Your Feedback

Urban Neighbourhood Zone at [REDACTED] Marion Road Bedford Pk 5042 with Overlays Hazard (Flooding General) plus General Development Policies of Interface between land uses, Open Space & Recreation, Site Contamination, and Land Division relevant. It is essential that the building of the proposed Elders Village does not encroach on the sensitive site of the ETSA easement on the east; and that there is a buffer to the Sturt River; an open space land use and critical that the Sturt River is not polluted by petrol station contamination, inappropriate chemicals into the soil. The Oaklands Reserve aquifer impacted by contaminants in the Sturt River will poison the aquifer and its water supply.
