Subject: Planning Code

Dear Minister Knoll

I belong to to of the many community groups attempting to make a submission on the draft planning code.

I am also a professional planner, so these groups are asking me to help with their submissions.

It is challenging for professionals to understand the code impacts, let alone lay people.

We therefore thank you for extending the implementation deadline but urge you to make time for the code to be reviewed a second time by Councils and community members before it is implemented.

The failure of your department to respond to feedback to date, and the numerous errors still in the code makes this an imperative, if the community and construction industry is to have trust in successful implementation of the code.

Thank you

Stephanie Johnston
