Burnside

ADELAIDE
(CITY)

Note: This Concept Plan is indicative only. The final location of access points and the arrangement of land use areas may change as a result of detailed land division and urban design outcomes that achieve the desired character for the policy area.

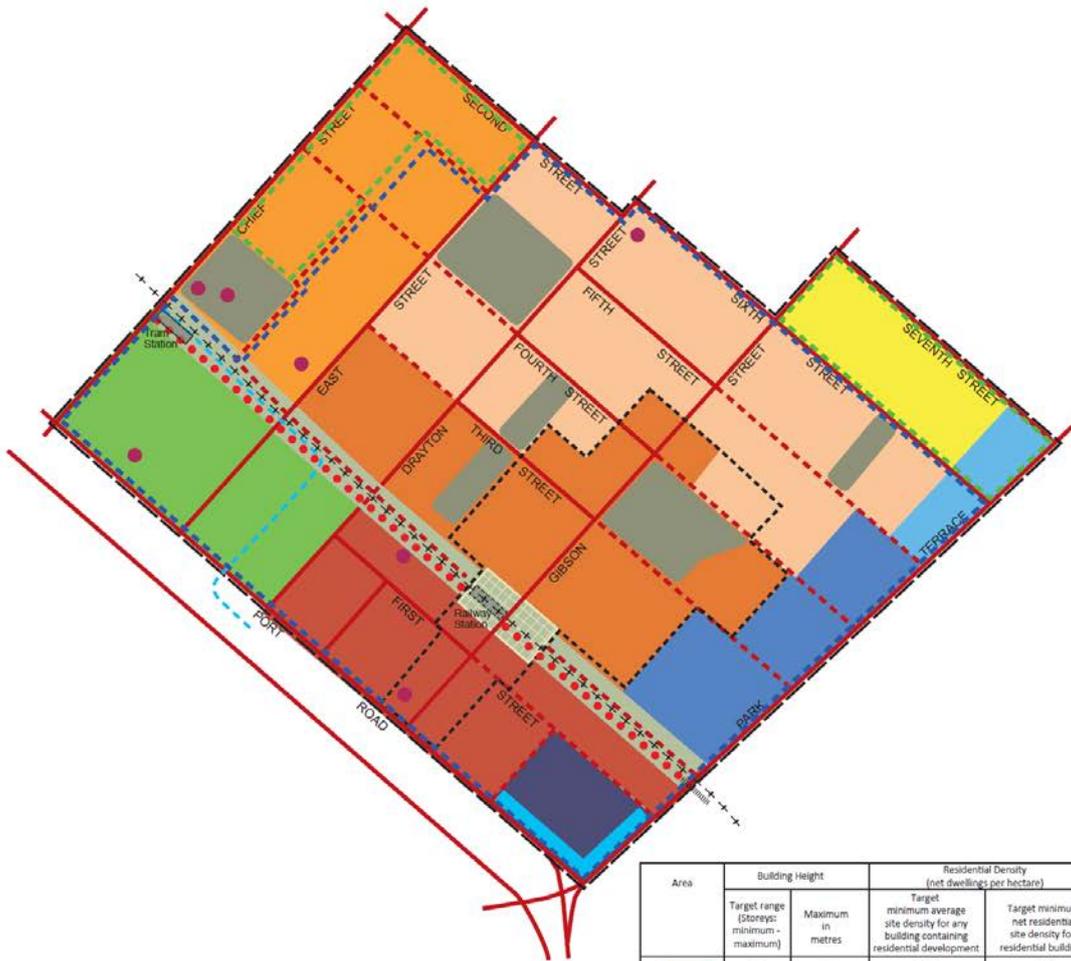

-  Open Space / Stormwater Management
-  Hospital
-  Arts
-  Residential
-  Secondary Access Point
-  Maximum 2 Storey Building Height
-  Development Plan Boundary

BURNSIDE (CITY) MIXED USE (GLENSIDE) ZONE POLICY AREA 1 CONCEPT PLAN Fig MU(G)/2

Notes:

Buildings up to six storeys in height are considered appropriate in the mixed use and arts areas shown on Concept Plan Fig MU(G)/2, with development in other parts of the Policy Area being of a lesser number of storeys.

- Core
- Transition
- Greenway and bike/pedestrian path
- Piazza
- Proposed Pedestrian/Bicycle Overpass
- State Heritage Place
- Landmark Site
- Open Space
- Urban Core Zone
- Main Street Precinct boundary
- Potential extension of Tram Way
- Future Tram Station
- Future Underground Railway Station
- Potential for undergrounding and realignment of rail line
- Road
- Proposed new street

Area	Building Height		Residential Density (net dwellings per hectare)	
	Target range (storeys: minimum - maximum)	Maximum in metres	Target minimum average site density for any building containing residential development	Target minimum net residential site density for residential buildings
	2 - 8	32.5	230	100
	3 - 4	16.5	90	60
	3 - 6	24.5	220	60
	3 - 10	40.5	260	130
	3 - 10	40.5	230	200
	4 - 6	24.5	220	150
	6 - 12	46.5	230	200
	6 - 12	48.5	270	220
	12 - 16	64.5	230	200

MINDA INCORPORATED BRIGHTON CAMPUS

HOLDFAST BAY COUNCIL

Minda Incorporated Brighton Campus

- 1 Shops located within the Minda Incorporated Brighton Campus should be of local scale, comprise a number of individual retail tenancies, not exceed in the order of 1500 square metres gross leasable floor area across the whole Campus and should primarily be located within the commercial area as identified on Concept Plan Map HoB/6 - Minda Incorporated Brighton Campus.
- 2 The existing vegetated buffer adjacent to the southern Campus site boundary should be retained to assist with the screening of new development and minimise overlooking from new development.
- 3 Maximum building heights should be in accordance with the following:

Designated Area	Maximum building height (metres)
'Foreshore Development Area' as identified on <u>Concept Plan Map HoB/6 - Minda Incorporated Brighton Campus</u>	9 storeys and no more than 32.5 metres
Balance of the site within the Institution Policy Area 4 as identified on <u>Concept Plan Map HoB/6 - Minda Incorporated Brighton Campus</u>	6 storeys and no more than 22 metres

- 4 Buildings within the foreshore development area (identified on Concept Plan Map HoB/6 - Minda Incorporated Brighton Campus) should be built at a variety of heights to create visual interest in the site as viewed from the foreshore and coast.
- 5 Public access over that foreshore land required to complete the Coast Park pathway should be provided in accordance with Concept Plan Map HoB/6 - Minda Incorporated Brighton Campus and should be provided concurrently with any early development of the Minda Brighton Campus Foreshore Development Area.
- 6 To minimise building massing at the interface with adjoining residential development (identified as interface areas on Concept Plan Map HoB/6 - Minda Incorporated Brighton Campus), building elements adjacent to the eastern, northern and southern Campus site boundaries above three storeys in height should be setback as follows:

Building height	Setback (metres)
4 th storey component of a development	21
5 th storey component of a development	27
6 th storey component of a development	33

- 7 Building elements adjacent to the **Coastal Conservation Zone** boundary and located south of the area identified as open space on Concept Plan Map HoB/6 - Minda Incorporated Brighton Campus should be setback 10 metres from the Coastal Conservation Zone boundary.
- 8 Development involving buildings above 4 storeys within the Foreshore Development Area identified within Concept Plan Map HoB/6 - Minda Incorporated Brighton Campus should be separated from one another by a minimum distance in the order of 25 metres when viewed from the west.

Concept Plan Map Lig/13 ROSEWORTHY TOWN EXPANSION

LIGHT REGIONAL COUNCIL

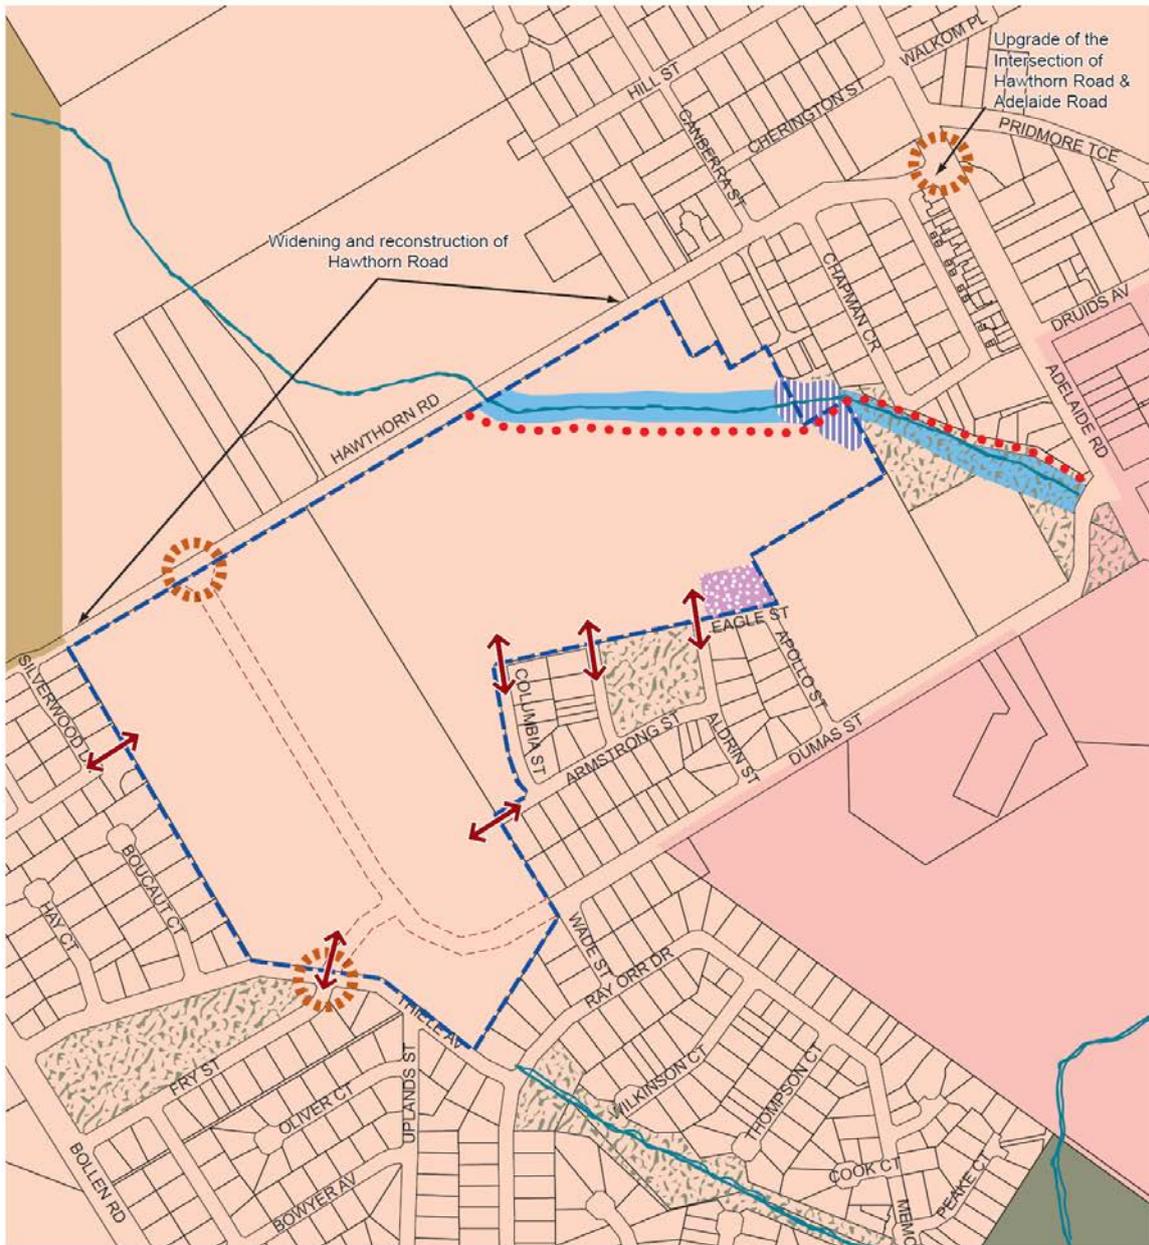

Those 'areas of interest' shown on Concept Plan Map L13/13 - Roseworthy Township Expansion are known to be potentially affected by land contaminating activities and therefore should not be developed unless the site has been assessed and remediated as necessary to ensure that it is suitable and safe for its proposed use. Notwithstanding these known 'areas of interest' it is acknowledged that there may be others as yet unidentified which will need a similar consideration.

Development should be in the order of 1 to 2 storeys except where located in or adjacent to a designated activity centre, or adjacent to public neighbourhood open space, as identified on Concept Plan Map L13/13 - Roseworthy Township Expansion where it should be up to 3 storeys.

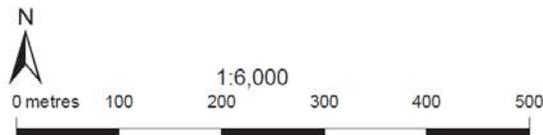

- 9 Land division should result in:
 - (a) allotments of between 300 square metres and 350 square metres adjacent to activity centres and public open space shown on Concept Plan Map L13/13 - Roseworthy Township Expansion
 - (b) allotments of 1000 square metres to 1500 square metres at the boundary interface of the zone with adjoining rural land
 - (c) allotments of 350 square metres to 1000 square metres in other circumstances.

- 10 Development, including land division, within the Roseworthy Town Expansion area should only occur once the infrastructure items identified for the area (or a specified part of the area) identified on Concept Plan Map L13/13 - Roseworthy Township Expansion are either provided, or a legally binding agreement has been executed for the provision of those infrastructure items, (or alternative infrastructure items that achieve the same outcome have been provided or a legally binding agreement has been executed for the provision of these alternative infrastructure items) for the construction of the following infrastructure:
 - (a) stormwater management systems
 - (b) wastewater management system
 - (c) road and intersection upgrades
 - (d) community / neighbourhood house
 - (e) community recreational facilities.

HAWTHORN ROAD SOUTH, MOUNT BARKER

Concept Plan Map MtB/1

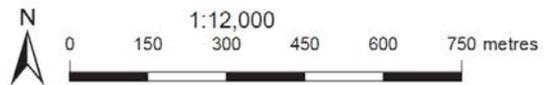

RESIDENTIAL

MOUNT BARKER COUNCIL

- 11 Development, including land division, in the 'Subject Area' as depicted on Concept Plan Map MtB/1 - Residential (Hawthorn Road South, Mount Barker) should not be undertaken until all of the following infrastructure works have been completed or legally binding arrangements for their completion are in place:
- (a) the upgrade of the intersection of Adelaide and Hawthorn Roads to a standard suitable for the anticipated traffic volumes
 - (b) the widening and reconstruction of Hawthorn Road, including a lighting upgrade and shared use path from the western edge of the 'Subject Area' to eastern edge of the 'Subject Area' to a standard suitable for the anticipated traffic volumes
 - (c) the installation of a roundabout that accommodates a creek crossing at the intersection of Fry Street and Thiele Avenue
 - (d) the installation of a sealed pedestrian and bicycle link between the 'Subject Area' and Adelaide Road and through the 'Subject Area' to Hawthorn Road
 - (e) the installation of a sealed pedestrian and bicycle link between the 'Subject Area' and Silverwood Drive
 - (f) the installation of a roundabout at the junction of Hawthorn Road and the proposed internal collector road
 - (g) the widening of Dumas Street from Wade Street to Apollo Street to include a footpath and koala crossing.

- ↔ Development of land to provide ability to interconnect with safe and convenient pedestrian and bicycle access achievable between all Residential land.

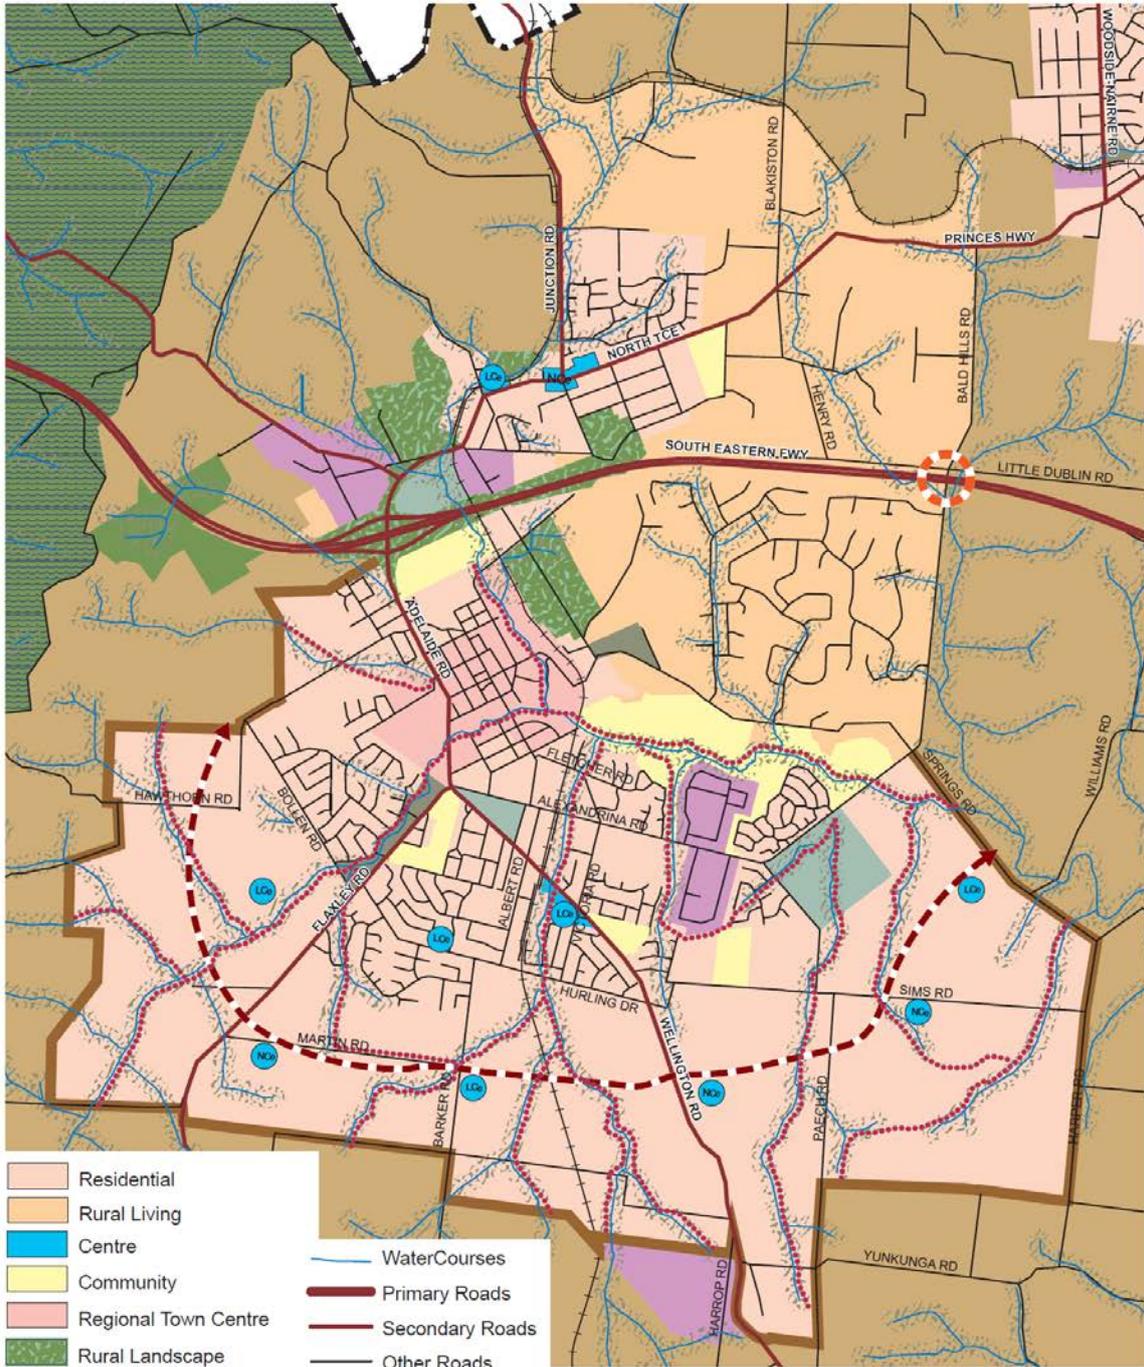

HURLING DRIVE, MOUNT BARKER

Concept Plan Map MtB/3

RESIDENTIAL

MOUNT BARKER COUNCIL

- 12 Development, including land division, in the 'Subject Area' as depicted on Concept Plan Map MtB/3 - Residential (Hurling Drive, Mount Barker) should not be undertaken until all of the following infrastructure works have been completed or legally binding arrangements for their completion are in place:
- (a) for Hurling Drive the following work is required:
 - (i) between Flaxley Road and Barker Road construct indented parking bays on both sides of Hurling Drive
 - (ii) between Victoria Road and Wellington Road lighting upgrade and shared use path.
 - (b) the installation of appropriate intersection treatments to a standard suitable for the anticipated traffic volumes at the following intersections:
 - (i) Albert Road and Wellington Road
 - (ii) Victoria Road and Wellington Road
 - (iii) Hurling Drive and Flaxley Road
 - (iv) Wellington Road and the south eastern corner of the 'Subject Area', including upgraded junction at new entrance to Wellington Road
 - (c) the installation of a sealed pedestrian and bicycle link between the 'Subject Area' and Separation Avenue Reserve

Part 6.4 Minimum Allotment Sizes

Minimum lot size for a residential flat building is 300 sqm
Minimum lot size for a group dwelling is 300 sqm
Minimum lot size is 81 sqm
Minimum lot size for a detached dwelling is 100 sqm; semi-detached dwelling is 100 sqm; row dwelling is 100 sqm; group dwelling is 100 sqm; residential flat building is 100 sqm
Minimum lot size is 120 sqm
Minimum lot size for a detached dwelling is 120 sqm; semi-detached dwelling is 120 sqm; row dwelling is 120 sqm; group dwelling is 120 sqm; residential flat building is 120 sqm
Minimum lot size is 150 sqm
Minimum lot size for a detached dwelling is 150 sqm; semi-detached dwelling is 150 sqm
Minimum lot size is 200 sqm
Minimum lot size is 250 sqm
Minimum lot size is 300 sqm
Minimum lot size for a detached dwelling is 300 sqm; semi-detached dwelling is 270 sqm; row dwelling is 200 sqm
Minimum lot size for a detached dwelling is 300 sqm; semi-detached dwelling is 300 sqm
Minimum lot size for a detached dwelling is 300 sqm; semi-detached dwelling is 300 sqm; group dwelling is 300 sqm
Minimum lot size for a detached dwelling is 300 sqm; semi-detached dwelling is 300 sqm; row dwelling is 200 sqm; group dwelling is 300 sqm; residential flat building is 300 sqm
Minimum lot size for a detached dwelling is 300 sqm; semi-detached dwelling is 300 sqm; row dwelling is 300 sqm; group dwelling is 300 sqm
Minimum lot size for a detached dwelling is 300 sqm; semi-detached dwelling is 300 sqm; row dwelling is 300 sqm; group dwelling is 300 sqm; residential flat building is 300 sqm
Minimum lot size is 350 sqm
Minimum lot size for a detached dwelling is 350 sqm; semi-detached dwelling is 300 sqm; row dwelling is 250 sqm
Minimum lot size for a detached dwelling is 350 sqm; semi-detached dwelling is 350 sqm; row dwelling is 350 sqm
Minimum lot size for a detached dwelling is 350 sqm; semi-detached dwelling is 350 sqm; row dwelling is 350 sqm; group dwelling is 350 sqm; residential flat building is 350 sqm
Minimum lot size for a detached dwelling is 350 sqm; semi-detached dwelling is 350 sqm; row dwelling is 450 sqm; group dwelling is 350 sqm; residential flat building is 350 sqm
Minimum lot size is 400 sqm
Minimum lot size for a detached dwelling is 400 sqm; semi-detached dwelling is 250 sqm; row dwelling is 350 sqm; group dwelling is 300 sqm; residential flat building is 300 sqm
Minimum lot size for a detached dwelling is 400 sqm; semi-detached dwelling is 400 sqm
Minimum lot size for a detached dwelling is 420 sqm; semi-detached dwelling is 375 sqm
Minimum lot size for a detached dwelling is 420 sqm; semi-detached dwelling is 420 sqm
Minimum lot size is 450 sqm
Minimum lot size for a detached dwelling is 450 sqm; semi-detached dwelling is 250 sqm; row dwelling is 250 sqm; group dwelling is 350 sqm; residential flat building is 250 sqm
Minimum lot size for a detached dwelling is 450 sqm; semi-detached dwelling is 270 sqm; row dwelling is 300 sqm; group dwelling is 250 sqm; residential flat building is 250 sqm
Minimum lot size for a detached dwelling is 450 sqm; semi-detached dwelling is 300 sqm; row dwelling is 250 sqm; group dwelling is 300 sqm; residential flat building is 300 sqm
Minimum lot size for a detached dwelling is 450 sqm; semi-detached dwelling is 300 sqm; row dwelling is 350 sqm; group dwelling is 300 sqm; residential flat building is 300 sqm

Minimum lot size for a detached dwelling is 750 sqm; semi-detached dwelling is 600 sqm
Minimum lot size for a detached dwelling is 750 sqm; semi-detached dwelling is 750 sqm; row dwelling is 750 sqm; group dwelling is 750 sqm; residential flat building is 750 sqm

Part 6.5 Minimum Allotment Frontage Sizes

Minimum Allotment Frontage
Minimum frontage for a residential flat building is 15m
Minimum frontage for a group dwelling is 15m
Minimum frontage for a detached dwelling is 10m
Minimum frontage for a detached dwelling is 10m; semi-detached dwelling is 10m; row dwelling is 10m; group dwelling is 10m; residential flat building is 10m
Minimum frontage for a detached dwelling is 10m; semi-detached dwelling is 9m; row dwelling is 7m
Minimum frontage for a detached dwelling is 10m; semi-detached dwelling is 9m; row dwelling is 6m; group dwelling is 10m; residential flat building is 10m
Minimum frontage for a detached dwelling is 11m; semi-detached dwelling is 11m; row dwelling is 8m
Minimum frontage for a detached dwelling is 12m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 10m; row dwelling is 8m; group dwelling is 12m; residential flat building is 12m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 10m; group dwelling is 20m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 10m; row dwelling is 7m; group dwelling is 25m; residential flat building is 25m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 12m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 12m; row dwelling is 12m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 12m; row dwelling is 12m; group dwelling is 12m; residential flat building is 12m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 8m; row dwelling is 8m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 9m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 9m; row dwelling is 18m; group dwelling is 18m; residential flat building is 18m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 9m; row dwelling is 7m; group dwelling is 20m; residential flat building is 20m
Minimum frontage for a detached dwelling is 12m; semi-detached dwelling is 9m; row dwelling is 7m; group dwelling is 6m; residential flat building is 6m
Minimum frontage for a detached dwelling is 13m; semi-detached dwelling is 10m; row dwelling is 7m; group dwelling is 18m; residential flat building is 18m
Minimum frontage for a detached dwelling is 14m
Minimum frontage for a detached dwelling is 14m; semi-detached dwelling is 10m; row dwelling is 7m; group dwelling is 18m; residential flat building is 18m
Minimum frontage for a detached dwelling is 14m; semi-detached dwelling is 12m
Minimum frontage for a detached dwelling is 14m; semi-detached dwelling is 12m; group dwelling is 14m

Minimum frontage for a detached dwelling is 15m; semi-detached dwelling is 9m; row dwelling is 8m; group dwelling is 18m; residential flat building is 8m
Minimum frontage for a detached dwelling is 15m; semi-detached dwelling is 9m; row dwelling is 9m; group dwelling is 20m; residential flat building is 20m
Minimum frontage for a detached dwelling is 17m; semi-detached dwelling is 8m; row dwelling is 8m; group dwelling is 18m
Minimum frontage for a detached dwelling is 18m
Minimum frontage for a detached dwelling is 18m; row dwelling is 7m; group dwelling is 24m; residential flat building is 15m
Minimum frontage for a detached dwelling is 18m; semi-detached dwelling is 12m; row dwelling is 10m; group dwelling is 24m; residential flat building is 20m
Minimum frontage for a detached dwelling is 18m; semi-detached dwelling is 15m; row dwelling is 10m; group dwelling is 20m
Minimum frontage for a detached dwelling is 18m; semi-detached dwelling is 18m
Minimum frontage for a detached dwelling is 20m
Minimum frontage for a detached dwelling is 20m; semi-detached dwelling is 18m
Minimum frontage for a detached dwelling is 21m
Minimum frontage for a detached dwelling is 23m
Minimum frontage for a detached dwelling is 24m; semi-detached dwelling is 24m
Minimum frontage for a detached dwelling is 25m
Minimum frontage for a detached dwelling is 25m; semi-detached dwelling is 20m; row dwelling is 20m; group dwelling is 20m; residential flat building is 20m
Minimum frontage for a detached dwelling is 30m
Minimum frontage for a detached dwelling is 40m
Minimum frontage for a detached dwelling is 5m; semi-detached dwelling is 5m; group dwelling is 5m
Minimum frontage for a detached dwelling is 50m
Minimum frontage for a detached dwelling is 6m; semi-detached dwelling is 6m; row dwelling is 6m; group dwelling is 6m
Minimum frontage for a detached dwelling is 6m; semi-detached dwelling is 6m; row dwelling is 6m; group dwelling is 6m; residential flat building is 6m
Minimum frontage for a detached dwelling is 85m
Minimum frontage for a detached dwelling is 9m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 7.5m; row dwelling is 7.5m; group dwelling is 14m; residential flat building is 14m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 8m; row dwelling is 8m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 9m; group dwelling is 15m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 9m; row dwelling is 15m; group dwelling is 15m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 9m; row dwelling is 7m; group dwelling is 15m; residential flat building is 15m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 9m; row dwelling is 6m; group dwelling is 18m; residential flat building is 18m

Bluff Beach - Minimum building site level 3.75m; Minimum building floor level 4m
Port Rickaby - Minimum building site level 3.8m; Minimum building floor level 4.05m

Part 7 – Land Use Definitions

Land Use Terms

The following table lists terms which may be used in this Planning and Design Code in relation to the use of land.

Meaning of Terms

A term listed in Column A has the meaning set out beside that term in Column B.

Inclusions and Exclusions

Land uses and activities set out in Column C are to be taken as being **included** in the meaning of the land use term set out in Column A.

Land uses and activities set out in Column D are to be taken as being **excluded** from the meaning of the land use term set out in Column A.

In the event of any inconsistency Column D prevails over Column C.

Ancillary and Subordinate

Unless stated to the contrary, a term set out in the following table which purports to define a form of land use will be taken to include a use which is ancillary and subordinate to that defined use.

No Definition

A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

Land Use Definitions Table LUD

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
Agricultural building	Means a building used wholly or partly for purposes associated with farming, commercial forestry or horticulture, or to support the operations of that use, but is not used wholly or partly for the processing or packaging of commodities.	Farm shed; Horticultural shed; Hay shed; Implement shed; Pump shed.	Dairy; Dwelling; Industry; Intensive animal husbandry; Office; Outbuilding; Shop.
Ancillary accommodation	Means accommodation that: (a) is located on the same allotment as an existing dwelling; (b) contains no more than 1 bedroom or room or area capable of being used as a bedroom; and (c) is subordinate to and shares the same utilities of the existing dwelling.		
Animal keeping	Means the boarding (short or long term), keeping, breeding or training of animals, except horses and/or commercially kept livestock.	Dog kennelling Catteries	Aquaculture; Farming; Horse keeping; Intensive animal husbandry; Low intensity animal husbandry.
Aquaculture	Has the same meaning as in the <i>Aquaculture Act 2001</i> .		Intensive animal husbandry.
Automotive collision repair	Means repairs to motor vehicles involving structural repairs, panel beating, replacement of vehicle body parts or spray painting.		Motor repair station
Bulky goods outlet	Means premises used primarily for the sale, rental, display or offer by retail of goods, other than foodstuffs, clothing, footwear or personal effects goods, unless the sale, rental, display or offer by retail of the foodstuffs, clothing, footwear or personal effects goods is incidental to the		

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	<p>sale, rental, display or offer by retail of other goods.</p> <p>Examples— The following are examples of goods that may be available or on display at bulky goods outlets:</p> <ul style="list-style-type: none"> (a) automotive parts and accessories; (b) furniture; (c) floor coverings; (d) window coverings; (e) appliances or electronic equipment; (f) home entertainment goods; (g) lighting and electric light fittings; (h) curtains and fabric; (i) bedding and manchester; (j) party supplies; (k) animal and pet supplies; (l) camping and outdoor recreation supplies; (m) hardware; (n) garden plants (primarily in an indoor setting); (o) office equipment and stationery supplies; (p) baby equipment and accessories; (q) sporting, fitness and recreational equipment and accessories; (r) homewares; (s) children's play equipment. 		
Caravan and tourist park	Means land used to provide short-term accommodation in caravans, recreational vehicles (RVs) cabins, tents		Residential park

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	and other similar demountable forms of shelter in a managed setting.		
Commercial forestry	Means the practice of planting, managing, and caring for forests that are to be harvested (or intended to be harvested) or used for commercial purposes (including through the commercial exploitation of the carbon absorption capacity of the forest).		
Consulting room	Means a building or part of a building (not being a hospital) used in the practice of a profession by a medical, veterinary or dental practitioner, or a practitioner in any curative science, in the provision of medical services, mental, moral or family guidance, but does not involve any overnight accommodation other than for animals that are recovering from treatment or in for observation as part of a veterinary practice.		
Cropping	Means propagating, cultivating and/or harvesting of grains, cereals, oilseeds, lupins, legumes, hops, hemp, hay, lucerne or other similar plants or plant products for commercial production.		Commercial forestry; Horticulture; Mushroom production.
Dairy	Means a building or part of a building used for all or any of the operations of commercial milk production (whether mechanical or otherwise) and includes a milking shed, milk room, wash room or engine room.		
Detached dwelling	Means a detached building comprising 1 dwelling on a site that is held exclusively with that dwelling and has a		

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	frontage to a public road, or to a road proposed in a plan of land division that is the subject of a current development authorisation.		
Dwelling	Means a building or part of a building used as a self-contained residence.		
Educational establishment	Means a primary school, secondary school, reception to year 12 school, college, university or technical institute, and includes an associated pre-school or institution for the care and maintenance of children.		
Electricity substation	<p>Means—</p> <p>(a) works for the conversion, transformation or control of electricity by 1 or more transformers, or by any switchgear or other equipment; or</p> <p>(b) any equipment, building, structure or other works ancillary to or associated with works referred to in paragraph (a), other than any such works—</p> <p>(i) that are mounted on a pole; or</p> <p>(ii) that are wholly enclosed in a weather-proof enclosure not exceeding 8.5m³; or</p> <p>(iii) that are incidental to any lawful use of the land which the works are situated.</p>		
Farming	Means cropping, grazing or low intensity animal husbandry.	Cropping; Grazing;	Animal keeping; Commercial forestry; Horse keeping;

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
		Low intensity animal husbandry.	Horticulture; Intensive animal husbandry; Mushroom production.
Fuel depot	Means land used primarily for the storage of petrol, gas, oils or other petroleum products and within or upon which no retail trade is conducted.		
General industry	Means any industry other than a light industry or special industry.		
Group dwelling	Means 1 of a group of 2 or more detached buildings, each of which is used as a dwelling and 1 or more of which has a site without a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current development authorisation.		
Horse keeping	Means the keeping or husbandry of horses where more than 1 horse is kept per 3ha of land used for such purposes.		
Horticulture	Means the use of land for market gardening, viticulture, floriculture, orchards, wholesale plant nurseries or commercial turf growing.		Commercial forestry; Mushroom production.
Hotel	Means premises licensed, or proposed to be licensed, as a hotel under the <i>Liquor Licensing Act 1997</i> .		
Indoor recreation facility	Means a building designed or adapted primarily for recreation or fitness pursuits.	Bowling alley; Squash courts; Fitness centre; Gymnasium; Pilates Studio; Yoga Studio; Dance studio; Indoor swimming centre;	

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
		Indoor trampoline centre; Indoor rock climbing centre; Indoor children's play centre.	
Industry	<p>Means the carrying on, in the course of a trade or business, of any process (other than a process in the course of farming or mining) for, or incidental to:</p> <p>(a) the making of any article, ship or vessel, or of part of any article, ship or vessel; or</p> <p>(b) the altering, repairing, ornamenting, finishing, assembling, cleaning, washing, packing, bottling, canning or adapting for sale, or the breaking up or demolition, of any article, ship or vessel; or</p> <p>(c) the getting, dressing or treatment of materials</p> <p>The use may include:</p> <p>(d) selling by wholesale of goods manufactured on site</p> <p>(e) selling by retail of goods manufactured on site provided the total floor area occupied for such sale does not exceed 250 square metres</p> <p>(and industrial will be construed accordingly).</p>	General industry; Light industry; Special industry.	
Intensive animal husbandry	Means the commercial production of animals or animal products where the animals are kept in enclosures or other confinement and their main	Broiler shed; Feedlot; Poultry hatchery; Piggery; Poultry battery.	Animal keeping; Apiculture; Aquaculture; Horse keeping;

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	food source is introduced from outside the enclosures or area of confinement in which they are kept.		Low intensity animal husbandry; Stock sales yard.
Landfill	Land used for the receipt and controlled disposal of refuse through burial and/or spreading over land.		
Light industry	<p>Means an industry where the process carried on, the materials and machinery used, the transport of materials, goods or commodities to and from the land on or in which (wholly or in part) the industry is conducted and the scale of the industry does not:</p> <p>(a) detrimentally affect the amenity of the locality or the amenity within the vicinity of the locality by reason of the establishment or the bulk of any building or structure, the emission of noise, vibration, smell, fumes, smoke, vapour, steam, soot, ash, dust, waste water, waste products, grit, oil, spilled light, or otherwise howsoever; or</p> <p>(b) directly or indirectly, cause dangerous or congested traffic conditions in any nearby road.</p>		
Low intensity animal husbandry	Means the commercial production of animals or animal products (eg meat, wool) on either native or improved pastures or vegetation where the animal's main food source is obtained by grazing or foraging.	Grazing;	Animal keeping; Aquaculture; Horse keeping; Intensive animal husbandry.

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
Motor repair station	Means any land or building used for carrying out repairs (other than panel beating or spray painting) to motor vehicles and / or farm machinery.		Automotive collision repair
Mushroom production	Means the commercial production of mushrooms or any other type of fungi.		
Office	Means any building used for administration or the practice of a profession.		Consulting room.
Organic waste processing facility	Means the commercial processing of organic waste by composing, mulching, shredding, grinding or similar process into organic material for use as mulch, soil improver, growing medium or the like.		
Outbuilding	Means a non-habitable detached building on the same site as a main building which is ancillary and subordinate to the main building and has a use and function which relates to the main building.		Private bushfire shelter.
Personal or domestic services establishment	<p>Means premises used for the provision of services catering to the personal or domestic needs of customers:</p> <p>Examples— The following are examples of services that may be available at personal and domestic services establishments</p> <ul style="list-style-type: none"> (a) clothing repair and alterations; (b) cutting, trimming and styling hair; (c) domestic pet grooming; (d) manicures and pedicures; 		Consulting room; Office; Financial institute.

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	(e) non-surgical cosmetic treatments; (f) personal care treatments; (g) self-service clothes laundering; (h) shoe repair; (i) watch repair.		
Place of worship	Means premises used by an organised group for worship and religious activities. The use may include facilities for social, educational and charitable activities associated with the congregation.	Chapel; Church; Mosque; Synagogue; Temple.	Funeral parlour.
Pre-school	Means a place primarily for the care or instruction of children of less than primary school age not resident on the site.	Child care centre; Early learning centre; Kindergarten; Nursery.	
Protective tree netting structure	Means netting and any associated structure: (a) that is designed to protect trees or plants grown for the purpose of commercial horticulture; and (b) that consists of a netting canopy attached to a structure (such as poles and cables).		
Public service depot	Means land used for storage and operations connected with the provision of public services (including gas, electricity, water supply, sewerage, drainage, roadworks or telecommunication services) by a body responsible for the provision of those services.		
Recreation area	Means any park, garden, children's playground or sports ground that is under the care, control and	Outdoor public sports courts; Public ovals and fields.	Golf course.

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	management of the Crown, or a council, and is open to the public without payment of a charge.		
Renewable energy facility	<p>Means land and/or water used to generate electricity from a renewable source such as wind, solar, tidal, hydropower, biomass and/or geothermal.</p> <p>This use may also include:</p> <p>(a) any associated facility for the storage and/or transmission of the generated electricity;</p> <p>(b) any building or structure used in connection with the generation of electricity.</p> <p>The use does not include a renewable energy facility principally used to supply and/or store electricity to an existing use of land that has a generating capacity less than 5MW (e.g., domestic solar panels, domestic wind generators, domestic battery storage).</p>	<p>Battery storage facility;</p> <p>Hydropower or pumped hydropower facility;</p> <p>Solar power facility;</p> <p>Wave power generator;</p> <p>Wind farm.</p>	
Residential flat building	Means a single building in which there are 2 or more dwellings.		Group dwelling; Row dwelling; Semi-detached dwelling;
Residential park	Means a residential park operating under the regulatory framework of the <i>Residential Parks Act 2007</i> .		Caravan and tourist park;
Restaurant	Means land used primarily for the consumption of meals on the site.		
Retail fuel outlet	<p>Means land used for:</p> <p>(a) the fuelling of motor vehicles involving the sale by retail of petrol, oil, liquid petroleum</p>		Fuel depot; Motor repair station.

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	<p>gas, automotive distillate and any other fuels; and</p> <p>(b) the sale by retail of food, drinks and other convenience goods for consumption on or off the land; and</p> <p>both are operated as and constitute one integrated facility where on-site facilities, systems and processes, car parking and access and egress are all shared.</p> <p>The use may also include one or more of the following secondary activities:</p> <p>(c) the washing and cleaning of motor vehicles;</p> <p>(d) the washing of other equipment or things including dogs and other pets;</p> <p>(e) the provision (on a paid or free basis) of facilities for charging electric vehicles;</p> <p>(f) the hiring of trailers;</p> <p>(g) selling of motor vehicle accessories and/or parts; and</p> <p>(h) the installation of motor vehicle accessories and/or parts.</p>		
Retirement facility	Means a facility operating under the regulatory framework of the <i>Retirement Villages Act 2016</i> .		
Row dwelling	<p>Means a dwelling:</p> <p>(a) occupying a site that is held exclusively with that dwelling and has a frontage to a public road or to a road proposed in a plan of</p>		

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	<p>land division that is the subject of a current development authorisation; and</p> <p>(b) comprising 1 of 3 or more dwellings erected side by side, joined together and forming, by themselves, a single building.</p>		
Semi-detached dwelling	<p>Means a dwelling:</p> <p>(a) occupying a site that is held exclusively with that dwelling and has a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current planning authorisation; and</p> <p>(b) comprising 1 of 2 dwellings erected side by side, joined together and forming, by themselves, a single building.</p>		
Service trade premises	<p>Means premises used primarily for the sale, rental or display of:</p> <p>(a) basic plant, equipment or machinery used in agriculture or industry; or</p> <p>(b) boats; or</p> <p>(c) caravans and recreational vehicles (RVs); or</p> <p>(d) domestic garages; or</p> <p>(e) sheds; or</p> <p>(f) outbuildings; or</p> <p>(g) motor vehicles; or</p> <p>(h) marquees; or</p> <p>(i) trailers; or</p>	Motor vehicle showroom; Used car yard.	Bulky goods outlet.

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	<p>(j) swimming pools, equipment and accessories; or</p> <p>(k) building materials in bulk supply; or</p> <p>(l) landscaping materials; or</p> <p>(m) garden plants (primarily in an outdoor setting), or</p> <p>(n) agricultural supplies such as agricultural chemicals, fertilisers, seed and animal feed; or</p> <p>(o) rainwater tanks and irrigation supplies;</p> <p>or similar articles or merchandise.</p> <p>The use may also include the servicing and repair of any of the listed items (but not vehicle panel beating or spray painting).</p>		
Shop	<p>Means:</p> <p>(a) premises used primarily for the sale by retail, rental or display of goods, foodstuffs, merchandise or materials; or</p> <p>(b) a personal or domestic services establishment.</p>	<p>Bulky goods outlet;</p> <p>Personal or domestic services establishment;</p> <p>Restaurant.</p>	<p>Hotel;</p> <p>Motor repair station;</p> <p>Retail fuel outlet;</p> <p>Service trade premises;</p> <p>Wholesale plant nursery.</p>
Special industry	<p>Means an industry where the processes carried on, the methods of manufacture adopted or the particular materials or goods used, produced or stored, are likely:</p> <p>(a) to cause or create dust, fumes, vapours, smells or gases; or</p>		

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	<p>(b) to discharge foul liquid or blood or other substance or impurities liable to become foul, and thereby:</p> <p>(c) to endanger, injure or detrimentally affect the life, health or property of any person (other than any person employed or engaged in the industry); or</p> <p>(d) to produce conditions which are, or may become, offensive or repugnant to the occupiers or users of land in the locality of or within the vicinity of the locality of the land on which (whether wholly or partly) the industry is conducted.</p>		
Stock slaughter works	<p>Means a building or part of a building, or land, used primarily for slaughter of stock (including camels, goats and deer) or poultry,</p> <p>This use may also include:</p> <p>(a) the keeping of animals prior to slaughter on site</p> <p>(b) processing of animal products for human or animal consumption.</p>		Retail butcher.
Stock sales yard	<p>Means land or premises used for the commercial conduct of buying and selling of livestock.</p>		Stock slaughter works.
Store	<p>Means a building or enclosed land used for the storage of goods, and within or upon which no trade (whether wholesale or retail) or industry is carried on.</p>		Junk yard; Outbuilding; Public service depot.
Student accommodation	<p>Mean premises used to accommodate students in</p>		Dwelling;

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	<p>room or dormitory style accommodation that is not self-contained and that includes common facilities for shared use by student occupants such as:</p> <p>(a) shared cooking facilities and/or the provision of meals;</p> <p>(b) common rooms and recreation areas;</p> <p>(c) shared laundry facilities or a laundry service; or</p> <p>(d) shared bathroom facilities.</p>		Residential flat building.
Supported accommodation	Means premises in which residential accommodation is provided to persons requiring/together with regular medical and/or personal care assistance.		Hospital; Retirement facility.
Telecommunications facility	Means a facility within the meaning of the <i>Telecommunications Act 1997</i> of the Commonwealth.		
Tourist accommodation	Means premises in which temporary or short-term accommodation is provided to travellers on a commercial basis.		
Warehouse	Means a building or enclosed land used for the storage of goods and the carrying out of commercial transactions involving the sale of such goods, but does not include any land or building used for sale by retail.		Store.
Wind farm	<p>Means land used to generate electricity from wind force with wind turbine generators. This use may also include:</p> <p>(a) any associated facility for the storage and/or</p>		

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
	<p>transmission of the generated electricity;</p> <p>(b) any building or structure used in connection with the generation of electricity including a wind turbine, substation, maintenance shed, access road or wind monitoring mast.</p> <p>The use does not include a wind farm principally used to supply and/or store electricity to an existing use of land (e.g., domestic wind generator).</p>		
Workers' accommodation	<p>Means premises used to accommodate workers on a temporary basis while they carry out employment:</p> <p>(a) on the same site as the workers' accommodation;</p> <p>(b) in mining or petroleum extraction;</p> <p>(c) in seasonally intensive rural activities such as fruit picking, pruning, animal shearing, meat processing or similar; or</p> <p>(d) in road and/or railway infrastructure construction.</p>	<p>Mining camp;</p> <p>Road workers camp;</p> <p>Shearing quarters;</p> <p>Railway workers camp;</p>	<p>Tourist accommodation.</p>

Part 8 – Administrative Definitions

The following table lists terms which may be used to assist with the interpretation of policy used in the Planning and Design Code.

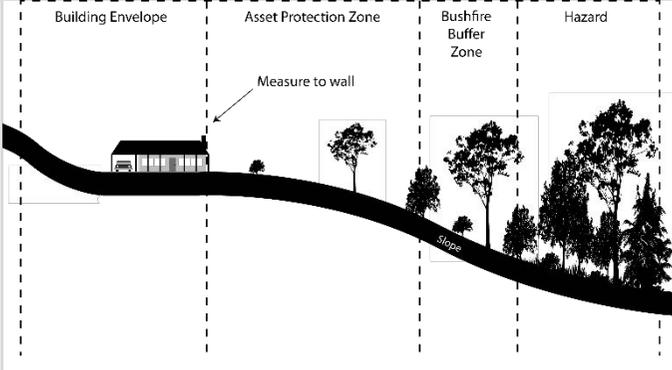

Meaning of Terms

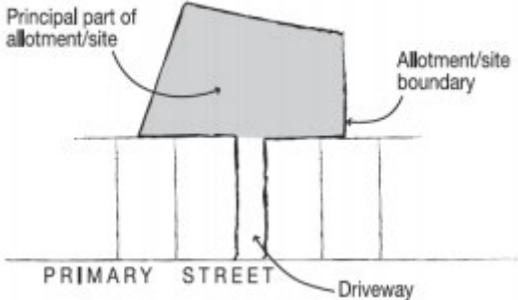

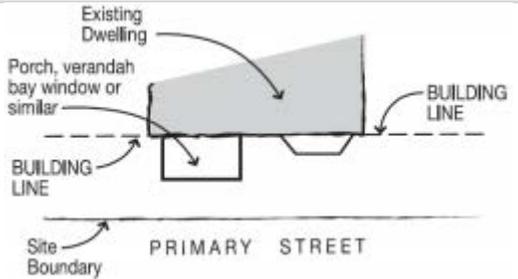

A term listed in Column A has the meaning set out beside that term in Column B. Column C contains, where applicable, illustrations to assist with the interpretation of the meaning provided in Column B.

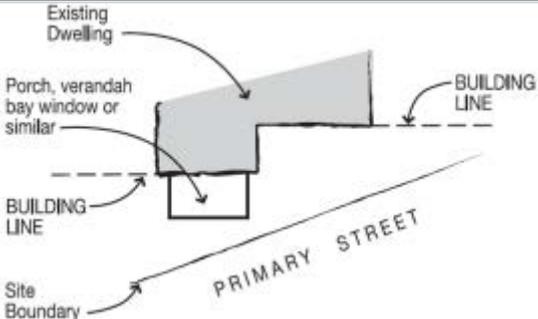

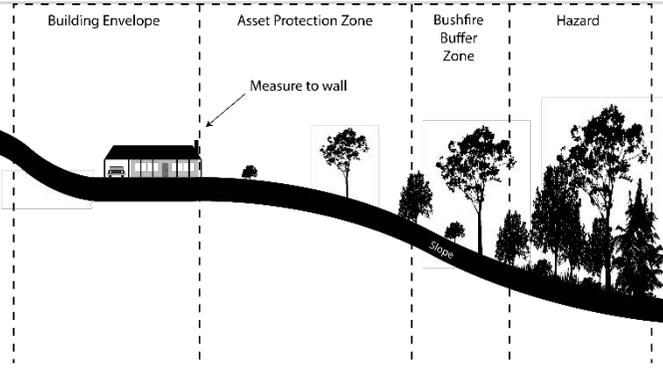

No Definition

A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

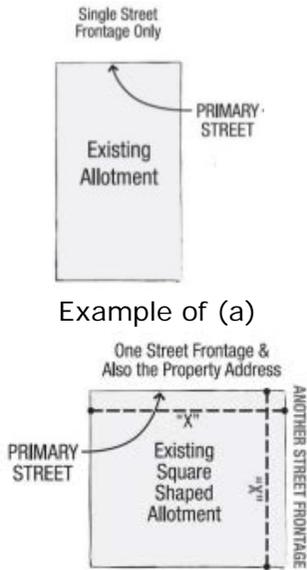

Administrative Definitions Table

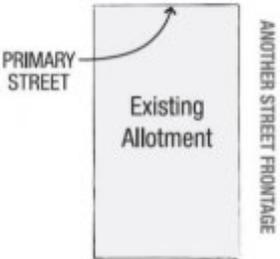

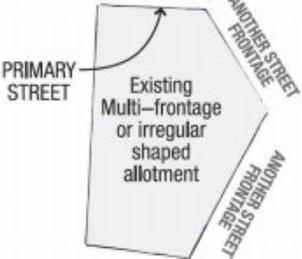

Term (Column A)	Definition (Column B)	Illustrations (Column C)
AEP	Means annual exceedance probability	
AHD	Means Australian height datum.	
Asset protection zone	<p>In relation to bushfire protection, means an area generally clear of vegetation that is maintained to minimise the spread of fire between areas of hazardous vegetation and habitable buildings.</p> <p>Asset protection zones may incorporate features such as driveways, vegetable gardens or landscaped gardens incorporating deciduous trees and fire retardant plant species.</p>	

Term (Column A)	Definition (Column B)	Illustrations (Column C)
Battle-axe allotment	<p>Means an allotment or site that comprises—</p> <p>(a) a driveway or 'handle' (and any related open space) that leads back from a road to the balance of the allotment or site; and</p> <p>(b) a balance of the allotment or site that is the principal part of the allotment or site and that does not have a boundary with a road.</p>	 <p><i>Note: Battle-axe allotments are often referred to as 'hammerhead' or 'flagpole' allotments.</i></p>
Building height	<p>Means the maximum vertical distance between the lower of the natural or finished ground level at any point of any part of a building and the finished roof height at its highest point, ignoring any antenna, aerial, chimney, flagpole or the like.</p>	
Building level	<p>Means that portion of a building which is situated between the top of any floor and the top of the next floor above it, and if there is no floor above it, that portion between the top of the floor and the ceiling above it. It does not include a floor located 1.5 metres below finished ground level or any mezzanine.</p>	
Building line	<p>In relation to a building on a site, means a line drawn parallel to the wall on the building closest to the boundary of the site that faces the primary street (and any existing projection from the building such as a carport, verandah, porch or bay window is not to be taken to form part of the building for the purposes of determining the relevant wall of the building).</p>	

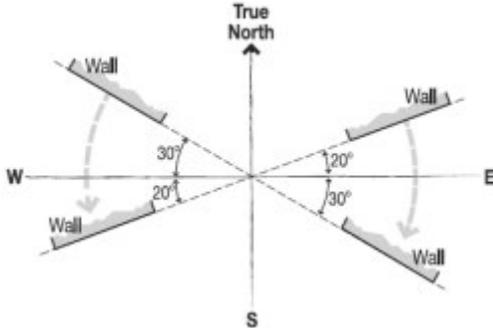

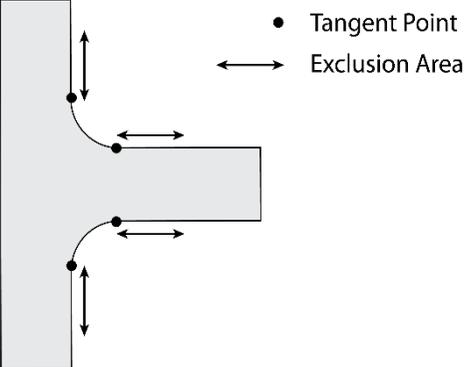

Term (Column A)	Definition (Column B)	Illustrations (Column C)
		 <p>The diagram illustrates a building footprint on a site. Labels include: 'Existing Dwelling' pointing to the main structure; 'Porch, verandah bay window or similar' pointing to an extension; 'BUILDING LINE' shown as a dashed line along the building's perimeter; 'Site Boundary' shown as a dashed line around the entire site; and 'PRIMARY STREET' shown as a diagonal line at the bottom of the site.</p>
Bushfire buffer zone	In relation to bushfire protection, means an area of land designed to isolate residential allotments from areas that pose a bushfire risk such as areas with rugged terrain or hazardous vegetation.	 <p>This cross-sectional diagram shows a building on a slope. From left to right, it identifies: 'Building Envelope' (the building itself); 'Asset Protection Zone' (the area immediately surrounding the building); 'Bushfire Buffer Zone' (a larger area containing trees and vegetation); and 'Hazard' (the area beyond the buffer zone). A 'Measure to wall' is indicated between the building and the asset protection zone. The 'Slope' of the ground is also labeled.</p>
Defence aviation area	Has the same meaning as in the <i>Defence Act 1903</i> of the Commonwealth.	
Density	In relation to residential development, means the number of dwelling units in a given area. It is calculated by dividing the total number of dwellings by the area of residential land that they occupy (excluding other land uses, roads, public open space, and services).	
FFL	Means finished floor level.	
Gross leasable floor area	Means the total floor area of a building excluding public or common tenancy areas such as malls, hallways, verandahs,	

Term (Column A)	Definition (Column B)	Illustrations (Column C)
	public or shared tenancy toilets, common storage areas and loading docks.	
Groundwater	Means water that is naturally contained beneath the surface of the ground.	
Habitable room	Means any room used for domestic purposes other than a bathroom, laundry, toilet, pantry, walk-in wardrobe, corridor, stair, hallway, lobby, clothes drying room or other space of a specialised nature occupied neither frequently nor for extended periods.	
Heritage agreement	In relation to State Heritage, is an agreement that is registered under section 34 of the <i>Heritage Places Act 1993</i> .	
High-density	Means greater than 70 dwelling units per hectare.	
High-rise	In relation to development, means 7 building levels and above.	
Hours of operation	Means the hours that a land use is open to the public or conducting activities related to the land use, not including administration or routine activities normally associated with opening and closing or start up and shut down.	
Low-density	Means less than 35 dwelling units per hectare.	
Low rise	In relation to development, means up to and including 2 building levels.	
Medium-density	Means 35 to 70 dwelling units per hectare.	
Medium-rise	In relation to development, means 3 to 6 building levels.	
Mezzanine	Means an intermediate floor within a building between building levels that is open to the floor below and does not extend over the whole floor space.	
Native vegetation	Has the same meaning as in the <i>Native Vegetation Act 1991</i> .	

Term (Column A)	Definition (Column B)	Illustrations (Column C)
Neighbourhood zone	Means any of the following: City Living Zone Residential Neighbourhood Zone Residential Parks Zone Rural Living Zone Suburban Neighbourhood Zone Suburban Neighbourhood (Medium Density) Zone Suburban Neighbourhood (Low Density) Zone Suburban Neighbourhood (Master-planned) Zone Suburban Neighbourhood (Greenfield) Zone Urban Renewal Zone	
Non-sensitive use	Means use of land other than sensitive use	
Power system	Has the same meaning as in the <i>Electricity Act 1996</i> .	
Primary street	In relation to an existing or proposed building on a site is— (a) in the case of a site that has a frontage to only 1 road – that road; (b) in the case of a site that has a frontage to 2 roads— (i) if the frontages are identical in length – the road that forms part of the street address of the building, as determined by the council for the relevant area when it is allocating numbers to building and allotments under section 220 of the <i>Local Government Act 1999</i> ; or (ii) in any other case, the road in relation to which the site has a shorter frontage; or (c) in any other case, the road that forms part of the street address of the building, as determined by the council for the relevant area when it is allocated numbers to buildings and allotments under section 220 of the <i>Local Government Act 1999</i> .	 <p>Single Street Frontage Only</p> <p>Existing Allotment</p> <p>PRIMARY STREET</p> <p>Example of (a)</p> <p>One Street Frontage & Also the Property Address</p> <p>Existing Square Shaped Allotment</p> <p>PRIMARY STREET</p> <p>ANOTHER STREET FRONTAGE</p> <p>Example of (b)(i)</p>

Term (Column A)	Definition (Column B)	Illustrations (Column C)
		<p data-bbox="1653 284 1749 323">One Street Frontage Only</p>  <p data-bbox="1552 395 1608 435">PRIMARY STREET</p> <p data-bbox="1653 443 1742 499">Existing Allotment</p> <p data-bbox="1787 363 1814 579">ANOTHER STREET FRONTAGE</p> <p data-bbox="1552 619 1794 651">Example of (b)(ii)</p> <p data-bbox="1608 667 1742 730">Street Frontage Matching the Property Address</p>  <p data-bbox="1523 794 1601 834">PRIMARY STREET</p> <p data-bbox="1624 802 1758 914">Existing Multi-frontage or irregular shaped allotment</p> <p data-bbox="1742 730 1825 834">ANOTHER STREET FRONTAGE</p> <p data-bbox="1742 882 1825 994">ANOTHER STREET FRONTAGE</p> <p data-bbox="1574 1010 1771 1042">Example of (c)</p>
Private open space	<p data-bbox="490 1066 1234 1098">Means an outdoor area associated with a dwelling that:</p> <ul style="list-style-type: none"> <li data-bbox="490 1118 1205 1177">(a) is for the exclusive use of the occupants of that dwelling; <li data-bbox="490 1198 1182 1230">(b) has a minimum dimension of 1.8 metres; and <li data-bbox="490 1251 842 1283">(c) is not fully enclosed. <p data-bbox="490 1299 1323 1394">Private open space may include balconies, terraces, decks and areas between the dwelling and side boundaries but does not include areas used for bin storage, laundry drying,</p>	

Term (Column A)	Definition (Column B)	Illustrations (Column C)
	rainwater tanks, utilities, driveways and vehicle parking areas.	
Proclaimed shipwreck	Means— (a) a historic shipwreck or historic relic within the meaning of the <i>Historic Shipwrecks Act 1981</i> ; or (b) a historic shipwreck or historic relic within the meaning of the <i>Historic Shipwrecks Act 1976</i> (Commonwealth).	
Secondary street	In relation to a building is any road, other than the primary street, that shares a boundary with the allotment on which the building is situated (or to be situated).	
Sensitive receiver	Means: (a) any use for residential purposes or land zoned primarily for residential purposes; (b) pre-school; (c) educational establishment; (d) hospital; (e) supported accommodation; (f) tourist accommodation.	
Sensitive use	Has the same meaning as in the <i>Environment Protection Act 1993</i> .	
Site	Means the area of land (whether or not comprising a separate or entire allotment) on which a building is built, or proposed to be built, including the curtilage of the building, or in the case of a building comprising more than 1 separate occupancy, the area of land (whether or not comprising a separate or entire allotment) on which each occupancy is built, or proposed to be built, together with its curtilage.	
Soft-landscaping	Means landscaped areas that are pervious and capable of supporting the growth of plant species. It does not include	

Term (Column A)	Definition (Column B)	Illustrations (Column C)
	any form of pervious paving or paved/hardstand areas used for pedestrian and/or vehicle movement.	
South	Means—true south.	
South facing	In relation to building orientation, a side wall is south facing if the wall is orientated anywhere between E20°N/W20°S and E30°S/W30°N.	 <p data-bbox="1467 766 1870 798">Example of south facing walls.</p>
Standard sea flood risk level	Means the 1% AEP sea flood level (tide, stormwater and associated wave effects combined), plus an allowance to accommodate 100 years of land subsidence.	
Tangent point	Means the end point of a road's curve at the point of intersection.	
Terrace arrangement	Means a group of 3 or more detached dwellings erected side by side and abutting each other but not joined by way of a party wall or party walls.	

Term (Column A)	Definition (Column B)	Illustrations (Column C)
Total floor area	Means the sum of the superficies of horizontal sections of a building or other roofed area made at the level of each floor, inclusive of all roofed areas and of the external walls and of such portions of any party walls as belong to the building.	
Wall height	Means the height of the wall measured from the top of its footings but excluding any part of the wall that is concealed behind an eave or similar roof structure and not visible external to the land.	
Waste	Means waste within the meaning of the <i>Environment Protection Act 1993</i> .	

Part 9 – Referrals

Notes- Additional Referrals

Additional referrals to those specified below are contained within Overlays within the Planning and Design Code

Notes- Additional Referrals

Additional referrals to those specified below are contained within Overlays within the Planning and Design Code

Part 9.1 Referral Body: Environment Protection Authority

In relation to Part 9(1):

Community wastewater management system (CWMS) means a system for the collection and management of wastewater generated in a town, regional or other community.

Liquid waste means waste classified as liquid waste in accordance with the assessment process set out in the guideline Liquid waste classification test, re-issued by the Environment Protection Authority in September 2003; as defined in Schedule 1 of the *Environment Protection Act 1993*.

Listed waste means a substance or thing listed in Part B of Schedule 1 of the *Environment Protection Act 1993*.

Medical waste has the same meaning as in the *Environment Protection (Waste to Resources) Policy 2010*.

Prescribed approved activity – means:

- (a) the on-site storage or disposal of domestic waste;
- (b) a regulated beverage container activity;
- (c) a regulated drop-off station for e-waste;
- (d) the temporary on-site storage of waste (other than tyre waste) while awaiting transport to another place;
- (e) incineration by way of thermal oxidation using fuel burning equipment for the disposal of solid trade waste with a processing capacity not exceeding 100 kilograms per hour;
- (f) the storage or disposal of tyre waste in a manner approved by the Environment Protection Authority;
- (g) the disposal of human wastewater or sewage to land in a manner approved by the Environment Protection Authority.

Quarantine waste means waste that is subject to quarantine under the *Quarantine Act 1908* of the Commonwealth.

River Murray Protection Area means a River Murray Protection Area under the *River Murray Act 2003*.

Treatment is taken to have the same meaning as defined in section 3(1) as in the *Environment Protection Act 1993*.

Waste has the same meaning as in the *Environment Protection Act 1993*.

Wastewater means waste principally consisting of water and includes—

- (a) human wastewater;
- (b) sewage;
- (c) water containing food or beverage waste;
- (d) wash down water or cooling water;
- (e) irrigation runoff or contaminated stormwater;
- (f) water containing any other trade waste or industrial waste;
- (g) any other water that has been used in any form of human activity;
- (h) a combination of any 1 or more of the above.

Water protection area has the same meaning as in the *Environment Protection Act 1993*.

Referral Body: Environment Protection Authority				
Referral Category	Development type	Referral triggers	Policies relevant to the referral	Purpose of referral
Site contamination	Change in use of land to sensitive use or more sensitive use, except where— (a) a <i>site contamination audit report</i> under Part 10A of the <i>Environment Protection Act 1993</i> has, within 5 years of the application, been	A change to a <i>more sensitive use</i> of land (including following its subdivision) at which <i>site contamination</i> exists or may exist as a result of a <i>class 1 potentially contaminating activity</i> listed in a Practice Direction (including <i>site contamination</i> caused by such an activity conducted on <i>adjacent land</i> , or on <i>other land</i> identified	Site Contamination General Development Provisions	To ensure an appropriate and proportionate assessment of potential site contamination by providing direction to the relevant authority on the most

	<p>prepared in relation to the land; and</p> <p>(b) the report clearly states that—</p> <p>(i) <i>site contamination</i> does not exist (or no longer exists) at the land; or</p> <p>(ii) the land is suitable for the proposed use or range of uses (without the need for any further remediation); or</p> <p>(iii) where remediation is or remains necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented as part of the application); and</p> <p>(c) no <i>class 1 or 2 potentially contaminating activities</i> (as identified in a Practice Direction) have taken place at the land since the preparation of the report.</p>	<p>on the SA Planning Portal that is known to impact the subject site).</p> <p>A change from:</p> <p>(a) a <i>non-sensitive use</i> to a <i>sensitive use</i>; or</p> <p>(b) <i>from a sensitive use</i> to a <i>more sensitive use</i></p> <p>on land at which <i>site contamination</i> exists or may exist as a result of a <i>class 2 potentially contaminating activity</i> listed in a Practice Direction (including <i>site contamination</i> caused by such an activity conducted on <i>adjacent land</i>, or on <i>other land</i> identified on the SA Planning Portal that is known to impact the subject site).</p> <p>A change in use of the land (including following its subdivision) that is the subject of a notation under section 103P of the <i>Environment Protection Act 1993</i> (i.e. a site contamination audit report has been prepared in respect of the land) to a <i>more sensitive use</i>.</p>		<p>appropriate person to determine site suitability (ie site contamination consultant or site contamination auditor).</p>
<p>Energy generation and storage facilities</p>	<p>Wind farms</p>	<p>Development that involves the establishment of a wind farm where 1 or more wind turbine generators (whether or not located on the same site) are</p>	<p>Section 57 of <i>Environment Protection Act 1993</i> sets out criteria to be considered by the EPA</p>	<p>To provide expert technical assessment and direction to the relevant authority on the assessment of the</p>

		<p>used to generate electricity that is then supplied to another person for use at another place.</p>		
	<p>Energy recovery from waste</p>	<p>Development involving energy recovery from <i>waste</i>, including <i>anaerobic digestion</i> and thermal activities such as <i>direct combustion</i>, <i>pyrolysis</i> and <i>gasification</i> used to generate gas, heat, electricity or a combination.</p> <p>In this referral trigger:</p> <p><i>anaerobic digestion</i> involves a series of processes in which microorganisms break down biodegradable material to biogas in the absence of oxygen</p> <p><i>direct combustion</i> involves burning in excess oxygen (from air) to produce heat or release energy contained in the fuel</p> <p><i>pyrolysis</i> involves the thermo-chemical decomposition of organic or inorganic material- for example synthetic tyres – at elevated temperatures in the absence of oxygen</p> <p><i>gasification</i> of waste is a process that converts organic or fossilised organic material such as coal, at</p>	<p>in relation to the assessment of development applications. This head power also links to other statutory criteria in the <i>Environment Protection (Air Quality) Policy 2016</i>, <i>Environment Protection (Noise) Policy 2007</i>, <i>Environment Protection (Waste to Resources) Policy 2010</i> and the <i>Environment Protection (Water Quality) Policy 2015</i>.</p>	<p>potential harm from pollution and waste aspects arising from activities of environmental significance and other activities that have the potential to cause serious environmental harm.</p>

		<p>elevated temperatures and with controlled amounts of oxygen, into a synthetic gas (syngas)</p>		
	<p>Energy generation and storage</p>	<p>Development involving an <i>electricity generating plant</i> or <i>energy storage facility</i> (other than a <i>battery storage facility</i>) using any other energy source (excluding <i>fuel burning</i> and solar photovoltaic) with a capacity to generate or store 30 megawatts (MW) or more that is to be connected to the State's <i>power system</i>.</p> <p>In this referral trigger:</p> <p><i>battery storage facility</i> means a facility for the purpose of 1 or more batteries that are capable of being charged, storing energy and discharging in into the State's power system</p> <p><i>electricity generating plant</i> means electricity generating plant within the ambit of paragraph (a) of the definition of electricity infrastructure in section 4(1) of the <i>Electricity Act 1996</i></p>		

		power system has the same meaning as in the <i>Electricity Act 1996</i>		
Petroleum and Chemical	Chemical storage and warehousing facilities	The storage or warehousing of chemicals or chemical products that are, or are to be, stored or kept in bulk or in containers having a capacity exceeding 200 litres at facilities with a total storage capacity exceeding 1,000 cubic metres.		
	Chemical works	The conduct of: (a) works with a total processing capacity exceeding 10 tonnes per year, involving either or both of the following operations: (i) manufacture (through chemical reaction) of any inorganic chemical, including sulphuric acid, inorganic fertilisers, soap, sodium silicate, lime or other calcium compound; (ii) manufacture (through chemical reaction) or processing of any organic chemical or chemical product or petrochemical, including the separation of such materials into different		

		<p>products by distillation or other means; or</p> <p>(b) works with a total processing capacity exceeding 5,000 tonnes per year involving operations for salt production.</p>		
	Coke works	The production, quenching, cutting, crushing and grading of coke.		
	Hydrocarbon storage or production works	<p>The conduct of works or a facility:</p> <p>(a) for the storage of hydrocarbon or hydrocarbon products in tanks that, in aggregate, have a storage capacity exceeding 100m³; or</p> <p>(b) for the production of hydrocarbon or hydrocarbon products, being works having a total capacity exceeding 20 tonnes per hour.</p>		
	Petrol stations	<p>The conduct of a petrol station, being a facility for the storage and retail sale of petroleum products or other liquid organic chemical substances</p> <p>In this referral trigger:</p> <p>petroleum product has the same meaning as in the <i>Petroleum Products Regulation Act 1995</i>.</p>		

	Timber preservation works	The conduct of works for the preservation of timber by chemicals, but excluding the preservation by a primary producer of timber for use in the course of primary production carried on by the producer.		
Manufacturing and Mineral Processing	Abrasive blasting	The cleaning of materials by the abrasive action of any metal shot or mineral particulate propelled in a gaseous or liquid medium (otherwise than solely by using blast cleaning cabinets less than 5m ³ in volume or totally enclosed automatic blast cleaning units).		
	Hot mix asphalt preparation	The conduct of works at which crushed or ground rock aggregates are mixed with bituminous or asphaltic materials (by heating in a furnace, kiln or other fuel fired plant) for the purposes of producing road building mixtures.		
	Cement works	<p>The conduct of works for the use of <i>argillaceous</i> and <i>calcareous</i> materials in the production of cement clinker or the grinding of cement clinker.</p> <p>In this referral trigger:</p> <p><i>argillaceous</i> means having to do with or resembling clay</p>		

		<i>calcareous</i> means having to do with calcium carbonate		
	Ceramic works	The conduct of works for the production of any products such as bricks, tiles, pipes, pottery goods, refractories, or glass that are manufactured or are capable of being manufactured in furnaces or kilns fired by any fuel, being works with a total capacity for the production of such products exceeding 100 tonnes per year.		
	Concrete batching works	The conduct of works for the production of concrete or concrete products that are manufactured or are capable of being manufactured by the mixing of cement, sand, rock, aggregate or other similar materials, being works with a total capacity for production of such products exceeding 0.5m ³ per production cycle.		
	Drum reconditioning or treatment works	The conduct of works for the cleaning, repairing, reconditioning or other treatment of metal or plastic drums or containers for the purposes of their reuse, including any associated storage facility.		

<p>Ferrous and non-ferrous metal melting</p>	<p>the melting of ferrous or non-ferrous metal in a furnace or furnaces that alone or in aggregate have the capacity to melt-</p> <p>(a) in excess of 50 but not in excess of 500 kilograms of metal during the normal cycle of operation but excluding facilities more than 500m from residential premises not associated with the works; or</p> <p>(b) in excess of 500 kilograms of metal during the normal cycle of operation.</p>		
<p>Metallurgical works</p>	<p>The conduct of works at which ores are smelted or reduced to produce metal.</p>		
<p>Mineral works</p>	<p>The conduct of works for processing mineral ores, sands or earths to produce mineral concentrates.</p>		
<p>Pulp or paper works</p>	<p>The conduct of works at which paper pulp or paper is manufactured or is capable of being manufactured, being works with a total capacity for production of such products exceeding 10 tonnes per year</p>		
<p>Surface coating</p>	<p>The conduct of:</p> <p>(a) works for metal finishing, in which metal surfaces are prepared or finished by</p>		

		<p>means of electroplating, electrolyse plating, anodising (chromating, phosphating and colouring), chemical etching or milling, or printed circuit board manufacture, being works producing more than 5 kilolitres per day of effluent; or</p> <p>(b) works for hot dip galvanising; or</p> <p>(c) works for spray painting or powder coating with a capacity to use more than 100 litres per day of paint or 10kg per day of dry powder.</p>		
	Timber processing works	The conduct of works (other than works at a builders supply yard or a home improvement centre) at which timber is sawn, cut, chipped, compressed, milled or machined, being works with a total processing capacity exceeding 4,000m ³ per year.		
	Maritime construction works	The conduct of works for the construction or repair of ships, vessels or floating platforms or structures, being works with the capacity to construct or repair ships, vessels or floating platforms or structures of a mass exceeding 80 tonnes.		
	Vehicle production	The conduct of works for the production of motor vehicles,		

		being works with a production capacity exceeding 2,000 motor vehicles per year.		
	Fibre-reinforced plastic manufacturing	The conduct of facilities for the purposes of manufacturing fibre-reinforced plastic products, but excluding facilities more than 300m from residential premises not associated with the facility.		
Resource recovery, waste disposal and related activities	Waste recovery (<i>excluding a prescribed approved activity</i>)			
	Waste recovery facility	The conduct of a <i>waste recovery facility</i> , being a depot, works or facility (including, but not limited to, a transfer station or material recovery facility) that, during a 12 month period, receives for <i>preliminary treatment</i> , or has the capacity for the <i>preliminary treatment</i> of: (a) more than 100 tonnes of solid waste or matter; or (b) more than 100 kilolitres of liquid waste or matter, prior to its transfer elsewhere for lawful reuse, further treatment or disposal but excluding a prescribed approved activity or an activity in respect of which the Environment Protection Authority is satisfied, having regard to prescribed factors, that a referral is not necessary and has provided		

		<p>written confirmation of this to the relevant authority.</p> <p>In this referral trigger:</p> <p>preliminary treatment of waste or matter, includes sorting, aggregating, compacting, baling or packaging the waste or matter as defined in Schedule 1 of the <i>Environment Protection Act 1993</i>.</p>		
<p>Waste reprocessing (<i>excluding a prescribed approved activity</i>)</p>				
	<p>Composting works</p>	<p>Being a depot, facility or works with the capacity to treat, during a 12 month period-</p> <p>(a) in the case of works located wholly or partly within a water protection area - more than 200 tonnes of organic waste or matter; or</p> <p>(b) in the case of works located wholly outside of a water protection area - more than 1,000 tonnes of organic waste or matter, for the production of compost, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided</p>		

		written confirmation of this to the relevant authority.		
	Scrap metal treatment works	Being a depot, facility or works for the treatment of scrap metal (by processes involving electrically heated furnaces or other fuel burning equipment or by mechanical processes), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.		
	Tyre waste treatment works	Being a depot, facility or works with the capacity to treat more than 5 tonnes of <i>tyre waste</i> during a 12 month period, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. In this referral trigger: <i>tyre waste</i> means waste comprised of tyres or tyre pieces as defined in Schedule 1 of the <i>Environment Protection Act 1993</i> .		

	<p>Waste lead acid battery treatment works</p>	<p>Being a depot, facility or works with the capacity to treat more than 500 waste lead acid batteries during a 12 month period, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.</p>		
	<p>Waste reprocessing facility</p>	<p>Being a depot, works or facility other than a depot, works or facility specified in a preceding paragraph) that, during a 12 month period, receives or has the capacity to treat:</p> <ul style="list-style-type: none"> (a) more than 100 tonnes of solid waste or matter; or (b) more than 100 kilolitres of liquid waste or matter, for the production of energy or materials that are ready for use (without requiring further treatment), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. 		

<i>Waste disposal (excluding a prescribed approved activity)</i>			
Landfill depot	Being a depot, facility or works for the disposal of waste to land, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.		
Liquid waste depot	Being a depot, facility or works for the reception and disposal of liquid waste, or the reception, treatment and disposal of liquid waste, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.		
Incineration depot	Being a depot, facility or works for the disposal, by incineration, pyrolysis or gasification by high temperature chemical decomposition, or thermal oxidation using fuel burning equipment, of solid waste, a listed waste or quarantine waste, but excluding:		

		<p>(a) facilities with a processing capacity not exceeding 100 kilograms per hour and more than 500m from residential premises not associated with the facility, or</p> <p>(b) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.</p>		
Wastewater treatment				
	Wastewater treatment works	<p>Being sewage treatment works, a <i>CWMS</i>, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period-</p> <p>(a) in the case of works located wholly or partly within a water protection area - more than 2.5 ML of wastewater;</p> <p>or</p> <p>(b) in the case of works located wholly outside of a water protection area - more than 12.5 ML of wastewater but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not</p>		

		necessary and has provided written confirmation of this to the relevant authority.		
	Activities involving listed wastes			
	Activity producing listed waste	<p>the conduct of an activity in which a <i>listed waste</i> is produced as waste or becomes waste, but excluding the following:</p> <ul style="list-style-type: none"> (a) a domestic activity; (b) retail pharmacy; (c) medical practice (other than the practice of pathology); (d) nursing practice; (e) dental practice; (f) veterinary practice; (g) the conduct of a nursing home or other residential aged care facility; (h) the conduct of an immunisation clinic; (i) the conduct of a hospital with capacity of fewer than 40 beds; or (j) a <i>prescribed industrial activity</i>; (k) an activity in which the waste produced is lawfully disposed of to a sewer; (l) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. 		

		<p>In this referral trigger:</p> <p><i>prescribed industrial activity</i>— means:</p> <ul style="list-style-type: none">(a) building work;(b) carpentry or joinery;(c) film processing;(d) plumbing or gas fitting;(e) dry cleaning;(f) primary or secondary school education;(g) agriculture or horticulture;(h) french polishing;(i) manufacturing jewellery;(j) painting or decorating;(k) panel beating and associated spray painting;(l) an activity that results in the production of less than 50 000 litres of waste oil per year;(m) an activity authorised by a lease or licence under the <i>Mining Act 1971</i>, the <i>Petroleum and Geothermal Energy Act 2000</i> or the <i>Roxby Downs (Indenture Ratification) Act 1982</i> where the waste is lawfully disposed of to land and contained within the area of the lease or licence;(n) an activity authorised by a lease under the <i>Mining Act 1971</i> where the waste is lawfully disposed of to land and contained within the area of a miscellaneous purposes		
--	--	---	--	--

		<p>licence under that Act adjacent to the area of the lease.</p>		
	<p>Reception or storage of listed waste</p>	<p>The conduct of a depot, facility or works for the reception or storage of a <i>listed waste</i>, but excluding the following:</p> <ul style="list-style-type: none"> (a) the temporary on-site storage of such waste while awaiting transport to another place; (b) an activity consisting only of storing or distributing goods, in respect of which the Environment Protection Authority is satisfied, having regard to prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority; (c) the reception or storage by a council or hospital of medical waste produced in the course of a prescribed medical activity; (d) the reception or storage by a retail pharmacy of personal sharps waste, <i>pharmaceutical waste</i> or other medical waste, in connection with a return system for such waste. <p>In this referral trigger:</p> <p><i>personal sharps waste</i> means medical sharps that have been</p>		

		<p>used in a domestic situation for medical purposes;</p> <p>pharmaceutical waste means waste comprised of medicines or other pharmaceutical products;</p> <p>prescribed medical activity— means:</p> <ul style="list-style-type: none"> (a) a medical practice other than— <ul style="list-style-type: none"> (i) medical practice at a hospital; or (ii) the practice of pathology; (b) nursing practice other than at a hospital; (c) dental practice other than at a hospital; (d) operating a nursing home; or (e) veterinary practice; (f) operating a hospital with a capacity of less than 40 beds; (g) operating an immunisation clinic. 		
	<p>Treatment of listed waste</p>	<p>The conduct of a depot, facility or works for the treatment of a <i>listed waste</i>, or <i>wastewater</i> containing a listed waste, by immobilising, stabilising or sterilising the waste by any process (before its further treatment or disposal), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors</p>		

		that a referral is not necessary and has provided written confirmation of this to the relevant authority.		
Activities in Specified Areas	Brukung Mine Site	The management of the abandoned Brukung mine site and associated acid neutralisation plant situated adjacent to Dawesley Creek in the Mount Lofty Ranges.		
	Discharge of stormwater to underground aquifer	Discharge of stormwater from a catchment area exceeding 1 hectare to an underground aquifer by way of a well or other direct means where the stormwater drains to the aquifer from- (a) land or premises on which a business is carried on in the council area of the City of Mount Gambier; or (b) a stormwater drainage system in the council area of the City of Mount Gambier; or (c) a stormwater drainage system in Metropolitan Adelaide.		
Animal husbandry, Aquaculture and other activities	Feedlots	carrying on an operation for holding in A confined yard or area and feeding principally by mechanical means or by hand- (a) not less than an average of 500 cattle, or 4,000 sheep or		

		<p>goats per day over any period of 12 months; or</p> <p>(b) where the yard or area is situated in a water protection area - not less than an average of 200 cattle, or 1,600 sheep or goats per day over any period of 12 months,</p> <p>but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.</p>		
	<p>Aquaculture or Fish Farming</p>	<p>The land based propagation or rearing of marine, estuarine or fresh water fish or other marine or freshwater organisms that involves the discharge of wastewater into marine or inland waters, or onto land but excluding where wastewater is discharged to an approved wastewater management system.</p>		
	<p>Saleyards</p>	<p>The commercial conduct of yards at which cattle, sheep or other animals are gathered or confined for the purpose of their sale, auction or exchange, including associated transport loading facilities, being yards with a throughput exceeding 50,000 sheep equivalent units per year [sheep equivalent units: 1 sheep</p>		

		<p>or goat = 1 unit, 1 pig (< 40kg) = 1 unit, 1 pig (> 40kg) = 4 units, 1 cattle (< 40kg) = 3 units, 1 cattle (40—400kg) = 6 units, 1 cattle (> 400kg) = 8 units].</p>		
	<p>Piggeries</p>	<p>The conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of-</p> <p>(a) in the case of a piggery located wholly outside of a water protection area- 1,300 or more standard pig units; or</p> <p>(b) in the case of a piggery located wholly or partly within a <i>water protection area</i>- 130 or more standard pig units.</p> <p>In this referral trigger:</p> <p>standard pig units is a unit of measurement of pigs determined-</p> <p>(a) by reference to clause 4.3 of the <i>National Environmental Guidelines for Piggeries 2010</i> (second edition (revised)) prepared by Australian Pork Limited; or</p> <p>(b) in a manner approved by the Environment Protection Authority and published on a website determined by the Environment Protection Authority.</p>		

	Poultry farms	The keeping of poultry in confined or roofed structure(s) exceeding 1,000m ² .		
	Dairies	Carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time in a <i>water protection area</i> .		
Food production and animal and plant product processing	Meat processing works	The conduct of slaughtering works for commercial purposes for the production of meat or meat products for human or animal consumption, being works- (a) in the case of poultry or poultry meat products at a rate of production exceeding 100 tonnes per year; or (b) in the case of any other animal meat or animal meat production at a rate of production exceeding 50 tonnes per year.		
	Breweries and cideries	The conduct of works for the production of beer, cider or any other alcoholic beverage (excluding wine and spirits) by infusion, boiling or fermentation, being works with a production capacity exceeding 5,000 litres per day.		

	Fish processing	<p>The conduct of works for scaling, gilling, gutting, filleting, freezing, chilling, packing or otherwise processing fish (as defined in the <i>Fisheries Management Act 2007</i>) for sale, but excluding:</p> <ul style="list-style-type: none"> (a) works with a processing output of less than 100 tonnes per year where wastewater is disposed of to a sewer or CWMS; or (b) works with a processing output of less than 2 tonnes per year where wastewater is disposed of otherwise than to a sewer or CWMS; or (c) processing of fish only in the course of a business of selling fish by retail. 		
	Milk processing works	<p>The conduct of works at which milk is separated, evaporated or otherwise processed for the manufacture of evaporated or condensed milk, cheese, butter, ice cream or other similar dairy products, being works at which milk is processed at a rate exceeding 5ML per year.</p>		
	Produce processing works	<p>The conduct of works for processing any agricultural crop material being:</p> <ul style="list-style-type: none"> (a) works for the processing of agricultural crop material by deep fat frying, roasting or drying through the 		

		<p>application of heat with a processing capacity exceeding 30kg per hour, or;</p> <p>(b) works at which more than 10ML of wastewater is generated per year and disposed of otherwise than to a sewer or CWMS.</p>		
	Rendering and fat extraction works	The conduct of works at which animal, fish or grease trap wastes or other matter is processed or is capable of being processed by rendering or extraction or by some other means to produce tallow or fat or their derivatives or proteinaceous matter, being works with a total processing capacity exceeding 25 kg per hour.		
	Curing or drying works	<p>the conduct of works at which meat, fish or other edible products are smoked, dried or cured by the application of heat or smoke:</p> <p>(a) with a total processing capacity exceeding 25 but not exceeding 250kg per hour excluding works more than 200m from residential premises not associated with the works; or</p> <p>(b) with a total processing capacity exceeding 250kg per hour.</p>		

	Tanneries or fellmongeries	The conduct of works for the commercial preservation or treatment of animal skins or hides being works processing more than 5 tonnes of skins or hides per year, but excluding- (a) the processing of skins or hides by primary producers in the course of primary production activities outside township areas; or (b) the processing of skins or hides in the course of taxidermy.		
	Woolscouring or wool carbonising works	The conduct of works for the commercial cleaning or carbonising of wool, but excluding cleaning or carbonising of wool in the course of handicraft activities where the wool is further processed for sale by retail.		
	Wineries or Distilleries	The conduct of works for the processing of grapes or other produce to make wine or spirits, being works at which more than 50 tonnes of grapes or other produce are processed per year; but excluding—works for bottling only.		
Materials handling and transportation	Bulk shipping facilities	The conduct of facilities for bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals		

		<p>to or from any wharf or wharf side facility (including sea-port grain terminals), being facilities handling or capable of handling these materials into or from vessels at a rate:</p> <p>(a) exceeding 10 but not exceeding 100 tonnes per day—excluding facilities more than 300m from residential premises not associated with the facility; or</p> <p>(b) exceeding 100 tonnes per day.</p>		
	Bulk storage	<p>The conduct of facilities for bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility at a rate exceeding 100 tonnes per day—excluding facilities more than 300m from residential premises not associated with the facility.</p>		
	Railway operations	<p>The conduct of any of the following activities associated with a railway:</p> <p>(a) the construction or operation of rail infrastructure; and</p> <p>(b) the operation of rolling stock on a railway;</p> <p>(c) other activities conducted on railway land,</p> <p>(d) but excluding—</p> <p>(e) any activities associated with:</p>		

		<ul style="list-style-type: none"> (i) a railway with a track gauge that is less than 600mm; or (ii) a railway in a mine which is underground or predominantly underground and used in connection with the performance of mining operations; or (iii) a slipway; or (iv) a crane-type runway; or (v) a railway used solely for the purposes of horse-drawn trams; or (vi) a railway used solely for the purposes of static displays; or (vii) a railway at an amusement park used solely for the purposes of an amusement structure or (viii) the transfer of freight into or onto, and unloading of freight from, rolling stock <p>(f) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.</p> <p>In this referral trigger:</p>		
--	--	--	--	--

		<p>rail infrastructure means infrastructure associated with the operation of a railway and includes (but is not limited to) railway track, associated track structures, over or under track structures, supports, tunnels, bridges, stations, platforms, train control systems, signalling systems, communication systems, electric traction infrastructure and buildings, but does not include any workshop or repair facility;</p> <p>railway means a guided system designed for the movement of rolling stock which has the capability of transporting passengers, freight or both on a railway track, together with its infrastructure and associated sidings or crossing, or passing loops, and includes a railway in a marshalling yard or a passenger or freight terminal;</p> <p>railway land means—</p> <ul style="list-style-type: none"> (a) land within a rail corridor or rail reserve, including any associated sidings; and (b) railway yards; and (c) other land over which a railway track passes; <p>rolling stock means a vehicle (whether or not self-propelled) that operates on or uses a railway track, but does not include a</p>		
--	--	--	--	--

		<p>vehicle designed to operate both on and off a railway track when the vehicle is not operating on a railway track.</p> <p>Examples—A locomotive, carriage, rail car, rail motor, light rail vehicle, train, tram, light inspection vehicle, road/rail vehicle, trolley, wagon.</p>		
	<p>Crushing, grinding or milling</p>	<p>Processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or in any other manner) of-</p> <p>(a) chemicals or rubber at a rate:</p> <ul style="list-style-type: none"> (i) in excess of 1 but not in excess of 100 tonnes per year excluding facilities more than 500m from residential premises not associated with the facility; or (ii) in excess of 100 tonnes per year; or <p>(b) agricultural crop products at a rate:</p> <ul style="list-style-type: none"> (i) in excess of 50 but not in excess of 500 tonnes per year, but excluding facilities more than 300m from residential premises not associated with the facility; or (ii) in excess of 500 tonnes per year; 		

		<p>but excluding non-commercial processing for on farm use; or</p> <p>(c) rock, ores or minerals at a rate:</p> <p>(i) in excess of 100 but not in excess of 1,000 tonnes per year, but excluding facilities more than 500m from residential premises not associated with the facility; or</p> <p>(ii) in excess of 1,000 tonnes per year;</p> <p>but excluding processing of wet sand.</p>		
	<p>Dredging</p>	<p>The conduct of capital dredging being: the excavation of more than 10m³ of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means and any associated disposal of dredged material to land or waters, but excluding:</p> <p>(a) maintenance dredging;</p> <p>(b) works associated with the establishment of a visual aid; or</p> <p>(c) any lawful fishing or recreational activity.</p> <p>In this referral trigger:</p>		

		<p>marine waters has the same meaning as in Section 3 of <i>Environment Protection Act 1993</i>.</p> <p>maintenance dredging means the excavation of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means for the purpose of maintaining a previously dredged (approved) depth, width and area in marine or inland waters.</p>		
	Coal handling and storage	The handling of coal or carbonaceous material by any means or the storage of coal, coke or carbonaceous reject material at facilities with a total handling capacity exceeding 100 tonnes per day or a storage capacity exceeding 5,000 tonnes.		
	Extractive industries	The conduct of operations involving extraction, or extraction and processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or any other manner), of sand, gravel, stone, shell, shale, clay or soil, being operations with an extraction production rate exceeding 100,000 tonnes per year.		

Other	Aerodromes	<p>The conduct of facilities for commercial or charter aircraft take-off and landing, being facilities estimated to be used for:</p> <ul style="list-style-type: none"> (a) more than 200 flight movements per year but excluding facilities more than 3km from residential premises not associated with the facilities; or (b) more than 2 000 flight movements per year in any case. 		
	Fuel burning	<p>The conduct of works or facilities involving the use of fuel burning equipment, including flaring (other than flaring at hydrocarbon storage or production works that do not have a total storage capacity or total production rate exceeding the levels respectively specified in 'Hydrocarbon storage or production works') or incineration, where the equipment alone or in aggregate is capable of burning combustible matter-</p> <ul style="list-style-type: none"> (a) a rate of heat release exceeding 5MW; or (b) at a rate of heat release exceeding 500KW and the products of combustion are used: <ul style="list-style-type: none"> (i) to stove enamel; or (ii) to bake or dry any substance that on heating releases dust or air impurities. 		

<p>Helicopter landing facilities</p>	<p>The conduct of facilities designed for the arrival and departure of helicopters, but excluding:</p> <ul style="list-style-type: none"> (a) facilities that are situated more than 3km from residential premises not associated with the facilities; or (b) facilities at the site of an activity authorised under the <i>Mining Act 1971</i>, the <i>Petroleum and Geothermal Energy Act 2000</i>, the <i>Petroleum (Submerged Lands) Act 1982</i> or the <i>Roxby Downs (Indenture Ratification) Act 1982</i>. 		
<p>Marinas and boating facilities</p>	<p>The conduct of facilities comprising pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for:</p> <ul style="list-style-type: none"> (a) 50 or more powered vessels at any 1 time; or (b) works for the repair or maintenance of vessels with the capacity to handle 5 or more vessels at any one time or vessels 12m or more in length. 		
<p>Motor racing or testing venues</p>	<p>The conduct of facilities designed and used for motor vehicle competitions or motor vehicle speed or performance trials, but</p>		

		excluding facilities that are situated more than 3km from residential premises not associated with the facilities.		
	Shooting ranges	The conduct of facilities for shooting competitions, practice or instruction (being shooting involving the propulsion of projectiles by means of explosion), but excluding facilities that are situated more than 3km from residential premises not associated with the facilities.		
	Desalination plants	The conduct of a desalination plant that has a production capacity exceeding 200 kilolitres of desalinated water per day, and includes- (a) an underground desalination plant; and (b) a number of underground desalination plants within any 1 square kilometre area that, in aggregate, have a production capacity exceeding 200 kilolitres of desalinated water per day, but does not include- (c) a plant that disposes of all of its wastewater to a wastewater management system that is the subject of a licence; or		

		<p>(d) a plant that produces 2 megalitres or less of wastewater per year;</p> <p>In this referral trigger:</p> <p>underground desalination plant means a plant having a system comprised of a borehole, submersible pump and associated equipment for the desalination below the ground of underground water;</p> <p>underground water means water occurring naturally under the ground or introduced to an aquifer or other area under the ground.</p>		
	<p>Discharges to marine or inland waters</p>	<p>The conduct of operations, other than a desalination plant referred to in this table), involving discharges into marine waters or inland waters where-</p> <p>(a) the discharges:</p> <ul style="list-style-type: none"> (i) raise the temperature of the receiving waters by more than 2 degrees Celsius at any time at a distance of 10m or more from the point of discharge; or (ii) contain antibiotic or chemical water treatments; and 		

		(b) the total volume of the discharges exceeds 50kl per day.		
	Saline water discharge	An activity involving the discharge to land, surface water or underground water of more than 0.5MI of water per day containing more than 1 500mg of total dissolved solids per litre.		
	Cremation or incineration of human or animal remains	<p>The conduct of a facility for the cremation or incineration of human or animal remains by means of thermal oxidation using fuel burning equipment.</p> <p>In this referral trigger:</p> <p>human or animal remains does not include-</p> <p>(a) medical waste; or</p> <p>(b) cytotoxic wastes; or</p> <p>(c) quarantine waste</p> <p>Cytotoxic wastes means waste that is toxic to living things.</p>		
	Land Division	Land division creating 1 or more additional allotments for residential purposes within 500 metres of land used as a landfill waste depot.		To provide expert technical assessment and advice to the relevant authority on the appropriateness of further residential opportunities being

				established within close proximity to landfill waste depots, due to potential health and safety impacts.
--	--	--	--	--

Part 9.2 Referral Body: The Minister responsible for the administration of the Natural Resources Management Act 2004

Referral Body: The Minister responsible for the administration of the Natural Resources Management Act 2004

Referral Category	Development Type	Purpose of referral
Dams	<p>Except where located within the River Murray Protection Area Overlay, development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water:</p> <p>(a) flowing in a watercourse that is not in the Mount Lofty Ranges Catchment (Area 1) Overlay or Mount Lofty Ranges Catchment (Area 2), and</p> <p>(b) that is not prescribed or flowing over any other land that is not in a Prescribed Surface Water Area Overlay or in the Mount Lofty Ranges Water Protection Area Overlay,</p> <p>and where it is contrary to a Natural Resources Management Plan applying in the region of the development site.</p>	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources.
Commercial Forestry	Development that involves a change in use of land for the purposes of undertaking commercial forestry for which a permit would be required	To provide expert assessment and direction to the relevant authority on potential

Referral Body: The Minister responsible for the administration of the Natural Resources Management Act 2004

Referral Category	Development Type	Purpose of referral
	under section 127(3) of the <i>Natural Resources Management Act 2004</i>	impacts from such development on water resources.

Part 9.3 Referral Body: Technical Regulator

Referral Body: Technical Regulator

Referral Category	Development Type	Purpose of referral
Building Near Powerlines	Development that involves the construction of a building where a declaration has not been given under Schedule 8 -11 of the <i>Planning, Development and Infrastructure Regulations 2019</i> , other than where the development is a building that is intended only to house, or that constitutes, electricity infrastructure (within the meaning of the <i>Electricity Act 1996</i>) or is limited to: (a) an internal alteration of a building; or (b) an alteration to the walls of a building but not so as to alter the shape of the building.	To provide expert technical assessment and direction to the relevant authority on: <ul style="list-style-type: none"> • potential impacts of development on electricity infrastructure; and • potential safety issues relating to development in close proximity to electricity infrastructure.

Part 9.4 Referral Body: Minister for the time being administering the Aquaculture Act 2001

Referral Body: Minister for the time being administering the <i>Aquaculture Act 2001</i>		
Referral Category	Development Type	Purpose of referral
Aquaculture Development	Aquaculture development, other than development which involves an alteration to an existing or approved development which in the opinion of the relevant authority is minor in nature.	To provide expert technical assessment and direction to the relevant authority on matters which may impact upon the associated license required for aquaculture development under the <i>Aquaculture Act 2001</i> .

Part 10 – Table of Amendments

Table of amendments

Nil
