Dear Planning SA

I would like to note my complete opposition to the plan to infill further the inner suburb areas.

No longer will it be “road rage” but instead “neighbour rage”,

To summarise the following occurs

1. increased tree removal - increasing run off, increasing temperatures and basically making a mockery of addressing climate change.
2. parking congestion - removal of on street car parking despite the plan in itself causing an increased parking needs due to smaller properties, less car parking spaces etc
3. increased overlooking causing reduced privacy
4. Increased need for water and sewer disposal, probably straining the current infrastructure
4. All the above cause further social disharmony.

Yours Sincerely

Annette Scurrah
