**Subject:** Planning code for Marion

I received your flyer today 17/12/2020 in the letterbox and find some of the statements self-contradicting (or deliberately misleading?). To expect a considered opinion by the 18/12/2020 without an opportunity to read a copy of your "Raising the Bar" I find once again the Government trying to dodge scrutiny for their own purposes. Tonight I downloaded a copy of the Marion Council's "Trees Are Cool" and as a resident I find the statements made there to be true. We enjoy our homes that are large enough to support a tree and to drive safely down a street that is not a parking lot.

Is the South Australian Government taking any notice of the Global Warming scientists or only worried about making property developers happy???

Jeffrey Schaefer [REDACTED], Marion 5043 [REDACTED]
