**Q14** Please enter your general feedback here

I'm concerned about the impact of urban infill on the future sustainability and climate resilient of our City. I feel particularly strongly that trees, open space and water sensitive urban design are essential components of liveable cities and that there is a need for government policy to ensure that balance of green cover and infill is sustainable.

I strongly support all aspects of the Code that encourage water sensitive urban design - in particular the mandatory use of rainwater tanks / retention systems and inclusion of deep soil zones for trees.
