**Subject:** completed Environmental Impact Statement

just submitted the survey Environmental Impact Statement with the responses below.

**Your name**

---

**Your email**

---

**Your postal address**

---

**What is your relationship to the project?**

Local community member

---

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely oppose

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

To close to water treatment As the air is blown all over Parafield Gardens and Mawson lakes This is a recipe for disaster and especially for the lakes of Mawson Lakes schools and places of worship- not to mention the water supply and possibly the leaked contaminates in the under ground water aquifer as the table line is very low- also the surrounding areas including commercial. Please I had been

advised this should be at least 100 km from any form of habitat- speak with the EPA and investigate facilities in other countries- I could see an Erin Brockovich moment forthcoming.

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

Yes - read that

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

Please read my previous major statement

---

**Do you have any other feedback about the EIS that you would like to share?**

Don't even think about- environmental disaster waiting to happen- not good for the community nor the health of our future generations

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

Erin Brockovich !

---

**Would you like to subscribe to Planning Ahead, our e-newsletter featuring news from the planning and development sector, building sector and State Planning Commission?**

Yes (please specify email address) - Sad 😞 if this goes ahead

Your postal address

What is your relationship to the project?

Local community member

The proposed BAM facility will be the first of its kind in South Australia.

To what extent do you support the construction of the BAM facility? Definitely oppose

The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water’s Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.

What are your thoughts on this proposed location?

the use of battery material is not for the environment, making here in the northern area. Dont want this to be around our farmers around either.

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

maybe another area would be of consideration the further away.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

i think the job aspect is always good, but not the location were others areas considered at all???

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

Just needs to move not a good idea near a water plant, needing a more secluded area possibly

---

**Would you like to subscribe to Planning Ahead, our e-newsletter featuring news from the planning and development sector, building sector and State Planning Commission?**

Yes (please specify email address)

---

**What are your thoughts on this proposed location?**

Appropriate location

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

Will be self contained and managed. No more impact than any other new business

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

Highly needed jobs out north. This needs to be approved

---

**Do you have any other feedback about the EIS that you would like to share?**

No

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

**What are your thoughts on this proposed location?**

It has very good logistical advantage with minimal community impact

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

I think the interaction will be minimal

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

Positive Impact - Jobs Creation - Economic Growth

**What are your thoughts on this proposed location?**

I believe Renascor has considered all options and I am confident they have the best site possible.

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

I cannot see any issues.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

This will be a major project and will benefit all involved.

---

**Do you have any other feedback about the EIS that you would like to share?**

No

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

This has Government support and should be fast tracked to enable production as soon as possible.

---

**What are your thoughts on this proposed location?**

Perfect location.

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

I believe enough research has been done to ensure the Bam facility doesn't negatively impact surrounding areas.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

Outstanding opportunity for South Australia to contribute to decarbonisation.

---

I am: other

I am - Other: Save Our Surroundings Riverina & National Rational Energy Network Member

My position is: I oppose the development

Do you have concerns regarding the proposed development?: I Object to any proposal such as this Renascor Battery Anode Material Facility that's part of the Fake Green RenewaBULL Solar/Wind/BESS Energy Poverty Grift & Ponzi Scheme/Scam that's irresponsibly Wrecking Australia & DO NOT CONSENT to the detrimental, toxic contaminating impacts, nor the complete waste of subsidy money for incapable Batteries & pathetic RenewaBULL JUNK that's ripping off everyday Australians during the Gov inflicted Cost of Living Crisis.

What could be done to address your concerns?: DUMP THIS PLAN & construct Australian benefiting, well proven, reliable, efficient, secure, 24/7 Coal & Nuclear power plants with MININIMAL ENVIRONMENTAL IMPACT instead.

Other general comments: I Object to Renascor Battery Anode Material Facility & all Industrialised Solar/Wind Electricity Generating Works + Battery Energy Storage Systems & related Transmission Interconnector Nightmares as the whole lot is an unconscionable waste of public funds for the most illogical & harmful, Fake Green, RenewaBULL, imaginary power delusion that could ever be orchestrated & forced on the S.A/Australian public with NO Consent, Against Our Will, with NO Social Licence & for NO COMMUNITY BENEFIT WHATSOEVER! Failure isn't a glitch, it is a design feature of S.A's 'Renewable' Swindle which can't deliver power on demand – only guarantees economic misery, environmental destruction & community disruption.

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

It looks like a reasonable choice

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

The BAM must not pollute food production operations.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

All good news

---

**Do you have any other feedback about the EIS that you would like to share?**

As long as known risks are mitigated and no adverse health or environmental affects are perceived, the development should go ahead

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

Are there possibilities for other battery related manufacturing?

---

**Would you like to subscribe to Planning Ahead, our e-newsletter featuring news from the planning and development sector, building sector and State Planning Commission?**

No

---

## DHUD:SPC Reps

**From:** YourSAy <notifications@engagementhq.com>  
**Sent:** Friday, 20 September 2024 9:34 PM  
**To:** DHUD:SPC Reps  
**Subject:** completed Environmental Impact Statement

just submitted the survey Environmental Impact Statement with the responses below.

**Your name**

---

**Your email**

---

**Your postal address**

---

**What is your relationship to the project?**

Interested individual

---

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

Great location.

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

I get the impression that there will be minimal if any detrimental interactions with the existing businesses or industries. Maybe some roadworks for a short period of time..

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

It's great for the community and for SA! More industries and jobs like this please!

---

**Do you have any other feedback about the EIS that you would like to share?**

No but thanks for asking

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

I personally think we need more industries like this to become a world leader in sustainability and help create jobs for the next generation

---

**Would you like to subscribe to Planning Ahead, our e-newsletter featuring news from the planning and development sector, building sector and State Planning Commission?**

Yes (please specify email address)

---

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

Productive use of this location. Superior to other options,

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

Adds to the growth of the region and hopefully improved utilisation of key resources such as water, energy, etc.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

A privilege to see this part of the region involved in such a critical facility for the long term sustainability of the planet.

---

**Do you have any other feedback about the EIS that you would like to share?**

No

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

No

---

---

**What is your relationship to the project?**

Local community member

---

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

It is appropriate and well placed.

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

The EIS has sufficiently detailed how it can minimise impact to surrounding businesses and the environment.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

It will have a very positive impact to the community and also the environment as it will enable the production of clean energy solutions.

---

**Do you have any other feedback about the EIS that you would like to share?**

It is very comprehensive and positive.

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

It is ideally placed.

---

**Would you like to subscribe to Planning Ahead, our e-newsletter featuring news from the planning and development sector, building sector and State Planning Commission?**

No

I just submitted the survey Environmental Impact Statement with the responses below.

**Your name**

---

**Your email**

---

**Your postal address**

---

**What is your relationship to the project?**

Other (please specify) - Shareholder

---

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

As detailed above, nil issues

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

Nil

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

massive upside to local government and community, also become a world leader in critical minerals.

---

**Do you have any other feedback about the EIS that you would like to share?**

Nil

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

massive boost for the Australian economy in general. make it happen, don't procrastinate.

---

**Would you like to subscribe to Planning Ahead, our e-newsletter featuring news from the planning and development sector, building sector and State Planning Commission?**

Yes (please specify email address) -

Interested individual

---

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

Excellent location and fit for purpose

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

Open discussion and communication

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

We need more manufacturing jobs and spherical graphite is in demand ex China. Not many if any other countries make it.

---

**Do you have any other feedback about the EIS that you would like to share?**

No

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

South Australians need these jobs and more manufacturing especially for critical minerals and spherical graphite.

---

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

Superb location - make use of the recycled water with minimal impact to the local environment.  
10/10 selection.

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

I see this project as synergistic with the water treatment plant nearby

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

Exceptional result - great to see South Australia creating much needed employment by leveraging our natural graphite resources

---

**Do you have any other feedback about the EIS that you would like to share?**

Please be sensible and don't stand in the way of a critical development for the state. This one has excellent merits.

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

No - just want to share my support.

---

**Would you like to subscribe to Planning Ahead, our e-newsletter featuring news from the planning and development sector, building sector and State Planning Commission?**

No

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

Perfectly suitable as it is out of the way in an industrial area, yet close to main road networks

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

Increase of traffic should be marginal

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

Being close to the northern suburbs, the extra employment opportunities will be of great benefit to the communities.

---

**Do you have any other feedback about the EIS that you would like to share?**

Having spoken and discussed the project with members of my family living in the area, they are also strongly in favour of this project going ahead.

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

Most people I have spoken with, would like the SA government to be proactive and further the cause of making SA a leader in the critical minerals space. The opportunity of creating a new industry that adds value to our recourses her in SA and providing new employment, should not be missed. There are no other SPG producers of this size in Australia.

---

**Would you like to subscribe to Planning Ahead, our e-newsletter featuring news from the planning and development sector, building sector and State Planning Commission?**

**To:** DHUD:SPC Reps  
**Subject:** completed Environmental Impact Statement

I just submitted the survey Environmental Impact Statement with the responses below.

**Your name**

---

**Your email**

---

**Your postal address**

---

**What is your relationship to the project?**

Interested individual

---

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

It seems to be a suitable location for this development as from my investigations there is a very low environmental impact from the activity. It provides jobs for those in the region and elsewhere. The products produced are excellent for our future clean energy supply.

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

It appears that there will be no discharge from the site into the local environment so potential impact should not occur. Local businesses may benefit from the build and future supply of required products and labour. It will show the world that renewable energy systems have a far reaching benefit.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

As SA is leading the country in renewables these jobs will benefit the local community plus the entire state. The flow on effect will help many communities statewide. It will attract others into SA who will bring new knowledge and ideas.

---

**Do you have any other feedback about the EIS that you would like to share?**

The materials being used and processed will have a zero or very low impact and are naturally occurring.

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

The components being processed are capable of being totally secured within the facility safely. I see no way that problems will occur during processing and manufacture of finished products. Unlike petrochemical plants IE> burning, processing, storing with their potential disasters and toxic fallout. This project will be a safe highly beneficial addition to renewable energy, jobs and promotion of SA as a world leader in this field.

**What are your thoughts on this proposed location?**

Great facility, convenient location

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

Will fit in well with the range of businesses around it

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

Great job support for renewables in SA as we continue to lead the field in the industry.

---

**Do you have any other feedback about the EIS that you would like to share?**

Very comprehensive, covers all issues as required

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

SA can continue to be a leader in this renewables sphere, as a State we should wherever possible responsibly support business like this.

---

Hi

You have received new feedback on the Guestbook on project **Renascor Battery Anode Material Facility – Environmental Impact Statement** on your site,

-

A comprehensive report, this is a great move forward for South Australia to keep leading the pack when it comes to renewables.

just submitted the survey Environmental Impact Statement with the responses below.

**Your name**

---

**Your email**

---

**Your postal address**

---

**What is your relationship to the project?**

Interested individual

---

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

I think the location is perfect for all the reasons you mention above. I grew up in Salisbury. The area is already quite heavily industrialised so it shouldn't have too much environmental impact, and what it will be producing has the ability to greatly reduce environmental impacts across the country.

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

There's a possibility that bio-waste from the region could be recycled for the carbon they need reducing the environmental impact of both the anode manufacturer and local market gardeners.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

This is something I want to see a lot more of in Australia. Selling off raw materials to other countries is robbing our children and grandchildren of their future. Instead we should be investing in more manufacturing in Australia and selling the value added end products. I would like to see more Australians making money out of Australian resources instead of almost giving them away to companies from other countries.

---

**Do you have any other feedback about the EIS that you would like to share?**

No.

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

No.

---

I am: a private citizen

I am - Other:

My position is: I support the development

Do you have concerns regarding the proposed development?:

What could be done to address your concerns?:

I'm writing to say that as a South Australian I support this project and the efforts of the Malinauskas government to encourage the development of projects vital to Australia and the western nations' renewable energy security. I welcome this proposed site of Renascor Resources.

just submitted the survey Environmental Impact Statement with the responses below.

**Your name**

---

**Your email**

---

**Your postal address**

---

**What is your relationship to the project?**

Local community member

---

**The proposed BAM facility will be the first of its kind in South Australia.**

**To what extent do you support the construction of the BAM facility?** Definitely support

---

**The proposed location for the BAM facility is Robinson Road, Waterloo Corner, adjacent SA Water's Bolivar Wastewater Treatment Plant. This site was selected based on various criteria including land availability, water and power supply, land use zoning, and proximity to freight routes.**

**What are your thoughts on this proposed location?**

The location is ideal due to the proximity to the required amenities while also being away from residential areas.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

Industry in SA is in a steep decline with no sight of a turn around for awhile to come. Economic pressures have already resulted in job cuts, beginning with onesteel in whyalla. Bringing these skilled workers back to adelaide will be good for the community and add value to a sector currently under distress.

---

**Do you have any other feedback about the EIS that you would like to share?**

We cannot allow money to come before the enviroment. From what I've read, The due diligence has been done and I see no issues with the company conducting business. It is good to see that due to the sites position, the company can use existing infrastructure reducing carbon footprint and the usage of water from the Bolivar treatment plant is a good move too.

**What are your thoughts on this proposed location?**

Perfect position, taking advantage of all the transport and infrastructure

---

**The development site is surrounded by various horticulture, agriculture and commercial businesses.**

**Do you have feedback on how the BAM facility may interact with existing industry and business in the area?**

The sight will improve all facets of road and connectivity for farmers and businesses.

---

**The facility is expected to create approximately 200 construction jobs, and approximately 200 ongoing jobs once the facility is built.**

**What are your thoughts on the benefits that the facility will have for the local community and South Australia?**

Jobs, economic benefits, long term country support and limits sovereign risk.

---

**Do you have any other feedback about the EIS that you would like to share?**

No

---

**Do you have any other feedback or information that you would like to share about the proposed development?**

Supporting environmental Critical minerals for the sustainable future

---
