Subject: Planning and Design Code - Public Consultation Draft - December 2020

Thank you for the opportunity to provide feedback on the draft planning and design code.

I fully support the City of Unley latest submission:

In particular,

- the proposed 1.7m cill height is far more appropriate to encourage privacy for all resident;
- tree canopy must be maintained/provided on all sites, with a rigorous intimated Off-set scheme

I have the privilege of living in a beautiful city so it is imperative that we take time to fully explore and resolve issues raised across our state before public fully understand what the proposal means. The implementation of this code must not be rushed. We would support a further extension of the consultation period to allow further refining and understanding.

Kind regards,
Julienne Lenain,
Black Forest Resident
