<ul style="list-style-type: none"> • State Significant Native Vegetation Overlay • Ramsar Wetlands Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Water Resources Overlay 	
<p>Verandah Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • Ramsar Wetlands Overlay • River Murray Flood Plain Overlay • Water Resources Overlay 	<p>38 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>39 It is ancillary to a dwelling erected on the site</p> <p>40 Primary street setback – as far back as the building line of the building to which it is ancillary</p> <p>41 Total floor area - does not exceed 40m²</p> <p>42 Post height - does not exceed 3m measured from natural ground level</p> <p>43 Building height - does not exceed 5m</p> <p>44 Length - does not exceed 10m if any part of the structure abuts or is situated on a boundary of the allotment</p> <p>45 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%.</p>
<p>Water tank (above ground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Native Vegetation Overlay 	<p>36 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>37 The tank is part of a roof drainage system</p> <p>38 Total floor area - not exceeding 15m²</p> <p>39 The tank is located wholly above ground</p> <p>40 Tank height – does not exceed 4m above natural ground level</p> <p>41 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p>

Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

Accepted Development Classification Criteria

- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

42 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.

Water tank (underground)

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- Sloping Land Overlay
- Water Resources Overlay

11 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system

12 The tank (including any associated pump) is located wholly below the level of the ground.

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusions
None specified	

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

A small mixed-use settlement supporting a limited range of residential development, tourist, recreation and community facilities grouped together to serve the local community and visiting public.

DO 2

Development that contributes to and enhances the local context and development pattern comprising the settlement.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Low-scale and low-density residential development that complements the residential character and amenity within the locality.

DTS/DPF 1.1

Development comprising detached dwellings.

PO 1.2

Small-scale retail, business and commercial development that provide a range of goods and services to the settlement community and visitors to the area.

DTS/DPF 1.2

The gross leasable floor area of a shop, office or consulting room does not exceed 150m².

PO 1.3

Small-scale light industry, store and warehousing activities that supply a local service to the community and nearby businesses.

DTS/DPF 1.3

The gross leasable floor area of a building plus any outdoor space used for a light industry, store or warehouse does not exceed 80m².

PO 1.4

Small-scale tourist accommodation that supports the visiting public and holiday makers.

DTS/DPF 1.4

None are applicable.

PO 1.5

Local service facilities and retail activities are grouped together or in close proximity to establish identifiable settlement service locations.

DTS/DPF 1.5

Development located adjacent to a site containing an existing non-residential use with the same primary street frontage.

Built Form and Character

PO 2.1

Buildings contribute to a low-rise character and complement the height of nearby buildings.

DTS/DPF 2.1

Building height (excluding garages, carports and outbuildings) is no greater than 2 building levels and 9m and wall height that is no greater than 6m.

PO 2.2

Buildings set back from primary street boundary to complement the existing streetscape character.

DTS/DPF 2.2

Buildings are no closer to the primary street boundary than:

- (a) the average of existing buildings on adjoining sites with the same primary street frontage and, if there is only one such building, the setback of that building; or
- (b) 8m, if no building exists on an adjoining site with the same primary street frontage.

PO 2.3

Buildings are setback from a secondary street boundary to maintain a consistent pattern of separation between building walls and public thoroughfares on corner sites within the settlement.

DTS/DPF 2.3

Buildings are no closer than 2.5 metres to the secondary street boundary.

PO 2.4

Dwellings are setback from rear boundaries to provide:

- (c) access to natural light and ventilation for neighbours;
- (d) open space recreational opportunities; and
- (e) space for landscaping and vegetation.

DTS/DPF 2.4

Dwellings no closer to the rear boundary of the site than the following:

- (a) 4m for the ground floor of a building; and
- (b) 6m for the upper floor of a building.

PO 2.5

Buildings are setback from side boundaries to:

- (a) establish separation between buildings to complement the established character within a locality; and
- (b) provide access to natural light and ventilation for neighbours.

DTS/DPF 2.5

Other than walls located on a side boundary, buildings are setback from side boundaries:

- (a) at least 900mm where the wall height is up to 3m;
- (b) other than for a wall facing a southern side boundary, at least 900mm plus 1/3 of the wall height above 3m; and
- (c) at least 1900mm plus 1/3 of the wall height above 3m for walls facing a southern side boundary.

PO 2.6

Boundary walls are limited in height and length to mitigate adverse impacts on the amenity of adjoining land users, including through an unreasonable loss of natural light and ventilation.

DTS/DPF 2.6

For buildings that do not have a common wall, any wall sited on or abutting a side allotment boundary:

- (a) does not exceed 3m in height from the top of the footings;

- (b) does not exceed 8m in length;
- (c) when combined with other walls on the boundary, does not exceed 45% of the length of the boundary; and is setback at least 3 metres from any existing or proposed boundary walls.

Site Dimensions and Land Division

PO 3.1

Allotments are of suitable size and dimension to contribute to a pattern of development that is consistent with the settlement.

DTS/DPF 3.1

Development accords with the following:

- (a) for sites connected to mains sewer or Community Wastewater Management System, site areas (or allotment areas in the case of land division) are not less than the minimum allotment area specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*;
- (b) for sites without connection to mains sewer or Community Wastewater Management System, site areas (or allotment areas in the case of land division) are not less than the greater of:
 - (i) 1200m²; or
 - (ii) the minimum allotment area specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*; and
 site frontages not less than 20m.

Procedural Matters (PM)

Notification of Performance assessed development

All classes of performance assessed development is excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as "all other code assessed development" in Settlement Zone Table 3
- (c) buildings exceeding 2 building levels or over 9m in height
- (d) development involving the creation of four or more additional dwellings or allotments
- (e) shop, office, or consulting room in excess of 100m² in gross leasable floor area
- (f) light industry, warehouse or store where the gross leasable floor area of the buildings plus any outdoor space used for any of these uses exceeds 80m².

Suburban Employment Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
Building work on railway land	1 Building work is associated with a railway 2 It is situated (or to be situated) on railway land 3 It is required for the conduct or maintenance of railway activities.
Internal building work Except where any of the following apply: <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	1 There will be no increase in the total floor area of the building 2 There will be no alteration to the external appearance of the building.
Shade sail Except where any of the following apply: <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Character Area Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Water Resources Overlay 	22 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 23 Shade sail consists of permeable material 24 The total area of the sail - does not exceed 40m ² 25 No part of the shade sail will be: <ul style="list-style-type: none"> (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 26 Primary street setback – at least as far back as the building line of the building to which it is ancillary 27 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m 28 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment – the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.

<p>Solar photovoltaic panels (roof mounted) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>10 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>11 Panels and associated components do not overhang any part of the roof</p> <p>12 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (above ground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Flooding) Overlay • Character Area Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>22 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>23 The tank is part of a roof drainage system</p> <p>24 Total floor area - not exceeding 15m²</p> <p>25 The tank is located wholly above ground</p> <p>26 Tank height – does not exceed 4m above natural ground level</p> <p>27 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>28 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.</p>
<p>Water tank (underground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>7 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>8 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusions
Industry	Light industry
Shop	Where: (f) the gross leasable floor area is no more than 1000m ² : or (g) it is a bulky goods outlet; or (h) it is ancillary to a light industry on the same allotment.
Waste reception, storage, treatment or disposal	
Wrecking yard	

Assessment Provisions

Desired Outcomes (DO)

DO 1

A zone supporting a diverse range of low impact light industrial, commercial and business activities that complement the role of other zones accommodating significant industrial, shopping and business activities.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

A range of employment generating light industrial, service trade, motor repair and other compatible businesses servicing the local community that do not produce objectionable emissions.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Bulky goods outlet
- Consulting room
- Indoor recreation facility
- Light industry
- Office
- Research facility
- Service trade premises
- Shop
- Store
- Training facility
- Tourist accommodation
- Retail fuel outlet
- Place of worship
- Motor repair station.

PO 1.2

Shops, other than bulky goods outlets, provide a local convenience service to meet the day to day needs of the local community and surrounding businesses as well as support the sale of products made on-site as a supplement to a business activity to enhance local job opportunities.

DTS/DPF1.2

Shop:

- a. with a gross leasable floor area up to 500m²;
- b. in the form of a bulky goods outlet; or
- c. ancillary to and located on the same allotment as a light industry.

Built Form and Character

PO 2.1

Development achieves distinctive building, landscape and streetscape design to achieve high visual and environmental amenity particularly along arterial roads, zone boundaries and public open spaces.

DTS/DPF 2.1

None are applicable.

PO 2.2

Building facades facing a boundary of a zone primarily intended to accommodate residential development, public roads, or public open space incorporate design elements to add visual interest by considering the following:

- (a) a variety of building finishes and avoid elevations that consist solely of metal cladding;
- (b) using materials with a low reflectivity; and
- (c) techniques to add visual interest and reduce large expanses of blank walls including modulation and incorporation of offices and showrooms along elevations visible to a public road.

DTS/DPF 2.2

None are applicable.

Building height and setbacks

PO 3.1

Buildings set back from the primary street boundary to contribute to a consistent streetscape.

DTS/DPF3.1

Buildings are no closer to the primary street frontage than:

- (a) the average of existing buildings on adjoining sites with the same primary street frontage and, if there is only one such building, the setback of that building; or
- (b) where no building exists on an adjoining site, 3m or more.

PO 3.2

Buildings set back from a secondary street boundary to accommodate the provision of landscaping between buildings and the street to enhance the appearance of land and buildings when viewed from the street.

DTS/DPF3.2

Buildings are no closer than 2m to the secondary street boundary.

PO 3.3

Buildings set back from rear access ways to provide adequate manoeuvrability for vehicles to enter and exit the site.

DTS/DPF3.3

Buildings are setback from the rear access way:

- (a) where the access way is 6.5m wide or more, no requirement; or
- (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

PO 3.4

Buildings are sited to accommodate vehicle access to the rear of a site for deliveries, maintenance and emergency purposes.

DTS/DPF3.4

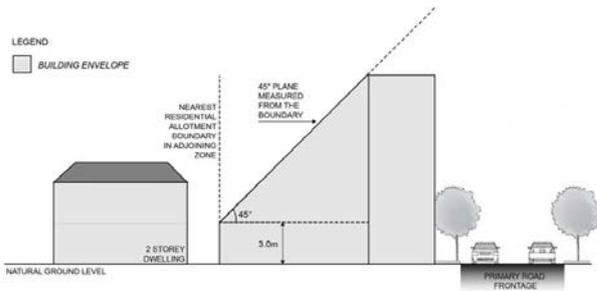

Buildings setback at least 3m from at least one side boundary, unless an alternative means for vehicular access to the rear of the site is available.

PO 3.5

Buildings adjoining a zone primarily intended to accommodate residential development are sited and designed to minimise visual impacts from building bulk.

DTS/DPF 3.5

Buildings constructed within a building envelope provided by a 45 degree plane, measured from a height of 3m above natural ground level at the allotment boundary of a zone primarily intended to accommodate residential development as shown in the following diagram, except where the relevant boundary is a southern boundary, or where this boundary is the primary street boundary.

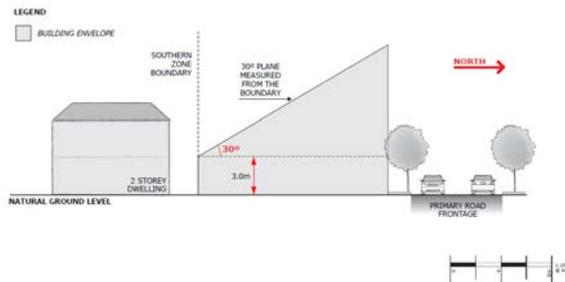

PO 3.6

Buildings are constructed to minimise overshadowing of sensitive receivers outside the zone.

DTS/DPF 3.6

Buildings on sites with a southern boundary adjoining a residential allotment within a different zone are constructed within a building envelope provided by a 30-degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

Site Dimensions and Land Division

PO 4.1

Land division that creates allotments that vary in size and are suitable for a variety of commercial and business activities.

DTS/DPF4.1

Allotments have:

- an area of 1250m² or more; and
- a frontage of 20 metres or more.

Landscaping

PO 5.1

Landscaping provided to enhance the visual appearance of development when viewed from public roads and thoroughfares.

DTS/DPF 5.1

Other than to accommodate a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land, a landscaped area is provided within the development site (excluding any land required for road widening purposes):

- where a building is setback less than 3m from the street boundary – 1m or more within the area remaining between a relevant building and the street boundary; or
- at least 1.5m wide.

PO 5.2

Development incorporates areas for landscaping to enhance the overall amenity of the site and locality.

DTS/DPF 5.2

Landscape areas comprise:

- (c) not less than 10 percent of the site;
- (d) a dimension of at least 1.5m.

Advertisements

PO 6.1

Freestanding advertisements are not visually dominant within the locality.

DTS/DPF 6.1

Freestanding advertisements:

- (a) do not exceed 4m in height above natural ground level; and
- (b) do not have a face that exceeds 3m².

Notification of Performance assessed development

All classes of performance assessed development are excluded from notification except where it involves any of the following:

(d)

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Suburban Activity Centre Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
<p>Air handling unit, air conditioning system or exhaust fan including any associated components and any associated building alteration or addition necessary or incidental to its installation</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1 The item will be installed on or within an existing building 2 The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire. 3 If the associated building is in a Local Heritage Area Overlay or State Heritage Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
<p>Internal building work</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<ol style="list-style-type: none"> 25 There will be no increase in the total floor area of the building 26 There will be no alteration to the external appearance of the building.
<p>Shade sail</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Coastal Areas Overlay • Character Area Overlay 	<ol style="list-style-type: none"> 43 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 44 Shade sail consists of permeable material

<ul style="list-style-type: none"> • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>45 The total area of the sail - does not exceed 40m²</p> <p>46 No part of the shade sail will be:</p> <ul style="list-style-type: none"> (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment <p>47 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>48 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p> <p>49 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment – the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>19 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>20 Panels and associated components do not overhang any part of the roof</p> <p>21 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (underground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Coastal Areas Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>13 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>14 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 2 – Deemed-to-Satisfy Development Classification

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 4 – Restricted Development Classification

Class of Development

The following Classes of Development are classified as Restricted

Industry (except light industry)

Assessment Provisions

Desired Outcome (DO)

DO 1

An active retail precinct that includes neighbourhood scale shopping, business, entertainment and recreation facilities. It is a focus for business and community life and provides for most daily and weekly shopping needs of the community. The precinct includes buildings that are well integrated with pedestrian and cycle networks as well as public transport, and sit within a high quality and well activated public realm.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Shops, office, entertainment, health and recreation related uses supplemented by other businesses that provide a range of goods and services to the surrounding neighbourhood and district.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

Cinema

Community facility

Consulting room

Educational establishment

Emergency services facility

Health facility

Hospital

Hotel

Indoor recreation facility

Library

Office

Place of worship

Pre-school

Public transport terminal

Recreation area

Restaurant

Retail fuel outlet

Service trade premises

Shop

Tourist accommodation.

PO 1.2

Residential development does not prejudice the operation of existing non-residential development and the long term provision of services and facilities for wider community benefit.

DTS 1.2

None are applicable.

PO 1.3

Dwellings developed only in conjunction with non-residential uses to support business, entertainment and recreational activities

DTS 1.3

Dwellings are developed only in conjunction with non-residential uses and sited:

- (a) at upper levels of buildings with non-residential uses located at ground level; or
- (b) behind non-residential uses on the same allotment.

PO 1.4

Where residential development is appropriate having regard to other performance outcomes of the zone, residential development achieves medium-to-high densities.

PO 1.4

Residential development achieves a minimum net density of 35 dwelling units per hectare.

PO 1.5

Bulky goods outlets are sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.

DTS/DPF 1.5

Bulky goods outlets with a gross leaseable area of 500m² or more are located towards the periphery of the zone.

Built Form and Character

PO 2.1

Development throughout the zone that integrates with desired development through building scale, connections and complementary land uses.

DTS 2.1

None are applicable.

PO 2.2

Buildings sited and designed to create pedestrian, vehicular, open space and visual linkages between the various built-form elements within the zone and adjoining main roads and thoroughfares.

DTS 2.2

None are applicable.

PO 2.3

Vehicular access points and car parks are coordinated and consolidated to enable the shared use of parking spaces.

DTS 2.3

None are applicable.

PO 2.4

Development promotes the use of pedestrian and cyclist connections to centre facilities and services.

DTS 2.4

None are applicable.

PO 2.5

Non-residential buildings and facilities are sited and designed to create streetscapes and spaces that encourage social interaction.

DTS 2.5

None are applicable.

Building height and setbacks

PO 3.1

A range of low to medium rise buildings, with the highest intensity of built form at the centre of the zone and lower scale at the peripheral zone interface.

DTS/DPF 3.1

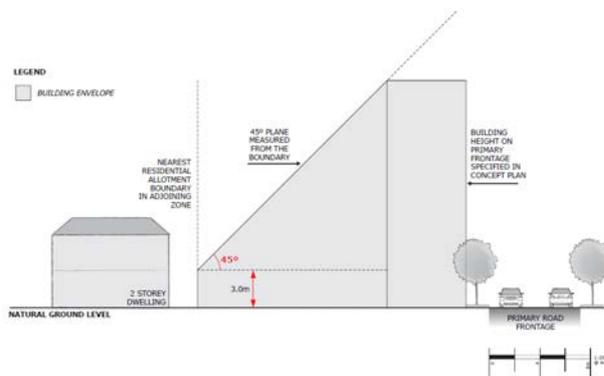

Building height is not greater than any maximum, or less than any minimum, specified in the *Maximum Building Height Levels Technical and Numeric Variation Overlay*, the *Maximum Building Height Metres Technical and Numeric Variation Overlay*, or the *Minimum Building Height Levels Technical and Numeric Variation Overlay*.

PO 3.2

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS/DPF 3.2

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.3 will apply, or where this boundary is the primary street boundary):

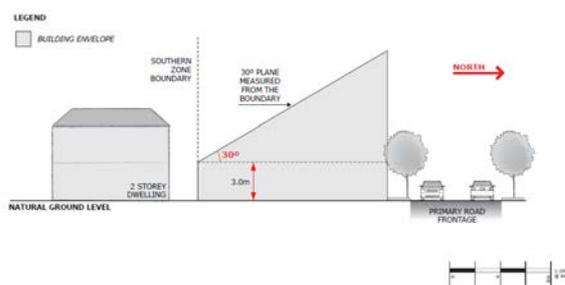

PO 3.3

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS / DPF 3.3

Buildings on sites with a southern boundary adjoining a residential allotment within a neighbourhood zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

Land Division

PO 4.1

Land division that creates allotments that vary in size and are suitable for a variety of business and community facilities.

DTS 4.1

None are applicable.

Advertisements

PO 5.1

Freestanding advertisements that identify the associated business without creating a visually dominant element within the locality.

DTS 5.1

Freestanding advertisements that:

- a) do not exceed 8m in height; and
- b) do not have a sign face that exceeds 6m² per side

Concept Plans

PO 6.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within the *Concept Plans Technical and Numeric Variation Overlay*

DTS/DPF 6.1

None are applicable

Procedural Matters (PM)

Notification

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) development on a site located adjacent a dwelling within a Neighbourhood Zone which comprises:
 - (i) development defined as 'all other code assessed development' in Suburban Activity Centre Zone Table 3
 - (ii) construction of a building which fails to comply with DTS 3.1 to 3.3 (inclusive)
 - (iii) the construction of or change of use to a retail fuel outlet, educational establishment, emergency services facility, entertainment venue, hospital, hotel, light industry

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Suburban Business and Innovation Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
<p>Carport</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Airport Building Heights (Aircraft Landing Area) Overlay • Airport Building Heights (Regulated) Overlay • Building Near Airfields Overlay • Defence Aviation Area Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • Major Urban Transport Routes Overlay • Murray Darling Basin Overlay • Native Vegetation Overlay • Non-stop Corridor Overlay • River Murray Tributaries Area Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Urban Transport Routes Overlay 	<ol style="list-style-type: none"> 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2 It is ancillary to a dwelling erected on the site 3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 5 Total floor area - does not exceed 60m² 6 Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7 Building height - does not exceed 5m 8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless: <ol style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): <ol style="list-style-type: none"> (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and

	<p>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</p> <p>10 The total roofed area of all existing or proposed buildings on the allotment does not exceed 70% of the area of the allotment</p> <p>11 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p> <p>12 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors</p> <p>13 The carport:</p> <p>(a) is located so that vehicle access:</p> <p>i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</p> <p>ii. will use a driveway that:</p> <p>A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and</p> <p>B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or</p> <p>iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and</p> <p>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</p> <p>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</p>
<p>Internal building work</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Place Overlay 	<p>7 There will be no increase in the total floor area of the building</p> <p>8 There will be no alteration to the external appearance of the building.</p>

<ul style="list-style-type: none"> Local Heritage Place Overlay 	
<p>Outbuilding (in the form of a garage) Except where any of the following apply:</p> <ul style="list-style-type: none"> Airport Building Heights (Aircraft Landing Area) Overlay Airport Building Heights (Regulated) Overlay Building Near Airfields Overlay Defence Aviation Area Overlay Future Road Widening Overlay Historic Area Overlay Local Heritage Place Overlay Major Urban Transport Routes Overlay Murray Darling Basin Overlay Native Vegetation Overlay Non-stop Corridor Overlay River Murray Tributaries Area Overlay State Heritage Area Overlay State Heritage Place Overlay Urban Transport Routes Overlay 	<p>43 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>44 It is detached from and ancillary to a dwelling erected on the site.</p> <p>45 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary</p> <p>46 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)</p> <p>47 Total floor area - does not exceed 60m²</p> <p>48 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)</p> <p>49 Building height - does not exceed 5m</p> <p>50 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:</p> <ul style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent <p>51 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):</p> <ul style="list-style-type: none"> (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure <p>52 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 70%</p> <p>53 Internal dimensions – exceed 3.2m in width and 6m in length between all walls and doors</p> <p>54 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p>

	<p>55 The garage:</p> <p>(a) is located so that vehicle access:</p> <p>i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</p> <p>ii. will use a driveway that:</p> <p>A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and</p> <p>B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or</p> <p>iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and</p> <p>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</p> <p>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</p> <p>56 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.</p>
<p>Outbuilding (not being a garage)</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Airport Building Heights (Aircraft Landing Area) Overlay • Airport Building Heights (Regulated) Overlay • Building Near Airfields Overlay • Defence Aviation Area Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay 	<p>37 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>38 It is detached from and ancillary to a dwelling erected on the site</p> <p>39 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>40 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)</p> <p>41 Side boundary setbacks – at least 900mm from the boundary of the allotment</p> <p>42 Total floor area does not exceed 60m²</p> <p>43 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)</p> <p>44 Building height - does not exceed 5m</p>

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusions
Shop	Restaurant Any other shop with a gross leasable floor area less than 1000m ²

Assessment Provisions

Desired Outcome (DO)

DO 1

A business and innovation precinct that includes a range of emerging businesses that have low level off-site impacts. Residential development within the area is subordinate to employment uses and generally include medium density residential that is designed to complement, and not prejudice the operation of existing businesses.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Shops, office, consulting room, low-impact industry and other non-residential uses supported by a variety of compact, medium density housing and accommodation types.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Consulting room
- Dwelling
- Institutional facility
- Light industry
- Motor repair station
- Office
- Service trade premises

Shop
Store
Warehouse

PO 1.2

Retail, business and commercial development of a scale that provides a local convenience service without undermining the vibrancy and function of zones primarily intended to accommodate such development.

DTS/DPF 1.2

The gross leasable floor area of a shop, office, or consulting room does not exceed 500m².

PO 1.3

Compact, medium density residential development does not prejudice the operation of existing non-residential activity within the zone.

DTS 1.3

None are applicable.

Built Form and Character

PO 2.1

Building scale and design complements surrounding built form, streetscapes and local character.

DTS 2.1

None are applicable.

PO 2.2

Presentation development which with high visual and environmental amenity, particularly along arterial roads and the boundaries of adjoining zones primarily intended to accommodate sensitive receivers.

DTS 2.2

None are applicable.

Building height and setbacks

PO 3.1

A range of low-rise to medium-rise buildings, with the highest intensity of built form at the centre of the zone, and lower scale at the peripheral zone interface.

DTS/DPF 3.1

Building height does not exceed:

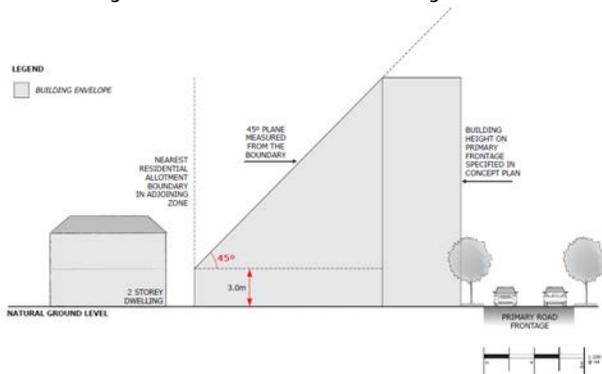

- (a) 2 building levels or 9 metres where the development is located adjoining a different zone that primarily envisages residential development; or
- (b) 3 building levels or 12 metres in all other cases.

PO 3.2

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS/DPF 3.2

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.3 will apply, or where this boundary is the primary street boundary):

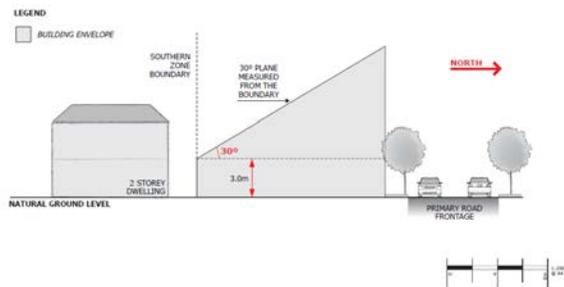

PO 3.3

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS 3.3

Buildings on sites with a southern boundary adjoining a residential allotment within a neighbourhood zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

PO 3.4

Buildings set back from primary street boundaries to contribute to a consistent streetscape.

DTS/DPF 3.4

Buildings set back from the primary street frontage:

- (a) the average of any existing buildings on either of the adjoining sites having frontage to the same street; or
- (b) not less than 6m where no building exists on an adjoining site.

PO 3.5

Buildings set back from secondary street boundaries (other than rear laneways) to contribute to a consistent streetscape.

DTS/DPF 3.5

Buildings set back from the secondary street frontage:

- (a) the average of any existing buildings on adjoining sites having frontage to the same street; or
- (b) not less than 0.9m where no building exists on an adjoining site.

PO 3.6

Buildings set back from side boundaries to maintain adequate separation and ventilation.

DTS/DPF 3.6

Other than walls located on a side boundary, buildings are set back at least 0.9 metres from side boundaries.

PO 3.7

Buildings set back from rear boundaries to minimise adverse impacts on adjoining land uses.

DTS/DPF 3.7

Buildings are set back from the rear boundary at least 3 metres.

Land Division

PO 4.1

Land division and site amalgamation that creates allotments that vary in size and are suitable for a variety of residential and commercial activities and that improve the level of development integration.

DTS 4.1

None are applicable.

Advertisements

PO 5.1

Freestanding advertisements that identify the associated business without creating a visually dominant element within the streetscape.

DTS/DPF 5.1

Freestanding advertisements that:

- (a) do not exceed 6m in height; and
- (b) do not have a sign face that exceeds 4m² per side

Concept Plans

PO 6.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within the *Concept Plans Technical and Numeric Variation Overlay*.

DTS 6.1

None are applicable

Procedural Matters (PM)

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (b) the site of the development is adjacent land to land in a different zone
- (c) development identified as "all other code assessed development" in Suburban Business and Innovation Zone Table 3
- (d) development that fails to comply with DPF 3.1

- (e) hotel
- (f) industry (other than a light industry)
- (g) shop, office or consulting room with a floor area exceeding 500m²

Suburban Main Street Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
Air handling unit, air conditioning system or exhaust fan including any associated components and any associated building alteration or addition necessary or incidental to its installation Except where any of the following apply: <ul style="list-style-type: none"> • State Heritage Place Overlay • Local Heritage Place Overlay 	10 The item will be installed on or within an existing building 11 The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire. 12 If the associated building is in a Local Heritage Area Overlay or State Heritage Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
Internal building work Except where any of the following apply: <ul style="list-style-type: none"> • State Heritage Place Overlay • Local Heritage Place Overlay 	9 There will be no increase in the total floor area of the building 10 There will be no alteration to the external appearance of the building.
Shade sail Except where any of the following apply: <ul style="list-style-type: none"> • Airport Building Heights (Regulated) Overlay • Building Near Airfields Overlay • Defence Aviation Area Overlay • Local Heritage Place Overlay 	36 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 37 Shade sail consists of permeable material 38 The total area of the sail - does not exceed 40m ² 39 No part of the shade sail will be: <ul style="list-style-type: none"> (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment

<ul style="list-style-type: none"> • Historic Area Overlay • River Murray Tributaries Area Overlay • Murray Darling Basin Overlay • State Heritage Place Overlay • State Heritage Area Overlay 	<p>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</p> <p>40 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>41 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p> <p>42 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted)</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Area Overlay • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>13 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>14 Panels and associated components do not overhang any part of the roof</p> <p>15 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (underground)</p>	<p>12 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>13 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 2 – Deemed-to-Satisfy Development Classification

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the ‘Deemed-to-Satisfy Development Classification Criteria’	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.			
	Zone	General Development Policies	Subzone (applies only in the area affected by the Subzone)	Overlay (applies only in the area affected by the Overlay)
Advertisement attached to a building or structure Except where any of the following apply: <ul style="list-style-type: none"> State Heritage Area Overlay State Heritage Place Overlay 	None	Clearance from Overhead Powerlines: DTS 1.1 Advertisements [Appearance]: DTS 1.1, 1.3, 1.4 Advertisements [Proliferation of Advertisements]: DTS 2.1, 2.2 Advertisements [Advertising Content]: DTS 3.1 Advertisements [Amenity Content]: DTS 4.1 Advertising [Safety]: DTS 5.1, 5.2, 5.3, 5.4, 5.5	None	Advertising Near Signalised Intersections Overlay: All DTS
Change of use to a <u>shop</u>, <u>office</u>, <u>consulting room</u> or any combination of these uses where the area to be occupied by the proposed development is located in an existing building and utilises existing on-site car parking Except where any of the following apply: <ul style="list-style-type: none"> State Heritage Area Overlay State Heritage Place Overlay 	None	Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1	None	Major Urban Transport Routes Overlay: [Access – Existing Access Points] DTS 3.1 Key Outback and Rural Routes Overlay: Access – Existing Access Points] DTS 3.1
Land division	None	Land Division in Urban Areas [All Land Division – Allotment Configuration]: DTS 1.1	None	None
Temporary change of use to a <u>sales office</u> within an existing building for no more than 2 years	None	None	None	None
The construction of a new building in the same, or substantially the same, position as a building which was demolished within the previous 3 years where the new building has the same, or substantially the same, layout and external appearance as the previous building Except where any of the following apply: <ul style="list-style-type: none"> Historic Area Overlay A Historic Shipwreck identified in the Historic Shipwrecks Overlay 	None	None	None	None

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted	Exclusions
<u>Industry</u>	n/a

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

A mix of land uses including retail, office, commercial, community, civic and medium density residential development that supports the local area.

DO 2

A high degree of pedestrian activity and main street activity with well-lit and visually engaging shop fronts and business displays including alfresco seating and dining facilities.

DO 3

An intimate public realm with active streets created by integrated mixed use buildings.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Retail, office, entertainment and recreation related uses supplemented by other businesses that provide a range of goods and services to the local community.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

Cinema

Community facility

Consulting room

Health facility

Hotel

Indoor recreation facility

Library

Office

Place of worship

Pre-school

Restuarant

Shop

Tourist accommodation.

PO 1.2

Land uses that promote movement and activity during daylight and evening hours, including restaurants, educational, community and cultural facilities, and accommodation for visitors and residents.

DTS 1.2

None are applicable.

PO 1.3

Ground floor uses that contribute to an active and vibrant main street.

DTS / DPF 1.3

Shop, restaurant, office, or consulting room uses are located on the ground floor level of buildings.

PO 1.4

Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities that contribute to making the main street precinct and pedestrian thoroughfares pleasant and lively places.

DTS / DPF 1.4

Dwellings developed in conjunction with non-residential uses that are sited:

- (a) at upper levels of buildings with non-residential uses located at ground level; or
- (b) behind non-residential uses on the same allotment.

PO 1.5

Tourist accommodation and visitor attractions that support the visiting public and holiday makers.

DTS 1.5

None are applicable.

PO 1.6

Bulky goods outlets are sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.

DTS/DPF 1.6

Bulky goods outlets with a gross leaseable area of 500m² or more are located towards the periphery of the zone.

Built Form and Character

PO 2.1

Buildings that sensitively frame the main street and public spaces and provide overall visual relief from building height and mass.

DTS / DPF 2.1

Buildings that:

- (a) include a clearly defined podium or street wall with a maximum building height of 1 building level or 4m in height; and
- (b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.

PO 2.2

Buildings preserve the main street appearance by complementing the key shop-front elements such narrow buildings and tenancy footprint with frequently repeated frontages, and clear-glazed narrow shop front displays above raised display levels [base stall boards] and recessed entries.

DTS 2.2

None are applicable.

PO 2.3

Pedestrian shelter and shade provided over footpaths through the use of structures such as awnings, canopies and verandas.

DTS 2.3

None are applicable.

PO 2.4

Buildings that are adaptable and flexible to accommodate a range of land uses, including retail, office and residential, without the need for significant change to the building.

DTS / DPF 2.4

Ground floor levels of buildings incorporate a minimum ceiling height of 3.5m.

PO 2.5

Buildings that create visual interest, promote an active interface with the main street frontage and maximise passive surveillance.

DTS / DPF 2.5

Not less than 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.

PO 2.6

Outbuildings, carports and garages located behind the primary building facing the main street, to ensure vibrancy and activity along the main street.

DTS 2.6

None are applicable.

PO 2.7

Development that creates an efficient and convenient pedestrian network establishing linkages within the main street and to adjoining zones.

DTS 2.7

None are applicable.

Building height and setbacks

PO 3.1

Building heights that are low to medium rise, where the height is commensurate with the development sites frontage and depth as well as the main street width, so that the impacts of building mass on adjoining properties and the streetscape can be minimised.

DTS / DPF 3.1

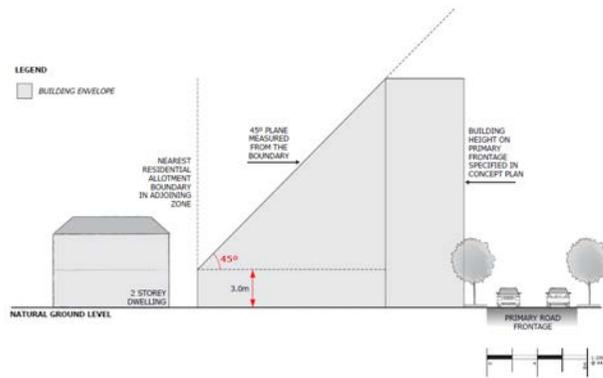

Building height is not greater than any maximum, or less than any minimum, specified in the Maximum Building Height Levels Technical and Numeric Variation Overlay, the Maximum Building Height Metres Technical and Numeric Variation Overlay, or the Minimum Building Height Levels Technical and Numeric Variation Overlay.

PO 3.2

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS / DPF 3.2

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.3 will apply, or where this boundary is the primary street boundary):

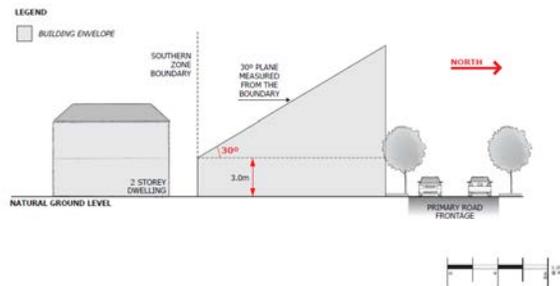

PO 3.3

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS / DPF 3.3

Buildings on sites with a southern boundary adjoining a residential allotment within a [neighbourhood zone](#) are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

PO 3.4

Buildings with no set-backs from road boundaries to achieve a continuity of street façade to the main street, but with sections of building set back to create outdoor dining areas, visually interesting building entrances and intimate but active spaces.

DTS 3.4

None are applicable.

PO 3.5

Buildings with no setback from side boundaries to achieve a continuity of street façade to the main street.

DTS / DPF 3.5

Except where contrary to DTS/DPF 3.2 or 3.3, building walls located on the site's side boundaries, with the front wall set back in line with neighbouring buildings.

PO 3.6

Buildings that are set back from rear boundaries (other than street boundaries) to minimise impacts on neighbouring properties, including access to natural light and ventilation.

DTS / DPF 3.6

Buildings set back a minimum 3 metres from rear boundaries where the subject land directly abuts an allotment of a different zone, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 3.7

Buildings that are set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.

DTS / DPF 3.7

Buildings setback from the rear access way:

- (a) no requirement where the access way is not less than 6.5m wide; or
- (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

Traffic, parking and access

PO 4.1

Development minimises the need for vehicle crossovers on the main street to reduce conflicts with pedestrians and avoid disruption to the continuity of built form.

DTS 4.1

None are applicable.

PO 4.2

Vehicle parking that is located behind buildings away from the primary main street frontage and designed to minimise its impacts on residential amenity.

DTS / DPF 4.2

Vehicle parking areas located behind the building line of the associated building.

Advertisements

PO 5.1

Freestanding advertisements that identify the associated business without creating a visually dominant element within the streetscape.

DTS/DPF 5.1

Freestanding advertisements:

- (a) do not exceed 8m in height; and
- (b) do not have a sign face that exceeds 6m² per side

Land Division

PO 6.1

Land division and site amalgamation that creates allotments that vary in size and are suitable for a variety of residential and commercial activities and that improve the level of development integration.

DTS 6.1

None are applicable.

Procedural Matters (PM)

Notification of Performance assessed development

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) development on a site located adjacent a dwelling within a neighbourhood zone which comprises:
 - (i) development defined as 'all other code assessed development' in Suburban Main Street Zone Table 3
 - (ii) construction of a building which fails to comply with DTS 3.1 to 3.3 (inclusive)
 - (iii) the construction of or change of use to a retail fuel outlet, educational establishment, emergency services facility, entertainment venue, hospital, hotel, light industry

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Notification of Performance assessed development

Placement of Notices – Exemptions for Restricted Development

None specified.

Suburban Neighbourhood Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
<p>Carport Except where any of the following apply:</p> <ul style="list-style-type: none"> • Building Near Airfields Overlay • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Character Area Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • Ramsar Wetlands Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Future Road Widening Overlay where an existing access is altered or a new access is created • Key Railway Crossings Overlay where an existing access is altered or a new access is created 	<ol style="list-style-type: none"> 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2 It is ancillary to a dwelling erected on the site 3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 5 Total floor area - does not exceed 40m² 6 Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7 Building height - does not exceed 5m 8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless: <ol style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): <ol style="list-style-type: none"> (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusions
Shop	With a gross leasable area less than 1000m2.

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Low or very low-density housing that is consistent with the existing local context and development pattern. Services and community facilities will contribute to making the neighbourhood a convenient place to live without compromising residential amenity and character.

DO 2

Development on sloping land that is sensitive to the topography of the area and minimises environmental and visual impacts.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Residential development and supporting uses that provide housing and supporting services and facilities that preserve a low density residential character.

DTS 1.1

Development comprises one or more of the following land uses:

Community facility

Dwelling

Educational establishment

Office

Pre-school

Recreation area

Shop.

PO 1.2

Dwellings complement the low-density or very-low density character of the neighbourhood.

DTS 1.2

None are applicable.

PO 1.3

Shops, consulting rooms and offices of a scale to maintain the amenity of nearby residents.

DTS 1.3

Other than a change in the use of an existing building that has been lawfully used as a shop, office or consulting room (or any combination thereof), shops, offices and consulting rooms do not exceed 100m² in gross leasable floor area (individually or combined).

PO 1.4

Larger scale shops, offices and consulting rooms established on higher order roads and adjacent existing commercial and retail precincts.

DTS/DPF 1.4

Shop, consulting room and office:

- (a) floor area does not exceed 200m²; and
- (b) are located on sites with a frontage to an arterial or collector road or adjacent a Main Street or Activity Centre Zone.

PO 1.5

Non-residential development located and designed to improve community accessibility to services, primarily in the form of:

- (a) commercial uses including small scale offices, personal and domestic services and consulting rooms;
- (b) community services such as educational establishments, community centres, places of worship, pre-schools, childcare and other health and welfare services;
- (c) services and facilities ancillary to the function or operation of supported accommodation or retirement facilities;
- (d) open space and recreation facilities.

DTS 1.5

None are applicable

PO 1.6

Non-residential development compatible with the low density suburban character and amenity.

DTS 1.6

None are applicable

Site Dimensions and Land Division

PO 2.1

Allotments/sites created for residential purposes are of suitable size and dimension and are compatible with the housing pattern consistent to the locality.

DTS/DPF 2.1

Where the allotment has a slope less than 12.5% (1-in-8), development accords with the following:

- n) site areas (or allotment areas in the case of land division) not less than the minimum allotment size specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*; and
- o) site frontages not less than the minimum allotment frontage specified in the *Minimum Allotment Frontage Technical and Numeric Variation Overlay*.

PO 2.2

Allotments/sites created for residential purposes are of suitable size and dimension to accommodate residential development that is sensitive to the topography of the locality.

DTS/DPF 2.2

Where the allotment has a slope equal to or greater than 12.5% (1-in-8), development accords with the greater of the following:

- (a) the site areas and site frontages specified in DTS/DPF 2.1; or

(b) the site areas and site frontages specified below:

Development Type	Gradient	Minimum Site Area (m ²)	Minimum Frontage (m)
All Dwelling Types	> 1:8 & < 1:4	1000	15
	≥ 1:4	1500	20

Site coverage

PO 3.1

Building footprints consistent with the character and pattern of a low-density suburban neighbourhood and provide sufficient space around buildings to limit visual impact, provide an attractive outlook and access to light and ventilation.

DTS / DPF 3.1

The development does not result in a total roofed area (excluding eaves of a dwelling) on the site exceeding 50%.

Building Height

PO 4.1

Buildings contribute to a low-rise suburban character and complement the height of nearby buildings.

DTS/DPF 4.1

Building height (excluding garages, carports and outbuildings) no greater than that specified in the *Building Height Technical and Numeric Variations Overlay*.

Primary Street Setback

PO 5.1

Buildings are setback from primary street boundaries to complement the existing suburban streetscape character.

DTS/DPF 4.1

Buildings are setback from the primary street boundary either:

- (a) at least the average of existing buildings on the adjoining sites which face the same street; or
- (b) in relation to a site on the corner of two streets or adjacent a public space or thoroughfare, at least the distance of existing buildings on the adjacent site or the closest site away from the corner, public space or thoroughfare that contains a building facing the same primary street without crossing another street, public space or thoroughfare; or
- (c) at least 8m where no buildings exist on the adjoining or adjacent sites.

Secondary Street Setback

PO 6.1

Buildings are set back from secondary street boundaries to maintain a pattern of separation between buildings and public streets and reinforce streetscape character.

DTS/DPF 6.1

Buildings are set back at least 900mm from the boundary of the allotment with the secondary street frontage, or if a dwelling on any adjoining allotment is closer to the secondary street than 900 millimetres, the distance of that dwelling from the boundary with the secondary street (being, if relevant, the lesser of the 2 distances).

Boundary Walls

PO 7.1

Boundary walls are limited in height and length to manage impacts on adjoining properties.

DTS/DPF 7.1

Except where the dwelling is located on a central site within a row dwelling or terrace arrangement, dwellings with side boundary walls are sited on only one side boundary, and either:

- (a) adjoin or abut a boundary wall of a building on adjoining land for the same length and height; or
- (b) do not exceed the following:
 - (i) 3m in height from the top of the footings;
 - (ii) 10m in length;
 - (iii) when combined with other walls on the boundary of the subject development site, maximum 45% of the length of the boundary; and
 - (iv) setback at least 3 metres from any other existing or proposed boundary walls on the subject land.

PO 7.2

Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a low density suburban streetscape character.

DTS / DPF 7.2

Dwellings in a semi-detached, row or terrace arrangement are setback from side boundaries shared with allotments outside the development site at least the minimum distance identified in DTS / DPF 6.1.

Side Boundary Setback

PO 8.1

Buildings are set back from side boundaries to provide:

- (a) separation between dwellings in a way that complements the established character of the locality; and
- (b) access to natural light and ventilation for neighbours.

DTS/DPF 8.1

Buildings are setback from the side boundary at least:

- A. On sites greater than 800m²:
 - (i) Other than a wall facing a southern boundary 1900mm
 - (ii) At least 1900mm plus a 1/3 of the wall height above 3m measured from the top of the footings for walls facing a southern boundary
- B. On sites less than 800m², and other than walls located on a side boundary:
 - (i) at least 900mm where the wall is up to 3m measured from the top of the footings;

- (ii) other than for a wall facing a southern side boundary, at least 900mm plus 1/3 of the wall height above 3m measured from the top of the footings; and
- (iii) at least 1900mm plus 1/3 of the wall height above 3m measured from the top of the footings for walls facing a southern side boundary.

Rear Boundary Setback

PO 9.1

Buildings are set back from rear boundaries to provide:

- (a) separation between dwellings in a way that complements the established character of the locality;
- (b) access to natural light and ventilation for neighbours;
- (c) private opens space; and
- (d) space for landscaping and vegetation.

DTS/DPF 9.1

Buildings are set back from the rear boundary at least:

- (a) 3m for the first building level; and
- (b) 5m for any second building level.

Procedural Matters (PM)

Notification

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as "all other code assessed development" in Suburban Neighbourhood (Low Density) Zone Table 3;
- (c) development involving the creation of four or more additional dwellings or allotments; or
- (d) development exceed the height specified in DTS / DPF 4.1.

Underground Subzone

Assessment Criteria (AC)

Desired Outcome (DO)

DO 1

Low density housing that contributes to the existing local context and development pattern primarily in the form of underground dwellings.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Underground dwellings located in areas that are best suited for subterranean development.

DTS 1.1

None are applicable.

PO 1.2

Underground dwellings designed and constructed to avoid impacts beyond the development site.

DTS 1.2

None are applicable.

Built Form and Character

PO 2.1

Underground dwellings constructed in a manner that minimises alteration to the natural landform, including the removal of vegetation.

DTS 2.1

None are applicable.

Side and Rear Boundary Setbacks

PO 2.2

Underground dwellings are set back from allotment boundaries to provide adequate separation between dwellings.

DTS/DPF 2.2

Underground dwellings are set back at least 2m from side and rear boundaries.

Earthworks

PO 3.1

Incomplete excavation is returned to the naturally occurring landform.

DTS 3.1

None are applicable.

Township Zone

Table 1 - Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
Building work on railway land Except where any of the following apply:	16 Building work is associated with a railway 17 It is situated (or to be situated) on railway land 18 It is required for the conduct or maintenance of railway activities.
Carport Except where any of the following apply: <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Flooding) Overlay • Character Area Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • Ramsar Wetlands Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Future Road Widening Overlay where an existing access is 	77 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 78 It is ancillary to a dwelling erected on the site 79 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 80 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 81 Total floor area - does not exceed 40m ² 82 Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 83 Building height - does not exceed 5m 84 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless: <ul style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 85 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): <ul style="list-style-type: none"> (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and

Table 4 – Restricted Development Classification

None specified	

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

A township supporting a range of residential, community, retail, business, commercial and light industry uses and facilities to serve the local community, businesses and the visiting public.

DO 2

Development that contributes to and enhances streetscapes and the settlement patterns comprising the township.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use

PO 1.1

A range of residential development types that complement local built form and the surrounding township context.

DTS/DPF 1.1

Residential development comprises detached dwellings or semi-detached dwellings.

PO 1.2

Small-scale retail, business and commercial development that provide a range of goods and services to the local community, the surrounding district and visitors to the area.

DTS/DPF 1.2

The gross leasable floor area of a shop, office or consulting room does not exceed 250m².

PO 1.3

Small-scale light industry and warehousing activities that supply a local service to the community and business activities.

DTS/DPF 1.3

The gross leasable floor area of a building plus any outdoor space used for a light industry, warehouse or store does not exceed 250m².

PO 1.4

Small-scale tourist accommodation that supports the visiting public and holiday makers.

DTS/DPF 1.4

None are applicable.

PO 1.5

Development of a business, commercial or light industrial nature are grouped together or in close proximity to establish identifiable service centres or reinforce traditional main streets.

DTS/DPF 1.5

Development located adjacent to a site containing an existing non-residential use with the same primary street frontage.

Built Form and Character

PO 2.1

Buildings are of a scale and design to complement the surrounding built form, streetscape and character.

DTS/DPF 2.1

None are applicable.

PO 2.2

Buildings contribute to a low-rise character and complement the height of nearby buildings.

DTS/DPF 2.2

Building height (excluding garages, carports and outbuildings) is no greater than 2 building levels and 9m and wall height that is no greater than 6m.

PO 2.3

Buildings are set back from the primary street boundary to complement the existing streetscape character.

DTS/DPF 2.3

Buildings are no closer to the primary street boundary than:

- (l) the average of existing buildings on adjoining sites with the same primary street frontage and, if there is only one such building, the setback of that building; or
- (m) 6m, if no building exists on an adjoining site with the same primary street frontage.

PO 2.4

Buildings are setback from a secondary street boundary to maintain a consistent pattern of separation between building walls and public thoroughfares on corner sites within the locality.

DTS/DPF 2.4

Buildings are no closer than 900mm to the secondary street boundary.

PO 2.5

Dwellings are setback from rear boundaries to provide:

- (f) access to natural light and ventilation for neighbours;
- (g) open space recreational opportunities; and
- (h) space for landscaping and vegetation.

DTS/DPF 2.5

Dwellings no closer to the rear boundary of the site than the following:

- (a) 4m for the ground floor of a building; and
- (b) 6m for the upper floor of a building.

PO 2.6

Buildings are setback from side boundaries to:

- (e) establish separation between buildings to complement the established character within a locality; and
- (f) provide access to natural light and ventilation for neighbours.

DTS/DPF 2.6

Other than walls located on a side boundary, buildings are setback from side boundaries:

- (c) at least 900mm where the wall height is up to 3m;
- (d) other than for a wall facing a southern side boundary, at least 900mm plus 1/3 of the wall height above 3m; and
- (e) at least 1900mm plus 1/3 of the wall height above 3m for walls facing a southern side boundary.

PO 2.7

Boundary walls are limited in height and length to mitigate adverse impacts on the amenity of adjoining land users, including through an unreasonable loss of natural light and ventilation.

DTS/DPF 2.7

For buildings that do not have a common wall, any wall sited on or abutting a side allotment boundary:

- (a) does not exceed 3m in height from the top of the footings;
- (b) does not exceed 8m in length;
- (c) when combined with other walls on the boundary, does not exceed 45% of the length of the boundary; and
- (d) is setback at least 3 metres from any existing or proposed boundary walls.

Site Dimensions and Land Division

PO 3.1

Allotments for residential purposes are of suitable size and dimension to contribute to a housing pattern consistent with the locality.

DTS/DPF 3.1

Development accords with the following:

- (a) for sites connected to mains sewer or Community Wastewater Management System, site areas (or allotment areas in the case of land division) are not less than the minimum allotment area specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*;
- (b) for sites without connection to mains sewer or Community Wastewater Management System, site areas (or allotment areas in the case of land division) are not less than the greater of:
 - (iii) 1200m²; or
 - (iv) the minimum allotment area specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*; and
- (C) site frontages not less than 20m.

Nairne Redevelopment Subzone

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Redevelopment of the former Chapman's Smallgoods factory (the Chapman's site) and Bush Timbers' Salvage yard (Bush Timbers' site) (Nairne East) to achieve a mix of retail and medium density housing.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Shops (including a supermarket), consulting room, office and related uses supplemented by other businesses that provide a range of goods and services to the surrounding neighbourhood and district.

DTS/DPF 1.1

None are applicable.

PO 1.2

Medium density residential development that does not prejudice the operation of existing non-residential development and the long term provision of services and facilities for wider community benefit.

DTS/DPF 1.2

None are applicable.

Built Form and Character

PO 2.1

Adaptive reuse of buildings that complement the prevailing historic values of the locality.

DTS/DPF 2.1

None are applicable.

PO 2.2

Development maintains the valued heritage and streetscape characteristics of the area.

DTS/DPF 2.2

None are applicable.

Procedural Matters (PM)

All classes of performance assessed development is excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as "all other code assessed development" in Township Zone Table 3
- (c) buildings exceeding 2 building levels or 9m in height
- (d) development involving the creation of four or more additional dwellings or allotments
- (e) shop, office or consulting room in excess of 250m² in gross leasable floor area
- (f) light industry, warehouse or store where the gross leasable floor area of the buildings plus any outdoor space used for any of these uses exceeds 250m².

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Township Main Street Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
<p>Air handling unit, air conditioning system or exhaust fan including any associated components and any associated building alteration or addition necessary or incidental to its installation</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>13 The item will be installed on or within an existing building</p> <p>14 The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire.</p> <p>15 If the associated building is in a Local Heritage Area Overlay or State Heritage Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.</p>
<p>Internal building work</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>11 There will be no increase in the total floor area of the building</p> <p>12 There will be no alteration to the external appearance of the building.</p>
<p>Shade sail</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Airport Building Heights (Regulated) Overlay • Building Near Airfields Overlay • Defence Aviation Area Overlay • Local Heritage Place Overlay • Historic Area Overlay • River Murray Tributaries Area Overlay • Murray Darling Basin Overlay 	<p>43 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>44 Shade sail consists of permeable material</p> <p>45 The total area of the sail - does not exceed 40m²</p> <p>46 No part of the shade sail will be:</p> <p style="margin-left: 20px;">(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</p> <p style="margin-left: 20px;">(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</p> <p>47 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>48 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p>

<ul style="list-style-type: none"> • State Heritage Place Overlay • State Heritage Area Overlay 	<p>49 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted)</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Area Overlay • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>16 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>17 Panels and associated components do not overhang any part of the roof</p> <p>18 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (underground)</p>	<p>14 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>15 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 2 – Deemed-to-Satisfy Development Classification

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the ‘Deemed-to-Satisfy Development Classification Criteria’	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.			
	Zone	General Development Policies	Subzone (applies only in the area affected by the Subzone)	Overlay (applies only in the area affected by the Overlay)
Advertisement attached to a building or structure Except where any of the following apply: <ul style="list-style-type: none"> • State Heritage Area Overlay • State Heritage Place Overlay 	None	Clearance from Overhead Powerlines: DTS 1.1 Advertisements [Appearance]: DTS 1.1, 1.3, 1.4 Advertisements [Proliferation of Advertisements]: DTS 2.1, 2.2 Advertisements [Advertising Content]: DTS 3.1 Advertisements [Amenity Content]: DTS 4.1 Advertising [Safety]: DTS 5.1, 5.2, 5.3, 5.4, 5.5	None	Advertising Near Signalised Intersections Overlay: All DTS
Change of use to a <u>shop, office, consulting room</u> or any combination of these uses where the area to be occupied by the proposed development is located in an existing building and utilises existing on-site car parking Except where any of the following apply: <ul style="list-style-type: none"> • State Heritage Area Overlay • State Heritage Place Overlay 	None	Transport, Access and Parking [Vehicle Parking Rates]: DTS 5.1	None	Major Urban Transport Routes Overlay: [Access – Existing Access Points] DTS 3.1 Key Outback and Rural Routes Overlay: Access – Existing Access Points] DTS 3.1
Land division	None	Land Division in Urban Areas [All Land Division – Allotment Configuration]: DTS 1.1	None	None
Temporary change of use to a <u>sales office</u> within an existing building for no more than 2 years	None	None	None	None
The construction of a new building in the same, or substantially the same, position as a building which was demolished within the previous 3 years where the new building has the same, or substantially the same, layout and external appearance as the previous building Except where any of the following apply: <ul style="list-style-type: none"> • Historic Area Overlay • A Historic Shipwreck identified in the Historic Shipwrecks Overlay 	None	None	None	None

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.			
	Zone	General Development Policies	Subzone (applies only in the area affected by the Subzone)	Overlay (applies only in the area affected by the Overlay)

Table 4 – Restricted Development Classification

The following Classes of Development are classified as Restricted

Industry

Assessment Provisions

Desired Outcomes (DO)

DO 1

A cohesive, active, accessible and welcoming main street environment for local residents and visitors to shop, work, meet, entertain and relax.

DO 2

Development contributes to vibrancy and activity of public spaces, and reinforces the traditional main street character.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Retail, office, entertainment and recreation related uses supplemented by other businesses that provide a range of goods and services to the local community and the surrounding district.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

Cinema

Consulting room

Community facility

Health facility

Hotel

Indoor recreation facility

Library

Office

Place of worship

Pre-school

Restaurant;

Shop; or

Tourist accommodation.

PO 1.2

Ground floor uses that contribute to an active and vibrant main street.

DTS / DPF 1.2

Shop, restaurant, office, or consulting room uses are located on the ground floor level of buildings.

PO 1.3

Residential development does not prejudice the operation of existing non-residential development and the long term provision of services and facilities for wider community benefit.

DTS 1.3

None are applicable.

PO 1.4

Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities.

DTS/DPF 1.4

Dwellings are developed in conjunction with non-residential uses and sited:

- (b) at upper levels of buildings with non-residential uses located at ground level; or
- (c) behind non-residential uses on the same allotment.

PO 1.5

Bulky goods outlets are sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.

DTS/DPF 1.5

Bulky goods outlets have a gross leaseable area not exceeding 500m².

Built Form and Character

PO 2.1

Buildings and structures designed to complement the traditional low scale main street built form by ensuring wall, parapet and roof height, veranda profile, and materials of construction are consistent with adjacent traditional main street buildings.

DTS 2.1

None are applicable.

PO 2.2

Buildings preserve main street character by complementing key traditional shop-front elements such as narrow building and tenancy footprint with frequently repeated frontages, clear-glazed narrow shop front displays above raised display levels (base stall boards) and recessed entries.

DTS 2.2

None are applicable.

PO 2.3

Buildings are adaptable and flexible to accommodate a range of land uses, including shops, offices, consulting rooms and residential land uses.

DTS / DPF 2.3

Ground floor levels of buildings incorporate a minimum ceiling height of 3.5m.

PO 2.4

Buildings create visual interest and an active interface with the main street frontage and maximise passive surveillance.

DTS/DPF 2.4

Not less than 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.

PO 2.5

Pedestrian shelter and shade provided over footpaths through the use of structures such as awnings, canopies and verandas.

DTS 2.5

None are applicable.

PO 2.6

Dwellings generally sited behind or above non-residential uses on the same site to maintain vibrancy and activity along the main street.

DTS 2.6

None are applicable.

PO 2.7

Outbuildings, carports and garages located behind the primary building facing the main street, to ensure vibrancy and activity along the main street.

DTS 2.7

None are applicable.

PO 2.8

Development contributes to and does not interfere with provision of an efficient and convenient pedestrian network linking the main street to adjoining zones.

DTS 2.8

None are applicable.

Building height and setbacks

PO 3.1

Building heights are low-to-medium rise, with height commensurate with the development site's frontage and depth as well as the main street width, so that the impacts of building mass on adjoining properties and the streetscape can be minimised.

DTS / DPF 3.1

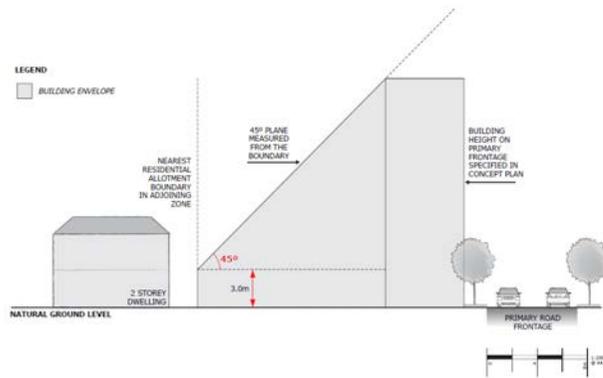

Building height is not greater than any maximum, or less than any minimum, specified in the *Maximum Building Height Levels Technical and Numeric Variation Overlay*, the *Maximum Building Height Metres Technical and Numeric Variation Overlay*, or the *Minimum Building Height Levels Technical and Numeric Variation Overlay*.

PO 3.2

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS / DPF 3.2

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a [residential allotment within a neighbourhood zone](#) as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.3 will apply, or where this boundary is the primary street boundary):

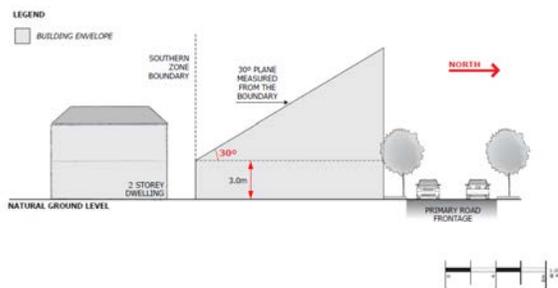

PO 3.3

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS / DPF 3.3

Buildings on sites with a southern boundary adjoining a residential allotment within a [neighbourhood zone](#) are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

PO 3.4

Buildings constructed to front boundary to achieve a continuity of street façade to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate but active spaces.

DTS/DPF 3.4

None are applicable.

PO 3.5

Buildings constructed to side boundaries to achieve a continuity of street façade to the main street.

DTS/DPF 3.5

Building walls are located on side boundaries.

PO 3.6

Buildings set back from rear boundaries (other where these are also street boundaries) to minimise impacts on neighbouring properties, including access to natural light and ventilation.

DTS/DPF 3.6

Buildings set back 3m or more from rear boundaries where the subject land directly abuts an allotment of a different zone, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 3.7

Buildings set back from rear access ways to provide adequate manoeuvrability for vehicles.

DTS/DPF 3.7

Buildings setback from the rear access ways:

- (a) no requirement where the access way is 6.5m or more wide; or
- (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at 6.5m wide.

Traffic, parking and access

PO 4.1

Development minimises the need for vehicle crossovers on the main street to reduce conflicts with pedestrians and avoid disruption to the continuity of built form.

DTS/DPF 4.1

None are applicable.

PO 4.2

Vehicle parking that is located behind buildings away from the primary main street frontage and designed to minimise impacts on residential amenity.

DTS / DPF 4.2

Vehicle parking areas located behind the building line of the associated building.

Advertisements

PO 5.1

Freestanding advertisements that identify the associated business without creating a visually dominant element within the streetscape.

DTS 5.1

None are applicable

Procedural Matters (PM)

Notification of Performance assessed development

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) development on a site located adjacent a dwelling within a neighbourhood zone and which comprises:
 - (i) development defined as 'all other code assessed development' in Township Main Street Zone Table 3
 - (ii) construction of a building which does not satisfy DTS/DPF 3.1 to 3.3 (inclusive)
 - (iii) the construction of or change of use to a retail fuel outlet, educational establishment, emergency services facility, entertainment venue, hospital, hotel, light industry

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Township Activity Centre Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
<p>Air handling unit, air conditioning system or exhaust fan including any associated components and any associated building alteration or addition necessary or incidental to its installation</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>16 The item will be installed on or within an existing building</p> <p>17 The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire.</p> <p>18 If the associated building is in a Local Heritage Area Overlay or State Heritage Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.</p>
<p>Internal building work</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>13 There will be no increase in the total floor area of the building</p> <p>14 There will be no alteration to the external appearance of the building.</p>
<p>Shade sail</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Airport Building Heights (Regulated) Overlay • Building Near Airfields Overlay • Defence Aviation Area Overlay • Local Heritage Place Overlay • Historic Area Overlay • River Murray Tributaries Area Overlay • Murray Darling Basin Overlay 	<p>50 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>51 Shade sail consists of permeable material</p> <p>52 The total area of the sail - does not exceed 40m²</p> <p>53 No part of the shade sail will be:</p> <p style="margin-left: 20px;">(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</p> <p style="margin-left: 20px;">(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</p> <p>54 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>55 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p>

<ul style="list-style-type: none"> • State Heritage Place Overlay • State Heritage Area Overlay 	<p>56 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted)</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Area Overlay • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>19 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>20 Panels and associated components do not overhang any part of the roof</p> <p>21 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (underground)</p>	<p>16 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>17 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 2 – Deemed-to-Satisfy Development Classification

The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'	Deemed-to-Satisfy Development Classification Criteria			
	Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 4 – Restricted Development Classification

The following Classes of Development are classified as Restricted	
<u>Industry</u>	<u>Light industry</u>

Assessment Provisions

Desired Outcomes (DO)

DO 1

A cohesive, active, accessible and welcoming centre for local residents and visitors to shop, work, meet, entertain and relax in an attractive and safe environment.

DO 2

The range of land uses that occur in the centre will provide important services to town residents, rural hinterland and the broader region.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Retail, office, entertainment, health and recreation related uses supplemented by other businesses that provide a range of goods and services to the local community and the surrounding district.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Cinema
- Community facility
- Consulting room
- Educational establishment
- Emergency services facility
- Health facility
- Hospital
- Hotel
- Indoor recreation facility
- Library
- Office
- Place of worship
- Pre-school
- Public transport terminal
- Recreation area
- Restaurant
- Retail fuel outlet
- Service trade premises
- Shop
- Tourist accommodation.

PO 1.2

Residential development that does not prejudice the operation of existing or future retail, office, entertainment or recreation related activity within the zone

DTS/DPF 1.2

Dwellings are:

- (a) developed in conjunction with non-residential uses; and
- (b) sited either behind or above non-residential uses on the same allotment

PO 1.3

Tourist accommodation and visitor attractions that support the visiting public and holiday makers.

DTS 1.3

None are applicable.

PO 1.4

Bulky goods outlets are sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.

DTS/DPF 1.4

Bulky goods outlets with a gross leaseable area of 500m² or more are located towards the periphery of the zone.

Built Form and Character

PO 2.1

Buildings are sited and designed to create pedestrian, vehicular and visual linkages between the various built-form elements within the zone and adjoining main roads.

DTS 2.1

None are applicable.

PO 2.2

Buildings are sited and designed to create streetscapes and spaces that encourage social interaction.

DTS 2.2

None are applicable.

Building height and setbacks

PO 3.1

Buildings set back from primary and secondary street boundaries to contribute to the consistent established streetscape.

DTS/DPF 3.1

Buildings set back from road boundaries to align with buildings on adjoining land.

PO 3.2

Building height of a low to medium rise that complements the established streetscape and minimises impact on adjoining residential properties.

DTS/DPF 3.2

Building height does not exceed:

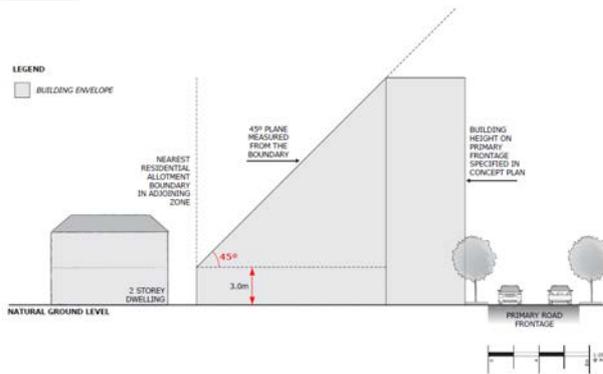

- (d) where provided, the relevant maximum height provided within the *Building Height Technical and Numeric Variation Overlay*; or
- (e) in all other cases – 3 building levels or 12 metres.

PO 3.3

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS / DPF 3.3

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.4 will apply, or where this boundary is the primary street boundary):

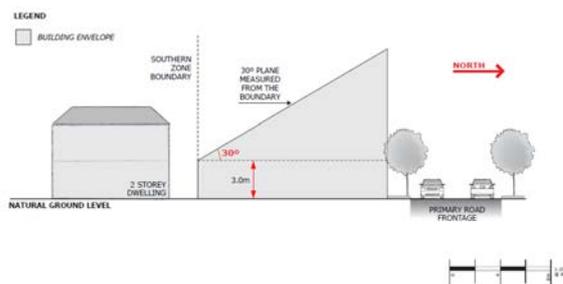

PO 3.4

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS / DPF 3.4

Buildings on sites with a southern boundary adjoining a residential allotment within a [neighbourhood zone](#) are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

Land division

PO 4.1

Land division that creates allotments that vary in size and are suitable for a variety of business and community facilities.

DTS 4.1

None are applicable.

Advertisements

PO 5.1

Freestanding advertisements that identify the associated business without creating a visually dominant element within the locality.

DTS 5.1

Freestanding advertisements:

- (a) do not exceed 8m in height; and
- (b) do not have a sign face that exceeds 6m² per side.

Procedural Matters (PM)

Notification of Performance assessed development

All classes of performance assessed development are excluded from notification except where they involve any of the following:

development on a site located adjacent a dwelling within a neighbourhood zone and which comprises:

- (a) development defined as 'all other code assessed development' in Township Activity Centre Zone Table 3
- (b) construction of a building which fails to comply with DTS 3.2 to 3.4 (inclusive)
- (c) the construction of or change of use to a retail fuel outlet, educational establishment, emergency services facility, entertainment venue, hospital, hotel, light industry

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Tourism Development Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
Building work on railway land	19 Building work is associated with a railway 20 It is situated (or to be situated) on railway land 21 It is required for the conduct or maintenance of railway activities.
Carport Except where any of the following apply: <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Historic Shipwrecks Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Key Outback and Rural Routes Overlay where an existing access is altered or a new access is created • Key Railway Crossings Overlay where an existing access is altered or a new access is created • Major Urban Transport Routes Overlay where an existing access is altered or a new access is created 	14 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 15 It is ancillary to a dwelling erected on the site 16 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 17 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 18 Total floor area - does not exceed 40m ² 19 Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 20 Building height - does not exceed 5m 21 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless: <ul style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 22 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): <ul style="list-style-type: none"> (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a

<ul style="list-style-type: none"> • Urban Transport Routes Overlay where an existing access is altered or a new access is created • Water Resources Overlay 	<p style="text-align: center;">building that would be adjacent to or abut the proposed wall or structure</p> <p>23 The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment</p> <p>24 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p> <p>25 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors</p> <p>26 The carport:</p> <p>(a) is located so that vehicle access:</p> <ul style="list-style-type: none"> i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or ii. will use a driveway that: <ul style="list-style-type: none"> A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and <p>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</p> <p>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</p>
<p>Internal building work Except where any of the following apply:</p> <ul style="list-style-type: none"> • A Historic Shipwreck identified in the Historic Shipwrecks Overlay • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>3 There will be no increase in the total floor area of the building</p> <p>4 There will be no alteration to the external appearance of the building.</p>

Outbuilding (in the form of a garage)

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Historic Shipwrecks Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Key Outback and Rural Routes Overlay where an existing access is altered or a new access is created
- Key Railway Crossings Overlay where an existing access is altered or a new access is created
- Major Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Water Resources Overlay

- 57 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 58 It is detached from and ancillary to a dwelling erected on the site.
- 59 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
- 60 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
- 61 Total floor area - does not exceed 40m²
- 62 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
- 63 Building height - does not exceed 5m
- 64 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:
- (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
 - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- 65 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
- (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
 - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 66 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%
- 67 Internal dimensions – exceed 3.2m in width and 6m in length between all walls and doors
- 68 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
- 69 The garage:
- (a) is located so that vehicle access:
 - i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
 - ii. will use a driveway that:

	<p>A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and</p> <p>B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or</p> <p>iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and</p> <p>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</p> <p>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</p> <p>70 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.</p>
<p>Outbuilding (not being a garage)</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Historic Shipwrecks Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>49 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>50 It is detached from and ancillary to a dwelling erected on the site</p> <p>51 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>52 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)</p> <p>53 Side boundary setbacks – at least 900mm from the boundary of the allotment</p> <p>54 Total floor area does not exceed 40m²</p> <p>55 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)</p> <p>56 Building height - does not exceed 5m</p> <p>57 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:</p> <p>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</p> <p>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</p> <p>58 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):</p>

	<p>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</p> <p>(b) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</p> <p>59 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%</p> <p>60 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.</p>
<p>Private bushfire shelters</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Historic Shipwrecks Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>13 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>14 Primary street setback – at least as far back as the building to which it is ancillary</p> <p>15 Secondary street setback – at least 900mm from the boundary of the allotment</p> <p>16 At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place).</p>
<p>Shade sail</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Historic Area Overlay • Historic Shipwrecks Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<p>29 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>30 Shade sail consists of permeable material</p> <p>31 The total area of the sail - does not exceed 40m²</p> <p>32 No part of the shade sail will be:</p> <p>(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</p> <p>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</p> <p>33 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p>

<ul style="list-style-type: none"> • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>34 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p> <p>35 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted)</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>22 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>23 Panels and associated components do not overhang any part of the roof</p> <p>24 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Spa pool Swimming pool</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Historic Shipwrecks Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>21 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>22 It is ancillary to a dwelling erected on the site</p> <p>23 Allotment boundary setback – not less than 1m</p> <p>24 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>25 Location of filtration system from a dwelling on an adjoining allotment:</p> <p>(a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise</p> <p>(b) not less than 12m in any other case.</p>
<p>Verandah</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay 	<p>41 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>42 It is ancillary to a dwelling erected on the site</p>

<ul style="list-style-type: none"> • Coastal Areas Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Historic Shipwrecks Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Water Resources Overlay 	<p>43 Primary street setback – as far back as the building line of the building to which it is ancillary</p> <p>44 Total floor area - does not exceed 40m²</p> <p>45 Post height - does not exceed 3m measured from natural ground level</p> <p>46 Building height - does not exceed 5m</p> <p>47 Length - does not exceed 10m if any part of the structure abuts or is situated on a boundary of the allotment</p> <p>48 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%.</p>
<p>Water tank (above ground)</p> <p>Except where any of the following apply</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Historic Shipwrecks Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Native Vegetation Overlay • State Significant Native Vegetation Overlay • River Murray Flood Plain Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>16 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>17 The tank is part of a roof drainage system</p> <p>18 Total floor area - not exceeding 15m²</p> <p>19 The tank is located wholly above ground</p> <p>20 Tank height – does not exceed 4m above natural ground level</p> <p>21 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>22 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.</p>
<p>Water tank (underground)</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Preservation District Overlay • Coastal Areas Overlay • Historic Shipwrecks Overlay 	<p>3 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>4 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 4 –Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusions
Industry	Light industry
Shop	Where: (i) the gross leasable floor area is no more than 500m ² , other than a bulky goods outlet: or (j) it is a restaurant.

Assessment Provisions

Desired Outcomes (DO)

DO 1

A range of tourist accommodation and associated services and facilities that enhance visitor experiences and enjoyment.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Tourist accommodation and a range of complementary entertainment, recreation and service activities catering to the needs and enjoyment of travellers.

DTS/DPF1.1

Development comprises one or more of the following land uses:

- Advertisement
- Amenity block, including shower, toilet and laundry facilities
- Caravan park
- Coast protection works
- Dwelling ancillary to tourist accommodation
- Indoor recreation facility
- Office ancillary to tourist accommodation
- Recreation facility
- Shop
- Spa pool
- Swimming pool
- Tourist accommodation
- Tourist information centre.

PO 1.2

Shops complement tourist accommodation and recreational activities to provide services and amenities to travellers at a scale that maintains the tourism values at the relevant location.

DTS/DPF1.2

Shop:

- a. is not a bulky goods outlet;
- b. is in the form of a restaurant ancillary to and in association with tourist accommodation on the same allotment; or
- c. other than a restaurant, has a gross leasable floor area not exceeding 250m² where ancillary to another building used for non-residential purposes on the same allotment.

PO 1.3

Offices are associated with and ancillary to tourist accommodation or non-residential development to support the management and operational aspects of tourist development.

DTS/DPF1.3

Office:

- (a) is ancillary to and located on the same allotment as tourist accommodation; and
- (b) has a gross leasable floor area not exceeding 50m².

PO 1.4

Dwellings are in the form of manager or caretaker residence to support the efficient management and maintenance of tourist accommodation and related facilities.

DTS/DPF1.4

Dwelling:

- (i) is ancillary to and located on the same allotment as tourist accommodation; and
- (j) will not result in more than one dwelling on an allotment.

Land Division

PO 2.1

Land division, including boundary realignments, support:

- a. a range of tourist accommodation, recreation, entertainment and community activities; and
- b. pedestrian and bicycle access between attractions within and adjacent to the zone.

DTS/DPF 2.1

None are applicable.

Advertisements

PO 3.1

Freestanding advertisements are not visually dominant within the locality.

DTS/DPF /DPF 3.1

Freestanding advertisements:

- (a) do not exceed 2m in height above natural ground level and do not have a face that exceeds 2m² where;
 - (i) located adjacent to a road that is not an arterial road;
 - (ii) associated with tourist accommodation comprising up to 10 guest suites; or
 - (iii) associated with a non-residential use, other than tourist accommodation, with a gross leasable floor area up to 150m²; or
- (b) in any other case, do not exceed 4m in height above natural ground level and do not have a face that exceeds 4m².

Procedural Matters

Notification

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as "all other code assessed development" Specific Use (Tourism Development) Zone Table 3
- (c) restaurant located within 30m of an existing dwelling on land in other ownership.

Urban Activity Centre Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
<p>Air handling unit, air conditioning system or exhaust fan including any associated components and any associated building alteration or addition necessary or incidental to its installation</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>22 The item will be installed on or within an existing building</p> <p>23 The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire.</p> <p>24 If the associated building is in a Local Heritage Area Overlay or State Heritage Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.</p>
<p>Internal building work</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>15 There will be no increase in the total floor area of the building</p> <p>16 There will be no alteration to the external appearance of the building.</p>
<p>Shade sail</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Airport Building Heights (Regulated) Overlay • Building Near Airfields Overlay • Defence Aviation Area Overlay • Local Heritage Place Overlay • Historic Area Overlay • River Murray Tributaries Area Overlay • Murray Darling Basin Overlay 	<p>57 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>58 Shade sail consists of permeable material</p> <p>59 The total area of the sail - does not exceed 40m²</p> <p>60 No part of the shade sail will be:</p> <p>(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</p> <p>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</p> <p>61 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>62 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p>

<ul style="list-style-type: none"> • State Heritage Place Overlay • State Heritage Area Overlay 	<p>63 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted)</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • State Heritage Area Overlay • State Heritage Place Overlay • Local Heritage Place Overlay 	<p>25 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>26 Panels and associated components do not overhang any part of the roof</p> <p>27 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (underground)</p>	<p>18 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>19 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 2 – Deemed-to-Satisfy Development Classification

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.			
	Zone	General Development Policies	Subzone (applies only in the area affected by the Subzone)	Overlay (applies only in the area affected by the Overlay)

Class of Development	Applicable Policies The following policies are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusions
<u>Industry</u>	<u>Light Industry</u>

Assessment Provisions

Desired Outcome (DO)

DO 1

A cohesive and legible environment supporting a broad spectrum of regional level business, shopping, entertainment and recreational facilities that can cater for large crowds, smaller social gatherings and events over extended hours.

DO 2

Primary business, shopping and entertaining areas are integrated with public transport facilities, pedestrian and cycling networks, and community transport infrastructure, and designed to enhance the quality of the public realm.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Shops, offices, entertainment, health, education and recreation related uses supplemented by other complementary businesses that provide a comprehensive range of goods and services to the region.

DTS 1.1

None are applicable.

PO 1.2

Facilities within the centre sited and designed with a view to promoting after-hours use to reinforce the centre as the focus of social activity.

DTS 1.2

None are applicable.

PO 1.3

Residential development does not prejudice the operation of existing non-residential development and the long term provision of services and facilities for wider community benefit.

DTS 1.3

None are applicable.

PO 1.4

Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities and contribute to making streets and pedestrian thoroughfares pleasant and lively places.

DTS 1.4

Dwellings are located at upper levels of buildings with non-residential uses located at ground level.

PO 1.5

Where residential development is appropriate having regard to other performance outcomes of the zone, residential development achieves medium-to-high densities.

PO 1.5

Residential development achieves a minimum net density of 35 dwelling units per hectare.

PO 1.6

Bulky goods outlets are sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.

DTS/DPF 1.6

Bulky goods outlets with a gross leasable area of 500m² or more are located towards the periphery of the zone.

Built Form and Character

PO 2.1

Development throughout the zone that integrates with existing development through building scale, connections and complementary land uses.

DTS 2.1

None are applicable.

PO 2.2

Development integrated with existing or planned public or community transport interchanges and networks.

DTS 2.2

None are applicable.

PO 2.3

Buildings are sited and designed to create pedestrian, vehicular, open space and visual linkages between the various built-form elements within the zone and adjoining main roads and thoroughfares.

DTS 2.3

None are applicable.

PO 2.4

Vehicular access points and car parks are coordinated and consolidated to enable the shared use of parking spaces.

DTS 2.4

None are applicable.

PO 2.5

Development promotes the use of pedestrian and cyclist connections to centre facilities and services.

DTS 2.5

None are applicable.

PO 2.6

Buildings and facilities are sited and designed to provide an active frontage to the public realm, contributing to streetscapes and spaces that encourage social interaction.

DTS / DPF 2.6

Not less than 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.

Building height and setbacks

PO 3.1

Medium rise development, with the highest intensity of built form at the centre of the zone, and lower scale at the peripheral zone interface.

DTS/DPF 3.1

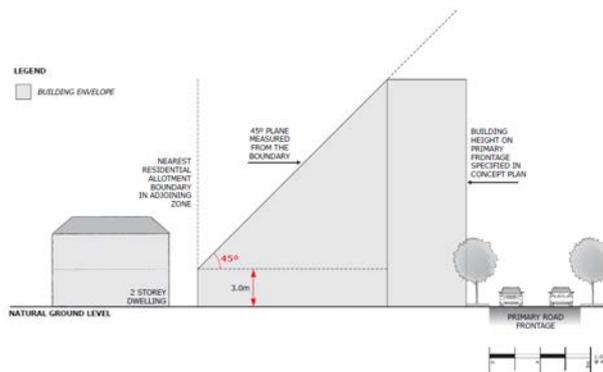

Building height is not greater than any maximum, or less than any minimum, specified in the Maximum Building Height Levels Technical and Numeric Variation Overlay, the Maximum Building Height Metres Technical and Numeric Variation Overlay, or the Minimum Building Height Levels Technical and Numeric Variation Overlay.

PO 3.2

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS/DPF 3.2

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.3 will apply, or where this boundary is the primary street boundary):

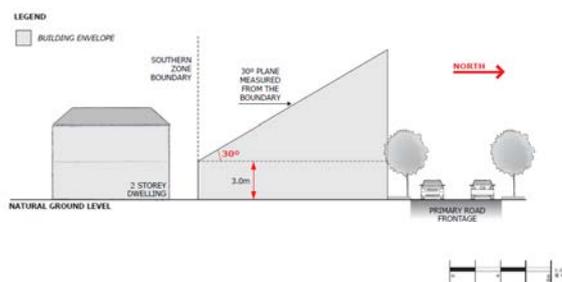

PO 3.3

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS / DPF 3.3

Buildings on sites with a southern boundary adjoining a residential allotment within a neighbourhood zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

Land Division

PO 4.1

Land division that creates allotments that vary in size and are suitable for a variety of business and community facilities.

DTS 4.1

None are applicable.

Advertisements

PO 5.1

Freestanding advertisements that identify the associated business without creating a visually dominant element within the locality.

DTS 5.1

Freestanding advertisements that:

- (f) do not exceed 10m in height; and
- (g) do not have a sign face that exceeds 8m² per side.

Vehicle parking

PO 6.1

Vehicle parking areas are sited and designed to minimise visual dominance when viewed from the public realm.

PO 6.1

Vehicle parking areas are sited above or below street level, in decked or basement parking.

Concept Plans

PO 7.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within the *Concept Plans Technical and Numeric Variation Overlay*.

DTS 7.1

None are applicable

Procedural Matters (PM)

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (d) development defined as 'all other code assessed development' in Urban Activity Centre Zone Table 3
- (e) within the Port Adelaide Centre Subzone, the following classes of development:
 - (i) construction of a building which fails to comply with Port Adelaide Centre Subzone DTS 3.2)
 - (ii) a freestanding advertisement with a height greater than 10 metres
 - (iii) a telecommunications facility exceeding 30 metres in height and located within 100 metres of a neighbourhood zone;
 - (iv) development on a site located adjacent a dwelling within a neighbourhood none which comprises the construction of or change of use to a retail fuel outlet, educational establishment, emergency services facility, entertainment venue, hospital, hotel, light industry
- (f) in all other parts of the Zone, development on a site located adjacent a dwelling within a neighbourhood none which comprises:

- (i) construction of a building which fails to comply with DTS 3.1 to 3.3 (inclusive); or
- (ii) the construction of or change of use to a retail fuel outlet, educational establishment, emergency services facility, entertainment venue, hospital, hotel, light industry.

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Port Adelaide Centre Subzone

Assessment Provisions

Desired Outcomes (DO)

DO 1

Development of tourism, cultural and recreational facilities related to Port Adelaide's unique maritime and commercial heritage and character, and promotion of the zone as a major State tourism destination.

DO 2

A more intense optimal use of vacant and under-utilised land, buildings and the inner harbour of the Port Adelaide River.

DO 3

The conservation and enhancement of items and areas of significance to the zone's unique maritime and commercial heritage, townscape, waterscape and landscape character.

DO 4

A substantial increase in the number of residential dwellings, resident population and provision of accommodation and services for a wide range of people and household types in appropriate areas.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Development is located, staged and designed such that vacant or under-utilised land and buildings are redeveloped or reused for more appropriate uses.

DTS 1.1

None are applicable.

PO 1.2

Land is generally developed in accordance with Concept Maps Part-6, with land uses generally in accordance with the following table:

Concept Map	Envisaged land uses
Cruickshank's Corner	Tourism and commercial development, with links to public open space, the public waterfront promenade and shore area
Dock One	Medium to high density residential development that includes mixed uses at ground floor level Small craft mooring facilities

Concept Map	Envisaged land uses
East End	Northern and south western parts: Offices, consulting rooms and similar uses that are suited to the conversion or rehabilitation of historic buildings in this area. Old Port Dock Railway Station and yards: tourism, museum uses and car parking, with sites fronting St Vincent Street and Lipson Street primarily office, commercial and institutional uses Southern part: Light industry, service industry, warehouse
Fletcher's Slip	Medium to high density residential dwellings Small scale marine related businesses and tourism activity
Hart's Mill	Areas fronting Vincent Street: Tourist accommodation and tourist or commercial uses at ground level Adjacent to the waterfront: Residential dwellings and mixed uses
Mainstreet	Small scale shops, offices, showrooms and consulting rooms Residential development integrated above ground floor envisaged uses.
McLaren's Wharf	Mixed tourism, retail, office, recreational, educational and residential development of diverse character which capitalises on its access to the waterfront. Development overlooking the Port Adelaide River: medium density to high density residential development.
North West	Medium to high density residential and small scale mixed use activities including some small scale tourist accommodation Areas over water: ground level non-residential purposes including retail, tourism and commercial uses
Old Port Reach	Medium to high-density residential development, including affordable housing
Port Adelaide State Heritage Area	Civic and administrative uses, small-scale offices, shipping agents and related commercial uses, and tourist facilities compatible with the area's historic townscape character.
Port Approach	Light industrial and commercial activities with opportunities for tourist infrastructure such as the maritime museum, tourist accommodation, offices, low impact commercial activities, and residential and mixed use development adjacent Dock One. Development to the south of the Port River Expressway: residential and mixed use development, commercial, office and tourist activities. Industrial development should not occur south of the road and rail bridges nearby residential activities.
Railways	Railway activities and associated commercial and industrial uses.
Retail Core	Major supermarkets and discount department stores, together with associated specialty shops, consulting rooms, offices and community service facilities. Medium to high-density residential development located above active ground floor uses
Southern Approach	Retail, showrooms, commercial, institutional development North-western part of the area: residential development.
Southern Gateway	Offices, commercial, showrooms, service trade premises and shops. Medium to high density residential development, including affordable housing, on sites in close proximity to major public transport facilities.
West	medium to high density residential development with associated open space areas and mixed use activities including some small-scale tourist accommodation
Woolstores	Low impact commercial, warehouse and storage activities Residential development where compatible with nearby land uses. Light industry, service industry and home industry in the area to the south of Brock Street.

DTS 1.2

None are applicable.

PO 1.3

Land adjacent to the Port Adelaide River not required for port or shipping activities is progressively redeveloped for a range of the following uses where consistent with the intent of Concept Plans X-X:

- a) community uses
- b) medium and higher density residential uses
- c) recreation
- d) tourism
- e) office
- f) retail.

DTS 1.3

None are applicable.

PO 1.4

Recreational and tourism development, such as the following, are developed on the Port Adelaide River in locations where boating and harbour activities can be undertaken safely and conveniently:

- a) marinas

- b) maritime museum uses
- c) ferry services
- d) water taxis.

DTS 1.4

None are applicable.

PO 1.5

Residential development adjacent the rail corridor as shown on Concept Plans X-X (East End, Port Approach, Concept Railways, Southern Approach, Southern Gateway, West, and Woolstores) has regard to existing and possible future noise sources with respect to site layout, orientation, design and construction to ensure a safe and comfortable residential environment and to minimise conflict with existing non-residential activities.

DTS 1.5

None are applicable.

PO 1.6

Tourist development is primarily situated adjacent to and on the Port Adelaide River and associated public promenade.

DTS 1.6

None are applicable.

PO 1.7

Major shops and groups of shops are concentrated within the areas constituting the 'Mainstreet' and 'Retail Core' Concept Plans.

DTS 1.7

None are applicable.

PO 1.8

Residential accommodation at medium and higher densities where it can be demonstrated that it is compatible with, and does not prejudice, the operation of non-residential activities within this or adjacent zones.

DTS 1.8

None are applicable.

PO 1.9

Public open space is provided in a variety of forms including a publicly accessible waterfront promenade, public reserves and public plazas.

DTS 1.9

None are applicable.

PO 1.10

Large landscaped or other open areas fronting on to Commercial Road and St Vincent Street are not developed.

DTS 1.10

None are applicable.

Built form and character

PO 2.1

Development is compatible with and reinforces the historical townscapes within the subzone by respecting, but not mimicking, existing 19th century building forms and townscapes of significance.

DTS 2.1

None are applicable.

PO 2.2

Development within the areas for 'Townscape Conservation' shown on Concept Plan Map X should conserve and enhance the existing 19th and early 20th century building forms.

DTS 2.2

None are applicable.

PO 2.3

Buildings are situated close to or abutting street frontages, particularly on corner sites, to reinforce the prevailing townscape character within the subzone.

DTS 2.3

None are applicable.

PO 2.4

Development is sited to provide view lines and reinforce existing vistas indicated on Concept Plan Y [Key Visual Elements]

View corridors:

- (a) take the form of one or more of the following:
 - (i) public road reservations
 - (ii) public reserves
 - (iii) wider spaces between buildings
- (b) incorporate pedestrian linkages
- (c) have a minimum width of 17.5 metres if identified as a major view corridor
- (d) have a minimum width of 12 metres if identified as a minor view corridor.

DTS 2.4

None are applicable.

PO 2.5

The siting, form and scale of buildings on corner sites:

- (a) increases the presence of built form on street intersections
- (b) addresses both street frontages
- (c) minimises unusable open space on the street frontages.

DTS 2.5

None are applicable.

PO 2.6

Street furniture, including lighting, advertisements, advertising hoardings, litter bins, seats, bicycle parking facilities and bollards, are designed and located so as to complement the townscape character of the area and respond to its maritime locality.

DTS 2.6

None are applicable.

PO 2.7

Development abutting St Vincent Street, Commercial Road, Church Place and Dale Street, public spaces and pedestrian malls indicated on Concept Plan Map Z [Key Visual Elements] has facades of no less than two storeys.

DTS 2.7

None are applicable.

PO 2.8

Materials reflect and reinforce the historic, maritime character of the subzone wherever practicable.

DTS 2.8

None are applicable.

PO 2.9

Development adjacent to the public promenade, public plazas, public reserves, main roads and edges of public spaces is designed to:

- (a) maintain an active interface through architectural detail and interest in skyline and pedestrian levels
- (b) provide active street frontages at ground level with land uses such as cafes, restaurants, local shops and home offices that contribute to the vibrancy and diversity of the area
- (c) maintain the continuity of streetscape with streets and public spaces defined by consistent building frontages at the street alignment
- (d) maximise solar access and limit overshadowing of these areas
- (e) protect the amenity of residents at ground level
- (f) protect pedestrian amenity
- (g) provide for varied and attractive building elevations.

DTS 2.9

None are applicable.

PO 2.10

Landmark buildings as indicated on Concept Plans X-X are designed to:

- (a) preserve a pleasant pedestrian environment
- (b) create consistent building frontages at the street, plaza or promenade alignment
- (c) assist to deflect wind downdrafts from penetrating to street level plazas and promenades.
- (d) be exemplary in their design quality and enhance the locality with architectural elements characteristic of the Port Adelaide, heritage buildings and waterfront environment.

DTS 2.10

None are applicable.

PO 2.11

Development facilitates the provision of a continuous pedestrian and cyclist 'Inner Harbour Ring Route' including connections to nearby bicycle routes, schools and stations shown on the following Concept Maps X-X:

- Cruickshank's Corner
- Dock One
- Fletcher's Slip
- Hart's Mill
- Mainstreet
- McLaren's Wharf
- North West
- Old Port Reach

- Port Approach
- West

DTS 2.11

None are applicable.

PO 2.12

Waterfront development is designed and sited to allow for future potential flood mitigation measures such as the creation of sea walls or levees that will provide protection from stormwater and seawater flooding in a consistent and integrated manner.

DTS 2.12

None are applicable.

PO 2.13

Buildings greater than three storeys provide human scale street frontages through one or more of the following methods:

- a) stepped reduction of building heights towards street frontages
- b) use of the podium level
- c) use of secondary/adjoining building elements to the street.

DTS 2.13

None are applicable.

Building height

PO 3.1

Buildings are designed to reflect the street wall heights and horizontal elements of adjacent buildings by reinforcing:

- (a) the prevailing datum heights, including parapet levels, balconies or distinguishing elements such as verandas and canopies at the street level; and
- (b) a distinction of levels below and above prevailing horizontal elements through architectural expression.

DTS 3.1

None are applicable.

PO 3.2

Building height reflects the form envisaged by Concept Plans

DTS/DPF 3.2

Buildings do not exceed the number of building levels as indicated on Concept Plans.

Land Division

PO 4.1

Development is sited to ensure that original grid street layouts within the centre are retained and wherever possible, re-established.

DTS 4.1

None are applicable.

PO 4.2

Roads and reserves are of sufficient width to cater for the projected traffic volumes and to provide for safe and convenient vehicle access, pedestrian environment, and on-street car parking.

DTS/DPF 4.2

Road types and road reserve widths are provided in accordance with the following table:

Road type	Maximum 24-hour traffic volume (vehicles)	Road reserve width (metres)	Carriageway width (metres)
Bus Route (Major Collector)	Over 3000	23.2 (including bike lanes)	7 (takes into account provision for parallel car parking provided both sides)
Bus Route (Minor Collector)	1500-3000	20.2	7 (takes into account provision for parallel car parking provided both sides)
Major Collector	Over 3000	19.2 (22 with bike lanes)	6
Minor Collector	1500-3000	16.1	7.5
Local Street	500-1500	15	7
Local Street with rear lane access	0-1500	14 (provides for indented car parking)	5.5
Local public road less than 60m in length and not contiguous with a road of lesser dimension than prescribed above	Less than 500	12.4	5

Vehicle parking and access

PO 5.1

Car parking areas, including decked car parking:

- (a) do not intrude upon, or interrupt the continuity of built-form desired along major street frontages in the subzone
- (b) do not detract from areas of architectural or townscape value.
- (c) in relation to multi-level car parking, are designed as buildings that contribute to the desired built form character include ground level uses adjacent to street frontages, such as offices, shops and tourist development.

DTS 5.1

None are applicable.

PO 5.2

On-street parking provided for detached, semi-detached and row dwellings to cater for anticipated demand.

DTS/DPF 5.2

Development of detached, semi-detached or row dwellings provides on-street parking at the rate of 0.3 spaces per dwelling within the following areas as delineated on Concept Maps X-X:

- a. Cruickshank's Corner
- b. Dock One
- c. Fletcher's Slip
- d. McLaren's Wharf
- e. North West
- f. Old Port Reach
- g. Port Approach
- h. West

PO 5.3

Garages and carports associated with residential development are sited and designed to minimise visual dominance on the streetscape and views of the dwelling from the street.

DTS/DPF 5.3

Garages or carports do not obtain direct access from or face the primary street.

Waterfront development

PO 6.1

Development creates and enhances a public promenade with a minimum width of 8 metres along the waterfront that achieves:

- (a) continuous public pedestrian and cyclist access
- (b) convenient, safe and attractive linkages between sections in areas of high pedestrian or cycle traffic and in front of key tourism uses
- (c) allowance for infrastructure provision and flood mitigation including a sea wall or levee.

DTS 6.1

None are applicable.

PO 6.2

Public plazas and public reserves are provided adjacent to the pedestrian promenade to provide for larger outdoor public events and gathering spaces adjacent to the waterfront in accordance with Concept Plans X-X.

DTS/DPF 6.2

Public reserves and plazas have a minimum area of:

- (a) In the case of public reserves: 2000 square metres (other than those located within the Fletcher's Slip Concept Plan X); or
- (b) In the case of public plazas: 1500 square metres (and where a public plaza abuts a promenade, the area of the promenade is included in calculation of the plaza area for the length that the promenade abuts the plaza).

PO 6.3

Development is sited to take advantage of waterfront views and activities.

DTS 6.3

None are applicable.

PO 6.4

Marinas, wharfs, jetties, piers or boat moorings:

- (a) provide permanent and temporary docking facilities for residents and the public;

- (b) provide moorings suitable to a variety and varying sizes of watercraft and vessels;
- (c) provide a visually stimulating environment;
- (d) add vitality and maritime activity to waterfront areas;
- (e) provide a continuation (literal or thematic) of the historic maritime uses of the Port;
- (f) maintain a strong link and physical integration between the Port Adelaide River and land based public reserves, plazas, promenades and other public and private features comprising the waterfront;
- (g) integrate with development built directly on or over the river;
- (h) avoid or minimise any negative impacts on:
 - (i) natural riverine ecology and processes
 - (i) dolphin safety within the dolphin sanctuary area
 - (ii) riverine or other water quality; and
 - (iii) ensure that any mechanical and electrical equipment and power outlets are safe from flooding or raised to a level not lower than 3.65 metres Australian Height Datum (AHD).

DTS 6.4

None are applicable.

PO 6.5

Development along the waterfront comprises bold, robust architectural forms with articulated and modelled facades and materials which reflect the character of older maritime/industrial buildings nearby.

DTS 6.5

None are applicable.

PO 6.6

Development encourages and facilitates the provision of a continuous 'Major Pedestrian/Cycle Path' and 'Inner Harbour Ring Route' public promenade including connections to nearby bicycle routes, schools and stations as shown on Concept Plans 'Port Adelaide Centre Traffic and Transport' and "McLaren's Wharf".

DTS 6.6

None are applicable.

PO 6.7

Marinas, wharfs, jetties, piers or boat mooring facilities and associated development provide for:

- (a) serviced moorings to allow for floating retail activity
- (b) functional requirements of public transport and water navigation including berthing and wharf facilities for ferry and water taxi stopping points that are coordinated with land based services
- (c) modal interface with land-based public and private transport services and infrastructure
- (d) connection to shore-based service requirements and support facilities such as boat repair and servicing, amenities, accommodation and shelter structures.

DTS 6.7

None are applicable.

Urban Corridor (Boulevard) Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
<p>Air handling unit, air conditioning system or exhaust fan including any associated components and any associated building alteration or addition necessary or incidental to its installation</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Place Overlay 	<p>1 The item will be installed on or within an existing building</p> <p>2 The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire.</p> <p>If the associated building is in a Local Heritage Area Overlay or State Heritage Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.</p>
<p>Internal building work</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>5 There will be no increase in the total floor area of the building</p> <p>6 There will be no alteration to the external appearance of the building.</p>
<p>Shade sail</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Hazards (Flooding) Overlay • Character Area Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Sloping Land Overlay 	<p>36 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>37 Shade sail consists of permeable material</p> <p>38 The total area of the sail - does not exceed 40m²</p> <p>39 No part of the shade sail will be:</p> <p>(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</p> <p>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</p> <p>40 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p>

	<p>41 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p> <p>42 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • A Local Heritage Place identified in the Local Heritage Place Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>28 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>29 Panels and associated components do not overhang any part of the roof</p> <p>30 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (underground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Sloping Land Overlay 	<p>5 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>6 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 2 – Deemed-to-Satisfy Development Classification

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exceptions
Industry	Light Industry
Shop	Restaurant Shop with a gross leasable floor area less than 4000m²

Assessment Criteria (AC)

Desired Outcomes (DO)

DO 1

Buildings that achieve a consistent, tall, uniform facade to frame the primary road corridor generally well set back with areas of significant open space. Buildings accommodate a mix of compatible residential and non-residential uses including contain small scale shops and mixed business development at ground and lower floor levels with residential land uses above.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

A vibrant mix of land uses adding to the vitality of the area and extend activities outside shop hours including restaurants, educational, community and cultural facilities and visitor and residential accommodation.

DTS/DPF 1.1

(a) Development comprises one or more of the following land uses:

- (a) Apartments
- (b) Child Care Centre
- (c) Consulting Room
- (d) Dwelling
- (e) Educational Establishment
- (f) Hotel
- (g) Licensed Entertainment Premises
- (h) Licensed Premises
- (i) Office
- (j) Residential Flat Building
- (k) Restaurant
- (l) Shop
- (m) Supported Accommodation
- (n) Student Accommodation
- (o) Tourist Accommodation

PO 1.2

Shops, offices and consulting rooms that provide a range of goods and services to the local community and the surrounding district.

DTS/DPF 1.2

Shop, office or consulting room uses not exceeding a maximum gross leasable floor area of 2,000m² in a single building.

PO 1.3

Dwellings developed in conjunction with non-residential uses that positively contribute to making the public realm of the primary road corridor, open space frontage and pedestrian thoroughfares safe, walkable, comfortable, pleasant and vibrant places.

DTS/DPF 1.3

Dwellings in mixed use buildings to be located at the upper floor levels of buildings.

PO 1.4

Development of medium to high density accommodation options either as part of a mixed use development or wholly residential development.

DTS/DPF 1.4

Residential development (other than residential development in a mixed use building) achieves a minimum net residential density of at least 75 dwellings per hectare.

PO 1.5

Ground floor uses positively contribute to an active primary road corridor and open space frontage.

DTS/DPF 1.5

Shop, restaurant, office, or consulting room uses located on the ground floor level of mixed use buildings.

Built Form and Character

PO 2.1

Buildings contribute to a consistent framing of the primary road corridor, open space and public spaces and provide visual relief from building mass at street level.

DTS/DPF 2.1

Buildings:

- (a) include a clearly defined podium or street wall with a maximum building height of 2 building levels or 8 metres in height; and
- (b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.

PO 2.2

Buildings are adaptable and flexible to suit a range residential and non-residential of land uses.

DTS/DPF 2.2

The ground floor of buildings contain a minimum floor to ceiling height of 3.5m.

PO 2.3

Buildings designed to create visual connection between the public realm and ground level interior, to ensure an active interface with the primary street frontage and maximise passive surveillance.

DTS/DPF 2.3

Minimum 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.

PO 2.4

Building height consistent with the form expressed in the *Maximum Building Height Levels Technical and Numeric Variation Overlay* and the *Maximum Building Height Metres Technical and Numeric Variation Overlay* and positively responds to the local context including the site's frontage, depth, and adjacent primary corridor or street width.

DTS/DPF 2.4

Building height is not greater than any maximum, or less than any minimum, specified in the *Maximum Building Height Levels Technical and Numeric Variation Overlay*, the *Maximum Building Height Metres Technical and Numeric Variation Overlay*, or the *Minimum Building Height Levels Technical and Numeric Variation Overlay*.

PO 2.5

Buildings setback from the primary street boundaries to provide a consistent streetscape edge with generous landscaping and tall articulated building facades.

DTS/DPF 2.5

Buildings setback from the primary street frontage in accordance with either of the following (whichever is the lesser):

- (a) not less than 6m; or
- (b) the average of the setback of the existing building on each adjoining site fronting the same street.

PO 2.6

Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.

DTS/DPF 2.6

Buildings setback from a secondary street frontage not less than 2m.

PO 2.7

Buildings set back from side boundaries (other than street and zone boundaries) to provide separation between buildings in a way that complements the established character of the locality and enables access to natural sunlight and ventilation for neighbouring buildings.

DTS/DPF 2.7

Buildings with no window/s or balcony/s fronting the boundary, setback from side boundaries as follows:

- (a) no minimum on the boundary, within the first 18m from the front property boundary for any building level;
- (b) no minimum for remaining length for ground level only; and
- (c) 2m for 1st level and above for building parts more than 18 metres from the front property boundary.

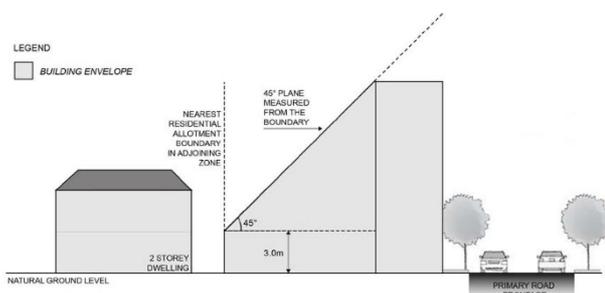

PO 2.8

Buildings set back from rear boundaries (other than street boundaries) to minimise negative impacts on neighbouring properties, including access to natural sunlight and ventilation.

DTS/DPF 2.8

Buildings setback from rear boundaries as follows:

- (a) 5m or more where the subject land directly abuts an allotment of a different zone; or
- (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 2.9

Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.

DTS/DPF 2.9

Buildings setback from the rear access way:

- (a) no requirement where the access way is not less than 6.5m wide; or
- (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

Interface Height

PO 3.1

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS/DPF 3.1

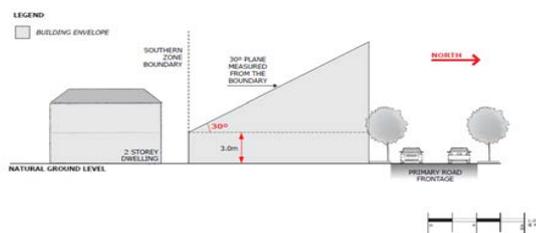

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.2 will apply, or where this boundary is the primary street boundary):

PO 3.2

Buildings designed to minimise overshadowing of sensitive receivers in the Suburban Neighbourhood Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS/DPF 3.2

Buildings constructed within a building envelope provided by a 30 degree plane grading north, measured from a height of 3m above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram:

Significant Development Sites

PO 4.1

Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor and over 2500m² in area, which may include one or more allotment) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

DTS/DPF 4.1

Development on significant development sites up to 30% above the maximum building height specified in DTS/DPF 2.4 where it:

- (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area;
- (b) includes more than 15% of dwellings as affordable housing; or
- (c) includes at least:
 - i. three of the following:
 - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street;
 - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site;
 - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind;
 - D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments;
 - E. a child care centre; and
 - ii. three of the following sustainable design measures are provided:
 - A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance;
 - B. living landscaped vertical surfaces of at least 50m² supported by services that ensure ongoing maintenance;
 - C. passive heating and cooling design elements including solar shading integrated into the building;
 - D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.

PO 4.2

Development on a significant development site designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.

DTS/DPF 4.2

Development that:

- (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 3.1 and 3.2;
- (b) locates non-residential activities and higher density elements towards the primary road corridor;
and
- (c) locates taller building elements towards the primary road corridor.

Movement, parking and access

PO 5.1

Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.

DTS/DPF 5.1

Vehicular access to be provided:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones; or
- (b) where it consolidates or replaces existing crossovers.

PO 5.2

Development is designed to ensure car parking is located avoid negative impacts on the primary corridor streetscape.

DTS/DPF 5.2

Vehicle parking garages located behind buildings away from the primary main street frontage.

Procedural Matters (PM)

Notification of Performance assessed development

All classes of development are excluded from notification except where it involves any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as "all other code assessed development" in Urban Corridor (Boulevard) Zone Table 3
- (c) development exceeding the maximum building height specified in DTS/DPF 2.4
- (d) development exceeding the defined building envelope specified in DTS/DPF 3.1 or 3.2
- (e) shop, office or consulting room in excess of the gross leasable floor area specified in DTS/DPF 1.2.

Hard-edged Built Form Sub-Zone

Assessment Criteria (AC)

Desired Outcomes (DO)

DO 1

A Sub-Zone that accommodates a variety of compatible non-residential and residential land uses with built form providing a prominent and continuous interface to frame the primary road corridor.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Built Form and Character

PO 1.1

Development with minimal landscaping to the primary and secondary street frontages with built form providing a prominent and continuous interface to the primary road corridor.

DTS/DPF 1.1

None are applicable.

PO 1.2

Buildings with a zero setback from the primary street boundaries to establish a strongly defined built form presence to the primary road corridor.

DTS/DPF 1.2

Development with a 0 metre setback from the primary street frontage.

Soft-edged Landscaped Sub-Zone

Assessment Criteria (AC)

Desired Outcomes (DO)

DO 1

A Sub-Zone that accommodates a variety of compatible non-residential and residential land uses providing a transitional soft-edged landscaped frame to the main road corridor.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Built Form and Character

PO 1.1

Development with landscaping provided on primary and secondary road frontages to enhance streetscapes, make a positive contribution to the public realm and provide a more amenable pedestrian environment adjacent to the road corridor.

DTS/DPF 1.1

None are applicable.

PO 1.2

Buildings with shallow front setbacks from the primary street boundaries to transition the character of the primary road corridor to a more open and landscaped environment.

DTS/DPF 1.2

Development with a 3 metre setback from the primary street frontage.

Urban Corridor (Business) Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
Internal building work Except where any of the following apply: <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	7 There will be no increase in the total floor area of the building 8 There will be no alteration to the external appearance of the building.
Shade sail Except where any of the following apply: <ul style="list-style-type: none"> • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Sloping Land Overlay 	43 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 44 Shade sail consists of permeable material 45 The total area of the sail - does not exceed 40m ² 46 No part of the shade sail will be: <ul style="list-style-type: none"> (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 47 Primary street setback – at least as far back as the building line of the building to which it is ancillary 48 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m 49 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: <ul style="list-style-type: none"> • Historic Area Overlay 	31 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 32 Panels and associated components do not overhang any part of the roof

<ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>33 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (underground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Sloping Land Overlay 	<p>7 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>8 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusion
Industry	Light Industry
Shop	Restaurant Shop with a gross leasable floor area less than 1000m²

Assessment Criteria (AC)

Desired Outcomes (DO)

DO 1

A medium rise mixed use zone with a strong focus on employment, which accommodates a diverse range of commercial and light industrial land uses together with compatible medium density residential development oriented towards a primary road corridor.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

A diverse range of employment land uses, educational and community facilities in conjunction with residential accommodation.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Apartments
- Child Care Centre
- Consulting Room
- Dwelling
- Educational Establishment
- Hotel
- Licensed Entertainment Premises
- Licensed Premises
- Office
- Residential Flat Building
- Retail Fuel Outlet
- Restaurant
- Service Industry
- Service Trade Premises
- Shop
- Store
- Student Accommodation
- Supported Accommodation
- Tourist Accommodation
- Warehouse

PO 1.2

A range of small to medium scale non-residential uses, services and facilities such as shops, offices and consulting rooms that meet the day to day needs of the local community.

DTS/DPF 1.2

Shop, office or consulting room uses not exceeding a maximum gross leasable floor area of 500m².

PO 1.3

Development of non-residential uses such as educational facilities, child care facility, health and welfare services to service the local community as well as a wider catchment.

DTS/DPF 1.3

None are applicable.

PO 1.4

Dwellings primarily developed in conjunction with non-residential uses to support local business, activities and contribute to making the primary road corridor and pedestrian thoroughfares safe, walkable, comfortable, pleasant and vibrant places.

DTS/DPF 1.4

Dwellings developed in conjunction with non-residential uses sited:

- (a) at upper levels of buildings with non-residential uses located at ground level; or
- (b) behind non-residential uses on the same allotment.

PO 1.5

Ground floor uses positively contribute to an active primary road corridor.

DTS/DPF 1.5

Shop, restaurant, office, or consulting room uses located on the ground floor level of mixed use buildings.

PO 1.6

Residential accommodation sited and designed to not impede ongoing operations of existing commercial activity.

DTS/DPF 1.6

None are applicable

Built Form and Character

PO 2.1

Buildings are adaptable and flexible to suit a range residential and non-residential of land uses.

DTS/DPF 2.1

The ground floor of buildings contain a minimum floor to ceiling height of 3.5m.

PO 2.2

Buildings designed to create visual connection between the public realm and ground level interior, to ensure an active interface with the primary street frontage and maximise passive surveillance.

PO / DPF 2.2

Minimum 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.

PO 2.3

Building height consistent with the form expressed in the *Maximum Building Height Levels Technical and Numeric Variation Overlay* and the *Maximum Building Height Metres Technical and Numeric Variation Overlay* and positively responds to the local context including the site's frontage, depth, and adjacent primary corridor or street width.

DTS/DPF 2.3

Building height is not greater than any maximum, or less than any minimum, specified in the *Maximum Building Height Levels Technical and Numeric Variation Overlay*, the *Maximum Building Height Metres Technical and Numeric Variation Overlay*, or the *Minimum Building Height Levels Technical and Numeric Variation Overlay*.

PO 2.4

Buildings setback from the primary street boundaries to contribute to the consistent established streetscape.

DTS/DPF 2.4

Buildings setback from the primary street frontage (whichever is the lesser):

- (a) not less than 3m; or
- (b) the average of the setback of the existing building on each adjoining site fronting the same street.

PO 2.5

Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.

DTS/DPF 2.5

Buildings setback from a secondary street frontage of not less than 2m.

PO 2.6

Buildings set back from rear boundaries (other than street boundaries) to minimise impacts on neighbouring properties, including access to natural sunlight and ventilation.

DTS/DPF 2.6

Buildings setback from rear boundaries as follows:

- (a) 5m or more where the subject land directly abuts an allotment of a different zone; or
- (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 2.7

Buildings set back from side boundaries (other than street and zone boundaries) to provide separation between buildings in a way that complements the established character of the locality and enables access to natural sunlight and ventilation for neighbouring buildings.

DTS/DPF 2.7

Buildings with no window/s or balcony/s fronting the boundary, setback from side boundaries as follows:

- (a) no minimum on the boundary within the first 18m from the front property boundary for any building level;
- (b) no minimum for remaining length for ground level only; and
- (c) 2m for 1st level and above for building parts more than 18m from the front property boundary.

PO 2.8

Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.

DTS/DPF 2.8

Buildings setback from the rear access way:

- (a) no requirement where the access way is not less than 6.5m wide; or
- (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

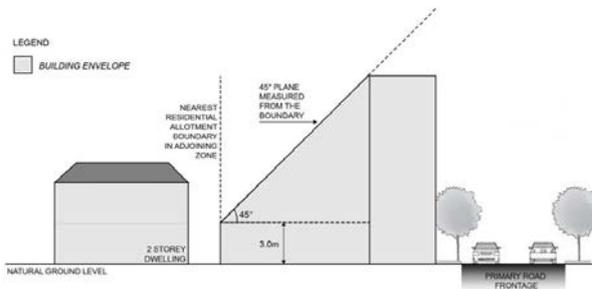

Interface Height

PO 3.1

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS/DPF 3.1

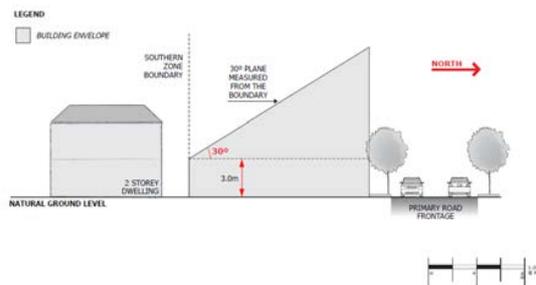

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.2 will apply, or where this boundary is the primary street boundary):

PO 3.2

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS/DPF 3.2

Significant Development Sites

PO 4.1

Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor and over 2500m² in area, which may include one or more allotment) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

DTS/DPF 4.1

Development on significant development sites up to 30% above the maximum building height specified in DTS/DPF 2.3 where it:

- incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area;
- includes more than 15% of dwellings as affordable housing; or
- includes at least:

- i. three of the following:
 - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street;
 - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site;
 - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind;
 - D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments;
 - E. a child care centre; and
- ii. three of the following sustainable design measures are provided:
 - A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance;
 - B. living landscaped vertical surfaces of at least 50m² supported by services that ensure ongoing maintenance;
 - C. passive heating and cooling design elements including solar shading integrated into the building;
 - D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.

PO 4.2

Development on a significant development site (a site with a frontage to a primary road corridor and over 2500m², which may include one or more allotment) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.

DTS/DPF 4.2

Development that:

- (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 3.1 and 3.2;
- (b) locates non-residential activities and higher density elements towards the primary road corridor; and
- (c) locates taller building elements towards the primary road corridor.

Movement, parking and access

PO 5.1

Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.

DTS/DPF 5.1

Vehicular access to be provided:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones; or
- (b) where it consolidates or replaces existing crossovers.

Procedural Matters (PM)

Notification of Performance assessed development

All classes of performance assessed development are excluded from notification except where it involves any of the following:

Notification of Performance assessed development

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as “all other code assessed development” in Urban Corridor (Business) Zone Table 3
- (c) development exceeding the maximum building height specified in DTS / DPF 2.3
- (d) development exceeding the defined building envelope specified in DTS / DPF 3.1 or 3.2
- (e) shop, office or consulting room in excess of the gross leasable floor area specified in DTS / DPF 1.2.

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Urban Corridor (Living) Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
Internal building work Except where any of the following apply: <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<ol style="list-style-type: none"> 1 There will be no increase in the total floor area of the building 2 There will be no alteration to the external appearance of the building.
Shade sail Except where any of the following apply: <ul style="list-style-type: none"> • Coastal Areas Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Sloping Land Overlay 	<ol style="list-style-type: none"> 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2 Shade sail consists of permeable material 3 The total area of the sail - does not exceed 40m² 4 No part of the shade sail will be: <ol style="list-style-type: none"> (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 5 Primary street setback – at least as far back as the building line of the building to which it is ancillary 6 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m 7 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.
Solar photovoltaic panels (roof mounted) Except where any of the following apply: <ul style="list-style-type: none"> • Historic Area Overlay 	<ol style="list-style-type: none"> 1 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof 2 Panels and associated components do not overhang any part of the roof

<ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>3 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (underground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Sloping Land Overlay 	<ol style="list-style-type: none"> 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2 The tank (including any associated pump) is located wholly below the level of the ground.

Table 2 – Deemed-to-Satisfy Development Classification

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusion
Industry (other than a light industry)	
Shop	Restaurant Shop with a gross leasable floor area less than 1000m²

Assessment Criteria (AC)

Desired Outcomes (DO)

DO 1

A mixed use area with a strong living and accommodation focus that provides a diverse range of low to medium rise medium density residential development supported by compatible non-residential land uses oriented towards a primary road corridor, high frequency public transport route, activity centre or significant open space.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

A vibrant mix of land uses adding to the vitality of the area and extend activities outside shop hours including restaurants, educational, community and cultural facilities and visitor and residential accommodation.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

- (a) Advertisement
- (b) Apartments
- (c) Child Care Centre
- (d) Consulting Room
- (e) Dwelling
- (f) Educational Establishment
- (g) Hotel
- (h) Licensed Entertainment Premises
- (i) Licensed Premises
- (j) Office
- (k) Restaurant
- (l) Shop
- (m) Student Accommodation
- (n) Supported Accommodation
- (o) Tourist Accommodation

PO 1.2

A range of small to medium scale non-residential uses, services and facilities such as shops, offices and consulting rooms that meet the day to day needs for the local community.

DTS/DPF 1.2

Shop, office, or consulting room uses not exceeding a maximum gross leasable floor area of 500m², or is contained within an existing building

PO 1.3

Development of diverse medium density accommodation options either as part of a mixed use development or wholly residential development.

DTS/DPF 1.3

Residential development (other than residential development in a mixed use building) achieves a net residential density of at least 45 dwellings per hectare.

Built Form and Character

PO 2.1

Buildings positively contribute to a continuous framing of the primary road / public transport corridor and public realm, and provide visual relief from building scale and massing from the ground level public realm.

DTS/DPF 2.1

Buildings:

- (a) include a clearly defined podium or street wall with a maximum building height of 2 building levels or 8m in height; and
- (b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.

PO 2.2

Building height consistent with the form expressed in the *Maximum Building Height Levels Technical and Numeric Variation Overlay* and the *Maximum Building Height Metres Technical and Numeric Variation Overlay*, and positively responds to the local context including the site's frontage, depth, and adjacent primary corridor or street width.

DTS/DPF 2.2

Building height is not greater than any maximum, or less than any minimum, specified in the *Maximum Building Height Levels Technical and Numeric Variation Overlay*, the *Maximum Building Height Metres Technical and Numeric Variation Overlay*, or the *Minimum Building Height Levels Technical and Numeric Variation Overlay*.

PO 2.3

Buildings setback from the primary street boundaries are consistent with the established streetscape.

DTS/DPF 2.3

Buildings setback from the primary street frontage in accordance with either of the following (whichever is the lesser):

- (a) not less than 4m where the adjoining sites do not contain a building; or
- (b) the average of the setback of the existing building on each adjoining site fronting the same street.

PO 2.4

Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.

DTS/DPF 2.4

Buildings setback from a secondary street frontage not less than 2m.

PO 2.5

Buildings set back from side boundaries (other than street and zone boundaries) to provide separation between buildings in a way that complements the established character of the locality and access to natural sunlight and ventilation for neighbouring buildings.

DTS/DPF 2.5

Buildings with no window/s or balcony/s fronting the boundary, setback from side boundaries as follows:

- (a) no minimum on the boundary, within the first 18m from the front property boundary for any building level;

- (b) no minimum for remaining length for ground level only; and
- (c) 2m or more for 1st level and above for building parts more than 18m from the front property boundary.

PO 2.6

Buildings set back from rear boundaries (other than street boundaries) to:

- (a) minimise negative impacts on neighbouring properties, including access to natural sunlight and ventilation;
- (b) provide open space recreational opportunities; and
- (c) provide space for landscaping and vegetation.

DTS/DPF 2.6

Buildings setback from rear boundaries as follows:

- (a) 5m or more where the subject land directly abuts an allotment of a different zone; and
- (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 2.7

Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.

DTS/DPF 2.7

Buildings setback from the rear access way:

- (a) no requirement where the access way is not less than 6.5m wide; or
- (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

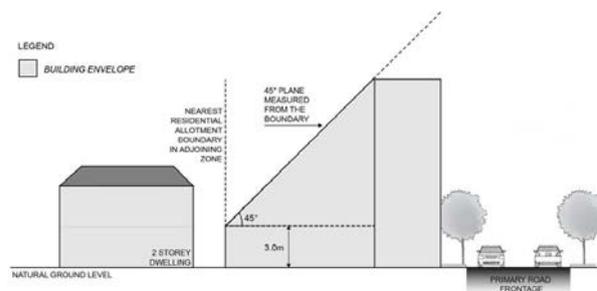

Interface Height

PO 3.1

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS/DPF 3.1

Buildings constructed within a building envelope provided by a 30 degree plane grading north, measured from a height of 3m above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram:

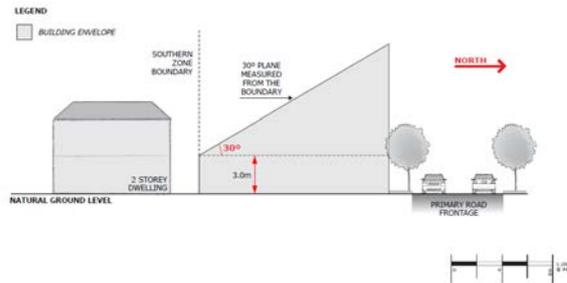

PO 3.2

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS/DPF 3.2

Buildings constructed within a defined building envelope provided by a 30 degree plane grading north, measured from a height of 3m above natural ground level at the southern zone boundary with the Suburban Neighbourhood (Low Density) Zone, Suburban Neighbourhood Zone, or Suburban Neighbourhood (Medium Density) Zone, as shown in the following diagram:

Significant Development Sites

PO 4.1

Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor and over 2500m² in area, which may include one or more allotment) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

DTS/DPF 4.1

Development on significant development sites up to 30% above the maximum building height specified in DTS/DPF 2.2 where it:

- (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area;
- (b) includes more than 15% of dwellings as affordable housing; or
- (c) includes at least:
 - i. three of the following:
 - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street;
 - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site;
 - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind;
 - D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments;
 - E. a child care centre; and
 - ii. three of the following sustainable design measures are provided:
 - A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance;
 - B. living landscaped vertical surfaces of at least 50m² supported by services that ensure ongoing maintenance;
 - C. passive heating and cooling design elements including solar shading integrated into the building;
 - D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.

PO 4.2

Development on a significant development site designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.

DTS/DPF 4.2

Development that:

- (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 3.1 and 3.2;
- (b) locates non-residential activities and higher density elements towards the primary road corridor;
and
- (c) locates taller building elements towards the primary road corridor.

Movement, parking and access

PO 5.1

Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.

PO 5.1

Vehicular access to be provided:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones; or
- (b) where it consolidates or replaces existing crossovers.

PO 5.2

Development is designed to ensure car parking is located avoid negative impacts on the primary corridor streetscape.

PO 5.2

Vehicle parking garages located behind buildings away from the primary main street frontage.

Concept Plans

PO 6.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within the *Concept Plans Technical and Numeric Variation Overlay*.

DTS 6.1

None are applicable

Procedural Matters (PM)

Notification of Performance assessed development

All classes of performance assessed development is excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as “all other code assessed development” in Urban Corridor (Living) Zone Table 3
- (c) development exceeding the maximum building height specified in DTS / DPF 2.2
- (d) development exceeding the defined building envelope specified in DTS / DPF 3.1 or 3.2
- (e) shop, office or consulting room in excess of the gross leasable floor area specified in DTS / DPF 1.2.

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Urban Corridor (Main Street) Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
<p>Air handling unit, air conditioning system or exhaust fan including any associated components and any associated building alteration or addition necessary or incidental to its installation</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Place Overlay 	<p>3 The item will be installed on or within an existing building</p> <p>4 The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire.</p> <p>5 If the associated building is in a Local Heritage Area Overlay or State Heritage Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.</p>
<p>Internal building work</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>9 There will be no increase in the total floor area of the building</p> <p>10 There will be no alteration to the external appearance of the building.</p>
<p>Shade sail</p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> • Hazards (Flooding) Overlay • Character Area Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>50 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>51 Shade sail consists of permeable material</p> <p>52 The total area of the sail - does not exceed 40m²</p> <p>53 No part of the shade sail will be:</p> <p>(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</p> <p>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</p> <p>54 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p>

	<p>55 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p> <p>56 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • A Local Heritage Place identified in the Local Heritage Place Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>34 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>35 Panels and associated components do not overhang any part of the roof</p> <p>36 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Water tank (underground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Sloping Land Overlay 	<p>10 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>11 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 2 – Deemed-to-Satisfy Development Classification

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Applicable Policies

The following policies are applicable to the assessment of the identified Class of Development.

Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development.

Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusions
Industry	Light Industry

Assessment Criteria (AC)

Desired Outcomes (DO)

DO 1

A safe, walkable and vibrant shopping, entertainment and commercial main street precinct with an active day and evening economy supported by medium density residential development.

DO 2

Development with built form positively contributing to:

- (a) a streetscape that is visually interesting at human-scale comprising articulated buildings with a high level of fenestration and balconies oriented towards the street; and
- (b) a fine-grain public realm comprising buildings with active frontages that are designed to reinforce the street rhythm, that consider the facades, articulation and massing of existing buildings and any spaces between them, and provide narrow tenancy footprints at ground level.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

A vibrant mix of land uses adding to the vitality of the area and extend activities outside shop hours including restaurants, educational, community and cultural facilities and visitor and residential accommodation.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

- (a) Apartments
- (b) Child Care Centre
- (c) Consulting Room
- (d) Dwelling
- (e) Hotel
- (f) Educational Establishment

PO 1.2

Retail, office, entertainment and recreation related uses that provide a range of goods and services to the local community and the surrounding district.

DTS/DPF 1.2

Except in the Activity Centre Subzone, shops, office or consulting room uses not exceeding a maximum gross leasable floor area of 2,000m² in a single building.

PO 1.3

Ground floor uses contribute to a safe, active and vibrant main street.

DTS/DPF 1.3

Shop, restaurant, office, or consulting room uses located on the ground floor level of buildings.

PO 1.4

Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities that contribute to making the main street locality and pedestrian thoroughfares safe, walkable, comfortable, pleasant and vibrant places.

DTS/DPF 1.4

Dwellings developed in conjunction with non-residential uses sited:

- (a) at upper levels of buildings with non-residential uses located at ground level; or
- (b) behind non-residential uses on the same allotment.

PO 1.5

Development of diverse medium density accommodation options either as part of a mixed use development or wholly residential development.

DTS/DPF 1.5

Residential development (other than residential development in a mixed use building) achieves a minimum net residential density of at least 70 dwellings per hectare.

PO 1.6

Land uses promote movement and activity during daylight and evening hours, including restaurants, educational, health, community and cultural facilities, and visitor and residential accommodation.

DTS/DPF 1.6

None are applicable.

Built Form and Character

PO 2.1

Buildings sensitively frame the main street and public spaces and provide overall visual relief from building height and mass.

DTS/DPF 2.1

Buildings:

- (a) include a clearly defined podium or street wall with a maximum building height of 2 building levels or 8m, or higher where it matches the existing street wall of adjoining buildings; and
- (b) have levels above the defined podium or street wall setback a minimum of 2m from that wall.

PO 2.2

Buildings and structures designed to complement and respond to the established fine grained main street character by:

- (a) ensuring the veranda profile, and materials of construction are consistent with and positively respond to adjacent traditional main street buildings; and
- (b) complementing the traditional shop-front elements, such as narrow buildings and tenancy footprints, with frequently repeated frontages, and clear-glazed narrow shop front displays above raised display levels [base stall boards] and recessed entries.

DTS/DPF 2.2

None are applicable.

PO 2.3

Buildings designed to create visual connection between the public realm and ground level interior, to ensure an active interface with the main street and maximise passive surveillance.

DTS/DPF 2.3

The ground floor primary frontage of buildings provide at least 5m or 60% of the street frontage (whichever is the greater) as an entry / foyer or display window to a shop or other community or commercial use that provides pedestrian interest and activation.

PO 2.4

Buildings provide a high amenity pedestrian environment by providing shelter and shade over footpaths.

DTS/DPF 2.4

Buildings that provide a continuity of verandas, canopies, awnings or other pedestrian shelters.

PO 2.5

Buildings are adaptable and flexible to accommodate a range of residential and non-residential land uses on the ground floor.

DTS/DPF 2.5

The ground floor of buildings contain a minimum floor to ceiling height of 3.5m.

PO 2.6

Building height consistent with the form expressed in the *Maximum Building Height Levels Technical and Numeric Variation Overlay* and the *Maximum Building Height Metres Technical and Numeric Variation Overlay* and positively responds to the local context including the site's frontage, depth, and adjacent primary corridor or street width.

DTS/DPF 2.6

Building height is not greater than any maximum, or less than any minimum, specified in the *Maximum Building Height Levels Technical and Numeric Variation Overlay*, the *Maximum Building Height Metres Technical and Numeric Variation Overlay*, or the *Minimum Building Height Levels Technical and Numeric Variation Overlay*.

PO 2.7

Buildings sited on the primary street boundary to achieve a continuity of built form frontage to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate but vibrant spaces.

DTS/DPF 2.7

Buildings with a 0m setback from the primary street boundary, with the exception of minor setbacks to accommodate outdoor dining areas.

PO 2.8

Buildings with no setback from the secondary street boundary to contribute to a consistent established streetscape.

DTS/DPF 2.8

Buildings with a 0m setback from the secondary street boundary.

PO 2.9

Buildings with no side boundaries setback to achieve a continuity of street façade to the main street.

DTS/DPF 2.9

Buildings with a 0m setback from the side boundary.

PO 2.10

Buildings set back from rear boundaries (other than street boundaries) to minimise negative impacts on neighbouring properties, including access to natural sunlight and ventilation.

DTS/DPF 2.10

Buildings setback from rear boundaries as follows:

- (a) 5m or more where the subject land directly abuts an allotment of a different zone; or
- (b) 3m or more in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 2.11

Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.

DTS/DPF 2.11

Buildings setback from the rear access way:

- (a) no requirement where the access way is not less than 6.5m wide; or
- (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

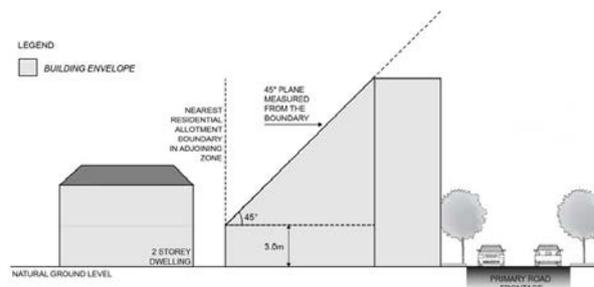

Interface Height

PO 3.1

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone, except where this

DTS/DPF 3.1

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.2 will apply, or where this boundary is the primary street boundary):

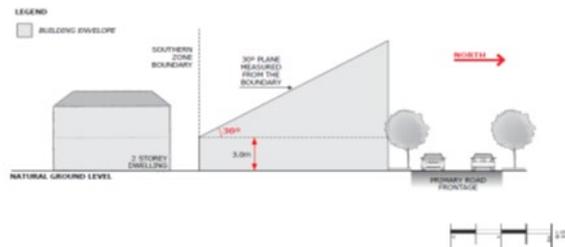

PO 3.2

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS/DPF 3.2

Buildings constructed within a building envelope provided by a 30 degree plane grading north, measured from a height of 3m above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram:

Significant Development Sites

PO 4.1

Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor and over 2500m² in area, which may include one or more allotment) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

DTS/DPF 4.1

Development on significant development sites up to 30% above the maximum building height specified in DTS/DPF 2.6 where it:

- (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area;
- (b) includes more than 15% of dwellings as affordable housing; or
- (c) includes at least:
 - i. three of the following:
 - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street;
 - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site;
 - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind;
 - D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments;
 - E. a child care centre; and
 - ii. three of the following sustainable design measures are provided:
 - A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance;
 - B. living landscaped vertical surfaces of at least 50m² supported by services that ensure ongoing maintenance;
 - C. passive heating and cooling design elements including solar shading integrated into the building;

- D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.

PO 4.2

Development on a significant development site (a site with a frontage to a primary road corridor and over 2500m², which may include one or more allotment) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.

DTS/DPF 4.2

Development that:

- (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF 3.1 and 3.2;
- (b) locates non-residential activities and higher density elements towards the primary road corridor; and
- (c) locates taller building elements towards the primary road corridor.

Movement, parking and access

PO 5.1

Development does not result in additional crossovers on the main street, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.

DTS/DPF 5.1

Vehicular access to be provided:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones; or
- (b) where it consolidates or replaces existing crossovers.

PO 5.2

Development is designed to ensure car parking is located avoid negative impacts on the main street rhythm and activation.

DTS/DPF 5.2

Vehicle parking garages located behind buildings away from the primary main street frontage.

Procedural Matters (PM)

Notification of Performance assessed development

All classes of performance assessed development are excluded from notification except where it involves any of the following:

- (e) the site of the development is adjacent land to land in a different zone
- (f) development identified as "all other code assessed development" in Urban Corridor (Main Street) Zone Table 3
- (g) development exceeding the maximum building height specified in DTS / DPF 2.6
- (h) development exceeding the defined building envelope specified in DTS / DPF 3.1 or 3.2.

Placement of Notices – Exemptions for Performance Assessed Development

Notification of Performance assessed development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Urban Activity Subzone

Assessment Criteria (AC)

Desired Outcomes (DO)

DO 1

An active business and social environment providing services and facilities for the surrounding neighbourhood. Buildings are integrated with pedestrian and cycling networks, as well as public transport facilities and community transport infrastructure, and contribute to enhanced quality of the public realm.

DO 2

The intensity and nature of land uses of a scale commensurate with the catchment it serves.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Built Form and Character

PO 1.1

Shops, office, entertainment, health and recreation related uses supplemented by other businesses that provide a range of goods and services to the surrounding neighbourhood and district.

DTS/DPF 1.1

None are applicable.

Urban Neighbourhood Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
Internal building work Except where any of the following apply: <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<ol style="list-style-type: none"> 1 There will be no increase in the total floor area of the building 2 There will be no alteration to the external appearance of the building.
Shade sail Except where any of the following apply: <ul style="list-style-type: none"> • Character Area Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Sloping Land Overlay • Water Resources Overlay 	<ol style="list-style-type: none"> 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2 Shade sail consists of permeable material 3 The total area of the sail - does not exceed 40m² 4 No part of the shade sail will be: <ol style="list-style-type: none"> (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment 5 Primary street setback – at least as far back as the building line of the building to which it is ancillary 6 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m

	<p>7 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • A Local Heritage Place identified in the Local Heritage Place Overlay • State Heritage Area Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>1 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>2 Panels and associated components do not overhang any part of the roof</p> <p>3 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Spa pool Swimming pool Except where any of the following apply:</p> <ul style="list-style-type: none"> • Character Area Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay • Sloping Land Overlay 	<p>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>2 It is ancillary to a dwelling erected on the site</p> <p>3 Allotment boundary setback – not less than 1m</p> <p>4 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>5 Location of filtration system from a dwelling on an adjoining allotment:</p> <p>(a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise</p> <p>(b) not less than 12m in any other case.</p>
<p>Water tank (underground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Sloping Land Overlay 	<p>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>2 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusions
Industry other than a Light Industry	
Shop	Restaurant Shop or group of shops with a gross leasable floor area less than 10000m²

Assessment Criteria (AC)

Desired Outcomes (DO)

DO 1

A low, medium to high rise and mixed use area that:

- (n) provides a flexible policy framework for the redevelopment of urban areas in close proximity to high frequency public transport corridors or adjacent primary road corridors that have the potential to become activity generators;
- (o) provides for the high-quality design and integration of buildings and public realm in mixed use areas with walkable urban form, excellent provision for walking and cycling and active street frontages that encourage social interaction, positively contribute to public safety and vibrancy and promote active movement and public transport use
- (p) provides a concentration of mixed use activity close to community focal points, such as a high frequency fixed transit stop, activity centre or high quality open space;
- (q) provides adaptable and flexible buildings that can accommodate changes in land use and respond to changing economic and social conditions and advances in technology; and
- (r) transitions to a reduced scale and intensity at the zone boundary to maintain the amenity of residential properties located within adjoining zones.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Development of low, medium and high density accommodation types for living, including dwellings, supported accommodation, student accommodation, short term accommodation, either as part of a mixed use development or wholly residential development

DTS/DPF 1.1

Development comprises one or more of the following land uses:

Advertisement

Apartments

Carport

Child Care Centre

Consulting Room

Dwelling

Educational Establishment

Hotel

Licensed Entertainment Premises

Licensed Premises

Office

Outbuilding

Restaurant

Shop

Student Accommodation

Supported Accommodation

Tourist Accommodation

PO 1.2

Development of diverse medium to high density accommodation, either as part of a mixed use development or wholly residential development.

DTS/DPF 1.2

Residential development (other than residential development in a mixed use building) achieves a net residential density of at least 150 dwellings per hectare, except where varied by a *Concept Plan Technical and Numeric Variation Overlay*.

PO 1.3

Light industrial and commercial uses (including high technology and research based activity) where compatible with adjoining uses.

DTS/DPF 1.3

None are applicable.

PO 1.4

Co-locate close to public transport land uses that generate high levels of pedestrian activity, encourage public transport use and provide opportunities for multi-purpose trips.

DTS/DPF 1.4

None are applicable.

PO 1.5

In clusters of non-residential development, provide high-quality, inclusive and integrated public realm, including open spaces, sport and recreation facilities, and places that serve as hubs for communal activity.

DTS/DPF 1.5

None are applicable.

PO 1.6

Shops, restaurants, offices and consulting rooms services and facilities to meet the day to day needs for the local community.

DTS/DPF 1.6

Shops, offices or consulting room uses not exceeding a maximum gross leasable floor area of 500m² for individual tenancies and 5,500m² in a single building.

PO 1.7

Larger scale shops, offices, and consulting rooms primarily clustered together to provide a focus for services and facilities.

DTS/DPF 1.7

None are applicable

Built Form and Character

PO 2.1

Development positively contributes to creating activity nodes around high-frequency public transport stops/stations and multi-modal transport interchanges, encourages public transport use and positively contributes to a fine-grain streetscape that provides a safe, comfortable, vibrant and walkable public realm at ground level.

DTS/DPF 2.1

None are applicable.

PO 2.2

Building height consistent with the form expressed in the *Maximum Building Height Levels Technical and Numeric Variation Overlay* and the *Maximum Building Height Metres Technical and Numeric Variation Overlay*, and positively responds to the local context including the site's frontage, depth, and adjacent primary street width.

DTS/DPF 2.2

Building height is not greater than any maximum, or less than any minimum, specified in the *Maximum Building Height Levels Technical and Numeric Variation Overlay*, the *Maximum Building Height Metres Technical and Numeric Variation Overlay*, or the *Minimum Building Height Levels Technical and Numeric Variation Overlay*.

PO 2.3

Buildings are designed to be adaptable and flexible to suit a range of land uses, including retail, office and residential, without the need for significant change to the building.

DTS/DPF 2.3

The ground floor of buildings contain a minimum floor to ceiling height of 3.5m.

PO 2.4

Buildings designed to create visual connection between the public realm and ground level interior, promote an active human-scale interface with the primary road / public transport corridor and open space and maximise passive surveillance.

DTS/DPF 2.4

Minimum 50% of the ground floor primary frontage of buildings are visually permeable, transparent or clear glazed.

PO 2.5

Buildings setback from the primary street boundaries to contribute to the consistent established streetscape.

DTS/DPF 2.5

Buildings setback from the primary street frontage in accordance with either of the following:

- (g) no minimum; or
- (h) the average of the setback of the existing building on each adjoining site fronting the same street.

PO 2.6

Buildings set back from secondary street boundaries to contribute to a consistent established streetscape.

DTS/DPF 2.6

Buildings setback from the secondary street frontage in accordance with either of the following:

- (f) no minimum where adjoining allotments are vacant; or
- (g) the average of the setback of the existing building on each adjoining site fronting the same street.

PO 2.7

Buildings set back from rear boundaries (other than street boundaries) to:

- (a) minimise impacts on properties in neighbouring zones; and
- (b) maximise intensity of development within the zone.

DTS/DPF 2.7

Buildings setback from the rear boundaries as follows:

- (a) 5m or more where the subject land directly abuts an allotment of a different zone; or
- (b) 0 metres in all other cases, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.

PO 2.8

Buildings set back from side boundaries (other than street boundaries) to:

- (a) reduce impacts of building bulk on adjoining properties;
- (b) provide adequate direct sun and ventilation to the building and open spaces;
- (c) minimise the extent of overlooking and resultant loss of privacy on adjoining properties; and
- (d) minimise the extent of overshadowing on adjoining properties.

DTS/DPF 2.8

Buildings setback from the side boundaries the average of the setback of the existing building on each adjoining site fronting the same street.

PO 2.9

Buildings set back from street boundaries (in the case of rear access ways) to provide adequate manoeuvrability for vehicles.

DTS/DPF 2.9

Buildings setback from the rear access way:

- (a) no requirement where the access way is not less than 6.5m wide; or
- (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

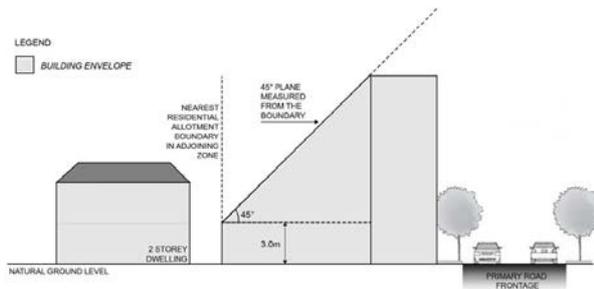

Interface Height

PO 3.1

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

DTS/DPF 3.1

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.2 will apply, or where this boundary is the primary street boundary):

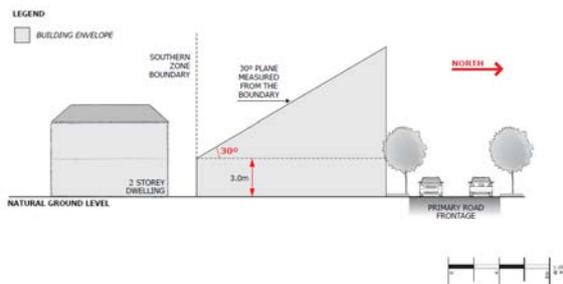

PO 3.2

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

DTS 3.2

Buildings constructed within a building envelope provided by a 30 degree plane grading north, measured from a height of 3m above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram:

PO 3.3

Development that manages the interface with a low rise neighbourhood zone by incorporating less dense low scale residential land uses, and avoiding land uses or intensity of land uses that adversely affect residential amenity.

DTS 3.3

None are applicable.

Site Dimensions and Land Division

PO 4.1

Where appropriate, a street grid pattern is provided in mixed use areas to maintain clear sightlines, improve public safety and legibility within the public realm, and ensure walkability and connectivity are maximised.

DTS/DPF 4.1

None are applicable.

Movement, parking and access

PO 5.1

Where practicable, buildings provide vehicle access via a side street or rear lane access way that is designed to:

- (a) provide space between buildings that reduces building mass and creates a more visually diverse public realm;
- (b) minimises conflicts with pedestrians and cyclists; and
- (c) achieve active frontages at a lower intensity than the primary street frontage.

DTS 5.1

Vehicular access to be provided:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones; or
- (b) where it consolidates or replaces existing crossovers.

Concept Plans

PO 6.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within the *Concept Plans Technical and Numeric Variation Overlay*.

DTS 6.1

None are applicable

Procedural Matters (PM)

Notification of Performance assessed development

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (i) the site of the development is adjacent land to land in a different zone
- (j) development identified as "all other code assessed development" in Urban Neighbourhood Zone Table 3
- (k) buildings exceeding the maximum building height specified in DTS / DPF 2.2
- (l) shop, office or consulting room in excess of 500m² in maximum gross leasable floor area for individual tenancies, excluding in the Main Street and Rehabilitation Subzone
- (m) shop, office or consulting room in excess of 5,500m² in maximum gross leasable floor area for a single building, excluding in the Main Street and Rehabilitation Subzone
- (n) shop, office or consulting room in excess of 2000m² in total maximum gross leasable floor area in the Rehabilitation Subzone.

Notification of Performance assessed development

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

Main Street Sub-Zone

Assessment Criteria (AC)

Desired Outcomes (DO)

DO 1

A shopping, entertainment and commercial main street supported by medium to high density residential development.

DO 2

A fine-grained public realm with safe, walkable and vibrant streets created by mixed use buildings with non-residential uses at ground level and a visually consistent street rhythm informed by local context and narrow tenancy footprints.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Retail, office, entertainment and recreation related uses supplemented by other businesses providing a range of goods and services to the local community and the surrounding district.

DTS/DPF 1.1

No maximum gross leasable floor area.

PO 1.2

Land uses promote movement and activity during daytime and evening hours, including shops, restaurants, small scale licenses premises, educational, community and cultural facilities, and visitor and residential accommodation.

DTS/DPF 1.2

None are applicable.

PO 1.3

Dwellings developed in conjunction with non-residential uses to support business, entertainment and recreational activities and positively contribute to making the main street locality and pedestrian thoroughfares safe, walkable, comfortable, pleasant and lively places.

DTS/DPF 1.3

Dwellings developed in conjunction with non-residential uses sited:

- (a) at upper levels of buildings with non-residential uses located at ground level; or
- (b) behind non-residential uses on the same allotment.

PO 1.4

Development of well-designed diverse medium to high density accommodation options, including dwellings, supported accommodation, student accommodation, and short term accommodation, either as part of a mixed use development or wholly residential development.

DTS/DPF 1.4

Residential development (other than residential development in a mixed use building) achieves a net residential density of at least 200 dwellings per hectare, except where varied by a *Concept Plan Technical and Numeric Variation Data Overlay*.

Built Form and Character

PO 2.1

Ground level uses contribute to a safe, walkable and vibrant main street.

DTS/DPF 2.1

Shop, restaurant, office, or consulting room uses located on the ground floor level of buildings.

PO 2.2

Buildings designed to create visual connection between the public realm and ground level interior, positively contribute to passive surveillance of the public realm, have an active interface with the main street and contribute to the fine-grain character and retail function of the street.

DTS/DPF 2.2

The ground floor primary frontage of buildings provide at least 5 metres or 60% of the street frontage (whichever is the greater) as an entry / foyer or display window to a shop or other community or commercial use that provides pedestrian interest and activation.

PO 2.2

Buildings are adaptable and flexible to suit a range of residential and non-residential land uses.

DTS/DPF 2.2

The ground floor of buildings contain a minimum floor to ceiling height of 3.5m.

PO 2.3

Buildings with no set-backs from the main street boundary to achieve a continuity of built form frontage to the main street, with the occasional section of building set back to create outdoor dining areas, visually interesting building entrances and intimate but vibrant spaces.

DTS/DPF 2.3

None are applicable.

PO 2.4

Vehicle parking and ancillary buildings and structures (including garages, carports and outbuildings) located behind buildings away from the primary main street frontage and designed to minimise negative impacts on the main street rhythm and activation.

DTS/DPF 2.4

None are applicable.

Urban Renewal Neighbourhood Zone

Table 1 – Accepted Development Classification

Class of Development The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'	Accepted Development Classification Criteria
<p>Carport Except where any of the following apply:</p> <ul style="list-style-type: none"> • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Native Vegetation Overlay • Sloping Land Overlay • Future Road Widening Overlay where an existing access is altered or a new access is created • Key Railway Crossings Overlay where an existing access is altered or a new access is created • Major Urban Transport Routes Overlay where an existing access is altered or a new access is created • Urban Transport Routes Overlay where an existing access is altered or a new access is created • Water Resources Overlay 	<ol style="list-style-type: none"> 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2 It is ancillary to a dwelling erected on the site 3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 5 Total floor area - does not exceed 40m² 6 Post height - does not exceed 3m measured from natural ground level (and not including a gable end) 7 Building height - does not exceed 5m 8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless: <ol style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): <ol style="list-style-type: none"> (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and

	<p>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</p> <p>10 The total roofed area of all existing or proposed buildings on the allotment does not exceed 70% of the area of the allotment</p> <p>11 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p> <p>12 The carport:</p> <p>(a) is located so that vehicle access:</p> <ul style="list-style-type: none"> i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or ii. will use a driveway that: <ul style="list-style-type: none"> A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and <p>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</p> <p>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</p>
<p>Demolition Except where any of the following apply:</p> <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>None.</p>

<p>Internal building work Except where any of the following apply:</p> <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<ol style="list-style-type: none"> 1 There will be no increase in the total floor area of the building 2 There will be no alteration to the external appearance of the building.
<p>Outbuilding (in the form of a garage) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Except where any of the following apply: • Hazards (Bushfire - Regional) Overlay • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Native Vegetation Overlay • Sloping Land Overlay • Future Road Widening Overlay where an existing access is altered or a new access is created • Key Railway Crossings Overlay where an existing access is altered or a new access is created • Major Urban Transport Routes Overlay where an existing access is altered or a new access is created • Urban Transport Routes Overlay where an existing access is altered or a new access is created • Water Resources Overlay 	<ol style="list-style-type: none"> 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2 It is detached from and ancillary to a dwelling erected on the site. 3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary 4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 5 Total floor area - does not exceed 40m² 6 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end) 7 Building height - does not exceed 5m 8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless: <ol style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent 9 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): <ol style="list-style-type: none"> (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure

	<p>10 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 70%</p> <p>11 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p> <p>12 The garage:</p> <p>(a) is located so that vehicle access:</p> <ul style="list-style-type: none"> i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or ii. will use a driveway that: <ul style="list-style-type: none"> A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and <p>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</p> <p>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</p> <p>13 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.</p>
<p>Outbuilding (not being a garage) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Native Vegetation Overlay • Sloping Land Overlay • Water Resources Overlay 	<ul style="list-style-type: none"> 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system 2 It is detached from and ancillary to a dwelling erected on the site 3 Primary street setback – at least as far back as the building line of the building to which it is ancillary 4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads) 5 Side boundary setbacks – at least 900mm from the boundary of the allotment 6 Total floor area does not exceed 40m²

	<p>7 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)</p> <p>8 Building height - does not exceed 5m</p> <p>9 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:</p> <p>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</p> <p>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</p> <p>10 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):</p> <p>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</p> <p>(b) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</p> <p>11 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 70%</p> <p>12 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.</p>
<p>Shade sail Except where any of the following apply:</p> <ul style="list-style-type: none"> • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Native Vegetation Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>2 Shade sail consists of permeable material</p> <p>3 The total area of the sail - does not exceed 40m²</p> <p>4 No part of the shade sail will be:</p> <p>(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</p> <p>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</p> <p>5 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>6 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p>

	<p>7 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>
<p>Solar photovoltaic panels (roof mounted) Except where any of the following apply:</p> <ul style="list-style-type: none"> • A Local Heritage Place identified in the Local Heritage Place Overlay • A State Heritage Place identified in the State Heritage Place Overlay 	<p>3 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>4 Panels and associated components do not overhang any part of the roof</p> <p>5 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>
<p>Spa pool Swimming pool Except where any of the following apply:</p> <ul style="list-style-type: none"> • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Native Vegetation Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>6 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>7 It is ancillary to a dwelling erected on the site</p> <p>8 Allotment boundary setback – not less than 1m</p> <p>9 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>10 Location of filtration system from a dwelling on an adjoining allotment: (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise (b) not less than 12m in any other case.</p>
<p>Verandah Except where any of the following apply: Except where any of the following apply:</p> <ul style="list-style-type: none"> • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Native Vegetation Overlay • Water Resources Overlay 	<p>9 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>10 It is ancillary to a dwelling erected on the site</p> <p>11 Primary street setback – as far back as the building line of the building to which it is ancillary</p> <p>12 Total floor area - does not exceed 40m²</p> <p>13 Post height - does not exceed 3m measured from natural ground level</p> <p>14 Building height - does not exceed 5m</p>

	<p>15 Length - does not exceed 10m if any part of the structure abuts or is situated on a boundary of the allotment</p> <p>16 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 70%.</p>
<p>Water tank (above ground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Hazards (Flooding) Overlay • Local Heritage Place Overlay • State Heritage Place Overlay • Native Vegetation Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>8 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>9 The tank is part of a roof drainage system</p> <p>10 Total floor area - not exceeding 15m²</p> <p>11 The tank is located wholly above ground</p> <p>12 Tank height – does not exceed 4m above natural ground level</p> <p>13 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>14 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.</p>
<p>Water tank (underground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Native Vegetation Overlay • Sloping Land Overlay • Water Resources Overlay 	<p>2 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>3 The tank (including any associated pump) is located wholly below the level of the ground.</p>

Table 2 – Deemed-to-Satisfy Development Classification

Class of Development The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'	Deemed-to-Satisfy Development Classification Criteria Provisions referred to are Deemed-to-Satisfy Criteria Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.			
	Zone	General Development Policies	Subzone (applies only in the area affected by the Subzone)	Overlay (applies only in the area affected by the Overlay)
Ancillary accommodation Except where Hazards (Bushfire – High Risk) Overlay Hazards (Bushfire – Urban Interface) Overlay Hazards (Bushfire – Regional) Overlay Hazards (Flooding) Overlay Local Heritage Place Overlay Noise and Air Emissions Overlay Sloping Land Overlay State Heritage Place Overlay Water Resources Overlay		Design in Urban Areas [All Residential Development – Ancillary Development]: DTS 17.1, 17.2	Mixed Use Transition Subzone [Land Division]: DTS 2.1	Building Near Airfields Overlay DTS 1.1 Airport Building Heights (Regulated) Overlay: All Defence Aviation Areas Overlay DTS 1.1, 1.3 Major Urban Transport Routes Overlay [Corner Cut-Offs]: All Native Vegetation Overlay [Environmental Protection]: DTS 1.1 State Significant Native Vegetation Areas Overlay [Environmental Protection]: All Future Road Widening Overlay: All

Class of Development

Applicable Policies

The following policies are applicable to the assessment of the identified Class of Development.

Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development.

Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 4 – Restricted Development Classification

Class of Development The following Classes of Development are classified as Restricted subject to any 'Exclusions'	Exclusions
Shop	With a gross leasable area less than 1000m².

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Housing that no longer meets community preferences is replaced with new diverse low – medium rise housing options. Housing density increases, taking advantage of well-located urban land. Employment and community services will improve access to jobs, goods and services without compromising residential amenity.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Residential development and supporting uses that are consistent with a spacious and peaceful lifestyle for individual households.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

Ancillary accommodation

Community facility

Dwelling

Educational establishment

Office

Outbuilding

Pre-school

Recreation area

Residential flat building

Retirement facility

Shop

Supported accommodation.

PO 1.2

Residential development accommodates a range of housing choices.

DTS/DPF 1.2

Residential development comprises:

- (a) detached dwellings;
- (b) semi-detached dwellings;
- (c) row dwellings;
- (d) group dwellings;
- (e) residential flat buildings;
- (f) retirement facility; or

(g) Supported accommodation.

PO 1.3

Shops, consulting rooms and offices of a scale to maintain the amenity of nearby residents.

DTS 1.3

Other than a change in the use of an existing building that has been lawfully used as a shop, office or consulting room (or any combination thereof), shops, offices and consulting rooms do not exceed 100m² in gross leasable floor area (individually or combined).

PO 1.4

Larger scale shops, offices and consulting rooms established on higher order roads or adjacent existing commercial and retail precincts.

DTS/DPF 1.4

Shop, consulting room and office:

- (a) floor area does not exceed 200m²; and
- (b) are located on sites with a frontage to an arterial or collector road or adjacent a Main Street or Activity Centre Zone.

PO 1.5

Non-residential development provides a range of services to the local community primarily in the form of:

- (a) commercial uses including small scale offices, shops and consulting rooms;
- (b) community services such as educational establishments, community centres, places of worship, pre-schools, child care and other health and welfare services;
- (c) services and facilities ancillary to the function or operation of supported accommodation or retirement housing;
- (d) open space and recreation facilities.

DTS 1.5

None are applicable

Building Height

PO 2.1

Buildings contribute to a low-medium rise residential character with the taller buildings located on sites that are a suitable size and dimension to manage massing and impacts on adjoining residential development.

DTS/DPF 2.1

Building height (excluding garages, carports and outbuildings) not exceeding:

- (a) 4 building levels and 15m where the site:
 - i. is at least 1200m²
 - ii. has a frontage of at least 35m
- (b) 3 building levels and 12m in all other circumstances.

Primary Street Setback

PO 3.1

Buildings are setback from primary street boundaries to establish a desirable urban streetscape character and integrate development with public open space.

DTS/DPF 3.1

Buildings are setback from the primary street boundary:

- (a) 3m or more; or
- (b) 1.5m or more where the allotment is located adjacent to a public reserve greater than 2000m², the dwelling faces that reserve and access is provided to the rear of the allotment.

Secondary Street Setback

PO 4.1

Buildings are set back from secondary street boundaries to maintain a pattern of separation between building walls and public streets and reinforce a streetscape character.

DTS/DPF 4.1

Buildings are set back at least 900mm from the boundary of the allotment with the secondary street frontage.

Boundary Walls

PO 5.1

Boundary walls are limited in height and length to manage impacts on adjoining properties.

DTS/DPF 5.1

Dwelling walls on side boundaries either:

- (a) adjoin or abut a boundary wall of a building on adjoining land for the same, or lesser length and height; or
- (b) do not exceed:
 - (i) 3 metres in height;
 - (ii) 10 metres in length; and
 - (iii) will not result in boundary walls on more than 45% of the total length of the side boundary.

PO 5.2

Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.

DTS / DPF 5.2

Dwellings in a semi-detached, row or terrace arrangement are setback at least 900mm from side boundaries shared with allotments outside the development site.

Side Boundary Setback

PO 6.1

Buildings are set back from side boundaries to provide:

- (a) separation between buildings to minimise visual impact; and
- (b) access to natural light and ventilation for neighbours.

DTS/DPF 6.1

Buildings not sited on side boundaries setback from the side boundary:

- (a) 900 mm for a wall height less than 3 metres; and
- (b) 900mm plus 1/3 of the wall height above 3m.

Rear Boundary Setback

PO 7.1

Buildings are set back from rear boundaries to provide:

- (a) separation between dwellings to minimise visual impact;
- (b) access to natural light and ventilation for neighbours;
- (c) open space recreational opportunities; and
- (d) space for landscaping and vegetation.

DTS/DPF 7.1

Buildings are set back from the rear boundary at least:

- (a) 3m for the first building level;
- (b) 5m for any second building level; and
- (c) 5m plus any increase in wall height over 7m.

Site Dimensions and Land Division

PO 8.1

Allotments created for residential purposes accommodate a diverse range of medium density housing.

DTS / DPF8.1

Residential development achieves a net density of up to 70 dwellings per hectare.

PO 8.2

High density housing located on sites of a suitable size and dimension to achieve a high standard of amenity for occupants and neighbours.

DTS / DPF 8.2

Development with a net residential density over 70 dwellings per hectare on sites with a minimum area of 1200m² and minimum frontage width of 35m.

Façade Design

PO 9.1

Dwelling facades facing public streets and common driveways make a positive contribution to the streetscape.

DTS / DPF 9.1

Where three storey or less, each dwelling includes at least 3 of the following design features along each façade facing a public road or common driveway:

- (a) a minimum of 30% of the façade is setback an additional 300mm
- (b) a porch or portico that projects at least 1m from the building façade and is open on least 2 sides
- (c) a balcony that projects from the building façade
- (d) a verandah that projects at least 1m from the building façade
- (e) eaves surrounding the dwelling of a minimum 450mm width
- (f) a minimum 30% of the upper level projects forward a minimum 300mm from the lower level building line

Note – use development above 3 storey policies for 4 storey fronting arterial roads.

Procedural Matters (PM)

Notification

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) where the site of the development is adjacent land to land in a different zone
- (b) development identified as “all other code assessed development” in Suburban Renewal Zone Table 3
- (c) Dwellings that do not satisfy DTS/DPF 201, 301, 4.1, 5.1, 5.2, 6.1, 7.1 and 9.1
- (d) buildings with a wall height greater than 7m and total height greater than 9m.

Mixed Use Transition Subzone

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Development accommodating a range of business, commercial, warehousing and light industrial uses enabling the transition of the area to mixed use development, compatible with residential development.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land use

PO 1.1

Redevelopment and transition of the area towards mixed development including, residential, supported by a mix of compatible uses including light industry, service trade, motor repair and other compatible businesses servicing the local community that do not produce objectionable emissions.

DTS/DPF 1.1

Development comprises one or more of the land uses:

Dwelling

Entertainment venue

Licensed premises Hotel

Bulky goods outlet

Consulting room

Indoor recreation facility

Light industry

Motor repair station

Office

Place of worship

Research facility

Retail fuel outlet

Service trade premises

Shop

Store

Tourist accommodation

Training facility

PO 1.2

Non-residential development involving the expansion, alteration or replacement of an existing industry or activity adjacent to a sensitive receiver or zone, and where current adverse impacts exist, only occur where adverse impacts are minimised in accordance with Environment Protection Act 1993 requirements.

DTS/DPF 1.2

None are applicable.

PO 1.3

Residential development and other sensitive development only occur where adverse impacts from nearby industries and activities are minimised in accordance with the Environment Protection Act 1993 requirements.

DTS/DPF 1.3

None are applicable.

PO 1.4

Shops, other than bulky goods outlets, provide a local convenience service to meet the day to day needs of the local community and surrounding businesses as well as support the sale of products made on-site as a supplement to a business activity to enhance local job opportunities.

DTS/DPF 1.4

Shop:

- (a) with a gross leasable floor area up to 500m²;
- (b) in the form of a bulky goods outlet; or
- (c) ancillary to and located on the same allotment as a light industry.

Land Division

PO 2.1

Sensitive uses and sensitive receivers are:

- (a) located away from areas which may be subject to unacceptable noise, dust, odour or other emissions; or
- (b) able to adequately mitigate impacts of noise, dust, odour or other emissions through design techniques such as:
 - (i) locating residential accommodation the greatest distance practicable from the industry;
 - (ii) locating buildings containing less non-sensitive receivers between the industry and sensitive receivers;
 - (iii) placing rooms more sensitive to air, noise and odour impacts (e.g. bedrooms) further away from the industry; or

- (iv) providing private or common open space adjacent a building facade that shields the space from impacts of the industry

DTS/DPF 2.1

Development does not incorporate any of the following (including alterations and additions which increase the floor area of buildings accommodating the following by 10% or more):

- (a) land division creating one or more additional allotments for residential purposes;
- (b) dwelling;
- (c) residential flat building;
- (d) tourist accommodation;
- (e) boarding home;
- (f) dormitory style accommodation;
- (g) workers' accommodation;
- (h) student accommodation;
- (i) pre-school;
- (j) educational establishment;
- (k) retirement village; or
- (l) supported accommodation;
- (m) residential park; or
- (n) hospital.

Part 3 – Overlays

Advertising Near Signalised Intersections Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Provision of a safe road environment by reducing driver distraction at key points of conflict on the road.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Advertisements Near Signalised Intersections

PO 1.1

Advertising near signalised intersections does not cause unreasonable distraction to road users through excessive size or illumination.

DTS/DPF 1.1

None are applicable.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
Development includes an advertisement or advertising hoarding; that: a) is within 100m of a: (i) signalised intersection; or (ii) signalised pedestrian crossing; and b) will: (i) be internally illuminated; (ii) incorporate a moving or changing display or message; or (iii) incorporate a flashing light.	Commissioner of Highways	To provide expert technical assessment on potential risks relating to pedestrian and road safety which may arise from advertisements near intersections.

Affordable Housing Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1.

Affordable housing that includes a range of affordable dwelling types is integrated into residential and mixed use development.

DO 2

Development that caters for a variety of household structures.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Division

PO 1.1

Development comprising 20 or more dwellings provides housing suited to a range of incomes including households with low – moderate incomes.

DTS/DPF 1.1

Development comprising 20 or more dwellings or residential allotments includes a minimum of 15% affordable housing except where:

- a. it can be demonstrated that any shortfall in affordable housing has been provided in a previous stage of development; or
- b. it can be demonstrated that any shortfall in affordable housing will be accommodated in a subsequent stage or stages of development.

PO 1.2

Affordable housing is distributed throughout the development to avoid an overconcentration of affordable housing.

DTS/DPF 1.2

None are applicable.

Built Form and Character

PO 2.1

Affordable housing is designed to complement the design and character of residential development within the development area.

DTS/DPF 2.1

None are applicable.

Affordable Housing Incentives

PO 3.1

Allotments created for affordable housing are a suitable size and dimension that provide a high standard of occupant amenity and integrate with residential neighbourhoods.

DTS/DPF 3.1

Where constituting affordable housing, the minimum site area specified for a dwelling can be reduced by up to 20%.

PO 3.2

To support the provision of affordable housing building heights may be increased above the maximum specified in the *Building Heights Technical and Numeric Variations Data Overlay*.

DTS/DPF 3.2

Where a mixed-use development or apartment building includes at least 15% affordable housing, the maximum building height specified can be increased by 1 storey in City Living, General Neighbourhood, Housing Diversity Neighbourhood Greenfield Neighbourhood, Masterplanned Suburban Neighbourhood zones, and up to 30% in any other zone.

Movement and Car Parking

PO 4.1

Sufficient car parking is provided to meet the needs of occupants of affordable housing.

DTS/DPF 4.1

Dwellings constituting affordable housing are provided with car parking in accordance with the following:

- a. 0 carparks for an apartment; and
- b. 1 carpark per dwelling for any other dwelling.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
Development for the purposes of the provision of affordable housing (applying the criteria determined under regulation 4 of the <i>South Australian Housing Trust Regulations 2010</i>)	Minister responsible for administering the <i>South Australian Housing Trust Act 1995</i>	To enable commitment and obligations on the provision of dwellings or allotments for affordable housing to be executed.

Aircraft Noise Exposure Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Development sensitive to aircraft noise designed to manage noise intrusion to reduce land use conflict and protect human health.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

PO 1.1

Buildings that accommodate activities that are sensitive to aircraft noise designed to minimise aircraft noise intrusion and provide appropriate interior acoustic amenity.

DTS/DPF 1.1

None are applicable

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
None	None	None

Airport Building Heights (Aircraft Landing Areas) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Management of potential impacts of buildings on the operational and safety requirements of aircraft landing areas.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Built Form

PO 1.1

Building height does not pose a hazard to the operation of an aircraft landing area.

DTS/DPF 1.1

The distance from any part of a runway centreline to the closest point of the building is greater than 30 times building height.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
None	None	None

Airport Building Heights (Regulated) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Management of potential impacts of buildings on the operational and safety requirements of certified commercial and military airfields, airports, airstrips and helicopter landing sites.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Built Form

PO 1.1

Building height does not pose a hazard to the operation of a certified aerodrome.

DTS/DPF 1.1

Building height does not exceed the Obstacle Limitations Surface (OLS) in the *Airport Building Heights (Regulated) Technical and Numeric Variation Overlay*.

PO 1.2

Development is adequately separated from runways and other operational facilities within certified aerodromes to minimise the potential for building generated turbulence and windshear.

DTS/DPF 1.2

The distance from any part of a runway centreline to the closest point of the building is 35 times building height or more

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
Development of a building height which would exceed the Obstacle Limitation Surface.	Commonwealth Secretary for the Department of Infrastructure, Regional Development and Cities	To provide expert assessment and direction to the relevant authority on potential impacts on the safety and operation of aviation activities

Building Near Airfields Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Management of lighting and bird attraction impacts on the operational and safety requirements of certified commercial and military airfields, airports, airstrips and helicopter landing sites.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

PO 1.1

Outdoor lighting does not pose a hazard to commercial or military aircraft operations.

DTS/DPF 1.1

Development does not include outdoor floodlighting

PO 1.2

Development likely to attract birds adequately separated from airfields to minimise the potential for aircraft bird strike.

DTS/DPF 1.2

Development incorporating one or more of the following land uses is located not less than 3km from the boundaries of an airport used by commercial or military aircraft:

- a. food packing/processing plant;
- b. horticulture;
- c. intensive animal husbandry;
- d. showground;
- e. waste management facility;
- f. waste transfer station;
- g. wetland; or
- h. wildlife sanctuary.

PO 1.3

Buildings and structures that are sensitive to aircraft noise designed to minimise aircraft noise intrusion and provide appropriate interior amenity.

DTS/DPF 1.3
None are applicable

Procedural Matters

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
None	None	None

Character Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Reinforce valued streetscape characteristics through contextually responsive development, design and adaptive reuse that responds to the attributes expressed in the Character Area Statement.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Built Form

PO 1.1

The form of new buildings and structures that are visible from the public realm consistent with the valued streetscape characteristics of the character area.

DTS 1.1

None are applicable.

PO 1.2

Development is consistent with the prevailing building and wall heights in the character area.

DTS 1.2

None are applicable.

PO 1.3

Design and architectural detailing of street facing buildings consistent with the prevailing characteristics in the character area.

DTS 1.3

None are applicable.

PO 1.4

Development is consistent with the prevailing front and side boundary setback pattern in the character area.

DTS 1.4

None are applicable.

PO 1.5

Materials are either consistent with or complement those within the character area.

DTS 1.5

None are applicable.

Alterations and Additions

PO 2.1

Additions and alterations do not adversely impact on the streetscape character.

DTS/DPF 2.1

Additions and alterations:

- (a) fully contained within the roof space of an existing building with no external alterations made to the building elevation facing the primary street; or
- (b) where including a second storey addition, the additions are not visible from the primary street assuming a 45 degree view angle measured from the primary frontage allotment boundary; and

- (c) do not include any development forward of the front façade building line; and
- (d) that comprise side or rear extensions that are no closer to the side boundary than the existing building and are not visible from the primary street.

PO 2.2

Encourage the adaptive reuse of buildings that complement the prevailing characteristics of the locality, by enabling complementary changes to buildings to accommodate new land uses.

DTS 2.2

None are applicable.

Ancillary Development

PO 3.1

Ancillary development, including carports, outbuildings and garages, complements the character of the area and associated building(s).

DTS 3.1

None are applicable.

PO 3.2

Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).

DTS 3.2

None are applicable.

PO 3.3

Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.

DTS 3.3

None are applicable.

PO 3.4

Front fencing and gates should be consistent with the traditional period, style and form of the associated built form.

DTS 3.4

None are applicable.

Land Division

PO 4.1

Land division creates allotments that are capable of accommodating buildings of a bulk and scale that reflect existing buildings and setbacks in the character area.

DTS 4.1

None are applicable.

Context and Streetscape Amenity

PO 5.1

The width of driveways and other vehicle access ways are consistent with the prevalent width of existing driveways in the character area.

DTS 5.1

None are applicable.

PO 5.2

Development maintains the valued landscape pattern and characteristics that contribute to the character area, except where they compromise safety, create nuisance, or impact adversely on existing buildings or infrastructure.

DTS 5.2

None are applicable.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
None	None	None

Character Area Statement

Character Area Overlays identify areas that comprise variable, but cohesive high quality streetscape. They are characterised by a generally consistent rhythm of building setting and spacing, allotment patterns, landscape features and the scale, proportion and form of the buildings and their key elements. Development within the Overlay will preserve these attributes.

Existing building stock that contributes to these attributes should be redeveloped in a manner as to retain their contribution to the prevailing streetscape.

New development will remain consistent, or enhance these streetscape attributes through maintaining a compatible siting, form, rhythm and/or visual consistency to the prevailing streetscape.

Example – 1950s – 1960s Housing Trust

Characteristics	Examples
Historical Period	- Late 1950's and early 1960's.
Subdivision Pattern	-Irregular allotment shapes and curvilinear street pattern. -Detached, 300 sqm , 10m min frontage Semi-detached, 270 sqm, 9m min frontage Single storey row dwelling, 200 sqm, 7m min frontage Double storey row dwelling, 180 sqm, 6m min frontage.
Architectural Buildings	-Single storey semi-detached dwellings (double-unit) -Detached dwellings
Materials	-Brick or concrete block with stylistic treatments varying house to house. -Roofs should remain clad in corrugated iron
Setting and Public Realm	-Large proportion of open space as parks and gardens -Established mature trees in landscaped road reserves
Fencing	-The incorporation of fences and gates in keeping with the height, scale and type of fences in the locality.
Height	-Low density detached and semi-detached dwellings. -Low-medium density row dwellings up to two storeys in height. - Two storey extensions should be set well back from the principal elevation and should not dominate the front section of the dwelling.

Example – 1920s – 1950s Mixed Residential

Characteristics	Prevailing Characteristics
Era of Development	-1920 to 1950.
Subdivision Pattern	-Strong uniformity of layout and buildings. -Medium sized detached housing on substantial allotments.

Architectural Buildings	-Predominantly Bungalow and Tudor. -Some examples of Spanish Mission, Dutch Gable and Art Deco.
Materials	-Freestone. -Red brick. -Stucco and baked brick. -Exposed by ornate timber work. -Terracotta Tiles. -Galvanised Iron.
Setting and Public Realm	-Traditional well-maintained gardens. -Abundant mature vegetation. -Tree lined streets. -Woodville Oval (precinct's main focus).
Fencing	-Low brick, stucco or wire (integral with design of the house).
Height	-Generally single storey. -Consistent with the character of the precinct.

Character Preservation District Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Recognise, protect and enhance the special character of Character Preservation Districts.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Land division undertaken in accordance with Section 8 of the Character Preservation (Barossa Valley) Act 2012 and Section 8 of the Character Preservation (McLaren Vale) Act 2012.

DTS/DPF 1.1

None are applicable.

PO 1.2

Renewable energy facilities and ancillary development, waste treatment and management facilities and high voltage electricity lines are not supported.

DTS/DPF 1.2

None are applicable.

Built Form and Character

PO 2.1

Development occurring at the edge of townships is sympathetic to the rural landscape and reinforces a clear transition between townships and rural landscape through measures including:

- (a) being of a low scale;
- (b) orientating residential development towards the rural area;
- (c) visual separation from the rural area through landscaping and road reserves.

DTS/DPF 2.1

None are applicable.

PO 2.2

Development contributes to and maintains the historic identity and character of townships through appropriate:

- a) form;
- b) scale;
- c) siting;
- d) design; and
- e) landscaping.

DTS/DPF 2.2

None are applicable.

PO 2.3

Adaptive re-use of rural structures and historic and/or character buildings to support their preservation and ongoing contribution to the landscape.

DTS/DPF 2.3

None are applicable.

Built Form and Character in the Rural Area

PO 3.1

Preservation of existing natural features including topography, watercourses and mature trees.

DTS/DPF 3.1

None are applicable.

PO 3.2

Buildings and structures do not interrupt views of the skyline through measures including being sited below ridge lines.

DTS/DPF 3.2

None are applicable.

PO 3.3

Buildings and structures harmonise with the natural features of the landscape and reinforces the rural character through use of muted, neutral, non-reflective landscape colours on external surfaces.

DTS/DPF 3.3

None are applicable.

PO 3.4

Large buildings and structures sited and oriented to minimise their visual bulk, particularly if close to roads or in open settings where there are no other buildings or mature trees in close proximity.

DTS/DPF 3.4

None are applicable.

PO 3.5

Buildings and structures grouped to create compact clusters well set back from public roads.

DTS/DPF 3.5

None are applicable.

PO 3.6

Development mitigates the need for long, steep access roads that require excessive grading or removal of vegetation.

DTS/DPF 3.6

None are applicable.

Earthworks

PO 4.1

Excavation and filling of land limited to that associated with:

- a. minimising the visual impact of buildings or structures; or
- b. construction of water storage facilities.

DTS/DPF 4.1

Excavation and/or filling of land is:

- (a) no greater than 1.5 metres from natural ground level; and
- (b) only undertaken in order to reduce the visual impact of buildings or structures or to construct water storage facilities.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
None	None	None

Coastal Areas Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Conservation and enhancement of the natural coastal environment, provision for natural coastal processes and recognition of current and future coastal hazards including sea level rise, flooding erosion and dune drift to avoid the need, now or in the future, for public expenditure on protection of the environment and development.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Division

PO 1.1

Land divided only if it or the subsequent development and use of the land will not adversely affect environmental values or the ability of the land or adjoining land to adapt to changing coastal processes.

DTS/DPF 1.1

Land division for minor adjustment of allotment boundaries to remove an anomaly in the current boundaries with respect to the location of existing buildings or structures.

PO 1.2

Land is not divided unless a layout is achieved whereby roads, parking areas and development sites for each allotment are at least 0.3m above the standard sea flood risk level, unless the land is, or can be provided with appropriate and acceptable coastal protection measures.

DTS/DPF 1.2

None are applicable.

PO 1.3

Other than small-scale infill land division in a predominantly urban zone, land division adjacent to the coast incorporates an existing or proposed public reserve (not including a road or erosion buffer) of a size adequate to provide for natural coastal processes, public access and recreation.

DTS/DPF 1.3

None are applicable.

Hazard Risk Minimisation

PO 2.1

Buildings sited over tidal water, or that are not capable of being raised or protected by flood protection measures in the future, are protected against the standard sea flood risk level and sea level rise.

DTS/DPF 2.1

Building floor levels are at least 1.25m above the standard sea flood risk level.

PO 2.2

Development, including associated roads and parking areas, but not minor structures unlikely to be adversely affected by flooding, protected from the standard sea flood risk level and sea level rise.

DTS/DPF 2.2

Development:

- (a) site levels are 0.3m or more above the standard sea flood risk level;
- (b) building floor levels are 0.55m or more above the standard sea flood risk level; and
- (c) practical measures to provide protection against an additional sea level rise of 0.7m plus an allowance to accommodate 100 years of land subsidence are incorporated.

PO 2.3

Development will not create or aggravate coastal erosion or require coast protection works that cause or aggravate coastal erosion.

DTS/DPF 2.3

None are applicable.

PO 2.4

Development set back a sufficient distance from the coast to provide an erosion buffer in addition to a public reserve that will allow for at least 100 years of coastal retreat for single buildings or small-scale developments, or 200 years of coastal retreat for large scale developments unless:

- (a) the development incorporates appropriate private coastal protection measures to protect it from anticipated erosion; or
- (b) there are formal commitments to protect the existing or proposed public reserve and development from anticipated coastal erosion.

DTS/DPF 2.4

None are applicable.

PO 2.5

Additions or alterations to or replacement of an existing dwelling does not increase the risk of effects from natural coastal processes such as flooding, sea-level rise, sand drift and erosion.

DTS/DPF 2.5

None are applicable.

Coast Protection Works

PO 3.1

Development avoids the need for coast protection works through measures such as setbacks to protect development from coastal erosion, sea or stormwater flooding, sand drift or other coastal processes.

DTS 3.1

None are applicable.

PO 3.2

Development does not compromise the structural integrity of any sea wall or levee bank or the ability to maintain, modify or upgrade any sea wall or levee bank.

DTS/DPF 3.2

None are applicable.

PO 3.3

Unavoidable coast protection works are the subject of binding agreements to cover the cost of future construction, operation, maintenance and management measures and will not:

- (a) have an adverse effect on coastal ecology, processes, conservation, public access and amenity;
- (b) require commitment of public resources including land; and
- (c) present an unacceptable risk of failure relative to potential hazard resulting from failure.

DTS/DPF 3.3

None are applicable.

Environment Protection

PO 4.1

Development will not unreasonably affect the marine and onshore coastal environment by pollution, erosion, damage or depletion of physical or biological resources, interference with natural coastal processes, introduction of and spread of marine pests or any other means.

DTS/DPF 4.1

None are applicable.

PO 4.2

Development avoids delicate or environmentally-sensitive coastal areas such as sand dunes, cliff tops, estuaries, wetlands or substantially intact strata of native vegetation.

DTS/DPF 4.2

None are applicable.

PO 4.3

Development allows for ecological and natural landform adjustment to changing climatic conditions and sea levels, by allowing landward migration of dunes, coastal wetlands, mangrove and samphire areas.

DTS/DPF 4.3

None are applicable.

PO 4.4

Development avoids, or in built up areas minimises, impacts on important habitat areas that support the nesting, breeding and movement/migration patterns of fauna, including threatened shorebirds.

DTS/DPF 4.4

None are applicable.

PO 4.5

Development designed so that solid and fluid wastes and stormwater runoff are disposed of in a manner that avoids pollution or other detrimental impacts on the marine and on-shore environment of coastal areas.

DTS/DPF 4.5

None are applicable.

PO 4.6

Development involving the removal of shell grit, cobbles or sand, other than for coastal protection works purposes, is not undertaken.

DTS/DPF 4.6

Development does not involve the removal of shell grit or sand.

Access

PO 5.1

Development maintains or enhances appropriate public access to and along the foreshore.

DTS/DPF 5.1

None are applicable.

PO 5.2

Public access through sensitive coastal landforms, particularly sand dunes, wetlands and cliffs, is restricted to defined pedestrian paths and constructed to minimise adverse environmental impact.

DTS/DPF 5.2

None are applicable.

PO 5.3

Access roads to the coast, lookouts and places of interest:

- (a) do not detract from the amenity or the environment;
- (b) are designed for slow moving traffic; and
- (c) are minimised in number.

DTS/DPF 5.3

None are applicable.

PO 5.4

Development on land adjoining a coastal reserve should be sited and designed to be compatible with the purpose, management and amenity of the reserve, as well as to prevent inappropriate access to or use of the reserve.

DTS/DPF 5.4

None are applicable.

<p>Except where the development is in the opinion of the relevant authority minor in nature and would not warrant a referral when considering the purpose of the referral, the following:</p> <p>(a) excavation or filling where the total volume of material excavated or filled exceeds 9m³;</p> <p>(b) dwellings and habitable buildings that</p> <p>(i) do not meet site and building floor level requirements set out in the Coastal Areas Overlay; or</p> <p>(ii) are within 100m of the mean high water mark;</p> <p>(c) other than within a Settlement Zone:</p> <p>(i) buildings with a floor area greater than 60m²;</p> <p>(ii) tourist accommodation, including a caravan park; or</p> <p>(iii) development that involves a division of land that would create 1 or more additional allotments;</p> <p>(d) off shore structures;</p> <p>(e) coast protection works; or</p> <p>(f) infrastructure within 100m landward of the mean high water mark.</p>	Coast Protection Board	<p>To provide expert assessment and direction to the relevant authority on:</p> <ul style="list-style-type: none"> the risk to development from current and future coastal hazards (including sea-level rise, coastal flooding, erosion, dune drift and acid sulfate soils); coast protection works; potential impacts from development on public access and the coastal environment (including important coastal features).

Defence Aviation Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Management of potential impacts of buildings on the operational and safety requirements of Defence Aviation Areas.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Built Form

PO 1.1

Building height does not pose a hazard to the operations of Defence Aviation Areas.

DTS/DPF 1.1

Building height does not exceed the relevant height specified by the Defence Aviation Area Technical and Numeric Variations Overlay.

PO 1.2

Exhaust stacks are designed and sited to minimise plume impacts on the operations of Defence Aviation Areas.

DTS/DPF 1.2

None are applicable.

PO 1.3

Buildings are adequately separated from airfields to minimise the potential for building generated turbulence and windshear.

DTS/DPF 1.3

The distance from any part of the runway centreline to the closest point of the building is greater than 35 times building height.

Dwelling Excision Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Creation of allotments to accommodate existing dwellings in primary production areas limited to avoid undermining primary production.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Division

PO 1.1

Land division to create an additional allotment to accommodate an existing dwelling limited to where it can be demonstrated that:

- (a) the dwelling is surplus to a productive land use; and
- (b) continuation of primary production land use will not be undermined.

DTS/DPF 1.1

No additional allotments are created.

PO 1.2

Land division to create an allotment to accommodate a surplus dwelling:

- (a) results in an allotment that supports rural living for the surplus dwelling; and
- (b) ensures that all other allotments are of a size to support primary production.

DTS/DPF 1.2

Land division creates no more than two allotments of which:

- (a) one allotment:
 - a. is 1 hectare or more in area;
 - b. has no boundary that is closer than 40m to an existing dwelling; and

- c. has a driveway 'handle' of no more than 50 metres in length if it is of a battle-axe configuration;
- (b) the other allotment has an area not less than that identified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*.

Other than where all deemed-to-satisfy criteria for all policies relevant to this referral are met, development (including the division of land) that is within or may encroach within a Future Road Widening Area.	Commissioner of Highways	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.

Hazards (Bushfire – Outback) Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Development is located to minimise the threat and impact of bushfires on life and property.

DO 2

To facilitate access for emergency service vehicles to protect assets and lives from bushfire danger.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Habitable Buildings

PO 1.1

Residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation):

- (a) are sited to avoid, narrow gullies, steep slopes (especially slopes with a northerly or westerly aspect) and vegetated areas (including unmanaged grasslands) that pose an unacceptable bushfire risk; and
- (b) minimise the need to clear native vegetation.

DTS/DPF 1.1

Development meets the following requirements:

- (a) an asset protection zone with a minimum width of 50m already exists and can continue to be maintained around the accommodation; and
- (b) the asset protection zone is contained wholly within the allotment of the development.

Vehicle Access –Roads and Driveways

PO 2.1

Roads are designed and constructed to:

- (a) facilitate the safe and effective:
 - ii. use, operation and evacuation of fire-fighting and emergency personnel; and
 - iii. evacuation of residents; and
- (b) avoid the unnecessary clearance of native vegetation

DTS/DPF 2.1

Roads:

- (a) do not require the clearance of native vegetation;
- (b) are constructed with a formed, all-weather surface;
- (c) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road;
- (d) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road;
- (e) have a minimum formed road width of 6m;
- (f) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 2);
- (g) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 3);
- (h) incorporating use of cul-de-sac endings or dead end roads to not exceed 200m in length and the end of the road to have either:
 - a. a turning area with a minimum formed surface radius of 12.5m (Figure 4); or
 - b. a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 5); and
- (i) incorporate solid, all-weather crossings that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes, over any watercourse.

PO 2.2

Where the furthest point of the building from the nearest public road is greater than 30m, driveways are designed and constructed to:

- (a) facilitate the safe and effective:
 - i. use, operation and evacuation of fire-fighting and emergency personnel; and
 - ii. evacuation of residents; and
- (b) avoid the unnecessary clearance of native vegetation.

DTS/DPF 2.2

Driveways:

- (a) do not require the clearance of native vegetation;
- (b) do not exceed 600m in length;
- (c) are constructed with a formed, all-weather surface;
- (d) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8);
- (e) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway;

- (f) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the driveway;
- (g) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 2);
- (h) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 6);
- (i) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 2);
- (j) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 3);
- (k) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by incorporating at the end of the driveway either:
 - ii. a loop road around the building; or
 - iii. a turning area with a minimum radius of 12.5m (Figure 4); or
 - iv. 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 5).
- (l) incorporate solid, all-weather crossings that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes, over any watercourse.

Hazards (Bushfire – Regional) Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Development is located to minimise the threat and impact of bushfires on life and property.

DO 2

To facilitate access for emergency service vehicles to protect assets and lives from bushfire danger.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Siting

PO 1.1

Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of:

- (a) vegetation cover comprising trees and/or shrubs and/or unmanaged grasslands;
- (b) poor access;
- (c) rugged terrain;
- (d) isolated location (e.g. more than 600m from a public road);
- (e) inability to provide an adequate asset protection zone; and/or
- (f) inability to provide a suitable site for an adequate supply of water for firefighting purposes.

DTS/DPF 1.1

None are applicable

Built Form

PO 2.1

Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts

DTS/DPF 2.1

None are applicable

PO 2.2

Extensions to existing buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) in the event of bushfire.

DTS/DPF 2.2

None are applicable

Habitable Buildings

PO 3.1

To minimise the threat, impact and exposure to bushfires on life and property, residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) are sited on the flatter portion of allotments and avoid steep slopes, especially:

- (a) upper slopes;
- (b) narrow ridge crests and the tops of narrow gullies; and
- (c) slopes with a northerly or westerly aspect.

DTS/DPF 3.1

None are applicable

PO 3.2

Residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation):

- (a) are sited away from vegetated areas that pose an unacceptable bushfire risk; and
- (b) minimise the need to clear native vegetation.

DTS/DPF 3.2

Development meets the following requirements:

- (a) an asset protection zone with a minimum width of 50m already exists and can continue to be maintained around the accommodation; and
- (b) the asset protection zone is contained wholly within the allotment of the development.

PO 3.3

Residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) have a dedicated and accessible water supply available at all times for fire-fighting purposes.

DTS/DPF 3.3

Development has a dedicated water supply available at all times for fire-fighting purposes:

- (a) comprising a minimum of 5000 litres; and
- (b) positioned in an accessible location and accompanied with necessary equipment to allow occupants to minimise the spread of bushfire to the accommodation.

Land Division

PO 4.1

Land division is designed to:

- (a) minimise fire risk danger to residents, other occupants of buildings and firefighting personnel;
- (b) minimise the potential risk of damage to buildings and other property during a bushfire; and
- (c) ensure each allotment contains a suitable building envelope that is located away from any vegetation that would pose an unacceptable risk in the event of bushfire.

DTS/DPF 4.1

None are applicable

PO 4.2

Land division designed in accordance with Figure 1 to:

- (a) facilitate the movement of emergency vehicles through, within and out of bushfire risk areas;
- (b) provide a mainly continuous street pattern serving new allotments that eliminates the use of cul-de-sacs or dead end roads. Where cul-de-sacs/dead end roads are proposed an alternative emergency evacuation route is provided;
- (c) facilitate the safe and efficient evacuation of residents, visitors and other personnel during a bushfire event and not rely on fire tracks as means of evacuation; and
- (d) include at least two separate entry/exit points where 10 or more allotments are proposed.

DTS/DPF 4.2

None are applicable

PO 4.3

Land division will ensure provision of a bushfire buffer zone that isolates residential allotments from areas that pose an unacceptable bushfire risk by containing the allotments within a perimeter road and other means such as open parks and sporting areas that achieve adequate separation (Figure 1).

DTS/DPF 4.3

None are applicable

Vehicle Access –Roads and Driveways

PO 5.1

Roads are designed and constructed to:

- (a) facilitate the safe and effective:
 - i. use, operation and evacuation of fire-fighting and emergency personnel; and
 - ii. evacuation of residents; and
- (b) avoid the unnecessary clearance of native vegetation avoid the unnecessary clearance of native vegetation

DTS/DPF 5.1

Roads:

- (a) do not require the clearance of native vegetation;
- (b) are constructed with a formed, all-weather surface;
- (c) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road;
- (d) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road;
- (e) have a minimum formed road width of 6m;
- (f) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 2);
- (g) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 3);
- (h) incorporating use of cul-de-sac endings or dead end roads to not exceed 200m in length and the end of the road to have either:
 - (i) a turning area with a minimum formed surface radius of 12.5m (Figure 4); or
 - (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 5); and

- (i) incorporate solid, all-weather crossings that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes, over any watercourse.

PO 5.2

Where the furthest point of the building from the nearest public road is greater than 30m, driveways are designed and constructed to:

- (a) facilitate the safe and effective:
 - i. use, operation and evacuation of fire-fighting and emergency personnel; and
 - ii. evacuation of residents; and
- (b) avoid the unnecessary clearance of native vegetation

DTS/DPF 5.2

Driveways:

- (a) do not require the clearance of native vegetation;
- (b) do not exceed 600m in length;
- (c) are constructed with a formed, all-weather surface;
- (d) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8);
- (e) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway;
- (f) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the driveway;
- (g) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 2);
- (h) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 6);
- (i) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 2);
- (j) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 3);
- (k) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by incorporating at the end of the driveway either:
 - ii. a loop road around the building; or
 - iii. a turning area with a minimum radius of 12.5m (Figure 4); or
 - iv. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 5).
- (l) incorporate solid, all-weather crossings that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes, over any watercourse.

Hazards (Acid Sulfate Soils) Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Protection of the environment and development from the release of acid water resulting from the disturbance of acid sulfate soils.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Excavation or change to a water table is managed in a way that effectively avoids potential harm or damage to any of the following from release of acid sulfate soils:

- a. marine and estuarine environments;
- b. natural water bodies and wetlands;
- c. agricultural or aquaculture activities;
- d. buildings, structures and infrastructure; or
- e. public health.

DTS/DPF 1.1

Development does not involve or cause:

- a. excavation of land; or
- b. change to a water table.

Procedural Matters (PM)

Hazards (Bushfire – General Risk) Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Development responds to the general level of bushfire risk by siting and designing buildings in a manner that mitigates the threat and impact of bushfires on life and property.

DO 2

To facilitate access for emergency service vehicles to protect assets and lives from bushfire danger.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Siting

PO 1.1

Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of:

- a. vegetation cover comprising trees and/or shrubs and/or unmanaged grasslands;
- b. poor access;
- c. rugged terrain;
- d. isolated location (e.g. more than 600m from a public road);
- e. inability to provide an adequate asset protection zone; and/or
- f. inability to provide a suitable site for an adequate supply of water for firefighting purposes.

DTS/DPF 1.1

None are applicable.

Built Form

PO 2.1

Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.

DTS/DPF 2.1

None are applicable.

PO 2.2

Extensions to existing buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) in the event of bushfire.

DTS/DPF 2.2

None are applicable.

Habitable Buildings

PO 3.1

To minimise the threat, impact and exposure to bushfires on life and property, residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student

accommodation and workers accommodation) are sited on the flatter portion of allotments and avoid steep slopes, especially:

- a. upper slopes;
- b. narrow ridge crests and the tops of narrow gullies; and
- c. slopes with a northerly or westerly aspect.

DTS/DPF 3.1

None are applicable.

PO 3.2

Residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation):

- a. are sited away from vegetated areas that pose an unacceptable bushfire risk; and
- b. minimise the need to clear native vegetation.

DTS/DPF 3.2

Development meets the following requirements:

- a. an asset protection zone with a minimum width of 50m already exists and can continue to be maintained around the accommodation; and
- b. the asset protection zone is contained wholly within the allotment of the development.

PO 3.3

Residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) have a dedicated area available that is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with Ministerial Building Standard SA 008.

DTS/DPF 3.3

None are applicable.

Land Division

PO 4.1

Land division is designed to:

- a. minimise fire risk danger to residents, other occupants of buildings and firefighting personnel;
- b. minimise the potential risk of damage to buildings and other property during a bushfire; and
- c. ensure each allotment contains a suitable building envelope that is located away from any vegetation that would pose an unacceptable risk in the event of bushfire.

DTS/DPF 4.1

None are applicable.

PO 4.2

Land division designed in accordance with Figure 1 to:

- (a) facilitate the movement of emergency vehicles through, within and out of bushfire risk areas;
- (b) provide a mainly continuous street pattern serving new allotments that eliminates the use of cul-de-sacs or dead end roads. Where cul-de-sacs/dead end roads are proposed an alternative emergency evacuation route is provided;

- (c) facilitate the safe and efficient evacuation of residents, visitors and other personnel during a bushfire event and not rely on fire tracks as means of evacuation; and
- (d) include at least two separate entry/exit points where 10 or more allotments are proposed.

DTS/DPF 4.2

None are applicable.

PO 4.3

Land division will ensure provision of a bushfire buffer zone that isolates residential allotments from areas that pose an unacceptable bushfire risk by containing the allotments within a perimeter road and other means such as open parks and sporting areas that achieve adequate separation (Figure 1).

DTS/DPF 4.3

None are applicable.

Vehicle Access –Roads and Driveways

PO 5.1

Roads are designed and constructed to:

- (a) facilitate the safe and effective:
 - i. use, operation and evacuation of fire-fighting and emergency personnel; and
 - ii. evacuation of residents; and
- (b) avoid the unnecessary clearance of native vegetation

DTS/DPF 5.1

Roads:

- (a) do not require the clearance of native vegetation;
- (b) are constructed with a formed, all-weather surface;
- (c) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road;
- (d) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road;
- (e) have a minimum formed road width of 6m;
- (f) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 2);
- (g) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 3);
- (h) incorporating use of cul-de-sac endings or dead end roads to not exceed 200m in length and the end of the road to have either:
 - i. a turning area with a minimum formed surface radius of 12.5m (Figure 4); or
 - ii. a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 5); and
- (i) incorporate solid, all-weather crossings that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes, over any watercourse.

PO 5.2

Where the furthest point of the building from the nearest public road is greater than 30m, driveways are designed and constructed to:

- (a) facilitate the safe and effective:
 - i. use, operation and evacuation of fire-fighting and emergency personnel; and
 - ii. evacuation of residents; and
- (b) avoid the unnecessary clearance of native vegetation

DTS/DPF 5.2

Driveways:

- (a) do not require the clearance of native vegetation;
- (b) do not exceed 600m in length;
- (c) are constructed with a formed, all-weather surface;
- (d) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8);
- (e) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway;
- (f) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the driveway;
- (g) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 2);
- (h) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 6);
- (i) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 2);
- (j) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 3);
- (k) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by incorporating at the end of the driveway either:
 - i. a loop road around the building; or
 - ii. a turning area with a minimum radius of 12.5m (Figure 4); or
 - iii. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 5).
- (l) incorporate solid, all-weather crossings that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes, over any watercourse.

Hazards (Bushfire – High Risk) Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Development will be sited and designed to minimise the threat and impact of bushfires on life and property with regard to the following risks:

- (a) potential for uncontrolled bushfire events
- (b) high levels and exposure to ember attack;
- (c) impact from burning debris;
- (d) radiant heat; and
- (e) likelihood and direct exposure to flames from a fire front.

DO 2

Activities that increase the number of people living and working in the area or where evacuation would be difficult is situated away from areas of unacceptable bushfire risk.

DO 3

To facilitate access for emergency service vehicles to protect assets and lives from bushfire danger.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use

PO 1.1

Development that significantly increases the potential for fire outbreak as a result of the spontaneous combustion of materials, spark generation or through the magnification and reflection of light are not located in areas of unacceptable bushfire risk.

DTS/DPF 1.1

None are applicable.

PO 1.2

Pre-schools, educational establishments, hospitals, retirement and supported accommodation are sited away from:

- (a) areas of unacceptable bushfire risk; and
- (b) locations where staff, children, students, residents and the public cannot be safely evacuated in the event of a bushfire.

DTS/DPF 1.2

None are applicable.

Siting

PO 2.1

Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of:

- (a) vegetation cover comprising trees and/or shrubs and/or unmanaged grasslands;
- (b) poor access;
- (c) rugged terrain;
- (d) isolated location (e.g. more than 600m from a public road);
- (e) inability to provide an adequate asset protection zone; and/or

(f) inability to provide a suitable site for an adequate supply of water for firefighting purposes.

DTS/DPF 2.1

None are applicable.

Built Form

PO 3.1

Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.

DTS/DPF 3.1

None are applicable.

PO 3.2

Extensions to existing buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) in the event of bushfire.

DTS/DPF 3.2

None are applicable.

Habitable Buildings

PO 4.1

To minimise the threat, impact and potential exposure to bushfires on life and property, residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) are sited on the flatter portion of allotments and avoid steep slopes, especially:

- (a) upper slopes;
- (b) narrow ridge crests and the tops of narrow gullies; and
- (c) slopes with a northerly or westerly aspect.

DTS/DPF 4.1

None are applicable.

PO 4.2

Residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation):

- (a) are sited away from vegetated areas that pose an unacceptable bushfire risk; and
- (b) minimise the need to clear native vegetation.

DTS/DPF 4.2

Development meets the following requirements:

- (a) an asset protection zone with a minimum width of 100m already exists and can be maintained around the accommodation; and
- (b) the asset protection zone is contained wholly within the allotment of the development.

PO 4.3

Residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) have a dedicated area available that:

- (a) is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with Ministerial Building Standard SA 008; and
- (b) includes the provision of an all-weather hardstand area in a location that:
 - i. allows fire-fighting vehicles to safely access the dedicated water supply and exit the site in a forward direction; and
 - ii. is no further than 6 metres from the dedicated water supply outlet(s).

DTS/DPF 4.3

None are applicable.

Land Division

PO 5.1

Land division for residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers accommodation) will:

- (a) be limited to those areas specifically set aside for these uses; and
- (b) ensure provision of a bushfire buffer zone that isolates residential allotments from areas that pose an unacceptable bushfire risk by containing the allotments within a perimeter road and use of other means such as open parks and sporting areas that achieve adequate separation (Figure 1).

DTS/DPF 5.1

None are applicable.

PO 5.2

Land division designed to:

- (a) minimise fire risk danger to residents, other occupants of buildings and firefighting personnel;
- (b) minimise the potential risk of damage to buildings and other property during a bushfire; and
- (c) ensure each allotment contains a suitable building envelope that is located away from any vegetation that would pose an unacceptable risk in the event of bushfire.

DTS/DPF 5.2

None are applicable.

PO 5.3

Land division designed in accordance with Figure 1 to:

- (a) facilitate the movement of emergency vehicles through, within and out of bushfire risk areas;
- (b) provide a mainly continuous street pattern serving new allotments that eliminates the use of cul-de-sacs or dead end roads. Where cul-de-sacs/dead end roads are proposed an alternative emergency evacuation route is provided;
- (c) facilitate the safe and efficient evacuation of residents, visitors and other personnel during a bushfire event and not rely on fire tracks as means of evacuation; and
- (d) include at least two separate entry/exit points where 10 or more allotments are proposed.

DTS/DPF 5.3

None are applicable.

Vehicle Access –Roads and Driveways

PO 6.1

Roads are designed and constructed to:

- (a) facilitate the safe and effective:
 - i. use, operation and evacuation of fire-fighting and emergency personnel; and
 - ii. evacuation of residents.
- (b) avoid the unnecessary clearance of native vegetation

DTS/DPF 6.1

Roads:

- (a) do not require the clearance of native vegetation;
- (b) are constructed with a formed, all-weather surface;
- (c) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road;
- (d) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road;
- (e) have a minimum formed road width of 6m;
- (f) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 2);
- (g) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 3);
- (h) incorporating use of cul-de-sac endings or dead end roads to not exceed 200m in length and the end of the road to have either:
 - i. a turning area with a minimum formed surface radius of 12.5m (Figure 4); or
 - ii. a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 5); and
- (i) incorporate solid, all-weather crossings that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes, over any watercourse.

PO 6.2

Where the furthest point of the building from the nearest public road is greater than 30m, driveways are designed and constructed to:

- (a) facilitate the safe and effective:
 - i. use, operation and evacuation of fire-fighting and emergency personnel; and
 - ii. evacuation of residents; and
- (b) avoid the unnecessary clearance of native vegetation

DTS/DPF 6.2

Driveways:

- (a) do not require the clearance of native vegetation;
- (b) do not exceed 600m in length;
- (c) are constructed with a formed, all-weather surface;
- (d) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8);
- (e) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway;
- (f) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the driveway;
- (g) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 2);

- (h) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 6);
- (i) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 2);
- (j) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 3);
- (k) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by incorporating at the end of the driveway either:
 - i. a loop road around the building; or
 - ii. a turning area with a minimum radius of 12.5m (Figure 4); or
 - iii. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 5).
- (l) incorporate solid, all-weather crossings that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes, over any watercourse.

Hazards (Bushfire – Urban Interface) Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Urban neighbourhoods that adjoin areas of General, Medium and High Bushfire Risk allow access through to bushfire risk areas, are designed to protect life and property from the threat of bushfire and the dangers posed by ember attack and facilitate evacuation to areas safe from bushfire danger.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Division

PO 1.1

Land division within the Urban Interface is designed to make provision for:

- (a) emergency vehicle access through to the bushfire risk area;
- (b) a mainly continuous street pattern serving new allotments that eliminates the use of cul-de-sacs or dead end roads. Where cul-de-sacs/dead end roads are proposed an alternative emergency evacuation route is provided;
- (c) the safe and efficient evacuation of residents, visitors and other personnel during a bushfire event and not rely on fire tracks as means of evacuation;
- (d) include at least two separate entry/exit points where 10 or more allotments are proposed; and
- (e) a bushfire buffer zone isolating residential allotments from areas of unacceptable bushfire risk by containing the allotments within a perimeter road and through other means such as open parks and sporting areas that achieve adequate separation (Figure 1).

Land Division

Figure 1 – Land Division Layouts

Hazards (Flooding) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Minimise impacts on people, property, infrastructure and the environment from exposure to flood hazard risk through limitation of development intensification.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Division

PO 1.1

Land division limited to areas where the consequences to buildings and safety are low and can be readily managed or overcome.

DTS/DPF 1.1

Land division resulting in the creation of new allotments occurs outside of areas where flood depth would exceed 0.3m above natural ground level and flood velocity would exceed 0.3m per second during a 1% AEP flood event.

PO 1.2

Allotments can be connected to a public stormwater system capable of catering for a 1% AEP flood event.

DTS/DPF 1.2

None are applicable

PO 1.3

Land is not divided unless a layout is achieved whereby roads, parking areas and development sites for each allotment are at least 0.3m above the 1% AEP flood event level, unless the land is, or can be provided with flood protection measures that are appropriate and acceptable for the intended future land use.

DTS/DPF 1.3

None are applicable

Land Use

PO 2.1

Buildings housing vulnerable people, community services facilities and emergency services are sited away from areas of unacceptable flood risk.

DTS/DPF 2.1

Pre-schools, educational establishments, retirement and supported accommodation, emergency services facilities, hospitals and prisons located outside of the 1% AEP flood area.

Flood Resilience

PO 3.1

Development avoids necessitating flood protection works through measures such as setbacks to protect development from the impacts of flooding.

DTS/DPF 3.1

None are applicable

PO 3.2

Development does not cause unacceptable impacts on any adjoining property by diversion of flood waters, increase in flood velocity or flood level, or cause an unacceptable loss of flood storage.

DTS/DPF 3.2

Development is limited to:

- (a) buildings, structures or earthworks required as part of flood protection works associated with a regional flood mitigation scheme; or
- (b) recreation area.

PO 3.3

Buildings sited, designed and constructed to prevent the entry of floodwaters in a 1% AEP flood event where the entry of flood waters is likely to result in undue damage to or compromise ongoing activities within buildings.

DTS/DPF 3.3

None are applicable

PO 3.4

Development, including outbuildings and fences, does not impede floodwaters.

DTS/DPF 3.4

None are applicable

Environmental Protection

PO 4.1

Buildings used either partly or wholly to contain or store hazardous materials designed to prevent spills or leaks leaving the confines of the building during a 1% AEP flood event to avoid potential environmental harm.

DTS/DPF 4.1

Development involving storage or disposal of hazardous materials is wholly located outside of the 1% AEP flood level.

PO 4.2

Development does not create or aggravate the potential for erosion or siltation or lead to the destruction of vegetation during a flood.

DTS/DPF 4.2

None are applicable

Site Earthworks

PO 5.1

The depth and extent of filling required to raise the finished floor level of a building does not cause unacceptable impact on any adjoining property by diversion of flood waters, an increase in flood velocity or flood level, or cause an unacceptable loss of flood storage.

DTS/DPF 5.1

None are applicable

PO 5.2

Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.

DTS/DPF 5.2

Filling for ancillary purposes:

- (a) does not exceed 100mm above existing ground level; and
- (b) is no more than 5m wide.

Access

PO 6.1

Development does not occur on land:

- (a) from which evacuation to areas not vulnerable to flood risk is not possible during a 1% AEP flood event; or
- (b) which cannot be accessed by emergency services vehicles or essential utility service vehicles during a 1% AEP flood event.

DTS/DPF 6.1

None are applicable

PO 6.2

Access driveways and tracks to significant development (i.e. dwellings, places of work, etc.) consist of a safe, all-weather trafficable surface that is accessible during a 1% AEP flood event.

DTS/DPF 6.2

None are applicable

Historic Area Overlay

Assessment Provisions (AP)

Assessment Provisions (AP)
<p>DO 1 Reinforce historic themes and characteristics through conservation and contextually responsive development, design and adaptive reuse that responds to existing coherent patterns in streetscapes and built form as expressed in the <u>Historic Area Statement</u>.</p>

Built Form

PO 1.1

The form of new buildings and structures that are visible from the public realm are consistent with the prevailing historic attributes and characteristics of the historic area.

DTS 1.1

None are applicable

PO 1.2

Development is consistent with the prevailing building and wall heights in the historic area.

DTS 1.2

None are applicable

PO 1.3

Design and architectural detailing of street facing buildings complement the prevailing characteristics in the historic area.

DTS 1.3

None are applicable

PO 1.4

Development is consistent with the prevailing front and side boundary setback pattern in the historic area.

DTS 1.4

None are applicable

PO 1.5

Materials are either consistent with or complement those within the historic area.

DTS 1.5

None are applicable

Alterations and additions

PO 2.1

Alterations and additions complement the subject building and are sited to ensure they do not dominate the primary facade, and employ a contextual design approach.

DTS 2.1

Alterations and additions are fully contained within the roof space of an existing building with no external alterations made to the building elevation facing the primary street.

PO 2.2

Encourage the adaptive reuse of buildings that complement the prevailing historic values and character of the locality, by enabling complementary changes to buildings to accommodate new land uses.

DTS 2.2

None are applicable

Ancillary development

PO 3.1

Ancillary development, including carports, outbuildings and garages, complements the historic character of the area and associated buildings.

DTS 3.1

None are applicable

PO 3.2

Ancillary development, including carports, outbuildings and garages, are located behind the building line of the principal building(s).

DTS 3.2

None are applicable

PO 3.3

Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.

DTS 3.3

None are applicable

PO 3.4

Front fencing and gates are consistent with the traditional period, style and form of the associated built form.

DTS 3.4

None are applicable

Land Division

PO 4.1

Land division creates allotments that are capable of accommodating buildings of a bulk and scale that reflect existing buildings and setbacks in the historic area.

DTS 4.1

None are applicable

Context and Streetscape Amenity

PO 5.1

The width of driveways and other vehicle access ways are consistent with the prevalent width of existing driveways of the historic area.

DTS 5.1

None are applicable

PO 5.2

Development maintains the valued landscape patterns and characteristics that contribute to the historic area, except where they compromise safety, create nuisance, or impact adversely on existing buildings or infrastructure.

DTS 5.2

None are applicable

Demolition

PO 6.1

Buildings and structures that demonstrate the historic characteristics as expressed in the Historic Area Statement are not demolished, unless:

- (a) the front elevation of the building has been substantially altered and cannot be reasonably, economically restored in a manner consistent with the building's original style; or
- (b) the building façade does not contribute to the historic character of the streetscape; or
- (c) the structural integrity or condition of the building is beyond economic repair.

DTS 6.1

None are applicable

PO 6.2

Partial demolition of a building where that portion to be demolished does not contribute to the historic character of the streetscape.

DTS 6.2

None are applicable

PO 6.3

Buildings, or elements of buildings, that do not conform with the values described in the historic areas statement may be demolished.

DTS 6.3

None are applicable

Ruins

PO 7.1

Development that conserves and complements features and ruins associated with former activities of significance including those associated with mining, farming and industry.

DTS 7.1

None are applicable

Procedural Matters (PM)

Referrals	
Development Type	Referral Body
None	None

Historic Area Statement

Historic Area Overlays identify areas that comprise unified, consistent streetscape characteristics of an identifiable historic, economic or social theme associated with an earlier era of development. They comprise built form characteristics, and at times natural features and sub-division patterns that provide a legible connection to the historic development of the local area. Development within the Overlay will preserve these attributes.

The redevelopment of existing places, through refurbishment or adaptive reuse, will maintain, and where possible enhance or reinforce, this unified, consistent historic streetscape character.

New development will be generally limited to the replacement of places that either do not contribute towards this unified, consistent historic streetscape character, or towards the rear of sites that do, so as to not adversely impact the legibility and interpretation of the prevailing historic, economic or social themes as viewed from the public realm.

Example – Large Estate

Heritage Characteristics	Prevailing Characteristics
Era of Development	-1880 to 1900. -1930 to 1940.
Subdivision Pattern	-Site areas of 1500- 3000 square metres. -Street frontages, 30 metres. -Generous front set-backs (e.g. 11 metres). -Side set-backs between 4 and 8 metres so as to maintain a total spacing between neighbouring dwelling walls, of some 12 metres.
Architectural Buildings	-Victorian and Turn-of-the-Century Villas/Mansions. -Tudors and Bungalows (1930-40's).
Materials	-Consistent with the materials contained within the architectural building.
Setting and Public Realm	-Wide streets. -Substantial trees. -Expansive allotments, street frontages and gardens. -Heywood Park.
Fencing	-Low and essentially open-style fencing. -May also include masonry pier and plinth fence with decorative open sections of up to 1.8 metres in total height.
Height	-Single storey built scale to the streetscape. -Second storey elements should be integrated sympathetically into the dwelling design.

Example – Large allotments, single level

Heritage Characteristics	Examples
Historical Period	-1900s-1920s

Subdivision Pattern	-Large allotments, fronting wide -Single-storey detached -Detached dwellings should have a primary street frontage not less than 18 metres.
Architectural Buildings	- Bungalows - Edwardian (Queen Anne) - Federation - Tudor Style
Materials	-Retention of original finishes and unpainted stone
Setting and Public Realm	-Tree lined avenues -Front gardens important design element -Landscaping around the dwelling
Fencing	-Front fencing is compatible with the period and style of the dwelling -Solid and high front fences are generally inappropriate (may be considered on roads of high traffic volume) -Lower more open fencing that allows an appreciation of the detailing of the dwelling, such as timber picket and paling, wire mesh with timber or tube framing, woven crimped wire, and masonry with galvanised steel ribbon. - Side and rear fences in traditional materials.
Height	-No more than one storey above natural ground level, except where the predominant height in the immediate locality is two storey. -In this instance development should not be more than two storeys above the natural ground level.

Example – Narrow Village

Heritage Characteristics	Examples
Historical Period	-Late 19 th Century (1870s to 1890s)
Subdivision Pattern	-Narrow allotments of varying widths -Closely spaced early small dwellings and narrow streets -Centred on the triangle created by Main North Road, Carter Street, Highbury Street and Argyle street.
Architectural Buildings	-Single fronted cottages -Attached cottages -Corner shops -Church

Materials	<ul style="list-style-type: none"> -Bluestone or sandstone with brick quoins around doors and window openings and wall corners -Sometimes rendered quoins -Side and rear walls are usually red brick or random rubble (stone) or river stone construction. -Roof cladding corrugated iron with OF profile gutters
Setting and Public Realm	<ul style="list-style-type: none"> -Village Character -Narrow Streets
Fencing	-Original front fences should be maintained and restored.
Height	- PDC refers to maximum height of 9 metres or 2 storeys.

Example – Grand/Mansion 1 – 750+

Heritage Characteristics	Prevailing Characteristics
Era and/or style of development	-Predominantly turn of the 20 th century, with valued dwellings to approximately 1940
Subdivision Pattern	<ul style="list-style-type: none"> -Site areas of 750 - 1200 square metres. -Street frontages of around 15 metres. -Front set-backs in the order of 7 metres. -Side set-backs between 1 and 4 metres so as to maintain a total spacing between neighbouring dwelling walls, of some 4metres.
Architectural Buildings	<ul style="list-style-type: none"> -Victorian and Turn-of-the-Century Villas (asymmetrical and symmetrical) -double-fronted cottages -limited complementary, Inter-war era styles
Materials	-Consistent with the materials associated with the architectural styles of the subject building and streetscape.
Setting and Public Realm	<ul style="list-style-type: none"> -Wide streets. -Substantial trees. -Expansive allotments, street frontages and gardens. -Original parks and street layouts.
Fencing	<ul style="list-style-type: none"> - Low, open fencing reflective of the architectural style of the subject building -May also include masonry pier and plinth fence with decorative open sections of up to 1.8 metres in total height.
Height	<ul style="list-style-type: none"> -Single and two storey built scale to the streetscape. -building wall heights in the order of 3.6 metres - total roof heights in the order of 5.6 metres or 6.5 metres -roof pitches in the order of 27 degrees and 35 degrees.

Example – Grand/Mansion 2 – 1200+

Heritage Characteristics	Prevailing Characteristics
Era and/or style of development	-Predominantly turn of the 20 th century, with valued dwellings to approximately 1940
Subdivision Pattern	-Site areas of 1200- 3000 square metres. -Street frontages of 30 metres or more. -Generous front set-backs (e.g. 11 metres). -Side set-backs between 4 and 8 metres so as to maintain a total spacing between neighbouring dwelling walls, of some 12 metres.
Architectural Buildings	-Victorian and Turn-of-the-Century Villas/Mansions. -1930s-1940s International Styles -Gentleman’s Tudors and Bungalows
Materials	-Consistent with the materials associated with the architectural styles of the subject building and streetscape.
Setting and Public Realm	-Wide streets. -Substantial trees. -Expansive allotments, street frontages and gardens. -Original parks and street layouts.
Fencing	- Low, open fencing reflective of the architectural style of the subject building -May also include masonry pier and plinth fence with decorative open sections of up to 1.8 metres in total height.
Height	-Single and two storey built scale to the streetscape.

Example – Township (mixed / residential)

Heritage Characteristics	Prevailing Characteristics
Era and/or style of development	- Turn of 20 th Century
Subdivision Pattern	- Traditional grid land division pattern - Within the main street/town centre, consistent setbacks and strong building line with little interruption. Buildings square to the street.
Architectural Buildings	-Within the main street/town centre, distinctive built form reflecting mix of civic, commercial and retail activities -Verandahs and parapets - Traditional railway architecture including workshops and industrial buildings - Small, humble worker’s accommodation, including single and double fronted cottages and row cottages -More prosperous stone/masonry villas surrounded by gardens/landscaping

Materials	<ul style="list-style-type: none"> -Consistent with the materials associated with the architectural styles of the subject building and streetscape. -CGI roofing -Weatherboard/fibro -Local stone/masonry
Setting and Public Realm	<ul style="list-style-type: none"> - Stone kerbing - Wide streets in original layout - Traditional parks/gardens - Maintenance of rural character and scenic views
Fencing	<ul style="list-style-type: none"> -Rural style fencing - Low, open fencing reflective of the architectural style of the subject building
Height	<ul style="list-style-type: none"> -Predominantly single storey where residential or retail -Two storeys associated with grand, civic or commercial activities -Roof pitches between 30-45 degrees, reflecting traditional styles

Historic Shipwrecks Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Historic shipwrecks and historic relics protected from encroaching development.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

General

PO 1.1

Development located and designed to avoid potential impacts on historic shipwrecks and historic relics.

DTS/DPF 1.1

Development involving impact to the surface or subsoil of land or sea/river floor is not located:

- a. seaward of the mean high water mark; or
- b. within 15m landward of the existing banks of the River Murray.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
Development that may involve impact to the surface or subsoil of land or the floor of a sea, lake or river.	The Minister responsible for administering the <i>Historic Shipwrecks Act 1981</i>	To provide expert assessment and direction to the relevant authority on the potential impacts of development on, or in proximity to, historic shipwrecks or relics protected under the relevant Act.

Key Outback and Rural Route Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Safe and efficient movement of vehicle and freight traffic on key outback and rural routes.

DO 2

Provision of safe and efficient vehicular access to and from key outback and rural routes.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Access – Safe Entry and Exit (Traffic Flow)

PO 1.1

Access points designed to allow safe entry and exit to and from a site to meet the needs of development, to ensure traffic flow interference associated with access movements is minimised.

DTS/DPF 1.1

An access point is located outside of a Township Zone and is designed to ensure:

- (a) the following for the largest vehicle expected to access the site:
 - i. entry and exit movements are left turn only;
 - ii. access to and from the site is in a forward direction, with on-site manoeuvring available through circulation around the site or no more than a 3-point turn;
 - iii. vehicles cross the property boundary at an angle between 70 and 90 degrees; and
 - iv. iv) access to and from the site using the kerbside lane of the road; and
- (b) where the access point services or is intended to service:
 - ii. a single dwelling, the access point has a width of no more than 4m (measured at the site boundary); or
 - iii. development other than a single dwelling, the access point has:
 - A. a width of at least 6.0 m (measured at the site boundary) where vehicles 12.5m or less in length are expected to access the site; or
 - B. a width of at least 8.0m (measured at the site boundary) where vehicles over 12.5m in length are expected to access the site; and
- (c) the access point is located 10m or more from any roadside infrastructure or trees.

Access – On-Site Queuing

PO 2.1

Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues are contained fully within the boundaries of the development site, to minimise interruption on the functional performance of the road and safe vehicle movement.

DTS/DPF 2.1

An access point:

- a. will be used by vehicles no greater than 12.5m in length and is not connected to internal intersections, car parking spaces, car park isles or any internal obstructions within 20m of the access point; or
- b. serves a single dwelling and there are no internal driveway intersections car parking spaces or gates within 6.0m of the access point

Access - Existing Access Points

PO 3.1

Existing access points designed to accommodate the type and volume of traffic likely to be generated by the development.

DTS/DPF 3.1

An existing access point:

- a. will not service and is not intended to service more than 6 dwellings; or
- b. will service development that will not result in:
 - i. an increase in traffic using an existing access point that is greater than 10% of the traffic volumes using the existing access prior to the development or 60 vehicles per day (whichever is the lesser); or
 - ii. a larger class of vehicle expected to access the site using the existing access.

Access – Location (Spacing)

PO 4.1

New access points are widely spaced apart from any existing access point or public road junction to not impede traffic flow and ensure safe and efficient road operating conditions.

DTS/DPF 4.1

Where access from an alternative road at least 25m from the Key Outback and Rural Route is not available, a new access point is:

- a. not located on a section affected by double barrier lines between either edge of the access point; and
- b. at least the following distance from a public road junction or railway, or terminating / merging lane or another access point:
 - i. 110 km/h road – 325m
 - ii. 100 km/h road – 280m
 - iii. 90 km/h road – 240m
 - iv. 80 km/h road – 200m
 - v. 70 km/h road – 165m
 - vi. 60 km/h road – 135m
 - vii. 50km/h or less road – 105m

Access – Location (Sight Lines)

PO 5.1

Access points located and designed to ensure appropriate sight distances are provided so that drivers:

- (a) on the road approaching the access point are able to recognise the presence of the access point and/or see a vehicle turning into or out of the access point in time to slow down or stop in a safe and controlled manner; and
- (b) exiting the access point onto the road can see approaching vehicles to avoid potential conflict.

DTS/DPF 5.1

Drivers approaching or exiting a new access point have an unobstructed line of sight to or from the new access point in accordance with the following distances:

- i. 110 km/h road – 325m
- ii. 100 km/h road – 280m
- iii. 90 km/h road – 240m

- iv. 80 km/h road – 200m
- v. 70 km/h road – 165m
- vi. 60 km/h road – 135m; and
- vii. 50km/h or less road – 105m.

Access – Mud and Debris

PO 6.1

Access points constructed to minimise mud or other debris being carried or transferred onto roads, to ensure safe road operating conditions.

DTS/DPF 6.1

The access way is spray sealed (except where the access point is for a single dwelling, or where the Key Outback or Rural Route is unsealed) from the road to a point not less than 10m into the site.

Access – Stormwater

PO 7.1

Access points designed to minimise negative impact on roadside drainage of water.

DTS/DPF 7.1

Development does not:

- (a) decrease the capacity of an existing drainage point; or
- (b) restrict or prevent the flow of stormwater to an existing drainage point and system.

Building on Road Reserve

PO 8.1

Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users.

DTS/DPF 8.1

No encroachment of buildings or structures onto, above or below the road reserve.

Public Road Junctions

PO 9.1

New junctions with public roads (including the opening of unmade public road junctions) and modifications to existing road junctions located and designed to ensure safe and efficient road operating conditions.

DTS/DPF 9.1

Development does not involve creation of a new junction with a public road, opening of an unmade public road junction or modification to an existing public road junction.

Corner Cut-Offs

PO 10.1

Development located and designed to ensure drivers can safely turn into and out of public road junctions.

DTS/DPF 10.1

None are applicable.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
<p>Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that:</p> <ul style="list-style-type: none"> (a) creates a new access or junction; or (b) proposes either of the following (except where deemed to be minor in the opinion of the relevant authority): <ul style="list-style-type: none"> i. alters an existing access or public road junction; or ii. may change the nature of vehicular movements or increase the number or frequency of movements through an existing access; <p>on a Key Outback or Rural Routes road or within 25m of an intersection with such a road.</p>	Commissioner of Highways	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.

Key Railway Crossings Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Safe, efficient and uninterrupted operation of key railway crossings.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Access Design and Function

PO 1.1

Site access does not interfere or impact on the safe operation of a railway crossing.

DTS/DPF 1.1

Development does not involve a new or modified access or an increase in traffic through an existing access that is located within the following distance from a railway crossing:

- i. 110 km/h road – 190m
- ii. 100 km/h road – 165m
- iii. 90 km/h road – 140m
- iv. 80 km/h road – 110m
- v. 70 km/h road – 90m
- vi. 60 km/h road – 70m
- vii. 50km/h or less road – 50m

Local Heritage Place Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Development maintains the heritage and cultural values of Local Heritage Places through conservation, ongoing use and adaptive reuse.

Built Form

PO 1.1

The form of new buildings and structures maintains the heritage values of the Place.

DTS 1.1

None are applicable.

PO 1.2

Massing and scale of development maintains the heritage values of the Place.

DTS 1.2

None are applicable.

PO 1.3

Design and architectural detailing maintains the heritage values of the Place.

DTS 1.3

None are applicable.

PO 1.4

Development is consistent with boundary setbacks and setting.

DTS 1.4

None are applicable.

PO 1.5

Materials and colours are either consistent with or complement the heritage values of the Place.

DTS 1.5

None are applicable.

PO 1.6

New buildings are not placed or erected between the front street boundary and the façade of a Local Heritage Place.

DTS 1.6

None are applicable.

PO 1.7

Development of a Local Heritage Place retains elements contributing to its heritage value.

DTS 1.7

None are applicable.

Alterations and Additions

PO 2.1

Alterations and additions complement the subject building and are sited to be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the Place or its setting.

DTS 2.1

None are applicable.

PO 2.2

Encourage the adaptive reuse of Local Heritage Places by enabling compatible changes to buildings to accommodate new land uses.

DTS 2.2

None are applicable.

Ancillary Development

PO 3.1

Ancillary development, including carports, outbuildings and garages, complements the heritage values of the Place.

DTS 3.1

None are applicable.

PO 3.2

Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principle building(s).

DTS 3.2

None are applicable.

PO 3.3

Advertising and advertising hoardings should be designed to complement the Local Heritage Place, be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the building or its setting.

DTS 3.3

None are applicable.

Land Division

PO 4.1

Land division creates allotments that:

- (a) are compatible with the surrounding pattern of subdivision of the Local Heritage Place;
- and

- (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the Local Heritage Place.

DTS 4.1

None are applicable.

Landscape Context and Streetscape Amenity

PO 5.1

Individually heritage listed trees, parks, historic gardens and memorial avenues retained unless:

- (a) trees / plantings are, or have the potential to be, a danger to life or property; or
- (b) trees / plantings are significantly diseased and their life expectancy is short.

DTS 5.1

None are applicable.

Demolition

PO 6.1

Local Heritage Places are not demolished, destroyed or removed in total or in part unless either of the following apply:

- (a) the portion of the Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value;
- (b) the structural integrity or condition of the building represents an unacceptable risk to public or private safety and is irredeemably beyond repair.

DTS 6.1

None are applicable.

PO 6.2

The demolition, destruction or removal of a building, portion of a building or other feature or attribute is appropriate where it does not contribute to the heritage values of the Place.

DTS 6.2

None are applicable.

Conservation Works

PO 7.1

Conservation works to the exterior of a Place match existing materials to be repaired and utilise traditional work methods.

DTS 7.1

None are applicable.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral

Major Urban Transport Routes Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Safe and efficient operation of major urban transport routes for all road users.

DO 2

Provision of safe and efficient access to and from major urban transport routes.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Access – Safe Entry and Exit (Traffic Flow)

PO 1.1

Access points designed to allow safe entry and exit to and from a site to meet the needs of development, to ensure traffic flow interference associated with access movements is minimised.

DTS/DPF 1.1

An access point is designed to ensure:

- a. the following for the largest vehicle expected to access the site:
 - (ii) entry and exit movements are left turn only;
 - (iii) access to and from the site is in a forward direction, with on-site manoeuvring available through circulation around the site of no more than a 3-point turn;
 - (iv) vehicles cross the property boundary at an angle between 70 degrees and 90 degrees; and
- b. access to and from the site fully within the kerbside lane of the road; and where the access point services, or is intended to service:
 - (ii) a single dwelling, the access point has a width of between 3m and 4m (measured at the site boundary); or
 - (iii) between 2 and 6 dwellings, the access point has a width of between 6m and 7m (measured at the site boundary); or
 - (iv) over 6 dwellings or any other non-residential land uses, then:
 - A. where vehicles 6.4m or less are expected to access the site, the access point has a width of between 7m and 10m (measured at the site boundary); or
 - B. where vehicles up to 8.8m in length are expected to access the site, the access point has a width of between 12m and 16m (measured at the site boundary); and
- c. the access point is located 1m or more from any roadside infrastructure or trees.

Access – On-Site Queuing

PO 2.1

Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues are contained fully within the boundaries of the development site, to minimise interruption on the functional performance of the road and safe vehicle movement.

DTS/DPF 2.1

An access point:

- (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point; or
- (b) will service development that will generate less than 60 vehicle movements per day; and

- i. where vehicles no greater than 6.4m in length are expected to access the site, there are no internal driveways, intersections, car parking spaces, car park isles or any other internal obstructions within 10.5m of the access point; or
- ii. where vehicles no greater than 8.8m in length are expected to access the site, there are no internal driveways, intersections, car parking spaces, car park isles or any other internal obstructions within 14.5m of the access point; or
- iii. where vehicles over 8.8m in length are expected to access the site, no Deemed-to-Satisfy Criteria applies.

Access – Existing Access Points

PO 3.1

Existing access points designed to accommodate the type and volume of traffic likely to be generated by the development.

DTS/DPF 3.1

An existing access point:

- (a) will not service and is not intended to service more than 6 dwellings; or
- (b) will service development that will not result in:
 - i. an increase in traffic using an existing access point that is greater than 10% of the traffic volumes using the existing access prior to the development or 60 vehicles per day (whichever is the lesser); or
 - ii. a larger class of vehicle expected to access the site using the existing access.

Access – Location (Spacing)

PO 4.1

New access points are widely spaced apart from any existing access point or public road junction to not impede traffic flow and ensure safe and efficient operating conditions are maintained on the road.

DTS/DPF 4.1

Where access from an alternative local road at least 25m from the Major Urban Route is not available, and the access is not located on a Controlled Access Road, a new access point is:

- (a) not located on a section affected by double barrier lines between either edge of the access point; and
- (b) at least the following distance from a public road junction, or terminating / merging lane on a public road:
 - B. 110 km/h road – 325m
 - C. 100 km/h road – 280m
 - D. 90 km/h road – 240m
 - E. 80 km/h road – 200m
 - F. 70 km/h road – 165m
 - G. 60 km/h road – 135m
 - H. 50km/h or less road – 105m; and
- (c) at least the following distance from another private (non-public road) access point:
 - A. 110 km/h road – 190m
 - B. 100 km/h road – 165m
 - C. 90 km/h road – 140m
 - D. 80 km/h road – 110m
 - E. 70 km/h road – 90m
 - F. 60 km/h road – 70m

G. 50km/h or less road – 50m

Access – Location (Sight Lines)

PO 5.1

Access points located and designed to ensure appropriate sight distances are provided so that drivers:

- (a) on the road approaching the access point are able to recognise the presence of the access point and/or see a vehicle turning into or out of the access point in time to slow down or stop in a safe and controlled manner; and
- (b) exiting the access point onto the road can see approaching vehicles to avoid potential conflict.

DTS/DPF 5.1

Drivers approaching or exiting a new access point have an unobstructed line of sight to or from the new access point in accordance with the following distances:

- (a) 110 km/h road – 325m
- (b) 100 km/h road – 280m
- (c) 90 km/h road – 240m
- (d) 80 km/h road – 200m
- (e) 70 km/h road – 165m
- (f) 60 km/h road – 135m; and
- (g) 50km/h or less road – 105m.

Access – Mud and Debris

PO 6.1

Access points constructed to minimise mud or other debris being carried or transferred onto the road, to ensure safe road operating conditions.

DTS/DPF 6.1

None are applicable.

Access – Stormwater

PO 7.1

Access points designed to minimise negative impact on roadside drainage of water.

DTS/DPF 7.1

Development does not:

- (a) decrease the capacity of an existing drainage point; or
- (b) restrict or prevent the flow of stormwater to an existing drainage point and system.

Building on Road Reserve

PO 8.1

Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users.

DTS/DPF 8.1

No encroachment of buildings or structures onto, above or below the road reserve.

Public Road Junctions

PO 9.1

New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road operating conditions.

DTS/DPF 9.1

Development does not involve creation of a new junction with a public road, opening of an unmade public road junction or modification to an existing public road junction.

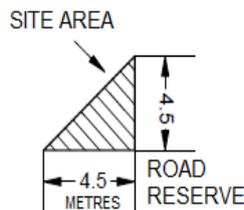

Corner Cut-Offs

PO 10.1

Development located and designed to ensure drivers can safely turn into and out of public road junctions.

DTS/DPF 10.1

Development does not involve building work, or building work is located wholly outside the land shown as “Site Area” in the following diagram:

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
<p>Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that:</p> <ul style="list-style-type: none"> b. creates a new access or junction; or c. proposes either of the following (except where deemed to be minor in the opinion of the relevant authority): <ul style="list-style-type: none"> i. alters an existing access or public road junction; or ii. may change the nature of vehicular movements or increase the number or frequency of movements through an existing access; <p>on a Major Urban Traffic Route road or within 25m of an intersection with such a road.</p>	Commissioner of Highways	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.

Marine Parks (Managed Use) Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Protection of marine habitats and biodiversity through limiting development to coastal infrastructure (jetties, marinas, pontoons), aquaculture, tourism, recreation and renewable energy facilities.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use

PO 1.1

Development does not unduly harm marine habitats, biodiversity or the functioning of ecosystems.

DTS/DPF 1.1

None are applicable.

Mount Lofty Ranges Catchment (Area 1) Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Safeguard Greater Adelaide's public water supply by ensuring development has a neutral or beneficial effect on the quality of water harvested from the Mount Lofty Ranges.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Water Quality

PO 1.1

Development results in a neutral or beneficial effect on the quality of water draining from the site.

DTS/DPF 1.1

None are applicable.

Wastewater

PO 2.1

Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.

DTS/DPF 2.1

Development results in:

- a. a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards; or
- b. an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.

PO 2.2

Surface and groundwater protected from wastewater discharge contamination.

DTS/DPF 2.2

All components of an effluent disposal area are:

- a) setback 50 metres or more from a watercourse;
- b) located on land with a slope no greater than 1-in-5 (20%);
- c) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table; and
- d) above the 10% AEP flood level.

Stormwater

PO 3.1

Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates.

DTS/DPF 3.1

None are applicable.

PO 3.2

Stormwater run-off from areas not likely to be subject to contamination diverted away from areas that could cause contamination.

DTS/DPF 3.2

None are applicable

PO 3.3

Contaminated stormwater treated prior to discharge from the site.

DTS/DPF3.3

None are applicable.

PO 3.4

Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality.

DTS/DPF 3.4

Development includes:

- a. rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings;
or
- b. rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100sqm.

PO 3.5

Stormwater from dwelling additions captured to protect water quality.

DTS/DPF 3.5

Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.

PO 3.6

Stormwater from shops and tourist accommodation managed to protect water quality.

DTS/DPF 3.6

Shops and tourist accommodation:

- (a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores;
- (b) are located on land with a slope not exceeding 20%;
- (c) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L; and
- (d) includes swales that divert clean stormwater away from areas where it could be contaminated.

PO 3.7

Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.

DTS/DPF 3.7

Horse keeping and low intensity animal husbandry:

- (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores;
- (b) is located on land with a slope not exceeding 10%;
- (c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L; and
- (d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be contaminated.

PO 3.8

Stormwater from horticulture is managed to protect water quality.

DTS/DPF 3.8

Horticulture:

- (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores;
- (b) is located on land with a slope not exceeding 10%; and
- (c) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be contaminated.

PO 3.9

Stormwater from excavated and filled areas is managed to protect water quality.

DTS/DPF 3.9

Excavation and/or filling:

- (a) is located 50m or more from watercourses;
- (b) does not involve excavation exceeding a vertical height of 0.75m;
- (c) does not involve filling exceeding a vertical height of 0.75m; and
- (d) does not involve a total combined excavation and filling vertical height of 1.5m.

Landscapes and Natural Features

PO 4.1

Development minimises the need to modify landscapes and natural features.

DTS/DPF 4.1

None are applicable.

PO 4.2

Development includes revegetation with locally indigenous plant species to increase native vegetation cover.

DTS/DPF 4.2

None are applicable.

Land Division

PO 5.1

Land division does not result in an increased risk of pollution to surface or underground water.

DTS/DPF 5.1

Land division:

- (a) does not create additional allotments;
- (b) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures; or
- (c) is for realignment of allotment boundaries in order to improve management of the land for primary production and/or conservation of natural features.

PO 5.2

Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system that cannot realistically satisfy South Australian standards for wastewater management and disposal.

DTS/DPF 5.2

None are applicable.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land.	The Minister responsible for the administration of the <i>Natural Resources Management Act 2004</i>	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources.
<p>Development that:</p> <p>(a) is not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure; and</p> <p>(b) that includes any of the following:</p> <ul style="list-style-type: none"> i. land division creating one or more additional allotments, either partly or wholly within the area of the overlay; ii. function centre, with more than 75 seats for customer dining purposes; iii. shops, where: <ul style="list-style-type: none"> a. it is a restaurant with more than 40 seats, or b. it is a restaurant (more than 30 seats) and cellar door; iv. Dwelling where a habitable dwelling or tourist accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation on the same allotment); v. Tourist accommodation where a habitable dwelling or tourist accommodation already exists on the 	Environment Protection Authority	To provide expert technical assessment and direction to the relevant authority on the assessment of the potential harm from pollution and waste aspects arising from activities of environmental significance and other activities that have the potential to cause serious environmental harm.

Referrals

Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Safeguard Greater Adelaide’s public water supply by ensuring development has a neutral or beneficial effect on the quality of water harvested from the Mount Lofty Ranges.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Water Quality

PO 1.1

Development results in a neutral or beneficial effect on the quality of water draining from the site.

DTS/DPF 1.1

None are applicable.

Wastewater

PO 2.1

Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.

DTS/DPF 2.1

Development results in:

- (a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards; or
- (b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.

PO 2.2

Surface and groundwater protected from wastewater discharge contamination.

DTS/DPF 2.2

All components of an effluent disposal area are:

- a) setback 50 metres or more from a watercourse;
- b) located on land with a slope no greater than 1-in-5 (20%);

- c) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table;
and
- d) above the 10% AEP flood level.

Stormwater

PO 3.1

Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates.

DTS/DPF 3.1

None are applicable.

PO 3.2

Stormwater run-off from areas not likely to be subject to contamination diverted away from areas that could cause contamination.

DTS/DPF 3.2

None are applicable.

PO 3.3

Contaminated stormwater treated prior to discharge from the site.

DTS/DPF 3.3

None are applicable.

PO 3.4

Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality.

DTS/DPF 3.4

Development includes:

- (e) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings;
or
- (f) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100sqm.

PO 3.5

Stormwater from dwelling additions captured to protect water quality.

DTS/DPF 3.5

Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.

PO 3.6

Stormwater from shops and tourist accommodation managed to protect water quality.

DTS/DPF 3.6

Shops and tourist accommodation:

- (a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores;
- (b) are located on land with a slope not exceeding 20%
- (c) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L; and
- (d) includes swales that divert clean stormwater away from areas where it could be contaminated.

PO 3.7

Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.

DTS/DPF 3.7

Horse keeping and low intensity animal husbandry:

- (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores;
- (b) is located on land with a slope not exceeding 10%;
- (c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L; and
- (d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be contaminated.

PO 3.8

Stormwater from horticulture is managed to protect water quality.

DTS/DPF 3.8

1 Horticulture:

- (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores;
- (b) is located on land with a slope not exceeding 10%; and
- (c) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be contaminated.

PO 3.9

Stormwater from excavated and filled areas is managed to protect water quality.

DTS/DPF 3.9

Excavation and/or filling:

- (a) is located 50m or more from watercourses;
- (b) does not involve excavation exceeding a vertical height of 0.75m;
- (c) does not involve filling exceeding a vertical height of 0.75m; and
- (d) does not involve a total combined excavation and filling vertical height of 1.5m.

Landscapes and Natural Features

PO 4.1

Development minimises the need to modify landscapes and natural features.

DTS/DPF 4.1

None are applicable.

PO 4.2

Development includes revegetation with locally indigenous plant species to increase native vegetation cover.

DTS/DPF 4.2

None are applicable.

Land Division

PO 5.1

Land division does not result in an increased risk of pollution to surface or underground water.

DTS/DPF 5.1

Land division:

- (a) does not create additional allotments;
- (b) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures; or
- (c) is for realignment of allotment boundaries in order to improve management of the land for primary production and/or conservation of natural features.

PO 5.2

Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system that cannot realistically satisfy South Australian standards for wastewater management and disposal.

DTS/DPF 5.2

None are applicable.

Procedural Matters (PM)

Murray-Darling Basin Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Sustainable water use in the Murray-Darling Basin area.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

PO 1.1

All development, but in particular development involving:

- a. horticulture;
- b. activities requiring irrigation;
- c. aquaculture;
- d. industry;
- e. intensive animal husbandry;

- f. horse keeping; or
- g. commercial forestry

having a lawful, sustainable and reliable water supply that does not place undue strain on water resources in the Murray-Darling Basin.

DTS/DPF 1.1

None are applicable.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
Development involving: <ul style="list-style-type: none"> (a) horticulture; (b) activities requiring irrigation; (c) aquaculture; (d) industry; (e) intensive animal husbandry; (f) horse keeping; (g) commercial forestry; where the development may require water to be taken from the River Murray within the meaning of the <i>River Murray Act 2003</i> under a water license under the <i>Natural Resources Management Act 2004</i> and applied to land within the Murray-Darling Basin.	Minister for the time being administering the <i>River Murray Act 2003</i> .	To provide expert technical assessment and direction to the relevant authority on matters regarding the taking of water to ensure development is undertaken sustainably in the Murray-Darling Basin.

Native Vegetation Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Protect, retain and restore areas of native vegetation.

Performance Outcome (PO) • Deemed to Satisfy Criteria (DTS)
(required for development to be classified as Deemed-to-Satisfy)

- Designated Performance Feature (DPF)

(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)

Environmental Protection

PO 1.1

Development avoids, or where it cannot be practically avoided, minimises the clearance of native vegetation taking into account the siting of buildings, access points, bushfire protection measures and building maintenance.

DTS / DPF 1.1

An application is accompanied by:

- (a) a declaration stating that the proposal will not, or would not, involve clearance of native vegetation under the Native Vegetation Act 1991, including any clearance that may occur:
 - (i) in connection with a relevant access point and / or driveway;
 - (ii) within 10m of a building (other than a residential building or tourist accommodation);
 - (iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control; and/or
 - (iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area; or
- (b) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the clearance is categorised as 'low level clearance'.

PO 1.2

Native vegetation clearance in association with development avoids the following:

- (a) significant wildlife habitat and movement corridors;
- (b) of rare, vulnerable or endangered plants species;
- (c) that is significant because it is located in an area which has been extensively cleared; or
- (d) that is growing in, or in association with, a wetland environment.

None are applicable.

PO 1.3

Intensive animal husbandry and agricultural activities are sited, setback and designed to minimise impacts on native vegetation, including impacts on native vegetation in State Significant Native Vegetation Areas, from:

- (a) the spread of pest plants and phytophthora;
- (b) the spread of non-indigenous plants species;
- (c) excessive nutrient loading of the soil or arising from surface water runoff;
- (d) soil compaction; or
- (e) chemical spray drift.

DTS / DPF 1.3

All classes of development, other than the following located within 500 metres of a boundary of an area identified in the State Significant Native Vegetation Areas Overlay:

- (a) horticulture;
- (b) intensive animal husbandry;
- (c) dairy;
- (d) commercial forestry; or
- (e) aquaculture.

Land division

PO 2.1

Land division that does not result in the fragmentation of land containing native vegetation, or necessitate the clearance of native vegetation, unless such clearance is considered minor, taking into account the location of allotment boundaries, accessways, fire breaks, boundary fencing, and potential building siting or the like.

DTS / DPF 2.1

Land division where:

- (a) an application is accompanied by:
 - (i) a declaration stating that none of the allotments in the proposed plan of division contain native vegetation under the Native Vegetation Act 1991; or
 - (ii) a declaration stating that no native vegetation clearance under the Native Vegetation Act 1991 will be required as a result of the division of land; or

(iii) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the vegetation to be cleared is categorised as 'low level clearance'.

(b) an application for land division is being considered concurrently with a proposal to develop each allotment which will satisfy, or would satisfy, the requirements of DTS / DPF 1.1, including any clearance that may occur; or

(c) the division is to support a Heritage Agreement under the Native Vegetation Act 1991 or the Heritage Places Act 1993.

Procedural Matters (PM)

Referrals

Class of Development / Activity	Referral Body	Purpose of Referral
---------------------------------	---------------	---------------------

Except where all of the relevant deemed-to-satisfy criteria are met, the following:

(a) all classes of development where a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 in connection with a development application categorises the clearance, or potential clearance, as 'major level clearance'.

Native Vegetation Council

To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation.

State Significant Native Vegetation Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Protect, retain and restore significant areas of native vegetation.

Performance Outcome (PO) • Deemed to Satisfy Criteria (DTS)

(required for development to be classified as Deemed-to-Satisfy)

- Designated Performance Feature (DPF)

(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)

Environmental Protection

PO 1.1

Development enhances biodiversity and habitat values through revegetation and avoiding native vegetation clearance except to promote an appreciation and awareness of wildlife areas, including visitor parking and amenities, or for the administration and management of a reserve or park established for the protection and conservation of wildlife.

DTS / DPF 1.1

An application is accompanied by:

- (a) a declaration stating that the proposal will not, or would not, involve clearance of native vegetation under the Native Vegetation Act 1991, including any clearance that may occur:
 - (i) in connection with a relevant access point and / or driveway;
 - (ii) within 10m of a building (other than a residential building or tourist accommodation);
 - (iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control; and/or
 - (iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area; or
- (b) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the clearance is categorised as 'low level clearance'.

Land division

PO 2.1

Land division that contributes to the conservation, protection and enhancement of native vegetation.

DTS / DPF 2.1

Land division to:

- (a) create a public road or a public reserve where the application is accompanied by a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 in which the extent of

native vegetation clearance proposed to be undertaken in connection with the division is categorised as 'low level clearance'; or

(b) realign allotment boundaries to incorporate land into a park or reserve established under the National Parks and Wildlife Act 1972.

Procedural Matters (PM)

Referrals

Class of Development / Activity	Referral Body	Purpose of Referral
---------------------------------	---------------	---------------------

Except where all of the relevant DTS / DPF are met, the following:

(a) land division where a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 in connection with a development application categorises the clearance, or potential clearance, as 'moderate level clearance' or 'major level clearance';

(b) all other classes of development. Native Vegetation Council

To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation.

Noise and Air Emissions Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Protect community health and amenity from adverse impacts of noise and air emissions.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Siting and Design

PO 1.1

Noise and air quality sensitive development located adjacent to high noise and/or air pollution sources designed and sited to shield sensitive receivers from the emission source using measures such as:

- (a) placing buildings containing non-sensitive receivers (such as retail and commercial) between the emission source and sensitive receivers;
- (b) within individual buildings, placing rooms more sensitive to air quality and noise impacts (such as living rooms and bedrooms) further away from the emission source;
- (c) providing appropriate separation or erecting noise attenuation barriers, provided the requirements for safety, urban design and access can be met;
- (d) the use building design elements such as podiums and jutting, deep or enclosed balconies (including with solid balustrades), provided the requirements for safety, urban design and access can be met.

DTS/DPF 1.1

None are applicable

PO 1.2

Air quality sensitive development located adjacent to high air pollution sources use building design elements such as varying building heights, widths, articulation, setbacks and shapes to increase wind turbulence and the dispersion of air pollutants, provided wind impacts on pedestrian amenity are acceptable.

DTS/DPF 1.2

None are applicable

PO 1.3

Noise and air quality sensitive development located adjacent to high noise and/or air pollution sources locate private open space (including ground level courtyards and balconies), common open space and outdoor play areas within educational establishments and pre-schools away from the emission source.

DTS/DPF1.3

None are applicable

Procedural Matters (PM)

Referrals

(ii) incorporate a moving or changing display or message; or (iii) incorporate a flashing light.		

Prescribed Surface Water Area Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Sustainable water use in prescribed surface water areas.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

PO 1.1

Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.

DTS/DPF 1.1

None are applicable.

PO 1.2

All development, but in particular development involving:

- (a) horticulture;
- (b) activities requiring irrigation;
- (c) aquaculture;
- (d) industry;
- (e) intensive animal husbandry; and
- (f) commercial forestry

having a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed surface water areas.

DTS/DPF 1.2

None are applicable.

Procedural Matters (PM)

RAMSAR Wetlands Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Protection of recognised RAMSAR Wetlands.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

General

PO 1.1

Development does not lead to significant negative impacts on RAMSAR wetland habitat.

DTWS/DPF 1.1

None are applicable.

PO 1.2

Development adjacent to RAMSAR wetlands maintains or establishes landform and vegetated corridor links between RAMSAR areas where possible.

DTS/DPF 1.2

None are applicable.

PO 1.3

Development within designated 'RAMSAR Reserves' does not adversely impact upon wetland habitat.

DTS/DPF 1.3

None are applicable.

PO 1.4

Buildings or structures not located on RAMSAR wetlands.

DTS/DPF 1.4

None are applicable.

PO 1.5

Development does not cause a significant change in the hydrological regime of RAMSAR wetlands, including:

- (a) a change in volume, timing, duration and frequency of ground and surface water flows to and within the wetland; or
- (b) a change in the level of salinity, pollutants, nutrients or water temperature.

DTS/DPF 1.5

None are applicable.

PO 1.6

Development designed to minimise the cumulative impacts on RAMSAR wetlands from frequent jetties, vegetation clearance and dredging.

DTS/DPF 1.6

None are applicable.

PO 1.7

Development does not result in the disruption of the breeding, feeding, migration or resting behaviour of an ecologically significant proportion of the population of a migratory or resident species.

DTS/DPF 1.7

None are applicable.

Land Division

PO 2.1

Land division supports the management or improvement of the natural environment and does not result in any additional allotments within a RAMSAR wetland.

DTS/DPF 2.1

None are applicable.

Regulated Tree Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

The conservation of regulated trees to provide aesthetic and environmental benefits and to mitigate tree loss through appropriate development and redevelopment.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Tree Retention and Health

PO 1.1

Regulated trees are retained where they make an important visual contribution to local character and amenity.

DTS / DPF 1.1

None are applicable.

PO 1.2

Regulated trees listed as rare or endangered under the *National Parks and Wildlife Act 1972* are conserved.

DTS / DPF 1.2

A tree not listed as rare or endangered.

PO 1.3

A tree damaging activity not in connection with other development is undertaken to:

- (a) remove a diseased tree where its life expectancy is short;
- (b) mitigate an unacceptable risk to public or private safety due to limb drop or the like;
- (c) rectify or prevent extensive damage to a building of value :
 - (i) a Local Heritage Place;
 - (ii) a State Heritage Place;
 - (iii) a substantial building of value;

and there is no reasonable alternative to rectify or prevent such damage other than to undertake a tree damaging activity;

- (d) reduce an unacceptable hazard associated with a tree within 20m of an existing residential, tourist accommodation or other habitable building from bushfire;
- (e) treat disease or otherwise in the general interests of the health of the tree;
- (f) maintain the aesthetic appearance and structural integrity of the tree.

DTS / DPF 1.3

None are applicable.

PO 1.4

A tree damaging activity in connection with other development is undertaken to accommodate the reasonable development of land in accordance with the relevant zone or subzone where it might not otherwise be possible and, in the case of a significant tree, all reasonable development options and design solutions have been considered to prevent substantial tree-damaging activity occurring.

DTS / DPF 1.4

None are applicable.

Ground work affecting trees

PO 2.1

Regulated trees, including their root systems, are not unduly compromised by excavation and / or filling of land, or the sealing of surfaces within the vicinity of the tree to support their retention and health.

DTS / DPF 2.1

None are applicable.

Land Division

PO 3.1

Land division results in an allotment configuration that enables its subsequent development and the retention of regulated trees as far as is reasonably practicable.

DTS/DPF 3.1

Land division where:

(a) there are no regulated trees located within or adjacent to the plan of division; or the application demonstrates that an area exists to accommodate subsequent development of proposed allotments after an allowance has been made for a tree protection zone around any regulated tree within and adjacent to the plan of division.

Procedural Matters (PM)

Resource Extraction Protection Area Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Protection of current and future state significant resource extraction activities by ensuring development has regard to potential environmental and amenity impacts generated by the lawful operation of proximate mines and quarries.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Protection of Strategic Resources

PO 1.1

Long-term availability of and ability to extract resources is maintained by ensuring development involving sensitive receivers is:

- (a) located away from areas which may be subject to unacceptable noise, dust or vibration emissions generated by current or future resource extraction activities; or
- (b) able to adequately mitigate impacts of noise, dust or vibration emissions through design techniques such as:
 - (i) locating residential accommodation the greatest distance practicable from the resource extraction activity;
 - (ii) placing buildings containing non-sensitive receivers between the resource extraction activity and sensitive receivers;
 - (iii) placing rooms more sensitive to air, noise and vibration impacts (e.g. bedrooms) further away from the resource extraction activity; and / or
 - (iv) providing private or common open space adjacent a building facade that shields the space from impacts of the resource extraction activity.

DTS/DPF 1.1

Development does not incorporate:

- (a) a sensitive receiver;
- (b) alterations or additions to a sensitive receiver which increase the floor area of such buildings by 10% or more; or
- (c) land division for the purposes of accommodating a sensitive receiver.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
<p>Where located within the area of the Resource Extraction Zone all forms of development except:</p> <ul style="list-style-type: none"> (a) agricultural building; (b) boundary realignment/adjustment; (c) farming; (d) fence; (e) horse keeping; (f) horticulture; (g) mushroom production; or (h) protective netting structure. 	Minister responsible for administering the Mining Acts	To provide expert assessment and direction to the relevant authority on the potential for development to adversely impact upon the lawful continued operation of resource extraction operations.
<p>Where located outside of the Resource Extraction Zone, the following forms of development (including land division creating additional allotments for such uses and alterations and additions which increase the floor area of buildings accommodating the following by 10% or more):</p> <ul style="list-style-type: none"> (a) dwelling; (b) residential flat building; (c) tourist accommodation; (d) boarding home; (e) dormitory style accommodation; (f) workers' accommodation; (g) student accommodation; (h) pre-school; (i) educational establishment; (j) retirement village; (k) supported accommodation; (l) residential park; or (m) Hospital. 	Minister responsible for administering the Mining Acts	To provide expert assessment and direction to the relevant authority on the potential for sensitive receivers in close proximity to adversely impact upon the lawful continued operation of resource extraction operations.

River Murray Flood Plain Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

The conservation and enhancement of water quality and the riverine environment, provision for environmental water flows, the protection of life and property against flood risk and recognition of the riverine environment as an important tourist and recreational resource.

DO 2

Development for the purpose of recreation (e.g. landings, jetties, houseboat moorings) water extraction, wetland management and irrigation management (e.g. channel, pumping stand, flood gate).

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Dredging

PO 1.1

Development is designed and sited in a manner that limits the need for dredging.

DTS/DPF 1.1

None are applicable.

Land Division

PO 2.1

Land division does not lead to intensification of development.

DTS/DPF 2.1

Land division:

- (a) is limited to the creation of a public road or a public reserve; or
- (b) is for adjustment of allotment boundaries to remove an anomaly in the current boundaries with respect to the location of existing buildings or structures and does not result in an additional allotment.

PO 2.2

Boundary realignment for residential purposes preserves the integrity of public waterfront reserves.

DTS/DPF 2.2

Boundary realignment for residential purposes:

- (a) locates any new roads on the landward side of an existing dwelling (rather than between an existing dwelling and the public waterfront reserve); and
- (b) provides a reserve 50m or more in width above pool level along the water frontage.

Built Form and Character

PO 3.1

Buildings and structures are sited and designed to be unobtrusive when viewed from the River Murray and nearby public roads.

DTS/DPF 3.1

Buildings / structures:

- (a) do not exceed one building level in height (excluding elevation to minimise the potential for personal or property damage as a result of a flood);
- (b) have no floor level elevated 2.5m or more above ground level;
- (c) are not closer than 50m to the waterfront; and
- (d) have associated electricity and telecommunications lines installed underground.

PO 3.2

Retaining walls avoided in the 1956 River Murray Flood Plain and in highly visible locations that can be viewed from public roads or the main channel of the Murray River.

DTS/DPF 3.2

Retaining walls:

- (a) are for the repair or replacement of a lawful retaining wall;
- (b) are essential to provide safe public access to the waterfront on public land;
- (c) are necessary to protect structures and buildings of historic significance;
- (d) are necessary for the purpose of protecting waterfront vegetation;
- (e) are ancillary to a dwelling and are essential for safe access to the waterfront from that dwelling; or
- (f) are necessary to protect a dwelling from material risk presented by erosion.

Flood Resilience

PO 4.1

Development does not cause, impede, or be subject to damage by floodwaters and fluctuating pool levels.

DTS/DPF 4.1

None are applicable.

PO 4.2

Dwellings do not impede floodwaters and fluctuating pool levels.

DTS/DPF 4.2

Undercroft areas of elevated dwellings:

- (a) when enclosed, are enclosed using roller doors, removable panels or other material that can easily be opened or removed during times of flood;
- (b) are not used for habitable rooms; and
- (c) have enclosed areas for a toilet, shower or laundry facilities not exceeding a combined maximum floor area of 10m².

PO 4.3

Outbuildings do not impede floodwaters and fluctuating pool levels.

DTS/DPF 4.3

Outbuildings are:

- (a) fitted with roller doors, removable panels or similar on two ends of side (whichever elevations face the direction of the flow); and
- (b) constructed at natural ground level

PO 4.4

Fencing does not impede floodwaters and fluctuating pool levels.

DTS/DPF 4.4

Fencing is of an open design such as post and wire strand construction.

Environmental Protection

PO 5.1

Adverse impacts on the natural features and stability of the waterfront are minimised.

DTS/DPF 5.1

None are applicable.

PO 5.2

Development incorporates buffer areas to protect the river and associated natural features such as wetlands and native vegetation.

DTS/DPF 5.2

None are applicable.

PO 5.3

Modification to the natural landform, including land reclamation, is avoided or minimised to prevent impacts on natural features, natural flow paths, floodwaters and the stability of the waterfront.

DTS/DPF 5.3

None are applicable.

PO 5.4

Outbuildings incorporate measures to prevent spills and leaks.

DTS/DPF 5.4

Outbuildings are wholly located within a bund to confine spills and leaks to the confines of the outbuilding.

PO 5.5

Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, sited and designed to prevent environmental harm.

DTS/DPF 5.5

Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are located:

- (a) outside the 1956 Murray River Flood Plain; and
- (b) wholly within a bund that has storage capacity of 133% or more of the volume of the largest fuel storage tank.

PO 5.6

Facilities for the collection of effluent from moored vessels sited and designed to prevent environmental harm.

DTS/DPF 5.6

Facilities for the collection of effluent from moored vessels are not located within the 1956 Murray River Flood Plain.

Access

PO 6.1

Waterfront reserve areas between buildings and the water is maximised to preserve the amenity of view corridors along the riverine environment.

DTS/DPF 6.1

None are applicable.

PO 6.2

Public access routes to waterfront reserves are provided and maintained.

DTS/DPF 6.2

None are applicable.

PO 6.3

Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.

DTS/DPF 6.3

No more than 100mm excavation and 100mm of fill is required in association with the construction of a driveway, access track or parking area.

River Structures

PO 7.1

River structures located where they do not cause a hazard to safe navigation.

DTS/DPF 7.1

River structures are located:

- (a) wholly outside navigation channels as defined by navigational signs;
- (b) 100m or more from either side of a ferry crossing; and
- (c) 150m or more from a lock.

PO 7.2

River structures are located where they do not cause a hazard to a designated recreation area for water skiing and swimming.

DTS/DPF 7.2

River structures are located wholly outside designated recreation areas for water skiing and swimming.

PO 7.3

Proliferation of water pumps is avoided to limit impact on the riverine environment.

DTS/DPF 7.3

None are applicable.

PO 7.4

Water pumping infrastructure designed and constructed to limit impact on the riverine environment.

DTS/DPF 7.4

Water pumping infrastructure is designed and constructed in accordance with Figure 1.

PO 7.5

Proliferation of jetties and floating pontoons is avoided to minimise impact on the riverine environment.

DTS/DPF 7.5

Jetty or floating pontoons are limited to one jetty or floating pontoon constructed per dwelling and:

- (a) are wholly located within the same allotment as an associated existing dwelling structure;
- (b) are located on an allotment (or lease site) separated from the river front by a public reserve or a public road (but not both); or
- (c) are for the repair, maintenance or replacement of an existing licensed river structure.

PO 7.6

Jetties and floating pontoons designed and constructed to limit impact on the riverine environment.

DTS/DPF 7.6

Jetties and floating pontoons are designed and constructed in accordance with Figures 2 to 6 and:

- (a) extend not more than 8m into the river measured from the riverbank at normal pool level;

- (b) have a width of not more than 1.4m in the case of a jetty (or gangway width in the case of a floating pontoon);
- (c) in the case of floating pontoons do not exceed the dimensions 3m by 6m; and
- (d) maintain a minimum of 3m between river structures including other jetties and pontoons.

PO 7.7

Proliferation of boat ramps is avoided to minimise impact on the riverine environment.

DTS/DPF 7.7

The repair, maintenance or replacement of an existing licensed boat ramp.

PO 7.8

On-river mooring facilities developed only where:

- (a) the mooring facility will not result in a mooring capacity exceeding one vessel per allotment;
- (b) where the allotment has a direct frontage to the river (or is only separated by a public road or public reserve, but not both) and the allotment contains an existing dwelling; and
- (c) the width of the river is greater than 100m at normal pool level.

DTS/DPF 7.8

None are applicable.

PO 7.9

Moorings for vessels located to avoid interfering with the operation or function of a ferry crossing, lock or major pumping station.

DTS/DPF 7.9

Moorings for vessels not be located within:

- (a) 100m of either side of a ferry crossing;
- (b) 150m of a lock; or
- (c) 400m of a major pumping station.

PO 7.10

Development of structures designed for the mooring of more than one vessel are located off-channel in a marina.

DTS/DPF 7.10

None are applicable.

River Murray Tributaries Area Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Sustainable water use and conservation of riverine environments within the River Murray Tributaries area.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use

PO 1.1

Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment and downstream users.

DTS/DPF 1.1

None are applicable.

PO 1.2

All development, but in particular development involving:

- a. activities requiring irrigation;
- b. aquaculture;
- c. commercial forestry;
- d. horticulture;
- e. industry; or
- f. intensive animal husbandry

having a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed surface water areas.

DTS/DPF 1.2

None are applicable.

Land Division

PO 2.1

Land division does not lead to the intensification of development to a level that would have a negative impact on the health or natural flow paths of the River Murray Tributaries.

DTS/DPF 2.1

None are applicable.

PO 2.2

Land division including boundary realignment preserves the integrity of the public waterfront of the River Murray system by limiting the number of allotments having a frontage (or extent of frontage) to that system.

DTS/DPF 2.2

Land division does not result in:

- a. an increase in allotments having a frontage to a part of the River Murray system; or
- b. an increase in the frontage of an allotment or allotments to a part of the River Murray system.

Procedural Matters (PM)

Significant Industry Interface Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Protection of state significant industrial activities by ensuring development has regard to potential environmental and amenity impacts generated by the lawful operation of proximate industry.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Division

PO 1.1

Sensitive uses and sensitive receivers are:

- (a) located away from areas which may be subject to unacceptable noise, dust, odour or other emissions; or
- (b) able to adequately mitigate impacts of noise, dust, odour or other dour emissions through design techniques such as:
 - i. locating residential accommodation the greatest distance practicable from the industry;
 - ii. locating buildings containing less non-sensitive receivers between the industry and sensitive receivers;
 - iii. placing rooms more sensitive to air, noise and odour impacts (e.g. bedrooms) further away from the industry; or
 - iv. providing private or common open space adjacent a building facade that shields the space from impacts of the industry

DTS/DPF 1.1

Development does not incorporate any of the following (including alterations and additions which increase the floor area of buildings accommodating the following by 10% or more):

- a. land division creating one or more additional allotments for residential purposes;
- b. dwelling;
- c. residential flat building

- d. tourist accommodation;
- e. boarding home;
- f. dormitory style accommodation;
- g. workers' accommodation;
- h. student accommodation;
- i. pre-school;
- j. educational establishment;
- k. retirement village; or
- l. supported accommodation;
- m. residential park; or
- n. hospital.

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral

Significant Landscape Protection Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Conservation of the natural and rural character and scenic and cultural qualities of significant landscapes.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Land use intensity restrained to conserve and enhance natural and rural character.

DTS/DPF 1.1

None are applicable

PO 1.2

Development in the form of the following not undertaken:

- (a) renewable energy facilities;
- (b) large scale industry, storage, distribution, warehousing; and
- (c) intensive animal husbandry.

DTS/DPF 1.2

None are applicable

Built Form and Character

PO 2.1

Development carefully sited and designed to:

- (a) complement rural character;

- (b) minimise disruption to natural landform and integrate existing natural environmental features including, particularly, native vegetation;
- (c) minimise impacts on wildlife habitat;
- (d) be visually unobtrusive and blend in with the surrounding area; and
- (e) be located below ridge lines.

DTS/DPF 2.1

None are applicable

PO 2.2

Buildings and structures limited to those that:

- (a) are ancillary, adjacent to and of the same or lesser scale as existing buildings;
- (b) are essential in supporting existing pastoral or rural activities;
- (c) are used for the ancillary sale of produce associated with a pastoral or rural activity;
- (d) are in the form of high quality nature-based tourist accommodation;
- (e) are for rainwater storage;
- (f) are for research or education purposes; or
- (g) support conservation or the interpretation of the environment or cultural features.

DTS/DPF 2.2

None are applicable.

Landscaping

PO 3.1

Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration.

DTS/DPF 3.1

Landscaping plantings exclusively constitute locally indigenous plant species.

Earthworks

PO 4.1

Excavation and filling of land limited to that associated with:

- (a) minimising the visual impact of buildings or structures; or
- (b) construction of water storage facilities.

DTS/DPF 4.1

Excavation and/or filling:

- (a) is undertaken in order to reduce the visual impact of buildings or structures or to construct water storage facilities;
- (b) does not involve excavation exceeding a vertical height of 0.75m;
- (c) does not involve filling exceeding a vertical height of 0.75m;
- (d) does not involve a total combined excavation and filling vertical height of 1.5m; and
- (e) scree slopes are covered in topsoil and landscaped with locally indigenous plant species.

Procedural Matters (PM)

None	None	None

Sloping Land Overlay

Assessment Provision (AP)

Desired Outcomes (DO)

DO 1

Development on sloping land designed to protect public safety, maintain and improve soil stability and minimise environmental and visual impacts.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land slip and Soil Erosion

PO 1.1

Development does not occur on land at risk of landslip or increase the potential for landslip or land surface instability.

DTS/DPF 1.1

None are applicable.

PO 1.2

Steep slopes stabilised through retention and replanting of vegetation.

DTS/DPF 1.2

None are applicable.

PO 1.3

Development includes site drainage systems that minimise erosion and avoid adverse impacts on slope stability.

DTS/DPF 1.3

None are applicable.

PO 1.4

Development avoids the alteration and obstruction of natural drainage lines.

DTS/DPF 1.4

None are applicable.

Visual Impacts

PO 2.1

Buildings sited and designed to integrate with the natural topography of the land using measures such as split level building construction and other approaches that minimise the extent of cut and fill.

DTS/DPF 2.1

None are applicable

Driveways and Access Tracks

PO 3.1

Driveways and access tracks are of a suitable gradient to allow safe and convenient access.

DTS/DPF 3.1

Driveways and access tracks do not have a gradient exceeding 25% (1-in-4) at any point along the driveway.

PO 3.2

Driveways and access tracks are of suitable construction to allow safe and convenient access.

DTS/DPF 3.2

Driveways and access tracks are constructed with an all-weather trafficable surface.

PO 3.3

Driveways and access tracks do not cause or contribute to the instability of embankments and cuttings.

DTS/DPF 3.3

None are applicable.

PO 3.4

Driveways and access tracks are sited and designed to integrate with the natural topography.

DTS/DPF 3.4

None are applicable.

PO 3.5

Driveways and access tracks provide level transition areas to enable safe movement of people and goods to and from the development.

DTS/DPF 3.5

None are applicable.

Earthworks

PO 4.1

Earthworks located outside townships and urban areas is limited and only undertaken to reduce the visual impact of buildings and structures and where it preserves the natural form of the land and native vegetation.

DTS/DPF 4.1

Development does not involve either:

- (g) excavation exceeding a vertical height of 0.75m; or
- (h) filling exceeding a vertical height of 0.75m;

and, if the development involves both excavation and filling, the total combined excavation and filling does not exceed a vertical height of 1.5m.

State Heritage Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Development maintains the heritage and cultural values of State Heritage Areas through conservation, ongoing use and adaptive reuse.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Built Form

PO 1.1

The form of new buildings and structures that are visible from the public realm consistent with the heritage values and characteristics of the State Heritage Area.

DTS 1.1

None are applicable.

PO 1.2

Development is consistent with the prevailing building and ceiling heights in the State Heritage Area.

DTS 1.2

None are applicable.

PO 1.3

Design and architectural detailing of street facing buildings consistent with the prevailing characteristics expressed in the State Heritage Area.

DTS 1.3

None are applicable.

PO 1.4

Development is consistent with the prevailing front and side boundary setback pattern in the State Heritage Area.

DTS 1.4

None are applicable.

PO 1.5

Materials are either consistent with or complement those within the State Heritage Area.

DTS 1.5

None are applicable.

Alterations and Additions

PO 2.1

Alterations and additions complement the subject building and are sited to ensure they do not dominate the primary facade, streetscape and employ a contextual design approach.

DTS 2.1

None are applicable.

Ancillary Development

PO 3.1

Ancillary development, including carports, outbuildings and garages, complements the heritage values of the Area.

DTS 3.1

None are applicable.

PO 3.2

Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principle building(s).

DTS 3.2

None are applicable.

PO 3.3

Advertising and advertising hoardings are designed to complement the State Heritage Area, be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting of the Area.

DTS 3.3

None are applicable

Land Division

PO 4.1

Land division creates allotments that:

- (a) are compatible with the surrounding pattern of subdivision of the State Heritage Area; and
- (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Area.

DTS 4.1

None are applicable.

Landscape Context and Streetscape Amenity

PO 5.1

Individually heritage listed trees, parks, historic gardens and memorial avenues within the State Heritage Area retained unless:

- (a) trees / plantings are, or have the potential to be, a danger to life or property; or
- (b) trees / plantings are significantly diseased and their life expectancy is short.

DTS 5.1

None are applicable.

Demolition

PO 6.1

Buildings and other features of identified heritage value within a State Heritage Area are not demolished, destroyed or removed in total or in part unless either of the following apply:

- (a) the portion of any building or other feature is determined to not contribute to the heritage value of the State Heritage Area; or
- (b) the structural condition of the building represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair.

DTS 6.1

None are applicable.

Conservation Works

PO 7.1

Conservation works to the exterior of buildings and other features of identified heritage value match existing materials to be repaired and utilise traditional work methods.

DTS/DPF 7.1

Conservation works involving:

- (a) replacement of roof materials, guttering or downpipes with the same or substantially the same materials and detailing;
- (b) replacement of timber building elements (structural or decorative) with the same or substantially the same material, dimension and detailing; or brick and stone repair/ repointing to match original. Procedural Matters (PM)

State Heritage Place Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Development maintains the heritage and cultural values of State Heritage Places through conservation, ongoing use and adaptive reuse.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Built Form

PO 1.1

The form of new buildings and structures maintains the heritage values of the Place.

DTS 1.1

None are applicable.

PO 1.2

Massing and scale of development maintains the heritage values of the Place.

DTS 1.2

None are applicable.

PO 1.3

Design and architectural detailing maintains the heritage values of the Place.

DTS 1.3

None are applicable.

PO 1.4

Development is consistent with boundary setbacks and setting.

DTS 1.4

None are applicable.

PO 1.5

Materials and colours are either consistent with or complement the heritage values of the Place.

DTS 1.5

None are applicable.

PO 1.6

New buildings are not placed or erected between the front street boundary and the façade of a State Heritage Place.

DTS 1.6

None are applicable.

PO 1.7

Development of a State Heritage Place retains elements contributing to its heritage value.

DTS 1.7

None are applicable.

Alterations and Additions

PO 2.1

Alterations and additions complement the subject building and are sited to be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the Place or its setting.

DTS 2.1

None are applicable.

Ancillary Development

PO 3.1

Ancillary development, including carports, outbuildings and garages, complement the heritage values of the Place.

DTS 3.1

None are applicable.

PO 3.2

Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).

DTS 3.2

None are applicable.

PO 3.3

Advertising and advertising hoardings are designed and located to complement the State Heritage Place, be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting.

DTS 3.3

None are applicable.

Land Division

PO 4.1

Land division creates allotments that:

- (a) are compatible with the surrounding pattern of subdivision of the State Heritage Place; and
- (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Place.

DTS 4.1

None are applicable.

Landscape Context and Streetscape Amenity

PO 5.1

Individually heritage listed trees, parks, historic gardens and memorial avenues retained unless:

- (a) trees / plantings are, or have the potential to be, a danger to life or property; or
- (b) trees / plantings are significantly diseased and their life expectancy is short.

DTS 5.1

None are applicable.

Demolition

PO 6.1

State Heritage Places are not demolished, destroyed or removed in total or in part unless either of the following apply:

- (a) the portion of the Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value; or
- (b) the structural condition of the Place represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair.

DTS 6.1

None are applicable.

Conservation Works

PO 7.1

Conservation works to the exterior of a Place and other features of identified heritage value match existing materials to be repaired and utilise traditional work methods.

DTS 7.1

None are applicable.

Strategic Infrastructure Gas Pipelines Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Safe operation of high-pressure gas transmission pipelines and associated infrastructure.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Division

PO 1.1

Land division preserves access to high pressure gas transmission pipelines for maintenance and emergency response purposes.

DTS/DPF 1.1

None are applicable.

Land Use

PO 2.1

Development maintains safe operation of high pressure gas transmission pipelines.

DTS/DPF 2.1

Development does not incorporate the following land uses:

- (a) educational establishment;
- (b) emergency services facility;
- (c) hospital;
- (d) industry;
- (e) pre-school;
- (f) retirement facility; or
- (g) supported accommodation.

Urban Transport Routes Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Safe and efficient operation of urban transport routes for all road users.

DO 2

Provision of safe and efficient access to and from urban transport routes.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Access – Safe Entry and Exit (Traffic Flow)

PO 1.1

Access points designed to allow safe entry and exit to and from a site to meet the needs of development, to ensure traffic flow interference associated with access movements is minimised.

DTS/DPF 1.1

An access point is designed to ensure:

- a. the following for the largest vehicle expected to access the site:
 - (i) entry and exit movements are left turn only;
 - (ii) access to and from the site is in a forward direction, with on-site manoeuvring available through circulation around the site of no more than a 3-point turn;
 - (iii) vehicles cross the property boundary at an angle between 70 and 90 degrees; and
 - (iv) access to and from the site fully within the kerbside lane of the road; and
- b. where the access point services, or is intended to service:
 - (i) a single dwelling, the access point has a width of between 3m and 4m (measured at the site boundary); or
 - (ii) between 2 and 6 dwellings, the access point has a width of between 6m and 7m (measured at the site boundary); or
 - (iii) over 6 dwellings or any other non-residential land use, then:
 - A. where vehicles 6.4m or less are expected to access the site, the access point has a width of between 7m and 10m (measured at the site boundary); or
 - B. where vehicles between 6.4m and 8.8m in length are expected to access the site, the access point has a width of between 12m and 16m (measured at the site boundary); or
 - C. where vehicles up to 12.5m in length are expected to access the site, the access point has a width of between 16m and 22m (measured at the site boundary); and
- c. the access point is located 1m or more from any roadside infrastructure or trees.

Access – On-Site Queuing

PO 2.1

Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues are contained fully within the boundaries of the development site, to minimise interruption on the functional performance of the road and safe vehicle movement.

DTS/DPF 2.1

An access point:

- (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point; or

- (b) will service development that will generate less than 60 vehicle movements per day; and
 - (i) where vehicles no greater than 6.4m in length are expected to access the site, there are no internal driveways, intersections, car parking spaces, car park isles or any other internal obstructions within 10.5m of the access point;
 - (ii) where vehicles between 6.4m and 8.8m in length are expected to access the site, there are no internal driveways, intersections, car parking spaces, car park isles or any other internal obstructions within 14.5m of the access point;
 - (iii) where vehicles no greater than 12.5m in length are expected to access the site, there are no internal driveways, intersections, car parking spaces, car park isles or any internal obstructions within 20m of the access point; or
 - (iv) where vehicles over 12.5m in length are expected to access the site, no Deemed-to-Satisfy Criteria applies.

Access - Existing Access Point

PO 3.1

Existing access points designed to accommodate the type and volume of traffic likely to be generated by the development.

DTS/DPF 3.1

An existing access point:

- (a) will not service and is not intended to service more than 6 dwellings; or
- (b) will service development that will not result in:
 - (i) an increase in traffic using an existing access point that is 10% greater than the traffic volumes using the existing access prior to the development or 60 vehicles per day (whichever is the lesser); or
 - (ii) a larger class of vehicle expected to access the site using the existing access.

Access – Location (Spacing)

PO 4.1

New access points are widely spaced apart from any existing access point or public road junction to not impede traffic flow and ensure safe and efficient road operating conditions.

DTS/DPF 4.1

Where access from an alternative local road at least 25m from the Urban Route is not available, and the access is not located on a Controlled Access Road, a new access point is:

- a. not located on a section affected by double barrier lines between either edge of the access point; and
- b. at least the following distance from a public road junction, or terminating / merging lane on a public road:
 - (a) 110 km/h road – 190m
 - (b) 100 km/h road – 165m
 - (c) 90 km/h road – 140m
 - (d) 80 km/h road – 110m
 - (e) 70 km/h road – 90m
 - (f) 60 km/h road – 70m
 - (g) 50km/h or less road – 50m; and
- c. at least the following distance from another private (non-public road) access point:
 - (a) 110 km/h road – 130m
 - (b) 100 km/h road – 105m

- (c) 90 km/h road – 85m
- (d) 80 km/h road – 70m
- (e) 70 km/h road – 55m
- (f) 60 km/h road – 40m
- (g) 50km/h or less road – 30m

Access – Location (Sight Lines)

PO 5.1

Access points located and designed to ensure appropriate sight distances are provided so that drivers:

- (a) on the road approaching the access point are able to recognise the presence of the access point and/or see a vehicle turning into or out of the access point in time to slow down or stop in a safe and controlled manner; and
- (b) exiting the access point onto the road can see approaching vehicles to avoid potential conflict.

DTS/DPF 5.1

Drivers approaching or exiting a new access point have an unobstructed line of sight to or from the new access point in accordance with the following distances:

- (a) 110 km/h road – 325m
- (b) 100 km/h road – 280m
- (c) 90 km/h road – 240m
- (d) 80 km/h road – 200m
- (e) 70 km/h road – 165m
- (f) 60 km/h road – 135m; and
- (g) 50km/h or less road – 105m.

within 25m of an intersection with such a road.		

Water Protection Area Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Safeguard South Australia's public water supplies by protecting regionally and locally significant surface and underground water resources from pollution in ecologically significant Water Protection Areas.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Groundwater

PO 1.1

Groundwater resources protected from pollution by ensuring development does not:

- (a) generate or dispose of waste in a manner that would pollute water resources; or
- (b) involve the storage or disposal of chemicals or hazardous substances in a manner that would pose an unsatisfactory risk to water supplies.

DTS/DPF 1.1

None are applicable.

PO 1.2

Groundwater catchment and recharge characteristics safeguarded by ensuring development:

- (a) retains and protects existing areas of native vegetation; and
- (b) does not inhibit the potential of an aquifer to recharge.

DTS/DPF 1.2

None are applicable.

Farming and Horticulture

PO 2.1

Farming or horticulture operations only occur where:

- (a) the activity will not result in any increase in salinity levels of groundwater;
- (b) the land and soil structure is capable of supporting the proposed activity and the likelihood of soil erosion is minimised; and
- (c) the depth to the water table is greater than 2 metres from the ground surface.

DTS/DPF 2.1

None are applicable.

Irrigation

PO 3.1

Irrigated areas sited to ensure they:

- (a) avoid any land prone to water logging or subject to flooding through irrigation;
- (b) avoid risk of the water table falling or rising significantly as a result of irrigation practices; and
- (c) minimise the risk of polluting surface and groundwater resources where wastewater is irrigated to land.

DTS/DPF 3.1

None are applicable

Procedural Matters (PM)

Referrals		
Class of Development / Activity	Referral Body	Purpose of Referral
Composting works (excluding a prescribed approved activity) – being a depot, facility or works with the capacity to treat, during a 12 month period more than 200 tonnes of organic waste or matter.	Environment Protection Authority	To provide expert Technical assessment and direction to the Relevant authority on the assessment of the potential harm from pollution and waste aspects arising from activities of environmental significance and other activities that have the potential to cause serious environmental harm.
Wastewater treatment works – being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period, more than 2.5ML of wastewater.		
Feedlots – being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.		
Piggeries – being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units.		
Dairies – being the carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time		

Water Resources Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Protection of the quality of surface waters.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Water Catchment

PO 1.1

Watercourses and their beds, banks, wetlands and floodplains are not damaged or modified and are retained in their natural state, except where modification is required for essential access or maintenance purposes.

DTS/DPF 1.1

None are applicable.

PO 1.2

Development avoids interfering with the hydrology or water regime of swamps and wetlands.

DTS/DPF 1.2

None are applicable.

PO 1.3

Wetlands and low-lying areas providing habitat for native flora and fauna are not drained, except temporarily for essential management purposes to enhance environmental values.

DTS/DPF 1.3

None are applicable.

PO 1.4

Along watercourses, areas of remnant native vegetation, or areas prone to erosion, that are capable of natural regeneration are fenced off to limit stock access.

DTS/DPF 1.4

None are applicable.

PO 1.5

Development that increases surface water run-off includes a suitably sized strip of vegetated land on each side of a watercourse to filter runoff so as to:

- (a) reduce the impacts on native aquatic ecosystems; and
- (b) minimise soil loss eroding into the watercourse.

DTS/DPF 1.5

A strip of land 20m or more wide measured from the top of existing banks on each side of the watercourse is free from development, livestock use and revegetated with locally indigenous vegetation.

PO 1.6

Development resulting in the depositing or placing of an object or solid material in a watercourse or lake only occurs where it involves:

- (a) the construction of an erosion control structure;
- (b) devices or structures used to extract or regulate water flowing in a watercourse;
- (c) devices used for scientific purposes; or
- (d) the rehabilitation of watercourses.

DTS/DPF 1.6

None are applicable.

PO 1.7

Watercourses, floodplains and wetlands protected and enhanced by retaining and protecting existing native vegetation.

DTS/DPF 1.7

None are applicable.

PO 1.8

Watercourses, floodplains and wetlands protected and enhanced by stabilising watercourse banks and reducing sediments and nutrients entering the watercourse.

DTS/DPF 1.8

None are applicable.

PO 1.9

Dams, water tanks and diversion drains are located and constructed to maintain the quality and quantity of flows required to meet environmental and downstream needs.

DTS/DPF 1.9

None are applicable.

Procedural Matters (PM)

Part 4 – General Development Policies

Advertisements

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Advertisements and advertising hoardings are designed appropriate to context, are efficient and effective in communicating with the public, are limited in number to avoid clutter, and do not create hazard.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Appearance

PO 1.1

Advertisements are compatible and integrated with the design of the building and/or land they are located on.

DTS/DPF 1.1

Advertisements attached to a building:

- (b) if located below canopy level, are flush with a wall;
- (c) if located at canopy level, are in the form of a fascia sign;
- (d) if located above a canopy:
 - i. are flush with a wall;
 - ii. do not have any part rising above parapet height; and
 - iii. are not attached to the roof of the building.
- (e) if attached to the side of a verandah, do not exceed the width of the verandah or project from the verandah;
- (f) if attached to the front of a verandah, do not exceed the length of the verandah or project from the verandah;
- (g) if attached to a two storey building, have no part located above the finished floor level of the second storey of the building; and
- (h) where they are flush with a wall, do not, in combination with any other existing sign, cover more than 15% of the building facade to which they are attached.

PO 1.2

Advertisements designed to conceal their supporting advertising hoarding from view.

DTS 1.2

None are applicable.

PO 1.3

Advertising located so as to not encroach on public land or the land of an adjacent allotment.

DTS/DPF 1.3

Advertisements and/or advertising hoardings are:

- (a) completely contained within the boundaries of the site; or
- (b) if a road widening is applicable, advertising and/or advertising hoarding are completely contained within the proposed property boundary realignment.

PO 1.4

Where possible advertisements on public land are integrated with existing structures and infrastructure.

DTS/DPF 1.4

An advertisement on public land:

- (a) achieves Advertisements DTS/DPF 1.1; or
- (b) is integrated with a bus shelter and it is not to be illuminated.

PO 1.5

Advertisements and/or advertising hoarding of a scale and size appropriate to the character of the locality.

DTS / DPF 1.5

Advertising and/or advertising hoardings meet the area and height requirements set out in [Advertisements Table 1 – Maximum Size and Height Requirements](#)

Proliferation of Advertisements

PO 2.1

Proliferation of advertisements minimised to avoid visual clutter and untidiness.

DTS/DPF 2.1

No more than one advertisement is displayed on each public road per occupancy.

PO 2.2

Multiple-business or activity advertisements co-located and coordinated to avoid visual clutter and untidiness.

DTS/DPF 2.2

Advertisements for multiple-business or activity complex incorporating information regarding each business or activity in a single advertisement fixture or structure.

Advertising Content

PO 3.1

Content of advertisements primarily limited to information relating to the lawful use of land they are located on.

DTS/DPF 3.1

An advertisement does not contain third party content.

Amenity Impacts

PO 4.1

Light spill from advertisement illumination does not unreasonably compromise amenity of adjacent and proximate sensitive receivers.

DTS/DPF 4.1

An advertisement does not incorporate any illumination.

Safety

PO 5.1

Advertisements and/or advertising hoardings erected on a verandah or project from a building wall designed and located to allow for safe and convenient pedestrian access.

DTS/DPF 5.1

An advertisement with a minimum clearance of 2.5m between the top of the footway and base of the underside of the sign.

PO 5.2

Advertisements and/or advertising hoardings do not distract or create a hazard to drivers through excessive illumination.

DTS/DPF 5.2

No advertisement illumination is proposed.

PO 5.3

Advertisements and/or advertising hoardings do not create a hazard to drivers by:

- (a) being liable to interpretation by drivers as an official traffic sign or signal;
- (b) obscuring or impairing a driver's view of official traffic signs or signals; or
- (c) obscuring or impairing a driver's view of features of a road that are potentially hazardous (such as junctions, bends, changes in width and traffic control devices) or other road or rail vehicles at/or approaching level crossings.

DTS/DPF 5.3

DTS/DPF 1.1, 1.2, 5.1, 5.2 and 5.5 are met.

PO 5.4

Advertisements and/or advertising hoardings do not create a hazard by distracting drivers from the primary driving task at a location where the demands on driver concentration are high.

DTS/DPF 5.4

An advertisement and/or advertising hoarding not located along or adjacent to a road having a speed limit of 80km/h or more.

PO 5.5

Advertisements and/or advertising hoardings provide sufficient clearance from the road carriageway to allow for safe and convenient movement by all road users

DTS/DPF 5.5

Where the advertisement or advertising hoarding is:

- (a) on a kerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 0.6m from the roadside edge of the kerb;
- (b) on an unkerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 5.5m from the edge of the seal; or
- (c) on any other kerbed or unkerbed road, the advertisement or advertising hoarding is located a minimum of the following distance from the roadside edge of the kerb or the seal:
 - i. 110 km/h road – 14m
 - ii. 100 km/h road – 13m
 - iii. 90 km/h road – 10m
 - iv. 70 or 80 km/h road – 8.5m

Table 1 – Maximum Size and Height Requirements

Advertisements and Advertising Hoardings			
P&D Code Zone	Type of Advertisement	Advertised area	Maximum height (metres)
Urban Activity Centre Suburban Activity Centre	Attached to building	Does not exceed 25 per cent of the ground floor wall area on the façade the sign is placed	N/A
	Freestanding	does not exceed 5m ² per side	8

Animal Keeping and Horse Keeping

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Animals kept at a density that is not beyond the carrying capacity of the land and in a manner that minimises adverse effects on the environment, local amenity and surrounding development.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Siting and Design

PO 1.1

Animal keeping, horse keeping and associated activities do not create adverse impacts on the environment or the amenity of the locality.

DTS/DPF 1.1

None are applicable

PO 1.2

Animal keeping and horse keeping located and managed to minimise the potential transmission of disease to other operations where animals are kept.

DTS/DPF 1.2

None are applicable

Horse Keeping

PO 2.1

Water from stable wash-down areas directed to appropriate absorption areas and/or drainage pits to minimise pollution of land and water.

DTS/DPF 2.1

None are applicable

PO 2.2

Stables, horse shelters or associated yards sited appropriate distances away from sensitive receivers and/or allotments in other ownership to avoid adverse impacts from dust, erosion and odour.

DTS/DPF 2.2

None are applicable

Stables, horse shelters and/or associated yards sited in accordance with the following:

- (a) 30m or more from any sensitive receivers or approved sensitive receivers on land in other ownership;
- (b) where an adjacent allotment is vacant and in other ownership, 30m or more from the boundary of that allotment.

PO 2.3

All areas accessible to horses separated from septic tank effluent disposal areas to protect the integrity of that system. Kennel flooring constructed with an impervious material to facilitate regular cleaning.

DTS/DPF 2.3

Septic tank effluent disposal areas enclosed with a horse proof barrier such as a fence to exclude horses from this area.

PO 2.4

To minimise environmental harm and adverse impacts on water resources, stables, horse shelters or associated yards are appropriately setback from a watercourse.

DTS/DPF 2.4

Stables, horse shelters or associated yards setback 50m or more from a watercourse

PO 2.5

Stables, horse shelters or associated yards are established on slopes that are stable to minimise risk of soil erosion and water run-off.

DTS/DPF 2.5

Stables, horse shelters or associated yards not located on land with a slope greater than 10% (1-in-10).

Kennels

PO 3.1

Kennel flooring constructed with an impervious material to facilitate regular cleaning.

DTS/DPF 3.1

The floor of kennels:

- (a) constructed of impervious concrete; and
- (b) designed to be self-draining when washed down.

PO 3.2

Kennels and exercise yards designed and sited to minimise noise nuisance to neighbours through measures such as:

- (a) adopting appropriate separation distances; and
- (b) orientating openings away from sensitive receivers.

DTS/DPF 3.2

Kennels sited 500m or more from the nearest sensitive receiver on land in other ownership.

PO 3.3

Dogs are regularly observed and managed to minimise nuisance impact on adjoining sensitive receivers from animal behaviour.

DTS/DPF 3.3

Kennels sited in association with a permanent dwelling on the land.

Wastes

PO 4.1

Storage of manure, used litter and other wastes (other than waste water lagoons) is sited, designed, constructed and managed to:

- (a) avoid attracting and harbouring vermin;
- (b) avoid polluting water resources; and
- (c) be located outside 1% AEP flood event areas.

DTS/DPF 4.1

None are applicable

Aquaculture

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Development of aquaculture facilities in an ecologically, economically and socially sustainable manner to support a fair and equitable sharing of marine, coastal and inland resources and mitigate conflict with other water-based and land-based uses.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Based Aquaculture

PO 1.1

Land-based aquaculture and associated components sited and designed to avoid adverse impacts on nearby sensitive receivers.

DTS/DPF 1.1

Land-based aquaculture and associated components located:

- (a) 200m or more from a sensitive receiver in other ownership; or
- (b) 500m or more from the boundary of a zone primarily intended to accommodate sensitive receivers.

PO 1.2

Land-based aquaculture and associated components sited and designed to prevent surface flows from entering ponds in a 1% AEP sea flood level event.

DTS/DPF 1.2

None are applicable.

PO 1.3

Land-based aquaculture and associated components sited and designed to prevent pond leakage that would pollute groundwater.

DTS/DPF 1.3

None are applicable.

PO 1.4

Land-based aquaculture and associated components sited and designed to prevent farmed species escaping and entering into any waters.

DTS/DPF 1.4

None are applicable.

PO 1.5

Land-based aquaculture and associated components, including intake and discharge pipes, designed to minimise the need to traverse sensitive areas to minimise impact on the natural environment.

DTS/DPF 1.5

None are applicable.

PO 1.6

Pipe inlet and outlets associated with land-based aquaculture sited and designed to minimise the risk of disease transmission.

DTS/DPF 1.6

None are applicable.

PO 1.7

Storage areas associated with aquaculture activity integrated with the use of the land and sited and designed to minimise visual impact on the surrounding environment.

DTS/DPF 1.7

None are applicable.

Marine Based Aquaculture

PO 2.1

Marine aquaculture sited and designed to minimise adverse impacts on sensitive ecological areas including:

- (a) creeks, and estuaries;
- (b) wetlands;
- (c) significant seagrass and mangrove communities; and
- (d) marine habitats and ecosystems.

DTS/DPF 2.1

None are applicable.

PO 2.2

Marine aquaculture sited in areas with adequate water current to disperse sediments to prevent the build-up of waste.

DTS/DPF 2.2

None are applicable.

PO 2.3

Marine aquaculture incorporates measures to ensure satisfactory removal and disposal of litter, disused material, shells, debris, detritus, dead animals and animal waste from the development to prevent pollution of waters, wetlands, or the nearby coastline.

DTS/DPF 2.3

None are applicable.

PO 2.4

Marine aquaculture designed to not involve discharge of human waste on the site, on any adjacent land or into nearby waters.

DTS/DPF 2.4

None are applicable

PO 2.5

Marine aquaculture (other than inter-tidal aquaculture) located an appropriate distance seaward of the high water mark.

DTS/DPF 2.5

Marine aquaculture development located 100m or more seaward of the high water mark.

PO 2.6

Marine aquaculture sited and designed to not obstruct or interfere with:

- (a) areas of high public use;
- (b) areas, including beaches, used for recreational activities such as swimming, fishing, skiing, sailing and other water sports.

DTS/DPF 2.6

None are applicable

PO 2.7

Marine aquaculture sited and designed to minimise interference and obstruction to the natural processes of the coastal and marine environment.

DTS/DPF 2.7

None are applicable

PO 2.8

Marine aquaculture sited and designed at a sufficient height above the sea floor and in a manner to minimise seabed damage.

DTS/DPF 2.8

None are applicable

PO 2.9

Marine aquaculture designed to be as unobtrusive as practicable by incorporating measures such as:

- (a) using feed hoppers that are painted in subdued colours and suspended as close as possible to the water surface;
- (b) positioning of structures to protrude the minimum distance practicable above the water surface;
- (c) avoiding the use of shelters and structures above cages and platforms unless necessary to exclude predators and protected species from interacting with the farming structures and/or stock inside the cages, or for safety reasons; and
- (d) positioning racks, floats and other farm structures in visually unobtrusive locations from the shoreline.

DTS/DPF 2.9

None are applicable

PO 2.10

Access, launching and maintenance facilities utilise existing established roads, tracks, ramps and paths to or from the sea where possible.

DTS/DPF 2.10

None are applicable

PO 2.11

Access, launching and maintenance facilities developed as common user facilities and co-located where practicable to mitigate adverse impacts on coastal areas.

DTS/DPF 2.11

None are applicable

PO 2.12

Marine aquaculture sited to minimise potential impacts on, and to protect the integrity of, reserves under the *National Parks and Wildlife Act 1972*.

DTS/DPF 2.12

Marine aquaculture located 1000m or more seaward of the boundary of any reserve under the *National Parks and Wildlife Act 1972*.

PO 2.13

Onshore storage, cooling and processing facilities that do not impair the coastline and its visual amenity and:

- (a) sited, designed, landscaped and developed at a scale and using external materials to minimise any adverse visual impact on the coastal landscape;
- (b) sited and designed with appropriate vehicular access arrangement; and
- (c) incorporate appropriate waste treatment and disposal.

DTS/DPF 2.13

None are applicable

Navigation and Safety

PO 3.1

Marine aquaculture sites are suitably marked to maintain navigational safety.

DTS/DPF 3.1

None are applicable

PO 3.2

Marine aquaculture sited to provide adequate separation between farms for safe navigation.

DTS/DPF 3.2

None are applicable

PO 3.3

Structures secured and/or weighted to prevent drifting from the licensed site.

DTS/DPF 3.3

None are applicable

Environmental Management

PO 4.1

Marine aquaculture is maintained to prevent hazards to people and wildlife, including breeding grounds and habitats of native marine mammals and terrestrial fauna, especially migratory species.

DTS/DPF 4.1

None are applicable

PO 4.2

Marine aquaculture designed to facilitate the relocation or removal of structures in the case of emergency such as oil spills, algal blooms and altered water flows.

DTS/DPF 4.2

None are applicable

PO 4.3

Marine aquaculture that provides for progressive or future reclamation of disturbed areas ahead of, or upon, decommissioning.

DTS/DPF 4.3

None are applicable

Beverage Production in Rural Areas

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Mitigation of potential amenity and environmental impacts of value-adding beverage production facilities such as wineries, distilleries, cideries and breweries.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Odour and Noise

PO 1.1

Beverage production activities are designed and sited to minimise odour impacts on amenity.

DTS/DPF 1.1

None are applicable

PO 1.2

Beverage production activities are designed and sited to minimise noise impacts on sensitive receivers.

DTS/DPF 1.2

None are applicable

PO 1.3

Fermentation, distillation, manufacturing, storage, packaging and bottling activities occur within enclosed buildings.

DTS/DPF 1.3

None are applicable

PO 1.4

Breweries designed to minimise odours emitted during boiling and fermentation stages of production.

DTS/DPF 1.4

Brew kettles are fitted with a vapour condenser.

PO 1.5

Beverage production solid wastes stored in a manner that minimises odour impacts on sensitive receivers in other ownership.

DTS/DPF 1.5

Solid waste is collected and stored in sealed containers and removed from the site within 48 hours.

Water Quality

PO 2.1

Beverage production wastewater management systems (including wastewater irrigation) setback from watercourses to minimise adverse impacts on water resources.

DTS/DPF 2.1

Wastewater management systems are setback 50m or more from the banks of watercourses and bores.

PO 2.2

Water resources are protected from pollution by ensuring development does not involve the storage or disposal of chemicals or hazardous substances in a manner that would pose a water pollution risk.

DTS/DPF 2.2

None are applicable

PO 2.3

Stormwater run-off from areas subject to contamination by beverage production activities (including vehicle movements and machinery operations) is drained to an onsite stormwater treatment system.

DTS/DPF 2.3

None are applicable

PO 2.4

Stormwater run-off from areas not likely to be subject to contamination by beverage production and associated activities (such as roof catchments and clean hard paved surfaces) is diverted away from beverage production areas and wastewater management systems.

DTS/DPF 2.4

None are applicable

Wastewater Irrigation

PO 3.1

Beverage production wastewater irrigation systems designed and located to not contaminate soil and surface and ground water resources or damage crops.

DTS/DPF 3.1

None are applicable

PO 3.2

Beverage production wastewater irrigation systems designed and located to minimise impact on amenity and avoid spray drift onto adjoining land.

DTS/DPF 3.2

Beverage production wastewater is not irrigated within 50 metres of any dwelling in other ownership.

PO 3.3

Beverage production wastewater is not irrigated onto:

- (a) waterlogged areas;
- (b) land within 50 metres of a creek, swamp or domestic or stock water bore;
- (c) land subject to flooding;
- (d) steeply sloping land; or
- (e) rocky or highly permeable soil overlaying an unconfined aquifer.

DTS/DPF 3.3

None are applicable

Bulk Handling and Storage Facilities

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Facilities for the bulk handling and storage of agricultural, mineral, petroleum, rock, ore or other similar commodities designed to minimise adverse impacts on transport networks, the landscape and surrounding land uses.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Siting and Design

PO 1.1

Bulk handling and storage facilities sited and designed to minimise risks of adverse air quality and noise impacts on sensitive receivers.

DTS/DPF 1.1

Facilities for the handling, storage and dispatch of commodities in bulk (excluding processing), meet the following minimum separation distances from sensitive receivers:

- (a) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility: 300m or more
- (b) bulk petroleum storage: 500m or more
- (c) coal handling with:
 - i. capacity up to 1 tonne per day or a storage capacity up to 50 tonnes: 500m or more
 - ii. capacity exceeding 1 tonne per day or a storage capacity exceeding 50 tonnes: 1,000m or more.

Buffers and Landscaping

PO 2.1

Bulk handling and storage facilities incorporate a buffer area for the establishment of dense landscaping adjacent road frontages.

DTS/DPF 2.1

None are applicable

PO 2.2

Bulk handling and storage facilities incorporate landscaping to assist with screening and dust filtration.

DTS/DPF 2.2

None are applicable

Access and Parking

PO 3.1

Roadways and vehicle parking areas associated with bulk handling and storage facilities designed and surfaced to control dust emissions and drag out of material from the site.

DTS/DPF 3.1

Roadways and vehicle parking areas are sealed with an all-weather surface.

Slipways, Wharves and Pontoons

PO 4.1

Slipways, wharves and pontoons used for the handling of bulk materials (such as fuel, oil, catch, bait and the like) incorporate catchment devices to avoid the release of materials into adjacent waters.

DTS/DPF 4.1

None are applicable.

Clearance from Overhead Powerlines

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Protection of human health and safety when undertaking development in the vicinity of overhead transmission powerlines.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

PO 1.1

Buildings are adequately separated from aboveground powerlines to minimise potential hazard to people and property.

DTS/DPF 1.1

One of the following is satisfied:

- (a) a declaration is provided by or on behalf of the applicant to the effect that the proposal would not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*; or
- (b) there are no above ground powerlines adjoining the site that is the subject of the proposed development.

Design in Urban Areas

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Development that is:

- (a) contextual – by considering, recognising and carefully responding to its natural surroundings and positively contributing to the character of the immediate area;
- (b) durable – fit for purpose, adaptable and long lasting;
- (c) inclusive – by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access, and also promote the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors alike; and
- (d) sustainable – by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

ALL DEVELOPMENT

External Appearance

PO 1.1

Buildings that reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).

DTS 1.1

None are applicable.

PO 1.2

Where zero or minor setbacks are desirable, development provides shelter over footpaths to positively contribute to the walkability and comfort of the public realm.

DTS 1.2

None are applicable.

PO 1.3

Buildings (other than ancillary buildings, group dwellings or buildings on a battle-axe allotment) designed so the main façade faces the primary street frontage of the land on which they are situated.

DTS 1.3

None are applicable.

PO 1.4

Plant, exhaust and intake vents and other technical equipment integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by:

- (a) positioning plant and equipment discretely, in unobtrusive locations as viewed from public roads and spaces;
- (b) screening rooftop plant and equipment from view; and
- (c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses.

DTS / DPF 1.4

Development does not incorporate any structures that protrude beyond the roofline.

PO 1.5

The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form) taking into account the form of development contemplated in the relevant zone.

DTS 1.5

None are applicable.

Safety

PO 2.1

Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.

DTS 2.1

None are applicable.

PO 2.2

Development designed to differentiate public, communal and private areas.

DTS 2.2

None are applicable.

PO 2.3

Buildings designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.

DTS 2.3

None are applicable.

PO 2.4

Development at street level designed to maximise opportunities for passive surveillance of adjacent public realm.

DTS 2.4

None are applicable.

PO 2.5

Common areas and entry points of buildings (such as the foyer areas of residential buildings), and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.

DTS 2.5

None are applicable.

Landscaping

PO 3.1

Landscaped (including trees), permeable open spaces incorporated to:

- (a) minimise heat absorption and reflection;
- (b) maximise shade and shelter;
- (c) maximise stormwater infiltration; and
- (d) enhance the appearance of land and streetscapes.

DTS 3.1

None are applicable.

Environmental Performance

PO 4.1

Buildings sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces.

DTS 4.1

None are applicable.

PO 4.2

Buildings sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling.

DTS 4.2

None are applicable.

PO 4.3

Buildings incorporate climate responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells.

DTS 4.3

None are applicable.

Water Sensitive Design

PO 5.1

Development sited and designed to maintain natural hydrological systems without negatively impacting:

- (a) the quantity and quality of surface and groundwater;
- (b) the depth and directional flow of surface and groundwater; or
- (c) the quality and function of natural springs.

DTS 5.1

None are applicable.

Car parking appearance

PO 6.1

Development facing the street designed to minimise the negative impacts of any semi-basement and under-croft car parking on streetscapes.

DTS/DPF 6.1

The protrusion of semi-basement and undercroft car parking structures does not exceed 1.2m above finished ground level and is screened through appropriate plantings, except in a location or zone where a continuous ground floor façade aligned with the front property boundary is desired.

PO 6.2

Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like.

DTS 6.2

None are applicable.

PO 6.3

Pedestrian connections that are safe, legible, direct and accessible are provided between parking areas and the development.

DTS 6.3

None are applicable.

PO 6.4

Street level vehicle parking areas that are open to the sky are landscaped to provide shade and reduce solar heat absorption and reflection.

DTS / DPF 6.4

Vehicle parking areas that are open to the sky and comprise 10 or more car parking spaces include a shade tree with a mature canopy of 4m diameter spaced for each 10 car parking spaces provided and a landscaped strip on any road frontage of a minimum dimension of 1m.

PO 6.5

Vehicle parking areas are landscaped along public frontages, allotment boundaries and between double rows of parking spaces.

DTS / DPF 6.5

Vehicle parking areas comprising 10 or more car parking spaces contain a vegetated landscaped strip of a minimum dimension of:

- (a) 1m along all public road frontages and allotment boundaries; and
- (b) 0.6m between double rows of car parking spaces.

PO 6.6

Vehicle parking areas and associated driveways are landscaped to shade and positively contribute to amenity.

DTS 6.6

None are applicable.

PO 6.7

Vehicle parking areas and accessways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with landscaping requirements.

DTS 6.7

None are applicable.

Earthworks

PO 7.1

Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.

DTS / DPF 7.1

Development does not involve either:

- (a) excavation exceeding a vertical height of 1m;
- (b) filling exceeding a vertical height of 1m; or
- (c) a total combined excavation and filling vertical height of 2m or more.

Fences and walls

PO 8.1

Fences, walls and retaining walls of sufficient height to maintain privacy and security without unreasonably impacting visual amenity and adjoining land's access to sunlight.

DTS 8.1

None are applicable.

PO 8.2

Landscaping incorporated on the low side of retaining walls that are visible from public roads and public open space to minimise visual impacts.

DTS / DPF 8.2

A vegetated landscaped strip 500mm deep or more is provided against the low side of a retaining wall.

ALL DEVELOPMENT - 4 OR MORE BUILDING LEVELS

External Appearance

PO 9.1

Buildings positively contribute to the character of the local area by responding to local context.

DTS 9.1

None are applicable.

PO 9.2

Fine-grain detail at street level and a mixture of materials at lower building levels near the public interface are provided to reinforce a human scale.

DTS 9.2

None are applicable.

PO 9.3

Buildings designed to reduce visual mass by breaking up building façades into distinct elements.

DTS 9.3

None are applicable.

PO 9.4

Boundary walls visible from public land include visually interesting treatments to break up large blank elevations.

DTS 9.4

None are applicable.

PO 9.5

External materials and finishes are durable and age well to minimise ongoing maintenance requirements.

DTS / DPF 9.5

Buildings utilise a combination (or thereof) of the following external materials and finishes:

- (a) masonry;
- (b) natural stone; and
- (c) pre-finished materials that minimise staining, discolouring or deterioration.

PO 9.6

Street facing building elevations designed to provide attractive, high quality and pedestrian friendly street frontages.

DTS / DPF 9.6

Building street frontages incorporate:

- (a) active uses such as shops or offices;
- (b) prominent entry areas for multi-storey buildings (where it is a common entry);
- (c) habitable rooms of dwellings; and
- (d) areas of communal public realm with public art or the like, where consistent with the Zone and/or sub zone provisions.

PO 9.7

Entrances to multi-storey buildings are safe, attractive, welcoming, functional and contribute to streetscape character.

DTS / DPF 9.7

Entrances to multi-storey buildings:

- (a) oriented towards the street;
- (b) clearly visible and easily identifiable from the street and vehicle parking areas;
- (c) designed to be prominent, accentuated and a welcoming feature if there are no active or occupied ground floor uses;
- (d) provide shelter, a sense of personal address and transitional space around the entry;

- (e) located as close as practicable to the lift and / or lobby access to minimise the need for long access corridors; and
- (f) avoid the creation of potential areas of entrapment.

PO 9.8

Building services, plant and mechanical equipment screened from view from the public realm.

DTS 9.8

None are applicable.

Landscaping

PO 10.1

Development facing a street provides a well landscaped area that contains a deep soil space to accommodate a tree of a species and size adequate to provide shade, contribute to tree canopy targets and soften the appearance of buildings.

DTS / DPF 10.1

Buildings provide a 4m by 4m deep soil space in front of the building to accommodate a medium to large tree, except where no building setback from front property boundaries is desired.

PO 10.2

Deep soil zones provided to retain existing vegetation or provide areas that can accommodate new deep root vegetation, including tall trees with large canopies to provide shade and soften the appearance of multi storey buildings.

DTS / DPF 10.2

Multi-storey development provides deep soil zones and incorporate trees at not less than the following rates, except in a location or zone where full site coverage is desired:

Site-area	Minimum-deep-soil-area	Minimum-dimension	Tree/-deep-soil-zones
<300m ²	10m ²	1.5m	1-small-tree/-10m ² -deep-soil
300-1500m ²	7%·site-area	3m	1·medium-tree/-30m ² -deep-soil
>1500m ²	7%·site-area	6m	1·large-or-medium-tree/-60m ² -deep-soil
Tree-size-and-site-area-definitions			
Small-tree	4-6m·mature-height-and·<4m·canopy-spread		
Medium-tree	6-12m·mature-height-and·4-8m·canopy-spread		
Large-tree	12m·mature-height-and·>8m·canopy-spread		
Site-area	The·total·area·for·development·site,·not·average·area·per·dwelling		

PO 10.3

Deep soil zones provided with access to natural light to assist in maintaining vegetation health.

DTS 10.3

None are applicable.

PO 10.4

Unless separated by a public road or reserve, development sites adjacent to any zone that has a primary purpose of accommodating low rise residential development incorporate a deep soil zone along the common boundary, to enable medium to large trees to be retained or established to assist in screening new buildings of 3 or more storeys in height.

DTS / DPF 10.4

Building elements of 3 or more storeys in height are set back at least 6m from a zone boundary in which a deep soil zone area is incorporated.

Environmental

PO 11.1

Development minimises detrimental micro-climatic impacts on adjacent land and buildings.

DTS 11.1

None are applicable.

PO 11.2

Development incorporates sustainable design techniques and features such as window orientation, eaves and shading structures, water harvesting, green walls, and roof designs that enable the provision of rain water tanks (where they are not provided elsewhere on site), green roofs and photovoltaic cells.

DTS 11.2

None are applicable.

PO 11.3

Development of 5 or more storeys, or 21m or more in height (as measured from natural ground level and excluding rooftop mounted mechanical plant and equipment), designed to minimise the impacts of wind through measures such as:

- (a) a podium at the base of a tall tower and aligned with the street to deflect wind away from the street;
- (b) substantial verandahs around a building to deflect downward travelling wind flows over pedestrian areas;
- (c) the placement of buildings and use of setbacks to deflect the wind at ground level; and / or
- (d) avoid tall shear facades that create windy conditions at street level.

DTS 11.3

None are applicable.

Site Facilities / Waste Storage

PO 12.1

Development provides dedicated area for on-site collection and sorting of recyclable materials and refuse, green organic waste and wash bay facilities for the ongoing maintenance of bins that is adequate in size considering the number and nature of the activities they will serve and the frequency of collection.

DTS 12.1

None are applicable.

PO 12.2

Communal waste storage and collection areas located, enclosed and designed to be screened from view from the public domain, open space and dwellings.

DTS 12.2

None are applicable.

PO 12.3

Communal waste storage and collection areas designed to be well ventilated and located away from habitable rooms.

DTS 12.3

None are applicable.

PO 12.4

Communal waste storage and collection areas designed to allow waste and recycling collection vehicles to enter and leave the site without reversing.

DTS 12.4

None are applicable.

PO 12.5

For mixed use developments, non-residential waste and recycling storage areas and access provide opportunities for on-site management of food waste through composting or other waste recovery as appropriate.

DTS 12.5

None are applicable.

Car Parking

PO 13.1

Multi-level vehicle parking structures designed to contribute to active street frontages and complement neighbouring buildings.

DTS/ DPF 13.1

Multi-level vehicle parking structures within buildings to:

- (a) provide land uses such as commercial, retail or other non-car parking uses along ground floor street frontages; and
- (b) incorporate facade treatments along major street frontages that are sufficiently enclosed and detailed to complement adjacent buildings.

PO 13.2

Multi-level vehicle parking structures within buildings complement the surrounding built form in terms of height, massing and scale.

DTS 13.2

None are applicable.

ALL RESIDENTIAL DEVELOPMENT

External Appearance

PO 14.1

Dwellings incorporate windows facing primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.

DTS/DPF 14.1

Each dwelling with a frontage to a public street includes at least one window with a total window area of at least 2m² facing the primary street, from a habitable room that has a minimum room dimension of 2.7m.

PO 14.2

Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.

DTS/DPF 14.2

Dwellings with a frontage to a public street have the entry door facing the public street.

Outlook and Amenity

PO 15.1

Primary living rooms have an external outlook to provide a high standard of amenity for occupants.

DTS / DPF 15.1

Primary living rooms (other than kitchens) incorporate a window with an external outlook towards the street frontage or private open space.

PO 15.2

Bedrooms separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.

DTS 15.2

None are applicable.

Ancillary Development

PO 16.1

Residential ancillary buildings and structures sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.

DTS / DPF 16.1

Residential ancillary buildings and structures:

- (a) are not being constructed, added to or altered so that any part is situated:
 - i. in front of any part of the building line of the dwelling to which it is ancillary; or
 - ii. within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads);
- (b) in the case of a garage or carport, the garage or carport is setback at least 5.5m from the boundary of the primary street;
- (c) not exceeding 7m or 50% of the site frontage (whichever is the lesser) when facing a primary street or secondary street;
- (d) if situated on a boundary (not being a boundary with a primary street or secondary street), a length not exceeding 10m unless:
 - i. a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
 - ii. the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent;
- (e) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary not exceeding 45% of the length of that boundary;
- (f) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure;
- (g) have a wall height or post height not exceeding 3m above natural ground level;
- (h) have a roof height where no part of the roof is more than 5m above the natural ground level; and
- (i) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.

PO 16.2

Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

DTS / DPF 16.2

Ancillary buildings and structures do not result in:

- (a) less private open space than specified in Design in Urban Areas Table 1 – Outdoor Open Space;
- (b) less on-site car parking than specified in Transport, Access and Parking Table 1 - Off-street Car Parking Requirements; and
- (c) the total roofed floor area of all existing or proposed ancillary building(s) or structure(s) exceeding 60m².

PO 16.3

Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.

DTS/DPF 16.3

The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:

- (a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment; or
- (b) located at least 12m from the nearest habitable room located on an adjoining allotment.

Flooding

PO 17.1

Residential accommodation sited, designed and constructed to prevent the entry of floodwaters where the entry of flood waters is likely to result in undue damage to or compromise ongoing activities within buildings.

DTS / DPF 17.1

Residential accommodation has a ground finished floor level 300mm above the top of the kerb level of the primary street.

RESIDENTIAL DEVELOPMENT - 3 BUILDING LEVELS OR LESS

External appearance

PO 18.1

Garaging designed to not detract from the streetscape or appearance of a dwelling.

DTS/DPF 18.1

Garages and carports facing a street:

- (a) do not exceed 7m in width or 50% of the sites frontage (whichever is less); and
- (b) are situated so that no part of the garage or carport will be in front of any part of the building line of the dwelling
- (c) are setback at least 5.5m from the boundary of the primary street; and
- (d) unless the dwelling has two storeys along the street frontage:
 - i. have single width car parking with a maximum garage door not exceeding 3.5m on sites with a frontage of 12m; or less
 - ii. have a garage door not exceeding 50% of the site frontage or 7m (whichever is less) on sites with a frontage greater than 12m.

PO 18.2

Dwelling facades make a positive contribution to streetscapes and common areas by providing variation of light and shadow and creating a sense of depth.

DTS/DPF 18.2

Each dwelling includes at least 3 of the following design features within each façade facing a public road or common driveway:

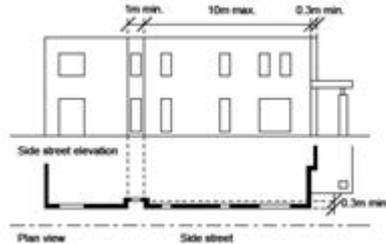

- (a) a minimum of 30% of the façade is setback an additional 300mm from the primary building line;
- (b) a porch or portico that projects at least 1m from the building façade that is open on at least 2 sides;
- (c) a balcony that projects from the building façade;
- (d) a verandah that projects at least 1m from the building façade;
- (e) eaves surrounding the dwelling of a minimum 450mm width;
- (f) a minimum 30% of the upper level projects forward from the lower level primary building line.

PO 18.3

The apparent mass of larger buildings is reduced when viewed from adjoining allotments or public streets.

DTS/DPF 18.3

Buildings of 2 or more building levels and a length exceeding 20m adjacent a secondary street or side boundary incorporate a step back of the building façade of more than 300mm for a minimum length of 1m, at least every 10m.

Overlooking / Visual Privacy

PO 19.1

Development mitigates direct overlooking of habitable rooms and private open spaces of dwellings.

DTS / DPF 19.1

Upper level windows facing side or rear boundaries shared with an allotment put to residential use:

- are permanently obscured to a height of 1.5m above finished floor level that is fixed or not capable of being opened more than 200mm;
- have sill heights greater than or equal to 1.5m above finished floor level; or
- incorporate screening to a height of 1.5m above finished floor level; and
- the building will not have a balcony or terrace on an upper building level, other than where the longest side of that balcony or terrace will face a road (including any road reserve), or reserve (including any land held as open space), and is at least 15m from the private open space of any other dwelling.

Private Open Space

PO 20.1

Dwellings provided with suitable sized areas of usable private open space to meet the needs of occupants.

DTS / DPF 20.1

Private open space provided in accordance with Design in Urban Areas Table 1 - Outdoor Open Space.

PO 20.2

Private open space positioned to provide convenient access from internal living areas.

DTS / DPF 20.2

Private open space is directly accessible from a habitable room, other than a bedroom or study.

PO 20.3

Private open space is positioned and designed to:

- provide useable outdoor space that suits the needs of occupants;
- take advantage of desirable orientation and vistas;
- animate the street frontage by encouraging activity between buildings and public streets;
- adequately define public and private space when located forward of the building; and
- prolong activity along street frontages by protecting against inclement weather.

DTS / DPF 20.3

A portion of the private open space specified in DTS 20.1 can be provided forward of the primary building line where:

- (a) the area is fenced to a maximum height of 1.8m;
- (b) the area incorporates a verandah with a minimum dimension of 1.5m
- (c) an area is provided behind the primary building line that has the minimum dimensions identified in DTS 20.1;

Landscaping

PO 21.1

Soft landscaping incorporated into development to:

- (a) minimise heat absorption and reflection;
- (b) contribute shade and shelter;
- (c) provide for stormwater infiltration and biodiversity; and
- (d) enhance the appearance of land and streetscapes.

DTS / DPF 21.1

Residential development incorporates areas for soft landscaping with a minimum dimension of 0.5 metres provided in accordance with the following:

- (a)

Dwelling-site-area-(or-in-the-case-of-residential-flat-or-group-average-site-area)-(square-metres)⌘	%-of-site-⌘
<200⌘	15%⌘
201--450⌘	20%⌘
>450⌘	25%⌘

; and

- (b) 25% of any land between the road boundary and the primary building line is provided for soft landscaping with a minimum dimension of 0.5 metres.

PO 21.2

Tree planting provided to:

- (a) contribute shade and shelter;
- (b) improve outlook for occupants of buildings;
- (c) reduce the apparent mass of buildings;
- (d) contribute to biodiversity;
- (e) mitigate urban heat; and
- (f) improve the amenity and character of streetscapes and contribute to attractive vistas.

DTS / DPF 21.2

Tree planting is provided in accordance with the following tables:

- (a)

Allotment-size	Tree-size* and-number-required-per-dwelling
<450m ²	1 small tree per dwelling
450-800m ²	1 medium tree
800m ² +	1 large tree

*refer Table DTS 21.2 Tree Size

Table-DTS-21.2-Tree-Size			
Tree-Size	Mature-Height	Mature-spread	Min-soil-area
Small	4-6m	2-4m	10m ² and min dimension of 1.5m
Medium	6-12m	4-8m	30m ² and min dimension of 2m
Large	>12m	>8m	60m ² and min dimension of 4m

Table DTS 21.2 Tree Size

(b) The following discounts apply where existing trees are retained on the subject land that are not a species identified in Regulation 3F(4)(b):

Retained-tree-height	Retained-tree-spread	Retained-soil-area-within-development-site	Discount-applied
4-6m	<4m	10m ² and min dimension of 1.5m	2 small
6-12m	4-8m	30m ² and min dimension of 3m	2 medium
>12m	>8m	60m ² and min dimension of 6m	2 large

(c) Trees can be replaced with smaller trees in accordance with the following rates:

Tree-size*	Equivalent-planting
Medium tree	2 small trees
Large tree	4 small trees or 2 medium trees

*refer Table DTS 21.2 Tree Size

Water Sensitive Design

PO 22.1

Residential development designed to capture and re-use stormwater to:

(a) maximise conservation of water resources;

- (b) manage peak stormwater runoff flows and volume to ensure the carrying capacities of downstream systems are not overloaded; and
- (c) manage stormwater runoff quality.

DTS / DPF 22.1

Residential development in the form of:

- (a) detached, semi-detached or row dwellings include a retention rainwater tank storage:
 - i. connected to at least 80% of the roof area of the dwelling (row dwelling), or at least 60% of the roof area of the dwelling (detached and semi-detached dwellings);
 - ii. connected to all toilets and either the laundry cold water outlets or hot water service;
 - iii. that has a minimum total capacity in accordance with Table 1, and
 - iv. the roof is at least 80% of the impervious area; or

Table 1: Retention Rainwater Tank

Allotment size (m ²)	Minimum site % perviousness	Minimum rainwater tank volume	Additional site permeability discount opportunity	
			Site % perviousness	Minimum rainwater tank volume (L)
<200	15%	2,000		
201-400	20%	3,000	30%	2,000
400-500	25%	5,000	35%	3,000

- (a) hammerhead dwellings have driveways and pathways constructed of a minimum of 50% permeable or porous material and include a retention rainwater tank storage:
 - i. connected to at least 60% of the roof area of the dwelling;
 - ii. connected to all toilets and either the laundry cold water outlets or hot water service; and
 - iii. that has a minimum total capacity in accordance with Table 2.

Table 2: Retention Rainwater Tank Option

Allotment size (m ²)	Site % perviousness	Rainwater tank volume (L)
<200	15%	2,000
201-400	20%	3,000
401-500	25%	5,000

PO 22.2

Development creating 5-19 dwellings includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.

DTS 22.2

Development creating 5-19 dwellings is accompanied by an approved Stormwater Management Plan that achieves the following stormwater runoff outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus; and
- (c) 45 per cent reduction in average annual total nitrogen.

PO 22.3

Development creating 5-19 dwellings includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

DTS 22.3

Development creating 5-19 dwellings

- (a) maintains:
 - i. a pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 5-year ARI (18.1% AEP) 30 minute storm; and
 - ii. the stormwater runoff time to peak to match that of the pre-development condition; or
- (b) capture and retain the difference in pre-development runoff volume (based upon a 0.35 runoff coefficient) vs post development runoff volume from the site for a 5-year ARI (18.1% AEP) 30 minute storm; and
- (c) manage site generated stormwater runoff up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings.

Car parking, access and manoeuvrability

PO 23.1

Covered car parking spaces are of dimensions to be functional, accessible and convenient.

DTS / DPF 23.1

Covered car parking spaces:

- (a) where enclosed by fencing or walls, have:
 - i. a minimum internal width of 3.2m and length of 6.0m for a single space;
 - ii. a minimum internal width of 6.0m and length of 6.0m for a double space (side by side); and
 - iii. a minimum internal width of 3.2m and length of 11m for a double space (tandem); or
- (b) where not enclosed by fencing, walls or garage doors, have:
 - i. a minimum width of 3.0m and minimum length of 5.5m for a single space;
 - ii. a minimum width of 5.2m and minimum length of 5.5m for a double (side by side) space; and
 - iii. a minimum width of 3.0m and minimum length of 10.4m for a double (tandem) space.

PO 23.2

Uncovered car parking space are of dimensions to be functional, accessible and convenient.

DTS / DPF 23.2

Uncovered car parking spaces have a minimum width of 2.4m and a minimum length of 5.5m.

PO 23.3

Driveways and access points located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages and on-street parking.

DTS / DPF 23.3

Driveways and access points:

- (a) for sites with a frontage to a public road of 12m or less, have a maximum width of 3.2m measured at the property boundary and are the only access point provided on the site; or
- (b) for sites with a frontage to a public road greater than 12m:
 - i. have a maximum width of 6m measured at the property and are the only access point provided on the site; or
 - ii. have a maximum width of 3.2 metres measured at the property boundary and no more than two access points are provided on site.

PO 23.4

Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.

DTS / DPF 23.4

Vehicle access to designated car parking spaces:

- (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land
- (b) where newly proposed, is setback:
 - (a) 500mm or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner;
 - (b) 2m or more from a street tree unless consent is provided from the tree owner;
 - (c) 6m or more from the tangent point of an intersection of 2 or more roads or a pedestrian-actuated crossing.

PO 23.5

Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.

DTS/ DPF 23.5

Driveways are designed and sited so that:

- (a) the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the garage or carport when work is completed is not steeper than 1:4 on average; and
- (b) the centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access.

PO 23.6

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

DTS / DPF 23.6

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

Waste storage

PO 24.1

Provision is made for the convenient storage of waste bins in a location screened from public view.

DTS / DPF 24.1

Dwellings are provided with:

- (a) an area of 3m² or more for the storage of waste (separate from any designated car parking spaces or private open space) is provided behind the building line; and
- (b) a continuous unobstructed path of travel with a minimum width of 800mm between the waste bin storage area and the street.

Design of Transportable Dwellings

PO 25.1

The sub-floor space beneath transportable buildings enclosed to give the appearance of a permanent structure.

DTS 25.1

None are applicable.

RESIDENTIAL DEVELOPMENT - 4 OR MORE BUILDING LEVELS (INCLUDING SERVICED APARTMENTS)

Outlook and Visual Privacy

PO 26.1

Ground level dwellings have a satisfactory short range visual outlook to public, communal or private open space.

DTS / DPF 26.1

Buildings:

- (a) provide a habitable room at ground or first level with a window facing toward the street; and
- (b) limit the height / extent of solid walls or fences facing the street to 1.2m high above the footpath level or, where higher, to 50% of the site frontage.

PO 26.2

The visual privacy of ground level dwellings within multi-level buildings is protected.

DTS / DPF 26.2

The finished floor level of ground level dwellings in multi-storey developments is raised by up to 1.2m.

Private Open Space

PO 27.1

Dwellings provided with suitable sized areas of usable private open space to meet the needs of occupants.

DTS / DPF 27.1

Private open space provided in accordance with Design in Urban Areas Table 1 - Outdoor Open Space.

Apartment Amenity

PO 28.1

Residential accommodation within multi-level buildings have habitable rooms, windows and balconies designed and positioned to be separated from those of other dwellings and accommodation to provide visual and acoustic privacy and allow for natural ventilation and the infiltration of daylight into interior and outdoor spaces.

DTS / DPF 28.1

Habitable rooms and balconies of independent dwellings and accommodation are separated by at least 6m from one another where there is a direct 'line of sight' between them and 3m or more from a side or rear property boundary.

PO 28.2

Balconies are designed, positioned and integrated into the overall architectural form and detail of the development to:

- (a) respond to daylight, wind, and acoustic conditions to maximise comfort and provide visual privacy; and
- (b) allow views and casual surveillance of the street while providing for safety and visual privacy of nearby living spaces and private outdoor areas.

DTS / DPF 28.2

Balconies utilise a combination (or thereof) of the following design elements:

- (a) sun screens;
- (b) pergolas;
- (c) louvres;
- (d) green facades; or

(e) openable walls.

PO 28.3

Balconies are of sufficient size and depth to accommodate outdoor seating and promote indoor / outdoor living.

DTS / DPF 28.3

Balconies open directly from a habitable room and incorporate:

- (a) a minimum dimension of 2m or more and are well proportioned to accommodate a table and 2 chairs; or
- (b) a minimum dimension of 2.4m and are well proportioned to accommodate a table and 4 chairs.

PO 28.4

Dwellings are provided with sufficient space for storage to meet likely occupant needs.

DTS / DPF 28.4

Dwellings (not including student accommodation or serviced apartments) are provided with storage at the following rates:

- (a) studio: 6m³ or more;
- (b) 1 bedroom dwelling / apartment: 8m³ or more;
- (c) bedroom dwelling / apartment: 10m³ or more; and
- (d) 3+ bedroom dwelling / apartment: 12m³; and
- (e) 50% or more of the storage volume is provided within the dwelling.

PO 28.5

Universal design features are incorporated to provide options for people living with disabilities or limited mobility and / or to facilitate ageing in place.

DTS 28.5

None are applicable.

Apartment Configuration

PO 29.1

Buildings containing in excess of 10 dwellings provide a variety of dwelling sizes and a range in the number of bedrooms per dwelling to contribute to housing diversity.

DTS / DPF 29.1

Buildings containing in excess of 10 dwellings provide at least one of each of the following:

- (a) studio (where there is no separate bedroom);
- (b) 1 bedroom dwelling / apartment with a floor area of at least 50m²;
- (c) 2 bedroom dwelling / apartment with a floor area of at least 65m²; and
- (d) 3+ bedroom dwelling / apartment with a floor area of at least 80m², and any dwelling over 3 bedrooms provides an additional 15m² for every additional bedroom.

PO 29.2

Dwellings located on the ground floor of multi-level buildings with 3 or more bedrooms have the windows of their habitable rooms overlooking internal courtyard space or other public space, where possible.

DTS 29.2

None are applicable.

Common Areas

PO 30.1

The size of lifts, lobbies and corridors is sufficient to accommodate movement of bicycles, strollers, mobility aids and visitor waiting areas.

DTS / DPF 30.1

Common corridor or circulation areas:

- (a) have a minimum ceiling height of 2.7m;
- (b) provide access to no more than 8 dwellings; and
- (c) incorporate a wider section of apartment entries where the corridors exceed 12m in length from a core.

GROUP DWELLINGS, RESIDENTIAL FLAT BUILDINGS AND BATTLE-AXE DEVELOPMENT

Amenity

PO 31.1

Dwellings are of a suitable size to provide high standard of amenity for occupants.

DTS / DPF 31.1

Dwellings have a minimum internal floor area in accordance with the following table:

Bedrooms	Minimum-internal-floor-area
Studio (where there is no separate bedroom)	35m ²
1-bed	50m ²
2-bed	65m ²
3+ bed	80m ² , and any dwelling over 3 bedrooms provides an additional 15m ² for every additional bedroom

PO 31.2

The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.

DTS / DPF 31.1

None are applicable.

PO 31.3

Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented towards neighbouring properties.

DTS 31.3

None are applicable.

Communal Open Space

PO 32.1

Communal open space provided where private open space provision is inadequate to meet the needs of occupants or where the nature of the development is such that private open space is not ordinarily provided.

DTS 32.1

None are applicable.

Car parking, access and manoeuvrability

PO 33.1

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

DTS / DPF 33.1

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

PO 33.2

The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.

DTS / DPF 33.2

Access to group dwellings or dwellings within a residential flat building provided via a single common driveway.

PO 33.3

Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability of the types of vehicles that are reasonably anticipated.

DTS / DPF 33.3

Battle-axe driveways and driveways that service more than one dwelling satisfy the following:

- (a) a width of 3m or more;
- (b) for driveways servicing three or more dwellings which exceed 30m in length, incorporate a least one vehicle passing point with a width of 5m or more and a length of 6m or more, and an additional passing point at least every 30m thereafter;
- (c) locate the passing point in (b) within 12m of the primary street boundary; and
- (d) a width of 5m or more for at least the first 6m from the primary street boundary where located on an arterial road.

PO 33.4

Driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site in a safe and convenient manner.

DTS / DPF 33.4

Driveways providing access to more than one dwelling allow a B85 passenger vehicle to enter and exit all dedicated car parks and garages in a forward direction without requiring more than a 2-point-turn manoeuvre.

PO 33.5

Dwellings are adequately separated from common driveways and manoeuvring areas.

DTS/DPF 33.5

Dwellings are at least 1.5m from any vehicle movement path required to achieve DTS 34.3.

Landscaping

PO 34.1

Landscaping is provided between dwellings and common driveways to improve the outlook for occupants and improve the appearance of common areas.

DTS / DPF 34.1

Other than where located directly in front of a garage or directly adjacent a building entry door, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.

PO 34.2

Landscaping is provided that improves the appearance of common driveways.

DTS / DPF 34.2

Where a common driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point required in DTS 34.3).

Site Facilities / Waste Storage

PO 35.1

Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.

DTS 35.1

None are applicable.

PO 35.2

Provision is made for suitable external clothes drying facilities.

DTS 35.2

None are applicable.

PO 35.3

Provision is made for suitable household waste and recyclable material storage facilities conveniently located away, or screened, from public view.

DTS 35.3

None are applicable.

PO 35.4

Waste and recyclable material storage areas are located away from dwellings.

DTS / DPF 35.4

Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.

PO 35.5

Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.

DTS 35.5

None are applicable.

SUPPORTED ACCOMMODATION, HOUSING FOR AGED PERSONS, AND PEOPLE WITH DISABILITIES

Siting and Configuration

PO 36.1

Supported accommodation and housing for aged persons and people with disabilities located where on-site movement of residents is not unduly restricted by the slope of the land.

DTS 36.1

None are applicable.

Movement and Access

PO 37.1

Development designed to support safe and convenient access and movement for residents by providing:

- (a) ground-level access or lifted access to all units;
- (b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places;
- (c) car parks with gradients no steeper than 1-in-40, and of sufficient area to provide for wheelchair manoeuvrability; and
- (d) kerb ramps at pedestrian crossing points.

DTS 37.1

None are applicable.

Communal Open Space

PO 38.1

Development designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors alike.

DTS 38.1

None are applicable.

PO 38.2

Communal open space provided where private open space provision is inadequate to meet the needs of occupants or where the nature of the development is such that private open space is not ordinarily provided (such as supported accommodation).

DTS 38.2

None are applicable.

Site Facilities / Waste Storage

PO 39.1

Development designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric powered vehicles.

DTS 39.1

None are applicable.

PO 39.2

Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.

DTS 39.2

None are applicable.

PO 39.3

Provision is made for suitable external clothes drying facilities.

DTS 39.3

None are applicable.

PO 39.4

Provision is made for suitable household waste and recyclable material storage facilities conveniently located away, or screened, from view.

DTS 39.4

None are applicable.

PO 39.5

Waste and recyclable material storage areas are located away from dwellings.

DTS / DPF 39.5

Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.

PO 39.6

Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.

DTS 39.6

None are applicable.

PO 39.7

Services including gas and water meters conveniently located and screened from public view.

DTS 39.7

None are applicable.

STUDENT ACCOMMODATION**PO 40.1**

Student accommodation is designed to provide safe, secure, attractive, convenient and comfortable living conditions for residents, including an internal layout and facilities that are designed to provide sufficient space and amenity for the requirements of student life and promote social interaction. DTS / DPF 41.1

Student accommodation provides:

- (a) a range of living options that meet a variety of accommodation needs, such as one bedroom, two bedroom and disability access units;
- (b) common or shared facilities to enable a more efficient use of space, including:
 - i. shared cooking, laundry and external drying facilities;
 - ii. internal and external communal and private open space provided in accordance with Design in Urban Areas Table 1 - Outdoor Open Space;
 - iii. common storage facilities at the rate of 8 cubic metres for every 2 dwellings or students;
 - iv. common on-site parking to meet anticipated demand in accordance with Transport, Access and Parking Table 1 - Off-street Car Parking Requirements ; and
 - v. secure and sheltered bicycle parking at the rate of one space for every 2 students.

PO 40.2

Student accommodation designed to provide easy adaptation of the building to accommodate an alternative use of the building in the event it is no longer required for student housing.

DTS 40.2

None are applicable.

ALL NON-RESIDENTIAL DEVELOPMENT

Water Sensitive Design

PO 41.1

Development likely to result in risk of export of sediment, suspended solids, organic matter, nutrients, oil and grease include stormwater management systems designed to minimise pollutants entering stormwater.

DTS/DPF 41.1

Development includes stormwater management systems designed to achieve the following gross pollutant outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus;
- (c) 45 per cent reduction in average annual total nitrogen;
- (d) 90 per cent reduction of litter/gross pollutants compared to untreated stormwater runoff; and
- (e) no visible oils/grease for flows up to the 1-in-3 month average return interval flood peak flow.

PO 41.2

Water discharged from a development site to be of a physical, chemical and biological condition equivalent to or better than its pre-developed state.

DTS 41.2

None are applicable.

PO 41.3

Development includes stormwater management systems to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

DTS / DPF 41.3

Development includes stormwater management systems that:

- (a) maintain a pre-development peak flow rate from the site, based upon a 0.35 runoff coefficient for the 20-year ARI (5% AEP) 30 minute storm, unless a lower performance measure is specified in an approved catchment based Stormwater Management Plan;
- (b) maintains the stormwater runoff time to peak to match that of the pre-development; and
- (c) manages up to and including the 100-year ARI flood event (1% AEP) to avoid flooding of buildings.

Wash-down and Waste Loading and Unloading

PO 42.1

Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, plant or equipment that are:

- (a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off;
- (b) paved with an impervious material to facilitate wastewater collection;
- (c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area; and
- (d) designed to drain wastewater to either:
 - i. a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme; or

- ii. a holding tank and its subsequent removal off-site on a regular basis.

DTS 42.1

None are applicable.

Table 1 - Outdoor Open Space

Dwelling Type	Dwelling / Site Configuration	Minimum Rate
Detached dwelling Semi-detached dwelling Row dwelling Group dwelling	Site area >1,000m ²	Total area: 20% of total site area Adjacent to habitable room: 10% total site area / minimum dimension 4m.
	Site area 500m ² – 1,000m ²	Total area: 80m ² Adjacent to habitable room: 24m ² / minimum dimension 4m.
	Site area 300m ² - 500m ²	Total area: 60m ² Adjacent to habitable room: 16m ² / minimum dimension 4m.
	Site area <300m ²	Total area: 24m ² Adjacent to habitable room: 16m ² / minimum dimension 3m
Cabin or caravan (permanently fixed to the ground) in a Residential Park Zone or Caravan and Tourist Park Zone		Total area: 16m ² , which may be used as second car parking space, provided on each site intended for residential occupation.
Apartments	Dwellings at ground level:	
	- All types	15m ² / minimum dimension 3m
	Dwellings located above ground level:	
	- Studio	4m ² / minimum dimension 1.8m
	- One bedroom dwelling	8m ² / minimum dimension 2.1m
	- Two bedroom dwelling	11m ² / minimum dimension 2.4m
- Three + bedroom dwelling	15 m ² / minimum dimension 2.6m	

Design in Rural Areas

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Development that is:

- (a) contextual – by considering, recognising and carefully responding to its natural surroundings and positively contributing to the character of the immediate area;
- (b) durable – fit for purpose, adaptable and long lasting;
- (c) inclusive – by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access, and also promote the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors alike; and
- (d) sustainable – by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

ALL DEVELOPMENT

External Appearance

PO 1.1

Buildings that reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).

DTS 1.1

None are applicable.

PO 1.2

Where zero or minor setbacks are desirable, development provides shelter over footpaths to positively contribute to the walkability and comfort of the public realm.

DTS 1.2

None are applicable.

PO 1.3

Buildings (other than ancillary buildings, group dwellings or buildings on a battle-axe allotment) designed so the main façade faces the primary street frontage of the land on which they are situated.

DTS 1.3

None are applicable.

PO 1.4

Plant, exhaust and intake vents and other technical equipment integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by:

- (a) positioning plant and equipment discretely, in unobtrusive locations as viewed from public roads and spaces;
- (b) screening rooftop plant and equipment from view; and
- (c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses.

DTS / DPF 1.4

Development does not incorporate any structures that protrude beyond the roofline.

PO 1.5

The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form) taking into account the form of development contemplated in the relevant zone.

DTS 1.5

None are applicable.

Safety

PO 2.1

Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.

DTS 2.1

None are applicable.

PO 2.2

Development designed to differentiate public, communal and private areas.

DTS 2.2

None are applicable.

PO 2.3

Buildings designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.

DTS 2.3

None are applicable.

PO 2.4

Development at street level designed to maximise opportunities for passive surveillance of adjacent public realm.

DTS 2.4

None are applicable.

PO 2.5

Common areas and entry points of buildings (such as the foyer areas of residential buildings), and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.

DTS 2.5

None are applicable.

Landscaping

PO 3.1

Landscaped (including trees), permeable open spaces incorporated to:

- (a) minimise heat absorption and reflection;
- (b) maximise shade and shelter;

- (c) maximise stormwater infiltration; and
- (d) enhance the appearance of land and streetscapes.

DTS 3.1

None are applicable.

Environmental Performance

PO 4.1

Buildings sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces.

DTS 4.1

None are applicable.

PO 4.2

Buildings sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling.

DTS 4.2

None are applicable.

PO 4.3

Buildings incorporate climate responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells.

DTS 4.3

None are applicable.

Water Sensitive Design

PO 5.1

Development sited and designed to maintain natural hydrological systems without negatively impacting:

- (a) the quantity and quality of surface and groundwater;
- (b) the depth and directional flow of surface and groundwater; or
- (c) the quality and function of natural springs.

DTS 5.1

None are applicable.

On-site Waste Treatment Systems

PO 6.1

Dedicated on-site effluent disposal areas that do not include any areas to be used for, or could be reasonably foreseen to be used for, private open space, driveways or car parking.

DTS / DPF 6.1

Effluent disposal drainage areas do not:

- (a) encroach within an area used as private open space or would result in less private open space than that specified in Design in Rural Areas Table 1 - Private Open Space;
- (b) use an area also used as a driveway; and
- (c) encroach within an area used for on-site car parking or would result in less on-site car parking than that specified in Transport, Access and Parking Table 1 - Off-Street Car Parking Requirements.

Car parking appearance

PO 7.1

Development facing the street designed to minimise the negative impacts of any semi-basement and under-croft car parking on the street scape.

DTS / DPF 7.1

The protrusion of undercroft car parks to not exceed 1.2m above finished ground level and screened through appropriate plantings, except in a location or zone where a continuous ground floor façade aligned with the front property boundary is desired.

PO 7.2

Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like.

DTS 7.2

None are applicable.

PO 7.3

Pedestrian connections that are safe, legible, direct and accessible are provided between parking areas and the development.

DTS 7.3

None are applicable.

PO 7.4

Street level vehicle parking areas that are open to the sky are landscaped to provide shade and reduce solar heat absorption and reflection.

DTS / DPF 7.4

Vehicle parking areas that are open to the sky and comprise 10 or more car parking spaces, include a shade tree with a mature canopy of 4m diameter spaced for each 10 car parking spaces provided and a landscaped strip on any road frontage of a minimum dimension of 1m.

PO 7.5

Vehicle parking areas are landscaped along public frontages, allotment boundaries and between double rows of parking spaces.

DTS / DPF 7.5

Vehicle parking areas comprising 10 or more car parking spaces contain a vegetated landscaped strip of a minimum dimension of:

- (a) 1m along all public road frontages and allotment boundaries; and
- (b) 0.6m between double rows of car parking spaces.

PO 7.6

Vehicle parking areas and associated driveways are landscaped to shade and positively contribute to amenity.

DTS 7.6

None are applicable.

PO 7.7

Vehicle parking areas and accessways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with landscaping requirements.

DTS 7.7

None are applicable.

Earthworks

PO 8.1

Development, including any associated driveways and access tracks, minimise the need for earthworks to limit disturbance to natural topography.

DTS / DPF 8.1

Development does not involve either:

- (a) excavation exceeding a vertical height of 1m;
- (b) filling exceeding a vertical height of 1m; or
- (c) a total combined excavation and filling vertical height of 2m or more.

Fences and walls

PO 9.1

Fences, walls and retaining walls alongside and rear boundaries of sufficient height to maintain privacy and security without unreasonably impacting visual amenity and adjoining land's access to sunlight.

DTS 9.1

None are applicable.

PO 9.2

Landscaping incorporated on the low side of retaining walls that are visible from public roads and public open space to minimise visual impacts.

DTS / DPF 9.2

A vegetated landscaped strip 500mm deep or more is provided against the low side of a retaining wall.

ALL RESIDENTIAL DEVELOPMENT

External appearance

PO 10.1

Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.

DTS/DPF 10.1

Each dwelling with a frontage to a public street includes at least one window (or windows) with a total window area of at least 2m² facing the primary street, from a habitable room that has minimum room dimension of 2.7m.

PO 10.2

Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.

DTS/DPF 10.2

Dwellings with a frontage to a public street has the entry door facing the public street.

Outlook and amenity

PO 11.1

Primary living rooms have an external outlook to provide a high standard of amenity for occupants.

DTS / DPF 11.1

Primary living rooms (other than kitchens) incorporate a window with an external outlook towards the street frontage or private open space.

PO 11.2

Bedrooms separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.

DTS 11.2

None are applicable.

Ancillary Development

PO 12.1

Residential ancillary buildings and structures sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.

DTS / DPF 12.1

Residential ancillary buildings and structures:

- (a) are not being constructed, added to or altered so that any part is situation:
 - i. in front of any part of the building line of the dwelling to
 - ii. within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
- (b) in the case of a garage or carport, the garage or carport is setback at least 5.5m from the boundary of the primary street;
- (c) not exceeding 7m or 50% of the site frontage (whichever is the lesser) when facing a primary street or secondary street;
- (d) if situated on a boundary (not being a boundary with a primary street or secondary street), a length not exceeding 10m unless:
 - i. a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
 - ii. the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- (e) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary not exceeding 45% of the length of that boundary;
- (f) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure;
- (g) have a wall height or post height not exceeding 3m above natural ground level;
- (h) have a roof height where no part of the roof is more than 5m above the natural ground level; and
- (i) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.

PO 12.2

Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

DTS / DPF 12.2

Ancillary buildings and structures do not result in:

- (a) less private open space than specified in Design in Rural Areas Table 1 – Outdoor Open Space;
- (b) less on-site car parking than specified in Transport, Access and Parking Table 1 - Off-street Car Parking Requirements; and
- (c) the total roofed floor area of all existing or proposed ancillary building(s) or structure(s) exceeding 60m².

PO 12.3

Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.

DTS/DPF 12.3

The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:

- (a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment; or
- (b) located at least 12m from the nearest habitable room located on an adjoining allotment.

RESIDENTIAL DEVELOPMENT - 3 BUILDING LEVELS OR LESS

External appearance

PO 13.1

Garaging designed to not detract from the streetscape or appearance of a dwelling.

DTS/DPF 13.1

Garages and carports facing a street:

- (a) do not exceed 7m in width or 50% of the sites frontage (whichever is less); and
- (b) are situated so that no part of the garage or carport will be in front of any part of the building line of the dwelling
- (c) are setback at least 5.5m from the boundary of the primary street;
- (d) unless the dwelling has two storeys along the street frontage:
 - i. have single width car parking with a maximum garage door not exceeding 3.5m on sites with a frontage of 12m or less
 - ii. have a garage door not exceeding 50% of the site frontage or 7m (whichever is less) on sites with a frontage greater than 12m.

PO 13.2

Dwelling facades make a positive contribution to streetscapes and common areas by providing variation of light and shadow and creating a sense of depth.

DTS/DPF 13.2

Each dwelling includes at least 3 of the following design features along each façade facing a public road or common driveway:

- (a) a minimum of 30% of the façade is setback an additional 300mm from the primary building line;
- (b) a porch or portico that projects at least 1m from the building façade that is open on at least 2 sides;
- (c) a balcony that projects from the building façade;
- (d) a verandah that projects at least 1m from the building façade;
- (e) eaves surrounding the dwelling of a minimum 450mm width;
- (f) a minimum 30% of the upper level projects forward from the lower level primary building line.

PO 13.3

The apparent mass of larger buildings is reduced when viewed from adjoining allotments or public streets.

DTS/DPF 13.3

Buildings of 2 or more building levels and a length exceeding 20m adjacent a secondary street or side boundary incorporate a step back of the building façade of at least 300mm for a minimum length of 1m, at least every 10m.

Overlooking / Visual Privacy

PO 14.1

Development mitigates direct overlooking of habitable rooms and private open spaces of dwellings.

DTS / DPF 14.1

Upper level windows facing side or rear boundaries shared with an allotment put to residential use:

- (a) are permanently obscured to a height of 1.5m above finished floor level that is fixed or not capable of being opened more than 200mm;
- (b) have sill heights greater than or equal to 1.5m above finished floor level; or
- (c) incorporate screening to a height of 1.5m above finished floor level; and
- (d) the building will not have a balcony or terrace on an upper building level, other than where the longest side of that balcony or terrace will face a road (including any road reserve), or reserve (including any land held as open space), and is at least 15m from the private open space of any other dwelling.

Private Open Space

PO 15.1

Dwellings provided with suitable sized areas of usable private open space to meet the needs of occupants.

DTS / DPF 15.1

Private open space provided in accordance with Design in Rural Areas Table 1 - Outdoor Open Space.

PO 15.2

Private open space positioned to provide convenient access from internal living areas.

DTS / DPF 15.2

Private open space is directly accessible from a habitable room, other than a bedroom or study.

PO 15.3

Private open space is positioned and designed to:

- (a) provide useable outdoor space that suits the needs of occupants;
- (b) take advantage of desirable orientation and vistas;
- (c) animate street frontages by encouraging activity between buildings and public streets;
- (d) adequately define public and private space where located forward of the building; and
- (e) prolong activity along street frontages by protecting against inclement weather.

DTS / DPF 15.3

A portion of the private open space specified in DTS 15.1 can be provided forward of the primary building line where:

- (a) the area is fenced to a maximum height of 1.8m;
- (b) the area incorporates a verandah with a minimum dimension of 1.5m; and
- (c) an area is provided behind the primary building line that has the minimum dimensions identified in DTS 15.1.

Water Sensitive Design

PO 16.1

Development creating 5-19 dwellings includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.

DTS 16.1

Development creating 5-19 dwellings is accompanied by an approved Stormwater Management Plan that achieves the following stormwater runoff outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus; and
- (c) 45 per cent reduction in average annual total nitrogen.

PO 16.2

Development creating 5-19 dwellings includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

DTS 16.2

Development creating 5-19 dwellings:

- (a) maintains:
 - i. a pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 5-year ARI (18.1% AEP) 30 minute storm; and
 - ii. the stormwater runoff time to peak to match that of the pre-development condition; or
- (b) capture and retain the difference in pre-development runoff volume (based upon a 0.35 runoff coefficient) vs post development runoff volume from the site for a 5-year ARI (18.1% AEP) 30 minute storm; and
- (c) manage site generated stormwater runoff up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings.

Car parking, access and manoeuvrability

PO 17.1

Covered parking spaces are of a size and dimensions to be functional, accessible and convenient.

DTS / DPF 17.1

Covered car parking spaces:

- (a) where enclosed by fencing or walls, have:
 - i. a minimum internal width of 3.2m and length of 6.0m for a single space;
 - ii. a minimum internal width of 6.0m and length of 6.0m for a double space (side by side); and
 - iii. a minimum internal width of 3.2m and length of 11m for a double space (tandem); or
- (b) where not enclosed by fencing, walls or garage doors, have:
 - i. a minimum width of 3.0m and minimum length of 5.5m for a single space;
 - ii. a minimum width of 5.2m and minimum length of 5.5m for a double (side by side) space; and
 - iii. a minimum width of 3.0m and minimum length of 10.4m for a double (tandem) space.

PO 17.2

Uncovered parking spaces are of a size and dimensions to be functional, accessible and convenient.

DTS / DPF 17.2

Uncovered car parking spaces have a minimum width of 2.4m and a minimum length of 5.5m.

PO 17.3

Driveways located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages and on-street parking.

DTS / DPF 17.3

Driveways and access points:

- (a) for sites with a frontage to a public road of 12m or less, have a maximum width of 3.2m measured at the property boundary and are the only access point provided on the site; or
- (b) for sites with a frontage to a public road greater than 12m:
 - i. have a maximum width of 6m measured at the property and are the only access point provided on the site; or
 - ii. have a maximum width of 3.2 metres measured at the property boundary and no more than two access points are provided on site.

PO 17.4

Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.

DTS / DPF 17.4

Vehicle access to designated car parking spaces:

- (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land
- (b) where newly proposed, is setback:
 - i. 500mm or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner;
 - ii. 2m or more from a street tree unless consent is provided from the tree owner;
 - iii. 6m or more from the tangent point of an intersection of 2 or more roads or a pedestrian-actuated crossing.

PO 17.5

Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.

DTS/ DPF 17.5

Driveways are designed and sited so that:

- (a) the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the garage or carport when work is completed is not steeper than 1:4 on average; and
- (b) the centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access.

PO 17.6

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

DTS / DPF 17.6

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

Waste storage

PO 18.1

Provision is made for the convenient storage of waste bins in a location screened from public view.

DTS / DPF 18.1

Dwellings are provided with:

- (a) an area of 3m² or more for the storage of waste (separate from any designated car parking spaces or private open space) is provided behind the building line; and
- (b) a continuous unobstructed path of travel with a minimum width of 800mm between the waste bin storage area and the street.

Design of Transportable Dwellings

PO 19.1

The sub-floor space beneath transportable buildings enclosed to give the appearance of a permanent structure.

DTS 19.1

None are applicable.

GROUP DWELLINGS, RESIDENTIAL FLAT BUILDINGS AND BATTLE-AXE DEVELOPMENT

Amenity

PO 20.1

Dwellings are of a suitable size to accommodate a layout that is well organised and provides high standard of amenity for occupants.

DTS / DPF 20.1

Dwellings have a minimum internal floor area in accordance with the following table:

Bedrooms	Minimum-internal-floor-area
1-bed	50m ²
2-bed	65m ²
3-bed	80m ² , and any dwelling over 3 bedrooms provides an additional 15m ² for every additional bedroom

PO 20.2

The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.

DTS 20.2

None are applicable.

PO 20.3

Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented to towards neighbouring properties.

DTS 20.3

None are applicable.

Communal Open Space

PO 21.1

Communal open space provided where private open space provision is inadequate to meet the needs of occupants or where the nature of the development is such that private open space is not ordinarily provided.

DTS 21.1

None are applicable.

Car parking, access and manoeuvrability

PO 22.1

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

DTS / DPF 22.1

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

PO 22.2

The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.

DTS / DPF 22.2

Access to group dwellings or dwellings within a residential flat building provided via a single common driveway.

PO 22.3

Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated.

DTS / DPF 22.3

Driveways that service more than one dwelling have:

- a) a minimum width of 3m;
- b) incorporate a least one vehicle passing point with minimum width of 5m and minimum length of 6m, and an additional passing point at least every 25m thereafter;
- c) locate the passing point in (b) within 12m of the primary street boundary; and
- d) a width of 5m for at least the first 6m from the primary street boundary where located on an arterial road.

PO 22.4

Residential driveways that service more than one dwelling are designed to allow adequate movement.

DTS / DPF 22.4

Where in a battle-axe configuration, a driveway servicing one dwelling to have a minimum width of 3m.

PO 22.5

Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site in a safe and convenient manner.

DTS / DPF 22.5

Driveways providing access to more than one dwelling allow a B85 passenger vehicle to enter and exit all dedicated car parks and garages in a forward direction without requiring more than a 3-point turn manoeuvre.

PO 22.6

Dwellings are adequately separated from common driveways and manoeuvring areas.

DTS/DPF 22.6

Dwellings are at least 1.5m from any vehicle movement path required to achieve DTS 21.5.

Landscaping

PO 23.1

Landscaping is provided between dwellings and common driveways to improve the outlook for occupants and improve the appearance of common areas.

DTS/ DPF 23.1

Other than where located directly in front of a garage or directly adjacent a building entry door, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.

PO 23.2

Landscaping is provided that improves the appearance of common driveways.

DTS / DPF 23.2

Where a common driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point required in DTS 21.3).

Site Facilities / Waste Storage

PO 24.1

Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.

DTS 24.1

None are applicable.

PO 24.2

Provision is made for suitable external clothes drying facilities.

DTS 24.2

None are applicable.

PO 24.3

Provision is made for suitable household waste and recyclable material storage facilities conveniently located from public view.

DTS 24.3

None are applicable.

PO 24.4

Waste and recyclable material storage areas are located away from dwellings.

DTS / DPF 24.4

Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.

PO 24.5

Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.

DTS 24.5

None are applicable.

SUPPORTED ACCOMMODATION, HOUSING FOR AGED PERSONS, AND PEOPLE WITH DISABILITIES

Siting and Configuration

PO 25.1

Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land.

DTS 25.1

None are applicable.

Movement and Access

PO 26.1

Development is designed to support safe and convenient access and movement for residents by providing:

- (a) ground-level access or lifted access to all units;
- (b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places;
- (c) car parks with gradients no steeper than 1-in-40, and of sufficient area to provide for wheelchair manoeuvrability; and
- (d) kerb ramps at pedestrian crossing points.

DTS 26.1

None are applicable.

Communal Open Space

PO 27.1

Development that is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors alike.

DTS 27.1

None are applicable.

PO 27.2

Communal open space provided where private open space provision is inadequate to meet the needs of occupants or where the nature of the development is such that private open space is not ordinarily provided (such as supported accommodation).

DTS 27.2

None are applicable.

Site Facilities / Waste Storage

PO 28.1

Development that is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric powered vehicles.

DTS 28.1

None are applicable.

PO 28.2

Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.

DTS 28.2

None are applicable.

PO 28.3

Provision is made for suitable external clothes drying facilities.

DTS 28.3

None are applicable.

PO 28.4

Provision is made for suitable household waste and recyclable material storage facilities conveniently located and screened from public view.

DTS 28.4

None are applicable.

PO 28.5

Waste and recyclable material storage areas are located away from dwellings.

DTS / DPF 28.5

Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.

PO 28.6

Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.

DTS 28.6

None are applicable.

PO 28.7

Services including gas and water meters conveniently located and screened from public view.

DTS 28.7

None are applicable.

ALL NON-RESIDENTIAL DEVELOPMENT

Water Sensitive Design

PO 29.1

Development likely to result in significant risk of export of litter, oil or grease should include stormwater management systems designed to minimise pollutants entering stormwater.

DTS/DPF 29.1

Development likely to result in significant risk of export of litter, oil or grease should include stormwater management systems designed to achieve the following gross pollutant outcomes:

- (a) 90 per cent reduction of litter/gross pollutants compared to untreated stormwater runoff; and
- (b) no visible oils/grease for flows up to the 1-in-3 month average return interval flood peak flow.

PO 29.2

Water discharged from a development site to be of a physical, chemical and biological condition equivalent to or better than its pre-developed state.

DTS 29.2

None are applicable.

Wash-down and Waste Loading and Unloading

PO 30.1

Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, plant or equipment that are:

- (a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off;
- (b) paved with an impervious material to facilitate wastewater collection;
- (c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area; and
- (d) designed to drain wastewater to either:
 - i. a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme; or
 - ii. a holding tank and its subsequent removal off-site on a regular basis.

DTS 30.1

None are applicable.

Table 1 - Outdoor Open Space

Dwelling Type	Dwelling / Site Configuration	Minimum Rate
Detached dwelling	Site area 1,000m ² or greater	Total area: 20% of total site area
Semi-detached dwelling		Adjacent to habitable room: 10% total site area / minimum dimension 4m.
Row dwelling		

Dwelling Type	Dwelling / Site Configuration	Minimum Rate
Group dwelling	Site area 500m ² to <1,000m ²	Total area: 80m ² Adjacent to habitable room: 24m ² / minimum dimension 4m.
	Site area 300m ² to <500m ²	Total area: 60m ² Adjacent to habitable room: 16m ² / minimum dimension 4m.
	Site area <300m ²	Total area: 24m ² Adjacent to habitable room: 16m ² / minimum dimension 3m
Cabin or caravan (permanently fixed to the ground) in a Residential Park Zone or Caravan and Tourist Park Zone		Total area: 16m ² , which may be used as second car parking space, provided on each site intended for residential occupation.

Forestry

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Commercial forestry designed and sited to maximise economic benefits whilst managing potential negative impacts on the environment, transport networks, surrounding land uses and landscapes.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Siting

PO 1.1

Commercial forestry plantations established where there is no clearance of valued trees or substantially intact strata of native vegetation, or where there is no detrimental effect on the physical environment or scenic quality of the rural landscape.

DTS/DPF 1.1

None are applicable.

PO 1.2

Commercial forestry plantations established on slopes that are stable to minimise the risk of soil erosion.

DTS/DPF 1.2

Commercial forestry plantations are not located on land with a slope exceeding 20% (1-in-5).

PO 1.3

Commercial forestry plantations and operations associated with their establishment, management and harvesting appropriately setback from a sensitive receiver to minimise fire risk and noise disturbance.

DTS/DPF 1.3

Commercial forestry plantations and operations associated with their establishment, management and harvesting are setback 50m or more from any sensitive receiver.

PO 1.4

Commercial forestry plantations separated from reserves gazetted under the National Parks and Wildlife Act 1972 and/or Wilderness Protection Act 1992 to minimise fire risk and potential for weed infestation.

DTS/DPF 1.4

Commercial forestry plantations and operations associated with their establishment, management and harvesting are setback 50m or more of a reserve gazetted under the *National Parks and Wildlife Act 1972* or *Wilderness Protection Act 1992*.

Water Protection

PO 2.1

Commercial forestry plantations incorporate artificial drainage lines (ie culverts, runoffs and constructed drains) integrated with natural drainage lines to minimise concentrated water flows onto or from plantation areas.

DTS/DPF 2.1

None are applicable

PO 2.2

Appropriate siting, layout and design measures adopted to minimise the impact of commercial forestry plantations on surface water resources.

DTS/DPF 2.2

Commercial forestry plantations:

- (a) do not involve cultivation (excluding spot cultivation) in drainage lines;
- (b) are setback 20m or more from the banks of any major watercourse (a third order or higher watercourse), lake, reservoir, wetland and sinkhole (direct connection to aquifer); and
- (c) are setback 10m or more from the banks of any first or second order watercourse or sinkhole (no-direct connection to aquifer).

Fire Management

PO 3.1

Commercial forestry plantations incorporate appropriate firebreaks and fire management design elements.

DTS/DPF 3.1

Commercial forestry plantations provide:

- (a) 7m or more wide external boundary firebreaks for plantations of 40ha or less;
- (b) 10m or more wide external boundary firebreaks for plantations of between 40ha and 100ha; or
- (c) 20m or more wide external boundary firebreaks, or 10m with an additional 10m or more of fuel-reduced plantation, for plantations of 100ha or greater.

PO 3.2

Commercial forestry plantations incorporate appropriate fire management access tracks.

DTS/DPF 3.2

Commercial forestry plantation fire management access tracks:

- (a) are incorporated within all firebreaks;
- (b) are 7m or more wide with a vertical clearance of 4m or more;
- (c) are aligned to provide straight through access at junctions, or if they are a no through access track are appropriately signposted and provide suitable turnaround areas for fire-fighting vehicles; and
- (d) partition the plantation into units 40ha or less in area.

Power-line Clearances

PO 4.1

Commercial forestry plantations achieve and maintain appropriate clearances from aboveground power-lines.

DTS/DPF 4.1

Commercial forestry plantations incorporating trees with an expected mature height of greater than 6m meet the clearance requirements listed in the following table:

Voltage of transmission line	Tower or Pole	Minimum horizontal clearance distance between plantings and transmission lines
500 kV	Tower	38m
275 kV	Tower	25m
132 kV	Tower	30m
132 kV	Pole	20m
66 kV	Pole	20m
Less than 66 kV	Pole	20m

Housing Renewal

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Renewed residential environments to replace older social housing, provide new social housing infrastructure and other housing options and tenures to enhance the residential amenity of the local area.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Residential development provides a range of housing choices.

DTS/DPF 1.1

Development comprises:

- (a) detached dwellings;
- (b) semi-detached dwellings;
- (c) row dwellings;
- (d) group dwellings; or
- (e) residential flat buildings, except where incorporating above-ground dwellings.

PO 1.2

Higher density housing options (such as medium rise residential flat buildings) provided in close proximity to public transit, open space or activity centres.

DTS/DPF 1.2

None are applicable.

Building Height

PO 2.1

Buildings contribute to a low-to-medium rise suburban character.

DTS/DPF 2.1

Building height (excluding garages, carports and outbuildings) does not exceed 3 building levels and 12m and wall height does not exceed 9m, except in the case of a gable end.

PO 2.2

Medium rise buildings in locations close to public transit, centres or open space.

DTS/DPF 2.2

None are applicable.

PO 2.3

Medium rise residential flat buildings located within or at the interface with zones which restrict heights to a maximum of 2 storeys transition down in scale and height towards the periphery (side and rear boundaries) of the site.

DTS/DPF 2.3

None are applicable.

Primary Street Setback

PO 3.1

Buildings are set back from the primary street boundary in a manner which is compatible with the desired outcomes of the area.

DTS/DPF 3.1

Buildings (excluding any balcony, verandah, porch, awning or similar structure) are set back from the primary street boundary 3m or more.

Secondary Street Setback

PO 4.1

Buildings are set back from secondary street boundaries to maintain separation between building walls and public streets and contribute to a suburban streetscape character.

DTS/DPF 4.1

Buildings are set back from any secondary street allotment boundary:

- (a) 900mm or more for any wall up to 6 metres in height
- (b) 2m or more for any wall above 6 metres in height.

Boundary Walls

PO 5.1

Boundary walls are limited in height and length to manage visual impacts and access to natural light and ventilation.

DTS/DPF 5.1

Except where the dwelling is located on a central site within a row dwelling or terrace arrangement, dwellings with side boundary walls are sited on only one side boundary and either:

- (a) adjoin or abut a boundary wall of a building on adjoining land for the same length and height; or do not exceed the following:
 - i. 3m in wall height;
 - ii. 10m in length; and
- (b) setback 3m or more from any other existing or proposed boundary walls on the subject land.

PO 5.2

Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.

DTS/DPF5.2

Dwellings in a semi-detached or row arrangement are setback 900mm or more from side boundaries shared with allotments outside the development site, except for a carport or garage.

Side Boundary Setback

PO 6.1

Buildings are set back from side boundaries to provide:

- (a) separation between dwellings in a way that contributes to a suburban character; and
- (b) access to natural light and ventilation for neighbours.

DTS/DPF 6.1

Other than walls located on a side boundary, buildings are set back from side boundaries:

- (a) 900mm or more where the wall is up to 3m measured from the top of the footings;
- (b) other than for a wall facing a southern side boundary, 900mm or more plus 1/3 of the wall height above 3m measured from the top of the footings; and
- (c) at 1.9m or more plus 1/3 of the wall height above 3m measured from the top of the footings for walls facing a southern side boundary.

Rear Boundary Setback

PO 7.1

Buildings are set back from rear boundaries to provide:

- (a) separation between dwellings in a way that contributes to a suburban character;
- (b) access to natural light and ventilation for neighbours;
- (c) private opens space; and
- (d) space for landscaping and vegetation.

DTS/DPF 7.1

Dwellings are set back from rear boundary:

- (a) 3m or more for the first building level; and
- (b) 5m or more for any subsequent building level.

Façade design

PO 8.1

Dwelling facades facing public streets and common driveways make a positive contribution to the streetscape.

DTS/DPF 8.1

Each dwelling includes at least 2 of the following design features along each façade facing a public road or common driveway:

- (a) a minimum of 25% of the façade is setback an additional 300mm
- (b) a porch or portico that projects at 1m or more from the building façade and is open on least 2 sides
- (c) a balcony that projects 1.0m or more from the building façade
- (d) a verandah that projects at least 1m from the building façade
- (e) eaves surrounding the dwelling of a minimum 450mm width
- (f) a minimum 50% of the upper level projects forward a minimum 300mm from the lower level building line.

PO 8.2

Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.

DTS/DPF 8.2

Each dwelling with a frontage to a public street or common driveway includes at least one window with a total window area of at least 2m² facing the primary street or common driveway, from a habitable room that has minimum room dimension of 2.7m.

PO 8.3

The visual bulk of larger buildings is reduced when viewed from adjoining allotments or public streets, such as through the incorporation of windows, articulation, building materials and textures.

DTS/DPF 8.3

None are applicable.

PO 8.4

Built form considers local context and provides a quality design response through scale, massing, materials, colours and architectural expression.

DTS/DPF 8.4

None are applicable.

PO 8.5

Entrances to apartment buildings are:

- (a) oriented towards the street
- (b) visible and easily identifiable from the street
- (c) designed to include a common mail box structure.

DTS/DPF 8.5

None are applicable.

Outlook and amenity

PO 9.1

Primary living rooms have an external outlook to provide a high standard of internal amenity for occupants.

DTS/DPF 9.1

None are applicable.

PO 9.2

Ground level bedrooms separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.

DTS/DPF 9.2

None are applicable.

Private Open Space

PO 10.1

Dwellings provided with suitable sized areas of usable private open space to meet the needs of occupants.

DTS/DPF 10.1

Private open space provided in accordance with the following table:

Dwelling-site-size ^a	Minimum-area-of-POS ^x	Minimum \uparrow dimension ^x	
>500m ² ^x	80m ² ^x	4m ^x	
300--500m ² ^x	60m ² ^x	4m ^x	
200--300m ² ^x	24m ² ^x	3m ^x	
<200 ^x	Three+ bedroom ^x	15·m ² ^x	3m ^x
	Two bedroom ^x	11·m ² ^x	2.5m ^x
	One bedroom ^x	8·m ² ^x	2m ^x
	Studio ^x	8·m ² ^x	2m ^x

PO 10.2

Private open space positioned to provide convenient access from internal living areas.

DTS/DPF 10.2

At least 50% of the required area of private open space is accessible from a habitable room, other than a study or bedroom.

PO 10.3

Private open space is positioned and designed to:

- (a) provide useable outdoor space that suits the needs of occupants;
- (b) take advantage of desirable orientation and vistas; and
- (c) adequately define public and private space.

DTS/DPF 10.3

None are applicable.

Visual privacy

PO 11.1

Development mitigates direct overlooking of habitable rooms and private open spaces of adjacent dwellings.

DTS/DPF11.1

Upper level windows facing side or rear boundaries shared with an allotment put to residential use:

- (a) are permanently obscured to a height of 1.5m above finished floor level that is fixed or not capable of being opened more than 200mm;
- (b) have sill heights greater than or equal to 1.5m above finished floor level; or
- (c) incorporate screening to a height of 1.5m above finished floor level.

PO 11.2

Balconies are sited and screened to minimise direct overlooking of adjacent dwellings.

DTS/DPF11.2

The building:

- (a) will not have a balcony on an upper storey; or
- (b) the longest side of a balcony faces a road (including any road reserve) or reserve (including any land held as open space); and

- (c) the balcony is 15m or more from the private open space of any other dwelling.

Landscaping

PO 12.1

Soft landscaping incorporated into development to:

- (a) minimise heat absorption and reflection;
- (b) maximise shade and shelter;
- (c) maximise stormwater infiltration and biodiversity; and
- (d) enhance the appearance of land and streetscapes.

DTS/DPF 12.1

Residential development incorporates areas for soft landscaping with a minimum dimension of 0.5 metres provided in accordance with the following:

Dwelling-site-area-(or-in-the-case-of-residential-flat-building-or-group-dwellings,-average-site-area)-(m ²)	%-of-site
<200	15%
201--450	20%
>450	25%

(a)

; and

- (b) 25% of land between the road boundary and the primary building line is provided for soft landscaping with a minimum dimension of 1.5 metres.

Water Sensitive Design

PO 13.1

Residential development designed to capture and re-use stormwater to maximise conservation of water resources, manage peak stormwater runoff flows and volume and manage runoff quality to maintain, as close as is practical, pre development conditions.

DTS/DPF 13.1

None are applicable.

Parking

PO 14.1

On-site car parking provided to meet the anticipated demand of residents, with less on-site parking appropriate in areas in close proximity to public transport stations.

DTS/DPF 14.1

On-site car parking is provided at the following rates:

- (a) 2 or less bedroom dwelling – 1 car parking space, covered or able to be covered (without impinging on building setbacks);
- (b) 3 or more bedroom dwelling - 2 car parking spaces, 1 of which is covered or able to be covered (without impinging on building setbacks).

PO 14.2

Covered car parking spaces are of dimensions to be functional, accessible and convenient.

DTS/DPF 14.2

Covered car parking spaces:

(a) where enclosed by fencing or walls, have:

- i. a minimum internal width of 3.2m and length of 6.0m for a single garage;
- ii. a minimum internal width of 6.0m and length of 6.0m for a double garage (side by side);
and
- iii. a minimum internal width of 3.2m and length of 11m for a double garage (tandem); or

(b) carports not enclosed by fencing, walls or garage doors, have:

- i. a minimum width of 3.0m and minimum length of 5.5m for a single width carport;
- ii. a minimum width of 5.2m and minimum length of 5.5m for double carports (side by side);
and
- iii. a minimum width of 3.0m and minimum length of 10.4m for double carport (tandem).

PO 14.3

Uncovered car parking spaces are of dimensions to be functional, accessible and convenient.

DTS/DPF 14.3

Uncovered car parking spaces have a minimum width of 2.4m and minimum length of 5.5m.

PO 14.4

Residential flat buildings and group dwelling developments provide sufficient on-site visitor car parking to cater for anticipated demand.

DTS/DPF 14.4

Visitor car parking for group and residential flat buildings incorporating 4 or more dwellings is provided on-site at a minimum ratio of 0.25 car parking spaces per dwelling.

PO 14.5

Residential flat buildings provide dedicated areas for bicycle parking

DTS/DPF 14.4

Residential flat buildings provide one bicycle parking space per dwelling.

Overshadowing

PO 15.1

Development minimises overshadowing of the private open spaces of adjoining land by ensuring that ground level open space associated with existing residential buildings receive direct sunlight for a minimum of 2 hours between 9am and 3pm on 21 June.

DTS/DPF 15.1

None are applicable.

Waste

PO 16.1

Provision is made for the convenient storage of waste bins in a location screened from public view.

DTS/DPF 16.1

Dwellings are provided with:

- (a) an area of 3m² or more for the storage of waste (separate from any designated car parking spaces or private open space) is provided behind the building line; and
- (b) a continuous unobstructed path of travel with a minimum width of 800mm is provided between the waste storage area and the street.

PO 16.2

Residential apartment buildings provide a dedicated area for the on-site storage of waste which is:

- (a) easily and safely accessible for residents and for collection vehicles;
- (b) screened from adjoining land and public roads; and
- (c) of sufficient dimensions to be able to accommodate the waste storage needs of the development considering the intensity and nature of the development and the frequency of collection.

DTS/DPF 16.2

None are applicable.

Vehicle Access

PO 17.1

Driveways located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages and on-street parking.

DTS/DPF 17.1

None are applicable.

PO 17.2

Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees

DTS/DPF 17.2

Vehicle access to designated car parking spaces:

- (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land
- (b) where newly proposed, is setback:
 - i. 500mm or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner;
 - ii. 2m or more from a street tree unless consent is provided from the tree owner;
 - iii. 6m or more from the tangent point of an intersection of 2 or more roads or a pedestrian-actuated crossing.

PO 17.3

Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces

DTS/DPF/ DPF 17.3

Driveways are designed and sited so that:

- (a) the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the garage or carport when work is completed is not steeper than 1:4 on average; and
- (b) the centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access.

PO 17.4

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

DTS/DPF17.4

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

PO 17.5

Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated.

DTS/DPF 17.5

Battle-axe driveways and driveways that service more than one dwelling satisfy the following:

- (a) a width of 3m or more;
- (b) for driveways servicing three or more dwellings which exceed 30m in length, incorporate a least one vehicle passing point with a width of 5m or more and a length of 6m or more, and an additional passing point at least every 30m thereafter;
- (c) locate the passing point in (b) within 12m of the primary street boundary; and
- (d) a width of 5m or more for at least the first 6m from the primary street boundary where located on an arterial road.

PO 17.6

Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site in a safe and convenient manner.

DTS/DPF 17.6

Driveways providing access to more than one dwelling allow a B85 passenger vehicle to enter and exit all dedicated car parks and garages in a forward direction without requiring more than a 2-point-turn manoeuvre.

PO 17.7

Dwellings are adequately separated from common driveways and manoeuvring areas.

DTS/DPF 17.7

Dwellings are set back 0.5m or more from any vehicle movement path required to achieve DTS/DPF 18.6.

Storage

PO 18.1

Dwellings are provided with sufficient space for storage to meet likely occupant needs.

DTS/DPF 18.1

Storage provided at the following rates:

- (a) 1 bedroom: 6m³;
- (b) 2 bedroom: 10m³;
- (c) 3+ bedroom: 12m³; and

50% or more of the storage volume is provided within the dwelling.

Earthworks

PO 19.1

Buildings are designed and sited to minimise alteration of existing landform.

DTS/DPF 19.1

The development does not involve:

- (a) excavation exceeding a vertical height of 1m;
- (b) filling exceeding a vertical height of 1m; and
- (c) a total combined excavation and filling vertical height exceeding 2m.

Service connections and infrastructure

PO 20.1

Dwellings are provided with appropriate service connections and infrastructure.

DTS/DPF 20.1

The applicant has certified that the site and building:

- (a) has the ability to be connected to a permanent potable water supply;
- (b) has the ability to be connected to a sewerage system, or a waste water control system approved under Public and Environmental Health Act 1987;
- (c) has the ability to be connected to electricity supply;
- (d) has the ability to be connected to an adequate water supply (and pressure) for fire-fighting purposes where located in a Hazard (Bushfire Risk) Overlay; and
- (e) would not be contrary to the Regulations prescribed for the purposes of Section 86 of the Electricity Act 1996.

Site contamination

PO 21.1

Development sites are suitable and safe for the intended land use, including remediation where required.

DTS/DPF 21.1

The applicant has provided a declaration indicating, to the best of his or her knowledge and belief, the allotment is not, and has not been, subject to site contamination as a result of a previous use of the land or a previous activity on the land or in the vicinity of the land.

Procedural Matters (PM)

Notification

All development undertaken by:

- i) the South Australian Housing Trust either individually or jointly with other persons or bodies;
or
- ii) registered Community Housing providers participating in housing renewal programs endorsed by the South Australian Housing Authority

is exempt from notification, except for a residential flat building (apartment building) of 3 storeys or greater.

Interface between Land Uses

Assessment Provisions (AP)

Desired Outcome (DO)	
<p>DO 1</p> <p>Development located and designed to mitigate adverse effects on neighbouring and proximate land uses to reduce potential for conflict.</p>	
Performance Outcome (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
General Land Use Compatibility	
<p>PO 1.1</p> <p>Sensitive receivers designed and sited to protect residents and occupants from adverse impacts generated by lawfully existing land uses and land uses desired in the zone.</p>	None are applicable.
<p>PO 1.2</p> <p>Development adjacent to a site containing an existing sensitive receiver or zone primarily intended to accommodate sensitive receivers designed to minimise adverse impacts.</p>	None are applicable.
Hours of Operation	
<p>PO 2.1</p> <p>Non-residential development does not unreasonably impact the amenity of existing sensitive receivers or an adjacent zone primarily for sensitive receivers through hours of operation having regard to:</p> <ul style="list-style-type: none"> (a) the nature of the development; (b) measures to mitigate off-site impacts; (c) the extent to which the development is desired in the zone; and 	<p>DTS/DPF 2.1</p> <p>Consulting room, office and shop hours of operation are limited to 7am – 9pm Monday to Friday and 8am – 5pm Saturday inclusive.</p>

Performance Outcome (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
(d) measures that might be taken in an adjacent zone primarily for sensitive receivers that mitigate adverse impacts without unreasonably compromising the intended use of that land.	
Overshadowing	
<p>PO 3.1</p> <p>Overshadowing of habitable room windows of adjacent residential land uses not unreasonably interrupted to maintain access to direct winter sunlight.</p>	<p>DTS/DPF 3.1</p> <p>North-facing windows of habitable rooms of adjacent residential land uses receive at least 3 hours of direct sunlight over their surface between 9.00 am and 3.00 pm on 21 June.</p>
<p>PO 3.2</p> <p>Overshadowing of the primary area of private open space or communal open space of adjacent residential land uses not unreasonably interrupted to maintain access to direct winter sunlight.</p>	<p>DTS/DPF 3.2</p> <p>Development maintains 2 hours direct sunlight between 9.00 am and 3.00 pm on 21 June to adjacent residential land uses in accordance with the following:</p> <ul style="list-style-type: none"> (a) for ground level private open space, the smaller of the following: <ul style="list-style-type: none"> (i) half of the existing ground level open space; or (ii) 35m² of the existing ground level open space (with at least one of the area's dimensions measuring 2.5m); (b) for ground level communal open space, at least half of the existing ground level open space.
<p>PO 3.3</p> <p>Development does not unduly reduce the generating capacity of existing rooftop solar energy facilities taking into account:</p> <ul style="list-style-type: none"> (a) the form of development contemplated in the relevant zone; 	<p>None are applicable.</p>

Performance Outcome (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
<p>(b) the orientation of the solar energy facilities to operate effectively and efficiently; and</p> <p>(c) the extent to which the solar energy facilities are already overshadowed.</p>	
<p>PO 3.4</p> <p>Development that incorporates moving parts, including windmills and wind farms, located and operated to not cause unreasonable nuisance to nearby dwellings and tourist accommodation caused by shadow flicker.</p>	None are applicable.
Activities Generating Noise or Vibration	
<p>PO 4.1</p> <p>Development that emits noise (other than music noise) does not unreasonably impact acoustic amenity at the nearest existing sensitive receivers.</p>	<p>DTS/DPF 4.1</p> <p>Predicted noise at the nearest existing sensitive receiver achieves the relevant Environment Protection (Noise) Policy criteria.</p>
<p>PO 4.2</p> <p>Areas for the on-site manoeuvring of service and delivery vehicles, plant and equipment, outdoor work spaces (and the like) are designed and sited to not unreasonably impact the amenity of adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers due to noise and vibration by adopting techniques including:</p> <p>(a) locating openings of buildings and associated services away from the interface with the adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers;</p> <p>(b) when sited outdoors, locating such areas as far as practicable from adjacent sensitive receivers and zones primarily</p>	None are applicable.

Performance Outcome (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
<p>intended to accommodate sensitive receivers;</p> <p>(c) housing plant and equipment within an enclosed structure or acoustic enclosure; and</p> <p>(d) providing a suitable acoustic barrier between the plant and / or equipment and the adjacent sensitive receiver boundary or zone.</p>	
<p>PO 4.3</p> <p>Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.</p>	<p>DTS/DPF 4.3</p> <p>The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:</p> <ul style="list-style-type: none"> (a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment; or (b) located at least 12m from the nearest habitable room located on an adjoining allotment.
<p>PO 4.4</p> <p>External noise into bedrooms minimised by separating or shielding these rooms from service equipment areas and fixed noise sources located on the same or an adjoining allotment.</p>	<p>DTS/DPF 4.4</p> <p>Adjacent land is used for residential purposes.</p>
<p>PO 4.5</p> <p>Outdoor areas associated with licensed premises (such as beer gardens or dining areas) designed and/or sited to not cause unreasonable noise impact on existing adjacent sensitive receivers.</p>	<p>DTS/DPF 4.4</p> <p>None are applicable.</p>

Performance Outcome (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code) 				
<p>PO 4.6</p> <p>Development incorporating music achieves suitable acoustic amenity when measured at the boundary of an adjacent sensitive receiver or zone primarily intended to accommodate sensitive receivers.</p>	<p>DTS/DPF 4.6</p> <p>Development incorporating music includes noise attenuation measures that will achieve the following noise levels:</p> <table border="1" data-bbox="842 786 1461 1055"> <thead> <tr> <th>Assessment location</th> <th>Music noise level</th> </tr> </thead> <tbody> <tr> <td>Externally at the nearest existing noise sensitive location</td> <td>Less than 8dB above the level of background noise ($L_{90,15min}$) in any octave band of the sound spectrum ($LOCT_{10,15} < LOCT_{90,15} + 8dB$)</td> </tr> </tbody> </table>	Assessment location	Music noise level	Externally at the nearest existing noise sensitive location	Less than 8dB above the level of background noise ($L_{90,15min}$) in any octave band of the sound spectrum ($LOCT_{10,15} < LOCT_{90,15} + 8dB$)
Assessment location	Music noise level				
Externally at the nearest existing noise sensitive location	Less than 8dB above the level of background noise ($L_{90,15min}$) in any octave band of the sound spectrum ($LOCT_{10,15} < LOCT_{90,15} + 8dB$)				
Air Quality					
<p>PO 5.1</p> <p>Development with the potential to emit harmful or nuisance-generating air pollution incorporates air pollution control measures to prevent harm to human health or unreasonably impact the amenity of existing sensitive receivers within the locality and zones primarily intended to accommodate sensitive receivers.</p>	<p>DTS/DPF 5.1</p> <p>None are applicable.</p>				
<p>PO 5.2</p> <p>Development that includes chimneys or exhaust flues (including cafes, restaurants and fast food outlets) is designed to minimise nuisance or adverse health impacts to nearby sensitive receivers by:</p> <ul style="list-style-type: none"> (a) incorporating appropriate treatment technology before exhaust emissions are released; and (b) locating and designing chimneys or exhaust flues to maximise dispersion of exhaust emissions taking into account 	<p>DTS/DPF 5.2</p> <p>None are applicable.</p>				

Performance Outcome (PO)	<ul style="list-style-type: none"> Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
the location of nearby sensitive receivers.	
Light Spill	
PO 6.1 External lighting positioned and designed to not cause unreasonable light spill impact on adjacent sensitive receivers.	DTS/DPF 6.1 None are applicable.
PO 6.2 External lighting is not hazardous to motorists and cyclists.	DTS/DPF 6.2 None are applicable.
Solar Reflectivity / Glare	
PO 7.1 Development designed and comprised of materials and finishes that do not unreasonably cause a distraction to adjacent road users and pedestrian areas or unreasonably cause heat loading and micro-climatic impacts on adjacent buildings and land uses as a result of reflective solar glare.	DTS/DPF 7.1 None are applicable.
Electrical Interference	
PO 8.1 Development in rural and remote areas does not unreasonably diminish or result in the loss of existing communication services due to electrical interference.	DTS/DPF 8.1 The building or structure: <ul style="list-style-type: none"> (a) is no greater than 10m in height, measured from existing ground level; or (b) is not within a line of sight between an existing fixed transmitter and fixed receiver (antenna) other than where an alternative service is available (via a different fixed transmitter or cable).

Performance Outcome (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
---------------------------------	---

Interface with Rural Activities

<p>PO 9.1</p> <p>Sensitive receivers located and designed to mitigate impacts from lawfully existing horticultural and farming activities including chemical spray drift and noise.</p>	<p>DTS/DPF 9.1</p> <p>None are applicable.</p>
<p>PO 9.2</p> <p>Sensitive receivers located and designed to mitigate potential impacts from lawfully existing intensive animal husbandry activities and not prejudice the continued operation of these activities.</p>	<p>None are applicable.</p>
<p>PO 9.3</p> <p>Sensitive receivers located and designed to mitigate potential impacts from lawfully existing land-based aquaculture activities and not prejudice the continued operation of these activities.</p>	<p>DTS/DPF 9.3</p> <p>Sensitive receivers are located at least 200m from the boundary of a site used for land-based aquaculture and associated components in other ownership.</p>
<p>PO 9.4</p> <p>Sensitive receivers located and designed to mitigate potential impacts from lawfully existing dairies including associated wastewater lagoons and liquid/solid waste storage and disposal facilities and not prejudice the continued operation of these activities.</p>	<p>DTS/DPF 9.4</p> <p>Sensitive receivers sited at least 500m from the boundary of a site used for a dairy and associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities in other ownership.</p>

Performance Outcome (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
prejudice the continued operation of these activities.	
<p>PO 9.6</p> <p>Setbacks and vegetation plantings along allotment boundaries should be incorporated to mitigate the potential impacts of chemical spray drift and other impacts associated with agricultural and horticultural activities.</p>	None are applicable.
<p>PO 9.7</p> <p>Urban development should not prejudice existing agricultural and horticultural activities through appropriate separation and design techniques.</p>	None are applicable.
Interface with Mines and Quarries (Rural and Remote Areas)	
<p>PO 10.1</p> <p>Sensitive receivers are separated from existing mines to minimise adverse impacts from noise, dust and vibration.</p>	<p>DTS/DPF 10.1</p> <p>Sensitive receivers are located no closer than 500m from the boundary of a Mining Production Tenement under the <i>Mining Act 1971</i>.</p>

Infrastructure and Renewable Energy Facilities

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Efficient provision of infrastructure networks and services, renewable energy facilities and ancillary development in a manner that minimises hazard, is environmentally and culturally sensitive and that suitably manages adverse visual impacts on natural and rural landscapes and residential amenity.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

General

PO 1.1

Development located and designed to minimise hazard or nuisance to adjacent development and land uses.

DTS/DPF 1.1

None are applicable.

Visual Amenity

PO 2.1

The visual impact of above ground infrastructure networks and services, renewable energy facilities (excluding wind farms), energy storage facilities and ancillary development from townships, scenic routes and public roads is minimised and managed by:

- (a) utilising features of the natural landscape to obscure views where practicable;
- (b) siting development below ridgelines where practicable;
- (c) avoiding visually sensitive and significant landscapes;
- (d) using materials and finishes with low reflectivity and colours that complement the surroundings;
- (e) using existing vegetation to screen buildings; and
- (f) incorporating landscaping or landscaped mounding around the perimeter of a site and between adjacent allotments accommodating, or zoned to primarily accommodate sensitive receivers.

DTS/DPF 2.1

None are applicable.

PO 2.2

Substations, pumping stations, battery storage facilities, maintenance sheds and other ancillary structures incorporate vegetation buffers to reduce adverse visual impacts on adjacent land.

DTS/DPF 2.2

None are applicable.

PO 2.3

Surfaces exposed by earthworks associated with installation of storage facilities, pipework, penstock, substations and other ancillary plant are reinstated and revegetated to reduce adverse visual impacts on adjacent land.

DTS/DPF 2.3

None are applicable.

Rehabilitation

PO 3.1

Progressive rehabilitation (incorporating revegetation) of disturbed areas, ahead of or upon decommissioning of areas used for renewable energy facilities and transmission corridors.

DTS/DPF 3.1

None are applicable.

Hazard Management

PO 4.1

Infrastructure and renewable energy facilities and ancillary development located and operated to not adversely impact maritime or air transport safety, including the operation of ports, airfields and landing strips.

DTS/DPF 4.1

None are applicable.

PO 4.2

Facilities for energy generating, power storage and transmission separated from dwellings, tourist accommodation and frequently visited public places (such as viewing platforms / lookouts) to reduce risks to public safety from fire or equipment malfunction.

DTS/DPF 4.2

None are applicable.

PO 4.3

Bushfire hazard risk minimised for renewable energy facilities by providing appropriate access tracks, safety equipment, and water tanks and establishing cleared areas around substations, battery storage and operations compounds.

DTS/DPF 4.3

None are applicable.

Electricity Infrastructure and Battery Storage Facilities

PO 5.1

Electricity infrastructure located to minimise visual impacts through techniques including:

- (i) siting utilities and services:
 - (i) on areas already cleared of native vegetation; or
 - (ii) where there is minimal interference or disturbance to existing native vegetation or biodiversity; and
- (j) grouping utility buildings and structures with non-residential development, where practicable.

DTS/DPF 5.1

None are applicable.

PO 5.2

Electricity supply (excluding transmission lines) serving new development in urban areas and townships installed underground, excluding lines having a capacity exceeding or equal to 33kV.

DTS/DPF 5.2

None are applicable.

PO 5.3

Battery storage facilities co-located with substation infrastructure where practicable to minimise the development footprint and reduce environmental impacts.

DTS/DPF 5.3

None are applicable.

Telecommunication Facilities

PO 6.1

Where technically feasible, telecommunications facilities seek to reduce visual impact by incorporating techniques such as:

- (a) avoiding proliferation of facilities in a local area;
- (b) co-locating with other communications facilities;
- (c) locating antennae as close as practical to support structures ; and
- (d) screening using landscaping and existing vegetation, particularly for equipment shelters and huts.

DTS/DPF 6.1

None are applicable.

PO 6.2

Telecommunications facilities sited and designed to minimise visual impact having regard to:

- (h) the size, scale, context and characteristics of existing structures, heritage, landforms and vegetation so as to be compatible with the local environment;
- (i) incorporating the facility within an existing structure that may serve another purpose; and
- (j) using existing buildings and vegetation for screening.

DTS/DPF 6.2

None are applicable.

Renewable Energy Facilities

PO 7.1

Renewable energy facilities located as close as practicable to existing transmission infrastructure to facilitate connections and minimise environmental impacts as a result of extending transmission infrastructure.

DTS/DPF 7.1

None are applicable.

Renewable Energy Facilities (Wind Farm)

PO 8.1

Visual impact of wind turbine generators on the amenity of residential and tourist development reduced through appropriate separation.

DTS/DPF 8.1

Wind turbine generators are:

- (a) setback at least 1,200m from the base of the turbine to non-associated (non-stakeholder) dwellings and tourist accommodation;
- (b) setback at least 2,000m from the base of a turbine to any of the following zones:
 - i. Settlement Zone;
 - ii. Township Zone;

- iii. Rural Living Zone; or
- iv. Rural Neighbourhood Zone

with an additional 10m setback per additional metre over 150m overall turbine height (measured from the base of the turbine).

PO 8.2

The visual impact of wind turbine generators on natural landscapes managed by:

- (a) designing wind turbine generators to be uniform in colour, size and shape;
- (b) coordinating blade rotation and direction; and
- (c) mounting wind turbine generators on tubular towers as opposed to lattice towers.

DTS/DPF 8.2

None are applicable.

PO 8.3

Wind turbine generators and ancillary development minimise potential for bird and bat strike.

DTS/DPF 8.3

None are applicable.

PO 8.4

Wind turbine generators incorporate recognition systems or physical markers to minimise the risk to aircraft operations.

DTS/DPF 8.4

No Commonwealth air safety (CASA / ASA) or Defence requirement is applicable.

PO 8.5

Meteorological masts and guidewires identifiable to aircraft through the use of colour bands, marker balls, high visibility sleeves or flashing strobes.

DTS/DPF 8.5

None are applicable.

Renewable Energy Facilities (Solar Power)

PO 9.1

Solar power facilities generating 5MW or more are not located on land of high environmental, scenic or cultural value.

DTS/DPF 9.1

None are applicable.

PO 9.2

Solar power facilities allow for movement of wildlife by:

- (f) incorporating wildlife corridors and habitat refuges; and
- (g) avoiding the use of extensive security or perimeter fencing; or
- (h) incorporating fencing that enables the passage of small animals without unreasonably compromising the security of the facility.

DTS/DPF 9.2

None are applicable.

PO 9.3

Amenity impacts of solar power facilities minimised through separation from sensitive receivers.

DTS/DPF 9.3

Solar power facilities are setback at least:

- (a) 500 metres from conservation areas;
- (b) 100 metres from Township, Settlement, Rural Neighbourhood and Rural Living Zones; and
- (c) 30 metres from adjoining land.

PO 9.4

Solar power facilities incorporate landscaping within setbacks from adjacent road frontages and boundaries of adjacent allotments accommodating non-host dwellings.

DTS/DPF 9.4

None are applicable.

Hydropower / Pumped Hydropower Facilities

PO 10.1

Hydropower / pumped hydropower facility storage designed and operated to minimise the risk of storage dam failure.

DTS/DPF 10.1

None are applicable.

PO 10.2

Hydropower / pumped hydropower facility storage designed and operated to minimise water loss through increased evaporation or system leakage, with the incorporation of appropriate liners, dam covers, operational measures or detection systems.

DTS/DPF 10.2

None are applicable.

PO 10.3

Hydropower / pumped hydropower facilities on existing or former mine sites minimise environmental impacts from site contamination, including from mine operations or water sources subject to such processes, now or in the future.

DTS/DPF 10.3

None are applicable.

Water Supply

PO 11.1

Development connected to an appropriate water supply to meet the ongoing requirements of the intended use.

DTS/DPF 11.1

Development is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the on-going requirements of the development.

PO 11.2

Dwellings connected to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the intended use. Where this is not available an appropriate rainwater tank or storage system for domestic use is provided.

DTS/DPF 11.2

A dwelling is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the development. Where this is not available it is instead serviced by a rainwater tank or tanks capable of holding at least 50,000 litres of water which is:

- (h) exclusively for domestic use; and
- (i) connected to the roof drainage system of the dwelling.

Wastewater Services

PO 12.1

Development is connected to an approved common waste water disposal service with the capacity to meet the requirements of the intended use. Where this is not available an appropriate on-site service is provided to meet the on-going requirements of the intended use in accordance with the following:

- (a) it is wholly located and contained within the allotment of the development they will service.
- (b) in areas where there is a high risk of contamination of surface, ground, or marine water resources from on-site disposal of liquid wastes are to include disposal systems that minimise the risk of pollution to those water resources
- (c) ensures septic tank effluent drainage fields and other waste water disposal areas located away from watercourses and flood prone, sloping, saline or poorly drained land to minimise environmental harm.

DTS/DPF 12.1

Development is connected, or will be connected, to an approved common waste water disposal service with the capacity to meet the requirements of the development. Where this is not available it is instead serviced by an on-site waste water treatment system in accordance with the following:

- (a) is wholly located and contained within the allotment of development it will service; and
- (b) ensures no part of a septic tank effluent drainage field or any other waste water disposal system is located:
 - i. within 50m of a watercourse, bore, well or dam;
 - ii. on any land with a slope greater than 20% (1-in-5), or a depth to bedrock or seasonal or permanent water table less than 1.2m; and
 - iii. on land that is waterlogged, saline, part of a runway area or likely to be inundated by a 10% AEP flood event.

PO 12.2

Effluent drainage fields and other waste water disposal areas maintained to ensure the effective operation of waste systems and minimise risks to human health and environmental harm.

DTS/DPF 12.2

Development is not built on, or encroaches within, an area that is, or will be, required for a sewerage system or waste control system.

Temporary Facilities

PO 13.1

In rural and remote locations, development that is likely to generate significant waste material during construction, including packaging waste, makes provision for a temporary on-site waste storage enclosure to minimise the incidence of wind-blown litter.

DTS/DPF 13.1

A waste collection and disposal service will be used to dispose of the volume of waste and at a rate it is generated.

PO 13.2

Temporary facilities to support the establishment of renewable energy facilities (including borrow pits, concrete batching plants, laydown, storage, access roads and worker amenity areas) are sited and operated to minimise environmental impact.

DTS/DPF 13.2

None are applicable.

Intensive Animal Husbandry and Dairies

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Development of intensive animal husbandry and dairies in locations that are protected from encroachment by sensitive receivers in a manner that minimises adverse effects on amenity and the environment.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Siting and Designs

PO 1.1

Intensive animal husbandry, dairies and associated activities sited, designed, constructed and managed to not unreasonably impact on the environment or amenity of the locality.

DTS/DPF 1.1

None are applicable

PO 1.2

Intensive animal husbandry, dairies and associated activities sited, designed, constructed and managed to minimise the potential transmission of disease to other operations where animals are kept.

DTS/DPF 1.2

None are applicable

PO 1.3

Intensive animal husbandry and associated activities such as wastewater lagoons and liquid/solid waste disposal areas sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions.

DTS/DPF 1.3

None are applicable

PO 1.4

Dairies and associated activities such as wastewater lagoons and liquid/solid waste disposal areas sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions.

DTS/DPF 1.4

Dairies, associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities located 500m or more from the nearest sensitive receiver in other ownership.

PO 1.5

Lagoons for the storage or treatment of milking shed effluent adequately separated from roads to minimise impacts from odour on the general public.

DTS/DPF 1.5

Lagoons for the storage or treatment of milking shed effluent setback 20m or more from public roads.

Waste

PO 2.1

Storage of manure, used litter and other wastes (other than waste water lagoons) is sited, designed, constructed and managed to:

- (a) avoid attracting and harbouring vermin;
- (b) avoid polluting water resources; and
- (c) be located outside 1% AEP flood event areas.

DTS/DPF 2.1

None are applicable

Soil and Water Protection

PO 3.1

To avoid environmental harm and adverse effects on water resources, intensive animal husbandry operations appropriately setback from:

- (a) public water supply reservoirs;
- (b) major watercourses (third order or higher stream); and
- (c) any other watercourse, bore or well used for domestic or stock water supplies.

DTS/DPF 3.1

Intensive animal husbandry operations are setback:

- (a) 800m or more from a public water supply reservoir;
- (b) 200m or more from a major watercourse (third order or higher stream); and
- (c) 100m or more from any other watercourse, bore or well used for domestic or stock water supplies.

PO 3.2

Intensive animal husbandry operations and dairies incorporate appropriately designed effluent and run-off facilities:

- (a) that have sufficient capacity to hold effluent and runoff from the operations on site; and
- (b) ensure that effluent does not infiltrate and pollute groundwater, soil or other water resources.

DTS/DPF 3.2

None are applicable

Land Division in Urban Areas

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Land division that:

- (m) creates allotments having appropriate dimensions and shape for intended use;
- (n) allows efficient provision of new infrastructure and optimum use of existing underutilised infrastructure;
- (o) integrates and allocates adequate and suitable land for the preservation of site features of value including significant vegetation, watercourses, water bodies and other environmental features;
- (p) supports energy efficiency in building orientation;
- (q) creates a compact urban form that supports active travel, walkability and the use of public transport; and
- (r) avoids areas of high natural hazard risk.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

ALL LAND DIVISION

Allotment configuration

PO 1.1

Land division creates allotments suitable for their intended use taking into account physical characteristics of the land, preservation of environmental and cultural features of value and the prevailing context of the locality.

DTS/DPF 1.1

Land division for the:

- (a) minor adjustment of allotment boundaries to remove an anomaly in existing boundaries with respect to the location of existing buildings or structures where no additional allotments are created; or
- (b) creation of a single additional allotment for residential purposes where:
 - i. the allotment will contain a single lawfully existing dwelling or an approval for a single dwelling exists and is operative;
 - ii. access is provided via a lawfully existing driveway or access point or an access point for which approval under the Local Government Act exists and is operative; and
 - iii. the resulting allotment achieves any minimum site area and frontage width specified by the relevant zone or a relevant Technical and Numeric Variation Overlays.

Design and Layout

PO 2.1

Land division results in a pattern of development that minimises the likelihood of future earthworks and retaining walls

DTS 2.1

None are applicable.

PO 2.2

Land division enables appropriate treatment of the interface between potentially conflicting land uses and/or zones.

DTS 2.2

None are applicable.

PO 2.3

Land division maximises the number of allotments that face public open space and public streets.

DTS 2.3

None are applicable.

PO 2.4

Land division integrated with site features, adjacent land uses, the existing transport network and available infrastructure.

DTS 2.4

None are applicable.

PO 2.5

Development and infrastructure provided and staged in a manner that supports an orderly and economic provision of land, infrastructure and services.

DTS 2.5

None are applicable

PO 2.6

Land division results in watercourses being retained within open space and land subject to flooding free from development.

DTS 2.6

None are applicable.

PO 2.7

Land division results in street patterns that are legible and connected to the surrounding street network.

DTS 2.7

None are applicable.

PO 2.8

Land division is designed to allocate adequate and suitable land for the preservation of existing vegetation of value including native vegetation, regulated and significant trees.

DTS 2.8

None are applicable.

Roads and Access**PO 3.1**

Land division provides allotments with access to a public road.

DTS 3.1

None are applicable.

PO 3.2

Street patterns and intersections designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.

DTS 3.2

None are applicable.

PO 3.3

Land division does not impede access to publicly owned open space and recreation facilities.

DTS 3.3

None are applicable.

PO 3.4

Road reserves provide for safe and convenient movement and parking of projected volumes of vehicles, and allow for the efficient movement of service and emergency vehicles.

DTS 3.4

None are applicable.

PO 3.5

Road reserves provide for footpaths, cycle lanes and shared-use paths, and accommodate street tree planting, landscaping and street furniture.

DTS 3.5

None are applicable.

PO 3.6

Road reserves accommodate stormwater drainage and public utilities.

DTS 3.6

None are applicable.

PO 3.7

Road reserves provide unobstructed vehicular access and egress to and from individual allotments and sites.

DTS 3.7

None are applicable.

PO 3.8

Street patterns and intersections designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.

DTS 3.8

None are applicable.

PO 3.9

Roads, open space and thoroughfares provided establish safe and convenient linkages to the surrounding open space and transport network.

DTS 3.9

None are applicable.

PO 3.10

Public streets include tree planting to provide shade and enhance the amenity of streetscapes.

DTS 3.10

None are applicable.

PO 3.11

Local streets designed to create low-speed environments that are safe for cyclists and pedestrians.

DTS 3.11

None are applicable.

Infrastructure**PO 4.1**

Land division incorporates public utility services within road reserves or within dedicated easements.

DTS 4.1

None are applicable.

PO 4.2

Waste water, sewage and other effluent is capable of being disposed of from each allotment without unreasonable risk to public health or the environment.

DTS/DPF 4.2

Each allotment can be connected to any of the following:

- (a) a waste water treatment plant that has the hydraulic volume and pollutant load treatment and disposal capacity for the maximum predicted wastewater volume generated by subsequent development of the proposed allotments; or
- (b) a form of on-site waste water treatment and disposal that meets relevant public health and environmental standards.

PO 4.3

Septic tank effluent drainage fields and other waste water disposal areas maintained to ensure the effective operation of waste systems and minimise risks to human health and environmental harm.

DTS / DPF 4.3

Development is not built on, or encroaches within, an area that is, or will be, required for a sewerage system or waste control system.

PO 4.4

Constructed wetland systems, including associated detention and retention basins, sited and designed to ensure public health and safety is protected including by minimising potential public health risks arising from the breeding of mosquitoes.

DTS 4.4

None are applicable.

PO 4.5

Constructed wetland systems, including associated detention and retention basins, sited and designed to allow sediments to settle prior to discharge into watercourses or the marine environment.

DTS 4.5

None are applicable.

PO 4.6

Constructed wetland systems, including associated detention and retention basins, sited and designed to function as a landscape feature.

DTS 4.6

None are applicable.

MINOR LAND DIVISION (UNDER 20 ALLOTMENTS)

Open Space

PO 5.1

Land division proposing an additional allotment under 1 hectare in area provides or supports the provision of open space.

DTS 5.1

None are applicable.

PO 5.2

Land division creating 5-19 non-residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

DTS 5.2

Land division creating 5-19 non-residential allotments is accompanied by an approved Stormwater Management Plan and manages up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings and:

- (a) maintain
 - i. a pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 5-year ARI (18.1% AEP) 30 minute storm; and
 - ii. the stormwater runoff time to peak to match that of the pre-development; or
- (b) capture and retain the difference in pre-development runoff volume (based upon a 0.35 runoff coefficient) vs post development runoff volume from the site for a 5-year ARI (18.1% AEP) 30 minute storm; and
- (c) manage site generated stormwater runoff up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings.

Solar Orientation

PO 6.1

Land division for residential purposes facilitates solar access for energy efficiency through allotment orientation.

DTS 6.1

None are applicable.

Water Sensitive Design

PO 7.1

Land division creating 5-19 allotments includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.

DTS 7.1

Land division creating 5-19 allotments is accompanied by an approved Stormwater Management Plan and achieves the following stormwater runoff outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus;
- (c) 45 per cent reduction in average annual total nitrogen.

PO 7.2

Land division creating 5-19 non-residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

DTS / DPF 7.2

Land division creating 5-19 non-residential allotments includes a storm water management system designed to:

- (a) maintain a pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 20-year ARI (5% AEP) 30 minute storm, unless a lower performance measure is specified in an approved catchment based Stormwater Management Plan;

- (b) maintain the stormwater runoff time to peak to match that of the pre-development; and
- (c) manage site generated stormwater runoff up to and including the 100 –year ARI flood event (1% AEP).

MAJOR LAND DIVISION (20+ ALLOTMENTS)

Open Space

PO 8.1

Land division allocates or retains, evenly distributed, high quality areas of open space to improve residential amenity and provide urban heat amelioration.

DTS 8.1

None are applicable

PO 8.2

Land allocated for open space is suitable for intended active and passive recreational use considering gradient and potential for inundation.

DTS / DPF 8.2

Where provided, no more than 20% of open space:

- (g) has a slope in excess of 1 in 4; and
- (h) is comprised of watercourses, wetlands or detention basins.

PO 8.3

Land allocated for active recreation is of a size and has dimensions capable of accommodating a range of active recreational activities.

DTS 8.3

None are applicable.

Water Sensitive Design

PO 9.1

Land division creating 20 or more residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

DTS/DPF 9.1

Land division creating 20 or more residential allotments is accompanied by an approved Stormwater Management Plan and manages up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings and:

- (a) maintains pre-development peak 5-year ARI (18.1% AEP) flow rate from the site, and maintains the time to peak to match that of the pre-development; or
- (b) captures and retains the difference in pre-development volume vs post development volume from the site for a 5-year ARI (18.1% AEP) 30 minute storm; or where there is no adequate local drainage scheme to connect to, captures and retains post development volume from the site for a 5 year ARI (18.1% AEP) 30 minute storm.

PO 9.2

Land division creating 20 or more non- residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

DTS/DPF 9.2

Land division creating 20 or more non- residential allotments is accompanied by an approved Stormwater Management Plan and manages up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings and:

- (a) maintains pre-development peak 20-year ARI (5% AEP) flow rate from the site and, maintains the time to peak to match that of the pre-development; or
- (b) captures and retains the difference in pre-development volume vs post development volume from the site for a 20-year ARI (5% AEP) 30 minute storm; where there is no adequate local drainage scheme to connect to, captures and retains post development volume from the site for a 20 year ARI (5% AEP) 30 minute storm.

PO 9.3

Land division creating 20 or more allotments includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies

DTS 9.3

Land division creating 20 or more allotments is accompanied by an approved Stormwater Management Plan and achieves the following stormwater runoff outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus;
- (c) 45 per cent reduction in average annual total nitrogen.

Solar Orientation

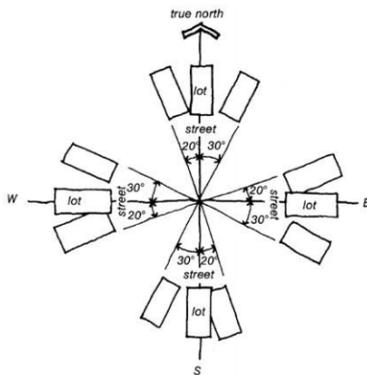

PO 10.1

Land division for residential purposes facilitates solar access for energy efficient through allotment orientation and allotment dimensions.

DTS/DPF 10.1

Land division results in:

- (a) at least 80% of allotments oriented so that their long axis conforms with figure 10.1:

- (b) 80% of allotments with an east-west orientation having a minimum frontage of 15m
- (c) no more than 20% of allotments are located on the south side of east-west oriented streets.

Land Division in Rural Areas

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Land division that:

- (a) creates allotments having appropriate dimensions and shape for intended use;
- (b) allows efficient provision of new infrastructure and optimum use of existing underutilised infrastructure;
- (c) integrates and allocates adequate and suitable land for the preservation of site features of value including significant vegetation, watercourses, water bodies and other environmental features; and
- (d) supports energy efficiency in building orientation;
- (e) creates a compact urban form that supports active travel, walkability and the use of public transport; and
- (f) avoids areas of high natural hazard risk.

Performance Outcomes (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
----------------------------------	---

ALL LAND DIVISION

Allotment configuration

PO 1.1

Land division creates allotments suitable for their intended use taking into account physical characteristics of the land, preservation of environmental and cultural features of value and the prevailing context of the locality.

DTS/DPF 1.1

Land division for the:

- (a) minor adjustment of allotment boundaries to remove an anomaly in existing boundaries with respect to the location of existing buildings or structures where no additional allotments are created; or
- (b) Creation of a single additional allotment for residential purposes where:
 - (i) the allotment will contain a single lawfully existing dwelling or an approval for a single dwelling exists and is operative;

Performance Outcomes (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
	<p>(ii) access is provided via a lawfully existing driveway or access point or an access point for which approval under the Local Government Act exists and is operative; and</p> <p>(iii) the resulting allotment achieves any minimum site area and frontage width specified by the relevant zone or a relevant Technical and Numerical Variation Overlays.</p>
<p>PO 1.2</p> <p>Land division creates allotments suitable for their intended use.</p>	<p>DTS/DPF 1.1</p> <p>Division of land that reflects the site or allotment boundaries on a valid development authorisation for Development Plan Consent under the <i>Development Act 1993</i> or Planning Consent under the <i>Planning, Development and Infrastructure Act 2016</i>.</p>
Design and Layout	
<p>PO 2.1</p> <p>Land division results in a pattern of development that minimises the likelihood of future earthworks and retaining walls</p>	<p>None are applicable.</p>
<p>PO 2.2</p> <p>Land division enables appropriate treatment of the interface between potentially conflicting land uses and/or zones.</p>	<p>None are applicable.</p>
<p>PO 2.3</p> <p>Land division maximises the number of allotments that face public open space and public streets.</p>	<p>None are applicable.</p>
<p>PO 2.4</p>	<p>None are applicable.</p>

Performance Outcomes (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
Land division integrated with site features, adjacent land uses, the existing transport network and available infrastructure.	
<p>PO 2.5</p> <p>Development and infrastructure provided and staged in a manner that supports an orderly and economic provision of land, infrastructure and services.</p>	None are applicable
<p>PO 2.6</p> <p>Land division results in watercourses being retained within open space and land subject to flooding free from development.</p>	None are applicable.
<p>PO 2.7</p> <p>Land division results in street patterns that are legible and connected to the surrounding street network.</p>	None are applicable.
Roads and Access	
<p>PO 3.1</p> <p>Land division provides allotments with access to a public road.</p>	None are applicable.
<p>PO 3.2</p> <p>Street patterns and intersections designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.</p>	None are applicable.
<p>PO 3.3</p> <p>Land division does not impede access to publicly owned open space and recreation facilities.</p>	None are applicable.

Performance Outcomes (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
<p>PO 3.4</p> <p>Road reserves provide for safe and convenient movement and parking of projected volumes of vehicles, and allow for the efficient movement of service and emergency vehicles.</p>	<p>None are applicable.</p>
<p>PO 3.5</p> <p>Road reserves provide for footpaths, cycle lanes and shared-use paths, and accommodate street tree planting, landscaping and street furniture.</p>	<p>None are applicable.</p>
<p>PO 3.6</p> <p>Road reserves accommodate stormwater drainage and public utilities.</p>	<p>None are applicable.</p>
<p>PO 3.7</p> <p>Road reserves provide unobstructed vehicular access and egress to and from individual allotments and sites.</p>	<p>None are applicable.</p>
<p>PO 3.8</p> <p>Street patterns and intersections designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.</p>	<p>None are applicable.</p>
<p>PO 3.9</p> <p>Roads, open space and thoroughfares provided establish safe and convenient linkages to the surrounding open space and transport network.</p>	<p>None are applicable.</p>
<p>PO 3.10</p> <p>Public streets include tree planting to provide shade and enhance the amenity of streetscapes.</p>	<p>None are applicable.</p>

Performance Outcomes (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
<p>PO 3.11</p> <p>Local streets designed to create low-speed environments that are safe for cyclists and pedestrians.</p>	<p>None are applicable.</p>
<p>Infrastructure</p>	
<p>PO 4.1</p> <p>Land division incorporates public utility services within road reserves or within dedicated easements.</p>	<p>None are applicable.</p>
<p>PO 4.2</p> <p>Waste water, sewage and other effluent is capable of being disposed of from each allotment without unreasonable risk to public health or the environment.</p>	<p>DTS/DPF 4.2</p> <p>Each allotment can be connected to any of the following:</p> <ul style="list-style-type: none"> (a) a waste water treatment plant that has the hydraulic volume and pollutant load treatment and disposal capacity for the maximum predicted wastewater volume generated by subsequent development of the proposed allotments; or (b) a form of on-site waste water treatment and disposal that meets relevant public health and environmental standards.
<p>PO 4.3</p> <p>Septic tank effluent drainage fields and other waste water disposal areas maintained to ensure the effective operation of waste systems and minimise risks to human health and environmental harm.</p>	<p>DTS/DPF 4.3</p> <p>Development is not built on, or encroaches within, an area that is, or will be, required for a sewerage system or waste control system.</p>

Performance Outcomes (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
<p>PO 4.4</p> <p>Constructed wetland systems, including associated detention and retention basins, sited and designed to ensure public health and safety is protected including by minimising potential public health risks arising from the breeding of mosquitoes.</p>	None are applicable.
<p>PO 4.5</p> <p>Constructed wetland systems, including associated detention and retention basins, sited and designed to allow sediments to settle prior to discharge into watercourses or the marine environment.</p>	None are applicable.
<p>PO 4.6</p> <p>Constructed wetland systems, including associated detention and retention basins, sited and designed to function as a landscape feature.</p>	None are applicable.
MINOR LAND DIVISION (UNDER 20 ALLOTMENTS)	
Open Space	
<p>PO 5.1</p> <p>Land division proposing an additional allotment under 1 hectare in area provides or supports the provision of open space.</p>	None are applicable.
Solar Orientation	
<p>PO 6.1</p> <p>Land division for residential purposes facilitates solar access for energy efficiency through allotment orientation.</p>	None are applicable.

Performance Outcomes (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
----------------------------------	---

Water Sensitive Design

<p>PO 7.1</p> <p>Land division creating 5-19 allotments includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.</p>	<p>DTS 7.1</p> <p>Land division creating 5-19 allotments is accompanied by an approved <i>Stormwater Management Plan</i> and achieves the following stormwater runoff outcomes:</p> <ul style="list-style-type: none"> (a) 80 per cent reduction in average annual total suspended solids; (b) 60 per cent reduction in average annual total phosphorus; (c) 45 per cent reduction in average annual total nitrogen.
<p>PO 7.2</p> <p>Land division creating 5-19 non-residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.</p>	<p>DTS / DPF 7.2</p> <p>Land division creating 5-19 non-residential allotments includes a storm water management system designed to:</p> <ul style="list-style-type: none"> (a) maintain a pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 20-year ARI (5% AEP) 30 minute storm, unless a lower performance measure is specified in an approved catchment based Stormwater Management Plan; (b) maintain the stormwater runoff time to peak to match that of the pre-development; and (a) manage site generated stormwater runoff up to and including the 100 –year ARI flood event (1% AEP).

MAJOR LAND DIVISION (20+ ALLOTMENTS)

Open Space

PO 8.1	None are applicable.
---------------	----------------------

Performance Outcomes (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
Land division allocates or retains, evenly distributed, high quality areas of open space to improve residential amenity and provide urban heat amelioration.	
<p>PO 8.2</p> <p>Land allocated for open space is suitable for intended active and passive recreational use considering gradient and potential for inundation.</p>	<p>DTS / DPF 8.2</p> <p>Where provided, no more than 20% of open space:</p> <ul style="list-style-type: none"> (a) has a slope in excess of 1 in 4; and (b) is comprised of watercourses, wetlands or detention basins.
<p>PO 8.3</p> <p>Land allocated for active recreation is of a size and has dimensions capable of accommodating a range of active recreational activities.</p>	None are applicable.
Water Sensitive Design	
<p>PO 9.1</p> <p>Land division creating 20 or more residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.</p>	<p>DTS/DPF 9.1</p> <p>Land division creating 20 or more residential allotments is accompanied by an approved <i>Stormwater Management Plan</i> and manages up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings and:</p> <ul style="list-style-type: none"> (a) maintains pre-development peak 5-year ARI (18.1% AEP) flow rate from the site, and maintains the time to peak to match that of the pre-development; or (d) captures and retains the difference in pre-development volume vs post development volume from the site for a 5-year ARI (18.1% AEP) 30 minute storm; or where there is no adequate local drainage scheme to connect to, captures and retains post development volume from the site for a 5 year ARI (18.1% AEP) 30 minute storm.

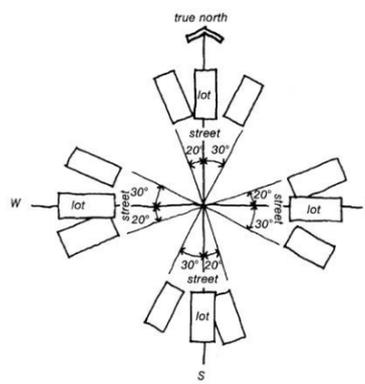

Performance Outcomes (PO)	<ul style="list-style-type: none"> • Deemed to Satisfy Criteria (DTS) (required for development to be classified as Deemed-to-Satisfy) • Designated Performance Feature (DPF) (used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)
<p>PO 9.2</p> <p>Land division creating 20 or more non-residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded</p>	<p>DTS/DPF 9.2</p> <p>Land division creating 20 or more non-residential allotments is accompanied by an approved <i>Stormwater Management Plan</i> and manages up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings and:</p> <ul style="list-style-type: none"> (a) maintains pre-development peak 20-year ARI (5% AEP) flow rate from the site and, maintains the time to peak to match that of the pre-development; or (b) captures and retains the difference in pre-development volume vs post development volume from the site for a 20-year ARI (5% AEP) 30 minute storm; where there is no adequate local drainage scheme to connect to, captures and retains post development volume from the site for a 20 year ARI (5% AEP) 30 minute storm.

Solar Orientation	
<p>PO 10.1</p> <p>Land division creating 20 or more allotments for residential purposes facilitates solar</p>	<p>DTS/DPF 10.1</p> <p>Land division results in:</p>

Performance Outcomes (PO)

- **Deemed to Satisfy Criteria (DTS)**
(required for development to be classified as Deemed-to-Satisfy)
- **Designated Performance Feature (DPF)**
(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)

access for energy efficient through allotment orientation and allotment dimensions.

- (a) at least 80% of allotments oriented so that their long axis conforms with figure 10.1:

- (b) 80% of allotments with an east-west orientation having a minimum frontage of 15m
- (c) no more than 20% of allotments are located on the south side of east-west oriented streets. no more than 20% of allotments are located on the south side of east-west oriented streets.

Marinas and On-Water Structures

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Marinas and on-water structures located and designed to minimise impairment of commercial, recreational and navigational activities and adverse impacts on the environment.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Navigation and Safety

PO 1.1

Safe public access is provided or maintained to the waterfront, public infrastructure and recreation areas.

DTS/DPF 1.1

None are applicable

PO 1.2

The operation of wharves not impaired by marinas and on-water structures.

DTS/DPF 1.2

None are applicable

PO 1.3

Navigation and access channels not impaired by marinas and on-water structures.

DTS/DPF 1.3

None are applicable

PO 1.4

Commercial shipping lanes not impaired by marinas and on-water structures.

DTS/DPF 1.4

Marinas and on-water structures are setback 250m or more from commercial shipping lanes.

PO 1.5

Marinas and on-water structures located to avoid interfering with the operation or function of a water supply pumping station.

DTS/DPF 1.5

On-water structures are setback:

- (a) 3km or more from upstream water supply pumping station take-off points; and
- (b) 500m or more from downstream water supply pumping station take-off points.

PO 1.6

Maintenance of on-water infrastructure, including revetment walls, not impaired by marinas and on-water structures.

DTS/DPF 1.6

None are applicable

Environmental Protection

PO 2.1

Development sited and designed to facilitate water circulation and exchange.

DTS/DPF 2.1

None are applicable

Open Space and Recreation

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Pleasant, functional and accessible open space and recreation facilities provided for active and passive recreation.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Recreation facilities compatible with surrounding land use and activity.

DTS/DPF 1.1

None are applicable

Design and Siting

PO 2.1

Open space and recreation facilities address adjacent public roads to optimise pedestrian access and visibility.

DTS/DPF 2.1

None are applicable

PO 2.2

Open space and recreation facilities incorporate park furniture, shaded areas and resting places to enhance pedestrian comfort.

DTS/DPF 2.2

None are applicable

PO 2.3

Open space and recreation facilities link habitats, wildlife corridors and existing open spaces and recreation facilities.

DTS/DPF 2.3

None are applicable

Pedestrians and Cyclists

PO 3.1

Open space incorporates:

- (a) pedestrian and cycle linkages to other open spaces, centres, schools and public transport nodes;
- (b) safe crossing points where pedestrian routes intersect the road network; and
- (c) easily identified access points.

DTS/DPF 3.1

None are applicable.

Usability

PO 4.1

Land allocated for open space is suitable for intended active and passive recreational use considering gradient and potential for inundation.

DTS/DPF 4.1

No more than 20% of the open space:

- (a) has a slope in excess of 1 in 4; and
- (b) is comprised of watercourses, wetlands or detention basins.

Safety and Security

PO 5.1

Open space is overlooked by housing, commercial or other development to provide casual surveillance where possible.

DTS/DPF 5.1

None are applicable.

PO 5.2

Play equipment is located where it can be casually observed by nearby residents and users.

DTS/DPF 5.2

None are applicable.

PO 5.3

Landscaping provided in open space and recreation facilities maximises opportunities for casual surveillance throughout the park.

DTS/DPF 5.3

None are applicable.

PO 5.4

Fenced parks and playgrounds have more than one entrance or exit to minimise potential entrapment.

DTS/DPF 5.4

None are applicable.

PO 5.5

Adequate lighting provided around toilets, telephones, seating, litter bins, bicycle storage, car parks and other such facilities.

DTS/DPF 5.5

None are applicable.

PO 5.6

Pedestrian and bicycle movement after dark focused along clearly defined, adequately lit routes with observable entries and exits.

DTS/DPF 5.6

None are applicable.

Signage

PO 6.1

Signage provided at entrances to and within public open space to provide clear orientation to major points of interest such as the location of public toilets, telephones, safe routes, park activities and the like.

DTS/DPF 6.1

None are applicable.

Buildings and Structures

PO 7.1

Buildings and car parking areas in open space areas are designed, located and of a scale to be unobtrusive.

DTS/DPF 7.1

None are applicable.

PO 7.2

Buildings and structures in open space are clustered where practical to ensure that the majority of the site remains open.

DTS/DPF 7.2

None are applicable.

PO 7.3

Development in open space is constructed to minimise the extent of hard paved areas.

DTS/DPF 7.3

None are applicable.

PO 7.4

Development that abuts or includes a coastal reserve or Crown land used for scenic, conservation or recreational purposes is located and designed to have regard to the purpose, management and amenity of the reserve.

DTS/DPF 7.4

None are applicable.

Landscaping

PO 8.1

Open space and recreation facilities provide for the planting and retention of large trees and vegetation.

DTS/DPF 8.1

None are applicable.

PO 8.2

Landscaping in open space and recreation facilities provides shade and windbreaks:

- (a) along cyclist and pedestrian routes
- (b) around picnic and barbecue areas; and
- (c) in car parking areas.

DTS/DPF 8.2

None are applicable.

PO 8.3

Landscaping in open space facilitates habitat for local fauna and facilitates biodiversity.

DTS/DPF 8.3

None are applicable.

Resource Extraction

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Resource extraction activities developed in a manner that minimises human and environmental impacts.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Resource extraction activities minimise landscape damage and provide for the progressive reclamation and betterment of disturbed areas.

DTS/DPF 1.1

None are applicable.

PO 1.2

Resource extraction activities avoid damage to cultural sites or artefacts.

DTS/DPF 1.2

None are applicable.

Water Quality

PO 2.1

Stormwater and/or waste water from resource extraction activities is diverted into appropriately sized treatment and retention systems to enable reuse on-site.

DTS/DPF 2.1

None are applicable.

Separation Treatments, Buffers and Landscaping

PO 3.1

Resource extraction activities minimise adverse impacts upon sensitive receivers through incorporation of separation distances and/or mounding/vegetation.

DTS/DPF 3.1

None are applicable.

PO 3.2

Resource extraction activities are screened from view from adjacent land by perimeter landscaping and/or mounding.

DTS/DPF 3.2

None are applicable.

Site Contamination

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Protection of human health and the environment wherever site contamination has been identified or is suspected to have occurred.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

PO 1.1

Ensure land is suitable for sensitive use in circumstances where it is, or may have been, subject to site contamination as a result of previously established uses of land or activities in the vicinity of the land.

DTS/DPF 1.1

Development:

- (a) does not incorporate a change of use of land;
- (b) incorporates a change of use of land that is not a more sensitive use of land than previously established uses of the land;
- (c) in respect of which the applicant is able to furnish, or the relevant authority is in possession of, a site contamination audit report less than 5 years old under Part 10A of the Environment Protection Act 1993 to the effect:
 - i. that site contamination does not exist (or no longer exists) at the land; or
 - ii. that any site contamination at the land has been cleared or addressed to the extent necessary to enable the land to be suitable for sensitive use; or
- (d) the allotment was the subject of consent granted under the Development Act 1993 or the Planning Development and Infrastructure Act 2016 on or after 1 September 2009 in relation the division of the land.

Tourism Development

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Tourism development in suitable locations that caters to the needs of visitors.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

General

PO 1.1

Tourism development complements and contributes to local, natural, cultural or historical context.

DTS/DPF 1.1

None are applicable.

PO 1.2

Tourism development comprising multiple accommodation units (including any facilities and activities for use by guests and visitors) clustered to minimise environmental and contextual impact.

DTS/DPF 1.2

None are applicable.

Caravan and Tourist Parks

PO 2.1

Potential conflicts between long-term residents and short-term tourists minimised through suitable siting and design measures.

DTS/DPF 2.1

None are applicable.

PO 2.2

Occupants are provided privacy and amenity through landscaping and fencing.

DTS/DPF 2.2

None are applicable.

PO 2.3

Communal open space and centrally located recreation facilities provided for guests and visitors.

DTS/DPF 2.3

12.5% or more of a caravan park comprises clearly defined communal open space, landscaped areas and areas for recreation.

PO 2.4

Perimeter landscaping is used to enhance the amenity of the locality.

DTS/DPF 2.4

None are applicable.

PO 2.5

Amenity blocks (showers, toilets, laundry and kitchen facilities) sufficient to serve peak population.

DTS/DPF 2.5

None are applicable.

PO 2.6

Long-term occupation does not displace tourist accommodation, particularly in important tourist destinations such as coastal and riverside locations.

DTS/DPF 2.6

None are applicable.

Transport, Access and Parking

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

A comprehensive, integrated and connected transport system that is safe, sustainable, efficient, convenient and accessible to all users.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Movement Systems

PO 1.1

Development integrated with the existing transport system and designed to minimise its potential impact on the functional performance of the transport system.

DTS/DPF 1.1

None are applicable.

PO 1.2

Development is designed to discourage commercial and industrial vehicle movements through residential streets and adjacent other sensitive receivers.

DTS/DPF 1.2

None are applicable.

PO 1.3

Industrial, commercial and service vehicle movements, loading areas and designated parking spaces are separated from passenger vehicle car parking areas to ensure efficient and safe movement and minimise potential conflict.

DTS/DPF 1.3

None are applicable.

PO 1.4

Development sited and designed so that loading, unloading and turning of all traffic likely to be generated avoids interrupting the operation of and queuing on public roads and pedestrian paths.

DTS/DPF 1.4

All vehicle manoeuvring occurs onsite.

Sightlines

PO 2.1

Maintenance or enhancement of sightlines at intersections, pedestrian and cycle crossings, and crossovers to allotments for motorists, cyclists and pedestrians to ensure safety for all road users and pedestrians.

DTS/DPF 2.1

None are applicable.

PO 2.2

Walls, fencing and landscaping adjacent to driveways and corner sites are designed to provide adequate sightlines between vehicles and pedestrians.

DTS/DPF 2.2

None are applicable.

Vehicle Access

PO 3.1

Safe and convenient access that minimises impact or interruption on the operation of public roads.

DTS/DPF 3.1

The access is:

- (a) provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; and
- (b) not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing.

PO 3.2

Development incorporating vehicular access ramps ensures vehicles can enter and exit a site safely and without creating a hazard to pedestrians and other vehicular traffic.

DTS/DPF 3.2

None are applicable.

PO 3.3

Access points sited and designed to accommodate the type and volume of traffic likely to be generated by the development or land use.

DTS/DPF 3.3

None are applicable.

PO 3.4

Access points sited and designed to minimise any adverse impacts on neighbouring properties.

DTS/DPF 3.4

None are applicable.

PO 3.5

Access points located so as not to interfere with mature street trees, existing street furniture (including directional signs, lighting, seating and weather shelters) or infrastructure services to maintain the appearance of the streetscape, preserve local amenity and minimise disruption to utility infrastructure assets.

DTS/DPF 3.5

The access point does not involve the removal or relocation of mature street trees, street furniture or utility infrastructure services.

PO 3.6

Driveways and access points are separated and minimised in number to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

DTS/DPF 3.6

Driveways and access points:

- (a) for sites with a frontage to a public road of 20m or less, one access point no greater than 3.5m in width is provided.
- (b) for sites with a frontage to a public road greater than 20m:
 - i. a single access point no greater than 6m in width is provided; or
 - ii. not more than two access points with a width of 3.5m each are provided.

PO 3.7

Access points appropriately separated from level crossings to avoid interference and ensure their safe ongoing operation.

DTS/DPF 3.7

None are applicable.

PO 3.8

Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated.

DTS/DPF 3.8

None are applicable.

PO 3.9

Development designed to ensure vehicle circulation between activity areas occurs within the site without the need to use public roads.

DTS/DPF 3.9

None are applicable.

Access for People with Disabilities

PO 4.1

Development sited and designed to provide safe, dignified and convenient access for people with a disability.

DTS/DPF 4.1

None are applicable.

Vehicle Parking Rates

PO 5.1

The provision of sufficient on-site vehicle parking and specifically marked accessible car parking places to meet the needs of the development or land use having regard to factors that may support a reduced on-site rate such as:

- (a) availability of on-street car parking
- (b) shared usage of other parking areas
- (c) in relation to a mixed-use development, where the hours of operation of commercial activities complement the residential use of the site the provision of vehicle parking may be shared.

DTS/DPF 5.1

Development provides a number of car parking spaces on-site at a rate no less than the amount calculated using Transport, Access and Parking Table 1 – General Off-Street Car Parking Requirements or Transport, Access and Parking Table 2 – Off-Street Vehicle Parking Requirements in Designated Areas, whichever is relevant.

Vehicle Parking Areas

PO 6.1

Vehicle parking areas that are sited and designed to minimise impact on the operation of public roads by avoiding the use of public roads when moving from one part of a parking area to another.

DTS/DPF 6.1

Movement between vehicle parking areas within the site can occur without the need to use a public road.

PO 6.2

Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like.

DTS/DPF 6.2

None are applicable.

PO 6.3

Vehicle parking areas designed to provide opportunity for integration and shared-use of adjacent car parking areas to reduce the total extent of vehicle parking areas and access points.

DTS/DPF 6.3

None are applicable.

PO 6.4

Pedestrian linkages between parking areas and the development are provided and are safe and convenient.

DTS/DPF 6.4

None are applicable.

PO 6.5

Vehicle parking areas that are likely to be used during non-daylight hours are provided with floodlit entry and exit points to ensure clear visibility to users.

DTS/DPF 6.5

None are applicable.

PO 6.6

Loading areas and designated parking spaces for service vehicles provided within the boundary of the site.

DTS/DPF 6.6

Loading areas and designated parking spaces are wholly located within the site.

PO 6.7

On-site visitor parking spaces are sited and designed to be accessible to all visitors at all times.

DTS/DPF 6.7

None are applicable.

Undercroft and Below Ground Garaging and Parking of Vehicles

PO 7.1

Undercroft and below ground garaging of vehicles designed to enable safe entry and exit from the site without compromising pedestrian or cyclist safety or causing conflict with other vehicles.

DTS/DPF 7.1

None are applicable.

Internal Roads and Parking Areas in Residential Parks and Caravan and Tourist Parks

PO 8.1

Internal road and vehicle parking areas surfaced to prevent dust becoming a nuisance to park residents and occupants.

DTS/DPF 8.1

None are applicable.

PO 8.2

Traffic circulation and movement within the park that is pedestrian friendly and promotes low speed vehicle movement

DTS/DPF 8.2

None are applicable.

Bicycle Parking in Designated Areas

PO 9.1

The provision of adequately sized on-site bicycle parking facilities to encourage cycling as an active transport mode supporting community health.

DTS/DPF 9.1

Areas and / or fixtures are provided for the parking and storage of bicycles at a rate not less than the amount calculated using Transport, Access and Parking Table 3 - Off Street Bicycle Parking Requirements.

PO 9.2

Bicycle parking facilities provide for the secure storage and tethering of bicycles in a place where casual surveillance is possible, is well lit and signed for the safety and convenience of cyclists and to deter property theft.

DTS/DPF 9.2

None are applicable.

PO 9.3

Non-residential development incorporates end-of-journey facilities for employees such as showers, changing facilities and secure lockers, and signage indicating the location of the facilities to encourage cycling as a mode of journey-to-work transport.

DTS/DPF 9.3

None are applicable.

The number of employees

Table 1 – General Off-Street Car Parking Requirements

Class of Development	Car Parking Rate (unless varied by Table 3 onwards) Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.
Residential Development	
Detached Dwelling	1 or 2 bedroom dwelling – 1 space per dwelling. 3 or more bedroom dwelling – 2 spaces per dwelling.
Group Dwelling	1 or 2 bedroom dwelling – 1 space per dwelling. 3 or more bedroom dwelling – 2 spaces per dwelling. 0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.
Residential Flat Building	1 or 2 bedroom dwelling – 1 space per dwelling. 3 or more bedroom dwelling – 2 spaces per dwelling.

Class of Development	Car Parking Rate (unless varied by Table 3 onwards) Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.
	0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.
Row Dwelling	1 or 2 bedroom dwelling – 1 space per dwelling. 3 or more bedroom dwelling – 2 spaces per dwelling.
Semi-Detached Dwelling	1 or 2 bedroom dwelling – 1 space per dwelling. 3 or more bedroom dwelling – 2 spaces per dwelling.
Aged / Supported Accommodation	
Aged person's accommodation	0.3 spaces per bed.
Nursing home	0.3 spaces per bed.
Retirement village	1 or 2 bedroom dwelling – 1 space per dwelling. 3 or more bedroom dwelling – 2 spaces per dwelling. 0.2 spaces per dwelling for visitor parking.
Supported accommodation	0.3 spaces per bed.
Residential Development (Other)	
Ancillary accommodation	No additional requirements beyond those associated with the main dwelling.
Residential park	1 or 2 bedroom dwelling – 1 space per dwelling. 3 or more bedroom dwelling - 2 spaces per dwelling. 0.2 spaces per dwelling for visitor parking.
Workers' accommodation	0.5 spaces per bed plus 0.25 spaces per bed for visitor parking.
Tourist	
Caravan park / tourist park	Parks with 100 sites or less – a minimum of 1 space per 10 sites to be used for accommodation.

Class of Development	Car Parking Rate (unless varied by Table 3 onwards) Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.
	Parks with more than 100 sites - a minimum of 1 space per 15 sites used for accommodation. A minimum of 1 space for every caravan (permanently fixed to the ground) or cabin.
Tourist accommodation	1 car parking space per accommodation unit / guest room.
Commercial Uses	
Auction room/ depot	1 space per 100m ² of building floor area plus an additional 2 spaces.
Automotive collision repair	3 spaces per 100m ² of gross leasable floor area plus 1 space for each vehicle being serviced, repaired or fitted with accessories, including vehicles waiting to be repaired, fitted with accessories or collected by owners.
Bulky goods outlet	3 spaces per 100m ² of gross leasable floor area.
Call centre	8 spaces per 100m ² of gross leasable floor area.
Motor repair station	3 spaces per 100m ² of gross leasable floor area plus 1 space for each vehicle being serviced, repaired or fitted with accessories, including vehicles waiting to be repaired, fitted with accessories or collected by owners.
Office	4 spaces per 100m ² of gross leasable floor area.
Retail fuel outlet	6 spaces per service bay, plus 50% of the spaces calculated to be provided for ancillary uses
Service trade premises	4 spaces per 100m ² of gross leasable floor area 1 space per 100m ² of outdoor area used for display purposes.
Shop other than a bulky goods outlet or restaurant	7 spaces per 100m ² of gross leasable floor area where not located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle

Class of Development	Car Parking Rate (unless varied by Table 3 onwards) Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.
	<p>parking, vehicle loading and unloading, and the storage and collection of refuse are shared.</p> <p>6 spaces per 100m² of gross leasable floor area where located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.</p>
Community and Civic Uses	
Childcare centre	0.25 spaces per child
Library	4 spaces per 100m ² of total floor area.
Community facility	10 spaces per 100m ² of total floor area.
Hall / meeting hall	0.2 spaces per seat.
Place of worship	1 space for every 3 visitor seats.
Pre-school	1 per employee plus 0.25 per child (drop off/pick up bays)
Educational establishment	<p>For a primary school - 1.1 space per full time equivalent employee plus 0.25 spaces per student.</p> <p>For a secondary school - 1.1 per full time equivalent employee plus 0.16 spaces per student</p> <p>For a tertiary institution - 0.8 per student based on the maximum number of students on the site at any time.</p>
Health Related Uses	
Hospital	5 spaces per bed.
Consulting room	4 spaces per 100m ² of gross leasable floor area.

Class of Development	Car Parking Rate (unless varied by Table 3 onwards) Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.
Recreational and Entertainment Uses	
Amusement machine centre	1 space per 10m ² of total floor area.
Bowling club	10 spaces per bowling green.
Cinema complex	0.33 spaces per seat.
Concert hall / theatre	0.33 spaces per seat.
Hotel	1 space for every 2m ² of total floor area in a public bar plus 1 space for every 6m ² of total floor area available to the public in a lounge, beer garden or other licensed area.
Indoor recreation facility	7 spaces per 100m ² of total floor area For a squash court or tennis court – 4 spaces per court.
Restaurant	Premises with a dine-in service only - 0.4 spaces per seat. Premises with a dine-in and take-away services - 0.55 spaces per seat. [Note: requirements associated with a drive-through service are to be considered separately to the parking rates mentioned herein]
Industry/Employment Uses	
Fuel depot	If employee numbers are known - 1 space per employee with a minimum of 2 spaces per premises. If employee numbers are unknown - 1.85 spaces per 100m ² of total floor area with a minimum of 2 spaces per premises.
Industry	If employee numbers are known - 1 space per employee with a minimum of 2 spaces per premises. If employee numbers are unknown - 1.85 spaces per 100m ² of total floor area with a minimum of 2 spaces per premises.

Class of Development	Car Parking Rate (unless varied by Table 3 onwards) Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.
Store	<p>If employee numbers are known - 1 space per employee with a minimum of 2 spaces per premises.</p> <p>If employee numbers are unknown - 1.85 spaces per 100m² of total building floor area with a minimum of 2 spaces per premises.</p>
Timber yard	<p>If employee numbers are known - 1 space per employee with a minimum of 2 spaces per premises.</p> <p>If employee numbers are unknown - 1.85 spaces per 100m² of total floor area with a minimum of 2 spaces per premises.</p>
Warehouse	<p>If employee numbers are known - 1 space per employee with a minimum of 2 spaces per premises.</p> <p>If employee numbers are unknown - 1.85 spaces per 100m² of total floor area with a minimum of 2 spaces per premises.</p>
Other Uses	
Funeral Parlour	1 space per 5 seats in the chapel plus 1 space for each vehicle operated by the parlour.
Radio or Television Station	5 spaces per 100m ² of total building floor area.

Table 2 – Off-Street Vehicle Parking Requirements in Designated Areas

Class of Development	Car Parking Rate		Designated Areas
	Minimum number of spaces	Maximum number of spaces	
Development generally			
All classes of development	No minimum.	No maximum.	Capital City Zone City Main Street Zone
Non-residential development			
Non-residential development excluding tourist accommodation	3 spaces per 100m ² of gross leasable floor area.	5 spaces per 100m ² of gross leasable floor area.	Urban Activity Centre Zone Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone
Non-residential development excluding tourist accommodation	3 spaces per 100m ² of gross leasable floor area.	6 spaces per 100m ² of gross leasable floor area.	Where located in accordance with the Table 2 - Criteria: Business Neighbourhood Zone Education and Innovation Zone Suburban Activity Centre Zone Suburban Business and Innovation Zone Suburban Main Street Zone Urban Activity Centre Zone

Class of Development	Car Parking Rate		Designated Areas
	Minimum number of spaces	Maximum number of spaces	
Tourist accommodation	Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.		
	1 space for every 4 bedrooms up to 100 bedrooms plus 1 space for every 5 bedrooms over 100 bedrooms	1 space per 2 bedrooms up to 100 bedrooms and 1 space per 4 bedrooms over 100 bedrooms	Urban Activity Centre Zone Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone
Residential development			
Residential component of a multi-storey building	Dwelling with no separate bedroom – 0.25 spaces per dwelling	None specified.	Urban Activity Centre Zone Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone
	1 bedroom dwelling – 0.75 spaces per dwelling 2 bedroom dwelling – 1 space per dwelling 3 or more bedroom dwelling – 1.25 spaces per dwelling 0.25 spaces per dwelling for visitor parking.		
Residential flat building	Dwelling with no separate bedroom – 0.25 spaces per dwelling 1 bedroom dwelling – 0.75 spaces per dwelling	None specified.	Urban Activity Centre Zone Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone

Class of Development	Car Parking Rate		Designated Areas
	Minimum number of spaces	Maximum number of spaces	
	Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type. 2 bedroom dwelling – 1 space per dwelling 3 or more bedroom dwelling – 1.25 spaces per dwelling 0.25 spaces per dwelling for visitor parking.		Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone

Table 2 - Criteria:

The designated area is wholly located within Metropolitan Adelaide and any part of the area satisfies one of the following:

- (b) is within 400 metres of a bus interchange⁽¹⁾
- (c) is within 400 metres of an O-Bahn interchange⁽¹⁾
- (d) is within 400 metres of a passenger rail station⁽¹⁾
- (e) is within 400 metres of a passenger tram station⁽¹⁾
- (f) is within 400 metres of the Adelaide Parklands.

[NOTE(S): (1) Measured from an area that contains any platform(s), shelter(s) or stop(s) where people congregate for the purpose waiting to board a bus, tram or train, but does not include areas used for the parking of vehicles.]

Table 3 – Off-Street Bicycle Parking Requirements

The bicycle parking rates apply within designated areas located within parts of the State identified in the Schedule to Table 3.

Class of Development	Bicycle Parking Rate Where a development comprises more than one development type, then the overall bicycle parking rate will be taken to be the sum of the bicycle parking rates for each development type.
Consulting Room	1 space per 20 employees plus 1 space per 20 consulting rooms for customers.
Educational establishment	For a secondary school – 1 space per 20 full-time time employees plus 10 percent of the total number of employee spaces for visitors. For tertiary education – 1 space per 20 employees plus 1 space per 10 full time students.
Hospital	1 space per 15 beds plus 1 space per 30 beds for visitors.
Indoor recreation facility	1 space per 4 employees plus 1 space per 200m ² of gross leasable floor area for visitors.
Office	1 space for every 200m ² of gross leasable floor area plus 2 spaces plus 1 space per 1000m ² of gross leasable floor area for visitors.
Residential flat building	1 space for every 4 dwellings for residents plus 1 for every 10 dwellings for visitors.
Residential component of a multi-storey building	1 space for every 4 dwellings for residents plus 1 space for every 10 dwellings for visitors.
Shop	1 space for every 300m ² of gross leasable floor area plus 1 space for every 600m ² of gross leasable floor area for customers.
Tourist accommodation	1 space for every 20 employees plus 2 for the first 40 rooms and 1 for every additional 40 rooms for visitors.

Schedule to Table 3	
Designated Area	Relevant part of the State The bicycle parking rate applies to a designated area located in a relevant part of the State described below.
All zones	City of Adelaide
Business Neighbourhood Zone Education and Innovation Zone Suburban Activity Centre Zone Suburban Business and Innovation Zone Suburban Main Street Zone Urban Activity Centre Zone Urban Corridor (Boulevard) Zone Urban Corridor (Business) Zone Urban Corridor (Living) Zone Urban Corridor (Main Street) Zone Urban Neighbourhood Zone	Metropolitan Adelaide

Waste Treatment and Management Facilities

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Mitigation of potential environmental and amenity impacts of waste treatment and management facilities.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Siting

PO 1.1

Waste treatment and management facilities incorporate separation distances and attenuation measures within the site between waste operations areas (including all closed, operating and future cells) and sensitive receivers and sensitive environmental features to mitigate off-site impacts from noise, air and dust emissions.

DTS/DPF 1.1

None are applicable.

Soil and Water Protection

PO 2.1

Soil, groundwater and surface water protected from contamination from waste treatment and management facilities through measures such as:

- (a) containing potential groundwater and surface water contaminants within waste operations areas;
- (b) diverting clean stormwater away from waste operations areas and potentially contaminated areas; and
- (c) providing a leachate barrier between waste operations areas and underlying soil and groundwater.

DTS/DPF 2.1

None are applicable.

PO 2.2

Wastewater lagoons setback from watercourses to minimise environmental harm and adverse effects on water resources.

DTS/DPF 2.2

Wastewater lagoons are setback 50m or more from watercourse banks.

PO 2.3

Wastewater lagoons designed and sited to:

- (a) avoid intersecting underground waters;
- (b) avoid inundation by flood waters;
- (c) ensure lagoon contents do not overflow; and
- (d) include a liner designed to prevent leakage.

DTS/DPF 2.3

None are applicable.

PO 2.4

Waste operations areas of landfills and organic waste processing facilities setback from watercourses to minimise adverse impacts on water resources.

DTS/DPF 2.4

Waste operations areas are setback 100m or more from watercourse banks.

Amenity

PO 3.1

Waste treatment and management facilities are screened, located and designed to minimise adverse visual impacts on amenity.

DTS/DPF 3.1

None are applicable.

PO 3.2

Access routes to waste treatment and management facilities via residential streets is avoided.

DTS/DPF 3.2

None are applicable.

PO 3.3

Litter control measures minimise the incidence of windblown litter.

DTS/DPF 3.3

None are applicable.

PO 3.4

Waste treatment and management facilities are designed to minimise adverse impacts on both the site and surrounding areas from weed and vermin infestation.

DTS/DPF 3.4

None are applicable.

Access

PO 4.1

Traffic circulation movements within any waste treatment or management site designed to enable all vehicles expected to use the facility to enter and exit the site in a forward direction.

DTS/DPF 4.1

None are applicable.

PO 4.2

Suitable access for emergency vehicles provided to and within waste treatment or management sites.

DTS/DPF 4.2

None are applicable.

Fencing and Security

PO 5.1

Security fencing provided around waste treatment and management facilities to prevent unauthorised access to operations and potential hazard to the public

DTS/DPF 5.1

Chain wire mesh or pre-coated painted metal fencing 2m or more in height is erected along the perimeter of the waste treatment or waste management facility site.

Landfill

PO 6.1

Landfill gas emissions managed in an environmentally acceptable manner.

DTS/DPF 6.1

None are applicable.

PO 6.2

Landfill facilities separated from areas of environmental significance and land used for public recreation and enjoyment.

DTS/DPF 6.2

Landfill facilities are setback 250m or more from a public open space reserve, forest reserve, national park or the Conservation Zone.

PO 6.3

Landfill facilities located on land that is not subject to land slip.

DTS/DPF 6.3

None are applicable.

PO 6.4

Landfill facilities separated from areas subject to flooding to avoid potential environmental harm.

DTS/DPF 6.4

Landfill facilities are setback 500m or more from land inundated in a 1% AEP flood event.

Organic Waste Processing Facilities

PO 7.1

Organic waste processing facilities separated from the coast to avoid potential environment harm.

DTS/DPF 7.1

Organic waste processing facilities are setback 500m or more from coastal high water mark.

PO 7.2

Organic waste processing facilities not located on land where the interface of the engineered liner and natural soils would be within any of the following:

- a. 15m of unconfined aquifers bearing groundwater with less than 3,000mg per litre total dissolved salts;
or
- b. 5m of groundwater with a water quality of 3,000mg to 12,000mg per litre total dissolved salts; or
- c. 2m of groundwater with a water quality exceeding 12,000mg per litre total dissolved salts.

DTS/DPF 7.2

None are applicable.

PO 7.3

Organic waste processing facilities sited away from areas of environmental significance and land used for public recreation and enjoyment.

DTS/DPF 7.3

Organic waste processing facilities are setback 250m or more from a public open space reserve, forest reserve, national park or the Conservation Zone.

PO 7.4

Organic waste processing facilities located on land that is not subject to land slip.

DTS/DPF 7.4

None are applicable.

PO 7.5

Organic waste processing facilities separated from areas subject to flooding to avoid potential environmental harm.

DTS/DPF 7.5

Organic waste processing facilities are setback 500m or more from land inundated in a 1% AEP flood event.

Major Wastewater Treatment Facilities

PO 8.1

Major wastewater treatment and disposal systems, including lagoons, designed to minimise potential adverse odour impacts on sensitive receivers.

DTS/DPF 8.1

None are applicable.

PO 8.2

Artificial wetland systems for the storage of treated wastewater designed and sited to minimise potential public health risks arising from the breeding of mosquitoes.

DTS/DPF 8.2

None are applicable.

Workers Accommodation and Settlements

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

PO 1.1

Workers accommodation and settlements sited and designed to minimise impacts on views from scenic routes, tourist destinations and areas of conservation significance.

DTS/DPF 1.1

None are applicable.

PO 1.2

Workers accommodation and settlements sited and designed to minimise nuisance impacts on the amenity of adjacent users of land.

DTS/DPF 1.2

None are applicable.

PO 1.3

Workers accommodation and settlements designed with materials and colours that blend with the landscape.

DTS/DPF 1.3

None are applicable.

PO 1.4

Workers accommodation and settlements supplied with service infrastructure such as power, water and effluent disposal sufficient to satisfy the living requirements of workers.

DTS/DPF 1.4

None are applicable.

Part 5 – Designated Areas

Under the *Planning, Development and Infrastructure (General) Regulations* the Planning and Design Code may designate a zone, subzone, overlay or identify other areas for certain purposes.

Column A identifies the purpose of a designated area and Column B identifies the relevant zone, subzone or overlay in the Planning and Design Code or other area designated for that purpose, including limits to the extent of a designated area.

Where the extent of a designated area is limited in Column B by a figure, the figure is provided in Schedule 1 of this Part.

Table 1 – Designated Areas

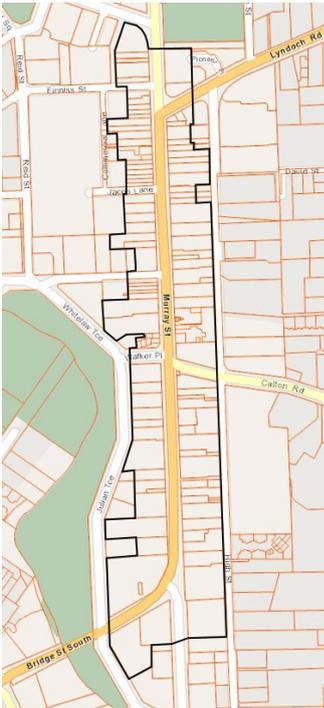

Introduction (Column A)	Designated Area(s) (Column B)
Interpretation	
Areas identified as 'designated 'airport building heights area' for the purposes of clause 3(1) of the Regulations – Interpretation	Airport Building Heights (Aircraft Landing Areas) Overlay Airport Building Heights (Regulated) Overlay Defence Aviation Area Overlay
Areas identified as 'designated environmental zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations – Interpretation	None specified
Areas identified as 'designated flood zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations – Interpretation	Coastal Areas Overlay Hazards (Flooding) Overlay River Murray Flood Plain Overlay
Areas identified as 'designated regulated tree overlay' for the purposes of clause 3(1) of the Regulations – Interpretation	Regulated Tree Overlay
Building Rules: bushfire prone areas	
Areas identified as 'designated bushfire prone areas' for the purposes of clause 98(b) of the Regulations – Building Rules: bushfire prone areas	Hazards (Bushfire - General Risk) Overlay Hazards (Bushfire - High Risk) Overlay Hazards (Bushfire - Medium Risk) Overlay Hazards (Bushfire - Outback) Overlay Hazards (Bushfire - Regional) Overlay Hazards (Bushfire – Urban Interface) Overlay
Additions to definition of development	
Areas identified for the purposes of clause 1 of	Hills Face Zone Significant Landscape Protection Overlay Hazard (Acid Sulfate Soils) Overlay

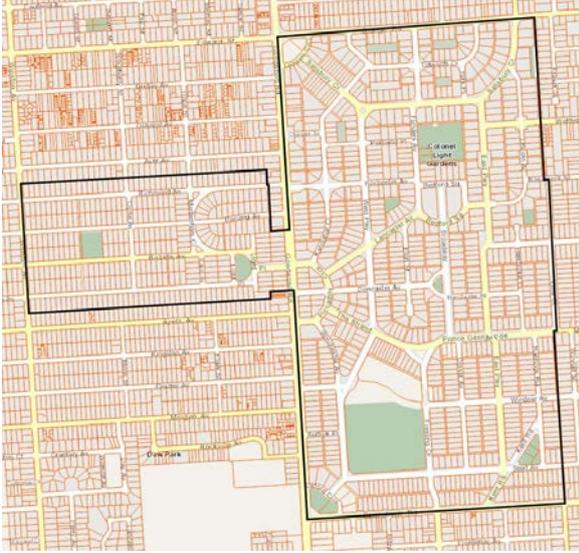

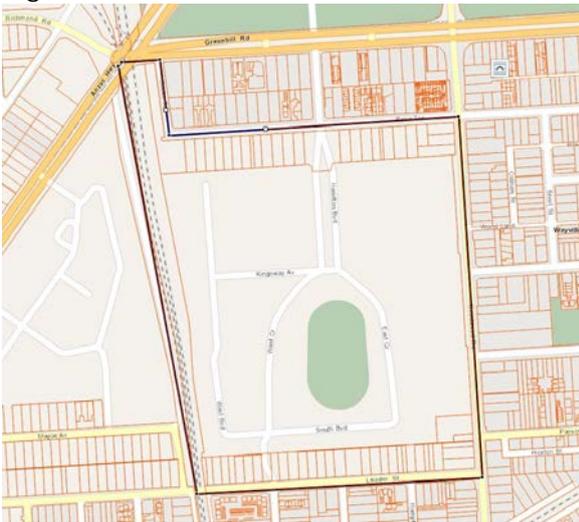

Introduction (Column A)	Designated Area(s) (Column B)
Schedule 3 under the Regulations – Excavating or filling in identified zones or areas	Sloping Land Overlay
Areas identified for the purposes of clause 3 of Schedule 3 under the Regulations – Excavation or filling in identified zones or areas subject to inundation or flooding	In addition to a 'designated flood zone, subzone or overlay', the following: None specified
Exclusions from definition of development - general	
Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(i) of Schedule 4 under the Regulations – Council works	Conservation Zone Significant Landscape Protection Overlay Consider deleting from the regulations as unsure of the purpose of this provision.
Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(ii)(A) of Schedule 4 under the Regulations – Council works	Coastal Areas Overlay As above – consider deleting from the regulations as unsure of the purpose of this provision.
Areas identified for the purposes of clause 4 (1)(a) of Schedule 4 under the Regulations – Outbuilding	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 4(1)(c) of Schedule 4 under the Regulations – Swimming pool	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone
Areas identified for the purposes of clause 4 (1)(d)(i)(B) of Schedule 4 under the Regulations – Fence not exceeding 2.1m in height	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 4(1)(i) of	In addition to a 'designated bushfire prone area', the following: Coastal Areas Overlay

Introduction (Column A)	Designated Area(s) (Column B)
Schedule 4 under the Regulations – Deck	Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 4(9) of Schedule 4 under the Regulations – External painting of a building	Any building located within the area identified in Figure Ga/1 or Figure Ga/2 of Schedule 1.
Areas identified for the purposes of clause 10 of Schedule 4 under the Regulations – Demolition of the whole of a building	Historic Area Overlay
Areas identified for the purposes of clause 11 of Schedule 4 under the Regulations – Dams	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 13 of Schedule 4 under the Regulations – Aerials, towers	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay
Relevant authority - Commission	
Areas identified for the purposes of clause 4(1) of Schedule 6 of the Regulations – Buildings exceeding 4 storeys	Design Overlay
Areas identified for the purposes of clause 5(1) of Schedule 6 of the Regulations – Developments over \$3m in the City of Port Adelaide	Design Overlay
Areas identified for the purposes of clause 8(1) of Schedule 6 of the Regulations – Developments over \$3m in the City of Charles Sturt	Design Overlay
Areas identified for the purposes of clause 11 of Schedule 6 of the Regulations – Developments in the show grounds	Recreation Zone in the City of Unley shown in Figure Un/1 of Schedule 1.
Areas identified for the purposes of clause 12 of	Conservation Zone

Introduction (Column A)	Designated Area(s) (Column B)
Schedule 6 of the Regulations – Tourism developments over \$3m on Kangaroo Island	
State agency development exempt from approval	
Areas identified for the purposes of clause 3 of Schedule 13 of the Regulations - Certain development in part of City of Mitcham	The area identified in Figure Mit/1 of Schedule 1 in connection with the

421 The Parade KENSINGTON GARDENS	House; External form and fabric of 1919 two storeyed residence (excluding trees and all recent extensions). Key features include sandstone and rendered walls, Marseilles terracotta tiled roof, large overhanging verandah gables and eaves.	a d e	8182
439 The Parade KENSINGTON GARDENS	House; External form and fabric of 1912 residence. Key features include complicated roof form of Marseilles tiled roof, projecting gables within roof, verandah with timber posts and fretwork, and brick walls.	a d	8183
31 West Terrace KENSINGTON GARDENS	House; External form and fabric of 1916 Spanish Mission style residence. Key features include expansive floor plan, semi-circular terracotta roof tiles, low pitched roof, chimneys with tiled capping, arcaded front elevation, column supports for vaulted arcades, timber joinery and solid shutters, timber gate posts and wrought iron entrance arch.	a d	8184
6 Alpha Street KENSINGTON PARK	Former Bus Depot; External form and fabric of former bus depot. Key features include face red brick walls, heavy concrete lintels, timber entrance and simple industrial form to Alpha Street.	a e	8187
8 Alpha Street KENSINGTON PARK	House and Front Fencing; External form and fabric of 1883 stone residence. Key features include hipped roof form, concave verandah, stone walls, cast iron and masonry fence with masonry capped pillars.	a d	8188
10 Alpha Street KENSINGTON PARK	House and Front Fencing; External form and fabric of 1883 stone residence. Key features include hipped roof form, concave verandah, stone walls, cast iron and masonry fence with masonry capped pillars.	a d	8189
8 Desaumarez Street KENSINGTON PARK	House; External form and fabric of 1895 bluestone residence. Key features include asymmetrical plan, bluestone walls, ornate rendered window dressings to front gable, bull-nose return verandah and cast iron verandah posts and trim.	a d	8190
9 Desaumarez Street KENSINGTON PARK	House; External form and fabric of 1897 residence. Key features include symmetrical plan, bluestone walls, bull-nose front verandah with central gable detail, and cast iron trim to verandah.	d	8191
347 Glynburn Road KENSINGTON PARK	House - Halton Brook; External form and fabric of early residence including 1840s and 1860s sections. Key features include masonry walls, late tiled roof, pointed arched wall vents and low chimneys.	a d e	8192
365 Glynburn Road KENSINGTON PARK	House; External form and fabric of single storey section of residence. Key features include terracotta tiled roof and projecting verandahs, projecting gable detail with rough render and strapping, masonry walls and tiled window hoods.	a d	8194
381 Glynburn Road KENSINGTON PARK	House; External form and fabric of 1882 residence and front fence. Key features include sandstone walls and rendered masonry bay window element, corrugated iron roof, rendered window and door dressings and quoining, and masonry and cast iron fence to Glynburn Road.	a d	8195

2 Holden Street KENSINGTON PARK	House; External form and fabric of circa 1935 two storey brick residence. Key features include face red brick walls with rendered eaves panels and concrete tiled roof, projecting garage with roof deck, timber window and door joinery, and shutters.	a d e	8196
21 McKenna Street KENSINGTON PARK	House; External form and fabric of 1956 residence. Key features include dressed Mount Gambier stone curved walls and flat roof.	d	8198
3 Oval Terrace KENSINGTON PARK	House; External form and fabric of circa 1901 residence. Key features include face sandstone walls, gable end with timber bargeboard strapping and narrow fluted corrugated iron infill, timber joinery and rendered window and door surrounds and quoins.	a d	8200
4-5 Oval Terrace KENSINGTON PARK	Attached Houses; External form and fabric of attached pair of 1884 cottages. Key features include face bluestone walls, rendered door and window dressings and quoins, and face red brick chimneys.	a d	8201
27 Park Road KENSINGTON PARK	House and Front Fence; External form and fabric of 1865 single storey residence. Key features include face bluestone walls, bull-nose verandah with cast iron posts and detailing embellished by timber barge boards and timber finials, masonry and cast iron fence.	d	8204
36 Park Road KENSINGTON PARK	House; External form and fabric of 1903 residence. Key features include face sandstone wall, simple roof form and verandah. Later additions are not included.	a d	8205
40 Park Road KENSINGTON PARK	House - Carlshurst; External form and fabric of 1884 two storey stone residence. Key features include sandstone walls, extensive return verandahs with cast iron posts and detailing, and sandstone and cast iron fence to Park Road, and gates to Pembroke Street.	a d	8206
10-28 Shipsters Road KENSINGTON PARK	Houses; External form and fabric of early 1880s row of cottages. Key features include face bluestone or sandstone front walls, simple verandahs and cast iron bracketing. Later extensions are excluded.	a d	8207
52-58 Shipsters Road KENSINGTON PARK	Houses; Current external form and fabric of former ground floor of 1881 Kensington Hotel. Key features include original form of entrance to hotel, early timber joinery and face stone walls.	a c d e	8209
341 The Parade KENSINGTON PARK	House; External form and fabric of the 1870s sandstone Italianate villa. Key features include the design and face sandstone walling, rendered dressings, cast iron freize, decorative features, roof form and chimneys and unusual return verandah between the two projecting wings.	a d	8211
342 The Parade KENSINGTON PARK	House - Bills House; External form and fabric of 1890s two storey bluestone residence. Key features include substantial verandah areas, substantial encircling verandahs with cast iron trim to upper level and timber boarding to lower level, moulded rendered door and window surrounds and quoining, moulded chimneys, and projecting ground floor gable entrance porch with cast iron detailing.	a d e	8212
363 The Parade KENSINGTON PARK	House; External form and fabric of 1899 residence. Key features include expansive asymmetrical plan, detailed moulding to chimneys, window and doors surrounds and quoining, bull-nose verandah with drum entrance on eastern verandah end and pierced timber bargeboards.	a d	8214

379 The Parade KENSINGTON PARK	House; External form and fabric of circa 1930 single storey residence. Key features include face brick walls, projecting bays, steeply pitched roof and gable profiles, arched and detailed brick entrance to gabled porch, semi-circular window openings to upper gables and matching brick fence.	a d	8215
16 Toowong Avenue KENSINGTON PARK	Flats, former house - Seaton; External form and fabric of two storey 1883 stone mansion. Key features included moulded detailing to eaves and gables, triple windows to both levels of projecting front wing, encircling verandahs with rear sections, cast iron columns, and cast iron frieze, bracketing and balustrading.	a d	8216
1 Uxbridge Street KENSINGTON PARK	House; External form and fabric of 1882 symmetrically fronted residence. Key features include face bluestone walls, early concave verandah with original timber mouldings on posts and cast iron frieze and bracketing, and eaves brackets.	a d	8217
5,7,9 Uxbridge Street KENSINGTON PARK	Houses; External form and fabric of three 1883 single fronted residences. Key features include render detail to elevations, ornate pediments with scrolled consoles and projecting sculptured faces at either end of simple convex verandah form, and rendered masonry walls.	a d	8218
37-41 Uxbridge Street KENSINGTON PARK	Houses; External form and fabric of three 1883 attached dwellings. Key features include asymmetric plan, projecting front gable with pierced bargeboards, concave verandah to southern wing, sandstone (painted) walls, and cast iron bracketing to verandah.	a d	8219
3 Walsall Street KENSINGTON PARK	House; External form and fabric of circa 1894 Italianate villa. Key features include segmental projecting bay, ornate coving to eaves, cast iron verandah detailing and cresting on projecting bay, paired octagonal chimneys with terracotta chimney pots and sandstone walls.	a d	8220
56 Yeronga Avenue KENSINGTON PARK	House - Tarndamia; External form and fabric of 1900 residence. Key features include complicated roof form with projecting gables, encircling verandah with square columns, timber bracketing to gable ends, rough faced sandstone walls.	a d	8221
419 Glynburn Road LEABROOK	House - Dawley; External form and fabric of substantial 1905 gentlemen's residence. Key features include expansive terracotta tiled roof, projecting strapped gables, tiled verandah with paired column supports, semi-circular arched window element, central pitched dormer window, tall brick chimneys and brick walls.	a d e	8222
455 Glynburn Road LEABROOK	Knightsbridge Baptist Church; External form and fabric of 1884-5 church. Key features include arcaded front porch, two storey front elevation with blind arcading and attached pilasters, face bluestone walls with rendered detailing, balustraded parapet, and overall plan.	a c d f	8223
42 Godfrey Terrace LEABROOK	House; External form and fabric of 1911 single storey residence. Key features include face sandstone walls, rendered door and window dressings, and verandahs.	a d	8224
44 Godfrey Terrace LEABROOK	House; External form and fabric of 1940 two storey inter-war functionalist dwelling. Key features include face yellow brick walls, curved front wing, metal framed windows and terra cotta tiled roof. Also includes brick and iron fence.	a d	8225

252 Kensington Road LEABROOK	Former Marryatville Primary School; External form and fabric of original 1880s school building. Key features include steeply pitched gabled roof with tall gabled elevations and projecting gable wing to Kensington Road boundary, tall brick chimneys with moulded detailing, brick banding and quoining, and verandahs and other elements.	a c d f	8226
286 Kensington Road LEABROOK	Kensington Park Uniting Church - former Methodist Church; External form and fabric of 1904 church building. Key features include face random bluestone walls, simple render detailing to semi-circular windows and entrance door, attached square pilasters and pedimented front gable.	a c d f	8227
288 Kensington Road LEABROOK	House; External form and fabric of 1904 residence. Key features include Marseilles tiled roof, projecting gables with strapping and rough render end, rock face sandstone walls, conical corner tower with slate tiled roof, verandah timber and cast iron detailing.	a d	8228
22 Philip Avenue LEABROOK	House - former Police Station; External form and original fabric of 1884 residence. Key features include asymmetrical form and face sandstone walls.	a d	8233
24 Philip Avenue LEABROOK	House; External form and fabric of 1882 residence. Key features include asymmetrical plan with projecting bay and face sandstone walls.	a d	8234
28 Rochester Street LEABROOK	House; External form and fabric of 1896 residence. Key features include random bluestone walls, brick window and door dressings and chimneys, concave verandah and symmetrical form.	a d	8236
39 Rochester Street LEABROOK	House; External form and fabric of 1880s mansion. Key features include bluestone walling, projecting rendered bay, ornate rendered quoining, and ornate cast iron detailing to verandahs.	a d	8237
28 Statenborough Street LEABROOK	House - former School; External form and fabric of house and attached school room. Key features include masonry walls (rendered and face red brick), gable ended roof form and rendered chimneys. Later verandah detailing excluded.	a c e	8241
33 Statenborough Street LEABROOK	House and Tree; External form and fabric of 1883 residence. Key features include stone walls with rendered quoins and projecting bay window. Concave verandah with cast iron detail. Also includes Araucaria heterophylla (Norfolk Island Pine) tree approximately eight metres north of Statenborough Street and approximately six metres east of western boundary (fence).	a d	8242
47 Statenborough Street LEABROOK	House - Craighuie; External form and fabric of 1880s two storey mansion. Key features include bluestone and brick walls, rendered masonry fenestration, projecting wing with square bay to ground floor with balcony above, projecting timber detailing to top of bay with circular vent, two level side verandah with timber detailing and expansive plan.	a d e	8243
2-4 The Parkway LEABROOK	Attached Houses; Overall external form and fabric of attached pair of 1880-2 residences. Key features include faceted bay window with moulded pilaster form divisions, bluestone and masonry walls, verandah continuation across front of pair, and symmetrical elevation.	a d	8245

5 The Parkway LEABROOK	House; External form and fabric of 1883 residence. Key features include face stonework to side walls, rendered and painted front wall, timber joinery, rendered quoins and dressings, small projecting bay window and moulded chimneys.	a d	8246
6-8 The Parkway LEABROOK	Attached Houses; External form and fabric of attached pair of 1880-2 residences. Key features include faceted bay window with moulded pilaster form divisions, bluestone and masonry walls, verandah continuation across front of pair, and symmetrical elevation.	a d	8248
7 The Parkway LEABROOK	House; External form and fabric of 1883 residence. Key features include continuous verandah with timber dentil trim, projecting bay window with pilaster form divisions, and corrugated iron roof.	d e	8247
10-12 The Parkway LEABROOK	Attached Houses; External form and fabric of attached pair of 1880-2 residences. Key features include faceted bay window with moulded pilaster form divisions, bluestone and masonry walls, verandah continuation across front of pair, and symmetrical elevation.	a d	8249
14-16 The Parkway LEABROOK	Attached Houses; External form and fabric of attached pair of 1880-2 residences. Key features include faceted bay window with moulded pilaster form divisions, bluestone and masonry walls, verandah continuation across front of pair, and symmetrical elevation.	a d	8250
18-20 The Parkway LEABROOK	Attached Houses; External form and fabric of attached pair of 1880-2 residences. Key features include faceted bay window with moulded pilaster form divisions, bluestone and masonry walls, verandah continuation across front of pair, and symmetrical elevation.	a d	8251
26 Chapel Street MAGILL	Morialta Uniting Church; External form and fabric of 1875 and 1882 church building. Key features include face bluestone walls, painted rendered door and window dressings, corner buttresses and finials, semi-circular and pointed arched openings to all walls, and small projecting porches. Excludes 1963 extensions.	a c d f	8254
18 Ellis Street MAGILL	House; External form and original detailing of 1880s cottage. Key features include bluestone and brick front elevation and simple symmetrical form.	a d	8255
20 Ellis Street MAGILL	House; External form and fabric of 1880s symmetrically fronted residence. Key elements include bluestone walls, timber joinery, eaves brackets and current verandah form.	a d	8256
496 Magill Road MAGILL	The Bible Presbyterian Church; External form and fabric of 1866 chapel. Key features include pedimented gable end over front entrance porch, and pointed arch window and door openings. Later extensions are not included.	a c d	8258
558 Magill Road MAGILL	Magill Community Centre - former Magill Primary School; External form and fabric of 1880s former school building. Key features include face sandstone and brick elevations, brickwork to pointed arched detail in gable end, coping mouldings and timber porch. Later window hoods are not included.	a c	8260
7 Penfold Road MAGILL	House; External form and original fabric of 1860s corner section of building. Key features include low scale roof and early joinery. The attached shop is not included.	a d	8264

13 Penfold Road MAGILL	House; External form and original fabric of 1880 stone cottage. Key features include low scale and simple detailing and masonry walls which have been rendered.	a d	8265
38 Penfold Road MAGILL	Former Seaview Champagne Cellars; External form and fabric of former champagne cellars, now offices. Key features include random stone walls, triple gable elevation to Penfold Road, brick quoining and detailing, horizontal banding and square gable end vents.	a b d e f	8266
2 Pepper Street MAGILL	House; External form and original detailing of 1880s cottage. Key features include symmetrical frontage, and simple rendered quoining, window and door dressings. Later verandah is not included.	a d	8267
4 Pepper Street MAGILL	House; External form and original fabric of simple symmetrical fronted cottage. Key features include simple verandah form, masonry walls and low roof scale.	a d	8268
6 Pepper Street MAGILL	House; External form and fabric of symmetrical stone cottage. Key features include simple concave verandah, low scale masonry walls, painted quoining and door and window surrounds.	a d	8269
10 Pepper Street MAGILL	House; External form and fabric of 1882 residence. Key features include asymmetric plan with projecting wing, face bluestone front wall with detailed moulding, window dressings and quoining, circular gable vent, simple bargeboard and timber finial.	a d e	8270
11 Pepper Street MAGILL	House; External form and fabric of 1914 cottage. Key features include corrugated iron and pressed metal false stone cladding, simple pyramidal roof form, bull-nose verandah with timber trim.	a d	8271
24 Romalo Avenue MAGILL	House - Romalo; External form and fabric of residence including early sections and circa 1870s additions to front elevation of house. Key features include projecting entrance portico and eastern wing with fluted pilasters and balustraded pediment elements, cast iron detailing to concave verandahs, early window shutters and other details.	a b d e	8272
1 Rosedale Place MAGILL	House; External form and fabric of circa 1870s building including random face stone walls, brick quoining and door surrounds, brick chimneys and simple roof form.	a	8273
553 The Parade MAGILL	House; External form and fabric of circa 1890s residence. Key features include prominent face brick chimneys, random sandstone walls with brick dressings, bull-nose return verandah with cast iron trim, and projecting wing with timber detailed gable end.	a d e	8274
60 Mount Osmond Road MOUNT OSMOND	Mount Osmond Golf Club Building; External form and fabric of two storey 1930 club house. Key features include major gable wing with projecting balcony and canopy, return verandah with square concrete columns and balustrade, terracotta tiled roof, and simple detailing.	a c d e	8275
52, 52A & 54, Alexandra Avenue ROSE PARK	Rose Park Primary School; External form and fabric of 1893 school building. Key features include face red brickwork, brick detailed cropped gable ends, bluestone plinth and banding, timber joinery, roof gables and finials.	a c d	8276
138 Fullarton Road (cnr Hewitt Ave) ROSE PARK	House; External form and fabric of 1898 residence. Key features include face sandstone walls, rendered window and door surrounds, chimneys and quoins, eaves brackets, and bull-nose verandah with cast iron detailing.	a d e	8277

141 Fullarton Road ROSE PARK	House and Fence - Vasey; External form and fabric of 1899 residence. Key features include projecting wing with highly ornate window detailing incorporating classical pilasters, projecting gable end detail, projecting verandah gable over entrance door, cast iron detailing to bullnose verandah, masonry and cast iron fence and gate.	a d e	8278
75-77 Grant Avenue ROSE PARK	Attached Dwelling; External form and fabric of pair of 1912-13 attached houses. Key features include masonry and brick walls, high pitched roof with projecting party wall, timber verandah details and gables with goose neck finials.	a d	8279
29 Hewitt Avenue ROSE PARK	House; External form and fabric of 1900 residence. Key features include stone walls with rendered quoins and window and door dressings, bullnose verandah with cast iron detail, roof and verandah gables with timber barge boards and finials.	a d	8280
48 Hewitt Avenue ROSE PARK	House; External form and fabric of 1885 residence. Key features include stone walls with rendered quoins, return concave verandah with timber gable detail, timber shutters.	a d	8281
10-12 Kensington Road ROSE PARK	Shops; External form and fabric of 1926 row of shops. Key features include original shopfront details, tiled stallboards and dividing panels, projecting parapet with tiled pilasters and coping, and recessed entry doors.	a c d	8282
18 and 20 Kensington Road ROSE PARK	Offices - former Attached Houses and Fences; External form and fabric of 1884 former paired residences. Key features include paired projecting bay windows, central concave verandah with cast iron detailing, moulded elaboration to window dressings, doors, quoins and eaves brackets and chimneys, and masonry and cast iron front fences.	a d	8283
22 Kensington Road ROSE PARK	Consulting Rooms - former House; External form and fabric of 1897 former residence. Key features include face sandstone walls, rendered quoins, window & door dressings, chimneys, bull-nose verandah with cast iron detailing.	a d	8284
24 Kensington Road ROSE PARK	Offices - former House; External form and fabric of 1900 residence. Key features include face sandstone walls, moulded decorative dressing to front paired windows of projecting wing, timber detailing to gable end, and bull-nose verandah with cast iron and timber verandah elements.	a d	8285
26 Kensington Road ROSE PARK	Offices - former House and Fence; External form and fabric of 1898 residence. Key features include face sandstone walls, ornate mouldings above semi-circular paired windows to front projecting wing, timber details to gable end, projecting verandah gable over entrance door, convex verandah with cast iron details, and masonry and cast iron fence.	a d	8286
28 Kensington Road ROSE PARK	Consulting Rooms - former House and Fence; External form and fabric of circa 1885 former residence. Key features include symmetrical form, face bluestone front elevation, concave verandah with central projecting gable and elaborate cast iron detailing, rendered door and window surrounds and quoins, moulded rendered chimneys, and cast iron and masonry front fence.	a d	8287

32 Kensington Road ROSE PARK	Offices - former house; External form and fabric of circa 1890 residence. Key features include face bluestone walls with brick quoining and door and window surrounds, convex verandah with cast iron detailing, projecting gable within front elevation with inscribed render band and gable vent, cast iron triangular panelling in apex of gable, timber detailing to barge board, central gable section to verandah with cast iron and timber trim.	a d	8288
36 Kensington Road ROSE PARK	House and Shop; External form and fabric of 1885 two storey shop and residence. Key features include face bluestone walls, rendered and moulded quoins, window and door dressings, eaves brackets and chimneys, and linking return concave verandah with cast iron detail. Later suspended awning over shopfront is excluded.	a c d f	8289
46 Kensington Road ROSE PARK	Offices - former House; External form and fabric of circa 1900 residence. Key features include face sandstone walls, rendered quoins and door and window surrounds, corrugated iron roof with gable projections, return verandah with timber posts and fretwork, tall rendered chimneys with fluted details.	a d	8290
48 Kensington Road ROSE PARK	House; External form and fabric of circa 1880 residence. Key features include rendered walls and chimneys, concave verandah and simple detailing.	a d	8291
58 Kensington Road ROSE PARK	House; External form and fabric of 1897 two storey stone residence. Key features include face sandstone walls, painted brick quoins and window and door surrounds, projecting Oriole window to upper floor, concave return verandah, elaborate timber and rough cast detailing to gable ends.	a d	8292
60 Kensington Road ROSE PARK	Offices - former house; External form and fabric of 1897 two storey stone residence. Key features include face sandstone walls, painted brick quoins and window and door surrounds, projecting Oriole window to upper floor, concave return verandah, elaborate timber and rough cast detailing to gable ends.	a d	8293
62 Kensington Road ROSE PARK	Offices - former house; External form and original fabric of circa 1890 single storey residence. Key features include face sandstone walls, rendered quoins and window and door surrounds, elaborate detailing to three part window on front gable, strapped gable end and tall timber finial, and rendered chimneys.	a d	8294
64 Kensington Road ROSE PARK	Offices - former house; External form and original fabric of circa 1890 single storey residence. Key features include face sandstone walls, rendered quoins and window and door surrounds, elaborate detailing to three part window on front gable, strapped gable end, bull-nose verandah with timber posts, and rendered chimneys.	a d	8295
66 Kensington Road ROSE PARK	House; External form and fabric of circa 1890 residence. Key features include face sandstone walls, corrugated iron roof with projecting timber gable with gable end strapping and tall timber finial, bull-nose with timber posts and cast iron detail.	a d	8296

68 Kensington Road ROSE PARK	Consulting rooms - former house; External form and original fabric of circa 1890 single storey residence. Key features include face sandstone walls, rendered quoins and window and door surrounds, elaborate detailing to three part window on front gable, strapped gable end and tall timber finial, and bull-nose verandah with timber detailing.	a d	8297
70 Kensington Road ROSE PARK	Consulting rooms - former house; External form and original fabric of circa 1890 single storey residence. Key features include face sandstone walls, rendered quoins and window and door surrounds, elaborate detailing to three part window on front gable, strapped gable end, and bull-nose verandah with timber detailing.	a d	8298
72 Kensington Road ROSE PARK	Offices - former house; External form and fabric of circa 1890 residence. Key features include face sandstone walls, rendered quoins, window and door dressings, elaborate window hood to window and front projecting bay. Excludes later verandah.	a d	8299
74 Kensington Road ROSE PARK	Consulting rooms - former house; External form and fabric of circa 1890 residence. Key features include face sandstone walls, rendered quoins, window and door dressings, elaborate window hood to window and front projecting bay.	a d	8300
