Your Feedback

24m² is too small for big blocks. The existing 60m² in the West Torrens development plan is more appropriate for 300-500m² blocks. We are going to lose all of our tree canopy which will make adaptation to climate change harder. There is plenty of opportunity to increase infill by changing to 2 storey houses in Established Neighbourhood zones and still maintain green space that can't be covered up by sheds.
