Subject: Unacceptable change of Planning and Design Code - Phase 3 (City of Burnside)
Date: Thursday, 13 February 2020 1:30:54 PM

In response to the draft Planning and Design Code - Phase 3 and a long time resident of Linden Park I would like to strongly object to the following issues.

1. General Neighbourhood Zone

The draft Code places RPA21 of my Beaumont Ward, in the General Neighbourhood Zone. The policy in this new zone is entirely at odds with current zone policy and allows for a far greater intensity of development than existing. Why are our suburbs singled out? The current zone focuses on preserving character rather than accommodating change and

infill and does not envisage a greater range and intensity of development. I request that you move all residential areas to the Suburban Neighbourhood Zone with TNVs to match existing conditions.

2. All Existing Residential Areas

a. Non Residential land use: Currently in the City of Burnside's residential areas, shops, offices and educational establishments are non-complying. In the new Code existing residential areas will allow these non-residential uses which will adversely impact traffic, parking, noise, neighbour's amenity and the character of our suburbs. This is unacceptable. All uses which are currently non-complying in our residential areas eg. office and shop should be "restricted development". Alternatively, a new zone should be created purely for residential land use.

b. Siting and Setbacks Under the Code, building setbacks from side and rear boundaries will noticeably decrease, particularly at upper levels. This is unacceptable and will severely impact ambience and privacy. Existing siting, setback and floor area criteria should be maintained throughout all our residential areas.

c. Density and Allotment Sizes The draft Code contains a number of errors and omissions. It is important that current minimum allotment sizes, heights and frontage widths match existing.

3 Historic Area Overlay

The lack of identification of Contributory items in the Code, by either a map or a list of addresses, will create uncertainty and confusion for owners, prospective buyers, neighbours and developers. Existing protections and identification of Contributory Items should be maintained.

4. Commercial Centres

The Code places large scale centres in the same zone as small local shops, allowing large scale development and more intensive land uses throughout all these areas. This is inappropriate. A hierarchy of centres should be maintained. Additional zones are needed to cater for the lower intensity local centres, particularly in older established areas.

5. Public Notification

The Code should reflect the City of Burnside's current Development Plan policy with respect to the notification of neighbours and the public. The Code should include notification for all development that increases development intensity, including additional

dwellings on the site, two storey development, earthworks where new dwelling is located 600mm above ground level, and change of use from residential to non-residential.

6. Tree Canopy and Climate Resilience

The 30- year Plan calls for an increase in tree canopy cover. however, the draft Code works directly against this by facilitating larger developments and the easier removal of trees on both private and public land. This will result in a significant reduction in canopy cover, habitat loss and climate resilience, due to the increased infill development opportunities, reduction in minimum site areas, site coverage, setbacks and increased number of street crossovers.

Unless the above issues are addressed and the draft Code is amended to reflect these concerns, there will be an unacceptable loss of local character and amenity in my neighbourhood.

I trust that the concerns detailed above will be given your full consideration.

More Ugly Urban Infill

More Crowded Streets

Hotter Summers Due To The Loss Of Gardens

No Space For Greenery Thus Hotter Temperatures

Making Suburbs Turn Into Slums

Difficulty Enrolling In Local Schools

Claustrophobic Atmosphere and Loss of Ambience

Yours sincerely,

Sigrid Herr
