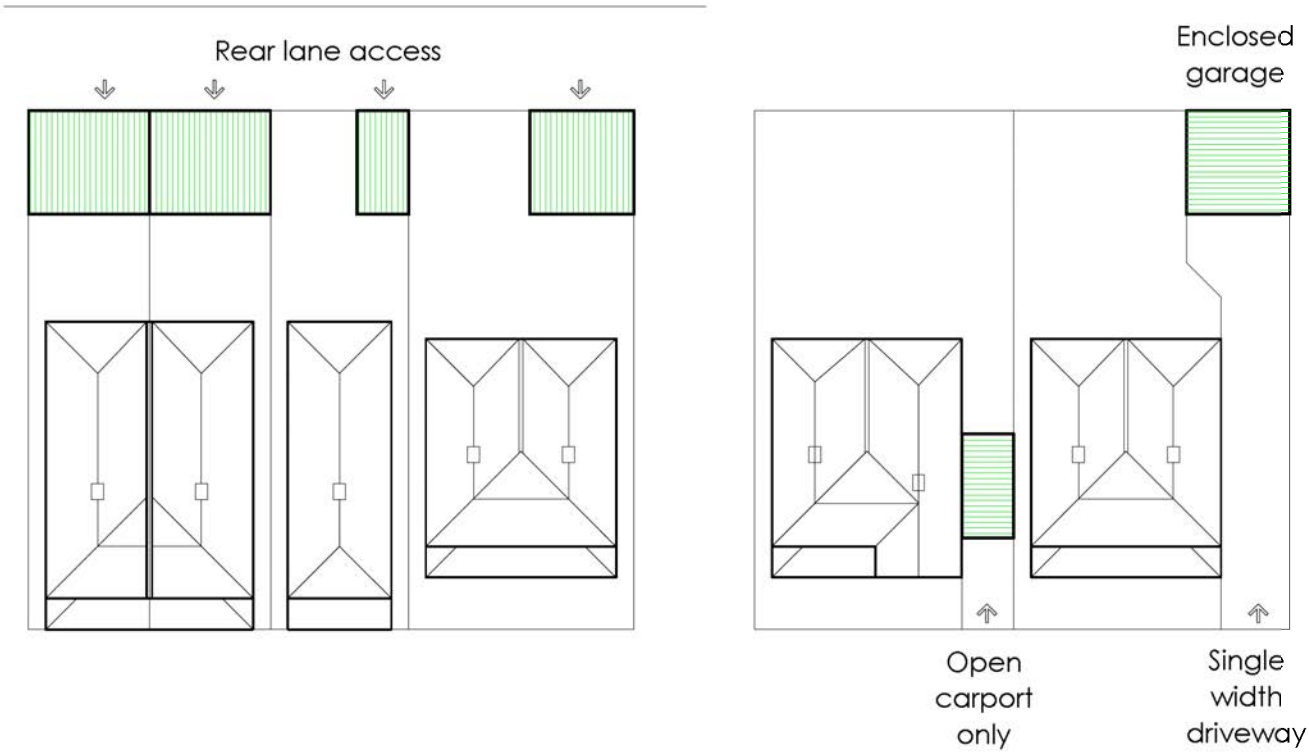
Victorian period.

Architectural styles including but not limited to Victorian villa.

Old Street (north side)

Victorian period.

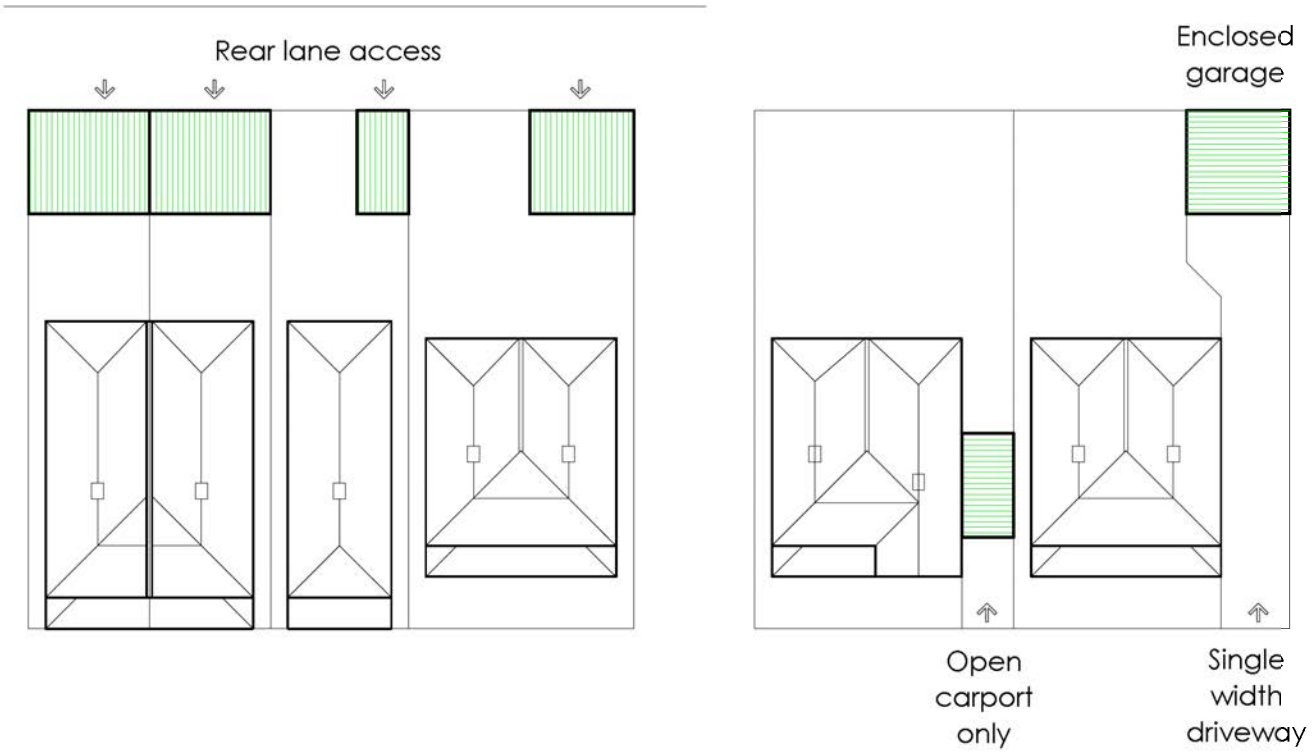
Victorian cottage.



Stanley Street

Victorian, Edwardian and Inter-war periods.

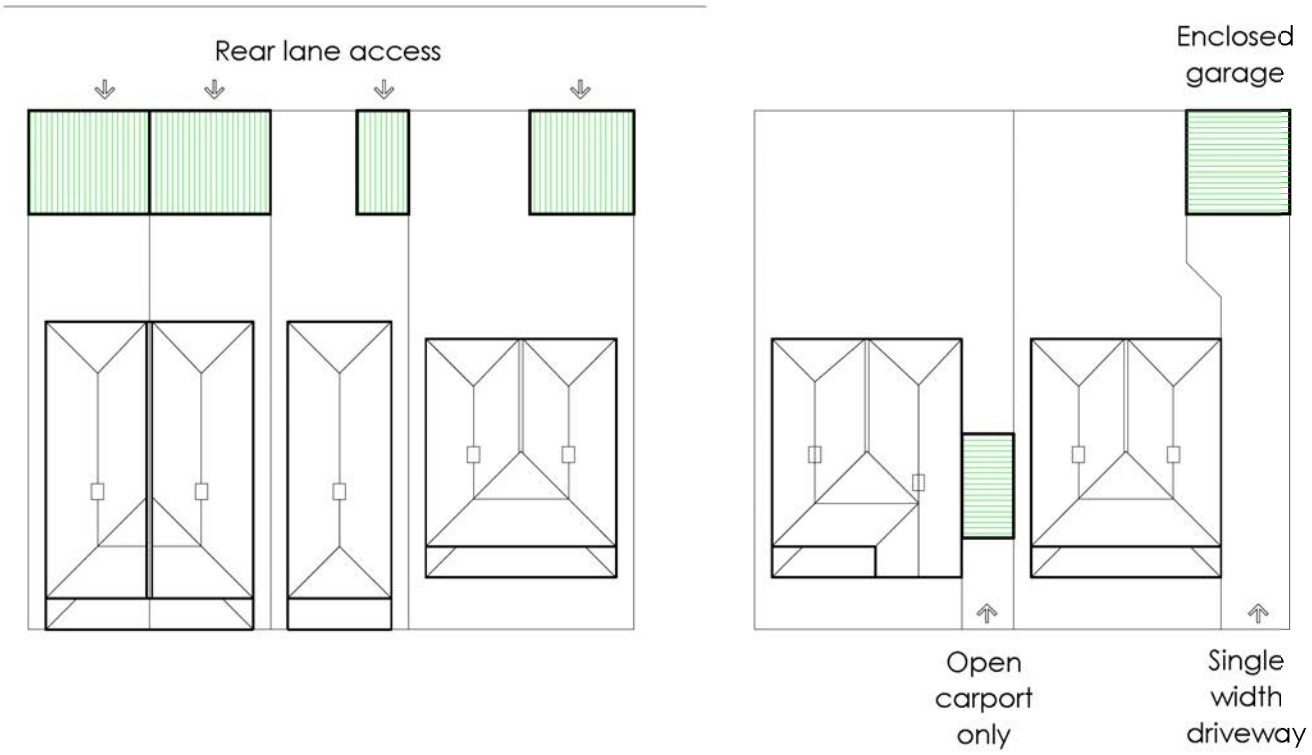
Exhibits a diverse collection of architectural styles including but not limited to Arts and Crafts, Nurney House, St Andrews, Neo-Georgian, Victorian villas, Queen Anne villas, Victorian Gothic Church, Inter-war Mediterranean, Transitional Edwardian – Inter-war, Victorian Italianate villa, Victorian Second Empire and Victorian cottages.



Statement#	Statement	
	Building height	Apart from the significantly taller former Congregational Church building at 196 - 210 Brougham Place, there are low-scale, one and two-storey residential buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Generous landscaped front grounds to residences with a significant number of larger dwellings surrounded by spacious garden gardens. Generous footpaths and verge areas, with original stone kerbing and guttering. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where traditionally vehicle access is not characteristic of the primary street frontage. Important views to Brougham Place Uniting Church. Views and vistas of the Adelaide Park Lands from Kingston Terrace and Brougham Place. Views of the city from Stanley Street and Brougham Place properties. The fall of land associated with the North Adelaide scarp affords significant distant views to the south from elevated sites. It is also a defining characteristic of streetscapes that run across the slopes, especially Brougham Place and New Street, but also Stanley and Jerningham Streets to a lesser degree. The juxtaposition of the lower and upper sections of urban North Adelaide and their street layouts and Adelaide Park Lands edges near the southern end of Le Fevre Terrace is a distinctive streetscape feature. Attractive pedestrian environment providing pedestrian shelter and amenity provided by street trees and a high standard of paving and other landscaping to the public realm along Brougham Place, Stanley Street and Jerningham Street especially. Stone kerbing along Kingston Terrace and New Street. Stone in concrete kerbing along Old Street. Stone water table along Kingston Terrace, Old Street and New Street. Stone in the concrete water table along Frederick Street. Enamel street number plates along Stanley Street, Melbourne Street and Brougham Place. Significant views and vistas from Brougham Place to the city and from the western side of Kingston Terrace to the east. Benchmark 15 is on the corner of Stanley Street and Jerningham Street.
	Representative Buildings	Not identified.
	North Adelaide Kentish Arms Historic Area Statement (Adel 12)	
	Eras, themes and context	<u>Themes and Context</u> Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historical evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings, and for the residences of many notable Adelaide community members. Lower North Adelaide is a discrete section within North Adelaide, sitting at an oblique angle to the city, encompassing 86 Town Acres and surrounded by the Adelaide Park Lands. Its topography is characterised by a steep rise from Melbourne Street to Stanley Street, below which the Area is relatively flat. The ridge of the North Adelaide scarp along Kingston Terrace/Stanley Street and the frontages to the Adelaide Park Lands provided the wealthy with 'views and airs' and were considered prestigious residential addresses. This Historic Area encompasses land at generally lower elevations compared to the adjoining Stanley Historic Area to the west. The high concentration of small cottages and worker housing below the scarp reflects the early subdivision of these Town Acres into estates for the development of more intensive residential forms, such as the speculative Chichester Gardens development (two hundred blocks subdivided in 1839), and the philanthropic mews cottages along the lower end of Stanley Street/Kingston Terrace. <u>Eras</u> 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.
	Allotments, subdivision and built form patterns	This Area is characterised by intact, low-scale residential development on rectangular allotments of varying widths and sizes. The historic streetscapes are characterised by large nineteenth and early twentieth century substantial Victorian and Edwardian villas and other detached and semi-detached dwellings in a variety of forms and styles including row cottages, detached cottages and small semi-detached cottages. The Area has retained much of its historic grid pattern with major and minor streets, lanes and places. A significant feature of this Area is the distinctive, varied alignments of Terraces facing the Adelaide Park Lands. The historic built form character is established by detached and attached dwellings of low density.

Statement#		Statement
		The far west of the Area is characterised by generally larger, wider allotments with detached dwellings merging with the more open, low-density character of the adjoining Stanley Historic Area. Narrower and smaller allotments with semi-detached dwellings are more prevalent in the remainder of the Area, including along Stanley Street and Kingston and Mann Terraces, Sussex Street, and other minor streets. Heritage Places and Representative Buildings create a cohesive pattern of shallow setbacks, including some buildings on the street frontage. Minor streets and lanes provide the majority of crossover locations for access to sites. The building setbacks from front, side and rear allotment boundaries are established by Representative Buildings and the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings. Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 50 percent of the site. The historic built-form character of the Area is established by Heritage Places and Representative, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Arthur Street The intimate historic streetscape is derived from the narrow street setting and the row of single-storey row cottages set close to the street with verandahs extending to the street frontage. Bower Street The distinctive historic character is derived from the narrow street setting and formed by matching single-storey row cottages on both sides of the street. These facing rows of cottages are consistently setback with small garden areas on allotments of consistent size, rhythm and pattern. Colley Street The historic character of the street is derived from the narrow street setting and the single-fronted cottages setback close to the street frontage with small garden areas. Dunn Street The historic character of the street is derived from the narrow street setting and the detached and semi-detached cottages along the eastern frontage that are set close to the street with verandahs extending to the street frontage. East Pallant Street and West Pallant Street The historic streetscape character is derived from the narrow street setting closely sited single-storey detached and semi-detached cottages built on or close to the street frontage. These include some of Adelaide's earliest residential buildings. The pattern, siting and setbacks are established by the Heritage Places. Francis Street Minor street with buildings on or close to frontages. Provides access to properties fronting Kingston Terrace. Francis Street East The historic streetscape comprises a narrow street setting with single-storey row cottages set close to the street, with verandahs extending to the street frontage. Provides access to properties fronting Kingston Terrace. Fuller Street Minor street with buildings setback consistently. Hart Street The consistent historic character is established by the narrow street setting flanked by detached single-storey cottages and villas of similar form, scale and setbacks with small front gardens on allotments of similar dimensions. Jerningham Street (east side) This wide street provides the solitary major north-south axis in Lower North Adelaide. To the south of Stanley Street, the historic character is derived from predominantly single-storey detached cottages and row cottages set close to the street with verandahs extending to the street frontage. The exception is the two-storey State Heritage dwelling on the corner of Stanley Street and Jerningham Street. To the north of Stanley Street, the historic built form character comprises single-storey villas setback from the street frontage with small garden areas. The pattern, siting and setback of dwellings are established by the Heritage Places. (The west side of Jerningham Street is in the Stanley Historic Area.) Kingston Terrace The high amenity streetscape is formed by the wide street setting and the Adelaide Park Lands frontage. The historic character is established by the single-storey row dwellings and detached and semi-detached dwellings, generally with shallow setbacks from the primary street frontage, with small garden areas. The landscaped gardens make an important contribution to the streetscape setting. The primary frontage setbacks vary only slightly, but they form a coherent building line. The pattern, siting, and setback of dwellings are established by the Heritage Places and Representative Buildings. MacKinnon Parade The high amenity streetscape is formed by the wide street setting and the Adelaide Park Lands frontage. East of Dunn Street, the historic built form character is derived from single-storey detached and semi-detached dwellings that are almost exclusively Heritage Places and of similar scale, design, with consistent setbacks and landscaped front garden areas. The consistent pattern, siting and front and side setbacks of dwellings are established by the Heritage Places. To the west of Dunn Street, the historic built form is derived from predominantly single-storey detached and semi-detached dwellings set closer to the street frontage, with only slight variation in setbacks and with smaller front garden areas than to the east. Mann Terrace The cohesive historic streetscape character is established by the narrow street setting and by the closely developed detached and semi-detached dwellings and a regular building setback from the street. The consistent pattern, siting and setback of dwellings is established by the Heritage Places and Representative Buildings. Porter Street and Veronica Lane Minor streets providing rear laneway access to carports and garaging for residences fronting another street. Provost Street The historic streetscape is formed by the narrow street setting and is characterised by single-storey detached and semi-detached dwellings built on or close to the street frontage with small front garden areas. Stanley Street The high amenity streetscape is formed by the wide street setting. The historic built form on the northern side of Stanley Street is characterised by a strong presence of single-storey detached and semi-detached dwellings and long lines of row dwellings generally with shallow setbacks from the primary street frontage established by the Heritage Places and Representative Buildings. There is a variation in setbacks between the different forms of dwellings, however, as they are in long groups of their dwelling form, their setback is viewed as coherent. The front garden areas make an important contribution to the streetscape setting. The historic built form character on the southern side of Stanley Street comprises closely sited single-storey detached and semi-detached dwellings with small setbacks from the street frontage and small front garden areas established by the Heritage Places. The exceptions are the two-storey Kentish Arms Hotel, which is built to the street frontage, and the two-storey Victorian house. The coherent pattern, siting and setbacks are established by the Heritage Places and Representative Buildings. Sussex Street The historic streetscape character is derived from a combination of the intimate and narrow street setting and the predominantly single-storey close-set semi-detached, detached, and row dwellings generally on or close to the street frontage, punctuated by some gaps in the typical historic building line. The pattern, siting and setbacks are established by the Heritage Places, except for one two-storey Victorian residence, which is deeply set back on a larger site.
	Architectural styles, detailing and built form features	The Area is characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s. The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places and Representative Buildings. Buildings address the street frontages. Design elements of a Heritage Place and Representative Buildings, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place or Representative Building and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages, and side additions are located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places and Representative Buildings. The illustration below illustrates the typical and appropriate siting of carports and garages.

Statement#	Statement
Adel12	 Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Early Victorian Houses (1837 to 1869)** In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult. **Victorian Houses (1870 to 1899)** During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration was used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights. **Edwardian Houses (1900 to 1915)** Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels. **Inter-War Houses (1916 to 1942)** In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows. Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War. Arthur Street Edwardian period. Architectural styles include but are not limited to Edwardian-Inter-war transitional style red-brick row cottages. Bower Street Victorian period. Architectural styles include but are not limited to late Victorian row cottages on either side of the street exhibiting matching roof and verandah profiles, materials and detailing, and facades unified by continuous verandahs. Colley Street Edwardian period. Architectural styles include, but are not limited to, small Edwardian workers' cottages on the eastern side. Dunn Street Victorian and Edwardian periods. Architectural styles include but are not limited to late Victorian terrace (one) and Edwardian semi-detached dwellings (two) on the eastern side. East Pallant Street and Mann Street Victorian period. Architectural styles include but are not limited to early Victorian corner shop and dwelling of simple design. Francis Street East Victorian period. Architectural styles include but are not limited to Victorian row cottages on the southern side. Francis Street Inter-war period. Architectural styles include, but are not limited to, an Inter-war Bungalow on the southern side. Hart Street Victorian period.



Statement#		Statement
		Architectural styles include but are not limited to Victorian cottages and villas. Jerningham Street (east side) Victorian and Inter-war periods. Architectural styles include, but are not limited to, Victorian villas between Kingston Terrace and Stanley Street on the more elevated sites, Victorian cottages south of Stanley Street, a two-story 1840s residence of English design on the corner site (78 Jerningham), and Victorian row cottages between Provost Street and MacKinnon Parade. Kingston Terrace Victorian and Inter-war periods. Exhibits a collection of architectural styles, including but not limited to Victorian villas and cottages, Victorian Italianate, Victorian Gothic, Victorian Terrace, and Inter-war Old English Revival. MacKinnon Parade Victorian period. Architectural styles include but are not limited to Victorian cottage, Victorian villas and Victorian-Edwardian transitional. This includes early to late Victorian dwellings in a variety of styles, ranging from simple worker cottage to more ornate dwellings with highly decorative cast iron detailing, and the very consistent six pairs of semi-detached dwellings in a row towards the eastern end. Mann Terrace (north of Melbourne Street) Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian cottages and villas. Articulated and gabled facades with pitched roof profiles and verandahs contribute to a highly cohesive character. Mann Terrace (south of Melbourne Street) Victorian, Edwardian and Inter-war periods. Architectural styles include but are not limited to Victorian cottages and villas, Victorian-Edwardian transitional and Inter-War Bungalow. Articulated and gabled facades with pitched roof profiles and verandahs contribute to a highly cohesive character. Provost Street Victorian and Inter-war periods. Architectural styles include but are not limited to small single-storey Victorian cottages and Inter-war Bungalow. Stanley Street Victorian, Edwardian and Inter-war periods. Exhibits a diverse collection of architectural styles, including but not limited to Victorian and Edwardian villas and cottages, mostly detached or row dwellings, of various forms and designs, as well as examples of Victorian-Edwardian transitional style dwellings and the occasional Inter-war Bungalow. A significant feature is the concentration of similar row dwellings on the northern side, east of Fuller Street and extending through to Kingston Terrace. Sussex Street Victorian, Edwardian and Inter-war periods. Architectural styles include, but are not limited to, small single-storey Victorian and Edwardian cottages, Inter-war Bungalow, and a large Victorian two-storey residence. West Pallant Street Victorian period. Architectural styles include but are not limited to early Victorian pair of cottages and late Victorian detached cottage.
	Building height	Low scale, mainly one-storey residential buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings, except where the following Concept Plan applies: Two-storey buildings contributing to the historic character are the Kentish Arms Hotel (23-31 Stanley Street), a shop and dwelling at 68 Stanley Street, and dwellings at 78 Jerningham Street and 128 Sussex Street. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the building as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Typical fencing defining property frontages is constructed of brick, stone or stone and cast-iron boundary walls and new fencing should unify the streetscape through the use of traditional materials. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Generous landscaped front grounds to residences with a significant number of larger dwellings surrounded by spacious garden gardens. Generous footpaths and verge areas, with original stone kerbing and guttering. Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering. Rear lane access, where traditionally vehicle access is not characteristic of the primary street frontage. Views and vistas of the Adelaide Park Lands from Kingston Terrace, Mann Terrace and McKinnon Parade. Attractive pedestrian environment providing pedestrian shelter and amenity provided by street trees and a high standard of paving and other landscaping to the public realm along Stanley Street and Jerningham Street. Stone kerbing in New Street, Hart Street, Francis Street, Fuller Street, Kingston Terrace and Kingston Terrace East.

Statement#		Statement
		Stone water table in New Street, eastern side of Old Street, Francis Street, Fuller Street, Kingston Terrace and Kingston Terrace East. Stone in concrete kerbing on the eastern side of Old Street, McKinnon Parade and Colley Street. Stone in the concrete water table in McKinnon Parade and Colley Street. Cast iron street name plates along West Pallant Street and Colley Street. Enamel street name plate along Stanley Street. Enamel street number plates along Stanley Street, Sussex Street, Finniss Street and Mann Terrace. Significant avenue of oriental plane trees along Stanley Street. Significant views east and west of Stanley Street.
	Representative Buildings	Identified - refer to SA planning database.
	North Adelaide Finniss Historic Area Statement (Adel 13)	
	Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas. The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings, and for the residences of many notable Adelaide community members. Lower North Adelaide is a discrete section within North Adelaide, sitting at an oblique angle to the city, encompassing 86 Town Acres and surrounded by the Adelaide Park Lands. Its topography is characterised by a steep rise from Melbourne Street to Stanley Street, below which the Area is relatively flat. The ridge of the North Adelaide scarp along Kingston Terrace/Stanley Street and the frontages to the Adelaide Park Lands provided the wealthy with 'views and airs' and were considered prestigious residential addresses. This Historic Area encompasses lower elevations than the nearby Stanley Historic Area to the north. It accommodates a range of mainly detached housing, from large-scale to modest in scale, representing a broad segment of the historic social mix of North Adelaide. Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.
	Allotments, subdivision and built form patterns	This Area is characterised by intact, low-scale residential development on rectangular allotments of varied size. The Area has retained much of its historic grid pattern with major and minor streets, lanes and places. A significant feature of this Area is the distinctive, varied alignments of MacKinnon Parade along the perimeter of the Adelaide Park Lands. The historic built form character is established by predominantly detached dwellings of low density, with other buildings associated with local services or institutions. The far west of the Area is characterised by generally larger, wider allotments with detached dwellings, a pattern with similarities to and merging with the more open, low-density character of the adjoining Stanley Historic Area. Narrower and smaller allotments with attached dwellings are more prevalent in the remainder of the Area, including along Stanley Street and Kingston and Mann Terraces, Sussex Street, and other minor streets. Typically, deep allotments are located on the northern side of Finnis Street. Other larger allotments tend to be prominent sites facing the Adelaide Park Lands. Kathleen Lumley College occupies a large site extending from Finniss Street through to MacKinnon Parade. Generally, shallow setbacks from the primary street frontage prevail in minor streets, and more generous setbacks prevail along major streets. On larger sites, detached dwellings are set within spacious landscaped open space. The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places and Representative Buildings and do not project forward of Heritage Places or Representative Buildings, including on adjacent sites, nor do they extend to side boundaries other than for party walls in semi-detached and row dwellings. Heritage Places and Representative Buildings create a cohesive pattern of shallow setbacks, including buildings on the street frontage. Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 40 percent of the site. The historic built-form character of the Area is established by State and Local Heritage Places and Representative Buildings, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Brougham Place The historic streetscape and built form character for this short section of Brougham Place is characterised by corner sites with large dwellings, spacious landscaped open space and an outlook to the Adelaide Park Lands. The pattern, siting and setback of dwellings is established by the Heritage Places. Finniss Street The historic streetscape is formed by the relatively wide street setting and the one-story detached dwellings set back from the street frontage with front garden areas. There is generally little variation in the setbacks from the street frontage on the northern side, except that the two-storey British Hotel protrudes well forward of adjoining buildings. The dwellings on the southern side are consistently set back from the street except for the corner two-storey shop and residential building on the Finniss Street and MacKinnon Parade frontages. The area between Finniss Street and MacKinnon Parade also contains the Kathleen Lumley College site, a State Heritage Place, including three primary buildings ranging from two to four storeys. In front of these buildings on the Finniss Street side are cottages. The pattern, siting and setback of dwellings is established by the Heritage Places and Representative Buildings. MacKinnon Parade Significant built edge with outlooks to the Adelaide Park Lands, including low-density Victorian detached dwellings, some of more substantial scale, moderately set back from the primary street frontage. The high amenity streetscape is formed by the wide street setting and the Adelaide Park Lands frontage. The historic character comprises single-storey detached dwellings of Local Heritage value setback from the street frontage with front garden areas. The historic built form character is also formed by the visual prominence of the State Heritage listed Kathleen Lumley College, comprising three primary buildings ranging from two to four storeys. The landscaped gardens make an important contribution to the streetscape setting. Edith Place Minor street comprising single-storey detached and semi-detached dwellings set close to the street with verandahs extending to the street frontage (western side). The street is characterised by a more intimate, compact built form than on other streets in the Area. Finnis Court Minor street containing a detached dwelling close to the street frontage with a small front garden area. Archer Place and Hudson Street Minor streets providing rear vehicle access to properties fronting other streets. Johnstone Place Minor street with consistent building setbacks and providing rear laneway access for residences facing another street. MacKinnon Court Minor street containing compact and single-storey detached and semi-detached dwellings with consistent setbacks. Newlands Lane Provides a pedestrian walkway between Melbourne Street and Finniss Street.
	Architectural styles, detailing and built form features	The Area is characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s. The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places and Representative Buildings.

Statement#	Statement
Adel13	Buildings address the street, and on corner sites, buildings provide facades that address each street frontage. Design elements of Heritage Places and Representative Buildings, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Place or Representative Building. Building additions incorporate materials and proportions that reflect the character of the Heritage Place or Representative Building and are materially compatible with the building. Second-storey development is located within the roof space or to the rear of the dwelling behind the ridgeline of the roof. Carports, garages, and side additions are located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places and Representative Buildings. The illustration below illustrates the typical and appropriate siting of carports and garages.  Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Early Victorian Houses (1837 to 1869)** In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult. **Victorian Houses (1870 to 1899)** During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay-fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights. **Edwardian Houses (1900 to 1915)** Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels. **Inter-War Houses (1916 to 1942)** In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows. Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War. Brougham Place Edwardian and Inter-war periods. Architectural styles include but are not limited to substantial Edwardian Queen Anne and Inter-war Tudor Revival dwellings on prominent corner sites. Architectural styles include but are not limited to predominantly Victorian and some Georgian Revival villas or cottages. Prominence of the British Hotel with its fine detailing and cantilevered balcony. Edith Place Victorian period. Architectural styles include but are not limited to Victorian detached and semi-detached cottages (western side). Finnis Court Victorian period. Architectural styles include but are not limited to Victorian cottages. Finniss Street Victorian and Inter-war periods. MacKinnon Court Victorian period. Architectural styles include but are not limited to Victorian detached and semi-detached cottages.

Statement#	Statement	
		MacKinnon Parade Victorian and Inter-war periods. Architectural styles include but are not limited to Victorian cottages and villas, and the occasional Georgian Revival residence.
	Building height	Low scale, mainly one-storey residential buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings, except where the following Concept Plan applies: • Concept Plan 25 – Kathleen Lumley College Two-storey buildings contributing to the prevailing historic character and/or of heritage value are the British Hotel and Finniss Corner (at 1-3 Finniss Street), and buildings of Heritage value (but more recent origin), ranging from two to four storeys in the Kathleen Lumley College site between Finniss Street and MacKinnon Parade. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the building as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences, sometimes with piers and cast-iron railings. Typical fencing defining property frontages is constructed of brick, stone or stone and cast-iron boundary walls and new fencing should unify the streetscape through the use of traditional materials. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Characterised by the linear grid of tree-lined major streets as well as minor streets and lanes, areas of original stone kerbing and guttering, landscaped front grounds to residences, and driveways/crossovers of single width where vehicle access prevails on primary street frontages. Views and vistas of the Adelaide Park Lands from Brougham Place and MacKinnon Parade. An attractive pedestrian environment provides pedestrian shelter and amenity, provided by street trees and a high standard of paving and other landscaping to the public realm along major streets. Vehicle access is provided from rear laneways or minor streets. Rear lane access, where vehicle access does not prevail on primary street frontages. Stone kerbing and water table in Edith Place. Stone in concrete kerbing and water table along MacKinnon Parade. Enamel street number plates along Finniss Street and Brougham Place. Established avenue planting in Finniss Street and MacKinnon Parade. Prominence of the British Hotel with its fine detailing and cantilevered balcony. Visual prominence of the State Heritage Place of Kathleen Lumley College. Visual prominence to Brougham Place Uniting Church. Vehicle access is via minor streets, side and rear lanes. Vehicle access points have been designed and located to maintain historic kerbing and trees.
	Representative Buildings	Identified - refer to SA planning database.
	Adelaide Historic Area Statement (Adel 14)	
	Eras, themes and context	Themes and Context Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008. Adelaide is part of the historic plan of the city of Adelaide. The historic character of Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time. Significant features include the natural and cultural landscape, which creates the physical setting and the hierarchy of wide and narrow streets, squares and gardens in the 'square mile' of Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale in proximity to the Adelaide Park Lands. The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s. Residential development of the area in Victorian times was accompanied by the establishment of shops and other services. The subdivision of Town Acres into a network of minor streets and lanes lined with cottages occurred in distinct phases, most rapidly during the late 1870s and 1880s. Some small cottages were built earlier, during the 1850s and 1860s, on some minor streets (e.g. Ada Street). The historic character of the south-east corner of the city provides strong cultural and historical evidence of the creation of the colony and the consolidation of early settlement in Adelaide. Light's Plan utilised a regular grid pattern, and although the original Town Acres within the south-east corner of the city have been divided and further developed, Light's Plan has been preserved as he conceived it. Adelaide was once predominantly a residential city. The existing late nineteenth-century character of the south-east corner of the city continues to reflect this. The Area retains a broad range of residential stock, from grand villas on South and East Terraces overlooking the Adelaide Park Lands to humble cottages lining the smaller streets, established during the course of successive subdivisions. The Area also includes a collection of building types important for any community. These include St John's Anglican Church, hotels and retail premises in Hutt Street. The South Australian Company held title to many Town Acres, and until the 1860s, leased them for grazing and hay-making. On 4 January 1870, the Register newspaper noted that, particularly in the south-eastern portion of the city, the company had released allotments for sale and that this 'led to the erection of numerous cottages, many if not most of which have been built and are owned by the occupants'. The surviving cottages built in those years are typically small-scale, low-set with high-pitched roofs, small casement windows, low ceilings, and built close to neighbours. Killua Place (now Ada Street) forms part of the land originally comprising Town Acres 578 and 589 and illustrates several phases of development, typical of the Area. One house was built in 1857, with all houses on the western side of Ada Street built between 1874 and 1884 and five houses built on the eastern side in 1907. The more elaborate dwellings in the south-east corner of the city were erected for prosperous residents. Most of these grand residences were built during the economic boom period of the late 1870s and 1880s. Other substantial developments occurring during this period include row terraces and additional cross streets. The main shopping centres in Adelaide were located further to the north and west, but a small retail precinct developed along the nearby Hutt Street, with corner shops in the residential streets serving local residents' needs. The south-east corner of the city has remained devoid of industry and heavy trades, which were concentrated in the western portion of the city. This has further served to preserve the residential and relatively uniform character in the south-east. Eras 1837 to 1899 - Victorian period. 1900 to 1915 - Edwardian period. 1916 to 1942 - Inter-war period.
	Allotments, subdivision and built form	The subdivision of Town Acres in the south-east into a network of streets and lanes lined with cottages occurred in distinct phases, most rapidly during the later 1870s and 1880s, although small cottages were built from the 1850s. These cottages were built on small allotments, on the smaller streets, and fronted directly onto the footpath.

Statement#		Statement
	patterns	The Area has retained its historic rectilinear grid with major and minor streets, lanes and places. The historic built form character is established by small-scale detached and attached dwellings exhibiting a regular pattern and rhythm of form, scale, and siting. Single-storey dwellings on or close to the primary street frontage are punctuated in places by two-storey buildings, such as terrace housing or a corner shop with residence above. St John's Church is an imposing landmark, part of a group of taller buildings including the Meeting Hall and Rectory, at 10-14 St John Street. The church has a significant presence in both Halifax and St John Streets. The regular spacing, setbacks, forms and heights of dwellings that are Heritage Places define the prevailing historic residential pattern of significance. Typically, there is either no on-site parking space for a car or else the space is situated at the rear of the dwelling. Single-storey semi-detached and attached cottages dominate the historic character in most streets, including consistent rows of compact dwellings on narrow sites. The historic built-form character of the Area is established by State and Local Heritage Places and Representative Buildings, reinforcing the character of the historic built form, allotments and subdivision patterns as described below: Ada Street The intimate historic streetscape is derived from the narrowness of the street and the cohesive built form character derived from the single storey detached, semi-detached and row cottages, and their scale and close development pattern comprising dwellings that are predominantly of Local Heritage value. The dwellings are sited on or close to the street frontage. Most have small front garden areas. The built form pattern is established by the regular pattern and siting of Heritage Places on individual allotments. Allen Place The intimate historic streetscape is derived from the narrowness of the street and the single-storey semi-detached and single-fronted cottages set close to the street frontage with small garden areas or verandahs extending to the street frontage. Carrington Street (west of Hutt Street) The historic streetscape is formed by the wide street setting and the historic built form character comprising a close development pattern of single-storey detached, semi-detached and row cottages and, on the northern side, two-storey terraces. The buildings are set close to the street frontage with small garden areas or verandahs extending to the street frontage. The side and front setback pattern is established by the Heritage Places. Carrington Street (east of Hutt Street) The historic streetscape is formed by the wide street setting, and the historic built form character is derived from buildings that are predominantly of Local and State Heritage value, comprising a close development pattern of single-storey detached, semi-detached and row cottages, a long row of two-storey terrace houses and a corner shop-dwelling. The buildings are set close to the street frontage with small garden areas or verandahs extending to the street frontage. The side and front setback pattern is established by the Heritage Places. Corryton Street (south of Halifax Street) The intimate historic streetscape is derived from the narrowness of the street and the long single-storey row of Local Heritage Victorian workers' cottages on allotments of predominantly consistent size and pattern. Verandahs are built to the street frontage. Corryton Street (north of Halifax Street) The intimate historic streetscape is derived from the narrowness of the street and single-storey semi-detached and single-fronted detached cottages sited close to the street frontage, with small garden areas establishing a rhythm of narrow dwelling facades. Gilles Street The historic streetscape is formed by the wide street setting, and the historic built form character is derived from the cohesive pattern of single-storey detached and semi-detached double and single fronted cottages, villas and two-storey terraces. West of St John Street, the buildings are set close to the street frontage with small garden areas or verandahs extending to the street frontage. The side and front setback pattern is established by the Heritage Places. East of St John Street is a more open subdivision pattern containing larger, detached residences, some having deeper setbacks from the street frontage and more spacious landscaped grounds. The more open subdivision pattern and site layouts are features of a transition from the intimate cottage character of Gilles Street to the grand mansion character of East Terrace. Gladstone Street The intimate historic streetscape is derived from the narrowness of the street and the single-storey semi-detached and row cottages of Local Heritage value with verandahs extending to or very close to the street frontage. The taller two-storey Victorian shop-dwelling and former stables built to street frontages on the corner of Gladstone Street and Carrington Street add to sense of enclosure. Halifax Street (east of Hutt Street) The historic streetscape is formed by the wide-open street setting, and the cohesive historic built form comprises single-storey detached and semi-detached cottages, a two-storey terrace and two large corner shop - dwellings built to both street frontages. The buildings are set close to the street frontage with small garden areas and minimal side boundary setbacks. The side and front setback pattern is established by the Heritage Places. St John's Church is a prominent landmark. The verandah of the prominent two-storey shop-dwelling on the corner of Halifax Street and Tomsey Street is situated over the public footpath. Halifax Street (west of Hutt Street) The historic streetscape is formed by the wide-open street setting and the historic built form comprises of single-storey detached and semi-detached cottages, villa and former two-storey former corner shop. The buildings are set close to the street frontage with small garden areas and minimal side boundary setbacks. The side and front setback pattern is established by the Heritage Places. Kate Court The historic streetscape is derived from the narrow street and the single-storey detached and semi-detached cottages and two-storey terraces sited close to the street frontage and with minimal side boundary setbacks. The side and front setback pattern is established by the Heritage Places. Marion Street The historic streetscape is derived from the narrow street and the close grouping of single-storey small detached and semi-detached cottages and row cottages sited close to the street frontage with small garden areas. The side and front setback pattern is established by the Heritage Places. McLaren Court and Neales Place Minor streets providing rear laneway access to carports and garaging for residences fronting Carrington or McLaren Street. McLaren Street and Regent Street South The intimate historic streetscape is derived from the narrowness of the street and the consistently closely sited single-storey cottages, row houses and occasional terrace of predominantly Local Heritage value sited close to the street frontage with small garden areas or verandahs extending to the street frontage. The allotments are of a consistent size and pattern. Power Street The historic streetscape is derived from the narrow street and the single-storey cottages and villas sited close to the street frontage, with small garden areas or verandahs extending to the street frontage. Royal Avenue The historic streetscape is derived from the relatively narrow street and the close pattern of single-storey cottages and villas of Local Heritage value sited close to the street frontage with small garden areas. The allotments are consistent in size and pattern. St John Street The historic streetscape is derived from the relatively narrow street and by a group of consistently sited, single-storey villas on the western frontage, complemented by a small group of narrow fronted single-storey cottages on the eastern frontage. The north-east is dominated by the substantial scale and richly detailed character of St John's Church, Meeting Hall and Rectory. Tomsey Street The historic streetscape is derived from the narrow street and the single-storey detached and semi-detached cottages sited close to the street frontage, with small garden areas. Vincent Place and Vincent Street The historic streetscape is derived from the narrow street and the small single-storey cottages with narrow frontages sited close to the street frontage, with small garden areas or verandahs extending to the street frontage.
	Architectural styles, detailing and built form features	The Adelaide Historic Area is dominated by Victorian cottages and villas, including a number of Early Victorian cottages (Ada Street and Tomsey Street). The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches. The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places and Representative Buildings. Buildings address the street frontages. Design elements of Heritage Places and Representative Buildings, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places. Building additions incorporate materials and proportions that reflect the character of the Heritage Place or Representative Building and are materially compatible with the building. Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street. Carports, garages, and side additions are located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places and Representative Buildings. The illustration below illustrates the typical and appropriate siting of carports and garages.

Statement#	Statement
Adel14	 Undercroft parking is inconsistent with the historic character and value of the Area. The Area is characterised by a variety of architectural styles, including but not limited to: **Early Victorian Houses (1837 to 1869)** In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult. **Victorian Houses (1870 to 1899)** During this period of intensive development, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay-fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim and cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights. **Edwardian Houses (1900 to 1915)** Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels. **Inter-War Houses (1916 to 1942)** In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows. Housing development essentially stopped during the period 1942 to 1950 because of the materials shortages caused by the Second World War. Ada Street Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian row cottages, semi-detached cottages and detached bay window cottages. Consistent pitched roof profiles, verandahs, fenestration and material. Allen Place Edwardian and Inter-war periods. Exhibits a collection of architectural styles, including but not limited to a cohesive group of small dwellings of a pre-WWI transitional Edwardian-Inter-war style. Carrington Street (west of Hutt Street) Victorian period. Exhibits a collection of architectural styles including but not limited to Victorian detached and semi-detached and Victorian row cottages and terraces. Carrington Street (east of Hutt Street) Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian Terrace houses, Victorian corner shop-dwelling and a larger number of single-storey Victorian cottages and row cottages. Corryton Street (north of Gilles Street) Victorian period. Exhibits a collection of architectural styles, including but not limited to a long single-storey row of Victorian workers' cottages, with a horizontal emphasis created by common roof and verandah profiles. Corryton Street (north of Halifax Street) Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian semi-detached and detached cottages with a rhythm of narrow dwelling facades, fenestration, pitched roof profiles and verandahs. Gilles Street Victorian, Edwardian and Inter-war periods. Exhibits a collection of architectural styles, including but not limited to Bungalow, Gothic and Queen Anne influences, Victorian cottages, villas and terraces with some Gothic influences.

Statement#		Statement
		Consistent pitched roof profiles, verandahs and fenestration. Gladstone Street Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian row and semi-detached cottages, taller Victorian shop-dwelling and former stables. Halifax Street (east of Hutt Street) Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian detached and semi-detached cottages, Victorian terraces and Victorian corner shops. Consistency of window proportions, high proportion of solid to void, pitched roof profiles and verandahs. Halifax Street (west of Hutt Street) Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian detached and semi-detached cottages. Kate Court Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian detached and semi-detached cottages and Victorian terraces. Consistent window proportions, roof forms and verandah styles. Marion Street Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian semi-detached and detached cottages and row cottages with low front parapet lines and consistent roof and verandah forms. McLaren Street and Regent Street South Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian cottages, row cottages and terraces. Vertically proportioned openings and consistent form of pitched roofs and verandahs, establishing a consistent pattern punctuated by occasional two-storey terrace houses in McLaren Street. Power Street Victorian and Edwardian periods. Exhibits a collection of architectural styles, including but not limited to Victorian and Edwardian cottages. Royal Avenue Victorian and early Edwardian periods. Exhibits a collection of architectural styles including but not limited to Victorian/early Edwardian villas and cottages, including Queen Anne detailing. St John Street Victorian and Edwardian periods. Exhibits a collection of architectural styles, including but not limited to Edwardian, Victorian Italianate villas and Victorian cottages. Richly detailed character of St Johns Church, Meeting Halls and Rectory. Tomsey Street Victorian period. Exhibits a collection of architectural styles including but not limited to Victorian cottages including some of the earliest cottages in this part of Adelaide. Vincent Place and Vincent Street Victorian period. Exhibits a collection of architectural styles, including but not limited to Victorian cottages with narrow dwelling facades.
	Building height	Low scale, predominantly one-storey residential buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings. The buildings are single-storey with the following exceptions: • Two storey Victorian dwellings in Carrington Street (302, 304, 306, 308, 346, 355, 357, 359, 361, 361A, 363, 365, 365A and 367), and at 10 Ada Street, 348 Gillies Street, 298, 364 and 366 Halifax Street, 20 Kate Street, and 66, 71 and 73 McLaren Street. • Taller St John's Church complex near corner of Halifax and St John Streets and two-storey factory in Regent Street South (1 Pope Court). Second level additions not protruding above the roof line or apparent from the primary street. Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality.
	Materials	Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following: Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered. Brick or rendered quoin work and plinths. Red brick and rendered chimneys. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing. Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders. Paint colours consistent or complementary with the era and style of the building as defined by archival sources.
	Fencing	Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings. Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites. The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources. Fencing is characterised by a variety of architectural styles, including: **Early Victorian Houses (1837 to 1869)** Fences typically were timber pickets, paling or corrugated iron with timber capping. **Victorian Houses (1870 to 1899)** Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing. **Edwardian Houses (1900 to 1915)** Fencing contains elements of Victorian and Inter-war fencing. **Inter-War Houses (1916 to 1942)** Fencing was typically low masonry walls, built from materials matching the main building.
	Setting, landscaping, streetscape and public realm features	Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres. Intimate, enclosed streetscape along Ada, Gladstone, and McLaren Streets, and Regent Street South, maintained by highly consistent, closely spaced dwellings and front verandahs on or close to the frontages on both sides. Landmark qualities of St John's Church, Meeting Hall and Rectory. Landscaped open space with significant vegetation.

Statement#		Statement
		Public and private open spaces incorporating landscaping to street frontages. Vehicle access is via minor streets, side and rear lanes. Vehicle access points have been designed and located to maintain historic kerbing and significant trees. Stone kerbing and water table in Ada Street.
	Representative Buildings	Identified - refer to SA planning database.
Historic Areas Affecting Adelaide Hills Council		
AdHi1	**Mylor Historic Area Statement (AdHi1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to late 1890s. Commercial centre. Workingmen's Block movement.
	Allotments, subdivision and built form patterns	Uniform rectangular allotments fronting the main street. Large site areas. Large street frontages. Varying front setbacks (residential development has generous setbacks with commercial/retail development located closer to the front boundary to address the main street). Varying side setbacks, with limited boundary development.
	Architectural styles, detailing and built form features	1890s commercial buildings interspersed with a variety of civic and residential buildings.
	Building height	Generally small scale, single storey construction with the exception of the larger public buildings such as the Uniting Church and the former Institute building.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape. Random coursed and rubble stone. Rendered stone. Brick and rendered quoins. Hipped and gabled roofs. Raked and bullnose verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. External finishes non-reflective incorporating a natural autumnal palate.
	Fencing	Front fences of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, to a height of 1200 millimetres.
	Setting, landscaping, streetscape and public realm features	Rustic character. The township is enclosed on three sides by highly valued remnant vegetation within the Mylor Parklands. Leslie Creek and Aldgate Creek meander through the township before joining up with the Onkaparinga River to the south. The main entrance to Mylor from the north is marked by bridge crossings over Leslie and Aldgate Creeks, the war memorial and views to an avenue of deciduous trees which define the centre of the township. Views of the historic building within the primary school. Other important views along Strathalbyn Road include the heritage buildings containing the general store and rural supplies establishment which defines the southern entry to the township. Wide landscaped verge that incorporates an avenue of trees along Strathalbyn road accentuates the historic built form. Vehicular access at the rear of allotments fronting Strathalbyn Road.
	Representative Buildings	*[Not identified]*
AdHi2	**Stirling - Ayres Hill Road Historic Area Statement (AdHi2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Mid to late 1880s residential.
	Allotments, subdivision and built form patterns	Large blocks of land. Larger houses on large, well vegetated grounds. Dwellings set well back from the street boundary. Smaller subordinate buildings located closer to the street boundary.
	Architectural styles, detailing and built form features	The architectural style of the buildings varies with their date of construction.
	Building height	Building height to 9 metres. Original scale of buildings.
	Materials	Consistent with the materials associated with the architectural style of the subject building. Random, coursed and dressed stone. Rendered stone. Brick, stone and rendered quoins. String courses. Hipped and gabled roofs. Dormer windows. Raked verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. Decorative cast iron features. Brick and stone chimneys. Stone Porticos. Decorative and ornate timber bargeboards. External finishes non-reflective and utilise natural colours.
	Fencing	Front fencing of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, with varying heights to between 1200-1800 millimetres.
	Setting, landscaping, streetscape and public realm features	'Secluded' nature of houses, in most cases set well back on their blocks, hidden behind the gardens and hedges. Streetscape is dominated by tree plantings and fencing behind which can be seen the larger trees and shrubs of the gardens. The lower section of the road (from Laurel Road to the roundabout near St Catherine's) is winding and bordered by hedges and trees. The upper portion of the road is straight and reveals a wider footpath margin than the lower section, adding to the feeling of privacy of the houses. Wide footpath verges which are of a rustic nature. Row and avenue plantings of exotic trees in the road verges.
	Representative Buildings	*[Not identified]*
AdHi3	**Woodside Historic Area Statement (AdHi3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 1880s.
	Allotments, subdivision and built form patterns	Original grid subdivision pattern. Uniform rectangular allotments.
	Architectural styles, detailing and built form features	The predominant character is single storey detached dwellings with an eclectic mix of European architecture set in large landscaped surrounds, interspersed with buildings including workers cottages and churches, at times built to the front boundary. The architectural style of the buildings varies with their date of construction.
	Building height	Primarily single storey detached buildings.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape. Random coursed and rubble stone. Rendered stone. Brick and rendered quoins. Hipped and gabled roofs. Raked verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. External finishes non-reflective and utilise natural colours.
	Fencing	Front fencing of pickets, post and wire, and masonry (exposed or rendered brickwork or stonework), with maximum heights ranging from 1000 of 1200 millimetres.
	Setting, landscaping, streetscape and public realm features	Relatively narrow streets, typically featuring box-style kerb and gutters, do not often have footpaths.
	Representative Buildings	*[Not identified]*
Historic Areas affecting Alexandrina Council		
	Strathalbyn Suburban Neighbourhood Historic Area Statement (Alex1) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Northern (Manse Road, Melville Lane, Taylors Lane, Melville Street, Harriet Street and North Parade) 1860s-1910s. Symmetrical double-fronted early settler cottages and simple workers accommodation. Centred on North Parade, the area was initially subdivided in 1856 and was developed to contain a mixture of functions ranging from an early butcher's shop, to a school, a hospital and a Rechabite Hall and residences. The early commercial and institutional functions have declined over time and the area is now mainly residential. Western (Sandegrove Road, King Street, Coronation Road) 1910s. Symmetrical double-fronted cottages and early Bungalow era dwellings.

Statement#	Statement	
Alex1		The Western area is important in the overall character of Strathalbyn as it reflects the period at the turn of the century which was one of consolidation and prosperity for the town. The specific residential character of the area derives from the consistent character of the circa 1910 residences, which display typical characteristics of domestic architecture at the time. Central (East Terrace, Murray Street, North Parade, Grey Street, Chapel Street, Rowe Street, Commercial Road, West Terrace, Jeff Street, Wallbank Street, Mill Street) 1860s - 1950.s. Symmetrical double-fronted cottages and early Bungalow era dwellings. The Central area represents the predominantly residential area within the bounds of the original town boundary following, North Parade, East Terrace, South Terrace and West Terrace. The area also includes church landmarks to the east of the town centre on Murray and Chapel Streets.
	Allotments, subdivision and built form patterns	Northern Large allotments and setbacks. Medium- to large front setbacks. Buildings parallel to street. Buildings typically located asymmetrically on allotments, allowing for access to rear of blocks on one side. This subdivision has a less regular layout, in part due to path of Middle Creek which borders the area on the north and east. Western Large allotments and setbacks. Consistent medium- to large front setbacks. Buildings parallel to street. Buildings typically located symmetrically on allotments with very wide side setbacks. Central Large allotments and setbacks. Buildings parallel to street. Buildings typically located asymmetrically on allotments, allowing for access to rear of blocks on one side.
	Architectural styles, detailing and built form features	Western and Northern Symmetrical stone double fronted cottages with some early bungalow styles. Predominantly hipped roofs of 27-35 degree pitch with detached verandah (concave, convex and bullnosed) set 300mm below main building gutter. High solid to void (window & door opening) ratio. Carports and sheds generally to the rear of allotments and not attached to dwellings. Central Stone double fronted cottages with some early bungalow styles. Predominantly hipped roofs of 27-35 degree pitch with verandahs. High solid to void (window & door opening) ratio. Carports and sheds generally to the rear of allotments and not attached to dwellings.
	Building height	Single storey with external wall heights generally 3.8-4.1m and ceilings at least 3.
	Materials	Sandstone and limestone with red brick quoins predominantly. Corrugated (mostly galvanised) roofing.
	Fencing	Northern Timber post and rail (local variation diamond style), low masonry, timber post and cyclone mesh, rural post and wire fencing to a height of 1.2m at front and 1.8m on side boundaries. Western Hedges, brush, pickets, low masonry and cyclone mesh, rural post and wire fencing to a height of 1.2m at front and 1.8m on side boundaries. Central Timber post and rail (local variation diamond style), hedges, low masonry, timber post and cyclone mesh, rural post and wire fencing to a height of 1.2m at front and 1.8m on side boundaries.
	Setting, landscaping, streetscape and public realm features	Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination. Northern Heavily vegetated, rural character, especially to Taylors Lane and Melville Street. Western Newly formed footpaths with planted verges and street trees. Central Rural character, wide streets and footpaths with regular street trees.
	Representative Buildings	Identified - refer to SA planning database.
Alex2	**Strathalbyn Centre - Township Main Street and Community Facilities Historic Area Statement (Alex2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860s - 1910s settlement period. Residential, small commercial, institutional and civic buildings. Dawson (Commercial Road / Dawson Street, Catherine Street, Rankine Street, South Terrace, Donald Terrace, Albyn Terrace) The River Angas and the associated Soldiers Memorial Gardens is a key element within this area, reflecting the rising civic consciousness of the residents of Strathalbyn as the town prospered through the 1870's-90's. Dawson Street and Albyn Terrace contain many notable early examples of commercial buildings which reflect the enterprise and success of these residents. High Street (High Street, Grey Street, Swale Street, Sunter Street, Alfred Place) An historic predominantly commercial area with buildings ranging from early settlement, through a period of expansion in the late 1860's to about 1910.
	Allotments, subdivision and built form patterns	Dawson Large, rectangular allotments with large frontage. No front setback to commercial properties. Typically small front setback to residential properties. Buildings parallel to street. Minimal side setbacks often with no driveways or vehicle access. High Street Large, rectangular allotments with large frontage. No front setback to commercial properties. Typically minimal to no front setback to residential properties. Buildings parallel to street. Minimal side setbacks often with no driveways or vehicle access.
	Architectural styles, detailing and built form features	High solid to void (window & door opening) ratio. Commercial properties typically parapeted or hipped and gabled with verandahs overhanging footpaths. Residential properties simple double fronted early settler residences and homesteads hipped and gabled roofs of 27-35 degrees pitch with separate verandah. Carports and garages generally to the rear of allotments and not attached to dwellings.
	Building height	Commercial and residential single storey with external wall heights 3.8-4.1m and ceilings of at least 3m. Two storey grand, civic or historic commercial activities.
	Materials	Sandstone and limestone with red brick quoins predominantly. Corrugated (mostly galvanised) roofing. Institutional and grand civic buildings rendered quoins and features. Distinct absence of contemporary materials.
	Fencing	Timber post and rail (local variation diamond style), timber post and cyclone mesh up to 1.2m in height at front and 1.8m on side boundaries. Pickets to verandahs at street line.
	Setting, landscaping, streetscape and public realm features	Rural open streetscape character. Some early stone and terracotta kerbing remain. Traditional street tree planting such as Ash trees. Wide streets in original layout connecting to traditional parks/gardens reinforcing rural character and scenic views. Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination.
	Representative Buildings	Identified - refer to SA planning database.
	Middleton Historic Area Statement (Alex3) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1855 - Flour Mill established, Middleton township 1856 - from mid 19th century era of grain production and local milling for export.
	Allotments, subdivision and built form patterns	Irregular angled large allotments containing former mill and ancillary dwellings and smaller lots.

Statement#	Statement	
Alex3		
	Architectural styles, detailing and built form features	Symmetrical structures with a high solid to void (window & door opening) ratio. Gabled and hipped roofs of 27-35 degree pitch.
	Building height	Single storey dwellings.
	Materials	Local stone, brick, corrugated iron, rendered walling or rammed earth walling. Corrugated galvanised roofing.
	Fencing	Fencing reflective of the architectural style of the subject building in terms of building material, including post and wire and open fencing up to 1.2m to the front alignment, side boundary fences up to 1.8m.
	Setting, landscaping, streetscape and public realm features	Existing mature vegetation and boundary structures, such as walls and fences form an important landscape element. Open landscape surrounding the mill complex. Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination.
	Representative Buildings	*[Not identified]*
Alex4	**Goolwa Historic Area Statement (Alex4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Between the 1850s and 1880s Goolwa developed as one of Australia's most important river ports. Dwindling after the Morgan to Port Adelaide railway opened in 1878. Australia's first railway, a single-track horse powered tramway (1854) extended from Goolwa to Victor Harbor in 1864 and later converted to steam and rail, now forms part of a major tourist attraction, the 'Cockle Train' trip. Residential development commenced with the settlement of Goolwa. From the late 19th century to the present day, Goolwa's main focus has been as a tourist township, but the industrial historic legacy of earlier times which includes former breweries, sawmill, shipyards, the wharf area, the Goolwa Patent Slip and iron works and flour mill. The Goolwa Historic Area is a residential area known as 'Little Scotland' adjoining the State Heritage Area to the north and bounded by the railway line to the south.
	Allotments, subdivision and built form patterns	Small narrow allotments, with many dwellings built over two allotments giving appearance of larger frontages. Buildings parallel to street. Minimal side setbacks, often no driveways or vehicle access.
	Architectural styles, detailing and built form features	Small humble workers' cottages. Gabled, hipped and parapeted roofs at 30-40 degree pitches. Separate verandah roof across frontage typical. High solid to void (window and door opening) ratio. Carports and garages generally to the rear of allotments and not attached to dwellings.
	Building height	Single storey with external wall heights 3.8 - 4.1m and ceilings of at least 3m.
	Materials	Stone, rendered masonry, weatherboard walls. Corrugated roofing. Distinct absence of contemporary materials.
	Fencing	Low picket fences or timber post and rails often at verandah line, up to 1.2m high.
	Setting, landscaping, streetscape and public realm features	Intimate village, narrow streets with minimal or no footpaths. Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination.
	Representative Buildings	*[Not identified]*
Alex5	**Port Elliot Township Main Street and Suburban Neighbourhood Historic Area Statement (Alex5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s-1920s. The Strand Residential and Small Commercial. Early commercial, civic and institutional buildings underpin the historic street. A compact commercial and shopping core towards North Terrace, with holiday houses and cottages concentrated towards Freeman's Lookout to the south. A pedestrian-friendly environment, preserving the backdrop to streetscapes on Charteris Street, Murray Terrace and Horseshoe Bay. Horseshoe Bay Former Port, Leisure. The focal point of the township and centre for leisure activities is Horseshoe Bay. It remains largely undeveloped, with landscape and natural elements prioritised. Murray Terrace Residential. The Murray Terrace section contains both historically significant buildings of the 19th Century and more recent dwellings which give the area a unique character, particularly the bungalow style dwellings located south of the railway line. North Terrace Commercial and Residential. This area provides the entrance to the historic Port Elliot township.
	Allotments, subdivision and built form patterns	The Strand Large allotment sizes and frontages. Minimal front setbacks to residential buildings, often no front setback to commercial buildings. Buildings parallel to street. Small to medium side setbacks. Murray Terrace Large allotment sizes and frontages. Minimal front setbacks south of the train line, significantly large front setbacks north of the train line. Buildings parallel to the street. Small to medium side setbacks. North Terrace Large allotment sizes and frontages. Medium to large front setbacks to residential buildings, typically no setback to commercial buildings. Buildings parallel to the street. Medium to large side setbacks to residential buildings, minimal setbacks to commercial buildings.
	Architectural styles, detailing and built form features	The Strand Square or rectangular ground plans with hipped and gabled roofs and mostly separate verandahs. Symmetrical facades common. High solid to void (door and window openings) ratio. Carports and garages generally to the rear of allotments and not attached to dwellings. Horseshoe Bay Significant natural landscape with historic shipping remnants (timber jetty, breakwater and quarry). Existing structures are generally unobtrusive. Murray Terrace Square or rectangular ground plans with hipped and gabled roofs and continuous verandahs in Bungalow styles. High solid to void (door and window openings) ratio. Carports and garages generally to the rear of allotments and not attached to dwellings. North Terrace Square or rectangular ground plans with hipped and gabled roofs. Separate verandahs, extending over footpaths for commercial buildings. High solid to void (window and door opening) ratio. Carports and garages generally to the rear of allotments and not attached to dwellings.
	Building height	The Strand and North Terrace Predominantly single storey residential external wall heights 3.8-4.1m and ceilings of at least 3m. Two-storey historic landmark civic, religious and commercial structures. Horseshoe Bay Predominantly single storey and sited well below the cliff face. Murray Terrace Single storey external wall heights 3.8-4.1m and ceilings of at least 3m.

Statement#	Statement	
	Materials	The Strand Walls unpainted limestone and bluestone with redbrick quoins. Some rendered masonry. Corrugated roofs. Distinct absence of contemporary materials. Horseshoe Bay Natural materials dominate. Stone, rendered masonry, unpainted timber, corrugated roofs. Murray Terrace Walls unpainted limestone redbrick quoins and side walls. Some rendered masonry. Corrugated and terracotta tiled roofs. Distinct absence of contemporary materials. North Terrace Bluestone, limestone and rendered masonry. Corrugated roofs. Distinct absence of contemporary materials.
	Fencing	The Strand Low, open fencing including post and wire, post and rail, picket, hedges and vegetation, masonry reflecting the dwelling behind. Front fencing up to 1.2m. Horseshoe Bay Fencing that enables views. Murray Street Low fencing including pickets and masonry (reflecting style of dwelling behind), some hedges. Front fencing up to 1.2m. North Terrace Low masonry fencing most common. Some brush, timber and hedging. Front fencing up to 1.2m.
	Setting, landscaping, streetscape and public realm features	Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination. The Strand Intimate village character, street trees and verandahs over footpath. Prominent public parks and railway precinct directly connected to street. Horseshoe Bay Significant natural landscape with historic shipping remnants. Murray Street Wide footpaths with planted verges including street trees and shrubs. North Terrace Rural open streetscape character with minimal signage and no illuminated signage. Paved and bituminised footpaths with some street trees. Street lamps and significant pine tree prominent features.
	Representative Buildings	*[Not identified]*
Alex6	**Milang Neighbourhood, Township Activity Centre and Conservation Historic Area Statement (Alex6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s-1920s Milang's location on the western shore of Lake Alexandrina has been pivotal in its colonial development as a thriving river port. This economic influence, in addition to typical civic services has left a legacy of industrial, civic and domestic buildings, mostly built of local limestone, and a surviving subdivision pattern from the 1850s. Since the 1920s, with the decline of commercial activity, Milang has developed as a tourist, retiree and holiday destination. The substantial Institute building and several commercial buildings including the old Butter Factory, former Lake Hotel and current Pier Hotel stand out as larger buildings in an essentially low-rise environment. These buildings should remain the most prominent structures within their localities, with new development subservient and reverential to them. Surrounding residential development is characterised by a mixture of simple vernacular cottages built in the mid to late 1800s, of local random stone, and more substantial double fronted cottages, villas and the occasional asymmetrical cottage with Victorian stylistic influences.
	Allotments, subdivision and built form patterns	The original township pattern remains clearly evident and should be retained and reinforced by any new divisions. The dominant subdivision pattern is rectilinear, with buildings parallel to boundaries. Front setbacks vary considerably, although as a rule older buildings are sited closer to front boundaries, some with zero setbacks. There are minimal 'hammerhead' or cul-de-sac arrangements, and this form of division should be discouraged. The distinct pattern of reserves and parklands surrounding Luard, Maroo and Lyon Streets should be retained as open landscaped areas surrounding the original central survey on three sides (the fourth side being the lake).
	Architectural styles, detailing and built form features	The early character of Milang can still be readily discerned through the historic buildings that remain from the 1850s to the early 1900s and the original subdivision pattern, which left a rich legacy of buildings including prominent public buildings, churches and a large number of private residences of varying scales and degrees of detail, mostly constructed of stone. It is envisaged Coxe Street and Daranda Terrace will serve as the primary retail areas of Milang complemented by adjacent streets within the Township Activity Centre providing small scale retail facilities catering more for the holiday maker, such as art galleries and tea rooms. It is expected that development along these streets will be mindful of the backdrop to adjacent streetscapes in terms of building bulk, height, overshadowing and overlooking. The floor areas of new buildings will be in the order of those of adjacent historic buildings, but deferential to landmark sites. Overall, development will continue to accommodate the range of small-scale retail and commercial land uses to serve the day to day needs of the local population while retaining Milang's distinctive historic character. In the commercial/civic core of the township, buildings tend to be sited on or close to street boundaries. Many former shops and workshops have been converted to dwellings over the years although many original features remain and should be conserved. It is desirable that sites currently containing development incompatible with the existing character of the policy area be redeveloped with residential development more in keeping with the prevailing historic character. The form of buildings, and the colours and materials used, need to be in keeping with those used on historic buildings existing within the policy area. Existing mature vegetation, walls and fences contribute to character and need to be retained and integrated with any future development. Future residential development within the Historic Area Overlay will complement the existing single storey form, design, siting and appearance of the historic built form. Development closer to street frontages should have a higher degree of consideration to the historic character and development further from street frontages with less contribution to the streetscape character should be screened by substantial vegetation such as large trees, shrubs and hedges. Outbuildings tend to be alongside or to the rear of the dwelling. Front verandahs are common, both concave and convex and the more substantial dwellings have verandahs front and side. Roof forms are a mixture of gable and hipped, typically at a pitch of 20° to 30° with corrugated iron roofs. Exclusively single-storey, high solid to void ratio, vertical proportions to doors and windows, and fine grain detail in elements such as plinths, door and window quoins and projecting sills predominate.
	Building height	Single-storey residential with typical proportions of Victorian era cottages with wall heights of 3m plus and overall heights of 4m to 5m.
	Materials	Materials are typically random stone, stone and brick dressings, with brick chimneys and timber joinery. Typically, these materials would have been sourced locally including underlying limestone. There are three corrugated iron-clad dwellings, one of which is State Heritage listed.
	Fencing	Predominantly low, around 1metre high, timber picket, post and wire, open wire, corrugated iron and occasional hedges. Many properties have no front fencing and in others landscaping is used to delineate boundaries. Overall impression is of low, unobtrusive front and side fencing.
	Setting, landscaping, streetscape and public realm features	This is a low-scale, essentially residential lakeside township with a focus on the water and historic artefacts associated with 19th century river and lake trade. There are significant pockets of tree cover which are prominent in the streetscape, in the surrounding parklands, along Luard Street and the central part of Daranda Terrace. Elsewhere landscaping is casual and scattered. The township has an informal feel. Many streets have no stormwater infrastructure and in others, kerb and gutter are "under" rather than "over" engineered, presenting a more natural appearance more like a country lane. Verges are untended for the most part, or casually landscaped, and Marroo Street and Lyon Street are unsealed.
	Representative Buildings	[Not identified]
	Milang Shacks Conservation Historic Area Statement (Alex7) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	

Statement#	Statement	
Alex7	Eras, themes and context	1948-1960. Milang's proximity to Adelaide made it a desirable riverside site for shacks. The first shack appeared in Milang in 1947. Shacks are a familiar feature of many coastal and riverine locations and have played a significant role in the holiday ethos of South Australia. The shacks provide sleeping accommodation, a place to prepare meals, eat and relax, and a place to store fishing and other equipment for holiday use only, not permanent occupation. Each have their own macerator that pumps effluent to the main CWMS tanks at the Todds Hill / Daranda Terrace area. Rainwater is collected from the roof of each shack. Public facilities on the foreshore also provide toilets and showers. Shacks now have electricity connected and electric lights and appliances replace the ice-chests, and kerosene lamps and stoves once used.
	Allotments, subdivision and built form patterns	There are 92 shacks in three distinct rows on the foreshore. Allotments are typically 5-6m wide and 10-12m deep.
	Architectural styles, detailing and built form features	Uniform in design, being simple rectilinear forms with simple gabled roofs of 10-20 degrees, with simple detailing. Small, simple verandahs of low pitch.
	Building height	Predominantly single storey with minimal two-storey structures. Wall heights typically 2.4m. Overall heights approximately 3m.
	Materials	Lightweight materials including fibre cement sheet, weatherboard and corrugated materials with timber and aluminium windows and doors. Colours vary greatly which is part of the charm and character of the locality.
	Fencing	No fencing between shacks. Some balustrades and enclosed verandahs.
	Setting, landscaping, streetscape and public realm features	Intimate, informal setting with some grassed common areas and scattered trees of modest size.
	Representative Buildings	[Not identified]

Historic Areas affecting The Barossa Council

Angaston Centre Historic Area Statement (Baro1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Baro1	Eras, themes and context	Early settlement in 1850s and 1860s. 19th and early 20th Century buildings and streetscapes.
	Allotments, subdivision and built form patterns	Original development and subdivision pattern, especially in the vicinity of Hannay Crescent including the cemetery allotment.
	Architectural styles, detailing and built form features	Banks, churches and hotels along Murray Street. Early post-supported verandas along sections of Murray Street.
	Building height	Two storeys.
	Materials	*[Not stated]*
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Significant visual backdrop formed by the hills, cemetery and stone walling when viewed from the Hannay Crescent area and Murray Street. The configuration of Murray Street with a bend at the Sturt Street junction provides interesting vistas east and west along the street. A vista is evident along Washington Street towards the Town Hall. Marble walling in front of the former Station Masters Residence, and former animal pound walls on the railway land. Along Murray Street, the paddock like nature of the land adjoining the creek bank links with the residential surrounds and, in association with the Murray Street park and rural backdrop, creates an attractive setting. Mature landscaping, deciduous street trees, Moreton Bay Fig trees, English Elm and the grouping of deciduous trees adjacent to the Laucke Mill on Murray Street.
	Representative Buildings	Identified - refer to SA planning database.

Angaston Residential Historic Area Statement (Baro2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Baro2	Eras, themes and context	Late 1800s. 1920s, second wave of prosperity for Angaston in the 20th Century.
	Allotments, subdivision and built form patterns	*[Not stated]*
	Architectural styles, detailing and built form features	Substantial residences in 1879-80. Residences of the 1920s.
	Building height	*[Not stated]*
	Materials	Local stone.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Tree lined streets, attractive gardens, varied topography, mature white cedars along Schilling Street, coprosma hedges in front of some houses (retaining early post and wire fence structures), mature ficus at the base of Dean Street, mature gums along the creek, and cypress hedges to many 1920s dwellings. Angas Recreation Park forms an important element located within the residential area. The park between Dean Street and Hill Street and Angaston Children's Reserve provides an open area for community use.
	Representative Buildings	Identified - refer to SA planning database.

Bethany Historic Area Statement (Baro3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Baro3	Eras, themes and context	Established in 1842 - one of the earliest substantial German settlements in the Barossa.
	Allotments, subdivision and built form patterns	Subdivided according to the hufendorf principle of long strips. Houses built close to the road with long narrow allotments stretching out behind, together with significant timber structures, particularly farm buildings either close to the road or behind the farm houses.
	Architectural styles, detailing and built form features	Early houses dating from the 1850s and the 1860s, many of which retain layouts and construction techniques clearly indicating their German origin.
	Building height	*[Not stated]*
	Materials	*[Not stated]*
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	The Herberge Christi Lutheran Church and the cemetery in the eastern end of the settlement form a dominant element. Vegetation and landscaping located within the public realm and mature street tree plantings lining the road, together with the mature gardens associated with the early dwellings. The Tanunda Creek, the Bethany Reserve and the creek crossing at Bethany Road are also important to the character of the settlement.
	Representative Buildings	Identified - refer to SA planning database.

Krondorf Historic Area Statement (Baro4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Statement#	Statement	
Baro4	Eras, themes and context	Established in 1847. First plan of division 1877.
	Allotments, subdivision and built form patterns	Division of land undertaken to the hufendorf arrangement. Linear nature.
	Architectural styles, detailing and built form features	Early farm complexes and buildings indicative of its early date of settlement.
	Building height	*[Not stated]*
	Materials	Pioneer building techniques and specifically German traditions in construction. Significant stone and timber structures, particularly farm sheds.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Buildings close to the road alignment. Zum Kripplein Christi Church ("Manger of Christ") forms a dominant building in the middle of the settlement.
	Representative Buildings	Identified - refer to SA planning database.

Moculta Historic Area Statement (Baro5)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Baro5		
	Eras, themes and context	Early service town in the northern agricultural plains comprising small scale development.
	Allotments, subdivision and built form patterns	Simple linear nature.
	Architectural styles, detailing and built form features	Early residential and commercial buildings along Truro Road.
	Building height	*[Not stated]*
	Materials	*[Not stated]*
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Row of mature Carob street trees lining Truro Road.
	Representative Buildings	Identified - refer to SA planning database.

Mount Pleasant Centre Historic Area Statement (Baro6)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Baro6		
	Eras, themes and context	Service centre for the surrounding pastoral area.
	Allotments, subdivision and built form patterns	Linear nature of settlement along Melrose Street.
	Architectural styles, detailing and built form features	Consistent early dwellings, the former bank building at the pivotal junction of Melrose Street and Saleyards Road, the ruins of the Henry Giles' early flour mill on the corner of Glen Devon Road and Melrose Street.
	Building height	*[Not stated]*
	Materials	*[Not stated]*
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Substantial buildings including the two hotels. Mature street planting.
	Representative Buildings	Identified - refer to SA planning database.

Stockwell Historic Area Statement (Baro7)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Baro7		
	Eras, themes and context	A rural character that highlights the early agricultural development of the district.
	Allotments, subdivision and built form patterns	Reflects the earliest periods of subdivision and also the later expansion of the town.
	Architectural styles, detailing and built form features	Significant public and private buildings located along Duckponds Road. Former steam powered flour mill.
	Building height	Low scale.
	Materials	*[Not stated]*
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Central concentration of public and residential buildings with the prominence of the St Thomas Lutheran Church.
	Representative Buildings	Identified - refer to SA planning database.

Williamstown Historic Area Statement (Baro8)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Baro8		
	Eras, themes and context	1860s and 1870s.
	Allotments, subdivision and built form patterns	Original street pattern including the junctions of the main roads in and out of town. Grid structure.
	Architectural styles, detailing and built form features	Forrester's Lodge, the Institute, the Post Office and the Hotel at the northern end of Queen Street, the small stone commercial structures at the south end of Queen Street, the small, but representative Churches located within the town, including the Uniting Church, the Anglican Church and the Church of Christ, and the notable cluster of early residences in George Street close to the junction of Queen Street. Indicative of the early building types and structural materials

Statement#	Statement
	Building height: *[Not stated]* Materials: *[Not stated]* Fencing: *[Not stated]* Setting, landscaping, streetscape and public realm features: Collections of historic buildings. Vistas to important historic buildings from surrounding areas. Notable Moreton Bay Fig tree at the corner of George Street and Little Eva Street creates a focal landmark element that is visible from Queen Street. Representative Buildings: Identified - refer to SA planning database.
Baro9	Murray Street Tanunda Historic Area Statement (Baro9) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: *[Not stated]* Allotments, subdivision and built form patterns: *[Not stated]* Architectural styles, detailing and built form features: Combination of domestic and commercial buildings. Significant and substantial public buildings which give a sense of civic importance. Building height: Low scale. Materials: *[Not stated]* Building height: Low scale. Setting, landscaping, streetscape and public realm features: Varied alignment of buildings in Murray Street, with commercial buildings aligned with the pavement and residential buildings setback to allow for front gardens. Early plantings of Moreton Bay Figs and Carob trees which retain their broad canopies and mature trunks form an attractive tree lined setting. Representative Buildings: Identified - refer to SA planning database.
Baro10	**Goat Square Tanunda Historic Area Statement (Baro10)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Low scale and open character of Goat Square and surrounding land. Allotments, subdivision and built form patterns: Original subdivision pattern maintained, particularly of the square itself. Architectural styles, detailing and built form features: Early residences located around the central square. Building height: *[Not stated]* Materials: Early residences constructed of early original materials. Fencing: *[Not stated]* Setting, landscaping, streetscape and public realm features: Buildings located around the central square, together with the open space and informal nature of the surface materials of the central square, which was originally used as a market area. Mature Carob trees and Kurrajong trees planted as groups located within the square. Representative Buildings: Identified - refer to SA planning database.
Baro11	**Basedow Road, Tanunda Historic Area Statement (Baro11)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Nineteenth century development. 1890 to 1910. Allotments, subdivision and built form patterns: *[Not stated]* Architectural styles, detailing and built form features: Low-scale, low density residential development, in particular, dwellings and other buildings from 1890 to 1910. Building height: *[Not stated]* Materials: *[Not stated]* Fencing: *[Not stated]* Setting, landscaping, streetscape and public realm features: *[Not stated]* Representative Buildings: *[Not identified]*
Baro12	**Tanunda Crayford Historic Area Statement (Baro12)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Nineteenth century development. 1900 to 1920. Allotments, subdivision and built form patterns: *[Not stated]* Architectural styles, detailing and built form features: Low-scale, low density residential development, in particular, dwellings and other historic buildings from 1890 to 1910. Building height: *[Not stated]* Materials: *[Not stated]* Fencing: *[Not stated]* Setting, landscaping, streetscape and public realm features: Row of houses forms part of the entrance to Tanunda at the junction of Bethany Road and the southern end of Murray Street. These houses form a consistent group opposite the State Heritage Registered St John's Cemetery. Representative Buildings: *[Not identified]*
	MacDonnell Street, Tanunda Historic Area Statement (Baro13) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

Statement#	Statement
Baro13	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Nineteenth century development. 1890s and 1920s. Allotments, subdivision and built form patterns: Western side originally subdivided in 1855 as part of their Murray Street subdivision. The MacDonnell Street area was subdivided later. Architectural styles, detailing and built form features: Houses from a wide range of domestic architectural periods. Building height: *[Not stated]* Materials: *[Not stated]* Fencing: *[Not stated]* Setting, landscaping, streetscape and public realm features: *[Not stated]* Representative Buildings: *[Not identified]*
Baro14	**Tanunda West Historic Area Statement (Baro14)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Nineteenth century development. Allotments, subdivision and built form patterns: Narrow streets. Architectural styles, detailing and built form features: *[Not stated]* Building height: *[Not stated]* Materials: *[Not stated]* Fencing: *[Not stated]* Setting, landscaping, streetscape and public realm features: Existing landscaping and low-density built form, attractive "gateway" to the town centre. Varied, but minimal building setbacks, forming intimate streetscapes. Representative Buildings: *[Not identified]*
Baro15	**Tanunda North Historic Area Statement (Baro15)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Nineteenth century development. Allotments, subdivision and built form patterns: *[Not stated]* Architectural styles, detailing and built form features: Range of periods of domestic architecture. Building height: *[Not stated]* Materials: *[Not stated]* Fencing: *[Not stated]* Setting, landscaping, streetscape and public realm features: Southwest corner incorporates the Tanunda Recreation Park and mature street plantings associated with the Park. This area extends from the eastern side of Murray Street to incorporate the northern end of Murray Street, which includes a large number of houses of similar residential quality. Representative Buildings: *[Not identified]*
Baro16	**Lyndoch Residential Historic Area Statement (Baro16)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Traditional dwelling styles and streetscape character. Allotments, subdivision and built form patterns: *[Not stated]* Architectural styles, detailing and built form features: *[Not stated]* Building height: *[Not stated]* Materials: *[Not stated]* Fencing: *[Not stated]* Setting, landscaping, streetscape and public realm features: Building form and pattern, predominant setbacks. Mature vegetation. Representative Buildings: *[Not identified]*
Historic Areas affecting City of Burnside	
Bur1	**Rose Park Historic Area Statement (Bur1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: 1880 - 1917 Victorian and Federation. 1918 - 1940 Post WW1. Allotments, subdivision and built form patterns: Traditional rectangular grid pattern. Generally large site areas. Generally large street frontage widths large. Large front of dwelling set-back. Vehicular access from rear lanes of many dwellings. Architectural styles, detailing and built form features: Late 19th Century and early 20th Century dwellings with forms, scale and detailing reflective of the era Villas and cottages in bluestone, freestone and/or brick. Many substantial dwellings as well as some more modest, unornamented dwellings . Brick quoinwork common. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports are located behind the main façade of dwellings. Visible chimneys.

Statement#	Statement	
	Building height	Predominantly single storey. Upper storey elements are integrated sympathetically into the dwelling design and generally not visible from street.
	Materials	Wall materials consistent with era of original construction including bluestone, freestone, sandstone and brickwork. Pitched roofs in galvanised iron sheet or terracotta tiles. Some original slate tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Timber picket or dowelling. Masonry and cast iron palisade. Some substantial hedging.
	Setting, landscaping, streetscape and public realm features	Substantial avenues, trees and gardens. Significant front landscaped gardens. Modest verges containing single line of streets trees. Double row of mature trees planted along Alexandra Avenue and Prescott Terrace as a war memorial. Area includes school, churches, mews cottages and other community facilities.
	Representative Buildings	Identified - refer to SA planning database.
Bur2	**Eastwood Historic Area Statement (Bur2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Majority 1870 - 1917 Victorian and Federation. Few 1917 - 1940 Post WW1.
	Allotments, subdivision and built form patterns	Narrow allotments of varying widths. Closely spaced small early dwellings and narrow streets. Minimal front set-backs. Many with front verandah built to front boundary. Minimal side set-backs.
	Architectural styles, detailing and built form features	Late 19th Century single fronted cottages, semi-detached and row dwellings. Modest double fronted detached cottages and villas. Few Interwar dwellings. Forms, scale and detailing reflective of the era. Hip and gable roof forms with pitches above 25 degrees.
	Building height	Single storey.
	Materials	Wall materials consistent with era of original construction including bluestone, freestone, sandstone and brickwork. Pitched roofs in galvanised iron sheet. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Timber picket or dowelling. Simple masonry and cast iron palisade, or simple wrought iron. Corrugated iron or mini orb within timber framing.
	Setting, landscaping, streetscape and public realm features	Narrow streets. Boundaries positioned close to street with narrow footpaths. Street trees penetrating footpath adjacent kerb. Pocket park.
	Representative Buildings	Identified - refer to SA planning database.
Bur3	**Wootoona Terrace Historic Area Statement (Bur3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Majority 1918 - 1940 Post WW1. Few 1912 - 1914 Federation.
	Allotments, subdivision and built form patterns	Single street intersected by side streets at 90 degree. Large site areas. Large street frontage widths. Generous front set-backs. Consistent side set-backs.
	Architectural styles, detailing and built form features	A range of early 20th Century international styles including Bungalows, Tudors and early English residential architecture. Large dwellings of generous proportions. Forms, scale and detailing reflective of the era. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs, usually of generous proportions, either projecting or as a continuation of the main roof structure.
	Building height	Mix of single storey and double story. Two storeys associated with grand residences. Upper storey elements are integrated sympathetically into the dwelling design.
	Materials	Wall materials consistent with era of original construction including bluestone, freestone, sandstone and brickwork. Roofs in galvanised iron sheet or terracotta tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Often including masonry pillars as entry statements constructed in stone or brick matching dwelling façade. Heavily vegetated. Some substantial hedging.
	Setting, landscaping, streetscape and public realm features	Wide verges. Substantial trees on public and private land.

Statement#	Statement	
		Expansive allotments, street frontages and gardens. Significant front landscaped gardens.
	Representative Buildings	Identified - refer to SA planning database.
Bur4	**Beulah Park Historic Area Statement (Bur4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Majority 1880 - 1917 Victorian and Federation. Few 1918 - 1940 Interwar.
	Allotments, subdivision and built form patterns	Traditional rectangular grid pattern with narrow streets. Narrow allotments of varying widths with closely spaced small early dwellings. Minimal front set-backs to single fronted cottages. Larger setbacks for larger allotments, in context with prevailing historic street pattern.
	Architectural styles, detailing and built form features	Predominantly late 19th Century villas and cottages and some early 20th Century villas and bungalows. Single fronted workers cottages, row housing and semidetached dwellings. Modest double fronted villas, cottages and bungalows. Forms, scale and detailing reflective of the era. Hip and gable roof forms with pitches above 25 degrees.
	Building height	Single storey.
	Materials	Wall materials consistent with era of original construction including brickwork and stone. Pitched roofs in galvanised iron sheet. Some original terracotta or slate tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open front fences. Maximum height to 1.2. Timber picket or dowelling. Simple masonry and cast iron palisade. Corrugated iron or mini orb within timber framing.
	Setting, landscaping, streetscape and public realm features	Narrow streets. Boundaries positioned close to street with narrow footpaths. Street trees penetrating footpath adjacent kerb.
	Representative Buildings	Identified - refer to SA planning database.
Bur5	**Tusmore Historic Area Statement (Bur5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Majority 1918 - 1950 Post WW1. Few 1900 - 1918 Federation.
	Allotments, subdivision and built form patterns	Traditional rectangular grid pattern. Large site areas. Large street frontages Large front set-backs.
	Architectural styles, detailing and built form features	Interwar styles including Bungalows and Tudors of varying designs. Forms, scale and detailing reflective of the era. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports are located behind the main façade of dwellings. Visible chimneys.
	Building height	Single storey.
	Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet. Few terracotta tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building facade. Maximum height to 1.2m. Woven crimped wire. Wire mesh with timber or galvanised tube framing. Masonry with galvanised steel ribbon. Low masonry wall under 900mm in brick matching dwelling. Masonry base with wrought iron steel top rail. Timber paling with timber top rail not exceeding 1m high. Some substantial hedging.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Buildings square to and on street alignments. Established vegetated gardens.
	Representative Buildings	Identified - refer to SA planning database.
	Toorak Gardens North Historic Area Statement (Bur6) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 - 1917 Victorian and Federation. 1918 - 1952 Post WW1.

Statement#	Statement	
Bur6	Allotments, subdivision and built form patterns	Traditional rectangular grid pattern. Large site areas. Large street frontage Large front of dwelling set-back.
	Architectural styles, detailing and built form features	Predominantly large single storey early 20th Century dwellings. Federation and Interwar styles including Gentleman's Bungalows and Tudors. Various forms, designs and detailing reflective of the era. Ranging from substantial residences to more modest, unornamented dwellings. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs, ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports located behind the main façade of dwellings. Visible chimneys.
	Building height	Predominantly single storey. A few dwellings with upper storey elements integrated sympathetically into the dwelling design.
	Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet or original terracotta tiles. Some original slate roof tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Timber picket or dowelling. Timber paling with timber top rail not exceeding 1m high. Masonry and cast iron palisade. Masonry with galvanised steel ribbon. Low masonry wall under 900mm in brick matching dwelling. Masonry base with wrought iron steel top rail. Some substantial hedging.
	Setting, landscaping, streetscape and public realm features	Wide streets with wide verges. Substantial trees. Expansive allotments, street frontages and gardens. Significant front landscaped gardens.
	Representative Buildings	Identified - refer to SA planning database.

Toorak Gardens Fergusson Square Historic Area Statement (Bur7)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Statement#		
Bur7	Eras, themes and context	Majority 1918 - 1952 Post WW1.
	Allotments, subdivision and built form patterns	Traditional rectangular grid set out around a central formal garden square. Large site areas. Large street frontage widths Large front of dwelling set-back.
	Architectural styles, detailing and built form features	Interwar styles including Bungalows and Tudors of various forms, designs and detailing reflective of the era. Ranging from substantial residences to more modest, unornamented dwellings. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs, ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports located behind the main façade of dwellings. Visible chimneys.
	Building height	Single storey.
	Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet. Few terracotta tiles. Retention of original materials and finishes and unpainted masonry.

Wire mesh with timber or galvanised tube framing. Timber paling with timber top rail not exceeding 1m high. Masonry with galvanised steel ribbon. Low masonry wall under 900mm in brick matching dwelling. Masonry base with wrought iron steel top rail.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Buildings square to and on street alignments. Central formal public garden square. Established vegetated gardens.
	Representative Buildings	Identified - refer to SA planning database.

Glenunga Park Historic Area Statement (Bur8)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

	Eras, themes and context	1880 - 1913 Victorian and Federation. 1914 - 1935 WW1 and Post war WW1.
	Allotments, subdivision and built form patterns	Traditional rectangular grid pattern. Large site areas. Large street frontage widths Large front of dwelling set-back.
	Architectural styles, detailing and built form features	Interwar styles including Bungalows and Tudors, of various forms, designs and detailing reflective of the era. Hip and gable roof forms with pitches above 25 degrees.

Statement#	Statement	
Bur8		Various porch and verandah styles including return verandahs, ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports located behind the main façade of dwellings. Visible chimneys.
	Building height	Single storey.
	Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet. Few terracotta tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Timber picket or dowelling. Woven crimped wire. Masonry and cast iron palisade. Masonry with galvanised steel ribbon. Masonry base with wrought iron steel top rail. Low masonry wall under 900mm in brick matching dwelling. Timber pailing with timber top rail not exceeding 1m high. Some substantial hedging.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Buildings square to and on street alignments.
	Representative Buildings	Identified - refer to SA planning database.

Bur9

Kensington Gardens - The Terraces Historic Area Statement (Bur9)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1880 - 1917 Victorian and Federation. 1918 - 1949 Post WW1.
Allotments, subdivision and built form patterns	Traditional rectangular grid pattern set out around a large recreational reserve. Large site areas. Large street frontage widths Large front of dwelling set-back.
Architectural styles, detailing and built form features	Interwar styles including Bungalows and Tudors , of various forms, designs and detailing reflective of the era. Ranging from substantial residences to more modest, unornamented dwellings. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs, ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports located behind the main façade of dwellings. Visible chimneys.
Building height	Predominantly single storey.
Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet. Few terracotta tiles. Retention of original materials and finishes and unpainted masonry.
Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Woven crimped wire. Wire mesh with timber or galvanised tube framing. Masonry and cast iron palisade. Masonry with galvanised steel ribbon. Masonry base with wrought iron steel top rail. Low masonry wall under 900mm in brick matching dwelling. Timber pailing with timber top rail not exceeding 1m high.
Setting, landscaping, streetscape and public realm features	Tree lined streets. Buildings square to and on street alignments. Large central public recreational reserve.
Representative Buildings	Identified - refer to SA planning database.

Romalo House Complex Historic Area Statement (Bur10)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	**Themes and Context** This Historic Area encompasses the 'Romalo House' complex and demonstrates important aspects of the settlement of the foothills of the Mount Lofty Ranges, specifically the Magill district. It is the product of the amalgamation of a number of phases of development including development of the country sections of the Hundred of Adelaide surrounding Magill, first for orchardsand horticulture, then vineyards and significant semi-rural estates. Romalo House in particular. Evolving from a small settler's cottage, Romalo House grew to become a substantial villa residence on a large semi-rural allotment with associated outbuildings, demonstrating the customs and way of life of closer settlement of the Magill area during the second half of the nineteenth century. This is further represented by the likely use of the outbuildings, first as barns or stables and coach house, before being used for the manufacture of wine, a characteristic function of the vineyards of the Magill foothills. The development of the property with a much enlarged, high quality villa residence and associated outbuildings and features, demonstrates the important pattern of the transformation of early settlers' dwellings throughout the Burnside area to fine residential properties as their owner's fortunes prospered. Despite a long program of development, alterations and additions, original internal and external fabric and planning from all phases of development remains discernible. The Romalo House property has a close association with at least four notable South Australians, vignerons and winemakers and its proximity to the Penfolds Magill Estate reflects the significant role this area played in the significant and rapid expansion of the viticultural industry in South Australia.

Statement#		Statement
Bur10		**Eras** Buildings and structures and landscaped setting from 1850s to 1909, reflecting early settlement and prosperity post settlement provide a prominent, distinctive and visual landmark in the locality.
	Allotments, subdivision and built form patterns	Large, irregular land parcel reflecting an early pattern of settlement and development. Substantive historical buildings in a landscaped setting, including large dwelling and associated outbuildings and structures, including two bluestone and timber barns. Main house and associated outbuildings and fountain are of particular value, as is their visual connection to each other. Substantial curtilage around existing dwelling and outbuildings. Remnant site planning and landscape layout, where extant. Dwelling addresses Romalo Avenue to the north.
	Architectural styles, detailing and built form features	Notable original dwelling, "Romalo" and pair of associated outbuildings (including two bluestone and timber barns) and other historic elements, including Victorian-era fountain to north of Romalo House. **House** Bluestone walling and remnant rendered detailing (string courses, quoins, sills, banding, pilasters, florets, corbels, cornices, brackets and balustraded parapets). Entrance steps including side walls, urns, slate step treads (north and west). Slate and marble tiling to verandah and slate courtyard paving. Timber-framed verandah, cast iron balustrade and corner brackets (may be of a later date). Window fenestration, timber window frames and double-hung sashes (various). Timber shutters, where extant or removed to other parts of the property for storage/salvage. Parapet wall structure, rendered decoration and cast iron finials to projecting gabled bays. Hipped roof structure and form. Rendered masonry chimneys. **Outbuildings** Single storey. Face random coursed rubble bluestone with face red brick quoins and dressings to openings. Bluestone walling. Brick detailing to quoins, gable vents, window and door surrounds. Window fenestration and door openings. Timber window frames and sashes. Timber door frames and door leaves, including paired, timber-clad stable doors and louvred highlights and panelled timber doors to west elevation, southern outbuilding. Gabled roof structure and form, including decorative barge timbers and finials.
	Building height	Single storey, with the exception of some later additions to south-east corner of the dwelling.
	Materials	Wall materials consistent with era of original construction including bluestone, sandstone and brickwork. Pitched roofs in galvanised iron sheet. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Eastern boundary defined by rural, open style post and wire fence reflecting original estate / use. (Newer, modern Colorbond steel panel fencing to adjoining development is not reflective of fences associated with era and style of original building).
	Setting, landscaping, streetscape and public realm features	Mildly undulating, vegetated, natural landscape setting with minimal cut and fill. Mature trees and remnant planting. Strong visual connection between remnant historic built forms which are recognised as landmark buildings and are important elements of the locality. Vistas and views into and out of the site are important, particularly the interspersed views to adjoining reserve and hills face escarpment.
	Representative Buildings	Identified – refer to SA planning database.

Historic Areas affecting City of Charles Sturt

Bowden / Brompton Historic Area Statement (ChSt1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

ChSt1	Eras, themes and context	1850s to early 1900s. Victorian era with an intimate and small-scale character.
	Allotments, subdivision and built form patterns	Small, long narrow allotments.
	Architectural styles, detailing and built form features	Single storey, detached and attached, single and double fronted workers' cottages. Some parapet walling to street with visible side return. Shop and dwelling typically on street corners. Early commercial and industrial buildings. Detached and semi-detached bungalow dwellings with wide verandahs, austerity and later townhouses.
	Building height	Single storey with ceiling heights at least 3m. Industrial scale walls of up to 5m.
	Materials	Red brick and bluestone walls and piers. Render to verandah piers, banding and parapets. Corrugated steel roofing in galvanised or paint finish. OG guttering in galvanised or paint finish. Painted timber to window frames, doors and roof trim. Chimneys; brick or painted render. Typically, small span steeply pitched gable and hipped 'M' roofs facing the street with ridge perpendicular or parallel to the street. Separate verandah to higher front wall or parapet.
	Fencing	Low front fencing, typically picket fencing and low masonry walls or combination thereof.
	Setting, landscaping, streetscape and public realm features	Small setbacks from the street. Narrow streets with minimal on site car parking. Original shopfronts to street corners. Industrial buildings constructed to street frontages.
	Representative Buildings	Identified - refer to SA planning database.

Statement#	Statement

Ovingham Historic Area Statement (ChSt2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

ChSt2

Eras, themes and context	1850s to 1900s. 1930s to 1940s. 1970s to 1980s (SA Housing Trust).
Allotments, subdivision and built form patterns	Small narrow lots, often on strongly sloping sites. Allotment shape and size variable and angled to suit strongly sloping sites and street pattern including Albert Turnbull Reserve.
Architectural styles, detailing and built form features	Single storey, detached and attached, single and double fronted workers' cottages. Bungalows and Austerity houses. Some early SA Housing Trust stock. Typically gable and hipped roofs facing the street, with separate verandah form. Generous roof planes and eaves overhangs to bungalows. Low wide bungalow style overhang verandah or gable.
Building height	Single storey with ceiling heights at least 3m.
Materials	Bluestone, sandstone and pressed metal/corrugated walls. Chimneys; brick or painted render. Red brick walls, chimneys and piers. Render to verandah piers, chimneys and banding. Corrugated steel roofing in galvanised or paint finish. OG guttering in galvanised or paint finish. Painted timber to window frames, doors and roof trim.
Fencing	Low front fencing, typically picket fencing and low masonry walls or combination thereof.
Setting, landscaping, streetscape and public realm features	Small to some generous variable setbacks from the street. Some dwellings parallel with angled side boundaries.
Representative Buildings	Identified - refer to SA planning database.

Brompton Park Historic Area Statement (ChSt3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

ChSt3

Eras, themes and context	1870s to 1890s. Victorian era.
Allotments, subdivision and built form patterns	Very narrow, long allotments.
Architectural styles, detailing and built form features	Single storey, detached and attached, single and double fronted workers' cottages. Typically, small span steeply pitched gable and hipped 'M' roofs facing the street with ridge perpendicular or parallel to the street. Separate verandah to higher front wall or parapet.
Building height	Single storey with ceiling heights at least 3m.
Materials	Bluestone and sandstone front walls, and red brick sidewalls. Render to verandah piers, banding and parapets. Corrugated steel roofing in galvanised or paint finish. OG guttering in galvanised or paint finish. Painted timber to window frames, doors and roof trim. Chimneys; brick or painted render.
Fencing	Low front fencing, typically picket fencing and low masonry walls or combination thereof.
Setting, landscaping, streetscape and public realm features	Small setbacks from the street. Narrow streets with minimal on-site car parking. Original shopfronts and hotels to street corners. Some industrial buildings constructed to street frontages.
Representative Buildings	Identified - refer to SA planning database.

Blight Street, Ridleyton Historic Area Statement (ChSt4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

ChSt4

Eras, themes and context	From 1939. Early SA Housing Trust.
Allotments, subdivision and built form patterns	Regular rectangular allotments with generous frontage and depth, central shared boundary and small side boundary setbacks for driveways.
Architectural styles, detailing and built form features	Single storey, 'early modern' style, typically semi-detached (duplex). Symmetrical frontage to duplex. Variable pattern of duplexes in street. Vertical proportions to windows. Hipped and gabled roofs, with porch a continuation of main roof or separate and awnings over front door and windows. Some projecting hipped roofs. Shallow roof pitch of 20 degrees maximum.
Building height	Single storey with ceiling heights around 2.7m - 3m.

Statement#	Statement	
	Materials	Red brick, protruding courses, painted and rendered sections, generally ay high level to walls. Corrugated steel and tiled roofing. Porches either corrugated steel or curved flat concrete canopies. Timber framed sunshade awnings with corrugated iron sheet roof. Red brick chimneys. Painted timber framed window frames, doors and roof trim.
	Fencing	Low open cyclone wire fencing or low tubular steel fencing.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Generous setting to each side of duplex.
	Representative Buildings	Identified - refer to SA planning database.
ChSt5	**Bell Street, Pennington Historic Area Statement (ChSt5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1938. Early SA Housing Trust.
	Allotments, subdivision and built form patterns	Layout reflects 'Garden Suburb' design concept, generally with shared central boundary and side boundary setbacks for driveways. Strong urban focal points in Sinclair Square and Tulloch Avenue. Regular rectangular allotments with generous frontage and depth central shared boundary and side boundary setbacks for driveways.
	Architectural styles, detailing and built form features	Austere, with late modern style, typically semi-detached (duplex). Symmetrical frontage to duplex. Variable pattern of duplexes in street. Vertical proportions to windows. Hipped and gable roof forms with porches continuous to main roof and separate awnings over windows. Some projecting hipped roofs. Shallow roof pitch of 20 degrees maximum.
	Building height	Single storey with ceiling heights around 2.7m - 3m.
	Materials	Red brick walls with protruding courses, painted and rendered sections, generally at high level to walls. Corrugated steel roofing and terracotta tile roofing (Bell Street). Porches either corrugated steel or curved flat concrete canopies. Timber framed sunshade awnings with corrugated iron sheet roof. Red brick chimneys. Painted timber framed window frames, doors and roof trim.
	Fencing	Low open cyclone wire fencing or low tubular steel fencing.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Generous setting to each side of duplex.
	Representative Buildings	Identified - refer to SA planning database.
ChSt6	**Croydon / West Croydon (North east of the railway line) Historic Area Statement (ChSt6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1890s - 1910s. 1910s - 1940s (west of Brown Street, north of Herbert Road).
	Allotments, subdivision and built form patterns	Very regular, consistent and long, rectangular allotments, with generous widths. Some combined shops and dwelling buildings to Rosetta and Elizabeth Street. Generous allotments facing Railway line.
	Architectural styles, detailing and built form features	Detached dwellings on generous allotments. Edwardian to early Federation. Post-Edwardian villas along Day Terrace. Early bungalow styles, including some Queen Anne, Tudor and Art Deco styles in latter period areas. A number of more substantial buildings, particularly fronting the railway line. Combined shop/dwellings and rows of shops (Elizabeth Street, Rosetta Street). Hipped, gable and Dutch-gable (gambrel) roofs, 'M' roofs with ridge parallel to street and separate verandahs. Some verandahs continuous with main roof line. Typical bungalow verandahs as low height gable frontage. Generous roof planes and eaves overhangs to bungalows.
	Building height	Single storey with generous ceiling and external wall heights of at least 3m.
	Materials	Bluestone, sandstone and redbrick, quoins and window surrounds. Red brick and rendered chimneys. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel and terracotta (latter period) roofing. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some elaborate decorative elements including painted timber fretwork, cast iron lacework to verandahs, finials, cover battens to gables and decorative barges.
	Fencing	Woven wire fences with painted timber posts. Painted timber picket fencing reflecting era of associated dwelling. Low masonry fencing with simple masonry piers, sometimes with simple iron and steel infill panels (from hume iron to tubular steel variations).

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks, typically set in mature gardens Typically tree lined streets particularly Day Terrace with railway line in treed setting. Generous side setbacks.
	Representative Buildings	Identified - refer to SA planning database.
ChSt7	**Croydon / West Croydon (South west of the railway line) Historic Area Statement (ChSt7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1890s - 1910s. 1940's bungalow style.
	Allotments, subdivision and built form patterns	Very regular and consistent rectangular allotments, with large widths.
	Architectural styles, detailing and built form features	Villas and symmetrical cottages, with some later, intrusive infill. Some worker's cottages of earlier periods. Some bungalow style. Hipped and gable roofs, and separate verandahs.
	Building height	Single storey with ceiling heights at least 3m.
	Materials	Bluestone, sandstone and redbrick. Corrugated steel roofing. Ornate render surrounds to window. Red brick and rendered chimneys. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel and terracotta (latter period) roofing. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some ornate decorative elements including painted timber fretwork, cast iron lacework to verandahs, finials, cover battens to gables and decorative barges.
	Fencing	Low masonry and original cast-iron and hume metal fencing. Woven wire fences with painted timber posts. Painted timber picket fencing reflecting era of associated dwelling.
	Setting, landscaping, streetscape and public realm features	Medium front setbacks. Plane Trees to Euston Terrace.
	Representative Buildings	Identified - refer to SA planning database.
ChSt8	**Allenby Gardens Historic Area Statement (ChSt8)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1920s - 1930s.
	Allotments, subdivision and built form patterns	Very regular and consistent rectangular allotments, with large widths. Some angular allotments due to street pattern and subdivision layout between main roads abounding area.
	Architectural styles, detailing and built form features	Late Edwardian, Federation and bungalow styles. Smaller number of Queen Anne and Tudor style houses. Mainly detached housing. Hipped, gable and Dutch gable roofs with decorative gable panelling and timber trim. Ridge lines that are mainly perpendicular or parallel to street frontage. Federation verandahs continuous with main roof. Some projecting gable forms to street. Low height bungalow style gables.
	Building height	Single storey with ceiling heights at least 3m.
	Materials	Terracotta tiles and corrugated steel roofing. Red brick and sandstone walls; some render. Red brick and render chimney.
	Fencing	Typically, low masonry fencing, sometimes with steel inserts. Woven wire fences with painted timber posts. Painted timber picket fencing reflecting era of associated dwelling.
	Setting, landscaping, streetscape and public realm features	Cohesive pattern of established detached dwellings with garden settings Medium front setbacks. Tree lined streets. Coombe Road is the natural focus of the area, and includes a school complex of a similar period to surrounding housing.
	Representative Buildings	Identified - refer to SA planning database.
	Pre-World War One Pennington West Historic Area Statement (ChSt9) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900s to 1920s, some 1940s/50s eastern side. Edwardian/Federation/early Bungalow.
	Allotments, subdivision and built form patterns	Uniform allotment size and street layout. Typically large frontages with deep allotments.

Statement#	Statement	
ChSt9	Architectural styles, detailing and built form features	Edwardian, Federation and early bungalows. Predominantly detached. Typical symmetrical frontage with return verandahs on corner allotments. Vertical proportion windows to earlier housing with typical wider and lower bungalow proportion windows. Steeply pitched Hipped, gable and Dutch gable (gambrel). Some 'M' Roof with ridge parallel to street. Some verandahs continuous with main roof. Some detached verandahs with typically bullnose profile. Generous simple roof planes to bungalow style with less steep roof. Low height wide bungalow verandahs.
	Building height	Single storey with ceiling heights and external walls to at least 3.5m.
	Materials	Red brick, sandstone and render walling. Render or brick chimneys. Some pressed metal wall cladding on the fronts. Some corrugated iron or small fluted iron cladding on the side walls. Terracotta tile and corrugated iron roofing and verandahs. Painted timber window frames, doors and roof trim. Ornate cast iron to verandahs. Turned painted timber verandah posts.
	Fencing	Typically, low masonry, timber picket or wire mesh with timber post fencing. Woven wire fences with painted timber posts. Painted timber picket fencing reflecting era of associated dwelling. Low small fluted metal fencing with painted timber trim.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Helen Street with Mt Carmel School as strong focal point.
	Representative Buildings	Identified - refer to SA planning database.

ChSt10

Pre-World War One West Hindmarsh Historic Area Statement (ChSt10)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1890s to 1910s. 1930 to 1940.
Allotments, subdivision and built form patterns	Uniform allotment size and street layout. Typically large frontages. Some narrow allotments (Albermarle Street).
Architectural styles, detailing and built form features	Symmetrical cottages and villas. Some single front cottages. Edwardian, Federation and early bungalow periods. Predominantly detached. Hipped, gable, 'M' and louvre (gambrel) roofs. Separate verandah of monopitch, concave and bullnose form. Bungalow style verandah with generous width and low pitching height, with masonry piers and low wall. Some original central verandah gable at entrance to symmetrical frontage. Roof pitches vary from bungalow pitch of 20-25 degrees to steeper Edwardian pitch of up to 35 degrees.
Building height	Single storey with ceiling and external wall heights at least 3m - 3.5m.
Materials	Bluestone, sandstone and red brick walls with chimneys typical of era. Rendered quoins and ornate surrounds to openings. Corrugated iron roofs with verandahs. Ornate painted timber to verandahs including fretwork and turned posts Ornate cast iron lacework to verandahs. Vertically proportioned windows with painted timber double-sash windows. Square bungalow proportioned three vertical windows in painted timber.
Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
Setting, landscaping, streetscape and public realm features	Broad and some narrow tree-lined streets. Medium to large front setbacks. Historic setting of Glanton Street defined by former church Local Heritage Place as focal point.
Representative Buildings	Identified - refer to SA planning database.

Welland Historic Area Statement (ChSt11)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1910s to 1940s.
Allotments, subdivision and built form patterns	Very regular and consistent rectangular allotments, typically very wide. Narrow deep allotments to Frederick Street.
Architectural styles, detailing and built form features	Late-Edwardian and Federation housing styles. Predominantly detached with some early semi-detached housing, some designed to look like one dwelling (Frederick Street). Early bungalows and 1940s Austerity houses. Some bungalow makeovers to earlier symmetrical dwellings. Hipped, gable and louvre roofs. Separate bull nose verandah typically to earlier dwellings. 'M' roof forms with ridge parallel to street frontage. Generous simple bungalow roof planes at shallower pitch to earlier housing with lower height generous width verandah.

Statement#	Statement	
ChSt11		Some verandahs continuous with main roof.
	Building height	Single storey with ceiling and external wall heights at least 3m - 3.5m.
	Materials	Red brick, bluestone and sandstone walls. Terracotta tiles, corrugated iron and decorative timber trim roofs. Painted metal gutters. Wall vents at high level between top of verandah and underside of gutter Red brick or render finish chimneys. Flat Cantilever concrete canopy sunshades with steel suspension. Ornate cast iron to some verandahs. Ornate decorative painted timber to some verandahs. Painted timber to window and door frames and timber roof trim.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Tree-lined streets. Large front setbacks.
	Representative Buildings	Identified - refer to SA planning database.

Woodville South Historic Area Statement (ChSt12)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

ChSt12		
	Eras, themes and context	1910s to 1940s.
	Allotments, subdivision and built form patterns	Substantial allotments with uniformity of layout and buildings, particularly in the 'Glen' Streets and Angus Street. Predominantly large frontages.
	Architectural styles, detailing and built form features	Predominantly bungalows with one wide verandah and Tudors with two main gables and central porch. Some Spanish Mission, Dutch Gable and Art Deco houses. Predominantly detached. Steep pitched gables associated with Tudor housing and Dutch Gables. Some villa/bungalow hybrid gables. Gable porches. Bungalow style verandahs with low height pitching point. Some verandah roofs continuous with main roof (bungalow and Spanish Mission). Some flat roofed verandahs set behind arched parapet verandah (Spanish Mission). Tall chimneys.
	Building height	Single storey with ceiling heights at least 3m. Bungalow and Spanish Mission typically of lower wall appearance to the street, with broad frontage.
	Materials	Freestone, red brick, stucco and baked or glazed brick. Exposed ornate timber work. Terracotta tiles and some galvanised corrugated iron roofs. Tapered and straight masonry piers and low walls to verandahs of bungalows, some with rendered capping to brickwork or rendered masonry. Painted timber battens (Tudor curved) to painted panel gables of Tudor and Bungalow. Painted timber framed window frames, door frames and roof trim.
	Fencing	Fencing generally low brick, stucco or wire and mostly integral with the design of the house. Some painted timber fencing with pickets or woven wire.
	Setting, landscaping, streetscape and public realm features	Tree lined streets, well maintained gardens, abundant with mature vegetation. Main-focus the landscaped Woodville Oval complex. Buildings fronting Woodville Oval on Oval Avenue and Cedar Avenue are of a larger scale with wider allotments, particularly on corner allotments with 'Glen' Streets.
	Representative Buildings	Identified - refer to SA planning database.

Kilkenny Historic Area Statement (ChSt13)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

ChSt13		
	Eras, themes and context	1850s to 1950s. Predominant era is 1920s to 1930s in the north and 1910s to 1920s in the south.
	Allotments, subdivision and built form patterns	Typically regular and consistent rectangular allotments, typically very wide. Narrow allotments to Wilpena Terrace, Arkaba Road and Mundulla Street.
	Architectural styles, detailing and built form features	Single front cottages. Edwardian and post-Edwardian cottages in the south. Federation and bungalow houses in the north. Small group of Victorian former shops located at the southern end of Wilpena Terrace reflecting the original main street of Kilkenny. High-quality 1930s houses on large allotments at the northern end Predominantly detached and some attached housing. Semi-Detached dwellings to Wilpena Terrace west of Mundulla Street. Small scale hipped, gable and louvre roofs typically with ridge line perpendicular to the street. Some 'M' roofs with ridge line parallel to the street. Relatively steeper roof pitch. Generous Bungalow roofing with simple roof plane and generous overhangs.

Statement#	Statement	
		Some federation verandahs continuous with main roof. Some separate bullnose verandahs lower than main wall height. Some central gable to verandah with finial.
	Building height	Single storey with ceiling heights at least 3m. Some traditional two storey.
	Materials	Freestone and red brick side walls. Red brick quoins. Rendered walling, tapered piers to bungalow verandahs and parapets. Corrugated iron and terracotta tile roofs. Brick or render chimneys with some decoration. Painted timber frame windows and doors with painted timber roof trim.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Shop and attached dwelling a strong characteristic in Wilpena Terrace with corner shops and verandahs over footpaths. Some dwellings and former shops constructed closer to front boundaries, especially if located on a corner allotment.
	Representative Buildings	Identified - refer to SA planning database.
ChSt14	**Woodville Park Historic Area Statement (ChSt14)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900s to 1950s.
	Allotments, subdivision and built form patterns	Very regular and consistent rectangular, deep allotments, to both sides of the railway line typically very wide with some narrow allotments to Belmore and Russell Terraces.
	Architectural styles, detailing and built form features	Generally detached, later symmetrical cottages, Villas, Federation, Queen Anne, occasional Austerity and bungalow styles with some attached housing to suit narrow allotments. Hipped, gable and louvre roofs with verandahs. Separate verandahs, typically bullnose, across frontages of symmetrical cottages, with many return verandahs not always on corner allotments. Separate verandahs to suit Villa style. Steeper roof pitches to earlier styles and Tudor with shallower pitched bungalow roofing. Wide low height verandah frontages to bungalows with gable and half gable styles with masonry piers and low plinth walls. Simple generous roof planes and eaves overhangs to bungalows with main ridge generally parallel to the street. Steeply pitched Tudor gables and verandah gables facing the street.
	Building height	Single storey with ceiling heights at least 3m.
	Materials	Red brick and freestone walls. Galvanised corrugated iron and terracotta roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels. Some ornate painted timber fretwork and posts to verandahs. Brick or rendered masonry chimneys.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Fences and front gardens are strong elements. Medium to large front setbacks.
	Representative Buildings	Identified - refer to SA planning database.
ChSt15	**Woodville Historic Area Statement (ChSt15)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880s to 1940s.
	Allotments, subdivision and built form patterns	Large, deep allotments typically very wide with slightly smaller scale housing south of the railway line. The Stanley Street change in direction results in allotments of lesser depth. Large corner allotments to Woodville Road. Some narrow allotments to Hughes Street North.
	Architectural styles, detailing and built form features	Generally large single-storey detached houses, bluestone Victorian villas, large Federation, Queen Anne and elaborate, large bungalow dwellings. Significantly larger mansions to Woodville Road. Smaller symmetrical cottages with some return verandah and smaller, simple bungalows to Russell Terrace. Semi-detached houses designed to look like one dwelling on Hughes Street North. Hipped, gable and louvre roofs. Relatively more complex hipped, gable and louvre roofs with verandahs. Separate verandahs, typically bullnose, across frontages of symmetrical cottages, with many return verandahs not always on corner allotments. Separate verandahs to suit Villa style. Federation style verandahs continuous with main roof. Steeper roof pitches to earlier styles with shallower pitched bungalow roofing. Wide low height verandah frontages to bungalows with gable and half gable styles with masonry piers and low plinth walls. Simple, multiple generous roof planes and eaves overhangs to bungalows with main ridge generally parallel to the street.
	Building height	Single storey with ceiling heights at least 3m - 3.5m.
	Materials	Bluestone, red brick and freestone walls. Galvanised corrugated iron and tiled roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels. Some ornate painted timber fretwork and posts to verandahs.

Statement#	Statement	
		Brick or rendered masonry chimneys.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Wide, tree-lined streets and large established gardens. Large front setbacks.
	Representative Buildings	Identified - refer to SA planning database.
ChSt16	**Cheltenham East Historic Area Statement (ChSt16)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 -1940. Small early cottages, Federation through to Bungalow.
	Allotments, subdivision and built form patterns	Small and variable allotment sizes, typically wide. Some substantial corner allotments remain.
	Architectural styles, detailing and built form features	Villas and symmetrical cottages, Federation and bungalow styles. Predominantly detached. Simple steeply pitched hipped, gable, louvre roof forms and verandas. Some separate and bullnose generally symmetrical with occasional return verandahs not always on corner allotments. Bungalow roof forms with simple generous roof planes and eaves overhangs. Some verandahs continuous with main roof. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.
	Building height	Single storey with ceiling heights at least 3m - 3.5m.
	Materials	Pressed metal, 'stone' front, metal or weatherboard clad, red brick, freestone and sandstone walls. Corrugated iron and terracotta tiled roofs. Red brick and rendered finish to chimneys. Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally, less ornate painted timber fretwork and posts to verandahs. Some cast iron lacework to verandahs.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Varied, small to medium front setbacks.
	Representative Buildings	Identified - refer to SA planning database.
ChSt17	**Cheltenham West Historic Area Statement (ChSt17)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1910s to 1950s.
	Allotments, subdivision and built form patterns	Typically, wide streets, with large allotments typically very wide.
	Architectural styles, detailing and built form features	Villas, Post-Edwardian, Federation, Tudor and bungalow and Post War style. West of Stroud Street, occasional Tudor or 1940s dwellings. Housing close to Torrens Road and south of the railway line more 'mixed' in character. Hipped, gable and louvre roof forms and verandas. Simple steeply pitched hipped, gable, louvre roof forms and verandas. Some separate and bullnose generally symmetrical with occasional return verandahs not always on corner allotments. Bungalow roof forms with simple generous roof planes and eaves overhangs. Shallower roof pitches to Post War housing. Some verandahs continuous with main roof. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.
	Building height	Single storey with ceiling heights at least 3m - 3.5m.
	Materials	Pressed metal, 'stone' front, metal or weatherboard clad, red brick, freestone and sandstone walls. Corrugated iron and terracotta tiled roofs. Red brick and rendered finish to chimneys. Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally, less ornate painted timber fretwork and posts to verandahs. Some cast iron lacework to verandahs.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Residual shops attached to dwellings and community facilities centred around 'main streets' in Buller Terrace, Stroud Street (north and south) and Railway Terrace. Medium to large front setbacks.
	Representative Buildings	Identified - refer to SA planning database.
	Henley Beach Historic Area Statement (ChSt18) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880s to 1940s.

Statement#		Statement
ChSt18		Transitional styles adopting cross era characteristics.
	Allotments, subdivision and built form patterns	Regular and consistent rectangular allotments, typically very wide with a high proportion of narrow and medium width allotments. Angled allotments to North Street west of Military Road.
	Architectural styles, detailing and built form features	Marlborough Street and Crewe Street, south to Clarence Street/Durham Street generally feature smaller but elaborate villas, early Spanish Mission, Federation and bungalows. Larger, grand villas, cottages and bungalows predominantly along Marlborough Street and East Terrace. South of Atkin Street, bungalows and Tudors. Hipped, gable and louvre roof forms and verandas. Bungalow roof forms with simple generous roof planes and eaves overhangs. Steeply pitched Tudor roof forms with two main symmetrical gables and central smaller gable porch to street. Some verandahs continuous with main roof. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.
	Building height	Single storey with ceiling heights at least 3m - 3.5m.
	Materials	Red brick walls and freestone facades. Corrugated and terracotta tile roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels especially Tudor and Bungalow. Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	South of the Bowling Club to Atkin Street, small setbacks. South of Atkin Street larger allotments and medium setbacks. Tree lined streets with a large presence of Norfolk Island pines along North Street and East Terrace. Vehicle access has been designed and located to preserve existing street trees. Some rear lane access.
	Representative Buildings	Identified - refer to SA planning database.

Grange Historic Area Statement (ChSt19)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Grange Road Late 1800s to 1950s. Beach Street Late 1800s to 1950s. Jetty Street Late 1800s in the west, to 1950s in the east. Grange Esplanade 1880s to 1940s.
Allotments, subdivision and built form patterns	Grange Road Allotments typically large and wide. Beach Street Allotments typically large and wide. Some angled allotments west of Military Road. Jetty Street Allotments typically large and wide. Large corner allotments. Grange Esplanade Varied, elevated allotments.
Architectural styles, detailing and built form features	Grange Road Bungalows, Spanish Mission. Symmetrical cottages to Grange Road. Pitched Hipped, gable with verandahs (continuous and separate). Bungalow roof forms with simple generous roof planes and eaves overhangs. Some verandahs continuous with main roof. Some separate bullnose verandahs and return verandah. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls. Beach Street Victorian houses, Federation, Bungalows, Spanish Mission, Austerity. Pitched Hipped, gable with verandahs (continuous and separate). Bungalow roof forms with simple generous roof planes and eaves overhangs. Some verandahs continuous with main roof. Some separate bullnose verandahs and return verandah. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls. Jetty Street Bungalows, cottages, and villas. Some Austerity. Concentration of Tudor homes on Jetty Street (from Charles Sturt Avenue to High Street). Pitched Hipped, gable with verandahs (continuous and separate). Bungalow roof forms with simple generous roof planes and eaves overhangs. Some verandahs continuous with main roof. Some separate bullnose verandahs and return verandah on corner allotments. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls. Grange Esplanade The Marines (State Heritage Place). Grange Hotel (Local Heritage Place). Federation dwellings, bungalows.

Statement#	Statement	
ChSt19		Hipped, gable and louvre roofs. Some verandahs continuous with main roof. Some separate bullnose verandahs and return verandah on corner allotments. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.
	Building height	Grange Road Single storey with ceiling heights at least 3.5m. Beach Street and Jetty Street Single storey with ceiling heights at least 3m. Grange Esplanade The Esplanade: 3 storeys. Along western frontage to Seaview Road: 2 storeys. To the east of Seaview Road: 2 storeys.
	Materials	Grange Road Red brick, painted render and freestone walls. Corrugated sheeting and terracotta tile roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys. Beach Street Red brick and freestone walls. Corrugated sheeting roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels especially Tudor and Bungalow. Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys Curved enclosed verandah form with flat roof. Jetty Street Red brick and freestone walls Corrugated metal sheeting and terracotta tile roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels especially Tudor and Bungalow. Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys. Grange Esplanade Stone and red brick walls. Corrugated iron and terracotta tiled roofs. Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally less ornate painted timber fretwork and posts to verandahs. Brick (sometimes painted) and rendered finish to chimneys.
	Fencing	Grange Road Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. Beach Street Predominantly small masonry retaining walls that border the footpath. Jetty Street Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. Grange Esplanade Variety of fencing styles or remaining unfenced. East of Seaview Road, given the retaining walls in this location, low or no fencing.
	Setting, landscaping, streetscape and public realm features	Grange Road Small, front setbacks relatively consistent. Beach Street Tree lined streets. Large presence of Norfolk Island pines. Vehicle access has been designed and located to preserve existing street trees. Jetty Street Large presence of Norfolk Island pines along Jetty Street. Vehicle access has been designed and located to preserve existing street trees. Grange Esplanade Seaview Road dominated by rendered retaining walls of varying heights between one to two metres. Presence of Norfolk Island pines. Vehicle access has been designed and located to preserve existing street trees.
	Representative Buildings	Identified - refer to SA planning database.
ChSt20	**Hindmarsh Place Historic Area Statement (ChSt20)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860s - 1930s.
	Allotments, subdivision and built form patterns	Uniform small allotments interspersed with larger allotments.
	Architectural styles, detailing and built form features	Single storey attached and detached cottages, row dwellings, former fire station, former Christian Chapel, former municipal hall, former brewery, Victorian churches. Steeply pitched gable and hipped roofs facing the street, with various separate verandah form and saw-tooth design (former brewery). Steeple and bell tower. Some parapet walling.
	Building height	Typically, single storey with ceiling heights at least 3m. Industrial and former church buildings with substantial ceiling and wall heights.

Statement#	Statement	
	Materials	Rendered masonry, red brick, bluestone, limestone and sandstone walls. Decorative brickwork detailing to windows and doors. Corrugated galvanised steel roofing. Painted decorative timber posts and fascia elements.
	Fencing	Substantial rendered masonry with brick capping, and cast iron infill fences and gates.
	Setting, landscaping, streetscape and public realm features	Small setbacks from the street.
	Representative Buildings	Identified - refer to SA planning database.
ChSt21	**Hindmarsh District Centre Historic Area Statement (ChSt21)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s to 1930s.
	Allotments, subdivision and built form patterns	Narrow fronted with deep allotments facing Port Road. Wider allotments to Manton and Milner Street.
	Architectural styles, detailing and built form features	Narrow fronted two-storey built form interspersed with some narrow fronted single storey of intimate scale. Generous verandahs over footpaths, balconies and parapets with some decorative elements including pediments. Some detached single and two storey residential buildings to Orsmond Street. Occasional upper level balconies. Vertically proportioned elements with high solid to void ratio, particularly at upper levels. Substantial church buildings. Decorative parapets to street frontages and returns. Steeply pitched hipped roofs visible behind parapets, with separate, wide verandahs across frontage. Some gable forms including simple cottage form to Milner Street.
	Building height	Single and two-storey built form with ceiling heights that vary from 3m through to substantial church buildings.
	Materials	Limestone, bluestone, sandstone, face red brick walls and rendered walls. Use of brick and rendered quoins. Corrugated galvanised steel roofing. Decorative cast iron posts and balustrades. Painted timber posts and fascia elements.
	Fencing	Built form typically to the street with verandahs over public realm. Some rendered masonry fencing with cast iron infill.
	Setting, landscaping, streetscape and public realm features	Historic heart of the Hindmarsh Village and the principal area for a range of retail, business, ecclesiastic and office uses.
	Representative Buildings	Identified - refer to SA planning database.
ChSt22	**Henley Square Historic Area Statement (ChSt22)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s to 1920s.
	Allotments, subdivision and built form patterns	Traditional patterns of development incorporating verandahs, balconies and parapets clustered around Henley Square.
	Architectural styles, detailing and built form features	Substantial two-storey buildings with wide balconies and verandahs, some over footpaths. Traditional single storey buildings with verandahs over footpaths. Modern development including large expansive verandahs on the square. Decorative parapets to the street and Henley Square facades. Steeply pitched hipped and gable roof forms, with attached balconies and verandahs across frontage. Skillion and curved (bull nose) verandah roof forms.
	Building height	Single and double storey buildings with ceiling heights at least 4.5m per floor giving an imposing character.
	Materials	Bluestone, sandstone, red brick walls and rendered walls. Some corrugated iron walling. Use of brick and rendered quoins, brick banding and other traditional decoration. Imposing masonry pediments and gables with brick banding. Corrugated steel roofing. Decorative cast iron and painted timber verandahs and balconies.
	Fencing	Some low masonry walling. Typically, open shop fronts with verandahs over public realm.
	Setting, landscaping, streetscape and public realm features	Historic heart of Henley Beach and the principal area for a range of retail, business and entertainment uses.
	Representative Buildings	Identified - refer to SA planning database.
	Eighth Street, Bowden Historic Area Statement (ChSt23) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	

Statement#	Statement

ChSt23

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1860s - 1890s.
Allotments, subdivision and built form patterns	Intimate scaled narrow fronted and regular rectangular allotment containing three pairs of semi-detached dwellings and one detached dwelling.
Architectural styles, detailing and built form features	Single storey semi-detached dwellings and detached dwelling. Gable facing the street defining each semi-detached dwelling. Steeply pitched gable roofs facing the street. Skillion verandah roof forms or variable pitch.
Building height	Single storey with ceiling heights around 3m. High solid to void ratio and vertically proportioned openings.
Materials	Rendered masonry walls with attached front verandahs. Brick capping to parapets with some decoration. Corrugated steel roofing.
Fencing	Traditional and some non-original low rendered masonry and timber picket fencing with occasional tubular-steel.
Setting, landscaping, streetscape and public realm features	Small front wall setbacks with verandah forward of front wall.
Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting Clare and Gilbert Valleys

CGV1

Auburn Historic Area Statement (CGV1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Town centre as the original village of Auburn. Buildings constructed in the 19th century.
Allotments, subdivision and built form patterns	Original land division pattern, street layout and setback patterns.
Architectural styles, detailing and built form features	Verandahs.
Building height	1-2 storeys, with 2 storey buildings generally for retail and civic uses.
Materials	[Not stated]
Fencing	Front fences and gates of timber pickets, pier and plinth masonry, wrought iron, brush or masonry not exceeding 1.2m.
Setting, landscaping, streetscape and public realm features	Wide streets and established trees contribute to a village setting.
Representative Buildings	Identified – refer to SA planning database.

Historic Areas affecting Coorong

COOD1

Raukkan Historic Area Statement (CooD1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	A significant meeting place for the Ngarrindjeri people. Community buildings (including the Raukkan Church, community hall and school) are of particular value.
Allotments, subdivision and built form patterns	Allotments of 700 to 800m^2.
Building height	Single storey.
Materials	Stone and corrugated iron roofing.
Setting, landscaping, streetscape and public realm features	Settlement arranged around the green open space defined by Lealinyeri, Seymour and Taplin streets. Wide streets, large grassed verges and buildings constructed to street frontages.
Representative Buildings	[Not identified]

Historic Areas affecting Copper Coast

COCO1

Moonta Mines Buffer Historic Area Statement (CoCo1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Rural.
Allotments and subdivision pattern	[Not stated]
Architectural styles, detailing and built form features	[Not stated]
Building height	[Not stated]
Materials	[Not stated]
Fencing	[Not stated]
Setting, landscaping, streetscape and public realm features	Open rural character that provides a setting for the historic mining features to be read and interpreted.
Representative Buildings	[Not identified]

Residential North Yelta (CoCo2)

Statement#	Statement
COCO2	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Late 19th century and early 20th century.
Allotments, subdivision and built form patterns	[Not stated]
Architectural styles, detailing and built form features	Within North Yelta, miners' cottages of simple design with skillion-roofed lean-to additions at the rear and verandahs to the front.
Building height	[Not stated]
Materials	Rendered stone.
Fencing	[Not stated]
Setting, landscaping, streetscape and public realm features	Within North Yelta, buildings are sited in a linear fashion along Kadina Road, framing the entrance to Moonta.
Representative Buildings	[Not identified]

Cornish Village Historic Area Statement (CoCo3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Late 19th century and early 20th century.
Allotments, subdivision and built form patterns	[Not stated]
Architectural styles, detailing and built form features	The following are of particular value: mine manager's residences south of Newland Terrace; semi-detached dwellings east of Stirling Terrace; rotunda; former Institute Building.
Building height	[Not stated]
Materials	[Not stated]
Fencing	[Not stated]
Setting, landscaping, streetscape and public realm features	Village setting.
Representative Buildings	[Not identified]

Matta Museum Historic Area Statement (CoCo4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Mining.
Allotments, subdivision and built form patterns	[Not stated]
Architectural styles, detailing and built form features	The Matta Mine is of particular value. Rural outbuildings.
Building height	[Not stated]
Materials	[Not stated]
Fencing	[Not stated]
Setting, landscaping, streetscape and public realm features	Open rural character.
Representative Buildings	[Not identified]

Mines Buffer Historic Area Statement (CoCo5)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Rural.
Allotments, subdivision and built form patterns	[Not stated]
Architectural styles, detailing and built form features	[Not stated]
Building height	[Not stated]
Materials	[Not stated]
Fencing	[Not stated]
Setting, landscaping, streetscape and public realm features	Open rural character that provides a setting for the historic mining features to be read and interpreted.
Representative Buildings	[Not identified]

Mines Industry Historic Area Statement (CoCo6)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

Statement#	Statement
COCO6	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Mining and industry. Allotments, subdivision and built form patterns: [Not stated] Architectural styles, detailing and built form features: Industrial artefacts of the Wallaroo Mines, including engine houses, power plants, mines, settling pools and powder magazines, are of particular value. Building height: [Not stated] Materials: [Not stated] Fencing: [Not stated] Setting, landscaping, streetscape and public realm features: [Not stated] Representative Buildings: [Not identified]
COCO7	**Residential Kadina Historic Area Statement (CoCo7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Late 19th and early 20th century. Colonial character. Building height: [Not stated] Materials: [Not stated] Fencing: [Not stated] Setting, landscaping, streetscape and public realm features: [Not stated] Representative Buildings: [Not identified]
COCO8	**Residential Matta Historic Area Statement (CoCo8)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: Late 19th century and early 20th century. Allotments, subdivision and built form patterns: [Not stated] Architectural styles, detailing and built form features: Remnants of miners' dwellings and cottages are of particular value. Building height: [Not stated] Materials: [Not stated] Fencing: [Not stated] Setting, landscaping, streetscape and public realm features: [Not stated] Representative Buildings: [Not identified]
COCO9	**Wallaroo Town Smelter Historic Area Statement (CoCo9)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: 1861-1926. Industry. Allotments, subdivision and built form patterns: [Not stated] Architectural styles, detailing and built form features: The Wallaroo Smelter Site, which includes the Hughes Chimney Stack, Wallaroo Seafarers' Centre (former Smelter's offices), ruins of various structures and slag heaps, are of particular value. Building height: [Not stated] Materials: Brick, stone and concrete. Fencing: [Not stated] Setting, landscaping, streetscape and public realm features: Open character dominated by the Hughes Chimney Stack. Representative Buildings: [Not identified]
	Wallaroo Town Centre Historic Area Statement (CoCo10) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: A civic, commercial and retail mix with a strong relationship to mining, industry and railway.

Statement#	Statement	
COCO10	Allotments and sub-division patterns	Traditional grid with wide streets.
	Architectural styles, detailing and built form features	Miners' cottages. Simple casement windows. Low scale simple gable and hipped roofs. Roof pitches between 25 and 40 degrees. Verandahs overhanging footpath on Owen Terrace. Traditional railway architecture. The former Wallaroo Train station is of particular value.
	Building height	Single storey residential and retail buildings. Two storey civic buildings (Wallaroo Town Hall).
	Materials	Local stone, limestone, masonry and corrugated iron.
	Fencing	Low, open fencing.
	Setting, landscaping, streetscape and public realm features	Consistent front setbacks and a strong building line with little interruption. Landscaping forward of buildings.
	Representative Buildings	[Not identified]

Moonta Town Centre Historic Area Statement (CoCo11)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

COCO11	Eras, themes and context	19th century historic main street with a mix of civic, commercial and retail activities.
	Allotments, subdivision and built form patterns	Traditional grid.
	Architectural styles, detailing and built form features	Two-storey stone buildings exhibiting refined detailing, ornate roof elements and a high-level of craftsmanship are of particular value. Extensive glazing and double-hung doors and windows in street facing frontages of non-residential buildings. Windows emphasised by framing. Symmetrical fronted and vertically proportioned dwellings. Hipped roof forms with pitches between 30-45 degrees. Sloping verandahs overhang footpaths to the street and are connected to shops.
	Building height	Predominantly single storey where residential or retail. Two storeys associated with grand, civic or commercial activities (town hall, hotels).
	Materials	Local stone, masonry, corrugated iron roofing, stone and timber-framed windows and doors, timber verandah posts and brick chimneys.
	Fencing	Timber and stone fences not exceeding 1.2m.
	Setting, landscaping, streetscape and public realm features	Wide streets, a prominent central public square framed by significant public buildings and limited landscaping. Buildings square to and on street alignments. Minimal breaks between buildings except where access to the rear of a site is provided. Dwellings are consistently set back further from the street.
	Representative Buildings	[Not identified]

Historic Areas affecting The Flinders Ranges Council

Quorn Historic Area Statement (FlRa1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

FLRA1	Eras, themes and context	Turn of the 19th century. Civic, commercial and retail. Railway.
	Allotments, subdivision and built form patterns	Traditional grid.
	Architectural styles, detailing and built form features	Villas and double fronted cottages. Railway buildings and railway architecture. Verandahs provided over footpaths. Heritage-style signage.
	Building height	Single storey. Two storeys associated with grand, civic or commercial activities.
	Materials	Local stone, masonry and corrugated iron.
	Fencing	Open fencing no more than 1.2m.
	Setting, landscaping, streetscape and public realm features	Buildings square to and on the street alignment. Buildings not on street alignment surrounded by gardens/landscaping. Minimal breaks between buildings other than where there has been an existing access to the rear of the site. Wide streets and verges, grassed median strips and tree lined streets.
	Representative Buildings	[Not identified]

Historic Areas affecting Town of Gawler

Gawler East Historic Area Statement (Ga1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Ga1	Eras, themes and context	1850-1940; residential and local scale retail.
	Allotments, subdivision and built form patterns	The Area is divided into two sections by Lyndoch Road. Large allotments with large dwellings and gardens exist along High Street and Duffield Street. Smaller allotments exist along Lyndoch Road. Traditional grid north of Lyndoch Road. Allotments typically are of consistent width and depth, rectangular in shape orthogonal to the street layout apart from some dwellings facing Lyndoch Road on the north side, which have an angled front boundary. The pattern of streets stem from orthogonal junctions with Lyndoch Road and rising ground.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century Villas/Mansions. Nineteenth century double fronted symmetrical cottages; parapet end gables a feature. Bungalows with some Inter War. Roof pitches in the order of 27 degrees and 35 degrees. Stone walls and stone outbuildings. Steeply pitched hipped and simple gable roofs of small and large scale. Large roofs typically gambrel in form with additional central gables and villa style projecting gable. Smaller early roof forms with ridge parallel to the street. Separate, generous verandahs to the street of bullnose, straight and concave form. Some return verandahs and some central entrance gable. Some verandahs continuous with main roof. Shallower pitched bungalow roof forms with simple generous roof planes and overhangs. Wide bungalow style verandahs with masonry supports and low plinth walls.
	Materials	Sandstone/Limestone with red brick quoins. Ornate render. Corrugated profile roofing. Vertically proportioned painted timber window frames and doors. Painted timber cover battens. Decorative brick, stone or rendered chimneys. Cast iron decoration and painted timber detailing to verandahs.
	Building height	Single storey forms generally influenced by site topography. Buildings on low side of streets appear as single storey with double level to rear, particularly in north west of area. Buildings on high side of street appear as double storey or elevated single storey with verandahs occurring on high plinth and central access steps.
	Fencing	Low open style fencing which includes masonry pier and plinth fence with decorative open infill. Low masonry walls up to 1.2 metres. Timber picket fences. Hedges. Stone walls on front boundaries are important features.

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	Important entrance to Gawler from east with significant north to south connecting streets such as Duffield and East. Unique angled street layout north of Lyndoch Road with Edith and Blanch Street connected by Short Street. North western edge defined by Railway Line. A portion of the west side faces Pioneer Park; some small scale mixed use to Union Street. North to south streets generally run with contours of land with high and low side. Generous front and side setbacks. Landscaped setting derived from generous gardens with substantial trees and wide tree-lined streets. Surfaces consistent with the footpaths and streets. Views to and from the area.
	Representative Buildings	Identified - refer to SA planning database.
Ga2	**Gawler South Historic Area Statement (Ga2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860 to 1950 including bungalows and Austerity.
	Allotments, subdivision and built form patterns	Generous allotments typically on flat land with some variations in topography towards Dead Man's Pass and river. Grid pattern intersected by Twelfth Street that shifts direction at Adelaide Road. Oblique street intersections and prominent irregular corner allotments as follows: Unique and variable Street pattern defined by Railway line, Adelaide Road, Racecourse, Gawler River and Town Centre. Eighteenth to twenty second street run east to west. First, Second and Fourth Streets run parallel with the northern Adelaide Road and join with Adelaide Road at an angle. Fifth, Seventh, Third and Sixth Streets connect to each side of Adelaide Road. Thirteenth, Fourteenth and Fifteenth Street and Eighth Streets angled to River. Smaller allotments to Ninth and Tenth Streets. Gawler Terrace defined by Dead Man's Pass.
	Architectural styles, detailing and built form features	Detached double-fronted villas. Semi-detached and row cottages. Some Federation and Bungalow style dwellings. Some Inter War and Austerity. Verandahs and parapets. Substantial stone or masonry villas surrounded by generous gardens and landscaping. Traditional railway structures associated with the Gawler Railway Station including workshops, stores and industrial buildings and small. Roof pitches in the order of 27 degrees and 35 degrees. 'M' Roof form and gambrel roof found in 13th and 14th street vicinity. Gambrel roof forms to villas. Simple, small span cottage style roofs generally evident. Parapets to cottages. Separate verandahs including but not limited to generous sweeping concave style. Some verandahs continuous with main roof.
	Building Height	Single storey with some elevated housing in Eighth Street and Gawler Terrace, featuring substantial setbacks and elevated verandahs. Wall heights in the order of 3.6 metres above floor level.
	Materials	Stone and limestone walling with red brick quoins. Some bluestone. Corrugated iron roof sheeting to verandahs and roofs. Red brick or render chimneys. Ornate brick detailing to gables and gable vents. Cast iron lacework to verandahs; typically simple timber details. Painted timber window frames, doors, roof trim and modest decorative treatments such as finials.
	Fencing	Low masonry walling. Low open style fencing which includes masonry pier and plinth fence with decorative open sections of up to 1.2 metres in total height. Painted timber picket fencing. Some woven wire fencing with painted timber posts.
	Setting, landscaping, streetscape and public realm features	Detached dwellings on generous wide and deep allotments. Generous front and side setbacks. Some early cottages with very substantial setbacks. The strong visual axis to the Railway Station buildings provided by Nineteenth Street. Boulevard style and character of Nineteenth Street derived from buildings positioned close to and square to the road frontage and designed to directly address the street. Corner sites where the grid is interrupted accommodating prominent buildings whose built form and side elevations are of equal importance to the façade. Established gardens with substantial front and side setbacks. Wide tree lined streets particularly Eighteenth Street, which incorporates gravel verges and remnant bluestone/slate kerbing to define bitumen. Night Cart lanes alignment and widths.
	Representative Buildings	Identified - refer to SA planning database.
Ga3	**Light Historic Area Statement (Ga3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Residential, commercial, public and ecclesiastical buildings developed predominantly between 1850 to 1940, with some later Federation and Bungalows (Jerningham Street).
	Allotments, subdivision and built form patterns	Allotments, streets, squares and other elements which comprise the original 1839 grid layout of Light, Finniss and Co. Large allotments of original plan, with some limited subdivision generally on the perimeter of the State Heritage Area.
	Architectural styles, detailing and built form features	Simple symmetrical double fronted cottages and villas surrounding the Church Hill State Heritage Area. Early small cottages and more substantial dwellings that retain simple symmetrical features, with vertically proportioned window openings and doors. Some parapet walling to early cottages. Roof pitches in the order of 27 degrees to 35 degrees. Variety of roof forms including simple small span gable and hipped to early cottages; 'M' roof forms; villa with typical projecting gable; larger span and higher Gambrel roof. Separate verandah forms with bullnose, straight pitch and concave verandahs of generous width. Some verandahs continuous with main roof.
	Building Height	Single storey facing street with double storey to rear due to escarpment. External wall heights to frontage and sides in the order of 3.6 metres.
	Materials	Bluestone, sandstone and limestone external walling with typically red brick trim and features including quoins and plinth. Some external front and side walling entirely in red brick. Corrugated iron roofing generally with roof tiling rarely found on older buildings and only on more recent buildings. Prominent chimneys in brick, stone or render finish. Some elaborate brick detailing to gable vents and parapets.
	Fencing	Low masonry front walls. Significant stone retaining walls to edge of Church Hill escarpment. Low open style fencing which includes masonry pier and plinth fence with decorative open sections, painted timber picket and woven wire. Stone walls and retaining walls are important features.
	Setting, landscaping, streetscape and public realm features	Subdivision retains planning undertaken by Light, Finniss and Co in 1839. Low lying areas that rise from surrounding rivers to Church Hill State Heritage Area. King Street is located on a ridge so dwellings on both sides appear as single story to the street with double storey to rear. Wide streets with slate kerbs and substantial trees. Gardens in scale with the buildings and large allotments. Front setbacks to streets such as King, Queen, Howard and Cameron Streets outside of Church Hill State Heritage Area have lesser front setbacks and generous side setbacks; notable exception is Jerningham Street that exhibits generous setbacks.
	Representative Buildings	Identified - refer to SA planning database.
Ga4	**Mixed Use Historic Area Statement (Ga4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1848 to 1940. Early Victorian through to Bungalow style. Intimate frontage commercial and retail with early to more recent residential in prominent locations. Substantial rear stone outbuildings and stone walling sometimes sharing a central dividing wall. Changing land use from early residential buildings to commercial uses, with minimal alteration to remnant residential character. Some prominent dwellings that retain a substantial land holding and visual prominence in the overall historic streetscape and main street appearance.
	Allotments, subdivision and built form patterns	Variable allotment sizes in a main street setting ranging from long and relatively narrow through to large. Area includes the important forked junction of Main North Road and Redbanks Road and the angled allotments that result from the road pattern. Rising ground from the Willaston Bridge northwards. The topography and physical limits of river, bridge and major road junction to the north retain the Willaston Township as a distinct and identifiable size.
	Architectural styles, detailing and built form features	Several wide shop and row shop frontages with front verandahs over footpath. Small scale shops with parapet walling above shopfront and separate verandahs, either over footpath or close to street frontage. Large dwellings with small to generous setbacks from street frontage, with separate concave, simple monopitch and bull nose verandahs. Early symmetrical cottages, generally elevated from the street frontage with minimal to generous setbacks, parapet end walls and small span simple gable roof forms with parapet ends. Traditional stone outbuildings and remnant walling at the rear or side of sites. Variety of roof forms ranging from simple small span gable through to longer span hipped gambrel and 'M' Roofs with some villa styles. Separate verandah forms with bull nose, simple pitch and concave.
	Building height	Single storey typically apart from the Willaston Hotel. Wall heights generally up to 3.5 to 4m on elevated sites.
	Materials	Stone external walls with brick quoins and some ornate render detail. Painted timber supports to verandahs with modest decorated timber treatments. Stone, brick and render chimneys.
	Fencing	Low to medium height masonry walling some of which are retaining walls. Some open timber picket or rural style fencing.
	Setting, landscaping, streetscape and public realm features	Definition of the main street achieved through stone walling to front boundaries, verandahs close to and over front boundaries, and shop fronts. Buildings and allotments typically orthogonal to main street. Strong sense of arrival in defined separate village from Gawler achieved through rising land, road junctions, river and bridge.
	Representative Buildings	Identified - refer to SA planning database.
	Redbanks Road, Willaston Historic Area Statement (Ga5) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and	1850 to 1940. Residential.

Statement#	Statement	
Ga5	context	
	Allotments, subdivision and built form patterns	Redbanks Road is on rising ground to the north west. Large allotments with greater width mainly to the lower side and narrower allotments to the high side. Allotment shapes and dwelling placement suit rising ground. Allotments are generally orthogonal to Redbanks Road resulting in a unique north west orientation for allotments.
	Architectural styles, detailing and built form features	Victorian and turn-of-the-century villas and double fronted cottages with some small and substantial bungalow style. Typically larger span (front 4 rooms) hipped roof with gambrel. Some simple gable roof forms and 'M' roofs with ridge parallel to the street. Variety of separate verandahs including bullnose, double curve, concave and straight mono pitch. Roof pitch typically steep (27 to 35 degrees) with some shallower bungalow style roofs.
	Building height	Single storey with wall heights in the order of 3.6m. Roof pitches in the order of 27 degrees to 35 degrees.
	Materials	Sandstone and limestone external walls of modest detail Corrugated iron roof sheeting. Painted timber window frames and doors, verandah posts and roof trim with modest embellishment. Red brick or rendered masonry chimneys.
	Fencing	Low stone walls and other open style fencing which includes woven wire with timber posts, picket and masonry pier and plinth fence with decorative open sections of up to 1.2 metres in total height. Stone walls and retaining walls due to rising ground.
	Setting, landscaping, streetscape and public realm features	Redbanks Road defined by walling and fending to street boundary with substantial gardens and street trees on the low (southern) side. Dwellings typically set back substantially from street frontage with generous spaces between Princess Park provides angled open space at angled junction of Redbanks Road with Princess Street. Slate kerbs.
	Representative Buildings	Identified - refer to SA planning database.
Ga6	**Special Uses Historic Area Statement (Ga6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850 to 1910.
	Allotments, subdivision and built form patterns	Open space surrounded by grid layout adapted to the topography of the rising ground and confluence of rivers and railway line.
	Architectural styles, detailing and built form features	Some historic structures such as Gasworks, monuments, railway, showgrounds and bridges. Some more recent structures including recreation centre and smaller clubroom buildings associated with courts and pool. Gasworks has distinctive curved roof.
	Building height	Approximately 6 metres for larger structures.
	Materials	Sandstone and limestone external walls of modest detail. Corrugated iron roof sheeting. Bridge of steel and cast iron.
	Fencing	Typically no fencing or open fencing. Some solid metal fencing to Railway line at Showgrounds.
	Setting, landscaping, streetscape and public realm features	The topography and natural features of the locality including the path of the North and South Para Rivers. Public squares around the churches; terraces and parklands bordering the rivers.
	Representative Buildings	Identified - refer to SA planning database.
Ga7	**Town Centre Gawler South Historic Area Statement (Ga7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860 to 1910. Important residential area at change in direction of Adelaide Road from north to north east, interspersed with smaller shops that herald the southern entrance to Gawler with historic monument, park and church and former hall to each sides and former Council offices at Twelfth Street. Recent developments include the change of use for commercial or consulting purpose typically without alteration to the residential character.
	Allotments, subdivision and built form patterns	Wide and deep allotments orthogonal to Adelaide Road. Rear lane to south east side parallel to Adelaide Road typically used to access rear car parking areas.
	Architectural styles, detailing and built form features	Victorian and turn-of-the-century detached and semi-detached villas and double fronted cottages. Some semi-detached dwellings and detached villas incorporate distinctive ornate render and brick detailing to gables and verandahs. Other semi-detached dwellings, cottages and detached vials incorporate modest detailing. Few intrusive modern infill buildings. Semi-detached residential buildings with short span hipped or gable roof forms and rear lean-to roofs; ridge typically parallel to Adelaide Road with many projecting gables as paired bookends to each building. Larger span (front 4 rooms) hipped roof with gambrel or 'M' roof with ridge parallel to the street. Variety of separate verandahs including bullnose, double curve, concave and straight mono pitch. Roof pitch typically steep (27 to 35 degrees).
	Building height	Single storey with wall heights in the order of 3.5-4.0 metres.
	Materials	Sandstone and bluestone external walls. Red brick quoins, parapets, vents and parapets. Some decorative render. Painted timber window frames and doors. Chimneys in brick or render.
	Fencing	Low stone or rendered masonry walling. Open style fencing with masonry pier and plinth fence with decorative open sections of up to 1.2 metres in total height.
	Setting, landscaping, streetscape and public realm features	Generous front garden settings set behind low masonry walling with substantial trees and wide tree-lined streets. Slate kerbs. Car parking is generally to the rear.
	Representative Buildings	Identified - refer to SA planning database.
Ga8	**Town Centre Light Historic Area Statement (Ga8)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Planning undertaken by Light, Finniss and Co in 1839. Historic civic and commercial heart of Gawler.
	Allotments, subdivision and built form patterns	Long relatively narrow allotments that span between Murray Street and High Street to the east and Julian Terrace to the west (south of Walker Place). Intersection with streets, squares and other elements which comprise the original 1839 grid layout of Light, Finniss and Co. Linear form that is positioned on a strong north/south axis with rising ground from south to the north. Area defined by the angled Adelaide Road entrance and junction with Murray Street, Gawler Mill and bridge on the south and angled road junctions with Lyndoch Road and Cowan Street to the north, the eastern escarpment and the river (Julian Terrace and avenue of Moreton Bay Figs). Area includes Gawler Central Railway Station precinct on the north side and Murray Street south of Bridge Street towards Dead Man's Pass. Pioneer Park and McKinlay's Monument mark the Cowan Street junction.
	Architectural styles, detailing and built form features	Substantial and ornate single and double storey buildings that demonstrate the importance of Gawler in the development of South Australia including civic and bank buildings, former church, hotels, former industrial buildings, terraces of shops, ground floor shop fronts and residential use above. Buildings constructed to the Murray Street frontage, some with generous verandahs and/or balconies to first floor over the footpath. Mostly narrow shopfronts contrasted by Essex House that demonstrates a rare consolidated wider shopfront to a single storey parapeted shop front. Hipped and gable roof forms, some with gambrel typically set behind parapet with some exceptions which feature eaves with ornate corbel supports. Ridges generally run perpendicular to main street with some exceptions.
	Building Height	Two storey up to 8-10 metres.
	Materials	External walls of bluestone, sandstone or render with brick or rendered parapets. Painted timber or cast iron verandah supports. Painted timber shopfronts and window frames. Brick and render or stone chimneys. Corrugated iron roofing and some terracotta tile.
	Fencing	Some low front walling to former Baptist Church. Masonry walls with cast iron to bank buildings and Rudall and Rudall. Cast iron to ANZ bank building.
	Setting, landscaping, streetscape and public realm features	Buildings generally constructed to street frontage with verandahs over footpath. Some exceptions include former Baptist Church and bank buildings set behind front walling. The topography and natural features of the locality including the rising ground at Church Hill and Gawler East (which flank either side of the Town Centre) and the form of the North and South Para Rivers and their confluence. The public squares around the churches and the terraces and parklands bordering the rivers. Views of the Gawler East escarpment from Bridge Street South.
	Representative	Identified - refer to SA planning database.

Ga9	**Willaston Historic Area Statement (Ga9)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1848 to 1900. Residential with some former ecclesiastical use and form.
	Allotments, subdivision and built form patterns	Generous allotments typically orthogonal to the street with distinctive variation due to the number of angled intersecting streets. Recent residential infill development.
	Architectural styles, detailing and built form features	Detached villas and double fronted cottages with rare semi-detached. Roof pitches in the order of 27 degrees to 35 degrees. Simple gable roof with parapet ends to semi-detached; 'M' Roof and hipped roof with gambrel.
	Building Height	Single storey with wall heights in the order of 3 to 3.6 metres.
	Fencing	Low open style painted timber picket and wire fencing. Stone walls to lower land.
	Materials	Typically sandstone, limestone with brick trim and modest decoration. Painted timber window frames and doors verandah posts and roof trim. Brick, render or stone chimneys.
	Setting, landscaping, streetscape and public realm features	Landscaped setting derived from wide streets at a variety of angled intersections, substantial trees and expansive allotments. Slate kerbs.
	Representative Buildings	Identified - refer to SA planning database.
Historic Areas affecting City of Holdfast Bay		
HoB1	**Glenelg Village Historic Area Statement (HoB1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s-1860s. 1870s - 1900s. 1910s - 1930s. Subdivision in 1839. Growth period in 1920s associated with increase in holidaymaking and leisure pursuits.
	Allotments, subdivision and built form patterns	Orderly street layout, centred around the St Peters Anglican Church in Torrens Square. Grid pattern of large allotments. Subject to further land division over time but legibility of original pattern remains. Consistent small front setbacks. Small side setbacks.
	Architectural styles, detailing and built form features	Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Inter-War buildings, mostly Bungalows. Low scale to medium, relatively small dimensions and basic building details. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Predominantly single storey but some two storey.
	Materials	Consistent with the materials used in the 1840s to 1930s period. Bluestone, sandstone, walls (unpainted). Some brick. Brick or rendered quoin work and plinths. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.
	Setting, landscaping, streetscape and public realm features	Well established streetscape character, with clearly defined setbacks and uniform front landscaping. Substantial Norfolk Island Pines along Augusta Street and Fig trees at Torrens Square. Vistas toward St Peters Anglican Church from Augusta and Nile Streets.
	Representative Buildings	Identified - refer to SA planning database.
	Maturin Road Historic Area Statement (HoB2) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to	

Statement#	Statement
HoB2	the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. **Eras, themes and context** 1920s or 30s. **Allotments, subdivision and built form patterns** Original subdivision of The Olives and Bromley. Allotments on southwest end were subdivided in 1886 and 1912. Mixed allotment sizes with large frontages. Substantial building setbacks. Large front setbacks. Side setbacks provide visual spacing between dwellings. **Architectural styles, detailing and built form features** Typical 1890s to early 20th Century dwellings. Victorian dwellings. Inter-War dwelling styles including Bungalow, Tudor, Art Deco and Mediterranean. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. **Building height** Single storey and two storey (some in-roof or partly in-roof). **Materials** Consistent with the materials used in the 1880s to 1930s period. Sandstone, red brick, rendered facades. Corrugated iron and terracotta tiled roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables. **Fencing** Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings. **Setting, landscaping, streetscape and public realm features** Narrow street. Well-established garden settings. Lack of street planting due to the narrow width of Maturin Road. The Olives is a significant State Heritage Place on Olive Street. **Representative Buildings** Identified - refer to SA planning database.
HoB3	**Da Costa Park Historic Area Statement (HoB3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. **Eras, themes and context** 1923 subdivision. 1920s - 1930s dwellings. **Allotments, subdivision and built form patterns** Subdivision is indicative of 1920s town planning with angled, diagonal streets centred radially around a central park or reserve. Garden city theory in practice. The pattern of the subdivision and the arrangement and size of individual allotments remains largely unaltered. Large allotments with large frontages. Consistent, large front setbacks. Side setbacks provide visual spacing between dwellings. **Architectural styles, detailing and built form features** Inter-War style dwellings including Tudor Revival, Californian bungalow, Art Deco, and some Spanish mission. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees. Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. **Building height** Single storey. **Materials** Consistent with the materials used in the 1920s to 1930s period. Terracotta tiled and corrugated iron roofing.

Statement#		Statement
		Brick, sandstone, and stucco and part-rendered finishes. Roofing, facades and fenestration in natural red brick and terracotta colouration. Timber joinery including fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Woven wire. Low masonry with geometric steel. Low masonry (stepped). Low masonry fencing (often stepped). Low Rock face sandstone. Hedging.
	Setting, landscaping, streetscape and public realm features	Centred around Da Costa Park, with its triangular landscaped area and mature trees. Relatively wide streets.
	Representative Buildings	Identified - refer to SA planning database.
HoB4	**New Glenelg Historic Area Statement (HoB4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Subdivided in 1850. Buildings 1860s - 1900s and 1920s - 1930s. Most intense development occurred in 1870s and 1880s. Further development in 1920s - 1930s (Interwar period).
	Allotments, subdivision and built form patterns	Varying allotment sizes and street width. Larger allotment sizes in some areas to the west along Broadway, Robert Street and South Esplanade. Smaller allotment sizes are predominant throughout the Bath Street area, and between Hastings and Moseley Streets. Uniform, large allotment sizes and large frontages along Penzance and Partridge Streets. Front setbacks vary from street to street across the area. Front setbacks are however consistent along individual streetscapes. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	All domestic architectural types from the 1870s to 1880s, from the largest of seaside mansions (e.g. South Esplanade) to the humblest of workers cottages (e.g. John Street). Late Victorian to early 20th Century Period architecture. Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing. Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings. Inter-War buildings, mostly Bungalows. Many dwellings without vehicle garaging. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Concave, bullnose and straight-pitched verandahs. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Predominantly single storey.
	Materials	Consistent with the materials used in the 1840s to 1920s period. Sandstone, bluestone and brick. Corrugated iron and tiled roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.
	Setting, landscaping, streetscape and public realm features	Norfolk Island pines throughout. Mature oak street trees along Moseley Street. Vistas over the ocean to the west of the Historic Area.
	Representative Buildings	Identified - refer to SA planning database.
Historic Areas affecting Kangaroo Island		
KI1	**Penneshaw Historic Area Statement (KI1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. Historic Areas affecting Light Regional Council

Lig1

Daveyston Historic Area Statement (Lig1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Early development C1850's in support of mining and trade and later development (C1870's) in support of agricultural pursuits.
Allotments, subdivision and built form patterns	Large allotments characteristic of their rural setting and focused along the Old Sturt Highway.
Architectural styles, detailing and built form features	A mix of both large and smaller homes of typical construction representing a range of periods.
Building height	Single storey built scale to the streetscape.
Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape.
Fencing	Low, open fencing reflective of the architectural style of the subject building.
Setting, landscaping, streetscape and public realm features	Rural setting with the presence of large mature trees and minimal front boundary setback commensurate to the undulating nature of the township.
Representative Buildings	Identified - refer to SA planning database.

Lig2

Freeling Historic Area Statement (Lig2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Mixed era and style of development comprising early buildings dating from 1880's - 1920's aligned with early farming settlement and the townships reliance on the railway and later grand villas (C1910).
Allotments, subdivision and built form patterns	Conventional land division pattern with a mix of allotment sizes.
Architectural styles, detailing and built form features	A mix of building types including stately and modest villas, single and double fronted cottages, interwar bungalows, galvanised iron homes, and symmetrical cottages representing a range of periods. Numerous prominent church buildings used for a range of worship and residential purposes.
Building height	Single storey built scale to the streetscape.
Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape.
Fencing	Low, open fencing reflective of the architectural style of the subject building.
Setting, landscaping, streetscape and public realm features	Wide streets and expansive allotments, generous siting characteristics and substantial gardens and trees. Areas of narrow streets and laneways and compact allotment layout.
Representative Buildings	Identified - refer to SA planning database.

Lig3

Greenock Historic Area Statement (Lig3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Early development dating from C1847 onwards and predominance of masonry residential structures.
Allotments, subdivision and built form patterns	Mixed allotment sizes with a dominance of deep allotments.
Architectural styles, detailing and built form features	A mix of building types with a predominance of stone residential structures however presence of other types including corrugated iron.
Building height	Single storey built scale to the streetscape.
Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape.
Fencing	Low, open fencing reflective of the architectural style of the subject building.
Setting, landscaping, streetscape and public realm features	Areas of wide streets and narrow laneways adding to the village feel and focused around the Greenock Creek.
Representative Buildings	Identified - refer to SA planning database.

Kapunda Historic Area Statement (Lig4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Mixed style commensurate to the formation of Kapunda from the 1840's onwards and reflective of the era of influence. Dominance of the Main Street and strong architectural elements.
Allotments, subdivision and built form patterns	Conventional grid land division pattern with a mix of allotment sizes. Within the Main Street/town centre, consistent setbacks and strong building line with little interruption.
Architectural styles, detailing and built	Main Street

Statement#	Statement	
Lig4	form features	Distinctive built form with two storey dominance. Strong presence of civic buildings on or within proximity of Main Street (Hill Street). Strong front boundary building line. Verandahs and parapet walls. Residential Stately houses with gardens or open space surrounding the buildings to the eastern end of High Street and South Terrace. Small modest cottages in proximity of the Historic Mine Site. Relatively high-density row cottages in the oldest part of Kapunda (e.g. Mildred Street and Tod Street). Other stately civic buildings in the form of the Kapunda Primary School and Kapunda High School.
	Building height	Main Street Two storey built scale commensurate of the streetscape. Residential Single storey built scale to the streetscape.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape.
	Fencing	Low, open fencing reflective of the architectural style of the subject building.
	Setting, landscaping, streetscape and public realm features	Areas of wide streets and expansive allotments and substantial gardens and trees. Areas of narrow streets and compact allotment layout.
	Representative Buildings	Identified - refer to SA planning database.

Wasleys Historic Area Statement (Lig5)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Lig5		
	Eras, themes and context	1870's to 1880's dwellings with later development dating from the 1920's and 1930's and the dominance of the railway.
	Allotments, subdivision and built form patterns	Large conventional land division pattern with a mix of allotment sizes.
	Architectural styles, detailing and built form features	A mix of building types including small villas and cottages representing a range of periods.
	Building height	Single storey built scale to the streetscape.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape.
	Fencing	Low, open fencing reflective of the architectural style of the subject building.
	Setting, landscaping, streetscape and public realm features	Areas of wide streets and expansive allotments with established street trees.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Marion

Worthing Mine Historic Area Statement (Mar1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Mar1		
	Eras, themes and context	1850/51. Structures and workings associated with Worthing Mine site.
	Allotments, subdivision and built form patterns	Sited in the steep valley of the Field River.
	Architectural styles, detailing and built form features	Mine, Chimney and Pump House/Engine House associated with copper mining (oldest surviving Cornish Engine House in Australia).
	Building height	*[Not stated]*
	Materials	Random rubble with timber lintels.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Sited in the steep valley of the Field River amongst undulating grassland. Recent housing development is located to the north, west and east of the site (200m plus in distance). Views to the Worthing Mine are available from parts of the adjacent residential areas.
	Representative Buildings	*[Not identified]*

Historic Areas affecting City of Mitcham

Residential (Central Plains) Historic Area Statement (Mit1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

	Eras, themes and context	Early 20th century dwellings.
	Allotments, subdivision and built form patterns	Substantial rectangular blocks. Substantial consistently wide and deep rectangular blocks that retains the historic pattern of land division. Consistent generous spacing between dwellings.

Statement#		Statement
Mit1	Architectural styles, detailing and built form features	Predominance of Queen Anne style villas and bungalow style dwellings. A number of early villas. Steeply pitched hipped and gable roof forms including smaller scale corner gable to return verandah villas. Separate typically bull nose verandah with some a continuation of the main roof form. Return verandahs particularly at corner allotments. Bungalows with slightly shallower roof pitch, simple generous roof plane facing the street with main ridge typically parallel to street. Wide Bungalow verandahs with tapered or upright masonry support piers and low infill walling. Timber framed and iron clad awnings to windows. Tudor roof forms generally steeper with two main projecting gables and smaller gable porch over main entrance.
	Building height	Predominately single storey with external wall height of 3-3.5 metres. Second storey development located within the roof space or to rear of dwellings.
	Materials	Original materials, finishes and profiles of building elements. External walls of sandstone, rendered masonry, face brick Decorative wall treatments such as rendered, or brick quoins and low plinths defined by cant brick set out. Painted timber cover battens to gables and roof trim. Painted decorative timber to verandahs and finials to gables. Verandahs supported on timber posts with some on painted masonry pillars. Roofs of corrugated galvanised iron cladding or terracotta tiles. Original unpainted plaster, brickwork, stonework or other masonry preserved unpainted. Decorated face brick or rendered masonry chimneys. Painted metal gutters to D or OG profile and round painted metal downpipes. Painted timber window frames and doors.
	Fencing	Typically fences reflect the era of the dwelling. Low masonry plinth and post, wrought iron, brush, timber woven with wire, painted timber picket. Height of 1.2m. Rear and side boundary fences located behind the front dwelling alignment 1.8m in height in corrugated profile metal.
	Setting, landscaping, streetscape and public realm features	Regularly planted tree lined verges. Established front gardens. Consistent setback of buildings.
	Representative Buildings	Identified - refer to SA planning database.
Mit2	**Adey Road Historic Area Statement (Mit2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1879 subdivision with predominance of buildings built between 1881-1920.
	Allotments, subdivision and built form patterns	Traditional pattern and scale of low density, rectangular allotments associated with the original subdivision for the purpose of detached dwellings. Variable width to allotments. East side is orthogonal to Adey Road. West side has angled side boundaries to Adey Road.
	Architectural styles, detailing and built form features	Detached dwellings of simple, modest, small scale with symmetrical early stone and brick villas. Victorian Regency and Edwardian to smaller and later bungalows. Gambrel roof typically with short ridge parallel to street, with projecting gable. Simple 'M' Roof with ridge parallel to street. Federation style verandahs continuous with main roof. Separate verandahs attached to main wall of varying profiles. Some bungalow influence roof forms and verandahs with masonry support piers and low plinth wall.
	Building height	Predominantly single storey with external wall height of 3 - 3.5 metres. Second storey development located within the roof space or to rear of dwellings behind ridgeline of roof. Second storey windows with total length less than 30 percent of total roof length along each elevation.
	Materials	Original materials, finishes and profiles of building elements. External walls incorporating sandstone, red brick, render. Roof in corrugated metal cladding. Render with some ornate detail to window surrounds. Simple painted timber detail and roof trim. Painted timber window frames and doors. Simple and modestly detailed timber posts to verandah. Red brick or render chimneys, some tapered in height with some ornate detailing. Some ornate painted timber barge boards and finials. Most original unpainted plaster, brickwork, stonework or other masonry is preserved unpainted.
	Fencing	Low and/or open fencing, typically in the form of hedges, woven wire, timber picket or low stone walls reflecting and the traditional period, style and form of the associated building. Generally, no more than 1.2m in height. Rear and side boundary fences located behind the front dwelling alignment no more than 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Minimal driveway widths with established front gardens dominant, including mature vegetation. Sense of space between buildings. Sloping land with minimal alteration to the land form. Bowling Club provides focal point and sense of Place. Traditional dwelling pattern located parallel to front boundaries.
	Representative Buildings	*[Not identified]*
	Belair Village Historic Area Statement (Mit3) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>Mit3</td><td>
These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

<table>
<tr><td>Eras, themes and context</td><td>1880-1900 (built form) original township of Belair developed around the railway. Village / residential character with an evident railway theme and rural character and the development of an old township.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Historic land division pattern, demonstrating a diverse array of allotments of varying sizes and shapes resulting from the change to rural character brought about through the introduction of the railway.

A diverse mix of residential, education and commercial buildings with a cohesive style and generous setting.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Mix of development including, churches, school, local shop, and concrete water tower. Clusters of substantial villas (4-6 rooms) with return verandahs to both sides of Sheoak Road.

Long linear buildings constructed along the Sheoak Road ridge and generally oriented facing Sheoak Road, resulting in a variable but cohesive pattern of buildings.

Traditional steeply pitched hipped and gabled roof forms and some projecting gables, typical of the Victorian era.

Ridges tend to be parallel to the street.

Separate verandahs of bullnose, straight monopitch or concave profile supported on painted timber posts.</td></tr>
<tr><td>Building height</td><td>Predominantly single storey with generally substantial external wall height up to 3.5 metres.</td></tr>
<tr><td>Materials</td><td>Original or otherwise complementary materials, colours and finishes, including stone, rendered masonry, face brick, corrugated iron and timber board.

Original verandah detailing including paving, posts and decoration.

External walls of sandstone or limestone.

Red brick quoins.

Corrugated sheet roofing in painted or galvanised finish.

Vertically proportioned painted timber window and door frames.

Decorative brick and rendered chimneys.</td></tr>
<tr><td>Fencing</td><td>Open rural style fencing using timber posts with draw wire.

Hedges define property boundaries.

Front fences and gates that reflect the traditional period, style and form of the associated building.

Open rural style Front fences and gates that are a maximum of 1.2 metres in height to a maximum of 1.5 metres if wrought iron, brush, timber and/or wire or woven mesh style.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Village character with an evident railway theme and historic Residential character.

Historic views of open railway side in a treed setting.

The Village area retains much of its original character and integrity, with a railway theme evident in various places of state heritage, local heritage and other buildings of historic character.

There are many prominent intact historic buildings and features within it and the streetscapes, townscapes and landscapes created by these historic features.

Central bitumen roadway with gravel verge and no kerb or guttering Street trees to Sheoak Road.

Gravel driveway entrances to properties.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>
</table>
</td></tr>
<tr><td>Mit4</td><td>
Mitcham Village Historic Area Statement (Mit4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

<table>
<tr><td>Eras, themes and context</td><td>Village Setting - 1840.

Core precinct of the village is readily identifiable and exhibits many of the original aspects of its early beginnings, including a range of single and cottage houses, commercial buildings, post office, bakery, shops, hotel and other public buildings.

Historic buildings and features that contribute to the historic character including State and Local Heritage Places and other buildings displaying historic architectural features.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>The village was laid out on the lines of an English village and contained traditional elements such as a village green and high street. Further subdivision has occurred since the date, however the majority of the original land division is intact.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Single, semi-detached, row and cottage houses, commercial buildings, post office, bakery, shops, hotel and other public buildings.

Intimate small scale and finely grained buildings.

Hotel and Institute with tall gabled ornate rendered parapets.

Modestly detailed parapet walling above verandahs to shopfronts and shops attached to dwellings, mostly over pavements.</td></tr>
<tr><td>Building height</td><td>Single storey with 3 to 3.5 metres ceiling height.</td></tr>
<tr><td>Materials</td><td>Consistent with the architectural era of the building.

Original unpainted brickwork or stonework.

Bluestone walling.

Corrugated profile roofing.

Painted timber window frames and doors.

Modest detailing to verandah posts and roof trim.

Brick, stone and rendered masonry chimneys.</td></tr>
<tr><td>Fencing</td><td>Front fences and gates reflecting the traditional period, style and form of the associated building.

Generally timber picket, brush or wire Fence height typically no more than 1.2m.

Rear and side boundary fences located behind the front dwelling alignment no more than 1.8 metres in height with corrugated profile cladding.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Traditional village setting with village green reflecting a mix of uses. Unbuilt land adjoining Brownhill Creek of Aboriginal heritage significance.

Regular pattern of street trees.

Varied historic townscape views due to plan of village and open space.

Consistent building setbacks for dwellings.

Shops attached to dwellings, commercial and institutional buildings constructed to the front boundary.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>
</table>

Callington Historic Area Statement (MtB1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

<table>
<tr><td>Eras, themes and</td><td>1849. Small compact historic mining township defined by the Bremer River.</td></tr>
</table>
</td></tr>
</table>

Statement#		Statement
MtB1	context	Buildings and structures predominantly dating from the 19th Century reflecting mining history.
	Allotments, subdivision and built form patterns	Unique often unbuilt grid street layout. Regular and repeated pattern of long narrow allotments arranged to west of Bremer River.
	Architectural styles, detailing and built form features	Early stone dwellings and outbuildings, shops, hotels and churches. Compact, intact and rustic collection of small scale, single storeyed, detached and semi-detached buildings and structures dating predominantly from the 19th century. Pioneer building techniques and materials typical of a former mining settlement. Parapet walls to end gables. Symmetrical frontages and separate verandas. Hipped and gable roof forms with ridge typically parallel to the street. Some simple skillion roof forms set behind a parapet. Barrel vaulted roofs. Separate verandahs with concave profile.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick quoins. Some rendered walling. Corrugated profile sheet roofing often over original timber shingles. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Low stone walling to front and side boundaries. Hardwood post and wire mesh or cyclone mesh. Some timber picket fencing. Metal posts with metal rails, wire or mesh infill varieties evident within the area.
	Setting, landscaping, streetscape and public realm features	Footpaths and verges unmade Street furniture unadorned. Bridge entrance and rise from river provides sense of place.
	Representative Buildings	Identified - refer to SA planning database.
MtB2	**Dawesley Historic Area Statement (MtB2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1857. Small scale, single storeyed, detached and semi-detached built form of early European settlements. Structures reflecting early local production and value adding industries. Small cottages and outbuildings on large allotments.
	Allotments, subdivision and built form patterns	Long narrow allotments typically orthogonal to the street. Mostly to each side of Donald Street and Hawthorn street. Varying allotment sizes and shapes to the streets that rise from Donald including Bower and Bremer. Variety of setbacks from street frontage.
	Architectural styles, detailing and built form features	Cottages. Some adaptation of early industrial or rural structures to dwellings. Steeply pitched (27 to 35 degrees) small span hipped and gable roofs. Separate verandahs with bullnose, concave or monopitch form. Some verandahs continuous with main roof or adopting change in pitch. Painted timber roof trim, verandah posts.
	Building height	External wall height of 3.3 to 3.8m.
	Materials	Building techniques and materials including external walls of local stone, smelter slag and early manufactured bricks. Corrugated galvanised iron roofing. OG or D painted or galvanised steel gutters.
	Fencing	Unpainted hardwood timber posts with wire or wire mesh infill, low hedges or stone walling.
	Setting, landscaping, streetscape and public realm features	Open landscaped/rural setting character. Unique entrance to Dawesley from Princess Highway coinciding with former post office.
	Representative Buildings	Identified - refer to SA planning database.
	Druids Avenue, Mount Barker Historic Area Statement (MtB3) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	19th and early 20th Century. Buildings and structures predominantly dating from the 19th Century. Small, compact workers cottages and larger residential buildings.
	Allotments, subdivision and built form patterns	Allotment pattern reflective of the original land division pattern.
	Architectural styles, detailing and built form features	Early stone dwellings. Compact, intact collection of small scale detached and semi-detached buildings dating predominantly from the 19th and 20th century. Symmetrical frontages and separate verandahs.

Statement#		Statement
MtB3		Hipped and gabled roof forms with ridge typically parallel to the street Some parapet walling.
	Building height	Single storey. External wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick or rendered chimneys.
	Fencing	Some timber picket fencing. Hedges. Low stone walling to front boundary. Hardwood post and wire mesh or cyclone mesh.
	Setting, landscaping, streetscape and public realm features	Mature street trees. Street hedging. Some red brick pavers to footpath.
	Representative Buildings	Identified - refer to SA planning database.
MtB4	**Echunga Historic Area Statement (MtB4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1849 - 1940. Commercial buildings including single storey shops, ecclesiastical, civic, former post office and hotel. Some rural structures including outbuildings. Some former shops being converted to dwelling. Single storeyed detached and semi-detached dwellings. Small cottages on large allotments.
	Allotments, subdivision and built form patterns	Shopfronts close to footpath. Generous setbacks to north-eastern side of Adelaide Road. Consistent, deep allotments.
	Architectural styles, detailing and built form features	Verandahs and porches up to and over footpath. Small scale, single storeyed detached and semi-detached built form of early European settlements. Structures reflecting early local production. Parapets to shop fronts. Symmetrical and asymmetric frontages. Separate verandahs. Hipped and gabled roofs. Ridge typically parallel to street for residential dwellings. Parapet ends and gable roof for shops.
	Building height	External wall height of 3 to 4 metres for residential dwellings.
	Materials	Stone external walls. Brick quoins. Corrugated profile roof sheeting. Painted timber window frames and doors. Painted timber verandah posts. Brick, render or stone chimneys. Fibre cement sheeting to parapets (e.g. Echunga Memorial Institute).
	Fencing	Hardwood post and wire mesh or cyclone mesh. Some timber picket fencing. Metal posts with metal rails, wire or mesh infill varieties evident within the area.
	Setting, landscaping, streetscape and public realm features	Wide street. Evenly spaced deciduous street trees to north-eastern side. Verandahs and porches to footpath providing shelter for pedestrians.
	Representative Buildings	Identified - refer to SA planning database.
	Exhibition Road, Mount Barker Historic Area Statement (MtB5) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From mid-19th and 20th Century. Public open space. Small cottages on large allotments. Small scale, single storeyed, detached built form.
	Allotments, subdivision and built form patterns	Variety of allotment sizes and shapes to Exhibition Road. Aligning setbacks from street frontage. Wellington Road dwellings parallel to side boundary providing angled frontage.
	Architectural styles, detailing and built form features	Small scale, intact, single storeyed, detached built form. Cottages.

Statement#		Statement
MtB5		Stone dwellings. Symmetrical frontages and separate verandahs. Hipped roof forms. Roof ridge typically parallel to the street. Separate verandahs with bullnose, concave or monopitch form. Some verandahs continuous with main roof or adopting change in pitch. Painted timber roof trim, verandah posts.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick quoins. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Low masonry. Brush. Metal picket fence.
	Setting, landscaping, streetscape and public realm features	Public open space. Open interface between the public space and residential uses. Stands of densely planted eucalypts and mature deciduous trees.
	Representative Buildings	Identified - refer to SA planning database.
MtB6	**Gawler Street Historic Area Statement (MtB6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From mid-19th Century. Main street of Mount Barker Township. Commercial, civic and residential. Religious and community buildings. Earliest European settlement of a township in South Australia. 1940's architecture of Bennett and Fisher.
	Allotments, subdivision and built form patterns	Long narrow allotments typically orthogonal to the street. Varying allotments to Hutchinson Street, McLaren Street and Cameron Road. Minimal setbacks. Gradual transition from commercial to residential on Mann Street.
	Architectural styles, detailing and built form features	Early brick and stone shops, hotels, civic and residential buildings. Single and double storeyed detached and semi-detached buildings and structures dating predominantly to late 19th and 20th century. Symmetrical frontages. Separate verandahs, concave, bullnose and monopitch form. Some verandahs as continuations of main roof forms. Parapet ends to gable end roofs. Parapets to shops fronts. Hipped and gable roof forms. Parapets with hipped, gable or skillion roofs behind. Separate verandahs or as continuation of the main roof.
	Building height	External wall height varies from single to double storey (3-8 metres).
	Materials	Stone external walls. Brick external walls. Rendered external walls. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts. Brick, render or stone chimneys. Large glazing to shops. OG or D painted galvanised steel gutters.
	Fencing	No fencing.
	Setting, landscaping, streetscape and public realm features	Public realm. Human scale. Pedestrian amenity. Verandahs, awnings and canopies sheltering over footpath. Entrances and windows addressing pedestrian environment. Mature avenue of deciduous street trees. Site topography with Gawler Street having gradual slope to creek; Stephen and Hutchinson Street joining at 90 degree junctions with steep slopes to south side. Adelaide Road, Mount Barker Creek and railway corridor uniquely define area. Street lights and bollards in complementary heritage style.
	Representative Buildings	Identified - refer to SA planning database.
	Hack - Mill Streets, Mount Barker Historic Area Statement (MtB7) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	

Statement#	Statement
MtB7	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: From 1850's-early to 1910. Buildings and character that represent residential land uses, and streetscapes of the town's early settlement continuing into the middle of the 20th Century. Small scale, single stored detached built form of early European settlements. Allotments, subdivision and built form patterns: Part of the original subdivision of the town. Predominantly consistent setbacks. Varying allotment sizes. Garden settings and generous spaces between buildings. Architectural styles, detailing and built form features: Worker's cottages and villas. Early stone cottages and interwar dwellings. Varying size and style. Symmetrical early dwellings. Asymmetrical early and interwar dwellings. Typically gabled, hipped or half gabled roofs (with the exception of one half hipped roof). Verandahs generally as a continuation of the main roof. Some verandahs separate to the main roof. Bullnose, concave and monopitch verandahs. Building height: Single storey. External wall height varies from 3 to 4 metres. Materials: Dressed stone. Course rubble. Rendered external walls. Brick quoins. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick or rendered chimneys. Corrugated profile sheet roofing. Fencing: Timber picket, timber post and rail or no fencing. Setting, landscaping, streetscape and public realm features: Footpaths and verges unmade. Representative Buildings: Identified - refer to SA planning database.
MtB8	**Kanmantoo Historic Area Statement (MtB8)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: From 1849. Structures reflecting early local production and value adding industries. Buildings and structures predominantly dating from the 19th century reflecting mining history and early settlement. Allotments, subdivision and built form patterns: Diamond grid layout. Small cottages on large allotments. Architectural styles, detailing and built form features: Early stone dwellings, outbuildings, ecclesiastical, civic and shops. Small scale, single storeyed, detached and semi-detached buildings and structures dating predominantly from the 19th century. Parapet walls to shop fronts. Symmetrical frontages. Separate verandahs or verandahs as continuations of the main roof. Pioneer building techniques and materials typical of a former mining settlement. Some adaptation of early industrial or rural structures to dwellings. Hipped and gable roof forms. Parapet ends to shop fronts. Separate verandahs or verandahs as continuations of the main roof. Concave, bullnose or monopitch profile verandahs. Building height: Single storey, 3 - 4 metres high. Materials: Stone external walls. Some rendered walling. Corrugated profile roof sheeting. Painted timber window frames and doors. Painted timber verandah posts. Brick, render or stone chimneys. Fencing: No fencing. Setting, landscaping, streetscape and public realm features: Vegetated landscape setting including mature and significant trees. Views provided by significant gum tree and creek to the east, and former Black Dog Inn on Old Princes Highway, create a sense of arrival to the township. Open landscape / rural setting character. Footpaths and verges unmade. Representative Buildings: Identified - refer to SA planning database.
	Littlehampton Historic Area Statement (MtB9) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. Eras, themes and context: From 1857. Buildings and structures predominantly dating from the 19th century and early 20th century. Major service centre for rural hinterland. Buildings, structures and sites reflecting early local production and service provisions. Allotments, subdivision and built form patterns: Long narrow allotments typically orthogonal to the street. Varying setbacks from street frontage. Elevated allotments to south side of Princes Highway. Architectural styles, detailing and built form features: Early stone dwellings, outbuildings, shops, civic buildings and churches. Symmetrical or asymmetrical frontages. Single storeyed, detached built form. Early European settlements. Interwar bungalows. Hipped and gable roof forms.

Statement#		Statement
MtB9		Separate verandahs with concave, bullnose or monopitch form. Verandahs as a continuation of the main roof Some parapets to shop fronts.
	Building height	Dwelling external wall varies from 3 to 4 metres. Shops, civic and churches wall height varies.
	Materials	Stone external walls. Brick external walls. Some rendered walling. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts. Masonry and masonry half columns to verandahs. Brick, render or stone chimneys.
	Fencing	Hedging to street fronts. Some timber picket fencing. Rendered masonry retaining walls.
	Setting, landscaping, streetscape and public realm features	Mature indigenous and significant trees. Vegetated landscape. Shop verandahs providing amenity to pedestrians.
	Representative Buildings	Identified - refer to SA planning database.
MtB10	**Macclesfield Historic Area Statement (MtB10)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1840's and 19th Century. Buildings, sites and structures represent the town's service provision to the local farming district. 19th century buildings associated with commercial and community services.
	Allotments, subdivision and built form patterns	Laid out around a village green, Davenport Square by the Angas River. Regular and repeated pattern of allotments becoming denser to the northern end of Strathalbyn road.
	Architectural styles, detailing and built form features	Early stone dwellings and outbuildings, shops and hotels. Small scale, single storeyed, detached buildings and structures dating predominantly from the 19th century. Parapet walls to shop fronts. Symmetrical frontages. Separate verandahs of a concave, monopitch or bullnose profile. Verandahs as a continuation of the main roof.
	Building height	Dwelling external wall height 3 - 4 metres.
	Materials	Stone external walls. Brick external walls. Brick quoins. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Timber picket fencing. Low stone wall.
	Setting, landscaping, streetscape and public realm features	Mature street trees. Davenport square and Anglican Church provide sense of place. Views of significant buildings along Venables Street. Wide main street. Shop verandahs provide shelter amenity to pedestrians. Footpath and verge unmade to eastern side of Strathalbyn Road.
	Representative Buildings	Identified - refer to SA planning database.
	Meadows Historic Area Statement (MtB11) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Unofficial subdivision in 1856. Official subdivision 1884. Buildings, structures and sites that represent the town's governmental, local production, community and commercial service provision role to the district. Buildings predominantly from the 19th century and early 20th century.
	Allotments, subdivision and built form patterns	Linear subdivision layout orthogonal to the street. Deep allotments.
	Architectural styles, detailing and built form features	Stone dwellings and shops. Brick or stone civic buildings and churches. Small scale, single storeyed, detached dwellings dating predominantly from the 19th century and early 20th century. Symmetrical 19th and early 20th century dwellings.

Statement#		Statement
MtB11		Asymmetrical interwar dwellings and shops. Parapet ends to shop fronts. Hipped and gable roof forms. Separate verandahs with concave, bullnose or monopitch profile. Verandahs as a continuation of the main roof.
	Building height	Dwelling external wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick external walls. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts. Masonry columns or half columns. Brick, render or stone chimneys.
	Fencing	Low masonry wall. Timber post and rail. Timber picket fence. No fence.
	Setting, landscaping, streetscape and public realm features	Memorial garden and council reserve along the creek provide sense of place. Mature deciduous street trees to both sides of road. Vegetated landscape.
	Representative Buildings	Identified - refer to SA planning database.
MtB12	**Nairne Historic Area Statement (MtB12)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1839. Buildings and structures predominantly dating from the late 19th century reflecting surrounding agricultural activity, mining, smelting and civic services. Predominately small scale, single storeyed detached dwellings. Buildings from the 1920s to 1960s include greater economic development and clustering's of interwar dwellings and World War Two Housing Trust dwellings.
	Allotments, subdivision and built form patterns	Subdivision pattern responsive to town's topography and contours of the creek. Original alignment of roads, streets and allotment layouts remain. Deep, narrow allotments.
	Architectural styles, detailing and built form features	Early stone dwellings, outbuildings, shops, hotels and churches. Compact, intact and rustic collection of small scale, single storeyed, detached and semi-detached buildings and structures dating predominantly from the 19th century. Pioneer building techniques and materials typical of an early settlement. Symmetrical frontages to early buildings. Asymmetrical frontages to interwar buildings. Hipped and gable roof forms. Parapet ends to shop fronts. Separate verandahs with concave, bullnose or monopitch profile. Some verandahs as continuations of the main roof.
	Building height	Single storey dwelling external wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick external walls. Some rendered walls. Brick quoins. Corrugated profile sheeting roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Timber picket fencing. Some timber post and rail. Hedging to street front. Low masonry walls.
	Setting, landscaping, streetscape and public realm features	Verandahs, canopies and balconies provide shelter to pedestrians on Old Princes Highway. Some gravel paths to Edinborough Street. Mature street trees to Old Princes Highway.
	Representative Buildings	Identified - refer to SA planning database.
	Paddys Hill, Mount Barker Historic Area Statement (MtB13) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1848. Detached dwellings of early European settlements. A visual landmark of the eastern landscaped boundary of the town.

Statement#		Statement
MtB13		Area represents religious beliefs including places of study, worship and burial in a landscaped setting.
	Allotments, subdivision and built form patterns	Open landscape. Varying allotment sizes.
	Architectural styles, detailing and built form features	Early stone dwellings. Single and double storeyed detached villas dating predominantly from the late 19th and early 20th century. Symmetrical frontages. Separate verandahs or as continuation of main roof. Hipped and gable roof forms with ridge typically parallel to the street. Verandahs with bullnose, concave or monopitch form.
	Building height	Single storeyed dwellings external wall height varies from 3 to 4 metres. Double storeyed dwellings external wall height varies from 6 to 8 metres.
	Materials	Stone external walls. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Timber post and rail. Timber posts and woven wire mesh.
	Setting, landscaping, streetscape and public realm features	Vegetated landscape setting. Mature eucalypts along Paddys Hill Road, Springs Road, Dutton Road, Railway Place and Daddow Road.
	Representative Buildings	Identified - refer to SA planning database.
MtB14	**Hahndorf, North Approaches Historic Area Statement (MtB14)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Mid to late 19th and early 20th Century. Dwellings associated with pioneer families and development of the district. Indicative of boom period from late 1880's to early 1900's. Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Large detached dwellings. Substantial gardens with interspersed view to the rural hinterland Generous setbacks of building from the main road. Linear residential development along the main arterial road to Adelaide.
	Architectural styles, detailing and built form features	Late 19th and early 20th century stone villas, cottages and bungalows. Some early Germanic influence buildings. Predominantly single storeyed, detached and semidetached buildings and structures. Some double storeyed buildings. Symmetrical frontages to villas and cottages. Asymmetrical frontages to bungalows and some villas. Pioneer building techniques and materials. Parapet walls to end gables.
	Building height	External wall heights varies from 3 to 8 metres.
	Materials	Stone external walls. Some brick external walls. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Timber picket fence. Hedging to street front. Low masonry.
	Setting, landscaping, streetscape and public realm features	Open landscaping indicative of traditional rural entrance to township. Mature deciduous street trees. Predominantly unmade verges and footpaths. Street furniture unadorned.
	Representative Buildings	*[Not identified]*
	Pine Avenue, Hahndorf Historic Area Statement (MtB15) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Interwar. Single storeyed, detached built form of Interwar developments. Structures reflect continuing prosperity of the town well into the mid-20th century.

Statement#		Statement
MtB15		Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Long allotments typically orthogonal to the street. Substantial curtilage around existing dwellings. Generous setbacks between dwellings and to the street.
	Architectural styles, detailing and built form features	Late 19th century and late 20th century stone villas and bungalows. Intact collection of single storeyed, detached and semidetached buildings. Symmetrical and asymmetric frontages. Some sun-rooms within verandah roof. Masonry columns or half columns. Hipped and gable roof forms. Projected front gables. Separate verandahs or as a continuation of the main roof.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Dressed stone / ashlar. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Brick, render or stone chimneys.
	Fencing	Low masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Mature deciduous street trees. Generous setbacks and street trees provide sense of second entrance into rural township.
	Representative Buildings	*[Not identified]*
MtB16	**Church Street, Hahndorf Historic Area Statement (MtB16)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From mid to late 19th Century. Buildings and structures dating from the 19th century reflecting early settlement and prosperity post settlement. Predominantly single story, with some double storey detached built forms. Public and religious buildings. Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Varying allotment sizes and shapes to the main street. Minimal setback from street.
	Architectural styles, detailing and built form features	Compact, intact and rustic collection of small scale, single and double storeyed, detached buildings and structures dating predominantly from the 19th century. Germanic influence style. Symmetrical frontages and separate verandahs. Parapet walls to shop fronts. Parapet walls to end gables. Hipped and gable roof forms. Half hipped (Germanic influence). Verandahs separate or as a continuation of main roof with concave, bullnose or monopitch profile.
	Building height	External wall height varies from 3 to 8 metres.
	Materials	Stone external walls. Rendered external walls. Some half-timbering / fachwerk. Corrugated profile roof sheeting. Brick quoins. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Some low timber picket fencing.
	Setting, landscaping, streetscape and public realm features	Simplistic planter boxes. Street furniture unadorned. Sense of place established by mature deciduous street trees.
	Representative Buildings	*[Not identified]*
	Auricht Road, Hahndorf Historic Area Statement (MtB17) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From late 19th and early to late 20th Century residential periods. Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Transition in allotments from historic main street to adjacent 20th century residential areas. Historic Strassendorf land division pattern remains evident. Regular and repeated long narrow allotments typically orthogonal to the street. Small setbacks from road.
	Architectural styles,	Single storey detached dwellings.

Statement#	Statement	
MtB17	detailing and built form features	Brick and stone dwellings and outbuildings. Hipped and gable roof forms. Verandahs separate with bullnose profile or as a continuation of the main roof.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick external walls. Brick quoins. Corrugated profile sheet roofing. Brick, render or stone chimneys.
	Fencing	Low masonry. Timber picket. Hedging to street front.
	Setting, landscaping, streetscape and public realm features	Some street trees. Footpath to eastern side only. Thoroughfare to main road.
	Representative Buildings	*[Not identified]*
MtB18	**Hahndorf Rural Setting Historic Area Statement (MtB18)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From Late 19th to 20th century. Rural landscape. Low intensity agricultural and pastoral lands. Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Open farmland. Allotments of varying sizes. Some Strassendorf and Hufendorf allotments.
	Architectural styles, detailing and built form features	Interwar bungalows. Late 19th to 20th century cottages. Small scale, single storeyed detached buildings and structures. Hipped and gable roofs. Separate verandahs with bullnose, concave or monopitch form. Verandahs as a continuation of the main roof.
	Building height	External wall height varies from 3 to 4 meters.
	Materials	Dressed stone external walls. Brick external walls. Brick quoins. Corrugated profile roof sheeting. Brick or render chimneys.
	Fencing	Hedging to street front. Timber post and rail.
	Setting, landscaping, streetscape and public realm features	Rural backdrop to township of Hahndorf. Paddocks. Native vegetation. Informal landscaped appearance.
	Representative Buildings	*[Not identified]*
MtB19	**Kia-Ora Street, Mount Barker Historic Area Statement (MtB19)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From early 20th Century to 1950's. Interwar architecture. Small compact dwellings which reflect the continuing prosperity of the town well into the mid-20th century. Represents a period of housing and streetscaping largely Intact. Stone and brick reflective of prominence of masonry and brickworks within the area.
	Allotments, subdivision and built form patterns	Varying allotment sizes orthogonal to the street, becoming deeper towards the creek. Small front setbacks. Reasonably consistent widths to street frontage. Unique no through road.
	Architectural styles, detailing and built form features	Dressed stone and red brick construction. Single storeyed, detached dwellings. Asymmetric frontages.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Dressed stone and red brick external walls. Brick quoins.

Statement#		Statement
		Some rendered walling. Corrugated profile roof sheeting. Tiled roofs. Painted timber window frames and doors. Some painted timber verandah posts with ornate decoration. Painted masonry columns and half columns. Brick or render chimneys.
	Fencing	Low masonry. Timber post and woven wire. No fencing.
	Setting, landscaping, streetscape and public realm features	Verges and footpath unmade. Compact, residential setting character.
	Representative Buildings	*[Not identified]*

Historic Areas affecting City of Mount Gambier

MtG1

Bay Road Historic Area Statement (MtG1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Development from period of settlement up to and including the 1920s.
Allotments, subdivision and built form patterns	Generous allotment sizes. Extensive street and side boundary set-backs.
Architectural styles, detailing and built form features	Large single storey houses with hipped and gabled galvanised iron roofs; and generous verandahs.
Building height	Predominantly single storey, with two storey additions within roof space to rear of buildings.
Materials	Varied building construction but generally comprising dolomite or limestone walling with quoins.
Fencing	Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
Setting, landscaping, streetscape and public realm features	Well maintained, mature gardens that contribute to a pleasant, open streetscape. Streetscape improvements within the area have particular emphasis on Bay Road as the entry to the Volcanic Complex State Heritage Area.
Representative Buildings	Identified - refer to SA planning database.

MtG2

Doughty Street and Wehl Street North Historic Area Statement (MtG2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Development from period of settlement up to and including the 1920s.
Allotments, subdivision and built form patterns	Generous allotments dominating the higher slopes, with substantial street and side boundary setbacks. Smaller allotments on the lower slopes.
Architectural styles, detailing and built form features	Varied building styles from one street to another. Grand houses dominating the higher slopes. On the lower slopes, workman's cottages. Contemporary housing.
Building height	Predominantly single storey, with two storey additions within roof space to rear of buildings.
Materials	Varied building construction and materials reflecting traditional period and style. Timber workman's cottages.
Fencing	Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
Setting, landscaping, streetscape and public realm features	Characterised by steep topography with generous allotments sizes and well-maintained mature gardens.
Representative Buildings	Identified - refer to SA planning database.

MtG3

Railway Historic Area Statement (MtG3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Transport and associated commercial history of the railyards, industrial. Development from period of settlement up to and including the 1920s.
Allotments, subdivision and built form patterns	The railway corridor forms one linear allotment, sited between Bay Road to the east and Wehl Street South to the west. Allotments along Margaret Street vary in size, however are predominantly regular in shape. Street frontages vary, however, are generally one of two large sizes. Allotment depth is consistent across Margaret Street. Large allotments range in size.
Architectural styles, detailing and built form features	Commercial/industrial in nature. Several buildings have frontage to Margaret Street and the Railway Lands. Railway station with associated platforms still exists.
Building height	Varying heights - single up to 3 to 4 storey high buildings dependant on their historical use.
Materials	Buildings are predominantly constructed from corrugated iron, timber or stone.
Fencing	Open styles of fencing - for example, timber post and rail; post and wire.
Setting, landscaping, streetscape and public realm features	Expansive, open nature of the railyards and the remnant buildings and structures associated with its use as a passenger and goods terminal. The commercial and industrial buildings along Margaret Street form a strong industrial streetscape fronting the railway yards. Railway track and other elements including ballast, railway iron fences, telegraph poles, platforms and structures. Use of old railway carriages. Temporary, demountable or movable structures and plantings.
Reprasentative Buildings	Identified - refer to SA planning database.

St Andrews Historic Area Statement (MtG4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

Statement#	Statement
MtG4	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. **Eras, themes and context:** Institutional and residential. Development from period of settlement up to and including the 1920s. **Allotments, subdivision and built form patterns:** Generally narrow roads with residential buildings exhibiting minimal street set-backs. Large allotments along Elizabeth Street and Penola Road. Allotment sizes ranging from large to small. **Architectural styles, detailing and built form features:** Significant institutional buildings include the Wesley Church and Hall, both of which are State heritage places, and the St Andrews Church and spire, which is a dominant element of the area. **Building height:** Predominantly single storey, with two storey additions within roof space to rear of buildings. **Materials:** Construction and materials reflecting traditional period and style. **Fencing:** Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building. **Setting, landscaping, streetscape and public realm features:** Significant Institutional buildings. Many residences are located at the top of the hill, taking advantage of fine views over the city to the south. **Representative Buildings:** Identified - refer to SA planning database.
MtG5	**Vansittart Park Historic Area Statement (MtG5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. **Eras, themes and context:** 1880s-1920s. **Allotments, subdivision and built form patterns:** Adjoining the St Andrews Historic Area, the Vansittart Park area contains uniform residential allotments on a grid pattern. There has been a small number of infill type developments in the area to date. However, the area remains predominantly dwellings on large regular shaped allotments. Generally large, consistent frontages. Predominantly large, consistent allotments. The Vansittart Park provides a sporting ground (with associated amenities) and large open garden areas. **Architectural styles, detailing and built form features:** Villa, federation and bungalow style dwellings. **Building height:** Predominantly single storey, with two storey additions within roof space to rear of buildings. **Materials:** Construction and materials reflecting traditional period and style. **Fencing:** Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building. **Setting, landscaping, streetscape and public realm features:** Well landscaped Vansittart Park and the topography of the area adds interest. Streets are not excessively wide by comparison to other areas of Mount Gambier. **Representative Buildings:** Identified - refer to SA planning database.
MtG6	**Wehl Street South Historic Area Statement (MtG6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. **Eras, themes and context:** 1860s- mid 1920s. **Allotments, subdivision and built form patterns:** Wide roads with large, deep allotments, although east-west roads are generally narrow with buildings set close to the street. Side setbacks are in some cases small. **Architectural styles, detailing and built form features:** Diverse dwelling styles. Larger residences predominantly along Wehl Street South. Smaller stone or timber-clad workman's cottages close to the railway line. Wehl Street Public School. **Building height:** Predominantly single storey, with two storey additions within roof space to rear of buildings. **Materials:** Stone and timber clad. Construction and materials reflecting traditional period and style. **Fencing:** Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building. **Setting, landscaping, streetscape and public realm features:** Street set-backs in this area vary considerably, and combined with clusters of historical housing, produce an interesting streetscape. Residential streetscape character, including within commercial areas. Unobtrusive advertising. Front fences and garden landscaping. Car parking located to the rear of buildings. **Representative Buildings:** Identified - refer to SA planning database.
Historic Areas affecting Rural City of Murray Bridge	
MuBr1	**Adelaide Road Pontoon Historic Area Statement (MuBr1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. **Eras, themes and context:** Late 19th and early 20th Century. **Allotments, subdivision and built form patterns:** Linear road pattern. Buildings square to the street. Moderate to large allotment sizes. **Architectural styles, detailing and built form features:** Varied built form including stone and brick dwellings with verandahs, Victorian dwellings, larger stone and brick cottages with verandahs. **Building height:** Low scale, single storey built form.

Statement#	Statement	
	Materials	Random limestone rubble. Stone and brick. Local limestone. Iron roofs.
	Fencing	Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Entrance to the centre of Murray Bridge. Frontages of developments adequately landscaped. Swimming pool complex.
	Representative Buildings	Identified - refer to SA planning database.
MuBr2	**Mannum Road Historic Area Statement (MuBr2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 19th and early 20th Century.
	Allotments, subdivision and built form patterns	Linear road pattern. Buildings square to the street. Moderate to large allotment sizes.
	Architectural styles, detailing and built form features	Varied built form including stone and brick dwellings with verandahs, Victorian dwellings, larger stone and brick cottages with verandahs.
	Building height	Low scale, single storey built form.
	Materials	Random limestone rubble. Stone and brick. Local limestone. Iron roofs.
	Fencing	Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Entrance to the centre of Murray Bridge.
	Representative Buildings	Identified - refer to SA planning database.
MuBr3	**Swanport Road Historic Area Statement (MuBr3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Includes land between Mary Terrace and Rachel Street where some of the first subdivisions in Murray Bridge occurred in 1873.
	Allotments, subdivision and built form patterns	Grid like pattern involving a number of narrow lanes and varying street widths. Consistent setback distances to both the front and side of dwellings.
	Architectural styles, detailing and built form features	Dwellings in this locality display a strong repetitive architectural style.
	Building height	Low scale, single storey built form.
	Materials	Random limestone rubble. Stone and brick. Local limestone. Iron roofs.
	Fencing	Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Entrance to the centre of Murray Bridge. Larger, well established front gardens.
	Representative Buildings	Identified - refer to SA planning database.
Historic Areas affecting Naracoorte Lucindale		
NALU1	**Livingston Street, Naracoorte Historic Area Statement (NaLu1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1870s to 1890s and turn of the 20th century.
	Allotments, subdivision and built form patterns	Small allotments.
	Architectural styles, detailing and built form features	Single- and double- fronted detached cottages (typically involving two rooms).
	Building height	Single storey.
	Materials	Local stone, fibro-sheet and weatherboard, corrugated iron and patterned sheet metal.
	Fencing	Open fencing predominantly wire and picket style no more than 1.2 metres.
	Setting, landscaping, streetscape and public realm features	Buildings positioned close to street frontages, landscaped front gardens and wide grassed verges.
	Representative Buildings	[Not identified]
Historic Areas affecting City of Norwood, Payneham and St Peters		
NPSP1	**College Park Historic Area Statement (NPSP1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Subdivision during the 1870s with dwellings built between 1870s and 1920s. Detached dwellings.
	Allotments, subdivision and built form patterns	Consistent pattern of prestigious single-storey detached dwellings on very large, spacious allotments fronting wide, tree-lined streets. Very low density. Side and rear setbacks providing large separation distances between dwellings.
	Architectural styles, detailing and built form features	Double fronted, symmetrical and asymmetrical dwellings; East Adelaide Investment Company dwellings; Larger villas and mansions; Victorian villas; Edwardian Queen Anne and Art Nouveau. The double fronted, symmetrical and asymmetrical dwellings in the College Park Policy Area are an elegant larger version of the simple colonial cottage with the addition of a projecting wing (in the case of the asymmetrical dwelling), a more elaborate verandah and increased detailing in plaster and render work around openings. The pitch and size of the roof makes this an important design element. The external walls are generally constructed of bluestone or dressed and coursed sandstone. Verandahs along the front elevation are another important element of both the double fronted symmetrical and asymmetrical dwelling.
	Building height	Single storey, two storey in some locations.
	Materials	External walls made of bluestone or dressed and coursed sandstone. Stone, brick and rendered masonry.

Statement#	Statement	
		Traditional colours and materials.
	Fencing	Low, open front fencing (including secondary streets to the main façade of building) associated with the traditional period and style of the building up to 1.2m (masonry), 1.5m (wrought iron, timber and wire) and 2m (masonry pillars) in height, allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other dwellings built during the Victorian period; or timber picket, timber paling or woven crimped wire; or corrugated iron or mini orb within timber framing for Edwardian dwellings. Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry. Side fences along street corners continue the detailing of the front fence to the house alignment, solid fencing beyond this point in traditional materials.
	Setting, landscaping, streetscape and public realm features	Dwellings have sizeable setbacks from all boundaries and are typically set in large landscaped grounds with front boundaries defined by fencing of various styles. Open landscape character to front garden, which enhances dwelling and streetscape quality. Wide streets lined with mature trees.
	Representative Buildings	Identified - refer to SA planning database.
NPSP2	**Hackney North Historic Area Statement (NPSP2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Predominantly pre 1920s, some pre 1940s dwellings. Detached, semi-detached and row dwellings.
	Allotments, subdivision and built form patterns	Small narrow fronted allotments on narrow streets.
	Architectural styles, detailing and built form features	Humble, mainly double fronted (with some single fronted) single storey cottages, in detached, semi-detached and row dwelling configurations.
	Building height	Single storey.
	Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.
	Fencing	Low, open front fencing (including secondary streets to the main façade of building) reflecting the traditional period and style of the associated building up to 0.9m in height, allowing views to building. Rear and side fencing behind the alignment of the main dwelling face to 1.8m. Timber picket, timber dowelling, simple masonry and cast iron palisade. Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry.
	Setting, landscaping, streetscape and public realm features	Consistent pattern of narrow streets with dwellings built close to street with minimal setbacks and separation distances.
	Representative Buildings	Identified - refer to SA planning database.
NPSP3	**Hackney South Historic Area Statement (NPSP3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Detached, semi-detached and row dwellings.
	Allotments, subdivision and built form patterns	Closely packed arrangement of buildings built close to the street frontage. Mainly small narrow fronted allotments which generally only allow for dwellings with a single room width, rear service lanes. Some sizeable allotments along parts of Osborne Street. Primary dwelling frontages are to streets, not lanes.
	Architectural styles, detailing and built form features	Small, mainly single-fronted dwellings, in detached, semi-detached and row dwelling configurations. Some elevated dwellings along eastern side of Westbury Street. Verandahs along the primary frontage of dwellings. Dwellings simple in structure and plan.
	Building height	Single-storey.
	Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.
	Fencing	Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m, allowing views to building. Original design and materials, such as timber picket, timber dowelling or simple masonry and cast iron palisade.
	Setting, landscaping, streetscape and public realm features	Consistent pattern of narrow streets and rear service lanes. Rear lanes used for vehicular access and garages. Streets lined with mature exotic street trees. Landscaped gardens to sizeable allotments.
	Representative Buildings	Identified - refer to SA planning database.
NPSP4	**Joslin / Royston Park Historic Area Statement (NPSP4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900s-1930s. Detached dwellings. Joslin/Royston Park Historic Area is divided into two separate locations: the area around First and Second Avenue, north of Lambert Road, in the suburb of Royston Park, and the area centred around Fourth, Fifth and Sixth Avenues in the suburb of Joslin.
	Allotments, subdivision and built form patterns	Regular pattern of large allotments.
	Architectural styles, detailing and built form features	Single storey detached dwellings. Bungalows. Edwardian (such as Queen Anne) and Federation dwelling styles. Some Tudor style dwellings with a steeper roof pitch, tiled roof and heavy columns.
	Building height	Single-storey, two storeys in some locations.
	Materials	Stone dwelling walls and original joinery.
	Fencing	Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, brush or timber and wire) and 2m (masonry pillars), allowing views to dwelling. Original design and materials, such timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other Victorian dwellings. Timber picket, timber paling or woven crimped wire, or corrugated iron or mini orb within timber framing for Edwardian dwellings. Timber paling, wire mesh and timber or tube framing, woven crimped wire, or masonry with galvanised steel ribbon for Bungalow and Tudor house styles. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
	Setting, landscaping, streetscape and public realm features	Area characterised by regularity of the wide, tree lined avenues. Landscaped garden setting, particularly in front of dwelling; Streets lined with distinctive street trees.
	Representative Buildings	Identified - refer to SA planning database.
	Kensington 1 Historic Area Statement (NPSP5) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	

Statement#	Statement	
NPSP5	Eras, themes and context	1838-1860; 1861-1880; 1881-1900; 1901-1915; 1916-1939. Residential urban village characterised by buildings, settings street patterns and natural features. Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern.
	Architectural styles, detailing and built form features	Larger Victorian-style brick and stone buildings, Federation era brick and stone buildings and bungalow-styled buildings of the post-1918 period. Significant corner buildings contribute to the character.
	Building height	Up to two storeys.
	Materials	Pise, stone or brick.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	The unique diagonal street pattern of Kensington is an important part of its character.
	Representative Buildings	Identified - refer to SA planning database.

Kensington 2 Historic Area Statement (NPSP6)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP6		
	Eras, themes and context	Dominant and historic institutional buildings of the St Joseph's Convent. Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern.
	Architectural styles, detailing and built form features	St Joseph's Convent buildings.
	Building height	Up to two storeys.
	Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Car parking and service areas are at the rear of buildings.
	Representative Buildings	*[Not identified]*

Kent Town 1 Historic Area Statement (NPSP7)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP7		
	Eras, themes and context	Pre 1890 (Victorian) and 1890-1915 (turn-of-the-century), 1915-1940 (bungalows). Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern with large scale villas. Smaller scale row houses and courtyard-style housing on Little Angas and Little Wakefield Street frontages.
	Architectural styles, detailing and built form features	Large-scale Victorian and turn-of-the-century villas set well back from the street frontage in mature garden settings together with other historic buildings including cottages and bungalows.
	Building height	Up to two storeys.
	Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	*[Not stated]*
	Representative Buildings	*[Not identified]*

Kent Town 2 Historic Area Statement (NPSP8)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP8		
	Eras, themes and context	Pre-1920s. Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern. Smaller scale row houses and courtyard-style housing on Dew Street frontage.
	Architectural styles, detailing and built form features	Double and single-fronted cottages.
	Building height	Up to two storeys.
	Materials	Bluestone or sandstone.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Consistency of front set-backs, in particular, the row of double-fronted houses in Grenfell Street.
	Representative Buildings	*[Not identified]*

Marden (Broad Street / Pollock Avenue) Historic Area Statement (NPSP9)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

	Eras, themes and context	Small group of dwellings, dating from 1910s. Detached dwellings. Semi-detached dwellings on Broad Street.
	Allotments, subdivision and built form patterns	Original historic pattern. Detached dwellings of modest proportions, set relatively close to Pollock Avenue. Mix of detached and semi-detached dwellings on Broad Street.

Statement#	Statement	
NPSP9	Architectural styles, detailing and built form features	Detached dwellings of modest proportions. Features such as the typical bull-nose verandah and gable ends, which are elaborated with strapping or finials.
	Building height	Single-storey.
	Materials	Unpainted stone, corrugated iron roofing materials and joinery.
	Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, timber and wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling. Timber picket and paling, woven crimped wire, or corrugated iron or mini orb within timber framing. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
	Setting, landscaping, streetscape and public realm features	Narrow street width, street plantings and footpath treatments of Pollock Avenue.
	Representative Buildings	Identified - refer to SA planning database.

Maylands Historic Area Statement (NPSP10)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP10		
	Eras, themes and context	Late 1800s onwards. Detached and semi-detached dwellings.
	Allotments, subdivision and built form patterns	Similar to Stepney area but with greater percentage of larger allotments, with proportionately larger homes. Allotments of generous size. Original historic pattern.
	Architectural styles, detailing and built form features	Double-fronted detached villas and cottages of modest proportions with substantial established gardens. Single-fronted attached dwellings of sandstone and bluestone construction. Remaining corner shop structures. Verandahs along the primary frontage.
	Building height	Single-storey.
	Materials	Sandstone and bluestone.
	Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry) or 1.5m (other materials), allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
	Setting, landscaping, streetscape and public realm features	Relatively wide streets in the original subdivision layout. Landscaping around a dwelling, particularly in the front garden, is an important design element as it enhances the dwelling and adds to the appearance and quality of the streetscape. Street trees are present in most of the streets and make a solid contribution to the overall character.
	Representative Buildings	Identified - refer to SA planning database.

Norwood 1 Historic Area Statement (NPSP11)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP11		
	Eras, themes and context	Late 19th Century (pre 1920s). Residential. Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern. Consistent front setback patterns.
	Architectural styles, detailing and built form features	Single-fronted and double-fronted cottages.
	Building height	Up to two storeys.
	Materials	Bluestone, sandstone, pise or brick.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	*[Not stated]*
	Representative Buildings	*[Not identified]*

Norwood 2 Historic Area Statement (NPSP12)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP12		
	Eras, themes and context	Late 19th Century and turn-of-the-century. Residential. Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern. Limited front and side setbacks.
	Architectural styles, detailing and built form features	Single-fronted, double-fronted, semi-detached and row cottages.
	Building height	Up to two storeys.
	Materials	Bluestone or sandstone with brick.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	*[Not stated]*
	Representative Buildings	*[Not identified]*

Norwood 3 Historic Area Statement (NPSP13)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

	Eras, themes and context	Pre 1890s (Victorian) and turn-of-the-century (pre 1920). Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern.

Statement#	Statement	
NPSP13	Architectural styles, detailing and built form features	Villas and double-fronted cottages. Prominent key heritage buildings e.g. St Bartholomew's Church.
	Building height	Up to two storeys.
	Materials	Sandstone or bluestone with brick.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Set-back consistently with landscaped frontages.
	Representative Buildings	*[Not identified]*
NPSP14	**Norwood 4 Historic Area Statement (NPSP14)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 19th Century, early 20th Century and some later period dwellings (pre 1940). Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern. Front setbacks of varying depths in various streetscapes.
	Architectural styles, detailing and built form features	Late 19th Century small-scale maisonettes and single and double-fronted cottages (mainly in Moulden, Clara, Bonney, Vernon and Foster Streets), early 20th Century villas (mainly in George and Queen Streets, the western side of Moulden Street and the western end of Prosser Avenue) and some later period bungalows, including Tudor-style bungalows mainly in the eastern part of Prosser Avenue but also in George Street).
	Building height	Up to two storeys.
	Materials	Bluestone or sandstone and brick.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Dwellings generally have landscaped frontages.
	Representative Buildings	*[Not identified]*
NPSP15	**Norwood 5 Historic Area Statement (NPSP15)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860 to 1920. Range of dwelling types.
	Allotments, subdivision and built form patterns	The consistency of the streetscapes of Willis and Colliver Streets, Montrose Avenue and the western side of Charles Street either side of the intersection with Montrose Avenue. Development of a more generous scale which fronts William Street. Overall topography relating to the alignment of First Creek through the area.
	Architectural styles, detailing and built form features	Single-fronted and double-fronted cottages, semi-detached cottages, other semi-detached dwellings, villas of various forms, and a mansion. Prominent remaining corner shop structures.
	Building height	Up to two storeys.
	Materials	Bluestone or sandstone, often with the side and rear walls of brick or rubble, and incorporating hipped or gable-end roofs of corrugated iron together with verandahs typical of the era in which the respective buildings were constructed.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	*[Not stated]*
	Representative Buildings	*[Not identified]*
NPSP16	**Payneham (Harcourt Road) Historic Area Statement (NPSP16)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Early 1900s and 1918-30 (State Bank bungalows). Detached dwellings.
	Allotments, subdivision and built form patterns	Medium sized allotments. Large frontages.
	Architectural styles, detailing and built form features	Early 1900s architectural housing styles in Harcourt Road - post Federation Villa style dwellings. State Bank bungalows in Kapunda Terrace. Local shop and attached dwelling at the junction of Harcourt Road and Kapunda Terrace. Original verandahs along the primary frontage. Well preserved housing stock, particularly in Harcourt Road.
	Building height	Single storey.
	Materials	Unpainted stone, corrugated iron roofing materials and joinery.
	Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, timber and wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for villas.

Statement#	Statement	
		Timber picket, timber pailing, woven crimped wire, or corrugated iron or mini orb within timber framing for Edwardian dwellings. Timber pailing, wire mesh and timber or tube framing, woven crimped wire, or masonry with galvanised steel ribbon for bungalows. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
	Setting, landscaping, streetscape and public realm features	The consistent early tree planting of mature natives species, including Lilly Pillys and Myrtles, particularly along Harcourt Avenue, will continue to define and unify the historic character of this street. Buildings located in garden setting.
	Representative Buildings	Identified - refer to SA planning database.
NPSP17	**Payneham (Henry Street/George Street) Historic Area Statement (NPSP17)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Pre 1890s (Victorian) and 1890s-1910s (Edwardian). Detached and semi-detached dwellings.
	Allotments, subdivision and built form patterns	Historic settlement sections of George Street and Henry Street, Payneham. Dwellings closely set on small, narrow fronted allotments and built close to the street with minimal setbacks and separation distances. Original verandahs.
	Architectural styles, detailing and built form features	Small Victorian and Edwardian / federation cottages in detached and semi-detached configurations which are an important relic of early residential development in this section of Payneham. Dwellings simple in structure and plan.
	Building height	Single storey.
	Materials	Unpainted sandstone and bluestone, corrugated iron roofing materials and joinery.
	Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including Henry Street / George Street corners and any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m, allowing views to dwelling. Timber picket, timber dowelling, simple masonry and cast iron palisade, or corrugated iron or mini orb within timber framing. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
	Setting, landscaping, streetscape and public realm features	Distinctive historic streetscape character established through the pattern of narrow streets and distinctive street trees.
	Representative Buildings	Identified - refer to SA planning database.
NPSP18	**St Peters Historic Area Statement (NPSP18)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1870 - 1930s. Detached and semi-detached dwellings.
	Allotments, subdivision and built form patterns	Mix of close-set, single-fronted cottages on narrow allotments and a range of cottages and villas set on larger allotments with more substantial established gardens, in wide streets, often with rear service lanes. Rear lanes used for vehicular access and garages In College Park and along Fifth and Sixth Avenue - small to medium sized allotments. In this section of First Avenue - modest sized allotments.
	Architectural styles, detailing and built form features	In College Park and along Fifth and Sixth Avenue - mainly single-storey double-fronted villas and detached dwellings of modest proportions with some single-fronted dwellings. In this section of First Avenue - reasonably compact single-fronted, double-fronted, and villa-type dwellings.
	Building height	Single storey.
	Materials	Sandstone and bluestone construction.
	Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, timber and wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
	Setting, landscaping, streetscape and public realm features	In College Park and along Fifth and Sixth Avenue - Reasonably wide streets are characteristic of this area, with significant street planting and fenced front boundaries. Rear vehicle access lanes. Landscaping around dwellings is an important design element. Streets lined with mature exotic street trees.
	Representative Buildings	Identified - refer to SA planning database.
NPSP19	**Stepney Historic Area Statement (NPSP19)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850 - 1890s. Detached, semi-detached and row dwellings.
	Allotments, subdivision and built form patterns	Intricate pattern of development. Dwellings built on small, narrow-fronted allotments, close to the street frontage with minimal setbacks and separation. Primary dwelling frontages to streets, not lanes.
	Architectural styles, detailing and built form features	Single and double fronted single storey cottages, in detached, semi-detached and row dwelling configurations, with some modest villas and bungalows. Dwellings simple in structure and plan.
	Building height	Single storey.
	Materials	Bluestone and sandstone.
	Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m, allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade.
	Setting, landscaping, streetscape and public realm features	Street trees feature to a varying degree due to the species selection and age of planting. Rear lanes used for vehicular access and garages
	Representative Buildings	Identified - refer to SA planning database.
	The Avenues Historic Area Statement (NPSP20)	

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>NPSP20</td><td>
The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>Between the late 1870s and 1900, between the 1900s and the 1920s, and inter-war.

Detached dwellings.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Historic streetscape created by the regularity of the avenues and the development patterns that have formed around them.

Primary dwelling frontages to streets, not lanes.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Predominantly single-storey, detached, late Victorian Italianate villas of reasonably substantial proportions.

Elsewhere - the consistent styles of detached late Victorian Italianate villas of reasonably substantial proportions.

Double fronted asymmetrical dwellings are the most common dwelling type, although there are a range of symmetrical dwellings, East Adelaide Company dwellings and some larger villas and mansions.

The double fronted symmetrical and asymmetrical dwellings are an elegant, larger version of the simple colonial cottage with the addition of a projecting wing (in the case of the asymmetrical dwelling), a more elaborate verandah and increased detailing in plaster and render work around openings. The pitch and size of the roof makes this an important design element.

Verandahs along the front elevation are another important element of both the double fronted symmetrical and asymmetrical dwelling.

Some Edwardian style housing (such as Queen Anne and Art Nouveau styles), generally located within the later subdivided areas or on blocks which were re-subdivided from larger allotments.

Joslin portion of this Policy Area - reflects general character, some of the dwelling stock, particularly towards the Lambert Road boundary, graduates into the 1920s style of housing, introducing with it a component of inter-war housing such as bungalows.</td></tr>
<tr><td>Building height</td><td>Predominantly single-storey, up to two storeys in some locations.</td></tr>
<tr><td>Materials</td><td>Bluestone or sandstone dressed and coursed.</td></tr>
<tr><td>Fencing</td><td>Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, brush, timber and or wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling.

Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other dwellings built during the Victorian period.

Timber picket, timber pailing, woven crimped wire, or corrugated iron or mini orb within timber framing for Edwardian dwellings.

Timber pailing, wire mesh and timber or tube framing, woven crimped wire, or masonry with galvanised steel ribbon for bungalows, Tudors and inter-war dwellings.

Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Landscaping around a dwelling, particularly in the front garden, is an important design element.

In St Peters, wide tree lined streets, with mature street trees and rear lanes used for vehicular access and garages</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>

Statement#	Statement

Payneham Road Historic Area Statement (NPSP23)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP23

Eras, themes and context	1870s and 1880s, early 1900s, and post-World War II. Offices, consulting rooms and residential dwellings generally utilising historic buildings, with new residential apartments and townhouses. Mixed business strip, shops, administrative, shop/dwellings, civic and institutional buildings. Local commercial activities. Shopping facilities north of St Peters Street.
Allotments, subdivision and built form patterns	Minimal set back from the Payneham Road frontage.
Architectural styles, detailing and built form features	Valued architectural elements fronting Payneham Road including verandahs, façade treatments (including windows and entrances), shopfront detailing and roof and parapets. Street-level coherence across signage, canopies, shopfronts and overhanging fabric of buildings such as cornices.
Building height	Single and two -storey.
Materials	Original materials and finishes including unpainted brickwork, stonework and corrugated iron roofing.
Fencing	*[Not stated]*
Setting, landscaping, streetscape and public realm features	Vehicular movement is dominated by Payneham Road, which provides primary access for delivery, service and visitors vehicles. Access and car parking is generally shared. Car parking is generally located to the rear of buildings, or otherwise sensitively located.
Representative Buildings	Identified - refer to SA planning database.

Portrush Road Historic Area Statement (NPSP24)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP24

Eras, themes and context	1880s and 1890s. Offices, consulting rooms and residential dwellings generally utilising historic buildings.
Allotments, subdivision and built form patterns	Consistent setbacks.
Architectural styles, detailing and built form features	Valued architectural elements fronting Portrush Road including verandahs, original openings (i.e. doors and windows) in external walls, roof form and pitch and façade treatments. Residential character. The historically significant Funeral Parlour on Portrush Road, Payneham.
Building height	Single storey.
Materials	*[Not stated]*
Fencing	*[Not stated]*
Setting, landscaping, streetscape and public realm features	Vehicular movement is dominated by Portrush Road, which provides primary access for delivery, service and visitors vehicles. Car parking is generally located to the rear of buildings.
Representative Buildings	Identified - refer to SA planning database.

The Parade / Fullarton Road Historic Area Statement (NPSP25)

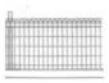
The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

NPSP25

Eras, themes and context	Pre 1890s (Victorian). Offices, consulting rooms and residential dwellings, generally utilising historic buildings, with new residential apartments and townhouses.
Allotments, subdivision and built form patterns	*[Not stated]*
Architectural styles, detailing and built form features	Victorian villas, large two storey mansion buildings, double-fronted houses and groups of two storey row houses. Consistent set-backs. Buildings which address Fullarton Road and The Parade have deep set-backs.
Building height	Generally up to two storeys.
Materials	Sandstone or bluestone.
Fencing	*[Not stated]*
Setting, landscaping, streetscape and public realm features	Vehicular movement is dominated by The Parade, Fullarton Road, Rundle Street and Little Dew Street, which provides primary access for delivery, service, visitors' and residents' vehicles, in preference to access via the adjoining residential areas. Well established garden settings. High standard of landscaping incorporating large trees which reinforce the leafy avenue character of these roads.
Representative Buildings	*[Not identified]*



Heathpool Historic Area Statement (NPSP26)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	An area which demonstrates its origin as a locally significant subdivision of land in 1917, following the sale of Heathpool farm. The subdivision by land developers Wilkinson, Sando and Wyles, created 40 allotments, forming a new residential estate known as 'Toorak East'. Developed during the Inter-War period (1915-1945) after the main phases of suburban development (on northern side of Kensington Road) were completed. This area was developed at the same time as similar subdivisions in nearby parts of the City of Burnside. An intact area displaying historic construction styles built from 1920 featuring large houses and gardens in Stannington Avenue, dominated by wide-fronted bungalow style dwellings. Later construction of mainly middle-class housing in Rothbury Avenue, dominated by Old English style dwellings. The southern extent of the Historic Area along Rothbury Avenue abuts and shares the built form character, patterns and housing styles of the Tusmore Historic Area (in the City of Burnside).
Allotments, subdivision and built form patterns	Largely intact original subdivision pattern, comprising grid pattern of original allotment sizes, providing regularity and consistency laid out along the east-west streets. Large single storey detached dwellings with bespoke decorative and ornate detailing on large allotments, especially along Stannington Avenue, including double allotments bought and retained as single holdings and other sites with extensive

Statement#		Statement
NPSP26		landscaped open space. Allotments are generally between 1000m² and 1400m². Sites comprised of double allotments in the order of 1700m² to 2500m². Frontages are generally between 21 and 33 metres. Sites comprised of double allotments with total frontage width in the order of 42 to 53 metres. Front setbacks are generous and range from 9 metres to 21 metres. Spaciousness around dwellings with site coverage in the order of 30 to 45 per cent on original allotments. Side setbacks are a feature of the locality providing large separation distances between dwellings of between 1 to 5 metres, with limited original development built on the side boundary. Setback patterns are generally asymmetrical, with varied space on either side of dwellings. Street facing dwellings enhanced by their landscaped settings.
	Architectural styles, detailing and built form features	Notable dwellings include large and finely crafted 1920s Inter-War Bungalow dwellings with form, scale and detailing reflective of 1920s-era homes of the wealthy, lining both sides of Stannington Avenue. Along the northern side of Rothbury Avenue are highly intact examples of middle-class Inter-War Old English dwellings and Inter-War Bungalow dwellings of varying designs, repeated on southern side of Rothbury Avenue in City of Burnside – Tusmore Historic Area to form a consistent streetscape. Porches and verandahs in keeping with the scale and style of associated dwellings, either projecting or as a continuation of the main roof structure. Hip and gable roof forms with roof pitches of 20 to 30 degrees on Bungalows and up to approximately 45 degrees on Inter-War Old English dwellings. Visible chimneys are a feature of the distinctive roofing detail in this area. Where a second building level exists, it is setback from side boundaries and incorporated within the roof-pitch. Single-width open style carport alongside and sometimes incorporated into the roof form with matching masonry pillars, or generously recessed is a feature of Inter-war dwellings in the area. Free-standing or enclosed ancillary buildings are sited to the rear of the associated dwelling.
	Building height	Dwelling height to the roof ridge in the order of 5 to 8 metres. Predominantly single storey, except for original lofts, dormer windows or other upper storey elements in some taller dwellings where the second level is incorporated with minimal interruption to the pitched roof-form.
	Materials	Feature front walls materials consistent with era of original construction including freestone, sandstone and brickwork. Verandah balustrades of red brick, freestone or rendered brick, often with feature pillars supporting the verandah roof. Bungalow styles featuring a front timber pergola adjoining the verandah. Pitched roofs in galvanised iron sheet or terracotta tiles, including double steep gables. Original materials and finishes and unpainted masonry. Detailing around doors, windows, wall edges and gables. Timber framed sash or casement style window openings and use of projecting bay windows. Natural and muted colour palette (including the use of red brick and terracotta) with colour highlights in the detailing such as quoins.
	Fencing	Front fences are generally open style and low in height (to 1.2 metres high) permitting good views of the dwelling and its curtilage. Fencing materials commonly associated with Inter-War Bungalow and Inter-War Old English dwelling styles, was typically woven wire or chain mesh with timber or galvanised tube framing and/or hedge, or a low masonry plinth wall.  Woven wire mesh
	Setting, landscaping, streetscape and public realm features	Spacious front and side gardens with extensive landscaping are features of this locality and are important in the setting of historic building forms. Tree lined streets creating a leafy public realm. Trees and tennis courts on larger sites, adding to the sense of buildings integrated into landscaped settings. Narrow access points which maximise the extent of unbroken street frontage and front landscaping with single width driveways.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Onkaparinga

Clarendon Historic Area Statement (Onka1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Onka1	Eras, themes and context	1840s - 1890s. Early European survey and settlement in the regional areas around Adelaide; Pastoralism, Agriculture, Viticulture, Tertiary Industries, Communications, Road Transport, Water Catchment and Supply, Social Services, Religion, Education, Law and Order, Local Government.
	Allotments, subdivision and built form patterns	Township allotments set out from the main road (Grants Gully Road) which winds its way along the floor of a valley and Turners Gully Road. Relatively large allotments, typical of a country township. Allotment sizes increase out from the centre of the township, emphasising the semi-rural environment. Substantial space between buildings. Buildings are sited relatively close to front boundaries and each other in the centre of the township but front and side setbacks increase as distance from the town centre increases. This pattern of development contributes to the sense of space and rural/country township character. Building frontages are parallel to streets becoming more random out from the centre of the township. Dwellings with frontage to Turners Gully Road and/or Clarendon Road sited on the lower slopes of hillsides or within the valley floor.
	Architectural styles, detailing and built form features	Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian stylistic influences. Agriculture and viticulture related structures such as winery buildings, farmhouses and barns. Public buildings such as police station, courthouse, school, former institute building (hall) with Victorian Gothic and similar styles of the Victorian era. Churches and cemeteries. Hotel, general store and shops. Transport related structures such as bridges. War memorial. Roof types: M - shaped, gable, hipped, concave or straight-pitched veranda, steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods short roof spans Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills
	Building height	Predominantly single-storey. Single-storey residential buildings with some two-storey or part two-storey dwellings. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Tall single-storey churches and institutional and public buildings that are generally exceptions and landmarks that punctuate the streetscape and stand out because of their difference in scale.
	Materials	Masonry - random rubble, roughly-coursed stone, unpainted local bluestone, sandstone, some with brick or rendered quoin work Roof - slate or corrugated iron Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts Consistent with the materials used in the 1840s-1890s buildings within the township. Unobtrusive, natural colours.
	Fencing	Picket fence. Woven wire. Timber post-and-rail or post-and-wire Low (approximately 1.2 metres in height) sandstone rubble. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and	Lineal township laid out along a narrow valley floor.

Statement#		Statement
	public realm features	Township located within a steeply-sided valley and a hillside, rural setting. Narrow streets. The reservoir and the Onkaparinga River. Mature landscape environment where well-established trees and vegetation reinforce the country township character and emphasise the space between buildings. Village or rural township character. Vistas and views into and out of the township are important.
	Representative Buildings	Identified - refer to SA planning database.
Onka2	**Kangarilla Historic Area Statement (Onka2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s - early 1900s. Early European survey and settlement in the regional areas around Adelaide; Pastoralism, Agriculture, Tertiary Industries, Communications, Road Transport, Social Services, Religion, Education.
	Allotments, subdivision and built form patterns	Concentrated on McLaren Flat Road. Relatively large allotments, typical of country township. Allotment sizes increase out from the centre of the township, emphasising the semi-rural environment. Substantial space between buildings. Buildings are sited relatively close to front boundaries and each other in the centre of the township but front and side setbacks increase as distance from the town centre increases. Sense of space and country township character. Building frontages parallel to streets.
	Architectural styles, detailing and built form features	Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian stylistic influences. Agriculture and viticulture related structures such as farmhouses, barns, stables, sheds, outbuildings, and winery. Public buildings such as school, post office, hall. Churches and cemeteries. Hotel, general store and shops. Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: M - shaped, gable, hipped. Concave, bullnose or straight-pitched veranda. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. short roof spans.
	Building height	Predominantly single-storey. Single-storey residential buildings with some two-storey or part two-storey dwellings or shop/dwellings. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Tall single-storey churches and institutional and public buildings that are exceptions
	Materials	Masonry - random rubble, roughly coursed stone, unpainted local bluestone, sandstone, some with brick or rendered quoin work. Roof - corrugated iron, slate, stringy bark shingles. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts. Consistent with the materials used in the 1840s-1890s buildings within the township.
	Fencing	Post-and-rail. Crude picket. Timber post-and-rail or post-and-wire. Low (approximately 1.2 metres in height) sandstone rubble. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Positioned at the junction of four main roads. Township confined to small cluster of buildings sited adjacent the major road junction. Presence of reliable creek. Rural township character. Mature landscape environment well-established trees and vegetation emphasise space between buildings. Farmhouses around the township area. Relatively broad road reserves. Informal footpaths and road edges.
	Representative Buildings	*[Not identified]*
Onka3	**Old Reynella Historic Area Statement (Onka3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s - 1920s. Early European survey and settlement in the regional areas around Adelaide; Pastoralism, Agriculture, Viticulture, Tertiary Industries, Communications, Road Transport/Coaching routes, Railway Services, Social Services, Religion, Education.
	Allotments, subdivision and built form patterns	Varied allotment sizes and pattern within the township.
	Architectural styles, detailing and built form features	Symmetrical and asymmetrical cottages with Victorian stylistic influences. Schools, hotel. Transport-related buildings such as horse changing station. Smaller cottages with rectilinear plan form. Low-scale. High solid-to-void ratio. Typically, two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: gable, hipped. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods Short roof spans.
	Building height	Predominantly single-storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger hotel and former school building are landmarks. Historic character punctuated by more recent infill and shopping facilities.
	Materials	Masonry - limestone, sandstone (coursed), random rubble, some stucco and rendered finishes. Quoins - rendered, brick. Roof - corrugated iron. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.
	Fencing	Picket fencing. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Narrow residential streets presenting variety in the age and style of buildings. Attractive public open spaces formed around the Field River. Creek line running through the centre of the town.
	Representative Buildings	*[Not identified]*
	Old Noarlunga Historic Area Statement (Onka4) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	

Statement#		Statement
Onka4	Eras, themes and context	1840s - 1930s. Bungalows and c1920s stage of development. Early European survey and settlement in the regional areas around Adelaide; Agriculture, Flour Milling, Tertiary Industries, Communications, Road Transport, Water Transport, Social Services, Religion, Education, Local Government.
	Allotments, subdivision and built form patterns	Allotments perpendicular to gently curving roads that follow the line of the adjacent Onkaparinga River. Large allotments with large frontages.
	Architectural styles, detailing and built form features	Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian, Federation and Inter-War Bungalow stylistic influences. Public buildings such as school, former post office, former institute building (hall). Churches and cemeteries. Hotel and shops. Former flour mill. Transport-related structures such as bridges. Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: gable. Steeply-pitched, typically 30 to 40 degrees, (slightly lower for bungalows), reflecting traditional architectural styles and building methods. Short roof spans
	Building height	Predominantly single-storey, with some 2 storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger hotel and former school building are landmarks.
	Materials	Masonry - limestone, sandstone, bluestone - random rubble, some rendered elements Quoins - rendered, brick Roof - corrugated iron, gables with timber strapping Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts. Cream, dark green and muted-earth colours.
	Fencing	Randomly-laid stone. Post-and-rail. Timber picket. Woven wire Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Sited in a bend of the Onkaparinga River. Enclosed by prominent steep river embankments. Township edges defined by open space and national park. Self-contained village with a strong 'main street' character. Town square (former Market Square). Horseshoe Park.
	Representative Buildings	*[Not identified]*
Onka5	**Port Willunga Historic Area Statement (Onka5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s - 1930s. Early European survey and settlement in the regional areas around Adelaide; Agriculture, Tertiary Industries, Road Transport, Water Transport/Shipping, Social Services, Leisure Pursuits/Holidaymaking.
	Allotments, subdivision and built form patterns	Radiating layout from north-easterly point where Mindarie Street meets the original termination of William Street. Traditional grid pattern elsewhere. Based on gridiron pattern. Views of the hills to east down public streets.
	Architectural styles, detailing and built form features	Mid-to-late 1800s stone buildings. Informal inter-war holiday and fishing shacks. Post-war holiday houses. Recent dwellings that draw on the traditional form and scale. Informality in the appearance of many buildings arising from additions over time and variety in use of materials. Rectilinear plan form. Low-scale. Typically two or more pavilions rather than a single mass. High solid-to-void ratio. Concave and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: gable. Hipped. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans.
	Building height	Predominantly single-storey, some two-storey (but well-modulated). Single-storey has typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger former hotel is a landmark.
	Materials	Masonry - limestone, sandstone, weatherboard, some rendered masonry - random rubble. Quoins - rendered, brick. Roof - corrugated iron, slate, dark grey. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.
	Fencing	Picket. Post-and-rail. Post-and-wire. Hedges. Randomly-laid limestone up to 1.2 metres high. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Established trees - mature Aleppo Pines, Norfolk Island Pines, Casuarinas. Informal streetscapes often lined with established trees and shrubs.
	Representative Buildings	*[Not identified]*
	Aldinga Historic Area Statement (Onka6) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s - 1920s. Early European survey and settlement in the regional areas around Adelaide; Agriculture, Tertiary Industries, Communications, Road Transport, Social Services, Religion, Leisure Pursuits, Holidaymaking.
	Allotments, subdivision and built form patterns	Village centred on the intersection of Old Coach Road and Port Road. Large allotments perpendicular to the roads. Allotment sizes increase out from the centre of the township, emphasising the semi-rural environment. Substantial space between buildings. Buildings are sited relatively close to front boundaries and each other in the centre of the township but front and side setbacks increase as distance from the town centre increases. This pattern of development contributes to the sense of space and rural/country township character. Building frontages are parallel to streets becoming more random out from the centre of the township. Based on gridiron pattern.

Statement#		Statement
Onka6		Views of the hills to the east down public streets.
	Architectural styles, detailing and built form features	Mid-to-late 1800s stone buildings with Victorian stylistic influences. Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian stylistic influences. Hotel, former Temperance Inn, former Institute building (hall) and church are landmarks. Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: gable, hipped. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans.
	Building height	Predominantly single-storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger hotel and former school building are landmarks.
	Materials	Masonry - limestone, sandstone - random rubble. Quoins - rendered, brick. Roof - corrugated iron, Willunga slate. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.
	Fencing	Picket. Post-and-rail. Post-and-wire. Hedges. Randomly-laid limestone up to 1.2 metres high.
	Setting, landscaping, streetscape and public realm features	Established trees - mature Aleppo Pines, Norfolk Island Pines, Casuarinas.
	Representative Buildings	*[Not identified]*
Onka7	**Willunga Historic Area Statement (Onka7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Predominantly 1840s - 1900. Early settlement; Agriculture, Slate Quarrying.
	Allotments, subdivision and built form patterns	Original subdivision in the late 1830s. Second subdivision of southern part of the township in 1857. Laid out around High Street, the main thoroughfare through the town, which cuts diagonally through the original subdivision. Allotments perpendicular to High Street in centre of township. Grid pattern with allotments perpendicular to streets in southern section of township. Original allotments of around half an acre. Subsequent land division has occurred, but allotments remain relatively large. Early buildings line High street and the road out of Willunga to Aldinga and McLaren Vale. Rectilinear. Buildings aligned parallel to boundaries.
	Architectural styles, detailing and built form features	Simple, vernacular cottages. Mid-to-late 1800s stone buildings with Victorian stylistic influences. Double-fronted cottages, villas and asymmetrical cottages with Victorian stylistic influences. Shops and shop/dwellings with Victorian stylistic influences. Churches and cemeteries. Public buildings such as police station, courthouse, school, former post and telegraph office, post office, former Institute building (hall). Three hotels. Transport-related structures such as bridges. Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: hipped. Gable. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans.
	Building height	Variation in the size and sophistication of buildings, from humble cottages to two-storey dwellings and institutional or public buildings. Predominantly single-storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Smaller vernacular cottages. Hotels, former post and telegraph office, former police station and courthouse and former Institute (hall) are landmarks.
	Materials	Masonry - local sandstone, pug-with-lime render, some local brick - random rubble, squared. Quoins - stone, rendered, brick. Roof - corrugated iron, Willunga slate. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts. Consistent with the materials used in the 1840s-1900s buildings within the township.
	Fencing	Picket. Post-and-rail. Post-and-wire. Slate post-and-wire. Hedges. Randomly-laid stone up to 1.2 metres high. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.
	Setting, landscaping, streetscape and public realm features	Commercial and residential buildings indicative of the town's early settlement phase in the mid-1800s. Landmark two-storey buildings in High Street. Range of buildings and uses reflecting the composition of the town's community and enterprise. Town's foothill topography features creek lines. Substantial remnant gum trees. High degree of mature landscaping.
	Representative Buildings	*[Not identified]*

Historic Areas affecting Outback Areas (Out of Councils)

Ob1	**Blinman Historic Area Statement (Ob1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Minor service and accommodation centre.
	Allotments, subdivision and built form patterns	Original development patterns.
	Architectural styles, detailing and built form features	Original built form.
	Building heights	Original building heights and scales.
	Materials	Original materials and colours.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	The mine and grave yard are important historic sites and the mine area is also of scientific importance.
	Representative Buildings	*[Not identified]*
	Beltana Historic Area Statement (Ob2) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Small community and historic centre.

Statement#	Statement	
Ob2	Allotments, subdivision and built form patterns	Original development patterns.
	Architectural styles, detailing and built form features	A number of buildings in original or well-restored condition.
	Building heights	Original building heights and scales.
	Materials	Original materials and colours.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	*[Not stated]*

Historic Areas affecting Peterborough

Peterborough Historic Area Statement (Pet1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

PET1		
	Eras, themes and context	Turn of 20th century. Civic, commercial and retail. Railways.
	Allotments, subdivision and built form patterns	Traditional grid arranged around Main Street and the railway line.
	Architectural styles, detailing and built form features	Along Main Street and within the town centre, commercial buildings with traditional shopfronts, parapets and verandahs. Small, humble workers' accommodation, including single- and double- fronted cottages and row cottages. Villas. Traditional railway architecture including workshops and industrial buildings. Roof pitches between 30-45 degrees.
	Building height	Single storey with the exception of civic and hotel buildings and the Capitol Theatre .
	Materials	Local stone, masonry and corrugated iron.
	Fencing	Open fencing of a rural style not exceeding 1.2m.
	Setting, landscaping, streetscape and public realm features	Along Main Street and within the town centre, consistent setbacks and a strong building line with little interruption. Buildings square to the street. Visibility of the railway line. Dominance of the railways housing and administrative buildings within the railway reserve east of Hurlstone Street. Dominance of railway workshops and industrial buildings at the western end of the railway reserve. Dominance of religious buildings associated with three churches along Kitchener Street. Symmetry given to Main Street by trees where there is no built form. Definition and articulation of four corners created by hotel buildings. Wide streets with stone kerbing. Slate footpaths.
	Representative Buildings	Identified – refer to SA planning database.

Yongala Township Historic Area Statement (Pet2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

PET2		
	Eras, themes and context	Late 19th and early 20th century.
	Allotments, subdivision and built form patterns	Traditional grid land division pattern arranged around Main Street.
	Architectural styles, detailing and built form features	Along Main Street, traditional shopfronts with verandahs.
	Building height	Single storey with the exception of the Globe Hotel.
	Materials	Local stone, masonry and corrugated iron.
	Fencing	Open fencing of a rural style no more than 1.2m.
	Setting, landscaping, streetscape and public realm features	Silos and the Globe Hotel are landmark features. Consistent building setbacks from street frontages and the central unifying element of the grassed area on Main Street give the area cohesion.
	Representative Buildings	[Not identified]

Historic Areas affecting City of Playford

One Tree Hill Historic Area Statement (Play1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Play1		
	Eras, themes and context	1860s - Uniting Church & Cemetery, Cottages. 1900s - Institute & War Memorial.
	Allotments, subdivision and built form patterns	Orderly allotment configuration fronting Black Top Road. Varying front setbacks. Generous side setbacks.
	Architectural styles, detailing and built form features	Early symmetrical cottages of low scale and simple form. Institutional/community period buildings featuring simple gable form. Rectilinear plan forms. Moderate degree of modulation and articulation. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on domestic buildings. Short roof spans. Hip roof forms on domestic buildings. Gable roof form on institutional/community buildings. Short straight pitched verandahs on domestic buildings. Vertical proportions in windows and doors.
	Building heights	Low scale single storey domestic buildings. Single storey institutional/community buildings.
	Materials	Consistent with the materials used in the 1860s to 1900s period. Institutional/community buildings featuring local stone face, walls unpainted. Private buildings featuring rendered and painted walls. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building. Low open style fencing.

Statement#	Statement	
		Low stone fence and iron gate to Uniting Church.
	Setting, landscaping, streetscape and public realm features	Well established streetscape character, with notable landscaping.
	Representative Buildings	*[Not identified]*

Historic Areas affecting City of Port Adelaide Enfield

PAdE1

Alberton / Rosewater Historic Area Statement (PAdE1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1860 - 1950 built development.
Allotments, subdivision and built form patterns	Squares linked by wide streets. Modified grid pattern. Reasonably consistent allotment depths. Varied front setbacks.
Architectural styles, detailing and built form features	Wide range of housing styles including villas, bungalows, cottages, terrace and rows.
Materials	Materials consistent with the style of building and era of its original construction.
Building height	Single storey.
Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with 1920s including capped timber palings, post and wire or woven wire fences.
Setting, landscaping, streetscape and public realm features	Pockets of important early houses in Queen Street and King Street, dating from the 1860s. Substantial Victorian stone and brick houses grouped around two squares, Company Square and St Patricks Square, with good examples of substantial corner villas. The Alberton station complex is an important feature in the area and contains the earliest railway station in South Australia and shops of a consistent design. The double line of trees along the railway line that divides the area and the established street trees, particularly, Plane trees, Ash trees, Jacarandas, White Cedars and some mature Canary Island Date Palms make an important contribution to the character of the area.
Representative Buildings	Identified - refer to SA planning database.

PAdE2

Exeter Historic Area Statement (PAdE2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1860's - 1940's built development.
Allotments, subdivision and built form patterns	Grid pattern with narrow north-south running streets with the long axes of allotments running east -west. Allotments fronting Harris St, Exmouth Road and Semaphore Road configured with their long axes running north- south so that buildings address those roads. Generally built close to street with small front setbacks.
Architectural styles, detailing and built form features	Housing styles consisting of cottages, villas, bungalows, terraces and rows.
Materials	Materials consistent with the style of building and era of its original construction.
Building height	Predominately single storey but some scattered two storey.
Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated Victorian and Edwardian houses include pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with the 1920s including capped timber palings, post and wire or woven wire fences.
Setting, landscaping, streetscape and public realm features	The early cottages and neighbourhood shops with verandahs extending over the footpath and the Cooperative Building Society in Denman Street provide a reminder of the local village character of this area, catering for the needs of residents whose main means of transport was walking. A collection of intact early buildings characterised by stone and brick residences, early timber houses and later corrugated iron houses all retaining original detailing. A second small residential pocket on the south side of Semaphore Road which also has a local village character with single storey brick and stone cottages and a two storey hotel and paired terrace.
Representative Buildings	Identified - refer to SA planning database.

PAdE3

Semaphore / Largs Historic Area Statement (PAdE3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1860's - 1940's built development.
Allotments, subdivision and built form patterns	Grid pattern with predominately east-west running streets with the long axes of allotments running north-south. Allotments fronting the Esplanade and Military Road configured with their long axes running east-west so that buildings address these roads. Consistent front setbacks for each street but setbacks varying between streets. Varied allotment sizes.
Architectural styles, detailing and built form features	Wide range of housing styles from all periods of development of Semaphore and Largs including villas, bungalows, workers row cottages, terraces, rows, mansions and Tudors. Early timber and masonry houses.
Building height	Predominately single storey but scattered two storey and a small amount of three storey along parts of the Esplanade frontage.
Materials	Materials consistent with the style of building and era of its original construction. Timber and masonry housing.
Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
Setting, landscaping, streetscape and public realm features	A continuous run of high quality residential buildings set among mature Norfolk Island Pines along the Esplanade. The low scale of the Esplanade set against the open view of the sea opposite contains individual houses of historical and architectural importance built as seaside residences. An important sub-precinct along Military Road running from Fort Glanville through to Largs containing high quality public and private buildings. A concentration of early houses around Newman Street and Blackler Street associated with the development of Semaphore during the 1860s. Pockets of mature street planting providing important settings for these early houses, particularly along the Esplanade, Union Street, Clare Street, Hall Street and others.
Representative Buildings	Identified - refer to SA planning database.

Mainstreet Historic Area Statement (PAdE4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1850's - 1940's built development.
Allotments, subdivision and built form patterns	Focused around Commercial Road, St Vincent Street, Dale Street and Church Place. Allotments configured with their long axes running perpendicular to these roads. Allotments sizes vary to accommodate retail and commercial uses. Commercial buildings generally built to road frontages.
Architectural styles,	Commercial buildings featuring a fine grain fabric of small scale tenancies with narrow frontages. The extensive use of balconies and verandahs over footpaths.

Statement#	Statement	
PAdE4	detailing and built form features	
	Building height	Predominately single and two storey with a small number three and four storey buildings to the east of Commercial Road.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	The area is a commercial and retail focus. It acts as a buffer and an approach area to the Port Adelaide State Heritage Area noting that the boundary around the Port Adelaide State Heritage Area is relatively arbitrary and the Main street Policy Area contains some buildings that are of equal significance to buildings within the Port Adelaide State Heritage Area. It features a large number of early buildings, many of which have housed the same continuous functions since the time of their construction. The State Heritage listed St Paul's Church is a prominent building in the area and provides a land mark along a major view corridor from the Nelson St Bridge. Similarly, the State Heritage listed Uniting Church off Commercial Road is an important landmark and southern gateway to this area. The area contains a number of State Heritage places and many Local Heritage places.
	Representative Buildings	Identified - refer to SA planning database.
PAdE5	**Woolstores Historic Area Statement (PAdE5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880's - 1940's built development.
	Allotments, subdivision and built form patterns	Modified grid pattern with St Vincent Street and Bedford Street providing the main access roads into and out of this area. The southern and western boundaries of the grid are radiused by Brock Street and Barlow Street. The northern boundary is defined by Santo Parade, the northern side of which was previously an extension of Dock 1 and provided the woolstores with convenient access to cargo vessels. Woolstores and commercial buildings generally built to road frontages. Cottages close to and facing the road frontage. Medium to large allotment sizes.
	Architectural styles, detailing and built form features	Large purpose designed woolstores and warehouses featuring strong and robust built forms with parapet walls and saw tooth roofs. Simple, single storey workers cottages.
	Building height	Large masonry woolstores buildings ranging from single to four storeys. Single storey former workers cottages.
	Materials	Masonry and corrugated iron feature strongly and are key defining materials. Materials consistent with the style of building and era of its original construction.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	A key characteristic of this area is the compact group of large, well detailed warehouses associated with the wool export trade and located close to the dockside. The woolstores buildings are highly visible and prominent from eastern approaches into the Port Adelaide Regional Centre, particularly from Perkins Drive. The unimpeded visibility and prominence of these buildings is important. The area also contains a collection of primarily corrugated iron houses, mainly located between Aberdeen and Crozier Streets south of Brock Street. Some are identified as Local Heritage Places, dating from 1900 to 1920, which served as worker's housing for the nearby woolstores. These surviving houses are a remnant of a more consistent low scale residential area which contrasted visually with the adjacent imposing woolstores.
	Representative Buildings	Identified - refer to SA planning database.
PAdE6	**Semaphore Road Historic Area Statement (PAdE6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1870's - 1920's built development. Semaphore Road developed as a substantial commercial centre after the establishment of a railway line from Port Adelaide to Semaphore Jetty in 1878 and a subsequent increase in residential population in the area requiring goods and services.
	Allotments, subdivision and built form patterns	Semaphore Road is a wide east west road that in this area runs from Causeway Road to the Esplanade. Allotments are orientated so that buildings address Semaphore Road. Allotment sizes vary to accommodate a range of retail and commercial uses. Retail and commercial buildings built to and addressing the Semaphore Road frontage.
	Architectural styles, detailing and built form features	A variety of Government, institutional and commercial buildings including simple single storey shops with verandahs and parapet walls. Many of these shops retain post-supported verandahs over the footpath. There are pockets of well-preserved historic residential development featuring mansions, villas and cottages.
	Building height	Predominately single storey and two storey.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	None for retail and commercial buildings. Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms.
	Setting, landscaping, streetscape and public realm features	A popular main street that links Semaphore and Port Adelaide and provides a pleasant environment for both seaside holiday makers and residents. The seaward end of Semaphore Road retains strong evidence of Semaphore's original function as a transport and communications station for the early South Australian colony from 1850 onwards. The Time Ball Tower, Customs Boarding Station and the early Post Office building remain as an indication of these early services. The development of the Semaphore Town Hall, now the Library, and the RSL Hall continued the provision of community facilities, and these developed in association with the commercial areas of Semaphore road further to the east. This area is an important reminder of Semaphore's early prominence in the development of Port Adelaide and the State. A generous public foreshore provides a popular recreation area and the backdrop and view to the western end of Semaphore Road. The road is wide and features pedestrian areas, paving, upper canopy trees and low lying shrubs located in the median and verge, seating and public art. It is a well-established retail and commercial area that provides cafes, restaurants, shops, hotels, churches, a cinema and a range of other facilities. Many well maintained commercial and residential buildings from the 1880s to the 1920s remain in the area. There are many Local Heritage listed places along the length of the road and a number of State Heritage listed places in the western portion of the area.
	Representative Buildings	Identified - refer to SA planning database.
PAdE7	**Jetty Road Historic Area Statement (PAdE7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1870's - 1920's built development. The first subdivision of Largs was in 1873. The Largs Bay Land and Investment Company formed in 1881, constructed the jetty and built the Largs Pier Hotel by December of 1882.
	Allotments, subdivision and built form patterns	Allotments are orientated so that buildings have frontages to and address Jetty Road and the Esplanade. Generous rectangular allotments with wide frontages. Retail and commercial buildings built to and addressing road frontages.
	Building height	Single storey and two storey except at the Jetty Road / Esplanade intersection where development is three storey.
	Architectural styles, detailing and built form features	A mix of architectural styles including simple, single storey shops with over footpath verandahs and parapet walls and a double storey terrace with residential development over ground floor shops.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	None for retail and commercial buildings.
	Setting, landscaping, streetscape and public realm features	Located at the seaward end of Jetty Road, this area has strong links to the foreshore and beach and is a popular area for local residents and visitors. The State Heritage listed Largs Pier Hotel of Victorian (Italianate) architecture is a landmark building. Defining the corner of the Esplanade and Jetty Road, the Hotel, with its arcaded facades presents a prominent entry to this area.

Statement#		Statement
		The area also contains other early commercial and residential buildings including a former Post Office, two storey shops, and early housing. The latter includes a row of double storey terraces with small scale residential development located above shops.
	Representative Buildings	*[Not identified]*

Historic Areas affecting Port Pirie Regional Council

Port Pirie Historic Area Statement (PtPi1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

PtPi1	Eras, themes and context	Integral part of the Port Pirie Regional Centre. 19th and early 20th century.
	Allotments, subdivision and built form patterns	Buildings on Ellen Street and Alexander Street built to the allotment boundary. Traditional allotment pattern, frontages and widths.
	Architectural styles, detailing and built form features	Traditional designs, roof forms and building features such as verandas, awnings and balconies.
	Building height	One and two storeys.
	Materials	Original or otherwise complementary materials, colours and finishes.
	Fencing	Front fences and gates associated with traditional period, style and form of the building, up to 1.2 m in height.
	Setting, landscaping, streetscape and public realm features	The distinctive historic character is created and enhanced by the interaction between built form, spaces, plantings and general street pattern within the area.
	Representative Buildings	Identified - refer to SA planning database.

Crystal Brook Historic Area Statement (PtPi2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

PtPi2	Eras, themes and context	Integral part of Crystal Brook Town Centre.
	Allotments, subdivision and built form patterns	Traditional allotment pattern, frontages and widths.
	Architectural styles, detailing and built form features	Traditional designs, roof forms and building features such as verandas, awnings and balconies.
	Building height	Predominantly single storey with two storey structures in suitable locations.
	Materials	Original or otherwise complementary materials, colours and finishes.
	Fencing	Front fences and gates associated with traditional period, style and form of the building, up to1.2 m in height.
	Setting, landscaping, streetscape and public realm features	The distinctive historic character is created and enhanced by the interaction between built form, spaces, plantings and general street pattern within the area.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Prospect

Fitzroy Terrace Historic Area Statement (Pr1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Pr1	Eras, themes and context	Late 19th and Early 20th century mansion style housing.
	Allotments, subdivision and built form patterns	Very large spacious allotments with wide frontages. Sizable setbacks from all boundaries with sizable spaces between buildings. The established pattern of buildings sited away from allotment boundaries makes a significant contribution to the character.
	Architectural styles, detailing and built form features	Very large mansion style dwellings. Additions to the rear or side of dwellings. Range of designs with homogeneity derived from decorative front facades, pitched roofs, brick chimneys & front verandahs and building placement on allotments.
	Building height	Up to 2 storeys.
	Materials	Variety of materials and colour finishes with additional detailing around windows, doors and edges of walls.
	Fencing	Low open style to 1.2 metres high. Fencing that associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Substantial well landscaped gardens with front yards that complement the style of the dwelling. Landscaping around dwellings. The spacious streetscape character of Fitzroy Terrace is created by the large allotments on which have been built a range of equally large residences. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.

Clifton Street Historic Area Statement (Pr2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Pr2	Eras, themes and context	Late 1870s, late 19th speculative housing by local builder James Trevail for middle class home buyers.
	Allotments, subdivision and built form patterns	Original subdivisions of 1881, 1882 and larger allotments of 1894-95 at western end of street (known as Prospect View at the time of sale). Consistent, large front setbacks. Large and small asymmetrical side setbacks to dwellings. The set-back and pattern of coverage creates a notable streetscape with vistas and views towards the west.
	Architectural styles, detailing and built form features	Consistent front verandahs with highly decorative cast iron and timber trim, hipped and gabled pitched roofs and brick chimneys. 1880s-1890s residential designs along Clifton Street reflecting speculative subdivision. Double fronted cottages with central gable feature and front steps to raised finished floor levels to respond to the falling topography to the west.

Statement#	Statement	
	Building height	Single storey, moderate residential scale. Essentially single storey residences which take advantage of the sloping topography to the west.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls.
	Fencing	Low open style to 1.2 metres high with mainly masonry and iron materials.
	Setting, landscaping, streetscape and public realm features	Homogenous streetscape of houses and associated buildings. Substantial well landscaped gardens with front yards that complement the style of the dwelling. Narrow verge with mature street trees. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.
Pr3	**Little Adelaide Historic Area Statement (Pr3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Little Adelaide Village formed in late 1839. The section was bought by John Bradford an agent for Adelaide Mechanics Land Company. Most of the current homes are dated from the 1870s to 1890s.
	Allotments, subdivision and built form patterns	Is centred on a triangle created by Main North Road, Carter Street, Highbury Street and Argyle Street. Narrow allotments of varying widths and narrow streets. Small setbacks from all boundaries with compact spaces between buildings.
	Architectural styles, detailing and built form features	Coherent pattern of small cottages with common features including pitched roofs, brick chimneys & front verandahs. Single fronted and attached cottages are predominant, mainly from 1870-1890s. The village retains a church, corner shops (former) and other buildings typical of early village settlement.
	Building height	Single storey. Compact small single fronted and attached cottages.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Small front yards and limited space between buildings. Public realm characterised by narrow street and verge with limited room for landscaping. Village atmosphere. Where present, garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.
Pr4	**Whinham Street Historic Area Statement (Pr4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 19th century villas.
	Allotments, subdivision and built form patterns	Regular subdivision pattern. Consistent moderate street setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Consistent front verandahs with highly decorative cast iron and timber trim, hipped and gabled pitched roofs and brick chimneys. 19th century villas with face stone walls and gable ends, verandahs with cast iron or timber trim, steeply pitched corrugated iron roofs and elaborate rendered trim to window surround.
	Building height	Single storey, moderate residential scale. Additions are at the rear or side dwellings.
	Materials	Bluestone walls and limited external colour palette with detailing around windows, doors and edges of walls.
	Fencing	Low open style to 1.2 metres high which provides views to dwellings. Masonry and iron. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Substantial well landscaped gardens with front yards that complement the style of the dwelling. Narrow verge with mature street trees. Relative lack of high, solid fencing enables the principal elevation of the homes to be visible from the public realm. Homogenous streetscape of villas. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.
Pr5	**Flora Terrace Historic Area Statement (Pr5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 19th and early 20th centuries residential. Focus of commemoration of war service, civic activities and important sporting events.
	Allotments, subdivision and built form patterns	Regular subdivision pattern. Three separate land divisions between 1892 and 1923 - part of the Oxford subdivision of 1892 on south side of the Terrace with, part of St John's Wood South subdivision in 1909 on north side with larger allotments of and part of a 1923 division of the eastern end to the Memorial Gardens. Consistent setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Range of designs with range homogeneity derived from decorative front facades (detailing around windows, doors verandahs & gables), pitched roofs, brick chimneys & front verandahs. Houses display style, form and detail of the relevant periods of historic development - 1892 to the 1920s.
	Building height	Single storey and large residential scale.
	Materials	Face stone and brick walls and corrugated iron or terra cotta roofs.
	Fencing	Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and	Substantial front gardens.

Statement#	Statement	
	public realm features	Very leafy streetscape. Civic and residential character. Strong visual axis between the Town Hall and the Memorial Gates to Prospect Oval. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.
Pr6	**Martin Avenue Historic Area Statement (Pr6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Inter-War residential.
	Allotments, subdivision and built form patterns	Large allotments. Regular generous front setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Mix of bungalows, 'gentleman's residence' and Tudor homes. Range of designs with homogeneity derived from decorative front facades, pitched roofs, brick chimneys & front verandahs. Additions to the side and rear of dwellings.
	Building height	Single to two storey and large residential scale. Two storey additions are within the roof space or to rear of buildings.
	Materials	Face stone and brick walls and terracotta tiled roofs, original finishes.
	Fencing	Low open style to 1.2 metres high. Fences comprising low masonry plinth with regularly spaced columns and iron above to a medium height.
	Setting, landscaping, streetscape and public realm features	Large, well landscaped front yards as an extension of a green and leafy streetscape with mature canopy over grassed verges. Street trees and wide grassed verges combine with the generous setbacks to contribute to the spacious appearance of the public realm. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.
Pr7	**North Ovingham Historic Area Statement (Pr7)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 19th Century housing. 1877 - 1879.
	Allotments, subdivision and built form patterns	Small allotments subdivided in 1877 - 1879. Double fronted, narrow, deep allotments between Toronto Street and Cotton Street. Small setbacks from all boundaries with compact spaces between buildings.
	Architectural styles, detailing and built form features	Coherent pattern of small cottages with common features including pitched roofs, brick chimneys & front verandahs. Primarily double fronted cottages with central gable feature and front steps to raised finished floor levels to respond to the falling topography on individual allotments from east to west. Small symmetrically fronted or attached stone houses remain in Toronto Street and larger examples of similar style fronting Churchill Road.
	Building height	Single storey and small residential scale.
	Materials	Stone walls and steps facing stone and brick houses and attached cottages with verandahs, corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high associated with the design of the dwelling and allows gardens to spill onto the street.
	Setting, landscaping, streetscape and public realm features	Small front yards and limited space between buildings. Public realm characterised by narrow street and verge and moderate canopy cover from semi-mature street trees. Mature gardens which spill onto the street, pleasant green streetscape. Intimate, small residential pocket. Where present, garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	*Identified - refer to SA planning database*
Pr8	**Prospect Lanes Historic Area Statement (Pr8)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Reflects substantial areas of Prospect that were developed during the turn of the century (1880s to early 1900s) and constructing cottages and villa homes on higher areas overlooking Churchill Road and beyond.
	Allotments, subdivision and built form patterns	Regular subdivision pattern with consistent large frontages and site areas. The series of laneways that link the allotments are distinctive features within the sub division. Regular moderate front setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs. Cottages and villa homes on higher areas overlooking Churchill Road and beyond. Housing in the area displays a consistency of character reflecting the styles of domestic architecture at the turn of the century. Houses incorporate concave or bull-nosed verandahs and other typical detail and generally comprise face stone front walls, with brick or rendered quoins, and window and door dressings.
	Building height	Single storey.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Consistent moderate street setbacks. Large and small asymmetrical side setbacks to dwellings. Rear lane access, with primary streets having no access or access which has been designed and located to be subordinate to the main dwelling.
	Representative Buildings	*Identified - refer to SA planning database*
	Highbury Historic Area Statement (Pr9) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1882 subdivision. Turn of the century residential development. The area is characterised by primarily detached housing reflecting styles of domestic architecture at the turn of the century.
	Allotments,	Regular subdivision pattern with consistent large frontages and site areas.

Statement#	Statement	
Pr9	subdivision and built form patterns	Regular moderate front setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs. Characteristic design features such as bull-nosed verandahs, brick quoining, and stone front walls.
	Building height	Single storey and moderate residential scale.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high, providing visibility to landscaped front yards and dwellings.
	Setting, landscaping, streetscape and public realm features	Well landscaped front yards as an extension of a green leafy streetscape. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	*Identified - refer to SA planning database*

Ballville/Gloucester Historic Area Statement (Pr10)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Pr10	Eras, themes and context	Subdivided in 1878 by Henry Ball. Turn of century residential development. The area is characterised by primarily detached housing reflecting styles of domestic architecture at the turn of the century.
	Allotments, subdivision and built form patterns	Original subdivision with modest allotments with large frontages. Consistent moderate street setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Primarily detached housing reflecting styles of domestic architecture at the turn of the century. Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs.
	Building height	Single storey and moderate residential scale.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Limited landscaping and dominant built form from small front yards and narrow road verges. Gloucester Street has greener front yards and public realm. St Cuthbert's Anglican Church and its adjacent manse are prominent landmarks. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	*Identified - refer to SA planning database*

Medindie Gardens Historic Area Statement (Pr11)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Pr11	Eras, themes and context	Inter-War period housing. The area is predominated by bungalows to the east of Corbin Road and Tudor-style houses to the west. The majority of the original dwellings constructed prior to 1930 remain intact, with additions occurring over time either within the roof space or to the rear and side.
	Allotments, subdivision and built form patterns	Regular subdivision pattern of generously sized allotments and wide frontages. Consistent large front and side setbacks. The area retains its original subdivision pattern, with regular sized allotments supporting residential development at a low density.
	Architectural styles, detailing and built form features	Predominantly bungalows to the east of Corbin Road and Tudor-style houses to the west. Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs.
	Building height	Single storey and large residential scale. Two storey additions are within the roof space or to rear of buildings.
	Materials	Stone and brick walls and limited external colour palette with detailing (including glazed bricks) around windows, doors and edges of walls and corrugated iron or terra cotta roofs. Consistent use of materials including rock faced stone and masonry, face red brick, terracotta roof tiles or corrugated iron, glazed bricks for trim and other details and materials typical of the housing of the Inter-War Period.
	Fencing	Low open style (to 1.2 metres high). Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Large well landscaped front yards and tree lined streets above grassed verges. Minimal driveway and hard-surfaced areas. Consistent pattern of prestigious single storey detached dwellings on generous allotments fronting tree-lined street. Spacious and open feel. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	*Identified - refer to SA planning database*

Historic Areas affecting Robe

Robe Historic Area Statement (Ro1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

RO1	Eras, themes and context	19th century and early decades of 20th century. Shipping port, communication and administration township servicing pastoral development of the South East.
	Allotments, subdivision and built form patterns	Topography shapes the setting of Robe and land division pattern. Royal Circus is a low knoll. It is a commemorative landmarks and a distinct road feature. There is a legible connection between Royal Circus, the sea wall / jetty abutment, the Customs House and the Post and Telegraph Office. Main Road, Victoria Street and Mundy Street form the main line of road to the port and the main street. The traditional street grid pattern extends either side of Victoria Street, to the coastal fore-dune and across the ridge to the south which overlooks and forms the backdrop to the township. Most of the original large square allotments have been subdivided but the pattern of historic buildings remains legible.
	Architectural styles, detailing and built form features	Traditional stone commercial buildings with shopfronts, parapets and verandahs within the town centre. The variety rather than the consistency of traditional building forms is a distinct characteristic of Robe. Small workers' cottages on large allotments, often with low walls, hipped roofs spanning one or two rooms, casement windows and lime-washed or natural stone walls. Heritage listed community buildings (the primary school, churches and the Institute) are on prominent sites and remain as strong landmarks. Heritage-listed government buildings (the Post and Telegraph Office, Customs House and Court House) dominate Royal Circus. Massive stone chimneys are a characteristic feature of the historic buildings. Stone outbuildings are visible from public streets. Roof pitches between 25-35 degrees. Roofs with a high degree of articulation, steep pitches and small spans, provide a unique roofscape across Robe to Guichen Bay. Older buildings have casement windows. Later buildings have double-hung timber sash windows.
	Building height	Two storey buildings along small section of Smillie Street, and hotels. Their built form combines double and single storey elements and verandahs, articulating their bulk and scale. Adjacent buildings differ in style, creating a varied rather than a consistent skyline. Other historic buildings generally single storey, with small span hipped roofs. Building floor levels are close to, step with or are built into, the slope of the land.
	Materials	Local stone, limestone, rendered and bagged masonry with painted or lime wash finish. Painted timber weatherboard, painted timber joinery, trims, verandahs, barges and fascias. Galvanised and painted corrugated iron roofing. Some examples of slate and traditional flat metal roof tiles. Driveway materials are neutral in colour and pattern with natural finishes.

Statement#	Statement	
	Fencing	Local stone, hardwood palings and pickets, hardwood and woven wire, brush with round hardwood posts and hedges not exceeding 1.2m.
	Setting, landscaping, streetscape and public realm features	Views and vistas of the entrance to the town centre along Main Road past Lake Fellmongery and Lake Charra. Views of the foreshore area adjacent Town Beach and streetscapes of historic buildings of Smillie Street and Mundy Terrace. Views across the area illustrate the importance of native vegetation and the distinct character of the roof designs of historic buildings. Historic buildings square to and often close to street alignments, particularly on Smillie Street. Minimal breaks between buildings except where access to the rear of a site is provided. Streets, verges and reserves in the public realm characterised by Lakestone kerbing, limestone cuttings, landmark trees (Norfolk Island Pines in particular) and native vegetation. Important public open space reserves that frame the township at Lannum Reserve, the Institute / Town Beach Foreshore, Royal Circus and the southern edge of Lake Butler. Each has a distinct landscape structure, planting character and historic quality.
	Representative Buildings	[Not identified]

Historic Areas affecting Tatiara

Bordertown Historic Area Statement (Tat1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

TAT1	Eras, themes and context	1910-1930.
	Allotments, subdivision and built form patterns	Traditional grid. Large allotments.
	Architectural styles, detailing and built form features	Federation-style houses with asymmetrical plans and multiple decorative gables. California bungalows with veranda pylons and gables extending to the veranda perimeter. Low-pitched roofs.
	Building height	Single storey.
	Materials	Rock-faced sandstone walls and terracotta tiled roofs.
	Fencing	No fencing or open front fencing no more than 1.2m.
	Setting, landscaping, streetscape and public realm features	Rural setting. Landscaping surrounding dwellings.
	Representative Buildings	Identified – refer to SA planning database.

Historic Areas affecting City of Tea Tree Gully

Tea Tree Gully Township Historic Area Statement (TTG1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

TTG1	Eras, themes and context	The village core of Tea Tree Gully. Mid to late 19th Century to early 20th Century.
	Allotments, subdivision and built form patterns	Traditional subdivision layout focussed on North East Road as the major approach route to the township in both directions. Allotments are varied in size and shape. Regular moderate front setbacks and small setbacks from side boundaries. Generally consistent siting and space between buildings. Sites address North East Road.
	Architectural styles, detailing and built form features	Colonial style flat facades articulated with post-supported verandas. Symmetrical designs with simple footprints. Roof forms are generally hipped or gable roofs with pitches between 30-40 degrees. A mix of buildings including detached dwellings, churches, row shops, a war memorial, former police station, institute building, hotel, former bakehouses, flour mill and winery. Tea Tree Gully museum and former council chambers building as State Heritage Places. Historic homestead relics and a stone retaining wall in Pine Park.
	Building Height	Single storey, with the exception of the Old Flour Mill and Tea Tree Gully Museum.
	Materials	A combination of sandstone and bluestone construction with corners and window and door reveals formed with quoin work. Generally, all dwellings include corrugated roofs in galvanised or light to mid-tone greys, green or red. Unpainted stone / brick. Modern dwellings are consistent with the above materials, but also include a combination of raw brick, painted brick and rendered brick in natural, earthy colours. Timber windows.
	Fencing	Low, open fencing forward of the building line to height of 900mm. Associated with the traditional period, style and form of building. Hedges, timber picket, post and rail with woven wire, pailing or railing, stone, rendered brick or block.
	Setting, landscaping, streetscape and public realm features	Undulating and natural setting with minimal cut and fill, and extensive planting and landscaping. The Township provides for a visual transition between the rural landscape of the hills to the east and the suburban plains to the west. Angove's tower and cellar are recognised as landmark buildings and are important elements of the western gateway, including vistas of the tower. The North East Road entrance to Anstey Hill Recreation Park is also an important gateway and features historic building relics that line the entrance walk inside the park. The communal focal point is Haines Memorial Park, which features a European landscape theme surrounded by native street tree planting which illustrates the history of European settlement. Views to and from Haines Memorial park. Strong landscape setting dominated by undulating topography. Significant stands of native trees and intensively landscaped watercourse of Tea Tree Creek Discreet, low scale advertising comprising typefaces, colours, sizes and forms associated with the clear and simple styles used on the 19th and early 20th centuries, generally not illuminated.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Unley

Centres Conservation - Goodwood, King William and Fullarton Roads Historic Area Statement (Un1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Un1	Eras, themes and context	1880 to 1940's built development.
	Allotments, subdivision and built form patterns	Goodwood Road - prominent original imposing buildings, homogeneous historic nature and intrinsic features formed by the close-knit development to the street alignment, open balconies and verandahs extending over the footpath. King William Road - early era buildings and quaint unique close-knit character formed by the parade of buildings of narrow fronted shops to the street alignment, with simple continuous series of ornate parapet facades and verandahs over the footpath and some open balconies above. Fullarton Road - significant and early era residential forms of buildings with appropriate setbacks, low-key commercial uses adaptation and substantial landscaped frontages north of Cheltenham Street and small scale simple straight facade shopfronts to south. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks and spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian. Turn-of-Century. Inter-War. Complementary main street shopfronts, parapet walls and verandahs over footpaths and residential forms.
	Building height	Maximum two storey street presentation.
	Fencing	Fencing forward of the front façade of the building on Fullarton Road, of a form associated with the building and generally of low masonry pier and plinth, cast iron, brush, timber or similar nature.
	Setting, landscaping, streetscape and public realm features	Limited street trees, except Fullarton Road with dominant, well-established street trees. Goodwood Road - early commercial centre from the late nineteenth century comprising large imposing buildings, including landmark two-storey State Heritage Place, two-storey Local Heritage Place and Church buildings, and smaller narrow fronted premises. King William Road - early commercial centre from the late nineteenth century comprising some larger buildings and primarily small narrow fronted premises. Fullarton Road - residential buildings, some converted to community and commercial uses, and low-key, well landscaped gardens and State Heritage significant mansion 'Hughes Estate'.

Un2	**Residential Compact Goodwood Estate Historic Area Statement (Un2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1870 to 1900 built development.
	Allotments, subdivision and built form patterns	Simple grid layout pattern, with longitudinal axis perpendicular to narrow roads. Regular modest allotments and wide site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian double fronted, symmetrical and asymmetrical cottages. Complementary Victorian corner shops that are landmarks and features of the area. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.5 metres. Total Roof Height in the order of 5.7 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs in the order of 2.1 metre fascia height and 3.0 metre pitching height.
	Materials	Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated Iron roof cladding.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); Hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Compact streetscape character, simple grid of short and narrow streets, narrow verges, modest street trees. Goodwood Estate of 1875 a rectangular section of 30 acres (12.1 hectares) with regular layout of standard modest properties, some local corner shops, adjacent to facilities and services along Goodwood Road and the notable bisection in north by tramway corridor.
	Representative Buildings	Identified - refer to SA planning database.
Un3	**Residential Compact Parkside St Ann's Estate Historic Area Statement (Un3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860 to 1940 built development.
	Allotments, subdivision and built form patterns	Village initial layout and development in 1854. Tightly angled pattern of short and narrow streets. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing and garden landscape setting. Varied allotment sizes and site frontages reflective of the architectural era of the building.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century double fronted cottages and villas, single-fronted, attached and row cottages. Later complementary Inter-War styles, together with corner shop variations and institutional buildings, including school and church buildings. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.3 to 3.5 metres, total Roof Height in the order of 5.7 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs in the order of 2.1 metre fascia height and 3.0 metre pitching height.
	Materials	Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Rendered masonry. Corrugated Iron roof cladding.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Early village township of 1854 on edge of Adelaide Parklands with an angular layout following alignment of arterial roads. Compact streetscape character. Tightly angled pattern of short and narrow streets. Narrow verges. Modest street trees.
	Representative Buildings	Identified - refer to SA planning database.
Un4	**Residential Compact Forestville (North) Historic Area Statement (Un4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1930 built development.
	Allotments, subdivision and built form patterns	Simple grid layout pattern of roads, with longitudinal axis perpendicular to narrow roads. Regular large allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century double-fronted, single-fronted as well as attached cottages. Victorian and Turn-of-the-Century symmetrical and asymmetrical villas. Inter-War Bungalows. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.5 metres. Total Roof Height in the order of 5.7 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs in the order of 2.1 metre fascia height and 3.0 metre pitching height. Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes associated with the identified architectural styles.
	Materials	Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Rendered masonry. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Compact streetscape character. Simple grid of short and narrow streets. Narrow verges. Modest street trees.

Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Compact streetscape character, narrow verges, and modest street trees.
	Representative Buildings	*[Not identified]*
Un9	**Residential Grand Unley Park Heywood Estate Historic Area Statement (Un9)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860 to 1940's built development.
	Allotments, subdivision and built form patterns	Regular, very generous allotments and site frontages. Prevailing rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and grand garden landscape setting.
	Architectural styles, detailing and built form features	Victorian Villas and Mansions. Turn-of-the-Century Villas and Mansions. Inter-War period Bungalows, particularly Gentleman's Bungalows. Tudor, particularly Gentleman's Tudors. Old English, Georgian Revival and other International Styles. Individualised by original architectural inspirations. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Grand built scale and form of existing historic buildings.
	Materials	Consistent with the materials typically associated with the style and era of the dwelling. For example (but not limited to): stone with brick or rendered embellishments, iron roof and timber joinery for Victorian and Turn-of-the-Century; stone with brick embellishments, tiled roof and timber joinery for Bungalows; brick with rendered embellishments, tiled roof and timber joinery and gable details for Tudors, brick or render with restrained detailing, flat roof forms and timber, steel and/or concrete features for International Styles.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Wide streets and verges. Avenues of substantial street trees. Expansive allotments, street frontages with substantial well landscaped gardens including trees. Heywood Park a key feature at junction of key axis of King William Road and Northgate Street.
	Representative Buildings	*[Not identified]*
Un10	**Residential Grand Myrtle Bank Historic Area Statement (Un10)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1940 built development.
	Allotments, subdivision and built form patterns	Generous, wide, long street. Regular, very generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century grand villas. Inter-War era, primarily Bungalow but also Tudor, Art Deco, Mediterranean and complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Grand streetscape character. Generous wide street. Wide verges. Large street trees.
	Representative Buildings	*[Not identified]*
Un11	**Residential Spacious Millswood Page Estate Historic Area Statement (Un11)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900 to 1930's built development.
	Allotments, subdivision and built form patterns	Basic grid street layout around the central recreation feature of Goodwood Oval, but with long curvilinear and some truncated streets around the bisecting train lines previously laid in the 1870's. Spacious streetscape character of long, short and curved, wide, tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century villa styles. Primarily distinctive Inter-War period bungalows, art deco, Tudor and complementary later styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees.-Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on later style buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Simple grid of long, short and curved, wide, tree-lined streets. Large front gardens. Wide verges. Large street trees.

Un12	**Residential Spacious Millswood Wooldridge Estate Historic Area Statement (Un12)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1920 to 1940's built development.
	Allotments, subdivision and built form patterns	Short grid street layout of short, wide tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Central to this estate is the notable original homestead "Bella Vista" c1862. Late Inter-War period (between 1934 and 1940) in particular of bungalow, Tudor, art deco and complementary latter English domestic styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on later style buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Simple grid of short, wide, tree-lined streets. Large front gardens. Wide verges. Large street trees.
	Representative Buildings	*[Not identified]*
Un13	**Residential Spacious Unley and Malvern Trimmer Estate Historic Area Statement (Un13)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1920 built development.
	Allotments, subdivision and built form patterns	Spacious streetscape character of regular grid layout (with axial views focussed on the central oval feature) of wide, tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century villas (asymmetrical and symmetrical), double-fronted cottages and limited complementary, Inter-war era, styles. More affluent, original owners developed some larger, amalgamated allotments in the southern areas of Malvern establishing grander residences and gardens. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.
	Materials	Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Regular grid layout of wide tree-lined streets, with axial views along wide, tree-lined Cambridge Terrace and Oxford Street focussed on the central Unley Oval feature. Large front gardens. Wide verges. Large street trees.
	Representative Buildings	*[Not identified]*
Un14	**Residential Spacious Clarence Park Historic Area Statement (Un14)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1940 built development.
	Allotments, subdivision and built form patterns	Simple grid layout pattern of wider streets. Large allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century double-fronted cottages and villas. Inter-War era housing, primarily bungalow but also Tudor and art deco and complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Un22

Residential Spacious Wayville Historic Area Statement (Un22)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1880 to 1940 built development.
Allotments, subdivision and built form patterns	Simple grid layout of pattern of wider streets. Regular large allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century cottages, double-fronted and narrow-fronted styles, and villas. Inter-War era housing, primarily bungalow but also complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
Building height	Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.
Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Regular grid of wide streets. Wide verges. Large street trees.
Representative Buildings	*[Not identified]*

Un23

Residential Spacious Fullarton (West) Historic Area Statement (Un23)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1900 to 1940 built development.
Allotments, subdivision and built form patterns	Simple grid layout of pattern of wider streets. Regular allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
Architectural styles, detailing and built form features	Inter-War era housing, primarily bungalow, Tudor and art deco but also complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
Building height	Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.
Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Regular grid of wide streets. Wide verges. Large street trees.
Representative Buildings	*[Not identified]*

Un24

Residential Spacious Unley Park (West) Historic Area Statement (Un24)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1900 to 1940 built development.
Allotments, subdivision and built form patterns	Simple grid layout pattern of wider streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
Architectural styles, detailing and built form features	Turn-of-the-Century double-fronted cottages and villas. Inter-War era housing, primarily bungalow but also Tudor, art deco and complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
Building height	Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.
Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Regular grid of wide streets. Wide verges. Large street trees.
Representative Buildings	*[Not identified]*

Residential Spacious Malvern Highgate Fullarton and Myrtle Bank (South) Historic Area Statement (Un25)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1880 to 1940 built development.
Allotments,	Simple grid layout pattern, with longitudinal axis perpendicular to narrow roads. Regular large allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.

Statement#	Statement	
Un25	subdivision and built form patterns	
	Architectural styles, detailing and built form features	Victorian. Turn-of-Century. Inter-War. Hipped and gable roof forms, roof louvres, chimneys, open verandahs, feature ornamentation, (plasterwork, ironwork and timberwork), latticework and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Consistent scale and proportions of buildings including wall heights and roof designs to the streetscape.
	Materials	Sandstone. Bluestone. Brick, including glazed brick .Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. 	Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Modest verges. Large street trees.
	Representative Buildings	*[Not identified]*
Un27	**Residential Compact Parkside (South) Historic Area Statement (Un27)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1930 built development.
	Allotments, subdivision and built form patterns	Simple grid layout pattern of roads, with longitudinal axis perpendicular to narrow roads. Regular large allotment sizes and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century double-fronted, single-fronted as well as attached cottages. Victorian and Turn-of-the-Century symmetrical and asymmetrical villas. Inter-War Bungalows. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.5 metres. Total Roof Height in the order of 5.7 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs in the order of 2.1 metre fascia height and 3.0 metre pitching height. Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes associated with the identified architectural styles.
	Materials	Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Rendered masonry. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Compact streetscape character. Simple grid of short and narrow streets. Narrow verges. Modest street trees.
	Representative Buildings	*[Not identified]*
Un28	**Residential Spacious Fullarton Roseberry Estate Historic Area Statement (Un28)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840 to 1940 built development.
	Allotments, subdivision and built form patterns	Spacious streetscape character of regular grid of short, wide, tree-lined streets. Regular, generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Notable original homesteads include "Rosefield" c1842 and "Woodfield" c1883. Victorian and Turn-of-the-Century double fronted cottages and villas. Inter-War period primarily bungalows, and some unique Spanish mission and complementary later styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.
	Materials	Sandstone. Bluestone. Brick, including glazed brick. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on some post 1900s buildings.

Statement#	Statement	
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character from later 1921-1927 subdivision of original farms. Simple grid of short, wide, tree-lined streets. Large front gardens. Wide verges. Large street trees. Regular street-fronting dwelling format, primarily of detached dwellings, and complementary community buildings.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Victor Harbor

Victor Harbor Town Centre Historic Area Statement (ViH1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

ViH1		
	Eras, themes and context	1870s to 1890s era, a period of early development in Victor Harbor. 1920s to 1930s when Victor Harbor experienced a boom period as a holiday destination.
	Allotments, subdivision and built form patterns	Mostly grid pattern. The intersections of Ocean Street and Coral Street, Coral Street and Flinders Parade and the termination of the Railway Terrace at Warland Reserve are key elements of urban space within the area. No or minimal front and side setbacks.
	Architectural styles, detailing and built form features	Commercial premises in Ocean Street, institutional buildings in Coral Street and those supporting facilities associated with the terminus of the railway line along Railway Terrace. Late 1800s era shops (some with Inter-war additions), dwellings, shop/dwellings, town hall, institute/library, hotels, former banks, railway buildings and associated infrastructure. Victorian stylistic influences. Inter-War commercial and public buildings, some with Art-Deco and some with Stripped Classical stylistic influences. Low scale and simple form. Rectilinear plan form with steeply-pitched roof forms (typically 35 to 40 degrees) on 1800s and early 1900s era buildings, also comprising low-pitched roofs behind parapets on Inter-War buildings, reflecting traditional architectural styles and building methods. Short roof spans, minimising roof bulk. Concave, bullnose and straight-pitched verandahs on front and sometimes side facades reduce building bulk and scale and add visual interest. Lean-to forms are also common. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Prevailing one to two storeys. One or two three storey buildings on Coral Street and Flinders Parade.
	Materials	Limestone walls, some rendered masonry. Red brick or rendered quoin work and detail. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Corrugated iron or corrugated steel roofing. Variation in materials which assists in breaking down bulk and scale, adding visual interest.
	Fencing	Some timber picket fencing and corrugated iron fencing.
	Setting, landscaping, streetscape and public realm features	Commercial properties provide the main built form and are characteristically single or two-storey buildings aligning with the street boundary. Typically buildings are symmetrical in design with parapets, verandas and balconies over the footpath to further define the pedestrian nature of the area. The railway corridor with its associated buildings and infrastructure is a prominent landscape element.
	Representative Buildings	*[Not identified]*

Historic Areas affecting Wakefield

Edith Terrace / Wallace Street, Balaklava Historic Area Statement (WakR1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WAKR1		
	Eras, themes and context	1875-1930.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Face stone walls dressed with quoins; stuccoed raised parapets and stucco 'neoclassical' styled decoration/ elements to commercial premises. Framed shopfront windows and doors. Steeply pitched roof forms. Verandahs provided over footpaths.
	Building height	Single storey.
	Materials	Local stone, masonry, stucco, red brick quoins, corrugated iron, timber framed windows and doors and brick chimneys.
	Fencing	[Not stated]
	Setting, landscaping, streetscape and public realm features	Remnant 'Silent Cop' in intersection of two streets, locating the commercial centre of the town. Buildings square to and consistently set back from the street, creating a strong building line with little interruption. Minimal breaks between buildings except where access to the rear of a site is provided.
	Representative Buildings	[Not identified]

Scotland Street, Balaklava Historic Area Statement (WakR2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WAKR2		
	Eras, themes and context	1875-1915.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Villas, symmetrical and projecting gable front facades, face stone walls with quoins, vertically proportioned double-hung windows and doors and projecting gables with half-timbered facing, steeply pitched roofs with chimneys and bullnose verandahs.
	Building height	Single storey buildings.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fencing not exceeding 1.2m to Scotland Street and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Dwellings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]

Humphrey / Baker Streets, Balaklava Historic Area Statement (WakR3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Statement#	Statement	
WAKR3	Eras, themes and context	1875-1915
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Cottages with symmetrical facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors, steeply pitched gable or hipped roofs, masonry parapets to side-gable roofs, chimneys and bullnose verandahs and brick chimneys.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fences not exceeding 1.2m to Scotland Street and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]

Fisher / Charles Streets, Balaklava Historic Area Statement (WakR4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WAKR4	Eras, themes and context	1875-1925.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Cottages and villas with projecting gable front or symmetrical facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors, projecting gables with half-timbered facing, steeply pitched gable or hipped roofs, chimneys and bullnose and sloping verandahs.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]

Ralli / John Streets, Balaklava Historic Area Statement (WakR5)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WAKR5	Eras, themes and context	1905-1925.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Cottages and villas. Projecting gable front and symmetrical facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors and projecting gables with half-timbered facing, steeply pitched gable and hipped roofs, chimneys and bullnose and sloping verandahs.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	[Not stated]
	Representative Buildings	[Not identified]

Burney Street, Blyth (WakR6)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WAKR6	Eras, themes and context	1875-1930.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Villas with projecting gable front and symmetrical facades, face stone walls with quoins to openings and corners, vertically proportioned, double-hung windows and entry doors, projecting gables with half-timbered facing, steeply pitched roofs.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]

Harley Street, Blyth Historic Area Statement (WakR7)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

	Eras, themes and context	1875-1930.

Statement#	Statement	
WAKR7	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Shops with attached dwellings. Face stone walls dressed with quoins, stuccoed raised parapets to commercial premises, projecting gable fronts and bullnose verandahs to attached dwellings. Framed shopfront windows and doors, corrugated galvanised iron sheet cladding to walls and roofs. Chimneys. Steeply pitched roof forms. Deep pitched roof verandahs.
	Building height	Single storey.
	Materials	Local stone, masonry, stucco, red brick quoins, corrugated iron, brick chimneys.
	Fences	Timber picket fences forward of dwellings attached to shops no more than 1m in height.
	Setting, landscaping, streetscape and public realm features	Consistent setbacks and strong building lines with little interruption. Buildings square to the street. Minimal breaks between buildings except where access to the rear of a site is provided. Dwellings are consistently set back further from the street.
	Representative Buildings	[Not identified]
WAKR8	**March Street, Bowmans Historic Area Statement (WakR8)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1923. Railways.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Detached and semi-detached dwellings having face stone walls with quoins, vertically proportioned double-hung windows and entry doors, steeply pitched corrugated iron sheet half-gabled hipped roofs, chimneys and simple integrated pitched front verandahs.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Dwellings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]
WAKR9	**Main Street Brinkworth Historic Area Statement (WakR9)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1892-1920. Civic, commercial and retail.
	Allotments, subdivision and built form patterns	Wide allotments.
	Architectural styles, detailing and built form features	Symmetrical fronted and projecting gable fronted dwellings with face stone walls with quoins, vertically proportioned double-hung windows and entry doors, steeply pitched gabled or half-gabled hipped roofs with timber half facing, chimneys and bullnose front verandahs. Corrugated iron gable roofed shops with parapets or gables facing the street and period framed windows and re-entrant doorways.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, weatherboard and corrugated iron. Brick chimneys. Timber verandah posts.
	Fences	Timber and wire fences not exceeding 1.2m to Main Street and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Buildings square to the street with consistent front and side setbacks.
	Representative Buildings	[Not identified]
WAKR10	**Light Street, Hamley Bridge Historic Area Statement (WakR10)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1868-1930. Civic, commercial and retail.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Gable roofed shops with decorative parapets or gables facing the street and period framed windows and re-entrant doorways. Styles vary in detail from Victorian-era pediments to shops through to the early twentieth century mannerist styled detailing of banks and an art-deco styled, glass panel fronted corner shop. Dwellings south of Light Street recessed behind shops, with one room of the front facade projecting onto small gardens to the side of shops. Dwellings continue the built characteristics of attached shops: face stone walls with quoins, vertically proportioned double-hung windows and entry doors, steeply pitched gabled and half-gabled hipped roofs, projecting gables with half-timbered facing, chimneys and bullnose front verandahs.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors, brick chimneys, timber verandah posts.
	Fences	Picket and woven wire fences not exceeding 1.2m to Light Street.
	Setting, landscaping, streetscape and public realm features	Buildings sited close and square to the street.
	Representative Buildings	[Not identified]
	Hill / Archer Streets, Hamley Bridge Historic Areas Statement (WakR11) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

<tr><td colspan="2">Historic Areas affecting Town of Walkerville</td></tr>
<tr><td></td><td>Church Terrace Locality Historic Area Statement (Walk1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</td></tr>
</table>

<table>
<tr><th>Statement#</th><th>Statement</th></tr>
<tr><td>Walk1</td><td>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

<table>
<tr><td>Eras, themes and context</td><td>Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to late 1920s.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Very-low density and low-density residential development, with predominantly detached dwellings on wide allotments. Detached dwellings on hammerhead allotments or group dwellings with shared access at the rear with wide street frontage. Very large allotments fronting Church Terrace and St Andrews Street, slightly smaller allotments within the remaining parts of the area.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Built form is varied, covering a range of architectural periods including early stone villas and brick cottages such as those in the Lansdowne Terrace, together with Victorian and Edwardian architecture and later bungalows and Tudor houses. This historic character has been partially eroded through the development of semi-detached dwellings and other dwellings of uncomplimentary design and siting, reducing the areas available for landscaping to along the front and side of dwellings.</td></tr>
<tr><td>Building height</td><td>Generally single storey. Two storey additions to the rear of buildings or within the roof space and on larger sites with setbacks.</td></tr>
<tr><td>Materials</td><td>Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.</td></tr>
<tr><td>Fencing</td><td>Examples of original fencing with bluestone plinths and cast iron fence railings above remains. Low front fencing which provides some visibility to the historic built form, although brush fencing or solid pillars and plinths with open style inserts and gates appears in some locations.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Vegetation in private yards contributes positively to the overall visual amenity and street tree planting which includes Jacarandas, Golden Rain and Ash trees, particularly in Church Terrace and Devonshire Street also contributes positively to residential amenity.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>
</table></td></tr>
<tr><td>Walk2</td><td>Medindie Historic Area Statement (Walk2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

<table>
<tr><td>Eras, themes and context</td><td>Very-low and low density residential. 19th Century and early 20th Century.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Predominantly detached dwellings on large, wide allotments. Allotment sizes and building setbacks vary throughout the policy area, although there are patterns established in individual streets.</td></tr>
<tr><td>Architectural styles, detailing and built form features</td><td>Range of architectural styles and dwelling types from the late 19th Century and early 20th Century periods including early Victorian, high Victorian, Edwardian, Classic Revival and large bungalows, all set within large landscaped garden settings that enhance the presentation of the dwellings.</td></tr>
<tr><td>Building height</td><td>Predominantly single storey. Two storey additions to the rear of buildings or within the roof space with single storey appearance at the street. Two storey dwellings found on Robe Terrace and on larger sites with setbacks.</td></tr>
<tr><td>Materials</td><td>Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. Consistent early stone and brick dwellings on large sites with wide frontages to public roads.</td></tr>
<tr><td>Fencing</td><td>There is a distinctive lack of high, solid fencing and/or the use of open design of large gates to access long driveways has enabled the principal elevation of the historic homes and landscaped grounds to be visible from the public roads.</td></tr>
<tr><td>Setting, landscaping, streetscape and public realm features</td><td>Reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. Low-density residential development, with predominantly detached dwellings on allotments that are generous in width. Regular spacing between residential buildings that is primarily achieved through consistent setbacks from each side boundary. Formal avenues and regular spacing of street trees along road verges also make a positive contribution to the amenity of the area.</td></tr>
<tr><td>Representative Buildings</td><td>Identified - refer to SA planning database.</td></tr>
</table></td></tr>
<tr><td>Walk3</td><td>Walkerville Terrace Historic Area Statement (Walk3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. Statement#	Statement

Gilberton South Historic Area Statement (Walk5)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Walk5

Eras, themes and context	Turn of the century to early 1900s. Modest, single storey cottages.
Allotments, subdivision and built form patterns	Predominantly low density detached dwellings on wide allotments. Range of allotment sizes. Cottages on small allotments with narrow frontages adjacent the narrow residential streets.
Architectural styles, detailing and built form features	Mixture of architectural styles from turn of the century to early 1900s. Larger Victorian-era villas, bungalows and Tudor dwellings on the more spacious allotments with frontage to Walkerville Terrace, Park Terrace and Stephen Terrace.
Building height	Predominantly single storey. Two storey additions to the rear of buildings or within the roof space.
Materials	Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.
Fencing	Low fences allowing view to houses, except on Walkerville and Stephen Terraces where there are higher fences.
Setting, landscaping, streetscape and public realm features	There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. Large street trees and generous garden settings visible from the primary street frontage.
Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting Wattle Range

Penola - Riddoch Street, Penola (Town Centre) Historic Area Statement (WatR 1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WATR1

Eras, themes and context	Civic, commercial and retail.
Allotments, subdivision and built form patterns	Traditional grid.
Architectural styles, detailing and built form features	[Not stated]
Building height	Single and two storey.
Materials	Local stone and masonry.
Fencing	Open front fencing not exceeding 1.2m.
Setting, landscaping, streetscape and public realm features	The connection and approach to the State heritage area of Petticoat Lane and the vista towards the Catholic Church at the eastern end of Riddoch Street. Stone paving. Wide streets in original layout. Consistent setbacks and strong building line with little interruption. Buildings square to the street.
Representative Buildings	[Not identified]

Riddoch Street, Penola (Residential) Historic Area Statement (WatR 2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WATR2

Eras, themes and context	[Not stated]
Allotments, subdivision and built form patterns	Traditional grid.
Architectural styles, detailing and built form features	[Not stated]
Building height	Single storey.
Materials	Local stone, masonry, weatherboard and corrugated iron roofing.
Fencing	Open front fencing not exceeding 1.2m.
Setting, landscaping, streetscape and public realm features	The connection and approach to the State heritage area of Petticoat Lane and the vista towards the Catholic Church at the eastern end of Riddoch Street. Consistent setbacks and strong building lines with little interruption. Buildings square to the street.
Representative Buildings	[Not identified]

Historic Areas affecting City of West Torrens

Elston Street Historic Area Statement (WeTo1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

WeTo1

Eras, themes and context	1890s - 1920s.
Allotments, subdivision and built form patterns	Low to very low density site areas. Wide frontages. Detached dwellings on substantial allotments.
Architectural styles, detailing and built form features	Predominantly Federation villa style homes with examples of Bungalows and Art Deco dwellings. Bay windows. Hip, gable and Dutch gable roofs. Integrated and complementary verandahs / porticos. Simple façade detailing. Additions are generally located to the rear of the dwelling.
Building height	Generally single storey. Second storey within the roof space.
Materials	Stone. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick chimneys.
Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
Setting, landscaping, streetscape and	Strong uniformity of layout and buildings. Consistent side and rear setbacks, large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Regularly spaced trees.

Statement#	Statement	
	public realm features	Vehicle access has been design and located to preserve existing street trees.
	Representative Buildings	Identified - refer to SA planning database.
WeTo2	**Mile End Historic Area Statement (WeTo2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860s - 1920s.
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Wide frontages. Detached and semi-detached to allotments.
	Architectural styles, detailing and built form features	Predominantly detached Victorian villas with examples of Victorian semi-detached row dwellings; Victorian single fronted cottages Bungalows; Inter-war Art Deco dwellings; and Parapeted shopfronts. Bay windows. Gable and Dutch gable roofs. Steeply pitched hip roofs. Integrated and complementary verandahs / porticos. Additions are generally located to the rear of the dwelling.
	Building height	Generally single storey. Second storey within the roof space.
	Materials	Stone. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Leadlight windows. Iron and timber filigree. Red brick chimneys.
	Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Generous side and rear setbacks, maintaining large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Tree lined streets. Vehicle access has been design and located to preserve existing street trees. Vehicle access is via rear lanes where available.
	Representative Buildings	Identified - refer to SA planning database.
WeTo3	**Richmond Historic Area Statement (WeTo3)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900s - 1920s.
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Medium to low density. Rectangular shaped allotments with direct street frontage. Predominantly Row and semi-detached dwellings.
	Architectural styles, detailing and built form features	Predominantly Inter-war dwellings with examples of State Bank Bungalows and Art Deco dwellings. Half-hipped (hipped gable roofs). Hip roofs. Integrated and complementary verandahs/porticos. Additions are generally located to the rear of the dwelling.
	Building height	Up to 2 storeys.
	Materials	Consistent material palette. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick chimneys.
	Fencing	No fencing or low fencing facilitating views of the dwelling.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Consistent side and rear setbacks. Carports and garages are behind the main face of dwellings. Street trees. Vehicle access has been design and located to preserve existing street trees.
	Representative Buildings	Identified - refer to SA planning database.
WeTo4	**Rose Street Historic Area Statement (WeTo4)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1900s - 1920s.
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Rectangular shaped allotments with direct street frontage. Narrow and deep allotments. Predominantly semi-detached dwellings to allotments.
	Architectural styles, detailing and built form features	Strong uniformity in architectural style. Predominantly semi-detached Gothic workers cottages. Pitched roofs. Verandahs / porticos. Parapeted gable. Features associated with traditional era and style of buildings. Additions are generally located to the rear of the dwelling.
	Building height	Generally single storey. Second storey within the roof space.
	Materials	Strong uniformity in material palette. Stone. Brick. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Leadlight windows. Red brick chimneys.
	Fencing	No fencing or low fencing facilitating views of the dwelling. Timber picket to boundary.
	Setting, landscaping, streetscape and public realm features	Consistent front setbacks. Consistent side and rear setbacks. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Street trees. Vehicle access has been design and located to preserve existing street trees. Vehicle access from laneways, particularly Rose Street where there are no crossovers.
	Representative Buildings	Identified - refer to SA planning database.
WeTo5	**Torrensville East Historic Area Statement (WeTo5)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1890s - 1930s.
	Allotments, subdivision and built form patterns	Low to very low density site areas. Wide frontages. Narrow and deep allotments. Consistent and uniform allotment pattern.
	Architectural styles, detailing and built form features	Predominantly Victorian and Federation style villa and cottage dwellings with examples of Californian and State Bank Bungalows; Single fronted cottages; and Parapeted shopfronts. Hip, gable and Dutch gable roofs. Bay windows. Verandahs / porticos. Simple detailing. Window awnings. Additions are generally located to the rear of the dwelling.

Statement#	Statement	
	Building height	Generally single storey. Second storey within the roof space.
	Materials	Stone. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Tiled roofs. Timber windows. Iron and timber filigree. Red brick chimneys.
	Fencing	Low fencing to facilitate views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Consistent side and rear setbacks, large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Tree lined streets. Wide streets. Vehicle access has been design and located to preserve existing street trees.
	Representative Buildings	Identified - refer to SA planning database.
WeTo6	**Urban Corridor (High Street) Historic Area Statement (WeTo6)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1890s - 1920s.
	Allotments, subdivision and built form patterns	Linear pattern of development along Henley Beach Road. Medium density site areas. Narrow/deep tenancies. Continuous shopfronts. Fine grained.
	Architectural styles, detailing and built form features	Predominantly ornate parapeted, glazed shopfronts. Pedimented parapets. Hidden roof forms. Elaborate parapet treatments. Traditional verandahs. Ornamental timber verandah posts. Additions are generally located to the rear of the building.
	Building height	Predominantly single storey. Two storey on corner allotments.
	Materials	Rendered masonry. Stone. Masonry. Brick. Timber shopfronts. Corrugated pre-coloured or galvanised iron sheeting. Pressed Metal. Timber verandahs. Materials, finishes and colours associated with of original eras and styles.
	Fencing	*[Not stated]*
	Setting, landscaping, streetscape and public realm features	Commercial Strip. Continuous shopfronts. No setback to front boundary. Verandahs over footpath. Tree lined streets. Intimate and engaging public interface
	Representative Buildings	Identified - refer to SA planning database.
Historic Areas affecting District Council of Yankalilla		
Ya1	**Rapid Bay Historic Area Statement (Ya1)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Rapid Bay is historically significant because of its connection with the first mainland landing by Colonel Light and his survey team in 1836 and has very strong connections and cultural significance for Aboriginal descendants being a popular fishing and summer occupation site, burial ground and Tjilbruke Dreaming site. 1948-1949 (School added in 1950). Encompasses housing established by BHP as part of mining/quarrying operations to the west as well as historic buildings and items at the southern end of the town. Rapid Bay's built character and landscape setting reflects the influence of BHP's extractive industry, which was established during the 1940s with the establishment of a limestone quarry, crushers and loading jetty. Houses were built for employees. At the peak of construction homes were built for BHP by Fricker Bros using local stone and Wattle Flat bricks. A further 16 houses were built during 1949/50 on the eastern side of the township and the primary school officially opened in 1950. BHP stopped operations in June, 1962, and sold houses on the eastern side of Rapid Bay for private ownership. Adelaide Brighton Cement recommenced quarry operations in 1982, providing local jobs and stone products for the Highways Department, local councils and private contractors amounting to 12,000 tonnes annually. The operations have resulted in moving the shore line westward, as 30% of screenings were deposited in the area. Consequently the setting of the township with company housing divided by the Yattogolinga Creek and school oval, has a unique landscape setting and character.
	Allotments, subdivision and built form patterns	Rapid Bay has two residential enclaves which are divided by Yattogolinga River and the town oval. The western section of the town is laid out around the main entrance road and comprises eighteen houses, a former general store and meeting hall. These are without individual subdivision allotments. The eastern section includes fifteen houses either side of Cygnet Place and the primary school. They are constructed on allotments of approximately the same size and are set back the same distance from the road. Allotment sizes provide narrower frontages at the end of the cul-de-sac.
	Architectural styles, detailing and built form features	Semi bungalow in design with painted hipped corrugated roofs, simple and return verandahs, windows surrounds comprising painted concrete lintels and window sills. The 15 houses in Cygnet Place were designed using one of six house plans prepared by BHP Limited. They are either five or six room dwellings and some have sleep-outs attached. On the western side, company dwellings range from simple detached, hipped or gable roof designs to a row of larger stone and brick houses with expansive verandahs facing the sea and overlooking the coastal area.
	Building height	All buildings in the township are of single storey, low scale character on generous allotments.
	Materials	Materials used in housing construction include varying combinations of red brick, concrete brick and stone or limestone.
	Fencing	There is a row of low rendered walls along the front of one group of allotments in Cygnet Place which overlook the sea, but all other allotments have wire mesh front fences and corrugated iron side and rear fences.
	Setting, landscaping, streetscape and public realm features	The streets are well treed, and although Norfolk Island pines are not the only species, they are the most dominant. The extension of the main entrance road which leads through the western residential area and then branches off towards the quarry is divided by a wide median strip in which Norfolk Island pines and pyramid trees have been planted alternately. About a third of the way along this street a road branches off towards the beach to provide access to the jetty, the foreshore caravan park and camping area and the eastern residential area. Trees have been planted along all these routes and the embankments along the roads have been planted with shrubs, flowers and ground cover. The mouth of the Yattagolina River, which is located near the junction of these three routes, is shallow and filled with reeds. The jetty and the quarry works dominate the western end of the beach.
	Representative Buildings	*[Not identified]*
Ya2	**Randalsea Historic Area Statement (Ya2)** The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Established during the first phase of settlement (1836-1861). A sharp distinction is evident between the unformed groupings of buildings set within the township proper, and the bare hillsides surrounding the town. Randalsea comprises a small rural village founded in the 1836-1861 settlement period of SA around two industries- a steam mill and sawmilling. The historic significance of the village lies in the integrity, age and condition of the original buildings and landscape setting. The settlement's corner setting in Second Valley has been described as 'aesthetically one of the most pleasing heritage environments in South Australia'.
	Allotments, subdivision and built form patterns	Historic division pattern is maintained around the intersection of Main South Road and Finniss Vale Drive. A range of allotments of various configurations and sizes east and west of Main South Road.
	Architectural styles, detailing and built form features	A compact group of small scale, single storey cottages and buildings with randomly aligned frontages to the original road (Gamlen Place), with Randall's cottage and Palm House a former boarding house located west at a distance from the group. The Institute building, school house, school, and Florence's Guest House are higher set on the southern side of Finnis Vale Road. Leonard's Mill, with ancillary buildings is a visually dominant building on the eastern side of Main South Road. The former Mill is State Heritage listed.
	Building height	Predominantly single storey heights, in small scale buildings. The State Heritage listed Leonard's Mill provides a dominant element on the south-eastern side of Main South Road opposite Gamlen Place. Palm House presents a single storey appearance to Finnis Vale Drive but is two storey given the building is cut into the side of the slope that falls away from the road to the creek like north of the road.
	Materials	Dominant materials include stone walling, timber fenestration and entrances, slate flooring and corrugated iron roofing. More recent materials include colorbond roofing, mini-orb iron sheeting, brick and rendered surfaces. Evidence of early gum slab construction noted in outbuilding.
	Fencing	Minimal fencing retaining an open feel to the shared spatial arrangements of buildings and gardens. A section of existing stone walling on the southern side of the road intersection and some post and wire fencing maintains the informal and open spatial character of the village.
	Setting, landscaping, streetscape and public realm features	Randalsea is nestled at the bottom of the Parananacooka River at its junction with a smaller tributary. A scattered collection of buildings are located along the valley floor, with trees and grazing land rising steeply behind to the ridge lines which form a contrasting rural backdrop. The public realm includes a creek side reserve and higher level park with walkway in the vicinity of a fenced War Memorial set higher than the Finniss Vale Road.
	Representative	*[Not identified]*

Historic Shipwrecks Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Historic shipwrecks and historic relics are protected from encroaching development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Development is located and designed to avoid potential impacts on historic shipwrecks and historic relics.	DTS/DPF 1.1 Development involving impact to the surface or subsoil of land or sea/river floor is not located: (a) seaward of the mean high water mark or (b) within 15m landward of the banks of the River Murray.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the development, in the opinion of the relevant authority, would not substantially impact the shipwreck (or associated relics) and would not warrant a referral when considering the purpose of the referral, any of the following classes of development: (a) development that may involve impact to the surface or subsoil of land or the floor of a sea, lake or river.	Minister responsible for the administration of the *Historic Shipwrecks Act 1981*.	To provide expert assessment and direction to the relevant authority on the potential impacts of development on, or in proximity to, historic shipwrecks or relics protected under the relevant Act.	Development of a class to which Schedule 9 clause 3 item 5 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Except where the development, in the opinion of the relevant authority, would not substantially impact the shipwreck (or associated relics) and would not warrant a referral when considering the purpose of the referral, any of the following classes of development: (a) development that may involve impact to the surface or subsoil of land or sea floor, where located partly or fully within the 'adjacent area' of a historic shipwreck or historic relic within the meaning of the *Underwater Cultural Heritage Act 2018* (Commonwealth) as shown on the Historic Shipwrecks Overlay.	Commonwealth Minister responsible for the administration of the *Underwater Cultural Heritage Act 2018* (Commonwealth).	To provide expert assessment and direction to the relevant authority on the potential impacts of development on, or in proximity to, historic shipwrecks or relics protected under the relevant Act.	Development of a class to which Schedule 9 clause 3 item 6 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Infrastructure Coordination Overlay

Assessment Provisions (AP)

Desired outcome (DO)

Desired Outcome	
DO 1	Development is consistent with and will not compromise efficient delivery of infrastructure provided for under an infrastructure delivery scheme.
DO 2	Coordination of infrastructure and the strategic use of land with necessary services and infrastructure.

Performance Outcomes (PO)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Infrastructure Delivery Scheme	
PO 1.1 Development is consistent with the location and form of infrastructure provided for under an infrastructure delivery scheme established under Part 13 of the *Planning, Development and Infrastructure Act 2016*.	DTS/DPF 1.1 Development satisfies one of the following: (a) does not comprise the division of land (b) does not involve building work comprising a non-residential use, except for where such a use would represent a continuation of an existing or rural land use (c) does not result in more than 1 dwelling on an existing allotment (d) development which will occur in accordance with an agreement under section 123 of the *Planning, Development and Infrastructure Act 2016*.
PO 1.2 The delivery of infrastructure occurs in accordance with the relevant Concept Plan.	DTS/DPF 1.2 Infrastructure is delivered in accordance with the infrastructure type and location shown on any relevant Concept Plan. The following concept plans are relevant: **Description** Concept Plan 160 - Concordia Growth Area: Basic Infrastructure Concept Plan 164 - Sellicks Beach: Basic Infrastructure
PO 1.3 Development does not conflict with or compromise planned infrastructure.	DTS/DPF 1.3 Development satisfies one of the following:

	(a) does not comprise the division of land (b) does not involve building work comprising a non-residential use, except for where such a use would represent a continuation of an existing or rural land use (c) does not result in more than 1 dwelling on an existing allotment (d) development is located wholly outside of land which has been identified for the provision of infrastructure shown on any relevant concept plans. The following concept plans are relevant: **Description** Concept Plan 160 - Concordia Growth Area: Basic Infrastructure Concept Plan 164 - Sellicks Beach: Basic Infrastructure
PO 1.4 Development is consistent with the capacity of existing or planned infrastructure and servicing networks, or can demonstrate that infrastructure and servicing requirements can be accommodated without compromising the delivery, timing, or cost of infrastructure identified in an infrastructure delivery scheme.	DTS/DPF 1.4 Development satisfies one of the following: (a) is located within an area where infrastructure capacity has been confirmed by the relevant Scheme Coordinator (b) is supported by a servicing report or infrastructure assessment demonstrating that: (i) infrastructure capacity is sufficient to accommodate the proposed development or (ii) infrastructure upgrades required to support the development are feasible, sequenced appropriately, and consistent with the relevant infrastructure delivery scheme.
Social Infrastructure	
PO 2.1 Social infrastructure, including health, education, community facilities, police, justice or emergency services facilities, is delivered in accordance with the relevant Concept Plan.	DTS/DPF 2.1 Social infrastructure is delivered in accordance with the size and location of social infrastructure shown and nominated on any relevant Concept Plan. The following concept plans are relevant: **Description** Concept Plan 161 - Concordia Growth Area: Land Use
PO 2.2 Development does not compromise or conflict with planned social infrastructure.	DTS/DPF 2.2 Development satisfies one of the following: (a) does not comprise the division of land (b) does not involve building work comprising a non-residential use, except for where such a use would represent a continuation of an existing or rural land use (c) does not result in more than 1 dwelling on an existing allotment (d) is located wholly outside of land which has been identified for the provision of social infrastructure shown on any relevant concept plans. The following concept plans are relevant: **Description** Concept Plan 161 - Concordia Growth Area: Land Use

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
A class of development in an area where an infrastructure delivery scheme has been established under Part 13 of the *Planning, Development and Infrastructure Act 2016* and that does not satisfy Infrastructure Coordination Overlay DTS/DPF 1.1, except where: (a) the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral or (b) the development has been granted outline consent.	Scheme Coordinator established under section 165 of the *Planning, Development and Infrastructure Act 2016* in relation to an infrastructure delivery scheme in operation in the area affected by this overlay	To provide direction to the relevant authority in relation to: (a) whether development is consistent with the provision of infrastructure associated with the relevant infrastructure delivery scheme (b) whether development compromises or conflicts with the provision of infrastructure provided for under an infrastructure delivery scheme (c) infrastructure capacity and servicing associated with a development within the scheme area (d) whether contributions or other conditions are required in accordance with the relevant infrastructure delivery scheme.	Development of a class to which Schedule 9 clause 3 item 8A of the *Planning, Development and Infrastructure (General) Regulations 2017* applies.

Interface Management Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development of sensitive receivers in a manner that mitigates potential adverse environmental and amenity impacts generated by the lawful operation of neighbouring and proximate land uses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Sensitive receivers are carefully sited and designed to mitigate adverse impacts of hazards, noise, dust, odour, light spill or other emissions from existing legally operating land uses through design techniques such as: (a) locating residential accommodation the greatest distance practicable from the source of the impacts (b) locating buildings containing non-sensitive receivers between the source of the impacts and sensitive receivers (c) placing rooms more sensitive to air, noise and odour impacts (e.g. bedrooms) further away from the source of the impacts (d) providing private or common open space adjacent a building elevation that shields the space from the source of the impacts.	DTS/DPF 1.1 None are applicable.

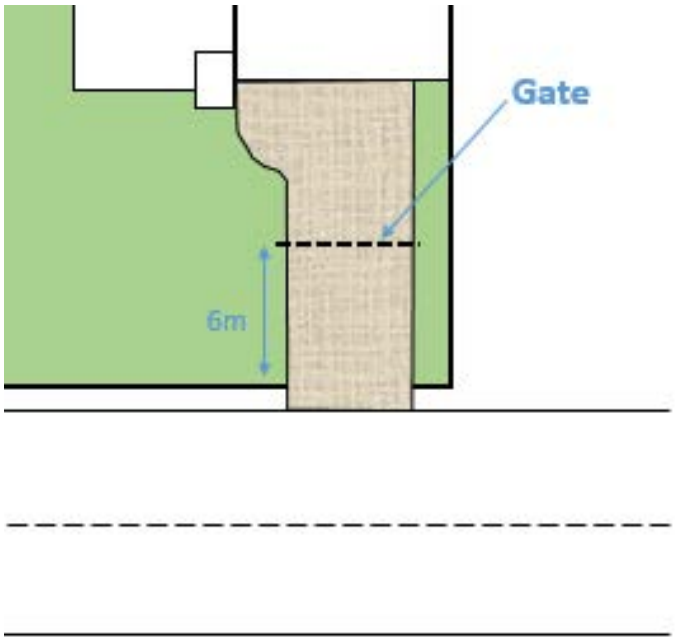
Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Key Outback and Rural Routes Overlay



Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient movement of vehicle and freight traffic on Key Outback and Rural Routes.

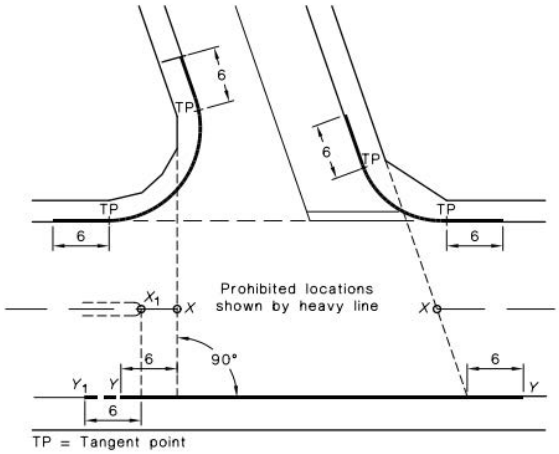
DO 2	Provision of safe and efficient vehicular access to and from Key Outback and Rural Routes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Access - Safe Entry and Exit (Traffic Flow)	
PO 1.1 Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State maintained roads.	DTS/DPF 1.1 An access point satisfies (a), (b) or (c): (a) where servicing a single dwelling / residential allotment all of the following are satisfied: (i) it will not result in more than one access point (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 3m and 4m (measured at the site boundary). (b) where the development will result in 2 and up to 6 dwellings all of the following are satisfied: (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site). (c) where the development will result in 7 or more dwellings, or is a non-residential land use all of the following are satisfied: (i) it will not result in more than one access point servicing the development site (ii) where on a road with a speed limit of 80 km/h or greater vehicles can enter and exit the site using left turn only movements (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (v) it will have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less (vi) it will have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m (vii) it will have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m (viii) it provides for simultaneous two-way vehicle movements at the access: A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road and B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.
Access - On-Site Queuing	
PO 2.1 Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site to minimise interruption of the functional performance of the road and maintain safe vehicle movements.	DTS/DPF 2.1 An access point satisfies (a), (b) or (c): (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:  (b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and all of the following are satisfied: (i) is expected to be serviced by vehicles with a length no greater than 6.4m (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site). (c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and all of the following are satisfied: (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) (iii) any termination of or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the largest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram: 
Access - Location (Spacing) - Existing Access Points	
PO 3.1 Existing access points designed to accommodate the type and volume of traffic likely to be generated by development.	DTS/DPF 3.1 An existing access point satisfies (a), (b) or (c):

(a) it will not service, or is not intended to service, more than 6 dwellings
(b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access
(c) it is not located on a Controlled Access Road and development constitutes one or more of the following:
  (i) a change of use between an office <500m² gross leasable floor area and a consulting room <500m² gross leasable floor area or vice versa
  (ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment
  (iii) a change of use from a consulting room or office <250m² gross leasable floor area to shop <250m² gross leasable floor area
  (iv) a change of use from a shop <500m² gross leasable floor area to a warehouse <500m² gross leasable floor area
  (v) an office or consulting room with a gross leasable floor area <500m²
  (vi) a change of use from residential dwelling to a shop or office or consulting room or personal or domestic services establishment with <250m² gross leasable floor area.

Access - Location (Spacing) - New Access Points



PO 4.1

New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1

A new access point satisfies (a), (b) or (c):

(a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

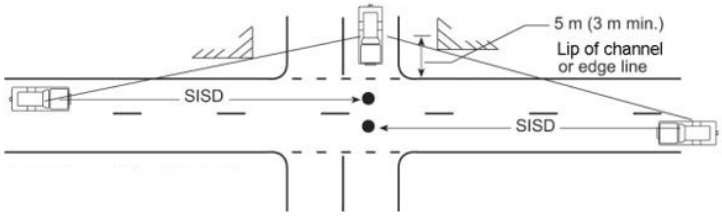
NOTE:
The points marked X_1 and X are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension Y-Y extends to Point Y_1.

(b) where the development site is intended to serve between 1 and 6 dwellings, the new access satisfies all of the following:
  (i) is not located on a Controlled Access Road
  (ii) is not located on a section of road affected by double barrier lines
  (iii) will be on a road with a speed environment of 70km/h or less
  (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
  (v) is located a minimum of 6m from a median opening or pedestrian crossing.
(c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

Speed Limit	Separation between access points	Separation from public road junctions and merging/terminating lanes
50 km/h or less	No spacing requirement	97m
60 km/h	5m (for development intended to serve between 1 and 6 dwellings) and 20m for all other cases	123m
70 km/h	55m	151m
80 km/h	70m	181m
90 km/h	90m	226m
100 km/h	110m	262m
110 km/h	135m	300m

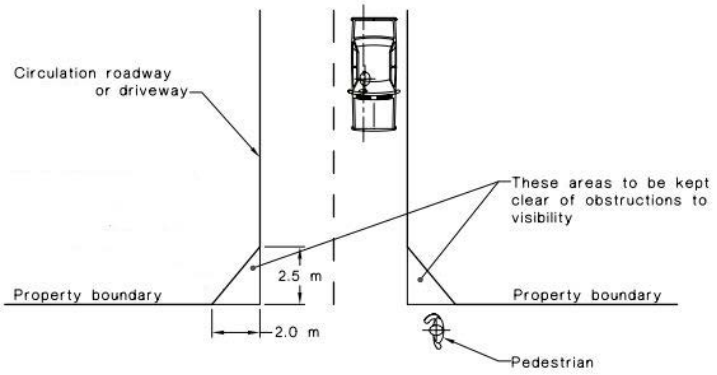
Access - Location (Sight Lines)

PO 5.1



Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.

DTS/DPF 5.1



An access point satisfies (a) and (c) or (b) and (c):

(a) the development site serves or is intended to serve between 1 and 6 dwellings and utilises an existing access point
or
(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

Speed Limit	Access Point serving 1-6 dwellings	Access point serving all other development
40 km/h or less	47m	73m
50 km/h	63m	97m
60 km/h	81m	123m
70 km/h	100m	151m
80 km/h	121m	181m
90 km/h	144m	226m
100 km/h	169m	262m
110km/h	195m	300m

and
(c) pedestrian sightlines in accordance with the following diagram:

	
Access - Mud and Debris	
PO 6.1 Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.	DTS/DPF 6.1 Where the road has an unsealed shoulder and the road is not kerbed, the access way is sealed from the edge of the seal on the road for a minimum of 10m or to the property boundary (whichever is closer).
Access - Stormwater	
PO 7.1 Access points are designed to minimise negative impact on roadside drainage of water.	DTS/DPF 7.1 Development does not result in any of the following: (a) decrease the capacity of an existing drainage point (b) restrict or prevent the flow of stormwater to an existing drainage point system (c) result in access points becoming stormwater flow paths directly onto the road.
Building on Road Reserve	
PO 8.1 Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users.	DTS/DPF 8.1 No encroachment of buildings or structures onto, above or below the road reserve.
Public Road Junctions	
PO 9.1 New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road opening conditions are maintained on the State Maintained Road.	DTS/DPF 9.1 Development does not comprise any of the following: (a) creating a new junction with a public road (b) opening an unmade public road junction (c) modifying an existing public road junction.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land, but not an excluded land division) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road: (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Key Railway Crossings Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe, efficient and uninterrupted operation of key railway crossings.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Access, Design and Function	
PO 1.1 Site access does not interfere or impact on the safe operation of a railway crossing.	DTS/DPF 1.1 Development does not involve a new or modified access or cause an increase in traffic through an existing access that is located within the following distance from a railway crossing: (a) 110 km/h road - 190m (b) 100 km/h road - 165m (c) 90 km/h road - 140m (d) 80 km/h road - 110m (e) 70 km/h road - 90m (f) 60 km/h road - 70m (g) 50km/h or less road - 50m

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Limited Dwelling Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Establishment of additional dwellings in primary production areas is limited to avoid undermining primary production.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Development does not result in the establishment of a dwelling.	DTS/DPF 1.1 A new dwelling replaces an existing dwelling within the same allotment.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Limited Land Division Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	The long term use of land for primary production is maintained by minimising fragmentation through division of land.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Land division does not result in the creation of an additional allotment.	DTS/DPF 1.1 No additional allotments are created.
PO 1.2 Land division involving boundary realignments occurs only where the number of resulting allotments with a site area less than that specified in the relevant Zone is not greater than the number that existed prior to the realignment.	DTS/DPF 1.2 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Local Heritage Place Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development maintains the heritage and cultural values of Local Heritage Places through conservation, ongoing use and adaptive reuse.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 The form of new buildings and structures maintains the heritage values of the Local Heritage Place.	DTS/DPF 1.1 None are applicable.
PO 1.2 Massing, scale and siting of development maintains the heritage values of the Local Heritage Place.	DTS/DPF 1.2 None are applicable.
PO 1.3 Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the Local Heritage Place.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is consistent with boundary setbacks and setting.	DTS/DPF 1.4 None are applicable.
PO 1.5 Materials and colours are either consistent with or complement the heritage values of the Local Heritage Place.	DTS/DPF 1.5 None are applicable.
PO 1.6 New buildings and structures are not placed or erected between the primary or secondary street boundaries and the façade of a Local Heritage Place.	DTS/DPF 1.6 None are applicable.
PO 1.7 Development of a Local Heritage Place retains features contributing to its heritage value.	DTS/DPF 1.7 None are applicable.
Alterations and Additions	
PO 2.1 Alterations and additions complement the subject building and are sited to be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the Local Heritage Place or its setting.	DTS/DPF 2.1 None are applicable.
PO 2.2	DTS/DPF 2.2

Adaptive reuse and revitalisation of Local Heritage Places to support their retention in a manner that respects and references the original use of the Local Heritage Place.	None are applicable.
Ancillary Development	
PO 3.1 Ancillary development, including carports, outbuildings and garages, complements the heritage values of the Local Heritage Place.	DTS/DPF 3.1 None are applicable.
PO 3.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line and does not dominate the Local Heritage Place or its setting.	DTS/DPF 3.2 None are applicable.
PO 3.3 Advertising and advertising hoardings are designed to complement the Local Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or its setting.	DTS/DPF 3.3 None are applicable.
PO 3.4 Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the Local Heritage Place.	DTS/DPF 3.4 None are applicable.
Land Division	
PO 4.1 Land division creates allotments that: (a) maintain the heritage values of the Local Heritage Place, including setting (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the Local Heritage Place.	DTS/DPF 4.1 None are applicable.
Landscape Context and Streetscape Amenity	
PO 5.1 Individually heritage listed trees, parks, historic gardens and memorial avenues are retained unless: (a) trees / plantings are, or have the potential to be, a danger to life or property or (b) trees / plantings are significantly diseased and their life expectancy is short.	DTS/DPF 5.1 None are applicable.
Demolition	
PO 6.1 Local Heritage Places are not demolished, destroyed or removed in total or in part unless: (a) the portion of the Local Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value or (b) the structural condition of the Local Heritage Place represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair.	DTS/DPF 6.1 None are applicable.
PO 6.2 The demolition, destruction or removal of a building, portion of a building or other feature or attribute is appropriate where it does not contribute to the heritage values of the Local Heritage Place.	DTS/DPF 6.2 None are applicable.
Conservation Works	
PO 7.1 Conservation works to the exterior of a Local Heritage Place (and other features identified in the extent of listing) match original materials to be repaired and utilise traditional work methods.	DTS/DPF 7.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Major Urban Transport Routes Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of Major Urban Transport Routes for all road users.
DO 2	Provision of safe and efficient access to and from Major Urban Transport Routes.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

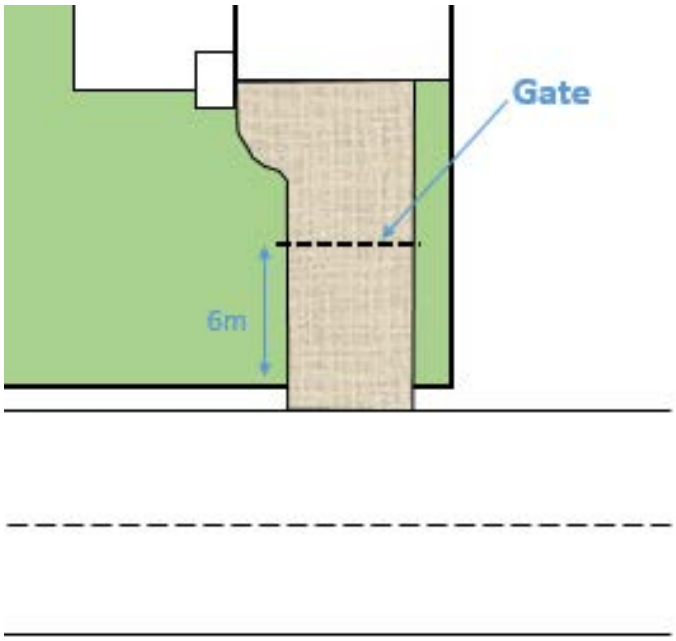
Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State Maintained Roads.	Access - Safe Entry and Exit (Traffic Flow)
DTS/DPF 1.1 An access point satisfies (a), (b) or (c): (a) where servicing a single (1) residential dwelling / residential allotment all of the following are satisfied: (i) it will not result in more than one access point (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) have a width of between 3m and 4m (measured at the site boundary). (b) where the development will result in 2 and up to 6 dwellings all of the following are satisfied: (i) it will not result in more than one access point servicing the development site (ii) entry and exit movements are left turn only (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees; (v) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (vi) have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site). (c) where the development will result in over 7 dwellings, or is a non-residential land use all of the following are satisfied: (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site using left turn only movements (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (v) have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less (vi) have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m (vii) have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m (viii) provides for simultaneous two-way vehicle movements at the access;	

A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road

and

B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.

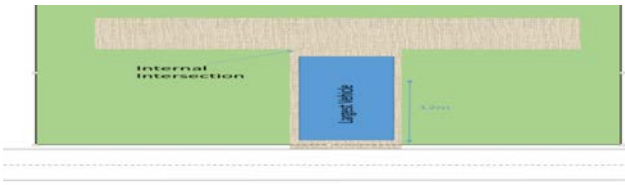
Access - On-Site Queuing



PO 2.1

Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption of the functional performance of the road and maintain safe vehicle movements.

DTS/DPF 2.1



An access point satisfies (a), (b) or (c):

(a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:

(b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and all of the following are satisfied:
- (i) is expected to be serviced by vehicles with a length no greater than 6.4m
- (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site).

(c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and all of the following are satisfied:
- (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle
- (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)
- (iii) any termination of, or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop
- (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the largest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram:

Access – Location (Spacing) - Existing Access Points

PO 3.1

Existing access points designed to accommodate the type and volume of traffic likely to be generated by the development.

DTS/DPF 3.1

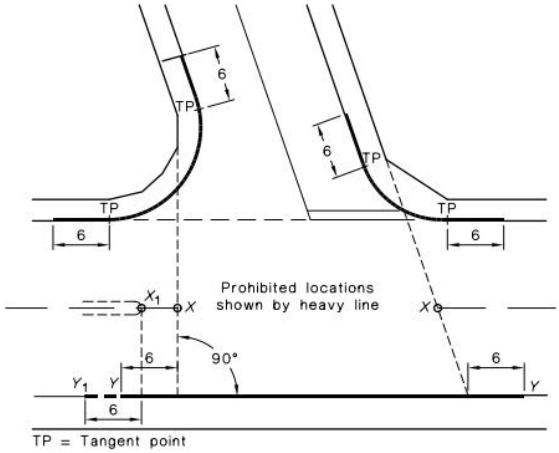
An existing access point satisfies (a), (b) or (c):

(a) it will not service, or is not intended to service, more than 6 dwellings

(b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access

(c) it is not located on a Controlled Access Road and development constitutes one or more of the following:
- (i) a change of use between an office <500m² gross leasable floor area and a consulting room <500m² gross leasable floor area or vice versa
- (ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment
- (iii) a change of use from a consulting room or office <250m² gross leasable floor area to shop <250m² gross leasable floor area
- (iv) a change of use from a shop <500m² gross leasable floor area to a warehouse <500m² gross leasable floor area
- (v) an office or consulting room with a gross leasable floor area <500m²
- (vi) a change of use from residential dwelling to a shop, office, consulting room or personal or domestic services establishment with <250m² gross leasable floor area.

Access – Location (Spacing) – New Access Points



PO 4.1

New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1

A new access point satisfies (a), (b) or (c):

(a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:

The points marked X_1 and X are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension Y-Y extends to Point Y_1.

(b) where the development site is intended to serve between 1 and 6 dwellings, the new access satisfies all of the following:
- (i) is not located on a Controlled Access Road
- (ii) is not located on a section of road affected by double barrier lines
- (iii) will be on a road with a speed environment of 70km/h or less
- (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
- (v) located minimum of 6m from a median opening or pedestrian crossing.

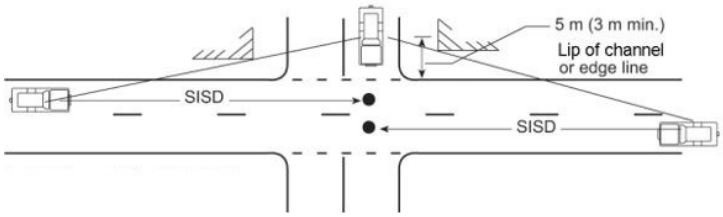
(c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

Speed Limit	Separation between access points	Separation from public road junctions and merging/terminating lanes
50 km/h or less	No spacing requirement	20m
60 km/h	5m (for development intended to serve between 1 and 6 dwellings) and 20m for all other cases	123m
70 km/h	55m	151m
80 km/h	70m	181m
90 km/h	90m	214m
100 km/h	110m	248m
110 km/h	135m	285m

Access - Location (Sight Lines)

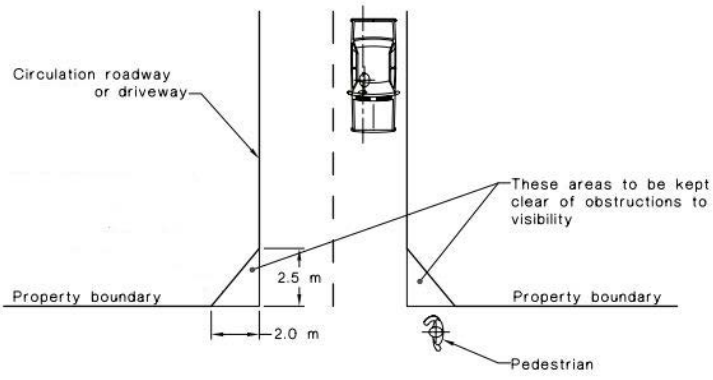
PO 5.1

Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.



DTS/DPF 5.1

An access point satisfies (a) and (c) or (b) and (c):



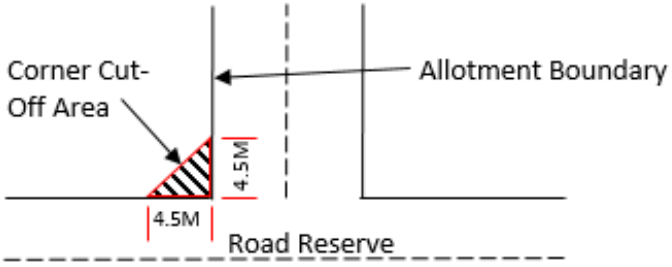
(a) the development site does or is intended to serve between 1 and 6 dwellings and utilises an existing access point
or

(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

Speed Limit	Access Point serving 1-6 dwellings	Access point serving all other development
40 km/h or less	47m	73m
50 km/h	63m	97m
60 km/h	81m	123m
70 km/h	100m	151m
80 km/h	121m	181m
90 km/h	144m	226m
100 km/h	169m	262m
110km/h	195m	300m

(c) pedestrian sightlines in accordance with the following diagram:

Access - Mud and Debris



PO 6.1

Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.

DTS/DPF 6.1

Where the road has an unsealed shoulder and the road is not kerbed the access way is sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer)

Access - Stormwater

PO 7.1 Access points designed to minimise negative impact on roadside drainage of water.	DTS/DPF 7.1 Development does not result in any of the following: (a) decrease the capacity of an existing drainage point (b) restrict or prevent the flow of stormwater to an existing drainage point and system (c) results in access points becoming stormwater flow paths directly onto the road.
Building on Road Reserve	
PO 8.1 Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users.	DTS/DPF 8.1 No encroachment of buildings or structures onto, above or below the road reserve.
Public Road Junctions	
PO 9.1 New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road operating conditions are maintained on the State Maintained Road.	DTS/DPF 9.1 Development does not comprise any of the following: (a) creating a new junction with a public road (b) opening an unmade public road junction (c) modifying an existing public road junction.
Corner Cut-Offs	
PO 10.1 Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to driver safety.	DTS/DPF 10.1 Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram: 

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land, but not an excluded land division) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road: (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Marine Parks (Managed Use) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Marine habitats and biodiversity are protected through limiting development to coastal infrastructure (jetties, marinas, pontoons), aquaculture, tourism, recreation and renewable energy facilities.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development avoids or minimises harm to marine habitats, biodiversity or the functioning of ecosystems.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Marine Parks (Restricted Use) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	High value marine habitats and biological diversity are protected.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development is limited to that required to support the ongoing operation of ports and harbours.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Mount Lofty Ranges Water Supply Catchment (Area 1) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safeguard Greater Adelaide's public water supply by ensuring development has no adverse impact on the quality of water harvested from primary reservoirs or diversion weir catchments from the Mount Lofty Ranges.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Water Quality	
PO 1.1 The quality of water draining from the site of development has no adverse impact on the role of the catchment as a water supply.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into primary public water supply reservoirs and weirs.	DTS/DPF 1.2 Development does not involve any one or combination of the following: (a) aquaculture involving husbandry or supplementary feeding in a water flow through system (b) dairy except if a replacement dairy (c) organic waste processing facility (d) fuel depot (e) horticulture involving only market gardening or commercial turf growing (f) intensive animal husbandry (g) landfill (h) retail fuel outlet (i) special industry (j) stock sales yard (k) stock slaughter works (l) timber preservation works (m) waste recycling, storage or treatment facility (n) wrecking yard.
Wastewater	
PO 2.1 Development that generates trade or industrial wastewater is designed to ensure wastewater disposal avoids adverse impacts on the quality of water draining into primary public water supply reservoirs and weirs.	DTS/DPF 2.1 Development that generates trade or industrial wastewater is connected to a: (a) sewer or community wastewater management system with sufficient hydraulic and treatment capacity to accept the inflow, or (b) wastewater holding tank which has storage capacity of more than four days total flow during peak operations and is contained within an impervious, bunded area with a total liquid holding capacity of more than 120 percent of the total holding tank capacity, prior to transporting for off-site disposal.
PO 2.2 Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within primary reservoir and weir catchment areas.	DTS/DPF 2.2 Development, including alterations and additions, in combination with existing built form and activities within an allotment: (a) does not generate a combined total of more than 900 litres of wastewater per day, and (b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards or is otherwise connected to a sewerage or community wastewater management system.
PO 2.3 Wastewater management systems have no adverse impact on the quality of water draining from the site.	DTS/DPF 2.3 Development results in: (a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards or (a) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.
PO 2.4 Surface and groundwater protected from wastewater discharge pollution.	DTS/DPF 2.4 All components of an effluent disposal area are: (a) set back 50 metres or more from a watercourse (b) set back 100 metres or more from a public water supply reservoir (c) located on land with a slope no greater than 1-in-5 (20%) (d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table (e) above the 10% AEP flood level.
Stormwater	
PO 3.1 Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site.	DTS/DPF 3.1 None are applicable.
PO 3.2 Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution.	DTS/DPF 3.2 None are applicable.
PO 3.3 Polluted stormwater is treated prior to discharge from the site.	DTS/DPF 3.3 None are applicable.
PO 3.4 Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality.	DTS/DPF 3.4 Development includes: (a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings or (b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m^2.
PO 3.5 Stormwater from dwelling additions captured to protect water quality.	DTS/DPF 3.5 Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.

PO 3.6 Stormwater from shops and tourist accommodation is managed to protect water quality.	DTS/DPF 3.6 Shops and tourist accommodation satisfy all the following: (a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) are located 100m or more from public water supply reservoirs and diversion weirs (c) are located on land with a slope not exceeding 20% (d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L (e) includes swales that divert clean stormwater away from areas where it could be polluted.
PO 3.7 Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.	DTS/DPF 3.7 Horse keeping and low intensity animal husbandry satisfy all the following: (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) is located on land with a slope not exceeding 10% (c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L (d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted.
PO 3.8 Stormwater from horticulture is managed to protect water quality.	DTS/DPF 3.8 Horticulture satisfies all the following : (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) is located on land with a slope not exceeding 10% (d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted.
PO 3.9 Stormwater from excavated and filled areas is managed to protect water quality.	DTS/DPF 3.9 Excavation and/or filling satisfy all the following: (a) is located 50m or more from watercourses (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) does not involve excavation exceeding a vertical height of 0.75m (d) does not involve filling exceeding a vertical height of 0.75m (e) does not involve a total combined excavation and filling vertical height of 1.5m.
Landscapes and Natural Features	
PO 4.1 Development minimises the need to modify landscapes and natural features.	DTS/DPF 4.1 None are applicable.
Land Division	
PO 5.1 Land division does not result in an increased risk of pollution to surface or underground water.	DTS/DPF 5.1 Land division does not create additional allotments and satisfies (a) and/or (b): (a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures (b) is for realignment of allotment boundaries to improve management of the land for primary production and/or conservation of natural features.
PO 5.2 Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists.	DTS/DPF 5.2 None are applicable.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development that are not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure: (a) function venue with more than 75 seats for customer dining purposes (b) restaurant with more than 40 seats for customer dining purposes (c) restaurant with more than 30 seats for customer dining purposes in association with a cellar door (d) dwelling where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (e) tourist accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (f) workers' accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (g) any other development that generates human wastewater from a peak loading capacity of more than 40 equivalent persons (or more than 6,000 litres/day).	Environment Protection Authority.	To provide expert technical assessment and direction to the relevant authority on whether a proposed development would have an adverse impact on water quality.	Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safeguard Greater Adelaide's public water supply by ensuring development has no adverse impact on the quality of water harvested from secondary reservoirs or diversion weir catchments from the Mount Lofty Ranges.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Water Quality	
PO 1.1 The quality of water draining from the site of development has no adverse impact on the role of the catchment as a water supply.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into secondary public water supply reservoirs and weirs.	DTS/DPF 1.2 Development does not involve any one or combination of the following: (a) landfill (b) special industry.
Wastewater	
PO 2.1	DTS/DPF 2.1

Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within secondary reservoir and weir catchment areas.	Development including alterations and additions, in combination with existing built form and activities within an allotment: (a) do not generate a combined total of more than 1500 litres of wastewater per day and (b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards or is otherwise connected to a sewer or community wastewater management system.
PO 2.2 Dairy development is of a scale and design that will avoid adverse water quality impacts.	DTS/DPF 2.2 Dairy development satisfies all of the following: (a) is located at least 100 metres from any watercourse, dam, bore or well (b) is connected to a wastewater management system that is located 200 metres from any watercourse, dam, bore or well and is designed and constructed to avoid leakage to groundwater or overflow under extreme rainfall conditions (c) treated wastewater irrigation areas: (i) have a slope of less than 1-in-5 (20 percent) (ii) are greater than 100 metres from any watercourse, dam, bore or well are suitable to provide for seasonal wastewater irrigation without causing pollution of surface or groundwater.
PO 2.3 Development that generates trade or industrial wastewater is designed to ensure wastewater disposal avoids adverse impacts on the quality of water draining into secondary public water supply reservoirs and weirs.	DTS/DPF 2.3 Development that generates trade or industrial wastewater is connected to: (a) a sewer or community wastewater management system with sufficient hydraulic and treatment capacity to accept the inflow or (b) an on-site wastewater holding tank which has storage capacity of more than four days total flow during peak operations and is contained within an impervious, bunded area with a total liquid holding capacity of more than 120 percent of the total holding tank capacity, prior to transporting for off-site disposal.
PO 2.4 Wastewater management systems have no adverse impact on the quality of water draining from the site.	DTS/DPF 2.4 Development results in: (a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards or (b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.
PO 2.5 Surface and groundwater protected from wastewater discharge pollution.	DTS/DPF 2.5 All components of an effluent disposal area are: (a) setback 50 metres or more from a watercourse (b) setback 100 metres or more from a public water supply reservoir (c) located on land with a slope no greater than 1-in-5 (20%) (d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table (e) above the 10% AEP flood level.
Stormwater	
PO 3.1 Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site.	DTS/DPF 3.1 None are applicable.
PO 3.2 Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution.	DTS/DPF 3.2 None are applicable.
PO 3.3 Polluted stormwater is treated prior to discharge from the site.	DTS/DPF 3.3 None are applicable.
PO 3.4 Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality.	DTS/DPF 3.4 Development includes: (a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings or (b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m^2.
PO 3.5 Stormwater from dwelling additions captured to protect water quality.	DTS/DPF 3.5 Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.
PO 3.6 Stormwater from shops and tourist accommodation is managed to protect water quality.	DTS/DPF 3.6 Shops and tourist accommodation satisfy all the following: (a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) are located 100m or more from public water supply reservoirs and diversion weirs (c) are located on land with a slope not exceeding 20% (d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L (e) includes swales that divert clean stormwater away from areas where it could be polluted.
PO 3.7 Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.	DTS/DPF 3.7 Horse keeping and low intensity animal husbandry satisfy all the following: (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) is located on land with a slope not exceeding 10% (c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L (d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted.
PO 3.8 Stormwater from horticulture is managed to protect water quality.	DTS/DPF 3.8 Horticulture satisfies all the following: (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) is located on land with a slope not exceeding 10% (d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted.
PO 3.9 Stormwater from excavated and filled areas is managed to protect water quality.	DTS/DPF 3.9 Excavation and/or filling satisfy all the following: (a) is located 50m or more from watercourses (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) does not involve excavation exceeding a vertical height of 0.75m (d) does not involve filling exceeding a vertical height of 0.75m (e) does not involve a total combined excavation and filling vertical height of 1.5m.
Landscapes and Natural Features	
PO 4.1 Development minimises the need to modify landscapes and natural features.	DTS/DPF 4.1 None are applicable.
Land Division	
PO 5.1 Land division does not result in an increased risk of pollution to surface or underground water.	DTS/DPF 5.1 Land division does not create additional allotments and satisfies (a) and/or (b): (a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures or (b) is for realignment of allotment boundaries in order to improve management of the land for primary production and/or conservation of natural features.
PO 5.2	DTS/DPF 5.2

Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists.	None are applicable.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development that are not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure: (a) function venue with more than 75 seats for customer dining purposes (b) restaurant with more than 40 seats for customer dining purposes (c) restaurant with more than 30 seats for customer dining purposes in association with a cellar door (d) dwelling where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (e) tourist accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (f) workers' accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned (g) any other development that generates human wastewater from a peak loading capacity of more than 40 equivalent persons (or more than 6,000 litres/day)	Environment Protection Authority.	To provide expert technical assessment and direction to the relevant authority on whether a proposed development would have an adverse impact on water quality.	Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Murray-Darling Basin Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use in the Murray-Darling Basin area.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 All development, but in particular development involving: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) horse keeping (g) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in the Murray-Darling Basin.	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development that require, or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) horse keeping (g) commercial forestry.	Minister responsible for the administration of the *River Murray Act 2003*.	To provide expert technical assessment and direction to the relevant authority on matters regarding the taking of water, to ensure development is undertaken sustainably in the Murray-Darling Basin.	Development of a class to which Schedule 9 clause 3 item 10 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Native Vegetation Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Areas of native vegetation are protected, retained and restored in order to sustain biodiversity, threatened species and vegetation communities, fauna habitat, ecosystem services, carbon storage and amenity values.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Environmental Protection	
PO 1.1 Development avoids, or where it cannot be practically avoided, minimises the clearance of native vegetation taking into account the siting of buildings, access points, bushfire protection measures and building maintenance.	DTS/DPF 1.1 An application is accompanied by: (a) a declaration stating that the proposal will not, or would not, involve clearance of native vegetation under the Native Vegetation Act 1991, including any clearance that may occur: (i) in connection with a relevant access point and / or driveway

	(ii) within 10m of a building (other than a residential building or tourist accommodation) (iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control (iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area or (b) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the clearance is categorised as 'Level 1 clearance'.
PO 1.2 Native vegetation clearance in association with development avoids the following: (a) significant wildlife habitat and movement corridors (b) rare, vulnerable or endangered plants species (c) native vegetation that is significant because it is located in an area which has been extensively cleared (d) native vegetation that is growing in, or in association with, a wetland environment.	DTS/DPF 1.2 None are applicable.
PO 1.3 Intensive animal husbandry, commercial forestry and agricultural activities are sited, set back and designed to minimise impacts on native vegetation, including impacts on native vegetation in an adjacent State Significant Native Vegetation Area, from: (a) in the case of commercial forestry, the spread of fires from a plantation (b) the spread of pest plants and phytophthora (c) the spread of non-indigenous plants species (d) excessive nutrient loading of the soil or loading arising from surface water runoff (e) soil compaction (f) chemical spray drift.	DTS/DPF 1.3 Development within 500 metres of a boundary of a State Significant Native Vegetation Area does not involve any of the following: (a) horticulture (b) intensive animal husbandry (c) dairy (d) commercial forestry (e) aquaculture.
PO 1.4 Development restores and enhances biodiversity and habitat values through revegetation using locally indigenous plant species.	DTS/DPF 1.4 None are applicable.
Land division	
PO 2.1 Land division does not result in the fragmentation of land containing native vegetation, or necessitate the clearance of native vegetation, unless such clearance is considered minor, taking into account the location of allotment boundaries, access ways, fire breaks, boundary fencing and potential building siting or the like.	DTS/DPF 2.1 Land division where: (a) an application is accompanied by one of the following: (i) a declaration stating that none of the allotments in the proposed plan of division contain native vegetation under the *Native Vegetation Act 1991* (ii) a declaration stating that no native vegetation clearance under the *Native Vegetation Act 1991* will be required as a result of the division of land (iii) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the vegetation to be cleared is categorised as 'Level 1 clearance' or (b) an application for land division which is being considered concurrently with a proposal to develop each allotment which will satisfy, or would satisfy, the requirements of DTS/DPF 1.1, including any clearance that may occur or (c) the division is to support a Heritage Agreement under the Native Vegetation Act 1991 or the *Heritage Places Act 1993*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that is the subject of a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* that categorises the clearance, or potential clearance, as 'Level 3 clearance' or 'Level 4 clearance'.	Native Vegetation Council	To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation.	Development of a class to which Schedule 9 clause 3 item 11 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Noise and Air Emissions Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Community health and amenity is protected from adverse impacts of noise and air emissions.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting and Design	
PO 1.1 Sensitive receivers adjoining high noise and/or air pollution sources are designed and sited to shield sensitive receivers from the emission source using measures such as: (a) placing buildings containing non-sensitive receivers (such as retail and commercial) between the emission source and sensitive receivers (b) within individual buildings, placing rooms more sensitive to air quality and noise impacts (such as living rooms and bedrooms) further away from the emission source (c) providing appropriate separation or erecting noise attenuation barriers, provided the requirements for safety, urban design and access can be met (d) the use of building design elements such as podiums and jutting, deep or enclosed balconies (including with solid balustrades).	DTS/DPF 1.1 Sensitive receivers satisfy all of the following: (a) do not adjoin a: (i) Designated Road: Type A (ii) Designated Road Corridor: Type B (iii) Designated Road: Type R (iv) Train Corridor (v) Tram Corridor (b) adjoining development incorporating music includes noise attenuation measures to achieve a noise level in any bedroom exposed to music noise (L10) less than: (i) 8 dB above the level of background noise (L90,15 min) in any octave band of the sound spectrum; and (ii) 5 dB(A) above the level of background noise (LA90,15 min) for the overall (sum of all octave bands) A-weighted levels.
PO 1.2 Development incorporating a sensitive receiver adjoining high air pollution sources use building design elements such as varying building heights, widths, articulation, setbacks and shapes to increase wind turbulence and the dispersion of air pollutants.	DTS/DPF 1.2 Sensitive receivers do not adjoin any of the following: (a) Designated Road: Type A (b) Designated Road: Type B (c) Designated Road: Type R (d) Train Corridor (e) Tram Corridor.
PO 1.3 Development incorporating a sensitive receiver adjoining high noise and/or air pollution sources locates private open space (including ground level courtyards and balconies), common open space and outdoor play areas within educational facilities and child care facilities away from the emission source.	DTS/DPF 1.3 Open space associated with a sensitive receiver is not adjoining any of the following: (a) Designated Road: Type A (b) Designated Road: Type B (c) Designated Road: Type R (d) Train Corridor

	(e) Tram Corridor (f) Development incorporating music.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Non-Stop Corridors Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of non-stop corridors, where free-flowing traffic movement is prioritised.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Non-Stop Corridor Overlay	
PO 1.1 The safety, efficiency and functional performance of non-stop corridors is maintained.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land, but not an excluded land division) that involves any of the following to/on a Non-Stop Corridor Road or within 25 metres of an intersection with any such road: (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Except where all of the relevant deemed-to-satisfy criteria are met, an advertisement or advertising hoarding that is on a Non-Stop Corridor Road or is on land abutting a Non-Stop Corridor Road and: (a) is within 100m of an on or off ramp to a Non-Stop Corridor Road as shown in the Non-Stop Corridors Overlay and (b) will: (i) be internally illuminated or (ii) incorporate a moving or changing display or message or (iii) incorporate a flashing light.	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Prescribed Surface Water Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use in prescribed surface water areas that maintains the health and natural flow paths of surface water.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.	DTS/DPF 1.1 None are applicable.
PO 1.2 All development, but in particular development involving any of the following: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed surface water areas.	DTS/DPF 1.2 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts surface water flowing over land.	Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths	Development of a class to

	under that Act to grant or refuse a permit to undertake the subject development.	of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent.	which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Except where located within the Murray-Darling Basin Overlay, any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry. Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*.	The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*.	To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably and maintains the health and natural flow paths of water resources.	Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Prescribed Watercourses Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Prescribed watercourses are protected by ensuring the taking of water from such watercourses is avoided or is undertaken in a sustainable manner that maintains the health and natural flow paths of the watercourses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 All development, but in particular development involving any of the following: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on prescribed watercourses.	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.
PO 1.2 Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing in a prescribed watercourse is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.	DTS/DPF 1.2 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a prescribed watercourse.	Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development.	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent.	Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Except where located within the Murray-Darling Basin Overlay, any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry. Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*.	The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*.	To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably.	Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Prescribed Water Resources Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use in prescribed water resources areas maintains the health and natural flow paths of surface water, watercourses and wells.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 All development, but in particular development involving any of the following: (a) horticulture	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use

(b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas.	or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.
PO 1.2 Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.	DTS/DPF 1.2 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts surface water flowing over land.	Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development.	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent.	Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Except where located within the Murray-Darling Basin Overlay, any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry	The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*.	To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably and maintains the health and natural flow paths of water resources.	Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*.			

Prescribed Wells Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use in prescribed wells areas.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 All development, but in particular involving any of the following: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed wells areas.	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where located within the Murray-Darling Basin Overlay, any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*: (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commerical forestry.	The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*.	To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably.	Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*.			

Ramsar Wetlands Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection and restoration of Ramsar wetlands.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Development provides for the restoration and/or sustainable management of wetlands habitat.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development does not lead to significant negative impacts on Ramsar wetland habitat and its carbon capture and storage potential.	DTS/DPF 1.2 None are applicable.
PO 1.3 Development adjacent to Ramsar wetlands maintains or establishes landform and vegetated corridor links between Ramsar areas where possible.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is not detrimental to the hydrological regime of Ramsar wetlands taking into account the effects of climate change on rainfall and air temperature, including: (a) a change in volume, timing, duration and frequency of ground and surface water flows to and within the wetland (b) a change in the level of salinity, pollutants, nutrients or water temperature.	DTS/DPF 1.4 None are applicable.
PO 1.5 Development is designed to minimise the cumulative impacts on Ramsar wetlands from jetties, vegetation clearance and dredging.	DTS/DPF 1.5 None are applicable.
PO 1.6 Development does not result in the disruption of the breeding, feeding, migration or resting behaviour of an ecologically significant proportion of the population of a migratory or resident species.	DTS/DPF 1.6 None are applicable.
Land Division	
PO 2.1 Land division supports the management or improvement of the natural environment and does not result in any additional allotments within a Ramsar wetland.	DTS/DPF 2.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Regulated and Significant Tree Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Conservation of regulated and significant trees to provide aesthetic and environmental benefits and mitigate tree loss.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Tree Retention and Health	
PO 1.1 Regulated trees are retained where they: (a) make an important visual contribution to local character and amenity (b) are indigenous to the local area and listed under the *National Parks and Wildlife Act 1972* as a rare or endangered native species and / or (c) provide an important habitat for native fauna.	DTS/DPF 1.1 None are applicable.
PO 1.2 Significant trees are retained where they: (a) make an important contribution to the character or amenity of the local area (b) are indigenous to the local area and are listed under the *National Parks and Wildlife Act 1972* as a rare or endangered native species (c) represent an important habitat for native fauna (d) are part of a wildlife corridor of a remnant area of native vegetation (e) are important to the maintenance of biodiversity in the local environment and / or (f) form a notable visual element to the landscape of the local area.	DTS/DPF 1.2 None are applicable.
PO 1.3 A tree damaging activity not in connection with other development satisfies (a) and (b): (a) tree damaging activity is only undertaken to: (i) remove a diseased tree where its life expectancy is short (ii) mitigate an unacceptable risk to public or private safety due to limb drop or the like (iii) rectify or prevent extensive damage to a building of value as comprising any of the following: A. a Local Heritage Place B. a State Heritage Place C. a substantial building of value and there is no reasonable alternative to rectify or prevent such damage other than to undertake a tree damaging activity (iv) reduce an unacceptable hazard associated with a tree within 20m of an existing residential, tourist accommodation or other habitable building from bushfire (v) treat disease or otherwise in the general interests of the health of the tree and / or (vi) maintain the aesthetic appearance and structural integrity of the tree (b) in relation to a significant tree, tree-damaging activity is avoided unless all reasonable remedial treatments and measures have been determined to be ineffective.	DTS/DPF 1.3 None are applicable.
PO 1.4 A tree-damaging activity in connection with other development satisfies all the following: (a) it accommodates the reasonable development of land in accordance with the relevant zone or subzone where such development might not otherwise be possible (b) in the case of a significant tree, all reasonable development options and design solutions have been considered to prevent substantial tree-damaging activity occurring.	DTS/DPF 1.4 None are applicable.
Ground work affecting trees	
PO 2.1 Regulated and significant trees, including their root systems, are not unduly compromised by excavation and / or filling of land, or the sealing of surfaces within the vicinity of the tree to support their retention and health.	DTS/DPF 2.1 None are applicable.
Land Division	
PO 3.1 Land division results in an allotment configuration that enables its subsequent development and the retention of regulated and significant trees as far as is reasonably practicable.	DTS/DPF 3.1 Land division where: (a) there are no regulated or significant trees located within or adjacent to the plan of division

	or (b) the application demonstrates that an area exists to accommodate subsequent development of proposed allotments after an allowance has been made for a tree protection zone around any regulated tree within and adjacent to the plan of division.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Resource Extraction Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of current and future state significant resource extraction activities by ensuring development has regard to potential environmental and amenity impacts generated by the lawful operation of proximate mines and quarries.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Protection of Strategic Resources	
PO 1.1 Long-term availability of and ability to extract resources is maintained by ensuring development involving sensitive receivers is: (a) located away from areas which may be subject to unacceptable noise, dust or vibration emissions generated by current or future resource extraction activities or (b) able to adequately mitigate impacts of noise, dust or vibration emissions through design techniques such as: (i) locating residential accommodation the greatest distance practicable from the resource extraction activity (ii) placing buildings containing non-sensitive receivers between the resource extraction activity and sensitive receivers (iii) placing rooms more sensitive to air, noise and vibration impacts (e.g. bedrooms) further away from the resource extraction activity (iv) providing private or common open space adjacent a building facade that shields the space from impacts of the resource extraction activity.	DTS/DPF 1.1 Development does not incorporate: (a) a sensitive receiver or (b) alterations or additions to a sensitive receiver which increase the floor area of such buildings by 10% or more or (c) land division for the purposes of accommodating a sensitive receiver.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Where located within the area of the Resource Extraction Zone, all forms of development except: (a) where the development is deemed-to-satisfy or (b) where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral or (c) any of the following classes of development (i) agricultural building (ii) land division for the purpose of a boundary realignment where no additional allotments are created (iii) farming (iv) fence (v) horse keeping (vi) horticulture (vii) mushroom production (viii) protective tree netting structure.	Minister responsible for administering the Mining Acts.	To provide expert assessment and direction to the relevant authority on the potential for development to adversely impact upon the lawful continued operation of resource extraction operations.	Development of a class to which Schedule 9 clause 3 item 14 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Where located outside of the Resource Extraction Zone, the following forms of development (including land division creating additional allotments for such uses and alterations and additions which increase the floor area of buildings accommodating the following by 10% or more): (a) dwelling (b) residential flat building (c) tourist accommodation (d) boarding home (e) dormitory style accommodation (f) workers' accommodation (g) student accommodation (h) child care facility (i) educational facility (j) retirement facility (k) supported accommodation (l) residential park (m) hospital.			

River Murray Flood Plain Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Conservation and protection of water quality and the riverine environment, provision for environmental water flows, the protection of life and property against flood risk, and recognition of the riverine environment as an important ecological, tourist and recreational resource.
DO 2	Development for the purpose of recreation (e.g. landings, jetties, houseboat moorings) water extraction, wetland management and irrigation management (e.g. channel, pumping stand, flood gate).

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 All development, but in particular development involving any of the following: (a) activities requiring irrigation (b) aquaculture (c) commercial forestry (d) horse keeping	DTS/DPF 1.1 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.

(e) horticulture (f) industry (g) intensive animal husbandry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas.	
Wastewater	
PO 2.1 Wastewater management systems have no adverse impact on the quality of water draining from the site.	DTS/DPF 2.1 Development results in: (a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards or (b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer, community wastewater management system or wastewater holding tank that complies with relevant South Australian standards.
Dredging	
PO 3.1 Development is designed and sited in a manner that limits the need for dredging.	DTS/DPF 3.1 None are applicable.
Land Division	
PO 4.1 Land division does not lead to intensification of development.	DTS/DPF 4.1 Land division is: (a) limited to the creation of a public road or a public reserve or (b) for adjustment of allotment boundaries to remove an anomaly in the current boundaries with respect to the location of existing buildings or structures and does not result in an additional allotment.
PO 4.2 Boundary realignment for residential purposes preserves the integrity of public waterfront reserves.	DTS/DPF 4.2 Boundary realignment for residential purposes: (a) locates any new roads on the landward side of an existing dwelling (rather than between an existing dwelling and the public waterfront reserve) and (b) provides a reserve 50m or more in width above pool level along the water frontage.
Built Form and Character	
PO 5.1 In the context of any measures required to mitigate against flood risk, buildings are sited and designed to be unobtrusive, particularly when viewed from the River Murray and nearby public roads.	DTS/DPF 5.1 Buildings satisfy all of the following: (a) do not exceed one building level in height (excluding elevation to minimise the potential for personal or property damage as a result of a flood) (b) in accordance with Figure 5: (i) have no floor level elevated 3m or more above natural ground level other than where the Finished Ground and Floor Levels Technical and Numeric Variation layer applies and would require the minimum finished floor level of the building to exceed 3m above natural ground level, in which case this is acceptable as outlined in DTS/DPF 6.1(a) and (ii) have an overall roof height that does not exceed 5m above the elevated floor level described in DTS 5.1(b)(i) (c) are not closer than 50m to the waterfront (d) have associated electricity and telecommunications lines installed underground (e) in relation to outbuildings and agricultural buildings clad in sheet metal - are pre-colour treated or painted in a non-reflective colour.
PO 5.2 Outbuildings and agricultural buildings designed and sited to minimise their visibility from the waterfront and not dominate the appearance of public places.	DTS/DPF 5.2 Outbuildings and agricultural buildings: (a) clad in sheet metal are pre-colour treated or painted in a non-reflective colour (b) in the case of a site with a waterfront (including where there is an intervening public reserve), are not sited between the waterfront and the existing or proposed dwelling as demonstrated in Figure 7.
PO 5.3 Development setback from the River Murray and canals to establish a consistent character along a river front.	DTS/DPF 5.3 None are applicable.
PO 5.4 Limited use of retaining walls in the 1956 River Murray Flood Plain and in highly visible locations that can be viewed from public roads or the main channel of the River Murray to maintain the natural amenity and character along the river.	DTS/DPF 5.4 A retaining wall for one or more of the following purposes: (a) for the repair or replacement of a lawful retaining wall (b) to provide safe public access to the waterfront on public land (c) to protect structures and buildings of historic significance (d) to protect waterfront vegetation (e) is ancillary to a dwelling and will provide safe access to the waterfront from that dwelling (f) to protect a dwelling from material risk presented by erosion.
Flood Resilience	
PO 6.1 Habitable and other valuable buildings that may be adversely affected by floodwaters and fluctuating pool levels are elevated (or relocatable in the case of caravan and tourist parks) to protect property from damage.	DTS/DPF 6.1 Development incorporates finished ground and floor levels not less than the following, except where: (a) it would require a finished floor level greater than 4m above natural ground level in which case 4m is an acceptable finished floor level or (b) it relates to habitable buildings within a caravan or tourist park which will be relocatable in the event of a flood:

Finished Ground and Floor Levels
Minimum finished floor level is 2.6m AHD
Minimum finished floor level is 20.4m AHD
Minimum finished floor level is 3m AHD
Minimum finished floor level is 3.45m AHD

	Finished Ground and Floor Levels Minimum finished floor level is 8.59m AHD Minimum finished floor level is 8.71m AHD Minimum finished floor level is 8.93m AHD Minimum finished floor level is 9.02m AHD Minimum finished floor level is 9.51m AHD Minimum finished floor level is 9.55m AHD Minimum finished floor level is 9.68m AHD Minimum finished floor level is 9.77m AHD Minimum finished floor level is 9.85m AHD Minimum finished floor level is 4.64m AHD In instances where no finished floor level value is specified, development incorporates a finished floor level at least 300mm above the height of a 1% AEP flood event except where: (a) it would require a finished floor level greater than 4m above natural ground level in which case 4m is an acceptable finished floor level or (b) it relates to habitable buildings and structures within a caravan or tourist park which will be relocatable in the event of a flood.
PO 6.2 Development avoids the need for coast and river protection works through measures such as setbacks to protect development from coastal erosion, sea, river or stormwater flooding, sand drift or other coastal or riverine processes.	DTS/DPF 6.2 None are applicable.
PO 6.3 Dwellings and dwelling additions or alterations: (a) do not impede floodwaters and fluctuating pool levels (b) are designed and sited to mitigate against damage in the event of a flood.	DTS/DPF 6.3 Dwellings and additions or alterations to dwellings satisfy (a) or (b) and (c): (a) are located outside the 1956 River Murray Flood Plain as shown in the Planning Reference layer in the South Australian Property and Planning Atlas (b) are elevated and the undercroft area: (i) is wholly open (there are no enclosures) or (ii) where enclosed areas are proposed, such areas are in accordance with all of the following, as depicted in Figures 5 and 6: A. there are no habitable rooms B. each enclosed space does not include internal linings (excluding a wet area or lift facility) and is fitted with roller door(s) or similar (that are not glass) on each side of a width not less than 2.4m so the space can be easily opened during times of flood C. does not include more than one wet area and that wet area does not exceed 15m^2 D. the combined enclosed area (inclusive of a wet area but excluding a lift facility) does not exceed a total floor area of 60m^2 E. at least one third of the undercroft area remains open (not enclosed) from the principal waterfront elevation through to its opposite elevation. (c) in the case of an existing dwelling with a habitable floor level at ground level, alterations and additions do not: (i) increase the total floor area of the dwelling to greater than 90 square metres, excluding: A. wet areas of up to 15 square metres, and B. any verandah, balcony or deck (ii) comprise the addition of a second building level.
PO 6.4 Outbuildings and agricultural buildings do not impede floodwaters and fluctuating pool levels.	DTS/DPF 6.4 Outbuildings and agricultural buildings are: (a) fitted with roller doors, or similar (that are not glass) on two opposite ends or sides (whichever elevations face the direction of the river flow) (b) constructed at natural ground level.
PO 6.5 Fencing does not impede floodwaters and fluctuating pool levels.	DTS/DPF 6.5 Fencing is of an open design such as post and wire strand construction.
Environmental Protection	
PO 7.1 Adverse impacts on the natural features and stability of the waterfront are minimised.	DTS/DPF 7.1 None are applicable.
PO 7.2 Development incorporates buffer areas to protect the river and associated natural features such as wetlands and native vegetation.	DTS/DPF 7.2 None are applicable.
PO 7.3 Modification to the natural landform, including land reclamation, is avoided or minimised to prevent impacts on natural features, natural flow paths, floodwaters and the stability of the waterfront.	DTS/DPF 7.3 None are applicable.
PO 7.4 Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are sited and designed to prevent environmental harm.	DTS/DPF 7.4 Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are located: (a) outside the 1956 River Murray Flood Plain and (b) wholly within a bund that has storage capacity of 133% or more of the volume of the largest fuel storage tank.
PO 7.5 Facilities for the collection of effluent from moored vessels are sited and designed to prevent environmental harm.	DTS/DPF 7.5 None are applicable.
Access	
PO 8.1 Waterfront reserve areas between buildings and the water are maximised to preserve the amenity of view corridors along the riverine environment.	DTS/DPF 8.1 None are applicable.
PO 8.2 Public access routes to waterfront reserves are provided and maintained.	DTS/DPF 8.2 None are applicable.
PO 8.3 Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.	DTS/DPF 8.3 No more than 100mm excavation and 100mm of fill is required in association with the construction of a driveway, access track or parking area.
River Structures	
PO 9.1 River structures are located where they do not cause a hazard to safe navigation.	DTS/DPF 9.1 River structures are located to satisfy all of the following: (a) wholly outside navigation channels as defined by navigational signs (b) 100m or more from either side of a ferry crossing (c) 150m or more from a lock.
PO 9.2 River structures are located where they do not cause a hazard to a designated recreation area for water skiing and swimming.	DTS/DPF 9.2 River structures are located wholly outside designated recreation areas for water skiing and swimming.
PO 9.3 Proliferation of water pumps is avoided to limit impact on the riverine environment.	DTS/DPF 9.3 None are applicable.
PO 9.4 Water pumping infrastructure is designed and constructed to limit impact on the riverine environment.	DTS/DPF 9.4 Water pumping infrastructure is designed and constructed in accordance with Figure 1.
PO 9.5 Proliferation of jetties and floating pontoons is avoided to minimise impact on the riverine environment.	DTS/DPF 9.5 Jetties and floating pontoons are: (a) ancillary to a dwelling (b) limited to one jetty or floating pontoon per dwelling (c) located on the same allotment as the associated dwelling or (d) are separated from the allotment (or lease site) accommodating the associated dwelling by a public reserve or a public road (but not both) or (e) are for the repair, maintenance or replacement of an existing licensed river structure.
PO 9.6	DTS/DPF 9.6

Jetties and floating pontoons are designed and constructed to limit impact on the riverine environment.	Jetties and floating pontoons satisfy all of the following: (a) extend not more than 8m into the river measured from the riverbank at normal pool level (b) have a width of not more than 1.4m in the case of a jetty (or gangway width in the case of a floating pontoon) (c) in the case of floating pontoons, do not exceed the dimensions 3m by 6m (d) maintain a minimum of 3m between river structures including other jetties and pontoons.
PO 9.7 A proliferation of boat ramps is avoided to minimise impact on the riverine environment.	DTS/DPF 9.7 The repair, maintenance or replacement of an existing licensed boat ramp.
PO 9.8 On-river mooring facilities are developed only where: (a) the mooring facility will not result in a mooring capacity exceeding one vessel per allotment (b) where the allotment has a direct frontage to the river (or is only separated by a public road or public reserve, but not both) and the allotment contains an existing dwelling (c) the width of the river is greater than 100m at normal pool level.	DTS/DPF 9.8 None are applicable.
PO 9.9 Moorings for vessels are located to avoid interfering with the operation or function of a ferry crossing, lock or major pumping station.	DTS/DPF 9.9 Moorings for vessels not located within: (a) 100m of either side of a ferry crossing (b) 150m of a lock (c) 400m of a major pumping station.
PO 9.10 Development of structures designed for the mooring of more than one vessel are located off-channel in a marina.	DTS/DPF 9.10 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral: (a) development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land (b) development that is within the ambit of clause 7 of Schedule 3 of the *Planning, Development and Infrastructure (General) Regulations 2017* (c) the construction of a building, or the undertaking of an act or activity specified in clause 3 of Schedule 3 of the *Planning, Development and Infrastructure (General) Regulations 2017*, other than where the development: (i) is the construction of a fence not exceeding 2m in height or (ii) is the construction of a carport, verandah, balcony, porch or other similar structure or (iii) is the construction of an enclosed shed, garage or similar outbuilding: A. that is ancillary to an existing building; and B. where the enclosed shed, garage or similar outbuilding will not have a total floor area of more than 150m²; and C. that is located outside the 1956 River Murray Flood Plain or will be fitted with roller doors, or similar on two opposite ends or sides so as not to impede flood waters; and D. that will not be located closer to the River Murray than the building to which it is ancillary, or is not closer than 100m to the River Murray or (iv) is the construction of an agricultural building: A. that is located outside the 1956 River Murray Flood Plain or will be fitted with roller doors, or similar on two opposite ends or sides so as not to impede flood waters; and B. that is not closer than 200m to the River Murray; and C. that will not have a total floor area of more than: (A) 350m² within the Productive Rural Landscape Zone (B) 500m² within the Rural Zone or Rural Intensive Enterprise Zone (C) 250m² within any other zone or (v) is the construction of: A. an aboveground or inflatable swimming pool, or a spa pool or B. an in-ground swimming pool located outside the 1956 River Murray Flood Plain or (vi) comprises: A. the construction of a dwelling (or the alteration or extension of an existing dwelling) that is located outside the 1956 River Murray Flood Plain and not closer than 100m to the River Murray or B. an alteration or extension of an existing dwelling that in the opinion of the relevant authority is minor and where any extension of the dwelling will not result in a part of the dwelling being closer to the River Murray or (vii) is the construction of an elevated dwelling (including any incidental excavation or filling or any retaining wall which retains a difference in ground levels not exceeding 1m) that is located within the Rural Shack Settlement Zone and has an open undercroft area or an undercroft area: A. that when enclosed, is enclosed on two opposite ends or sides using roller doors, or other material (that is not glass) that can be easily opened or removed during times of flood B. that is not a habitable room C. that will have enclosed areas for a toilet, shower or laundry facilities not exceeding a combined maximum floor area of 15m² (excluding any stairwell and/or lift shaft area) or (viii) is the construction of a transportable dwelling or cabin, or a removable annexe, within an existing caravan and tourist park (d) land division classified as restricted by the Planning and Design Code (e) land division that results in: (i) 4 or more additional allotments (ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment) or (iii) a mix of 4 or more additional allotments and separate grants of occupancy (f) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system (g) alteration of the boundaries of an allotment so as to result in: (i) the allotment having a frontage to a part of the River Murray system or (ii) the allotment having an increase in its frontage to a part of the River Murray system.	Minister responsible for administration of the *River Murray Act 2003*.	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health of the River Murray system, its natural flow regime (including floodwaters), water quality, and cultural heritage.	Development of a class to which Schedule 9 clause 3 item 15 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Development that generates human wastewater from a peak loading capacity of more than 40 equivalent persons or more than 6000 litres/day and is not connected to a community wastewater management system or sewerage infrastructure.	Environment Protection Authority	To provide expert assessment and direction to the relevant authority on potential impacts to water quality in the River Murray system from pollutants discharged into any waters or onto land in a place that is reasonably likely to impact the quality of drinking water.	Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Any pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for 5 or more vessels at any 1 time			
Vessel refuelling facility			
Vessel sewage pump-out facility.

River Murray Tributaries Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Sustainable water use and conservation of riverine environments within the River Murray Tributaries area.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment and downstream users.	DTS/DPF 1.1 Development involving the construction of a retaining wall that will not materially result in the collection or diversion of surface water flowing over land or water flowing in a watercourse.
PO 1.2 All development, but in particular development involving any of the following: (a) activities requiring irrigation (b) aquaculture (c) commercial forestry (d) horticulture (e) industry (f) intensive animal husbandry has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas.	DTS/DPF 1.2 Development satisfies either of the following: (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*.
Land Division	
PO 2.1 Land division does not lead to the intensification of development to a level that would have a negative impact on the health or natural flow paths of the River Murray Tributaries.	DTS/DPF 2.1 None are applicable.
PO 2.2 Land division, including boundary realignment, preserves the integrity of the public waterfront of the River Murray system by limiting the number of allotments having a frontage (or extent of frontage) to that system.	DTS/DPF 2.2 Land division does not result in any of the following: (a) an increase in allotments having a frontage to a part of the River Murray system (b) an increase in the frontage of an allotment or allotments to a part of the River Murray system.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral: (a) development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land (b) land division classified as *restricted* by the Planning and Design Code (c) land division that results in: (i) 4 or more additional allotments or (ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment) or (iii) a mix of 4 or more additional allotments and separate grants of occupancy (d) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system (e) alteration of the boundaries of an existing allotment so as to result in: (i) the allotment having a frontage to a part of the River Murray system or (ii) the allotment having an increase in its frontage to a part of the River Murray system.	Minister responsible for the administration of the *River Murray Act 2003*.	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health of the River Murray system, its natural flow regime (including floodwaters), water quality and cultural heritage.	Development of a class to which Schedule 9 clause 3 item 16 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Scenic Quality Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development complements natural and rural character, and areas of scenic value.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Land uses that complement and enhance the natural and rural character.	DTS/DPF 1.1 None are applicable.
Built Form and Character	
PO 2.1 Development is carefully sited and designed to: (a) complement rural or natural character (b) minimise disruption to natural landform (c) integrate existing natural environmental features (d) minimise impacts on scenic features (e) be low-scale (f) be visually unobtrusive and blend in with the surrounding area	DTS/DPF 2.1 None are applicable.
Landscaping	
PO 3.1 Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration.	DTS/DPF 3.1 Landscaping plantings exclusively constitute locally indigenous plant species.
Earthworks	
PO 4.1 Excavation and filling of land is limited to that required to reduce the visual prominence of buildings and make provision for water storage facilities to maintain natural landforms and landscapes.	DTS/DPF 4.1 Excavation and/or filling is associated with a building or water storage facility and satisfies all of the following: (a) does not involve excavation exceeding a vertical height of 750mm (b) does not involve filling exceeding a vertical height of 750mm (c) does not involve a total combined excavation and filling vertical height of 1.5m (d) any scree slope is covered in topsoil and landscaped.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Significant Interface Management Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	The prevention of the establishment of new, and intensification of sensitive receivers to mitigate community exposure to potential adverse hazards and environmental and amenity impacts generated by the lawful operation of proximate significant activities.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Intensification of sensitive uses and / or sensitive receivers, inclusive of land division for either purpose, is not undertaken to avoid increasing resident or community exposure to potential adverse hazards or emissions unless: (a) each source of adverse hazard or emission has ceased operation or (b) it can be demonstrated that the site of the proposed development is not unreasonably impacted by the hazard or emissions from a relevant source, including as a result of environmental or operational improvements that have been or will be made to reduce the hazard or emissions from each source to an acceptable level.	DTS/DPF 1.1 Development does not comprise a sensitive use, sensitive receiver and / or land division for a sensitive use or sensitive receiver purpose unless: (a) it is a replacement dwelling where the total floor area is no greater than the existing or previous dwelling or (b) each source of hazard and /or emissions has ceased to operate or has been superseded by another use such that it cannot be revived.
PO 1.2 Alterations and additions to sensitive receivers support ongoing activity without leading to an increase in resident or community exposure to unacceptable levels of hazard, noise, dust, odour or other emissions.	DTS/DPF 1.2 Alterations and additions where: (a) associated with a dwelling, do not increase the total floor area by more than 10% taking into account any previous alteration or addition or (b) associated with any other sensitive receivers, do not increase the on-site capacity of the service or facility.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Significant Landscape Protection Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Conservation of the natural and rural character and scenic and cultural qualities of significant landscapes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Land use intensity is restrained to conserve and enhance natural and rural character.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development inconsistent with conserving significant natural and rural landscapes is not undertaken.	DTS/DPF 1.2 Development does not include any of the following (or any combination of any of the following): (a) renewable energy facility (other than roof mounted solar photovoltaic panels) (b) large-scale industry, storage, distribution, warehousing (c) intensive animal husbandry.
Built Form and Character	
PO 2.1 Development is carefully sited and designed to: (a) complement rural or natural character (b) minimise disruption to natural landform (c) integrate existing natural environmental features, including native vegetation (d) minimise impacts on wildlife habitat (e) be low-scale (f) be visually unobtrusive and blend in with the surrounding area (g) be located below ridge lines.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings and structures are limited to those that: (a) are ancillary, adjacent to, and of the same or lesser scale as existing buildings (b) support desired outcomes of the relevant zone or subzone (c) are used for the ancillary sale of produce associated with a pastoral or rural activity (d) are in the form of high-quality, nature-based tourist accommodation (e) are for rainwater storage (f) are for research or education purposes (g) support conservation or the interpretation of the environment or cultural features.	DTS/DPF 2.2 None are applicable.
Landscaping	
PO 3.1 Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration.	DTS/DPF 3.1 Landscaping plantings exclusively constitute locally indigenous plant species.
Earthworks	
PO 4.1 Excavation and filling of land is limited to that associated with: (a) minimising the visual impact of buildings (b) construction of water storage facilities.	DTS/DPF 4.1 Excavation and/or filling satisfies all of the following: (a) it is in connection with a building or water storage facility (b) does not involve excavation exceeding a vertical height of 0.75m

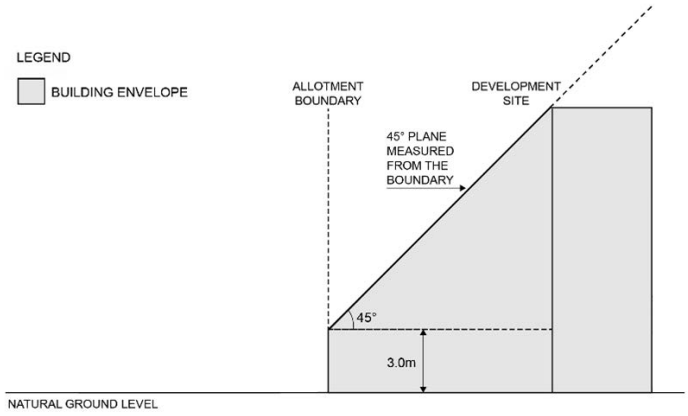
	(c) does not involve filling exceeding a vertical height of 0.75m (d) does not involve a total combined excavation and filling vertical height of 1.5m (e) any scree slope is covered in topsoil and landscaped with locally indigenous plant species.

Procedural Matters (PM) - Referrals

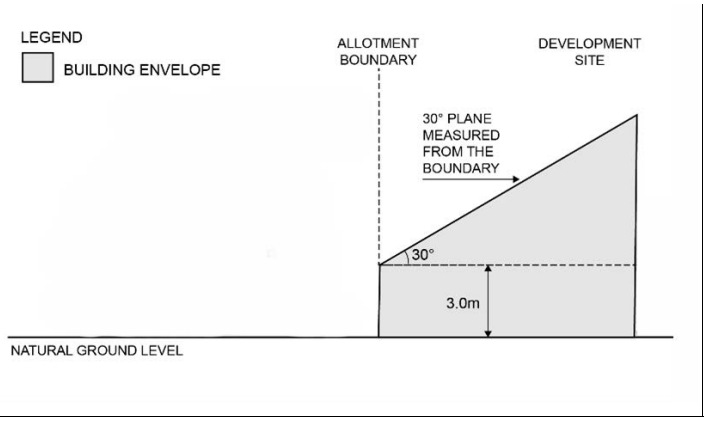
The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None



Significant Retirement Facility and Supported Accommodation Sites Overlay



Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development of supported accommodation and/or retirement facilities on significant retirement facility and supported accommodation sites to provide accommodation for the communities' ageing residents.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Non-residential activities are subordinate to, and in association with, retirement facilities and/or supported accommodation to support occupant care and wellbeing and the local community.	DTS/DPF 1.1 None are applicable.
PO 1.2 Shops, offices and consulting rooms are subordinate to, and associated with a retirement facility and/or supported accommodation on a significant retirement facility and supported accommodation site, and: (a) support the facility's residents, workers, visitors and the local community and (b) are of a scale to maintain residential amenity.	DTS/DPF 1.2 A shop, consulting room or office associated with supported accommodation and/or a retirement facility located on a significant retirement facility and supported accommodation site does not exceed: (a) either of the following: (i) 450m2 gross leasable floor area per tenancy or (ii) the relevant zone's maximum gross leasable floor area whichever is greater and (b) when combined with any other existing or proposed shop office or consulting room, 10% of the total gross leasable floor area of all buildings on the site.
Built form and Character	
PO 2.1 Buildings for, or associated with, supported accommodation and/or retirement facilities on a significant retirement facility and supported accommodation site are consistent with the form expressed in DTS/DPF 2.1 or positively responds to the local context, provided that off-site impacts can be managed.	DTS/DPF 2.1 Buildings for, or associated with, supported accommodation and/or a retirement facility on a significant retirement facility and supported accommodation site do not exceed: (a) 4 levels and 15m in height on sites between 6,500m2 up to 10,000m2 in area or (b) 6 levels and 22m in height on sites over 10,000m2 in area. In instances where the zone's maximum building height exceeds the height specified in part DTS/DPF 2.1 (a) or (b) (whichever is relevant), then the zone's maximum building height will apply.
PO 2.2 Development on a significant retirement facility and/or supported accommodation site designed to minimise impacts on local streetscapes and adjacent residential uses with regard to overshadowing, massing and building proportions.	DTS/DPF 2.2 Parts of a building associated with, a retirement facility and/or supported accommodation on a significant retirement facility and supported accommodation site that exceed the zone's maximum building height are constructed within a building envelope provided by a: (a) 45 degree plane measured from a height of 3m above natural ground level at the site boundary as shown in the following diagram (except where this boundary is a southern boundary or a State maintained road):  (b) 30 degree plane measured from a height of 3m above natural ground level at the southern site boundary as shown in the following diagram (except where this boundary is a State maintained road):

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

State Heritage Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development maintains the heritage and cultural values of State Heritage Areas through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993.
Note	Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993 can be found here

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 The form of new buildings and structures that are visible from the public realm are consistent with the heritage values and characteristics of the State Heritage Area.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development is consistent with the prevailing building and ceiling heights in the State Heritage Area.	DTS/DPF 1.2 None are applicable.
PO 1.3 Design and architectural detailing of street facing buildings is consistent with the prevailing characteristics expressed in the State Heritage Area.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is consistent with the prevailing front and side boundary setback pattern in the State Heritage Area.	DTS/DPF 1.4 None are applicable.
PO 1.5 Materials are consistent with or complement those within the State Heritage Area.	DTS/DPF 1.5 None are applicable.
Alterations and Additions	
PO 2.1 Alterations and additions complement the subject building and are sited to ensure they do not dominate the primary façade or streetscape and employ a contextual design approach.	DTS/DPF 2.1 None are applicable.
PO 2.2 Adaptive reuse and revitalisation of heritage buildings and places to support their retention in a manner that respects and references the heritage values of the State Heritage Area.	DTS/DPF 2.2 None are applicable.
Ancillary Development	
PO 3.1 Ancillary development, including carports, outbuildings and garages, complements the heritage values of the State Heritage Area.	DTS/DPF 3.1 None are applicable.
PO 3.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).	DTS/DPF 3.2 None are applicable.
PO 3.3 Advertising and advertising hoardings are designed to complement the State Heritage Area, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting of the State Heritage Area.	DTS/DPF 3.3 None are applicable
PO 3.4 Fencing and gates are consistent with the heritage values of the State Heritage Area.	DTS/DPF 3.4 None are applicable.
Land Division	
PO 4.1 Land division creates allotments that: (a) are compatible with the surrounding pattern of subdivision of the State Heritage Area (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Area.	DTS/DPF 4.1 None are applicable.
Landscape Context and Streetscape Amenity	
PO 5.1 Street trees, kerbing, footpaths and other features that contribute to the historic value of the State Heritage Area are maintained unless: (a) trees / plantings are, or have the potential to be, a danger to life or property or (b) trees / plantings are significantly diseased and their life expectancy is short.	DTS/DPF 5.1 None are applicable.
Demolition	
PO 6.1 Buildings and other features of identified heritage value within a State Heritage Area are not demolished, destroyed or removed in total or in part unless:	DTS/DPF 6.1 None are applicable.

(a) the portion of any building or other feature is determined to not contribute to the heritage value of the State Heritage Area or (b) the structural condition of the building represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair.	
Conservation Works	
PO 7.1 Conservation works to the exterior of buildings and other features of identified heritage value match original materials to be repaired and utilise traditional work methods.	DTS/DPF 7.1 Conservation works involving: (a) replacement of roof materials, guttering or downpipes with the same or substantially the same materials and detailing or (b) replacement of timber building elements (structural or decorative) with the same or substantially the same material, dimension and detailing; or brick and stone repair/ repointing to match original.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where: (a) the development is to be undertaken in accordance with a Heritage Agreement under the Heritage Places Act 1993 or (b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral any of the following classes of development: (a) demolition of external building fabric and other features of identified heritage value within the State Heritage Area (b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare within the State Heritage Area (c) alterations or additions to buildings and other features of identified heritage value that: (i) are visible from a public street, road or thoroughfare within the State Heritage Area or (ii) are visually dominant within the State Heritage Area or (iii) involve substantive physical impact to the fabric of significant buildings (d) new buildings that: (i) are visible from a public street, road or thoroughfare within the State Heritage Area or (ii) are visually dominant within the State Heritage Area (e) conservation repair works that are not representative of 'like for like' maintenance (f) solar panels that are visible from a public street, road or thoroughfare within the State Heritage Area (g) land division (h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare within the State Heritage Area (i) the removal of an individual tree or a tree within a garden or park of identified heritage significance within the State Heritage Area.	Minister responsible for the administration of the *Heritage Places Act 1993*.	To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Areas.	Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

State Heritage Place Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development maintains the heritage and cultural values of State Heritage Places through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the *Heritage Places Act 1993*.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 The form of new buildings and structures maintains the heritage values of the State Heritage Place.	DTS/DPF 1.1 None are applicable.
PO 1.2 Massing, scale and siting of development maintains the heritage values of the State Heritage Place.	DTS/DPF 1.2 None are applicable.
PO 1.3 Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the State Heritage Place.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is consistent with boundary setbacks and setting.	DTS/DPF 1.4 None are applicable.
PO 1.5 Materials and colours are either consistent with or complement the heritage values of the State Heritage Place.	DTS/DPF 1.5 None are applicable.
PO 1.6 New buildings and structures are not placed or erected between the primary and secondary street boundaries and the façade of a State Heritage Place.	DTS/DPF 1.6 None are applicable.
PO 1.7 Development of a State Heritage Place retains elements contributing to its heritage value.	DTS/DPF 1.7 None are applicable.
Alterations and Additions	
PO 2.1 Alterations and additions complement the State Heritage Place and are sited to be unobtrusive, not conceal or obstruct heritage features and detailing, or dominate the State Heritage Place or its setting.	DTS/DPF 2.1 None are applicable.
PO 2.2 Adaptive reuse and revitalisation of State Heritage Places to support their retention in a manner that respects and references the original use of the State Heritage Place.	DTS/DPF 2.2 None are applicable.
Ancillary Development	
PO 3.1 Ancillary development, including carports, outbuildings and garages, complement the heritage values of the State Heritage Place.	DTS/DPF 3.1 None are applicable.
PO 3.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the State Heritage Place.	DTS/DPF 3.2 None are applicable.
PO 3.3 Advertising and advertising hoardings are designed and located to complement the State Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting.	DTS/DPF 3.3 None are applicable.
PO 3.4	DTS/DPF 3.4

Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the State Heritage Place.	None are applicable.
Land Division	
PO 4.1 Land division creates allotments that: (a) maintain the heritage values of the State Heritage Place, including setting (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Place.	DTS/DPF 4.1 None are applicable.
Landscape Context and Streetscape Amenity	
PO 5.1 Individually heritage listed trees, parks, historic gardens and memorial avenues retained unless: (a) trees / plantings are, or have the potential to be, a danger to life or property or (b) trees / plantings are significantly diseased and their life expectancy is short.	DTS/DPF 5.1 None are applicable.
Demolition	
PO 6.1 State Heritage Places are not demolished, destroyed or removed in total or in part unless either of the following apply: (a) the portion of the State Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value or (b) the structural condition of the State Heritage Place represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair.	DTS/DPF 6.1 None are applicable.
Conservation Works	
PO 7.1 Conservation works to the exterior and interior of a State Heritage Place and other features of identified heritage value match original materials to be repaired and utilise traditional work methods.	DTS/DPF 7.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where: (a) the development is to be undertaken in accordance with a Heritage Agreement under the *Heritage Places Act 1993* or (b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral any of the following classes of development: (a) demolition of internal or external significant building fabric (b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare that abuts the State Heritage Place (c) alterations or additions to buildings that: (i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place or (ii) may materially affect the context of a State Heritage Place or (iii) involve substantive physical impact to the fabric of significant buildings; (d) new buildings that: (i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place or (ii) may materially affect the context of the State Heritage Place (e) conservation repair works that are not representative of 'like for like' maintenance (f) solar panels that are visible from a public street, road or thoroughfare that abuts the State Heritage Place (g) land division (h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare that abuts the State Heritage Place (i) the removal of an individual tree or a tree within a garden or park of identified heritage significance.	Minister responsible for the administration of the *Heritage Places Act 1993*.	To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Places.	Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

State Significant Native Vegetation Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protect, retain and restore significant areas of native vegetation.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Environmental Protection	
PO 1.1 Development enhances biodiversity and habitat values through revegetation and avoiding native vegetation clearance except to promote an appreciation and awareness of wildlife areas, including visitor parking and amenities, or for the administration and management of a reserve or park established for the protection and conservation of wildlife.	DTS/DPF 1.1 An application is accompanied by either (a) or (b): (a) a declaration stating that the proposal will not , or would not, involve clearance of native vegetation under the *Native Vegetation Act 1991*, including any clearance that may occur: (i) in connection with a relevant access point and / or driveway (ii) within 10m of a building (other than a residential building or tourist accommodation) (iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control (iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area (b) a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* that confirms that the clearance is categorised as 'Level 1 clearance'.
Land division	
PO 2.1 Land division that contributes to the conservation, protection and enhancement of native vegetation.	DTS/DPF 2.1 Land division satisfies one of the following: (a) to create a public road or a public reserve where the application is accompanied by a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* in which the extent of native vegetation clearance proposed to be undertaken in connection with the division is categorised as 'Level 1 clearance' (b) to realign allotment boundaries to incorporate land into a park or reserve established under the *National Parks and Wildlife Act 1972*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference

The following classes of development: (a) land division where a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* in connection with a development application categorises the clearance, or potential clearance, as 'Level 2 clearance', 'Level 3 clearance' or 'Level 4 clearance' (b) all other classes of development other than where DTS/DPF 1.1(a) or DTS/DPF 1.1(b) is achieved.	Native Vegetation Council	To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation.	Development of a class to which Schedule 9 clause 3 item 11 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Stormwater Management Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development incorporates water sensitive urban design techniques to capture and re-use stormwater.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Residential development is designed to capture and re-use stormwater to: (a) maximise conservation of water resources (b) manage peak stormwater runoff flows and volume to ensure the carrying capacities of downstream systems are not overloaded (c) manage stormwater runoff quality.	DTS/DPF 1.1 Residential development comprising detached, semi-detached or row dwellings, or less than 5 group dwellings, co-located housing or dwellings within a residential flat building satisfies all of the following: (a) includes rainwater tank storage: (i) connected to at least: A. in relation to a detached dwelling (not in a battle-axe arrangement), semi-detached dwelling or row dwelling, 60% of the roof area B. in all other cases, 80% of the roof area (ii) connected to either a toilet or laundry cold water outlets for sites less than 200m^2 (iii) connected to one toilet and the laundry cold water outlets for sites of 200m^2 or greater (iv) with a minimum total capacity in accordance with Table 1 (v) where detention is required, includes a 20-25 mm diameter slow release orifice at the bottom of the detention component of the tank (b) incorporates dwelling roof area comprising at least 80% of the site's impervious area Table 1: Rainwater Tank **Site size (m^2)** / **Minimum retention volume (Litres)** / **Minimum detention volume (Litres)** \<200 / 1000 / 1000 200-400 / 2000 / Site perviousness <30%: 1000 Site perviousness ≥30%: N/A >401 / 4000 / Site perviousness <35%: 1000 Site perviousness ≥35%: N/A

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Traffic Generating Development Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of Urban Transport Routes and Major Urban Transport Routes for all road users.
DO 2	Provision of safe and efficient access to and from urban transport routes and major urban transport routes.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Traffic Generating Development	
PO 1.1 Development designed to minimise its potential impact on the safety, efficiency and functional performance of the State Maintained Road network.	DTS/DPF 1.1 Access is obtained directly from a State Maintained Road where it involves any of the following types of development: (a) building, or buildings, containing in excess of 50 dwellings (b) land division creating 50 or more additional allotments (c) commercial development with a gross floor area of 10,000m2 or more (d) retail development with a gross floor area of 2,000m2 or more (e) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more (f) industry with a gross floor area of 20,000m2 or more (g) educational facilities with a capacity of 250 students or more (h) supported accommodation and/or a retirement facility containing in excess of 50 residences, on a significant retirement facility and supported accommodation site.
PO 1.2 Access points sited and designed to accommodate the type and volume of traffic likely to be generated by development.	DTS/DPF 1.2 Access is obtained directly from a State Maintained Road where it involves any of the following types of development: (a) building, or buildings, containing in excess of 50 dwellings (b) land division creating 50 or more additional allotments

	(c) commercial development with a gross floor area of 10,000m2 or more (d) retail development with a gross floor area of 2,000m2 or more (e) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more (f) industry with a gross floor area of 20,000m2 or more (g) educational facilities with a capacity of 250 students or more (h) supported accommodation and/or a retirement facility containing in excess of 50 residences, on a significant retirement facility and supported accommodation site.
PO 1.3 Sufficient accessible on-site queuing provided to meet the needs of the development so that queues do not impact on the State Maintained Road network.	DTS/DPF 1.3 Access is obtained directly from a State Maintained Road where it involves any of the following types of development: (a) building, or buildings, containing in excess of 50 dwellings (b) land division creating 50 or more additional allotments (c) commercial development with a gross floor area of 10,000m2 or more (d) retail development with a gross floor area of 2,000m2 or more (e) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more (f) industry with a gross floor area of 20,000m2 or more (g) educational facilities with a capacity of 250 students or more (h) supported accommodation and/or a retirement facility containing in excess of 50 residences, on a significant retirement facility and supported accommodation site.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, any of the following classes of development that are proposed within 250m of a State Maintained Road: (a) except where a proposed development has previously been referred under clause (b) - a building, or buildings, containing in excess of 50 dwellings (b) except where a proposed development has previously been referred under clause (a) - land division creating 50 or more additional allotments (c) commercial development with a gross floor area of 10,000m^2 or more (d) retail development with a gross floor area of 2,000m^2 or more (e) a warehouse or transport depot with a gross leasable floor area of 8,000m^2 or more (f) industry with a gross floor area of 20,000m^2 or more (g) educational facilities with a capacity of 250 students or more (h) supported accommodation and/or a retirement facility containing in excess of 50 residences, on a significant retirement facility and supported accommodation site.	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Tunnel Protection Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO1	Development which preserves the integrity and operation of underground tunnel corridors and associated infrastructure.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

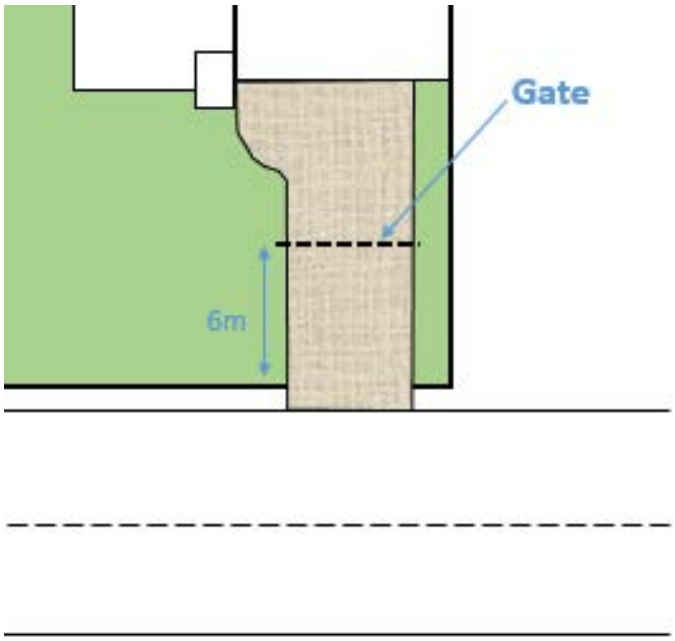
Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Development does not unsatisfactorily increase loading on underground tunnel corridors or infrastructure.	DTS/DPF 1.1 Development satisfies (a) and (b): (a) comprises one or more of the following, and does not exceed 3 building levels above the regulated surface level: (i) ancillary accommodation (ii) carport (iii) child care facility (iv) community facility (v) consulting room (vi) dwelling (vii) educational facility (viii) hotel (ix) office (x) outbuilding (xi) retirement facility (xii) shop (other than a bulky goods outlet) (xiii) student accommodation (xiv) supported accommodation (xv) tourist accommodation (xvi) verandah (xvii) development which is, in the opinion of the relevant authority, minor in nature or would not warrant a referral when considering the purpose of the referral. (b) does not include any of the following: (i) filling of land more than 1m above the regulated surface level (ii) storage of materials, equipment or vehicles (whether temporary or permanent) over an area exceeding 100 square metres (iii) temporary stockpiling of soil, gravel, rock or other natural material over an area exceeding 100 square metres.
Excavation and Ground Intruding Activity	
PO 2.1 Development does not unsatisfactorily interact with or reduce the loading on an underground tunnel corridors or infrastructure.	DTS/DPF 2.1 Development does not include excavation or ground intruding activity at a depth greater than 2.5 metres below the regulated surface level.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development that is within the Tunnel Protection Overlay.	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority in relation to the potential for development to adversely impact upon the safety and structural integrity of tunnels and associated underground infrastructure proposed by or under the care, control and management of the Commissioner of Highways.	Development of a class to which Schedule 9 clause 3 item 8 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.



Urban Transport Routes Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of Urban Transport Routes for all road users.
DO 2	Provision of safe and efficient access to and from Urban Transport Routes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Access - Safe Entry and Exit (Traffic Flow)	
PO 1.1 Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State maintained roads.	DTS/DPF 1.1 An access point satisfies (a), (b) or (c): (a) where servicing a single (1) dwelling / residential allotment all of the following are satisfied: (i) it will not result in more than one access point (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 3m and 4m (measured at the site boundary) (b) where the development will result in 2 and up to 6 dwellings all of the following are satisfied: (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site) (c) where the development will result in 7 or more dwellings, or is a non-residential land use all of the following are satisfied: (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site using left turn only movements (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (v) it will have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less (vi) it will have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m (vii) it will have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m (viii) provides for simultaneous two-way vehicle movements at the access: A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road and B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.
Access - On-Site Queuing	
PO 2.1 Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption on the functional performance of the road and maintain safe vehicle movements.	DTS/DPF 2.1 An access point satisfies (a), (b) or (c): (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:  (b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and all of the following are satisfied: (i) is expected to be serviced by vehicles with a length no greater than 6.4m (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) (c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and all of the following are satisfied: (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) (iii) any termination of or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the longest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram:

Access - (Location Spacing) - Existing Access Point

PO 3.1

Existing access points are designed to accommodate the type and volume of traffic likely to be generated by the development.

DTS/DPF 3.1

An existing access point satisfies (a), (b) or (c):

(a) it will not service, or is not intended to service, more than 6 dwellings

(b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access

(c) is not located on a Controlled Access Road and development constitutes one or more of the following:

(i) a change of use between an office <500m² gross leasable floor area and a consulting room <500m² gross leasable floor area or vice versa

(ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment

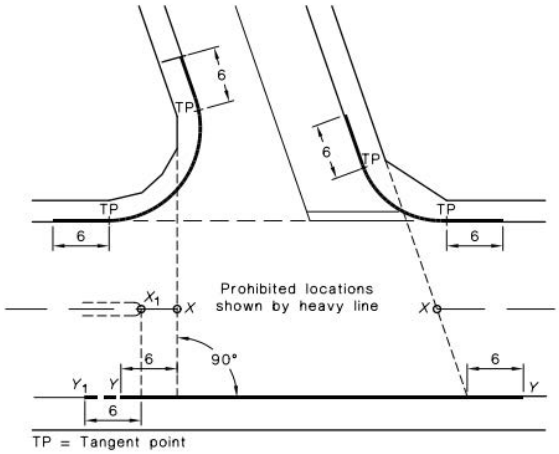
(iii) a change of use from a consulting room or office <250m² gross leasable floor area to shop <250m² gross leasable floor area

(iv) a change of use from a shop <500m² gross leasable floor area to a warehouse <500m² gross leasable floor area

(v) an office or consulting room with a <500m² gross leasable floor area

(vi) a change of use from a residential dwelling to a shop, office, consulting room or personal or domestic services establishment with <250m^2 gross leasable floor area.

Access – Location (Spacing) – New Access Points



PO 4.1

New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1

A new access point satisfies (a), (b) or (c):

(a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:

The points marked X_1 and X are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension Y-Y extends to Point Y_1.

(b) where the development site is intended to serve between 1 and 6 dwellings, the new access satisfies all of the following:

(i) is not located on a Controlled Access Road

(ii) is not located on a section of road affected by double barrier lines

(iii) will be on a road with a speed environment of 70km/h or less

(iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)

(v) is located a minimum of 6m from a median opening or pedestrian crossing

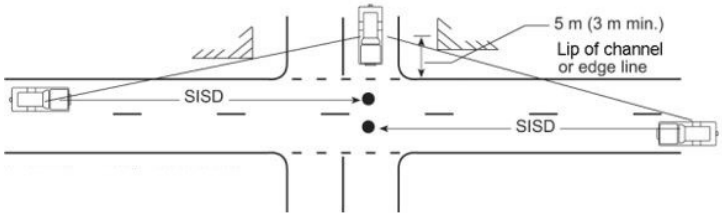
(c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

Speed Limit	Separation between access points	Separation from public road junctions and merging/terminating lanes
50 km/h or less	No spacing requirement	20m
60 km/h	5m (for development intended to serve between 1 and 6 dwellings) and 10m for all other cases	73m
70 km/h	40m	92m
80 km/h	50m	114m
90 km/h	65m	139m
100 km/h	80m	165m
110 km/h	100m	193m

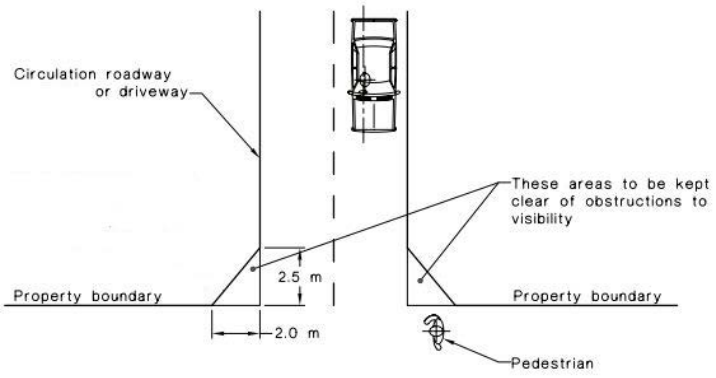
Access - Location (Sight Lines)

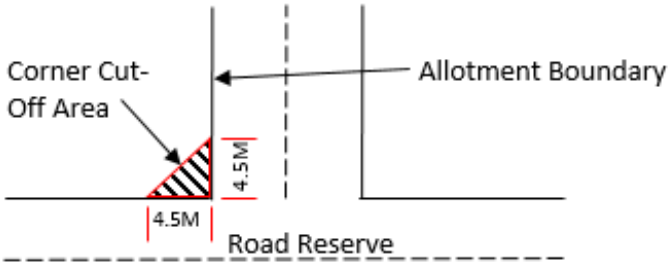
PO 5.1

Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.



DTS/DPF 5.1





An access point satisfies (a) and (c) or (b) and (c):

(a) the development site does or is intended to serve between 1 and 6 dwellings and utilises an existing access point
or

(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

Speed Limit	Access point serving 1-6 dwellings	Access point serving all other development
40 km/h or less	47m	73m
50 km/h	63m	97m
60 km/h	81m	123m
70 km/h	100m	151m
80 km/h	121m	181m
90 km/h	144m	226m
100 km/h	169m	262m
110km/h	195m	300m

	and (c) pedestrian sightlines in accordance with the following diagram: 
Access – Mud and Debris	
PO 6.1 Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.	DTS/DPF 6.1 Where the road has an unsealed shoulder and the road is not kerbed, the access way is sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer).
Access - Stormwater	
PO 7.1 Access points are designed to minimise negative impact on roadside drainage of water.	DTS/DPF 7.1 Development does not result in any of the following: (a) decrease the capacity of an existing drainage point (b) restrict or prevent the flow of stormwater through an existing drainage point and system (c) result in access points becoming stormwater flow paths directly onto the road.
Building on Road Reserve	
PO 8.1 Buildings or structures that encroach onto, above or below road reserves are designed and sited to minimise impact on safe movements by all road users.	DTS/DPF 8.1 Buildings or structures are not located on, above or below the road reserve.
Public Road Junctions	
PO 9.1 New junctions with a public road (including the opening of unmade public road junctions) or modifications to existing road junctions are located and designed to ensure safe operating conditions are maintained on the State Maintained Road.	DTS/DPF 9.1 Development does not comprise any of the following: (a) creating a new junction with a public road (b) opening an unmade public road junction (c) modifying an existing public road junction.
Corner Cut-Offs	
PO 10.1 Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to driver safety.	DTS/DPF 10.1 Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram: 

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land, but not an excluded land division) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road: (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Urban Tree Canopy Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Residential development preserves and enhances urban tree canopy through the planting of new trees and retention of existing mature trees where practicable.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Trees are planted or retained to contribute to an urban tree canopy.	DTS/DPF 1.1 Tree planting is provided in accordance with the following: Site size per dwelling (m^2) | Tree size* and number required per dwelling <450 | 1 small tree 450-800 | 1 medium tree or 2 small trees >800 | 1 large tree or 2 medium trees or 4 small trees *refer Table 1 Tree Size Table 1 Tree Size Tree size | Mature height (minimum) | Mature spread (minimum) | Soil area around tree within development site (minimum) Small | 4 m | 2m | $10m^2$ and min. dimension of 1.5m Medium | 6 m | 4 m | $30m^2$ and min. dimension of 2m Large | 12 m | 8m | $60m^2$ and min. dimension of 4m The discount in Column D of Table 2 discounts the number of trees required to be planted in DTS/DPF 1.1 where existing tree(s) are retained on the subject land that meet the criteria in Columns A, B and C of Table 2, and are not a species identified in Regulation 3F(4)(b) of the Planning Development and Infrastructure (General) Regulations 2017. Table 2 Tree Discounts Retained tree height (Column A) | Retained tree spread (Column B) | Retained soil area around tree within development site (Column C) | Discount applied (Column D) 4-6m | 2-4m | $10m^2$ and min. dimension of 1.5m | 2 small trees (or 1 medium tree) 6-12m | 4-8m | $30m^2$ and min. dimension of 3m | 2 medium trees (or 4 small trees) >12m | >8m | $60m^2$ and min. dimension of 6m | 2 large trees (or 4 medium trees, or 8 small trees) Note: In order to satisfy DTS/DPF 1.1, payment may be made in accordance with a relevant off-set scheme established by the Minister under section 197 of the Planning, Development and Infrastructure Act 2016, provided the provisions and requirements of that scheme are satisfied. For the purposes of section 102(4) of the Planning, Development and Infrastructure Act 2016, an applicant may elect for any of the matters in DTS/DPF 1.1 to be reserved.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Water Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safeguard South Australia's public water supplies and ecologically significant areas by protecting regionally and locally significant surface and underground water resources in Water Protection Areas from pollution. This includes considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development with potential to expose the water supply role of the Water Protection Area to significant adverse water quality risk is avoided to maintain the long term function of the Water Protection Area.	DTS/DPF 1.1 Development does not involve any one or combination of the following: (a) fuel depot (b) intensive animal husbandry (c) special industry (d) stock slaughter works (e) timber preservation works.
Groundwater	
PO 2.1 Groundwater resources are protected from pollution by ensuring development does not: (a) generate or dispose of waste in a manner that would pollute water resources (b) involve the storage or disposal of chemicals or hazardous substances in a manner that would pose a risk to water supplies.	DTS/DPF 2.1 None are applicable.
PO 2.2 Groundwater catchment and recharge characteristics are safeguarded by ensuring development: (a) retains and protects areas of native vegetation (b) does not inhibit the potential of an aquifer to recharge.	DTS/DPF 2.2 None are applicable.
Farming and Horticulture	
PO 3.1 Farming or horticulture operations occur only where: (a) the activity will not result in any increase in the salinity levels of groundwater (b) the land and soil structure is capable of supporting the proposed activity and the likelihood of soil erosion is minimised (c) the depth to the water table is greater than 2 metres from the ground.	DTS/DPF 3.1 None are applicable.
Irrigation	

PO 4.1 Irrigated areas are sited to ensure they: (a) avoid any land prone to waterlogging or subject to flooding through irrigation (b) avoid the risk of the water table falling or rising significantly as a result of irrigation practices (c) do not increase the salinity levels of groundwater (d) minimise the risk of polluting surface and groundwater resources where wastewater is used to irrigate the land.	DTS/DPF 4.1 None are applicable.
Wastewater	
PO 5.1 Wastewater-generating development utilises existing communal wastewater management infrastructure to avoid on-site disposal.	DTS/DPF 5.1 Development (including land division) that generates wastewater is connected to sewerage or community wastewater management systems with sufficient hydraulic capacity to accept the inflow.
PO 5.2 Development that generates wastewater which cannot be disposed of via sewerage or community wastewater management systems, is designed and of a scale that will enable on-site wastewater treatment and disposal in accordance with relevant health and environmental requirements.	DTS/DPF 5.2 On-site wastewater treatment systems comply with: (a) the 'On-site Wastewater Systems Code' or (b) AS/NZS 1547: On-site domestic wastewater management and the South Australian amendments to AS/NSZ 1547 as outlined in section 9.2 of the 'On-site Wastewater Systems Code'.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Water Resources Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of the quality of surface waters considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change.
DO 2	Maintain the conveyance function and natural flow paths of watercourses to assist in the management of flood waters and stormwater runoff.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Water Catchment	
PO 1.1 Watercourses and their beds, banks, wetlands and floodplains (1% AEP flood extent) are not damaged or modified and are retained in their natural state, except where modification is required for essential access or maintenance purposes.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development avoids interfering with the existing hydrology or water regime of swamps and wetlands other than to improve the existing conditions to enhance environmental values.	DTS/DPF 1.2 None are applicable.
PO 1.3 Wetlands and low-lying areas providing habitat for native flora and fauna are not drained, except temporarily for essential management purposes to enhance environmental values.	DTS/DPF 1.3 None are applicable.
PO 1.4 Watercourses, areas of remnant native vegetation, or areas prone to erosion that are capable of natural regeneration are fenced off to limit stock access.	DTS/DPF 1.4 None are applicable.
PO 1.5 Development that increases surface water run-off includes a suitably sized strip of vegetated land on each side of a watercourse to filter runoff to: (a) reduce the impacts on native aquatic ecosystems (b) minimise soil loss eroding into the watercourse.	DTS/DPF 1.5 A strip of land 20m or more wide measured from the top of existing banks on each side of the watercourse is free from development, livestock use and revegetated with locally indigenous vegetation.
PO 1.6 Development resulting in the depositing or placing of an object or solid material in a watercourse or lake occurs only where it involves any of the following: (a) the construction of an erosion control structure (b) devices or structures used to extract or regulate water flowing in a watercourse (c) devices used for scientific purposes (d) the rehabilitation of watercourses.	DTS/DPF 1.6 None are applicable.
PO 1.7 Watercourses, floodplains (1% AEP flood extent) and wetlands protected and enhanced by retaining and protecting existing native vegetation.	DTS/DPF 1.7 None are applicable.
PO 1.8 Watercourses, floodplains (1% AEP flood extent) and wetlands are protected and enhanced by stabilising watercourse banks and reducing sediments and nutrients entering the watercourse.	DTS/DPF 1.8 None are applicable.
PO 1.9 Dams, water tanks and diversion drains are located and constructed to maintain the quality and quantity of flows required to meet environmental and downstream needs.	DTS/DPF 1.9 None are applicable.

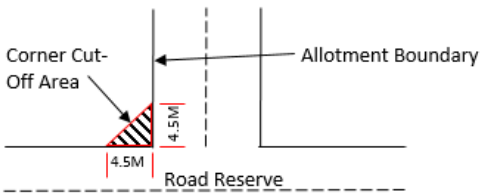
Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Part 4 - General Development Policies



Advertisements

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Advertisements and advertising hoardings are appropriate to context, efficient and effective in communicating with the public, limited in number to avoid clutter, and do not create hazard.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Appearance	
PO 1.1 Advertisements are compatible and integrated with the design of the building and/or land they are located on.	DTS/DPF 1.1 Advertisements attached to a building satisfy all of the following: (a) are not located in a Neighbourhood-type zone (b) where they are flush with a wall: (i) if located at canopy level, are in the form of a fascia sign (ii) if located above canopy level: A. do not have any part rising above parapet height or B. are not attached to the roof of the building (c) where they are not flush with a wall: (i) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure (ii) if attached to a two-storey building all of the following are satisfied: A. has no part located above the finished floor level of the second storey of the building B. does not protrude beyond the outer limits of any verandah structure below C. does not have a sign face that exceeds 1m2 per side. (d) if located below canopy level, are flush with a wall (e) if located at canopy level, are in the form of a fascia sign (f) if located above a canopy all of the following are satisfied: (i) are flush with a wall (ii) do not have any part rising above parapet height (iii) are not attached to the roof of the building. (g) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure (h) if attached to a two-storey building, have no part located above the finished floor level of the second storey of the building (i) where they are flush with a wall, do not, in combination with any other existing sign, cover more than 15% of the building facade to which they are attached.
PO 1.2 Advertising hoardings do not disfigure the appearance of the land upon which they are situated or the character of the locality.	DTS/DPF 1.2 Where development comprises an advertising hoarding, the supporting structure is: (a) concealed by the associated advertisement and decorative detailing or (b) not visible from an adjacent public street or thoroughfare, other than a support structure in the form of a single or dual post design.
PO 1.3 Advertising does not encroach on public land or the land of an adjacent allotment.	DTS/DPF 1.3 Advertisements and/or advertising hoardings are contained within the boundaries of the site.
PO 1.4 Where possible, advertisements on public land are integrated with existing structures and infrastructure.	DTS/DPF 1.4 Advertisements on public land that meet at least one of the following: (a) achieves Advertisements DTS/DPF 1.1 (b) are integrated with a bus shelter.
PO 1.5 Advertisements and/or advertising hoardings are of a scale and size appropriate to the character of the locality.	DTS/DPF 1.5 None are applicable.
Proliferation of Advertisements	
PO 2.1 Proliferation of advertisements is minimised to avoid visual clutter and untidiness.	DTS/DPF 2.1 No more than one freestanding advertisement is displayed per occupancy.
PO 2.2 Multiple business or activity advertisements are co-located and coordinated to avoid visual clutter and untidiness.	DTS/DPF 2.2 Advertising of a multiple business or activity complex is located on a single advertisement fixture or structure.
PO 2.3 Proliferation of advertisements attached to buildings is minimised to avoid visual clutter and untidiness.	DTS/DPF 2.3 Advertisements satisfy all of the following: (a) are attached to a building (b) other than in a Neighbourhood-type zone, where they are flush with a wall, cover no more than 15% of the building facade to which they are attached (c) do not result in more than one sign per occupancy that is not flush with a wall.
Advertising Content	
PO 3.1 Advertisements are limited to information relating to the lawful use of land they are located on to assist in the ready identification of the activity or activities on the land and avoid unrelated content that contributes to visual clutter and untidiness.	DTS/DPF 3.1 Advertisements contain information limited to a lawful existing or proposed activity or activities on the same site as the advertisement.
Amenity Impacts	
PO 4.1 Light spill from advertisement illumination does not unreasonably compromise the amenity of sensitive receivers.	DTS/DPF 4.1 Advertisements do not incorporate any illumination.
Safety	
PO 5.1 Advertisements and/or advertising hoardings erected on a verandah or projecting from a building wall are designed and located to allow for safe and convenient pedestrian access.	DTS/DPF 5.1 Advertisements have a minimum clearance of 2.5m between the top of the footpath and base of the underside of the sign.
PO 5.2 Advertisements and/or advertising hoardings do not distract or create a hazard to drivers through excessive illumination.	DTS/DPF 5.2 No advertisement illumination is proposed.
PO 5.3 Advertisements and/or advertising hoardings do not create a hazard to drivers by: (a) being liable to interpretation by drivers as an official traffic sign or signal (b) obscuring or impairing drivers' view of official traffic signs or signals (c) obscuring or impairing drivers' view of features of a road that are potentially hazardous (such as junctions, bends, changes in width and traffic control devices) or other road or rail vehicles at/or approaching level crossings.	DTS/DPF 5.3 Advertisements satisfy all of the following: (a) are not located in a public road or rail reserve (b) are located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram 
PO 5.4 Advertisements and/or advertising hoardings do not create a hazard by distracting drivers from the primary driving task at a location where the demands on driver concentration are high.	DTS/DPF 5.4 Advertisements and/or advertising hoardings are not located along or adjacent to a road having a speed limit of 80km/h or more.

PO 5.5 Advertisements and/or advertising hoardings provide sufficient clearance from the road carriageway to allow for safe and convenient movement by all road users.	DTS/DPF 5.5 Where the advertisement or advertising hoarding is: (a) on a kerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 0.6m from the roadside edge of the kerb (b) on an unkerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 5.5m from the edge of the seal (c) on any other kerbed or unkerbed road, the advertisement or advertising hoarding is located a minimum of the following distance from the roadside edge of the kerb or the seal: (a) 110 km/h road - 14m (b) 100 km/h road - 13m (c) 90 km/h road - 10m (d) 70 or 80 km/h road - 8.5m.
PO 5.6 Advertising near signalised intersections does not cause unreasonable distraction to road users through illumination, flashing lights, or moving or changing displays or messages.	DTS/DPF 5.6 Advertising satisfies all of the following: (a) is not illuminated (b) does not incorporate a moving or changing display or message (c) does not incorporate a flashing light(s).

Animal Keeping and Horse Keeping

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Animals are kept at a density that is not beyond the carrying capacity of the land and in a manner that minimises their adverse effects on the environment, local amenity and surrounding development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting and Design	
PO 1.1 Animal keeping, horse keeping and associated activities do not create adverse impacts on the environment or the amenity of the locality.	DTS/DPF 1.1 None are applicable.
PO 1.2 Animal keeping and horse keeping is located and managed to minimise the potential transmission of disease to other operations where animals are kept.	DTS/DPF 1.2 None are applicable.
Horse Keeping	
PO 2.1 Water from stable wash-down areas is directed to appropriate absorption areas and/or drainage pits to minimise pollution of land and water.	DTS/DPF 2.1 None are applicable.
PO 2.2 Stables, horse shelters or associated yards are sited appropriate distances away from sensitive receivers and/or allotments in other ownership to avoid adverse impacts from dust, erosion and odour.	DTS/DPF 2.2 Stables, horse shelters and associated yards are sited in accordance with all of the following: (a) 30m or more from any sensitive receivers (existing or approved) on land in other ownership (b) where an adjacent allotment is vacant and in other ownership, 30m or more from the boundary of that allotment.
PO 2.3 All areas accessible to horses are separated from septic tank effluent disposal areas to protect the integrity of that system. Stable flooring is constructed with an impervious material to facilitate regular cleaning.	DTS/DPF 2.3 Septic tank effluent disposal areas are enclosed with a horse-proof barrier such as a fence to exclude horses from this area.
PO 2.4 To minimise environmental harm and adverse impacts on water resources, stables, horse shelters and associated yards are appropriately set back from a watercourse.	DTS/DPF 2.4 Stables, horse shelters and associated yards are set back 50m or more from a watercourse.
PO 2.5 Stables, horse shelters and associated yards are located on slopes that are stable to minimise the risk of soil erosion and water runoff.	DTS/DPF 2.5 Stables, horse shelters and associated yards are not located on land with a slope greater than 10% (1-in-10).
Kennels	
PO 3.1 Kennel flooring is constructed with an impervious material to facilitate regular cleaning.	DTS/DPF 3.1 The floors of kennels satisfy all of the following: (a) are constructed of impervious concrete (b) are designed to be self-draining when washed down.
PO 3.2 Kennels and exercise yards are designed and sited to minimise noise nuisance to neighbours through measures such as: (a) adopting appropriate separation distances (b) orientating openings away from sensitive receivers.	DTS/DPF 3.2 Kennels are sited 500m or more from the nearest sensitive receiver on land in other ownership.
PO 3.3 Dogs are regularly observed and managed to minimise nuisance impact on adjoining sensitive receivers from animal behaviour.	DTS/DPF 3.3 Kennels are sited in association with a permanent dwelling on the land.
Wastes	
PO 4.1 Storage of manure, used litter and other wastes (other than wastewater lagoons) is designed, constructed and managed to minimise attracting and harbouring vermin.	DTS/DPF 4.1 None are applicable.
PO 4.2 Facilities for the storage of manure, used litter and other wastes (other than wastewater lagoons) are located to minimise the potential for polluting water resources.	DTS/DPF 4.2 Waste storage facilities (other than wastewater lagoons) are located outside the 1% AEP flood event areas.

Aquaculture

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Aquaculture facilities are developed in an ecologically, economically and socially sustainable manner to support an equitable sharing of marine, coastal and inland resources and mitigate conflict with other water-based and land-based uses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land-based Aquaculture	
PO 1.1 Land-based aquaculture and associated components are sited and designed to mitigate adverse impacts on nearby sensitive receivers.	DTS/DPF 1.1 Land-based aquaculture and associated components are located to satisfy all of the following: (a) 200m or more from a sensitive receiver in other ownership

	(b) 500m or more from the boundary of a zone primarily intended to accommodate sensitive receivers or The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 1.2 Land-based aquaculture and associated components are sited and designed to prevent surface flows from entering ponds in a 1% AEP sea flood level event.	DTS/DPF 1.2 None are applicable.
PO 1.3 Land-based aquaculture and associated components are sited and designed to prevent pond leakage that would pollute groundwater.	DTS/DPF 1.3 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 1.4 Land-based aquaculture and associated components are sited and designed to prevent farmed species escaping and entering into any waters.	DTS/DPF 1.4 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 1.5 Land-based aquaculture and associated components, including intake and discharge pipes, are designed to minimise the need to traverse sensitive areas to minimise impact on the natural environment.	DTS/DPF 1.5 None are applicable.
PO 1.6 Pipe inlets and outlets associated with land-based aquaculture are sited and designed to minimise the risk of disease transmission.	DTS/DPF 1.6 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 1.7 Storage areas associated with aquaculture activity are integrated with the use of the land and sited and designed to minimise their visual impact on the surrounding environment.	DTS/DPF 1.7 None are applicable.
Marine Based Aquaculture	
PO 2.1 Marine aquaculture is sited and designed to minimise its adverse impacts on sensitive ecological areas including: (a) creeks and estuaries (b) wetlands (c) significant seagrass and mangrove communities (d) marine habitats and ecosystems.	DTS/DPF 2.1 None are applicable.
PO 2.2 Marine aquaculture is sited in areas with adequate water current to disperse sediments and dissolve particulate wastes to prevent the build-up of waste that may cause environmental harm.	DTS/DPF 2.2 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 2.3 Marine aquaculture is designed to not involve discharge of human waste on the site, on any adjacent land or into nearby waters.	DTS/DPF 2.3 The development does not include toilet facilities located over water.
PO 2.4 Marine aquaculture (other than inter-tidal aquaculture) is located an appropriate distance seaward of the high water mark.	DTS/DPF 2.4 Marine aquaculture development is located 100m or more seaward of the high water mark or The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 2.5 Marine aquaculture is sited and designed to not obstruct or interfere with: (a) areas of high public use (b) areas, including beaches, used for recreational activities such as swimming, fishing, skiing, sailing and other water sports (c) areas of outstanding visual or environmental value (d) areas of high tourism value (e) areas of important regional or state economic activity, including commercial ports, wharfs and jetties (f) the operation of infrastructure facilities including inlet and outlet pipes associated with the desalination of sea water.	DTS/DPF 2.5 None are applicable.
PO 2.6 Marine aquaculture is sited and designed to minimise interference and obstruction to the natural processes of the coastal and marine environment.	DTS/DPF 2.6 None are applicable.
PO 2.7 Marine aquaculture is designed to be as unobtrusive as practicable by incorporating measures such as: (a) using feed hoppers painted in subdued colours and suspending them as close as possible to the surface of the water (b) positioning structures to protrude the minimum distance practicable above the surface of the water (c) avoiding the use of shelters and structures above cages and platforms unless necessary to exclude predators and protected species from interacting with the farming structures and/or stock inside the cages, or for safety reasons (d) positioning racks, floats and other farm structures in unobtrusive locations landward from the shoreline.	DTS/DPF 2.7 None are applicable.
PO 2.8 Access, launching and maintenance facilities utilise existing established roads, tracks, ramps and paths to or from the sea where possible to minimise environmental and amenity impacts.	DTS/DPF 2.8 The development utilises existing established roads, tracks, ramps and/or paths (as applicable) to access the sea.
PO 2.9 Access, launching and maintenance facilities are developed as common user facilities and are co-located where practicable to mitigate adverse impacts on coastal areas.	DTS/DPF 2.9 The development utilises existing established roads, tracks, ramps and/or paths (as applicable) to access the sea.
PO 2.10 Marine aquaculture is sited to minimise potential impacts on, and to protect the integrity of, reserves under the *National Parks and Wildlife Act 1972*.	DTS/DPF 2.10 Marine aquaculture is located 1000m or more seaward of the boundary of any reserve under the *National Parks and Wildlife Act 1972*.
PO 2.11 Onshore storage, cooling and processing facilities do not impair the coastline and its visual amenity by: (a) being sited, designed, landscaped and of a scale to reduce the overall bulk and appearance of buildings and complement the coastal landscape (b) making provision for appropriately sited and designed vehicular access arrangements, including using existing vehicular access arrangements as far as practicable (c) incorporating appropriate waste treatment and disposal.	DTS/DPF 2.11 The development does not include any onshore facilities in conjunction with a proposal for marine aquaculture.
Navigation and Safety	
PO 3.1 Marine aquaculture sites are suitably marked to maintain navigational safety.	DTS/DPF 3.1 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
PO 3.2 Marine aquaculture is sited to provide adequate separation between farms for safe navigation.	DTS/DPF 3.2 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.
Environmental Management	
PO 4.1 Marine aquaculture is maintained to prevent hazards to people and wildlife, including breeding grounds and habitats of native marine mammals and terrestrial fauna, especially migratory species.	DTS/DPF 4.1 None are applicable.
PO 4.2 Marine aquaculture is designed to facilitate the relocation or removal of structures in the case of emergency such as oil spills, algal blooms and altered water flows.	DTS/DPF 4.2 None are applicable.
PO 4.3 Marine aquaculture provides for progressive or future reclamation of disturbed areas ahead of, or upon, decommissioning.	DTS/DPF 4.3 None are applicable.
PO 4.4 Aquaculture operations incorporate measures for the removal and disposal of litter, disused material, shells, debris, detritus, dead animals and animal waste to prevent pollution of waters, wetlands, or the nearby coastline.	DTS/DPF 4.4 The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*.

Beverage Production in Rural Areas

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Mitigation of potential amenity and environmental impacts of value-adding beverage production facilities such as wineries, distilleries, cideries and breweries.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Odour and Noise	
PO 1.1 Beverage production activities are designed and sited to minimise odour impacts on rural amenity.	DTS/DPF 1.1 None are applicable.
PO 1.2 Beverage production activities are designed and sited to minimise noise impacts on sensitive receivers.	DTS/DPF 1.2 None are applicable.
PO 1.3 Fermentation, distillation, manufacturing, storage, packaging and bottling activities occur within enclosed buildings to improve the visual appearance within a locality and manage noise associated with these activities.	DTS/DPF 1.3 None are applicable.
PO 1.4 Breweries are designed to minimise odours emitted during boiling and fermentation stages of production.	DTS/DPF 1.4 Brew kettles are fitted with a vapour condenser.
PO 1.5 Beverage production solid wastes are stored in a manner that minimises odour impacts on sensitive receivers in other ownership.	DTS/DPF 1.5 Solid waste from beverage production is collected and stored in sealed containers and removed from the site within 48 hours.
Water Quality	
PO 2.1 Beverage production wastewater management systems (including wastewater irrigation) are set back from watercourses to minimise adverse impacts on water resources.	DTS/DPF 2.1 Wastewater management systems are set back 50m or more from the banks of watercourses and bores.
PO 2.2 The storage or disposal of chemicals or hazardous substances is undertaken in a manner to prevent pollution of water resources.	DTS/DPF 2.2 None are applicable.
PO 2.3 Stormwater runoff from areas that may cause contamination due to beverage production activities (including vehicle movements and machinery operations) is drained to an onsite stormwater treatment system to manage potential environmental impacts.	DTS/DPF 2.3 None are applicable.
PO 2.4 Stormwater runoff from areas unlikely to cause contamination by beverage production and associated activities (such as roof catchments and clean hard-paved surfaces) is diverted away from beverage production areas and wastewater management systems.	DTS/DPF 2.4 None are applicable.
Wastewater Irrigation	
PO 3.1 Beverage production wastewater irrigation systems are designed and located to not contaminate soil and surface and ground water resources or damage crops.	DTS/DPF 3.1 None are applicable.
PO 3.2 Beverage production wastewater irrigation systems are designed and located to minimise impact on amenity and avoid spray drift onto adjoining land.	DTS/DPF 3.2 Beverage production wastewater is not irrigated within 50m of any dwelling in other ownership.
PO 3.3 Beverage production wastewater is not irrigated onto areas that pose an undue risk to the environment or amenity such as: (a) waterlogged areas (b) land within 50m of a creek, swamp or domestic or stock water bore (c) land subject to flooding (d) steeply sloping land (e) rocky or highly permeable soil overlaying an unconfined aquifer.	DTS/DPF 3.3 None are applicable.

Bulk Handling and Storage Facilities

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Facilities for the bulk handling and storage of agricultural, mineral, petroleum, rock, ore or other similar commodities are designed to minimise adverse impacts on transport networks, the landscape and surrounding land uses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting and Design	
PO 1.1 Bulk handling and storage facilities are sited and designed to minimise risks of adverse air quality and noise impacts on sensitive receivers.	DTS/DPF 1.1 Facilities for the handling, storage and dispatch of commodities in bulk (excluding processing) meet the following minimum separation distances from sensitive receivers: (a) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility (including sea-port grain terminals), where the handling of these materials into or from vessels does not exceed 100 tonnes per day: 300m or more from residential premises not associated with the facility (b) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility: 300m or more from residential premises not associated with the facility (c) bulk petroleum storage involving individual containers with a capacity up to 200 litres and a total on-site storage capacity not exceeding 1,000 cubic metres: 500m or more (d) coal handling with: a. capacity up to 1 tonne per day or a storage capacity up to 50 tonnes: 500m or more b. capacity exceeding 1 tonne per day but not exceeding 100 tonnes per day or a storage capacity exceeding 50 tonnes but not exceeding 5000 tonnes: 1000m or more.
Buffers and Landscaping	
PO 2.1 Bulk handling and storage facilities incorporate a buffer area for the establishment of dense landscaping adjacent road frontages to enhance the appearance of land and buildings from public thoroughfares.	DTS/DPF 2.1 None are applicable.
PO 2.2 Bulk handling and storage facilities incorporate landscaping to assist with screening and dust filtration.	DTS/DPF 2.2 None are applicable.
Access and Parking	
PO 3.1 Roadways and vehicle parking areas associated with bulk handling and storage facilities are designed and surfaced to control dust emissions and prevent drag out of material from the site.	DTS/DPF 3.1 Roadways and vehicle parking areas are sealed with an all-weather surface.

Slipways, Wharves and Pontoons	
PO 4.1 Slipways, wharves and pontoons used for the handling of bulk materials (such as fuel, oil, catch, bait and the like) incorporate catchment devices to avoid the release of materials into adjacent waters.	DTS/DPF 4.1 None are applicable.

Clearance from Overhead Powerlines

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of human health and safety when undertaking development in the vicinity of overhead transmission powerlines.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

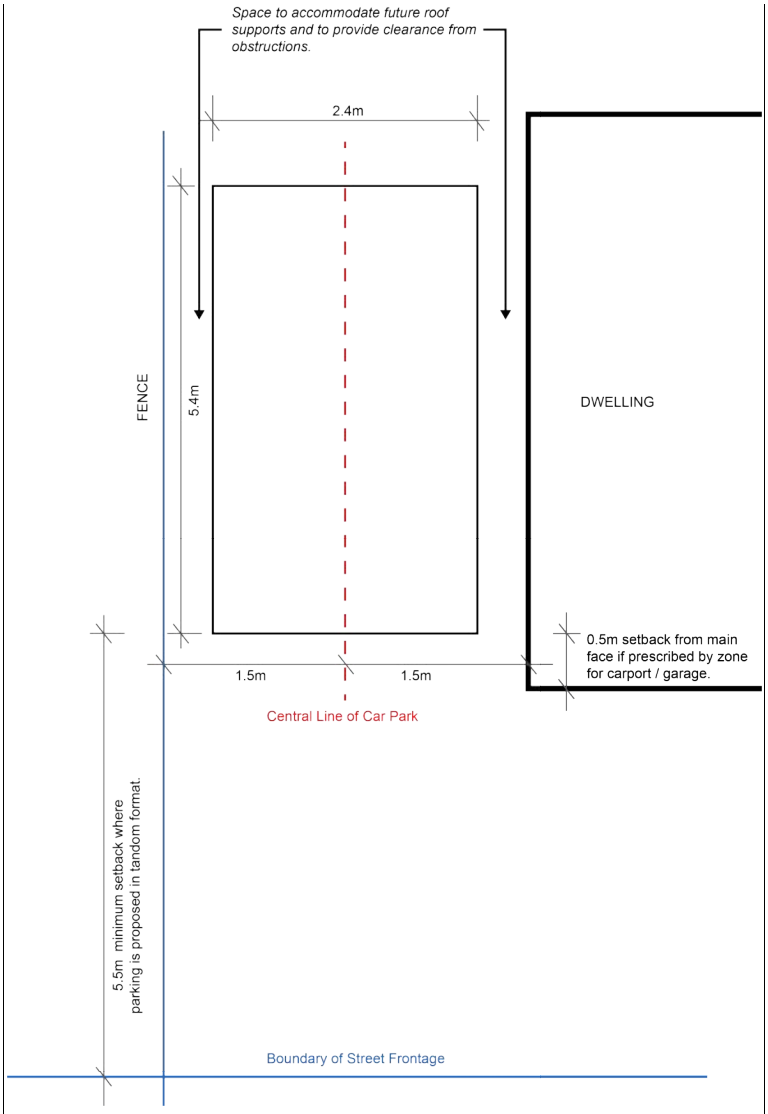
Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Buildings are adequately separated from aboveground powerlines to minimise potential hazard to people and property.	DTS/DPF 1.1 One of the following is satisfied: (a) a declaration is provided by or on behalf of the applicant to the effect that the proposal would not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996* (b) there are no aboveground powerlines adjoining the site that are the subject of the proposed development.

Design

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is: (a) contextual - by considering, recognising and carefully responding to its natural surroundings or built environment and positively contributes to the character of the immediate area (b) durable - fit for purpose, adaptable and long lasting (c) inclusive - by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access, and promoting the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors (d) sustainable - by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.



Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All development	
External Appearance	
PO 1.1 Buildings reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).	DTS/DPF 1.1 None are applicable.
PO 1.2 Where zero or minor setbacks are desirable, development provides shelter over footpaths (in the form of verandahs, awnings, canopies and the like, with adequate lighting) to positively contribute to the walkability, comfort and safety of the public realm.	DTS/DPF 1.2 None are applicable.
PO 1.3 Building elevations facing the primary street (other than ancillary buildings) are designed and detailed to convey purpose, identify main access points and complement the streetscape.	DTS/DPF 1.3 None are applicable.
PO 1.4 Plant, exhaust and intake vents and other technical equipment is integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by: (a) positioning plant and equipment in unobtrusive locations viewed from public roads and spaces (b) screening rooftop plant and equipment from view (c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses.	DTS/DPF 1.4 Development does not incorporate any structures that protrude beyond the roofline.
PO 1.5 The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form) taking into account the form of development contemplated in the relevant zone.	DTS/DPF 1.5 None are applicable.
Safety	
PO 2.1 Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is designed to differentiate public, communal and private areas.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings are designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development at street level is designed to maximise opportunities for passive surveillance of the adjacent public realm.	DTS/DPF 2.4 None are applicable.
PO 2.5 Common areas and entry points of buildings (such as the foyer areas of residential buildings), and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.	DTS/DPF 2.5 None are applicable.
Landscaping
