**Subject:** Protect our heritage

Dear Premier

We are greatly concerned by proposals put forward by the State Planning Commission to dismantle heritage protections across South Australia. These proposals will reduce and undermine current heritage protections, placing thousands of heritage buildings at risk of demolition.

We are calling on you to start an open public consultation on the future of heritage protection in South Australia. We need a system that keeps councils and communities in decision-making about local heritage and protects local heritage buildings, streetscapes and neighbourhoods from demolition.

We urge you to pay attention to the community's desire to strengthen local heritage protections and not to diminish them as the State Planning Commission has proposed.
